APPENDIX	1053

NOMINATIONS OF HON. MADELYN R. CREEDON TO BE PRINCIPAL DEPUTY ADMINISTRATOR, NATIONAL NUCLEAR SECURITY ADMINISTRATION; HON. BRAD R. CARSON TO BE UNDER SECRETARY OF THE ARMY; AND DR. WILLIAM A. LAPLANTE, JR., TO BE ASSISTANT SECRETARY OF THE AIR FORCE FOR ACQUISITION

THURSDAY, JANUARY 16, 2014

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:34 a.m. in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Nelson, Udall, Hagan, Gillibrand, Donnelly, Kaine, King, Inhofe, Ayotte, and Blunt.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nominations of: Madelyn Creedon to be Principal Deputy Administrator for the National Nuclear Security Administration (NNSA); Brad Carson to be Under Secretary of the Army; and William LaPlante, Jr., to be Assistant Secretary of the Air Force for Acquisition.

We welcome our witnesses and their families. We extend our gratitude to the family members in particular, who are so critically important for the support of our nominees through the long hours that they work and the countless demands on them as a result of their careers in public service.

To our witnesses, during your opening statements please feel free to introduce your family members and others who are here to support you today.

Each of our nominees has an impressive record in public service. Ms. Creedon has served in positions of distinction throughout her time in Government service, positions including the Assistant Secretary of Defense for Global Strategic Affairs; Assistant Administrator of the NNSA for Defense Programs; General Counsel for the Defense Base Closure and Realignment Commission; and a trial attorney in the Department of Energy (DOE); and of course, as counsel to this committee for over 17 years. I think we're all familiar

with her deep knowledge of and passionate commitment to the national security of our country.

Mr. Carson was a member of the House of Representatives representing the Second District of Oklahoma from 2001 to 2005. In 2008 and 2009 he served on Active Duty with an explosive ordnance disposal battalion in Iraq and was awarded the Bronze Star for his service. Mr. Carson is currently serving as the senior-most legal advisor in the Department of the Army, the Army General Counsel.

Dr. LaPlante began his career in the Johns Hopkins University Applied Physics Laboratory. He remained at the university for over 25 years. During that time he held a variety of positions, including the Department Head for Global Engagement and Associate Department Head of the National Security Technology Department. Dr. LaPlante has been a member of the U.S. Strategic Command Senior Advisory Group, the Naval Research Advisory Committee, and the Defense Science Board. He is currently the Principal Deputy Assistant Secretary of the Air Force for Acquisition.

When they're confirmed—usually I say “if confirmed,” but I'll be very optimistic this morning, so I'll say “when confirmed”—Ms. Creedon will take on a key leadership role in the Nation's nuclear security apparatus, while Mr. Carson and Dr. LaPlante will help to guide the Army and the Air Force through the challenging fiscal environment that we now face and will face even more so in the Department of Defense (DOD).

We look forward to the testimony of our nominees and hopefully to their confirmation, and we now call on Senator Inhofe.

STATEMENT OF SENATOR JAMES M. INHOFE

Senator INHOFE. Thank you, Mr. Chairman. Let me first repeat what I've told those who are here at the table before the hearing. Unfortunately, my effort to segregate the two committees of the Environment and Public Works Committee and the Armed Services Committee has been unsuccessful again. We're simultaneously having a meeting upstairs two floors, so I will be going back and forth.

I will use your characterization of “when confirmed” also.

Ms. Creedon, it's nice to see you again. It's very rare that you get someone who has such a deep background and interest in this. You're predictable, and we appreciate that very much. Congress remains committed to the nuclear modernization promises that were made back when they were getting the votes for the New Strategic Arms Reduction Treaty (START) and I will be asking some questions about that.

Secretary Hagel said earlier this month in Wyoming, and this is a quote, he said: “We've got some work to do on modernization and we're going to invest in the modernization we need to keep that deterrent stronger than it's ever been. And you have my commitment to do that.”

That's a quote by Secretary Hagel and I was very glad to hear that. When confirmed, you'll play an important role in overseeing the efforts to meet these modernization commitments. NNSA's successful execution and implementation of the nuclear modernization program will be essential to avoid delays in cost growth. This will

require the NNSA to implement changes in its organizational culture and improve the way it manages programs.

I'm happy to see my good friend Brad Carson here from Oklahoma. I told him in my office yesterday that Joe Westphal has been one of my best friends long before he had the position that Mr. Carson's going to be confirmed in. He was also from Oklahoma. He taught at the Oklahoma State University. So as long as we keep Okies in that position I'm happy about it, Mr. Chairman. [Laughter.]

When I served on the House Armed Services Committee, I remember—I think I told you this story—that my last year on the House Armed Services Committee would have been 1949—1994—[Laughter.]

Anyway, at that time I remember we had witnesses that said in 10 years we'll no longer need ground troops. I think we know that now, that we have some real serious problems. We talked about the drawdown, reducing the end strength from 490,000 to 420,000. No matter how many smart politicians, Pentagon officials, or academics you put around the table, you will never be able to predict the future and what our needs are going to be.

Discussions are also ongoing about future mix of Active and Reserve component forces that will have far-reaching implications for the future of the force and its ability to meet our national security needs.

Dr. LaPlante, the past several years have been challenging for the Air Force's acquisition community. The lack of accountable leadership is one of the reasons for recent failures, including the cancellation of the Expeditionary Combat Support System (ECSS), a program that lost \$1 billion in taxpayers' dollars. Additionally, questions remain if the Air Force will be able to perform an audit by September 30, 2017.

Other critical programs, such as the Long-Range Strike Bomber, are just beginning and ensuring an achievable and affordable acquisition program will be critical to maintaining our Nation's nuclear triad and conventional global strike capabilities.

Now, given your experience—and I really appreciate the time that you gave me in the office to go over things. I really believe that you have the background where you are going to be able to try some new things.

Specifically, I have a chart that I've already explained to you, that we want to be sure that we explain to this committee. I'm looking forward to working with you and with all of those who are before us today.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Senator Inhofe.

We'll now call upon our witnesses for their opening statements. Secretary Creedon.

STATEMENT OF HON. MADELYN R. CREEDON, TO BE PRINCIPAL DEPUTY ADMINISTRATOR, NATIONAL NUCLEAR SECURITY ADMINISTRATION

Ms. CREEDON. Thank you, Chairman Levin, Ranking Member Inhofe, distinguished members of the committee. I'm honored to be here today and grateful to President Obama and Secretary Moniz

for nominating me to be the Principal Deputy Administrator at the National Nuclear Security Administration.

I would also like to introduce and thank my husband, Jim Bracco, for being here today, but mostly for his patience over the years, for putting up with the many long nights and weekends at work and away from home, and with my being late to more things than I ever want to count, but mostly for being enthusiastically supportive of this new challenge.

I want to thank my daughter Meredith and my son John, who have grown up to be incredible adults, for all of their support, even though today their support is virtual. I know that they will watch the Senate Armed Services Committee website tonight so that they can critique me in the morning.

I also want to thank my parents, who still live in Indiana, Marilyn and Richard Creedon. Through my dad's 35-plus years of service in the Army Reserve and my mom's unending commitment to volunteerism, they have instilled in me dedication to public service and a deep commitment to my country.

My over 30 years in Government service supporting national security have been a special privilege, and if confirmed to be Principal Deputy Administrator, I will have the honor to serve again with the dedicated and highly talented men and women of the NNSA. These men and women work every day to ensure that the U.S. nuclear deterrent remains safe, secure, and effective, to prevent the threats from nuclear proliferation and nuclear terrorism, and to ensure that our nuclear-powered naval surface ships and submarines can steam all over the world to secure our freedoms.

The NNSA has many challenges, but I have faith in the people of the NNSA and look forward to the opportunity, if confirmed, to work with all of them to address these many challenges. Just last week I had the pleasure of accompanying Secretary Hagel as he visited the NNSA's Sandia National Laboratory in Albuquerque, NM. While I was there in my role as the DOD Assistant Secretary and had been to NNSA sites many times, it was a wonderful reminder of the impressive work done by the men and women of the nuclear security enterprise.

The NNSA's work remains as important and impressive as it has ever been. Even in today's budget environment and with Cold War facilities decaying around the complex, the commitment of the NNSA remains strong. It is a privilege to be asked to continue in public service, and particularly to be asked to serve at the NNSA.

Maintaining nuclear security is a whole-of-government sport. The Departments of State and Defense, as well as Members of Congress and the personal and committee staffs, are all necessary to ensure a bright future at NNSA. If confirmed, I will work to ensure that this partnership remains strong.

In closing, I also want to thank Senators Reed and Nelson and Senators Sessions and Vitter for their work on the Strategic Forces Subcommittee when I was on the committee staff; and now Senator Udall for his support; and for all the continuing commitment to NNSA that all have given.

I look forward to this new challenge and to your questions, and I thank you for your support.

Chairman LEVIN. Thank you so much.

Now, Mr. Carson.

**STATEMENT OF HON. BRAD R. CARSON, TO BE UNDER
SECRETARY OF THE ARMY**

Mr. CARSON. Senator Levin, Ranking Member Inhofe, distinguished Senators of the committee: I do have a prepared statement that I would propose I submit for the record and instead speak a bit more extemporaneously and briefly.

Chairman LEVIN. That would be fine.

Mr. CARSON. I would like to thank President Obama for nominating me to this position and to the Secretary of Defense for his support of the nomination. It's been a great professional pleasure of mine for the last 2 years to serve as General Counsel to the Secretary of the Army, John McHugh. I look very steeply up to the example he has set. Joe Westphal, the Under Secretary, who Senator Inhofe has already mentioned, is a friend and a mentor as well. To Generals Odierno and Campbell, soldier's soldiers, combat leaders extraordinaire, people who are respected not only within the Army but far outside of it.

I have many friends here today from the Army's Office of General Counsel and from across the Pentagon, and I am grateful to be part of their team and to have been a small part of the effort in the Army to try to do some good things.

Of course, behind me is my wife Julie, who is an attorney herself, and she has sacrificed so much as I have pursued my own career, often at the expense of the things that she would have done for her own professional development. I am very grateful to her.

The Army is an amazing place, filled with extraordinary people. I'm reminded of this most when I see any soldier who is under the age of 35, because I know that each of them joined knowing that they would be sent almost immediately upon the completion of training to Iraq or Afghanistan. They joined not to avoid the fight, because they wanted to be in the fight at its very hottest moments.

The Army has sacrificed much: 4,843 casualties in Iraq, 2,401 as of today in Afghanistan, tens of thousands more wounded. All the Services have contributed much to these conflicts, but the Army has borne more than its sad share of those statistics. Perhaps even more notable, 15,000 Awards for Valor, 9 Medals of Honor, 30 Distinguished Service Crosses, and more than 600 Silver Stars. It is said when you go to Section 60 of Arlington National Cemetery you'll see all the Services well represented, but you can't overlook the contributions that the U.S. Army has made.

I think my background in law, politics, higher education, and business have well prepared me to be the Under Secretary of the Army. One thing I can assure the committee is that if I am confirmed I won't forget the example of those people I've mentioned and I will do my best to acquit myself in their honor.

I look forward to your questions.

[The prepared statement of Mr. Carson follows:]

PREPARED STATEMENT BY HON. BRAD R. CARSON

Thank you, Chairman Levin, Ranking Member Inhofe, and distinguished members of the committee. It is a significant privilege to be considered for the important role of Under Secretary of the Army, and I appreciate the committee's rigor and diligence as it considers my nomination. Before we begin, I would like to acknowledge

some of the many people who have played a part in this professional journey. I would like to first thank President Obama for demonstrating his continued trust in me with this second role in his administration. I am indebted to Secretary of Defense Chuck Hagel for his support and Secretary of the Army John McHugh for his strong example of leadership and management. I am grateful to Under Secretary Joseph Westphal for his mentorship. I would like to express my admiration for Chief of Staff of the Army General Raymond Odierno and his Vice Chief of Staff General John Campbell; it is only through close cooperation with military leaders that we can accomplish the Army's important work. I would like to recognize my current staff at the Army General Counsel's Office for their commitment to excellence and professionalism. I would especially like to thank my wonderful wife, Julie, who has been my constant companion and friend.

Since 2001, soldiers have completed more than 1.7 million deployments, with 4 in 7 deployments being to Iraq and Afghanistan. Every soldier under the age of 35 today joined up knowing one thing for certain: that as soon as training was complete, he or she would be shipped half a world away and into the fight. The Army has 6,000 soldiers who have spent, quite incredibly, more than 5 whole years in Iraq or Afghanistan, and tens of thousands more who have spent 3 or 4 years in the fight. But perhaps the best measure of the Army is found not in these statistics, but in these: since 2001, soldiers have earned more than 15,000 awards of valor, including 9 Medals of Honor, almost 30 Distinguished Service Crosses, and nearly 600 Silver Stars.

It is humbling to work among professionals of such strong will and high caliber, but I believe my education and professional experiences have equipped me well to lead them. In addition to the breadth of experience afforded by my current post as Army General Counsel, I believe that my extensive and diverse background within law, higher education, politics, and business, has imbued me with all the necessary tools, the acumen, and the judgment to serve faithfully as Under Secretary of the Army. I recognize the honor of serving in the Army and with the Army, and, if confirmed as Under Secretary, I assure you, I will be untiring in my efforts to sustain the confidence placed in me. I am thankful for your consideration and appreciate the opportunity to appear before you today, and I look forward to your questions.

Chairman LEVIN. Thank you very much, Mr. Carson, and thank you for mentioning Joe Westphal, too, and Senator Inhofe did as well, because he's a wonderful person who's done a wonderful job. I am glad you made reference to him and I should have actually done that when I introduced you.

Dr. LaPlante.

STATEMENT OF WILLIAM A. LAPLANTE, JR., PH.D., TO BE ASSISTANT SECRETARY OF THE AIR FORCE FOR ACQUISITION

Dr. LAPLANTE. Good morning. Thank you, Chairman Levin, Ranking Member Inhofe, and other members of this distinguished committee. Thank you for having the hearing and inviting us here to answer your questions.

I'd like to start by thanking President Obama, Secretary Hagel, Secretary James, and Frank Kendall for their confidence in having me as the Principal Deputy, as well as nominating me for the Acquisition Executive. I want to offer a special thanks to Frank Kendall and former Air Force Secretary Mike Donley for their especially persuasive powers to bring me into the Federal Government. I would not be here if it wasn't for them.

With me today is my family: my wife Joann, my two daughters Clair and Caroline, Nathan, my sister Lyn, and my nephew August, who is supposed to be in first grade in Illinois this morning, but instead is here. August, I hope this is worth the travel for you.

I have spent over 28 years, like many of you, around defense systems, technologies, acquisition programs, touching all aspects of those programs, all Services. This experience, along with the tenure on activities like the Defense Science Board, offers a first-hand

impression of the state and the challenges of defense acquisition. Of course, this has evolved and changed over the years, whether it was, for me at least, starting during the height of the Cold War in the mid-1980s, living through the drawdown and all that we went through in the mid-1990s with the lower force levels, the acquisition reform initiatives, as we called them, back in the late 1990s, the first decade of the 2000s with the wars and the rapid acquisition that we had to do, and where we are, of course, today, which up until extremely recently had significant budget uncertainties.

In all that time, like all of my colleagues who've been in those forums, I've formed impressions and opinions on the challenges of acquisition. Also, I come, though, from a community that desperately wants to make a difference. I come from a community that wants to find the game-changing technology, bring it to the warfighter, get it into production. I come from a community that wants to invent the clever way to do contracting so we finish a development contract on time. I come from a community that just wants to make a difference.

It's such an opportunity for me and a privilege to potentially be able to come into the Government and, if confirmed, be the Acquisition Executive. I'm under no illusions of the challenges in the system, of course. We've all seen the successes, we've all seen the misfires. I would say coming into the Pentagon, just in the last several months, I had my own impressions of what to expect. Many of those impressions were confirmed. I also found that there are nuances, of course, and subtleties that I had no appreciation for being outside the Government.

Finally and probably most importantly, I found some surprising successes, some good news stories, some positive indicators, some of which I was unaware of, that I think we can build upon. What I would pledge to this committee is, if confirmed, I will build upon those successes, those bright spots, those best practices. I will directly take on the areas that we know need help in terms of improving acquisition outcomes. I'll be transparent in doing so and be honest as I can be on the state of the programs.

Again, I thank the committee for having the hearing and for inviting me here to answer your questions. Thank you.

Chairman LEVIN. Thank you, Dr. LaPlante.

Let me now ask all of you the standard questions that we ask of our nominees. Have you adhered to applicable laws and regulations governing conflicts of interest?

Ms. CREEDON. I have.

Mr. CARSON. Yes.

Dr. LAPLANTE. Yes.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Mr. CARSON. No.

Dr. LAPLANTE. No.

Ms. CREEDON. No.

Chairman LEVIN. Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Dr. LAPLANTE. Yes.

Mr. CARSON. Yes.

Ms. CREEDON. Yes.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Ms. CREEDON. Yes.

Dr. LAPLANTE. Yes.

Mr. CARSON. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Ms. CREEDON. Yes.

Mr. CARSON. Yes.

Dr. LAPLANTE. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Ms. CREEDON. Yes.

Mr. CARSON. Yes.

Dr. LAPLANTE. Yes.

Chairman LEVIN. Finally, do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Ms. CREEDON. Yes.

Dr. LAPLANTE. Yes.

Mr. CARSON. Yes.

Chairman LEVIN. Thank you.

Yes? Yes, Senator Reed.

Senator REED. Mr. Chairman, I have to go to the Banking Committee. I want to just say how enthusiastic I am about the nominees. Their service to the Nation already has been spectacular. I look forward to their rapid confirmation.

I also want to commend the chairman on his attire today. He looks great in that West Point tie. [Laughter.]

Chairman LEVIN. Thank you, Senator Reed.

Senator REED. Finally, if we were as composed as August, we'd get more business done here in the Senate. That's all I have to say. Thank you, August.

Thank you, Mr. Chairman.

Chairman LEVIN. That puts a lot of pressure on you to stay awake. But you're allowed not to.

Okay, thank you, Senator Reed, very much.

Let's start with 7 minutes for the first round of questions.

First let me ask you, Secretary Creedon, the Air Force disclosed yesterday that 34 intercontinental ballistic missile (ICBM) officers were implicated in cheating on their monthly proficiency tests. In your current position as Assistant Secretary of Defense for Global Strategic Affairs, are you responsible for the oversight of training and equipping those personnel?

Ms. CREEDON. No, sir, I'm not. Those people fall within the military chain of command.

Chairman LEVIN. You are not in that chain?

Ms. CREEDON. Correct, I am not.

Chairman LEVIN. All right, so you are not involved in knowledge of this. You were informed about the same time we all were?

Ms. CREEDON. Yesterday.

Chairman LEVIN. That's totally understandable, given what your job is and the fact that you're not in the chain of command.

Secretary Creedon, let me ask you this about the NNSA, which has had a history of program delays and cost growth, particularly with its construction projects for new facilities. We, in the 2013 National Defense Authorization Act (NDAA), had a provision which establishes in the NNSA an Office of Cost Analysis and Program Evaluation (CAPE). My question is the following: If you're confirmed and when you're confirmed, will you work without delay in standing up that office?

Ms. CREEDON. Yes, sir.

Chairman LEVIN. The Department of Defense has a similar office to evaluate its programs. How do you envision those two offices working together on future projects?

Ms. CREEDON. Senator, the CAPE Office in the Department of Defense has been very helpful over the course of the past 18 months in providing assistance to the Nuclear Weapons Council in determining some of the costing for several life extensions, and they've also been very much involved with the NNSA, helping the NNSA come to grips with various costing methodologies both for life extensions and for construction projects.

I would hope, if confirmed, to be able to continue to draw on the expertise at CAPE, particularly for their costing experience, which is deep and extensive, as we set up a similar organization in the NNSA.

Chairman LEVIN. Secretary Creedon, the NNSA is a semi-autonomous agency in the DOE. Can you explain the relationship between the NNSA and the DOE in setting safety and security regulations?

Ms. CREEDON. Yes, sir. The statute that created the NNSA made it clear that the administration reports to the Secretary of Energy through the Deputy Secretary, and that the Secretary of Energy sets the overarching policies for DOE, including for the NNSA. The overarching policies and regulations that apply to the Department also apply to the NNSA. The NNSA does have authority to make modifications to those as necessary, should the Administrator make that decision.

Chairman LEVIN. Thank you.

Mr. Carson, the National Defense Authorization Act for Fiscal Year 2010 requires the Chief Management Officer of the Department of Defense to establish a plan to ensure DOD's financial statements are validated as ready for audit by not later than September 2017. The Secretary of Defense has established the additional goal of ensuring that the statement of the Department's budgetary resources is validated as ready for audit by not later than September 30th of this year. Is the Department of the Army in your opinion on track to achieve those objectives, particularly with regard to data quality, internal controls, and business process reengineering?

Mr. CARSON. Yes, Senator, the Army is on track to meet those goals. There's a lot of work still being done, many challenges to be faced, but we are on track to achieve those goals.

Chairman LEVIN. Will you take all the steps you can and all the ones that are available and needed, if confirmed, to ensure that the Army moves to achieve these objectives without an unaffordable or unsustainable level of one-time fixes and manual work-arounds?

Mr. CARSON. Yes, I will do everything in my power to make sure that happens.

Chairman LEVIN. Let me ask you now about the servicemembers who are wounded or injured in combat operations. I think the American people and every one of us believe that they deserve the highest priority from our Government for support services, healing, recuperation, rehab, evaluation for return to duty, and successful transition from Active Duty, if required, and then continuing support beyond retirement or discharge.

There's a lot of challenges, obviously, that remain, despite the enactment of a lot of legislation and a renewed emphasis over the last few years. Can you give us your assessment of the progress to date by the Army to improve the care, management, and transition of seriously ill and injured soldiers, as well as the support needed for their families?

Mr. CARSON. The Army's faced a great challenge over the last 14 years of conflict in meeting those requirements, but I think we are world leaders and are setting examples in every day making progress that will be followed around the world for decades to come. We are world leaders in this particular area. Our warrior transition units, the community-based warrior transition units, have been very successful in delivering basic care.

I've been involved with Secretary McHugh in ensuring the behavioral health diagnoses for the tens of thousands of returning soldiers who've had difficulties there are satisfied. We are better in burn care, in rehabilitation for people with traumatic injuries.

The Army has put forth a tremendous effort to meet this sacred obligation to our veterans and I think there are many lessons for other institutions to take from it.

Chairman LEVIN. Are you satisfied and will you take steps to ensure that sufficient facilities and services are available to the redeployment of troops that are coming home from Afghanistan, particularly in the area of reintegration, medical services, so that we can accommodate the increase in the soldier populations at their home stations when that occurs?

Mr. CARSON. I give you my word in that, Senator.

Chairman LEVIN. Thank you very much.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

I want to thank all of you for your willingness to serve, and your families as well.

Let me start with you, Dr. LaPlante. New Hampshire is very proud that the Air Force has selected Pease Air National Guard Base, the home of the 157th Air Refueling Wing, as the top National Guard base to receive the new KC-46A. We're very proud of that, and I wanted to get an update on where we are based on your position, your current position, and preparing for this hearing, and

your new position, on the status of the KC-46A. Is it on track? Are we going forward?

Dr. LAPLANTE. Thank you, Senator. The program is on track and this past year in September it completed a successful critical design review with the contractor, with Boeing, and completed that actually about a month ahead of schedule. The program has to date had no engineering changes on the fixed price contract in the development. A reminder, the Government's liability, if you will, in the program is capped under that fixed price arrangement.

We are on track to begin first flight of the KC-46 later this year. All indications are the program is going well. I would also like to call out the trainer that was competed for and selected by the Air Force, the trainer for the KC-46. The actual trainer came in about \$250 million under what the independent cost estimate was for that trainer. It's on track.

Senator AYOTTE. That is music to my ears and I'm really glad to know that that program is going so well and on track.

On another note, unfortunately I want to ask you about a program from December 2012, where the U.S. Air Force cancelled an information technology program called the ECSS, that it had been working on since 2005. The Air Force scrapped the program after putting in \$1 billion into the project, with no identifiable benefit to the military or taxpayers. There were also reports that the project would have required an additional \$1.1 billion to fix and the system wouldn't have been completed until 2020. That was obviously cancelled by the Air Force.

Based on your experience and your preparation for this hearing, particularly in the position you're going into, who is being held accountable in the Air Force for wasting \$1 billion of tax dollars into a failed Air Force acquisition program?

Dr. LAPLANTE. Senator, your characterization of ECSS and the history is correct. From the accountability perspective, the direct answer to your question is in 2011 and 2012 it's my understanding that the program manager for that program was removed and the program executive officer for that program was removed.

Having said that, do you believe that we have firm accountability in the acquisition system and are comfortable with where it is? I am not. I think it is something, should I be confirmed, that I will put extra emphasis on. But again, your characterization of ECSS is correct.

Senator AYOTTE. Why did it happen and how do we prevent it from happening again?

Dr. LAPLANTE. The best answer to why it happened from my perspective coming in to the Principal Deputy position and preparing for this hearing today was achieved by careful review of what's called the acquisition incident report. That report should be available, has been available for the committee. It was commissioned in the way a mishap, an airplane crash, for example, report would be done, where an independent team came in, did fishbone analysis, as they call it, failure analysis, interviews, and got to root cause.

It's very, very sobering reading. It identified about six fundamental root causes, which in my assessment were probably baked in, unfortunately, at the very beginning. I will go through a few examples.

There was a lack of appreciation of the complexity of the data, the data that was going to go into this business system. When you're going to an enterprise business system, of course, the commodity everybody uses is the data itself. Not understanding that data, not understanding how to get the quality of the data, was a foundational error in the program.

Then two other quick things, but there are more: Not having a good transition plan. In other words, going from these legacy systems, the as-is, to the to-be vision, in some ways the to-be vision is often the thing that's the easiest to come up with. That's where we all dream of having a nice, seamless enterprise business system. The hard part and the part that was not done well was understanding the way to get from where they were with these legacy systems and this data to that to-be. Just like when there's construction on a major highway you have to assume there's still going to be traffic and how's the traffic going to use the system, the user still had to use this as it was doing the transition.

Those are foundational errors that were baked into the program.

Senator AYOTTE. Here's why your position that you're going into in particular is so important and why this billion dollar loss disturbs me, as I know it disturbs all of us. The Air Force is proposing that all Active Duty A-10s be divested by 2016, plus the Air National Guard unit in Boise, ID, and that all Guard and Reserve units be divested by 2017, in order to save money in 2019. A billion dollars, that's about \$3.7 billion over the Future Years Defense Program.

I think of that and I think \$1 billion we lost on that, when we have the A-10s that are incredibly important for close air support, incredibly important for search and rescue, incredibly important to our men and women in uniform. In fact, General Odierno has said it's the best close air support platform we have today. Despite this effort to divest it, General Welch has said it is the best airplane in the world at what it does.

These are the things that you're going to be facing, that if we waste \$1 billion and then you come to us and say, divest a plane that our men and women, especially those on the ground, care about, they know, that it has saved lives. In your position this is very important that this not happen again, and we look for areas in the Air Force where you see this problem bubbling up, so that we can not waste taxpayer dollars and we can make sure that the dollars go to things that we know our men and women in uniform need.

Dr. LAPLANTE. Thank you, Senator. I appreciate your concerns on that particular platform. As we all know, there are very, very difficult force structure trades that are being made by the leadership and will be presented in the President's budget.

I would say what I'm learning in the short time on the job is it all costs money. It costs money to keep things, to maintain things. It also costs money actually to divest. I think there are some very difficult choices that the leadership is making with force structure, as you point out. I know the Air Force, I know General Welch, is keenly aware of your concerns, and that's the fiscal environment that they're facing, how to go to a different force structure.

Senator AYOTTE. I know my time is up, and obviously I do not believe that the A-10 should be divested, because I believe it's very important. It saves lives. But not just that. What we need to avoid, stepping back from it is, it's hard to say to the men and women on the ground, hey, we're going to eliminate the A-10, but we wasted \$1 billion on an information technology system.

This is where you all, focusing on being better, need to make sure that the resources we have go to where they need to go, you'll have a very important role in this new position. I look forward to working with you on that.

Thank you.

Dr. LAPLANTE. Yes, thank you, Senator.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Udall.

Senator UDALL. Good morning to all of you. It's terrific to see all three of you here. Secretary Creedon, I want to thank you for your long history of public service. You've taken on a lot of daunting assignments. This is another one for you. The NNSA is a vitally important agency. You are going to be responsible for some of our most sensitive and important programs. You really fit the bill in my estimation for the job that's in front of you. I'm going to ask you some questions about the job the assignment you have.

I'd be remiss if I didn't acknowledge my good friend Brad Carson. We served in the House together. He's a true patriot. If you look at Brad's biography, he's walked the walk, including deciding at a relatively old age, I think I can say, that he wanted to serve our country, went to Officer Training School, was deployed in Iraq if my memory is correct.

It's just fantastic that you're going to have this opportunity to serve us, Congressman, in the Army, along with our friend John McHugh, with whom we also served in the House. I'm full-throated in support of your nomination and look very much forward to voting for you to take on this important assignment.

Dr. LaPlante, I don't mean to ignore you, but I have close connections with both of the other nominees. Thank you for your willingness to serve as well.

I want to turn right to the NNSA, Secretary Creedon. Someone suggested that if we separated the nuclear enterprise from DOE we'd be better served. Would you share your thoughts on that debate and that discussion we've been having?

Ms. CREEDON. Thank you, Senator Udall, and thank you very much for those kind words. They're most appreciated.

Senator UDALL. They're well deserved.

Ms. CREEDON. Thank you.

Obviously, my views with respect to the NNSA at this point in time would be my personal views. But I happen to believe that the legislation that established the NNSA remains sound and that it's in the long-term best interests of the NNSA to be part of the Department of Defense. I think having a cabinet-level agency responsible for looking out for assisting with the NNSA is really incredible and essentially important, particularly as we look to the long-term budget debates that we know are going to continue in the future as the budget goes down.

That said, there are significant internal management challenges with the NNSA that the NNSA has to deal with. But I think these challenges can be dealt with within the flexibility provided in the statute and that, at least at the moment—and obviously, if confirmed I'll know a little better when I get back into the NNSA again. But at least at the moment, I haven't identified any legislative changes that I think are necessary.

Senator UDALL. Madam Secretary, if we could clarify for the record, you said Department of Defense. I think you meant Department of Energy.

Ms. CREEDON. Energy, I'm sorry. The Department of Energy.

Senator UDALL. You did mean Department of Energy?

Ms. CREEDON. I'm sorry, I did mean Energy.

Senator UDALL. Thank you for that, those insights. They're valuable because again of your broad experience.

I'd be remiss in my second question if I didn't ask you about the recent news reports about what happened in Malmstrom. Do you have greater concerns about larger systemic issues associated with our ICBM force?

Ms. CREEDON. Senator, from my observation sitting where I have over the course of the last 2½ years—and obviously, it's the military chain of command; I'm not in that chain of command—but it is very troubling. I think to me it's even more troubling for all of those men and women who really do have a commitment, who show up every day, who are dedicated.

As I mentioned in my opening statement, I had the opportunity to travel with Secretary Hagel and we also went out to F.E. Warren Air Force Base and went out to one of the launch control centers, talked to the crew. He then had a very long discussion with some of the folks out there. We had lunch with them, had some pretty good one-on-ones, talked to the 20th Air Force commander. They are so committed and they try really hard. They live in a very difficult environment, and we need to support them fully, and it's just a shame when there are just bad apples.

Senator UDALL. Yes. We're going to need to work on this, and I know you're committed to it and focused on it, as am I.

Let me turn to the Congressional Budget Office (CBO) number, \$350 billion. That's the estimate that we'll spend over the next 10 years on nuclear forces, I should say. That includes the NNSA programs. Do you think that's accurate? Could you mention what that investment's going to purchase for us?

Ms. CREEDON. Yes, sir. I think the CBO did a pretty good job. Obviously, determining the long-term costs of the entire enterprise depend a little bit on what you put in and what you put out. But I think CBO did a good job in getting what's really at the heart of the long-term challenges.

The NNSA challenges are with respect to both the modernization of the complex—there are two big facilities left to address. We need plutonium, we need highly enriched uranium processing facilities, and pretty much, NNSA needs assured, understanding, and reliable budgets. DOD's budget bow wave is coming in a few years and it really has to do with the modernization of the platforms and the delivery systems—the submarine, the bomber, and whatever is the

future of the ground-based strategic deterrent, in other words the next Minuteman III. Those are the bulk of the costs.

Senator UDALL. We're going to be working, I know, to do what's right to maintain our nuclear posture, but also keep control of costs. We just have to do that, and I know you agree.

Let me turn to Congressman Carson. I'd be interested in your thoughts about what's in front of you. I'd ask you the traditional question: What keeps you up at night as you anticipate taking on this important assignment?

Mr. CARSON. These are extraordinary times in the U.S. Army, where we are trying to manage coming out of two wars and the many problems that dealing with that, that retrograde of equipment and with soldiers who are transitioning back into either garrison life or returning to the civilian world, along with their families. That's an extraordinary challenge.

We have a difficult budget climate and we have a drawdown in forces, while at the same time still trying to meet the needs of the National military strategy, which are quite robust. It's that overall challenge of managing the Army that is a very difficult one.

Senator UDALL. You're up to it, I know, along with John McHugh.

Dr. LaPlante, if I might I'd like to use what time I have remaining—and I'll truncate my question. Basically, my question goes to the proposal that the Air Force has put forth that would involve developing an entirely new helicopter, given that we already have a series of machines, a group of machines, that I think get the job done. My concern is if we spend hundreds of millions of dollars so the Air Force has its own unique helicopter and at the same time we're cutting funding for the space surveillance systems and other vital programs, to me that doesn't fit.

I'd be curious to hear your comments on this.

Dr. LAPLANTE. In general, on items like new starts, whether for helicopters or airplanes, we're in an environment now where we're having to be very careful about starting anything new, and we're looking very carefully, as we should, at what the tradeoffs are between something new versus extending life, extending what we have.

I understand your concerns and I think in general the force structure decisions that the Air Force is currently making are going to be trading some of those very difficult things. I'll be happy to work with you further on.

Senator UDALL. I'd like to follow up with you in more detail.

Dr. LAPLANTE. Absolutely. Thank you.

[The information referred to follows:]

Once confirmed, I will set up a meeting with you to discuss modernization initiatives in greater detail.

Senator UDALL. Thanks again to the panel and thank you for your willingness to serve our country.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Udall.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

Ms. Creedon, in my opening statement I talked about our concern, and it's not just mine. Others have the same concern. In fact,

when the New START treaty was put in place, there were some commitments that were made and those commitments have not become a reality. When you are confirmed what would be your effort in terms of trying to reach the level that was agreed upon prior to the voting on the New START treaty?

Ms. CREEDON. Senator Inhofe, not only does the NNSA have substantial budget challenges in front of it, but so obviously does the Department of Defense in looking forward to the long-term modernization programs and investment programs to support the nuclear complex. The numbers that you're referring to are what have been referred to as in the 1251 report. At least with respect to the NNSA at the moment, the NNSA budget request for fiscal year 2014 was a little bit under the fiscal year 2012 1251 report and a little bit over the fiscal year 2011 1251 report.

One of the challenges I think that has occurred over time is some of the elements that were supposed to be covered by those funds have ended up costing more. It's caused a delay of the plutonium facility and also has caused a relook of the approach on the uranium facility.

Senator INHOFE. I really believe that if anyone can do it, you can do it. I think the main thing we want to hear before this committee is that you do have a commitment to do your best to try to get us on track for security purposes.

Ms. CREEDON. I absolutely do, Senator Inhofe.

Senator INHOFE. Mr. Carson, we talked in the office about you're inheriting a little bit of a mess in terms of end strength, and it's because it's the understanding that the Office of the Secretary of Defense believes the Army end strength should be reduced to 420,000 from 520,000 Active, and 315,000 from 358,000 on Guard, and then a comparable Reserve figure.

I know you've had some time to look at this, and you've also heard from the Chief of Staff of the Army, who's been quite outspoken on what his needs are. How are you going to handle that?

Mr. CARSON. It is a difficult challenge, of course. The Chief of Staff of the Army and the Secretary of the Army himself have talked about how the drawdown will make it more and more difficult to meet the many requirements that are placed upon the Army. There's really two questions there: What are the requirements that the Nation is going to ask of the Army, and what is the right size for the Army to meet those, and can the country afford an Army of that particular size?

Drawdowns are always very difficult. Maintaining the right grade play, the right mix of officers and enlisted members in the Army as you reduce by 30,000 or 50,000 members, maintaining soldier and family resiliency, keeping morale up, the transition of those soldiers who are leaving to go back into civilian life.

It's going to be a great challenge, both on these strategic questions as well as on kind of the personnel and readiness side, to make sure we manage this drawdown in a way that is equitable and does justice to the sacrifice of our soldiers over the last decade.

Senator INHOFE. It's tough, because you're going to hear from some of the uniforms that it could increase risk. Of course, risk is lives. It's a tough issue to deal with. I know you will do everything you can to try to make that a reality.

Dr. LaPlante, again thank you for the time that you gave me in my office. I have a slide that the Defense Advanced Research Projects Agency (DARPA), the Tactical Technology Office, put together in 2012 that shows from approximately 1975 to the present. You see the chart here. The blue line is where it would be with commercial aircraft. When you get into—everything's fine up through the F-117. Then with the F-18, the C-17, B-2, and the rest of them, you see what is going up. We had a chance to look at this.

[The information referred to follows:]

DARPA
Clear time trend in defense new start aircraft
developments

Senator INHOFE. The question I would want to ask you is, the last platform we didn't have a problem with was F-117. Have you had time to look? Do you have an analysis or an idea of, if we were able to do that, why that same can't be used as a model for some of the other platforms?

Dr. LAPLANTE. Yes, thank you, Senator. As it turns out, being a member of the Defense Science Board, we in fact looked at some of this in studying adaptable systems, in fact with DARPA's help, a few years ago. Part of that, we actually looked specifically at the F-117. A couple things I would offer that were in my view unique in listening and interviewing the principals who were there.

The first was that it was a very small group of empowered, what I would call today a cross-functional team. That is, the requirements, the user, if you will, the program manager, the systems engineer, the lead contractor, am I told it was on the order of six to eight people who were all empowered to make decisions, that were in a protected environment. It was a highly classified program, but it also had top-level support.

If you know some of the individuals that were there—and the one I happen to know, and some of you may know, is Dr. Paul Kaminsky, currently the Chairman of the Defense Science Board. He was in part of that time the program manager as an Active Duty colonel.

It was quite a talented team. When you listen to how they did it, it's remarkable. What it was, was it started with quick identification of what the hardest parts of the problem were, which in their case was the signature itself and getting it to fly, then going right to the prototyping and, if you will, experimentation to see if they could actually make this thing work.

They had accidents, as Paul will tell you. They had fatalities. But within about 3 years they were able to wring out some of the fundamental problems there and were able to go right into production.

There's two pieces to that which I think are lessons for us. One is the requirements side. Dr. Kaminsky will give the story of when he was the program manager he was pressured, if you will, by some of the leadership in the Services at the time of why the airplane could not fly in all weather: Why don't we add a radar so it can fly in all weather? Dr. Kaminsky knew that was going to be a very difficult challenge and he resisted. He said: "No, if we do that we're not going to have the airplane." He resisted it. He says to this day we wouldn't have that airplane if he had to put that radar on it.

Senator INHOFE. He had to do that first?

Dr. LAPLANTE. Yes. It was understanding the requirements, resisting changes to the requirements as needed, and an empowered team. It proves it can be done, and I think it should be an inspiration for all of us.

Thank you.

Senator INHOFE. I think that's a great answer. You certainly would be one of the rare persons who could make that a reality.

My time has expired. I'll wait a few minutes for the second round.

Chairman LEVIN. Thank you very much, Senator Inhofe.
Senator King.

Senator KING. Thank you very much, Mr. Chairman.

Ms. Creedon, the *Ohio*-class submarine is aging and we're getting to the point where we're talking about a replacement. Are there particular challenges as we deliver the new reactor for the upcoming *Ohio*-class replacements?

Ms. CREEDON. Yes, Senator. I would say the biggest challenge, frankly, is ensuring that there is stable and predictable funding with respect to that reactor. My understanding is the naval reactors program has the technology fairly well in hand at the moment, but it is a critical part of the success of that replacement submarine.

Senator KING. Is multi-year funding part of the answer?

Ms. CREEDON. Senator, I'm going to have to pass on that question. I will certainly look into it and get back to you. The NNSA part of it is the research and development part of it and so multi-year doesn't really fit with the research and development part of it. The procurement side of that is on the Navy side and so that's not an area of my expertise. I would have to get with the Navy and get back to you on that side.

[The information referred to follows:]

Additional options may exist to reduce program costs and risks associated with transitioning from the *Ohio*-class to *Ohio*-class replacement. The Navy is investigating various contracting and acquisition scenarios to increase efficiencies and reduce costs of construction.

Senator KING. You're talking about continuity of funding for the research side year to year?

Ms. CREEDON. I'm talking about the research side and the NNSA side, yes, sir.

Senator KING. Some predictable funding level from year to year is an important part of your being able to meet this challenge?

Ms. CREEDON. Yes, sir.

Senator KING. In your prior position you were working on countering weapons of mass destruction, nonproliferation. Do you see that as relevant experience to what you're going to be doing now?

Ms. CREEDON. Absolutely, sir. In my current job I have the policy responsibility for countering weapons of mass destruction at the Department of Defense, and the Department of Defense has primarily been focused on biological threats, chemical threats, and the NNSA has also been primarily focused on the nuclear threats. But there is also overlap where the two Departments work very closely together.

Between the Department of Defense and the Department of Energy, the NNSA, it's essential that the two Departments work together so that we handle all aspects of the threats from weapons of mass destruction that face this country.

Senator KING. It's somewhat out of the scope of this hearing, Mr. Chairman, but I woke up this morning suddenly thinking about what happened in West Virginia, which was an accident. But it certainly raises the specter of what if it wasn't an accident and how vulnerable we are and what that did to a third of the State of West Virginia by contaminating the water supply. It's a daunting concept.

Ms. CREEDON. It absolutely is, Senator. One of the things that right now in my current job I'm working on is a new strategy for

the Department of Defense for countering weapons of mass destruction.

Senator KING. Godspeed.

Mr. CARSON, we've all—I suspect we've all—I know I have heard from my governor and my adjutant general. I think one of the toughest issues we're going to face this year is the relationship between the Guard and the Reserve and the Regular Army. Do you have thoughts on how this force structure issue should be approached, how do we make sense of it, bearing in mind the interests of the States as well as the national interest?

Mr. CARSON. I think it is going to be a very vexing problem for us, and I think the only solution is to commit not to engage in Army fratricide about the Active component/Reserve component mix, but instead to work together in consultation with the governors, with the adjutant generals (TAG) in the States, with the National Guard Bureau, and the Department of Defense.

Everyone recognizes, myself especially as a reservist, that the Reserve components have played a heroic incredible role over the last 14 years of conflict, no longer simply a strategic reserve, but an operational asset to the Army and to the other Services, too. I don't believe we're going to go away from that, but we do have to look at the right mix as we come out of these wars, the right assets, what functionalities the governors, for example, would like to see in the Guard, what functionality we need to keep in the Active component, the kind of boots-on-the-ground dwell ratio.

These are all very difficult questions and there's no one solution to it other than to say you must be committed to working with the various stakeholders in the States, in the Guard, in the Active component, and through leadership bring everyone together, because in the end, whatever differences we may have seem quite superficial given the commonality of interests that the National Guard, the Reserve component altogether, and the Active component have.

Senator KING. You see essentially a new analysis of needs and roles, as opposed to applying a rule of thumb of a ratio of two to one or three to two or whatever?

Mr. CARSON. The Chief of Staff has talked about the historic ratio of the Reserve component to the Active component of about 54 percent to 46 percent respectively. There's been some discussion by him in particular about maintaining that role going forward. I don't think it's a new analysis. People value the contributions that have been made by the Guard and the U.S. Army Reserve over the last decade, the last 15 years. It's taking what we've learned, taking that institutionalized knowledge, and then applying it for the rather austere budget climate we find ourselves in.

Senator KING. By new analysis what I meant is we can't just say because the ratio was 54 to 46 2 or 3 years ago that's what it's going to be ongoing. We have to stop and look and see, okay, what do we need and what are the roles.

Mr. CARSON. That's absolutely right. We have to look at what requirements we have in each of the components, and then resource them accordingly.

Senator KING. A second issue that we're going to have to struggle with is personnel costs. You know the figures that personnel costs are steadily eating up readiness and procurement and other parts

of the military. Congress learned about a month ago how difficult it is to even touch these issues.

Do you have thoughts about how we can deal with the personnel cost issues without causing a firestorm of concern among Active Duty and retired military? Should we do it all in a prospective way, which means we don't get the savings for a long time? How do we approach this?

Mr. CARSON. It, too, is not an easy matter.

Senator KING. "Not easy" is an understatement.

Mr. CARSON. It's particularly acute in the Army, though, because we are a people-centric Service, where about 46 percent of our budget goes to paying our soldiers. Those problems you talk about that are chronic in the Department of Defense are notable in the Army especially.

I do prefer approaches that don't prejudice the interests of people who have already made long-term commitments, whether it's retirees, whether it's people who are close to retirement. It is certainly better to start out on the front end, and those savings can be manifested over years. There are other ways to find savings.

But it's difficult—and this is my own personal view—to be making changes that are contrary to either the explicit or implicit promises we've made to servicemembers and for which they have made, set expectations for the future as well. Those are very difficult things to do, and to be avoided in the absence of profound countervailing benefits.

Senator KING. I completely agree. I believe you have an explicit or implicit contract. People have expectations and that's what's going to make this problem exceedingly difficult to deal with.

I'm almost out of time or I am out of time, but, Dr. LaPlante, I just want to call attention again to that chart that Senator Inhofe showed. If it takes 22 years to develop something from idea to completion in the private sector, you'd be out of business. That's just ridiculous. By the time you get finished, the technology's changed and you're almost by definition building something that's not state of the art.

I think the example of the F-117 is a good example. We have to figure out how to deal with that. It's just unacceptable to take 20 years to develop a new weapon system. I commend to you to keep looking at that prior example. In my experience it takes a small group who have the power and the authority to make decisions. The larger the committee, the lesser the results.

Dr. LAPLANTE. Yes, Senator, thank you, and I agree, and I look forward to working with you. Thank you.

Senator KING. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator King.

Senator Blunt.

Senator BLUNT. Thank you, Mr. Chairman.

Dr. LaPlante, on the A-10 issue that Senator Ayotte raised, I'm totally in agreement with the points she made. I would have made them if she hadn't and that might have been the principal thing that you and I would have talked about. But that's getting some attention, and it's particularly getting some attention based on the comments of General Odierno and others who understand the ground support that that particular plane provides. I hope that's

one of the things you'll look at very carefully, and I think you said you're going to do that. I just want to say I would have brought that issue up in more detail, but I think Senator Ayotte did a good job of covering our concerns about that.

Secretary Creedon, thanks for coming by one day this week to talk about this assignment. I think the principle thing I would just want to raise again here would be the importance of the transfer Kansas City facility to that new campus. Everything from moving a 6-ounce tool to an 87,000-pound piece of milling equipment has had to happen as part of that big transfer of what you're doing there.

Then once that transfer's completed, the other thing that I'd like you to comment on briefly is just the importance of what we do with the piece of property that the Federal Government has been on for half a century and now would be leaving, after all the work that's done there and all the kinds of left-behind problems that that work would mean would have to be dealt with.

Ms. CREEDON. Thank you, Senator. Yes, the new Kansas City plant, which goes by the acronym of KCRIMS [Kansas City Responsive Infrastructure, Manufacturing, and Sourcing], is a very important part of the modernization plan for the NNSA's nuclear complex. As you know very well, it's the electronics. But the real achievement with this new facility is that it'll be a much better place for the workforce to work and they'll be able to do the same work in half the space, and they get out of a building that they've been in since the late 1940s, early 1950s. It's a long time coming and it's definitely needed.

That said, after our conversation yesterday I've done a little more looking into it and the old Bannister Federal Facility that has both the General Services Administration, the NNSA, and other Federal entities in it, it will be a challenge in the future. It's absolutely something that, if confirmed, I will take on to make sure that in the end it is the best result for the community as well as for the NNSA to understand really how to deal and get rid of this old Federal facility in a way that's really beneficial.

Senator BLUNT. For my colleagues on the committee, this is a facility that, as the Secretary indicated, we've been at for 60, 70 years now. Lots of nuclear work is done there. By this point, it's pretty well located right in the center of lots of things and has great development potential, but only if the Government now deals with it in a way that allows somebody to in the future use it for that purpose. I'm pleased that Secretary Creedon understands that in the depth that she does, as did the nominee that had the agency that the committee reported out again just the other day after those names had to be dealt with another time.

Mr. Carson, nice to see you again. We served in the House together for 4 years in districts that were pretty close together and we were able to do some things there. This is an important assignment for a lot of the reasons you've already been asked about today in terms of restructuring the military.

While I'm in the mode of talking about Missouri facilities, I would just call your attention to Fort Leonard Wood, where General Odierno was in the last week. Secretary McHugh has visited there recently. I know General Odierno when he went to the chem-

ical school, the biological school, the radiological school, the nuclear school, all of which are there, said that this has unique possibilities, both because of the location and community support, to look at all of those homeland security applications.

As everyone does when they visit there, he mentioned the level of community support and how important this base is seen to the people that surround it. One of the neighbors, by the way, is the Mark Twain National Forest, which gives us even more capacity to do some things on the base that might in other places be seen as intrusive or troublesome. I wanted to call his visit to your attention, but Secretary McHugh, who you and I also served with in the House, has been there as well.

On the question that Senator King mentioned about the integrated armed services, I've seen some reports lately that there is a discussion of eliminating the Guard from the support services, the helicopter services, the Kiowa, the Apache helicopters—a lot of that has been done by Guard personnel, and a discussion that maybe that assignment would come back to the full-time force.

I don't know of any reason to believe that the Guard personnel that have done that haven't done an extraordinarily capable job there. I will just continue to look, as I think you may have already responded to, the importance of having that integrated Armed Forces and looking at any comments that General Grass and others in the Guard have to make about this.

But on the support generally of air support and other things that come to the Army from the Guard, do you want to comment on that?

Mr. CARSON. Certainly. It was a real pleasure serving with you in Congress. I had my home in Oklahoma, of course, just down the road from I know your home, and we worked together a lot on issues.

Senator BLUNT. Right across the border.

Mr. CARSON. I hope at Fort Leonard Wood we'll have a chance to visit that together and give me a good excuse to go back to our neighborhood.

As has been reported, part of the Army restructuring is going to look at the aviation, both in the Active component and the Reserve component, with the idea of streamlining it. We have a number of assets, like our TH-67 training helicopters, that have to be replaced or supplanted by another airframe. The aviation community wants to come to what they call glass cockpit dual-engine aircraft, which are better for training and have more uses. They want to save some money in operations and sustainment costs that they can put into the long-term projects for the future of vertical lift, for example, the next generation helicopters that may some day replace the Apache and the Blackhawk.

There is a restructuring that's being examined. There's been no final decision that I'm aware of on those kind of issues. As I was telling Senator King, I am confident that I will be a part of this process if confirmed to consult with the governors, the TAGs, and others to say, what functionality do you need in your National Guard aviation units, the 12 aviation brigades that are in the National Guard, what do you need here, so we can make sure that those requirements are satisfied.

Senator BLUNT. I would just suggest again that whatever you do there I think needs to, as you've already committed, to have the active communication with the Guard here, with the adjutant generals and the States, looking at the impact this has on the ongoing mission and recruiting capability and maintaining the numbers that these units have had, and look at the performance, as well as looking about whether that particular skill also continues to be a valuable skill for the States to have available in the State for the other work that the Guard does in addition to being able to be called up and used to support the full-time force.

I think this will be an issue that a lot of members, including me, will take very seriously as it comes up, and I know you will, too, and I wanted to raise it with you today.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Blunt.

Senator Gillibrand.

Senator GILLIBRAND. Thank you, Mr. Chairman.

Mr. Carson, I am very concerned about cyber security and in particular in recruiting and retention of cyber experts. In the NDAA for Fiscal Year 2014, I included language that would give career credit to newly commissioned officers with cyber security experience. If confirmed, what additional steps will you take to ensure that we're recruiting the best and the brightest into the field?

Mr. CARSON. It's a real challenge to recruit this highly in-demand skill set into the military, where our pay structure often can't compete with that of the private sector. We are fortunate that we've established relationships with some major universities, including the one I used to teach at, the University of Tulsa, one of three universities that is working closely with the military, with Cyber Command, the National Security Agency, and others to try to recruit and train people to come into the military.

These special programs like you mentioned can help do that. The Army has been fortunate that we have met most of the filling of the two new cyber brigades we've established. But it's going to be a continuing challenge for us, simply because these skills are so highly in demand.

Senator GILLIBRAND. Do you need any additional authorities to reach your goals?

Mr. CARSON. I'm not sure at this time we do need any authorities, but I will commit to you that General Cardon, who runs Army Cyber Command, could come in and talk to you specifically about what our recruiting status is and if we do need some kind of special provisions to allow that.

Senator GILLIBRAND. That would be helpful.

I authored a bill last year called the Cyber Warrior Act, which leverages the talent pool that already exists within our National Guard, and because of the National Guard's dual mission it's an ideal place to attract those individuals. They might be working at Google by day and could be a cyber warrior for their Service on weekends and when their commitments are due.

However, I've heard that this idea isn't as well received as it might be because they think that it needs to reside within DOD and focus should be on Active, not Reserve, forces. My question is, please explain why, if you did create these units with a dual status,

it would be detrimental to the Army and the overall goal of protecting our Nation against cyber attack?

Mr. CARSON. I don't think it would be detrimental. That skill set needs to be in both the Active component and the Reserve component without doubt. I think some of the interesting ideas for recruiting—for example, the Navy has allowed direct commissioning of officers who had unique skill sets who didn't have time to spend 4 or 5 months in training and they spread it out over time. These are the kind of things we're going to have to look at for our cyber warriors, if you will.

But the skill set's going to be needed in both the Active component and the Reserve component, and I don't think that anyone's denigrating the service of the Reserve community cyber community in any way.

Senator GILLIBRAND. Okay.

Dr. LaPlante, I'm concerned that we aren't able to move as quickly as we need to to get the best, most cutting edge technologies, particularly in the cyber theater. What changes would you propose in terms of implementing or improving Air Force's cyber acquisition strategy?

Dr. LAPLANTE. Of course, being cyber, there's many aspects of the problem. Let me first talk about the cyber resiliency part and then I'll talk about the tools side.

What we need to do, and we've just begun it in the Air Force, but much more work needs to be done, is bring the life cycle part of the acquisition system together with the program executive officers and to begin to, if you will, first understand what the cyber vulnerabilities are in your weapons system. While that sounds simple, it's actually quite difficult, depending on what level of threat you're talking about. Then, when you understand what it is, begin to put in what the mitigations are.

The mitigations can be technical, but it's also important to remind ourselves that mitigations can be just a different way to operate the system. Very simple what I just said, but it's a very complex endeavor and, if anything, also because of the way programs buy things. We buy things by weapons systems, yet cyber works by being connected. You're only as good as your weakest link, if you will, for a weapons system.

We've already begun that. But I would say there's much more work to be done there. Related to that, we're beginning to come up with what I would call the beginnings of cyber resiliency metrics. That is, things that we can give almost in a requirements way to the program to say, you will build this system to this resiliency against that threat.

But what I do think the Air Force and in fact the other Services continue to need is flexibilities in dealing with implementing new information assurance requirements. One of the concerns that a lot of us have is that as we continue to learn more about what the cyber threats are and we build up, let's say, the requirements for building information assurance into the system, by the time it actually gets to a program office it may be 2 years later.

Senator GILLIBRAND. Right. That's part of the problem.

Dr. LAPLANTE. That's part of the problem. We know what was a problem 2 years ago—

Senator GILLIBRAND. Is not a problem today.

Dr. LAPLANTE.—is not a problem today, and what's a problem today we didn't even imagine 2 years ago.

Senator GILLIBRAND. Right.

Dr. LAPLANTE. Anything that will help us build the resiliency and get the compliance part of the system to be much quicker in reacting and not just do the normal push out information assurance would be very helpful.

Senator GILLIBRAND. I think you need to, and I think you need to make recommendations about how to do that and change protocols accordingly.

Dr. LAPLANTE. Yes, and I'd be happy, if confirmed, to work on that, work on that with you.

Senator GILLIBRAND. Turning to mental health, Mr. Carson, the issue of mental health, including the stigma surrounding post-traumatic stress disorder (PTSD), as well as the rates of suicide in our Services, is critical. I receive monthly suicide data and I am very, very disheartened to see the number of servicemembers who fall through the cracks in our system. If confirmed, what are your plans to improve suicide prevention in the Army? What will you do to ensure the Army is providing appropriate mental health care to the servicemembers and their families?

Mr. CARSON. It is a major priority of the U.S. Army, it has been for the last couple of years, to improve our suicide prevention programs and forestall suicides within the ranks among veterans who have served in the U.S. Army. We have about 125 to 180 suicides per 1,000—or for I guess 100,000 serving—125 to 185 suicides per year of Active Duty members. That rate of 25 or so, 22 to 25 per 100,000, is in excess of what you find out in the civilian population at large.

It comes from a number of fronts. We've put in together comprehensive soldier-family fitness programs, readiness and resilience programs. We have suicide prevention hotlines. We have suicide education standdowns. There is an almost heroic effort to try to deal with this problem, a problem that's difficult to understand and to grapple with and has many different causes and is almost unique in each circumstance.

A major part of that, though, is about our behavioral health treatment, whether it's reducing the stigma associated with getting care and admitting to having behavioral health conditions. Secretary McHugh has been a real leader on this in how he's treated PTSD and making sure diagnoses are uniform and fair and making sure that we're out in the community educating people.

It's a multi-front war against suicide, but the Army is seized of this issue and realizes it is a matter of paramount importance.

Senator GILLIBRAND. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Gillibrand.

Senator Kaine.

Senator KAINE. Thank you, Mr. Chairman. To all the witnesses, I appreciate your service.

Mr. Carson, in June the Army announced its plans to integrate women into combat roles, opening up positions within 27 brigade combat units. Then there are other initiatives under way, including

the Soldier 2020 initiative to examine the specifications for different billets within the Army.

If you could just talk about the status of the Army's plans to integrate women into combat roles, I'd appreciate it.

Mr. CARSON. Absolutely. We have 147 mission occupation specialties that are not including those that are in the Special Forces and under their control. Of those, 133 are open to women today. There are 14 in the combat arms, combat engineers, that are not open to women.

You have really two efforts going on. One is to look at those 14 military occupational specialties (MOS) and establish occupational requirements for it, to revalidate those. The Army Research Institute, the U.S. Army Medical Research Environmental Medicine Institute, working with the Training and Doctrine Command, are all doing that kind of work. Over the next few months, in anticipation of the deadlines set for us by the Secretary of Defense, we'll be talking about what the requirements are to serve in those particular MOSs.

At the same time, of course, we have the direct ground combat exclusion of women. Even if it was in one of the 133 eligible MOSs, you couldn't necessarily serve in a combat unit or one that was closely associated with it. We are in the process right now of opening up all of those, of notifying Congress about those. Over the next few months we'll be opening up 33,000 positions across the Army to women in those so-called closed positions.

We're working on both the closed occupations and the closed positions.

Senator Kaine. Great. Thank you.

One program I've been impressed with in the Army is the Soldier for Life program. My first bill, which was enacted as part of the NDAA, was the Troop Talent Act of 2013, which largely focused on the credentialing of Active Duty service personnel for the skills they obtain with credentials that are meaningful in a civilian workforce, designed to help folks get traction quicker as they move back into the private workforce.

Could you talk a little bit about efforts under way and your focus on that issue to assist either in Soldier for Life or more broadly in the sort of credentialing work that's being done within the Army?

Mr. CARSON. I think working on these issues of soldiers who are transitioning out into civilian life are extraordinarily important ones and ones I will be very committed to work on as the Under Secretary. The veterans unemployment rate is much higher than the national average. You just look at it in the unemployment payments that the Army is making. Ten years ago we spent about \$90 million a year on unemployment compensation. Today we spend \$500 million on unemployment compensation.

We're trying to deal with these problems through a number of innovative programs, working with the Department of Labor, others, the Veterans Opportunity to Work program, the Army Career and Alumni programs, Soldier for Life, working with private sector employers, to where we have close relationships so they know the quality and the skills that soldiers have.

There's a number of programs. Again, it's a multi-front war on this problem, and I promise as the Under Secretary I'll both con-

tinue and work with you and others who are interested in these issues, because that transition is a difficult one for many soldiers and in an era of downsizing of the Army those programs are going to be among the very most important ones that we have.

Senator KAINE. Thank you for that.

Secretary Creedon, I think a question was asked on this topic before I came in, dealing with the recent controversy over the exam and how that's being done. I know some of the military personnel in charge of nuclear weapons are not directly in the oversight of NNSA, but there have been a number of incidents sort of touching upon this issue that raise questions about just the general morale level. These have come up in recent media reports about the Air Force.

Are you concerned that there's a lack of focus among officers within U.S. Strategic Command and how that has affected attitudes and focus within the NNSA, and in particular what do you see yourself doing to contribute to a morale uplift? I know there's been an awful lot of reports of low morale within some of these personnel MOSs.

Ms. CREEDON. First, Senator, I have to certainly share the disappointment with the announcement that came out yesterday with respect to the Air Force. That said, the vast majority of the Air Force as well as the Navy nuclear folks—and I know it's probably not well known, but there is also a really incredible cadre of Army nuclear folks, known as Army 59s, that, even though the Army doesn't have nuclear weapons, they play a key role in just making sure that the complex runs smoothly.

But nevertheless, morale is a huge problem. I think it's something that hurts most those who do the job best and who are mostly committed to it, and that's something that I really want to make sure, at least within the context of the NNSA, if confirmed, that the NNSA sees that they are highly valued, they're essential to maintaining a strong, effective, secure deterrent, and that they really do play a key role. I think sometimes they don't think that the nuclear deterrent is always valued.

Senator KAINE. Thank you for that.

Dr. LaPlante, a parochial question. The Ballston area in Northern Virginia is a real concentration of Government offices connected to research, so DARPA, the Office of Naval Research (ONR), the Air Force's Office of Scientific Research, National Science Foundation, some work done down at Defense Geospatial Intelligence Agency. What are your views about how the Air Force can work together with DOD and these kind of allied Federal research institutions to do more research and development as we face the budgetary challenges that we're all familiar with?

Dr. LAPLANTE. First, I would say I know Ballston well. If anybody has been with ONR, DARPA, or the Defense Science Board, you're actually spending time in Ballston all the time. We all know Ballston well.

In general, obviously, the science and technology, particularly in the times that we are in, where we're drawing down, is, if anything, even more important. Regardless of the geography of it, science and technology is a priority for the Air Force and for being the superior force in 2020, 2023.

I would pledge that any community outreach, any geography issues that the Air Force has, whether it's in science, technology, or others, we will engage the local community and we will be open-minded and transparent in what we do. But again, without committing to anything, I am a fan of the concentration in Ballston because I've experienced it myself. I would commit to being transparent with anything that the Air Force does.

Thank you.

Senator KAINE. Just quickly, you indicate as we draw down these scientific and research investments will become even more important. Could you just explain what you mean by that? I think I know what you mean, but I'd like to make sure.

Dr. LAPLANTE. Sure. I think it goes somewhat as follows: that when we're bringing force structure down, when we're beginning to look at what is essential versus what's not essential, what we've always relied upon in the United States is having a superior, a technological military. We're not going to change that.

What does it mean in today, 2014, to think about what it will mean to be technologically superior 10 years from now? It's going to come very, very fast. I was on a study just a few months ago on 2030 technologies. 2030 is 16 years from now. 1998 doesn't seem very long ago.

We have to be doing that work now. We have to be doing it in addition to perhaps something we haven't done before, which is technology scan. The breakthroughs may be international. They may not be domestic. This is the time, in my judgment and many other people's judgment, that we have to be emphasizing science and technology, for that reason.

Chairman LEVIN. Thank you, Senator Kaine.

Senator Donnelly.

Senator DONNELLY. Thank you, Mr. Chairman.

I want to thank all of you for your service to our country. Secretary Creedon, I want you to know everyone in Indiana is very proud of you and what you've accomplished.

Mr. Carson, it is nice to see another Blue Dog alum here and we wish you the very best.

Dr. LaPlante, you're not from Indiana, but we're still proud of you.

Congressman Carson, the first question I want to ask you is about suicide prevention. It is something that we all have worked very hard on. I certainly have had a big focus on this. It is part of the defense bill that we moved forward that we have a study that's coming out in February as to how to best aid our men and women who serve in the Armed Forces.

One of the areas that we had worked on in our office was to try to, as part of the physical health assessments that's made of each soldier each year, that a mental health assessment be made, and that we talk to the commander of each individual, who is there and who sees them every day, who can tell if there's changes, and also do some screening.

We're supposed to get that report back in February from the Office of the Secretary of Defense as to how this will work moving forward. We would like to work with you, with the Army, obviously with all of the branches, but as someone with the Army, to try to

help us in this process, because we've lost more young men and women to suicide than in combat last year.

I want to know the Army's—I shouldn't say willingness; I'm sure you're willing. But we'd love to have you as a great partner in this effort to try to end this scourge.

Mr. CARSON. I can assure you you will have our very much utmost partnership in this effort.

Senator DONNELLY. Additionally, Mr. Carson, you mentioned before 46 percent of the Army budget now is personnel. In your mind, is there a red line that we get to that, we can't cross that line in terms of that percentage that's dedicated to personnel, as opposed to equipment or other areas?

Mr. CARSON. That number is historically rather stable in fact, that while the Army budget has fluctuated over time, that 45, 50 percent is being spent on military personnel, not including our civilian personnel, is more or less stable in the Army budget. I think that's a good number. We are a people-centric Service. We spend much more than the other Services do on our soldiers, and that number is probably going to be one we try to maintain.

Senator DONNELLY. Do you see it remaining in that neighborhood, that percentage, as we move forward? Because I know there's concern, for instance with the Navy. Where it was one third, it's about half now. Unless some changes come through in the future, you're heading up towards two-thirds. Do you see it in the Army as being a stable number?

Mr. CARSON. I think we will budget to try to make it a stable number. That means we have to make cuts in number of people, let's say, or in other areas, try to make this all balance, because the Army has a view of what a balanced Army budget looks like, the amount we spend on procurement or research and development. But we are greatly concerned, and the Chief of Staff has spoken quite eloquently about this, about the inexorable rise of compensation costs, whether it's health care benefits, whether it is pay raises, benefits, these kinds of things.

I know Congress is very interested in this question. We are as well, because as the most people-centric Service to keep that number stable we do have to get a handle on that increasing slope of compensation.

Senator DONNELLY. Secretary Creedon, don't take offense at this, but I want to invite Mr. Carson and Dr. LaPlante to Crane Naval Warfare Center. You're invited as well, but these two for very specific reasons.

Dr. LaPlante, we do a lot of work on counterfeit and counterfeit detection there in terms of parts and supplies and equipment. Naturally, in the position that we are hoping you are ascending to, what do you see as your role in preventing the introduction of counterfeit parts into the Air Force process?

Dr. LAPLANTE. I would tie counterfeit parts, unfortunately, as part of the broader cyber resiliency issue. What we typically talk about is we talk about the supply chain, and that is understanding for our weapons systems where we're getting the parts and that in fact these parts are truly what we think they are.

I would view the counterfeit part issue in terms of the job I'm nominated for to be part of building the resiliency into that system.

I think there are for selected military programs—we have gone to Trusted Foundries, as you may know. In my view there's a limit to how much you can do with Trusted Foundries, only because there's a certain throughput. But I think we're going to have to start to build resiliency into starting with our most critical systems end to end, and that's going to include looking at the supply chain and the parts.

Senator DONNELLY. I was wondering if you are a proponent, as I am, of more aggressive forensic measures, because, as you said, we certainly hope they are from trusted suppliers or whatever, but constant spot check or determination on a lot of what we come through, because of the critical nature of making sure these parts are reliable and perform as advertised.

Dr. LAPLANTE. Absolutely. We talked earlier about science and technology. I think this is an area that we should be investing in in science and technology, noninvasive ways of doing surveillance testing on large populations of ships, for example, to detect anomalies and things that are in there, Trojan horses, whatever. I think that is an active, important area of research that we should be doing.

Senator DONNELLY. Secretary Creedon, you have done so much work in the nuclear area and in keeping our Nation safe. Just recently we went through some challenges with North Korea. As we look forward, looking at the government that they have there, the actions that have been taken there—and I'm not asking you to be an expert on all things North Korean, but what do you think are the key steps in making sure that we're able to continue to move forward, continue to counter that threat, and what do you think are the things that they respond to more than anything?

Ms. CREEDON. Senator, from my current position one of the things that we've been very instrumental in is ensuring that the United States is well protected from whatever the North Koreans end up doing with respect to the development of their long-range missiles, as well as their short-range missiles, which are a threat to the theater and to our forces over there.

We've been very instrumental in March with respect to the Secretary's announcement to expand the capacity and the capability of the ground-based strategic deterrent, to add 14 additional ballistic missile defense interceptors at Fort Greely in Alaska. The challenge now is to continue to improve those interceptors so that they become safe and efficient.

From a nonproliferation, counterproliferation, proliferation perspective with respect to North Korea, it's absolutely essential that we do everything possible to prevent them from achieving their goals in their program, from getting the materials, the technologies. Whatever it is that they need to advance their program, we have to work to be able to prevent them from getting those things; also with respect to making sure that our allies in the region also feel that our extended assurance and deterrence is secure and viable. I think we did that too not too long ago when we had the B-52 flyover of the Korean Peninsula.

I think all of these things need to continue to press forward so that we maintain a good posture with respect to North Korea.

Senator DONNELLY. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Donnelly.

We will have a second round. We can have perhaps 3 minutes for the second round. If we need a third round, we will.

Senator Donnelly raised an issue of counterfeit parts and I want to make sure, Dr. LaPlante, that you are aware of the investigation, which was a very extensive investigation that this committee held, into counterfeit parts. Millions, literally millions of counterfeit parts, have found their way into our weapons systems. I would hope that you would find out what we had to say, that you would study what we did in the 2012 defense authorization bill, mainly in the area of holding the contractors accountable for those parts and accountable for the correction of those parts.

We've had a lot of effort now on the part of some contractors to change our law and to not hold them accountable. But hopefully that's not going to happen. We would urge you to read this report. It's a pretty disturbing report. Mainly the source is Chinese. We looked at the electronic parts, where they rip apart old computers, take the parts and wash them, put new numbers on them. They do it openly. It's quite an amazing operation that they're running there, and we're going to do everything we can to stop it, at least as far as weapons systems are concerned.

Dr. LAPLANTE. Senator Levin, I know about the report. I will definitely review it carefully, and I consider it extremely important. As we say, it's part of that broader cyber issue. I look forward to working, if confirmed, with you on that. Thanks.

Chairman LEVIN. Mr. Carson, when you take this position you will become the second Chief Management Officer of the Department of the Army. It's only a few years ago that we said that the position that you'll be confirmed to is the Chief Management Officer. We did this in 2007 out of frustration with the inability of the Military Departments to modernize their business systems and processes. We chose to have the Under Secretary serve concurrently as Chief Management Officer because no other official in the Department of the Army other than the Secretary sits at a high enough level to cut across all the stovepipes and to be able to implement comprehensive change.

We hope that you will make modernization of the Army's business systems and processes a top priority.

Mr. CARSON. I assure you I will consider it a very top priority.

Chairman LEVIN. Do you think you have the resources and the authority needed to carry out the business transformation of the Department of the Army?

Mr. CARSON. I do.

Chairman LEVIN. If you find out that that's not true, for whatever reason, you would let us know?

Mr. CARSON. Yes, of course.

Chairman LEVIN. Thank you.

Senator Blunt.

Senator BLUNT. No, thank you.

Chairman LEVIN. All right. Then Senator King or Senator Kaine?

Senator KING. One brief follow-up. Mr. Carson, I don't expect you to have this data at hand, but perhaps you could supply it. I'd be interested in knowing, in that personnel cost figure that you were

talking about, the breakdown within that figure of Active Duty versus retired in terms of costs, of health care, retirement. Do you see what I mean?

Mr. CARSON. Absolutely. I will get that to you, Senator.

Senator KING. I appreciate that. Thank you.

[The information referred to follows:]

Army retiree expenses are paid into the Department of Defense's retiree accrual fund, and the fund distributes payments to retirees. In fiscal year 2013, the Army paid about \$7.1 billion of the approximately \$61.1 billion in its military pay budget to the retiree accrual fund. This represents about 11.6 percent of the Army's military pay budget in that fiscal year.

Chairman LEVIN. Senator Kaine?

Senator KAINE. No additional questions, Mr. Chairman.

Chairman LEVIN. All right. Again, we thank you, thank you all, for your service and for what you're embarked upon in the new positions that you'll be confirmed to. We thank your families, your supporters, particularly August. You've done a wonderful job, and I know how important it is to an uncle to have a nephew or a niece there by his side or her side. I only have one nephew, a lot of nieces.

But it's a good thing that you skipped school today. Don't do that too often, though. This has to be a special occasion. But we again know how important it was to your uncle that you be here today.

We will stand adjourned, and we will move these nominations as quickly as possible—even quicker than usual in the Senate these days.

[Whereupon, at 11:12 a.m., the committee adjourned.]

[Prepared questions submitted to Hon. Madelyn R. Creedon by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. Section 3141 of the National Defense Authorization Act for Fiscal Year 2002 stated that the Principal Deputy Administrator shall be appointed "from among persons who have extensive background in organizational management and are well-qualified to manage the nuclear weapons, nonproliferation, and materials disposition programs of the administration in a manner that advances and protects the national security of the United States."

What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have had over 30 years of experience in a variety of executive and legislative branch positions. In addition to my current position as an Assistant Secretary of Defense, I have served in management positions at the Department of Energy (DOE), including as the first Deputy Administrator for Defense Programs at the National Nuclear Security Administration (NNSA). I also served as the General Counsel of the 1995 Base Realignment and Closure Commission. I was honored to serve for many years as a member of the staff of the Senate Committee on Armed Services with responsibilities directly related to those of the Principal Deputy Administrator of the NNSA.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Principal Deputy Administrator?

Answer. If confirmed, I will focus on understanding the many specific responsibilities and interactions that are necessary to ensure that I can effectively carry out the duties of the office of the Principal Deputy Administrator of the NNSA. I firmly believe that there are always actions that I can take to improve my ability to perform successfully in any position. That said, some of the key areas on which I will focus are program and project management execution, safety and security, maintaining science excellence and ensuring that the NNSA meets its national security commitments.

Question. Section 3141 goes on to state that the Principal Deputy Administrator “shall perform such duties and exercise such powers as the Administrator may prescribe, including the coordination of activities among the elements of the administration.”

Assuming you are confirmed, what duties and functions do you expect that the Administrator of the NNSA would prescribe for you?

Answer. While there is currently not a permanent Administrator in place to provide guidance to this question, history would indicate that the Principal Deputy would, among other duties and tasks, focus on the internal workings of the NNSA, the budget, and interactions with Congress and other departments and agencies.

Question. Are there any special projects or assignments on which you will focus?

Answer. If confirmed, I would expect to work closely with the Administrator to identify specific projects and assignments. I would also expect that some projects would focus on restoring the trust in and credibility of the NNSA.

MAJOR CHALLENGES AND PROBLEMS

Question. What is your understanding of the role that you will play in the overall administration of the NNSA, in the event that you are confirmed?

Answer. If confirmed, I would expect to be focused on the internal workings of the NNSA, the budget, and interactions with Congress and other departments and agencies. This would be consistent with the roles undertaken by my predecessors.

Question. In your view, what are the major challenges that will confront the Principal Deputy Administrator?

Answer. The challenges that will confront the Principal Deputy are the same that confront the NNSA itself. Implementation of the Nuclear Posture Review (NPR) and the President’s nuclear security agenda will be significant challenges, as will ensuring the continued safety, security, and effectiveness of the stockpile and maintaining a highly skilled, trained, and capable workforce at NNSA, its labs and plants. Doing all this under increasingly constrained budgets will be even more challenging. NNSA is midway through its first major life extension program and is beginning work on the second even more challenging life extension program. Two major manufacturing capabilities are in need of replacement, threats from nuclear terrorism and proliferation have become more complex, work is underway on a new reactor for the *Ohio*-class replacement submarine, and the amount of money available to address all of these challenges is decreasing. In addition, confidence in the management of the NNSA has been questioned.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed as Principal Deputy Administrator, I will develop close working relationships with key partners at NNSA headquarters and field offices, the labs and plants, with other relevant executive branch partners, and with Congress, to understand and address the various problems, issues, and concerns. I would work to establish clear expectations, clear plans and requirements, clear lines of communications, authority and responsibility, and generally work to restore the credibility of and trust in the NNSA.

Question. What do you consider to be the most serious problems in the performance of the functions of the Principal Deputy Administrator?

Answer. If confirmed, I will focus on those serious problems mentioned above. Resolving these problems will take time and the patience of NNSA stakeholders, as well as their support and partnership. Reestablishing these baseline relationships will be the key to success. If confirmed, I will work closely with the Administrator, the leadership of the NNSA and its operating contractors, and the whole NNSA team to achieve this goal.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. If confirmed, I will work with the Administrator of the NNSA and the whole NNSA team, as well as other departments and agencies, to identify, understand, and prioritize the problems facing NNSA, and to develop appropriate timelines to resolve these problems.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues that must be addressed by the Principal Deputy Administrator?

Answer. If confirmed, and working in conjunction with the Administrator, I would make reestablishing solid baseline relationships an overarching priority. I believe this can be achieved while working on the specific problems that face NNSA. In addition, if confirmed, I would also focus on ensuring that the highly-skilled and tal-

ented NNSA workforce is closely involved in identifying and resolving the many challenges that face the NNSA. An additional priority would be to establish stability in the program, budget, and workforce.

Question. If confirmed, how will you prioritize the NNSA's budget and management structure to ensure a safe, secure, reliable, and credible nuclear weapons stockpile for the Nation?

Answer. Achieving this goal will become increasingly more difficult in the face of declining budgets. As a result, focusing on improving NNSA's overall process to accurately estimate costs, establish clear program requirements, and execute those programs will be a priority of mine, if confirmed. I would expect to work closely with the Administrator, the NNSA leadership and the new Under Secretary for Management and Performance to achieve these goals.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Principal Deputy Administrator with the following Officials:

The Secretary and Deputy Secretary of Energy.

Answer. If confirmed, I would report through the Administrator to the Deputy Secretary and Secretary and represent the Administrator with these officials in his absence.

Question. The Administrator of the NNSA.

Answer. If confirmed, the Administrator would be my immediate supervisor.

Question. The Deputy Administrators of the NNSA.

Answer. If confirmed, I would serve as the immediate supervisor for the Deputy Administrators for Defense Programs, Defense Nuclear Nonproliferation, and Naval Reactors.

Question. The Assistant Secretary of Energy for Environmental Management.

Answer. Within the NNSA, the Associate Administrator for Infrastructure and Operations is the principal interface with the Office of the Assistant Secretary for Environmental Management (EM). If confirmed, I would interact with the Under Secretary for Management and Performance on EM matters, given that the Assistant Secretary for EM reports to that Under Secretary, as well as the Assistant Secretary.

Question. The Assistant to the Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs.

Answer. NNSA's Deputy Administrator for Defense Programs is the main counterpart to the Assistant to the Secretary of Defense for Nuclear, Chemical and Biological Defense Programs. If confirmed, I would represent the interests of the Administrator and the NNSA with this Deputy Administrator, as called for.

Question. The Chairman of the Nuclear Weapons Council.

Answer. The Administrator is the principle interface with the Chairman and the member of the Nuclear Weapons Council. If confirmed, I would represent and support the interests of the Administrator and the NNSA to the Chairman of the NWC as appropriate.

Question. The Commander of U.S. Strategic Command.

Answer. The Deputy Administrator for Defense Programs is the principal interface with the Commander of U.S. Strategic Command. As necessary, in the absence of the Administrator, I would represent the interests of the Administrator and the NNSA with the Commander in Chief of the U.S. Strategic Command.

Question. The nuclear directorates of the Air Force and Navy.

Answer. The Deputy Administrator for Defense Programs is the principal interface with the nuclear directorates of the Air Force and Navy. As necessary, I would represent the interests of the Administrator and the NNSA with these officials.

Question. The Associate Administrator of NNSA for Facilities and Operations.

Answer. If confirmed, I would serve as the immediate supervisor to the Associate Administrator of NNSA for Facilities and Operations (Infrastructure and Environment).

Question. The Associate Administrator of NNSA for Management and Administration (APM).

Answer. If confirmed, I would serve as the immediate supervisor to the Associate Administrator of NNSA for Management and Administration.

Question. The DOE Director of Health, Safety, and Security.

Answer. If confirmed, I would represent the interests of the Administrator and the NNSA as called for.

Question. The Under Secretary of Energy for Science and the Director of the Office of Science.

Answer. If confirmed, I would represent the interests of the Administrator and the NNSA as called for.

Question. The Defense Nuclear Facilities Safety Board.

Answer. If confirmed, I would represent the interests of the Administrator and the NNSA as called for.

MANAGEMENT OF THE NNSA

Question. What is the role of NNSA's Management Council and, if confirmed, what would be your relationship with the Council?

Answer. If confirmed, as the Principal Deputy Administrator, I understand that I would be the lead official of the NNSA Management Council.

Question. In your view, are there any changes needed to the management structure of the NNSA?

Answer. If confirmed, I would consult directly with the Secretary, the Deputy Secretary, the Administrator, and the Deputy and Associate Administrators regarding what changes need to be made to the management structure of the NNSA.

Trust is clearly an issue that remains a challenge within the nuclear security enterprise, between headquarters and the field. What may assist in addressing this issue is to further clarify lines of authority, responsibility, and accountability within the entire NNSA enterprise. I understand the Secretary has begun to address these management issues. It will also be critical to assess business processes to operate more efficiently as well as NNSA's capabilities for cost estimation and program execution.

Question. In your view are there clear lines of authorities and responsibilities in the NNSA?

Answer. I am aware of the relationships prescribed under the NNSA Act and know that governance of the NNSA will be a critical area to focus on if I am confirmed. I would expect to work closely with the Congressional Panel currently conducting a review of NNSA governance. I understand the Secretary has begun to implement reforms that would clarify lines of authority and responsibility specifically in the areas of safety and security across the Department to include the NNSA, and if confirmed would work to understand and implement these reforms.

Question. Do you believe that any changes are needed to ensure clear lines of authority and responsibility?

Answer. I understand the Secretary has begun to implement reforms that would clarify lines of authority and responsibility specifically in the areas of safety and security across the Department to include the NNSA. If confirmed, I would consult directly with the Secretary, the Deputy Secretary, the Administrator, and the Deputy and Associate Administrators regarding what changes need to be made to the management structure of the NNSA.

Question. As Principal Deputy Administrator, how will you address the findings and recommendations from the dozens of reports that have been published in the past 2 decades regarding management problems at NNSA/DOE?

Answer. I am very familiar with the many reports that have been published over the years identifying management challenges at DOE and NNSA. If confirmed, I will work with the Secretary and the Administrator to continue to tackle these challenges. I would also want to personally engage with the members of the Congressional Advisory Panel who have been charged with examining the governance structure, mission, and management of the nuclear security enterprise.

WEAPONS PROGRAMS WORK FORCE

Question. If confirmed, what specific steps would you recommend for the NNSA to retain critical nuclear weapons expertise, particularly design capabilities, in the Federal NNSA workforce and at the labs and the plants?

Answer. If confirmed, recruiting and retaining world class talent within NNSA's Federal and contractor workforce will be a priority of mine. As the Federal agency responsible for the management of the nuclear security enterprise, including one of a kind detection and forensic capabilities, I believe it is essential for NNSA to provide meaningful and challenging professional opportunities that attract and retain dedicated professionals. Central to this effort is fostering an enterprise-wide sense of purpose in NNSA's nuclear security mission. Particular attention must be placed on ensuring that, as the current NNSA workforce ages, the administration maintains partnerships with the academic and university communities through pipelines that encourage and attract the world's best engineers, scientists, and technical experts. Also key to the health of the Labs is maintaining the ability to utilize the independent research and development (R&D) funds.

Question. If confirmed, what specific steps would you recommend for the NNSA to ensure that adequate and appropriate technical skills are maintained in NNSA workforce and at the labs and the plants?

Answer. Successful Federal workforce planning is essential for NNSA to retain the appropriate degree of technical skills within the workforce. A combination of well-designed recruitment and internship programs, academic partnerships, continued collaboration with minority serving institutions, and outreach programs with the science and academic community is something I believe will remain critical to NNSA's laboratories and plants.

Question. In your view, what are the critical skills that are needed in the NNSA complex wide?

Answer. The success of NNSA's laboratories, plants, and facilities in large part relies upon the Federal and contractor workforce maintaining a diverse set of critical skills. Within the national security laboratories, as the fiscal year 2014 Stockpile Stewardship and Management Plan addresses, the critical skills and knowledge needed include nuclear design and evaluation, computing and simulation, manufacturing and fabrication, electrical, mechanical, and materials engineering, project management, nuclear criticality safety engineering and nuclear design code development. Many of these same skills are also essential for the nuclear nonproliferation, counterterrorism, and emergency response work of the NNSA. These are just some of the essential skills that underpin the important work across the NNSA complex and programs.

SAFEGUARDS AND SECURITY

Question. What role, if any, will you have in ensuring safety and security in the nuclear weapons complex?

Answer. If confirmed, the safe and secure operation of the nuclear weapons enterprise, personnel, and assets will be my top priority. I will work in partnership with the Administrator, and in accordance with the Secretary's vision to ensure a strong professional culture that values security and safety. This includes executing existing security and safety best practices and working with DOE and NNSA leadership to provide an operationally safe and secure complex. I will also collaborate closely with the Defense Nuclear Facility Safety Board (DNFSB) to ensure that NNSA appropriately applies safety best practices and policies throughout the nuclear security enterprise.

Question. In your opinion, what are the biggest safety and security threats to the facilities and materials in the nuclear weapons complex?

Answer. I understand the critical importance of maintaining safety and security at all NNSA sites. If confirmed, I will emphasize NNSA's commitment to proactively mitigate cyber, physical, materials, and transportation security threats, and ensure operational safety standards are met.

Question. What role, if any, will you have in ensuring operational nuclear safety in the nuclear weapons complex?

Answer. If confirmed, I will be committed to the safe and secure operation of the nuclear weapons enterprise and the dedicated professionals serving in NNSA's Federal and contractor workforce. I will work to ensure that NNSA sites, plants, and staff are properly equipped and trained to effectively execute all applicable safety and security standards and laws.

Question. What role, if any, will you have with the DNFSB?

Answer. If confirmed, I will work closely with the DNFSB on their recommendations. I am quite familiar with the DNFSB's statutory responsibility to review the design and ensure adequacy of operational nuclear safety controls at defense nuclear facilities. It is critically important for the NNSA to work proactively with the DNFSB early in the design and execution process so as to resolve any operational nuclear safety concerns that could later play a role in the eventual cost of the project.

STOCKPILE STEWARDSHIP PROGRAM

Question. What is your view of the Stockpile Stewardship Program's progress towards its goal of being able to continuously certify the U.S. enduring nuclear weapons stockpile as safe, secure, and reliable, without the need for underground nuclear testing?

Answer. The Stockpile Stewardship Program has been very successful to date in maintaining a safe, secure, and effective deterrent without the need for underground nuclear explosive testing. Some of the various experimental facilities that underpin the success of the program are the National Ignition Facility (NIF) at Lawrence Livermore National Laboratory; the Z machine at Sandia National Lab-

oratories; the Dual-Axis Radiographic Hydrodynamic Test Facility at Los Alamos National Laboratory; and the Joint Actinide Shock Physics Experimental Research Facility at the Nevada National Security Site. Underlying the success of all these facilities are the laboratory computational facilities. If confirmed, I will visit all the sites in the NNSA enterprise to meet the workforce and see the capabilities that assess the safety, security, and effectiveness of our nuclear weapons and the experimental tools that contribute to broader national security. I will work to ensure that these facilities are maintained so that the NNSA can continue to make the necessary certifications in the absence of underground nuclear explosive testing.

Question. In your opinion, what are the greatest challenges confronting the Stockpile Stewardship Program?

Answer. The greatest challenge that currently confronts the Stockpile Stewardship Program is an unpredictable budget environment. NNSA must balance planned life extension programs and infrastructure modernization investments while maintaining the scientific research and experimental capabilities required certifying the stockpile. I also believe that steady, continued investments in science and engineering at all of the sites remains a core requirement in order to maintain and attract the high quality staff essential to the long-term mission of maintaining the deterrent without returning to underground nuclear explosive testing.

Question. Do you fully support the goals of the Stockpile Stewardship Program?

Answer. Yes.

Question. In your view what additional capabilities will the Stockpile Stewardship Program need in the next 5 years?

Answer. I am not aware of any major additional capabilities required beyond those already described in the fiscal year 2014 Stockpile Stewardship and Management Plan, but requirements will have to be mapped against resource constraints. NNSA needs to have the means to ensure that new technical and policy expertise relating to nuclear policy is "grown" in NNSA as the nuclear workforce continues to age. It is also critical that NNSA have consistent and predictable funding.

LIFE EXTENSION PROGRAMS IN SUPPORT OF THE NUCLEAR POSTURE REVIEW

Question. As a result of the 2010 NPR, the Nuclear Weapons Council has laid out a schedule over the next 20 years that involves numerous demands on the NNSA, these are the B-61 life extension program, the interoperable warhead, the W-88/87 joint fuse program, the warhead for the long-range stand off weapon, in addition to the maintenance of the existing stockpile systems (W-88, W-87, W-76, W-78, B-61, B-83, and W-80).

What do you see as some of issues in this ambitious schedule that concern you?

Answer. In my current capacity as the Assistant Secretary of Defense for Global Strategic Affairs, I am very much aware that nuclear modernization work of this kind is expensive, technically demanding, and time consuming. The Nuclear Weapons Council has developed a strategy for managing the cost, scope, and schedule of these modernization activities. This strategy should help refine the concurrent nature of this work to better map our requirements, planned resources, and workforce capabilities. Of course maintaining the budget needed to achieve the strategy will be a challenge.

Question. Are you concerned this schedule is achievable if sequestration continues?

Answer. I am very concerned about the effect of sequestration and general budget constraints on this schedule. Consistent and predictable funding is essential to maintaining the planned schedule for such complex and technically challenging modernization programs. Given my experience at DOD, I am well aware how sequestration, as well as continuing resolutions, can cause crippling uncertainty for the people and the programs.

Question. The NNSA is in the early stages of an effort to develop an interoperable warhead for the W-88 and W-78 systems.

If the cost of the interoperable warhead become prohibitive would you support life extensions of the existing systems?

Answer. I believe that this decision would be in the purview of the Nuclear Weapons Council, which has full awareness of and the statutory responsibility to consider various technical, military, and budgetary options and issues.

Question. Do you support the current scope of the B-61 mod 12 life extension program?

Answer. Yes.

Question. Are you concerned about the overall cost of the B-61 mod 12 life extension program and if so what particular issues are of concern?

Answer. The B61-12 LEP was chosen as the option that meets military requirements at the lowest cost. If confirmed, I will continue the NNSA's commitment to a safe, secure, and reliable nuclear deterrent. This includes sustaining and maintaining the nuclear stockpile, and modernizing the nuclear infrastructure and delivery systems. The President has said that the United States will retain a safe, secure, and effective nuclear deterrent, as long as nuclear weapons exist. Modernizing the stockpile is essential to achieving that goal but will become more challenging in a constrained budget environment.

Question. The Senate Appropriations Committee has proposed a reduction of \$168 million to the President's fiscal year 2014 request for the B61 Life Extension program. What impact will this have on the B61 LEP in terms of cost and schedule? How might it affect other planned LEPs?

Answer. A cut of this magnitude would substantially delay the overall schedule and could jeopardize the overall effectiveness of the weapon system. A slip to the B61-12 LEP could also adversely impact the schedule for future LEPs.

OVERALL MANAGEMENT

Question. What is your view on the relationship and the relative duties and responsibilities of the Secretary of Energy as found in the Atomic Energy Act and the Administrator of the NNSA?

Answer. The NNSA Act states that the Secretary establishes overarching policy for the DOE and the NNSA and may direct DOE officials to review NNSA programs and activities. These DOE officials can then make recommendations to the Secretary regarding administration of the NNSA program and activities. Having served as the Deputy Administrator for Defense Programs during the first year of the NNSA, I have an appreciation for the critically important role of the Secretary in ensuring the mission of NNSA is successfully executed, and the need to work cooperatively with the other organizational units of the DOE.

Question. Do you believe that there are any organizational structure issues in the NNSA that should be addressed to improve management and operations of the NNSA, or that you would address if confirmed?

Answer. I believe the statutory structure of the NNSA is sound and that the primary challenge lies with implementing that structure. The challenges related to site security and major project management have been among the most significant. If confirmed, I will focus on implementing and then sustaining the reforms to security that have been put forth by Secretary Moniz and implementing additional reforms as needed. If confirmed, I will work with the Administrator, Deputy Administrators, Associate Administrators and the leadership of the NNSA facilities to build on improvements to NNSA's project management, program review, and cost estimation expertise. This collaborative effort will include creating an implementation plan to stand up NNSA's Office of Cost Estimation and Program Evaluation as directed by the National Defense Authorization Act (NDAA) for Fiscal Year 2014.

Question. The NNSA and DOE has been plagued by cost overruns and project cancellations related to the construction of nuclear facilities, nuclear weapons modernization programs, and nuclear stockpile stewardship facilities.

How serious are these cost overruns in your view?

Answer. Cost overruns are a very serious issue. NNSA is challenged in the coming years with a significant uptick in work activity related to modernization of the stockpile and responsive infrastructure. If cost overruns persist, NNSA's critically important mission could be adversely affected.

Question. What steps will you take, if confirmed, to ensure they are not repeated in the future?

Answer. If confirmed, and as I stated before, I will work with the Administrator, Deputy Administrators, and Associate Administrators to build on improvements to NNSA's project management, program review, and cost estimation expertise in an effort to ensure we are committing to work that can be delivered on time and on budget. This collaborative effort will include creating an implementation plan to stand up NNSA's Office of Cost Estimation and Program Evaluation as directed by the NDAA for Fiscal Year 2014.

Question. Do you believe that the expertise of DOE personnel serving outside the NNSA can be helpful to you if confirmed? If so, how do you expect to utilize this expertise if you are confirmed?

Answer. Yes. DOE relies upon an exceptionally skilled workforce at the laboratories, plants, and headquarters. If confirmed, I would enthusiastically utilize the world class expertise that exists throughout the complex to drive favorable outcomes to NNSA's toughest challenges.

Question. Are you aware of any limitations on your authority, if confirmed, to draw on that expertise?

Answer. No. I am not aware of any limitations on my authority, if confirmed, to draw on the expertise that resides within DOE. If, however, any are identified, I will work promptly with the Administrator, the Secretary and Deputy Secretary to resolve any issues.

Question. What is your view of the extent to which the NNSA is bound by the existing rules, regulations, and directives of DOE and what flexibility, if any, do you believe you would have in implementing such rules, regulations, and directives?

Answer. If confirmed, I will adhere to the NNSA Act, which sets forth the relationship between the DOE and NNSA. DOE and the NNSA have a unique partnership in order to ensure the integrity of the nuclear security enterprise. I anticipate working closely with the Administrator in conjunction with the Secretary, the Deputy Secretary and the other senior leadership throughout the Department to ensure the NNSA runs smoothly and efficiently.

ADVISORY BOARD

Question. The NNSA had an external advisory board, which included technical and other subject matter experts to provide advice to the NNSA. The charter for the board was allowed to expire. In your view is there any benefit to reconstituting an advisory board? Why or why not?

Answer. I believe there is great value gained by receiving advice and counsel from external groups comprised of subject matter experts. If confirmed, I will work with the Administrator to determine the most appropriate format to utilize outside expertise.

FACILITIES AND INFRASTRUCTURE

Question. DOE and the NNSA have looked at, and have in some circumstances used, third party or other alternate financing options for construction projects.

If confirmed, would you commit to review carefully any NNSA proposal to undertake construction projects with funding approaches that deviate from the traditional line item funding approach?

Answer. Yes. If the NNSA finds that third party financing arrangements are beneficial in the future, if confirmed, I would commit to ensuring that Congress is fully informed of all plans to use third party financing and that all projects are consistent with executive branch and statutory requirements.

Question. In addition, would you commit to keep the committee fully informed of any such proposals, to fully coordinate any proposal with the Office of Management and Budget, and to ensure that any such proposals include a business case documenting that any alternative financing approach is in the best interests of the taxpayer?

Answer. Yes.

Question. One of the goals of the effort to modernize the nuclear weapons complex is to reduce the number of square feet of building space.

As the NNSA proceeds with construction projects in the future, would you commit to support the goal, and work to include in the total project cost of any new facility the cost to dispose of any buildings or facilities that are being replaced?

Answer. Yes.

Question. In some instances the disposition of old buildings might be more appropriately handled by the Office of Environmental Management (EM). In your view under what circumstances should EM be responsible for the disposition and under what circumstances should the NNSA be responsible?

Answer. I support the current division of labor where EM disposes of facilities with process-related contamination (i.e. contamination not commonly managed in private sector operations, typically radioactive contamination) and NNSA disposes of all other facilities. I understand that discussions are ongoing between NNSA and EM to develop more specific criteria for transfer, and if confirmed as Principal Deputy Administrator, I would support this work to further clarify roles and responsibilities in this area. I recognize that the current inventory of process contaminated surplus facilities DOE-wide will require substantial time and resources to disposition and these process contaminated facilities tend to present higher risks than other surplus facilities, so I would support looking at ways for NNSA to complete prudent risk reduction activities while awaiting transfer to EM.

Question. Do you believe that clear criteria exist on which to make disposition determinations?

Answer. If confirmed, I will review carefully the existing criteria for their adequacy. If necessary, I will make recommendations to the Administrator to clarify relevant criteria.

Question. The Facilities and Infrastructure Recapitalization Plan (FIRP) was terminated in 2013. This program was intended to reduce the large backlog of deferred maintenance for NNSA facilities.

With the termination of FIRP, how do you believe NNSA should continue to address its backlog of deferred maintenance?

Answer. I understand, since the termination of FIRP, NNSA's deferred maintenance backlog has increased. If confirmed as Principal Deputy Administrator, I would support NNSA efforts to prioritize the existing resources and identify opportunities for enterprise-level solutions to reduce the maintenance backlog.

Question. As Deputy Administrator, how will you ensure the deferred maintenance backlog continues to be reduced?

Answer. If confirmed as Principal Deputy Administrator I will prioritize NNSA's existing resources and identify opportunities for enterprise-level solutions to reduce the maintenance backlog.

ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT

Question. What responsibility do you believe the NNSA should have for funding, managing, and disposing of its current and future hazardous waste streams and for future environmental restoration?

Answer. I believe that as the landlord of its eight sites, NNSA is responsible for managing and disposing of its current and future hazardous waste streams and ensuring that these operations do not create future environmental restoration obligations. Environmental restoration, however, is not a core NNSA capability—NNSA's responsibility is to ensure that EM, the partner DOE program with that core capability, and all NNSA stakeholders, including Congress, are aware of NNSA's requirements. This will require close teamwork and partnership between NNSA and EM. If confirmed, I will work to ensure NNSA and EM work together to meet these needs.

Question. What specific steps do you believe the NNSA should take to negotiate programmatic responsibilities for environmental activities between the NNSA and the Office of the Assistant Secretary for Environmental Management?

Answer. NNSA and EM are partners, each with their own core capabilities. NNSA works with its EM counterparts at all levels to ensure each understands the total requirement and how they will work together to protect workers, the environment, and the public. I think the division of responsibilities between NNSA and EM is well understood, but if confirmed, I will commit to review this relationship and to ensure its continued success.

Question. If confirmed, what role do you anticipate you will play in this process?

Answer. If confirmed I would work to ensure that environmental restoration, waste management, and facility disposition goals are included as appropriate in each relevant senior manager's performance goals, including mine, and are addressed in all strategic plans and budget submissions, and that each funding decision is fully informed by the risks it accepts.

DEFENSE NUCLEAR NONPROLIFERATION PROGRAMS

Question. In your view, are any policy or management improvements needed in the Defense Nuclear Nonproliferation Programs? If so, what improvements would you recommend?

Answer. NNSA's Defense Nuclear Nonproliferation (DNN) programs are vital to U.S. national security and are a first line of defense in reducing the risk of nuclear terrorism and proliferation. If confirmed, I would commit to working with the Secretary, Deputy Secretary, Administrator, and Deputy Administrator for Defense Nuclear Nonproliferation, as well as other strategic partners, to consider the future of the DNN programs as we move towards the goal of permanent threat reduction where possible, vice a prevention-focused approach. Great progress has been made to date on securing vulnerable nuclear material worldwide, but much work remains to address the nuclear terrorism and proliferation threat.

In this fiscally constrained environment, it will be critical to continue to move some of our foreign cooperative relationships from assistance to partnership. In addition, we need to engage our international partners to ensure that work completed to date is maintained and sustained.

Question. NNSA has significantly expanded its work in the Megaports program in cooperation with the Department of Homeland Security and to secure vulnerable

weapons usable materials worldwide, the Global Lockdown program, which is being implemented in cooperation with the Department of Defense (DOD).

If confirmed, would you commit to keeping Congress fully informed as to the success of, as well as any problems with these cooperative relationships?

Answer. Yes. If confirmed, I would commit to keep Congress fully informed of these cooperative relationships. From my current vantage point as the Assistant Secretary of Defense for Global Strategic Affairs, I see the tremendous interagency cooperation among the Departments of Defense, State, Energy, and Homeland Security, the Intelligence Community, the Nuclear Regulatory Commission, and the Federal Bureau of Investigation and if confirmed, I will work to ensure those important relationships continue. These relationships leverage expertise and resources and ensure there is no duplication of effort and no major gap in addressing the broad scope of nuclear security issues at home and abroad.

Question. The NNSA has responsibility for the bulk of the Federal Government's basic research on radiation detection technologies as well as other nuclear technologies, such as those used in nuclear forensics.

If confirmed, would you commit to undertake a review of the nonproliferation R&D program to ensure that it is adequately funded and fully coordinated with the activities of other Federal agencies?

Answer. I understand that an external review of the R&D program was completed in May 2011, and that the recommendations from that review have been implemented.

If confirmed, I will work with the Administrator and the Deputy Administrator for DNN to ensure these critical R&D activities are fully supported and coordinated.

Question. The NNSA nonproliferation programs have occasionally had implementation issues that have resulted in large carryover balances.

In your view is the management in place to implement the new Global Lockdown program and to ensure that the funds are spent in a timely and effective manner?

Answer. I understand there has been tremendous success in achieving President Obama's 4-year effort to secure vulnerable nuclear material worldwide but that much work still remains for the future. If confirmed, I will work with the Administrator and Deputy Administrator for DNN to ensure the continued implementation of the Global Lockdown program and that funds are spent in a timely and effective manner.

Question. If not, what changes would you recommend?

Answer. I am not in a position to recommend any changes at this time. If confirmed, I would discuss this further with NNSA and DNN leadership.

NATIONAL LABORATORIES

Question. The NNSA, as the steward of the three National Security Laboratories, has a responsibility to ensure that the labs are capable of meeting their broad national security obligations, not just those of the NNSA.

What is your view on the role of the three National Security laboratories in addressing broad national security challenges and the role of the NNSA in overseeing those activities?

Answer. The three National Security Laboratories have a unique role in ensuring a variety of national security challenges are met. Maintaining the vitality of the laboratories and sites and the core competencies of the workforce at each site must be a priority for the NNSA. NNSA laboratories and sites possess unique capabilities that other agencies utilize to serve their national security missions. Supporting these national security missions not only advances the Nation's security interests, but also exercises, challenges, and augments workforce skills and laboratory capabilities. In addition, there are often direct benefits back to NNSA's programs. I firmly believe in order to recruit and retain top-notch personnel you must provide them challenging and interesting work—including national security work—as well as world-class laboratory equipment and facilities in which to work. NNSA has a role to enable this kind of work and a responsibility to understand the benefits from these efforts. NNSA also has a responsibility to oversee the work of the laboratories to ensure they perform the work entrusted to them and they do so safely and securely.

Question. In your view are there any changes that are needed to facilitate or improve the work for others program at the three National Security Laboratories?

Answer. If confirmed, I will review the interagency work performed at the three laboratories and make a recommendation to the Administrator about any changes that may need to be made.

Question. The three NNSA laboratories are Federally Funded Research and Development Centers (FFRDC) run under a government-owned, contractor-operated model.

Do you see these laboratories as simply contractors, or partners in carrying out NNSA's mission?

Answer. As FFRDCs, the three NNSA laboratories have a special long-term relationship with NNSA. As such, they have access to information, equipment and property beyond that of normal contractual relationships and operate in the public interest with objectivity and independence, free of organizational conflicts of interest. The NNSA contractor operators of the labs and plants have special and unique national security responsibilities. NNSA relies on the technical expertise of the three laboratories as they are integral to the mission and operation of NNSA. I do, however, believe the relationships between Federal employees and the laboratories, as well as the plants, must be strengthened.

Question. Do you believe the directors of the three NNSA laboratories have a statutory duty to provide objective advice and opinions to Congress? If so, how will you ensure Congress receives such advice?

Answer. The directors of the three NNSA laboratories have a statutory duty to provide their advice and opinions to Congress as directed by various reporting requirements, such as the requirement at title 50 U.S.C. § 2525 to provide a Stockpile Assessment Report which is transmitted to Congress through executive agencies and the President. If confirmed, I will make sure these statutory requirements are carried out.

MATERIALS DISPOSITION PROGRAM

Question. The NNSA is responsible for implementing the U.S. commitment to the Russian Government to dispose of 34 metric tons of weapons grade plutonium. There are many issues and challenges facing the program including the fact that it is substantially over budget.

What role will you play in ensuring that all aspects of this program will be on schedule and on budget and if necessary to review alternative disposition technologies?

Answer. In my current capacity at DOD, I am aware that the Department is conducting a review of options for plutonium disposition and that the Secretary of Energy will make a determination on the path forward in the near future. If confirmed, I would work with the Secretary, Deputy Secretary, the NNSA Administrator and Deputy Administrator for Defense Nuclear Nonproliferation, other U.S. Government leaders, as well as our international partners to ensure that we are pursuing our commitments in the Plutonium Management and Disposition Agreement with Russia and that the Secretary's guidance is implemented.

Cost overruns are always a concern but even more so in today's fiscal climate. If confirmed I will work with the Administrator to implement the Secretary's decision effectively and efficiently.

NATIONAL IGNITION FACILITY

Question. The National Ignition Facility (NIF) supports nuclear weapons experimental work but also has the capability to support a broad range of science and energy research challenges.

If confirmed, what role, if any, will you play in ensuring the success of the NIF and to ensure that NIF is fully utilized?

Answer. If confirmed, I will support the Administrator in maintaining NIF as a central part of the NNSA enterprise. It is an essential facility for understanding our nuclear weapons stockpile in the absence of nuclear explosive testing to ensure a safe, secure, and effective nuclear deterrent. NIF also contributes important capabilities to basic science and energy research.

Question. What are the future implications to the facility and the stockpile stewardship program if NIF does not achieve sustained ignition?

Answer. The work at NIF is vitally important to ensuring the safety, security, and effectiveness of our nuclear weapons stockpile. All of NIF's experiments contribute to our knowledge of nuclear weapons characteristics and, in turn, to implementing our stockpile stewardship program.

Question. Do you believe NIF should be utilized primarily to support stockpile stewardship activities, energy research, or basic science?

Answer. NIF was built as a stockpile stewardship tool and I support its use to maintain the stockpile.

CONTRACTOR-OPERATED FACILITIES

Question. What recommendations, if any, would you make to improve oversight of and contractor management of the facilities in the nuclear weapons complex?

Answer. Before making any specific recommendations, and if confirmed, I would review the existing system to understand the existing oversight methodologies. As needed I would then work to ensure that there are clear lines of authority, responsibility, and accountability for both Federal and contract staff; that performance expectations are understood to achieve mission requirements in an efficient and effective manner; and that there is a strong emphasis on strengthening the safety and security culture. I understand that NNSA is making headway in its efforts to hold its contractors accountable for performance, particularly in its capital construction projects. I would hope to build upon these early successes.

Question. In your view what is the role of the NNSA field offices in the oversight of the contractor-operated facilities?

Answer. The NNSA field offices, as the first line of oversight, are best positioned to recognize potential issues before they become problems. For them to be successful the partnerships between headquarters and field and between Federal and contractor employees must be strong.

Question. Do you believe that recent problems contractor-operated facilities have resulted from too little government oversight?

Answer. The Department has been criticized for both too little and too much oversight in regards to contractor-operated facilities. Before I take a view on the problem in specific instances, I would need to evaluate the situation in greater detail. I understand that NNSA is working to improve oversight mechanisms, to include clarifying roles, authorities, and functions for the organization. If confirmed I would work to ensure that the right balance of oversight for the specific activity is achieved and maintained.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Principal Deputy Administrator?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees in a timely manner?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR SAXBY CHAMBLISS

MIXED OXIDE FUEL

1. Senator CHAMBLISS. Secretary Creedon, in his fiscal year 2014 budget request, the President sought to end the Mixed Oxide Fuel (MOX) Fabrication Facility at the Savannah River Site. Is this an opinion you share and would you recommend lowered funding for MOX in the upcoming budget cycle, if confirmed?

Ms. CREEDON. The Department is committed to the U.S. Plutonium Disposition mission and to fulfilling its obligations under the U.S.-Russia Plutonium Management and Disposition Agreement. However, the U.S. plan to dispose of surplus weapon-grade plutonium by irradiating it as MOX fuel has proven more costly than anticipated. As described in the fiscal year 2014 budget request, the administration

is conducting an analysis of disposition technology options to determine how best to complete the mission.

I understand that the analysis has not yet been finalized. If confirmed, and in conjunction with the Secretary, Deputy Secretary, and Administrator, I commit to work closely with Congress to ensure the United States meets its plutonium disposition obligations.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

DEPARTMENT OF ENERGY INSPECTOR GENERAL REPORT

2. Senator AYOTTE. Secretary Creedon, according to a January 2014 Department of Energy Inspector General (IG) report on the National Nuclear Security Administration's (NNSA) Management of the \$245 million Nuclear Materials Safeguards and Security Upgrades Project (Phase II) at Los Alamos National Laboratory, the project "suffered from a number of project management weaknesses." As a result, the report said "the project will be delayed by approximately 1 year and will require an additional \$41 million more than anticipated to complete." Can you address this IG finding?

Ms. CREEDON. The Nuclear Materials Safeguards and Security Upgrade Project (NMSSUP) is a project that upgrades security at Los Alamos National Laboratory's (LANL) Technical Area-55, a facility that houses high-security plutonium assets and operations. I understand the project is scheduled to be completed in the spring of 2014. The original Total Project Cost (TPC) for NMSSUP was \$245 million. The NMSSUP project is currently tracking to deliver at or below the original TPC.

In April 2010, the original TPC was reduced to an estimated cost of \$213 million. This was done without a thorough understanding of the risks and based on unreliable Earned Value Management System data. In September 2012, LANL issued stop work orders to contractors due to ongoing quality concerns with construction, and in October 2012, LANL suspended work on the project because the expected cost would exceed the \$213 million budget.

Subsequently, after NNSA's Office of Acquisition and Project Management (NA-APM) was established, project management responsibility and accountability was transferred to NA-APM by the NNSA Administrator and the Acquisition Executive. In January 2013, LANL proposed increasing the TPC to \$254 million; however, NA-APM rejected that proposal and instead reached an agreement wherein the contractor would absorb \$10 million of the overrun. As a result, the revised TPC became \$244 million, \$1 million below the original TPC.

3. Senator AYOTTE. Secretary Creedon, how will you ensure there are no more delays or cost growth in this project?

Ms. CREEDON. I understand that NNSA has taken actions to foster an improved culture of responsibility and accountability for delivering work on time and on budget. Some of these reforms that have been administered by NA-APM have included hiring a new Federal Project Director (FPD) with Level 3 project management certification. NNSA provided the new FPD with full Contracting Officer's Representative authority. The FPD was also given additional Federal and contractor support to execute his responsibilities. A new highly qualified contractor project manager was also put in place on the NMSSUP project.

My understanding is that the NMSSUP project is currently in acceptance testing. The total project cost will not be known until the project is accepted. I understand that NNSA intends to ensure that the contractor is held accountable for any defects and charged accordingly as NNSA previously did with the \$10M in unallowable costs.

The NMSSUP project represents a significant cultural change for the NNSA. NA-APM and the NMSSUP Project Team demonstrated that with the right team, focused attention to detail, and top to bottom leadership involvement even a troubled project can be righted when clear expectations are set and all parties accept accountability for their role in project delivery. If confirmed, I will work to ensure there is a successful conclusion to this and all other projects.

NATIONAL SECURITY LABORATORIES

4. Senator AYOTTE. Secretary Creedon, in your responses to the advance policy questions, you discuss the health of our three national security laboratories. You say that, "Maintaining vitality of the laboratories and sites and the core competencies of the workforce at each site must be a priority ..." In the past, I have heard con-

cerns about the loss of expertise and core competencies of our national labs supporting our nuclear deterrent. Do you share these concerns?

Ms. CREEDON. I am concerned about retaining critical skills at the laboratories and sites because it's the people that enable the laboratories and sites to deliver the best products for national security. If confirmed, I will face this challenge head on by ensuring NNSA's talented and highly skilled workforce—contractor and Federal—is sustained through effective workforce recruitment, mentoring, and development. This workforce is the NNSA's chief asset.

5. Senator AYOTTE. Secretary Creedon, if you do share these concerns, what is causing this problem?

Ms. CREEDON. There are competing factors that stress our critical skills. As we move further from the end of the Cold War, our ability to recruit topflight talent into a nuclear weapons program is increasingly challenging, as nuclear weapons are not viewed as an attractive [long-term] career. Over time the number of scientists with certain skills, such as testing, has significantly decreased as it has been 20 years since the last nuclear test. I am most concerned that we ensure that the laboratories and facilities are able to attract the best and the brightest, and that the experiences are passed to the next generation so that they can further develop the skills needed to maintain and certify the stockpile in the absence of testing. Key to evolving the skills and attracting the top talent to maintain the stockpile of the future are the facilities, computational, and experimental capabilities to ensure the generation charged with this responsibility will have the skills to undertake the responsibility. If confirmed, I will examine how to strengthen NNSA's ability to attract and retain the next generation of scientists and engineers needed to accomplish the mission.

6. Senator AYOTTE. Secretary Creedon, how serious is this problem?

Ms. CREEDON. I believe the ongoing erosion of the workforce is a serious problem that demands an immediate and long-term strategy at the Department. If confirmed, I intend to focus on this important challenge.

7. Senator AYOTTE. Secretary Creedon, what can we do about this problem?

Ms. CREEDON. This challenge must be met through workforce planning to ensure that the Department is recruiting and then retaining professionals with the core competencies, knowledge, and technical expertise NNSA needs to execute its mission. We also have to make sure that the NNSA, its laboratories and facilities are seen as and are the best place to be working in the fields that are most critical. As I addressed in my APQs, maintaining the vitality of the laboratories and sites and the core competencies of the workforce at each site must be a priority for the NNSA. I firmly believe in order to recruit and retain top-notch personnel they must have challenging and interesting work as well as world-class laboratory equipment and facilities in which to work. Moreover, this work must be valued by the nation.

If confirmed, I will work with the laboratories, the academic community, and other institutions that are able to assist NNSA in meeting its responsibility to have the most talented and capable Federal workforce.

[The nomination reference of Hon. Madelyn R. Creedon follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 6, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Hon. Madelyn R. Creedon, of Indiana, to be Principal Deputy Administrator, National Nuclear Security Administration, vice Neile L. Miller, resigned.

[The biographical sketch of Hon. Madelyn R. Creedon, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF HON. MADELYN R. CREEDON

Madelyn Creedon was confirmed by the U.S. Senate as the Assistant Secretary of Defense for Global Strategic Affairs on August 2, 2011. In this capacity she supports the Under Secretary of Defense for Policy in overseeing policy development and execution in the areas of countering Weapons of Mass Destruction (WMD), U.S. nuclear forces and missile defense, and Department of Defense (DOD) cyber security and space issues.

Prior to her confirmation, Ms. Creedon was counsel for the Democratic staff on the Senate Committee on Armed Services and was responsible for the Subcommittee on Strategic Forces as well as threat reduction and nuclear nonproliferation issues.

In 2000, she left the Senate Armed Services Committee to become the Deputy Administrator for Defense Programs at the National Nuclear Security Administration, Department of Energy (DOE), and returned to the committee in January 2001.

Prior to joining the Senate Armed Services Committee staff in March 1997, she was the Associate Deputy Secretary of Energy for National Security Programs at the Department of Energy, beginning in October 1995.

From November 1994 through October 1995, Ms. Creedon was the General Counsel for the Defense Base Closure and Realignment Commission. This Commission, under the Chairmanship of former Senator Alan Dixon of Illinois, was responsible for recommending to the President military bases for closure or realignment.

From 1990 through November 1994, Ms. Creedon was counsel for the Senate Committee on Armed Services, under the Chairmanship of Senator Sam Nunn. While on the committee staff she was responsible for DOE national security programs, DOE and DOD environmental programs, and base closure transition and implementation programs.

Before joining the staff of the Senate Armed Services Committee, Ms. Creedon was a trial attorney and Acting Assistant General Counsel for Special Litigation with the DOE Office of the General Counsel for 10 years.

Born and raised in Indianapolis, IN, Ms. Creedon is a graduate of St. Louis University School of Law, where she was captain of the moot court team. Her undergraduate degree is in political science from the University of Evansville, Evansville, IN.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate, and certain senior military officers as determined by the committee, to complete a form that details the biographical, financial and other information of the nominee. The form executed by Hon. Madelyn R. Creedon in connection with her nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior

to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Madelyn Raub Creedon

2. **Position to which nominated:**

Principal Deputy Administrator, National Nuclear Security Administration, U.S. Department of Energy.

3. **Date of nomination:**

January 6, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

November 1, 1951; Indianapolis, IN.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to James J. Bracco.

7. **Names and ages of children:**

Meredith Creedon Bracco; May 2, 1981.

John Edward Bracco; November 12, 1984.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Broad Ripple High School, Indianapolis IN; 1964–1969; High School Diploma

University of Evansville, Evansville, IN; 1969–1973; BA

Tulane University School of Law, New Orleans, LA; 1973–1974

St. Louis University School of Law, St. Louis, MO; 1974–1976; JD

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Counsel, U.S. Senate Committee on Armed Services, January 2001–August 2011

Assistant Secretary of Defense/Global Strategic Affairs, U.S. Department of Defense, August 2011–Present

10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Trial Attorney, U.S. Department of Energy, July 1980–February 1990

Counsel, U.S. Senate Committee on Armed Services, February 1990–November 1994

General Counsel, Base Closure and Realignment Commission, November 1994–October 1995

Associate Deputy Secretary of Energy, U.S. Department of Energy, October 1995–March 1997

Counsel, U.S. Senate Committee on Armed Services, March 1997–July 2000

Deputy Administrator for Defense Programs, National Nuclear Security Administration, July 2000–January 2001

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Daughters of the American Revolution

Women in Aerospace

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

DOE Secretary's Achievement Award, 2001

DOE Distinguished Service Award, 1990

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Public Speaking Engagements:

- 1) Remarks to the U.S. Strategic Command (STRATCOM) Cyber and Space Symposium, Omaha, NE, November 15, 2011
- 2) Remarks to the Monitor Exchange Publications and Forums 4th Annual Deterrence Summit, Arlington, VA, February 15, 2012
- 3) Keynote address at the American Institute of Aeronautics and Astronautics (AIAA) 10th Annual U.S. Missile Defense Conference, Washington, DC, March 26, 2013
- 4) Featured speaker at The Space Foundation 28th National Space Symposium, Colorado Springs, CO, April 16, 2012
- 5) Remarks to the Royal United Services Institute (RUSI) Annual Missile Defense Conference, London, UK, May 30, 2012
- 6) Remarks to the Aerospace Industries Association (AIA) Space Council Meeting, Washington, DC, June 14, 2012
- 7) Remarks to the U.S. Strategic Command (STRATCOM) Deterrence Symposium, La Vista, NE, August 9, 2012
- 8) Keynote address at the Woodrow Wilson International Center for Scholars Workshop on Nuclear Forces and Nonproliferation, Washington, DC, November 28, 2012
- 9) Remarks to the Department of Defense (DOD) 20th Anniversary Cooperative Threat Reduction (CTR) Conference, Washington, DC, December 3, 2012
- 10) Keynote speech to the Daughters of the American Revolution (DAR) 112th Annual State Conference Formal Banquet, Indianapolis, IN, May 18, 2013
- 11) Remarks to the Stimson Center on Deterrence, Washington, DC, September 17, 2013

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Articles and Other Publications:

- 1) Madelyn R. Creedon, "Space and Cyber: Shared Challenges, Shared Opportunities" Strategic Studies Quarterly, Vol. 6, No. 1, Spring 2012, available at <http://www.au.af.mil/au/ssq/2012/spring/spring12.pdf>. accessed on August 12, 2013. Article attached.
- 2) Madelyn Creedon, "Ash Carter Got It Right in Aspen, Top DOD Nuclear Weapons Official Responds," Defense One, July 30, 2013, available at <http://www.defenseone.com/ideas/2013/07/ash-carter-got-it-right-aspen-top-dod-nuclear-weapons-official-responds/67721/?oref=d-river>. accessed on August 12, 2013. Article attached.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee,

or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MADELYN R. CREEDON.

This 13th day of January, 2014.

[The nomination of Hon. Madelyn R. Creedon was reported to the Senate by Chairman Levin on January 28, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 23, 2014.]

[Prepared questions submitted to Hon. Brad R. Carson by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. The Goldwater-Nichols Act has had a significant and positive impact on the Department of Defense (DOD) and the Army. The framework established by the act has improved inter-Service relationships and strengthened the ability of the Services to work with the combatant commands. I do not see the need for any modifications.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. No modifications are needed at this time.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I believe that, if confirmed, my diverse political, military, legal, and business experiences have well prepared me to execute the duties of the Under Secretary of the Army. I currently have the honor and privilege of serving as the General Counsel of the Army, a position in which I have had legal oversight of every issue arising from the Army’s global operations. In addition to myriad routine matters, I have assisted Secretary of the Army John McHugh in developing military-wide responses to particularly vexing problems and issues, such as ensuring that soldiers with behavioral health conditions are properly diagnosed, creating wholesome environments at all Army child development centers, and eradicating sexual assault. More generally, I have been asked to advise at nearly every meeting of the Army’s senior leaders, where issues of readiness, modernization, operations, and personnel are discussed and decided.

It is helpful to also briefly summarize my education and professional career. Before joining the Department of the Army, I was a professor in the College of Busi-

ness and the College of Law at the University of Tulsa, where I led a research institute devoted to energy issues and taught courses in property law, energy policy, negotiations and game theory, and globalization. I attended Baylor University, where I graduated with highest honors and was inducted into Phi Beta Kappa. Studying as a Rhodes Scholar at Trinity College, Oxford, I earned a B.A./M.A. in Politics, Philosophy, and Economics. Upon returning to the United States, I graduated from the University of Oklahoma College of Law, where I was recognized as the Outstanding Graduate. I entered the practice of law at Crowe & Dunlevy, the largest firm in the state of Oklahoma. During my early years of legal work, I focused on commercial litigation, with a particular emphasis on antitrust. From 1997 through 1998, I was a White House Fellow, serving in DOD. After completing the White House Fellowship, I returned to practicing commercial litigation at Crowe & Dunlevy. In 2000, I was elected to represent the 2nd District of Oklahoma in the U.S. House of Representatives. As a Congressman, I worked closely with other members of the Oklahoma delegation to protect and enhance the state's military installations. In 2005, after leaving politics, I was a fellow at the Kennedy School of Government at Harvard University. Thereafter, I was a Director and then Chief Executive Officer of CNB, LLC, where I oversaw a company with revenues in excess of \$400 million per year. From 2008 to 2009, as an officer in the U.S. Navy, I served in Iraq on active military duty with the 84th Explosive Ordnance Battalion of the U.S. Army, as the Officer-in-Charge of Weapons Intelligence Teams in Multi-National Division-South. For my service, I was awarded the Bronze Star and Army Achievement Medal.

I believe that these varied experiences have prepared me for the extraordinary challenge of serving as Under Secretary of the Army. I know first-hand the legal and policy issues facing the Department of the Army in this time of continued war and budget austerity. If confirmed, I will commit to using my skills and experience to diligently and effectively perform the duties of Under Secretary.

DUTIES

Question. Section 3015 of title 10, U.S.C., states the Under Secretary of the Army shall perform such duties and exercise such powers as the Secretary of the Army may prescribe.

What is your understanding of the duties and functions of the Under Secretary of the Army?

Answer. By statute, the Under Secretary of the Army performs such duties and exercises such powers as the Secretary of the Army prescribes. By regulation, the Under Secretary is the Secretary's principal civilian assistant and advisor. To that end, the Under Secretary is charged with communicating and advocating Army policies, plans, and programs to external audiences, including Congress, foreign governments, and the American public. The Under Secretary also advises the Secretary on the development and integration of Army programs and the Army budget. Finally, pursuant to section 904 of the National Defense Authorization Act for Fiscal Year 2008, the Under Secretary is the Chief Management Officer (CMO) of the Department of the Army, responsible for business operations. In accordance with section 908 of the National Defense Authorization Act for Fiscal Year 2009, the Secretary of the Army acts through the Under Secretary to carry out initiatives necessary to the business transformation of the Army.

Question. What recommendations, if any, do you have for changes in the duties and functions of the Under Secretary of the Army, as set forth in section 3015 of title 10, U.S.C., or in DOD regulations pertaining to functions of the Under Secretary of the Army?

Answer. If confirmed, I will review the duties and functions currently assigned to, and performed by, the Under Secretary, discuss my findings with the Secretary of the Army, and recommend to the Secretary any changes that I believe necessary.

Question. Assuming you are confirmed, what additional duties, if any, do you expect will be prescribed for you?

Answer. I am confident that the Secretary will assign me duties that most appropriately support his efforts to ensure that the Department of the Army is effectively and efficiently administered.

RELATIONSHIPS

Question. If confirmed, what would be your working relationship with: The Secretary of Defense.

Answer. The Secretary of Defense, as head of DOD, possesses full authority, direction, and control over all of its elements. If confirmed, and subject to the authority, direction, and control of the Secretary of the Army, I would communicate with the Secretary of Defense on matters involving the Department of the Army. I would co-

operate fully with the Secretary of Defense to ensure that the Department of the Army fulfills the administration's national defense priorities and, mindful of my role as the Army's CMO, I would make certain that the business operations of the Army are effectively and efficiently organized and managed.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense performs such duties and exercises such powers as the Secretary of Defense may prescribe. The Deputy Secretary is also the CMO of DOD. If confirmed, and subject to the authority, direction, and control of the Secretary of the Army, I would be responsible to the Secretary of Defense—and to his Deputy—for the operation of the Army.

Question. The Deputy Chief Management Officer of DOD.

Answer. The Deputy CMO of DOD assists the Deputy Secretary of Defense in synchronizing, integrating, and coordinating business operations within DOD. If confirmed as Under Secretary, I will work in close coordination with the Deputy CMO on the full range of matters involving the management of DOD.

Question. The Director of the Business Transformation Agency.

Answer. To my knowledge, the Secretary of Defense disestablished this agency in 2011. The functions have been transferred to DOD Deputy Chief Management Officer.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman of the Joint Chiefs of Staff is the principal military advisor to the President, the National Security Staff, and the Secretary of Defense. If confirmed, I would cooperate fully with the Chairman in the performance of his responsibilities.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. The Vice Chairman of the Joint Chiefs of Staff performs the duties prescribed for him as a member of the Joint Chiefs of Staff, and such other duties as may be prescribed by the Chairman with the approval of the Secretary of Defense. If confirmed, I would cooperate fully with the Vice Chairman in the performance of his responsibilities.

Question. The Secretary of the Army.

Answer. The Secretary of the Army is the head of the Department of the Army and is responsible for, and has authority to conduct, all of its affairs. If confirmed, my relationship with the Secretary of the Army would be close, direct, and supportive. As CMO, I would be accountable to the Secretary for the effective and efficient organization and management of the Army's business operations and for carrying out initiatives he approves for the business transformation of the Army. I understand that all of my actions would be subject to the authority, direction, and control of the Secretary of the Army.

Question. The Chief of Staff of the Army.

Answer. The Chief of Staff of the Army performs his duties under the authority, direction, and control of the Secretary of the Army and is directly responsible to the Secretary. The Chief of Staff also performs the duties prescribed for him by law as a member of the Joint Chiefs of Staff. It is vital that all leaders of the Department of the Army, civilian and military, work closely together as one team to face the many challenges confronting the institution; if confirmed, I would coordinate with the Chief of Staff of the Army in the performance of my duties.

Question. The Assistant Secretary of the Army for Civil Works.

Answer. The Assistant Secretary of the Army for Civil Works has, as a principal duty, the overall supervision of Army functions relating to programs for conservation and development of national water resources, including flood control, navigation, and shore protection. If confirmed, I would continue the close professional relationship with the Assistant Secretary that I have developed as General Counsel, and I would cooperate fully with the Assistant Secretary to carry out the Army's civil works activities.

Question. The other Assistant Secretaries of the Army.

Answer. The four other Assistant Secretaries of the Army set the Army's strategic direction by developing and overseeing policies and programs within their respective functional areas. If confirmed, I will continue the close professional relationships with each of the Assistant Secretaries that I have developed as General Counsel. I will foster an environment of cooperative teamwork, which will ensure we work together effectively on both the day-to-day management and long-range planning needs of the Army. In particular, in my role as the CMO of the Army, I will coordinate with the Assistant Secretaries in addressing any matter related to business operations or business transformation that may impact their respective domains.

Question. The General Counsel of the Army.

Answer. The General Counsel is the chief legal and ethics officer of the Department of Army and serves as counsel to the Secretary and other Secretariat officials.

The General Counsel's duties include providing legal and policy advice to officials of the Department of the Army, as well as determining the position of the Army on all legal questions and procedures. If confirmed, and particularly given my experience serving as Army General Counsel, I would establish and maintain a close professional relationship with the new appointee, and would actively seek his or her guidance to ensure that Army policies and practices are in strict accord with the law and the highest principles of ethical conduct.

Question. The Inspector General of the Army.

Answer. The Inspector General of the Army is charged with inquiring into, and reporting on, the discipline, efficiency, economy, morale, training, and readiness of the Army, as so directed by the Secretary of the Army or the Chief of Staff of the Army. As General Counsel, I have worked closely with The Inspector General. If confirmed as Under Secretary, I am confident that this strong professional relationship would continue.

Question. The Surgeon General of the Army.

Answer. The Surgeon General is a special advisor to the Secretary of the Army and to the Chief of Staff of the Army on the military health service system. In that role, The Surgeon General is charged with maintaining a medically ready military force, as well as a trained and ready medical force. If confirmed, I intend to continue my close professional relationship with The Surgeon General to ensure that the Army's health care systems and medical policies effectively and uniformly support the Army's objectives, responsibilities, and commitments across the total force. In particular, I plan to focus on the advancement of key Behavioral Health (BH) initiatives, such as the BH System of Care (which logically and cohesively unifies eleven major BH programs into a cohesive, evidence-based system), and the BH Data Portal (which is an nationally-recognized automated method for collecting and displaying real-time treatment data during patient visits).

Question. The Army Business Transformation Office.

Answer. In accordance with section 908 of the National Defense Authorization Act for Fiscal Year 2009, the Secretary of the Army established the Office of Business Transformation to assist the CMO of the Army in carrying out business transformation initiatives. The Office of Business Transformation is headed by the Director of Business Transformation, who is appointed by the Army's CMO. If confirmed, I intend to work closely and directly with the Army Business Transformation Office in carrying out our important duties.

Question. The Judge Advocate General of the Army.

Answer. The Judge Advocate General of the Army is the legal advisor to the Chief of Staff of the Army, the Army Staff, and members of the Army generally. In coordination with the Army General Counsel, The Judge Advocate General serves as military legal advisor to the Secretary of the Army. The Judge Advocate General also directs the members of the Judge Advocate General's Corps in the performance of their duties and, by law, is primarily responsible for providing legal advice and services regarding the Uniform Code of Military Justice (UCMJ) and the administration of military discipline. As General Counsel, I have worked closely with the Judge Advocate General on a wide range of matters. If confirmed as Under Secretary, I look forward to continuing this close professional relationship.

Question. The Chief of the National Guard Bureau.

Answer. The Chief of the National Guard Bureau is a principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff, on matters involving non-Federalized National Guard forces and on other matters as determined by the Secretary of Defense. The Chief of the National Guard Bureau serves also as the principal advisor to the Secretary of the Army and the Chief of Staff of the Army. If confirmed, I would work with the Chief of the National Guard Bureau to utilize the talents available in the Reserve components to strengthen the Army.

Question. The Director of the Army National Guard.

Answer. The Director of the Army National Guard serves as the principal advisor on National Guard matters to the Secretary of the Army and the Chief of Staff of the Army. If confirmed, I would seek the input of the Director of the Army National Guard on all matters of policy and procedure that would impact the more than 350,000 soldiers in the Army National Guard.

Question. The Army Chief of Chaplains.

Answer. From the earliest days of the Army, chaplains have been an integral part of the total force. Chaplains are often the first to respond to incidents of death, combat casualty, suicide, and sexual assault. The programs that the Chaplains lead serve to bolster soldier and family resiliency in these difficult times. The Army Chief of Chaplains leads the Army Chaplains Corps in its primary mission of providing religious support to the Army, and advises the Secretary of the Army and Chief of Staff of the Army on all matters of chaplaincy. As General Counsel, I have worked

closely with the Army Chief of Chaplains, and, if confirmed as Under Secretary, I would continue this productive partnership. I understand the importance of, and value in, consulting with the Army Chief of Chaplains in the exercise of my responsibilities.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges, if any, that you would confront if confirmed as Under Secretary of the Army?

Answer. The Army stands at a critical moment in its history, challenged to reshape into a leaner force still capable of meeting the Nation's strategic priorities. The base budget of the Army is being squeezed by the rising costs of compensation, health care, and, to a lesser degree, procurement. Nonetheless, the Army's obligations remain unchanged: training and equipping soldiers, guaranteeing high quality medical care for wounded warriors, enhancing readiness, offering quality housing, modernizing Cold War-era equipment, and meeting stringent recruiting and retention goals, to name just a few examples. If confirmed, I will do everything in my power to ensure the Army meets these important, often sacred, obligations, no matter the fiscal environment.

But, to meet both its near-term and long-term challenges, the Army must create and use a new operating framework. The Army must reduce its overhead, especially as total force structure is thinned. The Army must pay attention not only to monetary obligations, but also to drivers of cost. The Army must develop, publish, and monitor metrics by which the success or failure of change can be determined. More generally, the Army must move from a budget-based culture to a cost-based approach. This transformation cannot take place without the active involvement of the Army's senior leaders. The greatest challenge that I will face as Under Secretary, if confirmed, is to assist in this process while ensuring that soldiers are prepared and their families are protected.

Question. If confirmed, how would you prioritize and what plans would you have, if any, for addressing these challenges?

Answer. If confirmed, I will focus on my responsibilities as CMO, which primarily lay in transforming the business operations of the Army. As the principal civilian advisor to the Secretary of the Army, I will also prioritize issues in concert with the Secretary and the Chief of Staff of the Army. The priorities of the Secretary of the Army and the Chief of Staff of the Army distill to two basic challenges: managing the drawdown of the Army, while simultaneously tending to the Army profession.

LESSONS LEARNED

Question. What do you believe are the major lessons that the Department of the Army has and should have learned from Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) regarding its title 10, U.S.C., responsibilities for manning, training, and equipping the force?

Answer. Thirteen years of war have reinforced time-honored lessons, while offering up new ones as well. I would like to highlight a few particularly important ones here, without making any pretention to comprehensiveness. First, OIF and OEF have shown that the Army must continue to develop agile and adaptive leaders capable of operating with disciplined initiative. This is especially important at the junior level, where this capability has proven vital to mission accomplishment throughout the conflicts in Iraq and Afghanistan. Second, the Army's training at the Combat Training Centers has proven to be an effective and flexible means of ensuring the mission readiness of deploying units. Third, physical and psychological resiliency is an important attribute in soldiers and their families, and there is evidence that resiliency can be improved through appropriate intervention. Fourth, cultural knowledge of our allies and adversaries is invaluable and is a key attribute to be developed throughout the Army. Fifth, programs such as the Rapid Equipping Force and processes such as the Urgent Operational Needs requests have effectively and expeditiously delivered needed materiel to warfighters. Sixth, modern conflicts involve joint, interagency, intergovernmental, and multinational actions, and require a "whole-of-government" approach. Seventh, the All-Volunteer Force proved capable of sustained warfighting. Eighth, the Army was able to adapt to the many challenges it encountered in Afghanistan and Iraq because of its institutional side, the sustaining base. Ninth, adversaries are innovative and adaptive, learn from recent operations, and will exploit any weaknesses. Tenth, long wars mean long-term consequences for the Nation and the Army. Eleventh, and most generally, the Army must always maintain its focus on continual training and the maintenance of capabilities to meet the needs of combatant commanders.

The Center for Army Lessons Learned is leading the effort to capture the most important lessons learned from OIF and OEF at the strategic, operational, tactical, and institutional levels. If confirmed, I would work to ensure that these lessons are not lost or forgotten, but are inculcated throughout Army doctrine, organization, training, materiel, leadership and education, personnel, and facilities.

Question. If confirmed, which of these lessons, if any, would you address as a matter of urgent priority?

Answer. Although all of these priorities are important, the most critical is that the Army has the right capabilities and the capacity to meet the Nation's national security requirements. If confirmed, I would work aggressively in support of the Secretary of the Army to ensure that the Army is trained and ready to meet combatant commander requirements.

ARMY MANAGEMENT AND PLANNING PROCESS

Question. Over the past several years, the Army's planning, programming and budgeting process has not kept pace with rapidly changing requirements. While this is more understandable for operational events like the presidential decision to surge additional forces into Iraq, it is less understandable with respect to long-term programmatic decisions such as the modular conversion of Army brigades or the more recent decision to increase Army end strength. It has become routine for the Army to submit "placeholders" instead of actual program plans in budget requests, and to purchase temporary facilities followed almost immediately by additional funding requests to buy permanent facilities to replace the temporary ones.

What is your understanding and assessment of the Army's management and planning process and any changes or reforms of these processes currently underway?

Answer. The Army's primary management and planning process is the Planning, Programming, Budgeting, and Execution (PPBE) system. PPBE is a common process for the entire DOD, customized to meet the needs of the individual Services. As required by the Government Performance and Results Act, the Army also has a strategic plan which is monitored through the Army Campaign Plan process. The PPBE process works best when future conditions and fiscal projections are relatively stable; recent events, including the drawdown of conflicts in Iraq and Afghanistan, sequestration, and the frequent changes in the DOD's fiscal outlook have challenged the Army's ability to react quickly to changing circumstances and have made Future Years Defense Program projections less relevant. I believe the fundamentals of these processes are sound, but it is possible that they may need to be modified if less predictability is going to be the "new norm". If confirmed, and subject to the direction of the Secretary of the Army, I would make it my priority to assume an active and informed leadership role in the management of the Headquarters, Department of the Army planning, programming and budgeting process, while seeking appropriate improvements in the systems by which we develop, prioritize, and resource our requirements, particularly for the longer term. So, too, I will make it a priority to streamline and improve the Army Campaign Plan, working with the Secretary of the Army, the Chief of Staff of the Army, and other members of the Secretariat.

Question. If confirmed, what additional changes would you propose, if any, to correct or improve management and planning processes?

Answer. If confirmed, and subject to the direction of the Secretary of the Army, I intend to explore ways to make our processes more agile and more responsive, so that we may react more quickly to changing fiscal and strategic conditions. I also intend to examine the Army's Strategic Planning Process to ensure it fully captures the priorities of the Secretary of the Army and then employ proven performance measurement techniques to ensure we are making progress towards our desired outcomes.

Question. In your view, does the Army have enough people with the right skills to manage the changes being attempted, or is the Army undertaking more organizational change than it is capable of accomplishing during a time of war?

Answer. I believe that the Army has the right leaders, civilian and military, to manage the organizational change necessary to keep the Army relevant and able to execute the demands of the National Military Strategy. The Army has an excellent leader development program and recognizes the value of investing in its people. Both the Secretary of the Army and the Chief of Staff of the Army have consistently made leader education and training one of their highest priorities, and I am confident we are heading in the right direction in this area.

Question. If confirmed, what changes in management would you propose, if any, to reduce or eliminate the Army's chronic cash flow challenges?

Answer. The Army does its best to accurately forecast its fiscal needs and ensure they are represented in the President's budget submission. Changing conditions, es-

pecially those in war zones, unexpected pricing changes, and the delay between the time the Army finishes work on its budget and the time it is appropriated by Congress, have, in the past, resulted in cash flow problems. If confirmed, I will strive to ensure Army requirements are included as part of the President's budget request, and, then, as we enter into the execution phase in a fiscal year, I will assist the Secretary of the Army in monitoring that fiscal execution and participate in the decisionmaking to reprioritize and reallocate funding to meet emergent needs.

Over the last several years, Continuing Resolutions and sequestration resulted in significant uncertainty in our normal budget and execution processes. Continuing Resolutions have become routine, having extended into or beyond the first quarter in each of the last 5 years. Continuing Resolutions initiate the fiscal year under restrictions that disallow timely execution of planned programs and perpetuate fiscal uncertainty. Under these circumstances, the Army must take a conservative approach until the appropriations are known. Once appropriations are received, the Army must then execute them within very abbreviated timelines. This often leads to sub-optimal execution decisions.

In order to more efficiently use the resources Congress provides for national defense, I will work with Congress to develop a comprehensive budget request to reflect the Army's funding requirements, as well as emphasize the importance of receiving appropriations on time, if I am confirmed.

DUTIES AND RESPONSIBILITIES AS CHIEF MANAGEMENT OFFICER

Question. Section 904 of the National Defense Authorization Act for Fiscal Year 2008 designates the Under Secretary of the Army as the Army's Chief Management Officer (CMO). Section 908 of the National Defense Authorization Act for Fiscal Year 2009 requires the CMO of each of the Military Departments to carry out a comprehensive business transformation initiative.

What is your understanding of the duties and responsibilities of the Under Secretary in his capacity as CMO of the Department of the Army?

Answer. Pursuant to the National Defense Authorization Act for Fiscal Year 2008, section 904, responsibility for the business operations of the Department of the Army is assigned to the Under Secretary of the Army as the CMO. The Secretary of the Army has provided all the authority necessary for the CMO to effectively and efficiently organize and administer the business operations of the Army. The CMO is further responsible for developing a comprehensive business transformation plan and a business systems architecture and transition plan.

Question. What background and expertise do you possess that you believe qualify you to perform these duties and responsibilities?

Answer. My education and combined professional experiences as a lawyer and professor of business law, my service as a member of the U.S. House of Representatives, and my current position as a senior Army leader have prepared me for the duties expected of the CMO of the Army. In particular, as the General Counsel of the Army, I have had wide exposure and gained intimate working knowledge of the many important and complex issues impacting the Army.

Question. Do you believe that you have the resources and authority needed to carry out the business transformation of the Department of the Army?

Answer. I believe the Army has dedicated adequate resources to business transformation. I believe, and I know Congress concurs, that business transformation is essential to all Military Departments, and, if confirmed, I will continue to ensure that resource constraint does not inhibit changes needed in the Army's business operations.

If confirmed, I will also consult with the Secretary of the Army, the Office of Business Transformation, and the Deputy CMO of DOD to assess if any additional authorities are needed to continue to drive the transformational effort to success.

Question. What role do you believe the CMO should play in the planning, development, and implementation of specific business systems by the Military Departments?

Answer. Over the last 2 years, the Army has put in place a robust governance mechanism whereby the Army Business Council synchronizes business activities and ensures alignment with the Office of the Secretary of Defense (OSD). The Army has also been steadily improving the planning and coordination needed to comply with OSD directives and OSD investment requirements, while at the same time maturing the Army Business Mission Area's enterprise architecture. Just as important, the Under Secretary's office and the Office of Business Transformation have fully integrated business management decisions within the overall Army Campaign Plan. If confirmed, I intend to capitalize on that success and maintain the synchronization between OSD and the Army.

Question. What changes, if any, would you recommend to the statutory provisions establishing the position of CMO?

Answer. The Army has seen substantial benefits from the original legislation that established the CMO and the Business Transformation Office. Senior leaders emphasize the critical role these institutions have played in optimizing processes, reducing systems investments, and communicating with the DOD Deputy CMO. All of this flows from the unique enterprise-level view that the CMO can provide across different functions. If confirmed, and in concert with the Secretary of the Army, I will review our current approach and then determine whether any provisions should be recommended for amendment or change.

ACQUISITION ISSUES

Question. What is your assessment of the size and capability of the Army acquisition workforce?

Answer. Over the past 5 years, the Army has made great strides in identifying the necessary skills and in promoting the growth, training, and development of the acquisition workforce. However, mounting fiscal pressures may impede the Army's ability to attract, recruit, and retain talented personnel within our acquisition workforce. As the Army considers the size of the future force and assesses reductions in civilian personnel, I am concerned about a consequent loss of knowledge, critical experience, and expertise that the Army needs to further its missions. The Army relies on an experienced and competent acquisition workforce to oversee the development and procurement of complex weapon systems, business systems, and other equipment and capabilities. Continued challenges presented by sequestration, pay and hiring freezes, and other reductions may cause attrition that would undo the positive gains achieved over the past few years in the development of a professional and experienced acquisition workforce.

Question. If confirmed what steps would you take to ensure that the Department of the Army has an acquisition workforce with the size and capability needed to manage and reverse the acquisition problem?

Answer. I fully support ongoing initiatives to grow the capacity and capability of the Army acquisition workforce. The Army requires critical skills in a diverse range of disciplines, to include contracting, program management, systems engineering, cost estimating, risk management, and test planning and management. If confirmed, I will vigorously support and advance efforts to enhance the growth of the acquisition workforce and cultivate its expertise in all critical areas.

Question. Major defense acquisition programs in the Department of the Army and the other Military Departments continue to be subject to funding and requirements instability.

Do you believe that instability in funding and requirements drives up program costs and leads to delays in the fielding of major weapon systems?

Answer. The continued instability of the Army's fiscal environment has had a significant impact on long-term program costs and fielding schedules of major weapon systems. Major weapon systems programs involve the expenditure of significant resources over several years to design, develop, test, and field cutting-edge capabilities. Successful execution of these programs calls for predictable and stable resources in order to meet planned program milestones and timelines. Indiscriminate reductions under the Budget Control Act, as well as recurring funding shortfalls under Continuing Resolutions, significantly impede the Army's ability to execute these programs. These reductions result in fewer procurement quantities, delayed development or testing activities, and restructuring of the Army's program execution plans. Increased costs almost inevitably ensue.

Question. What steps, if any, do you believe the Army should take to address funding and requirements instability?

Answer. I believe that the single most important step the Army can take to address funding instability is to encourage and support the budget, appropriations, and authorization committees in Congress in passing consistent, stable, and long-term funding and authorization bills from which the Army can effectively and efficiently plan. If confirmed, I will diligently communicate with Congress with respect to the grave importance of stable funding to the Army.

Requirements stability is a prerequisite for successful acquisition programs. The Army has made significant strides in developing processes to review requirements in its major acquisition programs in an effort to identify potential tradespace. These efforts must be reinforced to ensure the success of the Army's acquisition efforts.

Question. The Comptroller General has found that DOD programs often move forward with unrealistic program cost and schedule estimates, lack clearly defined and stable requirements, include immature technologies that unnecessarily raise pro-

gram costs and delay development and production, and fail to solidify design and manufacturing processes at appropriate junctures in the development process.

Do you agree with the Comptroller General's assessment?

Answer. Many of the deficiencies the Comptroller General cites are indeed common problems. The Army has undertaken significant efforts to prevent unrealistic program cost and schedule estimates, confront ill-defined and unstable requirements, reduce reliance on immature technologies, and address concerns related to any design and manufacturing processes across all of its acquisition portfolios. Consistent with the DOD's Better Buying Power initiative, the Army has instituted processes to manage the review and validation of weapon system requirements and emphasizes affordability in all acquisition programs. If confirmed, I will advocate for sound and affordable acquisition strategies, working in close collaboration with the Army's requirements, resourcing, and acquisition organizations.

Question. If so, what steps do you believe the Department of the Army should take to address these problems?

Answer. If confirmed, I would advocate (in close collaboration with the requirements, resourcing, and acquisition organizations within the Army) for sound and affordable acquisition strategies to ensure that cost growth is avoided. Moreover, I would work closely with Army requirements, resourcing, and acquisition communities to promote cost-informed trade-offs in system requirements in order to reduce risk and ensure that programs remain affordable across their lifecycles.

Question. By some estimates, DOD now spends more money every year for the acquisition of services than it does for the acquisition of products, including major weapon systems. Yet, the Department places far less emphasis on staffing, training, and managing the acquisition of services than it does on the acquisition of products.

What steps, if any, do you believe the Army should take to improve the staffing, training, and management of its acquisition of services?

Answer. The Army established an Army Senior Services Manager (SSM) in 2010 to focus oversight and improve services acquisition. The SSM provides governance, coordination, and comprehensive analysis of services acquisition across all Army commands. If confirmed, I will work with the SSM and Army commands and organizations to continue these efforts, identify areas for improvement, and monitor progress.

Question. Do you agree that the Army should develop processes and systems to provide managers with access to information needed to conduct comprehensive spending analyses of services contracts on an ongoing basis?

Answer. Yes, I agree. The Army was the first Service to initiate the processes and systems needed to address this matter through its implementation of the Request for Service Contract Approval Form. This form is a checklist that helps identify inherently governmental functions, tasks that are closely associated with inherently governmental functions, authorized and unauthorized personal services, and critical functions. This form was developed for use in conjunction with the Contractor Manpower Reporting Application and Panel for Documenting Contractors processes. The Army has worked with the Under Secretaries of Defense for Personnel and Readiness; Acquisition, Logistics and Technology; and Comptroller to expand these initiatives. This unified effort is intended to address the broader area of Total Force Management and management of service contracts.

Question. The last decade has seen a proliferation of new types of government-wide contracts and multi-agency contracts. DOD is by far the largest ordering agency under these contracts, accounting for 85 percent of the dollars awarded under one of the largest programs. The DOD Inspector General and others have identified a long series of problems with interagency contracts, including lack of acquisition planning, inadequate competition, excessive use of time and materials contracts, improper use of expired funds, inappropriate expenditures, and failure to monitor contractor performance.

What steps, if any, do you believe the Army should take to ensure that its use of interagency contracts complies with applicable DOD requirements and is in the best interests of the Department of the Army?

Answer. It is my understanding that the Office of Federal Procurement Policy has issued policy, procedures, and guidance concerning the use of interagency contracts. This policy directs acquisition officials to determine whether the use of an interagency acquisition represents the best procurement approach in terms of cost, schedule, performance and delivery. If confirmed, I will work with the Secretary of the Army to assess the Army's compliance with these policies, and I will examine the Army's internal processes to ensure that the concerns identified by the Inspector General are addressed.

Question. On November 1, 2010, the Assistant Secretary of the Army for Acquisition, Logistics and Technology (ASA(ALT)) established the Deputy Assistant Sec-

retary of the Army for Services (DASA(S)) in response to the September 2010 directive “Implementation Directive for Better Buying Power—Obtaining Greater Efficiency and Productivity in Defense Spending” from the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)).

In your view, has the establishment of this position helped or hindered that Army’s ability in obtaining cost-effective and efficient services to achieve their missions?

Answer. I believe the Army’s establishment of a single responsible official to oversee services acquisition has led to improvements in its planning, coordination, and execution. In December 2011, as part of Headquarters streamlining, the DASA(S) functions were realigned under the SSM. The SSM is a member of the Senior Executive Service with a permanent staff, and his sole mission is to improve Army services acquisition oversight and management. The SSM office has provided improved visibility of services requirements forecasts, funding, and cost savings.

Question. What steps, if any, do you believe the Army should take to ensure that this position is necessary?

Answer. The Army has already recognized the Senior Service Manager function as an essential component in our institutional goals to increase efficiency and effectiveness in services acquisition. If confirmed, I will continue to support the Army’s regular review of services requirements and execution; support the development of a services business intelligence capability to provide Army leaders end-to-end understanding of services acquisitions requirements, performance, and cost; and ensure the Army continues to work with the Defense Acquisition University to incorporate services acquisition management practices into training courses.

AUDITABLE FINANCIAL STATEMENTS

Question. Section 1003 of the National Defense Authorization Act for Fiscal Year 2010 requires the Chief Management Officer of DOD to establish a plan to ensure that DOD’s financial statements are validated as ready for audit by not later than September 30, 2017. The Secretary of Defense has established the additional goal of ensuring that the statement of DOD’s budgetary resources is validated as ready for audit by not later than September 30, 2014.

In your opinion, is the Department of the Army on track to achieve these objectives, particularly with regard to data quality, internal controls, and business process re-engineering?

Answer. Yes, the Army is on track to achieve the congressionally-mandated audit readiness objectives. The Army has been implementing and testing internal controls and is currently achieving increasingly higher success rates in monthly testing. Business processes have been thoroughly examined, end-to-end, and have been re-engineered for efficiency. At the same time, the Army is ensuring that quality data which is accurate, complete, and documented, is successfully transitioned from legacy systems into the Enterprise Resource Planning environment and into financial statements.

Question. If not, what impediments may hinder the Army’s ability to achieve this goal and how would you address them?

Answer. While the Army is indeed on track to achieve the congressionally-mandated audit readiness objectives, key challenges should not be ignored. These challenges include maintaining: robust and continuous leader involvement, a competent workforce, accountability and oversight, a well-defined and streamlined business architecture, effective internal controls, and compliant financial systems. Each of these challenges is identified in the Army’s Financial Improvement Plan (FIP), with corrective actions identified for each noted current deficiency. The Army FIP is consistent with the DOD Financial Improvement and Audit Plan and is geared to remove the obstacles to a successful audit.

Question. In your view, are the steps that the Army needs to take to meet the 2014 goal consistent with the steps that DOD needs to take to achieve full auditability by 2017?

Answer. Yes. The Army plan is consistent with the DOD plan.

Question. What steps will you take, if confirmed, to ensure that the Army moves to achieve these objectives without an unaffordable or unsustainable level of one-time fixes and manual work-arounds?

Answer. If confirmed, I will ensure accountability, leadership, and consistent governance of this important project.

ARMY MODERNIZATION

Question. In general, major Army modernization efforts have not been successful over the past decade or more. Since the mid-1990s, Army modernization strategies,

plans, and investment priorities have evolved under a variety of names from Digitization, to Force XXI, to Army After Next, to Interim Force, to Objective Force, to Future Combat System and Modularity. Instability in funding, either as provided by DOD or Congress, has been cited by the Army and others as a principal cause of program instability. For the most part, however, the Army has benefited from broad DOD and congressional support for its modernization and readiness programs even when problems with the technical progress and quality of management of those programs have been apparent—the Future Combat System is a recent example.

What is your assessment, if any, of the Army's modernization record?

Answer. The Army has had many notable successes in ensuring that soldiers in combat have the best equipment ready and available. The Army has fielded weapon systems that provide soldiers with improved mobility, protection, lethality, and a decisive advantage over our Nation's enemies. There have been some notable struggles, too, over the past 2 decades, and the Army is committed to drawing the right lessons from the less successful acquisition programs. If confirmed as Under Secretary, I will work to ensure that warfighter needs are met, while remaining fully cognizant of the lessons learned from canceled acquisition programs.

Question. If confirmed, what actions, if any, would you propose to take to achieve a genuinely stable modernization strategy and program for the Army?

Answer. If confirmed, I will work with the Secretary of the Army and the Chief of Staff of the Army to sustain a versatile and tailorable, yet affordable and cost-effective modernization strategy. The Army has initiated a much longer timeframe (30 years) for review of its modernization programs than it has had in the past. This wider lens of review will help to stabilize programs and to better predict investments. This change in temporal scope, in conjunction with the continued support of Congress in providing predictable appropriations, will help the Army achieve a stable modernization strategy and program. If confirmed, my focus will be on ensuring that soldiers and units are enabled, trained, and ready to meet the future challenges they may face.

Question. What is your understanding and assessment of the Army's modernization investment strategy?

Answer. Given today's significant fiscal pressures, the Army's investment in modernized equipment and capabilities will likely see across-the-board reductions in the near term. The Army's investment strategy in soldier weapon systems and capabilities will focus on making prudent investment decisions with limited resources to enable the Army to field the best capabilities into the future. In the near term, equipment investment will prioritize efficient acquisition, to include multi-year procurements, scaled-down weapon system requirements to address affordability constraints, and divestiture of outdated legacy systems as appropriate. Limited resources will be likely invested in key modernization programs such as the Joint Light Tactical Vehicle (JLTV), the Armored Multipurpose Vehicle (AMPV), and the deployed network. Upgrades to existing platforms like the Apache and Blackhawk helicopter, the Abrams tank, Bradley Infantry Fighting Vehicle (IFV), and the Paladin Self-Propelled Howitzer (PIM) will improve current capabilities. The Army will also continue to prioritize long-term investment in Science and Technology to mature critical enabling technologies that support future, next-generation capabilities for the Army. Overall, the Army will focus its attention on investments that provide improved force protection, mobility, lethality, and situational awareness in combat.

Question. In your view does the Army's modernization investment strategy appropriately or adequately address current and future capabilities that meet requirements across the spectrum of conflict?

Answer. In my view, the Army's investment strategy in this area does address requirements across the spectrum of operations that will be found in current and future conflict environments. The Army's ability to field these needed capabilities depends, however, on the availability of stable and adequate resources.

Question. If confirmed, what other investment initiatives, if any, would you pursue in this regard?

Answer. If confirmed, I would support ongoing efforts to ensure that the Army's equipment modernization strategy continues to be informed by evolving threats, emerging warfighter requirements, the rapid pace of technological change, industry research and development, as well as resource constraints. My efforts would strive to find the most cost-effective ways to upgrade the Army's current combat platforms while also making critical investments in the capabilities needed to fight in future operational environments.

Question. If confirmed, what actions, if any, would you propose to ensure that all these initiatives are affordable within the current and projected Army budgets?

Answer. The Army has made great strides in the past several years in conducting portfolio affordability analysis. This effort examines all life cycle costs, including

procurement, training, and sustainment. If confirmed, I hope to further these efforts and ensure the Army's modernization strategy is consonant with its level of resources.

Question. In your view, what trade-offs, if any, would most likely have to be taken should budgets fall below or costs grow above what is planned to fund the Army's modernization efforts?

Answer. Consistent with the Secretary of the Army and Chief of Staff of the Army's Strategic Vision, the Army will defend the Nation against all current and emerging threats by employing a balanced modernization strategy across all of its portfolios and by maintaining a proper balance between current and future readiness.

Question. In your view, should the Army trade-off requirements within a program in order to make that program affordable?

Answer. Yes, the Army already does this with all of its programs that are in development, and should continue to do so. As part of a program's affordability assessment, the Army must assess the individual cost of each capability associated with the proposed system and ensure the overall program remains affordable.

ARMY WEAPON SYSTEM PROGRAMS

Question. What is your understanding and assessment of the following research, development, and acquisition programs?

Ground Combat Vehicle (GCV).

Answer. The Army's IFV is reaching the limit of its capacity to receive upgrades that have proven critical for soldiers in combat operations. A new IFV remains a key requirement and priority for the Army. The GCV program is currently geared toward providing the Army with an IFV capability for rapidly deploying an over-matching infantry squad anywhere on the battlefield. Nevertheless, the current fiscal realities have challenged the Army's ability to afford ongoing development of a GCV program.

Question. Stryker Combat Vehicle, including the Stryker Mobile Gun variant.

Answer. The Stryker Combat Vehicle is an acquisition program that has proven to be highly successful in Iraq and Afghanistan. Blast-deflecting double v-hull improvements on the Stryker Combat Vehicle have saved lives in Afghanistan, and the Army continues to procure vehicles under existing equipping plans. The Stryker Mobile Gun System has also performed well in Iraq and Afghanistan.

Question. Joint Light Tactical Vehicle (JLTV).

Answer. The JLTV is a Joint Army and Marine Corps development program which consists of a Family of Vehicles (FoV) with companion trailers that are capable of performing multiple mission roles. The JLTV will be designed to provide protected, sustained, networked mobility for personnel and payloads across the full spectrum of military operations. JLTV addresses force protection performance and payload limitations in current High Mobility Multipurpose Wheeled Vehicles (HMMWVs), while providing more off-road mobility, fuel efficiency, and reliability than Mine-Resistant Ambush Protected All-Terrain Vehicles.

Question. M1 Abrams tank modernization.

Answer. The Abrams Tank remains the best tank in the world, and the age of the current tank fleet is low—only 3 to 4 years on average. As a result of experiences in Iraq, the Army plans incremental improvements to the Abrams tank in order to buy back power deficiencies, improve protection, and provide the ability to accept future network and protection upgrades. These improvements will enable the Abrams Tank to maintain its leading edge in measures of survivability, lethality, and maintainability through 2050.

Question. M2 Bradley Infantry Fighting Vehicle modernization.

Answer. The Bradley FoV has been an integral part of the Army's force structure for decades, but requires modernization. The Army plans to make incremental improvements to the Bradley variants that will buyback power deficiencies, improve protection, and provide the ability to accept future network and protection upgrades. These improvements will enable the Bradley FoV to play a vital role in the Army for years to come.

Question. Paladin Integrated Management (PIM) Self-Propelled Howitzer modernization.

Answer. The Army is fully committed to PIM, as it is one of the Army's most critical modernization programs. The PIM system will replace the Army's current M109A6 Paladin Howitzer starting in fiscal year 2017. PIM's new chassis will provide additional size, weight, and power capacity over the current Paladin fleet. The first PIM system is expected to be delivery in mid-2015. PIM will provide the Army

Armored Brigade Combat Team with a highly responsive indirect fire system capable of keeping pace with the Abrams and Bradley.

Question. Armored Multipurpose Vehicle (AMPV).

Answer. The AMPV will replace the M113 FoV, which has become operationally irrelevant due to inadequate mobility, survivability, and force protection, as well as the lack of size, weight, power, and cooling necessary to incorporate future technologies and the Army network. The AMPV will replace five M113 FoV mission roles with the following variants: Mission Command, Medical Treatment, Medical Evacuation, General Purpose, and Mortar Carrier.

Question. OH-58D Kiowa Warrior modernization.

Answer. The Kiowa Warrior has been a reliable capability for our Army for many years and, at this time, the Army is conducting a holistic review of the Aviation portfolio that may potentially involve a restructuring. It is my understanding that any restructuring of the force would likely look to divest legacy capabilities and retain the Army's most modern, dual-engine platforms.

Question. AH-64E Apache modernization.

Answer. The Apache is the Army's only heavy combat helicopter and is an invaluable asset on the modern battlefield, providing an immeasurable contribution to combat power. The Apache's history dates back to the 1980s, and the latest version, AH-64E, is the second remanufacture of the proven system. Remanufacturing and upgrading such a sophisticated asset is far more economical than developing a new system, especially since the Apache is unmatched by any other combat helicopter in the world.

Question. Armed Aerial Scout (AAS).

Answer. The Army has explored the availability of an affordable aircraft that will meet the AAS requirement through a series of voluntary flight demonstrations; however, it has been determined that there is currently no commercially available AAS alternative that would not require significant development. At this time, the Army is assessing the Aviation portfolio holistically to determine courses of action to address this requirement.

Question. Warfighter Information Network-Tactical (WIN-T).

Answer. The WIN-T program provides the Army a secure, high-speed, high-capacity networking backbone for mobile, ad-hoc networks in tactical environments, and underpins the Army's Tactical Network modernization efforts. Developmental efforts to date have supported successful development of key networking capabilities that have been tested and are currently deployed and utilized by warfighters in Afghanistan today. WIN-T is vital to the Army's endeavors to develop and field networks for tactical environments.

Question. Joint Tactical Radio System.

Answer. These radios comprise a critical aspect of the Army's and the DOD's network modernization effort and are the foundation of the Army's tactical network and communications. The radios provide manportable, vehicle-mounted, and aerial communication and data transport services for the Army's tactical network. It is my understanding that the Army is developing and executing a full and open competition acquisition strategy designed to leverage industry innovation and capability.

Question. Joint Multi-Role Rotorcraft Program.

Answer. I understand that the Joint Multi-Role Technology Demonstrator is a Science and Technology effort to help inform capabilities and requirements for the planned Future Vertical Lift-Medium Program.

Question. Small arms modernization.

Answer. The Army's Small Arms Modernization Program provides for the maturation, demonstration, testing, and evaluation of emerging technologies in small arms. The Army is focused on developing improvements that will enhance the lethality, target acquisition and tracking, fire control, training effectiveness, and reliability of weapons. Specific focus areas include maturing technologies that demonstrate lightweight materials, wear resistant/protective/anti-reflective coatings, observational/situational awareness improvements and equipment enhancements. These improvements would provide benefits to weapons, fire control equipment, optics, gun barrels, training devices, suppressors, component mounts, weapon mounts, and weapon/ammunition interfaces with the ultimate goal of providing soldiers world-class weapons systems for the current and future battlefield.

Question. Personal protective equipment modernization.

Answer. The Army provides soldiers with the best protective equipment in the world. Over the past 10 years, the Army has fielded, and continuously improved, protective equipment that saves soldiers' lives. Soldiers are equipped with a complementary suite of protective capabilities (body armor/combat helmets) that guard against multiple threats associated with ballistic, blast, and blunt force events, including ballistic projectiles and fragmentation from Improvised Explosive Devices

(IEDs). The Army is committed to making additional improvements to its current state-of-the-art personal protection equipment, to include reductions in weight, innovative solutions like the Pelvic Protection System, and improved performance against bodily injuries such as traumatic brain injury.

Question. Distributed Common Ground System (DCGS).

Answer. The Distributed Common Ground System-Army (DCGS-A) provides Army operational and tactical commanders automated intelligence capabilities and connectivity to the Defense Intelligence Information Enterprise (DI2E). It processes, fuses, and exploits data and information, and provides the Army the ability to receive national, theater, joint, and tactical sensor data; task sensors; and control select Army sensors. DCGS-A is the Army's enterprise solution to Intelligence, Surveillance, and Reconnaissance (ISR) requirements. Because DCSG-A is primarily a software system, the acquisition strategy emphasizes evolutionary development over the life of the program.

MINE-RESISTANT AMBUSH PROTECTED VEHICLES

Question. What is your understanding and assessment of the Army's long-term strategy for the retention, disposal, utilization, and sustainment of its large Mine-Resistant Ambush Protected (MRAP) vehicle fleet?

Answer. The Army intends to keep more than 8,500 of the best variants of MRAPs, while divesting itself of older, less capable versions that are too costly to ship, reset, upgrade, and sustain. Some MRAPs will be kept in CONUS for training. Others will be maintained in pre-positioned stocks strategically placed around the globe, where they will be ready for future contingencies. Vehicles that the Army does not keep will be made available to other agencies, activities, and nations. I believe the strategy for MRAPs is appropriate, and, if confirmed, I will work with the Secretary of the Army to ensure the MRAP strategy is continually refined and assessed.

EQUIPMENT REPAIR/RESET

Question. Congress has provided the Army with billions of dollars over the years to cover the costs to repair and replace equipment worn out by combat operations and prepare forces for rotations in support of operations in Afghanistan and previously in Iraq.

In your view, is this level of funding sufficient to not only prepare Army forces for OIF/OEF but to also improve the readiness of non-deployed forces for other potential contingencies?

Answer. A fully-funded Reset program would ensure that equipment lost in theater is replaced and equipment degraded by prolonged use in harsh environments is returned to a fully ready state. The extreme temperature variations and high altitude in Afghanistan add stress to aircraft engines and airframes as much as five times greater than the Army's normal operations tempo, while the rugged mountain terrain in that country accelerates wear and tear on ground equipment. The sequestration in fiscal year 2013 negatively impacted the Army Reset program, but the Army's fiscal year 2014 request will begin to address funding shortfalls in the program and improve equipment readiness. Due to the length of time required to plan and execute depot repair programs, Reset funding must continue for 3 years after the last piece of equipment leaves Afghanistan. Major weapon systems and equipment requiring Reset include aircraft, weapons, radios, MRAPs, and tactical wheeled vehicles.

Question. Is it your understanding that our repair depots are operating at full capacity to meet rebuild and repair requirements for reset?

Answer. It is my understanding that the Army constantly evaluates depot production requirements and adjusts its needs to meet current and anticipated demands and funding levels. Currently, our depots are operating at the levels required to meet Army needs. The Army does have extra capacity above the current operating levels and can increase production through additional overtime or hiring actions in response to any funded need to accelerate repair of equipment returning from current operations.

Question. What additional steps, if any, do you believe should be taken to increase the Army's capacity to fix its equipment and make it available for operations and training?

Answer. I do not believe that any additional steps are required at this time to increase the Army's capacity to fix its equipment. The industrial base, both organic and commercial, has successfully demonstrated that it has the capacity to respond to the needs of the Army for operations and training.

Question. What impact do you believe the decision to send additional Army forces to Afghanistan is likely to have on equipment available for continued operations in Iraq and for non-deployed unit training at home?

Answer. Withdrawn by committee.

Question. What are your views regarding the Army's stated requirement that it needs 3 years of overseas contingency operations funding post-Afghanistan retrograde to reset the force?

Answer. The Army has a deliberate and well-considered plan to retrograde and Reset equipment out of Afghanistan. The 3-year period is the actual time needed for some equipment to be retrograded from theater, inducted into a depot, and then repaired. Indeed, many of the Army's more complex systems, such as aircraft, take more than 1 year to complete the induction and repair process alone, and aircraft with battle damage will often take 18–24 months to repair. Over the last year, depot-level maintenance Reset workload has exceeded 87,000 pieces of equipment, and the Army has Reset more than 292,000 pieces of other equipment in that same period.

ARMY-RELATED DEFENSE INDUSTRIAL BASE

Question. What is your understanding and assessment of the systems and processes for identifying, evaluating, and managing risk in the Army's organic and commercial defense industrial base?

Answer. The Army is actively engaged in several efforts to identify, evaluate, and manage risk in its organic and commercial defense industrial base. The Army is working with OSD's Manufacturing and Industrial Base Policy office in the ongoing sector-by-sector, tier-by-tier effort that is designed to establish early-warning indicators of risk at all the defense supply-chain tiers. The Army, in cooperation with industry, is conducting a comprehensive combat vehicle portfolio industrial base study and a similar study for tactical wheeled vehicles. The Army has also created a strategic plan to identify and retain critical skill sets within the organic industrial base. The Army recognizes that a healthy industrial base is a treasured national security asset.

Question. If confirmed, what changes, if any, would you pursue in systems and processes to improve identification, monitoring, assessment, and timely actions to ensure that risk in the Army-relevant sectors of the defense industrial base is adequately managed in order to develop, produce, and sustain technically superior, reliable, and affordable weapons systems?

Answer. If assessed existing systems and processes used to identify risk to the industrial base, monitor its overall health, and I would implement any improvements deemed appropriate to ensure that it remains reliable, cost-effective, and prepared to meet strategic objectives.

ARMY SCIENCE AND TECHNOLOGY

Question. What is your understanding and assessment of the role that Army science and technology programs have played and will play in developing capabilities for current and future Army systems?

Answer. Over more than a decade of war, the world has witnessed the value and impact that technology brings to the battlefield and how capabilities, enabled by technology, are critical to our warfighters. The Army's Science and Technology mission is to enable soldiers to continue to dominate the battlefield, today and tomorrow. To that end, the Army has established a 30-year modernization plan to guide Science and Technology investments. I believe that to prevent, shape, and win future conflicts in an ever-changing world, Army Science and Technology must deliver timely technological solutions that address top priority capability gaps.

Question. Given the projected budget reductions, how will you ensure that Army science and technology programs will successfully transition to operational warfighting capabilities?

Answer. Science and Technology remains a critical investment to ensure our soldiers maintain a technological edge over potential adversaries. These investments are required to develop and mature enabling technologies. If confirmed, I would support efforts to preserve investment in this area and ensure that it successfully transitions to the Army's current and future acquisition programs. Given the great uncertainty about, and increasing complexity of, future national security threats, it is especially important that the Army also continues investing in basic research and development.

Question. If confirmed, what metrics would you use to judge the value and the investment level in Army science and technology programs?

Answer. If confirmed, I would consider a variety of metrics to assess the value of our investment in science and technology programs, to include measures evaluating our success in transitioning these efforts into fielded capabilities, as well as our effectiveness in fully leveraging investment by industry, other Services, and other government research institutions.

ARMY LABORATORIES AND RESEARCH, DEVELOPMENT, AND ENGINEERING CENTERS

Question. What role should Army laboratories play in supporting current operations and in developing new capabilities to support Army missions?

Answer. Army laboratories deliver technology-enabled solutions needed for current conflicts and help develop technologies that will enhance the Army's future capabilities that will be needed to prevent, shape, and win future conflicts.

Question. If confirmed, how will you ensure that the Army laboratories and research and development centers have a high quality workforce, laboratory infrastructure, resources, and management, so that they can continue to support deployed forces and develop next generation capabilities?

Answer. If confirmed, I promise to learn more and in great detail about the specific issues and challenges facing Army laboratories and centers in order to best ensure they have the necessary tools and personnel to effectively perform their missions. I fully recognize the important role that the science, technology, engineering, and mathematics workforce and laboratory facilities have in facilitating the Army of the future.

Question. Do you support the full utilization of authorities established by Congress under the Laboratory Personnel Demonstration program that is currently being run in many Army Research, Development, and Engineering Centers (RDEC)?

Answer. Yes, I have been informed that the authorities established by Congress under the Laboratory Personnel Demonstration Program have given the laboratories and centers the flexibility and tools necessary to manage and incentivize Army personnel performing this critical function.

Question. Do you believe that all RDECs in the Army's Research, Development, and Engineering Command (RDECOM) need enhanced personnel authorities in order to attract and retain the finest technical workforce? Would you support expansion of the Laboratory Personnel Demonstration authorities to all of RDECOM's laboratories and engineering centers?

Answer. It is my understanding that all the RDECOM laboratories and centers are currently part of the Laboratory Personnel Demonstration, and that this gives important management flexibility for the laboratory directors to shape their workforce and remain competitive with the private sector. If confirmed, I would assess the effectiveness of these existing authorities and recommend changes as needed and appropriate.

Question. Do you believe that the Army's laboratories and engineering centers should have a separate, dynamic personnel system, uniquely tailored to support laboratory directors requirements to attract and retain the highest quality scientific and engineering talent?

Answer. If confirmed, I would fully examine this issue to better understand the potential benefits and costs of such a system. However, with the exception of a few organizations, it is my understanding that the Laboratory Personnel Demonstration program provides the laboratory directors with the ability to attract and retain the highest quality scientific and engineering personnel.

Question. How will you assess the quality of Army laboratory infrastructure and the adequacy of investments being made in new military construction and sustainment of that infrastructure?

Answer. If confirmed, I would engage with the appropriate Army organizations to better understand the challenges facing our Science and Technology infrastructure and develop solutions to ensure we are making the necessary investments in this important area.

ARMY TEST AND EVALUATION EFFORTS

Question. If confirmed, how will you ensure that the Army's test and evaluation infrastructure is robust enough to ensure that new systems and technologies are tested to verify their combat effectiveness and suitability?

Answer. If confirmed, I promise to become more keenly acquainted with the specifics regarding test infrastructure capabilities, and I will work to ensure the appropriate level of funding for test and evaluation infrastructure and instrumentation is budgeted.

Question. What metrics will you use to assess the quality of the Army's test and evaluation infrastructure?

Answer. At this time, I do not have sufficient information to adequately answer this question; however, if confirmed, I would assess the Army's capability to accomplish all essential testing requirements.

Question. If confirmed, how would you ensure that weapon systems and other technologies that are fielded by the Army are adequately operationally tested?

Answer. If confirmed, I will ensure that operational test protocols are observed, and I will support the continuation of the Army's current practice of conducting independent operational testing by organizations not associated with the programs undergoing test and evaluation.

ARMY INFORMATION TECHNOLOGY PROGRAMS

Question. What major improvements would you like to see made in the Army's development and deployment of major information technology systems?

Answer. Information technology (IT) is critically important to both industry and government. For the Army, IT is an enabler that provides warfighters an edge in combat operations. On the business side of the Army, IT is used to automate complex, critical business processes. If confirmed, I would work to ensure that the development and deployment of major IT systems facilitate simplifying, streamlining, and clarifying the interdependencies in the Army's Enterprise Architecture.

Question. How will you encourage process and cultural change in organizations so that they maximize the benefits that new enterprise information technology systems can offer in terms of cost savings and efficiency?

Answer. Leadership.

Question. What is the relationship between Army efforts at implementing enterprise information technology programs and supporting computing services and infrastructure to support Army missions and efforts being undertaken by the Defense Information Systems Agency?

Answer. The Army is in close, regular collaboration with the Defense Information Systems Agency (DISA). As DISA's largest supported organization, the Army believes that this partnership is critical. If confirmed, I would continue the trend of developing Army enterprise information technology from a joint requirements perspective. Current examples of this approach include Defense Enterprise Email, the Joint Information Environment and enterprise license agreements that leverage the buying power of the entire DOD.

CONTRACT SUPPORT FUNCTIONS

Question. DOD has engaged in the privatization of many of its support functions. As a result, the Department now relies heavily on contractors to perform acquisition, budget, and financial management functions that are critical to the execution of the Department's mission. Senior DOD officials have informed the committee both formally and informally that, because of reductions in the acquisition work force, the Department now lacks the capability to effectively oversee the work performed by its support contractors.

Do you believe that the Army has become too reliant upon contractors to perform critical functions?

Answer. If confirmed, I will examine this issue very closely. It is important to ensure that inherently governmental functions are not outsourced, and, if confirmed, I will scrutinize those areas where the distinction may have been blurred. From an operational perspective, the Army has processes in place to identify critical functions that should rarely be outsourced; if an Army command believes that using contractors for a critical function poses unacceptable operational risk, it is able to bring that work in-house.

Question. What steps, if any, do you believe the Army should take to ensure that it has the resources it needs to provide effective oversight for its support contractors?

Answer. In order to ensure the Army has the resources it needs to provide effective oversight for its support contractors, I believe that an appropriately sized and sourced workforce is necessary. A critical component of effective compliance is ensuring the Army has sufficient organic personnel for oversight, to include a robust number of contracting officer representatives supporting the operational and institutional Army. If confirmed, I will work toward this end.

Question. The privatization of functions previously performed by DOD employees now extends to many functions performed on the battlefield. As a result, many functions that were performed by DOD personnel as recently as the Gulf War have been performed by contractor personnel in the current conflicts in Iraq and Afghanistan.

Do you believe that DOD has reached, or exceeded, an appropriate balance in providing for the performance of functions by contractors on the battlefield?

Answer. The use of the appropriate form of labor for specific functions is an important issue that requires constant rebalancing as missions and priorities change. I believe that DOD needs to evaluate functions on a case-by-case basis and source them as appropriate. The force of the future may not look the same as yesterday's force, or even the current force. The Army must do its part to take into account current, specific circumstances when determining the appropriateness of a labor source.

Question. Where do you believe that DOD should draw the line between functions on the battlefield that can and should be performed by contractors and functions that should only be performed by DOD personnel?

Answer. I believe it is vital that the Army retain sufficient critical enablers within the Active and Reserve components so that we can reduce the need for contractors on the battlefield. The Army must also ensure that it retains essential oversight personnel in the case of unforeseen requirements. Any use of contractors on the battlefield should be based on an appropriate and comprehensive assessment of risk.

Question. Do you believe that contractors on the battlefield are subject to appropriate levels of control and accountability for their actions, or would additional regulation be appropriate?

Answer. I believe that we must continually evaluate how effective our policies and regulations are at maintaining appropriate levels of control and accountability. The true challenge is ensuring proper oversight and enforcement of our existing regulations.

PRIVATE SECURITY CONTRACTORS

Question. The Special Inspector General for Iraq Reconstruction reported that Federal agencies including DOD have spent more than \$5 billion for private security contractors in Iraq since 2003.

Do you believe the Army should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. Contractors have served alongside soldiers throughout our Nation's history. While contractors may not always be the preferred method, they sometimes provide resource options critical to meeting commanders' requirements. The key is determining and clearly demarcating the line between soldier and contractor responsibility according to the situation. In certain cases, contractors may not be appropriate. In other cases, contractors may be the best sourcing solution to quickly fill a critical need on short notice.

I believe that unit commanders and leaders at all levels play a valuable role in determining those missions best suited for contractors depending upon the situation. If confirmed, I will ensure that commanders have the training, experience, and flexibility to make these difficult choices. For example, in particular local political situations, capabilities such as entry control and convoy security may be best handled by a contractor. In other locations and times, this may not be the case.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq?

Answer. I do not believe that time has shown, or that history will prove, the use of private security contractors to have undermined accomplishment of our objectives in Iraq.

While contractors may augment Army organizations by freeing up soldiers to conduct more dangerous combat operations, it is certainly critical to ensure that contractors possess the appropriate training and situational awareness. Contractors, just like their civilian and military counterparts, must understand their role and consistently function in support of operational and strategic objectives in an area. When contractors are untrained or unaware of the impact of their actions, they may negatively impact strategic-level objectives, resulting in long-term consequences. (The same can also be said for government personnel, whether civilian or military, but there is more flexibility to quickly effect change in those populations.) I believe that proper oversight and control mechanisms are imperative to ensure that the actions of the military, government civilians, and contractors are fully consistent with law and durably support the objectives of the United States.

Question. What steps would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. The Army and DOD have implemented policies to increase oversight and management of Private Security Contractors (PSCs) accompanying the force. These include contract requirements for training PSC employees on the authorized use of force, increasing use of past performance databases, and prosecuting contractor em-

ployees that violate use of force laws under the Military Extraterritorial Jurisdiction Act of 2000. Successful oversight is rooted in relevant training for contracting officers and commanders, vigilant monitoring and enforcement of applicable laws and regulations, and awareness of the full range of corrective measures available to the Government in the event of non-compliance. If confirmed, I will do my utmost to ensure we build on these past improvements.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in the past have testified that the military services under-invest in both the maintenance and recapitalization of facilities and infrastructure compared to private industry standards. Decades of under-investment in DOD installations has led to substantial backlogs of facility maintenance activities, created substandard living and working conditions, and made it harder to take advantage of new technologies that could increase productivity. These challenges have been exacerbated by current budget pressures.

What is your assessment of Army infrastructure investment?

Answer. The majority of Army infrastructure and facilities are in good shape. This is the result of significant investments in sustainment and construction over the 10-year period ending in 2012. These construction investments significantly modernized facilities that supported the Army during transformation and realignment. However, the Budget Control Act for 2011 reduced the Army's ability to make continued and necessary investments in our infrastructure and facilities. Prolonged under-investment in sustainment will cause Army infrastructure and facilities to degrade much faster and, in turn, will increase energy consumption and overall operating costs.

Question. If confirmed, what actions, if any, would you propose to increase resources to reduce the backlog and improve Army facilities?

Answer. As the Army's end strength and force structure decline alongside its available funding, millions of dollars will be spent maintaining underutilized buildings and infrastructure. Trying to spread a smaller budget over the same number of installations and facilities will result in rapid decline in the condition of Army facilities. To save money and free up resources, the Army must reduce energy consumption at installations, reduce lease costs by moving to facilities opened up through restationing and force reduction decisions, and synchronize routine stationing actions to minimize costs. Greater efficiency is the watchword.

BASE CLOSURE AND REALIGNMENTS

Question. DOD has requested another Base Realignment and Closure (BRAC) round.

Do you believe another BRAC round is necessary? If so, why?

Answer. Yes, for the many compelling reasons stated in my answer to question 76. If the Army is unable to make the tough decisions necessary to identify inefficiencies and eliminate unneeded facilities, scarce resources will be diverted away from training, readiness, and family programs. Additionally, the quality of Army installation services that support the warfighter will suffer.

Question. If confirmed, and if Congress were to authorize another BRAC round, how would you go about setting priorities for infrastructure reduction and consolidation within the Department of the Army?

Answer. BRAC legislation provides for developing closure and realignment recommendations based on specific selection criteria. I would prioritize Army recommendations consistent with congressionally-approved BRAC selection criteria, Army force structure, and stationing plans.

Question. If confirmed and if Congress were to authorize another BRAC round, what is your understanding of the responsibilities of the Army in working with local communities with respect to property disposal?

Answer. I understand that BRAC law ordinarily provides for local communities, through designated Local Redevelopment Authorities (LRA), to prepare reuse plans that will guide future development and use of the property. The Army gives substantial deference to those plans in disposing of the property. BRAC law also usually provides Economic Development Conveyance authority, under which the Army can convey property directly to a LRA to further enable those local reuse plans to be implemented.

Question. It has been noted repeatedly that the 2005 BRAC round resulted in major and unanticipated implementation costs and saved far less money than originally estimated.

What is your understanding of why such cost growth and lower realized savings have occurred?

Answer. I understand that BRAC 2005 was primarily focused on transformation. Nearly half of the recommendations from 2005 were intended to take advantage of opportunities that were available under BRAC authority to move forces and functions to where they made sense, even if doing so would not save much money. This transformation effort cost over \$29 billion and resulted in a small proportion of savings, but it allowed the Army and DOD to redistribute its forces and personnel within its infrastructure in a way that is typically difficult when not in the middle of a BRAC round. The remaining recommendations implemented under BRAC 2005 paid back in fewer than 7 years—even after experiencing cost growth.

Question. How do you believe such issues could be addressed in a future BRAC round?

Answer. Unlike BRAC 2005, which was implemented during a time that drove the need for transformation, a future BRAC round would be implemented as Army end strength is declining and the need for efficiencies is paramount. Consistent with BRAC law and selection criteria, the Army would make savings a priority in the development of specific recommendations.

END STRENGTH REDUCTIONS

Question. The Department last year laid out a defense strategy that proposes an eventual end strength of 490,000 for the Army, which the Army is on pace to hit by the end of 2015.

What is your understanding of the Army's ability to meet these goals without forcing out many soldiers who have served in combat over the past 10 years with the implicit promise that they could compete for career service and retirement?

Answer. The Army is committed to retaining the best qualified and most talented soldiers. Competitive selection boards and retention programs will enable soldiers currently serving in the Army, including those who have served in combat, to compete for continued service. Reduction programs will focus on overstrength Military Occupational Specialties, identifying those that should depart our ranks through a qualitative assessment of potential for continued contribution.

Question. To what extent will the Army have to rely on involuntary separations in 2014 through 2018? How will sequestration affect this?

Answer. I understand that the Army will rely on involuntary separations to meet end strength goals through fiscal year 2017. The present assessment is that continued sequestration is unlikely to impact these programs unless current end strength targets change.

Question. What programs are in place to ensure that separating and retiring servicemembers are as prepared as they can be as they enter a struggling economy?

Answer. In coordination with the Department of Veterans Affairs and the Department of Labor, the Army has developed an enhanced version of its Transition Assistance Program. Called the Army Career and Alumni Program (ACAP), this commander's program features soldier counseling and training sessions, employment and career workshops, and education opportunities, all while maintaining leadership focus on, and involvement in, each soldier's transition process. ACAP affords soldiers the opportunity to prepare for successful post-Service careers.

Question. How fast can the Army responsibly and fairly reduce end strength while maintaining the integrity and readiness of combat units?

Answer. The Army believes that it can responsibly reduce end strength by 15,000 to 20,000 per year, while still maintaining operational readiness.

Question. How does the Bipartisan Budget Act of 2013, which restores \$22 billion to the DOD budget in 2014, and an additional \$9 billion in 2015, affect the Army's end strength reduction plans?

Answer. I have been informed that the Bipartisan Budget Act and the funds it restores will not impact current personnel drawdown programs.

Question. What is your understanding of the need for additional force shaping tools requiring legislation beyond what Congress has provided the past few years?

Answer. The Army believes that, if reduction measures are required beyond fiscal year 2017, additional tools may be required to target specific overstrength skills and occupational specialties.

VOLUNTARY AND INVOLUNTARY FORCE SHAPING TOOLS

Question. Over the past several years, Congress has provided the services force shaping tools to allow them to accomplish their drawdowns responsibly and humanely while maintaining grade structure and critical specialties.

What voluntary and involuntary measures does the Army plan to use in the next 2 years to reach and maintain its target end strength of 490,000?

Answer. The Army will continue to support requests for voluntary separation, where possible. In some cases, service commitments may be waived to allow soldiers to separate prior to fulfilling their remaining obligations. Involuntary separations will continue through fiscal year 2015 in support of a reduced end strength (490,000). Officer Separation Boards, Selective Early Retirement Boards, Selective Continuation, Selective Retention Boards, Qualitative Service Program, Precision Retention and a reduction in overall accessions will allow the Army to meet end strength goals.

Question. How will the Army ensure that it retains the best personnel, given that these individuals often have multiple opportunities in the private sector and may be more likely to accept monetary or other incentives to leave early?

Answer. The Army will work to sustain robust promotion selection rates as a means to incentivize continued service for the best-qualified soldiers. Existing programs allow the Army to identify and retain the best talent while releasing those soldiers serving in over-strength skill sets. Soldiers who desire to leave the Army prior to fulfilling remaining service obligations may request separation if they meet criteria to participate in early release programs.

Question. How does the Army plan to attain the proper grade mix in senior enlisted and officer communities to avoid the grade disparities that can take years to correct? In your view, does the Army require any additional legislative authority to allow end strength reductions by offering early retirement or other early separation incentives?

Answer. End strength reduction programs target soldier populations in which the inventory exceeds requirements. The Army proposes to shape the future force based on grade and skill through a combination of reduced promotion opportunities, involuntary losses, and decreased demand and accessions. The Army will release soldiers in overstrength areas based on specific current and future requirements. I have been informed that the Army will not require any additional legislative authority to meet end strength requirements for fiscal year 2015.

ANNUAL INCREASE IN RATES OF BASIC PAY BELOW THE EMPLOYMENT COST INDEX

Question. The Department requested an across-the-board pay raise for 2014 for military personnel of 1 percent, versus a 1.8 percent rise in the Employment Cost Index (ECI) benchmark, and has indicated that in order to restrain the growth of personnel costs, similar below-ECI pay raises may be necessary over the next several years.

What is your assessment of the impact on recruiting and retention of pay raises below ECI in 2015 through 2018?

Answer. Compensation is, and has always been, an important component in motivating men and women to join the Army and remain in service for a career. The precise impact of lower pay raises on future recruiting and retention efforts is unclear. But continued authority to leverage limited bonus and targeted incentive programs may well mitigate any adverse impact of this proposal, especially in critical specialties.

ANNUAL INCREASE IN RATES OF RETIRED PAY BELOW THE CONSUMER PRICE INDEX

Question. Section 403 of the recently enacted Bipartisan Budget Act of 2013 reduces the annual cost-of-living adjustment (COLA) for military retirees under the age of 62 to CPU minus 1 percent. Monthly retired pay for those individuals would be readjusted upward at age 62 as if the COLA reduction had not taken place and retirees would receive full annual COLAs thereafter.

In your view how will this change to the law impact the Army's planning and programming assumptions about projected force and end strength requirements, retention, and advancement opportunities?

Answer. It is unclear whether or how this provision of law may affect retention or the propensity of individuals to serve in the Army in the future. I have been informed by experts in the Army that this change in law will have little to no impact on current promotions, which are based on requirements. The Army is uncertain about the impact this provision will have on end strength, as retention is a significant driving force of this number.

Question. What impact will this change have on the Army's annual budget and personnel costs?

Answer. This adjustment will reduce the amount the Army is contributing to trust funds that cover expenses related to military retirement payments for our soldiers. While the associated Army savings will approach \$200 million per year, I am concerned about the impact on recruiting, retention, and soldiers and their families.

Question. Do you support section 403 of the Bipartisan Budget Act of 2013? Why or why not?

Answer. Compromise is the art of politics. I understand that the enacted adjustment to COLA for military retirees will certainly help DOD control the growth of military compensation costs; it is difficult to project the degree, if any, to which this change will impact recruiting and retention. Nonetheless, adjustments to the COLA are not, standing alone and in absence of countervailing benefits, a particularly desirable course.

RELIGIOUS GUIDELINES

Question. In your view, do Department of the Army policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other beliefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. Yes. Army policies appropriately accommodate the varied religious practices of soldiers, including those with no religious belief. Army and DOD policies are intended to protect both the free exercise of religion, while avoiding the appearance of an official endorsement of any particular religion. If confirmed as Under Secretary, I will ensure that these policies are strictly enforced.

Question. Under current law and policy, are individual expressions of belief accommodated so long as they do not impact good order and discipline?

Answer. Yes. The Army values the rights of soldiers to observe and practice their diverse religious faiths, or to have no religious faith at all. Army policy permits soldiers to request waivers of regulations when necessary to accommodate religious practices, and these waivers will be granted unless a compelling military necessity otherwise exists.

Question. In your view, do existing policies and practices regarding public prayers offered by Army chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Yes. Army chaplains are well-trained to provide prayers in pluralistic settings, where sensitivity to diverse religious beliefs is at a premium. At the same time, chaplains, while providing ritualistic services on many occasions in both private and public settings, are never required to act in a manner inconsistent with the tenets of their endorsing agencies or in conflict with their individual convictions, beliefs, or religious traditions.

Question. Recent press coverage focused on two separate events involving unit-level Army equal opportunity training at Fort Hood and Camp Shelby that incorporated the views of an outside organization that certain organizations were "extremist" because of their faith-based opposition to same-sex relationships. The training appeared to officially endorse the views of the outside organization because it did not expressly state that the views of the outside organization did not represent the views of the Department of the Army or DOD. As a result some individuals who received the training were confused about the official views of the Army and became concerned that their affiliation with the organizations that were inappropriately identified as "extremist" could subject them to administrative or disciplinary action in accordance with Army policy prohibiting active support to extremist organizations. In fact, two of the organizations are included in the annual Combined Federal Campaign to which members of the Army may make charitable contributions.

What are your views on the permissible extent to which an individual soldier or Army civilian employee may express, in public or in private, sincerely-held personal views based on religious belief or conscience to oppose recognition and acceptance of same sex relationships or marriage?

Answer. Soldiers and Army civilian employees may express their sincerely-held personal beliefs, whether based on religious tenet or philosophical conviction, about the acceptance of same-sex relationships or same-sex marriage.

Question. If confirmed, what actions would you take to establish policy to clearly articulate the appropriate balancing of expressions of sincerely-held religious belief or matters of conscience by individual soldiers or civilian employees in the Army workplace?

Answer. If confirmed as Under Secretary, I will ensure that the Army always protects the constitutional right of soldiers and Army civilians to hold and express religious beliefs and matters of conscience.

Question. If confirmed, what actions would you take to ensure that the development and presentation of training delivered within the Department of the Army is properly supervised and does not include views from organizations outside the Army

or DOD that are inconsistent with official policy except when including those views is essential for the purpose of the training and are properly cited as the views of an outside organization?

Answer. If confirmed as Under Secretary, I will support and sustain the measures, recently directed by the Secretary of the Army, that require all training materials and instruction to reflect the official policy of the Department of the Army. It is inappropriate for training presentations to include material that is found on the internet or gleaned from some other informal source which is not approved by the Army. This action by the Secretary of the Army will ensure that incidents such as those referenced in this question do not occur again.

Question. What is your assessment of measures taken at the U.S. Military Academy (USMA) to ensure religious tolerance and respect?

Answer. The USMA is working diligently to create an environment in which Cadets, faculty, and staff, are supported in their personal faith choices, whatever those may be. USMA leaders have reached out to members of all faiths and have implemented policies to ensure religious tolerance and respect. If confirmed, I will see that these values of religious tolerance and respect are realized at USMA.

RECRUITING AND RETENTION

Question. How would you evaluate the status of the Army in successfully recruiting and retaining high caliber personnel?

Answer. I understand that the fiscal year 2013 Army recruiting mission was extremely successful, attracting high-quality recruits comprised of 98 percent High School Diploma Graduates and only 1.2 percent Category IV accessions across the Active and Reserve components. These new soldiers are a reflection of the best of America, highly qualified and with a genuine desire to serve.

Although consistently succeeding in meeting retention needs, the Army retains only the most highly-qualified soldiers. This is a remarkable feat given that, in recent years, the Army has increased retention standards, demanding the highest qualifications and performance from those who would remain in the force. The soldiers the Army enlists and retains today and in the near future, are among the smartest, most fit, and most capable young people in our Nation.

Question. How would you evaluate the recruiting and retention of uniformed and civilian health care professionals?

Answer. The Army has a two-pronged approach for recruiting military health professionals: directly recruiting fully-qualified health care professionals for military health care positions and recruiting individuals into various military health care training programs, such as the Health Professions Scholarship Programs. The Army has been very successful in recruiting students into these training programs, upon completion of which the student incurs an active duty service obligation. However, the recruitment of fully-qualified health care providers remains a challenge, exacerbated by national shortages in various physician subspecialties. The Army uses a variety of retention incentives, such as Special Pays and Professional Health Education Training opportunities that have proven very effective in retaining military healthcare providers.

Recruiting BH professionals continues to present a particular challenge. In 2013, more than 2,900 prescreened health care professional candidates were referred; of these, approximately 625 were behavioral health (BH) professionals. The ability of colleges and universities to produce more qualified BH professionals has not kept pace with the ever-increasing need for BH services. The Army must compete with other government agencies, such as the Department of Veterans Affairs, as well as the private sector, to recruit from the field of qualified candidates. If confirmed as Under Secretary, I will support efforts to reinforce our recruiting and retention successes, with a view to positioning the Army to compete favorably as an employer of choice.

Question. What initiatives would you take, if confirmed, to further improve Army recruiting and retention, in both the Active and Reserve components, including health care professionals?

Answer. Inevitably, the recruiting environment will become more challenging. If confirmed, I will work to ensure accession programs are appropriately resourced to allow the Army to continue to recruit and retain the highest quality soldiers. I have been informed of several promising initiatives, including working with the Department of Education to improve recruiter access in public schools, evaluating non-cognitive testing measures for applicant screening, and facilitating senior leader engagement with students and leaders at top-tier educational institutions across the Nation—particularly those hosting undergraduate and graduate medical programs—about opportunities for service in the Army.

GI BILL BENEFITS

Question. Congress passed the Post-9/11 Veterans Educational Assistance Act in 2008 (Post-9/11 GI Bill) that created enhanced educational benefits for servicemembers who have served at least 90 days on active duty since September 11. The maximum benefit would roughly cover the cost of a college education at any public university in the country. One purpose of the act was to recognize and reward the service of those who served voluntarily after September 11, particularly those who do not serve full careers and qualify for retirement benefits.

What is your assessment of the impact of the Post-9/11 GI Bill on recruiting and retention in the Army, including the provision of transferability for continued service?

Answer. The Post-9/11 GI Bill has enhanced the Army's ability to recruit and retain soldiers. In particular, giving soldiers the ability to transfer their Post-9/11 GI Bill benefits has greatly aided our effort to retain quality mid-grade and career soldiers.

MANAGEMENT AND DEVELOPMENT OF THE SENIOR EXECUTIVE SERVICE

Question. The transformation of the Armed Forces has brought with it an increasing realization of the importance of efficient and forward-thinking management of senior executives.

What is your vision for the management and development of the Army senior executive workforce, especially in the critically important areas of acquisition, financial management, and the scientific and technical fields?

Answer. My vision is for the Army to have a well-developed senior executive workforce capable of partnering with senior military officers to lead the Army in accomplishing assigned missions. The Army is already a leader in strengthening civilian talent management, especially through the Talent and Succession Management process. This is an annual opportunity for communication with senior civilians, their supervisors, and the Army regarding each person's future potential and readiness for new assignments. If confirmed, I will continue these measures and augment them to ensure transparency and fairness. This will allow the Army to attract and retain the best talent for all positions, including those in acquisition, financial management, and the scientific and technical fields.

Question. Do you believe that the Army has the number of senior executives it needs, with the proper skills to manage the Department into the future?

Answer. I believe the Army presently has the number of senior executives it needs. As with any large organization, we have a steady influx of new talent to replace those we lose to retirement and to other Federal agencies and the private sector. In anticipation of those losses, the Army has implemented the Senior Enterprise Talent Management Program, which is designed to build a bench of high-potential GS-14 and GS-15 leaders that establishes a robust talent pool ready and capable of assuming executive level positions in the future.

SYSTEMS AND SUPPORT FOR WOUNDED SOLDIERS

Question. Servicemembers who are wounded or injured in combat operations deserve the highest priority from the Army and the Federal Government for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge. Despite the enactment of legislation and renewed emphasis over the past several years, many challenges remain.

What is your assessment of the progress made to date by the Army to improve the care, management, and transition of seriously ill and injured soldiers and their families?

Answer. I believe the Army has made great strides by implementing and continuously improving three programs: the Warrior Care and Transition Program, the Integrated Disability Evaluation System, and the Soldier for Life program. All three programs are designed to address the care and transition of wounded, ill, and injured soldiers. If I am confirmed, I will ensure that the Army continues to support these vital programs for our most vulnerable soldiers and their families.

Question. What are the strengths upon which continued progress should be based? What are the weaknesses that need to be corrected?

Answer. The strength of the Army's Warrior Care and Transition Program is the dedicated and highly-trained cadre of nearly 4,000 military and civilian personnel who currently staff the 29 Warrior Transition Units, 9 Community-Based Warrior Transition Units, and 49 Soldier Family Assistance Centers. If I am confirmed, it will be a priority for me to continue to support the efforts of the many highly-dedi-

cated professionals who are making a difference at these facilities every day. They make sure Wounded Warriors are afforded the support, guidance, and assistance they require to recover, return to the force, or successfully transition to Veteran status, and integrate well into their communities.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Army's support for wounded personnel, and to monitor their progress in returning to duty or to civilian life?

Answer. If I am confirmed, I will work closely with the Secretary of the Army, the Chief of Staff of the Army, the leadership of the Warrior Transition Command, and the rest of the Army to ensure that we continue to make the changes and improvements necessary to maintain and enhance the support to soldiers who require medical care. The Nation and the Army owe our soldiers no less.

SUICIDE PREVENTION

Question. The number of suicides in the Army continues to be of concern to the committee.

If confirmed, what role would you play in shaping suicide prevention programs and policies for the Department of the Army to prevent suicides and increase the resiliency of soldiers and their families?

Answer. If confirmed, I will focus on providing clear guidance, effective policy, and sufficient resourcing for the Ready and Resilient Campaign. One of the primary purposes of this Campaign is to reduce suicides throughout our Army family by integrating suicide prevention efforts across the Army and providing support to our soldiers, civilians, and family members. I am committed to ensuring that best practices are incorporated throughout the Army.

FAMILY READINESS AND SUPPORT

Question. Soldiers and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of concerns among military families as a result of the stress of deployments and the separations that go with them.

What do you consider to be the most important family readiness issues for soldiers and their families, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. For more than a decade, the Army has continuously asked its soldiers to be apart from their families during long deployments, commit to Permanent Change of Station moves to unfamiliar climes, and cope with the vagaries of a high operational tempo. The Army understands that soldiers must have peace of mind that their families are well cared-for at all times, and is therefore 100 percent committed to ensuring family readiness. Family readiness is the state of being prepared to effectively navigate the challenges of daily living in the unique context of military service. The Army has invested in a wide array of Family Programs to make this concept a reality. Initiatives such as the Extraordinary Family Member Program (which considers family members with special needs during the assignments process), Child Development Centers (which provides soldiers with affordable, quality day care), and the Financial Readiness Program (which offers soldiers financial counseling) are just a few examples of the different ways the Army is committed to helping its soldiers. If confirmed, I will commit to maintaining family readiness by wholeheartedly supporting such programs.

Question. How would you address these family readiness needs in light of global rebasing, deployments, and future reductions in end strength?

Answer. If confirmed, I would not change the overall direction of Army Family Programs. My goal would be an Army of strong and resilient soldiers and families who will thrive as we reduce our deployed footprint. With the restructuring of the Army and the current austere fiscal climate, I would apply resources to programs and services that have the greatest impact on sustaining soldier and family readiness and resilience.

Question. If confirmed, how would you ensure support is provided to Reserve component families related to mobilization, deployment, and family readiness, as well as to Active Duty families who do not reside near a military installation?

Answer. If confirmed, I intend to continue the existing structured partnership with the Guard and Reserve to support all Army families, regardless of their component or geographic location, and to ensure the most efficient and effective delivery of programs and services wherever and whenever they are needed most. I will also continue to partner with the sister Services and local communities to fill gaps in programs, to provide alternatives to government-provided services, and to support

geographically-dispersed soldiers and families in order to reduce stress on Army families.

Question. If confirmed, what steps will you take to sustain Army family support, given current fiscal constraints?

Answer. Despite the fiscal climate, I would not change the future direction of military Family Programs. I would, however, ensure that scarce resources are dedicated to the programs and services that have the greatest impact on sustaining soldier and family readiness and resilience.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of deployments. These programs must be relevant and attractive to all eligible users, including Active-Duty and Reserve personnel, retirees, and families.

What challenges do you foresee in sustaining Army MWR programs, particularly in view of the current fiscal environment and, if confirmed, are there any improvements you would seek to achieve?

Answer. Family and MWR programs provide a comprehensive network of quality support and leisure services that enhance quality of life for soldiers, family members, and retirees. Sustained reductions to these programs may negatively impact future readiness and unit cohesion. Where possible, I will strive to improve program offerings while focusing on delivering affordable, quality services that best enhance the readiness and resilience of the military community.

ARMY CIVILIAN PERSONNEL WORKFORCE

Question. Section 955 of the National Defense Authorization Act for Fiscal Year 2013 required the Secretary of Defense to develop a plan to reduce the size of the civilian personnel workforce by 5 percent over the next 5 years. The plan developed by the Secretary does not meet this objective. Since the time that section 955 was enacted, the Department has implemented hiring freezes and furloughs due to sequestration. As a result, the DOD civilian personnel workforce is substantially smaller than it was when section 955 was enacted or at the time the plan was submitted.

Do you agree that the Army civilian employee workforce plays a vital role in the functioning of the Department of the Army?

Answer. Absolutely.

Question. How does the Bipartisan Budget Act of 2013, which restores \$22 billion to the Department's budget in 2014, and an additional \$9 billion in 2015, affect the Army's civilian personnel workforce plans?

Answer. The Bipartisan Budget Act will enable the Army to avoid further reductions in key mission areas. Civilian employees play a vital role in nearly all missions, so the Army expects to have fewer personnel reductions and enough funding to replenish the skills lost through natural attrition. This will allow the Army to hire the next generation of skilled professionals and to ensure mission-essential trades and crafts are integrated into the future workforce. In short, the additional funding will allow workforce planning to be accomplished in a calculated way.

Question. In your view, would it be preferable for the Army to make planned, prioritized reductions to the civilian workforce, or to downsize using arbitrary reductions based on hiring freezes and workforce attrition?

Answer. In my view, the Army must use all tools available to shape our civilian force while ensuring that the Army remains capable of meeting its mission objectives. As the Army transitions to a force that is operationally adaptable, it is crucial to employ solid workforce planning that will ensure that our civilian workforce possesses the skills and experience necessary to sustain the Army mission. Recently, the Army has used hiring freezes, workforce attrition, voluntary early retirement, voluntary separation incentives, and reductions in force to achieve the mandated civilian reductions. The use of planned, prioritized reductions is certainly preferable, and if confirmed, this will be one of my goals.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. In 2012, for the fourth year in a row, there were more than 3,000 reported cases of sexual assault in the military, including 2558 unrestricted reports, and an additional 816 restricted reports. Moreover, DOD's most recent survey indicates that the actual number of sexual offenses could be considerably higher, as 6.1 percent of Active Duty women and 1.2 percent of Active Duty men surveyed reported having experienced an incident of unwanted sexual contact in the previous 12 months. This survey has been criticized by some because its conclusions are ex-

trapolated from an unscientific sample set and the questions asked in the survey were too imprecise. Both former Secretary of Defense Panetta and Secretary Hagel have implemented new initiatives for addressing sexual assault in the military.

What is your assessment of the Army's implementation of the new policies for addressing sexual assault offenses?

Answer. In my assessment, the leadership demonstrated by the Secretary of Defense and the Secretary of the Army in starting an unprecedented number of program and policy initiatives to end sexual assault—more than 20 over the past year—will have a decidedly positive impact on the reporting, investigation, and prosecution of these offenses; on increasing the accountability of military leaders at all levels; and on fostering cultural change. In the last 12 months, the Army has:

- Implemented a Special Victims Counsel Program available to all servicemembers and their dependents who are victims of sexual assault;
- Added sexual assault prevention and response as a rated category for all officer and non-commissioned officer evaluations;
- Required Command Climate Surveys for every officer assuming a new command;
- Raised the level of leadership of the Army's Sexual Harassment/Assault Response and Prevention (SHARP) office to the Senior Executive Service level;
- Instituted expedited transfer of victims;
- Expanded the implementation of its special victim capability for the investigation and prosecution of offenses by instituting trauma-informed investigation training and increasing the number of special victim prosecutors;
- Credentialed thousands of Sexual Assault Response Coordinators (SARCs) and Sexual Assault Prevention and Response Victim Advocates (SAPR VAs);
- Required judge advocates to now serve as investigating officers in Article 32 proceedings;
- Enhanced victim participation in the post-trial process of military courts-martial;
- Required administrative separation of soldiers convicted of sexual assault offenses; and
- Improved commander awareness of soldier misconduct.

The Army also continues to develop metrics to measure its progress in addressing sexual assault and harassment. The tools used by the Army to evaluate its prevention programs include:

- Workplace and Gender Relations Surveys;
- Personnel Screening and Certification;
- DOD and Department of the Army Inspector General; Inspections, workplace inspections, and Annual Command Assessments
- Annual reports to Congress, OSD, J-1, and Army senior leaders;
- Quarterly reports to OSD, J-1, and Army senior leaders (including statistics and analysis);
- Annual OSD and USMA Assessments;
- DOD Annual Report on Sexual Harassment and Violence at the Military Service Academies;
- Annual "I. A.M. Strong" Sexual Harassment/Assault Prevention Summit Command Outbriefs;
- Command Climate Surveys within 30 days of assuming command, again at 6 months, and annually thereafter for the Active component;
- Command Climate Surveys within 120 days of assuming command for the Reserve component;
- Initial Entry Training Surveys;
- SAPR program compliance inspections;
- Department of Defense Safe Helpline feedback (for trends);
- Workplace inspections;
- Army Operational Troops Survey (OTS);
- Health-of-the-Force installation visits;
- Senior leader-conducted focus groups;
- SHARP Red Team Assessments;
- Army SHARP Standdown Plan (directed by the Secretary of the Army); and
- Army Directive 2013-20, Assessing Officers and Noncommissioned Officers on Fostering Climates of Dignity and Respect and on Adhering to the Sexual Harassment/Assault Response and Prevention Program.

These changes demonstrate the Army's committed, holistic approach to effectively change culture, prevent sexual assault and harassment in the ranks, provide world-class support for victims, and prosecute offenders to the fullest extent of the law. Assessment of the impact of these many policy changes, along with implementation of the provisions of the National Defense Authorization Act for Fiscal Year 2014 in the coming year, will be a top priority of mine, if confirmed.

Question. What is your view about the role of the chain of command in changing the military culture in which these sexual assaults have occurred?

Answer. I firmly believe that commanders must lead the effort to change Army culture. The Army relies on commanders to ensure that our soldiers are properly trained, equipped, safe, and healthy. The Army relies on commanders to ensure that standards are met or exceeded, to maintain order in the ranks, and to instill values in our troops. The Army also relies on commanders to discipline soldiers when these standards are not met. As part of these responsibilities, commanders are ultimately responsible for fostering respect within their units, creating a climate in which sexual assaults and sexual harassment are not tolerated, and cultivating an environment in which victims feel comfortable reporting all forms of misconduct. To carry out their responsibilities, commanders must have the authority and the tools to address the problem of sexual assault in our ranks. In turn, the Army must hold commanders accountable in the event of failures, as is contemplated by the new rating evaluation requirement. These crimes violate the trust that is at the core of the Army profession.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted?

Answer. Requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted would in effect create a parallel justice system for sexual assault cases, in which commanders handle some offenses but not others. In addition to generating confusion and inefficiencies in the military justice system, I believe that this change might undermine the Army's efforts to change the military culture in which sexual assaults have occurred. Within the Army, commanders are responsible for their soldiers' performance, safety, morale, and well-being. In carrying out their responsibilities, it is critical that commanders have the authority and the tools to address problems within their ranks, including sexual assault. Rather than removing commanders from their role within the military justice system, the Army should instead hold them accountable for ensuring that all victims feel comfortable in reporting misconduct and all soldiers believe that the system is fair and transparent.

Question. What is your understanding of the resources and programs the Army has in place to provide victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. I believe that the Army is dedicated to providing sexual assault victims with extensive medical, psychological, and legal support services. The Army is learning from the increasing body of peer-reviewed research about the neurobiology of trauma and how it affects the needs, behavior, and treatment of victims of sexual assault and other traumatic experiences. The Army is committed to both understanding this research and in implementing innovative and successful strategies to combat the effects of Military Sexual Trauma. All sexual assault victims are assigned a SARC and SAPR VA. When a victim of sexual assault presents to any Military Treatment Facility in the Army, his or her care is managed by a Sexual Assault Clinical Provider (SACP) and Sexual Assault Care Coordinator (SACC) from initial presentation to completion of all follow-up visits related to the sexual assault. The victim will be offered a Sexual Assault Forensic Exam, and if not already accompanied by a SARC or SAPR VA, the SACP or SACC will coordinate that process and explain reporting options. The SARC or SAPR VA will also provide a referral to appropriate services. With the implementation of the Special Victim Counsel Program, the victim will also be notified of the availability of a Special Victim Counsel by the SARC.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults? In your view, are these steps adequate?

Answer. In 2013, the Secretary of the Army listed the prevention of sexual assault as first among his published priorities for the Army. In June 2013, the Chief of Staff of the Army also stated the prevention of sexual assault is his top priority. Conforming to this important guidance, the Army has made the prevention of sexual assault a matter of utmost importance. Leaders at every echelon are committed to preventing sexual assaults and caring for victims, and the Army is working diligently to ensure that all soldiers share these commitments. For example, from the day they join the Army and continuing throughout their careers, soldiers receive

training on sexual assault prevention. I recognize that training alone will not stop sexual assaults, but it has brought unprecedented awareness of the issue to the force. To eliminate sexual assaults, the Army must change the culture of the force, which includes eliminating the stigma associated with reporting these crimes, regardless of whether the reporting soldier is a victim or a bystander. The Army continues to look for new and innovative ways to combat the difficult problem of sexual assault. With continued command emphasis, education throughout all of our ranks, and resources devoted to victim care, I believe the Army will achieve the necessary cultural change.

Question. What is your view of the adequacy of the training and resources the Army has in place to investigate and respond to allegations of sexual assault?

Answer. I believe that the Army has invested a substantial amount of resources and training toward the investigation and response to sexual assault allegations. The U.S. Army Military Police provides Special Victim Unit Investigative Training that focuses on memory and trauma, common victim behaviors, alcohol-facilitated sexual assaults, sex offender behaviors, male victimization, and the innovative victim interviewing technique that has resulted in a more in-depth and complete recollection of events than traditional methods of questioning. Investigators and attorneys from all three Services, as well as the Coast Guard and National Guard Bureau, attend this training, and I am told that it is the best education available to investigators and attorneys anywhere in the Federal Government.

The Army also has a dedicated group of nearly 30 Sexual Assault Investigators (SAI) in the Criminal Investigation Command (CID), each of whom is specially trained to ensure that allegations of sexual assault are fully and appropriately investigated. The Judge Advocate General also manages 23 specially-trained Special Victim Prosecutor (SVP) Teams comprised of SVPs, paralegals, and SAPR VAs. Special Victim Investigators collaborate closely with Special Victim Prosecutors, who are hand-selected at the Department of the Army level for their expertise in the courtroom and their ability to work with victims.

Developing a properly trained cadre of investigators is extraordinarily important in our efforts to increase reporting because victims' willingness to initiate and follow through with investigations is directly related to whether they feel supported and believed. If their initial contact with law enforcement is an unpleasant one, victims' likelihood of pursuing cases is virtually nil. This is an issue that I am particularly interested in and that I will continue to monitor closely if confirmed as Under Secretary.

Question. Do you consider the Army's current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. Yes, I believe the Army's system for receiving and processing reports of sexual assault, including both restricted and unrestricted reports, is effective, although this is a matter in which I will maintain a strong interest, if confirmed. Since implementing the "restricted" reporting option (which does not initiate a law enforcement investigation) in 2004, the number of total reports has continued to increase. This option has been a very beneficial reform in the system; anecdotally, it is credited with bringing a considerable number of victims forward who would not have otherwise done so. Though the Army prefers for reports to be "unrestricted" so that it may hold perpetrators accountable and remove them from the ranks, by giving victims control over triggering the investigation, the restricted option gives them time to understand the process, seek the counseling and care they need, and to consult with an attorney if they wish. The conversion of restricted reports to unrestricted is continuing to increase, which I believe to be evidence of the success of our numerous SAPR initiatives and an indication that victims are gaining more trust in the system. I am optimistic—although definitive data is elusive—that the increase in reports for fiscal year 2013 reflects growing confidence in our system. If confirmed, I will ensure that the Army continues to look for innovative ways to combat this difficult problem.

Question. What is your view of the adequacy of resources in the Army to investigate allegations of sexual misconduct and to hold perpetrators accountable for their actions?

Answer. I believe we have adequate numbers of and appropriate training for criminal investigators, forensic laboratory examiners, and prosecutors to ensure the successful investigation of sexual assaults and to hold offenders accountable. The CID has 747 authorized agents at 71 Field Investigative Units to conduct sexual assault investigations. The average experience level for the 22 civilian SAIs is 18.1 years and 8 more SAIs have been added this year; these investigators are exclusively assigned to handle sexual assault cases. Roughly 76 percent (54 of 71 Army installations with a CID office) have SVU-trained agents assigned, and the goal is to have SVU-trained agents at all CID field offices this year. In addition, the Com-

manding General of CID and the Army Judge Advocate General have closely aligned their forces and efforts to provide outstanding support to enable commanders to address these serious crimes and to hold offenders appropriately accountable. These leaders have prioritized the investigation and prosecution of sexual assaults and have dedicated considerable resources to ensuring that sexual assault victims receive the full efforts of the best-trained and most experienced investigators and prosecutors.

Question. What problems, if any, are you aware of in the manner in which the confidential reporting procedures have been put into effect?

Answer. I am not aware of any problems with regard to the way confidential reporting procedures have been implemented. First and foremost, the Army must ensure that each victim gets necessary care and treatment. Toward this end, I understand the need for the restricted option, and respect a victim's choice to select that option as he or she sees fit. Ultimately, however, the Army's goal is to ensure that victims feel confident enough in the Army's process to report sexual assault through the unrestricted reporting process, which will trigger thorough criminal investigations, ultimately allowing the military justice system to work in a fair, impartial way. It is very important that the Army ensures that all soldiers understand what the reporting options are, to whom they may confidentially report, and those who have a duty to report if they are made aware of any allegation of sexual misconduct.

Question. What is your view of the appropriate role for senior military and civilian leaders in the Secretariat and the Army staff in overseeing the effectiveness of implementation of new policies relating to sexual assault?

Answer. Senior military and civilian leaders are responsible for ensuring that all Army policies relating to sexual assault are implemented fully. They are also responsible for evaluating the effectiveness of these efforts, and for making changes to those programs and policies, when appropriate. The National Defense Authorization Act for Fiscal Year 2014 also contemplates that the Secretary of the Army may review some sexual assault cases. If I am confirmed, I will ensure that the Army continues to assess and improve its policies and programs to combat and respond to sexual assault.

Question. Do you believe that sexual assault continues to be an underreported crime in the Army?

Answer. Yes. The research is clear that sexual assault is one of the most underreported crimes in society at large, and this is no less the case in the Army or other Military Services. The Army is working hard to foster a climate in which victims trust their chains of command to support them if and when sexual offenses occur, victims know that they will receive all necessary services and support from the Army, victims are confident their allegations will be taken seriously, and that all incidents of sexual assault and harassment will be thoroughly investigated. The increase in reporting during this past fiscal year is possibly reflective of victims' growing confidence in our system.

Question. If so, what are the barriers that discourage or prevent victims from coming forward?

Answer. There are no doubt many reasons a victim does not always come forward to report a sexual assault, whether in the civilian world or in the military. Data from the 2012 Workplace and Gender Relations Survey of Active Duty Members shows that victims of sexual assault often do not come forward because of privacy concerns. Sexual assault is the most personal and intrusive of crimes, and victims report feeling reluctant to report this crime because they feel ashamed or embarrassed and because they feel that others might blame them or retaliate against them. Another one of the biggest barriers for victims is the fear of being ostracized by their peers in the unit—and this is an issue whose remedy lies directly in the hands of the leadership and authority of the commander. I believe that commander-driven change in unit culture and compassionate, thorough support of victims are critical to address these concerns.

Question. If confirmed, what additional steps would you take to remove barriers to reporting sexual assaults?

Answer. If confirmed, I will begin by focusing on victim care and commander accountability. The Army has made significant programmatic changes to ensure victims receive the support they need when they come forward to report a sexual assault. I intend to evaluate the effectiveness of these (and related) efforts, and to look for ways to continue to improve the Army's programs and policies for victim care. I also believe that effective leadership training, demonstrated values and accountability of leaders at all levels is essential.

In response to the Annual Report on Sexual Harassment and Violence at the Military Service Academies for Academic Program Year 2011–2012, the Secretary of Defense wrote to the Service Secretaries and the Under Secretary of Defense for Per-

sonnel and Readiness stating: “Despite our considerable and ongoing efforts, this year’s Annual Report on Sexual Harassment and Violence at the Military Service Academies demonstrates that we have a persistent problem. I am concerned that we have not achieved greater progress in preventing sexual assault and sexual harassment among academy cadets and midshipmen. These crimes and abhorrent behavior are incompatible with the core values we require of our Armed Forces’ future officers. A strong and immediate response is needed.”

Question. What has the Army done to respond to the Secretary of Defense’s requirement for a strong and immediate response?

Answer. I have been advised that, under the USMA Superintendent’s guidance, Cadets established the Cadets Against Sexual Harassment and Assault committee, a SHARP-trained group of Cadets who are dedicated to preventing and responding to sexual assault at the USMA. Additionally, the Superintendent has met with all company commanders, regimental commanders, the brigade staff, and the Corps of Cadets to address leadership responsibilities, and he has emphasized each member’s responsibility for establishing a positive command climate in his or her unit that is based on dignity and respect for all. The Superintendent addressed the same subject during his briefings to the staff and faculty at the beginning of first semester, academic year 2013–2014, and he will continue to deliver this message to cadet groups throughout the second semester of this academic year.

Question. If confirmed, what additional steps will you take to address the findings contained in this report?

Answer. If confirmed, I will continue to work with the Secretary of the Army, the Chief of Staff of the Army, the Assistant Secretary for Manpower and Reserve Affairs, the USMA Superintendent and the Deputy Chief of Staff, G–1 to ensure that the Sexual Harassment/Assault Response and Prevention Program, both Army-wide and at USMA, remains a top priority for Army leaders throughout the Army.

ARMY POLICIES REGARDING DRUG AND ALCOHOL ABUSE

Question. What is your understanding of the Army’s policy with respect to disciplinary action and administrative separation of soldiers who have been determined to have used illegal drugs? Do you agree with this policy?

Answer. In 2012, the Secretary of the Army directed revisions to the criteria and retention authorities for drug and alcohol-related separations. In short, the revised policies reflect an increased responsibility on the part of the soldier to remain resilient and follow substance abuse rehabilitative treatment, and it holds commanders responsible for processing administrative separations. The revised policy directs commanders to process administrative separations for those soldiers who commit repeated offenses, such as two serious incidents of alcohol-related misconduct within a 12 month period, or for soldiers who test positive for illegal drugs twice during their careers. The decision authority for retention is now the first general officer in the chain of command with a judge advocate or legal advisor.

These revisions make the Army policy more responsive to the drug use and high-risk behavior trends that were identified in the Army. I believe the revised policy is well suited to assist the Army in identifying and retaining those soldiers who demonstrate the responsibility and maturity to learn from their incidents of high-risk behavior. At the same time, it provides commanders the necessary tools to process soldiers out of the Army who are unwilling to change. I support the current policy.

Question. What is your understanding of the Army’s policy with respect to rehabilitation and retention on Active Duty of soldiers who have been determined to have used illegal drugs or abused alcohol or prescription drugs? Do you agree with this policy?

Answer. My previous response concerning the Army’s disciplinary policy on illegal drug use outlines the Army’s focus on both soldier responsibility and command responsibility. The Army policy, which allows for soldiers with a single alcohol incident or a single positive drug test to be referred for evaluation, intensive education, or outpatient treatment, reflects the Army’s understanding of soldiers in terms of their ages and their representation of American society at-large. The Army understands that younger soldiers may make poor decisions and makes allowances for this by providing commanders with the flexibility to retain soldiers who have the potential to learn from their mistakes and maintain Army standards. I support this policy.

Question. Do you believe that the Army has devoted sufficient resources for implementation of its rehabilitation policies and objectives since 2001? If not, in what ways have resources been insufficient?

Answer. I have been advised that, while the Army has increased resourcing over the past decade to combat the abuse and/or misuse of both legal and illegal substances, capability gaps still exist that require funding. These gaps primarily reside within the Reserve component (Army National Guard and U.S. Army Reserve) in the deterrence, prevention, and treatment realms. If confirmed as Under Secretary, I will work to bridge these gaps.

DETAINEE TREATMENT STANDARDS

Question. Do you agree with the policy set forth in the July 7, 2006, memorandum issued by Deputy Secretary of Defense England stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. I agree with the 2006 memorandum of Deputy Secretary England and the 2009 Executive Orders of President Obama that require all Department of Defense directives, regulations, policies, practices, and procedures to fully comply with Common Article 3 of the Geneva Conventions. Since 2006, the Department of the Army has reviewed and updated all Army regulations, policies, practices, and procedures to ensure such compliance.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. I support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, and Department of Defense Directive 2310.01E. Current Army directives comply fully with the provisions of the Geneva Conventions, as noted above.

Question. Do you believe it is consistent with effective military operations for U.S. Forces to comply fully with the requirements of Common Article 3 of the Geneva Conventions?

Answer. Yes. It is entirely appropriate and consistent with effective military operations to comply fully with the requirements of Common Article 3 and establish a standard for the conduct of detainee operations that applies the Law of Armed Conflict in all military engagements, no matter how characterized, and in all other military operations.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Under Secretary of the Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

COMBAT INTEGRATION

1. Senator GILLIBRAND. Mr. Carson, in your testimony you stated that in the next few months the Army would be opening 33,000 positions that were previously closed to women due to the direct combat exclusion. How many of these positions have already been opened?

Mr. CARSON. The notification to Congress to open 33,000 positions occurred in January 2014; we will open these following expiration of the required 30 continuous days of congressional session. These 33,000 will be in addition to the approximately 22,000 positions the Army has already opened since May 2012.

2. Senator GILLIBRAND. Mr. Carson, why is it taking so long to open them?

Mr. CARSON. I understand that the integration of women into previously closed units is proceeding well. We began our work in 2012, focusing on the 14 Military Occupational Specialties (MOS)—such as the enlisted Combat Engineer MOS and the three enlisted MOSs in the Infantry, Armor, and Field Artillery branches—that were closed because their missions were related to direct ground combat. Our plan calls for all decisions on closed positions and occupations to be made by 2015, and we are on schedule to meet that goal.

3. Senator GILLIBRAND. Mr. Carson, are there intermediate steps that you feel are necessary before you make this shift?

Mr. CARSON. To ensure success, the Army has directed Training and Doctrine Command (TRADOC) to conduct a Gender Integration Study. The Gender Integration Study surveys soldiers in formerly closed combat arms MOSs and female soldiers currently serving in the Army. I have been told that the results of this extensive study will help the Army develop strategies to ensure the successful integration of women into combat units and combat arms MOSs. I support the Gender Integration Study as a necessary intermediate step to opening closed positions and occupations.

4. Senator GILLIBRAND. Mr. Carson, you specified that the Army is in the process of revalidating occupational standards for 14 previously closed MOSs. How many positions are included in those closed specialties?

Mr. CARSON. I understand that there are approximately 100,000 positions in the now-closed specialties.

5. Senator GILLIBRAND. Mr. Carson, at what pace are you opening up these positions?

Mr. CARSON. The Army's plan has three decision points: December 2014 for the enlisted Combat Engineer MOS 12B, March 2015 for the three Field Artillery MOSs, and July 2015 for the remaining occupations and Army schools that are currently closed to women. We will decide to either notify the Office of the Secretary of Defense of our intent to open additional occupations and positions or request an exception to policy to keep the remaining occupations and positions closed if we cannot meet the Secretary of Defense's stated guidelines.

6. Senator GILLIBRAND. Mr. Carson, how many of these positions have already been opened?

Mr. CARSON. To my knowledge, the Army has opened 22,000 positions since May 2012.

7. Senator GILLIBRAND. Mr. Carson, are you on schedule to meet the timeline specified by the directive of Secretary Panetta and Chairman Dempsey?

Mr. CARSON. Yes.

8. Senator GILLIBRAND. Mr. Carson, in your testimony you mentioned that the Army is revalidating the occupational requirements for the previously restricted MOSs. Could you please describe the methodology the Army is using to determine combat effectiveness?

Mr. CARSON. Currently, TRADOC is conducting a Physical Demands Study to establish occupation-specific accession standards for the specialties that are currently closed to women. The U.S. Army Research Institute of Environmental Medicine is assisting TRADOC by developing valid, safe, legally defensible physical performance tests to assess soldiers' abilities to perform the critical, physically demanding duties inherent in currently closed MOSs.

9. Senator GILLIBRAND. Mr. Carson, is the expertise of service women, and in particular of those women who have already participated in combat operations and accompanied Special Forces into the field as members of Female Engagement Teams, being sought out and utilized to inform this process?

Mr. CARSON. Yes they are. We are using a multitude of venues to gain lessons learned from the experiences of female soldiers, particularly those who have deployed, operated in Female Engagement Teams, and/or been members of Cultural

Support Teams. Their successes enabled the Army to start opening positions in May 2012.

10. Senator GILLIBRAND. Mr. Carson, in your testimony you stated that the Army is not responsible for integrating the MOSs associated with Special Forces. Could you clarify what role the Army has in selecting individuals for service in its Special Forces and providing guidance to Special Forces in ensuring that the most qualified candidates are allowed to compete for positions, regardless of gender?

Mr. CARSON. It is my understanding that Special Forces is an Army occupational specialty and the assessment, selection, and training of Special Forces soldiers are all conducted by Army personnel at the certified Special Operations Forces (SOF) Center of Excellence. However, Special Forces is funded by U.S. Special Operations Command (SOCOM), and the Army must coordinate changes to the Special Forces MOSs with that combatant command. The Army, through U.S. Army Special Operations Command, is working with SOCOM to ensure the most qualified candidates will be able to compete for positions, regardless of gender.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

FINANCIAL IMPROVEMENT AND AUDITABILITY

11. Senator MCCAIN. Mr. Carson, if confirmed, you would, of course, serve as the Chief Management Officer (CMO) in charge of overseeing, among other things, the Army's business transformation and financial improvement efforts. In your testimony, in response to Chairman Levin's question, you said that the Army is "on track" to meet both the Statement of Budgetary Resources September 30, 2014, and the Financial Statements September 30, 2017 auditability deadlines, but some challenges remain. As to both the legislatively-required 2014 and 2017 deadlines, what are the greatest areas of risk to the Army's ability to do so?

Mr. CARSON. Though the Army has clearly achieved several significant milestones, I understand that key challenges remain. First, the deployment of our Enterprise Resource Planning (ERP) systems requires us to undergo considerable financial management changes, a major challenge for an organization as large and complex as the Army. Second, our dependence on service providers for significant portions of our business processes also poses a risk to meeting these objectives. A third challenge we face is quickly and effectively implementing any corrective actions resulting from the ongoing audit by an independent public accountant. Finally, funding uncertainties, government shutdowns, and furloughs present risks to achieving auditability.

12. Senator MCCAIN. Mr. Carson, how is the Army mitigating those risks and what additional steps would you take to adequately address these risks?

Mr. CARSON. I understand that the Army will continue the activities that have facilitated success to date, particularly by following the guidance established by the Office of the Under Secretary of Defense (Comptroller). The Army will ensure change management is successful by implementing effective controls and processes and transforming our financial management organizations to be more effective and efficient. We are working closely with our service providers to ensure they follow these new controls and processes. As weaknesses from our current Exam 3 are identified, we will implement corrective action plans. The Army leadership, both military and civilian, will continue the active engagement that has helped establish the requisite accountability for audit readiness support at all levels and across all Army commands.

13. Senator MCCAIN. Mr. Carson, who should be held accountable if the Army misses either the 2014 or the 2017 deadline?

Mr. CARSON. Army senior leaders, including the Under Secretary, should be held accountable.

14. Senator MCCAIN. Mr. Carson, has the Army, in your view, been successfully implementing Business Process Reengineering (BPR) in connection with its auditability goals?

Mr. CARSON. Yes. BPR is the centerpiece of our business process improvement and audit readiness efforts. By leveraging our successful deployment of the General Fund Enterprise Business System and the results of several audit examinations, we have been continually reengineering our processes to improve efficiency and audit readiness. The Army Financial Improvement Plan is focused on long-term, sustain-

able business process improvements rather than short-term, manually-intensive efforts that are difficult or impossible to sustain. This approach has resulted in several “quick wins” that have confirmed the appropriateness and sustainability of the Army’s plan.

Using an end-to-end process reengineering approach, we have analyzed all Army financial and financial feeder systems, processes, and controls to ensure comprehensive process optimization and accountability. Also, we are linking IT portfolio optimization, enterprise architecture, Lean Six Sigma-informed continuous process improvement, and best business practices into a very powerful, synergistic method of evaluation across all Army core business processes. While we have made significant progress, there remains work to do. However, I am confident that our efforts will broaden over the coming years.

15. Senator MCCAIN. Mr. Carson, in June 2010, then-Secretary of Defense Robert Gates said that the Department of Defense (DOD) must significantly improve the effectiveness and efficiency of its business operations stressing the importance of changing how DOD does business. Yet, to date, DOD has struggled to implement successful business transformation because it has failed to fully utilize BPR. Do you agree with Secretary Gates’ comments and, if so, how will you improve the efficiency of the Army’s business operations?

Mr. CARSON. Yes, I believe that this was an accurate assessment at the time. In the years following Secretary Gates’ comments, I understand that the Army has made significant strides in BPR and in improving the efficiency of the Army’s business operations. We just released our 2014 Business Transformation Report that highlights many of our successful efforts in 2013. Going forward, if I am confirmed as Under Secretary, I will continue to emphasize four efforts to improve business operations: (1) achieving audit-readiness goals for 2014 and 2017; (2) improving the way we make cost-informed decisions for enterprise functions; (3) ensuring the alignment of the activities of the Headquarters, Department of the Army with those of DOD and Army operating forces; and (4) increasing momentum in improving the efficiency and effectiveness of our business operations. On the fourth point, we will continue to drive costs down on the business portfolio by reducing systems and re-engineering high-cost processes. Also, we will increase our BPR efforts to streamline processes and optimize the systems that support it. Finally, we will maintain our support to the Army’s enterprise-wide Lean Six Sigma program in order to accelerate Army-level BPR and help lower-level commands to make their own processes more efficient.

16. Senator MCCAIN. Mr. Carson, how will you measure the success of your efforts?

Mr. CARSON. I think that an actively managed performance assessment system is the key to measuring success, understanding our costs, and helping the Army make better resource-informed decisions. The Army Campaign Plan and the Army Business Management Strategy establish our measures, and our business governance structure provides the mechanism for Army leaders to routinely review progress, identify problem areas, and develop timely strategies to overcome obstacles. In addition to these, we will cooperate with the DOD Inspector General and Government Accountability Office (GAO), undergo external and internal audits, and utilize other sources of assessment to assist efforts to refine our performance measures. If confirmed as Under Secretary and Chief Management Officer (CMO), I will work to ensure that we have the right performance assessment mechanisms in place to measure progress and adjust our plans as needed.

17. Senator MCCAIN. Mr. Carson, what do you believe is the role of ERP systems in improving how the Army does business?

Mr. CARSON. The Army’s four ERP systems are the backbone to a connected and integrated Army business environment. While each ERP has a unique functionality, they share valuable data, reduce inefficiencies in our business activities, and provide the internal controls and traceability required for a credible financial management system. Our ERPs are paramount for achieving audit-readiness.

18. Senator MCCAIN. Mr. Carson, how do you plan to implement lasting cultural change so that new processes are both welcomed and quickly accepted by Army personnel in connection with the Army’s financial improvement/business transformation efforts?

Mr. CARSON. In my opinion, active, multi-echelon change management is the key to ensuring that Army personnel readily adopt new processes. I believe that education and training are the most important elements for lasting, transformative cul-

tural change. To that end, we are reviewing our education and leader development programs to place more emphasis on leader roles in performance assessment and process improvement. Likewise, we are reengineering our institutional training programs to include hands-on training across the full range of our new ERP systems.

I also feel that to effect change, we must also be responsive to user and customer feedback. I am confident that our change management plans include the right mechanisms to receive and consider user inputs and that our culture and personnel will adapt as necessary to embrace these new processes.

19. Senator McCAIN. Mr. Carson, if confirmed, how would you make the redesign of the Army's business processes, wherever warranted, a priority?

Mr. CARSON. The Army has specified the improvement of business processes as a major objective of the Army Campaign Plan, and Under Secretary Westphal recently published the Army Business Management Strategy to provide detailed guidance in this area. If confirmed, I will employ the principles in these documents to take an active role in this important Army priority, which spans across all of our major end-to-end processes and is driven by the development and successful fielding of our ERP systems. I plan to press for the optimization of business processes and the rationalization of the business Information Technology (IT) portfolios that support them. Reducing costs and improving effectiveness across our business operations would be among my main priorities if I became Under Secretary.

20. Senator McCAIN. Mr. Carson, what lessons did you learn from the Air Force's failed Expeditionary Combat Support System (ECSS) program?

Mr. CARSON. The Air Force was very forthcoming about their ECSS challenges when discussing ERP management with us. The biggest lesson from ECSS—which was reinforced during our successful fielding of the General Fund Enterprise Business System—is to reengineer existing business processes to work within the ERP software rather than customizing the software to fit existing processes. We also understand the importance of having the right expertise on our government teams to advise process owners on BPR efforts to align with the ERP software, and not relying solely on the contracted system integrator to perform this function. We have also taken steps to maintain stability within our acquisition teams. Lastly, we understand the importance of internal Army oversight processes over program duration. I am confident we have learned the right lessons and have incorporated them into our plans to ensure the successful fielding of Army ERPs and other business IT systems.

21. Senator McCAIN. Mr. Carson, how would you ensure that the Army effectively implements these lessons to current and future ERP procurement efforts?

Mr. CARSON. As the CMO of the Army, I would play a very hands-on managerial role in the governance structure we have established to continue to drive positive, meaningful change in the way the Army does business. If confirmed, I will direct the continuation of our robust audit and testing schedules to ensure we remain on track. I look forward to a productive relationship and open dialog with our acquisition executive as we apply those lessons to complete the fielding of ERPs.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

ARMY NATIONAL GUARD

22. Senator AYOTTE. Mr. Carson, in your view, how has the Army National Guard performed in Iraq and Afghanistan?

Mr. CARSON. The Army National Guard (ARNG) and the U.S. Army Reserve (USAR) have performed admirably in Iraq and Afghanistan.

23. Senator AYOTTE. Mr. Carson, could we have accomplished the missions in Iraq and Afghanistan without the National Guard?

Mr. CARSON. No.

24. Senator AYOTTE. Mr. Carson, as the Army tries to maintain readiness and necessary force structure under tighter budgets, do you believe it makes sense for us to increase our reliance on the National Guard?

Mr. CARSON. It is my understanding that the Army plans to continue its reliance on the Reserve component for operational depth and critical expertise in meeting the National Military Strategy.

INVOLUNTARY SEPARATIONS

25. Senator AYOTTE. Mr. Carson, to what extent has the Army utilized involuntary separations to achieve end strength reduction goals?

Mr. CARSON. To my knowledge, the majority of end strength reductions have been focused on reduced accessions and normal attrition. The Army has used limited involuntary separations to meet end strength goals for both officers and enlisted personnel.

26. Senator AYOTTE. Mr. Carson, how many enlisted soldiers and officers have been involuntarily separated?

Mr. CARSON. I have been told that under the Qualitative Service Program (QSP), the Army selected 123 Active component (AC) Noncommissioned Officers (NCO) and 37 NCOs from the ARNG and USAR for denial of future service in fiscal year 2013. In fiscal year 2014, the QSP denied continued service to 497 NCOs from the AC and 9 NCOs from the ARNG and USAR. Under the Selective Early Retirement Board for fiscal year 2013, 103 colonels and 136 lieutenant colonels were selected for early retirement. 73 officers have also been identified for early termination of selective continuation on active duty.

27. Senator AYOTTE. Mr. Carson, are the soldiers being separated well-performing soldiers with multiple combat tours?

Mr. CARSON. I understand that, in some cases, those identified for separation were well-performing soldiers with multiple combat tours. While it is certainly lamentable that some honorable soldiers' careers will be truncated, the Army is also concerned that the overall force may not have the proper rank structure or mix of specialties without involuntary separations. The Army recognizes and appreciates the many hard sacrifices its soldiers and their families make daily. However, we maintain that a reasoned, measured approach to involuntary separations is necessary to ensure that the Army's force structure can properly meet mission needs and that we do not repeat the mistakes made during the Cold War drawdown that left the force imbalanced.

28. Senator AYOTTE. Mr. Carson, to what extent do you anticipate that the Army will have to use involuntary separations to achieve future end strength reductions?

Mr. CARSON. The Army will continue to use involuntary measures to shape the force to the minimum extent possible; reduced accessions and natural attrition will remain our primary levers to meet end strength.

29. Senator AYOTTE. Mr. Carson, setting aside the impact on a soldier who is involuntarily separated, when soldiers see their brothers and sisters in arms, especially those not eligible for retirement, forced to leave the Army after multiple deployments and years of faithful service, what impact could this have on unit morale and readiness?

Mr. CARSON. Involuntary separations remain difficult and inevitably impact the morale of the force. As discussed above, the Army will eschew the use of involuntary separations except when it is absolutely necessary. We will also continue to actively communicate to the soldiers and their families about the impact of budgetary constraints and the possibility of involuntary separation.

30. Senator AYOTTE. Mr. Carson, do I have your commitment that you will work to avoid involuntary separations?

Mr. CARSON. Yes. If I am confirmed, I will work to ensure that lower accessions and natural attrition will remain the Army's preferred means to meet end strength requirements. However, budgetary constraints will likely require some involuntary separations.

31. Senator AYOTTE. Mr. Carson, are you aware of the requirement in section 525 of the National Defense Authorization Act for Fiscal Year 2013 regarding reports on involuntary separation of members of the Armed Forces?

Mr. CARSON. Yes.

32. Senator AYOTTE. Mr. Carson, will you ensure the Army complies with this reporting requirement?

Mr. CARSON. Yes.

WOUNDED WARRIORS

33. Senator AYOTTE. Mr. Carson, recently the Army announced changes to the organization of its Warrior Care and Transition Program. Can you describe those changes?

Mr. CARSON. Warrior Transition Units (WTUs) are located at major Military Treatment Facilities and provide support to wounded, ill, and injured soldiers who require at least 6 months of rehabilitative care and complex medical management. The Army is restructuring the WTUs in response to the scheduled withdrawal of troops from Afghanistan and the decline in the number of combat-wounded. The transition will be completed by 30 September 2014. The changes are designed to improve care and transition of soldiers through increased standardization, increased cadre-to-soldier ratios, improved access to resources on installations, and reduced delays in care. They are not related to budget cuts, sequestration, or furloughs. The restructuring includes inactivation of the WTUs at Fort Irwin, CA; Fort Huachuca, AZ; Fort Jackson, SC; Joint Base McGuire-Dix-Lakehurst, NJ; and the U.S. Military Academy, West Point, NY. As of 21 January 2014, each location has fewer than 35 soldiers assigned.

The restructuring plan also includes the inactivation of nine Community Based Warrior Transition Units (CBWTUs) in Alabama, Arkansas, California, Florida, Illinois, Massachusetts, Puerto Rico, Utah, and Virginia. The CBWTUs currently provide services for Army Reserve and National Guard soldiers who do not require day-to-day care, allowing soldiers to continue their recoveries closer to home. CBWTU soldiers will be re-assigned to 13 new Community Care Units (CCUs) at WTUs located on Army installations. The Army will establish these CCUs at Fort Carson, CO; Joint Base Lewis-McChord, WA, Forts Hood and Bliss, TX; Fort Riley, KS; Fort Knox, KY; Forts Benning, Stewart, and Gordon, GA; Fort Bragg, NC; and Fort Belvoir, VA. Forts Belvoir and Knox will each have two CCUs. The Puerto Rico CBWTU will become a Community Care detachment under the mission command of the Fort Gordon Warrior Transition Battalion. Soldiers will not have to move to those installations or change their care plans to receive medical attention after this reorganization.

34. Senator AYOTTE. Mr. Carson, why were those changes made?

Mr. CARSON. As of 21 January 2014, the WTU population was 7,078. This represents a decline of approximately 3,000 soldiers in the Army-wide Warrior Care Transition Program population over the past 14 months, a result of reduced contingency operations (fewer soldiers are arriving into WTUs/CBWTUs as fewer units deploy) and reduced mobilization of ARNG and USAR soldiers. These changes will allow the Army to scale the program to best meet the needs of the declining population.

35. Senator AYOTTE. Mr. Carson, how can we sustain and improve the quality support we are providing to our wounded warriors and their family members?

Mr. CARSON. The Army recognizes the care of our wounded, ill, and injured soldiers as a sacred obligation. Be assured that the Army will not falter in its commitment to the best care and transition of our wounded warriors and their families. They will continue to receive the best possible care and support as they transition either back to the force or into civilian life as veterans.

The Army is constantly looking at ways to improve the care and support for our wounded, ill, and injured soldiers and their families. To that end, the Army has developed numerous programs. The implementation of the Army's System of Health has empowered soldiers and their families with tools to improve their resiliency as they heal. The Army has also established Soldier Centered Medical Homes, which bring health care to soldiers in need. Moreover, the Warrior Transition Command conducts an annual review that includes all key Army stakeholders to ensure we provide quality care to our soldiers and their families.

The Army has also reorganized as part of ensuring that wounded warriors receive optimum care. The force structure changes discussed above reflect the inherent scalability of this program, which can expand or contract while continuing to meet the evolving need. The standardization of care and transition services brought about by the force structure changes will continue to ensure that all soldiers receive quality services and support across the Army.

In addition, the Army Medical Command and the Warrior Transition Command actively participate in the congressionally-mandated Interagency Care Coordination Committee which has studied and has made informed recommendations for improvements to the Services' individual programs for wounded, ill, and injured mili-

tary members. These recommendations have been incorporated into the Warrior Care and Transition Program.

The Army also uses information gleaned from independent sources to ensure continuous improvement; the Army Inspector General, DOD Inspector General, Recovering Warrior Task Force, GAO, and other auditing agencies monitor satisfaction levels of our wounded, ill, and injured soldiers. They provide timely and accurate information that allows the Army to continue to both sustain and improve the quality support we are providing to our wounded warriors and their family members.

MODERNIZATION

36. Senator AYOTTE. Mr. Carson, what are the Army's top modernization priorities?

Mr. CARSON. My understanding is that, given significant fiscal pressures, the Army's investment in modernized equipment and capabilities will likely see reductions in the near-term. The Army will continue to prioritize a range of investments focusing on incremental upgrades to existing systems and new developmental programs. The Army's top priorities include the Network, Joint Light Tactical Vehicle, Paladin Integrated Management program, Armored Multipurpose Vehicle, and aviation platforms such as the Apache, Chinook, and Blackhawk helicopters.

37. Senator AYOTTE. Mr. Carson, do you believe the fiscal year 2014 omnibus bill adequately resources the Army's modernization priorities?

Mr. CARSON. The amount requested in the President's budget submitted in fiscal year 2014 adequately addressed the Army's requirements for modernization priorities. We are currently assessing the impacts of the fiscal year 2014 appropriation on our equipment modernization investments.

QUESTIONS SUBMITTED BY SENATOR MIKE LEE

ARMY

38. Senator LEE. Mr. Carson, with the military's role in Afghanistan coming to an end and reduced budgets due to sequestration, the Army will likely need to undergo some form of restructuring. What are the biggest factors that you will consider and will drive the way in which Army restructures in the coming years?

Mr. CARSON. The enduring priority of the Army is to preserve the high-quality All-Volunteer Force. The Army is committed to the Total Force Policy, in which the ARNG and USAR play key roles. In an era of likely budget austerity, the biggest factors driving restructure will be the need to meet the force and readiness requirements of the National Military Strategy, while ensuring that the drawdown in Army end strength is managed efficiently and equitably.

39. Senator LEE. Mr. Carson, the National Guard played a key and essential role in the conflicts of the past decade. Do you believe that its role and relationship to the Active components will change as our troops withdraw from Afghanistan?

Mr. CARSON. I believe that the ARNG provides operational capabilities and strategic depth to meet our Nation's defense needs across the range of military operations. It is my understanding that there will be continuity in the relationship between the AC and Reserve components after the withdrawal from Afghanistan.

40. Senator LEE. Mr. Carson, how should the National Guard figure into the Army's need to cut costs in future years?

Mr. CARSON. It is my understanding that the fiscal environment will likely result in cuts to all components of the Army. If confirmed as Under Secretary, I will work to ensure that the cuts are distributed fairly across the components and are based solely on the best interests of the Nation.

[The nomination reference of Hon. Brad R. Carson follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 6, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Brad R. Carson, of Oklahoma, to be Under Secretary of the Army, vice Joseph W. Westphal.

[The biographical sketch of Hon. Brad R. Carson, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF BRAD R. CARSON

Education:

Baylor University

- 1985–1989
- B.A., History

Oxford University

- 1989–1991
- B.A./M.A., Politics, Philosophy, & Economics

University of Oklahoma

- 1991–1994
- J.D.

Employment record:

Crowe & Dunlevy, P.C.

- Attorney
- September 1994–August 1997
- Tulsa, OK

Department of Defense

- White House Fellow
- September 1997–December 1998
- Washington, DC

Crowe & Dunlevy, P.C.

- Attorney
- January 1999–February 2000
- Tulsa, OK

U.S. Congress

- Congressman (2nd District - Oklahoma)
- January 2001–January 2005
- Washington, DC

Harvard University

- Fellow, Institute of Politics
- February 2005–May 2005
- Cambridge, MA

Cherokee Nation Businesses, L.L.C.

- Chief Executive Officer/Director of Business Development
- June 2005–November 2008
- Catoosa, OK

U.S. Navy

- Officer-in-Charge, MND–S, Weapons Intelligence Teams
- December 2008–December 2009
- Basrah, Iraq

University of Tulsa

- Associate Professor & Director, National Energy Policy Institute
- January 2010–December 2011
- Tulsa, OK

Department of Defense

- General Counsel, U.S. Army
- January 2012–present
- Washington, DC

Honors and awards:

Military Awards

- Bronze Star
- Army Achievement Medal

Academic Awards

- Rhodes Scholar
- Bledsoe Award for Outstanding Law School Graduate at the University of Oklahoma College of Law (1994)
- Phi Beta Kappa
- Magna cum laude, Baylor University

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate, and certain senior military officers as determined by the committee, to complete a form that details the biographical, financial and other information of the nominee. The form executed by Hon. Brad R. Carson in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Brad Rogers Carson.

2. **Position to which nominated:**

Under Secretary, U.S. Army.

3. **Date of nomination:**

November 21, 2013.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

Winslow, AZ; March 11, 1967.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Julie Kruse Carson.

7. **Names and ages of children:**

Jack David Carson; age 8.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Baylor University, B.A., 1989, 1985–1989
 Oxford University, B.A./M.A., 1991 (1989–1991)
 University of Oklahoma, J.D., 1994 (1991–1994)

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

U.S. Congressman, 2nd District of Oklahoma, January 2001–January 2005, Washington, DC.

Fellow, Kennedy School of Government, Harvard University, February 2005–May 2005, Cambridge, MA.

CEO & President/Director, Cherokee Nation Businesses, LLC, June 2005–December 2008, Catoosa, OK.

Officer-in-Charge, Weapons Intelligence Teams, MND–S, December 2008–December 2009, Iraq.

Associate Professor of Business, Associate Professor of Law, University of Tulsa, December 2009–January 2012, Tulsa, OK.

Director, National Energy Policy Institute, University of Tulsa, December 2009–January 2012, Tulsa, OK.

General Counsel, U.S. Army, Department of Defense, 2011 (confirmed)/2012 (assumed duties)–present.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

White House Fellow, Special Assistant to the Secretary of Defense, 1997–1998

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Oklahoma Bar Association, Member, 1994–present.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

U.S. Congress, 2nd District of Oklahoma.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Obama for America National Finance Committee, 2006–2008.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Williams for City Council, 2011, \$500

Smith-Soap for Chief, 2011, \$5,000

Obama Victory Fund, 2011, \$1,000

Reid for Senate, 2010, \$1,000

Edmondson for Governor, 2010, \$4,000

Gumm for Senate, 2010, \$1,000

Williams for House, 2010, \$500

Burrage for Senate, 2010, \$2,000

Boren for Congress, 2010, \$2,000

Paddock for State Superintendent, 2010, \$750

Adelson for Mayor, 2009, \$3,000

AmeriPac, 2008, \$2,500

Adelson for Senate, 2008, \$2,000

Hoskin for House, 2008, \$250

Rice for Senate, 2008, \$250

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Bronze Star, 2009

Army Achievement Medal, 2009

Board of Directors, National Job Corps Association, 2005–2008

U.S. Junior Chamber of Commerce Ten Outstanding Young Americans, 2002

- Rhodes Scholar, 1989–1991
 White House Fellow, 1997–1998
 Exceptional Contribution to Legal Services of Eastern Oklahoma, 1996
 Bledsoe Award for Outstanding Law School Graduate from The University of Oklahoma, 1994
 Adjunct Professor of Law (Law and Literature), University of Tulsa College of Law, 1997
 Legal Services of Eastern Oklahoma, Board of Directors, 1997
15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.
- “The Liberal Moment What Happened?” in Symposium Issue of Democracy: A Journal of Ideas (along with Michael Sandel, Michael Walzer, Danielle Allen, William Galston, Martha Nussbaum, Robert Reich, Katha Pollit, and Joe Klein) (Spring 2010)
- “The Claremore Diarist” in The New Republic (November 22, 2004)
- “Does the Democratic Party Have a Future?” in The Weekly Standard (September 16, 2002) (review of The Emerging Democratic Majority by Judis and Teixeira)
- “Pay to Play,” in Blueprint Magazine (May 31, 2005)
- “The Fall of the House of Representatives” in Democracy: A Journal of Ideas (September 2006) (review of The House: A History Of The House Of Representatives by Remini)
- “Smart Development Subsidies” in Democracy: A Journal of Ideas (part of “20 Ideas for the Next President”) (Spring 2008).
- Tate v. Browning-Ferris Industries: Oklahoma Adept A Common Law Action For Employment Discrimination*, 46 Okla. L. Rev. 557 (1993).
- Legal Issues Facing Small Businesses And Their Owners (with Michael Troilo) in Human Resource Management in Small Business (New Horizons In Management) (eds. Cooper and Burke)
- Federal Appellate Practice (with Robert E. Bacharach) in Appellate Manual For Oklahoma Lawyers (eds. Muchmore & Ellis) (3 vols.) (1997)
- The Economics of Renewable Energy, in The Handbook of Energy Finance (Wiley, 2012) (ed. Simians)
- Renewable Energy Economics (available at www.ssm.com)
16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.
- N/A.
17. **Commitments regarding nomination, confirmation, and service:**
- (a) Have you adhered to applicable laws and regulations governing conflicts of interest?
 Yes.
- (b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?
 No.
- (c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?
 Yes.
- (d) Will you cooperate in providing witnesses and briefers in response to congressional requests?
 Yes.
- (e) Will those witnesses be protected from reprisal for their testimony or briefings?
 Yes.
- (f) Do you agree, if confirmed, to appear and testify upon request before this committee?
 Yes.
- (g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?
 Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

BRAD R. CARSON.

This 6th day of December, 2013.

[The nomination of Hon. Brad R. Carson was reported to the Senate by Chairman Levin on January 28, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 12, 2014.]

[Prepared questions submitted to Dr. William A. LaPlante by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions, particularly with respect to the role of the service acquisition executives?

Answer. I agree with the goals of these defense reforms; indeed they have yielded a demonstrated improvement in the joint warfighting capabilities of the U.S. military. I do not currently see the need for any modifications.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. None at this time.

DUTIES

Question. What is your understanding of the duties and functions of the Assistant Secretary of the Air Force for Acquisition?

Answer. The Assistant Secretary of the Air Force for Acquisition is the Service Acquisition Executive (SAE) for the Air Force, the senior position authorized to exercise, on behalf of the Secretary, overall responsibility for acquisition functions within the Air Force.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I possess more than 28 years of experience in defense technology including positions at the MITRE Corporation and the Johns Hopkins University Applied Physics Laboratory. I have also served as member of the Defense Science Board, a special advisor to the U.S. Strategic Command's Senior Advisory Group and Naval Research Advisory Committee.

Prior to entering public service, I was the Missile Defense Portfolio Director for the MITRE Corporation. In this role, I led a technical team providing analytic and system engineering expertise across the Missile Defense Agency portfolio of ballistic missile defense systems. Previously, I was the Department Head for Global Engagement at the Johns Hopkins University Applied Physics Laboratory (JHU/APL) where I was responsible for all of APL's work supporting offensive military capabilities. Additionally, I was a member of APL's Executive Council and served on many other Laboratory leadership initiatives. As a senior manager at both MITRE and JHU/APL, I've had the opportunity to successfully lead large organizations with significant technical missions in support of the Department of Defense (DOD) and its major research and acquisition programs.

In the brief time I have been in the government, I have been extremely impressed with the dedication and professionalism of the Air Force acquisition workforce as well as OSD. I am absolutely committed to help the Air Force Acquisition Enterprise achieve the levels of excellence, including improving acquisition outcomes, that I know it can.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Assistant Secretary of the Air Force for Acquisition?

Answer. No; however, if confirmed, important to my success in this role will be my continued interaction, engagement and collaboration with other senior leaders engaged in the defense establishment, such as the other Component Acquisition Executives, the Defense Acquisition Executive, and the Air Force leadership. Additionally, continued interaction, engagement and collaboration with the scientific community and defense industry will be a foundation of acquisition success. I intend to heavily leverage my network of defense and technology experts across the government, industry, and academia.

RELATIONSHIPS

Question. If confirmed, what would your working relationship be with:

The Under Secretary of Defense for Acquisition, Technology, and Logistics

Answer. The Under Secretary of Defense for Acquisition, Technology, and Logistics USD(AT&L) is DOD's most senior acquisition official. If confirmed, I look forward to working with Mr. Kendall on all matters related to acquisition, technology, and logistics programs impacting the Department of the Air Force. In my present role, I have a very good professional relationship with Mr. Kendall and I have found him to be extremely effective and helpful to Air Force efforts to execute our largest and most visible programs.

Question. The Deputy Under Secretary of Defense for Acquisition and Technology.

Answer. If confirmed, I look forward to working with the Principal Deputy on all matters related to acquisition, technology, and logistics programs impacting the Department of the Air Force. In my present role, I have a very good professional relationship with Mr. Estevez and if confirmed, I look forward to continuing that relationship.

Question. The Secretary of the Air Force.

Answer. Subject to the authority, direction, and control of the Secretary of Defense, the Secretary of the Air Force is responsible for and has the authority necessary to conduct all affairs of the Department of the Air Force. If confirmed, I look forward to continuing the solid working relationship of the past as a direct report responsible to the Secretary for all acquisition, research, and development. In my present role, I have already had significant interaction with Secretary James and have found her to be extremely engaged and supportive of Air Force acquisition success.

Question. The Under Secretary of the Air Force.

Answer. The Under Secretary of the Air Force is authorized, subject to the Secretary of the Air Force's direction and control, to act for and with the authority of the Secretary of the Air Force on all matters for which the Secretary is responsible; that is, to conduct the affairs of the Department of the Air Force. If confirmed, I would continue to foster a close working relationship with Mr. Fanning to ensure that policies and resources are appropriate to meet the needs of the Air Force.

Question. The other Assistant Secretaries of the Air Force.

Answer. If confirmed, I will work closely with the other Assistant Secretaries of the Air Force and foster teamwork and information sharing in order to carry out the goals and priorities of the Department of the Air Force and in cross cutting areas where horizontal integration of Air Force people and resources is required and provides best value to DOD, the combatant commanders, and the taxpayer.

Question. The Chief of Staff of the Air Force.

Answer. The Chief of Staff of the Air Force is subject to the authority, direction, and control of the Secretary of the Air Force, presides over the Air Staff, and is a principal advisor to the Secretary. In addition, as a member of the Joint Chiefs of Staff he is a military adviser to the President, the National Security Council, and the Secretary of Defense. The relationship between the Assistant Secretary and the Chief of Staff is extremely important. If confirmed, I would continue to foster a close working relationship with General Welsh to ensure that policies and resources are appropriate to meet the needs of the Air Force and respect his additional responsibilities as a member of the Joint Chiefs of Staff.

Question. The General Counsel of the Air Force.

Answer. The General Counsel is the chief legal officer and chief ethics official of the Department of the Air Force and serves as the senior legal advisor to Air Force leaders. He is responsible, on behalf of the Secretary of the Air Force, for the effective and efficient provision of legal services in the Air Force. If confirmed, I will continue to foster a good working relationship with the General Counsel.

Question. The Service Acquisition Executives of the Army and Navy.

Answer. If confirmed, I look forward to continuing the close working relationship with Mr. Sean Stackley and Ms. Heidi Shyu. A strong national defense will require joint capability portfolios, reduction of program redundancy, improved joint interoperability across service centric platforms, and increased joint R&D and acquisition initiatives with new organizations and processes that cut across traditional stovepipes. As senior leaders in acquisition in the Department, all three SAEs must work together to reshape the defense enterprise.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the Assistant Secretary of the Air Force for Acquisition?

Answer. The Air Force Acquisition Enterprise is exceptionally capable and continues to deliver the world's best and most advanced weapons and other capabilities. After having been in the Principal Deputy position for over 8 months, I have a much better understanding of the challenges and opportunities facing the Air Force Acquisition Enterprise. My initial assessment is that the Enterprise has the following areas of concern that require attention: the challenges linked to declining and unstable budgets as well as the need to better manage and develop the acquisition workforce. Furthermore, while progress has been made on acquisition improvement via initiatives such as Better Buying Power, the Air Force acquisition community will need to continue to improve cost and schedule performance. The often well cited challenges to do better up front systems engineering, robust risk management, assessment of technology maturity levels, and disciplined approaches to requirements development and changes, are all areas that are improving in the Air Force but still have ways to go to systemically improve acquisition outcomes across the enterprise. This must be sustained over a long term to have lasting impact, and if confirmed, will be my areas of emphasis.

The budgetary environment challenges acquisitions directly by impacting the dollars available to develop, procure, field and sustain systems, as well as indirectly, including the recent furloughs and government shutdown cutting into the time available for the workforce to accomplish essential tasks. Budgetary limitations and instability will be a fact of life for the foreseeable future. While both the Air Force and DOD are taking steps to mitigate these challenges, there is no doubt the current environment will impact existing programs. Minimizing the impact to key programs like the KC-46 Tanker, F-35, the Long-Range Strike Bomber and others, is a major challenge. Additionally, I have witnessed how budget uncertainty has made it extremely difficult for our program managers to manage established cost and schedule baselines; for example driving decisions toward short term contracts and strategies that may be less efficient for the taxpayer than longer term ones (such as multi-year contracts).

The performance of the workforce is even more impressive given the environment in which they are performing. With the likelihood of a shrinking workforce, it is essential we develop a workforce structure that is agile enough to realign program staffing and skill mix to meet evolving mission needs. The desired end state should be to ensure solid functional career management while permitting the flexibility to better realign the workforce when necessary. We also need to closely monitor the morale and associated attrition rates of our highly skilled early career personnel—the past year has impacted our workforce in ways we are still trying to understand, and we must minimize any negative effect on the broader long-term effort to revitalize the acquisition workforce.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will focus on forcing the Enterprise to determine if a capability requirement is worth the cost. In my current position, I have stressed how requirements can drive cost, with the intent of guiding the community to evaluate how changing or reducing a requirement, even slightly, can have significant cost and schedule ramifications. Cost/schedule versus capability trade-off curves are a valuable tool in identifying which requirements are key cost drivers and can assist in the assessment of which requirements can be reduced. The Configuration Steering Boards (CSB) and the Air Force Requirements Oversight Council (AFROC) provide two forums to evaluate requirements priorities and trade-offs, and while the AFROC has been essential to this task, I am seeking to increase the effectiveness of CSBs in this regard. Finally, the acquisition community has demonstrated its commitment to cultivating a strong working relationship with the requirements community, and the teamwork between acquisitions and requirements will continue to pay dividends as we face a challenging future.

While there are a number of initiatives in work to help the Air Force reduce the cost of programs, I think the most important thing I can do is to increase the senior leadership emphasis on execution. I will personally hold Program Executive Officers (PEO) and individual program managers accountable for the outcomes of their programs. To enable this, quarterly and Annual Acquisition Performance Assessments of the Acquisition Enterprise are reported and assessed. These can be an invaluable tool to evaluate the state of acquisition cost, schedule, and performance.

Workforce qualifications are another major challenge facing the enterprise. It will be essential that personnel in key positions have knowledge and experience in specific program domains and phases. I have been impressed in my short tenure as Principal Deputy in the quality of the workforce in our key programs; challenges that need attention are to build depth in the talent as well as building mechanisms for increased mobility and flexibility to quickly move top talent to high need programs.

Question. If confirmed, what management actions and timelines would you establish to address these challenges?

Answer. If confirmed, I will work closely with our new Secretary of the Air Force as well as our Chief of Staff of the Air Force to establish an action plan that aligns with their priorities for Air Force Acquisition in order to address these areas. I see these challenges as an opportunity to revamp the Air Force Acquisition Enterprise to be more efficient and effective.

PRIORITIES

Question. If confirmed, what broad priorities would you establish for Air Force acquisition, research, and technology?

Answer. If confirmed, I plan to focus on what I consider some of the Air Force's most challenging problems in the acquisition arena. My preliminary assessment is that our effectiveness is often measured by how well we execute our most visible programs; however, the discipline and tradecraft with which we do so also makes us successful in the execution of our less visible, smaller programs. Rightfully so, acquisition performance will be judged by our weakest programs, not our strongest. We must continue to develop and grow our acquisition workforce to ensure it can keep our most critical acquisition programs on track, but so that we can also "own the technical baseline" for our weapon systems and other capabilities. We must strengthen our organic ability to develop, produce, field and sustain the most technologically advanced systems this world has ever known. I believe this priority is consistent with our new Air Force Secretary's priority to take care of people, which includes recruiting, training and shaping a quality force.

Sound resource execution is another critical focus item so that we can more effectively stretch the benefit of every dollar with which we are entrusted. Our Secretary of the Air Force (SECAF) has identified as a priority the need to ensure our Air Force remains the most capable in the world at the lowest possible cost. In this environment of declining resources and budget uncertainty, we must be extremely efficient and effective in how we plan to use, and ultimately spend our scarce fiscal resources. Mr. Kendall's Better Buying Power Initiatives are a good set of guiding principles that help us to be effective resource stewards.

Finally, we have a responsibility to develop and deliver the Air Force capabilities required to fight and win in the 2023 timeframe and beyond. Among other things, this means being able to fight and win in highly contested environments, including being challenged in space, control of the electro-magnetic spectrum, and cyber. I believe this priority meshes well with our SECAF's priority to balance today's readiness with tomorrow's modernization. As we preserve the Service's current readiness posture, our Air Force must also make investment decisions that will ensure we remain the most capable Air Force in the world in the 2023 and beyond timeframe. This requires that we invest in important science and technology advancements, maintain a global technology horizon scan to identify emerging disruptive technologies, and developing comprehensive modernization and recapitalization strategies designed to keep our Air Force the greatest in the world.

MAJOR WEAPON SYSTEM ACQUISITION

Question. Do you believe that the current investment budget for major systems is affordable given decreasing defense budgets, the historic cost growth trends for major systems, and the continuing costs of ongoing contingency operations?

Answer. Yes. Air Force Acquisition is responsible to uniformed servicemembers and the American taxpayers to ensure that they have the best equipment at the best value. I support USD(AT&L)'s affordability initiative to establish goals and caps to ensure funding limitations are identified early and revalidated at milestone

decisions. If programs exceed their affordability goals, the Air Force will make a decision to restructure the programs so they are affordable.

Question. If confirmed, how do you plan to address this issue?

Answer. If confirmed, I am committed to working with the requirements and resource communities to ensure programs have clear, achievable requirements and realistic funding profiles.

Question. What would be the impact of a decision by the Department to reduce purchases of major systems because of affordability issues?

Answer. Air Force requirements are carefully structured to ensure the service can support its needs based on current threats. Any reduction of major systems will affect our overall. Any reduction of major system purchases will result in reduced force structure. Such reductions to planned force structure will impact the Services ability to meet COCOM requirements, thus affecting readiness. I am committed to ensuring that all Air Force programs meet their affordability goals to best support the warfighter.

Question. Specifically, are sufficient funds allocated in future years' budgets to execute the Air Force's current acquisition plans for major systems, including, but not limited to, the F-35, KC-46, the Long-Range Strike Bomber (LRS-B).

Answer. The deep cuts brought on by sequestration-level funding has forced the Air Force to make profound cuts to readiness and major defense acquisition programs funded out of investment accounts in order to achieve the targeted reduction amounts in the first few years of the fiscal year defense plan. When forced to make tough decisions, I understand the Air Force will favor new capabilities over upgrades to legacy forces. I understand the top three acquisition priorities remain the KC-46, the F-35, and the LRS-B. As best as possible, the Air Force will aim to protect these programs in the current fiscal environment.

Question. Nearly half of DOD's major defense acquisition programs have exceeded the so-called "Nunn-McCurdy" cost growth standards established in section 2433 of title 10, U.S.C., to identify seriously troubled programs. Section 206 of the Weapon Systems Acquisition Reform Act of 2009 (WSARA) tightened the standards for addressing such programs.

Answer. The Air Force is committed to reducing costs across all acquisition programs. The Air Force closely tracks execution and provides guidance as necessary to keep efforts "on track". The number of Nunn-McCurdy breaches has declined significantly since the mid-2000s (fiscal year 2005-2008 had 26 breaches over 14 programs). Over the past 3 years, the Air Force has had 5 programs declare a significant or critical Nunn-McCurdy breach. Of those, three are no longer Major Defense Acquisition Programs (MDAP) (C-27J, C-130AMP, and National Polar-orbiting Operational Environmental Satellite System), one was driven by a combination of quantity reductions and cost growth (Global Hawk), and one resulted from restoration to MDAP status (EELV). This past year, the Air Force had no Nunn-McCurdy breaches.

Question. In your opinion, what is the root cause for cost growth in the Department's major weapon system programs?

Answer. The 2013 USD/AT&L Report on the Performance of the Acquisition System lists three dominant root causes of Nunn-McCurdy cost growth over the past 3 years. Poor Management effectiveness was the primary root cause and included: poor systems engineering to translate user requirements into testable specifications; ineffective use of contractual incentives; poor risk management; and poor situational awareness. Additional dominant root causes are unrealistic baseline cost and schedule estimates and changes in procurement quantities.

Question. To what extent does requirements creep and changes in requirement quantities impact cost growth triggering Nunn-McCurdy breaches?

Answer. These two factors may impact Unit Cost growth. Changing requirements based on warfighter needs can lead to cost and schedule growth. However, as the Air Force has worked to better integrate the requirements and budgeting process, changing requirements is being seen less as a driver, and I expect that to remain so, especially as we move into an era of decreased budgets. Although over the past 3 years, only 22 percent of Nunn-McCurdy breaches were driven by changes in procurement quantities, I am concerned with the impact budget reduction-driven changes in quantities will have on Defense programs in an environment of declining resources.

Question. What steps if any would you take, if confirmed, to address the out-of-control cost growth on DOD's major defense acquisition programs?

Answer. DOD, in concert with recent legislation such as WSARA, has begun to address much of the cost growth seen in the past. This may be evidenced by the reduced number of Nunn-McCurdy breaches over the past few years. As a cautionary note, many of the WSARA reforms as well as the related Better Buying

Power initiatives are going to take years to affect the final acquisition outcomes of programs; for that reason it is critical that the enterprise be persistent in their dissemination and application. If confirmed, I am committed to working with fellow SAEs in supporting the Department's efforts in Better Buying Power implementation and related foundational reforms of WSARA. The intent of this effort is to contain cost growth to provide the warfighter increased capability with decreased costs—truly better buying power. I am particularly focused on controlling cost and schedule growth of development programs as that is where we can perhaps see the biggest impact in the near to mid-term.

Question. What steps, if any, do you believe that the Air Force should consider taking in the case of major defense acquisition programs that exceed the critical cost growth thresholds established in the “Nunn-McCurdy” provision?

Answer. Under such circumstances, there are mechanisms in place that allow for major restructuring or termination of poorly performing programs. While program terminations are rare, the Air Force leadership, working in conjunction with the Office of the Secretary of Defense and the Joint Staff has the authority to cancel programs. In this era of sharply declining budgets, it would not be surprising to see program terminations used more frequently in the case of troubled programs.

If confirmed, I will continue to work with the Defense Acquisition Executive and PEOs to ensure the Air Force continues to avoid programs exceeding thresholds. PEOs have been tasked with implementing Program Integration precepts which organize and synchronize the analyses and outputs that programs must carry out into a comprehensive process. Examples of analyses are cost estimating, schedule management, earned value management, and integrated risk analysis. The program integration function assists them in overseeing proper and efficient execution of the efforts within their respective portfolios.

Question. Do you see the need for any changes to the Nunn-McCurdy provision, as revised by section 206?

Answer. I do not currently envision any required changes to the current provision.

Question. What principles will guide your thinking on whether to recommend terminating a program that has experienced critical cost growth under Nunn-McCurdy?

Answer. If a program has a Nunn-McCurdy breach, then OSD conducts a review and certification process to meet the requirements as laid out in title 10, U.S.C., section 2433. My recommendation to continue or terminate a program would be based on an assessment of program execution performance, remaining risk, and Air Force needs.

Question. What principles will guide your thinking on whether someone should be held accountable for Nunn-McCurdy breaches?

Answer. An investigation into the decisions, and information available at the time of the decisions, are considered prior to making an accountability determination for anyone in the acquisition execution chain. Using well established best practices, we must arrive at root cause of acquisition failures before moving to the steps of assessing accountability. Accountability must also be directly tied to authority and resources. If an individual did not have the authority or the resources to properly execute their program due to budget, cost, schedule, technical or other factors outside of their control, then the individual cannot and should not be held accountable. In all cases, if confirmed I am committed to giving our program managers and PEOs the right authorities, responsibilities, and then holding the chain of command accountable for the outcome.

POSSIBLE REVISIONS TO DODI 5000.02

Question. Under Secretary of Defense for Acquisition, Technology, and Logistics Frank Kendall has recently released revisions to Department of Defense Instructions (DODI) 5000.02, which governs the defense acquisition system.

What are the top five changes to this instruction you would recommend to streamline or otherwise improve the defense acquisition system?

Answer. I am still in the process of reviewing the recent revision to DODI 5000.02, but if confirmed, I look forward to working with Mr. Kendall on continuing to streamline and improve the defense acquisition system.

Question. What is your understanding of the objectives of the review effort?

Answer. My understanding is the objectives of the review was to publish a revised instruction that: decreased emphasis on “rules” and increases emphasis on process intent and thoughtful program planning; provides program structures and procedures tailored to the dominant characteristics of the product being acquired and to unique program circumstances, (e.g., risk and urgency); enhances the discussion of

program management responsibility and key supporting disciplines; and institutionalizes changes to statute and policy since the last issuance of DODI 5000.02.

OPERATING AND SUPPORT COSTS

Question. The Department estimates that operating and support (O&S) costs account for up to 70 percent of the acquisition costs of major weapon systems. Section 832 of the National Defense Authorization Act (NDAA) for Fiscal Year 2012 requires the Department to take a series of steps to improve its processes for estimating, managing, and reducing such costs.

What is the current status of the Air Force's efforts to implement the requirements of section 832?

Answer. The Air Force has implemented the NDAA for Fiscal Year 2012, section 832 through comprehensive guidance on assessing, managing and controlling operating and support (O&S) cost for major weapon systems. The Air Force is working with key stake holders on readiness and O&S funding drivers to balance readiness and cost in weapon system sustainment strategies. Examples of ongoing section 832 related initiatives include: implementation of guidance requiring life cycle sustainment planning documents to include comprehensive sustainment strategy and cost information; implementation of independent logistics assessments to ensure effectiveness of sustainment planning; and the establishment and monitoring of program affordability targets.

Question. What steps remain to be taken to implement section 832, and what is the Air Force's schedule for taking these steps?

Answer. The Air Force, in a collaborative effort between acquisition and sustainment leadership, is taking steps to increase the effective implementation of performance based product support per guidance from OSD (AT&L). Current actions expected to be completed in 2014 include establishing a program evaluation methodology, identifying a high payoff target program list, and finalizing implementation strategy recommendations.

Question. Regarding section 832(b)(8), what Air Force processes are being performed to ensure O&S costs are reduced by ensuring the depot maintenance considerations are part of the entire acquisition process? What additional processes are required to further bring down O&S costs by ensuring depot maintenance considerations are part of the entire acquisition process?

Answer. Through implementation of statute and regulation, Air Force guidance requires early and continuous consideration of depot maintenance including at oversight reviews and in life cycle planning documentation. Additionally, the Air Force is already taking steps to shift the organizational and cultural focus of acquisition headquarters to adopt an Integrated Life Cycle Management and portfolio perspective. I have no additional process recommendations, but if confirmed, I will continue to look for opportunities to reduce O&S costs.

Question. What steps, if any, are needed to ensure that the requirements and acquisition communities fully and effectively collaborate to understand and control the O&S costs prior to and early in product development, when it is possible to have the most significant impact on those costs?

Answer. In November 2012, as a direct result of the Acquisition Continuous Process Improvement (CPI) 2.0 effort, the Air Force implemented policy titled "Implementation of Contractual and Requirements Sufficiency" to address Life Cycle Affordability Cost versus Capability Tradeoff Analysis at all requirements and acquisition review boards. The policy mandates cost/schedule versus capability/design trade-off curves (metrics) throughout the life of the program. Implementing Commands, such as Air Force Materiel Command, support the requirements sponsor by providing the analysis for all developmental Joint Capabilities Integration and Development System (JCIDS) documents.

Question. What additional steps, if any, do you believe the Air Force needs to take to bring O&S costs under control?

Answer. In concert with the logistics community, Air Force Acquisition is focusing efforts on the design, development, and delivery of life cycle supportable and sustainable systems and the appropriate support equipment. The goal is to enhance warfighter mission capabilities while minimizing corrosion, environment, safety, and occupational health risks along with minimizing life cycle system product support costs. The Air Force is also linking weapon systems sustainment resources to readiness measures to optimize cost versus readiness.

SYSTEMS ENGINEERING

Question. One of the premises for WSARA was that the best way to improve acquisition outcomes is to place acquisition programs on a sounder footing from the

outset by addressing program shortcomings in the early phases of the acquisition process. The Defense Science Board Task Force on Developmental Test and Evaluation reported in May 2008 that “the single most important step necessary” to address high rates of failure on defense acquisition programs is “to ensure programs are formulated to execute a viable systems engineering strategy from the beginning.”

Do you believe that the Air Force has the systems engineering and developmental testing organizations, resources, and capabilities needed to ensure that there is a sound basis for key requirements, acquisition, and budget decisions on major defense acquisition programs?

Answer. The Air Force has been successfully building towards achieving the systems engineering resources and capabilities required to perform important acquisition activities. Sound systems engineering, especially early on, is fundamental to ensuring there is a sound basis for requirements and that they are affordable, as well as ensuring we implement and execute a successful acquisition program strategy. To this end, the Air Force continuously evaluates the resources and capabilities necessary to supply systems engineering support to acquisition programs. In the process of getting to the necessary systems engineering workforce resource levels, the Air Force has been consistently hitting our yearly goals and there is a plan in place for more improvements for fiscal year 2014. In addition, there is currently a significant enterprise-level effort to evaluate and improve deficiencies in Air Force systems engineering capabilities to enable high quality engineering decisions, improve engineering discipline through technical information management and standardization, as well as continuously address engineering workforce issues.

In terms of test and evaluation, the Air Force test personnel, facilities, equipment are first class, adequate and efficient. The Air Force Materiel Command reorganization to a 5-center construct has improved management of developmental test. At this time, my concern is that budget pressures will reduce available test resources which may ultimately increase weapon system cost and warfighter risk.

Question. Are all the steps which the Air Force takes to ensure a viable systems engineering strategy necessary to achieve the goals articulated in the 2008 Report? Specifically, which processes and procedures provide little or no value added, or for which any value added is outweighed by the cost or schedule delay of the processes or procedures. In addition, what elements of organizations and layers of review are redundant and unnecessary, add cost, or create schedule delays without adding commensurate value.

Answer. Section 102 of the Weapon Systems Acquisition Reform Act required systems engineering to support key three key requirements.

1. Acquisition and budget decisions made for each major defense acquisition program prior to Milestone A approval and Milestone B approval through a rigorous systems analysis and systems engineering process.
2. Include a robust program for improving reliability, availability, maintainability, and sustainability as an integral part of design and development within the systems engineering master plan for each major defense acquisition program.
3. Identify systems engineering requirements, including reliability, availability, maintainability, and lifecycle management and sustainability requirements, during the Joint Capabilities Integration Development System process, and incorporate such systems engineering requirements into contract requirements for each major defense acquisition program.

All three of the key requirements have been implemented and I consider value added. The program Systems Engineering Plan and the execution of this plan is key to accomplishing the requirements. In addition, the Air Force has streamlined program technical oversight reviews, when determined necessary by the Air Force Chief Engineer, to minimize added cost while being value added to ensure program success. The Air Force assists the Deputy Assistant of Secretary of Defense Systems Engineering Program Support Reviews which are completed for ACAT ID, MAIS programs, and special interest programs.

Question. What is your assessment of the Air Force’s implementation to date of section 102 of WSARA, regarding systems engineering?

Answer. I am pleased by the good working relationship that Air Force acquisition has with the Deputy Assistant Secretary of Defense for Systems Engineering. We work with his staff to make improvements in WSARA focus areas and we collaborate to document the status of Air Force systems engineering in the annual WSARA Report.

Specifically, the Air Force is making progress implementing two important areas cited in section 102 of WSARA, early systems engineering and reliability. In 2013,

SAF/AQ helped establish the Air Force Requirements Review Group (AFRRG) in order to increase program success by tightening the linkage between requirements development and acquisition. SAF/AQ participates in the AFRRG, allowing Air Force engineers to ensure tight linkage between requirements, technology maturity, and accomplishment of sufficient early systems engineering to inform cost and capability analyses.

In the area of reliability, the Air Force continues to collaborate with OSD and the Army and Navy through the Service Leads meetings held by DASD(SE). We have aided efforts refining the DAES Reliability Growth Curve (RGC) reporting requirement mandated under DTM 11-003, the development and review of the OSD R&M engineering management guide, improving RAM-C Rationale Report Guidance, and the ongoing human capital initiatives for the RAM workforce.

Question. What additional steps will you take, if confirmed, to implement this provision?

Answer. If confirmed, I will continue to refine Air Force engineering enterprise governance to enable high-quality engineering decisions and seamless communication. Air Force engineers must have the technical expertise to build a strong collaborative partnership with industry to ensure we acquire and field the capabilities the Air Force needs while ensuring the American taxpayers' interests remain a priority. Furthermore, hiring the best and brightest talent is challenging in this fiscal environment but must also continue to be a priority. I will exercise my authority as Air Force Scientist and Engineer Career Field Functional Authority to explore and pursue, as cited in section 102, additional authorities or resources needed to attract, retain, and reward systems engineers with appropriate levels experience and technical expertise to meet Air Force needs.

TECHNOLOGICAL MATURITY

Question. Section 2366b of title 10, U.S. Code, requires the Milestone Decision Authority for a major defense acquisition program to certify that critical technologies have reached an appropriate level of maturity before Milestone B approval.

What steps if any will you take, if confirmed, to make sure that the Air Force complies with the requirements of section 2366b?

Answer. If confirmed, I will ensure the Air Force continues to comply with 2366b certification requirements. The Air Force has established robust compliance processes that I will monitor and continue to improve upon. For example, the Technology Readiness Assessment (TRA) process has been reestablished and guidance is being published to ensure a formal, independent assessment of critical technologies. In accordance with this guidance, TRAs will be conducted by a team of subject matter experts, carefully selected from the Centers' engineering and scientific community, prior to Milestone B. These experts will verify the technologies are sufficiently mature to meet the Milestone B 2366b certification requirement, and their TRA report will be approved by the Deputy Assistant Secretary of the Air Force for Science, Technology, and Engineering before a program is recommended to proceed to Milestone B.

Question. Are you satisfied that technology readiness assessments adequately address systems integration and engineering issues which are the cause of many cost overruns and schedule delays in acquisition programs?

Answer. No. While technology readiness assessments are essential to help avoid many cost overruns and schedule delays, they are not sufficient as a stand-alone solution for systems integration and engineering risks. The expertise of a professional engineering workforce within the Air Force acquisition community to perform early systems engineering analysis is also critical to addressing these challenges. This workforce must balance the integration of:

- (1) Overall systems engineering design and process,
- (2) Concerns for operational mission requirements,
- (3) The state of current available technologies (TRLs 8 & 9),
- (4) Near-term technologies in laboratory development (TRLs 4-6), and
- (5) Increasingly stringent concerns for funding and schedule realism.

An engineering workforce effectively addressing these issues earlier in the program will help mitigate cost overruns and schedule delays in future systems.

Question. Beyond addressing technological maturity issues in acquisition programs, what other steps should the Air Force take to increase accountability and discipline in the acquisition process?

Answer. It would be unreasonable to hold a program manager accountable for program failures for which he/she has inadequate authorities or resources to affect outcomes. If confirmed, I will continue to improve accountability and discipline in acquisitions by first ensuring program managers have the adequate authorities to exe-

cute their missions. I am committed to vigorously defending the authorities granted to the program manager and ensuring he/she continues to have the required expertise and resources to lead our programs successfully. Finally, the culture must allow for program managers to be able to “raise a flag” if they assess the program they are to manage is not executable.

Question. What features of an acquisition program, in your view, contribute most to the effective maturation and integration of advanced technologies?

Answer. Competitive prototyping, when practical and affordable, is important because it drives technology maturation early in the acquisition, enables effective systems engineering, and allows the warfighter to see the potential capability demonstrated in an operational or relevant environment. This leads to the most effective maturation of technology with the minimization of programmatic risk.

CONCURRENCY

Question. Some of the Department’s largest and most troubled acquisition programs appear to have suffered significantly from excessive concurrency—the effort to produce a weapon system, even as it is still being designed.

What impact do you believe that such excessive concurrency has on our efforts to produce major weapon systems on schedule and on budget?

Answer. With any strategy there are risks of cost growth and schedule slippages. Concurrency is often highlighted as a reason for cost growth. Unfortunately, research into this acquisition strategy is sparse. A study published in the July 2011 edition of the Defense Acquisition Research Journal found that “concurrency by itself is insufficient to predict cost growth”. There may be other factors, such as quantity, requirements and budget changes that create cost growth. Surprisingly, the study found that “too little concurrency was actually more problematic than too much concurrency” and could contribute to greater cost growth.

Mr. Kendall has spoken extensively on this subject. He has noted that excessive concurrency can drive cost growth and result in major schedule disruptions that produce further inefficiency. One must keep in mind that the acceptable degree of concurrency between development and production depends on a range of factors including the risk associated with the development phase, the urgency of the need, and the likely impact on cost and schedule of realizing that risk. A careful balance must be struck on every program, taking all these factors and others into account. If confirmed, I look forward to working with the DAE and PEOs to ensure that balance is carefully assessed and properly managed.

Question. What steps will you take, if confirmed, to address this issue?

Answer. If confirmed, I will weigh the risks with the potential rewards of concurrency and make informed decisions that are in the best interest of the Air Force and the taxpayer.

Question. Under what circumstances, if any, do you believe that it is useful and appropriate to require prime contractors on major defense acquisition programs to share in concurrency costs?

Answer. If the driving reason for taking on concurrency would benefit the prime contractor in executing the contract and the risks and rewards were acceptable to the Air Force, I believe that both parties should share in the concurrency costs and share in both the risk and reward.

Question. In your view, would a requirement for such cost sharing reduce the likelihood of excessive concurrency in the development and production of major weapon systems?

Answer. Yes. If both parties have “skin in the game,” then the likelihood of taking on concurrency will be a deliberate decision by both parties to accept the risks and rewards.

UNREALISTIC COST, SCHEDULE, AND PERFORMANCE EXPECTATIONS

Question. Many acquisition experts attribute the failure of DOD acquisition programs to a cultural bias that routinely produces overly optimistic cost and schedule estimates and unrealistic performance expectations. Section 201 of WSARA seeks to address this problem by promoting early consideration of trade-offs among cost, schedule, and performance objectives in major defense acquisition programs.

Do you believe that early communication between the acquisition, budget, and requirements communities in DOD can help ensure more realistic cost, schedule, and performance expectations?

Answer. Yes.

Question. If so, what steps if any would you take, if confirmed, to ensure such communication?

Answer. If confirmed, I will continue efforts to shift the organizational and cultural focus of acquisition headquarters to adopt an Integrated Life Cycle Management and portfolio perspective. This will help address WSARA section 201 and will align acquisition headquarters with life cycle organizational changes already made in the field headquarters and amongst the PEO organizations. The main shift will be having our acquisition program element monitors partnering with the O&S program element monitors and other functional staff to ensure that all actions are a result of total life cycle deliberative process.

Question. DOD has increasingly turned to incremental acquisition and spiral development approaches in an effort to make cost, schedule, and performance expectations more realistic and achievable.

Do you believe that incremental acquisition and spiral development can help improve the performance of the Air Force's major acquisition programs?

Answer. Yes. While not a panacea, using an incremental acquisition approach (e.g. block) can help improve program performance. This approach is premised on knowledge-based, incremental development that provides increasing degrees of warfighting capability with each block. This is the preferred strategy that provides the most effective balance of technical risk, financial resources, and the Air Forces' operational needs.

Question. What risks do you see in the Air Force's use of incremental acquisition and spiral development?

Answer. If implemented correctly, there would be modest to very little technical risk to using such a strategy. If not correctly implemented, incremental development could result in the program being overwhelmed with frequent milestone or fielding decision points and associated approval reviews. It is important to structure programs so multiple activities or build phases may be approved at any given milestone or decision point, subject to adequate planning, well-defined exit criteria, and demonstrated progress. Having a well-trained acquisition workforce is critical to mitigating the risk since the use of incremental development can lead to additional complexities in all phases of the program including testing, management, sustainment, and security.

Question. In your view, has the Air Force's approach to incremental acquisition and spiral development been successful? Why or why not?

Answer. The Air Force has had successes with both incremental acquisition (Advanced Medium-Range Air-to-Air Missile, F-16, F-15) and spiral development (Ops software for Air Operations Centers). We consider both approaches fundamental in our acquisition strategies. However, using incremental/spiral development strategies with the emerging technologies in MDAP or MAIS programs must be evaluated on a case-by-case basis as there is no one solution that works best. We have found that incremental acquisition/spiral development approaches using mature technologies are critical in both IT and non-IT systems as they allow capability to be delivered to the warfighter faster.

Question. What steps if any do you believe are needed to ensure that the requirements process, budget process, and testing regime can accommodate incremental acquisition and spiral development approaches?

Answer. While the Service is working to make our processes more flexible and complementary to accommodate incremental acquisition and spiral development approaches, more can be done to take additional steps to make these approaches more amenable. We can start with working on budgeting models that are more flexible to shorter timelines. This is similar to the concerns raised in the section 804 report about the budgeting lag and difficulty in differentiating appropriations for some of the new technology.

For testing, we have to continue to strengthen the integrated testing approach to ensure that we are using dollars and testing activities more efficiently. We have made strides in the requirements community in implementing methodologies that allow us to set high level requirements through the formal process and standing up lower level boards to manage requirements for increments and releases, but we need to continue on working on setting realistic and executable requirements up front. Finally, demanding open architecture designs for our programs is critical to helping enable cost effective spiral development; this leads to a need for government and industry to arrive at mutually agreeable terms on data rights ownership.

Question. How should the Air Force ensure that the incremental acquisition and spiral development programs have appropriate baselines against which to measure performance?

Answer. As part of implementing statute and regulation, Air Force guidance requires each program or increment to have a baseline establishing program goals—thresholds and objectives—for the minimum number of cost, schedule,

supportability, and performance parameters that describe the program over its life cycle.

FUNDING AND REQUIREMENTS STABILITY

Question. The poor performance of major defense acquisition programs has also been attributed to instability in funding and requirements. In the past, DOD has attempted to provide greater funding stability through the use of multi-year contracts. More recently, the Department has sought greater requirements stability by instituting Configuration Steering Boards (CSB) to exercise control over any changes to requirements that would increase program costs.

Do you support the use of CSBs to increase requirements stability on major defense acquisition programs?

Answer. Yes. In my current position, I have received a CSB briefing on every ACAT I program. I have found them to be an effective forum for stabilizing requirements of major defense acquisition programs. CSBs provide a collaborative environment for rigorous scrutiny on controlling derived requirements and I believe they will continue to be a value-added function.

Question. What other steps if any would you recommend taking to increase the funding and requirements stability of major defense acquisition programs?

Answer. Funding and requirements stability are critical to stable, successful programs. The acquisition community has an obligation to work closely with the requirements and other stakeholder communities to ensure programs have clearly defined and achievable requirements with realistic funding profiles. I have found that the Defense Acquisition Management System tends to have optimism baked in (overoptimistic schedules, cost estimates, execution plans). The acquisition community must guard against overoptimistic planning and remain engaged with stakeholders throughout the process to enable requirements and funding profiles that are inherently stable because they are realistic and affordable.

Question. The Joint Requirements Oversight Council (JROC) has recently launched an initiative to ensure "appropriate trade-offs are made among the life-cycle cost, schedule, and performance objectives, and procurement quantity objectives in the establishment and approval of military requirements." Specifically, the JROC has issued guidance that "encourages Program Managers, Program Executive Officers and Component Acquisition Executives, in coordination with the requirements sponsor, to officially require requirements relief, through the appropriate requirements validation authority, where Key Performance Parameters appear out of line with an appropriate cost-benefit analysis."

If confirmed, what steps will you take to ensure the continued success of this initiative?

Answer. The Air Force has taken steps to incorporate the appropriate trade-offs during the requirements development and validation process as part of the Capability Based Analysis and Analysis of Alternatives. During program execution, the Air Force continues to address trade-off opportunities in CSBs and Air Force Review Boards. If confirmed, I will continue to work with the Secretary, Chief, and other departmental offices to foster a culture of teamwork with the Requirements and Resource Communities to ensure the programs started have firm cost goals in place, appropriate priorities set, and the necessary analysis to make these informed trade-offs to keep programs within affordable limits while meeting warfighter needs.

FIXED PRICE-TYPE CONTRACTS

Question. Recent Congressional and DOD initiatives attempt to reduce technical and performance risks associated with developing and producing major defense acquisition programs so as to minimize the use of cost-reimbursable contracts.

Do you think that the Air Force should move towards more fixed price-type contracting in developing or procuring major defense acquisition programs? Why or why not?

Answer. I prefer not to make blanket statements regarding the use of contract types as I believe it's important to match the contract type to each specific and unique circumstance. That said, cost-type contracts are generally the best option to explore concepts, mature technologies and buy down risk during development. Cost-type contracts may also be appropriate during system integration when performing Low Rate Initial Production (LRIP). Once a program is in production, fixed-price contracts become a more appropriate contract type. What is fundamental is to understand risk.

Question. Under what circumstances, if any, do you believe it would be appropriate for the Air Force to use a cost-type contract for the production of a major weapon system?

Answer. Initial production of satellites is a situation where cost-type contracting is often appropriate. Often in this situation, the LRIP number is so low that the initial production space vehicles may begin production prior to the LRIP space vehicles completing final integration testing. Production actuals are key to an effectively negotiated fixed-price agreement. The low production volume for satellites does not usually allow cost visibility to be carried over until later production lots enter production.

TECHNOLOGY TRANSITION

Question. The Department continues to struggle with the transition of new technologies into existing programs of record and major weapons systems and platforms. Further, the Department also has struggled with moving technologies from DOD programs or other sources rapidly into the hands of operational users.

What impediments to technology transition do you see within the Air Force?

Answer. I see resource constraints and risk as the greatest impediments to technology transition. Technology transition has a cost and in our current fiscally constrained environment, this is among the greatest impediments. The Air Force will continue to carefully assess costs associated with sustaining existing weapon systems vice recapitalizing with new ones, all while ensuring we continue to meet the needs of the warfighters. Our industry partners continue to invest in and share incredible technological advances, but, we simply cannot afford to pursue them all. Those the Air Force chooses to pursue introduce risk into development programs, especially in instances where the technology has never before been integrated into similar capabilities or designs. It is imperative that defense program managers perform adequate risk assessments of such technologies and develop well thought out risk mitigation plans. Once a choice is made to pursue a new technology, the program team must effectively utilize early systems engineering and integration, sound technology maturation techniques and carefully manage associated lifecycle costs.

Question. What steps if any will you take, if confirmed, to enhance the effectiveness of technology transition efforts?

Answer. If confirmed, I will facilitate effective communication of capability gaps and promising technologies between the warfighter and S&T communities. As a former member of the Defense Science Board, and a key contributor to the recent DSB Study on "Technology Enablers for Military Superiority in 2030," I am committed to finding, developing, and transitioning technology into our systems. I will further champion the continued investment in innovative technologies important to ensuring the best Air Force in the world remains the most capable in the future. For those technologies that we pursue, I will emphasize strong early systems engineering and integration, and when appropriate, prototyping, to reduce schedule and cost risks. I also look to collaborate with organizations such as small business. Small businesses drive the majority of our technology revolutions, while our large prime contractors lead integration, prototyping, and major program production. If confirmed, I will place increased emphasis on large prime contractor partnerships with innovative small business companies.

Question. What can be done from a budget, policy, and organizational standpoint to facilitate the transition of technologies from science and technology programs and other sources, including small businesses, venture capital funded companies, and other non-traditional defense contractors, into acquisition programs?

Answer. If confirmed, with regards to policy, I will focus on ensuring the warfighter's prioritized capability gaps are appropriately communicated and aligned with the efforts of our laboratories and industry partners, to include small businesses and venture capitalists. I will continue to coordinate efforts with my counterparts in the other Services and in OSD to maximize the return on our investment and continue to sustain/modernize the most capable warfighting force in the world.

With regards to budget, I will ensure appropriate cost assessments are accomplished for technologies available for transition, enabling effective decisions in a fiscally constrained environment. I intend to reach out to the small business, venture capital, and non-DOD traditional industrial base to leverage technology innovations of benefit to the future Air Force.

Finally, if confirmed, I will continue to assess, and when necessary, make required organizational adjustments, to maximize our ability to effectively transition technologies from our S&T community to the warfighter.

Question. Do you believe that the Air Force's science and technology organizations have the ability and the resources to carry technologies to higher levels of maturity before handing them off to acquisition programs?

Answer. The Air Force Research Laboratory has the ability to mature technology to Technology Readiness Level (TRL)/Manufacturing Readiness Level (MRL) 6/7 and

then in partnership with our Program Executive Officers and Centers to take that technology to TRL/MRL levels of 8 or 9 where it can be transitioned into a program of record. The Research Laboratory does a phenomenal job balancing the resources associated with research, applied research and technology development. If more resources are prioritized for increasing the level of maturity, then resources for longer-term activities decrease or fewer projects are selected to be matured at a higher level.

A major challenge is securing funding for the demonstration and evaluation of technology that is at TRL/MRL 6/7. This is why the role of our Program Executive Officers is so important. They serve as the transition agent between the lab and the warfighter.

Question. What steps if any do you believe the Air Force should take to ensure that research programs are sufficiently funded to reduce technical risk in programs so that technological maturity can be demonstrated at the appropriate time?

Answer. With limited funding, it's critical we prioritize our efforts and allocate resources appropriately. To accomplish this, we must clearly understand our warfighter's capability gaps, the potential capability inherent in the new technology, and the cost associated with maturing, integrating and transitioning it to the warfighter. These steps will enable effective investment in research programs that will maximize the benefit to the warfighter and ensure the continued national security of the United States.

Question. What role do you believe Technology Readiness Levels and Manufacturing Readiness Levels should play in the Air Force's efforts to enhance effective technology transition and reduce cost and risk in acquisition programs?

Answer. TRLs and MRLs play an important role in communicating the development stage of the technology and the risk associated with pursuing various research, development, test, and evaluation or acquisition decisions. TRLs and MRLs are tools that should be considered by stakeholders in determining whether to proceed with the next stage of technology development. As a guide, TRL/MRL 6 indicates a technology has reached the point where it should be considered for demonstration. However, as Under Secretary of Defense Frank Kendall often says, TRLs do not end the conversation about risk. TRLs may start the risk conversation, and they may provide a convenient shorthand benchmark, but they do not provide the answer to the question is the risk acceptable to proceed. Mr. Kendall believes, as do I, good program managers will take the TRL assessment and then perform a professional risk assessment and produce well thought out risk mitigation plans before moving forward.

Question. What is your view of the Rapid Innovation Program established pursuant to section 1073 of the Ike Skelton NDAA for Fiscal Year 2011?

Answer. The Rapid Innovation Program has been an excellent means for the Air Force to communicate critical needs and solicit vendors to respond with innovative technology solutions. The response to the program has been overwhelming, and instrumental to the transition of capability by small businesses. Over the last 3 years, the Air Force has received submissions from thousands of vendors offering solutions to critical Air Force needs. We have awarded over 60 projects directly to small businesses and anticipate awarding another 25 by the end of the year.

Question. What do you see as the major challenges to successful implementation of this program?

Answer. The main challenge is centered on the overwhelming vendor response to the program. Since the Rapid Innovation Fund started 3 years ago, we have reviewed over 2,200 white papers on innovative solutions to our critical needs. Setting up and managing the program to review these white papers, down-selecting only the most compelling, and awarding contracts on the top 3 percent is challenging. We are up to this task but it does take time to complete. The pressure on our acquisition team, especially our contracting officers, intensifies greatly with budget uncertainty. Last year due to the length of the Continuing Resolution Authority, many of our contracts were not signed until September, the final month prior to expiration of the funds.

Question. What steps will you take, if confirmed, to ensure that funds authorized and appropriated for this program are spent in the most effective manner possible to promote the objectives of the program?

Answer. If confirmed, I will continue to monitor and improve the established robust processes to increase the likelihood that these technologies transition into programs of record. We have Air Force transition agents identify critical focus areas, a fair and open competition where subject matter experts from the field select winning proposals, and rely on our transition agents to execute the contracts. Ensuring direct Program Executive Office sponsorship from the beginning is the way to guarantee a very effective use of the appropriated monies. If confirmed, I will continue

to capitalize and build on these processes to enable decentralized execution with our transition agents to ensure we have a high rate of success.

MULTI-YEAR CONTRACTS

Question. The statement of managers accompanying section 811 of the NDAA for Fiscal Year 2008 addresses the requirements for buying major defense systems under multi-year contracts as follows: “The conferees agree that ‘substantial savings’ under section 2306b(a)(1) of title 10, U.S.C., means savings that exceed 10 percent of the total costs of carrying out the program through annual contracts, except that multi-year contracts for major systems providing savings estimated at less than 10 percent should only be considered if the Department presents an exceptionally strong case that the proposal meets the other requirements of section 2306b(a), as amended. The conferees agree with a Government Accountability Office (GAO) finding that any major system that is at the end of its production line is unlikely to meet these standards and therefore would be a poor candidate for a multi-year procurement contract.”

What are your views on multi-year procurements? Under what circumstances do you believe they should be used?

Answer. I believe multi-year contracts are appropriate if the business case indicates they will provide significant savings and if there is a strong commitment to the procurement. The economies of scale linked to multi-years have the potential to generate substantial savings and can present strong incentives for suppliers to reduce negotiated price and cost. Because they create a multiple-year funding commitment with penalties, the Business Case supporting such a determination must clearly demonstrate an advantage to the Air Force and the taxpayer.

Question. What is your opinion on the level of cost savings that constitute “substantial savings” for purposes of the defense multi-year procurement statute, title 10, U.S.C., § 1A2306b?

Answer. There is historical support for 10 percent cost savings as being adequate to justify the pursuit of a multi-year contract. While this is a good rule of thumb, it is not an absolute determining factor. Thorough analysis is required. The associated business case analysis should demonstrate the savings associated with the contract would be substantial in terms of the relative difference in price the Service would pay otherwise for annual procurement and in terms of dollars saved for the taxpayer.

Question. If confirmed, under what circumstances, if any, do you anticipate that you would support a multi-year contract with expected savings of less than 10 percent?

Answer. It is difficult to answer this question in absolute terms. While generally, I would like to see a business case analysis projection of at least 10 percent savings before proceeding, there may be rare circumstances when I might support pursuing a multi-year with just short of 10 percent projected savings. For example, if I had strong confidence in the government contract negotiation team’s ability to achieve an excellent price for the Department, and if I had equal confidence the Air Force will acquire the systems I might consider supporting the multi-year.

Question. If confirmed, under what circumstances, if any, would you support a multi-year contract for a major system at the end of its production line?

Answer. I cannot imagine under what circumstances I would support a multi-year contract for a major system at the end of its production line; however, there may be a future situation where this would be appropriate. The Business Case supporting such a determination would have to clearly demonstrate an advantage to the Air Force and the taxpayer.

Question. Under what circumstances, if any, do you believe that a multi-year contract should be used for procuring weapons systems that have unsatisfactory program histories, e.g., displaying poor cost, scheduling, or performance outcomes but which might otherwise comply with the requirements of the defense multi-year procurement statute, title 10, U.S.C., § 2306b?

Answer. If confirmed, I look forward to working with the DAE and PEOs to correct circumstances which may have led to unsatisfactory program histories. Once a program has demonstrated a capability to deliver satisfactory cost, schedule, and performance outcomes, it may become a candidate for multi-year procurement. The Business Case supporting such a determination would have to clearly demonstrate an advantage to the Air Force and the taxpayer.

Question. What is the impact of the Department’s current budget situation, in your view, on the feasibility and advisability of additional multi-year procurement contracts for major weapon systems?

Answer. Given ongoing budget uncertainties, additional multi-year procurement contracts for major weapons systems would have to be on a longstanding program with many years remaining and the Business Case supporting such a determination clearly demonstrates an advantage to the Air Force and the taxpayer.

Question. Under what circumstances, if any, should the Air Force ever break a multi-year procurement?

Answer. The circumstances that I would consider ever breaking a multi-year procurement would be if the contractor fails to perform, the Air Force has significant changes to requirements, or the Business Case supporting such a determination clearly demonstrates an advantage to the Air Force and the taxpayer.

CONTINUING COMPETITION AND ORGANIZATIONAL CONFLICTS OF INTEREST

Question. Section 202 of WSARA requires DOD to take steps to promote continuing competition (or the option of such competition) throughout the life of major defense acquisition programs.

What is your view on the utility of continuing competition as a tool to achieve long-term innovation and cost savings on major defense acquisition programs?

Answer. I agree that implementing appropriate measures to ensure competition throughout the life of a program, such as those identified in section 202, can be a valuable tool to achieve long-term innovation and cost savings.

Question. Do you believe that such continuing competition is a viable option on major defense acquisition programs?

Answer. Continuing competition is a viable option on many major defense acquisition programs, but may not be viable for all areas of all major programs. It does require continued effort and management.

Question. If so, what steps if any can and should the Air Force take to address this issue?

Answer. The Air Force should continue to address long-term competitive effects of program decisions during periodic system or program reviews.

Question. Section 203 of WSARA requires the use of competitive prototypes for major defense acquisition programs unless the cost of producing such prototypes would exceed the lifecycle benefits of improved performance and increased technological and design maturity that prototypes would achieve.

Do you support the use of competitive prototypes for major defense acquisition programs?

Answer. Yes, I support the USD(AT&L) implemented policy changes to address WSARA that increased focus on early and competitive prototyping and all efforts that will result in improvements in the Defense acquisition process. Competitive prototyping has the clear benefit of protecting procurement flexibility by keeping multiple competitors in the hunt during system development. In addition, it is key to addressing several critical program issues, to include risk management, assessment of technology maturation and integration, identification of potential problems and assessment of the framing assumptions upon which requirements are based. This contributes to the assessment of potential trade-offs between requirements and cost. It is also useful in establishing reliability growth potential and to help prepare systems for manufacturing. Finally, it supports efforts to maintain the Defense industrial base by funding companies to continue to develop technologies and systems.

Question. Under what circumstances do you believe the use of competitive prototypes is likely to be beneficial?

Answer. Competitive prototyping is likely to be beneficial when more mature designs are required to begin manufacturing planning, to reduce technological risk, to aid in developing operational requirements, and the competition is likely to result in lower costs. Competitive prototyping can be especially cost-effective when it can be focused on individual subsystems and components or focused on integration challenges, rather than prototyping full systems. Subsystem and component prototyping is beneficial when there are critical technologies that require significant innovation and maturation prior to system integration. Competitive prototyping of integration issues is valuable for programs that involve mature platforms, subsystems, and components.

Question. Under what circumstances do you believe the cost of such prototypes is likely to outweigh the potential benefits?

Answer. Competitive prototyping is likely to be cost prohibitive when it requires complete prototypes of complex systems, especially those with significant integration and technology maturation issues. Additionally, there are certain sectors of the industrial base that are low volume and highly technically specialized that may not support more than a single vendor.

Question. Section 207 of WSARA required the Department to promulgate new regulations to address organizational conflicts of interest on major defense acquisition programs.

Do you agree that organizational conflicts of interest can reduce the quality and value of technical support services provided to the Air Force and undermine the integrity of the Air Force's acquisition programs?

Answer. I agree that organizational conflicts of interest can increase risk and that the quality and value of technical support services provided to the Air Force would be impacted. It could also undermine the integrity of the Air Force's acquisition programs.

Question. What is your understanding of the steps the Air Force has taken to implement section 207 and the new regulations?

Answer. The Air Force revised acquisition policy and contracting guidance to implement the requirements of section 207, including reiterating restrictions on lead system integrators and inherently government functions.

Question. What additional steps if any do you believe the Air Force should take to address organizational conflicts of interest in major defense acquisition programs?

Answer. I believe the current statutory and regulatory framework is adequate to protect the government's interests in this area, but will continue to look for opportunities to reduce risks to programs.

Question. What are your views on the use of system engineering and technical assistance contractors that are affiliated with major defense contractors to provide "independent" advice to the Air Force on the acquisition of major weapon systems?

Answer. It is critical for advice to the Air Force to be truly independent. In those instances where subject matter expertise is required, I will seek to avoid any conflicts of interest so that advice received is truly unbiased.

Question. What lines do you believe the Air Force should draw between those acquisition responsibilities that are inherently governmental and those that may be performed by contractors?

Answer. It is my understanding that new Defense Federal Acquisition Regulations Supplement provisions, coupled with heightened awareness of the issue among the contracting workforce and changes in the defense industrial base, have gone a long way to ameliorating the issue making the likelihood of unmitigated Organizational Conflicts of Interests less common. I will continue to support these efforts.

Question. If confirmed, what steps if any would you take to ensure that defense contractors do not misuse their access to sensitive and proprietary information of the Air Force and other defense contractors?

Answer. Policies emphasize reliance upon competition at the prime and subcontract levels to provide for innovation, flexibility, reduced life cycle costs, and increased quality. The Air Force expects their program managers and contracting officers to pay close scrutiny to the government's best interests when a contractor may propose the use of its own resources when other capabilities are available, and we Reserve the right to consent to subcontracts to ensure that the government's interests are adequately protected. I will continue to support these efforts.

Question. If confirmed, what steps if any would you take to ensure that defense contractors do not unnecessarily limit competition for subcontracts in a manner that would disadvantage the government or potential competitors in the private sector?

Answer. If confirmed, I will support Air Force policies that emphasize reliance upon competition at the prime and subcontract levels to provide for innovation, flexibility, reduced life cycle costs, and increased quality. The Air Force expects their program managers and contracting officers to pay close scrutiny to the government's best interests when a contractor may propose the use of its own resources when other capabilities are available, and the Air Force Reserves the right to consent to subcontracts to ensure that the government's interests are adequately protected.

CONTRACTING FOR SERVICES

Question. Do you believe that the Air Force can do more to reduce spending on contract services?

Answer. The Air Force uses a mix of military, civilians and contractors to accomplish its mission, and in today's fiscal environment, we are looking at each for potential savings without compromising mission effectiveness. In services acquisition, we are examining opportunities to reduce costs through the use of enterprise-wide vehicles as well as partnering with other Services and agencies. We need to improve understanding of types of services being contracted and ways they can be made more efficient.

Question. Do you believe that the current balance between government employees (military and civilian) and contractor employees is in the best interests of the Air Force?

Answer. I believe we must continue to examine this balance and to ensure that inherently governmental functions are not outsourced. Additionally, we must assess the work accomplished by military, civilian, and contractor personnel to achieve the correct balance. For services acquisition projects, the Air Force does have a process to conduct these discussions during the requirements definition phase.

Question. What steps if any would you take, if confirmed, to control the Air Force's spending on contract services?

Answer. The Air Force has made significant improvements in the management of services acquisition—from requirements review to contract execution. If confirmed, I will continue to refine these processes, raise visibility and oversight, and partner with Major Command Commanders and the Program Executive Officer for Combat and Mission Support to maximize the effectiveness of available services resources.

Question. Do you believe that the Air Force has appropriate organizations, capabilities, and procedures in place to manage its service contracts?

Answer. Through the Single Manager for Services and Program Executive Officer structures, the Air Force has successfully put in place the right capabilities and processes to manage services acquisition. Even with these advances, the Service is still examining methods to increase effectiveness, such as engaging senior leaders to improve their understanding of services related to their mission area. We recognize this is an important area to manage and improve for the taxpayer.

Question. If not, what steps would you take, if confirmed, to develop such organizations, capabilities, and procedures?

Answer. N/A

Question. Section 863 of the NDAA for Fiscal Year 2011 requires DOD to establish a process for identifying, assessing, reviewing, and validating requirements for the acquisition of contract services.

What is the status of the Air Force's efforts to implement the requirements of section 863?

Answer. Focused on these same areas, the Air Force instituted a requirements review process for services acquisitions in 2008 and continues to refine it to address the requirements in section 863 and meet the needs of the Service.

Question. What steps remain to be taken, and what schedule has the Air Force established for taking these steps?

Answer. While the Major Command Commanders and SAF/AQ are involved in the current requirements review process, the Service is expanding the involvement of senior leaders who oversee their functional services and expect to formalize their involvement in this process during fiscal year 2014.

Question. What additional steps if any would you take, if confirmed, to improve the Air Force's management of its contracts for services?

Answer. If confirmed, I will continue to engage with senior leaders within the Air Force and across the Department on requirements, acquisition strategies and methodologies for managing the execution of services acquisitions. I will work similarly with OSD AT&L.

Question. Do you believe that the use of Indefinite Delivery Indefinite Quantity (IDIQ) contracts are beneficial or harmful for the acquisition of services?

Answer. If used correctly, Single- and Multiple-Award IDIQ contracts are very beneficial. Our acquisition teams perform market research to determine the appropriate strategy to meet the mission requirement. In services acquisitions, the Air Force has been using Multiple-Award IDIQ contracts extensively as they provide a continuous opportunity for competition among a set of qualified contractors.

CONTRACTOR PERFORMANCE OF CRITICAL GOVERNMENTAL FUNCTIONS

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, has the Air Force become too reliant on contractors to support the basic functions of the Department?

Answer. I recognize this is an area of concern. The Service must continue to examine mission requirements and ensure that inherently governmental functions are

not outsourced. If confirmed, I will review the Air Force use of contractors in basic functions.

Question. Do you believe that the current extensive use of personal services contracts is in the best interest of the Air Force?

Answer. I believe the appropriate use of personal services contracts is in the best interest of the Air Force. The Federal Acquisition Regulation (FAR) and title 10, U.S.C., section 129, restrict the use of personal services contracts. While not extensive, the Air Force does use it where authorized, such as in the medical support area. If confirmed, I would continue to work with leaders across the Air Force to ensure compliance with applicable laws and policies.

Question. What is your view of the appropriate applicability of personal conflict of interest standards and other ethics requirements to contractor employees who perform functions similar to those performed by government employees?

Answer. While they are prohibited from making decisions on behalf of the government, I believe the rule set for these personnel should more closely mirror the rule set of a government employee.

CONTRACTING METHODS

Question. In recent years, DOD has relied heavily on time-and-materials contracts for the acquisition of services. Under such a contract, the Department pays a set rate per hour for contractor services, rather than paying for specific tasks to be performed. In some cases, contractors have substituted less expensive labor under time-and-materials contracts, while continuing to charge Federal agencies the same hourly rates, resulting in effective contractor profits of 25 percent or more.

What is your view of the appropriate use of time-and-materials contracts by the Air Force?

Answer. In general, I prefer the use of almost any other type of contract for services, but there are still limited situations where time-and-materials contracts are appropriate. For example, time-and-materials contracts may be appropriate when the Government lacks historical data on the nature of work to be performed or there is a large variation in the work to be performed. These situations prevent the reasonable estimation of the resulting work and labor mix for an effective task-based contract. If confirmed, I will strive to limit the use of time-and-materials contracts to only appropriate situations and provide effective oversight to prevent contractor abuse.

Question. What steps if any do you believe the Air Force should take to minimize the abuse of time-and-materials contracts?

Answer. The Air Force began focusing on reducing the use of time-and-materials contracts several years ago and if confirmed I will continue these efforts. In fiscal year 2006, the Air Force spent approximately \$3 billion on time-and-materials contracts and that number was reduced to \$371 million in fiscal year 2013.

Question. Section 802 of the NDAA for Fiscal Year 2013 requires DOD to promulgate regulations to ensure the review and justification of any "pass-through" contracts on which more than 70 percent of the work will be performed by subcontractors.

What is your understanding of the status of the Department's efforts to implement the requirements of section 802?

Answer. It is my understanding that a FAR case, 2013-012, was initiated for this statutory provision. I also understand as part of the rule making process some concerns were raised and I believe those have been resolved and the case is moving forward in the process.

Question. What additional steps if any do you believe the Air Force should take to address the problem of unjustified pass-through contracts?

Answer. I support the idea of the language because it is in the best interest of the Air Force and cost to the taxpayer.

BETTER BUYING POWER

Question. DOD's Better Buying Power initiative provides acquisition professionals with important guidance on how to achieve greater efficiency, enhanced productivity and affordability in how the Department procures goods and services.

What steps if any will you take, if confirmed, to ensure that the Air Force's acquisition and contracting professionals implement this guidance, and achieve intended results?

Answer. If confirmed, I will continue to ensure that all Air Force acquisition and contracting professionals implement this guidance and achieve the levels of success already seen to date. In my current position, I have been actively engaged in promoting the concepts behind Better Buying Power to our workforce, through visits

to the field and recognition of our personnel on individual successes and cost savings. Additionally, the Air Force has set policy and guidance on a wide variety of initiatives including Better Buying Power, and integrated these tenets in all levels of acquisition reviews. This active engagement is just the first step towards institutionalizing the process and making it the new way of doing business.

Question. Which elements of this guidance, if any, do you disagree with and would not expect to fully implement, if confirmed?

Answer. OSD's Better Buying Power initiatives are positive steps towards achieving successful program management and acquisition excellence. If confirmed, I look forward to working with USD(AT&L) to implement the initiatives to the maximum extent possible.

Question. How would you measure how effectively the Air Force's acquisition and contracting workforce is implementing the tradecraft and best practices called for under this initiative?

Answer. Some of the initiatives are easier to measure effectiveness than others, but one concrete example on which we are already seeing great returns is the implementation of "should cost". The "should cost" strategy is aimed at seeking out and eliminating low- and non-value added aspects of program costs. Managers are then 'rewarded' by being given the opportunity to utilize those savings as additional resources to support efforts within the program, the portfolio itself, or elsewhere within the Department's acquisition community as deemed appropriate and necessary.

The Air Force is actively gathering should cost data and reporting our successes to OSD. In fiscal year 2013, the Air Force realized \$673 million in should-cost savings. Additionally, in fiscal year 2013, only one program requested a should cost waiver, down from 79 percent of programs in fiscal year 2012, which indicates that these initiatives are becoming second nature. This is just one example of how the Air Force has already accepted and begun to implement Better Buying Power. If confirmed, I will continue to implement Better Buying Power to the maximum extent possible, and I am confident we will continue to see cost savings and other efficiency trends throughout the Air Force.

Question. What steps would you take, if confirmed, to implement the following elements of the Better Buying Power initiative?

Answer. If confirmed, I am committed to the Air Force being the leader in implementing Better Buying Power initiatives throughout DOD. The Air Force has been at the forefront through preliminary implementation and will continue to realize cost savings as these new processes become more familiar.

(1) Sharing the benefits of cash flow

I agree with the Department's initiative to better align profitability with performance goals, and with including the use of cash flow as another incentive. If confirmed, I will emphasize training and education for contracting officers on the benefits from cash flow as an incentive tool during negotiations.

(2) Targeting non-value-added costs

The Air Force continues to make great progress with respect to identifying opportunities to reduce and eliminate non-value added costs. The Air Force is primarily doing this through our concerted efforts aimed at implementing should cost based management practices. The program executive officers are actively instilling a culture within their portfolios that requires their program managers to continually scrutinize each element of cost under their control and assess how it can be reduced.

This should cost strategy is aimed at seeking out and eliminating low- and non-value added aspects of program costs. Managers are then 'rewarded' by being given the opportunity to utilize those savings as additional resources to support efforts within the program, the portfolio itself, or elsewhere within the Department's acquisition community as deemed appropriate and necessary.

(3) Mandating affordability as a requirement

The Air Force has already taken steps to improve management of long-term affordability for Major Defense Acquisition Programs in the establishment and tracking of Affordability Goals/Caps at the next Milestone review. If confirmed, I would continue to work with the user community to improve articulation of long-term affordability constraints during the requirements process.

(4) Eliminating redundancy within warfighting portfolios

The staff is working hand-in-hand with the acquisition staffs of the Navy and Army to assure everyone is meeting the intent of this initiative. Last month the Senior Acquisition Executives provided a status to AT&L regarding joint efforts to address this initiative. The Air Force feels comfortable that processes and guidance are well-established for the larger ACAT Programs across the Services. While the

Air Force believes that there are many processes in place to help eliminate redundancy in the smaller ACAT programs, if confirmed, I will continue to work together to assure duplication is eliminated.

INTERAGENCY CONTRACTING

Question. What is your assessment of the risks and benefits associated with the Air Force's use of interagency contracts?

Answer. A risk of interagency contracts is additional costs and fees which could result in higher costs to the Air Force. One of the primary benefits of interagency contracts is the ability to leverage existing contracts to expedite contract award and delivery while reducing duplication of effort. Interagency contracts can create an efficient use of scarce resources and provide better support to our warfighter. The use of existing vehicles makes sense and is encouraged when it results in faster delivery for the warfighter at a fair and reasonable price.

Question. Do you believe additional authority or measures are needed to hold Air Force or other agency personnel accountable for their use of interagency contracts?

Answer. No. The Air Force has a process that requires any Military Interdepartmental Purchase Request (MIPR) or interagency transfer of funds to be reviewed by the contracting officer. This ensures the contracting officer engages the requiring activity to use the most cost effective mechanism to receive the supply or service. This review has been effective in ensuring the appropriate use of interagency contracts while also maintaining control and accountability of MIPR'd funds.

Question. Do you believe contractors have any responsibility for assuring that the work requested by Air Force personnel is within the scope of their contract?

Answer. Yes. Contractors are required by the terms and conditions of their contract to inform the contracting officer if they believe work is outside the scope of the contract. If asked to perform work outside contract scope, the contractor must request the contracting officer modify the contract and reach an agreement on the work and resulting consideration.

ACQUISITION OF INFORMATION TECHNOLOGY

Question. Most of the Department's Major Automated Information System (MAIS) acquisitions are substantially over budget and behind schedule. In particular, the Department has run into unanticipated difficulties with virtually every new business system it has tried to field in the last 10 years. Section 804 of the NDAA for Fiscal Year 2010 required DOD to establish a new acquisition process for information technology.

What role if any do you expect to play, if confirmed, in oversight and management of the Air Force's acquisition of information technology?

Answer. If confirmed, I will work with the MAIS stakeholders, to include USD(AT&L), the Chief Management Officer, the Chief Information Officer and functional communities, to provide rigorous oversight and efficient management. I will actively engage in efforts to implement important lessons learned from previous IT acquisition efforts.

Question. Do you believe that unique problems in the acquisition of business systems require different acquisition strategies or approaches?

Answer. Yes, I believe there are unique challenges associated with the acquisition of information systems that call for the use of acquisition approaches different from those normally used by the Department for acquiring weapons and other systems. Under Secretary of Defense Kendall often says that all acquisitions should be tailored to the nature of the product being acquired. He has further noted that as a class, business systems are products having characteristics that tend to dictate a specific type of program structure. Additionally, there is an existing requirement to keep Air Force business systems relevant with evolving technology and ensure both current and planned systems are meeting mission needs in a cost-effective way. In particular, the success of the Service with these programs depends on the ability to recognize, plan and execute to a roadmap for how each acquired system will exchange very vast and complex sets of data within our existing ("As-Is") and future ("To-Be") information architectures. Air Force decision-makers at all levels must have clear policy and an effective governance structure that they can translate into execution of a tailored strategy to smartly acquire business systems—particularly at the program manager level. Likewise, end-users must be accepting of the changes a new business system will likely have on their operating culture.

Question. What steps, if any, do you believe the Air Force should take to address these problems?

Answer. The Air Force is addressing these problems by moving away from large-scale Enterprise Resource Planning (ERP) programs, like the former Expeditionary

Combat Support System (ECSS), in favor of smaller-scoped capability-based increments.

A perfect example of the Air Force's current efforts is the Logistics Transformation Maintenance Repair and Overhaul initiative (MROi). MROi is the first critical increment to transforming the Air Force's entire logistics IT required functionality. Subsequent capability initiatives will follow MROi, building upon each other to ultimately achieve critical improvements across all areas of the Air Force's logistics enterprise.

With both MROi and future business systems acquisition, the Air Force will implement a more robust requirements definition process up front that fully maps out our existing and required end-state architectures before pursuing any materiel solution through the use of Business Process Re-engineering (BPR) and related architecture disciplines. Another key element of the application of these architecture and BPR disciplines is the ability to scope the delivered IT solution to a user-defined capability as opposed to a developer-defined software release that may not be the most effective solution for the user. This user focus serves as the basis for determining the appropriate increments. The architecture and BPR disciplines provide the means to manage and deliver smaller-scoped solutions and satisfy mission objectives. This BPR rigor also ensures that the users' requirements are defined correctly up front and remain stable through the lifecycle of the program.

Question. What steps has the Air Force taken to implement the requirements of section 804? What steps remain to be taken?

Answer. On November 26, 2013, OSD published a new DODI 5000.02 that further clarifies policies, streamlines defense acquisition procedures and eliminates redundant/conflicting guidance. As a result, the core processes within DODI 5000.02 and the former Business Capability Lifecycle (BCL) process are better aligned. The Air Force has also strengthened the processes associated with Business Process Re-engineering (BPR) and IT certification to further ensure acquired capabilities meet mission needs. OSD DCMO, now working in concert with USD(AT&L) is further refining these processes to better integrate its key assertions into DOD acquisition guidance, in part as a result of its previous joint efforts with the Air Force.

Question. If confirmed, how would you work with the Chief Information Officer of the Air Force to take these steps?

Answer. If confirmed, I will continue to collaborate with our CIO to identify and take steps needed to improve acquisition of information technology and to leverage use of a common technology baseline across Air Force IT systems. This common baseline will facilitate common hosting standards and promote consistent security practices and sustainment methods allowing us to bring new capabilities online more quickly and at lower cost. If confirmed, I will also work with the CIO to ensure cyber security is built into Air Force systems, leveraging the processes of the newly defined Risk Management Framework.

Question. Some have argued that the current test and evaluation process does not appropriately address the unique circumstances applicable to the acquisition of information technology systems.

What steps if any do you believe the Air Force should take to improve the test and evaluation process for information technology systems, including their vulnerabilities in the face of a growing cybersecurity threat environment?

Answer. The Air Force needs to better integrate developmental test, operational test, and certification and accreditation activities to the greatest extent practical. Programs should utilize early user involvement, automated testing, and continuous monitoring of deployed capabilities. To better address the growing cybersecurity threats, programs will need to engineer and test mission assurance and cyber security from the ground up.

Question. The Air Force planned for the Expeditionary Combat Support System to be an "underlying business system intended to tie ... [the Service's] transformation efforts together and provide a holistic, end to end view of the ... [Air Force's] logistics enterprise." This was to be accomplished using commercial off-the-shelf software. Unfortunately, after approximately 7 years and \$1.03 billion the program was cancelled.

What lessons have you and the Air Force learned from this episode and how will future MAIS programs be structured differently to ensure such a result does not occur in the future?

Answer. The Air Force has learned a great deal from Expeditionary Combat Support System (ECSS) and is following through on the specific recommendations made in the Acquisition Incident Review (AIR) report. Specifically, the AIR report found four contributing causes and six root causes to the failure of ECSS. The four contributing causes were a confusing and sometimes ineffectual governance structure; challenges with tactics, techniques and procedures of acquisition tools; difficulty of

changing from our legacy systems; and a high rate of churn among personnel and organizational structures. The six root causes were the Air Force's lack of understanding of the data, lack of understanding of the "As-Is" and "To-Be" architectures, lack of a transition plan, lack of an execution plan, an unrealistic development environment, and the fact that the right culture was not in place for ECSS to be successful.

Following the release of the AIR report the Secretary of the Air Force directed a review of existing major Air Force business systems to determine to what extent the ECSS AIR lessons learned were being incorporated, and recommended specific actions in addition to the AIR report to further ensure mistakes made during ECSS are not repeated on future programs. The Air Force is taking steps to ensure the recommendations from both the AIR report and the Secretary of the Air Force-directed review are fully implemented.

Several examples of Air Force actions to implement lessons learned include: Standardizing practices to increase collaboration with functional stakeholders earlier on in the acquisition process; Blueprinting current architecture for our existing core logistics systems; Applying rigorous Business Process Re-engineering (BPR) before determining whether new materiel solutions are required and should be pursued; Establishing Integrated Functional and Program Executive Office teams to bolster co-accountability for program outcomes among key stakeholders; Increasing training opportunities for end-users on technology transition management curricula.

Question. The Department's Information Technology Enterprise Strategy and Roadmap, dated 6 September 2011, proposes overhauling IT policies to provide improved access to information, common identity management, standardized Department-wide services/applications/tools, streamlined IT acquisition, consolidated data centers, and cloud computing services.

What reorganization, if any, do you believe will be needed in the IT acquisition structures of the Air Force to achieve these objectives?

Answer. At this time, I do not believe the Air Force needs to reorganize in the IT acquisition structures to achieve these objectives. The Air Force is taking steps to clearly define roles and responsibilities, develop common standards and to empower the CIO to provide strategic direction and corporate investment inputs. These steps will move us closer to these objectives and ultimately, improve warfighting effectiveness across the cyber mission area.

Question. In your view, how fundamentally different, in ways relevant to procuring needed defense capability effectively, is acquiring information technology products and services from how the Air Force more typically procures products and services?

Answer. The fundamental difference in procuring information technology products and services is the greater use of rapidly evolving commercial technology. Leveraging this commercial technology allows the Department to more quickly deploy capabilities through shorter delivery cycles, incremental and concurrent development and test, use of established standards, use of common infrastructures and integrated cyber-security. With shorter timelines and incremental capabilities, there is a greater need for architecture and integration. The interim DODI 5000.02 identifies models tailored for IT to better enable rapid delivery and an incremental build process to reach full system functionality.

Question. What specific changes, if any, would you recommend to improve how the Air Force procures MAISs?

Answer. I would recommend clearly defining the roles and responsibilities of the many MAIS stakeholders, to include AT&L, CIO, DOT&E and the Chief Management Office. Additionally, in order for MAIS acquisitions to be successful, there must be efficient execution authority, improved governance and stable requirements throughout the process.

Question. In your view, what are the implications of the challenges and differences you discussed above on efforts by the Air Force to procure effectively cyber-security products and services?

Answer. One implication is that much more collaboration will be required in order to procure effective cyber-security products and services. As we move towards more common and integrated capabilities, the shared opportunities will be greater, but so will the shared risks. The Air Force, other members of DOD and the Federal Agencies must act in concert to implement cyber capabilities and security. Stakeholders need to collaborate on everything from architectures, to acceptable common technologies, to cyber-security strategies, and how to best access and share information. Collaboration must be part of our culture. Having been a member of the recent Defense Science Board Task Force on Resilient Military Systems and the Advanced Cyber Threat, I am under no illusions that making our combat systems cyber resilient to a competent adversary will be simple or easy. The magnitude of the chal-

lenge to all of the Department here is significant and will be so for the years ahead. We will need to systemically build resiliency in at the beginning, continually assess end-to-end potential vulnerabilities, and then implement countermeasures (whether they be material solutions or new concept of operations/TTPs).

Question. Are there any special acquisition authorities not currently available that if authorized could help address some of the observed IT and cybersecurity-related acquisition shortfalls?

Answer. While not specifically an acquisition authority, a major challenge with IT acquisition is the application of funding rules that are based on traditional, non-IT weapon system procurement. As identified in the 804 report, IT programs are currently funded with a mix of three principal appropriations (Research and Development, Procurement, and Operations and Maintenance), each with unique rules and definitions that are based on funding for traditional weapon system models. IT acquisition would benefit greatly from a specific appropriation designed for unique IT needs and challenges. A specific IT appropriation would also help the Air Force articulate, support and defend the type and amount of funding needed to meet requirements.

Question. In your view, does the Defense Information Systems Agency (DISA) deliver enterprise computing services and provide IT infrastructure in an operationally responsive and cost effective manner?

Answer. It does, in most cases. Air Force systems continue to move to the DISA services, to leverage this common, enterprise suite of capabilities. The Air Force is working closely with DISA to characterize Air Force IT infrastructure requirements and develop a streamlined process for hosting Air Force systems. The Service expects DISA to gain efficiencies through economies of scale and a la carte menu of services.

Question. What specific recommendations would you make to improve DISA's delivery of telecom and IT contracting, enterprise services, and computing/application hosting?

Answer. Air Force engagement with DISA is essential to ensure that the IT infrastructure and services DISA provides meet Service needs. Competitive pricing, clearly defined standards and interfaces, and increased collaborative engagement will continue to facilitate movement to DISA services.

ACQUISITION WORKFORCE

Question. Section 852 of the NDAA for Fiscal Year 2008 established an Acquisition Workforce Development Fund to help DOD address shortcomings in its acquisition workforce. The fund provides a continuing source of funds for this purpose.

Do you believe that the Acquisition Workforce Development Fund is still needed to ensure that DOD has the right number of employees with the right skills to run its acquisition programs in the most cost effective manner for the taxpayers?

Answer. Yes. With the pressure on O&M budgets, the Defense Acquisition Workforce Development Fund (DAWDF) has become even more important to providing a highly capable acquisition workforce. As O&M funds have been reduced, the Air Force has become much more reliant on DAWDF to train and develop the acquisition workforce with both Defense Acquisition University and Air Force specific courses. If confirmed, I would also like to explore utilizing the fund to replenish skilled personnel losses from retirements and attrition as well to adjust the personnel skill mix as future needs dictate.

Question. What do you see as the most significant shortcomings, if any, in the quality of the Department's acquisition and contracting workforce?

Answer. I believe the Air Force has an exceptional workforce that is executing very difficult tasks. The workforce receives excellent training from Defense Acquisition University and other sources; however, if confirmed, I intend to increase the emphasis of on-the-job experience to put into practice the training received. The Air Force needs to continue to address development of practical application skills emphasizing technical and business acumen because classroom training is not enough.

Question. What role do you expect to play, if confirmed, in addressing these shortcomings?

Answer. If confirmed, I plan to work closely with OSD(AT&L) and Air Force acquisition leadership at all levels to continue to improve the training and development provided to the acquisition workforce. In my current role, I've been directly involved in leading and communicating workforce requirements through multiple forums including the OSD(AT&L) acquisition workforce Senior Steering Board and Business Senior Integration Group as well as the Air Force Leadership and Development Review. Additionally I will continue to work closely with the Air Force's Direc-

tor, Acquisition Career Management who manages the Air Force Acquisition Professional Development Program.

Question. How do you communicate those shortcomings to such organizations as the Defense Acquisition University?

Answer. If confirmed, I will communicate shortcomings via the forums identified above. Additionally, the Air Force Defense Acquisition Career Manager and Functional Managers routinely communicate training requirements to the Defense Acquisition University and OSD counterparts.

Question. What specific skill sets or core competencies if any do you believe to be vital the Department's ability to procure goods and services effectively and are lacking within the Department's acquisition and contracting workforce?

Answer. I believe improved business acumen is vital to acquisition excellence. The Air Force should strive to leverage experience from commercial industry as well as promote, track and leverage business experience within the workforce.

Question. Do you believe that the Department's human capital plan for the acquisition workforce includes adequate measures to acquire or reconstitute these vital skill sets or core competencies?

Answer. Yes. I believe the incorporation of the DAWDF into the Department's overall approach to the acquisition workforce has been the most important addition to its human capital plan.

Question. What steps if any would you take if confirmed to improve the Department's human capital plan for the acquisition workforce?

Answer. If confirmed, I will continue to work with OSD(AT&L) to make replenishment of the acquisition workforce a focus of the human capital plan. I will advocate use of the DAWDF to enable continued entry level hiring of recent college graduates in order to backfill as members move up, separate or retire. I will also explore modifying existing demo programs to better target shortage skills using direct/expedited hiring authorities.

SCIENCE AND TECHNOLOGY

Question. What, in your view, is the role and value of science and technology programs in meeting the Air Force's transformation goals and in confronting irregular, catastrophic, traditional and disruptive threats?

Answer. The Air Force Science and Technology (S&T) Program prepares and equips the warfighter to face threats in an uncertain future. The Air Force S&T Program investigates game-changing technologies to affordably transition the "art-of-the possible" into military capabilities. The Air Force invests in research that addresses urgent, near-term warfighter needs as well as research that will provide revolutionary capabilities in the future.

Question. If confirmed, what direction will you provide regarding funding targets and priorities for the Air Force's long-term research efforts?

Answer. If confirmed, I will actively work with the Air Force S&T Executive, the Air Force Chief Scientist and Air Force Research Laboratory leadership to develop affordable research priorities and resource those priorities accordingly.

Question. What specific metrics would you use, if confirmed, to assess whether the Air Force is making adequate investments in its basic research programs?

Answer. If confirmed, I will work to ensure the Air Force's S&T investment supports a balanced foundation of basic research, applied research, and advanced technology development that will provide demonstrated transition options for future warfighting capabilities. The Air Force is currently working with OSD and Service counterparts to identify appropriate leading indicators (such as metrics) to assess S&T investments.

Question. Do you feel that there is sufficient coordination between and among the science and technology programs of the military services and defense agencies such as DARPA?

Answer. While there is always room for communication improvements, I believe there is sufficient coordination. The Air Force, working with the other Services, OSD, and their Agencies, have an extensive formal coordination mechanism for S&T focused on areas with Defense Department-wide utility. Currently, they have organized into 17 Communities of Interest covering technology areas such as materials and manufacturing, cyber security, and autonomy. Service representatives are engaged daily in nurturing and growing this formal approach to address S&T needs and priorities.

Additionally, informal coordination, discussions, and debates that happen at the individual researcher or program manager level with counterparts in the other Services and Agencies through professional societies and other avenues are just as important.

In many areas such as hypersonics, lasers, and cyber technology, AF partnerships with DARPA, other agencies, and sister Services are pushing the new capabilities that will keep the Air Force the best in the world.

Question. What is the Department's role and responsibility in addressing national issues related to science, technology, engineering, and mathematics education and workforce development?

Answer. Nurturing the next generation of science, technology, engineering, and mathematics (STEM) professionals is an Air Force, DOD and national concern. To maintain the U.S. military's decisive technological edge, the Department must be able to recruit, retain and develop a capable STEM workforce in the face of worldwide competition for the same talent. An objective of the STEM Strategic Communication Plan is to encourage all airmen to attract tech-savvy students to an Air Force career.

Question. What steps if any would you take to support efforts to ensure that the Nation has the scientific and technical workforce needed for its national security technological and industrial base?

Answer. If confirmed, I look forward to continue supporting efforts to recruit, retain and develop a world-class STEM workforce for the Air Force and the Nation. The Air Force has successfully used tools such as the Science, Mathematics, and Research for Transformation (SMART) Scholarship Program. Over the past 8 years, the Air Force has averaged providing 60 scholarships per year to scientists and engineers. After payback of the recipient's commitment, the Air Force has retained 88 percent of scholars in Air Force jobs. Additionally, the Air Force is updating the Bright Horizons STEM workforce strategic roadmap published in 2011. This roadmap addresses the "people" dimension of delivering and operating required technology by having the right STEM qualified people in the right place, at the right time, and with the right skills.

Question. How would you use science and technology programs to better reduce technical risk and therefore potentially reduce costs and schedule problems that accrue in large acquisition programs?

Answer. If confirmed, I will continue efforts to deliberately align S&T planning, technology transition planning, and development planning. The linkages between these activities are critical to initiating acquisition programs with mature technologies and credible cost estimates.

Question. Do you feel that the science and technology programs of the Air Force are too near-term in focus and have over-emphasized technology transition efforts over investing in revolutionary and innovative research programs?

Answer. No. A top priority of the Air Force S&T Strategy is to execute a well-balanced, integrated program. I am confident that the Air Force S&T portfolio is properly balanced between meeting current warfighter capability needs and discovering and developing innovative new technology opportunities.

Question. Are you satisfied that the Air Force has a well-articulated and actionable science and technology strategic plan?

Answer. Yes. The Air Force is currently updating the Air Force S&T Strategy, which was signed by Air Force Leadership 2010. This flexible strategy allows the Air Force to adapt its S&T program to dynamic strategic, budgetary and technology environments. Additionally, the priorities in the strategy will shape actionable S&T plans.

Question. Do you see a need for changes in areas such as hiring authority, personnel systems, financial disclosure, and ethics requirements, to ensure that the Air Force can recruit and retain the highest quality scientific and technical workforce possible?

Answer. An objective of the Air Force STEM Strategic Communication Plan is to build the understanding and recognition that the Air Force's success is based on the innovation and technical contributions of airmen. The Air Force is updating the Bright Horizons STEM workforce strategic roadmap published in 2011. This roadmap is investigating these areas and others to assure technologically superior warfighting capabilities through attracting, recruiting/accessing, developing, and retaining a world class STEM workforce.

Question. What is your view of the effectiveness of the Military Accessions Vital to National Interest Program to recruit non-U.S. citizens who graduate from U.S. universities with advanced degrees in scientific and technical fields of critical national importance?

Answer. Citizenship is required for commissioned service in the military. The military does not commission scientists who do not meet citizenship requirements. The Military Accessions Vital to the National Interest Program (MAVNI) is a pilot program that could be considered useful in its ability to utilize the limited authority provided in law to enlist non-citizens in the military service to fill critical skills. To

date, the Air Force has only used MAVNI to enlist people with certain language and associated culture capabilities to meet a critical strategic need.

Question. What steps if any would you take if confirmed to ensure the continued effectiveness of this program?

Answer. If confirmed, I will work with other Air Force and DOD leaders to ensure we are taking full advantage of all authorities within the law to acquire military and civilian forces to meet our science and technology needs in the Air Force.

TEST AND EVALUATION

Question. The Department has, on occasion, been criticized for failing to adequately test its major weapon systems before these systems are put into production.

What are your views about the degree of independence needed by the Director of Operational Test and Evaluation in ensuring the success of the Air Force's acquisition programs?

Answer. I support the independence of the Director of Operation Test and Evaluation as granted by title 10, U.S.C., (title 10 U.S.C. 2399, Operational Test & Evaluation of Defense Acquisition Programs). This independence is important to ensuring the Department's acquisition systems are realistically and adequately tested in their intended operational environment. Third party verification of system performance is a necessary and important step in acquiring weapon systems.

Question. Are you concerned with the level of test and evaluation conducted by the contractors who are developing the systems to be tested?

Answer. The level of test and evaluation conducted by contractors in developing systems to be tested is appropriate; however, it is important to ensure government representatives lead the testing and perform effective oversight of all contractor test events.

Question. What is the impact of rapid fielding requirements on the standard testing process? If confirmed, how will you work to ensure that all equipment and technology that is deployed to warfighters is subject to appropriate operational testing?

Answer. If confirmed, I will continue efforts to ensure capabilities provided in response to urgent operational requirements are balanced with testing that ensures the system is reasonably safe and effective within resource and time constraints. Many times this balance is achieved by the combined efforts of the acquisition and operational communities, sometimes taken to the extent of the design engineers working side by side with the warfighter to resolve issues in real time. In addition to meeting the urgent mission needs, the initial operational data derived during this activity actually adds to a more realistic, complete and robust operational test regime than an isolated test alone. Sometimes when a capability is fielded, the innovative warfighter effectively uses the capability in a way other than expected or tested; this drives a constant evolution of concept of operations and test planning and execution to maximize effectiveness.

Question. Do you believe that the developmental testing organizations in the Air Force are adequate to ensure an appropriate level of developmental testing, and testing oversight, on major defense acquisition programs?

Answer. Yes. The AFMC reorganization with the 5-center construct is an improvement in consolidating leadership and management of development test in order to ensure an appropriate level of developmental testing and testing oversight. The reorganization is leading to increased test efficiency and cross flow of information among the test organizations located at the Arnold Engineering Development Complex, 96th Test Wing at Eglin AFB and the 412th Test Wing at Edwards AFB. However, reduced budgets could have a negative impact on testing as resources continue to shrink.

Question. If not, what steps would you take, if confirmed, to address any inadequacies in such organizations?

Answer. If confirmed, I will work with AF/TE to continue to look at Air Force test organizations to ensure structures support the Air Force vision for 2023. Continued test efficiencies need to be investigated to accommodate budget constraints. Part of this investigation should include, where appropriate, increased integrated developmental and operational testing. Duplication of test effort must be avoided to ensure resources are used as efficiently and effectively as possible.

Question. As systems grow more sophisticated, networked, and software-intensive, DOD's ability to test and evaluate them becomes more difficult. Some systems-of-systems cannot be tested as a whole until they are already bought and fielded.

Are you concerned with Air Force's ability to test these new types of systems?

Answer. Yes. These new complex systems deserve a healthy concern and respect so they are not underestimated and are addressed adequately. The Air Force needs

to continue to conduct robust Developmental and Operational Test of all new systems to ensure they are safe and meet their intended purpose.

Question. What steps, if any, do you believe the Air Force should take to improve its test and evaluation facilities to ensure adequate testing of such systems?

Answer. First and foremost, the Air Force must maintain its unique core set of T&E infrastructure and associated workforce. These must be preserved as a national asset to provide T&E capabilities to support national defense. The Air Force must continue to assess test facilities to ensure they are sized, operated, and maintained appropriately to provide for the mission.

Question. In your view, does the Air Force have sufficient capabilities to test and evaluate the cybersecurity of its new information technology systems and networks?

Answer. The cyber world is rapidly progressing and evolving and the Air Force must continue to work hard to keep pace with this evolution. "Sufficient capabilities" is a constantly changing standard in this rapidly changing world. Underestimating its dynamism is to be left behind.

Question. What steps, if any, would you propose to take, if confirmed, to enhance this capability?

Answer. We will continue to build on the Air Force Chief Scientist's, Cyber Vision 2025, which provides a blueprint for cyber S&T and includes test and evaluation shortfalls. In addition, the Air Force will continue to support the tri-Service/OSD Technical Assessment Sub-Working Group for Cyber issues.

Question. Some have argued that testing takes too long and costs too much. Others contest this view pointing out that testing and evaluation is an essential tool to assist in the development of weapon systems and ensure that they perform as intended. The Armed Services Committee has expressed concern that problems with weapons systems have been discovered during operational testing and evaluation that should have been discovered during developmental testing and corrected during subsequent development.

Do you believe that major defense acquisition programs are helped or hurt by cutting tests budgets and reducing the time available for developmental testing?

Answer. Reduced test budgets and time are detrimental to Major Defense Acquisition Programs and inherently increase costs over the life of the system and delays fielding to the warfighter.

Question. What steps if any will you take, if confirmed, to ensure that the program management community and the testing and evaluation community work collaboratively and effectively in a way that maximizes the likelihood that developmental testing and evaluation will detect and identify problems timely in software and hardware to provide opportunities to correct them before production and before operational testing and evaluation begins?

Answer. If confirmed, to ensure that the program management community and the test and evaluation community work collaboratively and effectively I would continue to ensure an emphasis is placed on integrated T&E. In my current position, I have taken steps to foster this collaboration, meeting bi-weekly with the Air Force T&E executive. Linkages for coordination between developmental test, operational test, live fire test and evaluation and modeling and simulation must be maintained through communication among the various agencies as well as the program management office.

Question. To what extent do you think that dedicated operational testing can be more efficiently integrated into developmental and live-fire testing in a way that is also sufficiently rigorous?

Answer. I support increased integration of operational testing into developmental and live-fire testing. The newly revised DODI 5000.02 emphasizes integration of developmental and operational testing where possible. The key is early involvement of operational testers in the development of the Test and Evaluation Master Plan. Early collaboration between weapons designers, developmental testers and operational testers allows test scenarios to be developed that provide the needed data for the developer and in turn can be utilized by the operational tester in determining operational suitability. This integration can also uncover operational issues early in the development cycle when resolution is possible with less impact to cost and schedule.

Question. Noted defense analysts Andrew Krepinevich and Todd Harrison have argued the formal requirements of a weapons system should also include a statement as to how a weapons system will be tested. Therefore, a testing program will be identified before awarding contracts. The purpose of this proposal is to enable the contractor to have a much better understanding of what the military hopes to achieve.

Do you agree with this proposal?

Answer. A proposal limiting the development of test protocols to one single stage of the acquisition process may not fully address the complexity of the issue. However, I agree that testing should be a consideration early in the acquisition process. There should be early focus on the development of requirements that are operationally relevant, technically feasible and testable. The Air Force saw this need when forming the AFRRG in 2012. AF/TE was included in this Group that reviews all requirements documents for new weapons development in the future. The AFRRG tightly couples requirement, technical, acquisition and test and this process should improve Air Force performance in this area.

AIR FORCE INDUSTRIAL BASE

Question. What is your assessment of the health and status of the key elements of the Air Force's industrial base, including the Air Logistic Complexes?

Answer. The readiness of the Air Force to provide the capabilities inherent in Global Vigilance, Global Reach, and Global Power is sustained by the products and services purchased from the national technology and industrial base. Without the support of both the organic and the commercial components of the industrial base, the Air Force would not be ready to respond to the needs of the Nation. From the laces in boots to the electronics in air, space, and cyber systems, the Air Force draws upon a broad and diverse network of suppliers.

Through this dynamic network, the Air Force equips airmen, maintains bases, laboratories, and ranges, modernizes current systems, and designs, develops, and procures new capabilities to remain the world's preeminent Air Force. I assess the overall health of this dynamic network of suppliers and sustainers as sufficient for the current needs of the Air Force.

As I look to the ability of the industrial base to support future requirements in military-unique areas such as tactical aircraft and strategic missiles, I have some concerns about whether the Air Force can sustain the current level of these key industrial capabilities during this period of fiscal challenges. In addressing these concerns, the Air Force is collaborating with the other elements of the Defense Department to ensure thorough analysis leading to informed decisions about mitigating these concerns.

Question. In your view, is DOD's sector-by-sector, tier-by-tier (S2T2) activity providing useful information to assist the Army in maintaining and improving key elements of its industrial base?

Answer. The Air Force recognizes and supports the need to understand the network of firms providing goods and services to the Air Force and how the demands of the Air Force interact with those of the other Services and Defense Agencies. Since the inception of the S2T2 concept, the Air Force has collaborated with OSD, the other Services, and Defense Agencies to define, develop, and mature the S2T2 concept into a useful tool. This is an ongoing effort. In its current state, the S2T2 effort has been useful in validating known areas of concern such as the industrial base supporting solid rocket motors and fuzes. I look forward to the continued development of the S2T2 effort and its eventual maturation.

SMALL BUSINESS INNOVATION RESEARCH PROGRAM

Question. What do you see as the major successes and challenges facing the Air Force SBIR program?

Answer. Successes and challenges exist for the Air Force SBIR program. In terms of success, the Air Force Small Business Innovation Research (SBIR) Commercialization Readiness Program (CRP) established a successful process to mature SBIR developed technologies to acceptable readiness levels for Air Force customers. Using this process, transition plans have been implemented in the last several years between innovative small businesses and customers, with 43 producing technologies now in the hands of the warfighter. One example of a program is enhanced communication via an ultra-light, manportable, collapsible antenna which reduces acquisition costs by \$40 million over 5 years and support costs by 90 percent. This technology has also been utilized domestically during Hurricane Sandy and recent tornado events.

Challenges remain with matching Air Force acquisition and sustainment programs to high risk technologies typically at the technology and manufacturing readiness levels of 4 or 5. Program Managers are under tight budgets and schedule constraints, and they are more inclined to avoid risk and seek out higher readiness technologies at the 7 or 8 levels. Although maturation is the strength of the Air Force SBIR Commercialization Readiness Program, it remains difficult to convince program managers to align future program dollars to a technology that is still maturing.

Question. What steps would you take if confirmed to ensure that the Air Force has access to and invests in the most innovative small businesses?

Answer. I believe the current call and response process where the Service solicits proposals to address capability gaps can be augmented by a more proactive, aggressive search process to seek out those small businesses that may be new startups or unfamiliar with the SBIR program. Enhancing the visibility of the SBIR program and our communication channels among stakeholders will serve to enhance our effectiveness in delivering cutting edge capabilities to our warfighters.

In my current position, I am planning to conduct a Small Business Roundtable next month, which for the first time will put Program Executive Officers, major defense contractors, and SBIR and other Small Business representatives together discussing priorities, budgets, concerns, and communication improvements to enhance our access and ability to invest in most innovative Small Businesses. Several targeted Industry Days are planned this year to seek out small businesses that have innovative solutions and capabilities for our mission needs.

If confirmed, I will continue to maintain a strong partnership with our Air Force Small Business team and ensure our Program Executive Officers focus their efforts to achieve our objectives with our Small Business partners within industry.

Question. What steps would you take if confirmed to ensure that successful SBIR research and development projects transition into production?

Answer. If confirmed, I believe successful transition requires far better communication between the supply and demand entities involved. The warfighter end user must be central in articulating the demand via the Major Commands, PEOs, laboratories, and the small business community. We have the tools, including a network of transition agents, to facilitate the development of innovative solutions, and I intend to ensure that the demand function is well-articulated and to industry. The targeted Industry Day approach previously mentioned is one such effort, as are the multi-party roundtables.

TECHNICAL DATA

Question. Do you believe that the Air Force has been as aggressive as it should have been in: (1) securing ownership of technical data in connection with items and processes associated with major weapon systems that it procures when doing so would best serve the Government's interests; and (2) asserting ownership rights over this data in a manner sufficient to ensure competition for the production and maintenance of these systems over their lifecycle?

What steps if any will you take if confirmed to ensure that the Air Force obtains the technical data rights that it needs to avoid being locked into unnecessary sole-source follow-on production and sustainment to incumbents to the detriment of the taxpayer and the warfighter?

Answer. In the past, the Air Force abrogated its rights to data through Total System Responsibility agreements for a number of our major weapons systems. However, for the past several years several improvements have been made. The Air Force has been prudently pursuing its deliverables and data (license) rights requirements in the best interests of the government, seeking "license rights" vice "ownership" of contractor developed technical data.

If confirmed, I will continue efforts to actively implement the Defense Department's Better Buying Power focus area of open systems architecture enforcement and effective management of data rights in order to ensure competition and lower lifecycle costs. I will also continue efforts to actively secure the required deliverables and data (license) rights as appropriate in order to promote new strategies to compete sustainment and modernization efforts that were previously sole source to the original contractor.

NUCLEAR COMMAND, CONTROL AND COMMUNICATION SYSTEMS

Question. Some elements associated with the acquisition of Nuclear Command, Control and Communications (NC3) systems are fragmented between two Air Force acquisition organizations—Space Systems (SAF/AQS) and Global Power Systems (SAF/AQP). The primary result of this fragmentation is the Family of Advanced Beyond Line of Site Terminals (FAB-T), which are to be installed in command post and airborne platforms. SAF/AQS has oversight of the procurement while the actual implementation in nuclear command and control platforms is found in SAF/AQP. This mismatch between acquisition programs (and requirements) has been documented in a recent General Accountability Office Report "Space Acquisitions – DOD Needs More Knowledge Before It Commits to Producing Satellite Terminal Critical to Nuclear Mission", GAO-14-24SU, December 2013. The primary outcome of this mismatch is that the Air Force cannot install the FAB-T terminals its airborne plat-

forms, principally the B-2 and B-52 aircraft but also Navy E-6B aircraft as well, causing a cascade of cancelled programs associated with these aircraft that were to use the FAB-T systems.

Have you read this GAO report?

Answer. Yes.

Question. Do you agree with its findings?

Answer. I agree with the GAO's recommendations to develop and approve a risk mitigation plan to address remaining FAB-T cost, schedule, and performance risks, and to direct the FAB-T program to establish agreements with user platform organizations. However, I disagree with the recommendation to delay production decisions.

Question. Where you agree what will you do to correct the deficiencies found in the report?

Answer. DOD initiated an updated risk mitigation plan for FAB-T in July 2013 that addresses the risks noted in the GAO report. The FAB-T program office continues to execute a risk mitigation process that involves leadership, stakeholders, and the contractor. If confirmed, I will remain committed and will work with the Program Executive Officer and FAB-T Senior Materiel Leader to manage the key risks on this critical program.

Additionally, the FAB-T Program Office will formally produce Memorandums of Agreement with each platform program office to further stabilize terminal and platform requirements. These agreements will be finalized following the production contract award to simplify the process for each platform.

Question. Where you disagree, please explain why.

Answer. The Department believes that programmatic actions taken to date have reduced program risk to an acceptable level and support the current acquisition strategy. While we appreciate the GAO concerns over manufacturing and technology readiness, the Department is confident that the winning bidder of the FAB-T production contract will be ready to deliver the system. Based on over 10 years of working on the Boeing development contract, the government has an in-depth understanding of the design and its readiness for production. Raytheon already has three other AEHF terminals currently in production. Delaying the down-select decision to a production vendor will jeopardize critical national leadership command and control capabilities and add significant cost, effectively negating the savings created through healthy competition.

Question. Do you agree the matching of requirements and acquisition for nuclear command, control and communications is fragmented, as evidenced by the two acquisition organizations (SAF/AQS and SAF/AQP) responsible for the program?

Answer. No. Matching requirements and acquisition is a fact of life for all acquisition programs. This often must occur across Program Executive Officers and Major Commands; however, there are robust requirements and acquisition processes in place that ensure key interfaces and program interrelationships are properly managed and integrated at all levels. As with all SAF/AQ Capability Directorates, these two staff acquisition organizations (SAF/AQS and SAF/AQP) understand these processes in detail, and work across the acquisition and requirements communities to ensure this integration occurs.

Question. What lessons do you think can be learned from the FAB-T program and applied to future nuclear command and control acquisition programs?

Answer. The lessons from the FAB-T program apply not only to NC3 programs but to all acquisition programs. They include: (1) program and requirements instability increase system cost and delay the schedule; (2) competition can be an effective tool to lower technical and schedule risk, and overall program costs; and (3) life cycle costs drive the ultimate affordability of these systems in the context of other requirements that also must be met.

Question. If confirmed, are you committed to fixing this acquisition problem and once confirmed will you brief the congressional defense committees on plans to fix this structural acquisition problem?

Answer. While I disagree the SAF/AQ organizational structure was a contributing factor to the problems the Air Force faced on FAB-T, if confirmed I will work in cooperation with the USD(AT&L) and Congress to continue to apply the lessons learned from FAB-T and other programs to improve all aspects of the acquisition process.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ASAALT?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

TOP ACQUISITION PRIORITIES

1. Senator MCCAIN. Dr. LaPlante, please identify the Air Force's top major systems acquisition priorities and, for each priority, please identify what you view as the critical pathway to obtaining capability to be delivered by those programs on time, on budget, and with the required capability.

Dr. LAPLANTE. The Air Force's top three priorities remain the KC-46, the F-35, and the Long Range Strike Bomber (LRS-B).

At this point in the development of the LRS-B, stable requirements are essential to keeping the program on track. The capability level requirements for the LRS-B—approved by DOD—set affordable, achievable, realistic requirements balanced by cost considerations. In order to reduce system and program complexity the program has minimized new development, allowing integration of mature technologies/existing systems. Industry is actively designing the system to stable, agreed upon requirements. It is important that we also maintain schedule performance to successfully achieve our program milestones.

For the F-35 Joint Strike Fighter program, mission software, the Autonomic Logistics Information System (ALIS), and reliability and maintainability are items on the critical pathway that must be delivered on time, on budget, and with the required capability.

Overall, flight envelope testing for Block 2B (initial warfighting capability) mission software is 86 percent complete, and high angle of attack testing is 70 percent complete. Looking forward in 2014, the F-35 Joint Program Office (JPO) expects to complete Block 2B flying qualities, weapons environment, and software testing and continue Block 3F (full warfighting capability) envelope expansion and software flight testing. The Program Executive Officer (PEO) remains moderately confident Block 2B will release on time in support of U.S. Marine Corps initial operating capability (IOC) in 2015. The PEO is also moderately confident in an on-time delivery of Block 3i (which provides updated processors and the same operational capability as Block 2B) to support USAF IOC in 2016. However, there is some risk with the on-time delivery of Block 3F to support USN IOC in 2018.

Maturation of ALIS is a continuing challenge. A revised development plan is in work and expected to be complete next month. It will include fixes to support Block 2B fleet release and U.S. Marine Corps IOC in 2015. As a result of performance issues at Marine Corps Air Station Yuma, the JPO implemented independent software reviews, brought in expertise from across the Lockheed Martin enterprise, and increased visibility (at Program Executive Officer and Office of the Secretary of Defense (OSD) levels). A joint government/contractor Red Team determined in December 2013 that although there are issues, the ALIS architecture is sound. The team is continuing to provide recommendations to improve system performance and robustness.

Reliability and maintainability remain below projected growth curves, but we are optimistic they will improve. The JPO and Lockheed Martin have identified the top 20 design-controllable reliability and maintainability "degraders". Revised reliability and maintainability goals will be finalized in March 2014. Air vehicle availability

and not-mission capable for maintenance rates have improved steadily since October 2013.

The KC-46 program remains on schedule and contract costs remain stable. Maintaining both requirements and funding stability has been, and will continue to be, key in ensuring the success of the KC-46 program. Requirements stability to date on the KC-46 program is evidenced by zero engineering changes and the program having met every contractual milestone since contract award 36 months ago. A cornerstone of this stability has been the support provided by both DOD and Congress in maintaining funding required to execute the program. All four EMD aircraft are in assembly at the production facility and preparations are well underway for flight test. The first provisional tanker aircraft will be delivered to accomplish first flight this summer, followed by the first KC-46 aircraft delivery and first flight scheduled for early calendar year 2015.

2. Senator MCCAIN. Dr. LaPlante, at this point, do you expect any of those programs to experience significant or critical cost growth over their original or revised acquisition program baseline costs and if so, why? Please explain your answer.

Dr. LAPLANTE. I do not anticipate any additional government cost growth in KC-46 Engineering and Manufacturing Development contract. The contract is a Fixed Price Incentive Firm (FPIF) vehicle which establishes a \$4.9 billion ceiling price; this is the Government's maximum financial liability, assuming no program changes, and shields the taxpayer from increased costs. Regarding acquisition program baseline cost, I do anticipate some cost growth in KC-46 life cycle Operating and Support (O&S) costs due to the Air Force decisions to increase KC-46 crew ratios and the flying hour program post-fiscal year 2020 in order to take advantage of the enhanced capabilities of the weapon system. These increased costs are not a result of the aircraft development program, but simply a change in field operations. There is no projected increase in Air Force Total Obligation Authority, as other tanker manpower and flying hour resources will be repurposed to KC-46 in the out-years. This increase in projected O&S costs was reported in the 2012 KC-46 Selected Acquisition Report.

I do not expect the F-35 Joint Strike Fighter program to experience significant or critical cost growth over the revised acquisition program baseline cost. The F-35 program was rebaselined in March 2012 after declaring a critical Nunn-McCurdy breach. I believe the F-35 program was put on sound footing with a realistic budget and schedule when it was restructured after the Nunn-McCurdy breach.

At this point in the development of the LRS-B, stable requirements are essential to keeping the program on track. The capability level requirements for the LRS-B—approved by DOD—set affordable, achievable, realistic requirements balanced by cost considerations. In order to reduce system and program complexity the program has minimized new development, allowing integration of mature technologies/existing systems. Industry is actively designing the system to stable, agreed upon requirements.

MAJOR SYSTEMS ACQUISITION REFORM

3. Senator MCCAIN. Dr. LaPlante, at your confirmation hearing, in response to Senator Ayotte's question regarding the failed \$1 billion Expeditionary Combat Support System (ECSS) program, you conceded that the Air Force does not have "firm accountability in the acquisition process." ECSS, in particular, had six different program managers and five different program executive officers during its 8-year acquisition lifecycle.

Some have proposed addressing this problem by better empowering program managers (PM) to make decisions important to the effective management of a given program and holding them accountable for those decisions by aligning their tenure with key investment decision-points, or milestones, during a given program's acquisition lifecycle. What do you think of this proposal?

Dr. LAPLANTE. Wherever possible, it is my belief we should empower PMs to proactively make key decisions and effectively manage their programs. For there to be real accountability, we must first ensure PMs and PEOs have the required authorities and resources to effectively manage their programs. With those required authorities and resources, PEOs and PMs are then in a position from which they can execute effective programs. The PEOs and PMs have a responsibility to use the chain of command to communicate all systemic and institutional process issues that impede program success. Mr. Kendall's new OSD Interim 5000.02 reinforces the responsibility and accountability of the Service Acquisition Executives (SAE), PEOs and PMs for the programs that they manage. If confirmed I will work to ensure that

our acquisition professionals have the necessary resources and an unfettered line of authority to be successful at program management. In instances where programs are managed ineffectively, I will hold acquisition professionals accountable for their failures.

I support the requirement that a major defense acquisition program manager's tenure be aligned to key milestones during a program's acquisition lifecycle, with provision for waivers, as called for by title 10, U.S.C., § 1734, and DOD and Air Force policy.

The Air Force has taken a number of steps to strengthen its management of PM and PEO tenure. AFI 36-1301 specifies that for ACAT I PMs and Deputy PMs, tenure should be through completion of the major milestone that occurs closest in time to the date on which the person has served in the position for 4 years; and that for all key leadership positions, including ACAT II PMs, PEOs will recommend appropriate tenure periods to the SAE based on program requirements. Determination of tenure is restricted to the SAE and this responsibility is not delegated to lower levels. Personnel selected for these key leadership positions will not be eligible if they decline to sign the required tenure agreement.

Our goal is to balance PM tenure and the career development demands to grow future acquisition leaders. We are using the flexibility provided in title 10, U.S.C., § 1734, and DOD policy to tailor PM tenure appropriately, based on the program and its point in the acquisition life cycle.

4. Senator MCCAIN. Dr. LaPlante, if confirmed, would you be committed to instituting such an approach?

Dr. LAPLANTE. Yes. I support the requirement that a major defense acquisition program manager's tenure be aligned to key milestones during a program's acquisition lifecycle, with provision for waivers, as called for by title 10, U.S.C., § 1734, and DOD and Air Force policy.

The Air Force has taken a number of steps to strengthen its management of PM and PEO tenure. AFI 36-1301 specifies that for ACAT I PMs and Deputy PMs, the tenure should be through the program milestone closest to 4 years; and that for all key leadership positions, including ACAT II PMs, PEOs will recommend appropriate tenure periods to the SAE based on program requirements. Determination of tenure is restricted to the SAE and this responsibility is not delegated to lower levels. Personnel selected for these key leadership positions will not be eligible if they decline to sign the required tenure agreement.

Wherever possible, I empower PMs to proactively make key decisions and effectively manage their programs. PEOs and PMs are fully encouraged to use the chain of command to communicate all systemic and institutional process issues that impede program success. Additionally, Mr. Kendall's new OSD Interim 5000.02 reinforces how Service Acquisition Executives (SAE), PEOs and PMs are responsible and accountable for the programs they manage. If confirmed I will hold acquisition professionals accountable to the maxim extent possible.

5. Senator MCCAIN. Dr. LaPlante, if confirmed, how would you otherwise ensure greater accountability for acquisition managers of the Air Force's largest weapons procurement programs?

Dr. LAPLANTE. If confirmed, I would institutionalize greater accountability in a deliberate and fair-minded manner. Ensuring greater accountability encompasses a range of potential factors. Using well established best practices, we must arrive at root cause of acquisition failures before moving to the steps of assessing accountability. Accountability must also be accompanied by appropriate authorities and responsibilities for it to be truly real.

Of critical importance is the need to consider the extent to which acquisition managers do not have the authority or the resources to properly execute their program due to budget, cost, schedule, technical or other factors outside of their control. The culture must allow for program managers to be able to "raise a flag" if they assess the program they are to manage is not executable. In all cases, if confirmed I am committed to giving our program managers and PEOs appropriate authorities and responsibilities, and then holding the chain of command accountable for the outcomes.

6. Senator MCCAIN. Dr. LaPlante, during your testimony, you cited root and contributing causes to ECSS' failure identified in the ECSS Acquisition Incident Report (AIR). In your view, how effectively is the Air Force addressing these causes in other similar business systems or other major automated information systems?

Dr. LAPLANTE. In my view, we are effectively addressing the ECSS AIR team's findings across our defense business system portfolio. Upon completing the ECSS

AIR in mid-2013, the AIR Team briefed lessons-learned to all levels of Air Force requirements and acquisition organizations. The requirements community and program managers are asked to link AIR recommendations to all applicable points in the acquisition strategy and planned milestones. These are briefed at Air Force governance boards, program milestone events and management reviews to ensure any need for course correction is detected and implemented early in the program's lifecycle.

In addition to the ongoing reviews that take place, the Under Secretary of the Air Force directed a review of our Major Automated Information Systems (MAIS) to analyze the extent to which the AIR lessons-learned are being implemented and determine where the Air Force should make additional improvements. This MAIS review was accomplished under the direction of the Air Force Deputy Chief Management Officer in August 2013. The review used the AIR findings as the basis for assessment across five business systems of varying size and scope. The review afforded the Air Force the opportunity for both internal stakeholders (i.e., program and functional managers) and an external group of experts to look for problems similar to those of ECSS in existing programs. The findings (strengths, weaknesses and recommended corrective actions) were reported to Air Force program acquisition executives and Headquarters functional sponsors to help ensure our major business initiatives are on a solid path to success.

The MAIS review complements work the Air Force has done to improve business systems acquisition. As an example, with Defense Enterprise Accounting Management System (DEAMS), the Air Force adopted a seven-phase release strategy with each phase being comprised of small, manageable increments. This strategy allows for the development and deployment of must-have capabilities to meet the Financial Improvement Audit Readiness (FIAR) goals across the Air Force and their Defense Finance and Accounting Services (DFAS) and U.S. Transportation Command partners.

7. Senator McCAIN. Dr. LaPlante, if confirmed, would you take any additional steps to make sure that these lessons have, in fact, been learned so that ECSS' failures are not repeated?

Dr. LAPLANTE. Yes, as the Service's Acquisition Executive, I will make every effort to ensure the Air Force's ECSS AIR Report lessons learned are fully considered and the right actions are taken to ensure mistakes made during ECSS are not repeated. I will regularly review programs that require my oversight and with specific regard to our defense business systems I will work with Major Automated Information System (MAIS) stakeholders, to include the Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)), the Chief Management Officer, the Chief Information Officer and functional communities to better articulate roles and responsibilities and efficient management. I will work closely with the functional users to ensure programs are built on a robust foundation of documented data decomposition, carefully mapped requirements, extended use cases, and well laid-out transition plans that move us from the current, to the interim, and ultimately to the desired end-state environments. I will monitor potential cost drivers in our MAIS programs through rigorous Configuration Steering Boards (CSB) to ensure we regularly revisit technical requirements and schedule metrics to drive program affordability.

Additionally the AIR report pointed out shortcomings in how we assign and tenure our Program Managers. I will ensure that our Air Force Program Managers have the highest level of training and experience and placed in the right jobs. Specifically, I will work with our acquisition career management community to ensure Key Leadership Position (KLP) tenure agreements strike the appropriate balance between tenure and the career development demands to grow our future acquisition leaders. I will also make sure our Program Managers are empowered with the guidance they need to make and act on their decisions and that our policies hold the right people accountable for program outcomes. This is particularly relevant to the November 2013 release of DOD 5000.02 Interim acquisition policy. Upon its release, my office promptly engaged our counterparts at Headquarters Air Force and the Program Executive Offices to help broadcast the most critical changes in guidance and helped reduce uncertainty among stakeholders in how the new policy should be implemented. I plan to remain engaged on this topic and will pursue opportunities to help shape internal reforms within the Air Force and DOD to mitigate encumbering regulations and will reexamine the decision processes and metrics applied at each stage of the acquisition lifecycle to make sure we have established the most effective tools to assess each program's value and affordability.

8. Senator MCCAIN. Dr. LaPlante, in May 2009, then-Secretary of the Air Force Michael B. Donley and then-Chief of Staff of the Air Force General Norton Schwartz released the Air Force Acquisition Improvement Plan (AIP) to rebuild an “acquisition culture that delivers products and services as promised” and “on time”. The plan outlined five target areas to realign the Air Force’s culture with acquisition “best practices”, including: (1) revitalizing the Air Force acquisition workforce; (2) improving requirements generation process; (3) instilling budget and financial discipline; (4) improving Air Force Major Systems source-selections; and (5) establishing clear lines of authority and accountability within acquisition organizations. In your view, has the AIP been fully implemented?

Dr. LAPLANTE. Yes, it has been implemented and we requested the Air Force Audit Agency to validate our implementation (see their report F2011-0008-FC3000 29 July 2011). All improvement efforts must be continuously sustained and kept in the forefront of our minds to be effective over time. The 2012 follow-up review produced more recommendations and our assessment was in the areas that were applicable and had value, were largely already in work or had been completed.

We have seen improvements in unit price, overall costs and performance. Nunn-McCurdy breaches as well as successful protest are measurably lower in recent years. Areas to see improvement and requiring focus continue to be schedule—particularly during development. If confirmed, this will be an area of emphasis.

9. Senator MCCAIN. Dr. LaPlante, what target areas has the Air Force yet to address satisfactorily?

Dr. LAPLANTE. The Air Force 2009 AIP implemented 33 initiatives across five areas (Revitalize the Acquisition Workforce; Improve Requirements; Budget/Financial Discipline; Improve Source Selection; Acquisition Organization) and yielded over 170 process improvements. Although we have closed out AIP, Air Force Acquisition continues to seek improvement opportunities.

For our workforce, we’re creating succession plans for acquisition leadership in functional specialties, working to ensure we grow our key leaders. We continue improving the qualifications and proficiency of the Acquisition workforce by concentrating on the development of practical application skills, qualifications, and business and technical acumen necessary to successfully execute the mission. At the same time, we’re concentrating on growing and strengthening our systems engineering workforce with the right technical expertise needed to perform early systems engineering analysis.

We continue to work on decreasing the length of time to field major systems to the warfighter to reduce the years that it is currently taking from the original projection to deliver capabilities. Specifically, development programs take too long. Using an incremental acquisition approach (e.g. block) can help improve program performance. This approach is premised on knowledge-based, incremental development that provides increasing degrees of warfighting capability with each block.

An incremental acquisition approach is the preferred strategy that provides the most effective balance of technical risk, financial resources, and the Air Forces’ operational needs. As a result, we’re implementing procedures and processes to ensure we utilize incremental acquisition strategies with technologies that are established and mature, while enabling technologies still in development to be injected into future increments of the program once they have matured.

Finally, we continue to work with the requirements community to prevent requirements creep, control costs, and scope requirements to enable us to more successfully utilize incremental acquisition approaches.

10. Senator MCCAIN. Dr. LaPlante, if you are confirmed, how would you ensure that they are addressed?

Dr. LAPLANTE. If confirmed, I will address these issues by creating actionable initiatives for what I consider to be some of the Air Force’s biggest challenges in the acquisition arena.

My first priority is to ensure the Air Force’s most critical programs stay on track. To do this, we must continually assess requirements and their costs throughout the acquisition lifecycle. Consequently, I am working with the requirements community to ensure we institutionalize the use of cost/capability trades, working to build more rigor into the Developmental Planning process, and strengthening the oversight and review processes.

The Air Force must also address Technology Development and maturity early in the acquisition process; therefore, I am working with the requirements community to ensure we use incremental acquisition strategies when appropriate. Further, if confirmed I will focus on strengthening the government program offices in gaining access to top technical talent to manage and assess technology risk.

Sound resource execution is another critical focus item that must be addressed so we can more effectively stretch the benefit of every dollar with which we are entrusted. OSD's Better Buying Power (BBP) initiatives are a good set of guiding principles that can help the Air Force be effective resource stewards. Our acquisition workforce will ensure the BBP 2.0 initiatives are implemented to produce the greatest benefit in affordability, should cost, and stronger partnerships with the requirements community.

11. Senator MCCAIN. Dr. LaPlante, particularly in the KC-46A tanker replacement program, your predecessor successfully put in place a strict change management governance approach that was intended to freeze requirements early and ensure that this program did not experience requirements creep, and commensurately excessive cost-growth, during its acquisition lifecycle. Do you believe that the Air Force should take a similar approach to other sufficiently similar major defense acquisition programs? If so, if confirmed, how would you institute such an approach? Or, if not, why not?

Dr. LAPLANTE. Yes. If confirmed, I will continue to stress the relationship between requirements instability and cost/schedule growth and system affordability. The KC-46 change management governance approach is an excellent example of the commitment required to guard against requirements creep and its deleterious effects.

As I have started in my current position, I will continue to strengthen the role of the CSB as one of the change management governance oversight mechanisms that enables the acquisition and requirements communities to work in concert to shield programs from requirements instability. In my current role, I have already reached out to the Vice Chief of Staff of the Air Force and the Deputy Chief of Staff of the Air Force for Operations, Plans and Requirements to explore methods to more closely link the efforts of the requirements and acquisition communities. In order to achieve true requirements stability, there must be a strong commitment among all stakeholders. This is an area that will yield good acquisition outcomes with proper leadership focus.

BETTER BUYING POWER INITIATIVE

12. Senator MCCAIN. Dr. LaPlante, what is your view of the BBP initiative, started by then-USD(AT&L) (later Deputy Secretary) Ash Carter and continued by USD(AT&L) Frank Kendall?

Dr. LAPLANTE. I strongly endorse AT&L's BBP initiatives, and in my currently delegated role of Service Acquisition Executive, I have emphasized them in my priorities for the Air Force Acquisition Enterprise. The BBP 2.0 initiatives represent a collection of many tried and true best practices that DOD acquisition community should be implementing consistently. More than anything else, BBP 2.0 is a framework to train and teach the acquisition workforce time tested methods of acquiring systems and services.

The BBP initiatives certainly call for a significant cultural reawakening in the acquisition workforce which has been taking place now for several years. In fact, I have found that there are some BBP initiatives that pockets of leaders in the Air Force Acquisition Enterprise were executing prior to the initial publication of the AT&L BBP initiatives.

I am pleased with the positive gains the community has made, for example, in the implementation of Should Cost initiatives, Cost/Capabilities Trades, Affordability initiatives and other cost control measures. I have witnessed the benefits of BBP initiatives in our major acquisition programs, as well as in the Air Force acquisition of services. If confirmed, I will continue to implement BBP to the maximum extent possible, and I am confident we will continue to see cost savings and other efficiency trends in our Air Force acquisition programs.

13. Senator MCCAIN. Dr. LaPlante, in your view, how successfully has the Air Force acquisition workforce implemented its tenets?

Dr. LAPLANTE. We are actively working on the implementation of the BBP initiatives and some efforts are easier to measure effectiveness than others, but one concrete example on which we are already seeing great returns is the implementation of "should cost." The "should cost" strategy is aimed at seeking out and eliminating low- and non-value added aspects of program costs. Managers are then 'rewarded' by being given the opportunity to utilize those savings, if necessary, as additional resources to manage program risk within the baseline program, or have the funds returned to the Air Force or OSD for high priority needs.

The Air Force is actively gathering should cost data and reporting our successes to OSD. In fiscal year 2013, the Air Force realized \$673 million in should-cost savings. Additionally, in fiscal year 2013, only one program requested a “should cost” waiver, down from 79 percent of programs in fiscal year 2012, which indicates that these initiatives are becoming second nature. This is just one example of how the Air Force has already accepted and begun to implement BBP.

OSD’s BBP initiatives are positive steps towards achieving successful program management and acquisition excellence. If confirmed, I will continue to implement BBP to the maximum extent possible, and I am confident we will continue to see cost savings and other efficiency trends throughout the Air Force.

14. Senator MCCAIN. Dr. LaPlante, if confirmed, how would you ensure its continued implementation?

Dr. LAPLANTE. The BBP initiatives are a responsible framework for improving our acquisition workforce skills and capabilities. A total of 16 initiatives have been delegated to the Service Acquisition Executives for implementation.

If confirmed, I will continue to ensure that all Air Force acquisition and contracting professionals implement this guidance and achieve the levels of success already seen to date. In my current position, I have been actively engaged in promoting the concepts behind BBP to our workforce through visits to the field and recognition of our personnel on individual successes and cost savings. Additionally, the Air Force has set policy and guidance on a wide variety of initiatives including BBP, and integrated these tenets in all levels of acquisition reviews. This active engagement is just the first step towards institutionalizing the process and making it the new way of doing business.

If confirmed, I look forward to working with USD(AT&L) to implement the initiatives to the maximum extent possible, and will assure that the senior executives assigned to implement the initiatives are accountable for their implementation successes.

CONTRACTING NEGOTIATORS

15. Senator MCCAIN. Dr. LaPlante, if confirmed, what kinds of experience and knowledge would you look for in the individuals who negotiate major contracts for the Air Force?

Dr. LAPLANTE. I expect any Airman negotiating major Air Force contracts to possess the appropriate and significant level of professional training, hands-on experience, and requisite knowledge of the specific mission area as well as tough negotiating skills. What I also look for are individuals who think conceptually and listen critically. I expect airmen to possess the acumen, judgment, and character of an Air Force Contracting Professional. Above all, I look for integrity.

16. Senator MCCAIN. Dr. LaPlante, do you feel the Air Force has a sufficient number of such experts in its acquisition workforce?

Dr. LAPLANTE. While I feel that we have many such experts, I cannot say that we have a sufficient number of them. Experience takes years to build, and while we are actively doing so, retirement eligibility, competition with other agencies and competition with industry for such experts continues to impact our retention. I am concerned and will focus on the mobility of Air Force contracting experts—that is our ability to surge our best experts to emerging high priority contracting needs. Again, if confirmed this is an area I am committed to improving.

PROGRAM MATURITY

17. Senator MCCAIN. Dr. LaPlante, the Government Accountability Office (GAO) has consistently reported that the use of insufficiently mature technologies has resulted in significant cost and schedule growth in the major acquisitions of the Air Force and the other military departments. Do you believe that the use of insufficiently mature technologies drives up program costs and leads to delays in the fielding of major weapons systems?

Dr. LAPLANTE. Yes. It is my goal that all Air Force major acquisitions achieve a high level of technology maturity by the start of system development to ensure a match between resources and requirements. Continuing to exercise the well-established Air Force Technology Readiness Assessment (TRA) process, which includes an independent assessment of critical technologies, will help to ensure the necessary resource/requirements match. Understanding and then actively managing programmatic and technical risk is foundational for successful acquisition.

18. Senator MCCAIN. Dr. LaPlante, do you believe the Air Force has made progress in ensuring the right amount of technology knowledge is in place before embarking on major programs?

Dr. LAPLANTE. Yes. While the Technology Readiness Assessment (TRA) serves to ensure an alignment between resources and requirements prior to major program initiation, the TRA by itself does not address systems integration and engineering risks. The expertise of a professional engineering workforce within the Air Force acquisition community to perform early systems engineering analysis is critical before embarking on major programs. This workforce can balance the integration of:

- (1) Overall systems engineering design and process,
- (2) Concerns for operational mission requirements,
- (3) The state of current available technologies (Technology Readiness Levels (TRL) 8 & 9)
- (4) Near-term technologies in laboratory development (TRLs 4–6), and
- (5) Increasingly stringent concerns for funding and schedule realism.

Effectively addressing these issues earlier in the program will help mitigate cost overruns and schedule delays in future systems. Again, the TRA is a successful instrument for measuring knowledge points, but it must be augmented by a competent and professional workforce.

19. Senator MCCAIN. Dr. LaPlante, if confirmed, as to major defense acquisition programs, what steps would you take to make sure that critical technologies have indeed reached an appropriate level of maturity before Milestone B approval?

Dr. LAPLANTE. If confirmed, I will ensure the Air Force continues to apply its well-established Technology Readiness Assessment (TRA) process to ensure major defense acquisition programs (MDAPs) meet the Section 2366b of title 10, U.S. Code certification requirement that program technology be demonstrated in a relevant environment. The Deputy assistant Secretary of the Air Force for Science, Technology and Engineering facilitates the Air Force TRA process on my behalf and ensures that a formal, independent assessment of critical technologies has been completed prior to recommending a program proceed to Milestone B.

20. Senator MCCAIN. Dr. LaPlante, the USD(AT&L) has also issued a memorandum directing that the largest DOD acquisition programs undergo competitive prototyping to ensure technological maturity, reduce technical risk, validate designs, reduce cost estimates, evaluate manufacturing processes, and refine requirements. Do you support this requirement, and if so, why?

Dr. LAPLANTE. Yes, I support the USD(AT&L) policy changes to implement the Weapon Systems Acquisition Reform Act, which provides for early and competitive prototyping as well as other efforts to improve the Defense acquisition process. Competitive prototyping, when practical and affordable, drives technology maturation early in the acquisition, enables effective systems engineering, allows the warfighter to see the potential capability demonstrated in an operational or relevant environment, and leads to effective maturation of technology while minimizing programmatic risk. Wherever appropriate, I believe prototyping should be used to directly support initial system designs as well as experimentation.

COST GROWTH

21. Senator MCCAIN. Dr. LaPlante, GAO has reported that the use of unrealistically optimistic cost and schedule estimates by the Air Force and the other military departments is a major contributor to cost growth and program failure. Do you believe this is still the case within the Air Force?

Dr. LAPLANTE. The Air Force has made great progress toward improving the accuracy of cost and schedule estimates. In addition, Air Force senior decision makers now consider independent cost assessments in annual resource programming and budgeting decisions.

Since the passage of the Weapon Systems Acquisition Reform Act of 2009, the Air Force continues to improve the quality of cost and schedule estimates that form the baselines for our major acquisition programs. Independent cost estimates are developed that form the cost baseline for all our major acquisition programs. In addition, we are more rigorously budgeting to the cost baseline which facilitates program stability. New policy guidance and procedures require annual, independent cost estimates on all major acquisition programs.

In my current position, I have stressed how requirements can drive cost by evaluating how changing or reducing a requirement, even slightly, can have significant cost ramifications.

We have also addressed improving our cost estimating workforce in recent years by working with the Defense Acquisition University to improve the cost estimating curriculum required for their Defense Acquisition Workforce Improvement Act certification. These actions and improvements have resulted in more realistic, objective cost and schedule estimates in support of the budget process and acquisition decisions.

The Air Force is committed to improving cost and schedule estimates and enhancing program success across all acquisition programs. The Air Force closely tracks execution and provides guidance as necessary to keep efforts “on track”. The number of Nunn-McCurdy breaches has declined significantly since the mid-2000s (fiscal year 2005–2008 had 26 breaches over 14 programs). Over the past 3 years, the Air Force has had five programs declare a significant or critical Nunn-McCurdy breach. Of those, three are no longer MDAP programs (C-27J, C-130AMP, and National Polar-orbiting Operational Environmental Satellite System (NPOESS)), one was driven by a combination of quantity reductions and cost growth (Global Hawk), and one resulted from restoration to MDAP status (Evolved Expendable Launch Vehicle (EELV)). This past year, the Air Force had no Nunn-McCurdy breaches.

22. Senator McCAIN. Dr. LaPlante, what steps would you take to ensure that cost and schedule estimates are fair and independent and provide a sound basis for Air Force programs?

Dr. LAPLANTE. Since the passage of the Weapon Systems Acquisition Reform Act of 2009, the Air Force continues to improve the quality of its cost and schedule estimates and we are more rigorously budgeting to them. New policy guidance and procedures have been adopted that require annual, independent cost estimates on all major acquisition programs. Additionally, the Air Force routinely develops independent schedule assessments on major acquisition programs. This has resulted in more realistic, objective cost and schedule estimates in support of the budget process and acquisition decisions. Finally, there has been a cultural shift to emphasize starting programs where the service is fully committed with funding and fit within affordability caps derived from realistic budget assumptions.

INFORMATION TECHNOLOGY ACQUISITION

23. Senator McCAIN. Dr. LaPlante, in your advance policy questions, you note that information technology (IT) acquisitions would benefit from having a specific appropriations account. Would it be restricted only to major defense automated systems? Please explain this concept more fully.

Dr. LAPLANTE. I was expanding on a specific point that was raised in the “A New Approach for Delivering Information Technology Capabilities in the Department of Defense” report to Congress from November 2010. The specific appropriations account was one item in a larger response stating that, “The PPBE system, used to build the entire DOD budget, operates on a timeline that is mismatched to the fast-paced IT commercial marketplace. It is unreasonable to expect the funding process for the entire DOD to be shortened sufficiently to respond to the rapid changes of the IT environment, yet PPBE flexibility is needed.” This is an example of one potential action that could be taken to provide DOD with more flexibility in procuring all IT, not just major automated information systems, while also providing more oversight into the resources spent on IT. The report stated, “The funding appropriation would have the flexibility for development, procurement, and operations and maintenance to permit funding a range of potential IT materiel solutions based on a sound business case.” Additionally, the single IT appropriation would contain provisions for performance-based metrics that must be established before funds could be obligated and would offer complete transparency to ensure accountability to oversight officials. If aligned into a portfolio approach, the single IT appropriation would allow flexibility when selecting options for developing and procuring a new system. Overall, options need to be explored in how to fund IT systems and the single IT appropriation is one example of an idea that could be implemented to result in faster, more responsive IT.

FAMILY OF ADVANCED BEYOND LINE-OF-SIGHT TERMINALS

24. Senator McCAIN. Dr. LaPlante, significant technical challenges on the Family of Advanced Beyond Line-of-Sight Terminals (FAB-T) program have led to severe schedule delays and cost increases. Consequently, after more than a decade since program initiation, important nuclear command, control, and communications (NC3) capabilities are yet to be delivered and fielded to the warfighter. Recently, it has

been reported that the Air Force has decided to initially move forward with producing only command post terminals (84 units) and deferring production of terminals designed to be installed on strategic bomber aircraft (132 units). Does this reduction in production units mean the FAB-T program will breach the Nunn-McCurdy critical unit cost increase threshold, or are the bomber aircraft terminals still a part of the program?

Dr. LAPLANTE. The Department still has a validated FAB-T requirement to procure an AEHF capability on the 132 B-2, B-52 and RC-135 force element platforms, but procurement has been deferred beyond the Future Years Defense Program. We have prioritized procuring the command post terminals first in order to deliver Presidential and National Voice Conferencing by the fiscal year 2019 Initial Operational Capability date. I do not foresee the potential for a Nunn-McCurdy unit cost breach at this time

25. Senator MCCAIN. Dr. LaPlante, to what extent is there or should there be a Plan B to mitigate risk and help ensure needed capabilities are delivered in case the FAB-T program continues to experience delays and cost increases?

Dr. LAPLANTE. The current Air Force acquisition strategy, approved by the USD(AT&L) in 2012, brings an alternate source to the FAB-T development, effectively implementing a Plan B. The decision to complete development from both sources on firm fixed price contracts greatly mitigates the cost, schedule, and performance risks previously associated with the program. Further, this plan introduces competition into the FAB-T program which is expected to provide better cost effective capability then having a single supplier.

26. Senator MCCAIN. Dr. LaPlante, what assurances can you provide that the program is on the right track?

Dr. LAPLANTE. I believe programmatic actions taken to date have reduced program risk to an acceptable level and support the current acquisition strategy. Last year, the Department initiated an updated plan for FAB-T with a rigorous risk mitigation process involving leadership, stakeholders, and contractors. Based on over 10 years of working on the Boeing development contract and recent test activity on that program, the government has an in-depth understanding of the design and its readiness for production. Currently, Raytheon has three other AEHF terminals in production. The FAB-T program is on track to select a single source for production of command post terminals in the second quarter of fiscal year 2014. I am confident the winning bidder will be ready to deliver a system that meets requirements and affordability goals. I look forward to working with the USD(AT&L); the Air Force Program Executive Officer for Space; and the FAB-T program manager to ensure the program is ready for a successful Milestone C decision.

MILITARY SPACE ACQUISITIONS

27. Senator MCCAIN. Dr. LaPlante, since 2006 DOD has funded the fixed costs of its supplier under the EELV program under a contract line-item known as Launch Capability. This expenditure is in excess of \$1 billion annually and is executed on a cost-plus basis today. As you may know, in a November 2012 Acquisition Decision Memorandum (ADM), USD(AT&L) Frank Kendall directed the Air Force to aggressively reintroduce competition into the EELV program. In your view, what does the aggressive reintroduction of competition into the EELV program mean?

Dr. LAPLANTE. In my opinion, "aggressive reintroduction of competition" means taking steps wherever possible to establish a competitive environment, even if that competitive environment only covers a portion of the mission. Furthermore, it means posturing ourselves for increased competition (competition growth) as we move forward to 2018. The Air Force is taking steps to do this:

- We will compete portions of the launch manifest each year in 2015, 2016, and 2017 if there is even one New Entrant ready to compete; i.e., they have successful launches and have completed the required certification steps
- We will work early with declared New Entrants to certify their systems as ready as evidenced by our Cooperative Research and Development Agreement with SpaceX
- We will award early integration contracts supporting timely space vehicle integration to meet launch schedules
- We have added government team resources to assure timely review of certification products, data and other supporting information throughout the certification process

The Air Force is committed to competition within the EELV program and is aggressively taking steps to do so while ensuring its responsibilities to deploy National Security Space payloads into their orbits safely and with acceptable risk.

28. Senator MCCAIN. Dr. LaPlante, if you are confirmed, how would you ensure that this directive is implemented in that program?

Dr. LAPLANTE. I will continue to work closely with the USD(AT&L), and the Program Executive Officer for Space to introduce competition into the EELV program. In my current role, I recently met with the USD(AT&L) to discuss the status of the program and will continue to provide him additional information on the competitive request for proposal later this spring. We will continue those actions I previously described toward strengthening the competitive environment for launch.

29. Senator MCCAIN. Dr. LaPlante, given that the recently revised National Space Transportation Policy removed the previous policy that the Secretary of Defense fund the fixed costs of its launch provider, what actions does the Air Force plan to take to phase-out this Launch Capability contract line item, reduce the complexity of the existing contract structure, and establish a level playing field for all potential offers of national security space launch?

Dr. LAPLANTE. The Air Force reduced the complexity of the EELV contract for the current economic order quantity commitment through consolidation of the entire effort into a single contract. In accordance with the recently revised National Space Transportation Policy, we ensured the new EELV contract only pays for the capability to launch the 36-core buy and the previously purchased cores that haven't yet launched. We are currently working on the strategy for the next phase of the EELV-class program which will start in fiscal year 2018 with procurement of launch services for satellite launch requirements starting in fiscal year 2020. As part of this strategy, the Air Force does not intend the future contract to contain a contract line item structure similar to the one currently in place. The approach for this next phase will balance mission assurance with cost and satellite requirements within a full-and-open competition environment for certified providers

30. Senator MCCAIN. Dr. LaPlante, what additional steps, if any, would you take in this regard, if you are confirmed?

Dr. LAPLANTE. If confirmed, I will continue to work with potential competitors to understand their concerns and ensure we comply with National Policy, Federal Acquisition Regulation, and Department of Defense (DOD) requirements.

31. Senator MCCAIN. Dr. LaPlante, what do you see as the main challenges to achieving full-and-open competition in the EELV program?

Dr. LAPLANTE. I see three main categories of challenges to achieving full-and-open competition:

First, industry developments. To have full-and-open competition you must have competitors. While New Entrants, especially SpaceX, have made great strides in developing their launch systems, we still do not have any other provider capable of doing the entire mission required to be executed by the United Launch Alliance today. The new entrants have a lot of work ahead of them and I will be watching their progress with great interest and enthusiasm.

Second, mission assurance. We have had a tremendously successful run in the launch business in great part because of the strong engineering disciplines imposed upon our current launch systems. We do not want to lower our standards. So we must find an effective way to assure quality and mission assurance for New Entrants in a timely and affordable way. We are well on our way with SpaceX, but there is much work to go as mutually agreed to in our Cooperative Research and Development Agreement with them.

Third, wise purchasing. We will be challenged to establish a fair competition that complies with the Federal Acquisition Regulation, treats all competitors fairly, aggressively pursues a good deal for the U.S. Government, and at the same time postures us for success given possible developments in the domestic and international defense and commercial launch markets.

I think our team is up to this challenge, but it is indeed a tough job.

32. Senator MCCAIN. Dr. LaPlante, if confirmed, would you encourage a move to full-and-open competition if more than one launch company was certified to launch EELV-class payloads? If so, how so? If not, why not?

Dr. LAPLANTE. Yes, if confirmed I will continue to encourage a move to competitive procurement if more than one company is certified. However, this would in the near term be a limited competition versus full and open, as it would be limited to

the certified competitors. The first opportunity for competition is in fiscal years 2015–2017, where a limited number of missions are available for competition. I envision a competitive procurement for all launches starting in fiscal year 2018 if more than one provider is certified.

33. Senator MCCAIN. Dr. LaPlante, as to military space procurement generally, do you see a need for any changes/modifications to DOD's or the Air Force's current acquisition policies? If so, what areas might be appropriate for change, and why?

Dr. LAPLANTE. The USD(AT&L) recently released a revision to the DOD instruction (known as DODI 5000.02) that governs the defense acquisition system. I am still reviewing the instruction and how it specifically addresses military space procurement. Overall, I agree with its objectives that emphasize thoughtful program planning; tailored program structures and procedures that account for unique program circumstances, such as high-cost first article acquisitions like space programs; and program management responsibility. I see an opportunity under the new revision to implement changes to oversight and program structure of our space programs such as improved cost management and incentives. I think there are some excellent opportunities to drive down the cost of commercial satellite communications services through investment versus leases, and we continue to work with AT&L to identify the specific policy changes that might be required to implement these approaches. If confirmed, I look forward to working with the USD(AT&L) on continuing to streamline and improve the defense acquisition system.

34. Senator MCCAIN. Dr. LaPlante, the Air Force has only recently taken significant steps to gain insight into contractors and their costs for major space and other programs. These efforts have benefitted the Air Force, helping to lower prices for space launch services and key satellites. If confirmed, what would you do to ensure the Air Force continues and strengthens these efforts?

Dr. LAPLANTE. If confirmed, I will continue to implement USD(AT&L) BBP initiatives to the greatest extent possible. We continue to make excellent progress reducing and eliminating non-value added costs especially through our "should cost" efforts. The "should cost" concept enables us to understand a system's cost elements in great depth, and then, through prudent, cost-benefit based considerations of the associated risks, implement measures that eliminate or reduce non-value added costs. As an example, effective "should cost" management, along with other affordability initiatives made possible by good collaboration between DOD and Congress, enabled over \$1.6 billion of savings over buying the vehicles separately for the procurement of the fifth and sixth Advanced Extremely High Frequency production satellites. In addition, we must continue to grow the quality of our workforce to ensure personnel in key positions have the right knowledge and experience to "own the technical baseline" and drive these BBP initiatives.

Additionally, the complexity and high-unit cost of space systems creates a strong imperative for a high level of insight into our program costs. We learned this in EELV where the commercial nature of the original program did not provide such insight. So, as the market contracted and costs rose we did not have the data we needed. As you noted, we corrected that problem in EELV and have learned that lesson. I will apply these hard-learned lessons by continuing to ensure we have cost visibility into our expensive launch and space programs

35. Senator MCCAIN. Dr. LaPlante, we know that several prime space contractors have likewise taken actions to increase efficiencies and streamline operations. This is a welcome trend—but not without risk. How is the Air Force staying abreast of these changes and assuring that key areas of expertise are not being lost or that technical risks are not significantly increased?

Dr. LAPLANTE. I believe our understanding of and collaboration with the network of suppliers that provide space products and services to the Air Force will help us manage these risks. If confirmed, I will continue to support initiatives that accomplish this, such as the DOD's sector-by-sector, tier-by-tier (S2T2) activity and the numerous government-industry forums, councils, and committees the Air Force participates in along with the National Reconnaissance Office and the National Aeronautics and Space Administration.

In addition, I believe we must continue our efforts to recruit, retain and develop a world-class acquisition workforce to ensure technical risks, regardless of origin, are properly managed. In my current role, I've been pleased with the quality of our acquisition workforce and their ability to manage space acquisition programs. However, we must maintain a constant focus on growing our expertise to ensure implementation of efficiency initiatives and streamlining does not incur undue programmatic risk.

36. Senator MCCAIN. Dr. LaPlante, fixed-price contracts are a preferred approach for satellites that are in the production phase. Yet, for the past decade, the Air Force has maintained an acquisition workforce that is accustomed to working in a cost-plus environment as it recapitalized the majority of its space portfolio. If confirmed, how would you ensure that the Air Force adjusts within this environment to more extensively use fixed-price contracts, where their use is, in fact, warranted and appropriate?

Dr. LAPLANTE. If confirmed, I will continue to support fixed-price contracting where appropriate. In order to do this more extensively, I will work closely with the Program Executive Officer for Space to assess and adjust training and development opportunities for the space acquisition workforce that continue to grow the necessary skills to effectively implement fixed-price contracting approaches. We have begun to manage one of our major satellites under a fixed-price contract and are in the process of transitioning a second and preparing a third. I am fully utilizing this opportunity to evolve the space acquisition workforce to operate efficiently and effectively in a fixed-price environment.

37. Senator MCCAIN. Dr. LaPlante, in your view, how will the Air Force's oversight and insight into space programs change in a fixed-price contract environment?

Dr. LAPLANTE. The Air Force is responsible for providing space capabilities and must be an informed consumer. To accomplish this task, we will continue to provide oversight to space programs and require insight into contractor execution. When doing this, we must only implement fixed-price contracts where appropriate; and even when contracts are fixed-price, we must continue to closely monitor cost and schedule performance, demand in-progress testing and thorough evaluation of test results while at the same time enforce our mission assurance engineering disciplines on our space system development efforts. I anticipate fixed-price contracts for mature, lower-risk acquisitions to reduce costs in government oversight and contract execution. For example, the Wideband Global Satcom (WGS) program is an example of a mature, low-risk acquisition where we were able to substantiate the cost data and use a firm-fixed price contract. The risks with providing capability to the warfighter are low and there are other, available commercial options that provide similar capability. These factors allowed the Air Force to successfully leverage a commercial business model to yield efficiencies. In other cases, fixed-price contracts for higher risk, more complex acquisitions with unique mission requirements may require a higher level of government focus. For instance, the FPIF contract for AEHF 5/6 still requires significant government oversight to manage the higher risks associated with Nuclear Command, Control and Communications requirements and where substitute options are unavailable on the commercial market. These two programs highlight our ability to continue to provide oversight and leverage efficiencies from fixed-price contracts while maintaining focus on mission assurance and system activities.

38. Senator MCCAIN. Dr. LaPlante, how will the size and composition of the Air Force's acquisition workforce change in light of these changes?

Dr. LAPLANTE. When considering fixed-price contracting for our space systems, there are several factors that influence the size and composition of the space acquisition workforce that need to be evaluated. Some of the factors include different oversight requirements based on contract risks, cost savings or cost/risk avoidance functions such as "should-cost" analyses, and the development of more resilient architectures. We have been able to reduce workforce requirements for WGS by focusing on higher level oversight of cost, schedule, and performance. This has allowed us to realign that workforce to higher risk acquisitions that are critical to develop more affordable and resilient space systems architectures. If confirmed, I will work with the Program Executive Officer for Space to evaluate the size and composition of the space acquisition workforce to ensure that we are able to efficiently and effectively complete our missions.

39. Senator MCCAIN. Dr. LaPlante, many government groups have pointed out problems in the synchronization of space systems' development, such as ground control systems not being ready when satellites are launched, or user equipment not being available for the warfighter when advanced signals and information are being produced by satellites. In some cases, the gap between the availability of a satellite and its user equipment has added up to a delay of many years. What are some options you think will help to reduce these problems and improve coordination on space systems Government-wide?

Dr. LAPLANTE. I believe we must continue to improve the way we manage the space enterprise and our acquisition processes to field capabilities that are complete

and useful to the warfighter. Although we coordinate all of our capability fielding plans with the combatant commands, budgetary limitations and instability often force changes to these plans that can push a system's synchronization to a less optimal state. We can help mitigate these concerns by ensuring our space systems are affordable, and where practical, commit to longer-term plans that stabilize capability delivery. Additionally, we must continue to communicate and collaborate across the separate acquisition programs that make up an end-to-end space capability.

40. Senator MCCAIN. Dr. LaPlante, do you believe this problem is rooted in a lack of focused leadership for space systems? If so, how would you address this issue if confirmed?

Dr. LAPLANTE. I don't believe this problem is rooted in a lack of focused leadership for space systems. I understand that the Air Force's Space Launch Broad Area Review (BAR) in 1999 and later, the congressionally-directed Space Commission in 2000 took a hard look at how space activities should be managed. The Air Force adopted many of the BAR and Commission's key findings, to include assigning Air Force Space Command responsibility for providing the resources to execute space research, development, acquisition, operations and sustainment under one four-star commander. This construct created a strong center of advocacy for space systems and resources, and I believe maintains the proper level of leadership focus on our space systems.

41. Senator MCCAIN. Dr. LaPlante, multiple organizations are responsible for acquiring satellite communications for DOD, including the Air Force, the Defense Information Systems Agency, and the Navy, among others. Additionally, each Military Service is responsible for acquiring satellite communications terminals. To what extent should there be a single acquirer of satellite communications for DOD?

Dr. LAPLANTE. As you state, currently the Air Force procures wideband and protected military space and ground control segments, while the Navy procures narrowband military space and ground control segments. Similarly, each individual service procures associated terminals that best match their warfighting requirements. Finally, DISA leases commercial satellite bandwidth to augment overall Department capabilities. I do think the Department can do a better job delivering these capabilities in the future. A number of ongoing activities, as evidenced by the Protected Satellite Communication Services Analysis of Alternatives (AoA) and our commercial satellite communication pathfinder efforts are underway.

I don't believe a single acquirer of satellite communications is the answer to these problems. Each individual service is best equipped to develop and procure terminals that best match their unique needs. Similarly, there resides a level of technical expertise within the Air Force and Navy focused on wideband and protected, and narrowband satellite communications, respectively. While in theory that expertise could be consolidated into a single organization, the costs associated with consolidation may outweigh the benefits. That said, I believe opportunities remain to increase communications, collaboration, and integration between the separate organizations to improve the overall efficiency, effectiveness, and synchronization of satellite communications capabilities.

42. Senator MCCAIN. Dr. LaPlante, to what extent does DOD have the knowledge it needs to determine its short-term to mid-term communications bandwidth-needs to enable long-term leases of commercial satellite communications bandwidth?

Dr. LAPLANTE. To my knowledge, DOD is following a rigorous process to improve its knowledge and detailed understanding of its short-, medium-, and long-term commercial SATCOM bandwidth requirements. The DOD process accounts for the specifics of near-term requirements while utilizing a scenario-based process that documents, prioritizes and validates requirements for the medium- and long-term periods. This information can enable the use of longer-term leases and potential new acquisition approaches for more cost-effective methods to provide commercial satellite bandwidth to the warfighter.

43. Senator MCCAIN. Dr. LaPlante, when will acquisition and budget decisions need to be made on the way forward for providing space system capabilities following the fifth and sixth Space Based Infrared System (SBIRS) geosynchronous Earth orbit satellites, and the third and fourth highly elliptical orbit sensors, the fifth and sixth Advanced Extremely High Frequency (AEHF) satellites, the final two Defense Meteorological System (DWSS) program satellites, and the Space Based Space Surveillance (SBSS) satellite?

Dr. LAPLANTE. The Overhead Persistent Infrared AoA is expected to commence in 2014 to inform the way ahead to meet future requirements in a cost-effective manner. Currently, we anticipate the AoA's preliminary results to inform the fiscal year 2016 President's budget, with the final results of the AoA informing the fiscal year 2017 President's budget. The acquisition development decision is projected for fiscal year 2018.

We expect the Protected Satellite Communications (SATCOM) Services AOA, which will recommend how to best provision for protected military SATCOM capabilities beyond the sixth AEHF satellite, to provide recommendations in 2014 that will inform the fiscal year 2016 budget formulation. Final budget and acquisition decisions will have to be made by fiscal year 2017.

Acquisition and budget decisions are currently being considered within the fiscal year 2015 budget process for the Weather System Follow-on (WSF) effort. These decisions are being informed by the Space-Based Environmental Monitoring (SBEM) AOA, which included an assessment of the SBEM capabilities provided by the Defense Meteorological Satellite Program (DMSP), as well as civil and international SBEM partners.

The SBSS Block 10 system is the Air Force's only dedicated, operational space-based space situational awareness asset. Providing over 28 percent of all deep space collects in the space surveillance network and delivering vital mission data products to the warfighter, it is a cornerstone capability for deep-space Space Situational Awareness. In order to mitigate a critical capability gap post-SBSS Block 10 end of life (September 2017), acquisition and budget decisions are currently being considered within the fiscal year 2015 budget process.

44. Senator MCCAIN. Dr. LaPlante, what are the primary schedule-drivers for making these decisions?

Dr. LAPLANTE. For SBIRS, the primary schedule drivers for making these decisions are the predicted replenishment windows to avoid critical capability gaps to our warfighters and leadership. We also incorporate the acquisition, budgeting, and other process timelines to determine when decisions must be made.

For AEHF, current functional availability analysis indicates replenishment for a four satellite AEHF constellation needs to start in fiscal year 2027. As such, we need to make a decision no later than fiscal year 2017. The Protected SATCOM Services AoA and a number of ongoing risk reduction activities posture us to start that acquisition in time.

The Air Force's path forward for the next generation weather system (follow-on to the Defense Meteorological Satellite Program) will be informed by the Space-Based Environmental Monitoring (SBEM) AoA. The AoA was recently completed by the Air Force and submitted to OSD CAPE for a sufficiency review and to Joint Staff for their review and validation process. The AoA evaluated the contribution of DOD, civil, and international SBEM systems to fulfill the Joint Requirements Oversight Council (JROC)-endorsed capability gaps. This analysis will allow DOD to focus on a military solution to fulfill those capability gaps. The Air Force is formulating this strategy to inform the fiscal year 2015 budget.

Analyses and risk reduction efforts are underway to inform future decisions regarding timely space situational awareness of the geosynchronous regime. Many of these efforts should complete within the next 1 to 2 years.

45. Senator MCCAIN. Dr. LaPlante, do you believe that the Air Force should pursue a more disaggregated approach to the architectures for its space systems, such as fielding more numerous but simpler and smaller satellites or hosting payloads on commercial satellites? Why or why not?

Dr. LAPLANTE. Disaggregation is a concept that may offer advantages in areas of resiliency and affordability in certain situations; however, it is premature to embark on such a sweeping architectural solution to established mission areas without further rigorous study and analysis. I do believe that the Air Force should consider disaggregated approaches when determining how to best meet the mission needs, especially in a fiscally constrained environment. We expect the ongoing Protected SATCOM Services and soon-to-be Overhead Persistent Infrared systems AoA will examine disaggregated and other architectures in detail to inform the best approach to address requirements in the future. Furthermore, the Air Force and the National Security Space community have enacted requirements for protection as key performance parameters on all future space systems, with space situational awareness being a key architectural design consideration enabling our Nation's National Security Space (NSS) systems to operate in a contested space environment. There is no "silver bullet" that applies to all situations; the right answer will possibly be a mix

of disaggregation, hosted payloads, in situ Space Situational Awareness, commercial services, and simpler satellites architected across the entire NSS enterprise.

46. Senator MCCAIN. Dr. LaPlante, if you agree that the Air Force should take such an approach, how would you ensure that it does, if confirmed?

Dr. LAPLANTE. The question of whether a disaggregated approach is the best approach to meet a particular need should be addressed during the materiel solution analysis phase of an acquisition program, prior to Milestone A. The Analyses of Alternative in particular should consider disaggregated architectures. As the Service Acquisition Executive, I can personally ensure that disaggregated approaches will be considered during my review at this Milestone.

47. Senator MCCAIN. Dr. LaPlante, considering DOD's interest in disaggregated space systems, what efforts do you believe are needed in the launch area to develop domestic launch capabilities that are appropriately responsive and inexpensive in order to make disaggregation of national security space systems effective?

Dr. LAPLANTE. Disaggregated space systems could mean smaller satellites which could eliminate the need for larger boosters. The larger boosters are more expensive, take longer to build, and require more time on the pad. However, having multiple satellites going to similar orbits may mean EELV-class launch vehicles provide the best value by launching multiple satellites on the same booster. Regardless of the outcome, having additional launch providers on contract through the Rocket Systems Launch Program or EELV program will provide more options for a variety of system architectures.

48. Senator MCCAIN. Dr. LaPlante, I understand that the position of Air Force Program Executive Officer for Space Launch may be subsumed under the Program Executive Officer for Space. Do you believe that this change should be made? Please explain your answer.

Dr. LAPLANTE. Yes, I believe this change should be made. The program needed to get as good at the "business of launch" as they were at "day of launch." We separated the Program Executive Officer (PEO) for Space Launch to achieve cost control and focus on implementing a new acquisition strategy that maintains mission success, reduces costs, prevents or mitigates cost or redesign impacts to space vehicles, and sustains the program to assure access to space. This mission was accomplished and with the award of the Launch Vehicle Production Services and Capability contract, the program was placed back under the Program Executive Officer for Space on December 12, 2013. This was done in consultation with the Under Secretary of Defense for Acquisition, Technology, and Logistics, and the Air Force Space Command Commander. The EELV program is well aligned under the Program Executive Officer for Space who, as commander of the Space and Missile Systems Center, is also the EELV launch certification decision authority, as well as the New Entrant certification authority. To ensure a smooth transition, several existing members of the former PEO for Space Launch team will continue working the program through at least fiscal year 2015.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

AIR FORCE ACQUISITION PRIORITIES

49. Senator CHAMBLISS. Dr. LaPlante, Air Force Chief of Staff General Mark Welsh has made it quite clear the Air Force's top three acquisition priorities going forward are the F-35, the KC-46, and the LRS-B. He has also recently added a replacement for the aging E-8C Joint Surveillance Target Attack Radar System (JSTARS) as another top priority. Considering the effects of sequestration, is it realistic to believe the Air Force will be able to execute current acquisition plans for these major systems?

Dr. LAPLANTE. I believe we will be able to execute the current acquisition plans for the F-35, KC-46, and LRS-B programs in addition to JSTARS. As General Welsh has testified, we must recapitalize the aging fleets these capabilities are targeting. The effects of sequestration will undoubtedly threaten each of our top priority programs and lower priority programs, but the Air Force leadership is committed to ensuring the Service makes the required investments to execute its core missions against the expected threats in the 2023 and beyond timeframe. Budget constraints will make this challenging; however, when faced with difficult choices we will favor recapitalization over modernization, keeping these important programs in the foremost of our priorities. The JSTARS acquisition will take advantage of ma-

ture technology and more efficient commercial airframes to reduce acquisition risk and lifecycle costs.

50. Senator CHAMBLISS. Dr. LaPlante, how do you intend to continue modernizing our Air Force fleet in the face of budget constraints?

Dr. LAPLANTE. There are some things we cannot modernize to keep it viable against the threat after 5 or 10 years. There are some places we have to recapitalize and that is going to take money away from the modernization program, which is being hit by sequestration.

Continuing to modernize the Air Force fleet while living with severe budget constraints requires sound resource execution so we can more effectively stretch the benefit of every dollar with which we are entrusted. Our Secretary of the Air Force has identified as a priority the need to ensure our Air Force remains the most capable in the world at the lowest possible cost. In this environment of declining resources and budget constraints, we must be extremely efficient and effective in how we plan to use, and ultimately spend our scarce fiscal resources.

The Air Force must own the technical baseline for acquisition programs. Strong, stable program offices, augmented by experts and reach-back to the Laboratories, Federally Funded Research and Development Centers and University Affiliated Research Centers are required in order for the government to own the technical baseline. Furthermore, this process must be institutionalized into the life of each program, rather than depending upon our industrial partners to manage technical performance, dictate sustainment solutions and shape evolutionary technical solutions.

I want the Air Force acquisition community to design, develop and field systems for our Air Force that will be resilient to the capabilities of our anticipated peer competitors of 2023 and beyond. To do this we must make smart investment decisions and leverage experimentation and innovation. To ensure Air Force investment solutions and strategies support capabilities that will enable effectiveness in the highly contested domains beyond 2023, the Air Force must position itself through significant science and technology and advance research investments.

We will continue our heightened focus on the high priority programs. I am committed to launching these programs right and keeping them on track. The Air Force currently lists F-35, KC-46 Tanker, LRS-B, and replacement for aging E-8C JSTARS as our top priorities.

JOINT SURVEILLANCE TARGET ATTACK RADAR SYSTEM

51. Senator CHAMBLISS. Dr. LaPlante, how will the Air Force attempt to complete the acquisition of a replacement for JSTARS without compromising what has become a critical intelligence, surveillance, and reconnaissance (ISR) capability?

Dr. LAPLANTE. Although the primary role of JSTARS is Battle Management Command and Control, it also provides critical Ground Moving Target Indicator data to the ISR Enterprise. If a JSTARS replacement program is pursued, the Air Force will continue to maintain and operate the E-8C JSTARS fleet, with fewer aircraft in the short term, to support mission requirements. As the JSTARS replacement aircraft become available, the remaining E-8C legacy fleet will be brought down.

52. Senator CHAMBLISS. Dr. LaPlante, would the Air Force consider standing down legacy aircraft to facilitate paying for new aircraft with the savings generated?

Dr. LAPLANTE. Yes. Sequestration has created a very constrained budget environment for the Air Force, forcing the Service to make some very difficult decisions. During his testimony last year before the Senate, General Welsh discussed as a result of sequestration impacts we have been faced with difficult budget choices. He further stated that in those instances we will favor recapitalization over modernization. As the Air Force leaders make difficult force structure divestiture decisions, they will work to ensure that they are timed such that there will not be a loss of important capability for the warfighter.

53. Senator CHAMBLISS. Dr. LaPlante, what would be the associated risk of such a decision?

Dr. LAPLANTE. The consideration to stand down legacy aircraft in order to facilitate paying for new aircraft with the savings generated, would be approached with a balanced risk perspective. Ultimately, the Air Force would retain a reduced capability to support combatant commanders during the transition period.

54. Senator CHAMBLISS. Dr. LaPlante, is the Air Force totally committed to replacing the JSTARS or might we be looking at another round of upgrades, beyond what is already taking place, to the current fleet?

Dr. LAPLANTE. At this time, the AoA and other supporting analyses support replacing the current E-8C JSTARS.

55. Senator CHAMBLISS. Dr. LaPlante, what would be the impact of an Air Force decision to scrap plans to replace the JSTARS in favor of further upgrades?

Dr. LAPLANTE. Scrapping the JSTARS replacement would commit the Air Force to an aircraft that is likely unaffordable in the long term. Legacy JSTARS operations and sustainment costs are high and are projected to continue to increase. Legacy JSTARS also has a significant bow-wave of needed communications and avionics modernization efforts within the FYDP, with larger bills for modernization of the radar just outside the FYDP. In contrast, recapitalizing the JSTARS fleet will provide the AF with a more cost-effective airframe, a modern sensor, updated communications, and manned Battle Management. A JSTARS replacement ensures affordable dominance of the JSTARS Battle Management and Intelligence, Surveillance, and Reconnaissance mission areas through the 2040s.

56. Senator CHAMBLISS. Dr. LaPlante, what level of involvement has/will combatant commanders and other consumers of J-STAR-provided ISR play in planning for the aircraft's ultimate replacement?

Dr. LAPLANTE. Combatant commanders' (CCDR) requirements are considered throughout the Joint Capability Integration and Development Systems (JCIDS) process of developing the requirement and pursuing the replacement capability for the E-8C JSTARS. Specifically, the CCDR's Operational Plan requirements and Integrated Priorities Lists were reviewed and integrated into the overall requirements development process. Additionally, CCDRs and the military services (as force providers) participate in all Functional Capability Boards and Joint Capability Boards to provide input and concurrence on proposed Capability Development Documents, Capability Production Documents, and Acquisition plans. This coordination ensures awareness and validation that proposed solutions will effectively meet operational needs.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

AIR FORCE AUDITABILITY

57. Senator AYOTTE. Dr. LaPlante, Secretary Hagel said that DOD needs "auditable statements . . . to reassure the public, and Congress, that we are good stewards of public funds." Do you share Secretary Hagel's belief that we need auditable statements to ensure the Air Force is a good steward of our tax dollars—especially in this period of difficult budget cuts?

Dr. LAPLANTE. Yes, I share Secretary Hagel's belief that the Department needs auditable financial statements and I agree that auditable financial statements provide Congress and the American public confidence that the Air Force manages the taxpayer's funds in an efficient and transparent manner. The current budget environment makes this effort even more urgent.

58. Senator AYOTTE. Dr. LaPlante, as required by section 1005 of the National Defense Authorization Act (NDAA) for Fiscal Year 2013, do you understand that submitting an audit-ready statement of budgetary resources by September 30, 2014 is not just a goal, it is the law?

Dr. LAPLANTE. Yes. I fully understand that section 1005 of the NDAA for Fiscal Year 2013 requires an audit-ready Statement of Budgetary Resources. If confirmed, I will actively support DOD and the Secretary of the Air Force's continued focus on financial auditability.

59. Senator AYOTTE. Dr. LaPlante, I am concerned that the Air Force may not be on track to meet the audit deadlines. Do you share this concern?

Dr. LAPLANTE. The Air Force is on a well-designed, albeit aggressive, path to assert audit readiness by the mandated deadline of September 30, 2014. The Air Force plan has been reviewed and integrated with the OSD FIAR plan that integrates the entire DOD business environment but, it is still not without risk. However, the Air Force is seeing successes on the path to audit readiness, to include seven favorable opinions with two more assertions currently under examination. If confirmed, I will

make it a priority to assist in any way I can to ensure the Air Force meets these deadlines.

60. Senator AYOTTE. Dr. LaPlante, what are your greatest challenges in meeting the audit deadlines?

Dr. LAPLANTE. Our biggest challenge will be that the Air Force's current 1960s accounting system does not comply with the Federal requirement to use the standard government general ledger structure of accounts at the detailed, transaction level. The Air Force's ultimate solution to this challenge is to field a modern accounting system, the DEAMS, as quickly as possible. Recent indications are that the system is working pretty well, with dramatic performance improvements in the last year. The interim solution for remediation of shortcomings in the legacy environment is to use a DFAS-developed data analysis tool that sorts and matches data from multiple systems. Furthermore, the Air Force continues to collaborate within the Department to share lessons learned, establish performance measures, and consolidate efforts where applicable. Finally, some of the feeder systems to the financial systems being used are acquisition/contract related systems. If confirmed, those systems will fall within my purview and I will do everything in my power to ensure they are compliant with audit requirements.

61. Senator AYOTTE. Dr. LaPlante, how can Congress help the Air Force in meeting the audit deadlines?

Dr. LAPLANTE. The Air Force is fully committed to meeting the requirement of becoming audit ready. The Air Force has consistently acknowledged to you that is the 2014 audit deadline required an aggressive strategy that is not without risk. We do not consider any one achievement or failure on our path to audit readiness as a defining action. The Air Force is on an aggressive path towards audit readiness and will not relent. Your assistance in implementing a more predictable appropriations cycle free from protracted continuing resolutions or government shut downs would be most helpful. This would minimize the disruption of the government and contractor resources working to make the Air Force audit ready.

A-10

62. Senator AYOTTE. Dr. LaPlante, please provide a detailed, itemized list of how the Air Force has modernized the A-10 since September 11, 2001. The list should clearly delineate the name of the modernization investment, how much was spent on the modernization, the purpose of the modernization investment, and the current status of the modernization investment (e.g. completed or still ongoing). For each of these modernization items, where possible, it should be made clear what kind of life extension the modernization investment was intended to provide. The itemized list should provide the total amount of money spent on A-10 modernization since September 11, 2001. The list should clearly delineate which modernization programs the Air Force has decided to cancel, when this decision was made to cancel the program, and what the rationale was for this decision.

Dr. LAPLANTE. Since 11 September 2001, the Air Force has invested over \$2.85 billion in major modernization for the A-10, for enhanced capabilities, improved sustainment and life extension.

Note: Unless noted, program does not contribute to service life extension. Programs are listed from oldest to current, and reflect funding spent, to date. Estimates provided where actual figures were not available within the time constraint.

Completed Programs:

Program Name: A-10 Service Life Extension Program (SLEP)

Funding: \$786 million, Weapon System Support and National Guard and Reserve Equipment Account (NGREA)

Purpose: To extend service life of legacy wings to 16,000 Equivalent Flying Hours (EFH) to meet Air Combat Command Required Service Life.

Status: Complete. 2004 wing fatigue test results determined maximum life extension of A-10 to ~13,000 EFHs, necessitating A-10 Wing Replacement Program.

Life Extension: Extends legacy thin- and thick-skin wings from original 8,000 EFH service life to 13,000.

Program Name: Embedded Global Positioning System/Inertial Navigation System

Funding: \$39 million, Investment

Purpose: To provide enhanced capabilities to pinpoint location of aircraft and to improve navigation.

Status: Complete.

Program Name: Multi-Function Color Display
 Funding: \$30 million (estimated), NGREA
 Purpose: To provide ANG and AF Reserve aircraft with a moving map capability ahead of deployment of Precision Engagement.
 Status: Complete.

Program Name: Propulsion Upgrade Program
 Funding: \$29 million, Investment
 Purpose: To provide additional thrust at low and medium altitudes to minimize time in high-threat airspace.

Status: Complete. Efforts limited to RDT&E. Fielding estimated to cost >\$2 billion; not implemented.

Program Name: Precision Engagement Program
 Funding: \$546 million, Investment
 Purpose: To bring smart munitions, stores management, situational awareness and enhanced safety to the A-10. Includes aircrew training-related devices.
 Status: Complete.

Program Name: Situational Awareness Data Link
 Funding: \$55 million, Investment
 Purpose: To provide pilots with a more detailed situational picture of the air battle space.
 Status: Complete.

Program Name: Aircraft Protection/Countermeasures Systems
 Funding: \$98 million, Investment
 Purpose: To provide enhanced aircraft and pilot protection in high-threat environments. Includes AAR-47, Countermeasures Dispensing and Infrared Countermeasures programs.
 Status: Complete.

Program Name: Single ARC-210 Secure Line-of-Sight/Beyond Line-of-Sight Radio
 Funding: \$85 million, Investment
 Purpose: Upgrades voice radio for secure line of sight and beyond line-of-sight communications.
 Status: Complete.

Program Name: On-Board Oxygen Generating System
 Funding: \$9 million, Investment
 Purpose: To provide one Active Duty squadron with a self-contained, continuously generating oxygen system.
 Status: Complete.

Program Name: Second ARC-210 Secure Line-of-Sight/Beyond Line-of-Sight Radio
 Funding: \$11 million, NGREA
 Purpose: To upgrade ANG and AF Reserve aircraft with a second secure line-of-sight and beyond line-of-sight (satellite) radio to allow near-instantaneous communications with the ground and command and control assets/locations.
 Status: Complete.

Continuing Programs:

Program Name: Operational Flight Programs (OFP)
 Funding: \$307 million, Weapon System Support and Investment
 Purpose: To provide integration of hardware and software-based capabilities, as well as to perform Post-Fielding Support (sustainment) on the existing aircraft software baseline and maintain a Systems Integration Lab.

Status: Suites 3, 4, 5, 6, 7A, and 7B are fielded. The Secretary of the Air Force directed that Suite 8 development be continued through fiscal year 2014. An organic Systems Integration Lab will be complete in October 2014 at Hill AFB, UT. Post-Fielding Support continues indefinitely.

Program Name: A-10 Wing Replacement Program
 Funding: \$695 million, Investment
 Purpose: To procure a replacement wing for the A-10 based on the existing thick-skin wing with targeted structural enhancements.
 Status: Installs ongoing through fiscal year 2017.
 Life Extension: Allows aircraft to reach 16,000 EFH Required Service Life.

Program Name: Mode S/5
 Funding: \$35 million, Investment
 Purpose: To provide enhanced Identification, Friend or Foe capabilities.
 Status: Mode S is complete. Mode 5 software development is ongoing with the continuation of Suite 8 in fiscal year 2014. Mode 5 FOC mandate is fiscal year 2020.

Program Name: Helmet-Mounted Cueing System

Funding: \$46 million, Investment and NGREA
 Purpose: To provide off-bore sight cueing, targeting and situational awareness to more rapidly engage targets in the battle space.
 Status: Installs ongoing through the first quarter of fiscal year 2015.

Program Name: Lightweight Airborne Radio System V12
 Funding: \$17 million, NGREA
 Purpose: To upgrade ANG and AF Reserve aircraft with an enhanced combat search and rescue radio.
 Status: Installs ongoing through the first quarter of fiscal year 2015.

Program Name: Turbine Engine Monitoring System/Airborne Data Recorder (TEMS/ADR)
 Funding: \$11 million, Investment
 Purpose: To upgrade existing TEMS units to provide enhanced engine monitoring and reporting, as well as flight parameter reporting to assist Aircraft Structural Integrity Program engineers in assessing structural health.
 Status: Installs ongoing through fiscal year 2014.

Program Name: Rapid Innovation Funds
 Funding: \$10 million, Investment
 Purpose: Funds multiple, small studies to meet needs/gaps in A-10 capabilities.
 Status: Ongoing through fiscal year 2014.

Program Name: Portable Aircraft Test System (PATS)-70
 Funding: \$50 million, Investment
 Purpose: To address obsolescence issues with legacy A-10 aircraft testers. Combines multiple legacy testers into a single unit to reduce logistics footprint and ease maintenance burden. Planning follow-on effort via PATS-70A to further consolidate and improve testing capabilities.
 Status: Awaiting Milestone C decision with first fielding projected in April 2014.

Program Name: On-Board Oxygen Generating System
 Funding: \$4 million (estimated), NGREA
 Purpose: To provide Air Force Reserve aircraft with a self-contained, continuously generating oxygen system.
 Status: Installs begin in fiscal year 2014.

Program Name: Aircraft Parking Brake
 Funding: \$4 million, NGREA
 Purpose: To provide ANG and Air Force Reserve aircraft with an aircraft parking brake.
 Status: Acquisition and source selection ongoing with first installs planned in fiscal year 2014.

Program Name: Covert Overt Lighting Assembly
 Funding: \$1.5 million, NGREA
 Purpose: To provide ANG and AF Reserve aircraft with landing lights compatible with night vision (covert) and traditional (overt) operations.
 Status: Acquisition and source selection ongoing.

63. Senator AYOTTE. Dr. LaPlante, is it true that Air Combat Command has issued an official notification to cease Suite 8 development immediately with the exception of work required to preserve and store Suite 8 work to date?

Dr. LAPLANTE. The Secretary of the Air Force directed that Suite 8 development be continued through fiscal year 2014.

64. Senator AYOTTE. Dr. LaPlante, if this is accurate, what impact will this have on the ability to conduct future subsystem modernization?

Dr. LAPLANTE. As previously stated, the Air Force will continue development of OFP Suite 8 through fiscal year 2014. Also, in order to facilitate integration of required software updates, the Air Force is standing up an organic software integration laboratory (SIL). The SIL will provide us the ability to make software updates and modifications as required.

65. Senator AYOTTE. Dr. LaPlante, the Operational Flight Program (OFP) provides the mechanism to drive the central computer and its interface with many subsystems. Any updates to existing hardware or software within these subsystems require an OFP update. Does this decision represent a decision to end all future A-10 modernization efforts?

Dr. LAPLANTE. As previously stated, the Air Force will continue development of OFP Suite 8 through fiscal year 2014.

66. Senator AYOTTE. Dr. LaPlante, do you believe this action violates section 143 of the NDAA for fiscal year 2014 that prohibits DOD from using any funds to “prepare to retire” the A-10?

Dr. LAPLANTE. Because the Secretary of the Air Force has directed that development of OFP Suite 8 continue through fiscal year 2014, we believe this issue to be moot.

67. Senator AYOTTE. Dr. LaPlante, what are the operating costs per hour for the A-10, compared to the F-15E, F-16, B-1, AC-130, and B-52?

Dr. LAPLANTE. The Operational Cost Per Fly Hour (OCPFH) is a historically based metric from the Air Force Total Ownership Cost (AFTOC) system that provides visibility into the total cost to operate an aircraft during a specific year. The OCPFH is calculated by dividing the total operating and sustainment costs (excluding hardware modifications) associated with a weapon system by the total flying hours flown in the same year. The following represents the fiscal year 2013 OCPFH (TY\$):

A-10	\$17,398
F-15E	\$37,504
F-16	\$22,954
B-1	\$54,218
AC-130	\$37,492
B-52	\$67,475

AIR FORCE ACQUISITION PROGRAMS

68. Senator AYOTTE. Dr. LaPlante, please provide a list of all canceled acquisition category (ACAT) 1, 1A, and 2 Air Force acquisition programs since September 11, 2001, in which the Air Force did not end up procuring the item. The list should include how much the Air Force spent on the program before it was canceled.

Dr. LAPLANTE. There are 12 Air Force acquisition programs (5 ACAT I, 4 ACAT IA, and 3 ACAT II) since September 11, 2001, in which the Air Force did not procure the item.

[In millions of dollars]

Name	Reviewed Status	Amount Spend Prior to Canx	Full Name	Type	ACAT
AFNet Inc 2	Terminated-2013 (TY\$).	29.1	Air Force Intranet Increment 2 (AFNet Inc 2)		IAC
AFNet Inc 3	Terminated-2013 (TY\$).	29.8	Air Force Intranet Increment 3 (AFNet Inc 3)		IAC

GEMS	Terminated-2011 (TY\$).	281.3	Ground Element Minimum Essential Emergency Communications Network (MEECN) System.		II

69. Senator AYOTTE. Dr. LaPlante, please provide a list of all ACAT 1, 1A, and 2 Air Force acquisition programs since September 11, 2001, in which the program costs were more than 25 percent greater than initial cost estimates. The list should

include the initial cost estimate, how much the program ended up costing, and the difference between the two.

Dr. LAPLANTE. Answer:

ACAT	Program	Completed	Initial Qty	Final Qty	Initial Total Acq		Diff (\$M)	Percentage
					Cost Estimate (\$M)	Final Total Acq Cost (\$M)		
	ASIP (BY2010)	2010	4	4	\$ 539.60	\$ 538.90	\$ (0.70)	-0.13%
	AWACS RSIP (E-3) (BY1990)	2003	33	32	\$ 437.00	\$ 929.88	\$ 492.88	112.79%
	B-1B CMUP (BY1996)	2004			\$ 938.50	\$ 652.70	\$ (285.80)	-30.45%
	B-2 RMP (BY2004)	2011			\$ 1,148.40	\$ 1,211.80	\$ 63.40	5.52%
	C-17A (BY1996)	2010	210	223	\$ 41,250.90	\$ 64,310.70	\$ 23,059.80	55.90%
	C-5 AMP (BY2006)	2010	61	80	\$ 888.40	\$ 1,160.00	\$ 271.60	30.57%
	F-22 (BY1990 - Includes Baseline program through Increment 3.2.)	2010	648	188	\$ 60,270.00	\$ 52,102.91	\$ (8,167.09)	-13.55%
	JPAT5 (BY1993)	2013	766	752	\$ 4,862.30	\$ 2,487.94	\$ (2,374.36)	-48.83%
	JSTARS (BY1990)	2003	91	18	\$ 5,293.30	\$ 8,302.05	\$ 3,008.75	56.84%
I	LAIRCM (BY2008)	2011	8	8	\$ 457.00	\$ 436.60	\$ (20.40)	-4.46%
	MINUTEMAN III GRP (BY1993)	2008	652	652	\$ 1,463.60	\$ 2,095.40	\$ 631.80	43.17%
	MINUTEMAN III PRP (BY1994)	2009	607	601	\$ 2,086.80	\$ 2,190.90	\$ 104.10	4.99%
	MP-RTIP (BY2000)	2011	0	0	\$ 1,910.00	\$ 1,158.90	\$ (751.10)	-39.32%

AIR FORCE CIVILIAN PERSONNEL

70. Senator AYOTTE. Dr. LaPlante, how many Air Force civilians does the Air Force currently employ? What was this number in 2010, 2011, 2012, and 2013? What was this number on September 11, 2001?

Dr. LAPLANTE. The number of Air Force full-time U.S. (appropriated funded) civilians employed by end of fiscal year:

2010	139,428
2011	147,861
2012	143,351
2013	141,253

The number of Air Force full-time U.S. civilians employed on September 11, 2001 was 140,425.

71. Senator AYOTTE. Dr. LaPlante, how has the total number of Air Force civilians changed annually over this period (2010 to present) compared to the total number of uniformed Air Force end strength, i.e. provide the annual total Air Force civilian number for 2010 to present, as well as the same number for uniformed personnel?

Dr. LAPLANTE. The data below reflects the inventory of Air Force full-time U.S. (appropriated funded) civilians and Active Duty military personnel (includes officer, enlisted, and cadets) as of the end of each fiscal year.

Fiscal Year	Civilian	Military
2010	139,428	333,113
2011	147,861	333,243
2012	143,351	331,880
2013	141,253	332,320

72. Senator AYOTTE. Dr. LaPlante, how many Air Force civilians serve in each major command?

Dr. LAPLANTE. The number of U.S. full-time (appropriated funded) civilians at the end of fiscal year 2013 for each major command (Excludes Field Operating Agencies, Direct Reporting Units, Air National Guard or HQ USAF).

Air Combat Command (ACC)	9,899
Air Education and Training Command (AETC)	14,196
Air Force Global Strike Command (AFGSC)	2,391
Air Force Materiel Command (AFMC)	59,146
Air Mobility Command (AMC)	8,017
Air Force Reserve Command (AFRC)	12,768
Air Force Space Command (AFSPC)	7,317
Air Force Special Ops Command (AFSOC)	1,518
Pacific Air Forces (PACAF)	3,058
U.S. Air Forces Europe (USAFE)	1,667
Total	119,977

73. Senator AYOTTE. Dr. LaPlante, how many of these Air Force civilians serve in the area of acquisitions?

Dr. LAPLANTE. As of September 30, 2013, there were 24,993 Air Force civilian personnel serving in acquisition positions throughout the Air Force such as program management, contracting, engineering and science, product support/life cycle logistics and T&E.

74. Senator AYOTTE. Dr. LaPlante, how many of these civilians serve in headquarters elements?

Dr. LAPLANTE. As of September 30, 2013, there were 762 Air Force civilian personnel serving in management headquarters acquisition positions throughout the Air Force.

75. Senator AYOTTE. Dr. LaPlante, how many of these civilians serve in Headquarters, Department of the Air Force?

Dr. LAPLANTE. As of September 30, 2013, there were 223 Air Force civilian personnel serving in Headquarters USAF acquisition positions.

QUESTIONS SUBMITTED BY SENATOR MIKE LEE

AIR FORCE ACQUISITION

76. Senator LEE. Dr. LaPlante, there have been many reports in the press in the past month regarding the cost of the F-35 and efforts of both DOD and the contractors to bring these costs down. The program manager at Lockheed Martin stated that the cost of an F-35A would be around \$75 million by 2019. What do you believe needs to be done to make these cost projections realistic?

Dr. LAPLANTE. The F-35 JPO, in collaboration with the contractors, must continue to study and pursue affordability measures that further reduce costs. The F-35 JPO has already made significant progress in reducing the production cost of the aircraft. Lot over lot, the unit cost of the F-35 aircraft continues to come down. As an example, the average aircraft unit recurring flyaway decreased 3.2 percent from low rate initial production (LRIP) Lots 5 to 6 and 4.7 percent between LRIP lots 6 and 7. More work needs to be done and if confirmed I will work closely with the Navy SAE and USD(AT&L) to continue reducing the F-35A fly-away cost.

77. Senator LEE. Dr. LaPlante, what do you believe should be done to lower not just the acquisition costs of these aircraft but bring down the lifecycle costs as well?

Dr. LAPLANTE. The F-35 JPO and the contractors are already working on ways to lower the lifecycle costs of the program. Some of the affordability initiatives being pursued include the stand-up of a Cost War Room manned by F-35 JPO, Lockheed Martin, and Pratt & Whitney personnel; injecting competition into long-term sustainment based on Industry Day discussions (support equipment, global supply chain, training center operations); establishing an affordability database containing items for evaluation; and exploring contract efficiencies. In addition, the F-35 JPO is analyzing other ways to reduce costs such as obtaining technical data and data rights where it is cost effective to do so; streamlining the supply chain; implementing efficiencies in the assembly line; eliminating production scrap, rework, and repair; and implementing process improvements.

78. Senator LEE. Dr. LaPlante, what are your biggest acquisition priorities for the Air Force?

Dr. LAPLANTE. My five biggest acquisition priorities for the Air Force acquisition community are:

First, continue our heightened focus on the high priority programs. I am committed to launching these programs right and keeping them on track. The Air Force currently lists F-35, KC-46 Tanker, LRS-B, and replacement for aging E-8C JSTARS as our top priorities.

Second, continuously improve relationships and transparency with stakeholders, including the USD(AT&L), Capitol Hill, Industry, and the Laboratories. Through regular meetings, briefings, and other discussions, I will lead by example, and require our acquisition workforce to share the Air Force message with our stakeholders to help promote a culture of transparency.

Third, the Air Force must own the technical baseline for acquisition programs. Strong, stable program offices, augmented by experts and reach-back to the Laboratories, Federally Funded Research and Development Centers and University Affiliated Research Centers are required in order for the government to own the technical baseline. Furthermore, this process must be institutionalized into the life of each program, rather than depending upon our industrial partners to manage technical performance, dictate sustainment solutions and shape evolutionary technical solutions.

Fourth, in concert with OSD, I will continue to implement highest impact BBP 2.0 initiatives as my fourth acquisition priority. Included in this goal are implementing "should cost," building strong partnerships with requirements, employing appropriate contract types, eliminating unproductive processes and bureaucracy, enforcing open system architectures and effectively managing data rights, improving the acquisition of Services outside traditional acquisition, ensuring technical development is used for true risk reduction, increasing the cost consciousness of the workforce, and increasing small business roles and opportunities.

Finally, I want the Air Force acquisition community to design, develop and field systems for our Air Force that will be resilient to the capabilities of our anticipated peer competitors of 2023 and beyond. To do this we must make smart investment decisions and leverage experimentation and innovation. To ensure Air Force investment solutions and strategies support capabilities that will enable effectiveness in the highly contested domains beyond 2023, the Air Force must position itself through significant science and technology and advance research investments. Our program office personnel must be versed in cost and capability tradeoffs and analyses, and dedicated to should cost and other efficiency initiatives to generate savings for reinvestment. The result will be that all Air Force systems and capabilities will be able to operate through degraded conditions, including contested environments, and can withstand operational and engineered challenges in a variety of environments, including cyber, electronic warfare and space.

79. Senator LEE. Dr. LaPlante, how do you plan to balance the need to acquire the best quality equipment while finding areas to save money in the budget?

Dr. LAPLANTE. I have a commitment to the warfighter to acquire the best quality equipment and to the American taxpayers, minimize costs; and I plan to balance those priorities. In my current position, I have stressed how requirements can drive cost, with the intent of guiding the community, to evaluate how changing or reducing a requirement, even slightly, can have significant cost ramifications.

Cost/schedule versus capability trade-off curves are a valuable tool in identifying which requirements are key cost drivers and can assist in the assessment of which requirements can be reduced. The CSBs and the Air Force Requirements Oversight Council (AFROC) provide two forums to evaluate requirements priorities and trade-offs, and while the AFROC has been essential to this task, I am seeking to increase the effectiveness of CSBs in this regard. Finally, the acquisition community has demonstrated its commitment to cultivating a strong working relationship with the requirements community, and the teamwork between acquisitions and requirements will continue to pay dividends as we face a challenging future.

[The nomination reference of Dr. William A. LaPlante, Jr., follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 6, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

William A. LaPlante, Jr., of Maryland, to be Assistant Secretary of the Air Force, vice Sue C. Payton.

[The biographical sketch of Dr. William A. LaPlante, Jr., which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. WILLIAM A. LAPLANTE, JR.

Dr. William A. LaPlante, Jr., is the Principal Deputy, Assistant Secretary of the Air Force (Acquisition), Washington, DC. He is the senior civilian assistant to the Assistant Secretary of the Air Force (Acquisition). His duties include providing expert advice and guidance on Air Force acquisition programs and procurements. Dr. LaPlante is also responsible for development and execution of policies and procedures in support of the operation and improvement of the Air Force's acquisition system. He oversees an Air Force research and development, test, production, and modernization program portfolio of over \$40 billion annually.

Dr. LaPlante has more than 28 years of experience in defense technology including positions at the MITRE Corporation and the Johns Hopkins University Applied Physics Laboratory. He has also served on the Defense Science Board (DSB), U.S. Strategic Command (STRATCOM) Senior Advisory Group and Naval Research Advisory Committee. He has also taught as an adjunct lecturer in the Department of Mechanical Engineering at the Catholic University of America.

Prior to entering public service, Dr. LaPlante was the Missile Defense Portfolio Director for the MITRE Corporation. In this role, Dr. LaPlante led a technical team providing analytic and system engineering expertise across the Missile Defense Agency portfolio of ballistic missile defense systems. Previously, he was the Department Head for Global Engagement at the Johns Hopkins University Applied Physics Laboratory (APL) where he was responsible for all of APL's work supporting offensive military capabilities. Dr. LaPlante was a member of APL's Executive Council and served on many other Laboratory leadership initiatives. His earlier APL work included Associate Department Head of the National Security Technology Department and Program Area Manager for the Strategic Submarine Security Program.

Dr. LaPlante has also served on numerous prestigious scientific boards. He was appointed to the Defense Science Board in 2010 where he co-chaired a study on Enhancing the Adaptability of U.S. Military Forces and participated in studies on technology and innovation enablers, missile defense, cyber resiliency and contractor logistics. Dr. LaPlante chaired a Commander, STRATCOM Strategic Advisory Group study on nuclear planning factors and participated in various studies sponsored by the National Academy of Sciences, the Naval Research Advisory Committee, STRATCOM and the Office of the Secretary of Defense (Acquisition, Technology, and Logistics).

Education

1985 - Bachelor of Science degree in engineering physics, University of Illinois
 1988 - Master of Science degree in applied physics, Johns Hopkins University
 1998 - Doctorate in mechanical engineering, Catholic University of America

Career Chronology

1985, Began career at Johns Hopkins University Applied Physics Laboratory, Laurel, MD

1993–1998, Chief Scientist and Technical Director for several large at-sea submarine security experiments, Johns Hopkins University Applied Physics Laboratory, Laurel, MD

1998–2001, Program Area Manager for the Strategic Submarine (SSBN) Security Program, Johns Hopkins University Applied Physics Laboratory, Laurel, MD

2001–2003, Business Area Executive for Undersea Warfare and Associate Department Head, National Security Technology Department (Undersea Warfare, Homeland Security, and Biomedicine), Johns Hopkins University Applied Physics Laboratory, Laurel, MD

2003–2011, Department Head, Global Engagement Department, Johns Hopkins University Applied Physics Laboratory, Laurel, MD

2011–2013, Missile Defense Portfolio Director, MITRE Corporation, Mclean, VA

2013–present, Principal Deputy Assistant Secretary of the Air Force (Acquisition), Washington, DC

Other Achievements

Defense Science Board Member
 STRATCOM Strategic Advisory Group Member
 Lecturer, Department of Mechanical Engineering, Catholic University of America

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate, and certain senior military officers as determined by the committee, to complete a form that details the biographical, financial and other information of the nominee. The form executed by Dr. William A. LaPlante, Jr., in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228
 Washington, DC 20510-6050
 (202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
 BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
 William Albert LaPlante, Jr.
2. **Position to which nominated:**
 Assistant Secretary of the Air Force (Acquisition).
3. **Date of nomination:**
 October 30, 2013.
4. **Address:** (List current place of residence and office addresses.)
 [Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
 October 9, 1963; Philadelphia, PA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
 Married to Joanne Marie Hogan.
7. **Names and ages of children:**
 Claire LaPlante, 19
 Caroline LaPlante, 14
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
 University of Illinois at Urbana-Champaign, 1985, B.S. Engineering Physics
 Johns Hopkins University, 1988, M.S. Applied Physics
 Catholic University of America, 1998, Ph.D. Mechanical Engineering
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

May 2013–Present: Principal Deputy Assistant Secretary of the Air Force (Acquisition), U.S. Air Force, Pentagon, Washington DC

May 2011–May 2013: Missile Defense Portfolio Director, MITRE Corporation, McLean, VA

1985–April 2011: Department Head, Global Engagement, Johns Hopkins Applied Physics Laboratory, Laurel, MD

Aug. 1998–May 2013: Lecturer, Department of Mechanical Engineering, Catholic University of America, Washington, DC

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Member, Defense Science Board, 1/2010–5/2013

Advisor, U.S. Strategic Command Advisory Group, 2005–2013

Member, National Academies Committee on Distributed Remote Sensors for Undersea Warfare, 2005–2007

Member, Naval Research Advisory Council Committee on Protection of Critical Undersea Infrastructure, 2007–2009

Member, Strategic Systems Steering Task Group, 2003–2011

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None (no positions held with fiduciary or governance responsibilities).

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member - American Society of Mechanical Engineers

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

None.

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

2002 - Journal of Vibration and Control, "Active Control of Vibration and Noise Reduction from Fluid-Loaded Cylinder using Active Constrained Layer Damping."

2006 - Report of the Defense Science Board, "Information Management for Net Centric Operations." Vol. I and II.

2007 - Committee on Distributed Remote Sensing for Naval Undersea Warfare, Naval Studies Board, Division on Engineering and Physical Sciences, National Research Council of the National Academies, "Distributed Remote Sensing for Naval Undersea Warfare."

2009 - Report of the Defense Science Board, "Time Critical Conventional Strike from Strategic Standoff."

2010 - Report of the Defense Science Board, "Enhancing Adaptability of U.S. Military Forces." Part A and B.

2011 - Report of the Defense Science Board, "Science and Technology Issues of Early Intercept Ballistic Missile Defense Feasibility."

16. Speeches: Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Spoke at National Defense Industrial Association (NDIA) Gulf Coast Chapter Air Armament Symposium on November 5, 2013. No written speech was prepared and no transcript was taken.

17. Commitments regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

- Yes.
- (b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?
No.
- (c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?
Yes.
- (d) Will you cooperate in providing witnesses and briefers in response to congressional requests?
Yes.
- (e) Will those witnesses be protected from reprisal for their testimony or briefings?
Yes.
- (f) Do you agree, if confirmed, to appear and testify upon request before this committee?
Yes.
- (g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?
Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

WILLIAM A. LAPLANTE, JR.

This 17th day of December, 2013.

[The nomination of Dr. William A. LaPlante, Jr., was reported to the Senate by Chairman Levin on January 28, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 12, 2014.]

NOMINATIONS OF HON. ROBERT O. WORK TO BE DEPUTY SECRETARY OF DEFENSE; HON. MICHAEL J. McCORD TO BE UNDER SECRETARY OF DEFENSE (COMPTROLLER); MS. CHRISTINE E. WORMUTH TO BE UNDER SECRETARY OF DEFENSE FOR POLICY; MR. BRIAN P. McKEON TO BE PRINCIPAL DEPUTY UNDER SECRETARY OF DEFENSE FOR POLICY; HON. DAVID B. SHEAR TO BE ASSISTANT SECRETARY OF DEFENSE FOR ASIAN AND PACIFIC SECURITY AFFAIRS; AND MR. ERIC ROSENBAACH TO BE ASSISTANT SECRETARY OF DEFENSE FOR HOMELAND DEFENSE

TUESDAY, FEBRUARY 25, 2014

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:05 a.m. in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, McCaskill, Manchin, Shaheen, Gillibrand, Blumenthal, Donnelly, Kaine, King, Inhofe, McCain, Sessions, Wicker, Ayotte, and Fischer.

Other Senators present: Senators Nunn and Warner.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nominations of Robert Work to be Deputy Secretary of Defense; Michael McCord to be Under Secretary of Defense, Comptroller; Christine Wormuth to be Under Secretary of Defense for Policy; Brian McKeon to be Principal Deputy Under Secretary of Defense for Policy; David Shear to be Assistant Secretary of Defense for Asian and Pacific Security Affairs; and Eric Rosenbach to be Assistant Secretary of Defense for Homeland Defense.

I thank everybody for their understanding of the scheduling difficulties that we faced between last week's snowstorm and this

morning's floor votes and the need to shift the hearing to a 9 o'clock start.

We welcome our nominees and their families. We thank them for the support that those families provide to our nominees. Our nominees should feel free, during their opening statements, to introduce the family members who are here to support them today.

We're also delighted, all of us, to welcome back two dear friends and former chairmen of this committee, Senators Nunn and Warner. They're here to introduce two of our nominees.

Senators Nunn and Warner have an extraordinary record of public service, including, between the two of them, more than 50 years of service on this committee. By the way, Senator Warner first appeared before this committee 45 years ago, almost to the day, for a February 6, 1969, hearing on his nomination to the position of Under Secretary of the Navy.

Now, I'm not exactly sure why our nominees here this morning, all stood until the gavel banged. That's never happened before. I finally figured it out. It's because Senators Warner and Nunn were here. I think it's in your honor, not in ours, that we saw our nominees standing here this morning. In any rate, we're all delighted to have you back here with us.

Mr. Work is well known to us from his service as Under Secretary of the Navy from 2009 to 2013.

Mr. McCord has spent almost 30 years in service to our country, including 5 years as the Department of Defense's (DOD) Deputy Comptroller; before that, of course, Mike spent 21 years on the staff of this committee, and many of us remember his great expertise, his work ethic, and his commitment. They qualify him well for this job.

Ms. Wormuth has served in senior national security positions in the executive branch from 1996 to 2002 and from 2009 to the present; most recently, as Special Assistant to the President for Defense Policy and Strategy, and as Deputy Under Secretary of Defense for Strategy, Plans, and Force Development.

Mr. McKeon has spent the majority of his 29-year career in national security affairs, including 12 years on the professional staff of the Senate Foreign Relations Committee, and he is currently the Executive Secretary and Chief of Staff of the National Security Council.

Mr. Shear spent his 31-year career in the Foreign Service and serves currently as U.S. Ambassador to Vietnam.

Mr. Rosenbach has held a variety of national security-related positions in academia and in the private sector, and has served our country as an intelligence officer in the Army, as a professional staff member of the Senate Select Committee on Intelligence, and as the Deputy Assistant Secretary of Defense for Cyber Policy.

The security challenges that we face as a Nation are complex, and they're growing. Our nominees are going to be asked to help manage them in a time of decreased budgetary resources and increased budgetary uncertainty. I believe they're all well qualified to do just that.

Senator Inhofe.

STATEMENT OF SENATOR JAMES M. INHOFE

Senator INHOFE. Thank you, Mr. Chairman.

I'd echo the same remarks about Senator Warner and Senator Nunn. Nice to have you back. You haven't changed a bit, either one of you.

The Director of National Intelligence (DNI) Clapper stated, on February 12, "Looking back over my now more than a half century in intelligence, I've not experienced a time when we've been beset by more crises and threats around the globe." Based on what I've seen and heard in many travels over the years, I think that's exactly right. Yet, over the last few years, massive cuts to our military, our national security, including half a trillion dollars cut before sequestration took effect have resulted in deep decline in military readiness and capabilities.

We know what's happened to the Navy and the Air Force and the Army, in terms of the cuts in end strength. It's something that's disturbing. I think, particularly the speech that was made yesterday by Secretary Hagel. I'm going to read one of the quotes that I wrote down. He said, "American dominance on the seas, in the skies, and in space can no longer be taken for granted." I never thought I'd see that, but, that was the statement. Even though the recent budget deal provides some minor sequester relief, our military is still subject to nearly \$77 billion in sequester cuts in 2014 and 2015. Protecting the United States is more than just the resource levels, however. Resourcing must directly address the threats that we face using an effective and comprehensive strategy. Instead, the President and his administration continue to base their strategy and justify cutting national security spending on the naive world view that, "the tide of the war is receding" and "al Qaeda is on the run and on a path to defeat". If you look across the Middle East and northern Africa, we know better than that. Even the top intelligence official, Director Clapper, told us, during testimony, that al Qaeda isn't on the run and, instead, is morphing and franchising. Tragically, this is what happens when strategy is driven by hope rather than reality.

We've talked about this before, and I won't go into any detail now, as I was going to, but, in terms of the defense acquisition process, making sense of a convoluted and cumbersome acquisition process and instituting commonsense reforms will be a vital step towards maximizing taxpayer dollars and delivering necessary technology, on budget and on schedule.

I'm also deeply concerned about recent headlines that depict ethical and leadership failings of some of our military leaders. I know firsthand that the vast majority of our military cadre are strong and ethical leaders who serve our Nation with distinction. However, the failings of some have the potential to undermine the service of the rest.

I expect the Secretary of Defense, the Chairman of the Joint Chiefs, and all of the senior officers to renew their commitment to integrity and to firmly address failures in a transparent manner. If confirmed, the nominees today will be responsible for addressing these challenges. I look forward to the hearing.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Senator Inhofe.

We're first going to call on Senator Warner, who's going to be introducing the nominee for Deputy Secretary, and then we're going to turn over to Senator Nunn to introduce Mr. McCord.

John Warner, welcome.

**STATEMENT OF HON. JOHN WARNER, FORMER U.S. SENATOR
FROM THE STATE OF VIRGINIA**

Senator WARNER. I thank you, Mr. Chairman, distinguished ranking member, and colleagues and friends of many, many years. It's a special occasion for me, and I thank the chair for his thoughtful recollection that 45 years ago I did appear here. It's the symbolism of the wonderful Nation that we have and are preserving today to give the opportunity to people for public service. My Nation has been more than generous to me in that opportunity to have public service.

We're here today, my friend Sam Nunn and I, to introduce two individuals, one of whom I associate myself with your remarks, even though I haven't read them about Mike McCord. [Laughter.]

Mr. McCord served on our committee 21 years, and did a marvelous job, and he's here today with his family.

Bob Work, I've come to know, because he was, by parallel, Under Secretary of the Navy, the position I held under Melvin Laird and David Packard. As I reflected last night on the Laird-Packard team, Bob Work is much like David Packard. Packard founded Hewlett-Packard. Bob Work spent 27 years in the U.S. Marine Corps, advancing through all the positions of officer. He was number two in his basic class. I hasten to mention, I was in the Marine Corps, but I didn't rank number two. He was number one in his field artillery class. I went to communications school, and again, I was not number one. We have one parallel; we both served as Under Secretary. But, his career is far more distinguished in uniform than mine. He went on to take over positions of his skill, for which he was known in the Marine Corps, as an absolute expert analyst, an absolute hands-on manager. He carried those learning experiences of the Marine Corps right straight through as Under Secretary of the Navy.

There's an old saying in our business, Is this person a workhorse or a show horse? I don't know about his showmanship, but I do know that Bob Work is a workhorse. He's well known. His writings are prolific on the subjects of military, the most arcane aspects of our military. He's well known on taking on budgets. Given the dramatic announcements by the Secretary of Defense yesterday and the goals that the administration has set for the Defense Department, Bob Work and, I believe, Mike McCord, are the two right individuals to be in partnership with Secretary of Defense Hagel and get this job done.

Gentlemen of the committee and ladies of the committee, I thank you for the privilege of appearing this morning. I've rarely seen—and I examined the biographic achievement of all these nominees—a better qualified group to come before the Senate and seek confirmation and to serve in public service. On behalf of the men and women of the Armed Forces, I would simply say, in the case of Bob Work, that we're very pleased, Bob, that you and your lovely wife have reenlisted.

Thank you very much.
 Chairman LEVIN. Thank you so much, Senator Warner.
 Senator Nunn.

**STATEMENT OF HON. SAM NUNN, FORMER U.S. SENATOR
 FROM THE STATE OF GEORGIA**

Senator NUNN. Thank you very much, Mr. Chairman. Thank you, Mr. Chairman, Senator Inhofe, Senator McCain, Senator Reed, other members of the committee. I'm delighted and honored to be here.

I associate myself with the remarks of Senator Warner about Bob Work, and all of these nominees. I'm here to introduce a member of the Senate Armed Services Committee staff, as has been mentioned, for 21 years, Mike McCord. I'm very, very proud to have a chance to be with Mike and to meet his new bride and to see his family, and to be with all the members of the committee.

Being here with Senator Warner does bring back a lot of memories. One of those memories that I have so vividly was an individual by the name of Ed Braswell. I just received notice yesterday that Ed died, in the last couple of days, and I have certainly been in touch with his family. But, Ed served this committee with distinction as the chief of staff—general counsel, we called the leader, back in those days, of the staff. It reminded me of Ed's tremendous service to the committee and to the Senate and to the Nation, and it also reminded me of the work we often take for granted of all of our staff people that have done such a tremendous job in the last 40 years while I followed this committee, and even before that, in, basically, putting the security of our Nation first. I thank Ed for his service, and certainly, Mr. Chairman, I would hope someone would put something in the record about Ed's service, because he was indeed a tremendous leader here, a man of great, great integrity.

Senator WARNER. May I associate myself with the remarks about Ed Braswell? I remember him very well, as we all did. He exemplified the type of person that joins the staff of the Senate Armed Services Committee. He set the gold standard.

Senator NUNN. That's exactly right.

Mr. Chairman, I have a great pleasure of introducing Mike McCord today. Mike currently serves as the DOD's Deputy Comptroller, a position he's held for approximately 5 years. He's fully prepared for his critical role, if he is confirmed, as our Nation's Under Secretary of Defense, Comptroller.

Mike is well-known to the committee, having served 21 years here. Mike joined the Senate Armed Services Committee staff when I became chairman in 1987. He was recruited by a couple of people that I know that Senator McCain and Senator Levin and other members of this committee may recall, and that's Arnold Punaro and John Hamre. Of course, John went on from a position that Mike has been nominated for, as Comptroller, to be the Deputy Secretary of Defense, and now Chair of the Center for Strategic and International Studies, and he's served our country with great distinction.

Mike, John's path is a pretty good one to follow, there, and you're doing it with tremendous skills.

I believe our Nation is fortunate to have a nominee with the experience, the knowledge, and the credibility that Mike brings to this position, particularly at a critical time for the Department of Defense budget, as you all know.

First, Mike brings a background and spirit of nonpartisanship and a long history of working both sides of the aisle. While at this committee, he served more than 10 years in the majority and more than 10 years in the minority. He served under four chairmen—Senator Thurmond, Senator Warner, Senator Levin, and myself. At the Defense Department, he served under both political party Secretaries, Bob Gates, Leon Panetta, and Chuck Hagel. He's worked in the same nonpartisan fashion over the years with both the Budget Committee and the Appropriations Committee, two other key committees, where he has built respect and goodwill.

Second point is that Mike has served our Nation for almost 30 years in a number of critical national security and budgetary positions. His career spans from the last years of the Cold War through the fall of the Berlin Wall, Operation Desert Storm, the post-Cold War drawdowns of the 1990s, Bosnia and Kosovo, September 11, as well as our wars in Iraq and Afghanistan. Mike has seen build-ups, he's seen wars, and he's seen drawdowns at the conclusion of wars.

Mike was a key member of this staff during the turbulent years of the post-Cold War period when our budgets—not only our budgets, but indeed our strategic views and map of the world was rearranged. While here at the Armed Services Committee, his oversight responsibilities included defense budget matters, oversight of the Department's Quadrennial Defense Review, supplemental funding for contingent operations and natural disasters, ensuring compliance with discretionary and mandatory spending targets, and advising the committee on fiscal and budget policy issues.

During our work together on this committee when I was chairman, Mike also exhibited his deep understanding of our broader fiscal challenges in his work with me on entitlement, spending caps, and budget resolutions over many years. We all know the Defense Department's place in the overall budget is enormously important, but it gets squeezed in many directions because of other matters beyond the Defense Department. Mike's knowledge there, I think, will serve his position as Comptroller very well.

In his current role as Deputy Comptroller, Mike provides guidance to the Comptroller, the Secretary of Defense, and the Deputy Secretary of Defense on all budget, fiscal, and financial management matters. He's a member of numerous senior-level decision-making bodies inside the Department on budget, program, strategy, financial management, and legislative matters.

In conclusion, Mr. Chairman, with Mike's depth of experience and leadership skills, I can't think of anyone who's better prepared or equipped to serve our Nation as the Department of Defense's Comptroller. The committee wisely confirmed Michael McCord several years ago for his current position, and I urge you to do so again, and I urge his confirmation by the full Senate.

Thank you.

Chairman LEVIN. Thank you so much, Senator Nunn.

Both you and Senator Warner's words mean, I know, a great deal to the nominees and to this committee, and we appreciate your being here. We're privileged to be in your presence, as always. We look forward to many, many future years of being associated with both of you in some way or another.

Of course, you have busy lives to lead and schedules to follow, so you're free to leave, should you deem fit, at any time.

Senator WARNER. Mr. Chairman, if I could just add a word about Bob Work. I dwelled on the Marine Corps, because of personal reasons, with him. But, he went on into the private sector to do extensive analytical work, and is now Chief Executive Officer of the Center for New American Security. We worked very closely together, both when he was Under Secretary and in his new position. Again, this man looks into the future and is able to make the tough decisions and priorities that are facing this Department right now.

Chairman LEVIN. Thank you again. Thank you both.

We're going to be calling on the witnesses, for their opening comments and any introductions that they wish to make, in the order that they're listed on the notice of this hearing. Before that, though, I will ask all of you to answer, at one time, the following questions, which are standard questions we ask of all our civilian nominees:

Have you adhered to applicable laws and regulations governing conflicts of interest?

[All six witnesses answered in the affirmative.]

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

[All six witnesses answered in the negative.]

Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record in hearings?

[All six witnesses answered in the affirmative.]

Will you cooperate in providing witnesses and briefers in response to congressional requests?

[All six witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings?

[All six witnesses answered in the affirmative.]

Do you agree, if confirmed, to appear and testify, upon request, before this committee?

[All six witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly-constituted committee, or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

[All six witnesses answered in the affirmative.]

Thank you very much.

First, we will call upon Mr. Work.

**STATEMENT OF HON. ROBERT O. WORK, TO BE DEPUTY
SECRETARY OF DEFENSE**

Mr. WORK. Thank you very much, Mr. Chairman.

Chairman Levin, Ranking Member Inhofe, distinguished members of the committee, I'm really honored to appear before you today as President Obama's nominee as the Deputy Secretary of Defense. I firmly believe there is no higher calling than serving one's nation, and I am deeply humbled by the confidence that the President and Secretary Hagel have shown in me by nominating me for this demanding role.

Before continuing, I would like to thank several people here today. First, I'd like to thank Senator Warner for doing me the honor of introducing me, and for his kind remarks, and for both Senator Warner and Senator Nunn for everything they have done in service of this hallowed institution, as well as this great Nation.

I'd next like to introduce and thank my wife of 35 years, Cassandra, and my wonderful daughter, Kendyl, for being by my side today and for supporting me as I once again am being considered for demanding years in Government service.

I'd also like to recognize my younger brother, Skip. He retired as a Marine Master Sergeant, and I really appreciate his presence and support here today, as well as those of my colleagues from the Center for a New American Security, some of whom actually made it here today. I thank them.

Finally, I appreciate my five friends and colleagues here for joining me on this panel, as well as for volunteering to serve 3 more years in the administration, and especially for agreeing to answer all of the hard questions that I'm certain are surely to come.

I think the next 3 years are really going to be a period of extraordinary challenge and opportunity for the Department of Defense. The decision made by the administration, Congress, and the Department will impact the capabilities and capacities of our Armed Forces far into the future.

To reach the best decisions, I think all concerned will need to address these issues deliberatively, collaboratively, and with a spirit of cooperative purpose. For my part, if confirmed, I pledge to you, the President, Secretary Hagel, and all of the soldiers, sailors, airmen, marines, civilians, contractors, and their families, that I will spend every waking day doing everything humanly possible to address forthrightly the pressing national security challenges that face our country, and to improve both the warfighting capabilities and health, welfare, and resiliency of our superb total force.

While so doing, I will continuously strive to improve the Department's management, programming, and budgeting processes, guided by the principle that fiscal discipline and accountability can coexist with prudent discussions on national defense without harming national security or threatening commitments made to our servicemembers, past and present.

In closing, if the Senate chooses to confirm me as the next Deputy Secretary of Defense, I will make every effort to justify your decision, and I vow to work with every Member of Congress to maintain what I believe to be the greatest military in the world, so help me God.

Thank you, Mr. Chairman. I look forward to answering the committee's questions.

Chairman LEVIN. Thank you so much, Mr. Work.

Mike McCord, welcome back to the committee.

**STATEMENT OF HON. MICHAEL J. McCORD, TO BE UNDER
SECRETARY OF DEFENSE (COMPTROLLER)**

Mr. McCORD. Thank you, Mr. Chairman and Senator Inhofe, members of the committee.

I have so much to be thankful for, being here today. First, I am grateful to the President for nominating me to this important position, and to Secretary Hagel for his confidence in me. It's been an honor and a privilege to serve with Secretary Hagel and with former Secretaries Gates and Panetta over the past 5 years.

I'm also thankful to the President and the Secretary for choosing Bob Work to be our next Deputy, and Christine Wormuth to be our Under Secretary for Policy. I've enjoyed a great working relationship with both of them over the past several years. I have not worked as closely with Brian, Eric, or Ambassador Shear yet, but it's a real pleasure to be here with them and all our nominees today.

It's especially meaningful to me to be back here with the committee, where I served on the staff for 21 years and had the opportunity to learn from the outstanding Senators who have led this committee as Chairman and Ranking Member during my time here. Mr. Chairman, you, Senator McCain, who joined this committee, I notice, the same day I joined the staff, back in 1987, and our two former chairmen, Senator Warner and Senator Nunn. I'm very honored they're here today, and I'm especially grateful to Senator Nunn for making the trip all the way here and for his kind introduction.

Chairman Levin, it's an honor to be part of your staff for 11 years. Although it's too early to start saying goodbye, I want to recognize not just what you've done as a Senator, but the way you've done it, with the highest standards of integrity. I'm always proud to tell people that I worked for Sam Nunn and Carl Levin.

Senator Inhofe, I saw your dedication to our country and our military firsthand as chairman and ranking member of the Readiness and Management Support Subcommittee, back when I was supporting Senators Chuck Robb and Daniel Akaka. It's a pleasure to work with you again.

I also want to recognize my former colleagues on the staff, led by Peter Levine and John Bonsell, for the work they do to uphold the committee's high standards of bipartisanship and dedication, and especially the 52-year winning streak.

Most importantly, I want to thank my family. First and foremost, my wife, Donna—other shoulder. [Laughter.]

I could not serve without her love and support, and I'm so lucky today and every day to have her. My mother, Ann, and sister, Cathy, have joined us today. This is their second trip from Ohio in 2 weeks for this hearing, and I thank them for that. Donna and our daughter-in-law, Kim, and granddaughter, Charlotte Rose, are here. Charlotte's in the front row. My wife's law partner and friend, Ann Jones. I'm so happy all of them are here to share this important day in my life.

Finally, I want to recognize Bob Hale, who is not here, but for the outstanding job he's done as our Comptroller for the past 5 years. He's given the job his all, and he's been a great friend and mentor to me. The team that Bob and I lead take great pride in

what we do. Our people work extremely hard to ensure the Department accomplishes its missions; in particular, meeting the needs of a military at war. These past few years have been especially challenging, as we work through the longest continuing resolutions in the Department's history, a sequester and a shutdown and furloughs, all while supporting the demands of our wartime operations.

Should I be confirmed, I'll continue to lead our Comptroller organization as we support our military and our Nation. We face many challenges, going forward, in this era of dynamic security changes and constrained resources, but I'm confident we'll continue to meet those challenges.

Thank you.

Chairman LEVIN. Thank you so much, Mike.

Charlotte, as a grandfather, I know how important it is to your grandpa that you're here today supporting him.

Ms. Wormuth.

**STATEMENT OF MS. CHRISTINE E. WORMUTH, TO BE UNDER
SECRETARY OF DEFENSE FOR POLICY**

Ms. WORMUTH. Thank you, Chairman Levin, Ranking Member Inhofe, and members of the committee.

It's a privilege to appear before you this morning. I very much appreciate the opportunity to answer any questions you may have regarding my nomination as Under Secretary of Defense for Policy.

I'd like to thank President Obama and Secretary Hagel for their support of my nomination. I've had the privilege to serve President Obama, former Secretaries Gates and Panetta, and now Secretary Hagel, for the past 5 years, and, if the Senate chooses to confirm me for this position, I look forward to continuing to support the men and women of the U.S. military.

I began my service in the Office of the Secretary of Defense in 1995, and was a member of the career Civil Service for 7 years. I grew up professionally in the Office of the Secretary of Defense (OSD) Policy, and, over the years in and out of government, I've continued to be very impressed with the quality of our national security workforce. They're hardworking, patriotic individuals who serve with dedication alongside their military colleagues. I'm very humbled and honored by the opportunity to serve with them as Under Secretary, if confirmed.

I wouldn't be here before you today as someone who's pursued a career in international affairs and public service without the support and inspiration I've drawn from my mother, Deanna Wormuth. I'd also like to thank other members of my immediate family, who are such an important part of my life and who, in many ways, have made my service in Government possible. My sister, Jennifer Wormuth, who's a surgeon in Baltimore, is here. My husband, Drew Kuepper, who also works in Government and is a retired Navy officer. Finally, I'd like to thank my two amazing daughters, Rachel and Madeleine, who keep me grounded and remind me every day what matters in life. Thank you all for being here today and for being with me every day.

Senators, we live in a globalized, rapidly changing world at a time when the United States faces a number of challenges, as Sen-

ator Inhofe noted, but there are also opportunities to shape a more peaceful world. If confirmed, I would look forward to working with you all in Congress, with this committee, in particular, and with the executive branch, to advance U.S. national security interests in this environment.

I would support Secretary Hagel in building and sustaining strong defense relationships with countries around the world, with a goal of preventing crises wherever possible and ensuring our military is ready to respond to crisis, if needed.

I would also make it a priority to provide day-to-day leadership and management of the Office of Secretary of Defense Policy organization so that it continues to provide excellent support to Secretary Hagel and to the President.

Chairman Levin, Senator Inhofe, members of the committee, I'm grateful for your consideration this morning, and I look forward to your questions. I will make every effort to live up to the confidence that's been placed in me with this nomination.

Thank you very much.

Chairman LEVIN. Thank you very much, Ms. Wormuth.

Mr. McKeon.

STATEMENT OF MR. BRIAN P. McKEON, TO BE PRINCIPAL DEPUTY UNDER SECRETARY OF DEFENSE FOR POLICY

Mr. McKEON. Mr. Chairman, I've submitted a slightly longer statement, for the record, which I will try to abbreviate now.

Mr. Chairman, Ranking Member Inhofe, members of the committee, it's a distinct honor to appear before you as the President's nominee to be the Principal Deputy Under Secretary of Defense for Policy. I would like to thank the President and the Secretary of Defense for their confidence in me in selecting me for this position. I would also like to express my deep appreciation to the Vice President, for whom I worked for nearly 25 years in the Senate and in the White House, and who's been a great mentor and friend to me.

I would not be here today without the strong support of my family, particularly my parents and my wife. I owe a great debt of gratitude to them, particularly my wife. She spent nearly 25 years working for five different Senators, so she understands and has patiently tolerated the long hours required of working in the Senate and in the White House.

I'm also joined today by my mother-in-law, Hope, and my nephew, who shares my name and works here in the Senate for one of your colleagues.

I've been fortunate to spend my professional life working in all three branches of the Federal Government. In addition to working here in the Senate and the White House, I clerked for a Federal judge who was put on the bench by Senator Warner, so I should thank him, since he is here, for appointing Judge Doumar. It gave me a great opportunity.

My over 20 years of service in this chamber, and 5 years in the executive branch, have given me a strong appreciation for the challenges that confront our country, long experience in national security policy, and a deep knowledge of how the two political branches operate. I believe I have demonstrated an ability to manage people

as well as complex policy issues to get things done and to work well across party lines.

I also continue to have great respect for the role of Congress in national security. The most seminal change in the American defense establishment in the last several decades, the Goldwater-Nichols Act, would not have occurred without the persistence of Congress.

The debates in this chamber on the Gulf and Balkan wars, in significant treaties like the Chemical Weapons Convention and the North Atlantic Treaty Organization (NATO) expansion, were among the most memorable of my time here. They were also among the most important, for, in a democratic society, matters of war and peace must be publicly debated and require the informed consent of the American people through their representatives here in Congress.

I'm fully aware that not all wisdom resides in the executive branch, and I recognize that we will not always agree, but we are all motivated by the same commitment to protecting the country in our national interests, and I pledge that, if confirmed, I will help the Department to maintain a regular dialogue with the committee and its well-respected professional staff.

In my time at the White House, I've worked closely with many OSD Policy employees, including Ms. Wormuth. Just as the ranks of the uniformed military are filled with highly dedicated professionals, so too is OSD Policy. These women and men have gone through a difficult period in the last year with widespread furloughs resulting from sequestration, followed by the shutdown of the Government in October. Our Government is only as strong as its people, so an important priority, if confirmed, will be to focus on our human capital.

Mr. Chairman, I appreciate the opportunity to appear before you today, and I look forward to your questions.

[The prepared statement of Mr. McKeon follows:]

PREPARED STATEMENT BY MR. BRIAN P. MCKEON

Mr. Chairman, Ranking Member Inhofe, members of the committee, it is a distinct honor to appear before you as the President's nominee to be Principal Deputy Under Secretary of Defense for Policy.

I would like to thank the President and the Secretary of Defense for their confidence in me in selecting me for this position. I would like also to express my appreciation to the Vice President, for whom I worked for nearly 25 years in the Senate and in the White House and who has been a great teacher, mentor, and friend. I should also thank former National Security Adviser Tom Donilon for giving me the chance to serve in my current position on the National Security Council staff, and to Susan Rice for keeping me on when she succeeded Mr. Donilon and for supporting my possible move to a position in the Department of Defense.

I would not be here today without the strong support of my family, particularly my parents and my wife. My father, who hitchhiked from his home in New York to Michigan to attend college and paid for his studies by working in an auto factory at night—taught me the value of hard work, that every day brings new opportunities, and that politics is a noble profession. My mother, as much as anyone, drove me to succeed in school and to reach my full potential. My wife, who spent nearly 25 years working in this chamber for five different Senators, has, simply put, made me a better person. She has provided unstinting love, support, and friendship, while patiently tolerating the long hours required of working in the Senate and the White House, for which I am deeply grateful.

Finally, I would like to thank the committee and its staff for scheduling this hearing today, so soon after the nomination was submitted. I worked on hundreds of

nominations in my time on the staff of the Committee on Foreign Relations, so I fully appreciate the preparatory work required to convene a hearing of this nature.

I have been fortunate to spend my professional life working in all three branches of the Federal Government. My over 20 years of service in this chamber and 5 years in the executive branch have given me a strong appreciation for the many challenges that confront our country, long experience in national security policy, and a deep knowledge of how the two political branches operate. I believe I have demonstrated an ability to manage people as well complex policy issues, to get things done and to work well across party lines.

I also have great respect for the role of Congress in national security. The most seminal change in the American defense establishment in the last several decades—the Goldwater-Nichols Act—would not have occurred without the initiative and persistence of Congress. The debates in this chamber in the 1990s on matters such as the Gulf War, the Balkan conflicts, the Chemical Weapons Convention and the expansion of the North Atlantic Alliance were among the most memorable of my time here, and among the most important, for in a democratic society, matters of war and peace must be publicly debated and require the informed consent of the American people, through their representatives in Congress. I am fully aware that not all wisdom resides in the executive branch, and I recognize that we will not always agree. But we are all motivated by the same commitment to protecting the country and our national interests. I pledge to you that, if confirmed, I will help the Department maintain a regular dialogue with the committee and its professional staff. Throughout my tenure working in the Senate, this committee had a well-deserved reputation for bipartisanship, productivity and a strong professional staff, a reputation that continues today.

In my time in the White House, I have worked closely with many Office of the Secretary of Defense (OSD) Policy employees. Just as the ranks of the uniformed military are filled with highly dedicated professionals, so, too, is OSD Policy. The women and men of OSD Policy have gone through a difficult period in the last year, with widespread furloughs resulting from sequestration, followed by the shutdown of most government operations in October. Our Government is only as strong as its people, so an important priority, if confirmed, will be to focus on our human capital, as did Under Secretaries Flournoy and Miller, so that we can continue to recruit and retain talented professionals.

Mr. Chairman, I appreciate the opportunity to appear before you today. I look forward to your questions.

Chairman LEVIN. Thank you so much, Mr. McKeon.
Now Ambassador Shear.

STATEMENT OF HON. DAVID B. SHEAR, TO BE ASSISTANT SECRETARY OF DEFENSE FOR ASIAN AND PACIFIC SECURITY AFFAIRS

Ambassador SHEAR. Thank you, Mr. Chairman, Ranking Member Inhofe, and members of the committee. I'm honored to appear before you today, and I appreciate the opportunity to answer questions you may have regarding my nomination to serve as the Assistant Secretary of Defense for Asian and Pacific Security Affairs.

I wish to thank the President for nominating me for this position and to thank Secretary Hagel for supporting my nomination.

I'd also like to thank my family and friends for their strong support. My wife, Barbara, and my daughter, Jennifer, could not be with us today, but they're here in spirit.

I'm joined, instead, by my big brother, George, his wife, Diana, and their daughter, Laura. My brother, George, has served as an inspiration to me throughout my life, but particularly in my youth, when he was a U.S. Navy officer.

I'd like to thank the soldiers, sailors, airmen, and marines with whom I've worked closely throughout my career. Their commitment to our Nation is a testament to the continued strength of our military traditions. If confirmed, it would be an honor for me to help build on those traditions.

The mission of the Asian and Pacific Security Affairs Office is critical to our Nation's security. The Asia-Pacific region boasts over half the world's population, half the world's gross domestic product, and nearly half the world's trade. It presents the United States with profound challenges and opportunities. These include the continued fight against terrorism, the military and political transition in Afghanistan, the rise of China, and the need to strengthen our alliances and partnerships.

The administration has responded to these challenges and opportunities in East Asia by implementing the rebalance, a whole-of-government approach to strengthening our economic, diplomatic, and military positions in the region. If confirmed, I hope to help implement the balance as we draw down from Afghanistan, support a stable Afghan political transition, and continue to fight al Qaeda and other terrorist groups.

Mr. Chairman, I've worked closely with the military throughout my Foreign Service career. I believe my work demonstrates that close coordination between the diplomatic corps and the military ensures the effective execution of national security policy.

At the Embassy in Tokyo, I worked with U.S. forces to strengthen our alliance while adjusting our presence in Japan. While serving with the State Department's Office of Korean Affairs, I coordinated U.S.-Republic of Korea alliance issues with OSD and the Joint Staff. Most recently, as Ambassador to Vietnam, I helped to build a new partnership that includes a growing security cooperation component, adding both Navy and Coast Guard officers to our Defense Attache office. The Pacific Command has been a partner throughout my career.

My assignment as Deputy Chief of Mission in Kuala Lumpur and as Ambassador to Vietnam have allowed me to hone my skills as a leader and manager of large groups of people in a constrained fiscal environment. If confirmed, I look forward to working with this committee and the whole of Congress to address the national security challenges we face in order to keep America safe, secure, and prosperous. I will make every effort to live up to the confidence that has been placed in me. I'm grateful for your consideration, and I look forward to your questions.

Thank you very much.

Chairman LEVIN. Thank you so much, Ambassador.

Mr. Rosenbach.

**STATEMENT OF MR. ERIC ROSENBACH, TO BE ASSISTANT
SECRETARY OF DEFENSE FOR HOMELAND DEFENSE**

Mr. ROSENBACH. Good morning, Mr. Chairman, Ranking Member Inhofe. Thank you very much for the privilege of appearing before you in the committee today. I appreciate everything that you and the other members of the Senate Armed Services Committee do to help our military, and I look forward to answering your questions about my nomination for Assistant Secretary of Defense.

I'd like to start by thanking my family. First of all, my wife, Alexa, and my two kids, Max and Sophia, who are here today. Their support and understanding, in particular over the last several years when I've been in the Pentagon, has been heartwarming and essential to me surviving.

I'd also like to thank my parents, Bill and Colleen, who are here. Without them, I wouldn't be here today. It's their love and hard work that got me here.

I also would like to explicitly thank the service men and women of the U.S. military. The last decade has been hard on the country, but particularly hard on them and their families. We should always remember what they do.

Mr. Chairman, I've been in and around the military my entire life. My father served in Vietnam. I was born—and raised—at the U.S. Air Force Academy. I moved to and grew up in Gettysburg, and the battlefields there. I served on Active Duty in the Army in the military. I'm now working in the Pentagon. I can say, with all honesty, I see no higher honor than serving as Assistant Secretary of Defense and focusing, in particular, on Homeland defense and defending our country and working closely with the National Guard, U.S. Northern Command, U.S. Cyber Command, and U.S. Strategic Command, in particular.

If confirmed, I look forward to working with you and your staffs, in particular. As a former member of the Senate staff, I know that's important. I'll make every effort, if confirmed, to live up to your expectations. I look forward to your questions.

Thank you very much.

Chairman LEVIN. Thank you very much.

We're going to have a 7-minute first round of questions. I think we're still, with that number of minutes, able to make our 11:15 expected cutoff time, since the Senate will begin a series of votes at that time.

Let me start with you, Mr. Work. Secretary Hagel, yesterday, previewed the Department's 2015 budget request, which is not going to be released in full until a few days from now. He included numerous personnel-related proposals that are intended to slow the growth of personnel costs. Among those proposals are a 1-percent pay raise for most military personnel, which is lower than the currently projected 1.8 percent that would take effect under current law; a pay freeze for 1 year for general and flag officers; a reduction in the growth of the housing allowance over time to 95 percent of housing expenses rather than the 100 percent currently covered; a phased-in reduction in the annual direct subsidy provided to military commissaries; changes to the TRICARE health program to encourage greater use of the most affordable means of care; some fee increases for retirees in TRICARE; and, of course, the reduction in the Army's Active Duty end strength to 450,000, down from the currently planned 490,000.

Let me ask you, Mr. Work, what is the relationship between those proposals and our need to invest in modernization and readiness?

Mr. WORK. Thank you, Mr. Chairman.

This is one of the big issues that I dealt with as the Under Secretary of the Navy, and I expect it will be one of the issues that I'll deal with, if confirmed, as Deputy Secretary.

The rate of increase in personnel costs, especially since 2001, has been far above the rate of inflation. As a result, today, by at least all accounts, our servicemembers, men and women, are being compensated about 10 percent above their average civilian counterpart.

I think what Secretary Hagel—and Chairman Dempsey—are trying to signal is that we want to compensate our men and women for everything that they do for their Nation, but we need to slow down the growth of personnel compensation so that we can spend more money on readiness and modernization. There is a direct link. It's a very, very important and difficult issue, but one, if confirmed, I look forward to working with the committee and the members of the Department on trying to come to the right answer.

Chairman LEVIN. Mr. McCord, do you have a comment on that?

Mr. MCCORD. Mr. Chairman, I certainly agree with Mr. Work's comments. I think the chiefs wrestle with this when we go through our budget deliberations in the building, and the tradeoff is exactly as you state. They very directly feel it's the people who have to train and equip the force for today, as well as tomorrow, that there is a direct tradeoff between military capability and being able to control our compensation costs. I think the Secretary made clear that we are totally respecting the work that our warfighters do, we are just trying to restrain the growth a little bit. The compensation of our military is about a third of our budget; including military and civilian, it's about half. We cannot leave that area completely untouched. However, as has been the case every year that we have made some proposals in this area, they are disproportionately small. We are relatively protecting compensation, just recognizing the need that we have to make some savings there to do what we need to do.

Chairman LEVIN. Thank you.

Mr. Work, the National Commission on the Structure of the Air Force has concluded that the Department can and should place greater reliance on the Air Reserve components more than we have previously planned to do, and that a shift to placing a larger portion of the Air Force's capability in the Air Reserve component should be made even if we weren't facing these budget reductions.

These are strong positions that were unanimously adopted by the Commission, which included a former Secretary of the Air Force and a former Under Secretary of the Air Force. I'm wondering whether you have been briefed on the Commission's report, and, if so, what your reaction is.

Mr. WORK. Mr. Chairman, I haven't been briefed, but I have read the report in full, and have digested it.

In essence, the Commission recommends shifting about 28,000 Active Duty airmen to the Reserve, primarily in the areas of cyber, pilot training, space, and special ops. This would save about \$2.1 billion a year, and would increase the proportion of the Reserve contribution to the U.S. Air Force total force from about 35 percent to 42 percent.

If confirmed, I will work with the Department to try to understand whether all of these recommendations could be implemented, but the general thrust of the report, that we need to take a very close look at, the balance between the Active and the Reserve Force, is an important one, and one that I wholly endorse.

Chairman LEVIN. Mr. Work, last year, Secretary Hagel began to implement his plan to reduce the Department of Defense staff by 20 percent. Last year's authorization act contains a provision requiring the Secretary of Defense to develop a plan for streamlining

Department of Defense management headquarters by reducing the size of staffs, eliminating tiers of management, cutting functions that provide little value—or little additional value, consolidating overlapping and duplicative program offices. The objective is to reduce aggregate spending for management headquarters by not less than \$40 billion, beginning in fiscal year 2015.

What is your view on reductions to the size and composition of the Department's management headquarters?

Mr. WORK. I fully endorse Secretary Hagel's thrust here. We have long been focused, in the Department—or when I was the Under Secretary, we were long focused on taking overhead and taking forces out of what we would refer to as “tail” and put it into “tooth”, combat power. This is a first step, I believe. The 20-percent reduction that Secretary Hagel has ordered, all of the Department staffs as well as the combatant commander staffs, is an important first step and will reap important savings that we'll be able to plow back into capabilities and capacities that our warfighters need.

Chairman LEVIN. Thank you.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

Ms. Wormuth, thank you for the time we spent together yesterday to go over some of these problems that we have.

I do want to concentrate my questions on the current strategy that we have, but, before doing that, just one comment, and if it's going to be longer, we can do it for the record. Mr. Work, this is addressing the acquisition reform problem that we've been talking about for years and years, and that you've been close to. Do you have any comments on what your ideas are, in the near future, on that type of reform?

Mr. WORK. If confirmed, I look forward to working with Under Secretary of Defense Kendall, who is really being aggressive in this regard. I think we have to take a look at the way we generate requirements. I think all of us realize that sometimes we overshoot the mark on requirements, which add costs. All of the better business buying approaches that Secretary Kendall is asking for, I fully endorse.

Senator INHOFE. Okay, that's good, Mr. Work. If you don't mind, for the record, getting as much detail as you can to give us your recommendations as to how to address this type of reform.

Mr. WORK. I will do so, sir.

[The information referred to follows:]

I understand that the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)), the Honorable Frank Kendall, directed a number of parallel efforts to institute a continuous improvement process for the defense acquisition system and I support this ongoing effort. Prominent elements include: Better Buying Power 2.0 initiatives, an interim policy update to the Department of Defense Instruction (DODI) 5000.02, “Operation of the Defense Acquisition System,” a more dynamic coupling of military requirements and defense acquisition processes, and a review of current statutes aimed at suggesting a comprehensive consolidation and streamlining of legislative prescriptions for defense acquisition. If confirmed I will review this work, which is described in more detail below, and will seek out additional steps to improve defense acquisition.

BETTER BUYING POWER

Better Buying Power (BBP) 2.0, which is a second iteration of the BBP initiatives that were introduced by Dr. Ashton Carter when he was the USD(AT&L), identifies efficiencies and improvements across the Defense of Defense (DOD) acquisition sys-

tem. It focuses Defense-wide review of critical process elements ranging from requirements generation to system engineering, cost control, and life-cycle sustainment. It also addresses professional training and shaping of the Defense Acquisition Workforce (DAW). Stimulated by problem identification, definition, and resolution, BBP is also a pragmatic forum actively pursuing incremental efficiencies solicited from the entire DAW. Proposals for improvement are tested and refined before implementation into a growing body of acquisition best practices. The goal is to deliver better value to the taxpayer and improve the way the Department acquires goods and services in support of the warfighter.

BBP 2.0 consists of 34 initiatives organized into 7 focus areas:

- Achieve affordable programs
- Control costs throughout the product life cycle
- Incentivize productivity and innovation in industry and Government
- Eliminate unproductive processes and bureaucracy
- Promote effective competition
- Upgrade tradecraft in acquisition of services
- Improve the professionalism of the total acquisition workforce

One notable addition is a new focus area on increasing the professionalism of DOD's acquisition workforce. BBP 2.0 recognizes that people are essential to changing the way DOD provides critical capabilities to the warfighters. Within this area, Mr. Kendall is introducing four new initiatives: (1) establish higher standards for key leadership positions; (2) establish stronger professional qualification requirements for all acquisition specialties; (3) increase the recognition of excellence in acquisition management; and (4) continue to increase the cost consciousness of the acquisition workforce by focusing on culture change.

DODI 5000.02 UPDATE

Interim DODI 5000.02, "Operation of the Defense Acquisition System," provides fundamental guidance for Defense components. This interim policy released on November 25, 2013:

- Promotes best practices and flexibility to produce improved acquisition outcomes; and
- Reflects many of the BBP initiatives to include a substantially increased emphasis on improved business arrangements, program affordability, and what a program "should cost" the government, rather than what the expectations are that it "will cost" the government if no cost savings initiatives are attempted.

The product of close collaboration with DOD acquisition, requirements, and resource experts, this interim policy includes a series of program acquisition models that are tailored to the unique characteristics of the product being acquired and to the totality of circumstances associated with the program, including operational urgency and risk factors.

DYNAMIC INTERACTION OF MILITARY REQUIREMENTS AND DEFENSE ACQUISITION

In previous years, enhancements to the Defense acquisition process resulted in synchronization of requirements documentation at specific contractual milestones in product design, development, and production. BBP initiatives pursue a more profound integration of requirements and acquisition within Services and agencies to promote a dialogue to refine needs apace with evolving knowledge of product design and limitations.

Interim DODI 5000.02 adds a checkpoint immediately before the Engineering and Manufacturing Development phase to ensure that military needs and acquisition activities are fully aligned. This new decision point confirms that Requests For Proposals from potential contractors are informed by the latest validated requirements of joint military needs authority.

The BBP process also fosters expansion of the use of Configuration Steering Boards across the Department to ensure continuous examination of requirements, resources, and associated acquisition activities within the defense component organizations. This dynamic interaction of the principal authorities involved in investment decisions for warfighting capabilities aims to deliver affordable solutions by focusing on tradespace and increasing knowledge of technology options and associated costs.

AT&L LEGISLATIVE PROPOSAL

The process of updating DODI 5000.02 revealed that the current body of laws associated with major system acquisition has placed an unnecessarily complex burden upon Program Managers. As a result, USD(AT&L) initiated an effort to comprehen-

sively review current applicable statutes and regulations and is drafting a legislative proposal to simplify the existing body of acquisition law and regulations while maintaining the overall intent of existing statutes. In a February 2014 Defense News article, Mr. Kendall reaffirmed that this initiative “is not to really change any of the intent behind the existing laws, but just to simplify that body of law, make it more comprehensible, make it easier to implement and make it something that is much more focused on results and not as confusing and complex for everybody.”

Using the interim DODI 5000.02 as a starting point, the proposal will focus on areas such as Milestone certification, oversight regime overlap, duplicative documentation and reports, and proposed changes to the Federal Acquisition Regulation, the DOD FAR Supplement, and service supplement. Service program deep dive case studies will highlight key areas of interest and provide specific examples of statutory burden.

Congressional and industry-targeted engagement will also inform the effort. In order to ensure coordination and transparency, meetings have occurred with Senate and House Armed Services Committees professional staff and leadership. These engagements, in addition to industry-targeted opportunities, will continue.

The proposal should be finalized in time to be included in the National Defense Authorization Act (NDAA) for Fiscal Year 2016; however, some elements may be included in the NDAA for Fiscal Year 2015.

Senator INHOFE. Ms. Wormuth, you’ve had these positions working very closely with the administration. The President’s letter, at the front of the January 2012 Defense Strategy Guidance, he stated that we have, “put al Qaeda on a path to defeat”. In opening statement, I mentioned other statements that he made, “The tide of war is receding,” “We have al Qaeda on the run,” and all of that. But, when we asked the Director of National Intelligence, James Clapper, if al Qaeda is on the run, on a path to defeat, he answered, “No, it is morphing and franchising.” General Michael Flynn, who is also on the same panel—this was a couple of weeks ago—the Director of Defense Intelligence Agency, said, simply, “They are not.”

If you look at the chart over here, Ms. Wormuth, this shows what they’re concerned with, what’s happening with al Qaeda. Does it look like to you, that they are on the run or these statements that are made by the President?

[The chart referred to follows:]

Proliferation of Al-Qaeda & Al-Qaeda Linked Groups

Red Depicts: Safe Havens, Areas of Activity, Networks

Ms. WORMUTH. Senator, in my view, I would say that we have significantly degraded the core of al Qaeda, but I would certainly agree with Director Clapper that the broad al Qaeda threat has metastasized, and we are very concerned about the threat posed by, for example, al Qaeda in the Arabian Peninsula, al Qaeda and Associated Movements, and other groups. This is, I believe, a significant threat that we, in the Department, have to be very, very attentive to.

Senator INHOFE. You do agree, though, with James Clapper?

Ms. WORMUTH. I agree that the threat has metastasized, yes.

Senator INHOFE. Yes, okay. All right, that's a good question. Metastasized, does that mean it's bigger or smaller?

Ms. WORMUTH. I think it has spread and it's a nodal threat.

Senator INHOFE. We think al Qaeda—you can follow up on that—is spreading. North Korea has the nuclear weapons. We all know what's happening out there and the threats that are different today than they've ever been in the past. Under the current strategy, I don't think that the strategy is working, and also, when you hear statements by General Odierno, who talks about what is happening with the current strategy, the Chief of Naval Operations (CNO), Admiral Greenert, his statement saying that we will preclude our ability to execute the 2012 Defense Strategic Guidance, both in the near term and the long term. The same thing with General Amos. We will have fewer forces to provide less trained and arrive later in the fight.

I would say, to all of you, that, with the strategy that I think clearly is not working, we would have, maybe, one of two choices, to either change the strategy to try to enhance our abilities, and that would cost more—that would be more resources, or it would be to lower the expectations of the American people that we've al-

ways had. I will repeat the question. I'll ask each one of you if you agree with the statement that was made yesterday by Secretary Hagel when he took option number two—he said, “The American dominance on the seas, in the skies, and in space can no longer be taken for granted.” Do you agree with that?

Ms. WORMUTH. Senator, I think what Secretary Hagel is perhaps getting at there is that we are not taking for granted our position in the world, and, in fact, are doing everything we can to make sure that we have the capabilities we need and the ready forces we need to confront challenges.

Senator INHOFE. Okay. I don't agree with that. I read this thing, that “can no longer be taken for granted”.

Anyone else want to comment on that? [No response.]

Nobody?

Mr. WORK. Sir, there is a broad proliferation of guided weapons. The United States has enjoyed a monopoly in guided weapons for about 20 years. That monopoly is eroding. When that happens, operations in the air and on the surface of the ocean and under the surface of the ocean become much more challenging.

I think what Secretary Hagel is saying is, given the current trends, we really have to be careful or we will be faced with a situation where, when we fight, we could take more losses. That's one of the reasons why one of his key themes was to maintain technological superiority, and he made such a big issue of that in his speech.

Senator INHOFE. Yes, but I would say that it's the strategy that I look at this and I say we're going to have to change, because this expectation is there. All the Chiefs that I quoted a minute ago, they know that the problems that are out there, and they are greater. That means greater risk, which means loss of more lives. This is a great concern to me, and I'd like to have any of you, for the record, to respond in any more detail than you already have, because, to me, it's very simple. When he made the statement, he said, “American dominance of the seas, in the skies, and in space can no longer be taken for granted.” I'd like to get that for the record, and I'm not really satisfied at the responses we've had.

[The information referred to follows:]

Mr. WORK. As I said in my testimony, the United States is losing the virtual monopoly that it has enjoyed in precision-guided weapons. In recent years, a number of adversaries and potential adversaries have fielded military systems that can target and strike our ships and aircraft, as well as the forward bases from which they operate. Space is no longer a sanctuary and increasingly sophisticated adversaries are seeking to deny U.S. forces the advantages they currently enjoy in space.

For these reasons, it is essential that our defense program sustain investments in the types of capabilities that will be required to address these proliferating threats. Priorities for investment, in my opinion, include defenses against ballistic and cruise missiles, fifth-generation combat aircraft, undersea warfare platforms, standoff attack weapons, and more resilient systems for intelligence, surveillance, and reconnaissance (ISR), communications, and timing and positioning. The joint force must also develop new operational concepts for maintaining freedom of action in the face of anti-access/area denial threats.

Mr. McCORD. The Department of Defense (DOD) can no longer afford to conduct business as usual given the dynamic security and fiscal environments we face. DOD has protected its investments in capabilities to counter anti-access/area-denial threats as well as those who seek to constrain the ability of U.S. forces to operate freely across domains. Ensuring we can continue to counter such threats is motivating many of the Department's modernization efforts. If the Department does not

invest in new capabilities and develop new ways of operating, the Joint Force likely will face challenges projecting power in the future.

Ms. WORMUTH. Yes. Over the past decade or more we have witnessed the proliferation of advanced technologies to a number of states and even to non-state actors, including U.S. adversaries. Systems such as guided anti-ship weapons, quiet submarines, advanced surface-to-air missiles, modern fighter aircraft and air-to-air missiles, long-range ballistic and cruise missiles, sensor platforms, and command and control systems can be used by adversaries to impede U.S. access to theaters of operation, threaten forces at forward bases, and contest for control of access to sea and airspace and potentially interfere with U.S. operations. For example, China has successfully tested a direct-ascent anti-satellite weapon and, along with other countries, is developing electronic warfare and laser systems that can interfere with the operation of U.S. military satellites.

As a result, U.S. power projection operations are facing threats that we did not encounter in the past. It will take substantial and sustained investments in new capabilities, operating concepts, and infrastructure to maintain U.S. flexibility and the freedom to operate in these areas. The Department is paying close attention to these developments and is making needed investments to ensure that U.S. forces can operate in non-permissive environments.

Mr. MCKEON. I agree that we cannot assume that adversaries will not seek to challenge our dominance in these spheres. Based on the trajectory of current trends in the threat environment, if the Department does not invest in new capabilities and develop new ways of operating, the Joint Force will face challenges projecting power into some environments. I understand that the need to counter these threats is motivating many of the Department's modernization efforts.

Mr. ROSENBACH. I agree that the United States cannot assume that significant U.S. conventional capabilities will go unchallenged in the future. The diffusion of advanced technology enables potential adversaries—state and non-state actors alike—to try to blunt traditional U.S. power projection capabilities. Those seeking to deny U.S. forces operational access across the air, maritime, cyber, and space domains are growing in sophistication and in number. As a result, the Department must prioritize investments in capabilities needed to overcome these challenges.

Mr. SHEAR. I agree that we cannot take our position in Asia for granted and that improving it will require constant effort. Actors in the Asia-Pacific region, as elsewhere across the globe, seek to constrain the ability of U.S. forces to operate freely across domains. For this reason, the Department has been engaging China, strengthening our alliances, and seeking new partners. I also understand that the Department is doing everything it can to ensure that the United States possesses adequate capabilities that can counter anti-access/area-denial threats.

Senator INHOFE. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Inhofe.

Let me now call on Senator Reed, and also turn the gavel over to him for the balance of this morning's hearing.

Thank you.

Senator REED [presiding]. Thank you very much, Mr. Chairman.

Thank you all for your commitment to serve the Nation.

I first want to recognize Senator Warner and Senator Nunn, whose bipartisan, thoughtful, and patriotic leadership has set the standard for this committee. Thank you, Senators.

I also have to commend the people whose shoes you are stepping into. Ash Carter, Bob Hale, and Christine Fox have done a superb job at the Department of Defense. All of you have predecessors who you can be proud of and you can match your effort against theirs and they're a good target to aim for.

The questions we've been debating go toward the heart of a fundamental issue. Do budgets drive strategy, or do strategies drive budgets?

Mr. Work, you've indicated that you don't feel, given the Budget Control Act (BCA), as modified by the Ryan-and-Murray agreement, which this Congress supports—in fact, we give you the resources—is adequate to fully carry out the strategy. Is that a fair comment of your position?

Mr. WORK. I very much agree with the statements of Secretary Hagel and Chairman Dempsey, yesterday, who said that if we go to the full BCA levels from 2016 and beyond, that the risks will be elevated, and our ability to perform all parts of the strategy, which I believe is a very coherent strategy, as published in January 2012, being able to fully implement that strategy would be very difficult at the BCA levels.

Senator REED. That is a direct result of the budgets that Congress has agreed to, so far?

Mr. WORK. Yes, sir, it is.

Senator REED. Part of the response to the threats around the globe is to at least reevaluate the budget priorities that we've given the Department of Defense—we, in Congress, have legislated. Is that fair?

Mr. WORK. Yes, sir.

Senator REED. Now, let's take the other side of the question. We've dealt with the budget. In your view, it seems to be less than adequate to meet the strategy. What are the threats? Because I would like to think, simply, that you take the threats, you craft a strategy, and then you come to us and we give you adequate resources. Can you just briefly describe what you think the threats are to us, and how DOD is responding?

Mr. WORK. There's a broad range of threats, Senator. A rising power in the Asia-Pacific—it's rising very quickly. It has the means to compete with us militarily in a way that many of our former competitors have not. We have a broad problem in the Middle East that we can see the results of the Arab Spring and all of the problems that are happening in Syria, and the attendant reactions—or the attendant results on terrorism. We are focused very much on Iran and preventing Iran from becoming a nuclear power. We have a lot of small-scale contingencies around the world in which we must watch carefully.

Counterterrorism, cyber terrorism—or cyber warfare—rising powers, potential nuclear regional powers, these are all very, very big challenges that the Department has to face.

Senator REED. In some respects, we are in a world—and that's why it's much more complicated than perhaps in retrospect, the Cold War—where we have a range of challenges. Senator Inhofe's description, accurately, of the dispersion of al Qaeda, raises a special operations challenge, an intelligence challenge, a cyber challenge, et cetera. A lot different than a rising maritime power requiring surface vessels and major fleets and aircraft, or a conventional force, like the North Koreans. We are now at a stage where we have to cover down on all our bets. Is that one of the things that complicates your life, in terms of strategizing?

Mr. WORK. It certainly complicated my life as the Under Secretary of the Navy as we tried to balance all of the requirements with force structure. If confirmed, it would just be magnified as we take a look at the joint force and all of the capabilities and capacities that we need to address these threats.

Senator REED. Let me follow up, one of the points, I think, of the many that Senator Inhofe made that were right on target, which is the acquisition process. Fortunately, you had great support from people like Sean Stackley, et cetera, in your service in the Navy,

but there are programs in the Navy that are consuming significant resources and have yet to produce the kind of results that were anticipated when the programs were initiated. A lot of discussion recently is about the littoral combat ship (LCS), but this acquisition process is something that everyone in your job has worked on, every Secretary of Defense has worked on. We haven't got it right yet. I would join Senator Inhofe in urging you to specifically focus, along with Secretary Kendall, on improving that. There's no silver bullet, in terms of saving resources and shifting them, but that's something we have to do, and have to do better.

Mr. WORK. Yes, sir.

Senator REED. Mr. McCord, I'd again, thank you for your extensive work. You have a valuable role. One is to make sure that the money is well and wisely spent. The goal is to have as they say, a clean audit of the Department of Defense. Can you give us an idea of any initiatives that you're going to undertake to improve the auditing quality and the financial controls in the Department of Defense?

Mr. MCCORD. Thank you, Senator Reed, yes. That effort's very important to us, and one of the things that's very helpful to us is that it's a shared goal between us and Congress and the Armed Services Committees. We have a goal that Secretary Panetta set for 2014 for the Statement of Budgetary Resources, and we have a larger goal for 2017.

I believe that we're on track, we're making progress toward those goals. The plan that we have in place, that Mr. Hale's put in place, I support that plan. I'm going to stay with that plan, as long as I see that it's making the kind of progress that we've been making recently with the Marine Corps audit, for example. But, certainly I will come back to you and I will work within the Department to change that plan if I see that we are off track. But, right now, I believe we're on track.

Senator REED. Thank you very much.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

Mr. McCord, welcome back. Do you remember the first year we passed a requirement for an audit?

Mr. MCCORD. I was here at that time, Senator, yes.

Senator MCCAIN. Was it in the 1980s?

Mr. MCCORD. I'm remembering it's 1990, but I might be mistaken, sir.

Senator MCCAIN. You understand there might be a slight germ of doubt or cynicism about this latest claim that this year we're going to have a clean audit?

Welcome, our old friend, Chairman Warner, and Senator Nunn. It's great to see these two great public servants with us.

Ms. Wormuth, I've heard a lot of good names—"nodal threat"—it's a "nodal threat," is that what al Qaeda is?

Ms. WORMUTH. Senator, what I meant by that was, it's diffused, and there are cells that are—

Senator MCCAIN. I see.

Ms. WORMUTH.—geographically distributed—

Senator MCCAIN. You still didn't answer the question, whether it's growing or receding. Is the threat of al Qaeda growing or reced-

ing? I note your statement about, “core al Qaeda,” whatever that is worth. Is it growing or receding?

Ms. WORMUTH. I would describe—

Senator MCCAIN. Is the tide of war receding or growing?

Ms. WORMUTH. Senator, I would describe it as a persistent threat.

Senator MCCAIN. You won’t answer the question, is that it? It’s a simple question. Is it receding or growing? It’s not a very complicated question.

Ms. WORMUTH. I think it’s persistent.

Senator MCCAIN. You won’t answer the question. Is that it? I’m asking you, again, for the third time. Is it receding or growing?

Ms. WORMUTH. Senator, I think, in saying it’s persistent, I’m attempting to answer your question. I think there are—

Senator MCCAIN. Actually—

Ms. WORMUTH.—there are elements—

Senator MCCAIN. Actually, you—

Ms. WORMUTH.—of al Qaeda—

Senator MCCAIN.—are not. Actually, you are not. It’s a pretty simple question. We look at al Qaeda, and we decide, over the past few years, whether it is a receding threat or a growing threat. Since you keep saying “persistent,” you’re in disagreement with the Director of National Intelligence, which either means you refuse to answer the question or you’re not well informed.

Ms. WORMUTH. There are elements of the threat posed by al Qaeda that I would say are growing.

Senator MCCAIN. Which parts would you say are growing?

Ms. WORMUTH. But, just for example, al Qaeda in the Arabian Peninsula, the activities in Yemen, that is a growing threat, I think, of considerable concern to us.

Senator MCCAIN. Obviously you don’t agree with the map that Senator Inhofe just put up, because it’s spreading all over North Africa, Ms. Wormuth. Anybody who doesn’t know that has either been somewhere else or not knowing what’s going on in the world.

Mr. Work, as the former Navy Under Secretary, you wrote a very candid paper about the LCS program. I have a memorandum from Secretary Hagel to the Chief of Naval Operations. I don’t know if you’re aware of it, or not. He says, “Therefore, no new contract negotiations beyond 32 ships will go forward,” talking about the LCS. Do you agree with that assessment?

Mr. WORK. As I understand it, what the assessment is saying is, we will stop building the flight-zero-plus LCS at 32 ships, and we will consider follow-on ships, small combatants. A modified LCS could be one of the options. A domestic or foreign design could be one of the options.

I think this is very normal with Navy shipbuilding. We build—

Senator MCCAIN. You think it’s normal? You think it’s normal that the cost overruns associated with this ship, the fact that we don’t even know what the mission is, that there’s been this whole idea of moving different modules off and on—you disagree with the Government Accountability Office (GAO) statement, regarding the cost overruns? This is normal, Mr. Work?

Mr. WORK. Sir, up until 2007, 2008, 2009, when the program almost imploded, there were significant cost overruns. When Sec-

retary Mabus, Secretary Stackley, and I arrived in the Department of the Navy in 2009, I believe, since then, the program has met its cost targets. In 2001, the guidance to the Department of the Navy was to be able to build three LCSs for the price of one *Arleigh Burke*. The Department of the Navy is doing that today.

I think you have to look at the performance of the——

Senator MCCAIN. Sort of makes it hard to understand why Secretary Hagel would assess at 32 when the original plans, as presented to Congress for their approval, was 52 ships.

By the way, was anybody ever held responsible for these failures in 2007, 2008, 2009, 2010?

Mr. WORK. Those happened in the administration prior to ours, so I don't know what——

Senator MCCAIN. Everything's been fine under this administration, as far as the LCS is concerned?

Mr. WORK. I believe that the program is on solid ground and is meeting its cost targets, yes, sir.

Senator MCCAIN. You do believe that?

Mr. WORK. Yes, sir.

Senator MCCAIN. You're in direct contradiction to the Government Accountability Office study of 2013.

Mr. WORK. I haven't read that particular——

Senator MCCAIN. You haven't read it?

Mr. WORK. No, sir.

Senator MCCAIN. Wow. I'm stunned that you haven't. But, the fact is that the ship has still not had a clear mission, the modules that were supposed to be moving back and forth have not. We have not pursued the fly-before-you-buy policy, and do you remember the original cost estimate for an LCS?

Mr. WORK. It was \$220 million for the C frame, Senator, and, depending on the number of modules that you would buy, the total cost for a missionized LCS, average cost, was supposed to be no more than \$400 million, in fiscal year 2005 dollars.

Senator MCCAIN. What is it now?

Mr. WORK. I haven't been briefed on the most recent cost. I'll do that, if confirmed, and look at it. But, I know that we're on track——

Senator MCCAIN. Thank you for doing that. What's the cost now? You don't even know the cost now, Mr. Work?

Mr. WORK. I believe the average cost, with modules, is about \$450 million, but not in fiscal year 2005 dollars. If you take a look at the original costing factors, I believe the cost of today's LCSs are very close to the costs that were set, back in 2002–2003.

Senator MCCAIN. Given that, then it's hard to understand why the Secretary of Defense would curtail the production of it by some 24 ships. Mr. Work, every objective study, whether it be the Director of Operational Test and Evaluation, the Government Accountability Office, every other objective observer, the LCS has not been anywhere near what it was presented to for Congress by funding. This, again, makes me wonder about your qualifications, because the one thing that we are plagued with is significant cost overruns and lack of capability.

I thank you, Mr. Chairman.

Senator REED. Thank you, Senator McCain.

Senator Donnelly.

Senator DONNELLY. Thank you, Mr. Chairman.

Senator Warner, Senator Nunn, thank you for your tremendous service. I am blessed to follow Senator Lugar, and he and Senator Nunn will be in my home State tonight to talk about these issues. Thank you for everything you've done for our country.

Mr. Work, what I'd like to start off with is that article yesterday in Reuters, "Iraq Signs Deal to Buy Arms from Iran". Now, they have come here and talked to us about possible arms purchases. One of the big problems has been, how do you sell arms to a country where the army is 93 percent Shia and they have purchased them from Iran? Where does that leave us there now?

Mr. WORK. Sir, I haven't been briefed on the particulars of the report. If confirmed, I would take a look seriously at these and work with the Under Secretary of Defense for Policy, as well as the other Under Secretaries, to look at this issue very closely.

Senator DONNELLY. In this position, what are your ideas on how to get Iraq in a better place in regards to how we view it, the sectarianism just seems to continue to grow, which will, as it looks, if it continues that way, lead to a possible implosion there?

Mr. WORK. The sectarian violence in Iraq is very troubling. I know that the Department is looking at different aid packages for the Iraqi security forces, and, if confirmed, I would look very hard at this issue. But, I have not been briefed on any particular plans in this regard.

Senator DONNELLY. Let me ask you about Syria and the presence of al-Nusra and other al Qaeda-related forces. Do you see those forces growing in Syria right now? What strategies do you have in mind as to how to deal with that?

Mr. WORK. As DNI Clapper has said, Syria is now the magnet for many of the foreign fighters of the global jihadi movement. You even see different types of al Qaeda affiliates, or people who are associated with the movement, starting to fight against themselves. The Islamic State of Iraq (ISIS) in the Levant, are actually fighting against al-Nusra. This is a very big problem, as DNI Clapper has stated. If confirmed, I'd look forward to working with Ms. Wormuth, if she is confirmed, and also the uniformed officers, to look at all military options that are on the table.

Senator DONNELLY. Ms. Wormuth, do you have any ideas on this?

Ms. WORMUTH. Senator, I would agree with Mr. Work, that we would want to work, I think, carefully with our interagency partners, with our European partners who share our concerns about the growing extremism in the region. We've already been doing quite a bit of work with the Jordanian armed forces and the Lebanese armed forces to try to help them enhance their border security. But, we're certainly concerned about the flow of foreign fighters into Syria.

Senator DONNELLY. Let me ask you, Ms. Wormuth, about military suicide, as well. I see this as an incredible challenge, an incredible problem, and an obligation we have to eliminate. I was wondering your views on how we can reduce it to zero.

Ms. WORMUTH. Senator, I share your view that this is a terrible problem, and it's a very perplexing problem, I think, that the De-

partment of Defense has been putting a lot of energy in, in the last several years.

If I were to be confirmed, I would certainly want to do everything possible to work with the Under Secretary Organization for Personnel and Readiness (P&R) to try to find as many solutions as possible. I think we need to look at the number of providers we have to provide counseling, to try to look at what we can do to help servicemembers deal with some of what we think are the underlying causes of suicide—financial issues, substance abuse, for example. But, it's a very difficult problem, but one, I think, that we have to continue to put energy against.

Senator DONNELLY. As I mentioned to you yesterday, we are expecting a report from DOD, in line with a piece of legislation I have authored. Your assistance in helping to provide that to us, I would appreciate it a great deal, because this is a problem not only for those who are deployed, but also at home, as well. It seems, when we lost more young men and women to suicide than in combat in 2012, this would be right at the very top of the plate of everything we're trying to do.

Mr. McCord, one of the things that, in reviewing numbers, has seemed to become clear is that, in many cases, the Guard can do it for a lower cost. When the Reserve or the Guard operates at about one-third of the cost of Active Duty, how will this factor into your recommendations, going forward, as we look at some of the changes that Secretary Hagel and others have talked about and in the budget environment we're in?

Mr. McCORD. Senator, you're correct that cost is one of the factors that we have absolutely taken into account as we've gone through the recommendations, starting last summer, with these so-called Strategic Choices and Management Review leading on into, then, the budget that will be delivered to you next week. As you say, the Reserve component forces are less expensive when they're not mobilized. That difference tends to shrink quite a bit once called up.

The other main factor that we're considering, though, is the deployment times, the so-called "dwell times" that are the standard and the understanding that things like 1-to-3, 1-to-5 ratios—that we have to balance what's realistic of what we get out of the Reserve components while still maintaining the dwell-time commitments that we'd like to make with them.

Senator DONNELLY. Okay.

Ambassador Shear, when we look at North Korea, we see possibly a string of some of the most unstable decisions one could look at. What is your impression of the decisionmaking chain there, how those decisions are made? Who will we reach out to, to try to put some influence on decisions that are made there?

Ambassador SHEAR. Senator, I think the decisionmaking chain in North Korea is extremely unclear. They are in the midst of a succession, a political succession in which Kim Jong-un is trying to secure his leadership. We will be watching that very closely, of course. We want a complete verifiable and irreversible denuclearization on the Korean Peninsula, through authentic and credible negotiations. We consistently reach out to the Chinese, among others, to encourage them to use what leverage they have

with North Korea to encourage the North Koreans to be more moderate.

Senator DONNELLY. Thank you, Mr. Chairman.

Senator REED. Thank you very much, Senator Donnelly.

Senator WICKER, please.

Senator WICKER. Thank you, Mr. Chairman.

First, for Mr. Work, you are a former Marine Corps officer and former Under Secretary of the Navy, so you know a lot about amphibious warships. I have a yes-or-no question to ask you, but let me preface it by saying I believe they are a necessity to project American influence in regions such as the Asia-Pacific. I hope you agree. Amphibious ships are versatile, interoperable, and survivable platforms that are able to meet the full range of military and humanitarian missions abroad.

I do remain seriously concerned that our Navy may be unable to support all requests for amphibious ship support from our combatant commanders. I secured a provision in the most recent National Defense Authorization Act (NDAA) that calls for the Commandant of the Marine Corps to report to Congress on the number of amphibious ships required for the Marine Corps to execute the President's national security strategy. This committee eagerly awaits the Commandant's findings later this year.

Mr. Work, if you are confirmed, will you pledge to meet with me and other members of the committee within 30 days to discuss, in plain English, the Department of Defense's plan to provide sufficient amphibious ships to execute the full range of operational requirements from the combatant commanders?

Mr. WORK. Yes, sir, I will.

Senator WICKER. Thank you very much. I appreciate that, and I look forward to a further conversation.

Mr. WORK. Sir, if I could make one correction, for the record. I am a marine and a former Under Secretary.

Senator WICKER. When I was reading that statement, I expected to be challenged. [Laughter.]

At least in the minds of all the marines in the audience and within the sound of my voice. Thank you for clarifying that. If I had seen Senator Roberts on the floor, he would have made that correction, also.

Now, let me move to Mr. McKeon. There's been some publicity about a letter that Senator Ayotte and I wrote to you on February 20, 2014, citing, at the outset, a January 29, 2014, New York Times report that the Obama administration has known, for years, about potential Russian violations of the Intermediate-Range Nuclear Forces Treaty, the INF Treaty, that bans testing, production, and possession of medium-range missiles. Apparently, American officials believe Russia began conducting flight tests of a new ground-launched cruise missile, in violation of the INF Treaty, as early as 2008. Now, this would have been very helpful information to the Senate when we were discussing the New Strategic Arms Reduction Treaty (START) in 2010.

Senator Ayotte and I wrote a letter asking, in part, "As the Senate Armed Services Committee considers your nomination to be Principal Deputy Under Secretary of Defense for Policy, we request that you provide the committee with answers to the following ques-

tions. Number one, were you aware of any intelligence regarding potential Russian violations of the INF Treaty in 2010, when we were considering the new treaty with the Russian Federation?" Which has apparently violated the previous treaty. "Number two, do you believe that the Senate should have been made aware of any potential Russian violations of the INF Treaty during consideration of the New START treaty? Number three, do you believe the Senate was made aware of any potential Russian violations of the INF Treaty during consideration of the New START treaty? If so, please provide details." And, "Number four, questions of how to respond to arms-control cheating and noncompliance are ultimately policy decisions. One year from now, if Russia is not in compliance with this treaty, in your current position or in the position for which you are nominated, do you believe the United States should continue to comply with the older treaty, the INF Treaty?"

We sent this to you on February 20, 2014, in anticipation of this hearing, and, at the close of business yesterday, we still did not have an answer to this letter. Turns out that, around 8 p.m. last night, after most staff had left, and after the Senate had finished voting and people were on their way home, a letter was delivered to the committee, in answer to Senator Ayotte's and my letter. It was delivered at the codeword security level [TS/SCI].

Senator Ayotte and I are under some very serious constraints in asking you about this letter today. If I were cynical, I would wonder why this letter was not responded to earlier so that Senator Ayotte and I and our staffs and people with codeword security clearance who advise us on this side of the aisle in the committee could thoroughly look at the letter, consider the answers, and ask you questions in a non-classified manner. If I were cynical, I would question the fact that the response was delivered so late and in such a way that we're really not able to get into the answers to our questions in this hearing.

Let me just ask you in this way, Mr. McKeon. President Obama recently gave a speech calling for further cuts to our nuclear deterrent. He stated, "We need to work with Russia on new arms-control agreements that go beyond New START levels." Did you play a role in drafting this speech, sir?

Mr. MCKEON. Senator, I probably saw drafts of the speech. I think you're referring to the speech that he gave in Berlin during his trip to Germany last June?

Senator WICKER. Yes, I am.

Mr. MCKEON. I probably saw drafts, and maybe I made comments, but I don't recall with any specificity.

Senator WICKER. Can you say whether the President knew about these major violations of the arms control agreement at the same time he was making a speech calling for further cuts and for further working with the Russian Federation on arms control?

Mr. MCKEON. I don't know when the President has been informed of the issue that you've described. I'd have to check on—

Senator WICKER. You don't know what the President knew, and when he knew it?

Mr. MCKEON. That's correct.

If I could answer, briefly, your reference to the letter, I apologize that it got here so late last night. I very much wanted to get it here

earlier. I was coordinating with the committee staff to inform them of our progress to try to get it here. One of the great joys of working in the executive branch, as opposed to the legislative branch, is, you get to coordinate your letters with about 50 people, and the clearance process took longer than I would have liked. I apologize that you got the letter so late.

What I can say about that issue, sir, is, as you know from the letter, which I hope you've read by now, is that we are concerned about the Russian activity that appears to be inconsistent with the INF Treaty. We've raised this with the Russians. The Russians have come back to us with an answer which we do not consider to be satisfactory, and we've told them the issue is not closed.

Senator WICKER. When did you raise it with the Russians?

Mr. MCKEON. It's been raised with the Russians by several officials—this particular issue that you're referring to—over the course of the last 6 to 8 months, but I don't know the specific dates. I'd have to check on that.

Senator WICKER. If you can supply that to the committee in a non-classified answer, I would appreciate it.

[The information referred to follows:]

This matter was raised by senior administration officials in three meetings with Russian officials in May 2013, including by Deputy Secretary of State William J. Burns and Acting Under Secretary of State Rose Gottemoeller. It was raised with a Russian official by Under Secretary of Defense for Policy James Miller in December 2013. It was also raised in meetings with Russian officials by Acting Under Secretary of State Rose Gottemoeller in June 2013, August 2013, October 2013, November 2013, and February 2014.

Senator WICKER. Let me just say—I don't know whether you can answer this or not, based on the letter that you sent, but if you had such information during the context and during the timeframe of the 2010 deliberations on the New START treaty, you would have felt dutybound to give that information to members of the Senate who were voting on the treaty, would you not?

Mr. MCKEON. Sir, as you may recall during September 2010, on the eve of the vote in the Foreign Relations Committee in mid-September, there was an issue that the Intelligence Community (IC) flagged for us and for this committee and the Foreign Relations Committee, and I believe it was literally the day before the committee's vote. General Clapper, when he appeared in an all-Senators briefing, late that month, which was focused primarily on the National Intelligence Estimate on the IC's ability to monitor New START, raised this issue, as well, and told that the Senators that were there in the Senate briefing about this issue that had been raised in the middle of September that implicated possibly New START, possibly INF.

I believe, sir, that the IC and the executive branch were committed to providing timely information about potential concerns.

Senator WICKER. I don't think I can ask you the substance of what was told to the committee, can I, in this setting?

Mr. MCKEON. No, I'm afraid not.

Senator WICKER. Yes, okay.

You can understand the position that places the committee today.

Mr. MCKEON. I do, sir, and I can't really get around it. The information that is involved here is highly classified. As General Clap-

per said when he was here 2 weeks ago for the threats hearing when he was asked about this issue, he said a lot less than I did and wanted to defer all of it to a closed session, which I believe you are having later this week.

Senator WICKER. Let me just say that I have very serious concerns about this, and I will alert members of the committee and members of the Senate that I do not believe this committee and this body was provided with all of the information that you had and that we needed to know to cast a fully informed vote on the New START treaty. But, we will follow up in the proper context.

Thank you, Mr. Chairman.

Senator REED. Thank you, Senator Wicker.

Senator BLUMENTHAL.

Senator BLUMENTHAL. Thank you, Mr. Chairman.

Thank you all for your service to our Nation, both in your past and what you will do when you're confirmed, which I assume will happen, and I'm proud to be here and to support your nomination.

Mr. Work, let me begin with you and ask you a couple of questions about the HH-60G Pave Hawk combat rescue helicopter. The NDAA included the replacement of the aging 30-year-old helicopters that have served to rescue our downed warfighters in the past—in that measure. The Senate approved it. It has also included it in the budget, \$330-plus million, for this fiscal year, to support the development of the replacement airframe. I'd like a commitment from you that this program will be carried forward, as is the intent and mandate of Congress.

Mr. WORK. Senator, I don't know if I can make a firm commitment. I promise and I'd vow to work with Congress to work through this issue. As it was briefed to me, the Department is struggling to try to come up with the overall size and capability and capacities of the combat rescue force. It may be that the Department would come back and recommend some changes. But, I will promise and vow that I will work closely with you and all members of the committee and Members of Congress to make sure that this issue is looked at very carefully.

Senator BLUMENTHAL. You'd agree, wouldn't you, that the mission of rescuing our warfighters in peril is one of predominant urgency?

Mr. WORK. It's a very, very high priority mission. Yes, sir.

Senator BLUMENTHAL. The 30-year-old helicopters that now do that mission have to be replaced, do they not?

Mr. WORK. Yes, sir, they do.

Senator BLUMENTHAL. It would seem that this project is one that has to be reauthorized and that the spending has to be made in some form, does it not?

Mr. WORK. Yes, sir. I spoke with the Vice Chief of Staff of the Air Force, and they are looking at this very hard. I look forward to being briefed fully on it, if confirmed. I look forward to working with you.

Senator BLUMENTHAL. I would like your commitment, on behalf of myself and other colleagues who are very intent that the will of Congress be carried out, that this project go forward.

Mr. WORK. I commit that anything in the law, Department of Defense will follow through. There will be cases where we might come

back and recommend alternatives, but the mission remains the same. There will be systems purchased, and I guarantee you that we will work with Congress to find the right answer.

Senator BLUMENTHAL. The question will be one of perhaps timing and alternative forms of the contract that's authorized, but the mission has to be accomplished, and the helicopters have to be replaced.

Mr. WORK. That is correct, is my understanding, yes, sir.

Senator BLUMENTHAL. Thank you.

Turning to the base realignment and closure (BRAC) proposal that the Secretary of Defense made yesterday—and I'm not going to expect that you would contradict the Secretary of Defense. The recommendation made last go-around was not adopted by the Senate or Congress. The reason is, quite simply, in my view, BRAC is not cost-efficient. Do you have some facts that would contradict that contention?

Mr. WORK. Sir, I believe all of the prior BRAC rounds, up to 2005, did achieve savings, and the 2005 BRAC round was broken up between what was called a "transformational BRAC" and an "efficiencies BRAC". The efficiencies BRAC did achieve significant savings. I believe what the Department of Defense is asking is, in the future, if we are granted the authority for a BRAC, that we would approach the problem in that regard. I would expect to see savings.

Senator BLUMENTHAL. Isn't there excess capacity in overseas military installations?

Mr. WORK. I believe there is. I have not been briefed fully, but I understand that the Department is looking carefully at the laydown of bases in Europe and will be coming back and making recommendations on modifications to that.

Senator BLUMENTHAL. Has any actual action been taken to eliminate that excess capacity?

Mr. WORK. Since 2001, I don't know the exact figures, sir. I will get back to you, on the record. But, since 2001, there has been significant reductions in basing structure overseas, but I just don't know the numbers off the top of my head.

Senator BLUMENTHAL. I'd appreciate the numbers, if you can provide them. Thank you, Mr. Work.

[The information referred to follows:]

Between 2000 and 2011, the Department decreased the number of sites in Europe from 523 to 366 (a 30-percent reduction). Of the 366, an additional 70 sites were in the process of being returned to host nations, with another 62 identified for possible return. These returns are being validated through the European Infrastructure Consolidation (EIC) process, along with options for additional reductions. Once the EIC initiative is complete the Department expects the number of European sites will have decreased by more than 55 percent since 2000.

EUROPEAN SITES BY YEAR												
COUNTRY	YEAR											
	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
Germany	326	328	310	306	302	293	287	268	260	235	195	196
Italy	48	51	55	95	61	61	89	83	86	68	60	59
Spain	6	6	6	8	4	5	4	5	5	5	5	5
United Kingdom	52	55	54	64	52	51	57	45	48	47	33	33
Miscellaneous*	91	90	83	87	82	81	81	81	82	77	68	73
	523	530	508	560	501	491	518	482	481	432	361	366

* Includes Belgium, Greece, Netherland, Portugal, Turkey, etc.

Senator BLUMENTHAL. Just to finish on this topic, shouldn't we be closing or eliminating that excess capacity before we talk about another round of BRAC, which, in many ways, has been extraordinarily costly? I would appreciate, also, the numbers on BRAC that support its supposed cost-effectiveness.

Mr. WORK. Yes, sir. I believe Secretary Hagel and the Chairman of the Joint Chiefs believe that these can work in parallel, that there is over-capacity both in our continental U.S. infrastructure as well as overseas, and that we would hope to work with Congress in a parallel fashion to reduce it.

[The information referred to follows:]

I understand that historically savings from Base Realignment and Closure (BRAC) have been substantial. The first four rounds of BRAC (1988, 1991, 1993, and 1995) are producing a total of about \$8 billion in savings, and BRAC 2005 is producing an additional \$4 billion in annual, recurring savings.

I understand that even though the BRAC 2005 round required an investment of \$35 billion, that investment is paying the Department \$4 billion a year—in perpetuity. Thirty-five billion dollars is a significant investment, but also an aberration when compared to the cost of BRACs generally. BRAC 2005 were higher because half of the recommendations were not designed to save money but to achieve other goals. This portion of BRAC 2005—the so-called “Transformation BRAC”—was comprised of reorganizations and movements of functions to transform infrastructure (and of a nature that could only be accomplished as part of the BRAC process). This portion of BRAC 2005 cost \$29 billion and is saving \$1 billion annually—but these recommendations were pursued because of their transformational value to the Department, regardless of the cost.

If one isolates the remainder of the BRAC 2005 (the Efficiency BRAC portion of BRAC 2005), these recommendations had a payback of less than 7 years—one sees a [one time] cost of \$6 billion and savings of \$3 billion per year in perpetuity. This is similar to what the Department experienced in the 1993/1995 rounds, and it is what I understand the Department expects from the BRAC 2017 round it is requesting.

Senator BLUMENTHAL. Turning to the utilization of our National Guard and Reserve in force, Ms. Wormuth, I'd like to ask you to take a very close look as to whether Executive Order 13223, which was enacted on September 14, 2001, by President Bush, is still necessary. As you probably know, the order enables up to 1 million members of the Reserve component to be called up for Active Duty for up to 2 years. This year, we're completing our major force presence in Afghanistan. That's the action that necessitated the order. Although the Department has good force management plans now in place, I think that rescission of this Executive order, the withdrawal of it, would be a powerful symbol of the stability to guardsmen, their family, and their employers. I'd ask for your comment.

Ms. WORMUTH. Senator, I would be happy to go back to the Department, if confirmed, and work with, again, P&R—in particular, the Assistant Secretary for Reserve Affairs—to look at that order and to assess whether we continue to need those authorities. We also have additional mechanisms to access the Reserve component. I think it's very fair to go back and look at the range of callup authorities we have, to see which ones continue to be useful in the future.

Senator BLUMENTHAL. Would you agree that rescission of that one would send a message about the stability and the new era that we're entering to our National Guard and Reserve?

Ms. WORMUTH. Senator, I would want to look carefully at the Executive order before making a final recommendation to the Secretary. I certainly think we are looking to find policy ways to move off of the perpetual war footing that we've had for the last 10 years. But, again, without looking in detail at the Executive order, I wouldn't want to make a commitment at this time. I'd commit to look at it for you.

Senator BLUMENTHAL. Thank you.

Thank you very much. My time has expired. I have a lot more questions. I may submit some more for the record. I thank all of you for being here today and for your very helpful and informative answers.

Thank you.

Senator REED. Thank you, Senator Blumenthal.

Senator Ayotte, please.

Senator AYOTTE. Thank you, Mr. Chairman.

I want to thank the witnesses for being here today.

Let me follow up, Mr. Work, on the question that Senator Blumenthal asked you with regard to BRAC. I would like you to give us a commitment that the Department of Defense will not undertake BRAC without the approval of Congress, and will also not try to undertake BRAC through a workaround that undermines the will of Congress without seeking our approval for a BRAC round. Will you give me that commitment?

Mr. WORK. Senator, as I understand, the wording of the speech yesterday was that Secretary Hagel believes that there are some authorities that the Department could use, but I don't know what those authorities are. I commit to you that, if confirmed, I will work with the Department to get back to you. Of course, we would not start a BRAC unless we are given explicit approval in the law.

Senator AYOTTE. I take that as a lack of commitment. That troubles me, because I believe that Congress should be in the position to approve BRAC and that there should not be a runaround done. That troubled me in the Secretary's comments yesterday, and I believe this is a very important issue for the authority of this committee, in particular, that Congress should be the body to approve a BRAC round, not for the Department of Defense to undertake this on its own initiative without the full approval of Congress. I do expect an answer on that.

I would like to know, from the Secretary, in particular, what authority he believes he does have, so that we can be aware of it here, so that we can exercise appropriate authority to make sure that

our voices are heard here on the policy matters. I think this is a very important issue, and I would like a followup answer to that.

Mr. WORK. Yes, ma'am.

[The information referred to follows:]

I understand that the Department only has authority to undertake a Base Realignment and Closure (BRAC) round if Congress authorizes it to do so; that is why the Department has repeatedly submitted legislation to authorize a BRAC round.

I also understand that the Secretary of Defense has the authority to close and realign military installations outside of a traditional BRAC round, provided that action does not trigger the thresholds established in section 2687 of title 10, U.S.C. If the action exceeds the thresholds in the statute, the Secretary still has the authority to undertake the action, but only after satisfying the study and congressional reporting requirements and waiting the specified period of time. This is the authority to which the Secretary referred.

Senator AYOTTE. Thank you.

Mr. McKeon, I wanted to follow up on some of the questions that my colleague Senator Wicker asked you with regard to the INF—potential Russian INF Treaty violation. I understand that the answer, in terms of what you said to this committee, is that, in fact, there was information provided—I believe it would have been to the Senate Foreign Relations Committee—that would be addressing the potential New START treaty in September 2010. But, obviously, we can't discuss the substance of that information in this setting. Is that what you just testified to, that there was information provided to that committee about potential matters related to the INF right before—and that was on the eve of the vote, I believe you said?

Mr. MCKEON. What I said, Senator, was, there was a briefing by the Intelligence Community. I am informed by a former colleague from the Foreign Relations Committee that it was for the senior staff of the Foreign Relations Committee, the Intelligence Committee, and this committee, as well as the Senate leadership, and that was on or about September 15, 2010. Later that month, after the committee had voted, General Clapper appeared, in a all-Senators briefing, where he raised the same issue.

Senator AYOTTE. Now, without getting into the substance of the material that was provided, just to be clear, that wasn't all the information that the Intelligence Community possessed at the time that may have related to potential Russian INF violations, was it, Mr. McKeon?

Mr. MCKEON. Senator, I'm hesitant to get into any more detail about this issue. I've laid it out in great detail in my 3-page letter to you.

Senator AYOTTE. Let me reframe the question. In a more generic fashion, one of the responsibilities that is very important is that we receive a compliance report on treaties, correct? There's a compliance reporting mechanism that comes forward to Congress?

Mr. MCKEON. That's correct. There's a statutory provision that requires it.

Senator AYOTTE. That's right. When there is a situation where there is ambiguity as to whether a particular country has complied with a treaty of the United States, do you believe, when there's an ambiguity, that the Intelligence Community has a responsibility to brief policymakers, and that policymakers, in turn, have a responsibility to brief the U.S. Senate, whether they are calling it ambi-

guilty or not? How do you know, and when do you then brief the U.S. Senate?

I think this is a very important issue for us, particularly when we are considering new treaties, when the Intelligence Community may be aware, even if they are unsure what it means. How do you draw that line?

Mr. MCKEON. Senator, as somebody who worked up here for 20 years, I think it's essential that there be a regular dialogue between the executive branch and Congress on issues. The administration, as I understand it, the State Department in particular, regularly updates the Foreign Relations Committee on compliance-related issues, and has done so throughout the tenure of President Obama.

When we came into office, the compliance report, the annual report that you referred to, had not been submitted for several years, so we had some work to do to make up for the work that had not been done in the last few years of the Bush administration. As a general matter, I agree with you that we have to have a regular dialogue with the national security committees on compliance issues.

Senator AYOTTE. Can you tell me, in answer to my specific question, if there is a potential violation of a treaty, generically, and the Intelligence Community has information that exists that they're not sure whether it is a violation or it isn't a violation—in other words, it could potentially be a violation—do you believe that's the type of information that should be provided to Congress?

Mr. MCKEON. Senator, that's a fairly broad and abstract question, and I'd rather get into a specific issue with you in a closed session or in private, if you would permit me. Because I know what you're getting at, and I don't think it's right for me to talk about it in an unclassified forum.

Senator AYOTTE. Fair enough. We will get into it in a classified forum.

Let me just say, for the record, that I believe that we were not fully informed—meaning, I wasn't even in the U.S. Senate then, when the New START treaty was taken up, and that, regardless of how the Intelligence Community viewed particular information, that Congress should be fully informed. I do look forward to taking up the specific issue with you, in a classified setting, but it's not just you. Mr. McKeon, I appreciate that you're here before us today. There were certainly other individuals that certainly should be questioned about this. I don't mean to single you out, here. This is a very important issue for Congress.

I have other questions that I will submit for the record.

I know my time is up, but, very quickly—would you agree with me that a violation of the INF Treaty is a serious matter?

Mr. MCKEON. Yes, I would.

Senator AYOTTE. I thank you very much, and I thank all the witnesses for being here today.

Senator REED. Thank you, Senator Ayotte.

Senator King, please.

Senator KING. Thank you, Mr. Chairman.

Mr. Work, industrial base. What sections of the industrial base do you believe are under the greatest threat as we go through this

continued period of budget tightness, budget austerity? Do you see mitigation measures we can take so that we have the industrial base that we need when we need it?

Mr. WORK. Senator, I think there are large portions of the industrial base that are in threat simply because the amount of spending and investments and research and development (R&D) have been coming down. The aerospace community, right now, has two tactical fighter production lines. We've stopped building our wide-body aircraft. We do have the bomber coming online, as well as new unmanned systems. I don't know the exact state. If confirmed, I'd have to ask Secretary Kendall.

The shipbuilding industrial base right now is, I think, solid, but it is under pressure because of lower investments. Once again, if confirmed, I'd work with Secretary Kendall, who has a very, very good feel for this, and would work with Members of Congress to address industrial-base issues.

Senator KING. Do you agree that this is a significant issue that we need to pay attention to, just as we do compensation, training, and other matters under the jurisdiction of this committee?

Mr. WORK. I absolutely do, yes, sir.

Senator KING. Ms. Wormuth, what's your opinion of the appropriate force level and capacities that the United States should retain in Afghanistan after 2014? What's your understanding of the latest date that we can wait until in order to get some resolution of that important policy question?

Ms. WORMUTH. Senator, I think the President is still reviewing options for what our enduring presence should be after 2014, but I think we're looking at the kinds of capabilities we need to both pursue our counterterrorism objectives in Afghanistan, but also our train-and-advise mission with the Afghan national security forces. As we look at that, we are, again, weighing the options, and there are a variety under consideration.

It is very important that we sign a bilateral security agreement with Afghanistan. My understanding is that the President will be speaking with President Karzai this morning and will be raising that topic, and there will be a readout of that call.

Senator KING. I'd like to listen in on that call. That'll be a pretty interesting call, I suspect.

Ms. WORMUTH. I think as we move further into the spring and early summer, we are going to come to some decision points, in terms of our ability to move forces out of the region. Even more than our own forces, our coalition partners, who don't necessarily have the same flexible logistics system, they are going to be approaching decision points, in terms of very much needing to have that agreement or having to make decisions to move forces out.

Senator KING. As a policy advisor, what is your personal opinion? Do you believe we're going to have to maintain some force in Afghanistan after 2014?

Ms. WORMUTH. I think it's important that we find ways to support the Afghan security forces and the government, in terms of bringing more stability to the region. I haven't been fully briefed on the options that are being considered, but we need to, I think, pursue a variety of mechanisms to be able to help the Afghans have stability. Again, we have significant contributions and com-

mitments from international partners that I think are going to be important, in addition to what military capabilities we may retain in place.

Senator KING. The counterterrorism basis is an important consideration, as well.

Ms. WORMUTH. Yes, Senator, absolutely.

Senator KING. Mr. McKeon, we just received a worldwide threats briefing from the leaders of the Intelligence Community, and a common theme was cybersecurity. In fact, I think every hearing in defense and intelligence that I've been in, practically for the past year, has talked about cybersecurity. If confirmed, will this be a high priority for you in dealing with this threat? What do you consider the appropriate role for the Department to play in defending commercial assets from cybersecurity threats?

Mr. MCKEON. Senator, as a general matter, I agree with you about the concern of the threat. As to the specific duties that I may undertake, if Ms. Wormuth and I are both confirmed, I think we have discussed, in general terms, about having a division of labor so each of us are focusing on a set of issues, but we've not completed those discussions. Since she outranks me, she'll get the first choice, I suspect, of which issue she would like to work on.

In terms of our protection of the defense industrial base, I've not been deeply briefed on the DOD programs on this, sir, so I'd have to get back to you on that.

Senator KING. I just hope that this is a priority for this panel, for this administration, because I think this is our area of maximum exposure. The incident that occurred—I see Senator Manchin is no longer here—but, the incident that occurred in West Virginia was an accident, and it could have easily been an act of some kind of sabotage akin to a cyber attack. We're vulnerable, and your title is the Department of Defense, and I hope that you will take this as a very serious threat before it materializes.

Ambassador Shear, southeast Asia. What's our role in these territorial conflicts that are in the region in the South and East China Sea? My concern is, we have mutual defense treaties with Japan, South Korea, the Philippines, and I would certainly hate to see a Guns of August situation, where minor conflicts escalate into something which engages us in a major conflict in that region.

Ambassador SHEAR. Senator, we are very concerned about the possible effects those territorial claims could have on regional peace and stability. We watch it very closely. We, of course, support a peaceful negotiated solution to those conflicting claims. We would look with great concern on the use of force or coercion in the region. While we don't take sides in those territorial disputes, we do believe that claims should be based on customary international law, and that claims should be generated from land features, and that they should be consistent with international law.

We, of course, consult very closely with the Chinese as well as with our allies, on this issue.

Senator KING. Thank you very much.

I'll have other questions I'll be submitting for the record.

Thank you all.

Senator REED. Thank you very much.

Senator Fischer, please.

Senator FISCHER. Thank you, Mr. Chairman. My thanks also to the Ranking Member and to the panel for being here today. I appreciate it.

Mr. WORK, in your previous position with the Center for Strategic and Budgetary Assessments, you wrote about making some significant changes to the Navy's force structure, particularly about focusing on smaller platforms, as opposed to large surface ships. Do you think that we need any kind of paradigm shift for our nuclear forces?

Mr. WORK. Senator, I believe the current plan for our nuclear forces is very sound. Secretary Hagel is committed to the triad and having a safe, secure nuclear deterrent. We're moving to a three-plus-two warhead scheme in which we go to three interoperable warheads for our intercontinental ballistic missiles (ICBM) and our submarine-launch ballistic missiles, and only two air-delivered weapons. I think this is a very sound approach. We need to really focus in on costs now, and I applaud Congress for writing into the 2014 NDAA to establish an Office of Cost Assessment and Program Evaluation (CAPE)-like capability at the NNSA so that we can reduce costs as we pursue this plan.

Senator FISCHER. You would share the views of your predecessor, Dr. Carter? When he was here before the committee, he and I had a conversation on this, and he stated that the impact of sequestration on the deterrent was the last thing that we would want to do serious damage to. Would you agree with his assessment on that?

Mr. WORK. Yes, ma'am, I would. Secretary Hagel indicated that keeping the nuclear deterrent safe was job number one.

Senator FISCHER. I was encouraged to hear the Secretary say that in his comments yesterday, in support of all the legs of the triad.

Do you know if there is any contemplation in the future at looking at changing any of the structure on the triad, any of the emphasis on any of the different legs of the triad?

Mr. WORK. Ma'am, I'm not aware of it. If confirmed, this is one of the issues that I expect I would be centrally involved in.

Senator FISCHER. With our nuclear forces, it's not a big part of the budget. I'm sure you know it's about 4 percent of the national defense spending in 2014. Do you think we're getting a good bang for our buck on that?

Mr. WORK. I believe we do. I think we should always look at every part of our program, and our nuclear deterrent is absolutely at the top of the list. Pursuing that in the most cost-effective way I think is a principle that we should all aspire to.

Senator FISCHER. How do you think we're doing on modernization?

Mr. WORK. I believe the *Ohio* replacement program is proceeding apace. That is going to be a very difficult program, simply because of the costs, and the impacts on the Navy's shipbuilding budget are a matter of concern, I think, for everyone in the Department. I understand that moving with the B-61 is proceeding—the air-delivered bomb. Also, there is a well-thought-out plan. I believe the plan is well resourced right now. It's under stress, like all of the other parts of the budget. If confirmed, I vow to work with you and other

Members of Congress to make sure we have a safe nuclear deterrent.

Senator FISCHER. Thank you for that. Do you believe there are ways around sequestration so we can make sure that we do maintain the strength of our nuclear deterrent? If so, can you share those?

Mr. WORK. At the full BCA sequestration levels, prioritization is key. Secretary Hagel said the nuclear deterrent is at the very top of the priority list. I would expect it to remain there. The workaround in sequestration is really being ruthless about your prioritization.

Senator FISCHER. Thank you.

I think this next question would apply to the nominations of Ms. Wormuth and also Mr. McKeon. I'd like for you to provide me with a written explanation of the Department's understanding of section 8128 of the omnibus appropriations bill. I'm going to make a statement, here, more so than a question.

It's clear to me that this section prohibits the Department from undertaking any environmental studies related to the ICBM silos. If the Department has any different interpretation or is taking any action to the contrary, I want to know.

I'll get you that question for the record so that you can respond in writing. I would urge you to do so quickly. Would you please get me an answer to that when you receive it, then?

Ms. WORMUTH. We will do so, Senator.

Senator FISCHER. Thank you.

Mr. Work?

Mr. WORK. Yes, ma'am.

Senator FISCHER. Mr. McKeon?

Mr. MCKEON. Yes, Senator, we'll do that.

Senator FISCHER. Okay. Thank you so much.

Thank you, Mr. Chairman.

Senator REED. Thank you very much, Senator Fischer.

Before I recognize Senator McCaskill—I've conferred with Senator Inhofe—we have votes beginning at 11:15 a.m.—about five votes. We're going to continue the hearing. Senator Inhofe and I will go to the floor as quickly as possible, and return. In the interim, I would ask my colleagues, based on seniority, to take the chair in my absence. We will allow everyone to ask their questions before we adjourn the hearing. If a Republican colleague returns, obviously we will alternate back and forth.

With that general plan, Senator McCaskill.

Senator MCCASKILL. Thank you.

Thank you all. You have an amazing responsibility in front of you. I appreciate, as all Americans do, your willingness to serve.

We have been grappling with the tenacious and overwhelming problem of sexual assault in the military. Senator Gillibrand and I have worked together on a number of historic reforms that have been signed into law that you will have the responsibility of implementing. I know I can speak for her in this regard, that we're going to hold you accountable, that we're going to be paying very close attention to how all of this is done.

I wanted to take, though, a minute to ask some technical questions about the Gillibrand proposal, in terms of where we do have

a policy disagreement which would remove the command from any disposition authority on any crimes in the military, with a few exceptions—but, the vast majority of crimes, including writing bad checks and bunk theft and all of the things that currently are handled within the system with the current command disposition authority.

I have read the letter, from Elizabeth King, where she talks about the requirement that we would now have to have O-6s—colonels or Navy captains—in all of these new offices that would have to be stood up, the disposition offices. For some inexplicable reason, the amendment does not allow any new resources to be spent. Which means we would have to pull these O-6s from existing billets.

What I need from you, Mr. Work—and you're probably not prepared to answer it today—I need numbers. I need to know how short we are. The head of legislative affairs for the Defense Department says there's not enough O-6s to do it and that they would have to be pulled from positions they now hold as judges and as trial counsel and as supervising victim advocates. We would still be short, in terms of how many O-6s we have.

The question is, how would we do this if we have no new resources? Has there been any estimates done of the administrative costs of standing up these offices, which clearly—justice delayed is justice denied—if we're going to be trying to handle a bunk theft, a barracks theft in Afghanistan out of an office in the United States, has there been any calculation done of the time it was going to take for these decisions to be made? Or are we envisioning standing up these new disposition authority offices around the globe? Are these going to be new Judge Advocate General (JAG) offices that will be put various places?

I know some thought has to have been given to this, and I think it would be important for us to know the technical ramifications of no new resources being allowed to be used for this if, in fact, this were to pass into law.

Mr. Work, if you would make a commitment to try to get those numbers back to this committee, I think it would be very helpful.

Mr. WORK. I absolutely will, yes, ma'am.

[The information referred to follows:]

I understand that the Services have considered how they would implement a system that would require judge advocates in the grade of O-6 or higher to exercise prosecutorial discretion over many offenses under the Uniform Code of Military Justice. I also understand that the Services have estimated that this would require at least 74 O-6 judge advocate disposition authorities. That accounts for approximately one-fifth of all authorized O-6 judge advocates across the Services. The requirement that these 74 new billets be filled by O-6 judge advocates who "have significant experience in trials by general or special court-martial" would further limit the pool of O-6s who can be detailed to those new billets. As there are no Active Duty O-6 judge advocates without current assignments, reassigning 74 O-6 judge advocates to duties required by the bill would necessarily remove these senior judge advocates from critical billets as military judges, supervisory prosecutors and defense attorneys, and staff judge advocates. Additionally, I understand that many junior judge advocates and support personnel would also be required to staff these new offices.

Senator MCCASKILL. Thank you.

On Prisoner of War/Missing-in-Action (POW/MIA). Ms. Wormuth, are you familiar with the long problems we've had in this area?

Ms. WORMUTH. Senator, yes, I'm broadly familiar with the issues with Guantanamo Bay (GTMO).

Senator MCCASKILL. No, we're talking about—not GTMO—we're talking about recovering remains.

Ms. WORMUTH. I apologize, Senator. Yes, I'm familiar broadly, with that area, as well.

Senator MCCASKILL. We get daily complaints about the dysfunction at Joint POW/MIA Accounting Command. I have never seen a more inexcusable turf war in my life than the turf war that has gone on within this important responsibility within the military. Here's the problem we have right now. By the way, you know how long we've been talking about this? Decades. For decades, we have been talking about this. It's embarrassing, if you go back and read old GAO reports and old committee hearings on this subject, how long this problem has been identified and not fixed. Here's what you have. It's a little bit like Arlington National Cemetery. When you have too many cooks in the kitchen, when there's a problem, guess what everybody does? That's what you have going on right now. You have one function blaming the other function, and one part of the office blaming the other part of the office. I've taken enough time to get into this that, I will tell you, it is a mess. You have an opportunity to clean this up. You have an opportunity to do a clear chain of command and accountability in this area. It is costing millions of dollars for every recovery we have. Millions.

Now, I don't think any American will begrudge us spending this money to recover remains of our fallen. But, there's just a lot of work to be done here, and I want to be comfortable, Ms. Wormuth, that you are aware of it, because I believe it's going to fall in your folder.

Ms. WORMUTH. Yes, Senator, it will. It is a very solemn obligation. It's one that I take seriously, it's one the Department takes seriously. Certainly, we do have significant problems in this area. My understanding is that Secretary Hagel has very recently required that the Acting Under Secretary of Defense for Policy provide recommendations to him, within 30 days, on how we would propose to restructure the community to make it more effective and to have greater accountability.

I would be happy, if confirmed, to work with you and talk with you about the results of those recommendations. As you probably are also aware, we have other studies that our CAPE organization has undertaken in this area very recently.

Senator MCCASKILL. Yes, I'm aware of the CAPE study. My subcommittee that has looked at this really closely will be happy—it's on the Homeland Security and Government Affairs Subcommittee—but, we'd be happy to share with you, not only all the information we have, but, obviously, protecting whistleblowers giving you a taste of how bad it is.

Finally, Mr. Work, I want to just quickly go to our airborne electronic attack capability. If we have radar and surface-to-air missile batteries, if we have an anti-access aerial denial contested environment, right now, the only aircraft that can provide the capability of an airborne electronic attack, which is pretty important for our country to have, is the EA-18 Growler. With these challenges on the horizon and the need for our capability in this area of electronic

attack, can you talk about how we would benefit from additional electronic warfare capabilities?

Mr. WORK. Senator, airborne electronic attack, and all aspects of electronic attack, are going to be absolutely critical in this area of proliferating threats, as you have said. These type of capabilities are absolutely critical to support our aviation component, as well as other components of the joint force. The EA-18G is one critical component. It's a world-class platform. There are other capabilities that the Department is considering, such as stand-in jammers and other expendable decoys, et cetera. It's a very, very important subject. If confirmed, I would look very carefully at this, along with all other aspects of the force structure, to determine we have the proper mix of capabilities and capacities to meet our requirements.

Senator MCCASKILL. If we were to abandon the Growler, I would be anxious to hear what the capabilities would be to replace it, and where they are in the pipeline. I want to make sure that we do not leave ourselves exposed in this critical area, going forward.

Mr. WORK. Yes, ma'am.

Senator MCCASKILL. Thank you all very much.

Senator REED. Thank you, Senator McCaskill.

Senator Kaine, please.

Senator KAINE. Thank you, Mr. Chairman.

To the witnesses, thank you for your service and for being here today.

Mr. McCord, I'd like to ask you some questions and really focus on the speech that was delivered by Secretary Hagel yesterday, to just make sure I follow the concept. We do not have the budget. Secretary Hagel will be here next week, so I'm not going to get into line items, but just the concept in the speech in the one particular area that he mentioned.

My read of the speech is that a lot of the speech is about the continuing effect that full sequester cuts would have on the military budget, but also on the national security strategy of the Nation. Is that a fair statement?

Mr. MCCORD. That's correct. I think the Secretary did, yesterday, and will continue to try and distinguish between the path that we're going to present to you in the budget and a strict adherence to the BCA caps for the remainder of the period through 2021, and what a difference that's going to make to us.

Senator KAINE. Mr. McCord, I gather, from reading the speech, that, just as you indicate, the intent, when the budget comes, is to present us with alternative scenarios. A first scenario would be the full-sequester version, acknowledging the relief that the 2-year budget provided, to the tune of about \$30 billion in 2014 and 2015, but then, assuming that there's no additional sequester relief, that will be the budget that is presented, the full-sequester version. Then there's also an intention to deliver an alternative, which I would call the national security version, which would take the sequester version, but provide an additional \$115 billion of relief from sequester cuts, at least through the end of 2019. Is that your understanding?

Mr. MCCORD. Senator, that's pretty accurate. Let me just rephrase it a little bit, though.

The budget that we'll present is the higher level. That will be the President's budget, the higher level. The sequester alternative would really be described as a notional alternative, to illustrate the differences. But, there's not going to be two budgets.

Senator Kaine. I see.

Mr. McCord. There will be one, and it will be higher than the BCA caps for 2019.

Senator Kaine. But, the committee members and the public and all of the Senate will be able to look at the submission with both the President's budget submission and the discussion of what full sequester would mean, and see, essentially, the delta, in key line items and programs, between a full sequester and this sort of national security version that adds \$115 billion back. Is that correct?

Mr. McCord. We would certainly attempt—the Secretary and the Chiefs that will follow him, the Service Secretaries—to illustrate the major differences. As you say, not an excruciating line-item differential, but the major import of that difference. Yes, sir.

Senator Kaine. Just for the record, I would note that I think the format of this budget sounds like it will be very helpful, and it was a format that was, I think, suggested in a letter from Senators Levin and Inhofe to Secretary Hagel last summer. We really need to see what the delta is between an optimum and full sequester. I look forward to it.

My quick reading of the math on this would suggest, if we just go by what the Secretary said in his speech yesterday, that, if we opt for the President's budget—just wave a magic wand and say we'll do it, the national security version—DOD would still have absorbed over 60 percent of the sequester cuts, even if you add back in the \$115 billion and the \$30 billion that we provided as sequester relief in the 2014–2015 budget we just passed. Is that your general understanding?

Mr. McCord. That sounds accurate, Senator, and I could certainly provide detailed figures for the record if you desire.

Senator Kaine. I will ask that question in writing—because I think it's important to know that, based on the reading of the speech of the Secretary, DOD is not coming with a presidential budget submission asking for the elimination of sequester. I think what we will see is a budget where DOD and the President are saying, "We'll take 60 percent of the sequester cuts—whether we like them or not, we'll take 60 percent of the sequester cuts. Give us, in addition to what has already been done, additional sequester relief to avoid 40 percent of the sequester, in the interests of national security." It sounds like that's what we'll see with the presentation of the budget coming later in the week or next week.

Mr. McCord. Yes, Senator, since the BCA was passed, every year we have gotten some relief in some form from the absolute cap, but we've also gotten much less than we requested, every single year, from 2012, 2013, 2014. We've been cut about \$80 billion—over \$80 billion below what we requested each in those years. However, we have gotten about \$40 billion more than the absolute worst-case, lowest BCA caps, which were delayed 1 year, and then, as you alluded to, modified by the Murray-Ryan proposal in 2014–2015. There's been a middle ground that has been where we have taken a substantial part, more than half of the total sequestration

cuts, but not the entire amount. That informs the look, going forward in our budget, that is above the absolute sequester, but certainly mindful of the fiscal realities that we're going to take reductions from what we had proposed before.

Senator Kaine. Let me just use one example that I spoke with you and Mr. Work about yesterday. Then I'll ask each of you a question. This deals with carriers.

Secretary Hagel, in his speech yesterday, said, "The spending levels proposed under the President's budget plan would also enable the Navy to maintain 11 carrier strike groups. However, we will have to make a final decision on the future of the *George Washington* aircraft carrier in the 2016 budget submission. If sequestration spending levels remain in place in fiscal year 2016, she would need to be retired before her scheduled nuclear refueling and overhaul. That would leave the Navy with 10 carrier strike groups. But, keeping the *George Washington* in the fleet would cost \$6 billion, so we would have no other choice than to retire her, should sequestration-level cuts be reimposed. At the President's budget level, we would pay for the overhaul and maintain 11 carriers."

I'd like to ask both Mr. Work and Mr. McCord this. Do you support the presidential position, as outlined in the Secretary's speech, about the importance of maintaining an 11-carrier Navy?

Mr. Work. Yes, Senator, I do. The law of the land requires 11 carriers, and, if we had to go to the full sequestration level, we would have to get relief from the law. Secretary Hagel has made clear that, if we can remain at the President's budget, that we would retain 11 carriers.

Senator Kaine. Mr. McCord?

Mr. McCord. I would agree with that, and this is going to be one of those most clear differences that we've been discussing about sequester path versus the President's budget path.

Senator Kaine. Just to clarify what Mr. Work said, the maintaining of an 11-carrier Navy is not just a presidential policy that we will see in the budget, as elaborated yesterday by the Secretary, it is also a statutory requirement. Correct?

Mr. McCord. Yes, sir.

Mr. Work. Yes, sir.

Senator Kaine. Thank you, Mr. Chairman.

I'll look forward to seeing how the presidential budget supports this statutory policy of the 11-carrier Navy. I appreciate your testimony.

Senator Reed. Thank you, Senator Kaine.

Senator Gillibrand, please.

Senator Gillibrand. Thank you, Mr. Chairman.

I want to follow up from Senator McCaskill's questions. We had information that there's too many JAGs, actually. This is a letter from Dana Chipman, Lieutenant General USA, Judge Advocate General, and he writes, "As our Army begins to take the steps necessary to draw down to 490,000 Active component (AC) end strength, the JAG Corps must rebalance appropriately and be postured for the future. Historically high promotion and retention rates in recent years have created an excess of Judge Advocate Generals. Deliberate steps taken in a thoughtful manner will retain our ability to support the Army and the joint force. To do so,

I have requested authority to conduct selective early retirement for a portion of our JAGs.”

As you do your analysis for Senator McCaskill, please recognize that, according to our information, we have an excess of JAGs. Isn't it true, though, that JAGs are stationed all over the world, not just in the United States?

Mr. WORK. Yes, ma'am, it certainly is.

Senator GILLIBRAND. Isn't it true that, today, when there is a serious crime that's taken place, there are sufficient lawyers to investigate those crimes, there's investigative units, and the lawyers, in fact, do recommend to their commanding officers how to proceed in the cases?

Mr. WORK. I believe that is correct, yes, ma'am.

Senator GILLIBRAND. Those same lawyers can be used today, but just not in their own chain of command?

Mr. WORK. Yes, ma'am. I haven't been fully briefed on the laydown of JAGs so I would have to get back to you. But, what you have described is what I understand.

Senator GILLIBRAND. Thank you.

Moving to a related issue, do you think it's appropriate for a commander to ignore the advice of counsel or an Article 32 investigating officer when they recommend proceeding to prosecution, based on evidence supporting a sexual assault crime?

Mr. WORK. No, ma'am. I believe the commanding officer should be able to make those type of decisions.

Senator GILLIBRAND. Do you think he should disregard the advice of counsel in an Article 32 hearing that says there's evidence a serious crime has been committed?

Mr. WORK. Ma'am, I believe the commander always listens to the JAG and to the advice of counsel and makes the best judgment that he or she can to make sure that justice is served.

Senator GILLIBRAND. If you believe he can decide not to pursue a prosecution if there is sufficient evidence that a crime has been committed, on what basis do you think he should make that decision?

Mr. WORK. I know of no cases where personally, a commanding officer knew of enough evidence to pursue prosecution, and elected not to do so.

Senator GILLIBRAND. There are documented cases. In fact, recently, both the Washington Post and the Associated Press (AP) have run stories on ethical issues, and senior leaders specifically. The AP, after a 4-year Freedom of Information Act request, finally got documentation for a base in Japan, and found at least two cases where the attorney's judgment in the Article 32 hearing was disregarded, where the recommendations were to go forward, based on the evidence, and commanders declined to prosecute. There's at least two cases that the AP was able to report. I daresay—and I fully request all cases from the military, where counsel was disregarded or where a commander chose not to move forward after an Article 32 hearing where there was evidence that a crime had been committed and the recommendation was to go forward. I'd like you to investigate that and submit that information for the record.

Mr. WORK. Yes, ma'am.

[The information referred to follows:]

I understand that, based on a preliminary review of recent cases across the Services, in 2012, sexual assault-related charges were referred to court-martial in every case in which a staff judge advocate recommended that the case go forward. At this time, however, I do not have any information about instances in which a convening authority disagreed with the recommendations of an Article 32 investigating officer, or in which a convening officer decided to refer charges after a staff judge advocate or Article 32 investigating officer recommended against doing so.

Senator GILLIBRAND. Because, just because you've never seen it doesn't mean it doesn't happen. In fact, one victim survivor that I spoke to said she was supposed to go to trial and 4 days before the trial, her command changed, and her new commander looked at the file and said, "I don't think a crime has been committed. He might not have been a gentleman, but it wasn't a rape." He decided the trial would not go forward. There's a third example that I, at least, know about, anecdotally.

I'd like you to do a full review of all cases when that happens, because, to say it's never happened, we have evidence of three cases where it exactly did happen and that's concerning. I'd like you to investigate that.

Mr. WORK. Ma'am, I totally agree. I just don't know of any personal instances. But, I read the exact same report about Japan that you referred to, and it's extremely troubling. If confirmed, this is one of the top priorities of the Department, and I assure you that everyone is looking at this very closely.

Senator GILLIBRAND. If a commander decided not to prosecute, despite the evidence, what would be permissible reasons or acceptable reasons, in your mind, for him not to proceed?

Mr. WORK. Ma'am, it's a hypothetical question. I would have to know the exact nature of the evidence against them and to talk with the commander and see what the judgment would be. A commander should listen to the JAG, make his best judgment, as the commander, on how to proceed. I believe, in most cases, if the JAG feels there is enough evidence, that most commanders would proceed.

Senator GILLIBRAND. But, what about the instances where they don't proceed or wouldn't proceed? What do you think are legitimate reasons not to proceed, when the evidence says a crime's been committed?

Mr. WORK. Ma'am, when I was the Under Secretary of the Navy, we looked at this very, very closely, and the only time that this happens is when a JAG feels that the evidence is not sufficient to move forward. In most cases, or in many cases, the commander decides to go forward, even if the JAG feels that there is not enough evidence to support an ultimate conviction. It works both ways. It's important for us to understand that the commanders are trying to make the best judgment that they can.

Senator GILLIBRAND. Yes, but I'm not interested in cases where innocent accused are convicted. I'm not interested in cases going forward where there is no evidence that a serious crime's been committed. Just moving forward because you want to be perceived as being tough on sexual assault is not the right answer.

Mr. WORK. I didn't—

Senator GILLIBRAND. You have to understand. In this country, justice is blind. You do not tip the scales of justice in favor of a

victim or an accused. You have to have blind justice. My question to you is specific. What possible reason would a commander disregard facts and evidence that trained prosecutors have already developed through an Article 32 hearing to say, "I don't think we should go forward"? Do you think morale is a reason why you shouldn't go forward? Do you think the fact that the accused may be popular or well decorated or a great soldier—are those good reasons why you don't go forward to trial? Because if you think they are, that is the point of why this reform is so necessary.

I do not believe the commander should overrule the judgment based on evidence. I believe the decision should only be based on the evidence. If there's evidence a serious crime has been committed, you move forward. If there's not evidence that a serious crime has been committed, you don't move forward. Not based on politics, not based on who you like better, not based on who's more effective for your unit, not based on who you just happen to like. It's not relevant, and it's not appropriate. This is why victims and survivors have told us over and over again, "We don't trust the system. We don't trust the chain of command. We don't believe justice will be done."

The last DOD survey specifically said the number-one reason why victims did not report these crimes is because they believed that nothing would be done. The second reason cited is, they believed they would be retaliated against if they report it.

That's where the breach of trust has been. I really want to hear from you why you think that discretion is needed, whether there's evidence or no evidence. Why do you need discretion if there's evidence of a serious crime? What kind of discretion do you think is legitimate?

Mr. WORK. Ma'am, again, it's a hypothetical question, and I believe that the record shows that JAGs are more likely to press forward on prosecutions than their civilian counterparts. I believe that most commanders are——

Senator GILLIBRAND. There's no evidence of that, sir. The only evidence we have are 100 cases where the decision about whether to keep it by the DOD's prosecution was made. You don't know if the civilian system said, "If you want jurisdiction, take it. It's your judgment." You don't know that those cases were reviewed. That information is not provided. That evidence is misleading, and your conviction rate for some of those cases was closer to 50 percent. Today in the military, your conviction rate is about 95 percent for the cases that you take up. Arguably, you didn't perform as well as you needed to, because there wasn't evidence; or maybe there were innocent accused.

I do not think you can say that with a straight face. There are no facts or evidence that back that up. If you have it, please send it to me.

Mr. WORK. Very well, ma'am.

[The information referred to follows:]

I understand that on July 23, 2013, the Vice Chairman of the Joint Chiefs of Staff sent a letter to Chairman Levin indicating that, in the previous 2 years, commanders had exercised jurisdiction in 93 sexual assault cases after civilian authorities had either failed to pursue a full investigation or formally declined to prosecute. I also understand that because the military justice system has some military-specific offenses without civilian counterparts, there are sometimes instances where the

military can bring a prosecution when civilians cannot. Additionally, I understand that the Vice Chairman noted that the 93 sexual assault cases referred to above include 73 in which courts-martial had been completed, resulting in 52 convictions, a 71 percent conviction rate.

Senator GILLIBRAND. I'm going to submit a question for the record, Mr. Chairman, Mr. McCord, it's just specifically for you. We've heard reports that you are restructuring how the Army uses the Defense Finance and Accounting Services (DFAS), and the plan could severely impact the effect on civilian employees working in DFAS sites, like the one in Rome, NY. What I would like is a commitment from you to give me information in advance of these kinds of decisions. I don't want to have to hear this kind of report through back channels. Do I have your assurance that my office will be kept apprised of all future action relating to changes to the DFAS's mission and force structure?

Mr. MCCORD. Senator, yes, I'll work with the Army in that. The Army is the one really undertaking the study, and the Army is the customer, and so, DFAS does work for the Army. The Army is looking at how to possibly revise some of their operations but, we will work together with them to get you information on any conclusions that they reach. I understand they are not at that stage yet.

Senator GILLIBRAND. Thank you.

Mr. Chairman, I'm going to submit, for the record, questions about cyber.

Senator REED. Thank you very much.

There being no further questions, thank you, ladies and gentlemen, for your testimony.

Senator INHOFE. One question.

Senator REED. Certainly, Senator Inhofe. Please go ahead.

Senator INHOFE. Just quickly.

There's not time to pursue this, Mr. Work, but I've been concerned about the changes that take place with the Director of Operational Testing and Evaluation (DOT&E), Dr. Gilmore—coming along and changing the standards after the fact. I would like to ask if you would just respond, in some detail, for the record. What is the proper managerial relationship between the Deputy Secretary and the DOT&E? Would you do that?

Mr. WORK. Yes, sir. The DOT&E is a direct report to the Secretary of Defense and the Deputy Secretary of Defense. He works closely with the Under Secretary of Defense for the—

Senator INHOFE. Yes, I understand that, but I would like to have you talk about the problems that I see that are taking place, that you have a set of standards that is set, and then you come along later, change that set of standards, when decisions have already been made predicated on the standards that came out of the legitimate process. That's my concern.

Mr. WORK. It's a very valid question, sir.

Senator INHOFE. Go ahead.

Mr. WORK. Essentially, I think DOT&E should work with the established criteria, like the Joint Requirements Oversight Council (JROC), to come forward and say, "I believe a requirement isn't correct." If the JROC agrees with him, they can make that change so that the entire system then is working towards a common requirement.

[The information referred to follows:]

I understand that by statute, the Director of Operational Test and Evaluation is the principal adviser to the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology, and Logistics on operational test and evaluation, providing, among other responsibilities, independent and objective evaluations of the operational effectiveness and suitability for use in combat of weapons, equipment, and munitions. If I am confirmed, I will meet regularly with the Director with respect to issues associated with the operational and live-fire testing being conducted by the Department. I believe that the Director plays a critical role in validating system performance, and ensuring the effective stewardship of our resources.

Senator REED. Thank you very much, Senator Inhofe.

Again, thank you to the witnesses.

There are votes pending. With that, I adjourn the hearing and thank you very much.

[Whereupon, at 11:30 a.m., the committee adjourned.]

[Prepared questions submitted to Hon. Robert O. Work by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I do not believe that modifications to the Goldwater-Nichols Act provisions are necessary at this time. However, if confirmed and appointed, I will consider this question as I perform my duties as Deputy Secretary of Defense. If I come to believe that modifications are necessary, I will recommend appropriate amendments to the act.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not believe that modifications to the Goldwater-Nichols Act provisions are necessary at this time.

RELATIONSHIPS

Question. What is your understanding of the relationship between the Deputy Secretary of Defense and each of the following?

The Secretary of Defense.

Answer. The Secretary of Defense assigns the duties performed by the Deputy Secretary and is the Deputy Secretary's immediate superior. The Deputy Secretary performs the duties of the Secretary of Defense when the Secretary is unable to do so. The Deputy Secretary serves as the Department's Chief Operating and Management Officer (COO/CMO) and focuses primarily on the daily activities of the Department, including financial management, acquisition, civilian and military personnel policy and the implementation of policy and strategy decisions. As a result, the Secretary and Deputy Secretary must have a close working relationship and the Secretary must be able to rely completely on the Deputy Secretary.

Question. The Under Secretaries of Defense.

Answer. The five Under Secretaries establish policy and provide oversight over major Departmental functions, subject to the authority, direction, and control of the Secretary of Defense. The Deputy Secretary oversees the Under Secretaries and coordinates their activities. The Deputy Secretary must work closely with the Under Secretaries, ensuring that they understand the Secretary's guidance and implement that guidance faithfully. The Deputy Secretary must also resolve differences of opinion between or among the Under Secretaries, referring to the Secretary those important issues that require his decision.

Question. The Deputy Chief Management Officer of the Department of Defense (DOD).

Answer. The Deputy Secretary, who is the Chief Management Officer, supervises the Deputy Chief Management Officer, assigning tasks, providing oversight, and ensuring accountability. The Deputy Secretary must be able to rely on the Deputy Chief Management Officer to monitor the Department's performance in attaining management goals and keep the Deputy Secretary informed. The two must keep in constant communication to ensure seamless oversight of the Department's management program, and immediate intervention when required.

Question. The Assistant Secretaries of Defense.

Answer. There are two categories of Assistant Secretaries. Most of the Assistant Secretaries fall under the authority, direction, and control of the Under Secretaries. For those Assistant Secretaries, the Deputy Secretary exercises oversight through the Under Secretaries. For Assistant Secretaries who report directly to the Secretary, the Deputy Secretary should exercise a broader and more direct oversight, working closely together to ensure the Secretary's guidance is accomplished efficiently and effectively.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. The Secretary and Deputy Secretary must have complete confidence in the professional military advice of the Chairman and Vice Chairman, work closely with them, and communicate direction to the combatant commanders through them. The Deputy Secretary works most closely with the Vice Chairman, particularly on matters regarding budgeting, programming, and requirements.

Question. The Secretaries of the Military Departments.

Answer. The Secretaries of the Military Departments are under the authority, direction, and control of the Secretary of Defense. The Deputy Secretary assists the Secretary in providing direction to and oversight of the Secretaries of the Military Departments. The Deputy Secretary also helps resolve differences of opinion between the Secretaries of the Military Departments and the Under Secretaries of Defense.

Question. The Chief Management Officers of the Military Departments.

Answer. The Chief Management Officers of the Military Departments are the Under Secretaries of the Army, Air Force and Navy. They report to the Secretaries of the Military Departments. The Deputy Secretary and Deputy Chief Management Officer of DOD work closely with the Chief Management Officers of the Military Departments to ensure that the management program of DOD, as implemented in the respective Military Departments, is carried out consistently with the direction of the Secretary of Defense.

Question. The Service Acquisition Executives.

Answer. The Deputy Secretary and the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) perform essential roles in the Department's acquisition program, including providing guidance to, and oversight of, the Service Acquisition Executives. The Deputy Secretary works primarily through the USD(AT&L) when dealing with the Service Acquisition Executives.

Question. The Chiefs of Staff of the Military Services.

Answer. The Chiefs of Staff of the Military Services perform two vital roles for the Department. In their roles as Service Chiefs, they normally work with the Deputy Secretary through the Secretaries of the Military Departments. In their roles as members of the Joint Chiefs of Staff, they normally work with the Deputy Secretary through the Chairman of the Joint Chiefs of Staff. The Deputy Secretary seeks to ensure that the Chiefs of Staff in both of their roles have the resources necessary to accomplish their assigned missions and that they have ample opportunity to provide their professional military advice on significant matters.

Question. The Chief of the National Guard Bureau.

Answer. The Deputy Secretary works closely with the Chief of the National Guard Bureau on important issues regarding the States and the National Guard. The Deputy Secretary relies on the Chief of the National Guard to be a clear and persuasive channel of communication between the Department and the States on all National Guard matters.

Question. The Judge Advocates General of the Services.

Answer. The Deputy Secretary normally works through the General Counsel of DOD in dealing with the Judge Advocates General and the Staff Judge Advocate to the Commandant of the Marine Corps. Because the Judge Advocates General have an important role in providing legal advice to senior officials, military and civilian, in the Military Departments, the Deputy Secretary ensures that the Judge Advocates General are able to perform that vital function.

Question. The Inspector General of DOD.

Answer. The Deputy Secretary relies on the Inspector General to provide candid information on significant issues addressed by the auditors, inspectors, and inves-

tigators in the Inspector General's office. The Deputy Secretary plays a direct role in ensuring the independence of the Inspector General.

Question. The General Counsel of DOD.

Answer. The Deputy Secretary receives legal advice on all issues from the General Counsel, so he or she must have a close and candid relationship with the General Counsel. The General Counsel must feel that he or she may approach the Deputy Secretary with legal advice at any time, on any issue.

Question. The Director of National Intelligence.

Answer. When addressing matters of significance affecting both the Department and the Intelligence Community, the Deputy Secretary works with the Director of National Intelligence. The Under Secretary for Intelligence assists the Deputy Secretary in maintaining a close relationship with the Director of National Intelligence.

DUTIES OF THE DEPUTY SECRETARY OF DEFENSE

Question. Section 132 of title 10, U.S.C., provides that the duties of the Deputy Secretary of Defense are to be prescribed by the Secretary of Defense.

Assuming that you are confirmed, what duties do you expect the Secretary to prescribe for you?

Answer. I expect the Secretary to assign me the primary duties of being prepared to perform his duties in his absence, assisting him in leading the Department, providing him my best professional and candid advice, and performing the statutory duties of Chief Management Officer. In addition, I expect that the Secretary will assign me additional duties in areas that will assist him in accomplishing his many missions.

Question. What background and expertise do you possess that you believe qualify you to perform these duties?

Answer. I have either been a part of or analyzed and studied DOD and the armed services my entire life.

My first 17 years were spent as military dependent in a Marine Corps family. I learned first-hand what it was like moving every 2 to 4 years, sometimes unexpectedly. I lived on bases, off bases, and in foreign countries. I changed neighborhoods and schools, lost track of old friends and made new ones, and watched my Mom cope with my Dad's long absences.

After 4 years of preparing for a commission in the U.S. Marine Corps through the Naval Reserve Officer Training Corps, I spent 27 years as a Marine artillery officer, retiring at the rank of colonel. I commanded at the platoon, battery, battalion, and training base level. At different times I served as the personnel, intelligence, and assistant operations officer in an artillery battalion, assistant operations and logistics officer in an infantry regiment, and operations officer in an artillery regiment. I also spent time on the Headquarters Marine Corps staff as the Enlisted Force Planner and director of Marine Corps space plans and operations. As the head of the Strategic Initiatives Group, I provided analytical support to the Commandant of the Marine Corps on a variety of issues, including during the 1997 Quadrennial Defense Review (QDR). My time in the Marine Corps taught me much about leadership, strategy, operations, tactics, programming, and budgeting.

I was married for 23 of my 27 years in the Marine Corps, and was a father for 11. I watched my wife cope with frequent moves and the stresses of me being away. I missed some of her birthdays and our anniversaries. Then, I missed some my daughter's birthdays, school plays, and dance recitals. As a former member of a military family, I knew how hard it was to be constantly on the move and not having my dad around. But now it was me often leaving my wife and daughter to take care of themselves.

My last 2 years on Active Duty was spent as the Military Assistant and Senior Aide to Richard Danzig, 71st Secretary of the Navy. During this time, I observed what it was like to lead a Military Department, where strategy, Service culture, politics, programming, and budgeting come into play. I observed the 2001 QDR from the Department of Navy level, recognizing the Navy-Marine Corps Team was very much more than the sum of its two parts. In the process, I became an ardent Departmentalist, seeking cooperation and understanding across institutional boundaries.

After retiring, I spent most of the next 8 years at the Center for Strategic and Budgetary Assessments, a national security Think Tank, first as a Senior Fellow and later as Vice President for Strategic Studies. I studied, wrote, and spoke extensively on strategy, global posture, revolutions in war, and maritime affairs. I assisted the Red Team for the 2006 QDR, testing key assumptions and challenging major objectives.

This body of experience prepared me well to be Under Secretary of the Navy. The Department of the Navy is a microcosm of DOD, with two Services (the Navy and Marine Corps) and a \$140–\$160 billion annual budget. As Under Secretary, I was the principal deputy and advisor to the Secretary of the Navy, the Chief Operating/Management Officer of the Department, and Chief of Staff for the Navy Secretariat. As such, I assisted the Secretary in pursuing his priorities and agenda, supervising the organize, train, and equip function of both the Navy and Marine Corps; developing Departmental policy, capabilities, and capacities; and fashioning a balanced program. I worked extensively with the Deputy Secretary of Defense, the Under Secretaries of Defense, the Director of Cost Analysis and Program Evaluation, the Chief and Vice Chief of Naval Operations, the Commandant and Assistant Commandant of the Marine Corps, the Assistant Secretaries of the Navy, and Under Secretaries of the Army and the Air Force, and the senior military leadership of the Army and Air Force. I learned the rhythm and processes of the Pentagon, and how to make things happen. I led the Department's efforts on the 2010 QDR, and participated in the 2011 Strategic Review. Throughout this time, I gained a great appreciation for DOD civilians, who are a vital part of the Total Force.

For the last year, I have been the Chief Executive Officer for the Center for a New American Security, where I have tried to build a series of programs that view the entire range of national security issues, including strategy and statecraft; responsible defense; technology and national security; energy, environment and security; military, veterans and society; and Middle East and Asian studies.

Throughout my career, I have valued and sought out opportunities to better educate myself. I have a Masters in Science in Systems Management, a Masters of Systems Technology (Space Systems Operations); and a Masters in International Public Policy.

Although no job will ever prepare someone for the expansive responsibilities of the Deputy Secretary of Defense, I believe this body of experience qualifies and prepares me to tackle the duties of the Deputy Secretary of Defense.

Question. Do you believe there are actions you need to take to enhance your ability to perform the duties of the Deputy Secretary of Defense?

Answer. Yes. If confirmed and appointed, I would begin immediately to establish close working relationships with those whom I will work daily on national security issues, including:

- Secretary Hagel and his personal staff;
- The Under Secretaries of Defense, Director of Cost Evaluation and Program Evaluation (CAPE), the Deputy Chief Management and Information Officers, and other senior officials in the Office of the Secretary of Defense;
- The Chairman and Vice Chairman of the Joint Chiefs of Staff and senior leadership in the four armed services;
- The three Service Secretaries and Under Secretaries;
- Senior leadership at the Office of Management and Budget and the Cabinet departments who work national security issues;
- Senior leadership in the White House and on the National Security Council staff; and
- Leadership in Congress, particularly those who sit on the congressional defense committees.

I would review the analysis and conclusions of the Strategic Choices and Management Review and the 2013 QDR in order to understand what had happened and the OSD decisions made since I left my job as Under Secretary of the Navy in March 2013.

I would also begin detailed study of the fiscal, administrative, and operational issues that the Secretary assigns to me. I would spend time analyzing the business processes of the Department so that I could evaluate whether any changes may be appropriate and so advise the Secretary.

Question. What changes to section 132, if any, would you recommend?

Answer. I would not recommend any changes to section 132 at this time; I believe section 132 adequately provides for the duties of the Deputy Secretary. If I am confirmed and appointed, I will consider this issue while performing my duties, and if I determine that changes may be necessary, I will suggest them to the Secretary for consideration as a legislative proposal.

NATIONAL SECURITY BUDGET REDUCTIONS

Question. Section 132 was amended by section 904 of the National Defense Authorization Act (NDAA) for Fiscal Year 2008, to provide that the Deputy Secretary serves as the Chief Management Officer (CMO) of DOD. The Deputy Secretary is to be assisted in this capacity by a Deputy Chief Management Officer (DCMO).

What is your understanding of the duties and responsibilities of the Deputy Secretary in his capacity as CMO of DOD?

Answer. The primary duty of the Chief Management Officer is to provide leadership and to ensure accountability for the business operations of DOD. These operations involve all of the Department's components and cut across the responsibilities of the Under Secretaries of Defense. As such, they require leadership and accountability at a high level. In this role, the CMO should ensure that the business functions of the Department are optimally aligned to support the warfighter, that they form a simplified, efficient, and effective business environment, and that DOD maintains a strategic perspective and has the capacity to carry out its plans.

In addition, the CMO's role is to lead, oversee, and support the roles of the Secretaries of the Military Departments and agency heads in managing their business operations, as well as provide direction to DOD's Deputy CMO and the CMOs of the Military Departments.

Question. What background and expertise do you possess that you believe qualify you to perform these duties and responsibilities?

Answer. As the former Under Secretary and CMO of the Navy, I am very familiar with the array of management and business challenges that continue to confront DOD. Additionally, I spent my previous career, first as a military officer and then as a member of a number of think-tanks and academia, analyzing defense issues such as transformation, strategy, and programs. This experience has provided me with the background and expertise to serve as the Department's CMO.

Question. Do you believe that the CMO and DCMO have the resources and authority needed to carry out the business transformation of DOD?

Answer. My understanding is that the Secretary of Defense has recently announced a series of reforms following his Organizational Review to further strengthen the Deputy CMO to provide full spectrum oversight of OSD and DOD management, administration, and compliance. I am not currently in a position to determine if the CMO and Deputy CMO have the appropriate authority and resources to carry out their roles in light of these changes. If confirmed, I will examine the authorities and resources available to both functions to determine if they fully address the need.

Question. What role do you believe the DCMO of DOD should play in the planning, development, and implementation of specific business systems by the Military Departments?

Answer. The most important role the Deputy CMO can play regarding specific business systems is to ensure that the Department's overarching and functional business strategies and standards are clearly articulated at all levels and the Military Department's systems implementation plans will achieve these strategies. On occasion, there may be specific business systems that require the attention of the Deputy CMO to ensure alignment and resource prioritization across the budget horizon.

Beyond defense business systems, however, there is a significant role the Office of the Deputy CMO can play in helping the Deputy Secretary lead efforts across the Department to increase its efficiency and effectiveness. I have read the Secretary's December 4th public statement that strengthens the role of the Office. This is an important step in gaining better control and oversight of the Office of the Secretary of Defense, the Defense agencies and activities, and the Department as a whole. If confirmed, I will review the decisions made and make new ones, if necessary, to strengthen to the role of the Deputy CMO.

Question. Do you believe that the DCMO should have clearly defined decision-making authorities, or should the DCMO serve exclusively as an advisor to the Deputy Secretary in his capacity as CMO?

Answer. I believe that the Deputy CMO should meet the statutory responsibilities currently in law, as well as have the responsibilities assigned by the CMO and the Secretary of Defense. There may be areas or circumstances where it would be appropriate for the Deputy CMO's duties to include independent decisionmaking authority and others where it would not be appropriate. This should be determined by the CMO or the Secretary.

Question. What changes, if any, would you recommend to the statutory provisions establishing the positions of CMO and DCMO?

Answer. At this time, I believe the statutory authorities for the positions of the Chief Management Officer and the Deputy Chief Management Officer are sufficient. If confirmed, I would inform Congress if I determined that any changes in statute were necessary to more effectively perform the duties of this office.

Question. In your view, what are the major challenges confronting the next Deputy Secretary of Defense.

Answer. Clearly, the first challenge and responsibility is to get the entire Department working behind the Secretary's priorities. While doing so, the Deputy Secretary must be cognizant that the Department confronts a broadening range of missions within a complex strategic environment while it must carefully manage its diminished resources. Indeed, the dynamic fiscal environment is a major challenge since it relates to the principal function of the Deputy and CMO roles. Continued fiscal uncertainty generates potentially cascading effects across all elements of the Department enterprise. Having a stable fiscal picture will help the Department avoid inefficiencies and maximize the resources allocated to it. Another challenge will be the implementation of our National Security Strategy, consciously and deliberately managing risk and applying resources in accordance with the priorities of that strategy. This includes successful implementation of our plans in Afghanistan and adapting our force posture in the Asia-Pacific region.

I also foresee the need to carefully manage our Science & Technology investments. I agree with recent comments from the Under Secretary for AT&L about not taking our technological dominance for granted. We should deliberately prioritize our long-term needs and carefully allocate funding to key programs and potential game-changing technologies that meet our strategic requirements.

Another major challenge is the need to assess and define our force structure design in accordance with our strategy and to make resource-informed decisions about our force levels. A force sizing construct will be a key aspect of the upcoming QDR to help define those force levels, against various levels of risk. Finally, as we go forward with force level cuts and management overhead reductions, we must keep faith with our Total Force. We cannot overlook the contributions that have been made by our servicemembers, civilians, and their families over the last decade of conflict.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I look forward to working with the Secretary and the senior leadership of the Department and the components in addressing these myriad challenges. I would anticipate that the deliberations of the QDR, and the insights offered by Congress and the National Defense Panel, will help generate solutions to them.

Question. What broad priorities would you establish, if confirmed, with respect to issues which must be addressed by DOD?

Answer. Secretary Hagel has defined a set of broad priorities that establish the essential framework for resolving the Department's critical challenges.

The first involves a focus on institutional reform. We can set an example here for the components by scaling back our headquarters and adopting better business practices. We need to direct more resources to invest in concrete military capabilities and readiness, as well as make Defense organizations flatter and more responsive to today's threats and priorities.

Next we must re-evaluate our force planning and force-sizing construct. We need to ensure our strategy is aligned with how the Military Departments are organizing, training and equipping the force. The QDR will provide direction for that, with a force planning construct reflecting priorities and modern threats.

The Secretary's third priority is avoiding a long-term readiness challenge. This mandates finding a balance between force size, investment accounts, and readiness levels. Sequestration fell hard on the Department's future readiness accounts. The parameters for force planning in the QDR should assist the Department in precluding a readiness crisis and identifying the implications for Congress.

Fourth, the Department must protect investments in critical military capabilities. This challenge requires us to preserve and extend emerging priority capabilities—especially space, cyber, special operations and intelligence, surveillance, and reconnaissance (ISR). A critical aspect of this challenge is the ability to maintain access in traditional and emergent domains. Our access is being increasingly contested. We must recognize that future adversaries will learn much from the last decade of war and avoid our traditional advantages. Maintaining a technological edge will be key to our ability to maintain access and secure our interests.

Fifth, we must achieve a balanced strategic posture. This will include a capability/capacity balance for the military. In particular, defining the right balance of Active and Reserve components is necessary. We should leverage the potential of our Reserve component, ensuring that we define the training readiness, responsiveness and mobilization timelines required for their deployment. Balancing the military properly will also include an examination of forward-stationed and home-based forces. The force must also be balanced between its readiness for conventional, irregular, and unconventional warfare. The QDR will help define the balance required for general purpose and Special Operations Forces.

Finally, personnel and compensation policy is a priority. We must find the proper balance between compensation and other defense priorities in a time of scarce resources. The Department and Congress will need to work together to find comprehensive solutions that allow us to recruit and retain the quality of today's force, while also providing the resources to train and equip that force for their missions.

Question. The Budget Control Act, as amended by the recent Murray-Ryan budget agreement, calls for reductions in defense spending in excess of \$900 billion.

Do you believe that a national security spending reduction of this magnitude can be accomplished without significant adverse impact on our national security?

Answer. Based on my experience as Navy Under Secretary, and as an outside analyst, my answer would be "no". I believe the Department has expressed similar views. The BCA-level of funding will require significant force structure reductions, undermine readiness and delay modernization. My understanding is that the Department believes these actions will leave it unable to meet fully the current Defense Strategy.

Question. If confirmed, will you report to the committee on the impact of these reductions personnel, readiness, infrastructure, and modernization?

Answer. Yes, if confirmed, I will continue to work with Congress to define the impacts of potential reductions to the Defense budget and its impact on all the inter-related pillars of our security.

STREAMLINING HEADQUARTERS

Question. Last December, Secretary Hagel began implementation of his plan to reduce DOD staff by 20 percent. He expects this effort to save \$1.0 billion over a 5-year period by eliminating contract and civilian workers while reorganizing certain offices, such as the Office of the Secretary of Defense, Policy.

Answer. The NDAA for Fiscal Year 2014 contains a provision requiring the Secretary of Defense to develop a plan for streamlining DOD management headquarters by reducing the size of staffs, eliminating tiers of management, cutting functions that provide little or no addition value, and consolidating overlapping and duplicative program offices. The objective is to reduce aggregate spending for management headquarters by not less than \$40.0 billion beginning in fiscal year 2015.

Question. What is your view on reductions to the size and composition of DOD management headquarters?

Answer. I understand Secretary Hagel said he expected to save at least \$1 billion over the next 5 years. Given the fiscal challenges the Department faces, I fully support his efforts to reduce the size of headquarters. I am not familiar with the specifics of headquarters reduction plans, but, if confirmed, I believe it would be prudent to review these reductions to determine if additional savings can be achieved, and also to ensure these reductions do not create unacceptable risks to our national security interests.

Question. What role do you expect to play, if confirmed, in ensuring that the expected savings are achieved?

Answer. Again, I am not familiar with the specifics of headquarters reduction plans. However, if confirmed, it will be my responsibility to make sure these savings are realized.

Question. Do you believe that DOD can achieve significant additional savings in this area?

Answer. I do believe the Department can achieve savings by reducing headquarters. If confirmed, I look forward to ensuring that happens. Until given the opportunity to review those plans and the associated risk, however, I think it would be unwise to speculate on a specific savings number without understanding the functions involved and potential downsides in acquisition, cyber-security, intelligence, et cetera.

MANAGEMENT ISSUES

Question. GAO recently reported that "the DOD systems environment that supports [its] business functions is overly complex and error prone, and is characterized by: (1) little standardization across the department; (2) multiple systems performing the same tasks; (3) the same data stored in multiple systems; and (4) the need for data to be entered manually into multiple systems. ... According to the department's systems inventory, this environment is composed of 2,258 business systems and includes 335 financial management, 709 human resource management, 645 logistics, 243 real property and installation, and 281 weapon acquisition management systems."

If confirmed, what key management performance goals would you want to accomplish, and what standards or metrics would you use to judge whether you have accomplished them?

Answer. If confirmed, I would strive to achieve the four key goals and five guiding principles that are identified in the Department's Strategic Management Plan. Each goal has associated performance measures to track progress. If confirmed, I would use the plan's upcoming development cycle to carefully review the strategic goals, initiatives, and performance measures included in the plan. I will ensure that future plans demonstrate clear alignment with the Department's strategic objectives and that initiatives and measures are clear, consistent, relevant and outcome-based.

Question. Would you agree that the Department will not be able to put its financial house in order until it effectively addresses this problem?

Answer. While I would agree that a simpler DOD systems environment will make it easier to achieve financial objectives such as audit readiness, it is only part of the holistic approach to financial management that is needed to achieve the Department's goals. The Department has reported that it is making better business management a priority with a simpler business system environment as a component of the broader agenda for improvement.

Question. Do you believe that a comprehensive, integrated, enterprise-wide architecture and transition plan is essential to the successful transformation of DOD's business systems?

Answer. Yes, I believe these are elements of what is required for overseeing such a large and complex organization. However, I would caution anyone from underestimating the challenges of changing DOD's business practices and processes by just looking at technical systems. The Department is far more complicated and requires far more than these technical tools for simplifying, strengthening, and leaning out the business environment.

Question. What steps would you take, if confirmed, to ensure that DOD's enterprise architecture and transition plan meet the requirements of section 2222?

Answer. It is my understanding that strengthening DOD's business processes and tools is a goal of the OSD transition plan. If confirmed, I will review those plans and ensure we are meeting the full intent of section 2222 in our revised organization structure and processes.

Question. What are your views on the importance and role of timely and accurate financial and business information in managing operations and holding managers accountable?

Answer. Timely and accurate financial and business information is very important to the overall management of DOD's business operations. It allows senior leaders to make fact-based decisions about the most effective and efficient allocation of resources, while ensuring good stewardship of the taxpayers' dollars. If confirmed, I will continue to emphasize the Department's on-going efforts to improve our business processes and systems which will better enable effective leadership and management.

Question. What role do you envision playing, if confirmed, in managing or providing oversight over the improvement of the financial and business information available to DOD managers?

Answer. If confirmed, I would take my role as Chief Management Officer/Chief Operating Officer and chair of the Deputy's Management Action Group seriously. In these roles, I would hold the Department's senior leaders accountable for meeting DOD's objectives, including those identified in the Strategic Management Plan and Financial Improvement and Audit Readiness Plan that are directly linked to improving financial and business information.

AUDIT READINESS

Question. Former Secretary Panetta stated: "While we have reasonable controls over much of our budgetary information, it is unacceptable to me that DOD cannot produce a financial statement that passes all financial audit standards. That will change. I have directed that this requirement be put in place as soon as possible. America deserves nothing less."

What is your understanding of the efforts and progress that have been made in DOD toward the goal of being able to produce a clean audit?

Answer. My understanding is that DOD, as an agency, has made significant progress, particularly in the last 4 years. Secretary Hale worked with the Services and agencies to provide a coherent set of priorities and Secretary Hagel is fully engaging the entire leadership team. In my former position as the Department of Navy CMO, I saw how challenging this effort can be, and am gratified to see the Marine Corps recently achieve an important initial milestone (an unqualified opinion on the

current year of their budget statement). If confirmed, I intend to sustain the leadership emphasis in this area.

Question. Do you believe the Department will meet its statutory goal to achieve an auditable Statement of Budgetary Resources by the end of fiscal year 2014 or are additional steps necessary? If so, what are those steps?

Answer. I understand that the Department has told Congress that, while it is too soon to know for sure because remediation efforts are ongoing, they expect most budget statements to be ready for audit by September 2014. Because of years of budget turmoil and other problems, some may not be ready. Once the audit begins, I understand that the Department plans to conduct the audit in a cost-effective manner by starting with the current year. I also know that this whole project will be extremely challenging.

Question. Do you believe the Department will meet its statutory goal and achieve an auditable financial statement by the end of fiscal year 2017 or are additional steps needed? If so, what are those steps?

Answer. I know from my time as Navy Under Secretary that the Department is fully committed to this goal and has a plan to meet the target. I understand that the Department believes it is on track to meet this target despite the technical complexity of the problem and the scale of the Department's resources. However, I am not currently in a position to make a specific prediction about timing.

Question. Do you believe the Department will meet its statutory goal "to ensure a full audit is performed on the financial statements of DOD ..." for fiscal year 2018 and that audit will be completed by September 30, 2018 or are additional steps needed? If so what are those steps?

Answer. My understanding is that the Department is fully committed to this goal and timing and believes it is on track to meet the goal. However, I am not currently in a position to make a specific prediction about timing.

Question. Do you believe the Department will meet its statutory goal and submit to Congress the results of the audit to be completed by September 30, 2018 or are additional steps needed? If so, what are those steps?

Answer. My understanding is that the Department is fully committed to this goal and timing and believes it is on track to meet the targets. However, I am not currently in a position to make a specific prediction about timing.

Question. Do you believe in order to meet its statutory goal to conduct a full audit that the Department will have to place a monetary value on all of its property?

Answer. Yes. My understanding is that the Department will need to follow the government accounting and auditing rules, as well as its own policies. Those rules require property valuation. I know that the policies also provide some flexibility to make sure that the cost of accomplishing this valuation does not exceed the value of the information.

Question. Do you believe that the Department can achieve a clean audit opinion through better accounting and auditing, or is the systematic improvement of the Department's business systems and processes a prerequisite?

Answer. I believe that the Defense Department will need to do both. Over the past 5 years, the Department has made significant progress in audit readiness, despite the fact that it doesn't have modern business systems across the enterprise. However, the Department needs to continue efforts to improve and streamline the systems environment for operational efficiency, as well as to sustain cost effective annual financial audits.

Question. When do you believe the Department can achieve a clean audit?

Answer. The Department is fully committed to the goal of having audit ready statements by September 2017. After achieving audit readiness, experience in other Federal agencies suggests that it usually takes several years to secure a clean audit opinion.

Question. If confirmed, what steps would you take to sustain the commitment of the Department's top leadership to the long-term goal of transforming the Department's financial management?

Answer. I understand the Department has made substantial progress in transforming business operations, to include financial management. This progress is most visible in the audit readiness area, but I understand progress has also been made in reducing improper payments and the number of Anti-Deficiency Act violations reported. However, there is still a long way to go. Sustaining gains will continue to demand the attention and commitment of senior leadership. When I served as CMO in the Department of the Navy, I knew how difficult the problem appeared at the beginning, but we pressed forward and made solid progress. If confirmed, I intend to continue to make this a priority, not only for the Comptroller, but for all DOD leaders.

Question. Do you think that having the Deputy Secretary of Defense “dual-hatted” as the CMO is consistent with the prioritization and sustained day-to-day focus needed for the success of the Department’s financial improvement efforts?

Answer. Yes, based on my 4 years as Under Secretary of the Navy where I had both “hats” in a \$140 billion enterprise. While demanding in terms of management time, this “dual-hat” approach provides the high-level attention necessary to make progress on important but difficult initiatives such as financial improvement. Progress on financial initiatives also requires a close working relationship between the Comptroller and the CMO/DCMO leadership. I believe that relationship is working today and if confirmed, I will work to sustain it into the future.

BUSINESS TRANSFORMATION

Question. Since 2005, the Government Accountability Office (GAO) has designated DOD’s approach to business transformation as “high risk” due to its vulnerability to waste, fraud, abuse and mismanagement. However, GAO has recently found that the Department’s senior leadership has shown commitment to transforming business system operations and has made progress in establishing management oversight and developing a strategic plan to guide transformation efforts. Nonetheless, in GAO’s view, the Department needs to take additional action to further define management roles and responsibilities and to strengthen strategic planning.

Do you believe that the Department needs to more clearly define roles and responsibilities, as well as relationships among key positions and governance entities?

Answer. The Department has clearly defined roles and responsibilities among key positions and governance entities; however, I understand that Secretary Hagel recently announced a plan to realign certain reporting relationships and functions to the Deputy CMO to provide full spectrum oversight of OSD and DOD management, administration, and compliance. He further seeks to strengthen the role of the CIO in the Department. If confirmed, I look forward to working with the Secretary to implement those changes so that the Department can best meet the challenges that lie ahead.

Question. If so, what steps do you believe the Department should take to achieve this objective?

Answer. I believe that Secretary Hagel’s plan will improve the Department’s ability to transform its business operations and its systems. My understanding is that the plan is intended to strengthen both the Deputy CMO’s role in full spectrum management and the DOD Chief Information Officer’s role in overarching IT oversight. If confirmed, I look forward to driving implementation of the Secretary’s announced realignments so that management improves not only for business systems, but also across the Department.

Question. If confirmed, what steps, if any, would you take to further refine strategic goals, performance measures, and other elements of the Department’s strategic management plan?

Answer. The Department’s Strategic Management Plan is updated on a regular basis. If confirmed, I would use the plan’s upcoming development cycle to carefully review the strategic goals, initiatives, and performance measures included in the plan. I will make sure that future plans demonstrate clear alignment with the Department’s strategic objectives and that initiatives and measures are clear, consistent, relevant and outcome-based.

Question. If confirmed, what steps, if any, would you take to more clearly define the Department’s strategic planning process, including mechanisms to guide and synchronize efforts to develop strategic plans; monitor the implementation of reform initiatives; and report progress, on a periodic basis, towards achieving established goals?

Answer. If confirmed, I would seek to ensure that initiatives and measures are clearly linked to the overall strategic objectives of the Department. I believe establishing clear and meaningful outcome-based performance measures, periodic reporting, and use of these measures to inform management decisions is critical to success. Achieving these goals requires coordination among all of the Department’s senior leaders.

Question. Do you believe that the Deputy Chief Management Officer should have control over funds for the components’ business systems programs to ensure that the components follow guidance from the Office of the Secretary of Defense on the Department’s business transformation efforts?

Answer. I believe the components should maintain control over their funds for business systems programs; however, the Deputy Chief Management Officer needs to be able to confirm that components are following Department processes and guidance. As the Navy Chief Management Officer, it was my experience that the Deputy

Chief Management Officer had sufficient ability to ensure components followed guidance on business transformation through the Defense Business Council. However, if confirmed, I would notify Congress if I assess that further controls over funds were necessary.

ACQUISITION OF BUSINESS SYSTEMS

Question. Most of the Department's business transformation programs are substantially over budget and behind schedule. At the request of the Armed Services Committee, GAO reviewed DOD's 9 largest Enterprise Resource Programs (ERP), which are intended to replace more than 500 outdated business systems, and reported that 6 of the 9 had experienced schedule delays ranging from 2 to 12 years and incurred cost increases ranging from \$530.0 million to \$2.4 billion. GAO reported that DOD has failed to follow good management practices for developing schedules and cost estimates for many of these programs.

If confirmed, how would you work with the Deputy Chief Management Officer, the Chief Management Officers of the Military Departments, the Under Secretary of Defense for Acquisition, Technology, and Logistics (AT&L), the Chief Information Officer (CIO), and the Under Secretaries of Defense to address these problems?

Answer. If confirmed, I would work directly with the Under Secretary of Defense for Acquisition, Technology, and Logistics (AT&L), the Deputy Chief Management Officer, the Chief Management Officers of the Military Departments, the Under Secretaries of Defense, and the DOD Chief Information Officer to implement better management practices and lessons learned. Successful ERP implementations require integrated, end-to-end thinking and therefore must consider policy, business process, and acquisition equities. Each of these officials has an important role to play in addressing the planning, implementation, and change management challenges that historically have hamstrung the Department's ability to deliver programs such as ERPs in accordance with established cost and schedule baselines.

Question. What lessons can be learned from acquisition management of the Air Force's now cancelled Expeditionary Combat Support System?

Answer. I am not familiar with the details as to what happened regarding the Expeditionary Combat Support System. If confirmed, I will ensure the Department implements a full range of management controls to our business systems modernization efforts and will ensure that the lessons learned from Expeditionary Combat Support System are incorporated into our processes.

Question. DOD must implement a full range of business systems modernization management controls to ensure that its business system investments are the right solutions for addressing its business needs; that these investments are being managed to produce expected capabilities efficiently and cost-effectively; and that, ultimately, its business stakeholders are satisfied.

What additional steps, if any, do you believe are needed to ensure that both the corporate and component investment management processes are appropriately defined and institutionalized?

Answer. If confirmed, I will work with the Department's senior leadership to ensure our collective investment processes are balanced and focused on achieving the enterprise needs of the Department. I will review the Department's investment review process for business systems and ensure it provides the necessary framework so that component investments are aligned with the Department's strategy.

Question. What additional steps, if any, do you believe are needed to ensure that business system investments are managed with the kind of acquisition management rigor and discipline that is embodied in relevant guidance and best practices, so that each investment will deliver expected benefits and capabilities on time and within budget?

Answer. I am not aware of any additional steps being necessary at this time. If confirmed, I will work with the Under Secretary of Defense for Acquisition, Technology, and Logistics, the Deputy Chief Management Officer, the Chief Information Officer, and the Military Departments to identify opportunities to strengthen business system development acquisition processes and practices to improve our investment outcomes.

Question. Do you believe that unique challenges to acquiring services related to information-technology (IT) systems may require an acquisition strategy or approach different from those used for acquiring property or services unrelated to IT systems?

Answer. I believe DOD should ensure acquisition strategies or approaches are structured and tailored to best suit the required product, including information technology systems. If confirmed, I will ensure that we appropriately manage business system requirements development and acquisition.

Question. What additional steps, if any, do you believe are needed to ensure that requirements management, systems testing, and data quality are improved and to help resolve other problems that have continued to hinder the Department's efforts to implement its automated systems on schedule, within cost and with the intended capabilities?

Answer. I believe the Department must place appropriate management emphasis on the entire business system process, from requirements development to fielding. If confirmed, I will work with the Under Secretary of Defense for Acquisition, Technology, and Logistics, the Deputy Chief Management Officer, the Chief Information Officer, and the Military Departments to strengthen our efforts in this area.

DEFENSE ACQUISITION REFORM

Question. Congress enacted the Weapon Systems Acquisition Reform Act of 2009 (WSARA), without a dissenting vote in either House. WSARA is designed to ensure that new defense acquisition programs start on a sound footing, to avoid the high cost of fixing problems late in the acquisition process.

What are your views regarding WSARA and the need for improvements in the Defense acquisition process?

Answer. When I first took office as the Under Secretary of the Navy in 2009, Congress had just passed the Weapon Systems Acquisition Reform Act, which has become a valuable tool for the Department. I supported the implementation of WSARA at that time, and I continue to support the improvements in the area of Defense acquisition organization and policy. If confirmed, I would continue to support the efforts to improve the defense acquisition system consistent with the direction provided in WSARA.

Question. If confirmed, how would you improve all three aspects of the acquisition process—requirements, acquisition, and budgeting?

Answer. My time as the Under Secretary of the Navy taught me the value of strong communications and interactions between the requirements, acquisition, and financial communities. Given the complex nature of the acquisition process, it is important to review all three aspects of the process holistically and not independently. If confirmed, I will work to effectively synchronize these processes to balance warfighters needs with budget and acquisition realities.

Question. If confirmed, how would you improve acquisition accountability?

Answer. Short, clear lines of authority and accountability for acquisition were established by the Goldwater-Nichols Act. I emphasized this chain as Under Secretary of the Navy and would continue to do so, if confirmed. Further I will hold those responsible for establishing requirements, budgets, and acquisition programs accountable for meeting the needs of the warfighter. I also believe our industry partners must be held accountable for their performance as well, and that incentives and rewards should align with actual performance and outcomes.

Question. Do you believe that the current investment budget for major systems is affordable given increasing historic cost growth in major systems, costs of current operations, and asset recapitalization?

Answer. I believe it is critical that we ensure major systems are affordable. The constrained budget environment facing the Department for the foreseeable future increases the pressure on the Department to maintain affordability. If confirmed, I will examine the cost balance between current operations, readiness and weapon system acquisition and assess our risks in those areas. I will work with the Under Secretary of Defense for Acquisition, Technology, and Logistics to manage weapon system cost growth.

Question. If confirmed, how do you plan to address this issue and guard against the potential impact of weapon systems cost growth?

Answer. If confirmed, I will work with the Under Secretary of Defense for Acquisition, Technology, and Logistics to manage weapon system cost growth. We must spend the Department's resources prudently given our projected top line. That is why I support steps, such as those included in the Department's Better Buying Power initiatives, to manage requirements, improve affordability, and ensure completion where possible.

Question. Do you believe that the Department has adequately addressed its shortfalls in systems engineering and developmental testing capabilities, or does more remain to be done in these areas?

Answer. Systems engineering and developmental test and evaluation are essential to weapon system program success. Based on my experience in the Navy, I believe the Department has strengthened its system engineering and developmental test capabilities. If confirmed, I will work with the Secretary and other stakeholders in the

Department to evaluate what more needs to be done to ensure that the Department has adequate systems engineering and developmental testing capabilities.

Question. Do you believe that additional steps are needed to ensure that WSARA principles are implemented on current major programs like the Joint Strike Fighter (JSF) program?

Answer. Maintaining major acquisition programs on schedule and within budget is a high priority for me and the Department. If confirmed, in conjunction with the Under Secretary of Defense for Acquisition, Technology, and Logistics, I will review major programs, to include the JSF program, to assess whether WSARA principles have been implemented, and will determine if additional steps are required.

Question. Under Secretary of Defense (Acquisition, Technology, and Logistics) Frank Kendall recently released an updated Defense Department Instruction 5000.02. He has stated that the rewrite had “to do with the need for a requirements decision point during what is the risk-reduction phase, the technology demonstration phase.” The latest version of 5000.02 is to put a “place to finalize requirements ... we added a new decision point, which I’ll participate in for major programs, but it’s largely a Joint Requirements Oversight Council, Joint Staff, service, requirements community decision” between Milestone A and Milestone B.

Are you familiar with Under Secretary Kendall’s rewrite of DODI 5000.02?

Answer. I am generally familiar with Under Secretary Kendall’s focus on strengthening our acquisition process, but I am not familiar with the recent rewrite of DODI 5000.02.

Question. Do you believe a new decision point is necessary to finalize requirements between Milestone A and Milestone B?

Answer. I believe that we need to fully assess requirements and cost trades before finalizing requirements and committing to full scale development. If confirmed, I will review the new decision point with the Under Secretary of Defense for Acquisition, Technology & Logistics.

Question. Does having a new decision point between Milestone A and Milestone B risk creating a new bureaucratic hurdle in the acquisition process that will slow the process?

Answer. I believe it is important that major cost and performance trades have been completed and we have appropriately reduced risk before committing to full scale development. If confirmed, I will review the new decision point with the Under Secretary of Defense for Acquisition, Technology & Logistics to ensure it does not unnecessarily add bureaucracy and slow the acquisition process.

Question. Recently, the Joint Requirements Oversight Council (JROC) issued guidance which “encourages Program Managers, Program Executive Officers and Component Acquisition Executives, in coordination with the requirements sponsor, to officially request requirements relief, through the appropriate requirements validation authority, where Key Performance Parameters appear out of line with an appropriate cost-benefit analysis.”

Do you agree with this reform?

Answer. Yes. It is important to ensure that major cost and performance trades are made in order to control costs of our weapon systems.

Question. Do you support the JROC’s review of the analysis of alternatives prior to Milestone A as was called for in the Government Accountability Office’s June 2011 report titled DOD Weapon Systems: Missed Trade-off Opportunities During Requirements Reviews?

Answer. I am not familiar with this report, but if confirmed, I will review it and consider the recommendation.

ROLE OF SERVICE SECRETARIES AND CHIEFS IN THE ACQUISITION PROCESS

Question. Some have suggested that the Service Secretaries and Chiefs should be given a different or expanded role in the acquisition of major systems. Others have expressed concern that such a change would reverse efforts in the Goldwater-Nichols legislation to reduce the layers between the Under Secretary and the program managers, and ensure that there was a dynamic tension between those who defined requirements (Service Chiefs) and those who filled the requirements (Service Acquisition Executives).

What do you believe is the appropriate role for Service Chiefs in the acquisition of major systems?

Answer. Service Chiefs must play a major role in acquisition through their deep involvement in the requirements, manpower, and budget processes. I believe that the Service Chiefs profoundly affect the acquisition process through the way they and their organizations generate, prioritize, and review requirements, program budgets, manage workforce, and interact with the Acquisition Enterprise.

Question. Do you believe there is value in having greater participation of the Service Secretaries and Chiefs involved in the acquisition process?

Answer. I believe that the Service Chiefs and Service Secretaries must play a role in the acquisition process since they ensure the requirements development process, the manpower process, and the budget processes are properly managed and integrated with the acquisition process. If confirmed, I intend to work with the Service Chiefs and Service Secretaries to ensure effective interactions between the requirements, budgeting, staffing, and acquisition systems.

CONTRACTING FOR SERVICES

Question. Over the last decade, DOD's spending on contract services has more than doubled. As a result, the Department now spends more for the purchase of services than it does for products (including major weapon systems). When he was USD(AT&L), former Deputy Secretary of Defense Ashton Carter testified that "the low-hanging fruit really is [in contract services]. There's a lot of money. There has been a very, very high rate of growth over the last decade, in services. They have grown faster than everything else So, there's a lot we can do. I think great savings can be had there, across the Services' spend. It's essential that we look there, because that's half the money."

Do you believe that the cuts made to contract services have fully addressed the issues of waste and inefficiency in this area, or are further reductions possible?

Answer. While the Department has made progress, I believe more can be done. With the current fiscal realities facing the Department, we need to look for efficiencies in our service contracts. The Department needs to strengthen oversight of the requirements for services contracts, improve both competition and small business utilization, and strengthen the professionalism of those outside the acquisition workforce that are principally engaged in buying services. If confirmed, I will work with the Under Secretary of Defense for Acquisition, Technology, & Logistics and the Military Departments to improve the processes and procedures to manage contracted services.

Question. What additional steps would you take, if confirmed, to control the Department's spending on contract services?

Answer. If confirmed, I will review the current efforts in the Department to improve our visibility into, and accountability for, contracted services and focus on improving our insight into the appropriate utilization, cost effectiveness, and alignment of contracted services in support of the Department's mission. If confirmed, I will also support additional steps to ensure the Department's acquisition of services is more efficient and effective.

CONTRACTOR PERFORMANCE OF CRITICAL GOVERNMENTAL FUNCTIONS

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, is DOD still too reliant on contractors to support the basic functions of the Department?

Answer. The Department uses a Total Force approach to manage its workload. Contractors are an important element of the Total Force and provide flexibility and technical competence.

However, we must be careful to ensure work is appropriately assigned to military personnel (Active/Reserve), civilian employees, and contract support.

If confirmed, I will work to ensure the Department continues efforts to implement a Total Force strategy that aligns functions and work to military, civilian, and contract support in a cost effective and balanced manner consistent with workload requirements, funding availability, laws, and regulations.

Question. What additional steps, if any, do you believe are needed to reduce the Department's reliance on contractors to perform critical functions?

Answer. If confirmed, I will work with the acquisition and personnel communities to review our current use of contractor support and reduce such use where appropriate.

BASE REALIGNMENT AND CLOSURE

Question. DOD has requested another Base Realignment and Closure (BRAC) round.

Do you believe another BRAC round is necessary? If so, why?

Answer. With declining budgets and shrinking force structure, I believe the Department's supporting infrastructure must be examined; both for alignment with strategic needs, and opportunities to reduce unneeded capacity. BRAC provides a fair and comprehensive way to do that.

Question. It has been noted repeatedly that the 2005 BRAC round resulted in major and unanticipated implementation costs and saved far less money than originally estimated. What is your understanding of why such cost growth and lower realized savings have occurred?

Answer. I did not participate in the BRAC 2005 process. However, it is my understanding that the 2005 BRAC round was not designed specifically to save money. A good portion of the recommendations were focused on transformation, jointness, and relocating forces from overseas to the United States. These recommendations increased the costs of that BRAC round.

Question. How do you believe such issues could be addressed in a future BRAC round?

Given the Department's limited resources, I expect that a future BRAC round would be similar to the 1993/1995 rounds in which DOD cut excess capacity and achieved a relatively quick payback. That should be the focus of a future round should Congress provide that authority.

STRATEGIC REVIEWS

Question. What is your understanding and evaluation of DOD's processes for strategic assessment, analysis, decisionmaking, and reporting for each of the following strategic reviews?

Answer. The processes for these reviews are important tools to help the Department's senior leaders provide strategic guidance across the Department in keeping with defense objectives in the broader National Security Strategy. They help the Military Department and other Components prioritize efforts and resources to achieve the Department's objectives effectively and efficiently in light of the changing security and fiscal environment.

I have been involved directly and indirectly in many of these reviews at different points throughout my career. The Secretary of Defense determines how best to oversee these review processes. I have seen various approaches used over the years—each differs based on strategic changes, timing, and leadership preferences. However, each Defense review should be based on candid deliberations and advice from across the military and civilian leadership, supported by rigorous data and analysis. This analytical rigor and intense engagement are critical for the Department and the country's national security.

Question. The Quadrennial Defense Review (QDR) (section 118 of title 10, U.S.C.);

Answer. The QDR articulates the Nation's defense strategy in support of the President's national security strategy. Specifically, title 10 U.S.C. section 118, requires the Department to conduct a comprehensive examination of the national defense strategy, force structure, force modernization plans, infrastructure, budget plan, and other elements of the defense program and policies of the United States with a view toward determining and expressing the defense strategy of the United States and establishing a defense program for the next 20 years. In my experience, effective QDRs include a wide range of stakeholders and help to ensure the defense strategy guides U.S. military force structure, plans, and programs.

Question. The National Military Strategy (section 153 of title 10, U.S.C.);

Answer. The Chairman prepares the National Military Strategy as a means to delineate how the armed services support the National Defense Strategy, and to convey the military's views on strategic priorities and associated risks.

Question. Global Defense Posture Review (section 2687a of title 10, U.S.C.);

Answer. In my previous role as Under Secretary of the Navy, I participated in the Department's continuous review process for global defense posture. I have witnessed how this process is informed by the strategy and the Department's operational needs. The annual report to Congress encapsulates the Department's current overseas defense posture and the collaborative process by which the Department makes posture decisions.

Question. The Quadrennial Roles and Missions Review (section 118b of title 10, U.S.C.).

Answer. The Quadrennial Roles and Missions Review (QRM) describes how the Department intends to align organizational responsibilities and military capabilities to carry out assigned missions. Specifically, title 10 U.S.C., section 118b, requires the Department to complete a comprehensive assessment of the roles and missions of the Armed Forces and the core competencies and capabilities of the Department

to perform and support such roles and missions. In the past, conclusions reached during the QDR significantly influenced the Department's assessment of its military roles and missions.

Question. If confirmed, what recommendations would you make, if any, to change title 10, U.S.C., that would update, improve, or make these reviews more useful to the Department and to Congress?

Answer. The QDR and associated reviews serve a useful function for the Department by helping make sure that at least every 4 years the Department deliberately reassesses and, if necessary, adjusts the Nation's defense strategy, defense capabilities, and force structure in line with national security interests, the future security environment, and available resources. If confirmed, I look forward to working with Members of Congress to help make the specific requirements and information the Department provides in these reviews as relevant and useful as possible.

Question. If confirmed, what recommendations would you make, if any, to improve DOD's processes for strategic assessment, analysis, policy formulation, and decision-making relative to each review above?

Answer. From previous experience, I find that the following factors contribute to successful strategic reviews:

- The Secretary or Deputy Secretary provide clear initial guidance and maintain "hands-on" oversight of the review from start to finish.
- All relevant DOD stakeholders are a part of the formal review and decisionmaking fora. These stakeholders generally include senior leaders within the Office of the Secretary of Defense, the Joint Staff, military and civilian leadership from the Military Department and Services and the combatant commands.
- Working groups and review groups are co-led by the offices within the Office of the Secretary of Defense and the Joint Staff, allowing for the most relevant expertise and involvement in the issue areas being examined.
- The working groups' deliberations and findings are transparent and vetted with the key stakeholders.

If confirmed, I would recommend that insights gained from previous reviews, along the lines of those outlined above, be applied to additional reviews that the Department undertakes.

Question. The law requires the QDR to identify the budget plan that would be required to provide sufficient resources to execute successfully the full range of missions called for in that national defense strategy at a low to moderate level of risk, and any additional resources (beyond those programmed in the current Future Years Defense Program) required to achieve such a level of risk. The law also requires the QDR to make recommendations that are not constrained to comply with and are fully independent of the budget submitted to Congress by the President.

What is your understanding and assessment of the Department's QDR analysis and decisionmaking processes to address these two requirements?

Answer. The QDR assessment should be strategy-driven and resource-informed to determine the best mix of capabilities and investment portfolios for the Department to pursue in these complex and uncertain times. However, the Department should not be so constrained by this approach as to overlook gaps and risks in resource allocation or changes to the strategy.

Question. In your view, is there analytical and/or practical value in a defense strategy that is unconstrained by or independent of the current budget request or fiscal environment?

Answer. No. One of the first rules of strategy is that all resources are scarce. An effective defense strategy should take a comprehensive view of the future security environment to assess and prepare the Department prudently for a range of missions and associated risks to U.S. national interests. By definition, a strategy seeks to identify ways to meet policy goals, and allocate projected resources and means in response to perceived risks. As such, the QDR process ensures a broad review of the trends, threats, challenges, and opportunities that shape that environment. Although this assessment is strategy-driven, particularly in this fiscal environment, the defense strategy should also be resource-informed to ensure the Department sufficiently prioritizes its efforts and addresses trade-offs in the needed capabilities, activities, and posture of the future force.

IRAQ

Question. What in your view are the key U.S. strategic interests with regard to Iraq?

Answer. I have not been given a thorough update on developments in Iraq. However, I believe it is imperative that the United States maintain a long-term security

partnership with Iraq as part of a broader enduring commitment to regional peace and security. The United States has invested and sacrificed heavily in Iraq. Iraq's strategic location, oil production capacity, and work to counter violent extremism make Iraq an important regional partner. As such, the United States has a strategic interest in ensuring that Iraq remains stable, sovereign, and secure. If confirmed, I will work to strengthen the Department's relationship with Iraq, by maintaining consultation on security issues, continuing to develop Iraq's military capabilities through foreign military sales (FMS), and deepening Iraq's integration into the region.

Question. What do you see as the major areas, if any, of common security interest between the United States and Iraq?

Answer. I see areas of mutual strategic interest in partnership with a sovereign, stable, and democratic Iraq in several areas, including: countering Iran's aggression and pursuit of nuclear weapons capability, mitigating destabilizing effects on the region from violence in Syria, cooperating with regional allies and partners to reduce the capacity of the Islamic State of Iraq and the Levant (ISIS), maintaining stable production of petroleum exports, and actively participating in regional multilateral exercises.

Question. In what areas, if any, do you see U.S. and Iraqi security interests diverging?

Answer. Both Iraq and the United States have an interest in fighting terrorism, securing borders, combating undesirable external influence, and routing extremist militias to ensure the peace and security of Iraq and the stability of the Middle East region. The United States has an interest in Iraq remaining a close partner, and although our approaches may sometimes differ, our interests tend to be aligned.

Question. What do you see as the greatest challenges for the U.S.-Iraq security relationship over the coming years?

Answer. The greatest challenge facing the U.S.-Iraq security relationship is the successful transition to a more traditional security cooperation relationship—with a robust bilateral and multilateral training and exercise program—despite the complicated history we share, persistent sectarian violence, and tensions over Iranian support to Syria and proxy forces in the region. If confirmed, I will support efforts to work with the Iraqis to make sure that we maintain and expand our bilateral security relationship and will seek to bolster the U.S.-Iraq defense partnership on a wide array of security matters.

Question. Iraq faces a resurgent violent extremist threat that has sought to exploit popular discontent with the current Maliki Government, particularly within Sunni communities in western Iraq.

What role, if any, should the United States play in assisting the Government of Iraq in confronting the threat of violent extremism?

Answer. Iraq is the lead in providing for its own security, but the United States plays an important role in providing Iraq with security assistance to counter violent extremism. Information sharing, non-operational training and advice to the Iraqi Counterterrorism Services, and provision of key defense systems through the foreign military sales program play an important role in improving the capability of the Iraqi military in its campaign against extremists.

Question. In your view, what conditions, if any, should the United States place on the provision of equipment or assistance to the Government of Iraq in its fight against violent extremism?

Answer. I believe we already have sufficient conditions in place. All countries receiving defense equipment and assistance through the foreign military sales program are required to abide by stringent end-use monitoring (EUM) protocols that govern the use and application of military equipment. I understand that the United States holds Iraq to the same EUM standards of accountability and proper use of equipment as with other U.S. defense partners, and the Department makes it clear that cooperation is contingent on the proper use of these systems.

AFGHANISTAN

Question. In your view, has the military campaign in Afghanistan been successful in achieving its objectives?

Answer. Although I have not received a full briefing on the current situation in Afghanistan, I believe the campaign has made significant progress. Coalition and Afghan partners were successful against the insurgency's summer offensive for the second consecutive year. The progress made by ISAF and the ANSF over the past 3 years has put the Government of Afghanistan in control of all of Afghanistan's major cities and 34 provincial capitals, and has driven the insurgency into the countryside. I understand that the Department continues to pursue counterterrorism ob-

jectives. Afghanistan continues to face many challenges, but has made positive strides.

Question. What is your assessment of the performance of the Afghan National Security Forces (ANSF) in assuming the lead for security throughout Afghanistan?

Answer. I understand that Afghan security forces are now providing security for their own people, fighting their own battles, and holding their own against the Taliban. This is a fundamental shift in the course of the conflict. The ANSF now conduct the vast majority of operations in Afghanistan. However, ANSF capabilities are not yet fully self-sustainable, and they require continued support to make lasting progress.

Question. Do you support the retention of a limited U.S. military presence in Afghanistan after 2014?

Answer. I understand that the United States and coalition partners are on track to bring the ISAF mission to a close by the end of 2014 and transition to a new, post-2014 NATO train, advise, and assist (TAA) mission. Beyond the TAA mission, I understand that the United States also plans to conduct a narrowly focused counterterrorism mission against al Qaeda and its affiliates.

As the President has made clear, however, the United States must secure an agreement that protects U.S. Forces and must have an invitation from the Afghan Government in order to remain in Afghanistan.

My view is that the United States is, and should remain, committed to a long-term relationship with Afghanistan. The United States' fundamental goal in Afghanistan remains to defeat al Qaeda and disrupt other extremists who present a serious threat to the United States, its overseas interests, and its allies and partners.

Question. If the United States and Afghanistan are unable to conclude a Bilateral Security Agreement that ensures legal protections for such residual U.S. Forces after 2014, should the United States withdraw its military forces from Afghanistan?

Answer. The President has made clear that the United States must have an invitation from the Afghan Government and must secure an agreement that protects U.S. personnel.

It is my understanding that the current Status of Forces Agreement between the United States and Afghanistan does not have an expiration date. However, further consultation would be necessary if the United States were to rely on it after 2014.

My understanding is that the administration's position continues to be that if we cannot conclude a BSA promptly, we will initiate planning for a post-2014 future with no U.S. or NATO forces in Afghanistan. It continues to be up to the Afghans to determine what is in their interests.

That is not a future I will seek, and it is not in Afghanistan's interests. However, the further this slips into 2014 without a signed agreement, the more likely this outcome becomes.

Question. On Thursday, January 27, 2014, the Karzai Government announced it will release 37 Bagram detainees whom the United States has classified as "... legitimate threats to security".

How will you ensure that detainees held in Afghanistan which are thought to be threats to our security will continue to be held by the Afghan Government?

Answer. I understand that the Department is working through the mechanisms established by the Detention-related Memorandum of Understanding (MOU) with Afghanistan to resolve the matter. The MOU provides a process for the United States to object to releases that it deems inappropriate. Ultimately, however, the decision to release detainees is with the Government of Afghanistan.

Question. The current end strength of the ANSF is around 350,000 personnel. At the North Atlantic Treaty Organization (NATO) Summit in Chicago in May 2012, coalition participants discussed a proposal to reduce the future size of the ANSF to around 230,000, with an annual cost of \$4.1 billion.

Do you agree that any future reductions in the ANSF from the 352,000 troop level should be based on the security conditions in Afghanistan at the time the reductions would occur?

Answer. It is my understanding that the ANSF force structure is regularly evaluated to ensure the ANSF is right-sized based on operational and security conditions. If confirmed, I would review any plans for the final size and structure of the ANSF, including an appropriate force reduction.

Question. Would you support reinvesting a portion of the savings from the draw-down of U.S. Forces into sustaining the Afghanistan security forces at an end strength at or near their current level of 350,000 if necessary to maintain security in Afghanistan?

Answer. If confirmed, I would review the recommendations of the military commanders on the ground regarding the force structure and requisite funding of the Afghan National Security Forces.

Question. What do you see as the United States' long-term strategic interests in Afghanistan after 2014?

Answer. My view is that the United States should remain committed to a long-term relationship with Afghanistan. The United States' fundamental goal in Afghanistan remains to defeat al Qaeda and disrupt other extremists who present a serious threat to the United States, its overseas interests, and its allies and partners. As the President said in the January 2014 State of the Union address, after 2014, the United States will support a unified Afghanistan as it takes responsibility for its own future. If the Afghan Government signs the Bilateral Security Agreement with the United States, a small force of U.S. personnel could remain in Afghanistan with NATO allies to carry out two narrow missions: training and assisting Afghan forces, and counterterrorism operations to pursue any remnants of al Qaeda.

PAKISTAN

Question. What is your assessment of the current relationship between the United States and Pakistan?

Answer. My understanding is that since Pakistan reopened the Ground Lines of Communication to Afghanistan, the defense relationship with Pakistan has improved significantly. The United States has refocused the bilateral defense relationship on shared security interests, including promoting peace and reconciliation in Afghanistan, finishing the job of disrupting, dismantling, and defeating al Qaeda and its affiliates, and supporting Pakistan's fight against the militant and terrorist networks that threaten both the United States and Pakistan. However, if confirmed, I would ensure that the Department continues to engage on issues where there is discord, particularly the need for stronger and more effective action against insurgent groups—especially the Haqqani Network—that threaten U.S. personnel and their Afghan counterparts.

Question. Do you see opportunities for expanded U.S.-Pakistan cooperation on security issues? If so, how would you prioritize these areas of cooperation?

Answer. I believe the United States should continue to shape the defense relationship by taking a pragmatic approach, focused on cooperation in areas of shared interests, such as the fight against al Qaeda and other militant and terrorist networks. Doing so would involve supporting Pakistan military efforts to counter the threat of militant and insurgent groups along the border with Afghanistan. It may also mean working with Pakistan to develop longer-term solutions to Pakistan's militant challenge.

If confirmed, I would ensure that the Department engages with Pakistan where strategic interests diverge, such as the direction of the Pakistani nuclear program and support for proxy militant organizations.

Question. What is your assessment of Pakistan's efforts to combat the threat of international terrorism?

Answer. Pakistan continues to make a major contribution to the fight against terrorism. I understand that thousands of Pakistani troops are engaged in counter-insurgency operations along the border with Afghanistan. The enormous casualties Pakistan has suffered in the fight against terrorism demonstrate Pakistan's strong commitment.

However, I believe Pakistan also needs to counter militant and terrorist groups operating within its territory that do not directly threaten the Pakistani state, especially the Haqqani Network. These networks pose a direct threat to U.S. personnel, threaten regional security, endanger the prospects for a settlement in Afghanistan, and undermine Pakistan's own stability.

Question. What additional steps, if any, do you believe Pakistan should take to address the threat posed by violent extremist groups such as the Haqqani Network and the Taliban Quetta Shura that currently use their safe haven in Pakistan to launch cross-border attacks on U.S., coalition, and Afghan forces?

Answer. I believe Pakistan needs to curtail the ability of these violent extremist groups to plan and execute attacks against U.S. service men and women, coalition forces, and Afghan National Security Forces. Pakistan should take additional steps to target these groups with military and law enforcement assets, improve its efforts to interdict improvised explosive device precursor materials, and prevent these groups from moving freely throughout the country and across the Afghan border. At the same time, Pakistan needs to continue to support reconciliation efforts to promote a political settlement that bring peace and stability to Afghanistan.

Question. What conditions, if any, should the United States place on its security assistance to Pakistan?

Answer. It is difficult to make a comprehensive statement about the impact of conditions on security assistance to Pakistan. The United States and Pakistan do work together on areas of common interest, but it is important to be cautious about explicit conditions on assistance to encourage or require Pakistani cooperation. Any prospective conditions on U.S. assistance should be carefully examined to ensure they advance U.S. strategic interests.

Question. In your view, what impact will the conclusion of the International Security Assistance Force mission at the end of 2014 have on the U.S.-Pakistan relationship?

Answer. Following the conclusion of the ISAF mission at the end of 2014, the United States and Pakistan will still need to work to promote peace and reconciliation in Afghanistan, cooperate in the fight to defeat al Qaeda, its affiliates, and other militant groups, and improve regional security. U.S. Force reductions in Afghanistan will amplify the importance of Pakistani support for these efforts. It is, therefore, critical that the United States sustain its defense relationship with Pakistan, through 2014 and beyond.

CHINA

Question. From your perspective, what effect is China's expanding economy and growing military having on the region at-large and how is that growth influencing the U.S. security posture in Asia and the Pacific?

Answer. China's rapid economic growth is welcomed by many neighboring states as a driving force of economic dynamism and prosperity in the Asia-Pacific region. At the same time, the scale and character of China's military growth is increasingly becoming a source of concern. China's annual defense budget is growing faster than its economy—with average annual increases in defense spending topping 10 percent over the past decade. In certain respects, China's growing military capabilities create opportunities to partner and cooperate where our interests and those of China converge. However, China's rapid rise and the relative lack of transparency surrounding its intentions are increasingly perceived as threatening in the region, especially as its modernization efforts emphasize advanced anti-access and area denial (A2/AD) capabilities. I understand the Department has been making investments focused on countering A2/AD environments around the world, including in the Asia-Pacific region. If confirmed, I would evaluate the impact of these developments—as well as the impact of other security trends—on requirements for the U.S. defense posture in the region.

Question. What do you believe are the objectives of China's military modernization program?

Answer. As I understand it, China is pursuing a long-term, comprehensive military modernization program designed to improve the capacity of its armed forces to fight and win short-duration, high-intensity conflicts along its periphery, and to counter third party intervention. China's near-term focus appears to be preparing for potential contingencies involving Taiwan, and deterring or denying effective third party intervention in a cross-Strait conflict. China is also devoting increasing attention and resources to conducting operations beyond Taiwan and China's immediate periphery. This broader focus includes military missions such as humanitarian assistance and disaster relief, military medicine, peacekeeping, and counter-piracy. Lastly, China is strengthening its nuclear deterrent and enhancing its strategic strike capabilities through the modernization of its nuclear forces, and is improving other strategic capabilities, such as in space, counter-space, and computer network operations.

Question. How do you believe the United States should respond to China's military modernization program?

Answer. I believe the scope and pace of China's military modernization and China's relative lack of transparency with respect to its military plans and programs require that the United States closely monitor the evolution of China's armed forces. It is my understanding that the President's strategy of rebalancing to the Asia-Pacific region seeks, in part, to ensure that the United States remains the preeminent military power in the Asia-Pacific region so that we can continue to help preserve peace and prosperity. I believe the U.S. response to China's military modernization should be comprehensive and encompass changes to U.S. Force posture in the region, the strengthening of Alliances and partnerships, the maintenance of global presence and access for U.S. Forces, and the modernization of key capabilities in such areas as countering anti-access and area denial capabilities.

Question. U.S.-China military-to-military dialogue has been strained over the past several years and efforts to establish and maintain mutually beneficial military relations has been hampered by China's propensity for not responding to requests for military engagements, although there are signs that China has been more inclined to engage in the past 2 years.

What is your assessment of the current state of U.S.-China military-to-military relations and what would be your intention, if confirmed, regarding these relations?

Answer. I understand that the U.S.-China military-to-military relationship has experienced positive momentum over the past year. If confirmed, I would look for ways to strengthen the U.S.-China military-to-military relationship consistent with U.S. interests and values, in pursuit of sustained, substantive dialogue; concrete, practical cooperation; and enhanced risk reduction measures to manage our differences responsibly. At the same time, I would seek to ensure that we balance these exchanges with continued, robust interactions with allies and partners across the region.

Question. What is your view of the relative importance of sustained military-to-military relations with China?

Answer. I believe there is value in sustained and substantive military dialogue with China as a way to improve mutual understanding and reduce the risk of miscommunication and miscalculation. I believe we should continue to use military engagement with China as one of several means to demonstrate U.S. commitment to the security and stability of the Asia-Pacific region, to encourage China to play a constructive role in the region, to discuss the peacetime interaction of our respective military forces with a view to minimizing the risk of accidents, and to urge China to partner with the United States and our allies and partners in addressing common security challenges.

Question. Do you believe that we should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. I believe that military exchanges with China can be valuable, but can only truly move the relationship forward if China is equally committed to open and regular exchanges. If confirmed, I would support deepening and enhancing our military-to-military relationship with China. I would also continue to encourage China to act responsibly, both regionally and globally.

NORTH KOREA

Question. What is your assessment of the current security situation on the Korean peninsula?

Answer. Nearly a year has passed since the last period of heightened tension on the Korean Peninsula, but North Korea continues to be a serious concern for the United States and our allies and partners in the region.

North Korea's December 2012 missile launch and February 2013 nuclear test were highly provocative acts that undermined regional stability, violated North Korea's obligations under numerous U.N. Security Council resolutions, and contravened its commitments under the September 19, 2005, Joint Statement of the Six-Party Talks.

My understanding is that Kim Jong Un remains in full control and is consolidating his power. There is a strong possibility of more North Korean provocations, as Kim Jong Un continues to consolidate his power and Pyongyang attempts to coerce us back into negotiations on its own terms.

If confirmed, I would continue to monitor the situation closely and work with our allies and partners to maintain peace and stability in the region.

Question. What is your assessment of the threat posed to the United States and its allies by North Korea's ballistic missile and WMD capabilities and the export of those capabilities?

Answer. North Korea's missile and weapons of mass destruction (WMD) programs, and its proliferation activities, continue to pose a direct and serious threat to U.S. Forces deployed in the Asia-Pacific region as well as our regional allies and partners. Although these programs are largely untested at longer ranges, they could pose a direct threat to U.S. territory.

If confirmed, I would ensure that the Department draws upon the full range of our capabilities to protect against, and, if necessary, to respond to, these threats.

Question. In your view are there additional steps that DOD could take to ensure that North Korea does not proliferate missile and weapons technology to Syria, Iran, and others?

Answer. I understand that DOD, with its interagency partners, has taken several steps to prevent North Korea's proliferation of weapons-related technology. These steps include strengthening proliferation control regimes, advancing international

nonproliferation norms, and promoting cooperation with partners to interdict vessels and aircraft suspected of transporting items of proliferation concern. Despite these efforts, I believe North Korea will continue to attempt weapons-related shipments via new and increasingly complex proliferation networks. If confirmed, I would work to enhance DOD's countering WMD, partner capacity-building programs and the Department's ability to discover and disrupt these illicit networks.

LAW OF THE SEA CONVENTION

Question. What is your view on whether or not the United States should join the Law of the Sea convention?

Answer. I support U.S. accession to the Law of the Sea Convention. I believe that accession to the Convention would demonstrate a U.S. commitment to upholding the established legal order that codifies the rights, freedoms, and uses of the sea and airspace, including those that are critical to the global mobility of U.S. military forces.

Question. How would being a party to the Law of the Sea convention help or hinder the United States' security posture in the Asia-Pacific region?

Answer. I believe that becoming a party to the Law of the Sea Convention would enhance the U.S. security posture around the globe, including in the Asia-Pacific region, in several ways. First, it would enable the United States to reinforce all of the rights, freedoms, and uses of the sea codified in the Convention, including those that are critical to the global mobility of U.S. Forces. A significant portion of the world's oceans are located in the Asia-Pacific region, and the ability for U.S. Forces to respond to situations depends upon the freedom of the seas. Second, it would help the United States promote a common, rules-based approach among other nations to resolve their territorial and maritime disputes peacefully, including those in the Asia-Pacific region. Third, it would reassure some nations that have expressed concerns about the legal basis of cooperative security efforts that the United States supports, such as the Proliferation Security Initiative.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS

Question. On an annual basis, DOD's counternarcotics (CN) program expends approximately \$1.5 billion to support the Department's CN operations, building the capacity of certain foreign governments around the globe, and analyzing intelligence on CN-related matters. In a recent Government Accountability Office (GAO) report, GAO found that DOD "does not have an effective performance measurement system to track the progress of its counternarcotics activities." This is the second such finding relating to DOD CN in the last decade.

What is your assessment of the DOD CN program?

Answer. I am not familiar with all aspects of the DOD CN program. However, I know that the CN program should provide policy guidance and fiscal resources to perform this important mission, and it has been successful in identifying networks and preventing illicit drugs from entering this country. I understand the Department concurred in the 2010 GAO study that cited a need to improve performance measurement, and that DOD continues to work closely with the Office of National Drug Control Policy to refine these processes. If confirmed, I would ensure that the CN program continues to take concrete steps to improve its evaluation system.

Question. In your view, should DOD continue to play a role in attempting to stem the flow of illegal narcotics?

Answer. Yes. In my view, DOD should continue to play a role in detecting and monitoring drug trafficking. Because of its links to terrorism and other forms of transnational organized crime, drug trafficking has become a major national security challenge. The Department's efforts to build the counternarcotics capacity of partner nation security forces have helped them prevent and deter global trafficking of illegal narcotics.

Question. In your view, should DOD continue to fund the National Guard Counterdrug Program for Youth Intervention and local law enforcement education programs that may be duplicative of the efforts of other agencies, using CN funds?

Answer. I am aware that, in light of the fiscal environment, the National Guard has had to limit its Counterdrug youth outreach program in recent years. If confirmed, I would work with the National Guard Bureau to assess CN programs and to ensure they remain effective and efficient.

BUILDING PARTNER CAPACITY (BPC)

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations, including the

global train and equip authority (section 1206) and the Global Security Contingency Fund.

In your view, what should be our strategic objectives in building the capacities of partner nations?

Answer. My understanding is that these temporary DOD authorities are intended to address emerging threats, and as such the Department's primary objective should be to develop near-term capacity for partners to take effective actions against these threats. From a strategic perspective, the Department's objective should be to help partner countries develop effective and legitimate defense and security institutions that can provide for their countries' internal security. Doing so reduces the burden on U.S. Forces responding to security threats outside the United States and promotes interoperability between U.S. Forces and allied and partner forces. If confirmed, it would be my aim to ensure that DOD security assistance programs will fulfill defined strategic requirements and close vitally important capability gaps.

SPECIAL OPERATIONS FORCES

Question. The previous two QDRs have mandated significant growth in our Special Operations Forces and enablers that directly support their operations.

Do you believe QDR-directed growth in the size of Special Operations Forces can and should be maintained in light of current fiscal challenges?

Answer. The United States has grown Special Operations Forces substantially since 2001—doubling the size of the force and tripling the budget. As U.S. Forces draw down in Afghanistan, where Special Operations Forces have been heavily committed, the Department has an opportunity to rebalance the force to align it better with our overall strategy and declining resources. If confirmed, I would work with the Assistant Secretary of Defense (SO/LIC) and the Commander, SOCOM to understand more fully the issues associated with developing, employing, and resourcing our Special Operations Forces.

Question. Special Operations Forces heavily rely on enabling capabilities provided by the general purpose forces to be successful in their missions.

In light of current fiscal challenges, do you believe sufficient enabling capabilities can be maintained within the general purpose forces and that such capabilities will remain available to Special Operations Forces when needed?

Answer. It is my experience that U.S. Special Operations Forces (SOF) receive excellent support from the Services. As the Department reshapes and resizes overall force structure, it needs to ensure proper balance, including the right density of enabling capabilities such as intelligence, explosive ordnance disposal, communications, and medical support that are essential to both SOF and General Purpose Forces. If confirmed, I would work closely with our Service Chiefs and the Commander, SOCOM, to ensure the Department has the right balance across the entire force.

Question. Do you believe Special Operations Forces should develop additional organic enabling capabilities in addition or in place of those currently provided by the general purpose forces?

Answer. I believe organic enablers assigned to SOCOM should be purposely designed for "SOF-specific" requirements. Service-common capabilities should fill the rest of SOF's enabler requirements. This arrangement allows the Department to focus its Special Operations funding on SOF-specific requirements and avoids duplication with the Services.

Question. The Commander of U.S. Special Operations Command (SOCOM) has sought more control over the deployment and utilization of Special Operations Forces. For example, the Secretary of Defense modified policy guidance for the combatant commands earlier this year that gave SOCOM, for the first time, responsibility for resourcing, organizing, and providing guidance to the Theater Special Operations Commands of the geographic combatant commanders and Special Operations Forces assigned to them. It has been reported that the Commander of SOCOM is also seeking new authorities that would allow him to more rapidly move Special Operations Forces between geographic combatant commands.

Please provide your assessment of whether such changes are appropriate and can be made without conflicting with civilian control of the military, infringing upon authorities provided to the geographic combatant commanders, or raising concerns with the State Department.

Answer. It's appropriate always to look for ways to manage the force more efficiently and effectively, and in this time of transition and declining resources this is increasingly important. At the same time, I believe the Department should maintain a proper degree of oversight and control of force deployments, as it does with conventional forces. I understand the Department will continue to rely on our geographic combatant commanders to oversee activities in their respective areas of re-

responsibility, similar to how they oversee Service-led activities overseas. If confirmed, I would work closely with interagency colleagues to ensure deployments of Special Operations Forces are fully coordinated and synchronized with the geographic combatant commanders and the Chiefs of Mission and Chiefs of Station in the affected countries.

Question. Do you believe SOCOM is appropriately resourced to adequately support the Theater Special Operations Commands and Special Operations Forces assigned to them?

Answer. I have not been briefed on any gap between SOCOM requests and available resources. I believe SOCOM is appropriately resourced to support the forces assigned to them. I understand a recent change gave SOCOM increased responsibility for the Theater Special Operations Commands (TSOCs), which also receive funding and support from the Geographic Combatant Commands through their respective Service support activities. If confirmed, I would ensure the division of responsibility for TSOC resourcing is properly divided between SOCOM and the Services.

SECTION 1208 OPERATIONS

Question. Section 1208 of the NDAA for Fiscal Year 2005 (Public Law 108–375), as amended, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of this authority?

Answer. Section 1208 provides the Secretary of Defense with authority to combat terrorism in a wide range of operational environments—often where Special Operations Forces are operating under austere conditions and require specialized support from indigenous forces or persons. Although I have not been briefed on the particulars of these activities, I understand that combatant commanders and chiefs of mission place a high value on this program, and if confirmed, I would make it a priority to gain a deeper understanding of the costs, benefits, and risks associated with activities conducted under section 1208 authority.

DOD'S COOPERATIVE THREAT REDUCTION PROGRAM

Question. The Cooperative Threat Reduction (CTR) program was historically focused primarily on eliminating Cold War era WMD in the states of the former Soviet Union and Russia. The bilateral agreement with Russia has now ended.

What are the principal issues remaining to be addressed in this program with the former Soviet states?

Answer. I believe the principal issue that the CTR program needs to address in the former Soviet States is the threat posed by WMD terrorism. It is my understanding that the CTR Program has made significant progress to reduce the dangerous legacy of the Cold War-era WMD. In addition, I understand there is important work that could be done to assist partners within the former Soviet States to achieve the biosecurity measures referenced in the newly released Global Health Security Agenda.

Question. What are the principal issues with this program in the Middle East and North Africa?

Answer. I believe that reducing the threat from WMD should be the principal driver for the program in the Middle East and North Africa. One great example of this work that I am aware of is the Libyan Government's recent announcement that it had completed destruction of its chemical weapons stockpile with the help from the U.S. Government through the CTR Program and from the German Government.

Question. Do you think the CTR program is well coordinated among the U.S. Government agencies that engage in threat reduction efforts, including DOD, the Department of Energy, and the State Department?

Answer. My understanding is that the CTR Program and other non-proliferation programs executed by Federal agencies are coordinated well through the National Security Council staff. If confirmed, one of my priorities would be to ensure that all of the Department's activities in this area are well-coordinated with interagency partners.

Question. As the CTR program expands to geographic regions beyond the states of the former Soviet Union, in your view what proliferation and threat reduction goals should the DOD establish?

Answer. My understanding is that the President has highlighted nuclear and biological terrorism as key threats, and that the CTR Program strongly supports these priorities with particular emphasis on biological threats. I agree with these priorities and, if confirmed, I would work to make countering these threats a DOD priority. I understand that in the near term, one of the high-priority efforts of the CTR

Program is the destruction of the Syrian Chemical weapons and production materiel.

PROMPT GLOBAL STRIKE

Question. The 2010 QDR concluded that the United States will continue to experiment with prompt global strike prototypes. There has been no decision to field a prompt global strike capability as the effort is early in the technology and testing phase.

In your view, is there a role for a conventional prompt global strike capability in addressing the key threats to U.S. national security in the near future?

Answer. Yes, I believe there is a role. Prompt global strike weapons can provide a means for striking high value, time sensitive and defended targets from ranges beyond the capabilities of existing weapons or in situations where other forces are unavailable. The DOD technology development program is designed to determine whether the Department can achieve that desired capability at an affordable cost.

Question. What approach to implementation of this capability would you expect to pursue if confirmed?

Answer. I have not had the opportunity to review the status of current technology efforts that support this capability. If confirmed, I will monitor progress, and evaluate costs and options for implementation.

Question. In your view what, if any, improvements in intelligence capabilities would be needed to support a prompt global strike capability?

Answer. Discussion of intelligence capabilities and their limitations is classified. If confirmed, I will seek to understand and identify what improvement in intelligence capabilities would be needed in the context of a prompt global strike capability.

NUCLEAR WEAPONS AND STOCKPILE STEWARDSHIP

Question. Congress established the Stockpile Stewardship Program with the aim of creating the computational capabilities and experimental tools needed to allow for the continued certification of the nuclear weapons stockpile as safe, secure, and reliable without the need for nuclear weapons testing. The Secretaries of Defense and Energy are statutorily required to certify annually to Congress the continued safety, security, and reliability of the nuclear weapons stockpile.

As the stockpile continues to age, what do you view as the greatest challenges with respect to assuring the safety, reliability, and security of the stockpile?

Answer. I believe the greatest challenge for an aging stockpile in today's fiscal environment is maintaining a balanced program to ensure that the current stockpile can be maintained and the infrastructure modernized, and that the science and technology program that underpins the program is adequate to meet current and future tasks. It is my understanding that the most recent stockpile assessment reports from our Nation's Weapons Laboratory Directors and the Commander of STRATCOM indicate that the stockpile is safe, secure, and reliable. However, the average age of U.S. nuclear weapons is 27 years, and the nuclear weapons complex includes facilities that date back to the Manhattan project. As the stockpile continues to age, efforts to sustain and certify the deterrent through warhead surveillance activities will become even more challenging.

I understand that DOD and the Department of Energy have made significant investments in the nuclear complex since the 2010 Nuclear Posture Review. If confirmed, I would continue to work with Congress and the Department of Energy to update and execute a long-term modernization strategy that will continue to ensure the safety, reliability, security and effectiveness of the nuclear stockpile.

Question. If the technical conclusions and data from the Stockpile Stewardship Program could no longer confidently support the annual certification of the stockpile as safe, secure, and reliable, would you recommend the resumption of underground nuclear testing?

Answer. My understanding is that the administration's investments in the nuclear enterprise, including the Department of Energy's Stockpile Stewardship Program, continue to provide us confidence in the nuclear stockpile. If confirmed, I will look into this issue and take whatever steps are necessary to ensure that our nuclear stockpile is safe, secure, and reliable.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. Maintaining a safe, secure, and effective nuclear stockpile is a critical national security priority. If confirmed, I would advocate for the required funding to do so. The section 1043 report, which I understand has superseded the section 1251

report, describes the administration's plan for sustainment and modernization of nuclear deterrent capability, including how the plan will be funded. It is my understanding that DOD works closely with the Department of Energy, and other relevant agencies, to prioritize modernization efforts and align them with funding realities. If confirmed, I would continue that cooperation.

Question. Can DOD afford the plan set out in the report?

Answer. Modernizing the nuclear weapons complex is imperative to our Nation's security, and, if confirmed, I would work to ensure adequate funding for this critical national security priority. The current plan includes extending the life of nuclear weapons and investing in weapons infrastructure through refurbishment of existing facilities and construction of new facilities. I understand that DOD and the National Nuclear Security Administration are funding the B61 gravity bomb, the W76 warhead for Submarine Launched Ballistic Missiles, and the W88 warhead for Submarine Launched Ballistic Missiles. In the near future, cruise missile warheads and ICBM warheads must also be refurbished. The Nation's nuclear weapons complex also requires investment in new plutonium and uranium processing facilities to guarantee that critical nuclear components are available for warhead modernization programs. Even in a constrained budget environment, DOD and the Department of Energy, acting through the Nuclear Weapons Council, must work to ensure a safe, secure, and effective nuclear stockpile.

Question. Do you support the nuclear employment strategy released in June of 2013?

Answer. Yes, based on what I've seen in unclassified forms, I support the President's new guidance that aligns U.S. nuclear policies to the 21st century security environment. If confirmed, I would make sure that DOD takes the steps necessary to implement this policy. Consistent with the President's new guidance, I would support maintaining a credible deterrent, capable of convincing potential adversaries that the adverse consequences of attacking the United States or our allies and partners far outweigh any potential benefit they may seek to gain through an attack.

Question. Prior to completing this modernization effort, do you believe it would be prudent to consider reductions below New Strategic Arms Reduction Treaty (START) limits for the deployed stockpile of nuclear weapons? If so, what are the potential risks and benefits associated with further reductions?

Answer. The 2010 Nuclear Posture Review concludes: "The United States will retain the smallest possible nuclear stockpile consistent with our need to deter adversaries, reassure our allies, and hedge against technical or geopolitical surprise." The President has stated his willingness to next reduce U.S. nuclear forces by up to one-third over New START treaty limits. I believe such reductions below the New START treaty limits should only be done on a mutually negotiated basis, subject to the trajectory of other potential threats.

Question. If confirmed will you commit to participating in exercises involved with the nuclear command, communications, and control system in facilities and platforms outside the Pentagon?

Answer. Yes.

TACTICAL FIGHTER PROGRAMS

Question. Perhaps the largest modernization effort that we will face over the next several years is the set of programs to modernize our tactical aviation forces with fifth generation tactical aircraft equipped with stealth technology, to include the JSF.

Based on current and projected threats, what are your views on the requirements for and timing of these programs?

Answer. I believe the Department needs to transition to a fifth generation capability. We need the F-35 capability to address advanced threats world-wide, especially in the stressing electronic warfare environments of the future. If confirmed, I will review the Departments tactical aviation modernization programs.

Question. What is your view on the affordability of these programs?

Answer. I believe affordability is critical to these programs, as well as with all of our acquisition programs and services. If confirmed, this is an area I will be reviewing closely to assess these programs in the context of the overall DOD program, and make appropriate adjustments in consultation with the Secretary and other Department leadership.

Question. Even if all of the current aircraft modernization programs execute as planned, the average age of the tactical, strategic, and tanker fleet will increase. Aging aircraft require ever-increasing maintenance, but even with these increasing maintenance costs, readiness levels continue to decline.

Can both the maintenance of the legacy force and the modernization efforts be affordable at anywhere near the expected budget levels?

Answer. Given expected budget levels, balancing the costs of maintaining an aging aircraft fleet while recapitalizing and modernizing that fleet is an area I would examine closely, if confirmed. I expect risk-informed tradeoffs to be necessary. The Department will have to continue to assess where trades are required to meet those readiness and modernization needs.

Question. Some critics believe that there is still too much service parochial duplication in procuring new systems.

Do you agree with these critics?

Answer. I believe that the Department has improved in this area, but it is an area that requires continued vigilance and oversight to ensure the Department is not wasting scarce resources on duplicative systems. Service investments should be complementary to benefit the entire department.

Question. What steps will you take as Deputy Secretary to reduce such duplication?

Answer. If confirmed, I will ensure Service investments are complementary, and that any duplication I find is reduced appropriately.

Question. What additional steps, if any, do you believe the Department should take in the future?

Answer. If confirmed, I will investigate what levels of readiness exist and any reasons why readiness does not match investments in maintenance. I will then determine what additional actions to take.

UNMANNED SYSTEMS

Question. Congress has established a goal that by 2015, one-third of the aircraft in the operational deep strike force aircraft fleet and one-third of operational ground combat vehicles will be unmanned.

Do you support this goal?

Answer. I support the goal of fielding unmanned systems with greater capability for the future, especially as our National Defense Strategy shifts to one focused on the Pacific Region and more sophisticated operating environments than what we have experienced over the past decade in Iraq and Afghanistan.

Question. What is your assessment of DOD's ability to achieve this goal?

Answer. Based on what I know, I think the 2015 goal is overly optimistic. If confirmed, I will assess the ability of DOD to achieve this goal.

Question. What steps do you believe the Department should take to achieve this goal?

Answer. The Department should continue to focus on research and development efforts related to UAS and ground robotics technology, as well as on the development of concepts of operations and requirements for unmanned systems. This is vital to realizing increased unmanned capabilities that are properly aligned with evolving warfighter needs, at affordable cost. At the same time, if confirmed I will ensure the Department remains focused on being responsive in fielding urgently needed capabilities to meet the needs of today's warfighter.

SHIPBUILDING BUDGET

Question. With about half of the Navy's construction and development dollars being needed to build nuclear submarines, the Navy's commitment to building new submarines could crowd out funding needed to modernize the surface fleet.

In your view, will the level of funding in the shipbuilding budget and certain high-cost programs force the Department to make requirement decisions in a constrained budget environment that may not be in the best interest for our national security?

Answer. There are multiple options to make the shipbuilding budget support our national security including new procurements, modernizing legacy systems and security cooperation with other navies. It will take a balanced approach to sustain a maritime force structure adequate for national defense with acceptable risk. If confirmed, I will assess the shipbuilding budgets and programs and the potential consequences to operational capabilities over time, to include the industrial base.

Question. What steps, if any, do you believe the Department should take to address this concern and ensure adequate funding for the ballistic missile submarine replacement program?

Answer. I believe the strategic deterrence value of the *Ohio* Replacement Program remains valid. If confirmed, I will evaluate the need for, and level of, funding. I understand the Navy is working to manage the affordability of the *Ohio* replacement by managing requirements and leveraging advantages of the *Virginia* submarine program.

Question. Do you believe that certain high cost “national assets” should be funded outside the services’ budgets where they do not have to compete with other critical weapon systems modernization needs of the Services?

Answer. At this time, I do not believe that moving programs outside of the Service budgets will protect programs or reduce pressure on the Department’s topline. If confirmed, I will work with Congress to properly fund prioritized programs within the overall defense budget.

CYBER SECURITY

Question. Deputy Secretary Lynn and Deputy Secretary Carter were heavily involved in developing the DOD cyber strategy.

If confirmed will you also play a major role in DOD cyber issues?

Answer. In 2013, for the second year in a row, Director of National Intelligence James Clapper named cyber as a top-tier threat to the Nation. If confirmed, I would invest significant time and attention to cybersecurity and to DOD’s ability to operate effectively in cyberspace. I would work closely with the Secretary of Defense and others to make certain that DOD can accomplish its three principal cyber missions: to defend the Nation from strategic cyber-attack; conduct effective cyber operations in support of combatant commanders, when directed; and defend DOD networks.

TEST AND EVALUATION

Question. What is your assessment of the appropriate balance between the desire to reduce acquisition cycle times and the need to perform adequate testing?

Answer. Testing is needed to validate system performance, and I believe it is a necessary part of the acquisition process. The optimal balance of cycle time and testing is likely unique to each system, and, if confirmed, I would seek to examine opportunities to achieve this goal.

Question. Under what circumstances, if any, do you believe we should procure weapon systems and equipment that has not been demonstrated through test and evaluation to be operationally effective, suitable, and survivable?

Answer. Systems should demonstrate their effectiveness, suitability and survivability through operational testing prior to a full rate production decision. In specific cases, based on the nature and seriousness of the deficiencies found in testing, it may be acceptable to continue production while the deficiencies are corrected. There can be circumstances when it might also be necessary to field a system prior to operational testing in order to address an urgent need in a critical capability, especially in those circumstances when the system is better than anything already in the field. Even then, operational evaluation should still be done at the earliest opportunity to assess the system’s capabilities and limitations and identify any deficiencies that might need to be corrected.

FUNDING FOR SCIENCE AND TECHNOLOGY INVESTMENTS

Question. In the past, the QDR and the Department’s leaders have endorsed the statutory goal of investing 3 percent of the Department’s budget into science and technology programs.

Do you support that investment goal?

Answer. Yes. I recognize the critical importance of a robust science and technology program that can develop and deliver near-term capabilities and maintain long-term options for the Department. As we consider the Department’s future budget situation, every part of the budget must be assessed to identify the appropriate level of investment consistent with the Departments’ needs and long-term strategy.

Question. How will you assess whether the science and technology investment portfolio is adequate to meet the current and future needs of the Department?

Answer. If confirmed, I would work closely with the Secretary, the Chairman of the Joint Chiefs, the Services, and others to establish guidelines for investment priorities. Based on these priorities, I would work through the Under Secretary of Defense for Acquisition, Technology, and Logistics to assess the adequacy of the current science and technology investment portfolio and to identify any changes required in the planned program to address the Department’s priorities.

Congress established the position of Director of Operational Test and Evaluation to serve as an independent voice on matters relating to operational testing of weapons systems. As established, the Director has a unique and direct relationship with Congress which allows him to preserve his independence.

Question. What is your view on the responsibility of the Deputy Secretary of Defense to provide oversight of the Director of Operational Test and Evaluation?

Answer. If confirmed, I will rely on the Director of Operational Test and Evaluation to provide both me and the Secretary independent and objective evaluations of

system key performance parameters and their effectiveness and suitability for the Department's systems. This function is critical to advancing our acquisition priorities and ensuring the effective stewardship of our resources. I will meet regularly with the Director to review the scope, content, and findings of the operational and live-fire testing being conducted by the Department.

Question. Do you support the Director of Operational Test and Evaluation's ability to speak freely and independently with Congress?

Answer. Yes.

BALLISTIC MISSILE DEFENSE

Question. Do you support the policies, strategies, and priorities set forth in the February 2010 Ballistic Missile Defense Review and, if confirmed, will you implement them?

Answer. Yes, I support the conclusions of the 2010 Ballistic Missile Defense Review (BMDR). The policy priorities laid out in the BMDR are still valid, and, if confirmed, I would continue U.S. efforts already underway to implement them.

Question. Do you agree that operationally effective and cost-effective ballistic missile defenses are essential for both Homeland defense and regional defense and security?

Answer. Yes, even in these days of tight budgets, it is important that we invest in effective, affordable missile defense systems. If confirmed, I would support the U.S. commitment, described in the 2010 BMDR, to deploying capabilities that have been proven through extensive testing and assessment and that are affordable over the long term.

Question. The two most recent attempted intercept flight tests of the Ground-based Midcourse Defense (GMD) system failed to intercept their targets, one in December 2010, using a Capability Enhancement-2 (CE-2) kill vehicle, and one in July 2013, using the older CE-1 kill vehicle. The Director of the Missile Defense Agency (MDA) has indicated that MDA's highest priority is correcting the problems that caused these flight test failures, and that such corrections need to be demonstrated through successful intercept flight testing.

Do you agree that it is essential to demonstrate through successful and operationally realistic intercept flight testing that the problems that caused these flight test failures have been corrected, and that the GMD system will work as intended, with both the CE-1 and CE-2 kill vehicles?

Answer. Yes, I agree.

Question. On March 15, 2013, Secretary Hagel announced plans to improve our Homeland ballistic missile defense capability to stay ahead of ballistic missile threats from North Korea and Iran, including the deployment of 14 additional Ground-Based Interceptors (GBI) at Fort Greely, AK, by 2017. Secretary Hagel stated that, prior to deploying these 14 additional GBIs, there would need to be confidence that the system would work as intended, through successful testing of the GMD system with the CE-2 kill vehicle.

Do you agree with Secretary Hagel's "fly before you buy" approach that the GMD system needs to demonstrate successful operationally realistic intercept flight test results before we deploy any additional GBIs?

Answer. Yes, I agree.

Question. In a recent report, the Director of Operational Test and Evaluation said that the GMD flight test failures had raised questions about the robustness of the EKV design and recommended that the Department consider redesigning the EKV to be more robust. The Department is already planning a re-designed EKV, and Congress supported the funding requested for fiscal year 2014 to develop Common Kill Vehicle Technology.

Do you agree there is a need to improve the GMD system, including through development and testing of a re-designed EKV and improvements to sensor and discrimination capabilities, to increase the reliability and performance of the system against evolving homeland missile threats from North Korea and Iran?

Answer. Yes, I agree.

Question. DOD has successfully completed deployment of Phase 1 of the European Phased Adaptive Approach (EPAA) to missile defense and is proceeding toward planned deployment of Phases 2 and 3 in 2015 and 2018, respectively, to protect all of NATO European territory against Iranian missiles.

Do you support the EPAA and other similar United States regional missile defense efforts and, if confirmed, will you work to implement them?

Answer. Yes. Our regional missile defenses are an important element of our deterrence and defense strategies, and provide an essential capability for defending U.S. Forces and presence abroad, and our allies and partners. If confirmed, I would con-

tinue to support the European Phased Adaptive Approach as well as other regional missile defense efforts.

READINESS FUNDING

Question. After almost a decade of combat operations, each of the military Services faces a rising bill for maintenance and repair. The Army has stated that reset funding will be needed for at least 2 to 3 years beyond the end of Overseas Contingency Operations (OCO). The Marine Corps leadership has acknowledged that a \$10 billion bill awaits at the end of combat operations, but has requested only \$250 million for reset this year. The Navy has identified a 1-year backlog of deferred ship and aircraft depot maintenance. The Air Force has requested funding for only 84 percent of needed aircraft repairs this year.

What level of priority do you place on reset and reconstitution funding for the Military Services?

Answer. Reset and reconstitution are important to the Services as they transition from a counterinsurgency-focused force to a force ready and capable of operating across a full range of operations across the globe. Reset activities are funded out of the OCO budget. The Department needs these funds, and I understand that OCO funding, or some similar funding mechanism, will need to continue for several years. Some equipment can be repaired and some will have to be replaced if required for future contingencies. Reset and reconstitution requirements must be carefully managed to ensure these funds contribute to future readiness. If confirmed, I will work to ensure this happens.

Other maintenance needs are funded out of the base budget. Given the magnitude of sequestration reductions and despite some relief as a result of the BBA of 2013, the Military Services will have to make tough choices to balance their budgets to maintain the All-Volunteer Force, maintain readiness, and sustain infrastructure and modernization investments in equipment while continuing to give priority support to troops deployed in combat. If confirmed, I will make every effort to ensure adequate funding for these initiatives, consistent with the budget limitations that Congress places on the Department.

Question. What steps would you take, if confirmed, to address maintenance backlogs and ensure that the military departments request adequate funding for reset, reconstitution, and other maintenance requirements?

Answer. If confirmed, I would continue to monitor readiness reporting and work with the service secretaries and other components to ensure DOD is prepared to achieve the National Security Strategy goals.

PROTECTION AGAINST INTERNAL THREATS

Question. DOD has fallen victim to numerous internal threats, leading both to physical attacks and loss of life, and the theft and exposure of huge amounts of sensitive and classified information. The NDAA for Fiscal Year 2014 included legislation mandating reforms of the personnel security system and integration of that reformed system with other elements of a coordinated insider threat program. Prior NDAs mandated comprehensive insider threat protection programs coordinated with cybersecurity systems. The President issued a memorandum in late 2012 directing all departments and agencies to build and maintain an insider threat analytic capability that is integrated across many different domains and functions, including personnel security, personnel records, counterintelligence, law enforcement, information assurance, and computer network auditing. These requirements present a daunting information technology acquisition and integration challenge.

What type of management structure, resources, and authorities do you believe is necessary to succeed in this endeavor?

Answer. I believe the Department must take a very deliberative approach to understanding and evaluating potential threats posed by insiders while simultaneously ensuring that privacy and civil liberties are preserved. As I understand it, DOD is working both internally and with OMB, OPM, and other agencies to develop better approaches to guard against insider threats. I believe this challenge, and the associated challenges of information technology acquisition and integration, require the sustained attention of the Department's leadership. If I am confirmed, I will utilize the tools and procedures available to me as the Department's Chief Management Officer to ensure that the Department meets these critical challenges

ANNUAL INCREASE IN RATES OF BASIC PAY BELOW THE EMPLOYMENT COST INDEX

Question. The Department requested an across-the-board pay raise for 2014 for military personnel of 1 percent, versus a 1.8 percent rise in the Employment Cost Index (ECI) benchmark, and has indicated that in order to restrain the growth of

personnel costs, similar below-ECI pay raises may be necessary over the next several years.

What is your assessment of the impact on recruiting and retention of pay raises below the increase in ECI in 2015 through 2018?

Answer. From my time as Under Secretary of the Navy, I know our military compensation package is and must remain highly competitive in order to recruit and retain the high quality men and women who make up our Nation's military.

I understand that even under the Department's plan to slow the growth of military compensation, military members continue to receive a robust package of pay and benefits that compares favorably with private-sector compensation. Thus, I do not assess the below-ECI level pay raise as materially impacting our recruiting or retention efforts.

If confirmed, I will monitor this issue and remain vigilant to ensure our military pay levels remain appropriate and ensure the Department remains good stewards of the funds provided by Congress and the American taxpayers.

RELIGIOUS ACCOMMODATION IN THE ARMED FORCES

Question. In your view, do DOD policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other beliefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. Yes. From my previous experience as a Marine Corps Officer and Under Secretary of the Navy, I believe the Department is fully committed to the free exercise of religion.

Question. Under current law and policy, are individual expressions of belief accommodated so long as they do not impact good order and discipline?

Answer. Yes. That is my understanding of the current law and policy.

Question. In your view, do existing policies and practices regarding public prayers offered by chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Yes. I have had numerous opportunities during my decades of service in the Department to observe firsthand how chaplains strike this balance by considering their audience and the tenets of their faith before addressing groups in formal and informal settings.

Question. DOD Instruction 1300.17, "Accommodation of Religious Practices Within the Military Services" provides that servicemembers submitting requests for waiver of religious practices will comply with the policy, practice or duty from which they are requesting accommodation, including refraining from unauthorized grooming and appearance practices unless and until the request is approved.

In your view, does the requirement to comply with the policy from which the servicemember is seeking a waiver unless and until it is approved interfere with the accommodation of religious faith of a person, such as a male of the Sikh faith whose faith requires an unshorn beard, if that servicemember must comply with grooming standards that require that he shave his beard pending a determination of the waiver?

Answer. Servicemembers accept the standards of service upon entry into the military.

My understanding is the Department has recently updated its policy in this area to provide more latitude for members in favor of accommodation which can be approved on a case-by-case basis as long as those waivers do not affect mission accomplishment, military readiness, unit cohesion, good order, discipline, health and safety.

If confirmed, I look forward to receiving an update on the Department's revised policy.

Question. Section 774 of title 10, U.S.C., authorizes members of the Armed Forces to wear items of religious apparel, such as the Jewish yarmulke, while wearing their uniform so long as the items are neat and conservative and do not interfere with the performance of military duties.

Does DOD policy presumptively allow the wear of religious apparel or do servicemembers have to request approval in every instance, even for the wear of apparel that is neat and conservative and that does not interfere with the performance of military duties?

Answer. My understanding is that servicemembers must comply with the uniform policies of their individual Service.

Question. Do you believe that requests to waive grooming and appearance standards and to wear of items of religious apparel are more appropriately addressed prior to the member's entry into military service?

Answer. My understanding of the Department policy is that it does allow members to request waivers at any time during their service.

Question. Under what circumstances would you consider it appropriate to grant waivers for grooming and appearance standards and for wear of religious apparel for all members of a specific faith group?

Answer. Given my concern for the safety and well-being of our personnel and the often dangerous and austere conditions in which they operate, I cannot envision a set of circumstances that would make for a blanket waiver from military standards advisable. I believe the best approach is a case-by-case examination for each servicemember and duty station or service specialty.

Question. Under what circumstances would you consider it appropriate to grant waivers for grooming and appearance standards and for wear of religious apparel for a member of a faith group that could remain in place regardless of new assignment, transfer of duty stations, or other significant change in circumstances, including deployment?

Answer. Given my concern for the safety and well-being of our personnel and the often dangerous and austere conditions in which they operate, I cannot envision a set of circumstances that would make a blanket waiver from military standards for an entire career advisable. I believe the best approach is a case-by-case examination for each servicemember and duty station.

Question. In your view, what is the appropriate role in assisting the Department to develop policy for religious accommodation for the following:

The Armed Forces Chaplains Board?

Answer. To inform and advise Department policies.

Question. Ecclesiastical Endorsing Agents?

Answer. To provide advice on specific religious practices.

Question. Civil organizations?

Answer. I understand the Department often receives information from various private organizations and this information helps inform us regarding the views of the public.

Question. Section 533 of the NDAA for Fiscal Year 2013 (P.L. 112–239) protects rights of conscience of members of the Armed Forces and chaplains of such members, and prohibits, so far as possible, use of such beliefs as the basis of any adverse personnel action, discrimination, or denial of promotion, schooling, training, or assignment. Members of some religious denominations have sincerely held beliefs in opposition to same-sex marriage.

In your view, may a member of the armed forces who has a sincerely held belief in opposition to same-sex marriage be subject to adverse personnel action or similar other adverse action, if he or she shares those personal views on the subject in an official capacity?

Answer. It is my understanding that the Department has a longstanding practice of generally not supporting the expression of personal views in one's official capacity because of the likelihood of confusion between the two.

Question. Can he or she be subject to adverse personnel action if they express personal views on same sex marriage in their personal capacity?

Answer. My understanding is the Department does not inhibit the rights of members to talk about their beliefs, as long as such speech is free of compulsion or coercion and does not encroach upon the dignity and respect of others who do not hold the same moral or religious views.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. On December 20, 2013, the President commended the Pentagon leadership for moving ahead with a broad range of initiatives to address sexual assault in the military, including reforms to the military justice system, improving and expanding prevention programs, and enhancing support for victims. The President directed the Secretary of Defense and Chairman of the Joint Chiefs to continue their efforts and to report back to him by December 1, 2014, with a full-scale review of their progress.

What is the Department's plan for complying with the President's directive?

Answer. It is my understanding that the Department is working collaboratively with the White House to ensure the report reflects its progress toward satisfying the President's goal of detailing major improvements in the prevention and response to sexual assault, demonstrates the Department's efforts and leadership on the issue, and shows clear measures of progress—both quantitative and qualitative.

Question. If confirmed, do you expect to participate in the progress review directed by the President?

Answer. Yes. If confirmed, I will actively, and vigorously, participate in and support this review process.

Question. If confirmed, what will be your role in the Department's effort to prevent and respond to sexual assault in the military?

Answer. The Secretary has made it very clear that eliminating sexual assault from the armed forces is a priority. I share his commitment. Sexual assault is a crime and since it erodes the trust and cohesion that is central to our values and our operational mission effectiveness, it has no place in our Nation's military.

If confirmed, I intend to be an active participant in the Secretary's comprehensive efforts to prevent this crime from occurring, and if it does occur, ensuring we protect victims' privacy, provide responsive care, professionally investigate these crimes, and hold offenders appropriately accountable.

The Department must sustain its focus and current level of emphasis on this issue and continue fielding solutions that inspire victim confidence. If confirmed, I will support these efforts wholeheartedly.

Question. What is your view of the role of the chain of command in addressing sexual assault in the military?

Answer. I support the Department's position on the importance of retaining the Chain of Command as an integral part of an effective response to sexual assault.

Commanders make countless important decisions every day, both in and out of combat that impact the lives and careers of servicemembers and their families. They are accountable for mission accomplishment as well as the health, welfare, and readiness of those under their command. Having a defined role in the administration of justice helps commanders carry out these critical responsibilities.

END STRENGTH REDUCTIONS

Question. What is your understanding of the Army and Marine Corps' ability to meet their end strength reduction goals without forcing out soldiers and marines who want an opportunity to compete for career service and retirement?

Answer. I understand that the Army will continue to use lowered accessions and natural voluntary attrition as the primary levers to reduce end strength. Involuntary measures, however, are necessary to achieve lowered end strength goals. The Army has taken a proactive and transparent approach to communicating the draw-down to the force. The Army is committed to a fair board process and will work to ensure an equitable process for transitioning soldiers and families by affording them the maximum amount of time to transition while connecting them with opportunities for continued service in the Reserve component, civilian employment, education, and healthcare prior to separation.

Similarly, I understand the Marine Corps is maximizing voluntary incentives to meet its end-strength goals. The Commandant of the Marine Corps provided testimony in November that he intended to work with Congress to "map out a resource strategy that protects our global interests as a nation, keeps faith with our servicemembers, and provides the greatest value to the American people." The NDAA for Fiscal Year 2014 increased the allowable rate of drawdown for the Marine Corps to 7,500 per year.

If confirmed, I will be committed to achieving the highest quality force within our allocated end strength.

Question. What programs are in place to ensure that separating and retiring servicemembers are as prepared as they can be as they enter a struggling economy?

Answer. It is my understanding that the Department's current Transition Assistance Program (TAP) provides information and training to ensure servicemembers leaving military service are prepared for their next step—whether pursuing additional education, finding a job in the public or private sector, or starting their own business.

Question. What impact, if any, will the additional budget authority for fiscal years 2014 and 2015 provided by the Bipartisan Budget Act have on the end strengths of the Services?

Answer. If the Budget Control Act's sequestration-level cuts remain the law of the land, not only would they force deep reductions in force structure, they would also starve the Department of funds for readiness and maintaining our technological edge. I understand that Budget Control Act spending caps remain in place for fiscal year 2016 and beyond and there is significant lead-time involved in adjusting military end strength levels. This may inhibit the Military Services from using any of the additional fiscal year 2014 and fiscal year 2015 budget authority provided by the Bipartisan Budget Act for this purpose.

Question. What is your understanding of the need for additional force shaping tools requiring legislation beyond what Congress has provided the past 2 years?

Answer. Based on my experience as the Under Secretary of the Navy, I believe the Department has been granted the necessary force shaping tools to meet the drawdown in its current plan.

However, continued budget reductions may make it necessary to review the size of all components of the Total Force—the Active and Reserve components, DOD civilians and contractors.

If confirmed, I am committed to studying this issue in detail.

RECRUITING STANDARDS

Question. Recruiting highly qualified individuals for military service during wartime in a cost-constrained environment presents unique challenges.

What is your assessment of the adequacy of current standards regarding qualifications for enlistment in the Armed Forces?

Answer. I believe our qualification standards are appropriate with respect to aptitude, medical fitness, and adaptability. Today, our measures of quality are at some of the highest rates over the history of the All-Volunteer Force.

In my experience, the All-Volunteer Force continues to perform exceptionally well. Over the past 12 years of protracted conflict, the military has proven its ability to accomplish the mission when tasked. These standards have helped to ensure we have the strongest and most respected military in the world.

Question. In your view, is there any way to increase the pool of eligible enlistees without sacrificing quality?

Answer. If confirmed, I will engage the Military Departments to make certain our policies are not overly restrictive and allow us to recruit a diverse force drawn from the best and the brightest of our youth.

Question. In your view, are there any enlistment requirements or standards that are overly restrictive or which do not directly correlate to successful military service?

Answer. I am not aware that the Department's military enlistment standards are overly restrictive. The Services employ medical fitness, adaptability, and aptitude standards that correlate to the physical, disciplined, regulated lifestyle and cognitive demands needed to succeed in the Armed Forces. We continually assess and modify our policies based on empirical data or changes in law.

ASSIGNMENT POLICIES FOR WOMEN IN THE MILITARY

Question. The Department in January rescinded the policy restricting the assignment of women to certain units which have the primary mission of engaging in direct ground combat operations, and has given the Military Services until January 1, 2016, to open all positions currently closed to women, or to request an exception to policy to keep a position closed beyond that date, an exception that must be approved by the Chairman of the Joint Chiefs of Staff and the Secretary of Defense. The services are working now to develop gender-free physical and mental standards for all military occupations, presumably with the goal of allowing individuals, regardless of gender, to serve in those positions if they can meet those standards.

If confirmed, what role will you play in the development of these standards?

Answer. The Services and Special Operations Command are conducting the review and validation of their occupational standards.

If confirmed, along with the Secretary of Defense and Chairman of the Joint Chiefs of Staff, I will monitor their progress toward integration of female service-members into previously closed positions, in accordance with each of their implementation plans.

Question. If confirmed, will you ensure that the standards are realistic and preserve, or enhance, military readiness and mission capability?

Answer. Yes. If confirmed I will ensure I will monitor the progress of the Military Departments in terms of reviewing and validating their occupational standards to ensure the standards are current, definitively tied to an operational requirement, and gender-neutral.

Question. Do you believe that decisions to open positions should be based on bona fide military requirements? If so, what steps would you take to ensure that such decisions are made on this basis?

Answer. Yes, it is in the best interest of the Department to allow both men and women who meet the validated standards for military positions and units to compete for them on the merits.

If confirmed, I will ensure I monitor the progress of the Military Departments.

RISING COSTS OF MEDICAL CARE

Question. The President's budget request for the Department's Unified Medical Program has grown from \$19 billion in fiscal year 2001 to \$49.4 billion in fiscal year 2014. In recent years, the Department has attempted to address this growth through fee increases for military retirees, while also attempting to identify and implement other means to ensure the viability of the military health system in the future.

Do you agree with the health care efficiencies proposed by the Department over the past few years?

Answer. If confirmed, I am committed to keeping faith with our troops and will continue to review military health care and be transparent about any proposed changes. Efficiencies that preserve care and resources should be our first move. Given today's budget environment, we must continue to look for savings opportunities, and given the dramatic cost increases, this should include military health care.

Question. What reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. I understand the Department included proposals in the fiscal year 2014 President's budget that would slow the growth of healthcare costs while preserving and enhancing the quality and range of health care. If confirmed, I will continue this comprehensive review of all initiatives that would help control the costs of military health care.

Question. What is your assessment of the long-term impact of rising medical costs on future DOD plans?

Answer. As I understand the situation, health care consumes nearly 10 percent of the Department's budget and could grow considerably over the next decade taking an ever larger bite of our ability to invest in our people or in enhanced warfighting capability. I realize the healthcare benefit is a key component of retention for our men and women so I will work closely with the healthcare leadership in DOD to find reasonable and responsible ways to stem this growth without breaking faith with our troops and their families.

SYSTEMS AND SUPPORT FOR WOUNDED WARRIORS

Question. Servicemembers who are wounded or injured in combat operations deserve the highest priority from their Service and the Federal Government for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge. Despite the enactment of legislation and renewed emphasis over the past several years, many challenges remain.

What is your assessment of the progress made to date by DOD and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. The Walter Reed revelations in 2007 were a sobering moment for the Department. I believe we have made significant progress in how we support our recovering servicemembers. However, there is still more to learn, and more to be done. As the military continues to draw down forces in Afghanistan and moves to a new readiness posture, the focus will be to ensure current practices are maintained and updated to prevent us having to relearn the lessons of the last decade.

If confirmed, I look forward to working with the Department's healthcare professionals to better understand both the visible and invisible wounds of war, and continue to support advancements in how we support servicemembers and their families through treatment, recovery, rehabilitation, and possibly transition out of service.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded servicemembers and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I will be a proactive participant in making certain the necessary resources are in place to properly take care of our recovering wounded, ill, and injured servicemembers and their families. I am particularly interested in understanding the research initiatives we have in place to evaluate the effects of PTSD and TBI, making certain we are addressing these signature injuries of our most recent conflicts in a meaningful way.

Question. If confirmed, what role would you expect to play in ensuring that the Departments of Defense and Veterans Affairs achieve the administration's objectives in DOD and VA collaboration?

Answer. I understand and support the Department's commitment to continually improve DOD-VA collaboration and ensure our support to servicemembers and vet-

erans. Secretary Hagel has made it clear that he intends to strengthen efforts with Secretary Shinseki to accelerate improvements to our interoperable systems and processes. I understand the Department has cooperated with VA and assisted in reducing VA's disability claims backlog from nearly 611,000 to 400,000 during the course of 2013 and the hope is it will continue to be reduced in 2014. If confirmed, I will support efforts to improve cooperation on joint initiatives such as the electronic health record, care coordination, medical care and transition issues. I look forward to working with the veterans community as well in identifying ways of reducing our claims backlog and outreach.

SUICIDE PREVENTION

Question. The numbers of suicides in each of the services continue to be of great concern to the committee.

If confirmed, what role would you play in shaping DOD policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all servicemembers and their families?

Answer. Suicide is influenced by many factors: stressed relationships, mental health, substance misuse, legal and financial issues, exposure to trauma, social isolation, and many other influences from the broader social, cultural, economic, and physical environments.

Suicide is a serious problem that causes immeasurable pain, suffering, and loss to individuals, families, survivors, military formations, and to military communities.

The health and resilience of the force, our military members, and our Family members increase our combat effectiveness, and our overall readiness.

I know the Department has placed a significant amount of emphasis on implementing a wide variety of resilience programs in place to help our servicemembers.

Suicide prevention requires our best efforts, and the attention of leaders at all levels. Thus, if confirmed, I look forward to learning more about these efforts and it would be my intent to become engaged in, and supportive of, these important programs.

MILITARY QUALITY OF LIFE

Question. The committee is concerned about the sustainment of key quality of life programs for military families, such as family support, childcare, education, employment support, health care, and morale, welfare and recreation services, especially as DOD's budget declines.

How do you perceive the relationship between military recruitment and retention and quality of life programs and your own top priorities for the Armed Forces?

Answer. Quality of life programs improve the well-being and resilience of our servicemembers and military families and enhance the Department's ability to recruit an All-Volunteer Force (AVF). We cannot sustain the quality and readiness of today's AVF without also supporting their family adequately. It is part of an overall holistic approach to both readiness and personnel compensation.

Taking care of our servicemembers and their families is one of the Department's top priorities. If confirmed, I will continue to prioritize those quality of life programs that effectively meet our servicemembers' needs and that of their families.

Question. If confirmed, what military quality of life programs would you consider a priority, and how do you envision working with the Services, combatant commanders, family advocacy groups, and Congress to sustain them?

Answer. If confirmed, I will work with the Services to sustain key quality of life programs that support mission and family readiness. The benefits of core programs such as family support, child and youth programs, spouse employment and education, and Morale, Welfare and Recreation programs are invaluable to the well-being and readiness of military families and deserve the support of the Department and Congress.

I will strive to enhance cooperative relationships with advocacy groups to leverage resources that optimize support for the military community.

FAMILY READINESS AND SUPPORT

Question. Servicemembers and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of concerns among military families as a result of the stress of deployments and the separations that go with them.

What do you consider to be the most important family readiness issues for servicemembers and their families, and, if confirmed, how would you ensure that

family readiness needs are addressed and adequately resourced, especially in light of current fiscal constraints?

Answer. I believe the Department has a responsibility to help prepare families to face the challenges inherent with military service and deployments. Focusing on the social, financial, educational, and psychological well-being of military families will help to build and sustain resilient families.

If confirmed, I will prioritize sustainment of family resilience programs in the current fiscally constrained environment, while continuing to review and adapt them to improve efficiency and to maximize support from non-government sources.

Question. How would you address these family readiness needs in light of global rebasing, deployments, and future reductions in end strength?

Answer. Family readiness services including health care, non-medical counseling, education, and employment support must be available to families wherever they reside. Innovative solutions, such as web-based delivery systems, allow the Department to be more flexible and responsive to the diverse needs of the population.

The Department should continue to engage with Federal agencies, as well as local governments, businesses, and non-profit stakeholders to address the myriad aspects of military life, and work together to provide the necessary resources.

If confirmed, I will consider these impacts on our military families to ensure their needs are met.

MEDICAL MARIJUANA

Question. What is your assessment on the need for legitimate scientific study of the efficacy of medical marijuana in alleviating the symptoms of post-traumatic stress disorder experienced by servicemembers and veterans?

Answer. This is not something I have studied in detail. I would look to our medical leadership for an assessment. I understand that the Federal Government's position is that marijuana does not have a valid medical purpose, but some research efforts have been undertaken.

HUMAN CAPITAL PLANNING

Question. Section 115b of title 10, U.S.C., requires the Secretary of Defense to develop and annually update a strategic human capital plan that specifically identifies gaps in the Department's civilian workforce and strategies for addressing those gaps. DOD has not yet produced a strategic human capital plan that meets the requirements of these provisions.

Would you agree that a strategic human capital plan that identifies gaps in the workforce and strategies for addressing those gaps is a key step toward ensuring that the Department has the skills and capabilities needed to meet future challenges?

Answer. I believe this type of plan, and the workforce skill assessments required to develop it, would be of significant assistance to the Department's efforts relative to acquiring, developing, and retaining the workforce needed to meet current and future mission challenges.

Question. Do you see the need for any changes in the requirements of section 115b regarding the requirement for a strategic human capital plan?

Answer. I will, if confirmed, ensure that the Department strives to meet the human capital plan under section 115b and assess the need for any changes.

Question. If confirmed, will you ensure that DOD fully complies with these requirements?

Answer. Yes, if confirmed, I will continue to work toward ensuring the Department fully complies with statutory strategic workforce planning requirements.

DETAINEE TREATMENT POLICY

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes. I believe the proper treatment of detainees is of paramount importance to ensuring the Department has principled, credible, and sustainable detention policies and procedures.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes. The Department must ensure that it holds its personnel to the highest standards of treatment while detaining individuals in the context of armed con-

flict. Gaining intelligence from captured enemy forces is paramount to the war effort, and it must be done in a manner consistent with our values. Early in his first term, President Obama established the Army Field Manual on Interrogation as the “standard” for all U.S. Government agencies to adhere to. It is my understanding that this has been strictly adhered to throughout all DOD agencies, Services, and commands.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes. If confirmed, I would ensure that the Department continues to implement policies that are consistent with its current humane treatment standards.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes, without reservation.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Deputy Secretary of Defense?

Answer. Yes, if confirmed, I am committed to provide information relating to my position and the performance of the Department.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes, and I look forward to working with the committee and staff on advancing the Nation’s security.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR BILL NELSON

STRATEGIC DISPERSAL

1. Senator NELSON. Mr. Work, since 2005, congressional and military leadership have reaffirmed the importance of dispersing the Atlantic Fleet in two ports. In February 2005, then Chief of Naval Operations (CNO), Admiral Clark, stated that it was his view that, “over-centralization of the [carrier] port structure is not a good strategic move . . . the Navy should have two carrier-capable homeports on each coast.” He went on to say, “. . . it is my belief that it would be a serious strategic mistake to have all of those key assets of our Navy tied up in one port.” Despite current fiscal constraints, both the current CNO, Admiral Greenert, and the Secretary of the Navy, Secretary Mabus, have affirmed their commitment to accomplishing strategic dispersal of the east coast fleet.

The principle of strategic dispersal is decades old. What is your understanding of the principle of strategic dispersal and what are your thoughts regarding the priority of accomplishing strategic dispersal on the east coast?

Mr. WORK. It is my understanding that the Navy remains committed to the concept of strategic dispersal. Strategic dispersal ensures that the fleet’s ships and aircraft, their crews, supporting maintenance, training-critical infrastructure, and the public/private skilled labor force required to keep these assets running, are located at different locations in the continental United States, Hawaii and Alaska, U.S. territories, and overseas to the greatest degree possible consistent with available resources. I supported the general idea of strategic dispersal as Under Secretary of the Navy, and continue to do so.

It is my understanding that the Navy’s goal remains to strategically disperse its east coast fleet to the maximum extent practical. At this point, there are two major surface fleet concentration areas on the east coast, including the Hampton Roads

area of Virginia and Mayport, FL. Submarine bases are likewise distributed on the east coast in Groton, CT and King's Bay, GA. At this point in time, however, all east coast carriers and support infrastructure are consolidated within a 15 nautical mile radius in the Hampton Roads area. The Navy remains committed to strategic dispersal of east coast carriers, and I believe the Navy would still like to homeport a carrier in Mayport in the future. Due to fiscal constraints, the Navy has been forced to defer the investment required to homeport a carrier in Mayport at this time.

If confirmed, I will continue to monitor Navy plans for strategic dispersal, particularly with regard to the east coast carrier fleet.

QUESTIONS SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

CYBER SECURITY

2. Senator GILLIBRAND. Mr. Work, the National Commission on the Structure of the Air Force recently released their findings, which highlighted the importance of the National Guard and Reserve in the U.S. cyber mission. Specifically, it noted that the Guard and Reserve were uniquely positioned, because of their part-time status, to attract and retain the best and the brightest in the cyber field. I have long-agreed with this assessment, and introduced the Cyber Warrior Act which would establish National Guard cyber teams in each State to leverage this talent pool. In addition to the Air Force Commission review, I know that DOD is also looking at the role of the Reserve component in U.S. Cyber Command (CYBERCOM). If confirmed, do I have your commitment to look at the role of the Reserve component beyond CYBERCOM?

Mr. WORK. I agree that the National Guard and Reserves provide the Joint Force with a wide array of talents in cyber and a variety of other important joint capability areas. As such, if confirmed, I commit to looking at the role of the Reserve component in supporting CYBERCOM. Although not fully briefed on the initiative, I understand the Department is currently conducting a mission analysis looking at this very subject in response to section 933 of the National Defense Authorization Act (NDAA) for Fiscal Year 2014. If confirmed, I look forward to working across the Department to ensure that the mission analysis is both rigorous and thorough, and meets congressional timelines.

3. Senator GILLIBRAND. Mr. Work, I want to be helpful to DOD in recruiting the best talent and acquiring the best tools for our cyber mission. In your opinion, what can Congress do to assist DOD in this effort?

Mr. WORK. The NDAA for Fiscal Year 2014's requirement for CYBERCOM to build infrastructure to conduct military-specific operations was a critical step for equipping the cyber mission force with the tools necessary to fulfill its missions. If confirmed, I look forward to working with Congress to ensure that cyber capabilities for CYBERCOM, the Military Departments, and the Services are appropriately resourced and efficiently managed.

As part of this effort, I would monitor Departmental efforts to recruit and retain highly-qualified personnel in our officer, enlisted, and civilian cyber workforces. However, I understand there are challenges to organizing and equipping the total cyberspace workforce. For example, although the Services have plans to retain their most talented uniformed cyberspace operators, I have been told that the recruitment and retention of our civilian cyberspace workers is lagging. One way to tackle this problem is to encourage more students to enter Science, Technology, Engineering, and Mathematical (STEM) fields, and to incentivize some of them to pursue a career in the DOD cyber workforce cyber career. If confirmed, I look forward to working with Congress and the acquisition community within DOD to advance STEM education and recruit highly skilled personnel from less technical educational backgrounds as well.

4. Senator GILLIBRAND. Mr. Work, what do you believe DOD needs in order to remain on the cutting edge of cyber defense?

Mr. WORK. The quality of our people—Active, Reserve, civilian, and contractors—is what sets the U.S. military apart from all others. This is especially true in the realm of cyber warfare. To remain on the cutting edge of cyber defense, DOD needs to continue to invest in an elite, highly trained military and civilian workforce to carry out its missions of defending the Nation against strategic cyberattack, supporting combatant commands, and defending DOD networks. In addition to investing in quality people, DOD needs to continue investing in the tools, technical infra-

structure, and intelligence capabilities necessary for conducting effective cyberspace operations.

In my view, DOD must also build information systems that are more difficult to attack and easier to defend. Over the coming years, DOD is planning to invest in the Joint Information Environment, an information system composed of consolidated data centers, enterprise services, and a single security architecture. In achieving those goals, the Joint Information Environment should make it easier for DOD to see threats, prevent intrusions, and improve network defense operations.

Finally, cyber is a true national and international team sport. DOD needs to maintain strong partnerships with other government agencies, with the private sector, and with international allies and partners to defend the United States and its interests against cyberattacks.

If confirmed, I look forward to working with you and other Members of Congress to ensure DOD's cyber capabilities remain unequalled in the world.

5. Senator GILLIBRAND. Mr. Work, in your advance policy questions you were asked about ways to increase the pool of eligible enlistees without sacrificing quality. I think this is an especially important question as it pertains to our cyber workforce. If confirmed, will you look at some of the requirements for emerging missions, such as cyber, to determine if there are alternative requirements that we might consider in order to truly attract the best and the brightest?

Mr. WORK. Success in cyberspace will rely on our people—just as it does in other domains. The Services have a long history of excellence in recruitment, and I am confident that they will attract the best and brightest enlisted personnel to this growing career field. If confirmed, I will work with the Services to ensure that they can recruit and retain highly skilled cyber personnel who remain competitive, in both rank and position, with military personnel in other career specialties.

SEXUAL ASSAULT

6. Senator GILLIBRAND. Mr. Work, would you please share with me information about all the cases in which a convening authority did not follow the legal advice of his or her staff judge advocate or Article 32 investigating officer about whether to prefer charges for sexual assault, rape, or sodomy, or attempts, conspiracies, or solicitations, to commit these crimes?

Mr. WORK. Sexual assault is a major problem in our military that must be aggressively addressed. If confirmed, I look forward to working with you, Secretary Hagel, the Office of the Secretary of Defense, the Military Services, and all Members of Congress to improve the Department's ability to determine the scope of the sexual assault issue, to increase awareness and improve DOD policies so that victims feel confident reporting incidents, and to hold accountable those that perpetrate these crimes.

Based on a preliminary review of recent cases across the Services in 2012, sexual assault-related charges were referred to court-martial in every case in which a staff judge advocate recommended that the case go forward. At this time, however, I do not have any information about instances in which a convening authority disagreed with the recommendations of an Article 32 investigating officer, or in which a convening officer decided to refer charges after a staff judge advocate or Article 32 investigating officer recommended against doing so.

QUESTIONS SUBMITTED BY SENATOR RICHARD BLUMENTHAL

DEPARTMENT OF DEFENSE MEDICAL RECORD SYSTEM

7. Senator BLUMENTHAL. Mr. Work, DOD was charged with modernizing its health record infrastructure almost 7 years ago. To date, over \$1 billion has been spent in the effort. Although many Secretaries have directed the action, DOD is still using the legacy Armed Forces Health Longitudinal Technology Application. The improvements made to date seem to be superficial and overly expensive. The health records are still not interoperable with the current Veterans Affairs (VA) system. System modernization cost estimates are said to be \$28 billion. What will you do to ensure that DOD will modernize its health record system quickly?

Mr. WORK. Providing high-quality healthcare for current servicemembers and their dependents, and facilitating high-quality healthcare for our veterans are among our Nation's and DOD's highest priorities. I fully support Secretary Hagel's decision to pursue a competitive acquisition strategy for a new DOD electronic health record that is compatible with VA electronic health records. I also support

Secretary Hagel's decision to assign acquisition oversight of the program to Under Secretary Kendall.

I am not aware of the combined amount that both Departments (DOD and VA) have spent to date on the effort to improve health record infrastructure. If confirmed, I will support efforts to improve cooperation on joint initiatives with the VA, such as electronic health records, with two distinct goals: (1) Modernize the software supporting our clinicians; and (2) ensure health data interoperability among VA, DOD, and the private sector. The Department's commitment to achieving these goals in the most efficient and effective way possible is demonstrated by the ongoing personal engagement of Secretary Hagel. I also plan to be personally engaged and ensure this priority program remains on track.

8. Senator BLUMENTHAL. Mr. Work, is DOD currently reviewing any system modernization methods that could occur at significantly lower cost (such as adopting VA records infrastructure)?

Mr. WORK. DOD is pursuing a competitive acquisition strategy for electronic health records that will consider commercial alternatives that may offer reduced cost, reduced schedule and technical risk, as well as access to increased capability and capacity by leveraging ongoing advances in the commercial marketplace.

QUESTION SUBMITTED BY SENATOR MAZIE K. HIRONO

DEPARTMENT OF DEFENSE SEQUESTRATION CUTS

9. Senator HIRONO. Mr. Work, the Bipartisan Budget Agreement (BBA) reduced the impact of sequestration by \$22 billion in fiscal year 2014 and \$9 billion in fiscal year 2015. With this additional funding as a result of this agreement, how will DOD prioritize readiness funding levels for these fiscal years—by program or capacity, and what will the readiness impacts be for fiscal year 2016, should sequestration remain a reality?

Mr. WORK. I have not had the opportunity to review the President's budget for 2015. However, Secretary Hagel has said the BBA enabled the Department to mitigate the most serious cuts in readiness and modernization accounts in both fiscal year 2014 and fiscal year 2015. Nevertheless, some challenges remain at the fiscal year 2015 budget levels. As Secretary Hagel announced on 24 February, after careful deliberation, the administration has proposed a \$26 billion investment "bridge" in fiscal year 2015. As I understand it, approximately 40 percent of this added investment would be devoted to readiness; 40 percent would be devoted to modernization; 2 percent would be devoted to infrastructure; and the remainder for other pressing needs.

As for fiscal year 2016 and out, Secretary Hagel has stated for the record that full sequestration level funding generates unacceptable levels of risk to our national security. The administration's budget proposal includes an additional \$115 billion across the remainder of the Future Years Defense Program (FYDP). This \$141 billion total increase to the current budget caps (\$26 billion in fiscal year 2015, and an additional \$115 billion across the FYDP) will help to preserve force readiness as DOD shifts from a wartime footing to a more sustainable peacetime posture.

I cannot tell you at this point exactly how DOD is planning to prioritize its readiness funding. However, if confirmed I will do my best to ensure that resources are prioritized to support the readiness requirements for our warfighters worldwide. I lived through the "hollow force" of the late 1970s, and have no desire to do so again. If confirmed, I will do everything humanly possible to make sure we retain a force ready to respond to any contingency.

QUESTION SUBMITTED BY SENATOR TIM KAINÉ

DEPARTMENT OF DEFENSE SEQUESTRATION CUTS

10. Senator KAINÉ. Mr. Work, the Budget Control Act (BCA) originally placed DOD under reduced discretionary spending caps that have since been adjusted by the American Taxpayer Relief Act (ATRA) and the BBA. These across-the-board cuts have had significant negative implications for readiness, operational capacity, and our military personnel and their families. Fortunately, the President's budget request for fiscal year 2015 aims to ease the strain on DOD by \$26 billion in 2015 and \$115 billion over the next 5 years. Considering the adjustments that have been made with respect to ATRA and BBA, and with the proposed cap adjustments in

the President's fiscal year 2015 budget request, how much of the original sequestration cuts is DOD proposing to absorb?

Mr. WORK. As you indicate, after careful deliberation, the administration has proposed an additional \$26 billion defense investment "bridge" on top of the BBA fiscal year 2015 caps, and an additional \$115 billion in defense spending above BCA levels across the remainder of the FYDP. How much DOD will absorb of sequestration depends on future congressional action.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

SEQUESTRATION

11. Senator INHOFE. Mr. Work, I believe we can all agree that sequestration has had a devastating impact on our Nation's military readiness. However, I also believe many are under the mistaken impression the Ryan/Murray agreement solved this problem. It did not. It helped, but DOD is still subject to \$76.96 billion in sequester cuts in fiscal year 2014 and fiscal year 2015. Even with the small relief in fiscal year 2014 and fiscal year 2015, do you think we can execute the current Defense Strategic Guidance? If you believe we can execute the strategy but with greater risk, can you explain what you mean by risk? To me, risk equals lives, the lives of our men and women in uniform.

Mr. WORK. As Under Secretary for the Navy, I participated in the Strategic Review that followed the passage of the 2011 Budget Control Act. This review sought to balance strategic ends, ways and means with the \$487 billion reduction in planned defense spending over a 10-year period. I believe the results of that review, as outlined in Sustaining U.S. Global Leadership: Priorities for 21st Century Defense and the 2012 Defense Strategic Guidance that followed, maintained an excellent balance between strategic aims and expected resources.

I left the Department of the Navy in March 2013, just as DOD was coming to grips with the impact of an additional \$500 billion in cuts necessitated by sequestration. I am aware that the Strategic Choices and Management Review (SCMR) ordered by Secretary Hagel, and the subsequent fiscal year 2015 budget review, looked closely at ways to accommodate potential reductions. Based on Secretary Hagel's recommendations, the President proposes to budget at the cap level in fiscal year 2015 but at levels that exceed the caps by a total of \$115 billion for the years fiscal year 2016 through 2019. The President also proposes, and Secretary Hagel supports, a government-wide initiative to add some funding in fiscal year 2015.

I have not yet seen or been able to analyze the defense strategy in the 2014 Quadrennial Defense Review (QDR), which, as I understand, will update the 2012 Defense Strategic Guidance. Nor have I seen the Chairman's Risk Assessment associated with the QDR. However, if confirmed, I am committed to ensuring the Department of Defense (DOD) identifies and clearly communicates with Congress the risks and strategic choices associated with resourcing the strategy.

ALTERNATIVES TO THE QUADRENNIAL DEFENSE REVIEW

12. Senator INHOFE. Mr. Work, you are currently the Chief Executive Officer of the Center for New American Security (CNAS). CNAS recently participated in a joint think-tank exercise which offered alternatives to the QDR and proposals for the fiscal year 2015 defense budget. Though the author was another CNAS analyst, CNAS's recommendations appear to draw upon work you had previously conducted. For example, in a May 29, 2013, briefing, you proposed a smaller Army, smaller tactical air forces, a smaller Navy, an expeditionary-focused Marine Corps, while retaining a special operations force and air and sea mobility forces, which are comparable in size to current levels. In addition, you proposed to invest in technologies such as electromagnetic rail guns, unmanned systems, cyber, and directed energy weapons. I must say, this sounds much like the 2001 all over again. Specifically, Secretary Rumsfeld's Transformation Initiative advocated for smaller forces using new technologies. Therefore, are these positions incorporated in the fiscal year 2015 defense budget?

Mr. WORK. As Secretary Hagel stated at his press conference on February 24, 2014, the Department's fiscal year 2015 budget supports the joint force's ability to defend the United States against all strategic threats, build security globally by projecting U.S. influence and deterring aggression, and remain prepared to win decisively against any adversary should deterrence fail. Although I am not aware of the details of the fiscal year 2015 budget proposal, the broad outlines highlighted in the Secretary's speech seem consistent not only with the approach I advocated in my

CNAS work, but also with the requirements of U.S. Forces in this dynamic security environment. It seems to me that DOD has chosen to take selective reductions in end strength and force structure in order to sustain investments in readiness and modernization. As a result, although the joint force will be smaller, it will become more modern and more ready to confront a broad range of future defense challenges. I think this is the right overall approach.

13. Senator INHOFE. Mr. Work, would it not be more prudent to reduce the size of our forces after we have developed the technologies you envision?

Mr. WORK. I believe the Department must begin to act now to ensure that it can rebalance the force for the future. This will require difficult tradeoffs between near-term capacities and future capabilities that Secretary Hagel has been discussing since the Strategic Choices and Management Review.

Given reduced resources, in practical terms this means that if we want a force that is ready while it continues to modernize, it will likely be necessary to scale back force structure. Only by reducing some parts of the force now will we have the resources necessary to develop the systems and capabilities that the future force will need to confront a broad range of challenges. From what I understand, the fiscal year 2015 President's budget submission follows this general approach.

14. Senator INHOFE. Mr. Work, over the last 50 years, time and again we have seen assumptions regarding our national security proven wrong. Given today's current security environment, can we afford to bet it all on a smaller force?

Mr. WORK. Some degree of uncertainty is unavoidable in defense planning, as we must always make choices in the present that will limit some future options. The challenge is to strive for a force that is well-trained, well-led, well-equipped, ready to adapt to unforeseen circumstances, and with the will to win, despite the odds or level of adversity. Such a force depends first and foremost on the quality of the people, not on technology or force structure—that is why the U.S. Armed Forces stand apart from all others.

Said another way, continuing to invest in a robust joint force with diverse capabilities and a broad set of missions is one means of hedging against uncertainty. But equally, if not more important, is ensuring that the U.S. Armed Forces continue to attract the Nation's most capable, adaptable, and dedicated professionals. Maintaining force structure per se does not ensure that we will retain a capable force. Indeed, were the Department to retain more forces than it could afford to keep trained, ready, and well-equipped, it would risk undermining the quality and readiness of its force and, hence, its adaptability.

If confirmed, I intend to work tirelessly with other Department leaders to continually weigh the risks of fielding too small a force against those associated with holding onto force structure at the cost of underfunding training, readiness, and modernization.

NATIONAL SECURITY AND DEFENSE STRATEGY

15. Senator INHOFE. Mr. Work, a new QDR should be published soon. This is a critical document which sets DOD's strategies and priorities. Recently, DOD conducted a Strategic Choices Management Review, commonly called the Skimmer. The Skimmer explored different military capabilities based upon various funding scenarios. Both of you have watched the Skimmer process closely and Ms. Wormuth you have worked on the QDR itself. Many are concerned that in an effort to seek defense cuts, the new QDR will expose the United States to risks which recently would have been unthinkable. Therefore, will the QDR articulate where we are going to be taking additional risks?

Mr. WORK. I did not participate in the development of the 2014 QDR nor have I been briefed on it. However, the QDR statute requires an assessment of risk, and the Chairman of the Joint Chiefs of Staff is required to submit his own assessment of the review, including his assessment of risk and a description of the capabilities needed to address such risk. If confirmed, I will closely review both the QDR report and the Chairman's risk assessment to understand the levels of risk assumed in our strategy, and how it seeks to reduce, hedge against, or mitigate them.

That said, based on his recent speech, Secretary Hagel has said that under the PB15 proposals, the military can protect the United States and fulfill the President's defense strategy—but with some increased levels of risk. His speech provides more detail on those risks.

16. Senator INHOFE. Mr. Work, will the defense cuts cause major changes to our National Security Strategy and National Military Strategy?

Mr. WORK. It is my understanding that the National Security Strategy and National Military Strategy are under development. I have not been briefed on either of them and therefore do not know their current status. If confirmed, I will work closely with the Chairman and the Joint Chiefs of Staff on the National Military Strategy and with interagency counterparts on the National Security Strategy.

17. Senator INHOFE. Mr. Work, how can you tell when a strategy has gone from being budget-informed to being budget-driven?

Mr. WORK. A budget-informed strategy begins by defining one's objectives; assessing threats, challenges, and opportunities impinging upon those objectives; and then determining how best to harness available resources in the pursuit of them. A budget-driven strategy is not really a strategy at all but rather an exercise through which the force is developed to fit a given funding level. The former approach has several advantages because it enables decisionmakers to set priorities, make trade-offs, and adjust investments in ways appropriate to the demands of the security environment and the strategy. Such an approach also helps one to understand more clearly the risks associated with the choices one has made. Budget-informed strategy and planning cannot eliminate risks but offer a proven means of making best use of the resources available. Such an approach is especially important in times of diminished resources.

18. Senator INHOFE. Mr. Work, how are our risks affected when you change from being budget-informed to being budget-driven?

Mr. WORK. In a budget-informed approach, risk is identified by comparing what the force can or cannot do in terms of national security objectives. Risk is characterized in terms of the ability (or inability) of military forces to conduct all missions called for by the defense strategy. That ability can be defined in terms of the expected time and/or costs associated with conducting required missions. It can also define the level of risk associated with executing the mission successfully (high, moderate, or low).

A budget-driven approach simply identifies what the force can do, making risks more difficult to identify, mitigate, or manage. It is also more likely to miss opportunities to pursue innovative mixes of investments and approaches to accomplish desired objectives.

ROLES AND FUNCTIONS

19. Senator INHOFE. Mr. Work, included in last year's Senate version of the NDAA was a provision to create a new position, the Under Secretary of Defense for Management, which would replace the existing DOD Deputy Chief Management Officer (DCMO) and combine them with the DOD's Chief Information Officer (CIO) functions. The purpose was to empower the modernization effort of DOD's business/back office functions. However, many believe such duties should rest/have rested with the Deputy Secretary of Defense. Do you believe we should create an Under Secretary for Management which combines the DCMO and CIO functions?

Mr. WORK. I have not yet had the opportunity to study the recommendation you refer to, or understand its intent. I therefore am not comfortable offering an opinion at this time. In the most general sense, however, I agree more attention on the DOD's business/back office functions is required-especially in this time of scarce defense resources. I believe reducing overhead and becoming more efficient should be top priorities for all senior DOD managers. If confirmed, I plan to aggressively pursue this belief. The Secretary took important steps last December to strengthen the Office of the DCMO, which I support. I believe that we should allow these reforms to be implemented and mature before we decide to establish a sixth Under Secretary of Defense.

20. Senator INHOFE. Mr. Work, what will be the role of the DCMO if you are confirmed?

Mr. WORK. It is too early for me to answer this question definitively. If confirmed, I must first assess the progress made on Secretary Hagel's most recent headquarters review, as well as the capability of the DCMO organization. I would likely first focus the DCMO on strengthening, streamlining and cutting the costs of those business activities in the Office of the Secretary of Defense (OSD) and in the Defense agencies. These organizations include about 45 separate organizations with about 110,000 civilian, military, and contract employees. They currently account for

approximately \$84 billion of annual defense appropriations (\$34 billion on Defense Health Program alone). It is these organizations that make up what Secretary referred to last November as the “world’s largest back office.”

Because the scope, scale and complexity of these 45 agencies currently exceeds what can reasonably be expected to be overseen by the Department’s five Under Secretaries, my sense is that their business operations are “under-governed.” If confirmed, I would focus the DCMO on assessing the defense agencies’ business operations in direct support of the Under Secretaries, so as to strengthen their authority to provide direction and control over the related policy matters of those entities. By taking steps to strengthen the management of the OSD staff and defense agencies, as well as the rest of the Department, through an empowered DCMO function, I would aim to help Secretary Hagel deliver a higher level of service to the military departments at lower cost to the American taxpayer.

COMPENSATION AND BENEFITS

21. Senator INHOFE. Mr. Work, Congress established the Military Compensation and Retirement Modernization Commission to review military compensation and retirement systems and to make recommendations to modernize those systems. The Commission will report its recommendations in February 2015. Do you believe the administration should propose fragmented changes to personnel compensation and benefits before the Commission makes public its recommendations in 2015?

Mr. WORK. Based on my time as Under Secretary of the Navy, I believe the Department has ample analyses and information to request changes in some forms of military compensation. I also believe the Department must strive to find the proper balance between competitive pay and benefits and sustaining a force equipped with the latest technology and ready to meet current and future challenges. If confirmed, I would work with Secretary Hagel, the administration, and Congress to find that balance.

Due to the complexity of the military retirement system, however, I agree that changes in this area should not be fragmented. They should only be considered and evaluated in the context of a holistic, top-to-bottom review of the system, such as the one being conducted by the Commission.

22. Senator INHOFE. Mr. Work, how would development of a piecemeal package of retirement benefits and compensation reforms get us to an optimal solution for controlling DOD’s sky-rocketing personnel costs?

Mr. WORK. Finding the appropriate balance between providing the men and women who serve our great nation a competitive package of pay and benefits while also providing them the best possible training and equipment is a monumental challenge in the current fiscal environment. Based on my experience as Under Secretary of the Navy, I can readily see how adjusting some military personnel compensation costs now would allow the Department to achieve the balance it seeks, and that our men and women deserve.

However, due to the complexity of the military retirement system, I believe changes should not be made in this area until the Military Compensation and Retirement Modernization Commission completes its work and any recommendations it might make can be reviewed and evaluated by the President, the Department, and Congress.

23. Senator INHOFE. Mr. Work, Congress and the President have both promised our men and women in uniform that they would be grandfathered from any changes in the military retirement system. Do you support grandfathering those currently retired and those serving from any proposed changes?

Mr. WORK. Yes, I do. I believe that any retirement changes should be grandfathered; to do otherwise would break faith with our members.

24. Senator INHOFE. Mr. Work, do you feel that current servicemembers should also be grandfathered for all changes to proposed military benefits? Why or why not?

Mr. WORK. If confirmed, I will remain committed to ensuring that any proposed changes keep faith with those who are serving today and with those who have served in the past. That said, I will also remain committed to ensuring that the Department finds the proper balance to maintain force structure, readiness, and modernization capabilities while adequately compensating personnel. These will require hard choices in all parts of the defense program, including military benefits.

MISSILE DEFENSE

25. Senator INHOFE. Mr. Work, do you agree there is a need to improve the Ground-based Midcourse Defense (GMD) system against evolving Homeland missile threats from North Korea and Iran?

Mr. WORK. Yes, based on my understanding of the evolving threat, I think we need to improve the GMD system. If confirmed, I would look at the options and make recommendations to Secretary Hagel.

26. Senator INHOFE. Mr. Work, would you support funding for the development of a redesigned kill vehicle for the ground-based interceptor and improvements to sensor and discrimination capabilities?

Mr. WORK. Yes.

NUCLEAR MODERNIZATION

27. Senator INHOFE. Mr. Work, last month during a visit to Wyoming, Secretary Hagel said, "it's clear that we have some work to do on [nuclear] modernization." Secretary Hagel also said "we're going to invest in the modernization we need to keep the deterrent stronger than it's ever been, and you have my commitment to that." If confirmed, would we have your commitment to modernize our nuclear triad?

Mr. WORK. Yes. Our nuclear forces make vital contributions to the national security of the United States and our allies and partners. The 2010 Nuclear Posture Review and the report on the President's June 2013 Nuclear Employment Strategy make clear the President's commitment to maintain the nuclear Triad and a safe, secure, and effective nuclear stockpile and infrastructure.

Accordingly, if confirmed, I will vigorously support the President's and the Secretary's commitment to modernize U.S. nuclear forces, the nuclear stockpile, and its associated infrastructure.

28. Senator INHOFE. Mr. Work, your predecessor, Dr. Ashton Carter, observed that nuclear weapons are "not a big swinger in our budget". Were you aware that, according to recently released Congressional Budget Office (CBO) figures, total DOD and Department of Energy (DOE) funding for nuclear forces accounts for only 4 percent of national defense spending in 2014?

Mr. WORK. I am aware of the CBO Report and the figures reported.

29. Senator INHOFE. Mr. Work, do you consider this to be a reasonable and necessary investment in U.S. national security?

Mr. WORK. Yes. Based on my experience, I believe the planned investment in our nuclear forces is both reasonable and necessary. Our nuclear forces deter strategic attack on the United States, provide extended deterrence to our allies and partners, and contribute to strategic stability writ large. If confirmed, I will maintain the Department's focus on, and prioritization of, this vital component of our national security.

INTEGRITY AND ACCOUNTABILITY

30. Senator INHOFE. Mr. Work, two recent reports on cheating suggest a disturbing problem with integrity in the Armed Forces. The Navy reported on February 4 that 30 senior sailors serving as instructors cheated on written exams at the Navy Nuclear Power School. This follows a recent Air Force incident in which 92 airmen at Malmstrom Air Force Base were implicated in a cheating incident involving intercontinental ballistic missiles (ICBM) readiness examinations. Both incidents are under investigation. But they follow recent reports of senior officers and officials who behaved as if ethics rules didn't apply to them or who mistook toxic leadership for effective leadership. I view the recent failures of junior personnel as a failure of leadership. Do you agree and if so, why?

Mr. WORK. At this time, I am not privy to anything more than newspaper reports about these troubling incidents. It would therefore be premature and inappropriate for me to attribute the underlying justification or causation of these incidents.

What I can say unequivocally is that integrity, personal courage and accountability are the hallmarks of the U.S. military, and must be reinforced-particularly when it comes to our strategic forces. Senior leaders, both civilian and military, must model and reinforce the highest standards of behavior. If confirmed, I will promote a work environment that exemplifies these ideals.

31. Senator INHOFE. Mr. Work, if you are confirmed, what would be your role in restoring integrity and accountability?

Mr. WORK. If confirmed, I will work to implement Secretary Hagel's efforts to foster a culture of ethical values-based decisionmaking and stewardship among senior DOD leaders and their staffs. I will also work with General Martin Dempsey, the Chairman of the Joint Chiefs of Staff, to implement his general and flag officer professional character initiatives, which are aimed at maintaining the integrity of the military profession and preserving the public trust.

TOTAL FORCE

32. Senator INHOFE. Mr. Work, as we enter a time of end strength drawdowns, we must consider the total force structure and how to best use our servicemembers in the Active, Reserve, and Guard components. How do you envision the composition of the total force as we begin troop drawdowns and wind down from the wartime efforts?

Mr. WORK. I support our Total Force policy and, if confirmed, would welcome the opportunity to evaluate how we can best meet our security requirements using the Active, Reserve, and Guard components. When determining the composition of the Total Force, the Department looks at the expected demands and seeks a solution that will meet our national strategic goals, account for the strengths of each of the components, and fit within the budget topline.

If I am confirmed, and as the Department steps down from its war footing, I will work to ensure the Department considers and implements force shifts and drawdowns, and adopts the Total Force composition and capacity best suited for our strategy and available resources. Considerations of risk, readiness and responsiveness across the full range of military operations, which involves supporting the homeland, quickly responding to contingencies, and providing global presence, will be incorporated in these deliberations.

QUESTIONS SUBMITTED BY SENATOR ROGER F. WICKER

CREDIBLE THREAT OF FORCE

33. Senator WICKER. Mr. Work, combined with diplomacy and sanctions, the credible threat of military force has been a key component of the U.S. strategy to prevent Iran from developing a nuclear weapon. President Obama has repeatedly said "all options are on the table" to prevent Iran from acquiring a nuclear weapon and America "will do what is necessary to prevent Iran from getting the world's worst weapons". As diplomacy moves forward with Iran, a process I hope succeeds, I believe it is crucial that Iran understand both that additional sanctions will be forthcoming if an agreement is not reached and that we remain committed to using military force if all else fails to stop their nuclear weapons ambition. Will it remain U.S. policy that all options, including military force, remain on the table to prevent Iran from developing a nuclear weapon?

Mr. WORK. The President has been very clear on this issue—the United States is determined to prevent Iran from acquiring a nuclear weapon, and all options remain on the table to achieve this objective. These options include tough-minded diplomacy and economic sanctions and pressure, reinforced and complemented by credible military capabilities and options. If confirmed, I will fully and faithfully support this policy.

34. Senator WICKER. Mr. Work, if confirmed, will you ensure that our forces will always be prepared to disrupt a potential Iranian nuclear breakout?

Mr. WORK. If confirmed, I will work to ensure that the Department continues to provide the President with all the options he might need to prevent Iran from acquiring a nuclear weapon.

COOPERATION BETWEEN THE UNITED STATES AND ISRAEL

35. Senator WICKER. Mr. Work, a central hallmark of the U.S.-Israel defense relationship has been the close cooperation between the countries. In the past few years, this cooperation has grown immensely in breadth and depth. As the region continues to be unstable, Israel has remained a constant ally and friend. What is your view of the importance of the U.S.-Israel strategic relationship?

Mr. WORK. I believe the bond between the United States and Israel is unbreakable, and that the defense relationship between the United States and Israel has

never been stronger. This relationship is based not only on mutual security interests, but on common values.

I therefore strongly support the President's and Secretary Hagel's proven commitment to Israel's security. This includes providing Israel with the most Foreign Military Financing in history, working tirelessly to maintain Israel's qualitative military edge by authorizing the sale of advanced technology to Israel, and supporting Israel's active missile defense efforts, including funding programs such as Iron Dome.

With such significant change in the region, DOD must continue to forge an ever closer relationship with Israel. If confirmed, I will work hard to ensure that the strategic relationship between our two countries becomes stronger, and that our military-to-military cooperation remains robust.

36. Senator WICKER. Mr. Work, do you intend to continue to engage and strengthen the cooperation between the United States and Israel?

Mr. WORK. Yes. If confirmed, I will work to support the President's and Secretary Hagel's efforts to make the defense relationship between the United States and Israel the strongest it has ever been. Prime Minister Netanyahu has said that the security cooperation between our two countries is "unprecedented." I believe that no U.S. administration has done as much for Israel's security.

Under the leadership of Secretary Hagel, DOD has strengthened the U.S.-Israeli defense relationship significantly by providing \$3.1 billion in Foreign Military Financing (FMF) and by releasing some of the most advanced U.S. military capabilities—like the F-35 and V-22 aircraft. If I am confirmed, I will work to ensure that DOD continues to expand this defense cooperation with Israel across the board and that our military-to-military ties are stronger than ever.

ISRAEL'S QUALITATIVE MILITARY EDGE

37. Senator WICKER. Mr. Work, it is U.S. policy to maintain and enhance Israel's qualitative military edge (QME)—effectively, Israel's ability to defend itself, by itself, and against any threat or potential combination of threats. Given the growing instability among Israel's neighbors and the region overall, this U.S. commitment is of utmost importance. How would you help to enhance Israel's QME as Secretary Hagel has pledged?

Mr. WORK. Secretary Hagel has said, "Our commitment to Israel's security is ironclad and unyielding." To me, this commitment means ensuring that Israel has what it needs to defend itself—anytime and anywhere. Currently, the United States is providing \$3.1 billion in FMF, which is the most FMF that the United States has ever provided to any country in history. This funding commitment directly supports Israel's security, as it allows Israel to purchase the sophisticated defense equipment it needs to protect itself, to deter aggressors, and to maintain its qualitative military edge. If confirmed, I will work to ensure Israel's qualitative military edge, and that Israel always has access to the most advanced military capabilities possible.

38. Senator WICKER. Mr. Work, if confirmed, will you make ensuring Israel's QME is maintained a constant priority?

Mr. WORK. If confirmed, I will work not only to preserve, but to ensure Israel's qualitative military edge remains a constant priority. I fully support Secretary Hagel's statement from his visit to Israel in April 2013, where he said that DOD is "committed to providing whatever support is necessary for Israel to maintain military superiority over any state or coalition of states and non-state actors." This includes not only providing Israel with the most Foreign Military Financing in history, but ensuring that Israel has access to the most advanced military technologies available, including the F-35 and the V-22.

39. Senator WICKER. Mr. Work, will you ensure our military cooperation and arms sales to the region are always weighed against their impact on Israel's QME?

Mr. WORK. I believe that ensuring that Israel's qualitative military edge (QME) is maintained is the cornerstone of the U.S. security assurance to Israel. Israel must have the ability to defeat any adversary—anytime, anywhere.

As you well know, the United States' commitment to Israel's qualitative military edge is not just based on shared values and interests, but is U.S. law. This law provides that any proposed sale or export of defense articles or services to the Middle East will include a determination that the sale or export will not adversely affect Israel's QME. If confirmed, I will work diligently to ensure that DOD upholds its

obligations under the law, and that we continue to support Israel's qualitative military edge.

40. Senator WICKER. Mr. Work, what steps should the United States undertake to mitigate the impact of unfolding Middle East events on Israel's QME?

Mr. WORK. I believe the bond between the United States and Israel is unshakable, and I fully support Secretary Hagel's efforts to ensure that Israel's qualitative military edge is maintained in the midst of the uncertainty and instability that has plagued the Middle East in recent years. Maintaining Israel's qualitative military edge includes ensuring that Israel has access to the most advanced military technology possible. Last year, Secretary Hagel announced that the United States would make available to Israel a package of advanced military capabilities, including the V-22, advanced fighter aircraft radars, and anti-radiation missiles. This significant decision underscores the United States and DOD's support for Israel's security. If confirmed, I will work with our policy community and all members of the defense enterprise to ensure that Israel continues to have access to advanced technologies, and that military-to-military cooperation between the United States and Israel continues to expand and strengthen in the future.

41. Senator WICKER. Mr. Work, when we sell arms to the Middle East, there are often commitments and guarantees made by the purchasers that are meant to limit the potential threat to U.S. interests in the region. If confirmed, will you ensure these commitments are closely monitored and promptly advise Congress of any violations?

Mr. WORK. It is my understanding that when DOD sells arms to any overseas customers, the United States includes provisos to protect U.S. national security interests. These include technology security measures such as end-use monitoring requirements, equipment security, and end-use assurances where required in accordance with the Foreign Assistance Act and the Arms Export Control Act. Compliance with these provisions is necessary to preclude inadvertent use beyond their intended defensive purpose. If confirmed, I will work to ensure these provisos are closely monitored and that any violations are identified and reported to Congress in strict accordance with the law.

QUESTION SUBMITTED BY SENATOR KELLY AYOTTEE

CIVILIAN FURLOUGHS

42. Senator AYOTTE. Mr. Work, can you assure me that, if you are confirmed, you will do everything in your power to avoid furloughs of civilians at our public shipyards and depots?

Mr. WORK. The furlough of any civilian workers should be an absolute last resort. Our civilian and contracting workforce are important to the success of the defense of the Nation. The impact of a furlough ripples throughout the entire organization and directly impacts the morale and welfare of our dedicated civilian employees.

Furloughs also degrade the readiness of our military, which depend on public shipyards and depots to maintain their ships, aircraft, and equipment. If confirmed, I will do my best to ensure that we will consider furloughs only if every reasonable alternative has been exhausted or no alternative exists. For example, if there is another lapse in appropriations, the Department could have no alternative but to furlough civilians.

QUESTIONS SUBMITTED BY SENATOR DEB FISCHER

SECTION 8128: ENVIRONMENTAL STUDIES OF INTERCONTINENTAL BALLISTIC MISSILE SILOS

43. Senator FISCHER. Mr. Work, section 8128 of the fiscal year 2014 Consolidated Appropriations Act (H.R. 3547, Public Law 113-76) expressed congressional opposition to any environmental study relating to the silos of Minuteman III ICBMs. Specifically, it states: "None of the funds available to DOD shall be used to conduct any environmental impact analysis related to Minuteman III silos that contain a missile as of the date of the enactment of this act." Please state DOD's interpretation of this section.

Mr. WORK. As I understand it, section 8128 of the Consolidated Appropriations Act, 2014 states that no funds shall be used to conduct any environmental impact analysis related to Minuteman III silos currently containing a missile. I also under-

stand that section 8136 of the fiscal year 2014 Consolidated Appropriations Act, referencing section 1056 of the NDAA for Fiscal Year 2014 appears to authorize the Department to conduct an environmental assessment (but not an environmental impact statement), provided the Department meets certain reporting requirements. I believe that the Department has not yet reached a final decision on how best to interpret these provisions.

If confirmed, I would certainly look into this issue.

44. Senator FISCHER. Mr. Work, what interactions has DOD had with other Federal agencies or parties outside of the Federal Government to prepare for conducting any environmental studies on the ICBM silos?

Mr. WORK. I am unaware of any DOD interactions with other agencies or non-governmental organizations regarding environmental studies of ICBM silos.

45. Senator FISCHER. Mr. Work, does DOD believe the decisions with respect to New Strategic Arms Reduction Treaty (START) force structure depend on the results of an environmental study of ICBM silos?

Mr. WORK. As I understand it, the President must evaluate options to adjust our force structure in order to implement the New START treaty. The Department's role should be to develop options and recommendations for the President; and to preserve the decision space necessary for the administration to make its final force structure decision.

There are different options under consideration to bring the total number of deployed and non-deployed launchers within New START treaty limits. Keeping some number of ICBM silos warm or converting or eliminating some submarine-launched ballistic missile (SLBM) tubes is one possible option. Eliminating some number of ICBM silos while keeping SLBM tubes available is another possible option. An environmental assessment would help ensure that the Department is able to fulfill its responsibilities under the National Environmental Policy Act.

QUESTIONS SUBMITTED BY SENATOR ROY BLUNT

ELECTRONIC WARFARE CAPABILITIES

46. Senator BLUNT. Mr. Work, you have previously discussed the importance of electronic warfare capabilities and the necessity of dominating the electromagnetic (EM) spectrum in any warfighting scenario. Your comments at the nomination hearing this week echoed the position of the CNO as it pertains to the same topic. It appears to me that stealth doesn't necessarily control the EM spectrum, but more appropriately neutralizes limited portions of it. I am interested in the manned airborne electronic attack (AEA) full spectrum coverage and how it operates in the future. Would you please discuss the current role that the EA-18G Growler plays in controlling the EM spectrum for the Navy and the joint warfighter? I believe that it plays the most critical role in enabling mission effectiveness in contested environments.

Mr. WORK. EA-18G Growlers bring the fundamental attributes of range, speed, persistence, and flexibility to regions of the globe where AEA capability is required to support the Joint force, whether operating from aircraft carriers or land bases. There is no other Joint or Navy program that offers the broad AEA capability afforded by the EA-18G aircraft. EA-18G's have the ability to passively monitor the EM spectrum to provide targeting information. With legacy jamming pods or Next Generation Jammers, the EA-18G provides precise control of a broad range of the EM spectrum to create virtual tactical sanctuaries from which joint warfighters can execute offensive missions while providing the Joint Force with defensive capabilities.

47. Senator BLUNT. Mr. Work, in your time with the Navy, or in your capacity at CNAS, have you seen or performed any analyses that address the benefit of this capability in the form of additional Growlers on the carrier air wing?

Mr. WORK. Yes, I am aware of studies that have been conducted and are ongoing that address options for additional Growlers in the carrier air wing. However, I have not been briefed on the status of these studies inside DOD. If confirmed, I would ask to be briefed to understand the full range of options considered.

48. Senator BLUNT. Mr. Work, aside from budget constraints, do you feel that additional Growlers could enhance operational effectiveness in the anti-access/area-denial (A2/AD) environment for not only the Navy, but also the entire Joint Force?

Mr. WORK. Electromagnetic warfare is a core competency and primary mission of the Joint force. The growing character of A2/AD capabilities possessed by potential future adversaries could create a highly contested environment requiring precise control of the magnetic spectrum. The Growler is the only DOD AEA tactical aircraft in the joint force inventory. The Growler with legacy jamming pods or Next Generation Jammers is the only flexible joint system that creates the necessary sanctuaries for our fourth and fifth generation aircraft to execute offensive and defensive tasks. If confirmed, I would work to obtain the highest level of electromagnetic warfare capabilities and capacities consistent with budget resources.

JOINT STRIKE FIGHTER AND TACTICAL AVIATION DEFENSE INDUSTRIAL BASE

49. Senator BLUNT. Mr. Work, the Navy variant of the Joint Strike Fighter program—the F-35C—has an initial operational capability objective of late 2018 or early 2019. Last year, Secretary Kendall testified that the program made progress last year, but that there are remaining challenges with software, the new helmet, and the landing hook, in particular. I am concerned that before some of these challenges are overcome, DOD proposes shutting down the only risk mitigation to the program—the F/A-18 manufacturing line. I strongly disagree with the premature closure of the F/A-18 line. Would you please tell me how you will evaluate the risk still inherent in the F-35C development program and how delays might affect the tactical aviation inventory?

Mr. WORK. I left government service nearly a year ago, so I do not have the most up-to-date information on the F-35 program. However, I understand the program is generally tracking with the schedule established following the 2010 program re-baselining, though challenges remain. I understand the F-35C, carrier variant, recently completed developmental testing of the re-designed arresting hook system with positive results. The initial at sea testing period aboard the aircraft carrier is scheduled for later this year.

If confirmed, I will work with Under Secretary Kendall to ensure the F-35 program is closely monitored, that risks are carefully assessed, and issues are brought to resolution. I will also ensure the Department continues to carefully monitor and manage the strike fighter inventory to meet current and future operational requirements.

50. Senator BLUNT. Mr. Work, do you have any concerns about the tactical aviation defense industrial base if there is a single tactical aviation provider with the F-35?

Mr. WORK. Yes. Budget cuts are decreasing production and R&D for many Defense systems. In the tactical aircraft industrial base, I am concerned about maintaining engineering design capabilities for the future. To address this, I understand the Department has initiated a Defense Advanced Research Projects Agency-led Air Dominance Initiative with extensive participation from both the Navy and the Air Force, partnered with major tactical aviation industry suppliers. This team is exploring concepts for the next generation of air dominance and undertaking prototyping efforts based on the results of concept exploration.

I also know about and support DOD efforts to promote competition and innovation in aeronautics more broadly with investments in enabling technologies and programs, including the Unmanned Carrier Launched Airborne Surveillance and Strike aircraft.

[The nomination reference of Hon. Robert O. Work follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 10, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Robert O. Work, of Virginia, to be Deputy Secretary of Defense, vice Ashton B. Carter, resigned.

[The biographical sketch of Hon. Robert O. Work, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ROBERT O. WORK

Education:

University of Illinois

- 1970–1974
- BS Biology

University of Southern California

- 1978–1980
- MS Systems Management

Naval Postgraduate School

- 1988–1990
- MS Systems Technology

John Hopkins School of Advanced International Studies (SAIS)

- 1993
- Masters in International Public Policy (MIPP)

Employment record:

Center for New American Security

- Chief Executive Officer
- April 2013–Present

Department of the Navy

- Under Secretary of the Navy
- May 2009–March 2013

Center for Strategic and Budgetary Assessments

- Vice President for Strategic Studies
- January 2007–May 2009

Center for Strategic and Budgetary Assessments

- Senior Fellow
- April 2002–December 2006

George Washington University

- Adjunct Professor
- May 2003–May 2009

U.S. Marine Corps

- Various Officer assignments
- May 1974–2001

Honors and awards:

Navy Distinguished Civilian Service Award, 2013

Legion of Merit, 2001, 1998

Meritorious Service Medal, 1996, 1992, 1988

Defense Meritorious Service Medal, 1994

Marine Corps Achievement Medal, 1985, 1980

Ancient Order of St. Barbara for Conspicuous Service to Marine Field Artillery, 1995

1st Marine Brigade Nominee for the annual Leftwich Award, which recognizes the best small unit leader in the Marine Corps, 1983

Distinguished Speaker Award, U.S. Marine Corps Amphibious Warfare School, 1981

Distinguished Honor Graduate (1 of 53), U.S. Army Artillery School, Fort Sill, OK, 1975

Honor Graduate (2 of 242), Marine Officer's Basic School, Quantico, VA, 1975

Distinguished Marine Graduate, Naval Reserve Officers Training Course, University of Illinois, 1974

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee.

The form executed by Hon. Robert O. Work in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Robert Orton Work.

Robert O. Work.

Bob Work.

2. **Position to which nominated:**

Deputy Secretary of Defense.

3. **Date of nomination:**

February 10, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

January 17, 1953; Charlotte, NC.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Cassandra Faye Baugher.

Married Name: Cassandra B. Work.

7. **Names and ages of children:**

Kendyl Taylor Work, 23.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

University of Illinois, 5/1970-8/1974; BS Biology, 8/8/1974.

University of Southern California, 1/1978-1/1980; MS Systems Management, 1/31/1980.

Naval Postgraduate School, 6/1988-9/1990; MS Systems Technology, 9/27/1990.

John Hopkins School of Advanced International Studies (SAIS), 8/1992-5/1993, Masters in International Public Policy (MIPP), 5/26/1994.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Chief Executive Officer, Center for a New American Security, 1152 15th St., NW, Suite 950, Washington, DC, April 2013-present.

Under Secretary of the Navy, Department of the Navy, 1000 Navy Pentagon, Washington, DC, May 2009-March 2013.

Vice President for Strategic Studies, Center for Strategic and Budgetary Assessments, 1776 K St., NW, Washington, DC, January 2007-May 2009.

Senior Fellow, Center for Strategic and Budgetary Assessments, 1730 Rhode Island Ave., Washington, DC, April 2002-December 2006

Adjunct Professor, George Washington University, Washington, DC, January 2003–May 2009

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Member, President-elect Obama's Defense Transition Team, November–December, 2008.

Member, 2006 QDR Red Team for the Office of the Secretary of Defense
As Senior Fellow and VP for Strategic Studies at the Center for Strategic and Budgetary Assessments, provided consultative analysis for the Office of Net Assessment, Office of the Secretary of Defense.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Chief Executive Officer, Center for a New American Security, Washington, DC, April 2013–present.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, International Institute of Strategic Studies (IISS)

Member, U.S. Naval Institute

Member, Navy League

Member, Marine Corps Association

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

\$1,500 to Obama Victory Fund, 9/19/2012

\$500 to Obama Victory Fund, 9/29/2012

\$500 to Obama for America, 9/29/2012

\$100 to Obama for America, 10/26/2012

-\$100 from Obama for America 11/15/2012

\$100 to Democratic National Committee, October 2013 (2x\$50)

\$117 to Democratic National Committee, November 2013 (2x\$50; 1x\$17)

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Scholarships:

- Naval Reserve Officer Training Course, 4-year scholarship, University of Illinois, 1970–1974

Honorary Society Memberships:

- National Honor Society

Military Awards:

- Legion of Merit, 2001,1998
- Meritorious Service Medal, 1996,1992,1988
- Defense Meritorious Service Medal, 1994
- Marine Corps Achievement Medal, 1985,1980

Recognitions:

- Navy Distinguished Civilian Service Award, 2013
- Ancient Order of St. Barbara for Conspicuous Service to Marine Field Artillery, 1995
- 1st Marine Brigade Nominee for the annual Leftwich Award, which recognizes the best small unit leader in the Marine Corps, 1983
- Distinguished Speaker Award, U.S. Marine Corps Amphibious Warfare School, 1981
- Distinguished Honor Graduate (1 of 53), U.S. Army Artillery School, Fort Sill, OK, 1975
- Honor Graduate (2 of 242), Marine Officer's Basic School, Quantico, VA, 1975

- Distinguished Marine Graduate, Naval Reserve Officers Training Course, Univ. of Illinois, 1974
- Presidential Classroom for Young Americans, 1970

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Published Writings:

- The Challenge of Maritime Transformation: Is Bigger Better (Washington, DC: Center for Strategic and Budgetary Assessments, 2002)
- Meeting the Anti-Access and Area-Denial Challenge, with Andrew Krepinevich and Barry Watts (Washington, DC: Center for Strategic and Budgetary Assessments, 2003)
- Naval Transformation and the Littoral Combat Ship (Washington, DC: Center for Strategic and Budgetary Assessments, 2004)

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

I have given many speeches over the past 5 years. I typically speak without notes, although I often use PowerPoint to guide me. I have attached a CD with several

examples. Below is a short list of speeches or public remarks that I made as the Under Secretary of the Navy and as the Chief Executive Officer of the Center for New American Security.

23 July 2013 - Senate Budget Committee testimony
 12 June 2013 - Center for New American Security (CNAS) annual conference
 29 May 2013 - CNAS "Strategic Choices" out-brief
 17 May 2013 - EAST: Joint warfighting symposium
 26 October 2012 - Navy Flag Leadership Conference
 25 October 2012 - Navy SES Leadership Town Hall
 22 October 2012 - Navy Leadership Forum
 26 September 2012 - Master Chief Petty Officer of the Navy Leadership Summit
 12 July 2012 - John Hopkins APL Integrated Air—Missile Defense Symposium
 12 June 2012 - Current Strategy Forum (Naval War College)
 5 June 2012 - Navy Opportunity Forum
 21 May 2012 - CATO Institute—Speech on Fleet Design
 10 May 2012 - Navy Postgraduate School—State of the Navy
 30 April 2012 - Marine Corps Combat Development Command
 11 April 2012 - Army War College
 15 February 2012 - Expeditionary Operations Symposium
 12 January 2012 - Surface Navy Association Annual Conference
 10 January 2012 - Naval War College
 15 December 2011 - Navy Flag Officers/SES seminar
 13 December 2011 - Center for Naval Analysis—Air/Sea Battle Seminar
 28 October 2011 - Navy Flag Officers/SES seminar
 26 October 2010 - AIE Counter Anti-Access/Area-Denial Symposium
 9 June 2010 - Armed Forces Communications/Electronics Association

17. Commitments regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ROBERT O. WORK.

This 10th day of February, 2014.

[The nomination of Hon. Robert O. Work was reported to the Senate by Chairman Levin on March 26, 2014, with the rec-

ommendation that the nomination be confirmed. The nomination was confirmed by the Senate on April 30, 2014.]

[Prepared questions submitted to Hon. Michael J. McCord by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Currently, I do not see the need for modifications. I believe the Goldwater-Nichols Act reforms have been and are effective and continue to serve us well. If confirmed, I will continue to assess any need to recommend changes to the act.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not believe any modifications are presently required.

RELATIONSHIPS

Question. What is your understanding of the relationship between the Under Secretary of Defense (Comptroller) and each of the following?

The Secretary of Defense.

Answer. The Under Secretary of Defense (Comptroller) is the principal assistant and advisor to the Secretary on fiscal and budgetary matters. If confirmed, I will continue to support the Secretary in any aspect of the responsibilities of the Comptroller that the Secretary may prescribe.

Question. The Deputy Secretary of Defense.

Answer. My relationship with the Deputy Secretary of Defense will be based on the role as described above. During my time as the Department's Deputy Comptroller, the Comptroller and I have worked closely with the Deputy Secretary on budget and management issues and I would expect that will continue. If confirmed, I would support the Deputy Secretary in any matter within the purview of the Comptroller that the Deputy Secretary may prescribe.

Question. The other Under Secretaries of Defense.

Answer. If confirmed, I will continue to work closely with the Under Secretaries, to carry out the policies and guidance of the Secretary and Deputy Secretary.

Question. The Assistant Secretaries of Defense.

Answer. My relationship with the Assistant Secretaries of Defense and other senior officials of the Office of the Secretary of Defense would be similar to that described above in relation to the other Under Secretaries of Defense. In most cases I would expect to deal with the Assistant Secretaries through the Under Secretaries to whom they report. In those cases where the Assistant Secretary reports directly to the Secretary, as is the case with the Assistant Secretary of Defense for Legislative Affairs, I would expect to continue the excellent direct working relationships that both I and the incumbent Comptroller have had.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman of the Joint Chiefs of Staff is the principal military advisor to the President, the National Security Council, and the Secretary of Defense. If confirmed, I will continue to work closely with the Chairman and Vice Chairman of the Joint Chiefs of Staff, both directly and frequently through their Director for Force Structure, Resources, and Assessment on any matter pertaining to resourcing our forces and military operations and financial management.

Question. The Secretaries of the Military Departments.

Answer. If confirmed, I will continue to work closely with the Secretaries of the Military Departments on a wide range of resource allocation, budget execution, and other financial management issues. I will ensure that they are aware of the President's and the Secretary of Defense's policies and priorities and assist them in im-

plementing Departmental policies and programs as they may relate to their specific Services.

Question. The heads of the defense agencies.

Answer. If confirmed, I will continue to work closely with the heads of the defense agencies in any matter pertaining to resources and financial management. I will ensure that they are aware of the President's and the Secretary of Defense's policies and priorities and assist them in implementing Departmental policies and programs as they may relate to the specific agency.

Question. The Assistant Secretaries for Financial Management of the Military Departments.

Answer. The Department's Comptroller and I work very closely with the Assistant Secretaries for Financial Management of the military departments in the development and execution of budgetary matters, fiscal policy, and initiatives of the President and the Secretary of Defense. If confirmed, I will continue to work closely with the Assistant Secretaries in contributing to the successful development and implementation of effective DOD policies and programs and management of the defense budget.

Question. The General Counsel of the Department of Defense (DOD).

Answer. The Office of the Under Secretary of Defense (Comptroller) works closely with the Department's Office of the General Counsel on a daily basis. I will, if confirmed, continue to consult and coordinate with the General Counsel on all legal matters, and specifically, matters related to fiscal and budgetary issues that may have legal implications.

Question. The Inspector General.

Answer. If confirmed, I consider it my responsibility to support the DOD Inspector General (DODIG) in carrying out his or her duties as set forth in the Inspector General Act.

Question. The Director, Office of Cost Assessment and Program Evaluation.

Answer. If confirmed, I will continue to coordinate and work closely with the Director for Cost, Assessment and Program Evaluation in meeting his or her duties and in providing advice, assessments, and options to the Secretary or Deputy Secretary. I will continue to work with the Director to ensure that a robust and successful program/budget review is conducted and that our programs are aligned with and managed in accordance with their guidance.

Question. The Deputy Chief Management Officer.

Answer. If confirmed, I will continue to work to improve the management of the Department's complex operations and organization. In particular, I will work with the Deputy Chief Management Officer on monitoring the Department's progress on implementing efficiency measures directed by the President, the Secretary, and Congress, and on improving the systems that provide management information, particularly financial management information, and the development of appropriate metrics in those areas.

Question. The Director, Office of Management and Budget.

Answer. If confirmed, I will continue the near near-daily interaction with the Office of Management and Budget on the preparation and execution of the Department's budgets, and the advancement of both the administration's and the Department's management priorities.

Question. The Comptroller General.

Answer. If confirmed, I will continue to review the recommendations of the Comptroller General and the Government Accountability Office regarding DOD financial matters and, as required, support actions to improve the Department's processes.

DUTIES OF THE COMPTROLLER

Question. The duties of the Comptroller of DOD are set forth in section 135 of title 10, U.S.C., and in DOD Directive 5118.3. Among the duties prescribed in statute are advising and assisting the Secretary of Defense in supervising and directing the preparation of budget estimates of DOD, establishing and supervising DOD accounting policies, and supervising the expenditure of DOD funds.

Assuming you are confirmed, what duties do you expect that Secretary Hagel will prescribe for you?

Answer. To provide the Secretary and Deputy Secretary expert and timely advice on all issues related to the budgetary and financial management of the Department.

To ensure that the men and women serving within the Department for their Nation, to include the members of our Armed Forces, our Federal civilian employees and the contractors that support them, especially those engaged in overseas contingency operations, have the resources they need to meet national security objectives.

To ensure that funds are obligated and expended in accordance with laws and regulations that govern such funds and to exercise the fiduciary responsibilities vested in us by the American taxpayers to provide the best possible value for their tax dollars.

To be responsible for and accurately manage funds that have been authorized and appropriated to the Department by Congress.

Question. What background and experience do you possess that you believe qualifies you to perform the duties of the Comptroller?

Answer. I believe that my experience as the Principal Deputy Under Secretary of Defense (Comptroller) for the past 5 years demonstrates my qualification for this position. I am intimately familiar with the budgetary and financial issues that pertain to the Department.

Including my 5 years as the Department's Deputy Comptroller, I have over 29 years of experience in defense budget and financial management analysis. This includes:

The 21 years as a professional staff member of the Senate Armed Services Committee overseeing the DOD budget and providing expert analysis on issues such as funding overseas contingency operations, the fiscal impact of legislation, reprogramming of funds to meet emerging needs, questions of fiscal law and financial management, the analysis of alternative courses of action with respect to specific programs, and knowledge of the Federal budget process.

Two years at the Congressional Budget Office analyzing military pay and benefits, including military retirement, and force structure costs.

Service on the staff of the House Budget Committee working topline funding issues pertaining to both defense and veterans issues, which enhances my understanding of benefit issues and the areas of interaction between the two Departments, as well as the analysis of the cost of contingency operations and the overall Federal budget process.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform these duties?

Answer. Although I have been with the Department over the past 5 years as the Principal Under Secretary of Defense (Comptroller), the vast breadth of the Department's programs and policies require me to constantly enhance my expertise as they relate to the Department's budget and financial management issues.

Question. Do you expect Secretary Hagel to make any changes in the duties of the Comptroller as set out in DOD Directive 5118.3?

Answer. There are several initiatives Secretary Hagel is implementing to reduce size and increase the efficiency of the Office of the Secretary of Defense. I believe it is possible roles and responsibilities within DOD may be modified once these initiatives are fully implemented, but at this time I do not anticipate any significant change in the duties of the Comptroller or our office or Defense agencies.

CHIEF FINANCIAL OFFICER

Question. DOD Directive 5118.3 designates the Comptroller as the Chief Financial Officer of DOD.

Does Secretary Hagel intend to continue to designate you, if confirmed as the Comptroller, as the Chief Financial Officer of DOD?

Answer. I have no information that Secretary Hagel would do otherwise if I am confirmed.

Question. If so, what would be your major responsibilities as Chief Financial Officer?

Answer. As specified by DOD Directive 5118.03 dated April 20, 2012, the Chief Financial Officer shall:

Oversee all financial management activities relating to the programs and operations of DOD;

Oversee the development and maintenance of integrated DOD accounting and financial management systems, including financial reporting and management controls, which comply with law;

Direct, manage, and provide policy guidance and oversight of DOD financial management personnel, activities, and operations;

Monitor the financial execution of the DOD budget for actual obligations, expenditures, and costs incurred;

Review, the fees, royalties, rents, and other charges imposed by DOD for services and things of value it provides and make recommendations on revising those charges to reflect costs incurred by it in providing those services and things of value.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Under Secretary of Defense (Comptroller)/Chief Financial Officer?

Answer. The Comptroller's major and recurring challenge is to prepare and manage defense budgets and work with Congress to provide the Department the necessary resources to accomplish our national security objectives. Although the Department is transitioning from a wartime posture, it does so in an uncertain strategic environment. The Department will continue to require substantial resources to maintain the warfighting readiness of our Armed Forces, and to carry out a broad range of missions at the direction of the President and the Secretary of Defense on behalf of the Nation.

Providing our operational commanders with the resources and flexibility they need to carry out their directed missions. As the world security situation continues to grow in complexity and move at increasing speeds, I am concerned that our current executive and legislative processes may not be agile enough to keep pace. I intend to work with the defense committees to seek the additional flexibility I believe we need to ensure that we can meet our Nation's security needs in the 21st century, while respecting and preserving appropriate oversight on behalf of the taxpayers.

Continuing to improve our financial management and the financial information available to DOD managers, providing them with the information they need to help identify areas where they can help make defense spending as efficient as possible.

Maintaining a trained and capable financial management workforce in the face of significant challenges in recruiting, retaining, and training a skilled workforce in the face of the sequestration, hiring freezes, furloughs, and pay freezes the Federal workforce has experienced over the last several years.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will work closely with other senior officials in DOD, our Comptroller staff, the Military Departments and Defense agencies, the Office of Management and Budget, and Congress to develop policies to meet these challenges.

I will also provide my commitment, leadership, and support to our staff in the immediate office of the Comptroller, the Defense Finance and Accounting Service, and the Defense Contract Audit Agency in meeting these priorities.

I will ensure that we maintain our progress on the centerpiece of our financial management improvement efforts, which is achieving auditable financial statements.

An important part of our efforts to maintain or enhance the quality of our financial management workforce will be to continue the strong start we have made in implementing the course-based certification program for Defense financial managers that was authorized by Congress in the fiscal year 2012 defense authorization bill.

AUTHORIZATION FOR NATIONAL DEFENSE PROGRAMS

Question. Do you believe that an authorization pursuant to section 114 of title 10, U.S.C., is necessary before funds for operation and maintenance, procurement, research and development, and military construction may be made available for obligation by DOD?

Answer. The Department is committed to work with the Armed Services and Appropriations Committees to resolve any matter relating to the authorization or appropriation of the Department's activities. If confirmed, I will continue to respect the prerogatives of the Department's oversight committees, and will work closely with the committees to achieve a consensus necessary to meet our defense needs.

CONTRACTING FOR SERVICES

Question. Over the last decade, DOD's spending on contract services has more than doubled. As a result, the Department now spends more for the purchase of services than it does for products (including major weapon systems). When he was USD(AT&L), former-Deputy Secretary of Defense Ashton Carter testified that "the low-hanging fruit really is [in contract services]. There's a lot of money. There has been a very, very high rate of growth over the last decade, in services. They have grown faster than everything else. . . . So, there's a lot we can do. I think great savings can be had there, across the Services' spend. It's essential that we look there, because that's half the money."

Do you believe that the cuts made to contract services have fully addressed the issues of waste and inefficiency in this area, or are further reductions possible?

Answer. The funding reductions the Department has already made in contract services are a good start. These reductions are the result of several initiatives undertaken across the Department. We have gained efficiencies by improving require-

ments definition, negotiating lower labor and overhead rates, increasing competition, improving our purchasing processes, and by aggressively reviewing services contracts. Further reductions are possible as we reduce the military force structure and continue to implement process and system improvements to actively manage contracted services.

Question. What additional steps would you take, if confirmed, to control the Department's spending on contract services?

Answer. I support the efforts we are taking to improve our visibility into, and accountability for, contracted services. This improved data will help ensure appropriate utilization, cost effectiveness, and alignment to mission for contracted services and provide the information we need to target specific areas for improvement. We face the prospect of a prolonged period of constrained resources that will force us to continue to get the most bang for the buck in this area, among others.

CHIEF MANAGEMENT OFFICER

Question. The positions of Chief Management Officer of DOD and Deputy Chief Management Officer of DOD were established by section 904 of the National Defense Authorization Act for Fiscal Year 2008. In accordance with section 904, the purpose of these new positions is to improve the overall efficiency and effectiveness of the business operations of DOD and to achieve an integrated management system for business support areas within DOD.

Do you believe that a comprehensive, integrated, enterprise-wide architecture and transition plan is essential to the successful transformation of DOD's business systems?

Answer. Yes. The Department's Business Enterprise Architecture and the Enterprise Transition Plan are key elements in the successful modernization and integration of our business systems. They are critical in ensuring an interoperable business systems environment that effectively supports our business operations.

Question. Do you believe that the Department needs senior leadership from a Chief Management Officer and a Deputy Chief Management Officer to cut across stovepipes and ensure the implementation of a comprehensive, integrated, enterprise-wide architecture for its business systems?

Answer. Yes. The Chief Management Officer and the Office of the Deputy Chief Management Officer play a vital and significant role within the Department. Responsible for looking holistically at the Department's business operations, they are able to bring a cross-functional, end-to-end perspective to the management of the Department's business operations.

Question. If confirmed, what role do you expect to play in working with the Chief Management Officer and the Deputy Chief Management Officer to improve the business operations of DOD?

Answer. If confirmed, I will continue to work closely with the Chief Management Officer and Deputy Chief Management Officer, and the Under Secretaries of the Military Departments, in ensuring unified, standardized and integrated business processes and systems. Additionally, I will work closely with the Deputy Chief Management Officer as the co-chair of the Financial Improvement and Audit Readiness Governance Board to ensure we meet our financial improvement goals.

Question. What responsibilities, if any, that may have formerly been performed by the Comptroller do you believe have been, will be, or should be reassigned to the Chief Management Officer or the Deputy Chief Management Officer of DOD?

Answer. During my time as the Department's Deputy Comptroller, the Department's first Deputy Chief Management Officer was confirmed. Our office worked with hers to reconcile and clarify our responsibilities and we updated our governing directives to that effect fairly recently. Therefore I do not believe that any further changes are required, but if confirmed, I will assess the roles and responsibilities of the Office of the Comptroller and make recommendations for any changes required.

AUDIT READINESS

Question. Former Secretary Panetta stated: "While we have reasonable controls over much of our budgetary information, it is unacceptable to me that the Department of Defense cannot produce a financial statement that passes all financial audit standards. That will change. I have directed that this requirement be put in place as soon as possible. America deserves nothing less."

What is your understanding of the efforts and progress that have been made in DOD toward the goal of being able to produce a clean audit?

Answer. DOD is making real progress toward a clean audit. The large trust funds for retiree benefits and the revolving funds for several Defense Agencies have re-

ceived positive audit results. The U.S. Army Corps of Engineers earned a clean audit opinion, as did the U.S. Marine Corps' Schedule of Budgetary Activity.

There is, however, a substantial amount of work still to do, including efforts to address some of the most challenging problems. Under the leadership of our Comptroller, Robert Hale, the Department implemented a new strategy to achieve a clean audit that focuses improvement efforts on the financial information most used to manage, and that strategy is yielding very positive results throughout DOD. We expect most of the Department to undergo a financial audit of the Schedule of Budgetary Activity in fiscal year 2015. If confirmed, I will pursue appropriate actions to ensure continued progress toward meeting clean audit goals.

Question. Do you believe the Department will meet the statutory goal and achieve an auditable Statement of Budgetary Resources by the end of fiscal year 2014 or are additional steps necessary? If so, what are those steps?

Answer. The Department is making steady progress toward achieving a clean audit opinion. We intend to validate our audit readiness for budgetary accounts by the end of fiscal year 2014. Using the Marine Corps model, this will allow us to begin an audit of the Schedule of Budgetary Activities during fiscal year 2015. This represents a crucial step towards an auditable Statement of Budgetary Resources. While it is too soon to know for sure, I expect most budget statements to be audit ready. For those elements that are not ready, appropriate actions will be taken to achieve this state at the earliest possible opportunity. If confirmed, I will ensure that we clearly communicate our status in our regular status reports and staff briefings.

Question. Do you believe the Department will meet the statutory goal and achieve an auditable financial statement by the end of fiscal year 2017 or are additional steps needed? If so, what are those steps?

Answer. I believe that we have made significant progress and, if confirmed, I will continue the current approach that has supported this progress. We are committed to achieving audit readiness for all aspects of our business by the end of fiscal year 2017, supporting an audit of all required financial statements during fiscal year 2018 as described in this year's defense authorization bill. I believe that we are on track to meet this commitment, and if confirmed, I will ensure that we sustain this effort. While much work remains, we have a clear understanding of the breadth of work that is required.

Question. Do you believe the Department meets the statutory goal "to ensure a full audit is performed on the financial statements of DOD . . ." for fiscal year 2018 and that audit will be completed by September 30, 2018, or are additional steps needed? If so what are those steps?

Answer. We are committed to performing a full scope financial audit of the entire Department in fiscal year 2018. Based on experience within DOD as well as in non-defense agencies, this initial full scope audit will likely continue well into fiscal year 2019.

Question. Do you believe the Department will meet the statutory goal to submit to Congress the results of the audit to be completed by September 30, 2018, or are additional steps needed? If so, what are those steps?

Answer. The results from our initial fiscal year 2018 full-scope audit will be submitted by the DOD Inspector General when audit work is completed in fiscal year 2019. While I am hopeful those results will be positive, experience of other Federal agencies as well as our own experience in auditing the Marine Corps and other entities, is that achieving an unqualified opinion the first year under audit is rare.

Question. Do you believe in order to meet the statutory goal to conduct a full audit that the Department will have to place a monetary value on all of its property?

Answer. Yes. Under current Government audit standards, the Department will need to value all of its property that is above the appropriate capitalization thresholds. Depending on the type of property, this information may not always be useful. Current accounting standards allow us some flexibility to minimize the cost of valuing property, particularly when this information is not used.

Question. Do you believe that the Department can achieve a clean audit opinion through better accounting and auditing, or is the systematic improvement of the Department's business systems and processes a prerequisite?

Answer. Strengthening the Department's business systems and processes has been and is essential to achieving audit readiness. This includes timely and accurate accounting. The business operations of the Department are complex, often decentralized and not necessarily set up to support audit standards. We have found that we can achieve audit readiness by emphasizing controls in our existing systems, but sustaining audit readiness and supporting cost effective audits will require us to continue to improve and modernize our business systems and processes so that they can be relied upon by financial auditors.

Question. When do you believe the Department can achieve a clean audit?

Answer. We expect most of the Department's components to be prepared to undergo an audit of the Schedule of Budgetary Activity during fiscal year 2015. Using the Marine Corps experience and considering relative size, we anticipate clean audits for these smaller audits within several years. Building on this foundation, I believe the entire Department should be ready to undergo a full scope financial audit beginning in fiscal year 2018. Experience of other Federal agencies as well as our own experience in auditing the Marine Corps and other entities, is that achieving a clean opinion can take several years.

THE FINANCIAL IMPROVEMENT AND AUDIT READINESS PLAN

Question. The Department's Financial Improvement and Audit Readiness (FIAR) plan is organized into five waves that focus on audit readiness of the Statement of Budgetary Resources (SBR) (waves 1 and 2), the existence and completeness of assets (wave 3), and a full financial statement audit (waves 4 and 5).

Answer. To provide clarification, the Department's FIAR plan is organized into four waves that focus on audit readiness of Appropriations Received and the SBR (waves 1 and 2, respectively), the existence and completeness of mission-critical assets (wave 3), and a full financial statement audit (wave 4).

Question. If confirmed, what steps, if any, would you take to ensure the implementation of specific detailed plans for achieving a full audit through waves 4 and 5?

Answer. The Department is very close to completing the required work on the first 2 waves and is on track to complete Wave 3 (Existence and Completeness of property) by June 2016. Because of our intense focus on audit readiness of budgetary accounts, we have just provided the initial guidance for developing detailed plans for Wave 4—full financial statement audit. If confirmed I will ensure that these plans are completed and executed across the Department. Our progress on the auditability of our budgetary execution will provide the transaction-based foundation for full statement audits.

Question. What is your understanding of the roles and responsibilities of the Military Department Chief Management Officers (CMOs) in implementing the FIAR plan through their individual financial improvement plans (FIP)?

Answer. One of the key roles the Under Secretaries of the Military Departments, as CMOs, play in their organizations is integrating and coordinating efforts between the functional communities (e.g., Logistics or Personnel) to improve their business operations. This is particularly true when it comes to financial improvement. The Military Department CMOs ensure that all parts of the organization recognize their vital role in achieving audit readiness, since most financial transactions originate as the result of business events in the functional communities' operations, and work together to implement their FIPs. Additionally, the Military Department DCMOs sit on the FIAR Governance Board to help the Department maintain effective governance of the audit readiness process.

Question. What steps, if any, do you believe are needed to clarify those roles and responsibilities?

Answer. I believe that the role of the Military Department CMOs is clear. As the Under Secretaries of their organizations, they have the authority and responsibility necessary to ensure progress in implementing their FIPs and hold their functional communities, including the financial management community, accountable.

Question. Do you believe that performance measurement and monitoring mechanisms need to be improved?

Answer. Our current ability to link financial information to other measures of performance is not as robust as it should be. As part of our business systems modernization effort, we are improving our capability in this area.

Question. If confirmed, what steps would you take to sustain the commitment of the Department's top leadership to the long-term goal of transforming the Department's financial management?

Answer. Secretary Hagel has made improving financial information and audit readiness a Department-wide, all-hands responsibility, and if confirmed, I will do everything I can to support his leadership on this issue. I believe DOD leaders understand that audit success supports mission success and have embraced the need to transform financial management. We have made great progress in helping those outside the financial community understand how stronger controls will also improve the quality of their financial information and enhance their decision-making ability. I think we have made substantial progress in all aspects of financial management to include sustaining a professional work force through a strong certification program.

Question. Do you think that having the Deputy Secretary of Defense “dual-hatted” as the CMO is consistent with the prioritization and sustained day-to-day focus needed for the success of the Department’s financial improvement efforts?

Answer. Yes. Dual-hatting the Deputy Secretary of Defense as the CMO is a critical component in ensuring that the Department’s financial improvement efforts are both sustained over time and given the priority needed to be successful. The seniority and cross-cutting nature of the position of CMO/Deputy Secretary of Defense ensures that financial improvement issues can be elevated to a position with the authority necessary to drive change across all components within the Defense enterprise.

INCREMENTAL FUNDING VS. FULL FUNDING

Question. Do you believe DOD should continue to adhere to the longstanding practice of fully funding the purchases of major capital assets, including ships and aircraft, in the year the decision to purchase the asset is made, or do you believe incremental funding of such purchases is justified in some cases?

Answer. I agree with the longstanding Office of Management and Budget policy on fully funding end items in 1 fiscal year. However, there are circumstances where incremental funding of large assets, such as nuclear aircraft carriers and complex military construction facilities, which often take several fiscal years to complete, can be appropriate. In these limited situations, and with proper management oversight, incremental funding would not lead to inefficient delivery of the item being financed over 2 or more fiscal years. Such decisions should be made on a case-by-case basis after careful analysis.

Question. If you believe a change in policy is warranted, please explain how you believe such changes would benefit the Department and the taxpayer.

Answer. Currently, I do not see the need for a change in policy, or a need for new legislation. The use of incremental funding for Procurement and Military Construction projects should be limited, and justified case-by-case.

FISCAL YEAR 2015 INVESTMENT FUND

Question. It has been reported that the Department’s fiscal year 2015 budget request will include an outline of how it would spend an additional \$26 billion above the fiscal year 2015 discretionary limit set in the Bipartisan Budget Act (BBA). The reports describe the additional \$26 billion as an “investment fund”.

How was this wedge of additional spending created? That is, was the wedge created after the fiscal year 2015 program was drafted or was the fiscal year 2015 program drafted at a higher level and then program budgets reduced so the Department’s budget would conform to the discretionary cap in the BBA?

Answer. I cannot discuss the specifics of the fiscal year 2015 budget request at this time. The administration will release the budget on March 4, 2014. The Department has sought to prepare a budget that meets the President’s strategic national security guidance within the fiscal year 2015 discretionary spending limits in the BBA. Given the uncertainty of the fiscal climate difficult choices will have to be made.

Question. How does the wedge differ from the Secretary of Defense-screened compilation of the Services “Unfunded Priority Lists” of prior years?

Answer. As noted above, I cannot provide details on the fiscal year 2015 budget request at this time.

BUDGETING BEYOND FISCAL YEAR 2015

Question. It has been reported that DOD budget projections in the out-years (beyond fiscal year 2015) may exceed the Budget Control Act (BCA) caps currently in law.

What are the principal risks and possible consequences facing the Department in basing its fiscal year 2015 program on the assumption that out-year budgets will exceed the current out-year BCA caps?

Answer. I cannot comment on the fiscal year 2015 budget request at this time. The Department is very concerned about our ability to execute the Defense Strategy if constrained to budgets at the BCA cap levels over the long term, so there is a risk associated with reducing our forces and capabilities down to that level. There is a different kind of risk in building a program that more fully supports our strategy but requires additional resources, should those additional resources not be provided.

SEQUESTER AND READINESS

Question. The fiscal year 2013 sequester reduced DOD's funding by \$37 billion. The Services were directed to minimize fiscal year 2013 sequester impacts on readiness.

What steps did the Department take to protect readiness?

Answer. The Department did what it could to protect readiness, and sought to protect training and other key readiness enablers to the extent we could given the discretion we have in our operations and maintenance accounts. However, given the across-the-board formulaic nature of sequestration and the sheer mathematical imperative to cut \$37 billion in less than a full fiscal year, we were not able to completely protect readiness. The primary step we took to protect readiness was to shield our operations in and in support of Afghanistan from sequestration to the maximum extent possible by shifting those burdens to the rest of the force where possible.

The fiscal year 2013 sequester resulted in significant reductions to training events, including fewer rotations through the National Training Center, significant reductions in flying hours, and decreases in Navy operations. The Department made sure to support our deployed forces and ensured our next-to-deploy units were ready to go. Due to increased costs being experienced in Afghanistan, the Department had to reprogram significant funds, with the strong support of our defense committees, to ensure support to the deployed troops was adequately funded.

Sequestration resulted in substantial reductions in both facility and equipment maintenance activities. Hiring freezes and travel limitations were imposed. Most troubling to us was the necessity to furlough a large portion of our civilian work force, which could have long-term as well as short-term impacts on our readiness and capability.

The Department accommodated the sequestration funding limitations in part by deferring some requirements from fiscal year 2013 to fiscal year 2014. Our hope is the funding made available in the fiscal year 2014 Consolidated Appropriations Act will enable a gradual recovery from the readiness degradation experienced in fiscal year 2013.

Question. Within the operation and maintenance accounts, what steps were taken to protect operating accounts and activities?

Answer. Given the formulaic nature of sequestration, there is very little the Department could do to protect any of the accounts. In the operating accounts, priority was given to supporting deployed forces, treating wounded warriors, and sustaining family support programs. Beyond those activities, reductions in virtually all other operating account-funded activities such as peacetime training, facilities maintenance, depot maintenance, and base operations had to be implemented in order to accommodate the sequestration funding reductions.

Question. The Ryan/Murray Bipartisan Budget-Conference Agreement reduced the impact of sequester on Defense by \$22 billion in fiscal year 2014 and \$9 billion in fiscal year 2015. As a result, the Department remains subject over \$30 billion in cuts in fiscal year 2014 and \$45 billion in cuts in fiscal year 2015. Under these constraints, how does the Department intend to continue to take steps to protect readiness?

Answer. The additional \$22 billion above the Budget Control Act cap level of funding provided in the Consolidated Appropriations Act for fiscal year 2014 does provide an opportunity to begin a limited recovery from the readiness problems in fiscal year 2013. While our fiscal year 2014 budget was not built to recover from a sequester we did not anticipate in fiscal year 2013, the services and other components will use that topline relief provided by the Bipartisan Budget Act to recover readiness where possible. However, readiness is a function of time and available trained personnel and other factors beyond funding, so there will still be continued challenges to achieve the level of training required to improve readiness. Priority will continue to be given to supporting deployed forces and taking care of our wounded warriors.

The Department will also continue the implementation of efficiencies where possible to reduce support costs. The Department appreciates the additional funding that was provided and will seek to maintain readiness at the highest possible level.

Question. Does the Department intend to protect readiness in its base budget request or does it intend to request readiness resources through an additional "investment fund" request that lies outside of the prescribed BCA caps?

Answer. The Department seeks to fund our essential readiness activities in our base budget. Because there are so many activities that enable readiness directly or indirectly, not all of which can be fully funded given constrained resources, it will probably always be possible to enhance readiness through additional investments if additional resources can be provided.

STRATEGIC REVIEWS

Question. What is your understanding and evaluation of the DOD's processes for strategic assessment, analysis, decisionmaking, and reporting for each of the following strategic reviews?

The Quadrennial Defense Review (QDR) (section 118 of title 10, U.S.C.);

Answer. The QDR is required by law and asks the Department to take a long-term look at the Defense Strategy and related issues. It is important that the Department periodically conduct an intensive review and assessment of the future national security environment and highlight the required priorities. The QDR is an important tool to inform the critical decisions that need to be made concerning future resource levels.

Question. The National Military Strategy (section 153 of title 10, U.S.C.);

Answer. Section 153 directs the Chairman of the Joint Chiefs of Staff to assist the President and Secretary of Defense in assessing the strategic and military risks in executing missions under the National Military Strategy (NMS). It is extremely important for the civilian leadership of the Department to get the best military advice possible on the military force's ability meet the goals and objectives addressed in our strategy.

Question. Global Defense Posture Review (section 2687a of title 10, U.S.C.);

Answer. The Global Defense Posture Review provides an analysis and recommendations concerning the current global defense posture strategy and the status of key overseas posture realignments. The current Asia-Pacific pivot has engendered an intensive look at the changes needed to realign our global posture to the new priorities. My view is that this review, led primarily by the Under Secretary of Defense (Policy) and the Chairman of the Joint Chiefs of Staff, provides a disciplined way to focus reviews of this nature and can be used to inform future resource decisions.

Question. The Quadrennial Roles and Missions Review (QRM) (section 118b of title 10, U.S.C.).

Answer. The QRM is required by law and the next one is due in 2016. The Department is in a very dynamic situation. As we complete the mission in Afghanistan and adjust to the current fiscal climate, I think it will be important to assess future roles and missions. The QRM provides an opportunity to assess the impact of the ongoing changes and what they mean for the roles and missions of all the Services. That said, as Comptroller I would not expect to be directly involved in this review.

Question. If confirmed, what recommendations would you make, if any, to change title 10, U.S.C., that would update, improve, or make these reviews more useful to the Department and to Congress?

Answer. We are in a period of enormous strategic uncertainty and fiscal pressure. We should use all the tools available to inform the difficult decisions that will need to be made over the next few years. The Department's leadership appreciates the need to conduct robust reviews to inform our decisions. I do not think any statutory changes are needed at this time to assist us in these efforts.

Question. If confirmed, what recommendations would you make, if any, to improve DOD's processes for strategic assessment, analysis, policy formulation, and decision-making relative to each review above?

Answer. Given the dynamic world security situation and our constrained and uncertain funding situation, DOD needs to periodically re-evaluate our plans, our program, and our budgets to meet our evolving challenges. Because we have to carry out so many essential missions for the Nation and have so many stakeholders, it is a complex and difficult process to revise our strategy, plans, and resource decisions. We will need a combination of all the above reviews, and more, to arrive at informed decisions going forward. If confirmed, I will work with all the Defense communities to ensure we make fact-based decisions in an inclusive, participatory manner.

Question. The law requires the QDR to identify the budget plan that would be required to provide sufficient resources to execute successfully the full range of missions called for in that national defense strategy at a low-to-moderate level of risk, and any additional resources (beyond those programmed in the current Future Years Defense Program) required to achieve such a level of risk. The law also requires the QDR to make recommendations that are not constrained to comply with and are fully independent of the budget submitted to Congress by the President.

What is your understanding and assessment of the Department's QDR analysis and decisionmaking processes to address these two requirements?

Answer. The QDR should do an assessment of all the factors impacting the national security strategy and outline a program that allows us to best meet our mul-

multiple goals with acceptable risk. I will provide my resource-informed advice and counsel in the development of the QDR.

Question. In your view, is there analytical and/or practical value in a defense strategy that is unconstrained by or independent of the current budget request or fiscal environment?

Answer. The Defense Department must be mindful of fiscal realities. It would not be useful to develop a national military strategy that is unaffordable. Like any other enterprise, the Department must be realistic in its assessment of available resources.

FUNDING FOR OVERSEAS CONTINGENCY OPERATIONS IN FISCAL YEAR 2014

Question. The fiscal year 2014 Consolidated Appropriations Act provided \$160 billion for base operation and maintenance (O&M) funding which was \$15 billion below the request. The Act funded slightly more than \$9 billion of the base O&M request with OCO appropriations. In total, net of all changes, the act provided \$68 billion for OCO O&M which was \$6 billion above the request.

Did the realignment of funding comport with OMB criteria for what constitutes an OCO item?

Answer. The fiscal year 2014 Consolidated Appropriations Act did fund readiness-related activities in the Overseas Contingency Operations budget. The Department will use this funding to begin the recovery from the readiness reductions experienced in fiscal year 2013. I am not aware of an OMB assessment of this act for compliance with existing criteria.

Question. Did the realignment of funds from base to OCO distort actual base requirements?

Answer. The realignment of funds will make it more difficult to make year-to-year comparisons. The need to reduce funding by approximately \$30 billion below our fiscal year 2014 request level due to the BCA caps, as amended by the BBA, and the uncertainty and late enactment of those changes, constituted the major difference between our request and final enacted appropriations.

FUTURE FUNDING FOR OVERSEAS CONTINGENCY OPERATIONS

Question. With the end of a U.S. military role in Iraq, and the forthcoming end to U.S. combat operations in Afghanistan, when do you anticipate it will be possible to end the requirement for a separate budget request for overseas contingency operations?

Answer. The future of our separate overseas contingency operations (OCO) budget can and should be examined once the timing and circumstances of our enduring presence in Afghanistan becomes clear. Sufficient funding needs to be provided until all forces have redeployed from the theater and the retrograde of the equipment is complete. The Department has also emphasized that it will take at least 2–3 years subsequent to the end of major combat operations to repair and replace the equipment degraded, damaged, or destroyed as a result of combat operations. The OCO budgets have gone down significantly in recent years, but we must be cautious not to end funding prematurely before the mission is complete in all its phases.

PHASING OF MILITARY CONSTRUCTION PROJECTS

Question. In some cases, the Department has proposed phasing, as opposed to incrementing, some large military construction projects over multiple fiscal years even when each distinct phase does not satisfy the overall requirement of the Department. For example, the Army has proposed construction of a Command and Control Facility at Fort Shafter, HI, over five distinct phases. It has been shown that phasing large military construction projects, rather than requesting a single authorization for the complete facility and then seeking incremental authorization of appropriations over multiple fiscal years, can result cost growth of 10 percent or more if all phases are executed independently.

Do you believe phasing, as opposed to incrementing, large military construction projects is appropriate? If so, when?

Answer. It is the administration's policy that military construction projects should normally be fully funded. I am supportive of the policy. Phasing requires that each phase of a large military construction effort be a complete and usable segment of the facility. When those segments have different time sensitivities, phasing can help the Department to better balance competing critical requirements by not tying up limited budgetary resources ahead of the actual need for a segment. For example, in the case of the Command and Control Facility at Fort Shafter, HI, the military construction effort replaces over 10 separate World War II facilities, which are dispersed across the installation. The personnel occupying those dispersed, aging facili-

ties will move into the newly constructed segments as they are completed, while continuing operations.

Question. Do you believe phasing of large military construction projects can be justified even when it results in cost growth for the complete facility? If so, how?

Answer. The phasing of a military construction effort allows more flexibility to respond to any changes to the requirement over time, provides more flexibility to future administrations to address their priorities, and provides more opportunity for oversight by the Department and the congressional committees. That said, our policy is to fully fund our construction projects unless there is a compelling reason to do otherwise.

While the full funding of military construction projects is the administration's policy, as previously noted, there is an exception process to also allow for incremental funding of projects that have a very high cost and demonstrated major national security impact. Sometimes, incrementally funding a project can be a better fit for very large, complex military construction efforts or when the project is time sensitive, as incrementally funded projects are not subject to new start prohibitions under a continuing resolution and can continue with little or no disruption. For example, the Department is incrementally funding a very large and complex hospital replacement project at Landstuhl, Germany.

BASE REALIGNMENT AND CLOSURE

Question. DOD has requested another Base Realignment and Closure (BRAC) round.

Do you believe another BRAC round is necessary? If so, why?

Answer. Yes. It has been nearly a decade since the last base closure round in 2005, and much has changed in that time. Furthermore, the funding caps in the Budget Control Act of 2011 mean the Department faces a period of constrained resources through at least 2021. Decreasing budgets mean force structure reductions are needed, which is a primary reason why we must eliminate excess infrastructure to avoid wasting resources maintaining unnecessary facilities—resources that that could be much better spent on readiness and modernization.

Question. It has been noted repeatedly that the 2005 BRAC round resulted in major and unanticipated implementation costs and saved far less money than originally estimated.

Answer. The 2005 BRAC round was an anomaly—the only round conducted while our force structure was growing. It focused on transformation, jointness, and relocating forces from overseas to the United States. Additionally, during the implementation phase, Congress added extra requirements to medical facilities that added to the program cost.

Question. What is your understanding of why such cost growth and lower realized savings have occurred?

Answer. There were two types of BRAC in 2005: a “transformation” BRAC that had implementation costs of \$29 billion and resulted in a small portion of the savings, and an “efficiency” BRAC that cost \$6 billion and had an annual payback of \$3 billion, accounting for most of the \$4 billion total recurring savings from that round. The movement of Army brigades from Europe to the United States in that round is an example of a transformation move that had substantial costs.

Question. How do you believe such issues could be addressed in a future BRAC round?

Answer. Our intent is to conduct a future BRAC round similar to the 1993 or 1995 rounds in which DOD cut excess capacity and achieved a relatively quick payback.

REPEAL OF COLA REDUCTION FOR CERTAIN MILITARY PENSIONS

Question. The Bipartisan Budget Act included a provision that reduces the cost-of-living adjustment (COLA) made annually to military retired pay to 1 percent below the annual rise in the Consumer Price Index for working-age military retirees. The Consolidated Appropriations Act amended that provision to exclude disability retirees and their survivors. Deputy Secretary Fox and Admiral Winnefeld testified that the Services will save \$500 million per year in their discretionary budgets owing to reduced contributions to the Military Retirement Fund as a result of this change.

Will the Services realize any of these savings in 2014?

Answer. No. The actuarial valuation and determination processes detailed in chapter 74 of title 10 U.S.C., do not allow for adjustments to the normal cost contribution accrual percentages after the start of a fiscal year. Therefore, since the Bipartisan Budget Act was not enacted prior to the start of fiscal year 2014, the ear-

liest adjustments to the Department's normal cost contribution accrual rates can be made is at the beginning of fiscal year 2015.

Question. If Congress were to repeal the COLA reduction for working age military retirees but desire to retain the discretionary budget savings the reduction affords, would the security caps under the Budget Control Act have to be raised by \$500 million per year?

Answer. If Congress repealed the COLA reduction for working age military retirees, the Department would have to fund an additional \$500 million contribution to the Military Retirement Fund. These funds would have to come from other DOD programs to remain within the BBA cap unless Congress provided relief from that cap.

Question. Would repealing the COLA reduction affect the additional budget authority provided by the Bipartisan Budget Act to the Department for fiscal years 2014 and 2015?

Answer. If the COLA reduction were simply repealed, the BBA caps would be unaffected. However, the Department would lose the accrual savings described above and thus have fewer resources available to devote to other needs within the BBA caps.

RISING COSTS OF MEDICAL CARE

Question. The President's budget request for the Department's Unified Medical Program has grown from \$19 billion in fiscal year 2001 to \$49.4 billion in fiscal year 2014. In recent years, the Department has attempted to address this growth through fee increases for military retirees, while also attempting to identify and implement other means to ensure the viability of the military health system in the future.

What is your assessment of the long-term impact of rising medical costs on future DOD plans?

Answer. Health care consumes nearly 10 percent of the Department's budget and could grow considerably over the next decade, putting even more pressure on our ability to invest in enhanced warfighting capability. I realize the healthcare benefit is a key component of retention for our men and women, so I will continue to work closely with other senior military and civilian leaders in the Department to find reasonable and responsible ways to stem this growth.

Question. What additional cost saving measures has the Department considered other than raising enrollment fees and pharmacy co-pays?

Answer. Controlling health care costs is a priority for the Department. A continual emphasis is placed on achieving savings and efficiencies within the operational environment of the Military Health System. This has been a success story, with roughly \$3 billion in savings per year achieved through programs like Federal Ceiling Pricing (a discount drug program), implementing the Outpatient Prospective Payment system (a transition to more favorable Medicare rates for private hospitals), medical supply chain optimization and standardization, and increased efforts to detect fraud, waste, and abuse from fraudulent providers and institutions.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Under Secretary of Defense (Comptroller)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOE MANCHIN

HEFTY BANK FEES FOR SERVICEMEMBERS

1. Senator MANCHIN. Mr. McCord, the Wall Street Journal published an article on January 15, 2014, that described hefty bank fees for servicemembers. My office has been in contact with the Office of Financial Management and Comptroller and I am familiar with the 2011 investigation report. Are you familiar with the news article's claim and the Army financial investigation report?

Mr. MCCORD. Yes. I am aware of the Wall Street Journal article and the reference to the Army's review.

2. Senator MANCHIN. Mr. McCord, do you agree with the Wall Street Journal's claim?

Mr. MCCORD. I'm concerned about any allegations that our servicemembers are being unfairly treated, and we are reviewing this issue. I would prefer to have the benefit of that additional review before reaching final conclusions on this matter.

3. Senator MANCHIN. Mr. McCord, would the Department of Defense (DOD) be willing to work with civilian financial regulatory agencies to create banking products that are tailored for servicemembers and to help them avoid unnecessary fees and charges?

Mr. MCCORD. The Department takes seriously any practice, including financial products or services, that take unfair advantage of our servicemembers and their families. While DOD does not have the expertise to create new military-unique banking products, it does make sense, as you suggest, for the Department to work with other entities, such as financial institutions and bank regulators, who may have that expertise to seek improvements to financial products, services, or regulations, in addition to making sure our personnel are educated about existing policies, fees, services, and regulations.

4. Senator MANCHIN. Mr. McCord, what additional measures would you suggest to reduce these large numbers of unnecessary bank fees that servicemembers are disproportionately incurring?

Mr. MCCORD. The commercial financial institutions operating on DOD installations must abide by applicable Federal and State banking laws for commercial banking activities. Any additional measures related to fees, disclosure policies, or commercial banking activities should come from these Federal and State authorities.

There is also an element of personal responsibility that must be reinforced. To ensure our servicemembers and their families have access to financial management education, the Services' Family Support/Community Centers provide financial counseling, as well as conduct workshops on subjects such as money management, budgeting, consumer awareness, home buying, investment strategies, predatory lending, and savings. In addition, financial institutions on military installations are required to provide financial education to any servicemember, even if they are not a customer. The Department should assess whether our financial education programs are addressing this particular problem adequately so that our servicemembers can be as well educated as possible on how to recognize and avoid such fees.

QUESTIONS SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

DEFENSE FINANCE AND ACCOUNTING SERVICES

5. Senator GILLIBRAND. Mr. McCord, you said during your nomination hearing that as the client, it is the Army that is looking at a proposal to change its requirements from the Defense Finance and Accounting Services (DFAS) as part of an effort to restructure the Army's financial enterprise. As Under Secretary of Defense (Comptroller), part of your responsibility will be to oversee DOD's financial policy, financial management systems, and business modernization efforts. Can you please clarify for me who has oversight over this current proposal and over DFAS's role, responsibilities, and functions?

Mr. MCCORD. The Under Secretary of Defense (Comptroller) has oversight of the DFAS. However, in this case, the Army is undertaking a review of the work that DFAS performs for it, as part of a broader review of Army business practices. As the customer, the Army reimburses DFAS for the work that is accomplished at DFAS's location in Rome, NY.

Although I am aware that the Army is reviewing its business practices to seek efficiencies, as stated during the hearing, I am unaware of any Army decisions at this time that would reduce the workload that is conducted by DFAS in Rome, NY.

6. Senator GILLIBRAND. Mr. McCord, this plan could severely impact the civilian employees currently working at DFAS sites like the one in Rome, NY, who ensure the centralization, professionalism, and efficiency of DOD accounting. I believe DFAS is a logical focal point to ensure that DOD has independent accountants developing standardized, auditable records. What is your vision for DFAS's role and functions?

Mr. McCORD. DFAS does and will continue to play an important role to standardize, consolidate, and improve accounting and financial functions throughout the DOD. The goal is to reduce the cost of the Department's finance and accounting operations while strengthening its financial management. If confirmed, I will continue to seek opportunities to strengthen the roles and functions of DFAS and ensure its operations are efficient and effective. Any changes to operations at any of the DFAS sites should be designed to meet mission requirements in the most efficient and effective way, from a corporate DOD perspective.

7. Senator GILLIBRAND. Mr. McCord, I am concerned that I had to hear about the impact to my State through back channels. Do I have your assurance that my office will be kept apprised of all future actions relating to changes in the DFAS mission and force structure?

Mr. McCORD. If confirmed, I will keep you and your staff apprised of any changes with respect to DFAS mission and force structure.

QUESTIONS SUBMITTED BY SENATOR MAZIE K. HIRONO

DEPARTMENT OF DEFENSE SEQUESTRATION CUTS

8. Senator HIRONO. Mr. McCord, the Bipartisan Budget Agreement (BBA) reduced the impact of sequestration by \$22 billion in fiscal year 2014 and \$9 billion in fiscal year 2015. With this additional funding as a result of this agreement, how will DOD prioritize readiness funding levels for these fiscal years—by program or capacity, and what will the readiness impacts be for fiscal year 2016, should sequestration remain a reality?

Mr. McCORD. While readiness concerns remain, the President's budget offers a deliberate and responsible approach that puts us on a path to restore readiness, while maintaining a force large enough to fulfill our defense strategy, though with some risk for some missions. If sequestration funding levels should remain in place in 2016 and out, we will have to make some very difficult decisions. This will most likely result in a smaller force that will be less ready, less modern, and less capable. Were we to go back down to sequestration funding levels in fiscal year 2016, we would also waste much of the effort and resources we will devote in fiscal year 2014 and 2015 to recovering from the readiness problems resulting from the fiscal year 2013 sequester.

ALTERNATIVE ENERGY AND RESEARCH DEVELOPMENT

9. Senator HIRONO. Mr. McCord, as alternative energy research continues, there appear to be opportunities for reducing our reliance on petroleum. What is DOD's fiscal strategy for investment priorities in operational energy improvements and in particular, ones that impact Hawaii?

Mr. McCORD. The President's 2014 budget included \$2.6 billion for operational energy initiatives, 88 percent of which was to reduce the demand for energy in military operations, and 12 percent of which was to increase the supply of energy for operations. These initiatives include new and ongoing investments in energy efficiency, propulsion improvements, energy storage, new materials, unmanned systems, and alternative energy sources, such as high-efficiency solar and waste-to-energy. The goal of these efforts is to ensure that our Armed Forces have the energy they require to meet our 21st century defense challenges. These investments are primarily meant to increase military capabilities and effectiveness. While I cannot predict the precise extent to which they will benefit the broader energy security challenges we face as a Nation, these technologies hold promise for potential cross-over applications in our civilian economy, including in Hawaii.

QUESTION SUBMITTED BY SENATOR TIM KAINE

DEPARTMENT OF DEFENSE SEQUESTRATION CUTS

10. Senator KAINE. Mr. McCord, the Budget Control Act (BCA) originally placed DOD under reduced discretionary spending caps that have since been adjusted by the American Taxpayer Relief Act (ATRA) and the BBA. These across-the-board cuts have had significant negative implications for readiness, operational capacity, and our military personnel and their families. Fortunately, the President's budget request for fiscal year 2015 aims to ease the strain on DOD by \$26 billion in 2015 and \$115 billion over the next 5 years. Considering the adjustments that have been made with respect to ATRA and BBA, and with the proposed cap adjustments in the President's fiscal year 2015 budget request, how much of the original sequestration cuts is DOD proposing to absorb?

Mr. McCORD. The sequestration level reductions required by the BCA of 2011 between fiscal year 2013 and fiscal year 2019 were nearly \$400 billion compared to the President's budget for fiscal year 2013. The changes to the original BCA which were enacted by Congress for fiscal year 2013, 2014, and 2015 increased the Department's budget above the original sequestration levels by approximately \$50 billion. The Department's President's budget fiscal year 2015 would provide an additional \$115 billion above sequestration levels for fiscal year 2016 to fiscal year 2019.

While the relief provided in fiscal years 2014 and 2015 is helpful in supporting readiness and some procurement accounts, if nothing is done to eliminate sequestration in fiscal year 2016 and beyond, the Department could still see up to 80 percent of the original BCA sequestration level reductions. This will directly impact the current and future readiness of our Armed Forces.

 QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

AUDIT

11. Senator INHOFE. Mr. McCord, currently, there is an argument in DOD over whether to include valuations of property as part of the audit which is required to be completed in fiscal year 2018. Though establishing the value of a company's property is critical in the private sector, the benefit of ascertaining the value of property owned by DOD has much less significance. For example, what is gained by establishing the value of a destroyer? In addition, the amount of work to establish the value of each piece of DOD's equipment is a herculean enterprise sure to require vast numbers of auditors and could delay the timely completion of the audit. What is gained by DOD establishing the value of all of its property?

Mr. McCORD. In order to achieve a clean opinion, DOD must adhere to Federal financial accounting standards, which require that capital property be fairly valued. The current standards mandate that Federal agencies report property and equipment assets at full acquisition cost. The Department has recently published equipment valuation guidance, which provides various options for valuing our assets and costs associated with this effort. We will meet with each of our components to determine which options work best within their standard business processes. The Department is committed to meet its audit goals, including verifying the existence, completeness, location, and status of all equipment assets, which will provide assurance of physical control of assets, stewardship, and the information that is most meaningful to the management and our stakeholders, while also doing this in a cost-effective way.

12. Senator INHOFE. Mr. McCord, why do we need to know the monetary value of each ship, truck, and aircraft in the inventory?

Mr. McCORD. In most cases, we do not need to know the value of this kind of equipment to perform our mission. However, we do need to know depreciated value and remaining useful life of an asset as we make decisions such as disposition for equipment in theater. Additionally, to ensure that we are auditable and meet Federal accounting standards, our current plan is to first compute values on our newer, high value assets using actual costs or the estimating methodologies that are now permitted. Older assets will be valued if deemed necessary. The current value of the Department's property plant and equipment represents more than 71 percent of the property, plant, and equipment values reported for the entire Federal Government. To omit the Department's equipment values would therefore impact the Federal Government's overall consolidated annual financial statements, as well.

13. Senator INHOFE. Mr. McCord, will that enable DOD to make better business decisions or enhance our support of the warfighter?

Mr. MCCORD. Verifying the existence, completeness, location, and status of our property and equipment in support of the upcoming financial audit is expected to provide valuable information to help inform decisions on priorities for refurbishment, replacement, or obsolescence of that property and equipment. The valuation of this property, which is harder than verifying existence and completeness, is less useful to us, but is required by current accounting standards. Modifications to current accounting standards to address the concerns you raise would require a dialogue and consensus among the Department, Congress, the Office of Management and Budget, the Government Accountability Office, and the Federal Accounting Standards Advisory Board.

14. Senator INHOFE. Mr. McCord, won't we have to employ vast number of auditors to make these valuation determinations?

Mr. MCCORD. The Department is studying the cost of making and auditing property and equipment values. Auditors will verify not only the estimated value, but also the existence of our property, whether we have inventoried and reported all of our equipment and property, and whether we own or have the right to use that property. Valuation is only one element in the audit of property, plant and equipment. I agree that the valuation aspect of auditability will require a significant investment of time and resources, not just by auditors, but by many people across the Department, to include the logistics community. However, I recognize the importance of this information in reaching full auditability as required by law. If confirmed, I will work the committee and other interested parties to meet the requirements as they stand, and to discuss whether modifications to those requirements would be cost-effective and better serve the interests of the taxpayer and the Federal Government.

15. Senator INHOFE. Mr. McCord, when Congress has concerns about DOD meeting the statutory goals of audit readiness, should we not devote more of our resources to achieving the core of the requirement?

Mr. MCCORD. The Department currently devotes considerable resources to audit readiness, focusing first and foremost on our core requirements of our budget statements and then existence and completeness of assets. It will require significant additional resources in the coming years to fully meet our goals. We are committed to achieving full auditability, but given the Department's constrained resources, I share the concern that the resources we will have to devote to the valuation effort could be considerable and will come at the expense of other DOD needs. I am particularly concerned about our ability to meet all the Department's needs, including this one, should we return to the sequestration-level funding caps again in fiscal year 2016.

TRICARE FEES

16. Senator INHOFE. Mr. McCord, for many years, the military associations and veterans' service organizations vigorously opposed TRICARE fee increases, but in the NDAAs for Fiscal Years 2012 and 2013, Congress authorized increases to TRICARE enrollment fees and pharmacy co-pays based on annual military retired pay cost-of-living adjustments. In this current budget environment, will more TRICARE fee increases alone sustain the great health benefit that military retirees and their families have today?

Mr. MCCORD. Given the significant fiscal pressures the Department faces over a sustained period, as exemplified by the restrictions of the BCA of 2011, no single policy or savings proposal will generate the kind of savings we need. However, increases in co-pays for pharmaceuticals and implementing an enrollment fee for new TRICARE-for-Life beneficiaries would go a long way in helping to sustain the great health benefits that military retirees and their families have today while freeing up funds badly needed for training and maintenance. In the past, Congress has permitted small increases in the TRICARE Prime enrollment fees for working age retirees and some adjustments to retail and mail order pharmacy co-pays, but more needs to be done.

17. Senator INHOFE. Mr. McCord, I believe Congress, DOD, and beneficiaries—all of us—must share the responsibility for helping to control health care costs. What can DOD and its beneficiaries do, either separately or together, to help control the rapid growth in DOD's health care costs?

Mr. MCCORD. I agree, this is an area where the Department's leadership, Congress, our beneficiaries and providers, including our private sector partners, all need to work together. In the fiscal year 2015 budget, DOD proposes replacing the current three TRICARE plans with a consolidated TRICARE Health Plan starting in 2016 for about 3.3 million retirees under age 65 and about 2.1 million Active-Duty family members, while implementing new military treatment facility (MTF) fees and other fee increases. The proposed TRICARE reforms include higher copays designed to ensure that the quality of health care is not compromised, while allowing the Department to sustain an efficient and cost effective health care system.

The Department remains committed to ensuring any proposed changes keep faith with those who are serving, but this means more than just maximizing their benefits at the expense of everything else.

We all have a solemn responsibility as well to make sure our people are trained and equipped to do the missions we send them to do on behalf of the Nation.

18. Senator INHOFE. Mr. McCord, in the President's budget request last year, DOD proposed increases in TRICARE fees and co-pays again, but Congress didn't authorize those increases. In a few weeks, I imagine that DOD will send over more TRICARE proposals with the President's fiscal year 2015 budget request. If Congress doesn't agree with the administration's TRICARE proposals in the fiscal year 2015 budget request, what is your plan to make up the resulting large budget deficit resulting from the savings you assumed in the Defense Health Program budget?

Mr. MCCORD. To adequately fund readiness and modernization under constrained budgets, we have to slow the growth in military compensation. Our budget balances the need to protect our national security with the need to be realistic about the resources we can expect. If Congress chooses not to support our TRICARE proposals, our readiness and modernization accounts will be significantly affected, and ultimately we will probably need to further reduce the size of our force to keep whatever force we can afford trained and ready.

19. Senator INHOFE. Mr. McCord, if you have to move operation and maintenance (O&M) funds from the Services' budgets to the Defense Health Program O&M account to pay for incurred health care costs, how will that impact the readiness of the force?

Mr. MCCORD. Increases in health care spending will largely come at the expense of readiness spending, which would be detrimental to the Department's ability to carry out its missions.

20. Senator INHOFE. Mr. McCord, if confirmed as Comptroller, what role would you have in implementing necessary oversight measures for the responsible use of Government resources?

Mr. MCCORD. If confirmed, I expect to have a significant role in reviewing, implementing, and as required, recommending changes to policies and procedures to ensure the responsible use of Government resources. I will work closely with the Deputy Chief Management Officer, the Under Secretaries of the military departments, and other senior leaders to support the Secretary and Deputy Secretary in carrying out the Department's missions efficiently and effectively and in accordance with laws and regulations that govern the use of the Department's funds.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

A-10 COST SAVINGS

21. Senator AYOTTE. Mr. McCord, based on your current position as Principal Deputy Under Secretary of Defense (Comptroller), as well as the position for which you are nominated—Under Secretary of Defense (Comptroller)—could you please clarify the number Secretary Hagel cited on February 24 (\$3.5 billion) for potential A-10 savings?

Mr. MCCORD. The savings from retirement of the A-10 fleet by fiscal year 2019 is approximately \$3.7 billion. The response to question 88 provides additional detail on how those savings are achieved. If the cost avoidance to replace wings for 100 aircraft (\$500 million) is factored in, the total savings would be approximately \$4.2 billion over the Future Years Defense Program.

22. Senator AYOTTE. Mr. McCord, how will the Air Force specifically achieve that \$3.5 billion in savings? Please provide an annual breakdown by Program, Project, and Activity (PPA).

Mr. McCORD. The below table provides the breakdown for the \$3.7 billion savings specified in the response to question #21.

**A-10 FY15 PB FYDP Savings
(In Thousands)**

APPN CODE	APPN DESCRIPTION	BAC CODE	BAC DESCRIPTION	SAG	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019	FYDP Total

23. Senator AYOTTE. Mr. McCord, for any A-10 related funds that the Air Force claims as savings, please provide a detailed explanation of how the Air Force (not just the A-10 program) will no longer incur the expense. For example, for savings related to contract personnel or organic depot maintenance costs, can you confirm that the cost associated with that workload will not be transferred to other Air Force activities but represents sustaining activities that can actually be terminated?

Mr. McCORD. It is my understanding that the costs associated with that workload would be eliminated, and represent a savings to the Air Force. Depot maintenance requirements are determined based upon individual weapon system needs. As aircraft are retired they will no longer require depot activities, such as engine overhauls, aircraft heavy maintenance, and spare parts. As a result, the cost of the activities associated with that workload would not be incurred.

24. Senator AYOTTE. Mr. McCord, for A-10 personnel costs associated with Air Force personnel (organic depot maintenance), can you confirm that those personnel will no longer be employed with the Air Force as a result of losing this specific workload, and will not simply be transferred to other Air Force activities?

Mr. McCORD. Although the Air Force would be better suited to provide specific details, I understand that the overall size of the depot workforce is expected to decrease when the A-10 is retired. Given the fiscal pressures the Department faces due to the BCA of 2011, any savings that can be realized, whether in manpower, operating costs, or modernization costs, will generally be applied to meeting these constrained topline. Although some employees who support or maintain the A-10 may seek retraining or reassignment to other Air Forces systems, while others may retire or leave Federal service, I do not think it is possible to know enough about the portability of the skill sets of all such employees in a way that would allow a comprehensive answer to this question.

25. Senator AYOTTE. Mr. McCord, please provide a comprehensive list of which contracts would be terminated. In other words, for the \$3.5 billion number please differentiate between actual savings to the overall Air Force budget, and simply moving expenses to other Air Force accounts.

Mr. McCORD. The \$3.5 billion of potential savings Secretary Hagel referenced is associated with operating and support (O&S) funding for the A-10 as set out in the response to question #22. As was previously mentioned in other responses, these potential savings to the A-10 program can be broken down into the following cost elements: Military Personnel (\$1.47 billion), Flying Hours (\$1.51 billion), and Weapon System Sustainment (WSS) (\$0.70 billion). The total of these elements sum to \$3.68 billion in O&S savings across the Future Years Defense Program from divestiture of a 283-aircraft fleet.

Because there are no contracts associated with the Personnel and Flying Hours elements, this response will address the contracts associated with the WSS element. These contracts are funded with the O&M appropriation and are usually 1-year efforts, with follow-on option years that may be exercised at the government's discretion. It is my understanding that as the Air Force executes its A-10 divestiture plan, it will take appropriate contracting actions. In some cases, the Air Force may decide not to exercise future options on existing contracts. In instances where ongoing contracted work is underway, the Air Force may reduce the scope of those contracts. Finally, in instances where the Air Force was planning to award new contracts, such contracts may no longer be required.

Although the Air Force is better suited to address all the specific items that fall within this element, I am aware of the following information:

Full Mission Trainer (<\$27 million/year): The current contract runs to fiscal year 2016 and can be scaled back to required work; the follow-on contract will also be scalable with base plus option years;

Pacific Air Forces (PACAF) Depot Support (5 year/\$40 million cap, the Air Forces only pays for work required): The current contract runs out 30 Sep 2014 with a 6-month extension option. A new contract has gone out for proposals that will only carry cost if PACAF A-10s require depot maintenance;

Sustaining engineering contracts: These are scalable efforts to monitor fleet health and maintain fleet safety of flight; these provide support to meet Operational Safety Suitability and Effectiveness mandatory requirements;

Aircraft Structural Integrity Program (ASIP) - Legacy (value varies by year);

ASIP - Modernization (value varies by year);

Reliability Center Maintenance Contract (value varies by year).

The Air Force is best suited to provide additional details if required.

26. Senator AYOTTE. Mr. McCord, please provide a revised number for the potential A-10 divestment that reflects what the Air Force—not just A-10 PPAs—would no longer expend.

Mr. McCORD. Please refer to the response to question #22.

[The nomination reference of Hon. Michael J. McCord follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 30, 2014.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Michael J. McCord, of Ohio, to be Under Secretary of Defense (Comptroller), vice Robert F. Hale.

[The biographical sketch of Hon. Michael J. McCord, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF MICHAEL JOHN MCCORD

Education:

The Ohio State University

- September 1977–June 1981
- Bachelor of Art in Economics with honors in Liberal Arts

The University of Pennsylvania

- September 1981–May 1984
- Master of Arts in Public Policy

Employment Record:

Department of Defense

- Principal Deputy Under Secretary of Defense (Comptroller)
- January 2009–Present

U.S. Senate

- Professional Staff Member, Committee on Armed Services
- March 2004–January 2009

U.S. House of Representatives

- Budget Analyst, Committee on the Budget
- January 2003–February 2004

U.S. Senate

- Professional Staff Member, Committee on Armed Services
- January 1987–January 2003

Congressional Budget Office

- Assistant Analyst
- December 1984–January 1987

Honors and awards:

Federal Civilian Awards

- Department of Defense Medal for Distinguished Public Service (Bronze Palm), February 2013
- Department of Defense Medal for Distinguished Public Service, October 2011

Academic Awards

- National Merit Scholarship, The Ohio State University, 1977–1981
- Member, Phi Beta Kappa, The Ohio State University, 1981

Fellowships

- Stennis Congressional Staff Fellow, 110th Congress, The Stennis Center for Public Service Leadership, 2007–2008

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Hon. Michael J. McCord in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Michael John McCord.

2. **Position to which nominated:**

Under Secretary of Defense (Comptroller).

3. **Date of nomination:**

January 30, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

January 23, 1959; Marion, OH.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Donna Miller Rostant.

7. **Names and ages of children:**

Alejandra E. McCord, 28 (child).

Meredith J. McCord, 26 (child).

Joseph F. Slade IV, 27 (step-child).

Andrew T. Slade, 25 (step-child).

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

River Valley High School, Marion, OH, Fall 1972–Spring 1977, high school degree received May 1977.

The Ohio State University, September 1977–June 1981, Bachelor of Art in Economics with honors in the liberal arts, June 1981.

The University of Pennsylvania, September 1981–May 1984, Master of Arts in Public Policy, May 1984.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

January 2009–present, Principal Deputy Under Secretary of Defense (Comptroller), U.S. Department of Defense, The Pentagon, Washington DC.

March 2004–January 2009, Professional Staff Member, Committee on Armed Services, U.S. Senate, Washington DC (also January 1987–January 2003).

January 2003–February 2004, Budget Analyst, Committee on the Budget, U.S. House of Representatives, Washington DC.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Department of Defense, Principal Deputy Under Secretary of Defense (Comptroller), January 2009–present.

U.S. Senate, Professional Staff Member, Committee on Armed Services, March 2004–January 2009.

U.S. House of Representatives, Budget Analyst, Committee on the Budget, January 2003–February 2004.

U.S. Senate, Professional Staff Member, Committee on Armed Services, January 1987–January 2003.

Congressional Budget Office, Assistant Analyst, December 1984–January 1987.

President-Elect's Transition Team, Department of Defense Agency Review Team, The Pentagon, Washington DC, November–December 2008 (on detail from the Senate Armed Services Committee staff).

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Unitarian Universalists for Social Justice, Washington DC. Board Member.

Member, American Society of Military Comptrollers, Alexandria, VA.

Member, Reston Runners, Reston VA.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

My cumulative 2009–2013 contributions to any entity of \$100 or more are:

- Obama for America Presidential campaign, \$1,075
- Democratic Senatorial Campaign Committee, \$965
- Democratic National Committee, \$705
- Fairfax County (VA) Democratic Committee, \$635
- Democratic Party of Virginia, \$570
- Democratic Congressional Campaign Committee, \$540
- Virginia Inaugural Ball 2013, \$500
- McAuliffe for Governor (VA), \$450
- Kaine for Senate (VA), \$450
- Friends of Mark Warner, \$200
- Ohio Democratic Party, \$200
- Deeds for Governor (VA), \$120

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

- National Merit Scholarship, The Ohio State University, 1977–1981
- Member, Phi Beta Kappa, The Ohio State University, 1981
- Stennis Congressional Staff Fellow, 110th Congress, The Stennis Center for Public Service Leadership, 2007–2008
- Department of Defense Medal for Distinguished Public Service, October 2011
- Department of Defense Medal for Distinguished Public Service (Bronze Palm), February 2013

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Congressional Testimony:

- Written testimony to the House Small Business Committee regarding the potential impact of sequestration on small business, September 20, 2012.
- Written testimony to the Senate Committee on Homeland Security and Governmental Affairs, Subcommittee on Federal Financial Management, Government Information, Federal Services, and International Security, hearing on termination of the C-17 aircraft, July 13, 2010.

Speeches and Presentations:

I have given several speeches during the last 5 years. A list of all speeches is provided. Copies of three representative speeches are provided, and additional speeches can be made available upon request.

- Public Contracting Institute, Washington, DC, April 18, 2013. Roundtable discussion was on the record but I had no prepared remarks.
- AGA Conference, San Diego, CA, July 30, 2012
- ASMC Regional PDI, Washington DC, March 22, 2012
- Credit Suisse conference, New York, NY, November 30, 2011
- AGA/ASMC Regional PDI Conference, Honolulu, HI, August 17, 2011 (two presentations)
- ASMC National PDI, Minneapolis, MN, June 2, 2011
- AICPA, Washington, DC, August 16, 2010
- Credit Suisse conference, Arlington VA, June 10, 2010
- ASMC National PDI, Orlando FL, June 4, 2010
- DOD Managers Internal Controls Programs conference, Washington, DC, November 24, 2011
- Remarks on DOD Budget and Financial Management Priorities to the Association of Government Accountants/American Society of Military Comptrollers Professional Development Institute Conference, Honolulu, HI, October 14, 2009. (previously provided for 2010 confirmation) .

17. Commitments regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MICHAEL J. MCCORD.

This 10th day of February, 2014.

[The nomination of Hon. Michael J. McCord was reported to the Senate by Chairman Levin on March 26, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 12, 2014.]

[Prepared questions submitted to Ms. Christine E. Wormuth by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? Answer. I believe there is no need to modify the provisions of the Goldwater-Nichols Act at this time. The Act was a very significant piece of legislation that, over the course of more than two decades, has led to dramatic improvements in the effectiveness of the Armed Forces. Based on my experience since 2009, there is not a need for changes in the near term.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Please see my response above.

DUTIES OF THE UNDER SECRETARY OF DEFENSE FOR POLICY

Question. Section 134 of title 10, U.S.C., provides that the Under Secretary of Defense for Policy (USD(P)) shall assist the Secretary of Defense in preparing written policy guidance for the preparation and review of contingency plans, and in reviewing such plans. Additionally, subject to the authority, direction, and control of the Secretary of Defense, the Under Secretary shall have responsibility for supervising and directing activities of the Department of Defense (DOD) relating to export controls. Further, subject to the authority, direction, and control of the Secretary of Defense, the USD(P) is responsible for overall direction and supervision for policy, program planning and execution, and allocation and use of resources for the activities of DOD for combating terrorism.

Department of Defense Directive 5111.1 reiterates these duties and specifically notes that the USD(P) is the principal staff assistant and advisor to the Secretary of Defense and the Deputy Secretary of Defense for all matters on the formulation of national security and defense policy and the integration and oversight of DOD policy and plans to achieve national security objectives.

What is your understanding of the duties and functions of the USD(P) under current regulations and practices?

Answer. If confirmed, I would perform the duties set forth in title 10 and the Department of Defense Directive. The USD(P) serves as the principal staff assistant and advisor to the Secretary and Deputy Secretary of Defense for all matters concerning the formulation of national security and defense policy as well as the integration and oversight of DOD policy and plans to achieve national security objectives. Specifically, the USD(P) directly supports the Secretary of Defense in the interagency process, dealings with foreign counterparts, developing strategy and planning guidance for the Planning, Programming, Budgeting, and Execution (PPBE) process, providing policy oversight of current operations, and guiding the development and review of contingency plans. He or she is the Secretary's principal policy advisor on the use of the U.S. military and its adaptation for future missions.

Question. What is your understanding of the responsibilities of the USD(P) in combating terrorism, in particular as differentiated from those of the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict?

Answer. The Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (ASD/SOLIC) functions under the authority, direction, and control of the USD(P) in combating terrorism. More broadly, the ASD(SO/LIC) is defined in title 10 as the principal civilian advise to the Secretary of Defense on special operations and low intensity conflict matters.

Question. Assuming you are confirmed, what additional duties and functions do you expect that the Secretary of Defense would prescribe for you?

Answer. If confirmed, I will discuss with Secretary Hagel how the Office of the Secretary of Defense (OSD) Policy organization and I can best support him, including whether there are any duties and functions he would prescribe beyond those set forth in section 134(b) of title 10, and the Department of Defense Directive for USD(P). At this time, I have not identified any such additional duties and functions.

Relationships

Question. What is your understanding of the relationship between the USD(P) and each of the following?

The Secretary of Defense.

Answer. The USD(P) serves as the principal staff assistant and advisor to the Secretary of Defense for all matters concerning the formulation of national security and defense policy and the integration and oversight of DOD policy and plans to achieve national security objectives. The USD(P) provides policy support to the Secretary in interagency fora (such as National Security Council deliberations), in engagement with international interlocutors, and in the PPBE processes inside the Department, including the Quadrennial Defense Review (QDR), the Nuclear Posture Review, and annual program and budget reviews.

Question. The Deputy Secretary of Defense.

Answer. The Under Secretary for Policy provides similar support to the Deputy Secretary as described above.

Question. The other Under Secretaries of Defense.

Answer. The Under Secretary for Policy works closely with the other Under Secretaries of Defense to achieve the Secretary's objectives. This includes providing policy input, as appropriate, to each of them in their respective areas of responsibility. In addition, the Under Secretary for Policy works closely with the Under Secretary for Intelligence and other intelligence officials to ensure that policy formulation and execution are well informed and supported by intelligence.

Question. The Principal Deputy Under Secretary of Defense for Policy.

Answer. The Principal Deputy Under Secretary for Policy (PDUSD(P)) is the principal assistant to the USD(P) and is responsible for assisting the USD(P) in carrying out all responsibilities, fulfilling functions, managing relationships, and exercising authorities provided for in law to the USD(P). The PDUSD(P) advises on and supports the USD(P) in regard to all responsibilities in providing advice to the Secretary of Defense in interagency fora (such as National Security Council deliberations), engagement with international interlocutors, and in the PPBE processes inside the Department, including the QDR and annual program and budget reviews.

Question. The Assistant Secretaries of Defense.

Answer. The USD(P) exercises authority, direction, and control over the PDUSD(P), and the Assistant Secretaries of Defense for International Security Affairs, Asian and Pacific Affairs (APSA), Global Strategic Affairs, Special Operations and Low-Intensity Conflict (SOLIC), and Homeland Defense and Americas' Security Affairs (HD/ASA). This team works together to provide the Secretary with advice and recommendations on the full range of policy issues under consideration in the Department and provides policy oversight to ensure that the Secretary's guidance and decisions are implemented properly.

Question. The Secretaries of the Military Departments.

Answer. The USD(P) works closely with the Secretaries of the Military Departments on a broad range of issues, including defense strategy and policy development, force planning, and other areas in which the Military Departments are critical stakeholders.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. As the principal military advisor to the Secretary of Defense, the President, and the National Security Council, the Chairman has a unique and critical military role. The USD(P) works closely with the Chairman and Vice Chairman to support the efforts of the Secretary and Deputy Secretary in providing for the strategic direction of the Armed Forces, and to ensure that military advice is taken into account in an appropriate manner.

Question. The Service Chiefs.

Answer. The USD(P) works closely with the Service Chiefs on a broad range of issues, including defense strategy and policy development, force planning, and other areas in which the Military Departments and Services are critical stakeholders.

Question. The Commanders of the Regional and Functional Combatant Commands.

Answer. The USD(P) works closely with the regional and functional combatant commanders to support the efforts of the Secretary and Deputy Secretary, particularly in the areas of regional and functional strategy and policy, contingency planning, and policy oversight of operations.

Question. The Director of the National Guard Bureau.

Answer. The USD(P) works closely, through the Chairman and Vice Chairman, with the members of the Joint Chiefs of Staff. In accordance with the National Defense Authorization Act for 2012, the Chief of the National Guard Bureau is a member of the Joint Chiefs, and has a specific responsibility to provide information on the non-Federalized National Guard.

Question. The General Counsel of DOD.

Answer. The USD(P) works closely with the General Counsel on all policy issues that involve a legal dimension. In practice, this means significant and regular coordination on a broad range of issues.

Question. The Director, Defense Security Cooperation Agency.

Answer. The USD(P) exercises authority, direction, and control over the Director of the Defense Security Cooperation Agency (DSCA). The Policy organization works closely with DSCA to provide the Secretary with advice and recommendations on the full range of security cooperation issues facing the Department.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. Since joining the administration in March 2009, I have served in three senior defense-related positions that have enabled me to work on a very broad array of challenges facing DOD, and to understand how to work effectively in the inter-agency process to address difficult national security policy issues. As Principal Deputy Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs, I had the opportunity to work on a wide range of homeland security, Homeland defense, and defense support of civil authorities issues. In that role, I managed a staff of more than 300 people and worked closely with the National Security Council staff, as well as the Departments of Homeland Security and Justice and other key Federal departments and agencies. Then, as Special Assistant to the President and Senior Director for Defense Policy at the National Security Council, I had the opportunity to work on many of the most challenging defense policy issues in recent years, from helping to formulate the Defense Strategic Guidance to addressing a range of regional security issues in the Asia-Pacific region and the Middle East. For the last year and one-half, I have served as Deputy Under Secretary of Defense for Strategy, Plans, and Forces. In this capacity, I have collaborated closely with the Joint Chiefs of Staff, Military Department Secretaries, and Combatant Commanders on issues including strategy development, the global force management process, contingency planning, force structure analysis and development, and regional posture. I have frequently represented OSD Policy in the annual PPBE process on behalf of the USD(P). In each of these three positions, I have had the opportunity to work directly with the current and two previous Secretaries of Defense.

Prior to joining the administration, I focused professionally on defense and security policy issues both in and out of government for many years. As a Senior Fellow at the Center for Strategic and International Studies (CSIS) for 5 years, I worked on a host of national security issues, and was privileged during that time to serve as the Executive Director for the Independent Commission on Iraqi Security Forces, also known as the "Jones Commission." Before coming to CSIS, I was a senior manager in a small defense consulting firm for almost 3 years, which gave me valuable insight into defense industry concerns and provided me an opportunity to hone my management skills.

I also believe that my early years as a Presidential Management Intern and career civilian action officer in OSD Policy are an important part of what will enable me to be effective as Under Secretary, if I am confirmed. I grew up professionally in OSD Policy. I have seen how it works, in good times and in bad, from the ground up. I care deeply about the talented people who work there, and the important work we do to provide the Secretary and the President with the best possible policy advice on matters of national security. Drawing on that deep knowledge and commitment

to the organization, if confirmed, I would work with the Policy staff to ensure we serve the Secretary as effectively as possible.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges confronting the USD(P)?

Answer. If confirmed as USD(P), I would expect to confront a large number of very significant and difficult policy issues. Among the most important in the near term will be working with other U.S. departments and agencies to transition security responsibility effectively in Afghanistan and prevent that country from once again becoming a safe haven for groups like al Qaeda. Looking ahead, I think that we will continue to face a changing and increasingly complex security environment. I believe it will be essential to continue to demonstrate our strong commitment to our partners in the Middle East, while working to advance U.S. interests in the context of the sweeping changes that are unfolding in that region, and in North Africa. If confirmed, I would continue to prioritize defending the homeland and seek to ensure we effectively address emerging threats like cyber and the proliferation of weapons of mass destruction. If confirmed as Under Secretary, I would work closely with the rest of the Department and other U.S. departments and agencies to continue our efforts to defeat al Qaeda, counter the threat of violent extremism across the globe, and protect the United States and our vital interests from an attack. Addressing each of these challenges, and many others, will be made more difficult in the context of the significant fiscal pressures and uncertainty the Department is facing. If confirmed as Under Secretary, a major challenge I anticipate will be working to ensure that the Department allocates its more limited resources in ways that align to the needs of our defense strategy, and in ways that enable us to prepare as effectively as possible for future challenges and opportunities.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I look forward to working with the Secretary and the senior leadership of the Department, as well as interagency colleagues to develop and oversee implementation of effective strategies, policies, and plans that address these challenges. I would also work closely with Congress, U.S. allies and partners, and, where appropriate, nongovernmental organizations and the private sector. In working to address difficult policy issues, I would anticipate drawing on the deliberations of the QDR, gaining insights from the upcoming National Defense Panel report and other outside organizations and commissions, and using the range of annual planning and programming processes within the Department to generate potential policy solutions.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the USD(P)?

Answer. At the outset of the QDR process, Secretary Hagel outlined a number of priorities that guide his thinking in how to lead the Department. If confirmed, I would seek to ensure the Policy organization is focused on how we contribute to making progress in those areas, particularly those with significant policy implications. The forthcoming QDR report will outline our approach to some of those priorities, including re-evaluating our force planning and sizing construct, ensuring we avoid a long-term readiness challenge, and protecting investment in critical military capabilities most needed to implement our defense strategy. A key priority for me, if confirmed, would be to ensure that the Department executes our defense strategy through a disciplined and rigorous process that effectively matches resources to strategy.

If confirmed, I also would make it a priority to continue and deepen the Department's efforts to implement the President's guidance to rebalance to the Asia-Pacific region. Since the publication of the Defense Strategic Guidance in January 2012, the Department's senior leadership has made implementation of the rebalance a priority. If confirmed, I would work closely with other components of the Department, and with my interagency colleagues, to develop additional creative approaches to implement the military component of the rebalance, and continue to ensure that the rebalance is prioritized in the resource allocation process.

Secretary Hagel recently approved, as part of his efforts to streamline the Department further, a reorganization of the Policy organization. I support this reorganization, and if confirmed as Under Secretary, I will make it a priority to ensure that we successfully implement the reorganization plan. Ultimately, the strength of the Policy organization is its workforce, so I would continue to invest in developing, recruiting, and retaining a dynamic workforce. If confirmed, I would make it a priority to ensure that we make this transition in an effective, transparent, and well-orga-

nized way that enables us to continue to provide excellent advice to the Secretary, and function as a strong, effective part of the overall OSD.

If confirmed as Under Secretary, I also would make it a priority to set aside time, both personally and at the organizational level, to think strategically about over-the-horizon challenges and opportunities the United States may face in the future. It can be very challenging in government to find time to address emergent, long-term issues, but having worked in a think tank for a lengthy period, I am convinced that decisionmakers benefit when we are able to “give the future a seat at the table.” If confirmed, I would push myself and the Policy organization to devote sufficient time to strategic thinking and planning, even as we work to address more immediate threats and opportunities.

REORGANIZATION OF OFFICE OF THE UNDER SECRETARY FOR POLICY

Question. The Secretary of Defense has announced a plan to reorganize the Office of the USD(P). The reorganization has begun and is expected to be completed by 2015.

What is your understanding of the major changes planned for the organization that you have been nominated to lead, and what do you believe will be the primary benefits of the reorganization plan?

Answer. By 2015, the Policy reorganization will eliminate seven senior leader positions, including a DUSD, the Policy Chief of Staff, four DASDs, and a USD(P) senior advisor. The changes should increase efficiency by aligning similar functions and reducing the total number of offices overall. The reductions also ensure that Policy will be in compliance with pending DOD headquarters budget reductions and the requirement to eliminate the DUSD position itself.

Question. How do you plan to ensure that the reorganization leads to improvements and efficiencies in the formulation and execution of policy within the Department?

Answer. If confirmed, I would work with the PDUSD(P) and Assistant Secretaries to ensure that synergies created by the reorganization lead to development of more comprehensive and cohesive policy options. For example, defending the Nation from cyber attacks is an important element of protecting the U.S. Homeland. By placing responsibility for development of cyber policy in the Office of the Assistant Secretary for Homeland Defense, that Assistant Secretary will be better able to leverage the tools in the Cyber Policy office to ensure the homeland is defended against cyber threats. Implementation of the reorganization will also enable the Policy organization to recognize some efficiencies in terms of reducing and streamlining front office staffs due to the consolidation of a number of offices.

Question. What is your understanding of the Department’s rationale for combining the functional experts in Cyber and Space under one Deputy Assistant Secretary of Defense?

Answer. The reality of modern telecommunications is that there’s a strong nexus between policy issues related to cyber and space. During its comprehensive reorganization review, Policy recognized that the two offices worked together frequently and that improved synergy could be achieved by unifying the office under a single leader. Programs in both offices have matured significantly over the last few years, allowing the efficiency of single office management.

Question. How do you intend, if confirmed, to achieve unity of effort within the Prisoner of War (POW)/Missing in Action (MIA) accounting community given its fragmented command and control and budgetary processes?

Answer. As the committee is aware, the POW/MIA accounting community has been the subject of several organizational studies over the past 18 months. The Government Accountability Office (GAO) completed a study in 2013, and it is my understanding that the Department is implementing recommendations from the GAO report.

Additionally, the Office of Cost Assessment and Program Evaluation (CAPE) is reviewing DOD’s organizational structure in this area. If confirmed, I would consider the results of these reviews, and seek the views of family and veterans’ groups to determine how we can better achieve unity of effort.

AFGHANISTAN STRATEGY

Question. What are our key strategic objectives in Afghanistan and in your view are we on track to achieve those objectives?

Answer. I understand that Coalition and Afghan Forces are meeting campaign objectives. The Afghan Government is able to exert control over all of Afghanistan’s major cities and provincial capitals. Afghan forces have assumed the lead for security and, with the Coalition, have successfully countered the insurgency’s efforts in

the 2012 and 2013 summer fighting seasons. I understand that we continue to make progress in our counterterrorism efforts.

Question. If confirmed, what changes, if any, would you recommend to the U.S. strategy in Afghanistan?

Answer. I believe the U.S. strategy is succeeding and would recommend that we follow through on our commitments made in Chicago and Tokyo. Our core goal in Afghanistan remains disrupting, dismantling, and defeating al Qaeda and preventing its return to Afghanistan. To achieve this, we should maintain our commitment to Afghanistan after 2014 and continue to transition security responsibility to the Afghans.

Question. What do you see as the United States' long-term strategic interests in Afghanistan after 2014?

Answer. The United States has made a commitment to an enduring partnership with Afghanistan, and it will continue to be in the U.S. interest to work towards defeating al Qaeda and disrupting other extremists who present a serious threat to the U.S. Homeland, allies, partners, and interests. We have also pledged at Chicago and Tokyo to support the Government of Afghanistan's development as it takes responsibility for its own future.

Question. Do you support the retention of a limited U.S. military presence in Afghanistan after 2014?

Answer. I support a long-term partnership with Afghanistan, including a limited U.S. presence after 2014 to support the two missions the President discussed in the State of the Union address—a narrowly focused counterterrorism mission against al Qaeda and its affiliates; and a North Atlantic Treaty Organization (NATO)-led train, advise, and assist (TAA) mission to support the Afghan forces. To accomplish these missions, we must conclude an agreement with the Afghan government in order to remain in Afghanistan and to secure privileges and protections for our forces.

Question. If so, what in your view should be the size, mission, and duration of such a residual U.S. military force?

Answer. If confirmed, I would engage our military commanders to assess the appropriate size, mission, and duration of such a residual force.

Question. In your view, what would be the consequences for Afghanistan's security and stability if the United States were to reduce its post-2014 military presence in Afghanistan to a "normal" Office of Defense Cooperation under chief of mission authority?

Answer. At this time, I am unable to assess the impact of reducing our presence to an Office of Defense Cooperation. My understanding is that the Afghans are leading the majority of security operations, but that they require additional support and assistance at ministerial levels.

Question. If the United States and Afghanistan are unable to conclude a Bilateral Security Agreement that ensures legal protections for such a residual U.S. military force, should the United States withdraw its military forces from Afghanistan?

Answer. If confirmed, I would support a U.S. military presence in Afghanistan if our forces have the requisite legal protections that a status of forces agreement, such as the Bilateral Security Agreement, would provide.

Question. What is your understanding, as a legal matter, of when the current agreements that provide legal protections for the U.S. military between the Afghan Government and the U.S. Government expire? If a residual U.S. military force were to remain in 2015, would it have the same legal protections as the current U.S. military force does now even without the signing of the Bilateral Security Agreement?

Answer. I understand that the current bilateral Status of Forces Agreement with Afghanistan does not have an expiration date. The President has made clear that for the United States to remain in Afghanistan post-2014, it must be at the request of the Afghan government and under a Bilateral Security Agreement concluded with Afghanistan.

AFGHANISTAN TRANSITION

Question. Do you support the transition of full responsibility for the security of Afghanistan to the Afghan National Security Forces (ANSF) by 2014?

Answer. Yes. My understanding is that the ANSF has shown over the last year that it is up to the task of providing security across Afghanistan. The ANSF is now conducting virtually all operations independently and has prevented the insurgents from making any significant gains. I realize that the ANSF will require continued international assistance to sustain these gains, and, if confirmed, I would support such efforts in line with whatever decision the President makes about our post-2014 force level, mission, and resourcing.

Question. In your view, what are the main challenges to the success of such a transition?

Answer. In my view, the main challenge will be ensuring that the ANSF has adequate financial resources to sustain the gains they have made. This will require continued international assistance; if confirmed, I would support such efforts in line with whatever decision the President makes about our post-2014 force level, mission, and resourcing. Another challenge is that the Afghans now have limited combat enabler support from the coalition, so we will have to monitor closely how this affects their readiness and morale when the fighting becomes more intense later this year.

AFGHANISTAN NATIONAL SECURITY FORCES

Question. What is your assessment of the progress in developing a professional and effective ANSF?

Answer. My understanding is that the Afghan military and police forces have a competent cadre of officers and leaders, but the rapid growth in the size of the ANSF over the last few years has created a requirement to produce even more leaders—a task that cannot be accomplished quickly. The international assistance effort has expanded the institutional training base for all levels of ANSF leaders. If confirmed, I would support continuing this focus, consistent with the President's decision about our post-2014 force level and mission.

Question. What do you see as the main challenges to building the capacity of the ANSF, including after 2014?

Answer. My understanding is that building this capacity at the ministerial and institutional level will be the focus of the NATO-led train/advise/assist mission. One of the main challenges I see will be ensuring that the Afghans have the right leaders in place and that we have the right advisors with the right skillsets in place. Another challenge I foresee is ensuring the ANSF has the financial resources needed to sustain a force structure that is adequate to maintain the security gains it has made over the past year while continuing to develop their ability to improve their functional skills, such as in the areas of resource management, contracting, and logistics.

Question. If confirmed, what recommendations, if any, would you make for addressing those challenges?

Answer. If confirmed, I would work closely with our Afghan and coalition partners to ensure we are working toward the same objectives. The key will be to ensure the focus is on building Afghan capacity—not doing tasks for them. If confirmed, I would reinforce this focus and ensure DOD contributions are aligned with this approach.

Question. What do you see as the main challenges to sustaining the ANSF beyond 2014, and if confirmed, what recommendations, if any, would you make for addressing these challenges?

Answer. The ANSF is leading nearly all security missions in Afghanistan. I understand the main challenges to sustaining the ANSF beyond 2014 are ensuring that those forces have the training and equipment necessary to plan for and carry out their missions. This entails financial and personnel support for the NATO-led TAA mission at the ministerial and institutional levels to enable the planning, contracting, and logistics functions needed to sustain the ANSF forces. It also means engaging regularly with the U.S. civilian leadership to gauge progress in the Afghan missions.

Question. Do you agree that any future reductions from the current ANSF troop level should be based on the security conditions in Afghanistan at the time the reductions would occur?

Answer. If confirmed, I would participate in what I understand to be a biannual DOD review of the appropriate size of the ANSF, which considers operational and security issues, among other factors.

U.S. RELATIONSHIP WITH PAKISTAN

Question. What is your assessment of the current relationship between the United States and Pakistan?

Answer. The bilateral relationship with Pakistan continues to improve through cooperation to defeat al Qaeda, promote peace and reconciliation in Afghanistan, and support Pakistan's fight against militant and terrorist networks. There is still room for progress, however. If confirmed, I would focus on strengthening areas of common interest and continue engagement where we disagree, especially to spur greater action against the Haqqani Terrorist Network and other terrorist groups that operate on Pakistani soil.

Question. Do you see opportunities for expanded U.S.-Pakistan cooperation on security issues? If so, how would you prioritize these areas of cooperation?

Answer. I believe we should continue to focus our defense relationship with Pakistan on areas of mutual interest; specifically, the fight against al Qaeda and other terrorist networks. This will involve supporting Pakistan's military efforts to counter the threat of militant and insurgent groups along the border with Afghanistan.

Question. What is your assessment of Pakistan's efforts to combat the threat of international terrorism?

Answer. Pakistan plays a major role in the fight against terrorism, as demonstrated by the large number of forces Pakistan has deployed in counterinsurgency operations. Pakistan also has suffered significant military and civilian casualties combating terrorism in their country, which underscores the breadth of Pakistan's commitment to the fight against terrorism.

Question. What conditions, if any, should the United States place on its security assistance to Pakistan?

Answer. If confirmed, I would work to assess the level of our assistance, the return on that investment, and whether there is value in attaching conditions.

Question. What impact do you believe the end of coalition combat operations in Afghanistan will have on: (1) U.S.-Pakistan relations after 2014; and (2) U.S. strategic interests in the South Asia region?

Answer. Militants and terrorist groups may attempt to exploit perceived security gaps as the Afghan National Security Forces (ANSF) play an increased role in maintaining security after International Security Assistance Force (ISAF) combat operations end. Despite the drawdown, the United States will continue to have a strategic interest in promoting stability and countering the threat of terrorist groups in South Asia. As the coalition footprint decreases, the importance of cooperating with Pakistan and other partners to promote our strategic interests in the region will increase.

THE HAQQANI NETWORK

Question. The Haqqani Network, which has been linked to a number of deadly attacks on Afghan, U.S., and other coalition forces in Afghanistan, operates from safe havens in Pakistan.

In your view, should additional steps be taken to track and counter the illicit financial activities of the Haqqani Network, and if so, what role—if any—should DOD play?

Answer. The Haqqani Network continues to pose a threat to U.S., coalition, and Afghan personnel, threaten regional security, and undermine Pakistan's stability. I understand that DOD and the broader U.S. Government are taking steps to counter this network. The Department of State's designation of the group as a global terrorist network and the Department of Treasury's move on February 6, 2014, to freeze the assets of three suspected militants linked to the network are steps in the right direction. If confirmed, I would support DOD and other agencies' efforts to counter the Haqqani Network.

IRAQ

Question. What in your view are the key U.S. strategic interests with regard to Iraq?

Answer. I believe we have a key interest in making sure Iraq remains stable and secure. If confirmed, I would work to deepen the strategic partnership to make sure we continue collaboration on security challenges and work to deepen Iraq's military capabilities to repel the Islamic State of Iraq and the Levant (ISIL) and further integrate Iraq with regional partners.

Question. What in your view are the major areas, if any, for security cooperation between the United States and Iraq?

Answer. I believe we share many security interests with Iraq. We have cooperated and need to continue to cooperate in areas such as countering threats from Iran and terrorist organizations, including ISIL. We also have similar interests in making sure the region is peaceful and secure, including stemming instability emanating from the violence in Syria.

Question. In what areas, if any, do you see U.S. and Iraqi security interests diverging?

Answer. I don't see the United States and Iraq having divergent security interests. Both the United States and Iraq are working to ensure that Iraq remains stable, sovereign, and secure; is able to protect its borders from external aggression; and develops capabilities to fight terrorism and extremism inside its borders.

Question. What do you see as the greatest challenges for the U.S.-Iraq security relationship over the coming years?

Answer. Despite numerous security problems in the region, if I am confirmed, I would work to help Iraq integrate into the region, ensure it has the resources it requires to counter violent extremism, and move our relationship with Iraq to a more traditional security partnership like ones we have with other global and regional allies and partners.

Question. In your view, what steps, if any, should the United States take to engage with Iraq to promote greater security and stability across the Middle East region?

Answer. I believe by maintaining and increasing robust foreign military sales, information sharing, and additional training and exercises, the United States will help Iraq remain stable and secure and promote broader stability across the region.

Question. Iraq faces a resurgent violent extremist threat that seeks to exploit popular discontentment with the current Maliki Government, particularly within Sunni communities in western Iraq.

What role, if any, should the United States play in assisting the Government of Iraq in confronting the threat of violent extremism?

Answer. Despite the many challenges the Iraqis are facing, they are demonstrating to us that they are in the lead for their security, but are also asking the United States for help in the form of training and expedited weapons deliveries. I believe that with these tools, coupled with information sharing and non-operational training for the Iraqi Ministry of Defense and Ministry of Interior Counter Terrorism Services, we can assist the Iraqis in deepening their capabilities and dealing with violent extremists across Iraq.

Question. In your view, what conditions, if any, should the United States place on the provision of equipment or assistance to the Government of Iraq in its fight against violent extremism?

Answer. I believe that we should follow the end-use monitoring protocols that are already in place for all countries that we sell weapons to, including Iraq. The United States has made clear to Iraq that U.S. assistance is dependent on the Iraqis adhering to proper use of U.S.-origin systems. If confirmed, I would ensure that appropriate end-use monitoring is part of the discussion on negotiations for U.S. security assistance.

Question. What steps can be taken to ensure that the Maliki Government uses any equipment, training or advice provided by the United States to fight extremists and not to suppress the political opposition from the Sunni minority in Anbar?

Answer. In addition to the end-use monitoring protocols, I believe that deep and sustained U.S. diplomatic engagement to encourage the Government of Iraq to integrate all Iraqi citizens more fully into the political process offers the only way to achieve a lasting and durable peace and stability. We have seen vigorous engagement from officials across the U.S. Government as the security situation in Iraq has worsened and, if confirmed, on behalf of the Department I would continue to communicate the message that Iraq will be secure and free from extremists when all the people of Iraq are given a voice.

Question. The death toll in Iraq has risen to levels not seen since 2007–2008. The deteriorating security conditions in Iraq have been blamed on the growth of extremists in Syria and on Prime Minister Maliki's inability or unwillingness to address Sunni concerns.

What is your view on the cause of the increased violence?

Answer. The spillover of instability from Syria has clearly affected Iraq's security and aggravated Iraqi sectarian tensions. The Government of Iraq has taken notable steps to address these twin challenges. First, Iraqi Security Forces have deployed to western Iraq and are working with local governmental and tribal authorities to dislodge and expel terrorist elements that have taken refuge in the undergoverned spaces of Anbar. Second, the Iraqi Government announced plans to better integrate Sunni tribal forces more effectively into the national military and has publicly affirmed its intent to proceed with national elections in April despite the violence.

IRAN

Question. What is your assessment of the military and political threat posed by Iran?

Answer. In my view, some of the policies and activities of the Islamic Republic of Iran constitute a significant and direct threat to our regional allies and partners, to some of our core interests in the region, and to broader international norms. This is most evident in Iran's pursuit of capabilities that, if left uncontested, would enable it to build missile-deliverable nuclear weapons. Iran also has the largest inven-

tory of ballistic missiles in the region, and some of these missiles are inherently capable of delivering weapons of mass destruction. Last, Iran is the most active state-sponsor of terrorism in the world.

Question. What is your assessment of U.S. policy with respect to Iran?

Answer. I believe that the comprehensive approach of tough-minded diplomacy and unrelenting pressure has sharpened considerably the strategic choices for Iran. This policy has mobilized and unified the international community against the Iranian regime, resulting in Iran's unprecedented regional and global isolation. It has inflicted a heavy economic toll on Iran through a comprehensive set of smart and robust sanctions. It has sent a powerful message that unless Iran changes course, all options are on the table. Ultimately, the U.S. policy forced Iran to the negotiating table and to agree to the Joint Plan of Action. I believe that sustained application of our policy gives us the best chance of reaching a comprehensive nuclear deal with Iran, while holding Iran accountable for a range of destabilizing activities in the region and its dismal human rights record.

Question. In your opinion, what impact, if any, do ongoing P5+1 negotiations with Iran on Iran's nuclear program have on our ability to counter Iranian ambitions in Syria and Iran's support of international terrorism?

Answer. In my opinion, the ongoing P5+1 negotiations on Iran's nuclear program do not limit our ability or weaken our resolve to counter Iranian ambitions in Syria and Iran's support of international terrorism. I believe that we should not and will not relax our efforts to hold Iran accountable for its support of terrorism, interference across the region, and human rights violations.

Question. In your view, what are the risks associated with reducing U.S. presence in the Middle East with respect to the threat posed by Iran?

Answer. I believe that a substantial reduction of our military presence in the Middle East at this time could have a significant, adverse impact on the effectiveness of our policy vis-a-vis Iran and our credibility with our partners in the region. Therefore, if confirmed, I would support the Department's position, as stated by Secretary Hagel in Manama last December, that DOD will continue to maintain a strong military posture in the Gulf region.

Question. In your view, what role should DOD play in countering Iran's support of international terrorism?

Answer. In my view, the Department has an important role to play in supporting broader U.S. Government efforts to counter Iran's support for international terrorism. If confirmed, I would work with interagency and international partners to continue holding Iran accountable for a range of destabilizing activities in the region and elsewhere as necessary.

Question. In your view, is there a trust deficit with Saudi Arabia and our other Gulf partners based in part on negotiations with Iran?

Answer. I believe that the United States and our partners in the region share the same assessment of the threat and policy objective vis-a-vis Iran's nuclear pursuits. Although there may be occasional tactical differences, our extensive bilateral relations and especially our strong defense relationships serve to reassure our partners of our commitment to regional security and to building their capacity to deal with common threats, including those posed by Iran. This includes not just a strong U.S. military presence, which itself is clear evidence of continued U.S. commitment, but a robust schedule of combined exercises, routine key leader engagement, and a significant foreign military sales program. If confirmed, I would work to maintain and build on those strong relationships.

ISRAEL

Question. With regard to our relationship with Israel, President Obama has stated: "Our military and intelligence cooperation has never been closer. Our joint exercises and training have never been more robust. Despite a tough budget environment, our security assistance has increased every year. We are investing in new capabilities. We're providing Israel with more advanced technology—the type of products and systems that only go to our closest friends and allies. Make no mistake: we will do what it takes to preserve Israel's Qualitative Military Edge—because Israel must always have the ability to defend itself, by itself, against any threat."

Do you agree with President Obama's position and views with regard to the U.S. security relationship with Israel?

Answer. Yes, I agree with the President's views, which Secretary Hagel has reaffirmed on several occasions. Under the leadership of Secretary Hagel, the Department has worked diligently to strengthen the U.S.-Israeli relationship, which includes the largest amount of Foreign Military Financing (FMF) in history and the approval to release advanced military capabilities, including the F-35 and the V-

22 aircraft, to Israel. If confirmed, I would work to continue DOD's substantial cooperation with Israel and maintain the strength of our security relationship.

POST-ARAB UPRISING MILITARY-TO-MILITARY ENGAGEMENT

Question. The past few years have brought great change to the Middle East and North Africa. These changes may require adjustments to our military-to-military engagement efforts throughout the region.

What is your understanding of U.S. military-to-military engagement in the Middle East and North Africa (e.g. Yemen, Tunisia, Egypt, and other countries in the region), and what changes—if any—would you advocate for in light of the Arab Uprising?

Answer. DOD's military-to-military and defense civilian relations with our partners in the Middle East and North Africa constitute a variety of tailored programs and efforts. Our military engagement includes working with key partners' defense ministries and militaries, having a forward presence to enable operations and deter threats, building partner capacity to meet common challenges, and being prepared for future contingencies. These programs are matched to partners' perspectives, capabilities, and needs, and play a critical role in advancing U.S. strategic interests, which include: securing and protecting Israel, preventing Iran from acquiring a nuclear weapon, defeating extremists, countering terrorist organizations, ensuring the free flow of commerce, and supporting operations in Afghanistan.

During this time of continuing change and uncertainty in the region, it is imperative that the Department sustains and improves military-to-military and defense civilian relations, while continuing to evaluate and recalibrate the nature and substance of each of our relationships to ensure they are consistent with U.S. values and advance U.S. vital national interests.

EGYPT

Question. What is your assessment of the security situation in Egypt?

Answer. I am troubled by the government's crackdown on the Muslim Brotherhood, opposition groups, and journalists. I know that the Department has repeatedly voiced concerns about the crackdown to the Government of Egypt and urged that the interim government protect the rights provided in the new constitution.

I am also concerned with the recent increase in violence perpetrated by Sinai-based terrorist organizations. I understand that the Department has continued to provide maintenance support for platforms that support CT operations, and that the Secretary has personally offered our assistance. If confirmed, I would continue the Department's work to support Egypt's efforts to combat terrorist threats.

Question. What is your assessment of the U.S.-Egypt security relationship?

Answer. The U.S.-Egypt relationship is one of our most significant and enduring security relationships in the Middle East. Egypt is an important regional actor, and for more than 30 years our relationship has served to further our countries' joint security interests. Our security relationship with Egypt helps us facilitate expedited U.S. military access to the Suez Canal and critical overflight privileges, ensure the security of Israel, cooperate on counterterrorism efforts, and maintain the security of our embassy and consulate. Supporting Egypt's transition while encouraging a non-violent, transparent, and inclusive process ensures our security relationship is maintained and our interests protected.

Question. What is your assessment of the role Egypt plays with respect to regional stability?

Answer. Egypt remains an important partner for regional security. Egypt's upholding of the 1979 Peace Treaty with Israel, the security support that it provides to military and commercial ships transiting the Suez Canal, and its efforts to combat terrorist elements in the Sinai all advance critical regional security objectives. In addition, Egypt's work to prevent illicit trafficking across its shared borders with Libya, Sudan, and Israel demonstrate its commitment to promoting stability in the region.

Question. In your view, should the U.S. Government continue to provide defense articles and services purchased by the Egyptian military using U.S. FMF funds?

Answer. Our FMF funds have been an important part of our overall relationship with Egypt for more than 30 years. I understand the Department's position to be that we want to maintain our security assistance relationship with Egypt, and if confirmed I would continue the Department's efforts, working with other U.S. departments and agencies, to exercise the authorities granted in the fiscal year 2014 omnibus appropriations act to continue providing assistance to Egypt.

Question. If current Defense Minister Field Marshal el-Sisi were elected president of Egypt based on free and fair elections, what impact do you believe that might have on our military relationship with Egypt?

Answer. Egypt is an important partner of the United States and is critical to stability and security in the region, but Egypt's path forward is for the Egyptians to decide. The military and security aspect of the U.S.-Egypt relationship remains important to the United States and for our interests in the region, but the overall relationship is far broader than military assistance.

Regardless of who Egypt's president is, our shared interests in upholding the Camp David Peace Accords, counterterrorism and Sinai security, maritime security, and border security will remain, and I understand that the Department will continue to work with Egypt to advance those interests.

SYRIA

Question. The civil war in Syria continues and President Assad's commitment to continuing his regime's ongoing operations appear unwavering despite international condemnation. To date, the United States has limited its support to opposition forces to non-lethal assistance to forces on the ground, as well as technical assistance to elements of the opposition working to build a cohesive political entity.

In your view, what is the proper role on the U.S. military in this conflict?

Answer. A political solution to the Syria conflict would be the best outcome. DOD continues to be involved in interagency discussions that explore potential military roles, to support the important U.S. national interest in stopping atrocities in Syria. The U.S. military stands ready to support these goals, as determined by the President.

Question. In your view, should the United States provide support to opposition groups on the ground in Syria, including lethal support?

Answer. Yes, the United States should provide assistance to the moderate Syrian opposition. In fact, in addition to diplomatic support, the U.S. Government is providing nonlethal support—nearly \$260 million—to the Syrian Opposition Coalition (SOC) and the Supreme Military Council (SMC).

DOD also has been supporting the State Department in this endeavor. Since April 2013, DOD has delivered additional assistance directly to the SMC as well as the SOC in the form of meals ready-to-eat and medical supplies.

The provision of lethal assistance by DOD to the opposition would be a serious undertaking and would require a change in U.S. policy. If confirmed, I look forward to working closely through the U.S. interagency process to address such difficult policy questions.

Question. In your view, would the removal of the Assad regime be a strategic defeat of Iran in the region?

Answer. I believe the removal of the Assad regime would be a setback for Iran's destabilizing efforts in the region. The extent of that setback, however, would depend on what follows the downfall of Assad's regime.

As the President has said, there can only be a political resolution to the conflict in Syria. That is why the administration is focused on a negotiated transition that does not include Bashar al-Assad.

Question. National Counterterrorism Center Director Matthew Olsen said "As the conflict in Syria rages on, we are concerned about the flow of fighters to the country and the likelihood that they will pose a threat when they return from Syria to their home countries," and that dealing with this threat "will be the primary focus of our counterterrorism efforts in 2014."

If confirmed, what recommendations, if any, would you have for a counterterrorism strategy to blunt the rising tide of extremists in Syria?

Answer. Any counterterrorism strategy will need to involve active engagement with partner nations and allies, who have legitimate concerns about the growing extremist problem emanating from Syria. We must approach this issue regionally in order to combat these groups effectively, since this terrorist activity is not limited to Syria alone. Further, the Department must work closely with our interagency partners to develop options reflecting a whole-of-government approach to addressing the terrorist threat and disrupting terrorist efforts to attack the U.S. Homeland, our allies and partners, and our interests abroad.

Question. After the United States threatened the use of military force in response to Syria's use of chemical weapons against Syrian civilians in August 2013, Syria agreed to an international plan to eliminate its chemical weapons program by the end of June 2014. Although Syria acceded to the Chemical Weapons Convention and has eliminated its capacity to mix and fill chemical agents and munitions, it has

failed to meet recent deadlines to transport its chemical agents and precursors to Latakia for removal and destruction.

Given Syria's apparent unwillingness to meet all its internationally mandated deadlines, what are your views on the prospects for eliminating Syria's chemical weapons program by June 30, 2014?

Answer. I understand that the international community is poised to complete destruction of Syria's chemical materials once Syria fulfills its obligations. The United States is engaging bilaterally and multilaterally with key international partners to increase pressure on the Syrian Government in order to achieve complete elimination of Syria's chemical weapons program.

Question. What additional steps, if any, do you believe DOD could take as part of the international effort to ensure the successful elimination of Syria's chemical weapons program in 2014?

Answer. I understand the Department is playing a critical role in the international effort. If confirmed, I would continue the robust coordination within DOD, other U.S. departments and agencies, and with international partners necessary to ensure successful completion of our mission.

GULF SECURITY COOPERATION

Question. The administration has been working with Gulf Cooperation Council (GCC) governments to enhance regional cooperation and security against ballistic missile threats, particularly from Iran.

What is your view of the potential for missile defense cooperation within the GCC to enhance regional security, and how do you see this potential cooperation fitting into the United States missile defense and security efforts in the Middle East?

Answer. I understand that our efforts concerning missile defense cooperation with our Gulf partners are progressing. The plans that many GCC states have developed, including acquisition of advanced ballistic missile defense capabilities and participation in ballistic missile defense training and exercises, put us on a path to building stronger bilateral security partnerships, which could in turn provide a solid foundation for future progress in the multilateral arena.

Question. What role do you see for the sale to the United Arab Emirates of Terminal High Altitude Area Defense (THAAD) and Patriot missile defense systems, and similar sales to other GCC partners, in regional security against Iranian missile threats?

Answer. I understand that the United States is working with a number of GCC States regarding regional missile defense initiatives, including supporting their consideration of ballistic missile defense capabilities through the Foreign Military Sales program. As a result, many GCC partners are becoming increasingly interested, and active, in acquiring and fielding substantial ballistic missile defense capabilities. When complemented by the deployment of U.S. capabilities, these systems could make a significant contribution to deterrence of, and defense against, the Iranian ballistic missile threat.

Question. To your knowledge, have there been any requests by the GCC to purchase military equipment or services as a bloc, as Secretary Hagel announced in December 2013?

Answer. No, to my knowledge the GCC has not yet initiated any Foreign Military Sales requests following the recent Presidential Determination.

Question. Given the relative wealth of GCC states and their ability to buy complete systems independently (e.g., UAE's purchase of THAAD), what dynamics do you believe could lead to purchasing military capabilities as a GCC bloc?

Answer. I believe that a GCC decision to purchase military capabilities as a bloc would largely be a function of a shared view that the deployment of a collective capability would enhance the national, sovereign defenses of member states.

Question. Do you believe that, after the rotation of an aircraft carrier presence from the Gulf, the U.S. military should take any steps to reassure our GCC partners of U.S. willingness and capability to defend against the threat of Iranian aggression?

Answer. The United States has deep and enduring interests in the Middle East and maintains a robust regional military posture able to deter aggression and respond to potential security contingencies. This is a message that Secretary Hagel firmly delivered in his public remarks during the Manama Dialogue in Bahrain in December, and a theme he has repeatedly conveyed in consultations with our GCC partners.

REGIONAL BALLISTIC MISSILE THREATS AND RESPONSE

Question. Iran and North Korea each have hundreds of short- and medium-range ballistic missiles today that are capable of reaching forward-deployed U.S. forces, allies, and other friendly nations in the U.S. European Command, U.S. Central Command (CENTCOM), and U.S. Pacific Command areas of responsibility (AORs). The Ballistic Missile Defense Review Report of February 2010 stated that the United States intends to pursue regionally tailored phased adaptive approaches to ballistic missile defense against such missile threats in various regions.

Do you believe that such regionally tailored phased adaptive approaches will provide our regional combatant commanders with the missile defense capabilities needed to defend our forward deployed forces and our allies and partners in the region?

Answer. Yes. I believe our tailored missile defense approaches will contribute to the defense of our forward-deployed forces and our allies and partners. If confirmed, I would work to ensure that U.S. missile defenses are tailored to address the threat to each region using the capabilities that are most suited for deployment.

Question. What role do you see for the Aegis Ballistic Missile Defense system with Standard Missile-3 interceptors in U.S. missile defense capabilities in these AORs?

Answer. Ships equipped with the Aegis ballistic missile defense weapons system are a good example of the mobile systems that allow for the tailored defense of key regions and the capacity to surge missile defenses to a particular region in a crisis.

Question. In addition to U.S. missile defense capabilities in these AORs, what role do you see for other nations to contribute to regional missile defense capabilities?

Answer. The missile defense contributions from our allies and partners help to strengthen regional deterrence and defense by increasing defense cooperation ties with the United States while making themselves and our forward deployed forces less vulnerable to coercion and ballistic missile attack. If confirmed, I would encourage even closer cooperation with allies and partners in this area.

LIBYA

Question. What role do you envision the United States playing in helping Libya build capable security institutions?

Answer. Libya remains a country in a difficult democratic transition. I understand that building Libyan security capacity is a priority for DOD, and I would support this effort if confirmed. In response to a request from Libyan Prime Minister Zeidan, the United States will train a 5,000–8,000-member general purpose force (GPF), which will be a foundational element of Libya's future security. The United Kingdom, Italy, and Turkey are also committed to training Libyan GPF personnel, and we are working with them closely to ensure our efforts are coordinated. To underwrite the development of, and to sustain, this force, DOD also contributes to international efforts to provide defense advisor and defense institution reform programs to help the Libyan Ministry of Defense develop the capabilities necessary to manage the country's security forces.

Question. What is your assessment of the risks associated with the paramilitary forces that continue to have control of large swaths of Libya?

Answer. It is my assessment that paramilitary forces disrupt Libya's democratic transition and undermine the basic peace and stability of the state.

Question. In your view, what role, if any, should DOD play in assisting the Libyans with addressing the threat to stability posed by paramilitary forces?

Answer. I understand that the United States is committed to working with the Libyan Government as it addresses the risks paramilitary forces pose to Libyan stability, and DOD plays an important role in those efforts. In addition to the GPF program, I understand DOD provides training and equipment to increase Libya's border security and counterterrorism capacity. The Department also contributed to weapons abatement efforts and defense institution reform programs.

Question. What do you view as the most significant challenges to the Libyan Government in building capable and sustainable security institutions?

Answer. Libya was left without a deep bench of experienced technocrats and civil servants, and its ability to administer governing institutions is nascent. This poses challenges to Libya's capacity to absorb and coordinate international assistance efforts. For this reason, the administration is focused on ensuring that the United States and our international partners coordinate among ourselves to provide Libya with the assistance it needs.

Question. In what ways can the United States be most effective in assisting the Libyan Government in building capable and sustainable security institutions?

Answer. To complement our GPF, border-security, and counterterrorism training, DOD seeks to assist the Libyan Ministry of Defense with institution-building programs to facilitate the recruiting, retention, and integration of trained personnel

into the Libyan military. In my view, a capable Libyan Ministry of Defense is essential to the consolidation of Libya's security capacity.

Question. What security assistance programs do you consider most vital to providing security assistance to Libya and to help Libya build its security capacity?

Answer. Once implemented, I understand that the Libyan-funded General Purpose Force training will be our largest effort to help build Libya's security capacity. With Congress's support, we funded programs to develop counterterrorism forces as well as a border security company in Libya. I understand that DOD's defense advisor and defense institution reform programs also benefit Libyan Ministry of Defense development.

Question. In your opinion, how important is the Global Security Contingency Fund to U.S. security assistance efforts in Libya?

Answer. I understand that the United States has the strategic goals of supporting Libyan Government efforts to develop a basic capability to secure its own borders and maintain stability in the face of internal and regional challenges, and to create the space for a peaceful, successful democratic transition. By developing Libyan special operations and border security capacity, the Global Security Contingency Fund could play a critical role in advancing these objectives.

AFRICA-RELATED SECURITY MATTERS

Question. The new DOD strategic guidance, "Sustaining U.S. Global Leadership: Priorities for 21st Century Defense," announced by President Obama on January 5, 2012, sets out the defense priorities for the 21st century and the key military missions for which DOD will prepare. The primary emphasis of the strategy relates to the Middle East and Asia. The strategy makes little reference to Africa and its myriad security challenges.

In light of the emphasis on areas outside of the African continent, if confirmed, how would you draw attention to the myriad security challenges confronting African nations?

Answer. We must protect U.S. lives and interests from al Qaeda and its affiliates and those who intend to do us harm. Building the capability of African security forces, defense institutions, and regional organizations to combat transnational threats will continue to be a cornerstone of our defense efforts in Africa. As part of these efforts, if confirmed, I would support ongoing programs and policies that instill in African militaries a commitment to operate under civilian authority, respect the rule of law, abide international human rights norms, and support international peacekeeping operations. Over the long run, it will be Africans who will best be able to address African security challenges, and DOD will be positioned to advance U.S. security interests most effectively through focused security engagement with our African partners.

Question. In the last few years, there has been a growth of terrorist networks, capabilities, and operations in North and East Africa, including groups that reportedly intend to target Western nations, including the United States. Some have characterized the U.S. counterterrorism effort in North and East Africa as an "economy of force" effort.

Do you agree with that characterization of the U.S. counterterrorism effort in North and East Africa?

Answer. The growing terrorist threats in Northwest and East Africa present a complex security challenge to U.S. security interests. The vast under-governed areas in North and East Africa have contributed to a permissive environment for extremist networks. Working closely with international and regional partners, I understand that DOD focuses its efforts on disrupting and dismantling al Qaeda, its affiliates, and adherents. U.S. support of France's operations in Mali and support of United Nations peacekeeping forces have resulted in significant progress in addressing the terrorist threat in the Sahel. Our support to the African Union Mission in Somalia (AMISOM) has been critical to reducing al-Shabaab's freedom of movement in south and central Somalia.

Question. In your view, should these U.S. counterterrorism efforts be expanded, contracted, or remain the same?

Answer. In my view, U.S. counterterrorism efforts should align with the threat to the United States, our allies and partners, and our interests. If confirmed, I would support counterterrorism efforts to disrupt and over time defeat violent extremist organizations that pose a direct threat to U.S. and allied interests, and threaten regional security.

U.S. MILITARY OPERATIONS AGAINST THE LORD'S RESISTANCE ARMY

Question. Despite pressure by the Ugandan People's Defense Forces (UPDF) and efforts by U.S. Special Operations personnel to support them, elements of the Lord's Resistance Army (LRA)—including Joseph Kony—continue to operate and commit atrocities against civilian populations. Some observers have identified operational concerns with this mission, including that: (1) supported forces are trying to find an elusive foe in an area roughly the size of California, much of which is covered in thick jungle; (2) technical support to U.S. forces and their UPDF partners from the Defense and Intelligence Community continues to be inadequate; (3) limitations continue to be placed on the ability of U.S. Special Operations personnel to accompany UPDF partners outside of main basing locations, thereby limiting the level of direct support they can provide; and (4) logistics and operational enablers for U.S. forces.

In your view, what is the objective of Operation Observant Compass (OOC)?

Answer. The mission of U.S. OOC forces is to enhance African capacity to end the threat posed by the Lord's Resistance Army (LRA). It is my understanding that U.S. military advisors are working with these forces to strengthen information-sharing and synchronization, enhance their operational planning, and increase the effectiveness of African security forces. If confirmed, I would support the current U.S. policy of pursuing a comprehensive, multi-faceted strategy to help the governments and people of this region in their efforts to end the threat posed by the LRA and to address the impacts of the LRA's atrocities.

Question. In your view, what is the appropriate level of priority to be accorded to efforts to counter the Lord's Resistance Army?

Answer. OOC balances the operational needs of our African partners with our desire to ensure those partners remain in the lead as they confront their security challenges, and contributes to a whole-of-government effort to support local resistance to and eventual defeat of the LRA. I understand that this approach has yielded dividends. Since 2012, there have been more than 100 defections from the LRA, including LRA fighters, with many citing U.S.-supported defections messaging as influential in their decisions to defect. In December 2013, 19 individuals defected from the LRA, the largest LRA defection since 2008.

Question. If confirmed, will you work to review the four concerns outlined above and report back to the committee?

Answer. Yes.

TRANSATLANTIC RELATIONSHIP AND NATO

Question. In your view, how important to U.S. national security interests is the NATO and the U.S. transatlantic relationship with our Alliance partners?

Answer. Europe is and remains the United States' partner of first resort. The transatlantic community has never been more closely aligned in confronting the challenges of a complex, dangerous, and fast-changing world. The breadth and depth of our cooperation are remarkable. For example, in Libya, NATO allies came together with Arab and other partners to prevent a catastrophe and to support the Libyan people. In Afghanistan, with nearly 40,000 allied and partner personnel alongside our own, we built and sustained NATO's largest-ever overseas deployment. As President Obama has said, "Europe remains the cornerstone of our engagement with the world," and NATO is "the most capable Alliance in history".

Question. If the United States were to have to take military action against Iran in the future, do you believe that could occur without strategic basing in Europe, and if so how difficult would that be?

Answer. I cannot address the basing requirements for specific operations in an unclassified setting. I understand that, traditionally, U.S. basing in or transit through Europe has been essential to a broad range of contingency plans and global operations. For example, European bases provided critical support to Operation Desert Shield in Iraq and Operation Allied Force in Kosovo in the 1990s, and more recently to Operation Enduring Freedom in Afghanistan and Operation Unified Protector in Libya.

Question. Do you believe that any moderate to major military operation (e.g. Operation Odyssey Dawn, Operation Unified Protector) that the United States might undertake in Africa or the Middle East is likely to involve U.S. forces from Europe and/or with Europe?

Answer. Yes, I expect that U.S. forces and facilities in Europe would likely be involved in any moderate or major military operation the United States might undertake in Africa or the Middle East. Additionally, as recent and ongoing operations in the Middle East and Africa show, I expect that a moderate to major military operation in Africa or the Middle East would include European allies and partners.

Question. What changes, if any, would you recommend to strengthen that transatlantic relationship, if confirmed?

Answer. The strength of the transatlantic relationship has always been based on shared values of democracy, individual liberty, and rule of law enshrined in the North Atlantic Treaty. However, shared security interests and U.S. leadership are the glue that binds the Alliance. Making the transatlantic relationship stronger requires sustained U.S. support and leadership of the Alliance, a re-dedication on the part of the next generation of leaders on both sides of the Atlantic to the founding principles and values of the Alliance, and sharing the responsibility among allies for supporting the Alliance so that future leaders continue to believe that investments in the Alliance are in their national interest. If confirmed, I would work to ensure U.S. support for these principles.

Question. As the United States pursues a pivot toward the Asia-Pacific region, do you believe there should be a reduction in the U.S. security commitment to Europe?

Answer. No. Even as we add focus on the Asia-Pacific, we must sustain our commitments to Europe. Europe is home to many of our most committed and capable allies and partners, many of whom who have sacrificed—and continue to sacrifice—alongside U.S. forces in Afghanistan, Iraq, and elsewhere. In fact, economic austerity, the transnational nature of today's threats, and the rise of other centers of power in a multipolar world, make a strong transatlantic alliance all the more important to retaining our influence and defending our common interests.

Question. As the International Security Assistance Force mission in Afghanistan nears completion, do you foresee a need for NATO to re-evaluate its purpose, missions and objectives going forward?

Answer. Since the end of the Cold War, NATO has continually re-evaluated its purpose, missions, and objectives. The end of the International Security Assistance Force mission in Afghanistan should be no different. The purpose of the Alliance as stated in the 2010 Strategic Concept is still valid, but the end of NATO combat operations in Afghanistan at the end of this year provides an opportunity for the Alliance to reassess the balance between various missions and to review objectives. I understand that NATO's transition in Afghanistan will provide an opportunity to reinvest in areas that received less focus during the ISAF operation, and allies will face the challenge of maintaining the level of interoperability that we achieved after years of operating together in Afghanistan.

Question. Do you believe NATO should reduce the number of U.S. non-strategic nuclear weapons based in Europe at this time? If so why and, if not, what conditions could lead to such a reduction?

Answer. The President stated in Berlin last June that we will work with our NATO allies to seek bold reductions in U.S. and Russian tactical weapons in Europe. The 2012 Deterrence and Defense Posture Review (DDPR) reflects the consensus position of NATO members, and it commits NATO to remaining a nuclear Alliance as long as nuclear weapons exist. The DDPR concluded that the "Alliance's nuclear force posture currently meets the criteria for an effective deterrence and defence posture." The DDPR also notes, however, that, NATO is prepared to consider further reducing its requirement for non-strategic nuclear weapons assigned to the Alliance in the context of reciprocal steps by Russia, taking into account the greater Russian stockpiles of non-strategic nuclear weapons stationed in the Euro-Atlantic area.

Question. What is your assessment of the participation of NATO partners other than the U.S. in the European Phased Adaptive Approach (EPAA) program and other NATO missile defense efforts?

Answer. It is my understanding that our allies contribute to NATO missile defense through common funding to the command and control network, hosting U.S. missile defense assets in the region, and contributing their own missile defense capabilities. If confirmed, I would work to ensure robust Allied participation in NATO missile defense.

Question. If confirmed, what recommendations, if any, would you have for maintaining the unprecedented level of interoperability between the U.S. and NATO partners after the draw down in Afghanistan?

Answer. NATO political leaders recognize that as ISAF ends, Alliance forces will need to maintain the interoperability we have developed during the last 20 years of continuous deployments. I understand that those leaders tasked NATO's military planners to work on several training-related Summit deliverables, including an updated Education, Training, Exercise, and Evaluation Policy; a new NATO Training Concept looking at the 2015 to 2020 timeframe; and a new Major Exercise Program for 2016 and onwards. If confirmed, I would recommend following through on the work already undertaken by our NATO military planners.

Question. Two Brigade Combat Teams have been inactivated in Europe. What is your understanding of the status of a rotational brigade designed to provide regular training with NATO forces to help maintain engagement and interoperability?

Answer. I understand that DOD will continue to allocate a U.S. Brigade Combat Team to the Response Forces Pool of the NATO Response Force (NRF). We have also requested funding to support the deployment of a U.S.-based battalion to Europe twice per year for up to 2 months at a time, so that our U.S.-based Army units can exercise with the NRF and train with allies and partners in the same way that units stationed in Europe do. The U.S. European Command has already developed a plan to integrate the rotational battalion into several U.S. Army Europe-led multinational exercises, as well as several NATO-led exercises.

RUSSIA

Question. What in your view are the major security issues in the U.S.-Russian relationship?

Answer. There are a number of areas where the United States and Russia can and do cooperate in order to build common ground and increase shared security. These include, but are not limited to, strategic arms reductions, counterterrorism and counter-extremism, Afghanistan, preventing proliferation of dangerous technologies, military relations, and dissuading Iran from becoming a nuclear-armed nation.

In the last 4 years, we have achieved significant results by cooperating in areas of mutual interest, and produced real benefits for the American and Russian people. We negotiated, ratified, and are successfully implementing the New Strategic Arms Reduction Treaty (START); supported the conclusion of Russia's WTO negotiations; adopted tough multilateral sanctions on Iran and North Korea to prevent them from pursuing nuclear weapons programs; and worked together on stabilizing Afghanistan.

Right now we have differences on a number of important issues—including Georgia's security and territorial integrity, NATO's role in European security, missile defense in Europe, and conventional arms control in Europe. If confirmed, I would continue to engage the Russian government to try to find common ground, and when appropriate, to speak out about our concerns. I would also continue to work with Russia in areas where our interests overlap because it is in the long-term strategic interests of the United States and our allies and partners to do so.

Question. Where do you see U.S. and Russian security interests aligning and where are they diverging?

Answer. Although points of friction exist in many areas of our relationship, the United States and Russia should be able to cooperate effectively in the many areas in which we share common interests, communicate effectively in areas where we have competing interests, and negotiate reasonably in areas where we have overlapping interests.

Among the most important areas where the United States and Russia have common interests is in countering the proliferation of weapons of mass destruction, particularly nuclear weapons. We have had significant cooperation with Russia on Iran. The Russians supported U.N. Security Council Resolution 1929, which imposed international sanctions on Iran's ballistic missile and nuclear programs. Similarly, Russia is a key player in reversing North Korea's nuclear and missile programs, and shares common interests in this regard. As a third key example, Russia shares our concerns, and those of the international community, regarding what it views as the potential for regional instability should the conflict in Syria remain unresolved and should Syria retain its chemical weapons program. The United States and Russia have agreed on a framework to eliminate Syria's chemical weapons program. This framework represents an important step toward degrading the Assad regime's ability to use chemical weapons. Finally, the United States and Russia share strong interests in reducing the likelihood of nuclear war, as reflected in the New START treaty and in prior arms control treaties.

Question. In your view what policy steps should DOD take to improve relations with Russia? For instance, would you support increased military to military relations and exchanges with Russia?

Answer. DOD has been a proponent and a beneficiary of the "reset" with Russia. I understand that DOD is constantly looking for ways to improve military-to-military relations by ensuring that our cooperation with Russia serves U.S. and Russian interests and contributes to greater security in the Euro-Atlantic space. Over time, cooperation on a wide range of issues may help to build a foundation for more concrete and substantive cooperation with Russia.

Question. Would you support any joint development or other programs with Russia?

Answer. If confirmed, I would be interested in supporting joint programs that would benefit the United States. I understand that DOD recently proposed a project with Russia on Countering Improvised Explosive Devices (CIED) through the U.S.-Russia Defense Relations Working Group. If confirmed, I would support moving forward on CIED issues in both bilateral security cooperation and defense technology cooperation.

Question. Would you support joint U.S.-Russian cooperation on missile defense as a way to send a signal to Iran against Iran's developing long-range missiles or having nuclear weapons?

Answer. If confirmed, I would support U.S.-Russian cooperation on missile defense because it could improve the effectiveness of U.S. and NATO missile defenses, thereby improving our capability to protect the United States, our forces overseas, and our allies. Missile defense cooperation with Russia could strengthen capabilities across Europe to intercept Iranian ballistic missiles.

Question. Do you support efforts mandated by the New START Treaty Resolution of Ratification to seek reductions in the stockpiles of Russian and U.S. tactical nuclear weapons?

Answer. Yes.

Question. If so, what steps would you recommend for pursuing such reductions, if confirmed?

Answer. If confirmed, I would recommend that our focus for the next stage of arms control consist of bilateral negotiated efforts to increase transparency and pursue further reductions that could potentially include all nuclear weapons—deployed and non-deployed, strategic and non-strategic—while ensuring that we maintain our commitments to stability with other nuclear powers, deterrence of potential adversaries, and assurance of our allies and partners.

Question. What role, if any, should DOD play in responding to Russian attempts to exert influence over other countries on its border, including Ukraine, Georgia, and the Baltic countries?

Answer. I believe that stable democracies on Russia's borders contribute not only to Europe's security, but to Russia's as well. In that vein, if confirmed, I would stand by DOD's commitment to continue building partner capacity and establishing robust security cooperation programs with our partners throughout Europe and Eurasia.

Question. In your view, does Russia want Iran to have a nuclear weapon?

Answer. In my view, I do not believe Russia seeks a nuclear armed Iran. Russia is an active participant in the P5+1 dialogue. Russia also supported UNSCR 1929, which imposed international sanctions on Iran's ballistic missile and nuclear programs. I hope that we will continue to find ways to cooperate with Russia in dissuading Iran from a nuclear weapons path.

Question. After the Sochi Olympics are over, do you expect any change in Russia's pursuit of its interests in the international environment?

Answer. Russia has consistently pursued what it perceives as its national interests, and I believe that it will continue to do so after the Sochi Olympics.

Question. In your view, what additional risk does the presence of Russian Iskander missiles in Kaliningrad pose to NATO allies and military facilities in Europe?

Answer. President Putin recently dismissed reports that his country has deployed missiles in its Kaliningrad region. That said, any potential deployment of state-of-the-art missiles near the Alliance's eastern borders is destabilizing to the region, is cause for concern, and would underscore the need for regular communications between Russian and NATO military leaders.

CHINA

Question. China's defense spending has had double-digit increases annually for about the past 20 years. While a certain amount of military growth is to be expected for a country experiencing the kind of economic growth that China has had over about that same period, the types of platforms and capabilities China is developing have been interpreted by some as designed to project power, limit access and freedom of movement by potential adversaries, and conduct military operations at increasing distances. Such developments, coupled with strident rhetoric and a lack of transparency, stoke growing concerns about China's intentions in the region.

How would you characterize the current U.S. relationship with China?

Answer. The U.S.-China relationship is characterized by elements of both cooperation and competition. In November 2013, National Security Advisor Ambassador

Susan Rice stated that the United States seeks to manage inevitable competition while forging deeper cooperation on issues where our interests converge—in Asia and beyond. The United States continues to seek to manage those areas where we may have differences and pursue opportunities to engage where there is mutual benefit.

Question. To what extent do you believe the policies and actions of the United States and other major regional and international actors will affect the direction in which China develops?

Answer. The policies and actions of the United States and other actors can and do influence the direction of China's development. By that same token, U.S. policy and actions, or the policies and actions of any country or group of countries, cannot alone determine China's future. The choices of China's leaders play the central role in charting China's future. However, no country has done more to assist, facilitate, and encourage China's national development and integration into the international system than the United States. More fundamentally, the United States can also help to shape the environment in which China makes its strategic choices, and in so doing, encourage China to "do the right thing".

Question. What do you believe are the objectives of China's steady increase in defense spending and its overall military modernization program?

Answer. China is pursuing a long-term, comprehensive military modernization program designed to improve the capacity of its armed forces. Taiwan contingencies remain the principal focus of much of this modernization, which seeks to enable China to fight and win high-intensity regional military operations of short duration. One can also see growing indications that China's expanding regional and global influence is prompting it to develop capabilities for missions that go beyond China's immediate territorial concerns.

Question. How do you believe the United States should respond to this Chinese military growth and modernization?

Answer. The United States has been and should remain the foremost military power in the Asia-Pacific region. The United States must continue to monitor developments in China's military modernization and continue encouraging China to be more transparent about its military and security affairs. This lack of transparency breeds suspicion and the potential for misperception of intentions. The U.S. response to China's military modernization should be flexible and supported by two efforts: first, the continued evolution of our force posture in the Asia-Pacific region and the maintenance of our global presence and access, including through the strengthening of our alliances and partnerships; and second, the transformation of our own capabilities in such areas as countering anti-access and area denial challenges.

Question. What effect is China's military growth having on other countries in the region?

Answer. China's rapid rise and the relative lack of transparency surrounding its intentions are increasingly creating uncertainty in the region. Other countries in the region are closely watching the growth of China's military, and how its military acts. Tensions between China and its neighbors in the East and South China Seas have increased, spurring regional actors to modernize their forces.

Security concerns regarding Chinese military intentions have contributed to a greater focus on regional forums where issues may be addressed multilaterally and the need to adhere to international law and norms can be amplified. Such security concerns regarding Chinese military intentions have also led to stronger demand signals from regional countries and the United States as a security partner of choice.

China's annual defense budget is growing faster than its economy—with average annual increases in defense spending topping 10 percent over the past decade. In certain respects, China's growing military capabilities create opportunities to partner and cooperate where U.S. interests, regional states' interests, and China's interests converge.

Question. What is your assessment of the current state of U.S.-China military-to-military relations?

Answer. If confirmed, I would look for ways to strengthen the U.S.-China military-to-military relationship. I understand that the U.S.-China military-to-military relationship has experienced positive momentum over the past year. Our approach should continue to pursue this positive development, consistent with U.S. interests and values, in pursuit of sustained, substantive dialogue; concrete, practical cooperation; and enhanced risk reduction measures to manage our differences responsibly. At the same time, I would seek to ensure that we balance these exchanges with continued, robust interactions with allies and partners across the region.

Question. Do you believe that the United States should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. Military exchanges are an important mechanism to build trust and mutual understanding, reducing the risk for miscalculation. I believe that military exchanges with China can be valuable, but can only truly move the relationship forward if China is equally committed to open and regular exchanges. If confirmed, I would continue to encourage China to act responsibly, both regionally and globally. I would also support deepening and enhancing our military-to-military relationship with China.

By most accounts, China has become more assertive in its claims of sovereignty in various domains, including maritime, air and space. There are numerous examples of this assertiveness, but one in particular is China's increased aggressiveness in asserting its excessive maritime claims in the South China Sea.

Question. What role should the United States play in the ongoing maritime disputes in the South China Sea?

Answer. The United States is a Pacific nation that has a national interest in freedom of navigation, open access to Asia's maritime domain, the maintenance of peace and stability, free and open commerce, and respect for international law in the South China Sea. The United States should sustain its presence in the South China Sea and uphold its commitments to its allies and partners in order to maintain peace and stability in the region. I believe all parties should resolve their disputes through peaceful means and in accordance with customary international law, without resorting to the threat or use of force.

Question. How does the presence of the U.S. Navy in the South China Sea influence this maritime dispute and, in your view, would an increase in U.S. activity in that region serve to stabilize or destabilize the situation?

Answer. Although the United States does not take a position on the territorial and maritime disputes, I believe it is essential for the U.S. Navy to maintain a visible presence and assert its freedom of navigation and overflight rights in the East and South China Seas in accordance with customary international law. The U.S. Navy is a key provider of the military presence that underlies peace and stability across the globe, including in the Asia-Pacific region.

If confirmed, I would work with our military commanders to evaluate the appropriate level of naval activities in the region to maintain peace and stability as well as unimpeded access for lawful commerce and economic development.

Question. Cyber space has become a critical realm for civilian and military applications and, as a result, it represents a potentially substantial vulnerability. There are reports that China is aggressively pursuing cyber espionage and warfare capabilities, and would likely seek to take advantage of U.S. dependence on cyber space in the event of a potential conflict situation.

If confirmed, what would you do to help ensure our military is protected in cyber space and prepared to defend itself against a cyber attack?

Answer. The protection of U.S. military networks from cyber attack is one of DOD's core missions. If confirmed, I would continue to support DOD's ongoing efforts to develop new capabilities to defend military networks, support the development of our cyber workforce, and develop partnerships with other government agencies, the private sector, and our allies and international partners to strengthen our collective defenses. DOD must also continue to ensure that we are able to conduct operations in degraded information environments.

Question. In January 2007, China used a ground-based missile to hit and destroy one of its weather satellites in an anti-satellite test creating considerable space debris and raising serious concerns in the international community. Since then, China has continued its active pursuit of ballistic missile and anti-satellite technology.

What is your view of China's purposes for its pursuit of these capabilities?

Answer. In my view, this test was a troubling incident. It was yet another element of China's comprehensive, long-term military modernization effort to develop and field disruptive military technologies, including those for anti-access/area-denial, as well as for nuclear, space, and cyber warfare.

Question. What do you see as the long-term implications of such developments for the U.S. military, for U.S. national security, and for U.S. interests in space?

Answer. The United States should seek ways to protect our interests in space; space systems are vital to our national security and our economy. I believe we need to enhance our deterrence and ability to operate in a degraded environment by increasing the resilience of national security systems against threats to space-based architectures and developing space control capabilities. If confirmed, I would continue to pursue partnerships with commercial suppliers, collaboration with international partners, and changes in our own architectures and operational tactics that

can improve the resiliency of our systems and strengthen strategic stability in space.

NORTH KOREA

Question. What is your assessment of the current security situation on the Korean peninsula?

Answer. I believe that the security situation on the Korean Peninsula is serious and deserves our constant vigilance. North Korea has demonstrated—through its December 2012 missile launch and February 2013 nuclear test—that it has the capabilities and the will to undermine regional stability in pursuit of its national interests.

North Korea's provocative behavior, large conventional military, pursuit of ballistic missile and weapons of mass destruction programs, and proliferation activities continue to be serious concerns for the United States and our allies and partners in the region. Kim Jong Un's unpredictability adds to our concerns.

If confirmed, I would ensure that our military deterrence of North Korean aggression continues to support our diplomatic efforts to end North Korea's nuclear and missile programs.

Question. What is your understanding of the threats posed to the United States and our allies by North Korea's ballistic missile and WMD capabilities?

Answer. North Korea's ballistic missile and weapons of mass destruction (WMD) capabilities, and its proliferation of these capabilities, pose a serious threat to U.S. forces in the region as well as to our regional allies and partners. Although largely untested at longer ranges, these capabilities could pose a direct threat to U.S. territory. If confirmed, I would do my best to ensure that DOD uses its full range of resources and capabilities to defend against these threats.

Question. What concerns you most about North Korea and, if confirmed, what would you do to address those concerns?

Answer. Although under Kim Jong Un the North Korean regime has demonstrated unpredictability, my understanding is that Kim Jong Un remains in full control and is consolidating his power. We must remain vigilant against North Korean provocations given Kim Jong Un's continuing efforts to consolidate power, North Korea's tactic of escalating tension to draw parties to the negotiating table, and the onset of the spring military training cycle. If confirmed, I would work to ensure the Department is prepared for any potential provocations by North Korea.

REPUBLIC OF KOREA

Question. What is your understanding of the current status of the U.S.-South Korean security relationship?

Answer. The U.S.-ROK Alliance is a linchpin of peace and stability in the Asia-Pacific region. The United States and the Republic of Korea (ROK) are making shared investments in the security of the Korean Peninsula to enhance our combined ability to deter North Korean aggression. Our security relationship represents part of a comprehensive, strategic Alliance and plays an important role in contributing to stability not only on the Peninsula but also throughout Northeast Asia and globally.

Question. If confirmed, what measures, if any, would you take to improve this security relationship?

Answer. My understanding is that DOD and the ROK are focused on developing the strategies, interoperable capabilities, and processes needed to deter and, if necessary, respond to North Korean provocations. If confirmed, I would support a continued emphasis on these areas.

The United States and the ROK continue to work closely to realign U.S. forces on the Peninsula and to assess the conditions for the transition of wartime operational control to the ROK.

If confirmed, I would also prioritize supporting the ROK as it plays a greater role in regional and global security befitting its economic status and influence. I would work diligently to maintain strong, cooperative relationships with my ROK and interagency counterparts to ensure that we all work together to strengthen the Alliance.

Question. What is your view regarding the timing of the transfer of wartime operational control from the United States to South Korea, now planned for December 2015, and what will you do to ensure this transition takes place as planned?

Answer. The United States and the ROK remain committed to the transfer of wartime operational control on the timeline identified in the Strategic Alliance 2015 (SA2015) plan. Wartime OPCON transition has always been conditions-based, and,

if confirmed, I would support the continued assessment and review of the security situation on the Korean Peninsula in the context of implementing SA2015.

Question. Do you believe that the security relationship with South Korea should remain focused on defense of the Korean Peninsula, or should U.S. forces stationed in Korea be available for regional or global deployments?

Answer. I believe it is essential that the United States remains committed to the combined defense of the Korean Peninsula in accordance with our mutual defense treaty obligations. U.S. force posture on the Peninsula contributes to the stability of the Northeast Asia region. Our ROK allies are a linchpin for peace and stability on the Korean Peninsula and in the Asia-Pacific region, and we expect that they will remain so into the foreseeable future.

Question. What is your assessment of the security benefits of the force repositioning under the Land Partnership Plan and the Yongsan Relocation Plan and how does repositioning U.S. forces change the way they will operate on the Korean Peninsula?

Answer. I understand that both of these plans are based on the security benefits of being outside the tactical effective range of North Korean artillery. By being outside the range of North Korean artillery, U.S. forces gain operational advantages regarding force protection, survivability, and consolidation of personnel and equipment. There are also other potential benefits of the force repositioning, including efficiencies, reduced costs, and contribution to the political sustainability of our forward presence on the Korean Peninsula.

Question. What is your understanding of the U.S. obligations in the event of an attack on South Korea by North Korea, and under what circumstances do you believe the U.S. Armed Forces should be committed to engage North Korean forces in response to an attack on South Korea?

Answer. It is my understanding that under the Mutual Defense Treaty of 1953, when the political independence or security of the ROK or the United States are threatened by an external armed attack, the United States and the ROK will maintain and develop appropriate means to deter armed attack. Patterns of North Korean rhetoric and provocations necessitate that the two sides continue to consult closely so that Alliance responses are effective.

Question. Does the new Counter-Provocation Plan affect U.S. obligations in the event of an attack on South Korea by North Korea?

Answer. My understanding is that the new Counter-Provocation Plan is a ROK-led, U.S.-supported contingency plan developed by mutual understanding between the Chairmen of the Joint Chiefs of Staff of both countries after a November 2010 North Korean artillery attack on Yeonpyeong Island. The plan improves the Alliance readiness posture to allow for a strong and decisive combined South Korean and U.S. response to North Korean provocations and threats.

Question. How has the new Counter-Provocation Plan changed the consultation process between the ROK military and USFK after a provocation by North Korea?

Answer. The Counter-Provocation Plan includes procedures for consultation and ensures a well-coordinated combined action in response to North Korean provocations and threats. I understand that U.S. Forces Korea (USFK) and the ROK military closely consult to ensure the proper response and control escalation.

Question. Does the ROK military have the obligation to consult with USFK before it engages in a response to a provocation by North Korea?

Answer. The ROK military has the inherent right of self-defense to respond to a provocation by North Korea. However, USFK and the ROK military closely consult on a daily basis to deter North Korea and maintain peace and stability on the Korean Peninsula.

JAPAN

Question. How would you characterize the U.S.-Japan security relationship?

Answer. The U.S.-Japan Security Relationship is very strong and remains the cornerstone of our security strategy in the Asia-Pacific region. The U.S.-Japan relationship has underwritten the peace, stability, and prosperity of the region for more than a half century. Japan is a valued ally and anchor of democracy and prosperity in the region. The Joint Statement following the October 3, 2013, Security Consultative Committee meeting in Tokyo captures our full range of cooperative activities, which I would fully support, if confirmed.

Question. How does Japan's relationship with its regional neighbors, mainly China, North Korea and South Korea influence the U.S.-Japan relationship?

Answer. We encourage a healthy and open trilateral relationship among Japan, the ROK, and the United States, to facilitate better relations between our two closest allies in northeast Asia. A strong trilateral relationship is an important element

of deterrence against North Korean challenges. We also continue to encourage both China and Japan to increase the level of communication between the two sides in order to reduce the possibility of mistakes or miscalculation in contested areas.

Question. What steps, if any, do you believe Japan ought to take to become a more active partner in security activities with the United States and in the international security arena?

Answer. We welcome any steps Japan chooses to take that will enable it to play a larger role in the Alliance, and to increase its contributions to regional and global security. In my view, the steps Japan is considering represent a natural evolution in policy that reflects its stature on the global stage.

Question. What is your view of the U.S.-Japanese joint development of the Standard Missile-3, Block IIA missile defense interceptor, and of the overall program of cooperation between the United States and Japan on ballistic missile defense?

Answer. Japan is one of our most significant ballistic missile defense partners. Our cooperation on development of the SM-3 Block IIA and Japan's commitment of more than \$1 billion to the program serve as excellent examples of that partnership. Japan also hosts the U.S. Navy SEVENTH fleet, which includes multiple ballistic missile defense-capable Aegis ships; is licensed to co-produce the PATRIOT PAC-3 missile; and hosts a U.S. AN/TPY-2 missile defense radar with plans to host a second such radar by the end of 2014.

Question. The current plan is for the closure of the Marine Corps Air Station on Okinawa after the construction of a Futenma Replacement Facility (FRF) at Camp Schwab on Okinawa. While the Governor of Okinawa has signed the landfill permit to allow construction of the FRF to go forward, local opposition and a long construction timeline make the completion of the FRF uncertain.

What is your opinion of the prospects for the successful construction of the Futenma Replacement Facility at Camp Schwab on Okinawa?

Answer. In short, DOD is optimistic about the prospect for successful construction.

In December of last year, the Governor of Okinawa signed the land reclamation, or landfill, permit. This had been a significant political hurdle. This year, DOD expects to work closely with Japan on concrete steps to move forward with the landfill and the eventual construction of airfield facilities at the current Marine Corps Camp Schwab. Many of the necessary relocations within Camp Schwab required for the landfill are already underway, and we have every confidence that Japan will continue to make progress on this very significant forces realignment effort.

Question. Is the cost-sharing arrangement between the United States and Japan to pay for the relocation of U.S. forces from Okinawa to Guam and the costs associated with the continued presence of U.S. forces in Japan equitable and appropriate? Why or why not?

Answer. I understand that a revision to the Guam International Agreement signed last year by the Secretary of Defense and Secretary of State with their Government of Japan counterparts reaffirmed Japan's commitment to provide \$3.1 billion (in fiscal year 2012 U.S. dollars) in cash toward the construction of Marine Corps facilities on Guam and the Commonwealth of Northern Mariana Islands (CNMI). For Japan, this unprecedented commitment of funds for U.S. military facilities on U.S. territory makes perfect sense, preserving a strong U.S. military presence in the region while simultaneously reducing the pressure associated with the U.S. presence in Okinawa. It is also consistent with our policy to have a geographically distributed, operationally resilient, and politically sustainable force presence in the region.

The Japanese funds will not only assist in the construction of operational and administrative facilities for the U.S. Marines, but also contribute to the construction of training areas in Guam and the CNMI to ensure the operational readiness of our regional forces. I understand that we will also support opportunities for Japan to train at these facilities.

Question. How, in your view, does building an unpopular new airfield on Okinawa, one that could take 7 to 10 years to finish at a cost of at least \$3.6 billion, serve to improve the U.S.-Japan relations in general and the U.S. military-Okinawa relations in particular?

Answer. Since at least 1996, the United States and Japan have shared the view that there is a need to relocate the existing Marine Corps Air Station at Futenma, around which a significant population had grown over the years. Since 1999, we identified a replacement site in the vicinity of Camp Schwab near the village of Henoko. This was confirmed most recently in the October 2013 2+2 meeting Joint Statement.

I understand that the Department is confident that once this facility is completed and operational, the resulting benefit to the areas of Okinawa south of Kadena Air Base, where the vast majority of the Okinawa population resides, will be apparent

to all. At the same time, this facility will allow the Marine Forces on Okinawa to maintain their operational readiness and be able to respond quickly as the regional emergency force. The Marine Corps will be able to continue to train as they fight, as a combined arms team.

Question. Is Japan carrying a fair share of the burden of the cost of the U.S. presence in Japan under the current Special Measures Agreement?

Answer. My understanding is that Japan is meeting its obligations as negotiated under the 2011 Special Measures Agreement. If confirmed, I would monitor implementation to ensure that Japan continues to do its part to sustain the U.S. presence.

INDIA

Question. What is your view of the current state of the U.S.-India security relations?

Answer. In my view, the United States and India have built a strong strategic partnership, in which defense cooperation plays a major role, and the Secretary is strongly committed to this partnership. Over the past decade in particular, we have built a bilateral defense relationship that includes a robust number of military exercises, a strong track record on defense trade, and increasingly close consultations on regional security issues. As India continues its military modernization efforts, we look to India to be a net provider of security in the region, and a partner on issues ranging from maritime security to humanitarian assistance/disaster relief (HA/DR) to broader regional stability.

Question. How has the recent diplomatic crisis regarding the Indian diplomat who was arrested for failing to pay her domestic servant the minimum wage affected the U.S.-India security relationship?

Answer. This was an unfortunate incident, but it does not change the important bilateral defense agenda we are pursuing with India. I understand that we are putting this incident behind us and moving forward.

Question. If confirmed, what specific priorities would you establish for this relationship?

Answer. If confirmed, there are several key priorities with India that I would pursue. First, I would continue to build on the significant progress we have made in our military-to-military relationship, working to increase the scope and complexity of exercises, encouraging exchanges, and continuing to prioritize senior-level engagements. We should continue to consult closely on issues affecting broader regional stability and look to expand in other areas of cooperation. For example, I would continue the work over the past several years on maritime security and HA/DR, and I would continue to work toward increasingly sophisticated defense trade and technology, among other areas.

Question. What is your assessment of the current relationship between India and Pakistan?

Answer. Long-term stability in South Asia will depend upon progress in the India-Pakistan relationship, and I was encouraged by the meeting last year between Prime Minister Singh and Prime Minister Sharif on the margins of the U.N. General Assembly. DOD hopes to see more similar high-level engagements, and a greater degree of trust built up between India and Pakistan to ease longstanding tensions, particularly along the line of control. In the meantime, we continue to build our own bilateral relationships with both countries and to urge them to be transparent with each other on their activities in the region.

Question. In your view, what impact has the ongoing tension between Pakistan and India had on the stability of Central and South Asia generally, and on the prospects for lasting security in Afghanistan?

Answer. Central and South Asian stability will require India, Pakistan, and Afghanistan to achieve some level of sustained, mutual cooperation and trust, as well as productive relationships between Afghanistan and all of its neighbors, including those in Central Asia. We also need to recognize the need for separate bilateral relationships in the region, including the strategic partnership between India and Afghanistan, which is not, in my view, directed at any other country nor is it a threat to Pakistan. If confirmed, I would encourage all parties to be transparent with each other regarding their activities and relationships in the region.

REPUBLIC OF THE PHILIPPINES

Question. What is your view of the current state of U.S.-Philippine military-to-military relations?

Answer. We have a very strong U.S.-Philippine defense partnership and a strong alliance. We have made progress in several key areas and continue to work with

the Armed Forces of the Philippines as they pursue long-term military modernization and to increase cooperation on shared security challenges.

Question. What do you believe the U.S. goals should be in the Republic of the Philippines and how best can we achieve those goals?

Answer. If confirmed, I would support ongoing efforts to build Philippine capacity with respect to internal security, military modernization, and a role as a positive contributor to regional and global security challenges, such as counterterrorism and maritime security; and I would continue to support the negotiations now underway to enhance our defense cooperation and facilitate an increased rotational presence of U.S. forces in the Philippines.

Question. Do you believe Operation Damayan was a successful disaster relief effort? What were the lessons learned from the operation? What are the needed areas of improvement for U.S. disaster relief operations and joint task force operations in this area?

Answer. Operation Damayan was a very successful disaster relief effort, which saw a rapid international response and closed cooperation within the U.S. Government and between the U.S. Government, the Government of the Philippines, and other responders. The process of examining and incorporating lessons learned is ongoing, and if confirmed I would work to ensure we build on this experience to keep improving our own disaster response capabilities and those of our partners.

Question. Do you anticipate a reduced or increased U.S. military footprint or change in mission for U.S. military forces in the Philippines in the near to mid-term?

Answer. The United States and the Government of the Philippines are discussing ways to facilitate an enhanced rotational presence in the Philippines. I do not want to prejudge the outcome of those discussions. With regard to operations in the Southern Philippines, if confirmed, I would ensure that DOD continues to assess the requirements for the Joint Special Operations Task Force-Philippines mission as security improves in that region.

Question. In your opinion, how important is the Global Security Contingency Fund to U.S. security assistance efforts in the Philippines?

Answer. If confirmed, I would support the employment of the Global Security Contingency Fund as an important mechanism to help build partner capacity in the Philippines, particularly in the areas of maritime security and maritime domain awareness. This will help us support the Philippines' efforts to bolster important capabilities in these key areas.

INDONESIA

Question. What is your view of the current state of military-to-military relations with Indonesia and, specifically, Kopassus?

Answer. As the U.S.-Indonesia defense relationship continues to expand, we view Indonesia as a regional leader and a strong defense partner. Bilateral defense cooperation focuses on enhancing the Indonesian military's (TNI) capability to conduct the external missions of maritime security, peacekeeping, and humanitarian assistance/disaster relief. Bilateral defense trade is becoming an important part of our relationship as well.

With respect to the Kopassus military unit, we see Indonesian progress on human rights issues and continue to work with Indonesia to improve human rights and accountability.

Question. Do you favor increased U.S.-Indonesian military-to-military contacts? If so, under what conditions? Why?

Answer. If confirmed, I would favor increased U.S.-Indonesia military-to-military engagement to build on the progress in our defense relationship over the last decade. I would also advocate for continued DOD support to Indonesian defense reform efforts, including continued progress towards prevention of, and accountability for, human rights violations.

Question. What is your understanding of the factors that informed the decision to re-engage with Kopassus members?

Answer. I understand that in recent years we have seen a great deal of progress with respect to human rights and accountability. I believe that then-Secretary Gates' decision to resume limited engagement in 2010 was a recognition of this progress and a way to encourage continued improvement. Since then, I believe we have seen gradual improvement and, if confirmed, I would work to support Indonesia's continued progress.

Question. What is your view of the commitment of the Indonesian military leadership to professionalization of its Armed Forces, adhering to human rights standards,

improving military justice, and cooperating with law enforcement efforts to investigate and prosecute those military personnel accused of human rights abuses?

Answer. I believe that Indonesia has made significant progress in institutionalizing respect for human rights and in ensuring accountability when abuses do occur. If confirmed, I would continue to maintain an open dialogue between DOD and Congress on how best to keep this trend moving in the right direction, and, would support continued emphasis on necessary further reforms in our military engagement with Indonesia.

Question. If confirmed, what would you do to encourage respect for human rights and accountability in the Indonesian military?

Answer. If confirmed, I look forward to working with Indonesian leadership on this important issue through increased engagement with senior Ministry of Defense officials, personnel exchanges, and support for professional military education. We would also continue to encourage positive actions taken by the Indonesian Government when violations do occur, including: suspensions and removals of military officials accused and convicted of abuses, and cooperation with the prosecution of accused military members.

COLOMBIA

Question. Plan Colombia has enabled the Colombian Government to make significant gains against the FARC (Revolutionary Armed Forces of Colombia) and other paramilitary forces in Colombia, as well as enabled the government to secure many previously ungoverned areas. Since fiscal year 2000, the United States has provided more than \$7 billion to support Colombia's efforts to counter the threat of transnational criminal organizations and various terrorist groups.

What are your views regarding the current situation in Colombia focusing upon: (1) the current military and political situation in Colombia; (2) the ability of the Colombian military to control its territory; and (3) ongoing DOD programs?

Answer. It is clear to me that as one of our strongest defense partners in the region, Colombia has taken tremendous steps, with important U.S. support, to improve its own internal stability and citizen security. Colombia has dramatically improved its security throughout the country against several threats, including insurgents (such as the FARC), paramilitaries, criminal bands, and drug trafficking organizations. However, Colombia's efforts against such groups are not finished, nor is stability in Colombia assured. Colombia's Ministry of Defense, with U.S. support, continues to apply pressure on organizations like the FARC, while also working to address citizen security and external defense issues.

We also see Colombia as an increasingly capable and willing partner in addressing common security challenges and contributing to efforts to improve stability more widely in the Western Hemisphere. While providing training and engagement on its own to many countries in the Hemisphere, Colombia has also partnered with us directly in Central America, an area of common security interest. We are confident that Colombia will continue to grow as a stable, interoperable partner in supporting security in the region.

Question. In your view, is the Colombian Government capable of sustaining the last decade's gains during this economic downturn and the scheduled decline in U.S. security assistance?

Answer. Yes, Colombia is capable of maintaining its gains, if it continues to build on the strengthened institutional, operational, and technical capacity that it has developed, with U.S. support, over the past decade. DOD is working closely with Colombia to prioritize and streamline our mutual security cooperation programs, understanding that resources are declining, while also acknowledging that certain U.S. support, such as Intelligence, Surveillance, and Reconnaissance (ISR), will remain critical to Colombia's success for the foreseeable future. Colombia has been a good partner in acknowledging the new realities of more limited resources, and DOD remains committed to working with our Colombian partners to address their emerging needs while sustaining their hard-won security gains.

Question. In light of budget conditions, do you believe continued U.S. security assistance to Colombia at the current levels is sustainable?

Answer. Security assistance to Colombia has been slowly decreasing, and given budget realities across the U.S. Government, it will likely continue to decrease in the future. We have made hard decisions about where to focus our cooperation with Colombia, and also identified some areas where continued U.S. support remains critical into the foreseeable future (institutional reform efforts, for example). Although we acknowledge that fewer resources are available for security assistance in Colombia, we will stand by Colombia as it continues to move toward improved sta-

bility and a greater strategic partnership with the United States, and this type of commitment will continue to require U.S. resources.

Question. In your view, what are the remaining U.S. supported programs that will need to be continued to “lock in” the progress that has been made?

Answer. I believe that the United States should continue to support programs that strengthen Colombian defense institutions, providing them the capacity to plan, forecast, and sustain their enhanced abilities. The United States should also continue to provide support to programs that provide the Colombian Government the technical and tactical edge, including critical capabilities it needs to defeat internal threats and guarantee stability over the long term.

CENTRAL AMERICA AND MEXICO

Question. During a Senate Armed Services Committee hearing in 2011, General Douglas Fraser—the Commander of U.S. Southern Command—and Admiral Winnefeld—the former Commander of U.S. Northern Command—discussed the increasingly dangerous region between Colombia and Mexico, and the devastating impact transnational criminal organizations are having on the people and security in this region. The United States has increased its assistance in this region, but—to date—DOD has had only a small role.

What is your assessment of the threats posed by transnational criminal organizations in this region?

Answer. I understand that the level of threat posed by Transnational Criminal Organizations (TCOs) to the Governments of Mexico and in Central America varies. While the Government of Mexico continues to deal significant blows to TCOs, Honduras and other Central American governments struggle. The governments in Central America continue to build nascent democratic institutions, but are often susceptible to the corrupting influences of TCOs. DOD believes that the Governments of Mexico and in Central America will continue to require varying levels of support to address the TCO threat. Although Mexico is a more mature partner and has developed better capabilities to face TCOs, Central American Governments lack the means to confront the challenge successfully.

Question. What is your understanding and assessment of DOD’s current activities in Mexico and Central America?

Answer. I understand that the Department conducts security assistance and security cooperation programs to advance the capacity of Mexico and Central American countries to maintain host nation security, and to advance regional and hemispheric defense cooperation and coordination. To support Mexican and Central American efforts against TCOs, DOD security assistance and security cooperation activities focus on professionalization and capacity building of regional Armed Forces. Within Central America, much of DOD’s efforts are focused on maritime capacities to help curb illicit trafficking and training programs emphasizing respect for human rights and being responsive to civil authority. Although these efforts are important, and have significantly improved the capacity of our partners to meet the TCO threat, defense cooperation alone will not be sufficient to defeat the TCOs.

CUBA

Question. What is your view of the need to review and, potentially, revise U.S. policies regarding Cuba?

Answer. DOD stands in support of the overall U.S. Government policy towards Cuba. When the administration periodically reviews our Cuba foreign policy, DOD has the opportunity to contribute to the interagency process. Current policy is that the United States is open to forging a new relationship with Cuba when the Cuban people enjoy fundamental human rights and the ability to determine their own political future freely. The policy also emphasizes targeted bilateral engagement that advances U.S. national interests and the enactment of measures that help reduce the dependence of Cuban citizens on the state.

Question. What is your opinion about the need for, and the pros and cons of, military-to-military contact with Cuba?

Answer. The Department views military-to-military engagements as a valuable tool for building confidence. I understand that we currently conduct limited military-to-military engagement, including at monthly fence line talks at the Guantanamo Naval Base, which focus on ensuring there are no misunderstandings on either side of the fence.

Question. In your view, is Cuba currently supporting or sponsoring international terrorism?

Answer. Cuba remains designated by the Secretary of State as a State Sponsor of Terrorism. I am not aware that the Cuban Government has provided weapons

or paramilitary training to terrorist groups in recent years. However, if confirmed, I would work with the Department of State on all State Sponsorship of Terrorism designations, and advise the Secretary of Defense on the Department's appropriate response to complement those designations.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. Do you support U.S. accession to the United Nations Convention on the Law of the Sea (UNCLOS)? If so, please explain why?

Answer. I strongly support U.S. accession to the Law of the Sea Convention. I believe that accession to the Convention would show a U.S. strategic commitment to upholding the established legal order that codifies the rights, freedoms, and uses of the sea and airspace, including those that are critical to the global mobility of U.S. military forces.

Question. From a national security standpoint, what do you see as the advantages and disadvantages to being a party to UNCLOS?

Answer. I see many advantages to being a Party to the Convention. The primary national security advantage of U.S. accession would be strengthening U.S. credibility to promote the robust set of rights, freedoms, and uses of the sea reflected in the Convention. These rights are vital to the mobility of U.S. military forces around the world. As a non-Party, we are impeded in our ability to encourage other states to respect the rules of law contained in the Convention.

I do not see any disadvantages to the United States joining the Law of the Sea Convention. If confirmed, I would work with Members of the Senate to address any concerns that may be raised.

Question. What is your understanding of the principal arguments against ratifying UNCLOS, and what is your response to those arguments?

Answer. One of the arguments I have heard Convention opponents make is that U.S. accession may erode U.S. sovereignty. I believe that U.S. accession to the Convention would strengthen U.S. sovereignty and sovereign rights. The Convention recognizes that a State Party may claim 12 nautical miles of territorial sea, may establish an exclusive economic zone, and may assert resource-related sovereign rights on its extended continental shelf. Other nations may question whether they are obligated to respect a U.S. assertion of these coastal State rights as a non-Party to the Convention.

PEACEKEEPING OPERATIONS

Question. In testimony before the House Committee on Foreign Affairs (July 29, 2009), Ambassador Susan Rice, U.S. Ambassador to the U.N., stated that the United States "is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to U.N. peacekeeping operations."

What is your view on whether the United States should contribute additional military personnel to both staff positions and military observers in support of U.N. peacekeeping operations?

Answer. Successful U.N. peacekeeping operations are in the national security interest of the United States, as they generally cost less than U.S. operations, reduce the burden on U.S. forces, and in many cases directly advance U.S. security interests. In principle, I support additional contributions of U.S. military personnel to key staff officer positions that provide an opportunity to add significant value to mission effectiveness, and where the mission is a strategic priority for the Department and the United States.

Question. If confirmed, would you support identifying methods through which the DOD request for forces system could be more responsive to requests for personnel support from multilateral peacekeeping missions, like the U.N.?

Answer. We should explore more effective ways to contribute U.S. personnel in support of the United Nations and overcome barriers to U.S. military personnel serving in U.N. headquarters. If confirmed, I would support seeking ways where the Department could identify desired positions and turnover dates, and work to fill those positions.

MASS ATROCITIES PREVENTION

Question. President Obama identified the prevention of mass atrocities and genocide as a core U.S. national security interest, as well as a core moral interest, in August 2011 under Presidential Study Directive 10.

What is DOD's role in addressing atrocity threats, and what tools does DOD have for preventing or responding to atrocities?

Answer. DOD is a member of the Atrocities Prevention Board, which has strengthened our efforts and given us more tools with which to work. DOD plays an important role in early warning and providing support to enable international partners to prevent mass atrocities. If confirmed, I would continue to ensure that the Department contributes to U.S. efforts to prevent mass atrocities.

AUTHORITY FOR USE OF MILITARY FORCE/LAW OF ARMED CONFLICT

Question. On September 18, 2001, Congress passed the Authorization for the Use of Military Force (AUMF) (Public Law 107-40), which provides that “the President is authorized to use all necessary and appropriate force against those nations, organizations, or persons he determines planned, authorized, committed, or aided the terrorist attacks that occurred on September 11, 2001, or harbored such organizations or persons, in order to prevent any future acts of international terrorism against the United States by such nations, organizations or persons.” This AUMF remains in effect and provides the legal authority for certain U.S. military actions.

What is your understanding of the role of the USD(P) in interpreting the AUMF and in the application of the AUMF to military activities?

Answer. The AUMF is the domestic legal basis for use of force against al Qaeda and associated forces. If confirmed as the USD(P), my role would be to advise the Secretary of Defense on the policy dimensions of proposed operations, working closely with interagency colleagues, to ensure our operations and activities are aligned to our policy and strategy objectives.

Question. In your view, does DOD have the legal authorities it needs to conduct military operations against entities responsible for September 11 and against those who plan further attacks against the United States?

Answer. Yes, I believe the 2001 AUMF is appropriate for such military operations.

Question. In your view, do existing authorities provide the U.S. military the flexibility it needs to respond to new and emerging terrorism threats?

Answer. Yes. The President’s authority as Commander in Chief provides sufficient flexibility to respond to emerging terrorism threats posed by organizations not covered by the 2001 AUMF. If confirmed, I would provide my best advice to the Secretary and Congress to ensure we’re doing everything we can to protect our Nation from terrorist attacks.

Question. Without the AUMF, would the U.S. military have the authority to use force, including deadly force against members of al Qaeda and associated forces? If so, under what circumstances?

Answer. Yes. The President’s authority as Commander in Chief empowers him to order military operations necessary to protect an important national interest, subject to Constitutional and statutory limitations on the scope and duration of military operations the President may order without the express authorization of Congress.

Question. What is the impact of the President’s Policy Guidance on Counterterrorism on the application of the AUMF with respect to counterterrorism operations?

Answer. The President’s Policy Guidance on Counterterrorism provides rigorous processes for reviewing and approving counterterrorism direct action operations. The President’s Policy Guidance on Counterterrorism is not limited to operations conducted solely under authority of the 2001 AUMF. If confirmed, I intend to ensure we remain committed to conducting counterterrorism operations lawfully, and in accordance with this policy.

Question. In your view, would it be appropriate for the United States to use military force against terrorist groups that have not engaged in hostilities directly against the United States, but merely shown an intent to do so? If so, under what circumstances?

Answer. The decisions to use military force are made based on careful, fact-intensive assessments to identify the individuals and groups that pose a threat to the United States. The most important policy consideration is the protection of U.S. lives.

UNMANNED SYSTEMS

Question. Over the last 4 years, the administration has worked to establish a framework that governs our use of force against terrorists—insisting upon clear guidelines, oversight, and accountability that is now codified in Presidential Policy Guidance the President signed on May 22, 2013. As a part of that effort, the President has indicated a preference that the U.S. military should carry out the use of force in active warzones, and beyond.

What are your views on whether DOD should assume greater responsibility for lethal strikes by remotely-piloted aircraft (drones)?

Answer. I believe that DOD is the part of Government where expertise in the use of force abroad should reside. Our best efforts come when we are working in concert with our interagency partners to collect intelligence, collaborate with the host nation, and synchronize our actions. If confirmed, I would remain committed to ensuring DOD is capable and ready to fulfill its under the President's Policy Guidance.

Question. What benefits or risks to national security would be implicated if the Department were to take the lead role in operating unmanned systems?

Answer. The application of force abroad in a disciplined and accountable manner is a core strength of DOD. I understand that countering terrorist threats must be a collaborative effort that involves experts from across our Government, and if confirmed as USD(P), I would join my counterparts to ensure we are executing counterterrorism operations in a manner that takes advantage of current capabilities and provides a solid foundation to protect our Nation from terrorist attack.

CONTINGENCY PLANNING

Question. One of the purposes of Goldwater-Nichols was to increase military and civilian attention on the formulation of strategy and contingency planning. The USD(P) is specifically directed to assist the Secretary of Defense in preparing written policy guidance for the preparation and review of contingency plans and in reviewing such plans.

What is your view of the civilian role, as compared to the military role, in the formulation of strategy and contingency planning?

Answer. The role of the civilian leadership is not only statutorily mandated, but is critical to translating broad national security policies and principles into a defense strategy and strategic priorities that ultimately drive military planning and resource allocation. Civilian and military perspectives are both important to successful defense planning. The Civilian leadership plays the principal role in providing policy guidance to shape military planning and then has the responsibility to review that planning to ensure it fits within the policy guidelines outlined. The role of military leaders and planners is to provide their best military advice on how to achieve objectives within the parameters outlined by the President and Secretary of Defense.

The USD(P) is responsible for developing the guidance issued by the Secretary for the preparation of contingency plans and for reviewing DOD plans to ensure that they support strategic objectives. The USD(P) is also uniquely responsible for facilitating interagency coordination on contingency planning efforts, as necessary.

Question. In your opinion, does the civilian leadership currently have an appropriate level of oversight of strategy formulation and contingency planning?

Answer. Yes, I believe that the current level of civilian oversight of strategy formulation and contingency planning is appropriate. If confirmed, I would sustain the strong and healthy dialogue that is already ongoing between civilian and military leaders.

Question. What steps do you believe are necessary to ensure effective civilian control and oversight of strategy formulation and contingency planning?

Answer. Based on my experience, I believe that current oversight processes work well. Active and forthright dialogue between the Secretary, the senior civilian leadership, and the senior military leadership is essential for effective oversight of strategy and planning. Although all parties may not agree on a specific issue, in my experience we currently have a very healthy dialogue on strategy and planning issues.

If confirmed, I would be committed to reflecting civilian and military perspectives in my recommendations to the Secretary of Defense to provide him the best possible advice in fulfilling his statutory responsibilities and meeting the intent of Goldwater-Nichols.

STRATEGIC REVIEWS

Question. What is your understanding and evaluation of the DOD's processes for strategic assessment, analysis, decisionmaking, and reporting for each of the following strategic reviews?

The QDR (section 118 of title 10, U.S.C.);
 The National Military Strategy (section 153 of title 10, U.S.C.);
 Global Defense Posture Review (section 2687a of title 10, U.S.C.);
 The Quadrennial Roles and Missions Review (section 118b of title 10, U.S.C.).

Answer. These strategic reviews are important opportunities for substantive dialogue with Congress, and to provide guidance to the entire defense enterprise. Senior DOD leaders use these reviews to guide the Department in meeting the defense objectives described in the broader National Security Strategy. They are valuable

processes for managing and guiding the defense enterprise. These documents set priorities across the Military Departments and Services, combatant commands, and components and are especially useful as the Department seeks to achieve its objectives more effectively and efficiently in light of the changing security and fiscal environment. The end products are also used to inform a variety of other audiences, including the U.S. public and the international community.

I have been involved in several of these reviews throughout my career and have seen a wide variety of review processes. Each review is different based on strategic circumstances, timing, and preferences of the senior defense leadership at the time. The Secretary of Defense determines how best to oversee these review processes. Candid deliberations, significant collaboration, and analytic rigor are important hallmarks of each of these reviews.

The QDR (title 10 U.S.C., section 118) requires the Department to conduct a comprehensive examination of the national defense strategy, force structure, force modernization plans, infrastructure, budget plan, and other elements of the defense program and policies of the United States with a view toward determining and expressing the defense strategy of the United States and establishing a defense program for the next 20 years. The QDR is designed to articulate a defense strategy in support of the President's National Security Strategy. Based on my experience, effective QDRs involve a wide range of stakeholders and ensure the defense strategy sets priorities for U.S. military force structure, plans, and programs. The Department has strengthened its dialogue on QDRs with both interagency and international partners in recent years, which has been beneficial.

As directed in title 10 U.S.C., section 153, the National Military Strategy is prepared by the Chairman as a means to convey the military's views on strategic priorities and associated risks.

The Department employs a continuous review process to determine the best mix of continental United States and overseas-based forces, and reports annually to Congress on the status of these assessments in the Global Defense Posture Review. This report, authored primarily by the Under Secretary of Defense (Policy) and the Chairman of the Joint Chiefs of Staff, provides a comprehensive review of DOD's overseas posture, new initiatives, defense agreements, and negotiations; the report also plays an important role in supporting future resource decisions.

Title 10 U.S.C., section 118b, requires the Department to complete a comprehensive assessment of the roles and missions of the Armed Forces and the core competencies and capabilities of the Department to perform and support such roles and missions. The Quadrennial Roles and Missions Review (QRM) describes how the Department will align organizational responsibilities and military capabilities to carry out its missions. The QDR should have a strong influence on the Department's assessment of its military roles and missions.

Question. If confirmed, what recommendations would you make, if any, to change title 10, U.S.C., that would update, improve, or make these reviews more useful to the Department and to Congress?

Answer. These reviews serve a useful function for the Department. They provide deliberate processes for DOD to reexamine and, if necessary, adjust the defense strategy and the capabilities, capacity, and posture of the Armed Forces. The security environment and resources available for the Defense Department are not static, and periodic reviews are useful ways to ensure the Department refreshes, as required, the strategic approach it takes to defend the Nation. If confirmed, I look forward to working with Members of Congress to ensure these reviews are relevant, timely, and valuable to both defense leaders and the U.S. Congress.

Question. If confirmed, what recommendations would you make, if any, to improve DOD's processes for strategic assessment, analysis, policy formulation, and decision-making relative to each review above?

Answer. First, I note that from my experience, successful strategic reviews feature the following:

- Strong participation from the senior defense leadership, including the Secretary, throughout the process.
- Transparent and inclusive processes and decision fora. Civilian and military leadership from each DOD component is essential, including: the OSD, the Joint Staff, the Military Departments and Services, and the combatant commands.
- A structured process that is co-led by the OSD and the Joint Staff, which allows the appropriate subject matter expertise to be brought into the discussion. Such a structure allows analysis to be vetted with the key experts and stakeholders before being presented to the Department's senior leaders.

Strategic reviews also require robust analytical efforts to assess the sufficiency and proficiency of current, programmed, and projected forces. This is important to ensure that the appropriate information, data, and analysis are available for each QDR so that key questions can be formulated and informed decisions made. If confirmed, I would seek to apply insights gained from previous reviews to ensure future reviews are efficient and effective.

Question. The law requires the QDR to identify the budget plan that would be required to provide sufficient resources to execute successfully the full range of missions called for in that national defense strategy at a low-to-moderate level of risk, and any additional resources (beyond those programmed in the current Future Years Defense Program) required to achieve such a level of risk. The law also requires the QDR to make recommendations that are not constrained to comply with and are fully independent of the budget submitted to Congress by the President.

What is your understanding and assessment of the Department's QDR analysis and decisionmaking processes to address these two requirements?

Answer. In my view, the Department's QDR process is strategy-driven and resource-informed. This is appropriate and ensures that the QDR usefully sets priorities for the Department. A strategy-driven approach allows the Department to take a comprehensive view of the strategic environment and identify the full range of missions that the Department would need to undertake to meet potential challenges to U.S. national interests. A resource-informed process motivates the Department to pursue innovation and reach difficult decisions in determining the best mix of investments in capabilities, capacity, and readiness to execute the strategy.

If, in the process of shaping the overall defense program, the Department's leaders were to determine that available resources were not sufficient to execute a defense strategy necessary to achieve the larger national security objectives set forth by the President, it would be incumbent upon them to say so.

Question. In your view, is there analytical and/or practical value in a defense strategy that is unconstrained by or independent of the current budget request or fiscal environment?

Answer. A defense strategy completely unconstrained by fiscal realities would not be very useful, in my view. An effective defense strategy should examine the future security environment to assess and prepare the Department for the range of missions needed to meet potential challenges to U.S. national interests. Although the QDR is strategy-driven, the defense strategy should also be resource-informed, particularly in this fiscal environment, because a defense strategy is effective only if it is executable. Because it is not possible to eliminate all risk from the Nation's security, devising a resource-unconstrained strategy and accompanying force structure is not practical, given that it is impossible to eliminate risk completely in such a complex strategic environment.

A resource-informed process ensures that the Department sets priorities among its investments and activities—a central function of an effective strategy—and considers risks explicitly.

Question. In your view, what would be the indications that the line between a budget-informed strategy and a budget-driven strategy has been crossed?

Answer. A budget-driven strategy defines ends, ways, and means based on available resources. A budget-driven strategy would contain little to no risk because, by definition, the strategy is designed to do only what can be done with available resources, regardless of what might be needed in terms of advancing national interests. A budget-informed strategy first considers national interests and objectives, then assesses how to achieve those objectives given the strategic environment, and then develops specific ways and means to try to meet desired ends, informed by the likely available resource levels. A budget-informed strategy would explicitly consider risks to the strategy that may result from the reality that resource levels are finite. A strategy that failed to describe any inherent risks would be an indication, in my view, that the line between a budget-informed and a budget-driven strategy has been crossed.

GLOBAL FORCE POSTURE

Question. As the Defense Department continues its assessment of projected budget cuts on its end strength, force structure, and other programs, it must also consider the costs, benefits, and risks associated with the permanent stationing of military forces in countries around the world. Based on a series of reports by GAO, evidence indicates that the Department is challenged in its ability to comprehensively and reliably estimate the cost of our global defense posture.

What is your understanding and assessment of the cost and benefits of the U.S. global defense posture and the stationing of U.S. military forces overseas?

Answer. The financial cost of overseas stationing must be balanced against U.S. national interests and national security imperatives. DOD's global defense posture enables military operations overseas and is a visible expression of U.S. national security interests and priorities abroad. In many cases, our posture is essential to interoperability with partners and encourages other nations to work alongside with us to address common interests. As with any defense investment, global defense posture decisions should be strategy-driven and carefully examine risk and trade-offs.

Question. In light of the force structure reductions associated with the Department's planned end strength cuts, and potentially even deeper future end strength cuts, if confirmed, how would you propose to allocate those reductions between forces based within the United States and forces stationed outside the United States?

Answer. If confirmed, I would allocate available forces consistent with our defense strategy, selectively tailoring U.S. defense presence overseas to advance and protect our interests most effectively. Any force allocation, whether permanent or rotationally deployed, would need to contribute measurably to a strategic priority, such as protecting the homeland, sustaining defense contributions to the Asia-Pacific rebalance, maintaining U.S. assurances of security in the Middle East, sustaining NATO Article V commitments, and retaining the ability to engage actively in building partnerships globally.

Question. What is your understanding and assessment of the DOD methodology and assumptions used to evaluate the relative cost of overseas posture compared to stationing forces in the United States?

Answer. Although forward stationing can, in many cases, meet the required presence for a specific mission with less total force structure—a consideration in an austere budgetary environment—there are also significant costs associated with forward stationing that merit careful review. When considering the relative costs and benefits of overseas stationing, the Department employs a rigorous process to evaluate the “business case” of each forward stationing decision, taking into consideration our national strategy, U.S. costs, host nation contributions, and political-military and operational considerations.

Question. If confirmed, what actions would you take or changes would you recommend, if any, to DOD's methodology and assumptions in determining the cost of overseas force posture compared to forces stationed in the United States?

Answer. At this time, in my view, the Department's methodology and assumptions for determining overseas force posture are appropriate and useful, given the complexity of the issues, and assist in our posture decisionmaking processes.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations, including the global train and equip authority (section 1206), targeted authorities in Yemen and East Africa, and the Global Security Contingency Fund.

In your view, what are our strategic objectives in building the capacities of partner nations?

Answer. The Department's principal capacity-building objective should be to develop partner nation forces and their supporting defense and security institutions so that they can provide for their own internal security, and, when necessary, take effective action against those that pose an external threat.

Question. What improvements, if any, would you recommend, if confirmed, to the strategic direction, oversight, and management of the Department's programs for building partner capacity (BPC) to ensure that these programs are executed consistent with our national security goals and objectives?

Answer. If confirmed, I would ensure that DOD capacity-building programs fulfill defined strategic requirements, close important capability gaps, and adhere to the Department's strategic guidance. As part of the Policy reorganization, we are creating a new DASD for Security Cooperation, which will help us ensure even better alignment between the BPC programs and our larger defense strategy.

Question. In your view, what should be the role of DOD, vis-a-vis the State Department and other civilian departments and agencies in efforts to build the capacity of foreign security forces?

Answer. Building the capacity of foreign security forces can best be achieved when the expertise and resources of the entire U.S. Government are brought together in a synchronized and coordinated manner. If confirmed, I would seek strong relationships with DOD's interagency partners, in particular the State Department, to support and inform our combined efforts.

COMBATING TERRORISM

Question. What is your assessment of the threat posed by al Qaeda and its associated forces to the U.S. Homeland, U.S. interests overseas, and Western interests more broadly?

Answer. Al Qaeda's intent and capability to attack the United States varies by affiliate, but striking the homeland is a common theme in al Qaeda's propaganda and planning. We take these threats seriously and, if confirmed, I would work to ensure the Department remains capable and ready to take appropriate action to counter them.

Question. What do you believe is the terrorism threat from al Qaeda and affiliated groups in each of the geographic combatant commands? Of these threats, what do you consider the highest counterterrorism priorities?

Answer. Al Qaeda's core has been relatively isolated by pressure from the United States. However, core al Qaeda and its affiliates and adherents in the Afghanistan-Pakistan region are a persistent and serious threat and remain a priority. New groups of geographically dispersed, diverse, and loosely affiliated extremists have also emerged, which pose localized threats to U.S. personnel overseas.

Yemen-based al Qaeda in the Arabian Peninsula (AQAP) has the intent and the capability to conduct attacks against the United States, and is among our highest counterterrorism priorities. The Department collaborates extensively with Yemeni forces to capture or kill key AQAP leadership and operatives, and our programs to train, advise, and equip Yemeni forces are critical to long-term efforts against AQAP.

In the Levant, thousands of foreign fighters are traveling to support the Syrian insurgency against the Assad regime. Al Qaeda-affiliated groups in Syria are becoming a growing regional threat and a potential threat to the U.S. Homeland. If confirmed, I would support improving coordination and information sharing on foreign extremist flows from Syria, and would continue working with Jordan and Israel to support their stability.

In Africa, Somalia-based al-Shabaab is a threat to U.S. and Western interests in the Horn of Africa, and potentially to the homeland through its links to al Qaeda and Somali diaspora communities. Al-Shabaab has demonstrated the capability to stage complex, high-profile attacks against Western targets outside Somalia and to harm U.S. citizens abroad.

Algeria-based al Qaeda in the Islamic Maghreb (AQIM) and its regionally based associates threaten U.S. persons and interests in North and West Africa. These threats have flourished from instability in Libya and Mali, leading to hostage situations and high-profile attacks in Mali and Niger. However, my understanding is that there is no current, credible evidence that AQIM is a direct threat to the U.S. Homeland.

Question. What is your understanding of the Department's role in the U.S. strategy to combat terrorism?

Answer. The U.S. Government is engaged in a multi-departmental, multi-national effort guided by the National Strategy for Counterterrorism. DOD supports this strategy principally by building the capacity of partner security forces, collecting intelligence, conducting information operations, and, when appropriate, conducting operations to capture or kill terrorists who pose a continuing, imminent threat to U.S. persons.

Question. Are you aware of any nexus between non-state actors and criminal networks?

Answer. It is my understanding that there is a strong nexus between illicit non-state actors and criminal networks worldwide. I am aware of a few examples that pose threats to our national security interests and to those of our allies and partners. The Taliban continues to finance their insurgency activities through regional trade in illicit drugs. Additionally, the transnational drug cartels in Mexico rely on global criminal networks to sell their product and expand into new markets, and pirates off the coast of Somalia depend on land-based illicit networks to finance their operations.

Question. Given your current knowledge of DOD's programs, do you believe resources are aligned in a manner consistent with these counterterrorism priorities?

Answer. Yes. I believe the Department's counterterrorism resources are currently aligned consistent with the priorities outlined in the National Strategy for Counterterrorism. If confirmed, I would continue working with the Secretary, the Joint Staff, the Combatant Commands, and interagency partners to ensure that alignment of the Department's resources evolves with the nature—and geography—of the threat.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent legislation, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of the overall effectiveness of this authority?

Answer. Section 1208 remains critical to our counterterrorism efforts across a wide range of operational environments. If confirmed, I would make it a priority to gain a deeper understanding of the costs, benefits, and risks associated with activities conducted under section 1208 authority.

Question. The fiscal year 2014 appropriations bill makes a number of changes to the prohibitions and vetting process required for training and equipping foreign security forces that have committed gross violations of human rights.

What is your understanding of the impact of these changes on the 1208 program?

Answer. I fully support ensuring that foreign security forces who have committed gross violations of human rights are prohibited from receiving U.S. training or equipment. If confirmed, I would ensure that Congress is fully informed of any required changes to our programs as a result of this provision in the DOD Appropriations Act, 2014.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS ACTIVITIES

Question. On an annual basis, DOD's counternarcotics (CN) program expends more than \$1.0 billion to support CN operations, build the capacity of certain foreign governments around the globe, and analyze intelligence on CN-related matters.

What is your understanding and assessment of the DOD CN program?

Answer. It is my understanding that the Department's role in U.S. counterdrug efforts is to employ knowledge, skills, and capabilities to confront a range of national security threats associated with drug trafficking and related forms of transnational crime. As the lead agency for the detection and monitoring of aerial and maritime drug traffic bound for the United States, DOD has provided critical counterdrug support to State, local, Federal, and foreign law enforcement partners to combat the flow of illicit drugs into our country. DOD counterdrug efforts support the National Security Strategy, the National Drug Control Strategy, and the Strategy to Combat Transnational Organized Crime.

Question. What is your understanding of the Department's CN authorities?

Answer. In my experience, the Department's counternarcotics authorities are important tools to confront the threat of narcotics trafficking, terrorism, and transnational organized crime that increasingly pose a threat to our national security interests. Under its CN authorities, the Department serves as the lead U.S. Government agency for the detection and monitoring of aerial and maritime drug traffic bound for the United States, supporting State, local, tribal, Federal, and international law enforcement partners' activities to stem the flow of illicit drugs into the United States. The CN authorities also provide for the National Guard's counterdrug activities in 50 States and 3 Territories and support the theater campaign plans of all 6 geographic combatant commands.

Question. Should the Department continue to play a role in countering illegal narcotics trafficking?

Answer. Yes. The global flow of illicit narcotics and other contraband commodities provides resources that finance transnational terrorism and insurgencies and that undermine legitimate government institutions, foster corruption, and distort legitimate economic activity. The Department's CN programs focus on building the capacity of our foreign partners to confront these issues, serving to prevent and deter conflicts that could require a much more costly U.S. military intervention in the future.

COUNTER THREAT FINANCE

Question. A number of officials in DOD and the Intelligence Community (IC) have called for investing significantly more resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking.

What are your views on the role of DOD in counter-threat finance activities?

Answer. I believe it is essential to engage all U.S. government tools to track and halt the illicit flow of money and to fight our adversaries' ability to access and use global financial networks. While DOD is not the lead U.S. Agency for Counter-Threat Finance (CTF), the Department works with and supports other departments, agencies, and partner nations through a unique set of capabilities, including long-term planning, network analysis, and intelligence analysis.

Question. In your view, should DOD seek to expand its support to other U.S. Government departments and agencies conducting counter threat finance activities?

Answer. I believe DOD should continue to support U.S. Government departments, agencies, and partner nations with CTF assistance, within existing DOD resources. If confirmed, I will work to ensure the Department remains fully engaged in the interagency process on counter threat finance and is postured to provide additional support if necessary.

NATIONAL STRATEGY TO COMBAT TRANSNATIONAL ORGANIZED CRIME

Question. Transnational criminal organizations are having a debilitating impact on the ability of our foreign partners to govern their nations and provide opportunities for their people. DOD is by no means the U.S. Government's law enforcement agency, but it does bring unique enabling capabilities to our Nation's Federal law enforcement agencies.

What role, if any, should the Department play in combatting transnational criminal organizations?

Answer. The President's Strategy to Combat Transnational Organized Crime (TOC) declares TOC a threat to national security. Although DOD does not serve as the lead U.S. Government agency for TOC, it has provided and can provide unique, important support to U.S. efforts. These DOD-specific capabilities primarily include military intelligence support and counter-threat finance support to U.S. law enforcement.

NUCLEAR WEAPONS COUNCIL

Question. The USD(P) is a member of the Nuclear Weapons Council (NWC).

In your view, what are the significant issues that the NWC should take up in the coming years?

Answer. The significant issues facing the NWC in the coming years involve the need to sustain and modernize our weapons and our infrastructure in a time of limited budgets. Key decisions will have to be made on the scope and sequencing of both weapon and facility modernization. Additionally, in the wake of recent incidents involving personnel in our nuclear forces, I believe the NWC should examine any relevant implications of the Secretary's ongoing internal and external reviews of the nuclear enterprise.

Question. If confirmed would you commit to active personal participation in Nuclear Weapons Council matters?

Answer. Yes. If confirmed, I would commit to active personal participation in NWC matters. I have participated in Council meetings previously and would welcome the opportunity to do so again.

NUCLEAR WEAPONS COMPLEX MODERNIZATION

Question. Section 1251 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84) required a report (the "1251 report") on plans for modernizing the nuclear weapons complex and strategic delivery systems. Prior to the Budget Control Act of 2011, the 1251 report that accompanied the New START treaty set forth a robust plan for modernizing the nuclear weapons complex and the triad of nuclear delivery vehicles.

Do you support the modernization plan set forth in the 1251 report?

Answer. I do support the modernization plan set forth in the report by the administration.

Question. Do you agree that modernizing the nuclear triad and replacing critical infrastructure, such as the Chemistry and Metallurgy Research Replacement (CMRR) at Los Alamos and the Uranium Processing Facility (UPF) at Y-12, should be national security priorities that should be addressed in a timely manner?

Answer. I agree that modernizing both the nuclear Triad and the critical infrastructure should be priorities that are addressed in a timely manner. DOD has reviewed how best to replace critical nuclear infrastructure like the UPF, and has identified a more cost-effective way forward. If confirmed, I would support efforts to modernize both the weapons and facilities in a cost effective manner.

DOD'S COOPERATIVE THREAT REDUCTION PROGRAM

Question. Do you think the Cooperative Threat Reduction (CTR) program is well coordinated among the U.S. Government agencies that engage in threat reduction efforts, e.g., DOD, the State Department, and the Department of Energy?

Answer. My understanding is that the CTR Program and other threat reduction programs executed by Federal agencies are effectively coordinated by the National

Security Council staff. If confirmed, I would work to ensure that the CTR program's activities continue to be well-coordinated within the Department and with inter-agency and international partners.

Question. The CTR program has been expanded to geographic areas outside the former Soviet Union, for example including Syrian chemical weapons destruction.

What in your view are the key proliferation concerns that CTR should address outside the former Soviet Union? Please explain.

Answer. In my view, the key proliferation concerns the CTR Program should address outside the FSU are preventing the proliferation of WMD technology, materials, and expertise, as well as delivery systems. The President has highlighted nuclear and biological materials proliferation as key threats, and if confirmed, I would ensure that the CTR Program strongly supports efforts to reduce these threats.

Question. Which countries outside the former Soviet Union should be the focus of this expansion of the CTR program?

Answer. The threat of WMD proliferation is a global concern. I understand that the CTR Program uses a threat-based approach to identify potential partners to allow for flexibility in responding to rapidly evolving situations. If confirmed, I would continue to use a threat-based approach as a principal driver of future CTR activities.

Question. CTR has completed its scheduled work with Russia.

What in your view is the next step, if any, in the U.S.-Russia CTR program?

Answer. I understand that although the CTR Program has concluded most of its work with Russia, there are still important nuclear security activities underway with Russia as part of the CTR Program, which now will occur under a new bilateral framework agreement (Multilateral Nuclear Environmental Programme in the Russian Federation) and a related bilateral Protocol. I also understand that Russia is interested in cooperating with the United States and other nations to address the threat posed by WMD terrorism. If confirmed, I would work with members of Congress to ensure current efforts are completed and would explore additional cooperative opportunities with Russia to reduce the threat posed by WMD.

ILLCIT ARMS TRAFFICKING

Question. What is your understanding of the problem of illicit arms trafficking and the role of the United States to deal with the problem?

Answer. Illicit arms trafficking, unfortunately, continues to be a pervasive, worldwide problem. Because it has a robust arms export control system, the United States can help partner countries, through dialogue, to develop best practices and methods of controlling the transfer of arms.

Question. In your view, to what extent, if at all, does the lack of national controls and enforcement on arms flows contribute to the illicit trafficking problem, and could efforts to respond to illicit trafficking be improved if other countries adopted and enforced national regulations on arms import, export, and transit similar to those of the United States?

Answer. Where illicit arms trafficking is widespread, partner countries should indeed seek to improve their export, import, and transit controls for the transfer of arms. It is important for other countries to advance these controls, to a standard closer to that of the United States, so the international community can make significant progress in combatting this problem.

Question. Do you think the arms trade treaty would enhance U.S. national security interests?

Answer. Yes. My understanding is that the Arms Trade Treaty (ATT) would help establish higher standards for the international transfer of arms. This would help in preventing them from reaching the illicit market. The treaty would also establish international norms so that countries can better regulate, on a national basis, the transfer of arms and thus prevent them from getting into the hands of terrorists or other criminals. In this regard, the ATT would enhance U.S. national security interests.

ARMS CONTROL

Question. What role do you see for arms control as a means of improving U.S. national security?

Answer. Arms control can contribute to U.S. national security by providing predictability, stabilizing the strategic or military balance between the United States and other nations at lower levels of weapons, constraining arms competition, and reducing the number of weapons other States possess. Such agreements, and their attendant verification provisions, make the United States safer, more secure, and

provide mutual transparency and predictability regarding military forces that builds confidence and assists in force modernization planning.

Question. What are your views on the possible next steps to address nuclear weapons issues between the United States and Russia?

Answer. The New START treaty strengthens strategic stability with Russia at reduced nuclear force levels and limits the number of Russian ballistic missile warheads. After a comprehensive review of U.S. nuclear forces, the President concluded that we can ensure the security of the United States and our allies and partners and maintain a strong and credible nuclear deterrent while safely pursuing up to a one-third reduction in deployed nuclear weapons below the limits established in the New START treaty. The administration is seeking to pursue such reductions through negotiations with the Russian Federation. To date, Russia has shown little interest in pursuing such negotiations, though discussions can and should continue.

Question. What conditions, if any, do you believe need to be met to further reduce strategic and non-strategic nuclear stockpiles through arms control?

Answer. The United States has publicly and privately conveyed to Russia its desire to seek additional negotiated reductions. However, Russia has so far shown no interest in negotiating further reductions. The administration will continue to engage with Russia in appropriate bilateral and multi-lateral venues to gauge interest in pursuing opportunities for arms control relating to both strategic and nonstrategic nuclear stockpiles.

Question. What might be the risks and benefits of pursuing reductions below New START force levels?

Answer. Further nuclear reductions would reduce the number of weapons that can be targeted against the United States, promote our nuclear non-proliferation objectives, and support strategic stability and predictability at lower numbers of nuclear weapons. Such a posture, if supported by modernization programs to maintain the effectiveness and credibility of our nuclear forces and by close consultation and strategic cooperation with allies and partner nations in Europe and Northeast Asia, poses few if any risks as the United States will have a sufficient stockpile to deter and/or respond to 21st century threats.

BALLISTIC MISSILE DEFENSE

Question. Do you support the policies, strategies, and priorities set forth in the February 2010 Ballistic Missile Defense Review and, if confirmed, will you implement them?

Answer. Yes, I support the conclusions of the 2010 Ballistic Missile Defense Review. If confirmed, I would continue ongoing U.S. implementation efforts.

Question. Do you agree that any ballistic missile defense systems that we deploy operationally must be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat?

Answer. Yes, it is important that we invest in effective, affordable missile defense systems that counter credible threats.

Question. Do you agree that ballistic missile defense testing needs to be operationally realistic, and should include Operational Test and Evaluation, in order to assess operational capabilities and limitations of ballistic missile defense systems, prior to deploying such systems?

Answer. Yes, I agree. Realistic testing is an essential element on the path to deployment.

Question. The two most recent attempted intercept flight tests of the Ground-based Midcourse Defense (GMD) system failed to intercept their targets, one in December 2010, using a Capability Enhancement-2 (CE-2) kill vehicle, and one in July 2013, using the older CE-1 kill vehicle. The Director of the Missile Defense Agency (MDA) has indicated that MDA's highest priority is correcting the problems that caused these flight test failures, and that such corrections need to be demonstrated through successful intercept flight testing.

Do you agree that it is essential to demonstrate through successful and operationally realistic intercept flight testing that the problems that caused these flight test failures have been corrected, and that the GMD system will work as intended, with both the CE-1 and CE-2 kill vehicles?

Answer. Yes, I fully support rigorous and realistic testing as an essential element to improving the reliability of the GMD system.

Question. On March 15, 2013, Secretary Hagel announced plans to improve our Homeland ballistic missile defense capability to stay ahead of ballistic missile threats from North Korea and Iran, including the deployment of 14 additional Ground-Based Interceptors (GBIs) at Fort Greely, AK, by 2017. Secretary Hagel stated that, prior to deploying these 14 additional GBIs, there would need to be con-

vidence that the system would work as intended, through successful testing of the GMD system with the CE-2 kill vehicle.

Do you agree with Secretary Hagel's "fly-before-you-buy" approach that the GMD system needs to demonstrate successful operationally realistic intercept flight test results before we deploy any additional GBIs?

Answer. Yes, I agree. "Fly-before-you-buy" is a fiscally responsible approach that will ensure the best use of defense funds.

Question. In a recent report, the Director of Operational Test and Evaluation said that the GMD flight test failures had raised questions about the robustness of the EKV design and recommended that the Department consider redesigning the EKV to be more robust. The Department is already planning a redesigned EKV, and Congress supported the funding requested for fiscal year 2014 to develop Common Kill Vehicle Technology.

Do you agree there is a need to improve the GMD system, including through development and testing of a redesigned EKV and improvements to sensor and discrimination capabilities, to increase the reliability and performance of the system against evolving homeland missile threats from North Korea and Iran?

Answer. Yes, I agree. GMD improvements will increase the reliability and performance of the system against evolving missile threats to the Homeland from North Korea and Iran.

Question. DOD has successfully completed deployment of Phase 1 of the EPAA to missile defense and is proceeding toward planned deployment of Phases 2 and 3 in 2015 and 2018, respectively, to protect all of NATO European territory against Iranian missiles.

Do you support the EPAA and other similar United States regional missile defense efforts and, if confirmed, will you work to implement them?

Answer. Yes. Our regional missile defenses provide an essential capability for defending U.S. forces abroad, and our allies and partners. If confirmed I would continue to support the EPAA as well as other regional missile defense efforts.

SPACE MANAGEMENT AND ORGANIZATION

Question. What role, if any, do you believe the USD(P) should play in the establishment of a national security space policy?

Answer. The role of the USD(P) is to oversee implementation of existing national security space policy in coordination with other departments and agencies and with Congress. The USD(P) also oversees development of new policy when circumstances warrant. If I am confirmed, I look forward to working with my Departmental and interagency colleagues, and the members of this committee, on implementing our existing national security space policies and on continually assessing developments in the international security environment that could affect our national security interests in space.

Question. Do you support the policy of having an operationally responsive space (ORS) capability as a means to lower the cost and time for the development of national security space payloads?

Answer. I support the objectives of ORS to meet warfighter requirements at a lower cost and in a more timely way. DOD remains committed to achieving those goals. To that end, DOD is working to ensure that resilience, survivability, flexibility, and responsiveness are considered in all future space programs.

Question. The launch of the ORS-1 satellite demonstrated that giving combatant commanders such as CENTCOM the ability to control a small operationally responsive satellite can be successful.

Would you support extending this capability to other COCOMs through the development of additional small tactically responsive satellites?

Answer. DOD is committed to satisfying validated and prioritized combatant commander requirements to the extent that resources allow. ORS-1 was an appropriate solution to the urgent need to support U.S. Central Command (CENTCOM) with increased intelligence during Operations Iraqi Freedom and Enduring Freedom, given the options available. As we move forward, we need to exhibit flexibility and look to both government solutions and increasingly capable and available commercial options for meeting urgent warfighter requirements.

Question. Space systems, like other military systems, rely on the availability of sufficient frequency spectrum. However, frequency spectrum is becoming scarce, and its sale has been used as a source of revenue for the government.

If confirmed, how will you work with the Services, the Joint Staff and other elements of DOD to ensure that the Department's frequency spectrum requirements are accounted for in interagency discussions about potential spectrum auctions?

Answer. DOD's Chief Information Officer (CIO) has the lead responsibility for DOD interests regarding spectrum requirements, including representing DOD in interagency discussions about spectrum auctions. If confirmed as the USD(P), I would ensure continued close cooperation between OSD Policy and the CIO organization, as well as with the Services and Joint Staff, to address the interests of all DOD and non-DOD spectrum users.

SPECIAL OPERATIONS FORCES

Question. The previous two QDRs have mandated significant growth in our Special Operations Forces and enablers that directly support their operations.

Do you believe QDR-directed growth in the size of Special Operations Forces can and should be maintained in light of current fiscal challenges?

Answer. Since 2001, the United States has doubled the size of U.S. Special Operations Command (SOCOM) and tripled its budget. As forces withdraw from Afghanistan, we have opportunities to redistribute Special Operations Forces (SOF) to engage with partner nations, build capabilities, and remain vigilant for future threats. If confirmed, I would work closely with my interagency counterparts to develop options for the best use of these capabilities and, with the Assistant Secretary of Defense (SO/LIC) and the Commander, SOCOM, to examine this issue further.

Question. Special Operations Forces heavily rely on enabling capabilities provided by the general purpose forces to be successful in their missions.

Answer. In light of current fiscal challenges, do you believe sufficient enabling capabilities can be maintained within the general purpose forces and that such capabilities will remain available to Special Operations Forces when needed?

I believe that, as the Department reshapes overall force structure, it will ensure that the excellent intelligence, medical, communications, and other support provided by the Services to both SOF and the general purpose forces continue. If confirmed, I would work closely with the Secretaries of the Military Departments, the Service Chiefs, the ASD(SO/LIC), and the Commander, SOCOM to ensure the Department achieves the appropriate balance.

Question. Do you believe Special Operations Forces should develop additional organic enabling capabilities in addition or in place of those currently provided by the general purpose forces?

Answer. I believe SOF's enabling requirements can likely be met by both internally reexamining the SOF force structure for "SOF-particular" requirements, and by establishing common Service capabilities to fill the remaining SOF enabler requirements. This arrangement allows for more focused application of SOF-specific funds and avoids duplication of capabilities with those of the Services.

Question. The Commander of SOCOM has sought more control over the deployment and utilization of Special Operations Forces. For example, the Secretary of Defense modified policy guidance for the combatant commands earlier this year that gave SOCOM, for the first time, responsibility for resourcing, organizing, and providing guidance to the Theater Special Operations Commands of the geographic combatant commanders and Special Operations Forces assigned to them. It has been reported that the Commander of SOCOM is also seeking new authorities that would allow him to more rapidly move Special Operations Forces between geographic combatant commands.

Please provide your assessment of whether such changes are appropriate and can be made without conflicting with civilian control of the military, infringing upon authorities provided to the geographic combatant commanders, or raising concerns with the State Department.

Answer. The Secretary of Defense continues to rely on the geographic combatant commanders to oversee all military activities in their respective areas of responsibility, including deployments of SOF personnel resourced by SOCOM. If confirmed, I would work closely with interagency colleagues to ensure deployments of SOF are fully coordinated and synchronized with the geographic combatant commanders, interagency partners, and the relevant Chiefs of Mission.

Question. Do you believe SOCOM is appropriately resourced to adequately support the Theater Special Operations Commands and Special Operations Forces assigned to them?

Answer. Yes, I believe we have the right resources in place today. If confirmed, I would work with the ASD(SO/LIC) and the Commander, SOCOM to understand more fully future requirements to support the Theater Special Operations Commands and Special Operations Forces assigned to them.

PRIVATE SECURITY CONTRACTORS

Question. What steps, if any, would you take, if confirmed, to ensure that any private security contractors (PSC) who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. I am aware that over the years and based on lessons learned, DOD has published formal policy and procedures for the use of PSCs as both a department instruction and as part of the Code of Federal Regulations (title 32 CFR 159). The Department has also contributed to the development and publication of U.S. national standards from the American National Standards Institute for PSCs. If confirmed, I would work closely with the Under Secretary of Defense for Acquisition, Technology, and Logistics to continue to ensure that PSCs act in a responsible manner.

DETAINEE TREATMENT POLICY

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes. The humane treatment of detainees is fundamental to the Department's detention operations in armed conflict. If confirmed, I would ensure that all our policies continue to be consistent with all applicable law, including Common Article 3 of the Geneva Conventions.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes. It is vital to the war effort for the Department to continue gaining intelligence from captured enemy forces, in a manner consistent with our values. The Department must hold its personnel to the highest treatment standards for detention in armed conflict.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes. If confirmed, I would ensure that all of the Department's policies and plans continue to be implemented consistent with Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. Yes. I believe that the manner in which the Department treats detainees in the current conflict reflects our character and sets the standards by which we should expect our own personnel to be treated in future conflicts.

TRAINING AND EQUIPPING FOREIGN SECURITY FORCES

Question. The fiscal year 2014 appropriations bill makes a number of changes to the prohibitions and vetting process required for training and equipping foreign security forces that have committed gross violations of human rights.

What is your assessment of these changes and their possible effect on the Department's ability to provide needed training, especially in countries such as Mexico, Afghanistan, and Myanmar?

Answer. The Secretary of Defense and I strongly support both the letter and spirit of the Leahy law. As I understand it, OSD Policy, the Office of the General Counsel, the Joint Staff, and the Combatant Commands are working closely with the State Department to assess the impact of the changes to the Leahy law in the fiscal year 2014 DOD Appropriations Act.

Question. What concerns, if any, do you have regarding the changes to the law?

Answer. Overall, I fully support the Leahy law and human rights vetting. As with any changes in law, if confirmed, I would ensure that we work to develop clear implementation guidance for our commanders. I do not have any specific concerns at this point.

Question. Would it be beneficial to have an exception to the prohibitions on training and providing assistance to allow the Department to provide limited training on human rights, rule of law, the English language, and the law of armed conflict?

Answer. It is my understanding that, at this point, the Department is not recommending any changes to the Leahy law.

PRISONER OF WAR/MISSING IN ACTION ACCOUNTING COMMUNITY

Question. In the 2010 National Defense Authorization Act, Congress directed that the POW/MIA accounting community be resourced sufficiently to realize significant increases in identifications, with the goal of 200 per year by 2015. Despite increasing resources, the Department continues to identify less than half that number annually. Last year, GAO found that the Department's response to that accounting-for goal has revealed and brought to the fore: "longstanding disputes [within the community] that have not been addressed by top-level leaders, and have been exacerbated by the accounting community's fragmented organizational structure. . . . Leadership from the USD(P) and Pacific Command have been unable to resolve disputes between community members in areas such as roles and responsibilities and developing a community-wide plan to meet the statutory accounting-for goal. Further, the accounting community is fragmented in that the community members belong to diverse parent organizations under several different chains of command. With accounting community organizations reporting under different lines of authority, no single entity has overarching responsibility for community-wide personnel and other resources."

What is your reaction to this finding?

Answer. I support GAO's findings, and understand that the Department began implementing these recommendations in 2013. If confirmed, I would continue implementation of GAO's remaining recommendations.

Question. What is your view of the organization, management, and budget structure of the POW/MIA community?

Answer. I support the recent findings of the GAO's review of the accounting community. The accounting community suffers from a fragmented organizational structure. The community is currently the subject of reviews by CAPE and the DOD IG, and should I be confirmed, I would be committed to making the community more efficient and effective.

Question. If confirmed, what changes would you propose to address these organizational, management, and budgetary issues that appear to be hampering the recovery mission of the POW/MIA community?

Answer. The accounting community suffers from a fragmented organizational structure, and command and control functions should be streamlined as much as possible. If confirmed, I would be committed to reforms to make it more efficient and effective, including examining all options and recommendations for streamlining the community.

Question. The committee has historically maintained that recovery operations in North Korea are a humanitarian effort, and should not be tied to the larger political and strategic issues surrounding North Korea. Since its inception in 1996 until its suspension in 2005, this program was seen by both parties as humanitarian in nature. The program is very important to the families of these missing servicemembers.

What is the status of resumption of recovery operations in North Korea?

Answer. In October 2011, the United States and the Democratic People's Republic of North Korea (DPRK) agreed to resume joint remains recovery operations in the DPRK. As I understand it, in March 2012, the United States suspended operations because the DPRK took actions that violated the arrangement to recover remains. I am committed to achieving the fullest possible accounting for all our missing, including the more than 7,900 U.S. servicemen from the Korean War of which we estimate that 5,300 are missing in the DPRK.

Question. Does the Department intend to wait until political and strategic issues are resolved before approaching North Korea?

Answer. Engagement with the DPRK on remains recovery issues is a national-level issue. As I understand it, the United States will engage with the DPRK when conditions permit.

MINERVA INITIATIVE

Question. The Minerva Initiative is a DOD-sponsored, university-based social science research initiative established in 2008 focusing on areas of strategic importance to U.S. national security policy. The goal of the Minerva Initiative is to improve DOD's basic understanding of the social, cultural, behavioral, and political

forces that shape regions of the world of strategic importance to the United States for better awareness for Phase 0 operations. OSD Policy and the ASD (Research & Engineering) co-lead this initiative. Since its inception, examples of research funded by the Minerva Initiative include insights into China's technology and innovation sector and counter narratives to help countering violent extremism. The Initiative has also established research and teaching chairs at the professional military education colleges.

What is your understanding and assessment of the Minerva Initiative?

Answer. Over the past 6 years, the Minerva Initiative has been a useful vehicle for enabling DOD to encourage and invigorate basic social science research in the academic community that supports better understanding of emerging national security issues. As a result of Minerva-funded research, the Department has strengthened its ability to draw on relevant and critical research in the social sciences and improved its understanding of emerging features in the global security environment. These insights have informed the development of the Department's defense strategy and policy.

Question. If confirmed as USD(P), what guidance, if any, would you provide to the Minerva Initiative, including incorporating the results from the research produced thus far and utilizing the expertise affiliated with this initiative?

Answer. The Minerva Initiative is a unique channel in that it enables Defense Department personnel to draw on the deep body of relevant knowledge that resides in academia. Most importantly, it facilitates a productive dialogue between decision-makers and academic experts that shapes the direction of future academic research. If confirmed, I would seek to ensure that as the Department shapes the Minerva Initiative in the future, it strengthens this dialogue so that academic research sponsored by the Initiative is fully informed by policy priorities.

Question. What are your thoughts on the usefulness of the Conflict Records Research Center at the National Defense University and how can it support the Minerva Initiative?

Answer. The Conflict Records Research Center performs a useful function, facilitating academic research by providing access to primary source materials captured in past conflicts and helps us learn the lessons of past wars. This support to academic research is very much aligned with the Minerva Initiative's mission to encourage social science research in support of national security.

The passage of the National Defense Authorization Act for Fiscal Year 2014 has authorized funding for the CRRC to become independent from government for the first time. I understand the Department is working with the Joint Staff, NDU, and other interested parties to find a mechanism to facilitate that transition.

As directed by the legislation, the Department will report back to Congress on that effort later this year.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the USD(P)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

SEQUESTRATION

1. Senator INHOFE. Ms. Wormuth, I believe we can all agree that sequestration has had a devastating impact on our Nation's military readiness. However, I also believe many are under the mistaken impression the Ryan/Murray agreement solved this problem. It did not. It helped, but the Department of Defense (DOD) is still subject to \$76.96 billion in sequester cuts in fiscal year 2014 and fiscal year 2015. Even with the small relief in fiscal year 2014 and fiscal year 2015, do you think we can execute the current Defense Strategic Guidance (DSG)? If you believe we can execute the strategy but with greater risk, can you explain what you mean by risk? To me, risk equals lives, the lives of our men and women in uniform.

Ms. WORMUTH. The Bipartisan Budget Act did provide the Department modest relief from the impact of sequestration in fiscal year 2014 and fiscal year 2015, but your observation is correct in that it still reduced the Department's budget relative to the President's fiscal year 2014 budget request. Using the 2012 DSG as our starting point, the 2014 Quadrennial Defense Review (QDR) updates the defense strategy in light of the evolving security and fiscal environments. The 2014 QDR will make clear that, at the President's budget level in fiscal year 2015, we could execute the defense strategy, although there would be increased risk in some mission areas. We would continue to experience gaps in training and maintenance over the near term. U.S. Forces would remain actively engaged in building partner capacity, but our engagement would be even more tailored and selective. Over the long term, we would face the risk of uncertainty that is inherent in the dynamic and shifting nature of the security environment. We would have less margin of error to address unforeseen events, and we would face some risk as others develop more advanced capabilities and weapons systems. Returning to sequestration level cuts would significantly increase these and other risks.

NATIONAL SECURITY AND DEFENSE STRATEGY

2. Senator INHOFE. Ms. Wormuth, a new QDR should be published soon. This is a critical document which sets DOD's strategies and priorities. Recently, DOD conducted a Strategic Choices Management Review, commonly called the Skimmer. The Skimmer explored different military capabilities based upon various funding scenarios. Both of you have watched the Skimmer process closely and Ms. Wormuth you have worked on the QDR itself. Many are concerned that in an effort to seek defense cuts, the new QDR will expose the United States to risks which recently would have been unthinkable. Therefore, will the QDR articulate where we are going to be taking additional risks?

Ms. WORMUTH. The 2014 QDR does address the risks associated with the updated defense strategy and the future force, as envisaged in the President's fiscal year 2015 budget submission. It also describes the risks that the Department would face should sequester-level cuts be re-imposed in fiscal year 2016, if proposed reforms are not accepted, or if budget uncertainty continues. At the President's budget level, we would be able to execute the strategy with increased risk in some mission areas; we would still be able to meet the requirements of the force planning construct, including the ability to defeat or deny any adversary. If sequestration continues, DOD would be unable to adjust the size and shape of the force in the more balanced way envisioned in the President's budget submission. As a result, readiness would be reduced, modernization would be slowed, and reductions in capacity and capability would challenge our ability to respond to strategic surprise. The 2014 QDR report will describe in detail the implications and risks of sequestration to the Department's ability to implement the updated defense strategy fully.

3. Senator INHOFE. Ms. Wormuth, will the defense cuts cause major changes to our National Security Strategy and National Military Strategy?

Ms. WORMUTH. The 2014 QDR will articulate that at the President's budget level, the Department can continue to implement the updated defense strategy, which incorporates the priorities of the 2012 DSG, with increased risk in some mission areas. If sequestration level cuts are reinstated in fiscal year 2016 or beyond, the Department's ability to implement the defense strategy fully would be at significant risk. The 2014 QDR takes into account the fact that the National Security Strategy is being updated. Because the National Security Strategy has yet to be finalized, I cannot comment on that document in any detail. As I understand it, the Chairman is considering options for developing an updated National Military Strategy this year given changes to the updated defense strategy, the budget environment, and

readiness. The updated defense strategy in the 2014 QDR will be the starting point for the Chairman, but I would defer to him to answer specific questions about the content of a new National Military Strategy.

4. Senator INHOFE. Ms. Wormuth, how can you tell when a strategy has gone from being budget-informed to being budget-driven?

Ms. WORMUTH. A budget-informed strategy would first consider national interests and objectives, then assess how to achieve those objectives given the strategic environment. Next, it would develop specific ways and means to meet desired ends, informed by the likely available resource levels. A budget-informed strategy explicitly considers risks to the strategy that may result from the reality that resource levels are finite. A strategy that failed to describe any inherent risks would be an indication, in my view, that the line between a budget-informed and a budget-driven strategy has been crossed. A budget-driven strategy defines ends, ways, and means based on available resources. By definition, a budget-driven strategy would describe little to no risk, because this kind of strategy is designed to do only what can be done with available resources, regardless of what might be needed to protect and advance national interests.

5. Senator INHOFE. Ms. Wormuth, how are our risks affected when you change from being budget-informed to being budget-driven?

Ms. WORMUTH. A budget-informed approach characterizes risk in terms of the ability of the force to accomplish the missions that are necessary to support the defense strategy. The 2014 QDR will describe the risks we as a nation would face should sequestration be re-imposed in fiscal year 2016 and beyond or if proposed reforms are not accepted. A budget-driven approach will almost always result in greater strategy risks than a budget-informed approach because it does not focus on interests, threats to those interests, and trade-offs among investment choices.

QUESTIONS SUBMITTED BY SENATOR DEB FISCHER

SECTION 8128: ENVIRONMENTAL STUDIES OF INTERCONTINENTAL BALLISTIC MISSILE
SILOS

6. Senator FISCHER. Ms. Wormuth, section 8128 of the Fiscal Year 2014 Consolidated Appropriations Act (H.R. 3547, Public Law 113–76) expressed congressional opposition to any environmental study relating to the silos of Minuteman III intercontinental ballistic missiles (ICBM). Specifically, it states: “None of the funds available to DOD shall be used to conduct any environmental impact analysis related to Minuteman III silos that contain a missile as of the date of the enactment of this act.” Please state DOD’s interpretation of this section.

Ms. WORMUTH. I understand that DOD has not yet developed a final position on the application and interaction of the relevant provisions, including sections 8136 and 8128 of the Consolidated Appropriations Act.

7. Senator FISCHER. Ms. Wormuth, what interactions has DOD had with other Federal agencies or parties outside of the Federal Government to prepare for conducting any environmental studies on the ICBM silos?

Ms. WORMUTH. I am not aware that DOD, or the U.S. Air Force, has met with any other Federal departments or agencies or parties outside the U.S. Government with respect to conducting environmental studies for the elimination of ICBM silos.

8. Senator FISCHER. Ms. Wormuth, does DOD believe the decisions with respect to New START treaty force structure depend on the results of an environmental study of ICBM silos?

Ms. WORMUTH. An environmental assessment that deals with ICBM silos that currently contain Minuteman III missiles is important to determining the best path forward to achieving New START treaty compliance, whether compliance is to be achieved through dismantlement of some missile silos or through keeping a certain number of such silos “warm”.

[The nomination reference of Ms. Christine E. Wormuth follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 30, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Christine E. Wormuth, of Virginia, to be Under Secretary of Defense for Policy, vice James N. Miller, Jr., resigned.

[The biographical sketch of Ms. Christine E. Wormuth, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF CHRISTINE E. WORMUTH

Education:

University of Maryland, School of Public Affairs

- September 1992–August 1995
- Masters of Public Policy

Williams College

- August 1987–May 1991
- Bachelor of Arts cum laude in political science and fine arts

Employment Record:

Office of the Secretary of Defense, Department of Defense, Pentagon

- Deputy Under Secretary of Defense for Strategy, Plans, and Forces
- August 2012–present

National Security Staff, The White House

- Special Assistant to the President for National Security Affairs and Senior Director for Defense
- December 2010–August 2012

Office of the Secretary of Defense, Department of Defense, Pentagon

- Principal Deputy Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs
- March 2009–December 2010

Center for Strategic and International Studies, Washington DC

- Senior Fellow, International Security Program
- December 2004–March 2009

DFI International, Washington, DC

- Principal, DFI Government Services
- April 2002–December 2004

Office of the Assistant Secretary of Defense for International Security Policy, Department of Defense, Pentagon

- Country Director for France, Belgium, Netherlands, and Luxembourg
- September 2001–March 2002

Office of the Under Secretary of Defense for Policy, Department of Defense, Pentagon

- Special Assistant to the Under Secretary of Defense for Policy for Programs and Legislation
- March 2000–June 2001

Office of the Assistant Secretary of Defense for Strategy and Threat Reduction, Department of Defense, Pentagon

- Senior Assistant for Strategy Development
- January 1998–February 2000

Office of the Secretary of Defense, Department of Defense, Pentagon

- Presidential Management Intern
- January 1996–December 1997

The Henry L. Stimson Center, Washington, DC

- Senior Research Assistant
- January 1995–December 1995

Alliance for International and Educational and Cultural Exchange, Washington, DC

- Policy Analyst
- April 1994–January 1995

House Foreign Affairs Europe/Middle East Subcommittee

- Professional Staff, Women's Research and Education Institute Fellow
- July 1993–April 1994

Honors and awards:

Office of the Secretary of Defense Medal for Exceptional Civilian Service, 2000

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Ms. Christine E. Wormuth in connection with her nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Christine Elizabeth Wormuth.
2. **Position to which nominated:**
Under Secretary of Defense for Policy.
3. **Date of nomination:**
January 30, 2014.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
April 19, 1969; La Jolla, CA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Andrew Rabe Kuepper.
7. **Names and ages of children:**
Madeleine Wilson Heinemann, 12.
Rachel Wilkens Heinemann, 12.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Williams College, 1987–1991, Bachelor of Arts, Political Science and Fine Art (1991).

University of Maryland, College Park, 1992–1995, Masters degree, public policy, (1995).

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Office of the Secretary of Defense, Department of Defense, Pentagon.

- Deputy Under Secretary of Defense for Strategy, Plans, and Forces
- August 2012–present

National Security Staff, The White House

- Special Assistant to the President for National Security Affairs and Senior Director for Defense
- December 2010–August 2012

Office of the Secretary of Defense, Department of Defense, Pentagon

- Principal Deputy Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs
- March 2009–December 2010

Center for Strategic and International Studies, Washington DC

- Senior Fellow, International Security Program
- December 2004–March 2009

DFI International, Washington, DC

- Principal, DFI Government Services
- April 2002–December 2004

10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Private consultant to Department of Homeland Security 2007–2008

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None currently.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

2012, \$750, Obama for America (\$250, \$500 contributions)

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Exceptional Civilian Service Award, Office of the Secretary of Defense, 2000.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Attachment A - Published Writings

- Summer 2007, “Independent Commission on the Security Forces of Iraq.” The Jones Commission.
- March 2007, “Rethinking the National Guard and Homeland Defense.” CSIS.
- July 12, 2006, “The Future of the National Guard and Reserves.” CSIS.
- July 1, 2006, “Beyond Goldwater-Nichols Phase III.” CSIS.
- July 28, 2005. “Elevating and Strengthening Homeland Security Policy” Beyond Goldwater-Nichols Phase II. CSIS.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Please see Attachment B for copies of written statements provided as congressional testimony in 2008 and 2009.

Other than congressional testimony, I have not made any “formal speeches” of which I have copies since 2008. As a Senior Fellow at CSIS, I spoke at many conferences and on panels, etc. Typically I would speak extemporaneously from an outline or bullet points.

Since joining the Obama administration in March 2009, I have also made a number of presentations at conferences and other professional gatherings, but again, I generally do not give formal speeches.

[Nominee responded and the information is contained in the committee’s executive files.]

Please see Attachment C for a list of events at which I’ve spoken in the last several years.

Attachment C - Speaking Engagements

- November 30, 2010, International Symposium on Societal Resilience.
- May 24, 2010, Smart Security 2010 Conference. “Technology - Leading the Way toward a Secure Future.”
- February 25, 2010, Women in Defense Symposium.
- November 19, 2009, Panel member at CSIS conference session on “The Evolving Role of the National Guard and the Services’ Reserves in Homeland Defense and Civil Support.”
- September 21, 2009, Domestic Operations Essential Requirements Conference.
- March 2008, Moderator of a panel at a CSIS Conference on “The Role of DOD, the Guard and the Reserves in the Homeland”
- January 24, 2008, Moderator of a panel at a CSIS Event on “Goldwater-Nichols: A Critical Look.”
- April 27, 2007, Naval Reserve Association Conference. “Increased utilization of the Guard and Reserve and the concerns regarding the operational Guard and Reserve.”

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

CHRISTINE E. WORMUTH.

This 10th day of March, 2014.

[The nomination of Ms. Christine E. Wormuth was reported to the Senate by Chairman Levin on March 26, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 19, 2014.]

[Prepared questions submitted to Mr. Brian P. McKeon by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?
Answer. Not at this time.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. N/A.

DUTIES OF THE PRINCIPAL DEPUTY UNDER SECRETARY OF DEFENSE FOR POLICY

Question. Section 134a of title 10, U.S.C., provides that the Deputy Under Secretary of Defense for Policy shall assist the Under Secretary of Defense for Policy (USD(P)) in the performance of his duties. Department of Defense Directive 5111.3 emphasizes that the Deputy Under Secretary of Defense for Policy advises and assists the USD(P), particularly on strategy formulation, contingency planning, and the integration of Department of Defense (DOD) plans and policy with overall national security objectives.

What is your understanding of the duties and functions of the Principal Deputy Under Secretary of Defense for Policy (PDUSD(P)) under current regulations and practices?

Answer. Section 137a of title 10, U.S.C., governs the position for which I have been nominated. It provides that the Principal Deputy “shall be the first assistant to an Under Secretary of Defense and shall assist such Under Secretary in the performance of the duties of the position of such Under Secretary and shall act for, and

exercise the powers of, such Under Secretary when such Under Secretary is absent or disabled.” DOD Directive 5111.03 (January 8, 2009) provides a broad statement that the Principal Deputy “advise[s] and assist[s]” the Under Secretary for Policy “with all responsibilities in providing advice and assistance to the Secretary of Defense.”

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of Defense and the USD(P) would prescribe for you?

Answer. Unless and until I am confirmed, I will not know the specific set of issues that will be assigned to me by the Secretary and the Under Secretary for Policy. If confirmed, it is likely that Ms. Wormuth and I will divide responsibilities so that each of us has a lead role on certain issues for Office of the Secretary of Defense (OSD) Policy.

RELATIONSHIPS

Question. What do you see as the relationship between the PDUSD(P) and each of the following?

The Secretary of Defense.

Answer. Pursuant to the authority, direction, and control of the USD(P), as the USD(P)'s principal assistant, the PDUSD(P) serves as a staff assistant and advisor to the Secretary of Defense on all matters concerning the formulation of national security and defense policy and the integration and oversight of DOD policy and plans to achieve national security objectives.

Question. The Deputy Secretary of Defense.

Answer. The PDUSD(P) provides support to the Deputy Secretary similar to that provided to the Secretary, as described above.

Question. The Under Secretary of Defense for Policy.

Answer. The PDUSD(P) is the principal assistant to the USD(P) and is responsible for assisting the USD(P) in carrying out all responsibilities, fulfilling functions, managing relationships, and exercising authorities provided for in law to the USD(P). The PDUSD(P) advises and supports the USD(P) with all responsibilities in providing advice to the Secretary of Defense in interagency fora (such as National Security Council system deliberations), engagement with international interlocutors, and in the Planning, Programming, Budgeting, and Execution processes inside the Department, including the Quadrennial Defense Review, the Nuclear Posture Review, and annual program and budget reviews.

Question. The other Under Secretaries of Defense.

Answer. Pursuant to the authority, direction, and control of the USD(P), the PDUSD(P) works closely with the other Under Secretaries of Defense and their Deputies to achieve the Secretary's objectives. This includes providing policy input, as appropriate, to each of them in their respective areas of responsibility (AOR).

Question. The Assistant Secretaries of Defense.

Answer. Pursuant to the authority, direction, and control of the USD(P), the PDUSD(P) works closely with Assistant Secretaries of Defense across the Department to achieve the Secretary's objectives. This includes providing policy input, as appropriate, to each of them in their respective AORs. As the USD(P)'s principal assistant, within the Office of the Under Secretary for Policy, the PDUSD(P) provides oversight of Assistant Secretaries on issues and at times as directed by the USD(P). The Policy team works together to provide the USD(P) and the Secretary with advice and recommendations on the full range of policy issues under consideration in the Department and provides policy oversight to ensure that the Secretary's guidance and decisions are implemented properly.

Question. The Secretaries of the Military Departments.

Answer. The PDUSD(P) works closely with the Secretaries of the Military Departments on a broad range of issues, including strategy development, force planning, and other areas in which the Military Departments are critical stakeholders.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. As the principal military advisor to the Secretary of Defense, the President, and the National Security Council, the Chairman has a unique and critical military role. The PDUSD(P) works closely with the Chairman and Vice Chairman to support the efforts of the USD(P), the Secretary, and the Deputy Secretary, and to help ensure that military advice is taken into account in an appropriate manner across a broad range of issues relating to strategy, force development, force employment, and other matters.

Question. The Service Chiefs.

Answer. The PDUSD(P) works closely with the Service Chiefs in support of the USD(P) on a broad range of issues, including defense strategy and policy develop-

ment, force planning, and other areas in which the Military Departments and Services are critical stakeholders.

Question. The Commanders of the Regional and Functional Combatant Commands.

Answer. The PDUSD(P) also works closely with the combatant commanders to support the efforts of the USD(P), the Secretary, and Deputy Secretary, particularly in the areas of strategy and policy, contingency planning, and policy oversight of operations.

Question. The Director of the National Guard Bureau.

Answer. The Principal Under Secretary of Defense for Policy works closely, through the Chairman and Vice Chairman, with the members of the Joint Chiefs of Staff. The Chief of the National Guard Bureau is a member of the Joint Chiefs, and has a specific responsibility to provide information on the non-Federalized National Guard.

Question. The General Counsel of DOD.

Answer. The PDUSD(P) works closely with the General Counsel on all policy issues that involve a legal dimension. Doing so requires significant and regular coordination on a broad range of issues.

Question. The Administrator and Deputy Administrators of the National Nuclear Security Administration.

Answer. The PDUSD(P) works with the Administrator and Deputy Administrator of the National Nuclear Security Administration, in support of the USD(P)'s oversight of strategy for nuclear weapons and forces, as well as USD(P)'s role on the Nuclear Weapons Council. The PDUSD(P) also works with the Administrator and Deputy Administrator to coordinate policies and programs to reduce nuclear threats.

Question. The Director, Defense Security Cooperation Agency.

Answer. The PDUSD(P) supports the USD(P) in exercising authority, direction, and control over the Director of the Defense Security Cooperation Agency (DSCA). The Policy organization works closely with DSCA to provide the Secretary with advice and recommendations on the full range of security cooperation issues facing the Department.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have worked on national security issues for Congress and the executive branch for most of the past 25 years. Consequently, I have gained experience and knowledge on a very broad range of regional and functional issues. This experience has also given me a deep understanding about how policy is developed and advanced in the two political branches.

For the last 16 years, I have also been assigned management responsibilities. In my current position, I supervise a staff of approximately 370 people and have served as the de facto chief operating officer for 2 National Security Advisors, managing the budget, administration, and personnel, as well overseeing the Executive Secretariat and the White House Situation Room. I believe I have demonstrated an ability to manage people and processes.

Through my long service in the Senate and in the White House, I have developed strong personal and professional relationships with many senior officials currently serving in DOD, as well as in the White House, the Department of State, and the Intelligence Community. These relationships will help me in the performance of my duties, should I be confirmed.

My experiences as Deputy National Security Advisor to the Vice President and in my current position have given me first-hand experience in diplomacy and policy-making at the highest levels of the executive branch.

Finally, my long experience working in the Senate would enable me, if confirmed, to help the Department in its frequent interactions with Congress. Having spent so much of my professional career working in Congress, I have deep respect for its role in national security policy and am committed to ensuring a regular dialogue between the Department and Congress.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges confronting the PDUSD(P)?

Answer. Section 137a of title 10, U.S.C., provides only a general statement of the duties of the position for which I have been nominated. It provides that the "Principal Deputy Under Secretary of Defense shall be the first assistant to [the] Under Secretary of Defense and shall assist such Under Secretary in the performance of the duties of the position of such Under Secretary and shall act for, and exercise

the powers of, such Under Secretary when such Under Secretary is absent or disabled." Until and if I am confirmed, I will not know the specific set of issues that will be assigned to me by the Secretary and the Under Secretary for Policy. If I am confirmed, it is likely that the USD(P) and I would divide responsibilities so that each of us has a lead role on certain issues for OSD Policy.

As a general matter, I recognize that the women and men of OSD Policy have been through a difficult period in the last year, with furloughs resulting from sequestration, followed by the government shutdown in October. Among other things, I intend to focus on our human capital to ensure that OSD Policy can continue to recruit and retain strong talent.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. See response above.

Question. If confirmed, what broad priorities would you recommend be established in terms of issues which must be addressed by the PDUSD(P)?

Answer. See response above.

AFGHANISTAN

Question. What are our key strategic objectives in Afghanistan and, in your view, are we on track to achieve those objectives?

Answer. I understand we continue to make progress in our pursuit of the remnants of core al Qaeda. Additionally, our Afghan partners are proving effective in their combat operations, which supports our security objectives in Afghanistan.

Question. If confirmed, what changes, if any, would you recommend to the U.S. strategy in Afghanistan?

Answer. If confirmed, I would support the current U.S. strategy to defeat of core al Qaeda, to include preventing its reconstitution in the region.

Question. What do you see as the United States' long-term strategic interests in Afghanistan after 2014?

Answer. The U.S. strategic interests in Afghanistan include the defeat of core al Qaeda in the region as well as the realization of a stable Afghan Government that can provide security to its people.

Question. Do you support the retention of a limited U.S. military presence in Afghanistan after 2014?

Answer. A post-2014 U.S. military presence can help Afghanistan by continuing a focused counterterrorism mission against core al Qaeda and by being part of a North Atlantic Treaty Organization (NATO)-led mission to train, assist, and advise the Afghan National Security Forces (ANSF). As the President has stated, however, the Afghan Government must conclude the Bilateral Security Agreement (BSA) in order for U.S. troops to remain in Afghanistan.

Question. If so, what in your view should be the size, mission, and duration of such a residual U.S. military force?

Answer. The President has stated that if a BSA is signed, a small U.S. force could remain in Afghanistan with NATO allies to carry out two narrow missions: training and assisting Afghan forces, and counterterrorism operations to pursue any remnants of core al Qaeda. If confirmed, I will support DOD's work to develop options and a recommendation on the appropriate force size.

Question. If the United States and Afghanistan are unable to conclude a BSA that ensures legal protections for such a residual U.S. military force, should the United States withdraw its military forces from Afghanistan?

Answer. The President will make that decision at the appropriate time. In the meantime, I understand that the United States is prepared to sign the BSA. The longer it takes the Afghan Government to conclude the BSA, the greater the risk for higher costs and constrained options for the United States and coalition partners.

AFGHANISTAN TRANSITION

Question. Do you support the transition of full responsibility for the security of Afghanistan to the ANSF by 2014?

Answer. Yes. I understand that the ANSF now has the lead for virtually all operations, conducts these operations independently, and over the last year has proven itself to be up to the task. The ANSF has prevented insurgents from making any significant gains.

Question. In your view, what are the main challenges to the success of such a transition?

Answer. I believe the main challenge will be ensuring that the ANSF has the necessary financial support to preserve the progress achieved so far. This will require a continued U.S. commitment as well as assistance from allies and partners.

Question. What do you see as the major challenges of transitioning away from a DOD-lead for programs currently in Afghanistan to a civilian-led effort in Afghanistan?

Answer. There are many missions that DOD led during the counterinsurgency campaign (e.g., rule of law development) that will transition to civilian agencies post-2014. If confirmed, I would work with U.S. departments and agencies—particularly the Department of State—the international community and the Afghan Government to ensure that we are positioned to protect our strategic interests in Afghanistan with appropriate assistance, consistent with the President's decision on the post-2014 military mission.

AFGHANISTAN NATIONAL SECURITY FORCES

Question. What is your assessment of the progress in developing a professional and effective ANSF?

Answer. I am informed that current ANSF officers and leaders are very competent, but more are needed. The ANSF has grown rapidly over the last few years, but developing a larger leadership cadre takes time and sustained effort.

Question. What do you see as the main challenges to building the capacity of the ANSF, including after 2014?

Answer. My understanding is that capacity at the ministerial and institutional level is one of the main challenges facing the ANSF. Having advisors with the right skill sets in place will be critical in mitigating this challenge. Sustaining financial resources and ensuring the ANSF continue to build capacity to execute funding will also be critical in maintaining security gains made over the past 3 years.

Question. If confirmed, what recommendations, if any, would you make for addressing those challenges?

Answer. If confirmed, I would closely consult and coordinate with Afghan leaders, NATO allies, and other partners to ensure we are working together on shared priorities. We must also ensure we are promoting professionalism and self-sufficiency within the Afghan forces.

Question. What do you see as the main challenges to sustaining the ANSF beyond 2014, and if confirmed, what recommendations, if any, would you make for addressing these challenges?

Answer. My view is that we need to ensure that the Afghan forces continue to receive the necessary international support and assistance, as well as the training and equipment, to plan and conduct missions independently. If confirmed, I would recommend that we continue to focus on improving the Afghans' ability to conduct planning, contracting, and logistics functions at the ministerial levels.

Question. Do you agree that any future reductions from the current ANSF troop level should be based on the security conditions in Afghanistan at the time the reductions would occur?

Answer. It is difficult to contemplate or foresee the size or structure of the ANSF over an indefinite time period. I agree that, for the remainder of the Obama administration, the size of the ANSF should be governed primarily by security conditions.

U.S. RELATIONSHIP WITH PAKISTAN

Question. What is your assessment of the current relationship between the United States and Pakistan?

Answer. The relationship has improved since 2012, and the recent visit of Prime Minister Sharif to Washington was an indicator of that improvement. I attribute the improvement to both countries' decision to refocus the relationship on areas of mutual interest. This includes promoting peace and reconciliation in Afghanistan, eliminating core al Qaeda, and aiding Pakistan in its fight against militants that target the United States, Pakistan, and other nations. The relationship still faces significant challenges, but it is in a stronger position than it was. If confirmed, I would engage my Pakistani counterparts on common interests, as well as in areas where we have disagreement.

Question. Do you see opportunities for expanded U.S.-Pakistan cooperation on security issues? If so, how would you prioritize these areas of cooperation?

Answer. I believe we should continue to take a practical approach to the security relationship with Pakistan. We should focus on areas where our strategic interests overlap, while engaging in areas where they do not. In their joint statement issued last October, President Obama and Prime Minister Sharif agreed that no country's

territory should be used to destabilize its neighbors. This presents an opportunity for strengthened cooperation on counterterrorism.

Question. What is your assessment of Pakistan's efforts to combat the threat of international terrorism?

Answer. Pakistan has suffered significant military and civilian casualties in the fight against terrorism and deployed large numbers of forces in counterinsurgency operations along the Afghan border. These actions attest to the extent of Pakistan's commitment to the fight against terrorism. At the same time, we have longstanding concerns that we regularly discuss with the Pakistan government about the use of its territory by terrorist or extremist organizations that threaten U.S. interests and the security of Pakistan's neighbors.

Question. What conditions, if any, should the United States place on its security assistance to Pakistan?

Answer. The provisions of U.S. law and regulations governing the transfer of governing U.S. security assistance to foreign governments, including those found on the Enhanced Partnership with Pakistan Act of 2009 (P.L. 111-73), provide appropriate conditionality.

THE HAQQANI NETWORK

Question. The Haqqani Network, which has been linked to a number of deadly attacks on Afghan, U.S., and other coalition forces in Afghanistan, operates from safe havens in Pakistan.

In your view, should additional steps be taken to track and counter the illicit financial activities of the Haqqani Network, and if so, what role—if any—should DOD play?

Answer. I understand that the U.S. Government is taking action against the Haqqani Network through DOD action in Afghanistan and Treasury's decision on February 6, 2014, to freeze the assets of three suspected militants. If confirmed, I would work across the U.S. Government, and with international partners and organizations, to counter the Haqqani Network.

IRAQ

Question. What in your view are the key U.S. strategic interests with regard to Iraq?

Answer. The United States has a strategic interest in helping Iraq build a sovereign, stable, self-reliant country with a representative government that can be a partner in the region and not a safe haven for terrorists. We are working to develop a strong, long-term strategic partnership in accordance with the U.S.-Iraq Strategic Framework Agreement. Strengthening our partnership with Iraq will help us to advance significant interests, including counterterrorism cooperation against threats to our national security and that of the region, economic growth and the stabilization of global energy markets, and the development of democracy.

Question. What in your view are the major areas, if any, for security cooperation between the United States and Iraq?

Answer. We share key interests with the Iraqis in the security realm, including reducing the threat from violent extremists such as the Islamic State of Iraq and the Levant, containing the spread of extremism from Syria, and countering threats from Iran.

Question. In what areas, if any, do you see U.S. and Iraqi security interests diverging?

Answer. The United States and Iraq have similar security interests. We both have an interest in fighting terrorism and ensuring that Iraq is stable and free from external influences. We also both have an interest in maintaining stability and security in the Middle East.

Question. What do you see as the greatest challenges for the U.S.-Iraq security relationship over the coming years?

Answer. Today's Iraq is still recovering from decades of dictatorship and years of conflict and international isolation. To continue on a path of progress, it needs an inclusive government so that all people of Iraq feel they have a voice in their government. As the President said during the visit to Washington of Prime Minister Maliki last November, the United States stands ready to deepen its security cooperation and to honor the sacrifice of the U.S. Armed Forces by ensuring a strong, prosperous, inclusive, and democratic Iraq.

Question. In your view, what steps, if any, should the United States take to engage with Iraq to promote greater security and stability across the Middle East region?

Answer. The United States has encouraged Iraq and its neighbors to act to re-integrate Iraq into the region after years of isolation. Progress has been made over the last year in resolving longstanding disputes between Iraq and Kuwait, but more needs to be done. One important way to support this integration is by encouraging Iraq to take part in regional dialogues as well as military exercises as demonstrated by Iraq's participation in the Eager Lion exercise held in Jordan last summer. If confirmed, I would work with partners in the region to assist Iraq in becoming more integrated in the regional framework and to participate in additional trainings and exercises.

Question. Iraq faces a resurgent violent extremist threat that seeks to exploit popular discontentment with the current Maliki Government, particularly within Sunni communities in western Iraq.

What role, if any, should the United States play in assisting the Government of Iraq in confronting the threat of violent extremism?

Answer. Although the Government of Iraq is responsible for providing its own security, we can assist in a variety of ways to help the Iraqis increase their capabilities and capacity to meet current threats. It is my understanding that the Department, in concert with interagency partners, is already using a variety of key security assistance and cooperation tools to build the capacity of Iraqi Security Forces. If confirmed, I would support information sharing, non-operational training for the Iraqi Ministry of Defense and Ministry of Interior Counterterrorism Services, and continued sales of key defense articles to the Government of Iraq.

Question. In your view, what conditions, if any, should the United States place on the provision of equipment or assistance to the Government of Iraq in its fight against violent extremism?

Answer. The Foreign Military Sales program provides what I believe are stringent measures to monitor the Government of Iraq on the use of military equipment and assistance, consistent with U.S. laws. These are the same conditions imposed on other countries that have and receive U.S. defense articles. Prime Minister Maliki also pledged, in a recent letter to Chairman Menendez, that U.S. equipment would not be used against innocent civilians. The United States has made clear to Iraq that it will be held accountable for complying with end-use monitoring protocols, and that U.S. assistance is dependent on the Iraqis adhering to proper use of the systems we sell to them.

TRANSATLANTIC RELATIONSHIP AND NATO

Question. In your view, how important to U.S. national security interests is NATO and the U.S. transatlantic relationship with our Alliance partners?

Answer. NATO and our transatlantic relationships remain very important, as U.S. security and engagement in Europe are closely intertwined. Europe is home to some of the United States' most stalwart allies and partners, who have fought and continue to fight and sacrifice alongside U.S. forces. Europe is our principal partner in seeking global and economic security, and will remain so for the foreseeable future. The United States has enduring interests in supporting peace and prosperity in Europe as well as bolstering the strength and vitality of NATO.

Question. What changes, if any, would you recommend to strengthen that transatlantic relationship, if confirmed?

Answer. The transatlantic relationship is as strong as ever, but we should not take Alliance cohesion and solidarity for granted. The commitment of allies to a strong NATO must be manifested in a willingness to invest in the future of the Alliance by pooling resources and sharing risk to develop the capabilities needed to fulfill future missions. If confirmed, I would encourage allies to make those investments.

Question. As the United States pursues a pivot toward the Asia-Pacific region, do you believe there should be a reduction in the U.S. security commitment to Europe?

Answer. The rebalance to the Asia-Pacific region does not imply a shift of attention from Europe. Far from it. Europe remains our principal partner in seeking global and economic security. Moreover, we continue to have security obligations to our NATO allies pursuant to the North Atlantic Treaty. A peaceful and prosperous Asia-Pacific is in the interests of both Europe and the United States.

Question. As the International Security Assistance Force mission in Afghanistan nears completion, do you foresee a need for NATO to re-evaluate its purpose, missions and objectives going forward?

Answer. Like any organization, NATO should periodically examine its purpose, missions, and objectives. The successful completion of NATO's largest and most challenging operation represents a turning point for the Alliance. As allies sustained regular troop rotations to Afghanistan, defense investment in new capabilities and

the readiness of some forces for other potential missions declined. The purpose of the Alliance continues to be deterrence and defense, crisis management, and cooperative security. However, as NATO completes the International Security Assistance Force mission in Afghanistan, some of its operational objectives will likely be replaced by objectives related to training and readiness, with more emphasis on live exercises to maintain interoperability.

LIBYA

Question. What role do you envision the United States playing in helping Libya build capable security institutions?

Answer. The administration has made building Libyan security a priority. It is my understanding that DOD will train a 5,000–8,000-member general purpose force (GPF) with the basic skills needed to protect government institutions and maintain order. I believe that DOD plans to complement its training efforts with defense advisor and defense institution reform programs to build the institutional capacity of the Libyan Ministry of Defense. Importantly, DOD is coordinating security-capacity-building efforts with our partners in the United Kingdom, Italy, Bulgaria, and Turkey, and ensuring that our programs complement the U.N. Support Mission in Libya and other international activities to support Libya's security sector development efforts.

Question. What is your assessment of the risks associated with the paramilitary forces that continue to have control of large swaths of Libya?

Answer. Paramilitary forces present significant risk to the Libyan Government and the Libyan people. Building a government security force that is respected by Libya's people will be essential to Libya's future.

Question. In your view, what role, if any, should DOD play in assisting the Libyans with addressing the threat to stability posed by paramilitary forces?

Answer. I believe that DOD's GPF training and related efforts are intended to help Libya develop the security foundation necessary to protect government institutions and maintain order. DOD's border security and counterterrorism training and equipping programs are also aimed at building the Government of Libya's capacity to address its security challenges.

Question. What do you view as the most significant challenges to the Libyan government in building capable and sustainable security institutions?

Answer. Qaddafi left Libya with deep deficits in government capacity. As a generation of Libyans deprived of self-government takes on the challenges and responsibilities of renewing Libya's security sector, the United States will support their capacity- and capability-development goals through practical training and advice. If confirmed, I would support these efforts.

Question. In what ways can the United States be most effective in assisting the Libyan government in building capable and sustainable security institutions?

Answer. If confirmed, I would continue to advance the U.S. effort to couple our training and equipping efforts with institution-building programs to facilitate the Libyan Ministry of Defense's ability to recruit, sustain, and retain trained GPF personnel.

AFRICA-RELATED SECURITY MATTERS

Question. The new DOD strategic guidance, "Sustaining U.S. Global Leadership: Priorities for 21st Century Defense," announced by President Obama on January 5, 2012, sets out the defense priorities for the 21st century and the key military missions for which DOD will prepare. The primary emphasis of the strategy relates to the Middle East and Asia. The strategy makes little reference to Africa and its myriad security challenges.

In light of the emphasis on areas outside of the African continent, if confirmed, how would you draw attention to the myriad security challenges confronting African nations?

Answer. If confirmed, I would support the Department's continued focus on disrupting and dismantling al Qaeda and its affiliates in the region while building the capacity of African security forces, defense institutions, and regional organizations to combat transnational threats and participate in peace operations. As part of these efforts, if confirmed, I would support the Department's efforts to instill within African militaries a commitment to operate under civilian authority, respect the rule of law and human rights, and support international peacekeeping operations.

U.S. MILITARY OPERATIONS AGAINST THE LORD'S RESISTANCE ARMY

Question. Despite pressure by the Ugandan People's Defense Forces (UPDF) and efforts by U.S. Special Operations personnel to support them, elements of the Lord's

Resistance Army (LRA)—including Joseph Kony—continue to operate and commit atrocities against civilian populations. Some observers have identified operational concerns with this mission, including that: (1) supported forces are trying to find an elusive foe in an area roughly the size of California, much of which is covered in thick jungle; (2) technical support to U.S. forces and their UPDF partners from the Defense and Intelligence Community continues to be inadequate; (3) limitations continue to be placed on the ability of U.S. Special Operations personnel to accompany UPDF partners outside of main basing locations, thereby limiting the level of direct support they can provide; and (4) logistics and operational enablers for U.S. forces.

In your view, what is the objective of Operation Observant Compass (OOC)?

Answer. OOC is one component of a wider U.S. strategy to counter the LRA. This strategy has four pillars: increasing the protection of civilians; apprehending or removing Joseph Kony and senior commanders from the battlefield; promoting the defection, disarmament, demobilization, and reintegration of remaining LRA fighters; and increasing humanitarian access and providing continued relief to affected communities. Under OOC, U.S. Special Operations Forces seek to enhance the capacity of local forces to end the threat posed by the LRA. I understand that U.S. military advisors work with African forces to strengthen information-sharing and synchronization, enhance operational planning, and increase overall operational effectiveness.

Question. In your view, what is the appropriate level of priority to be accorded to efforts to counter the LRA?

Answer. I understand that, as with all of the Department's efforts in Africa, OOC is a low-cost, small-footprint effort that leverages the capabilities of our African partners. This approach has yielded significant results to date. Two of the top five LRA leaders have been removed from the battlefield, and recent reports suggest that the Ugandan military also removed a third leader, Okot Odhiambo. Since OOC was launched, civilian deaths attributed to the LRA have decreased by 75 percent, and LRA abductions are down by 50 percent. Such statistics indicate that the current level of effort is making progress against the LRA while keeping our African partners appropriately in the lead.

Question. If confirmed, will you work to review the four concerns outlined above and report back to the committee?

Answer. Yes.

RUSSIA

Question. What in your view are the major security issues in the U.S.-Russian relationship?

Answer. There are a number of areas where the United States and Russia cooperate, including strategic arms reductions, counter-terrorism, Afghanistan, preventing proliferation of dangerous technologies, military relations, and dissuading Iran from becoming a nuclear-armed nation. If confirmed, I would continue to engage Russian counterparts to try and find common ground and new areas of cooperation, such as the work we have done together to eliminate Syria's chemical weapons.

Question. Where do you see U.S. and Russian security interests aligning and where are they diverging?

Answer. Although there are points of friction in many areas of our relationship, the United States and Russia have worked together effectively on issues such as the removal of the Syrian chemical weapons program, countering the proliferation of weapons of mass destruction, and Afghanistan. If confirmed, I would work with Russia to make progress on such areas where we share common interests and communicate effectively where we disagree.

Question. In your view what policy steps should DOD take to improve relations with Russia? For instance, would you support increased military to military relations and exchanges with Russia?

Answer. My general view is that military-to-military exchanges are useful to increase channels of communication and mutual understanding. It is my understanding that DOD has a robust military-to-military work plan scheduled for this calendar year, with more than 60 events and a variety of quality activities such as military exercises, senior leader visits, and conferences. If confirmed, I would support our military-to-military cooperation agenda and support increasing our engagement for the benefit of both sides.

Question. Would you support any joint development or other programs with Russia?

Answer. If confirmed, I would support joint development programs that would benefit the United States.

Question. Would you support joint U.S.-Russian cooperation on missile defense as a way to send a signal to Iran against Iran's developing long-range missiles or having nuclear weapons?

Answer. If confirmed, I would support U.S.-Russian cooperation on missile defense. U.S.-Russia and NATO-Russia cooperation on missile defense would signal to Iran that its development of missiles and pursuit of nuclear capabilities are reducing rather than enhancing Iranian security.

Question. Do you support efforts mandated by the New Strategic Arms Reduction Treaty (START) Resolution of Ratification to seek reductions in the stockpiles of Russian and U.S. tactical nuclear weapons?

Answer. Yes.

Question. If so, what steps would you recommend for pursuing such reductions, if confirmed?

Answer. If confirmed, I would recommend that our focus for the next stage of arms control consist of bilateral efforts to increase transparency and pursue further reductions that would include all nuclear weapons—deployed and non-deployed, strategic and non-strategic. Consultation with allies and partners will be essential to ensure that extended deterrence and assurance remain strong.

Question. What role, if any, should DOD play in responding to Russian attempts to exert influence over other countries on its border, including Ukraine, Georgia, and the Baltic countries?

Answer. DOD's role and potential response would depend on the particular situation and whether it involved a military dimension. For example, in the current crisis in Ukraine, DOD officials have urged their counterparts in Ukraine to stay out of the political struggle. The United States, of course, has a treaty alliance with each of the Baltic States. It seeks to maintain strong partnerships with other countries in the region, including Ukraine and Georgia.

Question. In your view, does Russia want Iran to have a nuclear weapon?

Answer. No. Russia is a partner in the P5+1 process, which is working toward a long-term, comprehensive solution to prevent Iran from obtaining a nuclear weapon.

IRAN

Question. What is your assessment of the military and political threat posed by Iran?

Answer. If left uncontested, some of the policies and activities of the Iranian regime constitute a significant threat to the security of the United States and that of many U.S. friends and partners. This trend is particularly concerning with regard to Iran's advancement of its ballistic missile program. Iran's inventory of ballistic missiles, which is the largest in the region, is therefore a source of tremendous concern. Iran is the most active state-sponsor of terrorism in the world, with a proven track record of meddling in the internal affairs of countries in the region.

Question. What is your assessment of U.S. policy with respect to Iran?

Answer. The Obama administration's dual-track approach of combining smart diplomacy with economic and military pressure has resulted in a considerable sharpening of Iran's strategic choices. This policy has unified and mobilized the international community against Iran, resulting in Iran's regional and global isolation. It has imposed tremendous economic costs on Iran through robust and comprehensive sanctions. By keeping all options on the table, it has sent a powerful message to Iran that unless it changes course, its policies risk making it less, not more, secure. Ultimately, it is this comprehensive and focused policy that forced Iran to the negotiating table, where it agreed to the Joint Plan of Action. The sustained application of this policy, I believe, gives us the best chance of reaching a comprehensive nuclear deal with Iran. Meanwhile, I believe we should continue to hold Iran accountable for a host of destabilizing activities in the region and its deplorable human rights record.

Question. In your view, what are the risks associated with reducing U.S. presence in the Middle East with respect to the threat posed by Iran?

Answer. In my view, a significant reduction in our military presence in the Middle East during negotiations with Iran over its nuclear program would negatively impact the effectiveness of our policy in relation to Iran and our credibility with regional partners. If confirmed, I would support the position of DOD to maintain a strong military posture in the Gulf region, made clear by Secretary Hagel in December at the Manama Dialogue.

Question. In your view, what role should DOD play in countering Iran's support of international terrorism?

Answer. It is my view that DOD has a significant role to play in countering Iran's support for international terrorism through DOD's support to broader U.S. Government efforts. If confirmed, I would continue to work with interagency and international partners to ensure that Iran is held accountable for the full scope of its destabilizing activities in the region and beyond, as necessary.

ISRAEL

Question. With regard to our relationship with Israel, President Obama has stated: "Our military and intelligence cooperation has never been closer. Our joint exercises and training have never been more robust. Despite a tough budget environment, our security assistance has increased every year. We are investing in new capabilities. We're providing Israel with more advanced technology—the type of products and systems that only go to our closest friends and allies. Make no mistake: we will do what it takes to preserve Israel's Qualitative Military Edge—because Israel must always have the ability to defend itself, by itself, against any threat."

Do you agree with President Obama's position and views with regard to the U.S. security relationship with Israel?

Answer. Yes. Under the leadership of Secretary Hagel, the Department has worked to strengthen further this already historically strong U.S.-Israeli defense relationship. Key components include significant Foreign Military Financing (FMF) and the approval to release advanced military capabilities to Israel, like the F-35 and the V-22 aircraft. If confirmed, I would ensure that DOD's already deep cooperation with Israel is continued and I would work to sustain our strong security relationship.

POST-ARAB UPRISING MILITARY-TO-MILITARY ENGAGEMENT

Question. The past few years have brought great change to the Middle East and North Africa. These changes may require adjustments to our military-to-military engagement efforts throughout the region.

What is your understanding of U.S. military-to-military engagement in the Middle East and North Africa (e.g. Yemen, Tunisia, Egypt, and other countries in the region), and what changes—if any—would you advocate for in light of the Arab Uprising?

Answer. My understanding is that DOD cooperation with Middle East and North African partners is specifically tailored to partners' strategic interests and tactical needs while advancing U.S. strategic interests. In my view, during this time of continuing change and uncertainty in the region, DOD should sustain and improve military-to-military and defense civilian relations, while continuing to evaluate and re-calibrate the nature and substance of each of our engagements to ensure that they are consistent with U.S. values and advance U.S. national interests.

I also would stress the critical importance of reassuring partners that we will remain engaged in the region and committed to our joint strategic interests.

SYRIA

Question. The civil war in Syria continues and President Assad's commitment to continuing his regime's ongoing operations appears unwavering despite international condemnation. To date, the United States has limited its support to opposition forces to non-lethal assistance to forces on the ground, as well as technical assistance to elements of the opposition working to build a cohesive political entity.

In your view, what is the proper role on the U.S. military in this conflict?

Answer. The President has been very clear that he will direct the use of military force when necessary to protect the United States and in furtherance of U.S. national security interests. In the case of Syria, the President has been clear that there is no military solution to the conflict. The Department continues to be involved in interagency discussions that examine possible military roles to support U.S. policy goals in Syria. If confirmed, I look forward to advising the Secretary and working with interagency partners on this matter.

Question. In your view, should the United States provide support to opposition groups on the ground in Syria, including lethal support?

Answer. The United States should provide, and has been providing, a range of assistance to moderate elements of the Syrian opposition, both civilian and armed. This assistance is critical to building opposition capacity to meet essential needs, strengthen the effectiveness of the armed opposition on the ground, and counter the growing influence of extremist groups. We are providing nearly \$260 million in non-lethal support to the Syrian civilian opposition, including the Syrian Opposition Coalition (SOC), local activists, and the Supreme Military Council (SMC). This assistance includes the provision of equipment (e.g., ambulances, food, computers, commu-

nications equipment, and generators), small grants to local councils and Syrian non-governmental organizations (NGO) and associations on the ground, and support for media.

It is my understanding that since April 2013, DOD has delivered additional assistance directly to the SMC as well as the SOC. To date, DOD has provided more than 480,000 meals ready to eat and 18 tons of medical supplies, as well as communications gear and vehicles. We seek to be responsive to the needs of the armed opposition and ensure that our assistance serves the military purposes of the SMC. We have provided this support in consultation with the SMC. We continue to provide our support in consultation with and cooperation with other countries in the region, in an effort to build the effectiveness of the armed opposition.

We are constantly looking at what options are available to help resolve the crisis in Syria. We are focused on ways to help end the conflict, alleviate the suffering of the Syrian people, and mitigate the growing threat from extremists. If confirmed, I would continue OSD's efforts, in partnership with the Joint Staff, to examine the risks and opportunities related to the provision of lethal assistance to the moderate opposition and other military options for Syria to support the administration's decisionmaking on this question.

Question. In your view, would the removal of the Assad regime be a strategic defeat of Iran in the region?

Answer. Yes. Iran has an interest in the outcome of the conflict in Syria, and has invested resources in seeking to ensure that the Assad regime stays in power. Therefore, removal of the Assad regime would be a loss for Iran.

Question. After the United States threatened the use of military force in response to Syria's use of chemical weapons against Syrian civilians in August 2013, Syria agreed to an international plan to eliminate its chemical weapons program by the end of June 2014. Although Syria acceded to the Chemical Weapons Convention and has eliminated its capacity to mix and fill chemical agents and munitions, it has failed to meet recent deadlines to transport its chemical agents and precursors to Latakia for removal and destruction.

Given Syria's apparent unwillingness to meet all its internationally mandated deadlines, what are your views on the prospects for eliminating Syria's chemical weapons program by June 30, 2014?

Answer. The U.S. Government and international community are concerned about Syria's lack of progress in meeting its obligations, and further delays will make meeting the June 30 deadline more challenging. We are working with key international partners to increase pressure on the Syria to fulfill its obligations in accordance with the agreed timeline.

Question. What additional steps, if any, do you believe DOD could take as part of the international effort to ensure the successful elimination of Syria's chemical weapons program in 2014?

Answer. I understand that the Department is contributing capabilities critical to eliminating Syria's chemical weapons, and is postured to fulfill its role in the international effort as soon as Syria fulfills its obligations to remove the chemical materials from Syrian territory. If confirmed, I would work with my colleagues in the policy, operational, and technical communities, as well as with key international partners, to ensure the successful elimination of Syria's chemical weapons program.

EGYPT

Question. What is your assessment of the security situation in Egypt?

Answer. I know that the Department is concerned with the recent upswing in terrorist violence in the Sinai and around Cairo, and I understand that Secretary Hagel has personally offered assistance to help Egypt respond to and prevent future attacks. Despite the hold on delivery of some weapons systems, the Department continues to provide maintenance support for Apache helicopters used in counterterrorism operations. If confirmed, I would continue to support Egypt's counterterrorism efforts.

The Egyptian Government's detainment and arrest of journalists, opposition group members, and the Muslim Brotherhood are also a significant concern. I understand that the Department has continued to encourage the interim government to uphold the new constitution's rights and has raised U.S. concerns about this crackdown.

Question. What is your assessment of the U.S.-Egypt security relationship?

Answer. The U.S. security relationship with Egypt provides us with important over-flight routes and facilitates Suez Canal transit access, helps us to ensure Israel's security, allows us to cooperate on combatting terrorist threats, and helps to maintain the security of our embassy and consulate. Egypt is an important re-

gional actor, and our security relationship with Egypt helps us protect our interests in the region.

Question. What is your assessment of the role Egypt plays with respect to regional stability?

Answer. Egypt has historically played an important role in promoting regional stability. By continuing to fulfill its obligations under its Peace Treaty with Israel, increasing its counterterrorism operations in the Sinai, providing security for both military and private vessels transiting the Suez Canal, and efforts to prevent illicit trafficking across its shared borders with Libya, Sudan, and Israel, Egypt makes significant contributions to regional security.

Question. In your view, should the U.S. Government continue to provide defense articles and services purchased by the Egyptian military using U.S. FMF funds?

Answer. FMF remains an important element of the U.S.-Egypt relationship. At the same time, we have serious concerns about the Egyptian government's actions, as described in my response to question 69, above. The delivery of some weapons systems remains on hold. In addition, the fiscal year 2014 appropriations law restricts the use of fiscal year 2014 FMF for Egypt unless certain certifications are made by the Secretary of State. If confirmed, I would support the Department's efforts to work with the Department of State on making the required assessments, and implementing these authorities.

GULF SECURITY COOPERATION

Question. The administration has been working with Gulf Cooperation Council (GCC) governments to enhance regional cooperation and security against ballistic missile threats, particularly from Iran.

What is your view of the potential for missile defense cooperation within the GCC to enhance regional security, and how do you see this potential cooperation fitting into the U.S. missile defense and security efforts in the Middle East?

Answer. It is my understanding that U.S. missile defense cooperation with GCC nations, including their acquisition of advanced ballistic missile defense capabilities, is increasing. Such cooperation on defensive systems is beneficial to those countries as well to the United States and the region.

Question. What role do you see for the sale to the United Arab Emirates of Terminal High Altitude Area Defense (THAAD) and Patriot missile defense systems, and similar sales to other GCC partners, in regional security against Iranian missile threats?

Answer. It is my understanding that a number of GCC countries are considering acquiring ballistic missile defense capabilities. These systems would play an important role in countering Iranian missile threats.

REGIONAL BALLISTIC MISSILE THREATS AND RESPONSE

Question. Iran and North Korea each has hundreds of short- and medium-range ballistic missiles today that are capable of reaching forward-deployed U.S. forces, allies, and other friendly nations in the U.S. European Command, U.S. Central Command (CENTCOM), and U.S. Pacific Command AOR. The Ballistic Missile Defense Review (BMDR) report of February 2010 stated that the United States intends to pursue regionally tailored phased adaptive approaches to ballistic missile defense against such missile threats in various regions.

Do you believe that such regionally tailored phased adaptive approaches will provide our regional combatant commanders with the missile defense capabilities needed to defend our forward deployed forces and our allies and partners in the region?

Answer. Yes. I believe that continuing to deploy U.S. and allied and partner missile defenses appropriate to each region can make a significant contribution to defending our deployed forces and our allies and partners from ballistic missiles.

Question. What role do you see for the Aegis Ballistic Missile Defense system with Standard Missile-3 interceptors in U.S. missile defense capabilities in these AORs?

Answer. My understanding is that Aegis destroyers and cruisers with SM-3 interceptors are important capabilities that are in great demand for defending against ballistic missile threats in Europe, the Middle East, and Asia.

Question. In addition to U.S. missile defense capabilities in these AORs, what role do you see for other nations to contribute to regional missile defense capabilities?

Answer. Given the large number of short- and medium-range ballistic missiles that can threaten NATO, the Middle East, and East Asia, the missile defense capabilities of allies and partners in those regions are important both for their own defense and as a complement to U.S. ballistic missile defense capabilities.

Question. China's defense spending has had double-digit increases annually for about the past 20 years. While a certain amount of military growth is to be expected for a country experiencing the kind of economic growth that China has had over about that same period, the types of platforms and capabilities China is developing have been interpreted by some as designed to project power, limit freedom of movement by potential adversaries, and conduct military operations at increasing distances. Such developments, coupled with strident rhetoric and a lack of transparency, stoke growing concerns about China's intentions in the region.

How would you characterize the current U.S. relationship with China?

Answer. The relationship is both cooperative and competitive. Our policy is to manage the areas of competition while seeking to expand our cooperation in areas where our interests align, both in Asia and globally.

Question. What do you believe are the objectives of China's steady increase in defense spending and its overall military modernization program?

Answer. As is set forth in an annual report to Congress on this subject, China is undertaking a long-term, comprehensive military modernization program designed to improving the capacity of its Armed Forces to fight and win high-intensity regional military operations of short duration (i.e., a Taiwan contingency). In addition, there are indications that the People's Liberation Army (PLA) is developing capabilities beyond those required to address China's immediate territorial concerns.

Question. How should the United States respond to this Chinese military growth and modernization?

Answer. I believe that the U.S. response to China's military modernization should be flexible and supported by the continued evolution of our force posture in the Asia-Pacific region, the maintenance of our global presence and access, the modernization of our own capabilities in such areas as countering anti-access and area denial capabilities, and the strengthening of our alliances and partnerships. The United States should continue to monitor developments in China's military modernization program while encouraging China to be more transparent about its military and security affairs. The United States has been and should remain the preeminent military power in the Asia-Pacific region.

Question. What is your assessment of the current state of U.S.-China military-to-military relations?

Answer. The trajectory of the U.S.-China military-to-military relationship is positive. If confirmed, I would look for ways to build on this positive momentum consistent with U.S. interests and values, always balancing increased engagement with China against increased engagement with allies and partners across the region.

Question. Do you believe that the United States should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. I believe that military exchanges with China can be valuable. These exchanges require that China be as committed as the United States is to sustained and substantive exchanges. If confirmed, I would support increasing military-to-military engagement with China while encouraging China to act responsibly, both regionally and globally.

Question. By most accounts, China has become more assertive in its claims of sovereignty in various domains, including maritime, air, and space. There are numerous examples of this assertiveness, but one in particular is China's increased aggressiveness in asserting its excessive maritime claims in the South China Sea.

What role should the United States play in the ongoing maritime disputes in the South China Sea?

Answer. Freedom of navigation and overflight, open access to Asia's maritime domain, the maintenance of peace and stability, free and open commerce, and respect for international law are key national security interests of the United States in the South China Sea. U.S. policy is that all parties should resolve their disputes through peaceful means and in accordance with international law, without resorting to the threat or use of force.

Question. How does the presence of the U.S. Navy in the South China Sea influence this maritime dispute and, in your view, would an increase in U.S. activity in that region serve to stabilize or destabilize the situation?

Answer. I believe it is critical for the U.S. Navy to maintain a visible presence and assert its freedom of navigation and overflight in the East and South China Seas, in accordance with international law.

Question. Cyber space has become a critical realm for civilian and military applications and, as a result, it represents a potentially substantial vulnerability. There are reports that China is aggressively pursuing cyber warfare capabilities, and

would likely seek to take advantage of U.S. dependence on cyber space in the event of a potential conflict situation.

If confirmed, what would you do to help ensure our military is protected in cyber space and prepared to defend against a cyber attack?

Answer. The protection of U.S. military networks from cyber attack is one of DOD's core missions, and if confirmed, I would work with DOD components and other departments and agencies throughout the U.S. Government to ensure a coordinated approach to cyber threats, not only from China, but from others as well. If confirmed, I would continue to support DOD's efforts to develop its cyber capabilities and cyber workforce, which are two of the most important enablers for defending DOD's networks. We must also work closely with the private sector and international partners to strengthen our overall cybersecurity and collective defense.

NORTH KOREA

Question. What do you see as the implications for regional security and stability of North Korea's continued refusal to curb its provocative behavior?

Answer. The security situation on the Korean Peninsula is serious and requires constant vigilance. North Korea's December 2012 missile launch and February 2013 nuclear test demonstrate that it has the capabilities and the will to undermine regional stability.

North Korea's provocative behavior, large conventional military, pursuit of ballistic missile and weapons of mass destruction (WMD) programs, and proliferation activities continue to be serious concerns for the United States and our allies and partners in the region. The murky nature of the North Korean regime and the unpredictability of its leader, Kim Jong Un, add to our concerns.

If confirmed, I would ensure that our military deterrence of North Korean aggression continues to support our diplomatic efforts to end North Korea's nuclear and missile programs.

Question. What is your understanding of the threats posed to the United States and our allies by North Korea's ballistic missile and WMD capabilities?

Answer. My understanding is that North Korea's missile programs are largely untested at longer ranges. However, they are a direct threat to U.S. forces in the Asia-Pacific and to our allies and partners in the region. Combined with North Korean proliferation activities, they pose a direct threat to U.S. territory. I take this threat very seriously, and if confirmed, I would ensure that DOD is prepared to defend against it.

Question. What concerns you most about North Korea and, if confirmed, what would you do to address those concerns?

Answer. My top concerns regarding North Korea are the unpredictability of North Korea's leadership, its capabilities described in response to the previous question, its longstanding practice of provocations designed to draw parties to the negotiating table, and the upcoming spring military training cycle. If confirmed, I would work with our South Korean allies to ensure that we have the capabilities necessary to address the full range of possible North Korean aggression, including ballistic missile and WMD threats.

REPUBLIC OF KOREA

Question. What is your understanding of the current status of the U.S.-South Korean security relationship?

Answer. The U.S.-Republic of Korea (ROK) alliance is very strong. Together we are making investments necessary to deter North Korean aggression and ensure security on the Korean peninsula. The President plans to visit the Republic of Korea in April, at which time he will reaffirm the strength of our partnership.

Question. What is your view regarding the timing of the transfer of wartime operational control from the United States to South Korea, now planned for December 2015, and what will you do to ensure this transition takes place as planned?

Answer. If confirmed, I would support the continued assessment and review of the security situation on the Korean Peninsula in implementing Strategic Alliance 2015 (SA2015), of which the transition of wartime operational control (OPCON) is a part. OPCON transition has always been conditions-based. If confirmed, I will continue to support this approach.

Question. What is your assessment of the security benefits of the force repositioning agreed to under the Land Partnership Plan and the Yongsan Relocation Plan and how does repositioning U.S. forces change the way they will operate on the Korean Peninsula?

Answer. I am not familiar with the specifics of these plans and would need to be briefed on them before providing an assessment.

Question. There have been a number of North Korean attacks against South Korea in the last few years including the sinking of the South Korea Navy ship *Cheonan*, the artillery attack on the South Korean island, as well as the 2013 cyber attack against television stations and banks. South Korea has been adamant that it will respond “firmly” to the next such provocation.

What is your understanding of the U.S. obligations in the event of an attack on South Korea by North Korea, and under what circumstances do you believe the U.S. Armed Forces should be committed to engage North Korean forces in response to an attack on South Korea?

Answer. These obligations are set forth in the U.S.-Republic of Korea Mutual Defense Treaty of 1953, specifically Articles II and III.

Question. Are you confident that the recent Counter-Provocation Plan provides a sufficient framework to de-escalate tensions on the peninsula if there are future attacks?

Answer. My understanding is that the Counter-Provocation Plan includes procedures for consultation and ensures a well-coordinated combined action in response to North Korean provocations and threats. It is also my understanding that U.S. Forces Korea and the ROK military closely consult to ensure the proper response and control escalation, and if confirmed, I would work to ensure those close consultations continue.

JAPAN

Question. How would you characterize the U.S.-Japan security relationship?

Answer. The U.S.-Japan security relationship is very strong. It enables virtually all U.S. military activity in the Western Pacific, allowing peace, stability, and prosperity to flourish in the region for more than a half century. The President will visit Japan in April, at which time he will reaffirm the strength of our partnership.

Question. What steps, if any, do you believe Japan ought to take to become a more active partner in security activities with the United States and in the international security arena?

Answer. I support any steps that Japan chooses to take to increase its contributions to the Alliance and to regional and global security. I believe the changes Japan is currently contemplating are a logical reflection of Japan’s role in the world.

Question. The current plan is for the closure of the Marine Corps Air Station on Okinawa after the construction of a Futenma Replacement Facility (FRF) at Camp Schwab on Okinawa. While the Governor of Okinawa has signed the landfill permit to allow construction of the FRF to go forward, local opposition and a long construction timeline make the completion of the FRF uncertain.

What is your opinion of the prospects for the successful construction of the FRF at Camp Schwab on Okinawa?

Answer. I believe that Japan took a significant step towards enabling the construction of the FRF last December with the signing of the landfill permit by the Governor of Okinawa. This concrete step forward will lead to the construction of airfield facilities at the current Marine Corps Camp Schwab. It is my understanding that many of the necessary relocations within Camp Schwab required for the landfill are already underway. By working closely with Japan, we have every confidence that this very significant forces realignment effort will be successfully completed.

Question. Is the cost-sharing arrangement between the United States and Japan to pay for the relocation of U.S. forces from Okinawa to Guam and the costs associated with the continued presence of U.S. forces in Japan equitable and appropriate? Why or why not?

Answer. Current cost sharing arrangements for relocation of U.S. forces from Okinawa to Guam are both equitable and appropriate. Japan has made an unprecedented commitment to provide \$3.1 billion to fund U.S. military facilities on U.S. territory. This contribution helps us achieve our common goals of maintaining a strong U.S. military presence in the region while creating a U.S. military presence on Okinawa that is politically sustainable over the long term.

Question. How, in your view, does building an unpopular new airfield on Okinawa, one that could take 7 to 10 years to finish at a cost of at least \$3.6 billion, serve to improve the U.S.-Japan relations in general and the U.S. military-Okinawa relations in particular?

Answer. My understanding is that since at least 1996, the United States and Japan have been in agreement on the need to relocate the existing Marine Corps Air Station at Futenma, around which a significant population had grown over the years. Since 1999, we have identified a site in the vicinity of Camp Schwab near the village of Henoko. This was confirmed most recently in the October 2013 2+2 Meeting Joint Statement. I believe that once this facility is completed and oper-

ational, the resulting benefit to the areas of Okinawa south of Kadena Air Base, where the vast majority of the Okinawa population resides, will be apparent to all.

Question. Is Japan carrying a fair share of the burden of the cost of the U.S. presence in Japan under the current Special Measures Agreement?

Answer. My understanding is that Japan is meeting its obligations under the 2011 Special Measures Agreement (SMA). If confirmed, I will ensure that Japan continues to meet its obligations under the current and future SMAs.

INDIA

Question. What is your view of the current state of U.S.-India security relations?

Answer. I see the United States and India as committed to a long-term strategic partnership, based on common values, interests, and shared challenges. President Obama has referred to this relationship as one of the defining partnerships of the 21st century. The defense relationship is a vital and growing component of that relationship. My understanding is that defense cooperation has increased rapidly over the last decade since the signing of the 2005 New Framework Agreement on defense cooperation, and now includes a strong slate of high-level dialogues, personnel exchanges, exercises, and defense trade.

Question. If confirmed, what specific priorities would you establish for this relationship?

Answer. If confirmed, I would continue to prioritize a number of lines of effort with India currently underway. I would work to build upon current military-to-military engagement, including exercises, which remain the most visible part of the defense relationship. I would focus on accelerating defense trade, seeking out new joint ventures, and pursuing opportunities for technology transfer, co-production, and co-development of defense systems under the aegis of the defense trade and technology initiative approved by President Obama and Prime Minister Singh in 2013. In addition, if confirmed, I would seek to further cooperation in such areas as maritime security, humanitarian assistance and disaster relief response and counterterrorism.

Question. What is your assessment of the current relationship between India and Pakistan?

Answer. The relationship between India and Pakistan is marked by historic distrust. In recent years, the two governments have undertaken efforts to improve the relationship, with limited success. The U.S. Government is committed to constructive and durable relationships with both India and Pakistan. If confirmed, I would continue to encourage further confidence-building measures and senior-level engagements between India and Pakistan, and would encourage both countries to be transparent with each other on their activities in the region.

Question. In your view, what impact has the ongoing tension between Pakistan and India had on the stability of Central and South Asia generally, and on the prospects for lasting security in Afghanistan?

Answer. The distrust between India and Pakistan does not promote regional stability, and that is also the case in Afghanistan. The United States believes that the bilateral relationship between India and Afghanistan is not a threat to Pakistan, nor is it directed against any other country in the region. It is vital for Afghanistan to develop constructive relationships with all countries in the region to achieve long-term regional stability. I support the administration's view that we should continue to encourage all regional actors to be transparent with each other with respect to their bilateral relationships and cooperative activities.

Question. What effect, if any, do you anticipate that India's successful test launch of the Agni V rocket on April 19, 2012, will have on India-U.S. relations?

Answer. In the 2 years since that test, we have not seen a major impact on U.S.-India relations.

REPUBLIC OF THE PHILIPPINES

Question. What is the current state of U.S.-Philippine military-to-military relations, including efforts to increase the number of rotational U.S. forces operating from the Philippines?

Answer. My understanding is that DOD is in the process of modernizing the U.S.-Philippines alliance to position our two countries more effectively to address 21st century security challenges in the Asia-Pacific region. DOD supports the Armed Forces of the Philippines' long-term modernization. I understand that DOD is also currently negotiating a new agreement to further enhance our defense cooperation and enable an increased rotational presence of U.S. forces.

Question. Do you believe Operation Damayan was a successful disaster relief effort? What were the lessons learned from the operation? What are the needed areas

of improvement for U.S. disaster relief operations and joint task force operations in this area?

Answer. The U.S. whole-of-government response to Super Typhoon Haiyan/Yolanda was highly successful. In close cooperation with Philippine authorities, the United States was able to move responders and supplies rapidly into the affected area. I was pleased to see such close cooperation between DOD, the Department of State, U.S. Agency for International Development, Philippine authorities, and all of the other international and nongovernmental partners that came to the aid of those affected by this tragedy. I believe that the U.S. Government and international community are still discussing lessons learned, and I agree that it will be important to incorporate them into future disaster relief training, exercises, and preparedness. I would work to do so, if confirmed.

Question. Do you anticipate a reduced or increased U.S. military footprint or change in mission for U.S. military forces in the Philippines in the near to mid-term?

Answer. My understanding is that there are two primary considerations that will determine future U.S. military missions and footprint in the Philippines. First, discussions between the United States and the Philippines on enhanced rotational presence of U.S. forces are ongoing. I cannot predict the outcome of those discussions. Second, I understand that DOD continues to assess requirements for the current counterterrorism mission in the southern Philippines as security in that region improves. If confirmed, I look forward to engaging on both of these issues as we chart the future of the alliance.

INDONESIA

Question. What is the current state of military-to-military relations with Indonesia and, specifically, Kopassus?

Answer. My understanding is that DOD considers Indonesia to be a strong defense partner and that the U.S.-Indonesian military-to-military relationship continues to improve after the years of restrictions ended in 2005. In my view, increased military-to-military engagement supports our ability to foster the continued reform and professionalization of the Indonesian Armed Forces. Current defense cooperation is focused on maritime security, peacekeeping, and humanitarian assistance and disaster relief. Bilateral defense trade is also growing.

With respect to Kopassus, I agree with the July 2010 decision by then-Secretary Gates to begin limited engagement. If confirmed, I would work with Congress to ensure that we help Indonesia continue to make progress on reform, human rights, and accountability issues.

Question. Do you favor increased U.S.-Indonesian military-to-military contacts? If so, under what conditions? Why?

Answer. If confirmed, I would support increased military-to-military engagement with Indonesia. My understanding is that we have a strong bilateral defense relationship as well as many shared regional security interests, including maritime security, counterterrorism, and cooperation within regional architectures. Indonesia is a key regional leader, including within the Association of Southeast Asian Nations, and will be an important partner in increasing multilateral defense cooperation in the region. I support continuing and building on our engagement consistent with required human rights vetting, and we will continue to encourage further defense reform efforts.

COLOMBIA

Question. Plan Colombia has enabled the Colombian government to make significant gains against the FARC (Revolutionary Armed Forces of Colombia) and other paramilitary forces in Colombia, as well as enabled the government to secure many previously ungoverned areas. Since fiscal year 2000, the United States has provided more than \$7 billion to support Colombia's efforts to counter the threat of transnational criminal organizations and various terrorist groups.

What are your views regarding the current situation in Colombia focusing upon: (1) the current military and political situation in Colombia; (2) the ability of the Colombian military to control its territory; and (3) ongoing DOD programs?

Answer. Since the start of Plan Colombia, the Government of Colombia has made enormous strides, with substantial U.S. support, to improve its internal stability and citizen security. It has dramatically improved its capacity to secure the country against several threats, including insurgents (such as the FARC), paramilitaries, illegally armed groups, and drug trafficking organizations. Colombia's Ministry of Defense, with U.S. support, continues to apply pressure on organizations like the FARC, while also working to address citizen security and external defense issues.

Colombia has made progress in asserting better governmental control of its territory and maintaining consistent pressure on the FARC, and continues to work to consolidate those gains. If confirmed, I would support the Department's efforts to encourage Colombia to maintain pressure on the FARC and other threats to internal stability.

I understand that DOD's security cooperation programs with Colombia have focused on training, equipping, and mentoring Colombians and also provide support to intelligence, surveillance, and reconnaissance programs. Colombia has also partnered with the United States in Central America, an area of common security interest. I am confident that Colombia will continue to grow as a stable, interoperable partner in supporting security in the region, and if confirmed, I look forward to working with my Colombian counterparts to this end.

Question. In your view, is the Colombian Government capable of sustaining the last decade's gains during this economic downturn and the scheduled decline in U.S. security assistance?

Answer. Yes.

Question. In light of budget conditions, do you believe continued U.S. security assistance to Colombia at the current levels is sustainable?

Answer. Given Colombia's substantial progress, described above in response to question 110, security assistance to Colombia has been on a downward glide path. Given budget realities, this trend will likely continue. I understand that the Department has made difficult decisions about where to focus our cooperation with Colombia, and has also highlighted some areas where continued U.S. support remains critical, such as institutional reform efforts.

Question. In your view, what are the remaining U.S. supported programs that will need to be continued to "lock in" the progress that has been made?

Answer. It has been several years since I have been briefed on the details of our assistance programs in Colombia, so I would want to Reserve judgment on this question until and if I am confirmed. Colombia's long-term stability and response to transnational interests is in our direct interest. As a general matter, well-designed and well-implemented programs that restore security, provide social services, promote justice and human rights, and encourage legitimate economic development in areas formerly under guerrilla and terrorist control are essential to helping Colombia secure the progress that has been made.

CENTRAL AMERICA AND MEXICO

Question. During a Senate Armed Services Committee hearing in 2011, General Douglas Fraser—the Commander of U.S. Southern Command—and Admiral Winnefeld—the former Commander of U.S. Northern Command—discussed the increasingly dangerous region between Colombia and Mexico, and the devastating impact transnational criminal organizations are having on the people and security in this region. The United States has increased its assistance in this region, but—to date—DOD has had only a small role.

What is your assessment of the threats posed by transnational criminal organizations in this region?

Answer. In the region between Colombia and Mexico, the Central American Governments continue to struggle against the threat described in the question. Several Central American countries have nascent governmental institutions, making them susceptible to the corrupting influences of transnational criminal organizations.

Question. What is your understanding and assessment of DOD's current activities in Mexico and Central America?

Answer. My understanding is that DOD's Mexico and Central America programs support host nation security efforts, as well as regional and hemispheric defense cooperation and coordination. DOD activities focus on professionalization, respect for human rights, and developing sustainable capabilities with regional Armed Forces. Within Central America, DOD's efforts are focused on building maritime capacity to curb illicit trafficking.

Additionally, DOD has the lead responsibility for the detection and monitoring of maritime and air illicit narcotic smuggling flow to Central and North America and manages those efforts through the Joint Interagency Task Force South, a component of U.S. Southern Command.

CUBA

Question. What is your view of the need to review and, potentially, revise U.S. policies regarding Cuba?

Answer. The President's policy is to promote positive change in Cuba and the ability of the Cuban people freely to determine their future. The President's policy

changes have allowed separated Cuban families to reunite and given Cuban citizens greater access to resources and information that allow them to establish greater independence from the state. We are open to a more constructive relationship with Cuba, consistent with our national interests, but that will be difficult to achieve while Cuba continues to hold in jail U.S. citizen Alan Gross and continues to detain, harass, and abuse its citizens for exercising their fundamental freedoms. Consistent with current policy, I support targeted bilateral engagements that advance U.S. national interests and the enactment of measures that help reduce the dependence of Cuban citizens on the state.

Question. What is your opinion about the need for, and the pros and cons of, military-to-military contact with Cuba?

Answer. I understand that the U.S. military currently conducts regular military-to-military fence line talks at U.S. Naval Station Guantanamo Bay with representatives of the Cuban Frontier Brigade in order to prevent misunderstandings on either side. The U.S. military also conducts an annual disaster-relief exercise with the Cuban military at Guantanamo Bay. I look forward to learning more about these engagements, if confirmed.

Question. In your view, is Cuba currently supporting or sponsoring international terrorism?

Answer. As designated by the Secretary of State, Cuba remains on the list of State Sponsors of Terrorism.

BUILDING PARTNER CAPACITY

Question. In the past few years, the Defense Department has requested and Congress has approved a number of temporary authorities to build the capacity of partner nations or provide security assistance. These include the “section 1206” global train and equip authority, targeted authorities to build capacity in Yemen and East Africa, and the Global Security Contingency Fund.

In your view, what are the strategic objectives and priorities for the Department’s programs for building the capacity of partner nations?

Answer. In my view, the Department’s capacity building programs aim to develop partners’ defense and security institutions, and enable them to provide for their own security and contribute to regional and multilateral responses to threats and instability. Doing so reduces the burden on U.S. forces to respond to security threats outside the United States, and develops a group of partner countries that can effectively participate in coalition-based operations.

Question. What improvements, if any, would you recommend, if confirmed, to the strategic direction, oversight, and management of the Department’s programs for building partner capacity to ensure that these programs are executed consistent with U.S. national security goals and objectives?

Answer. I have not yet had the opportunity to review the Department’s partner capacity building programs in detail. If confirmed, I would ensure that DOD assistance programs are appropriately managed and assessed for strategic effectiveness, are coordinated with interagency efforts, and adhere to the Defense Strategic Guidance.

Question. What is your assessment of the implementation and effectiveness of the Department’s programs for building partner capacity in achieving U.S. national security goals and objectives?

Answer. I have not been involved in the implementation of the Department’s partner capacity building programs, but I understand the Department has undertaken in-depth assessments of their effectiveness. If confirmed, I look forward to continuing the Department’s close collaboration with the Department of State and Congress on these programs.

Question. In your view, what should be the role of DOD, vis-a-vis the State Department and other civilian departments and agencies, in efforts to build the capacity of foreign security forces?

Answer. DOD is an important member of the interagency group that considers, executes, and evaluates the U.S. Government approach to building partner capacity. If confirmed, I would seek to maintain strong relationships with DOD’s interagency partners, to ensure the Department’s efforts to strengthen foreign security forces fully contribute to regional foreign policy objectives.

AUTHORITY FOR USE OF MILITARY FORCE/LAW OF ARMED CONFLICT

Question. On September 18, 2001, Congress passed the Authorization for the Use of Military Force (Public Law 107–40), which provides that “the President is authorized to use all necessary and appropriate force against those nations, organizations, or persons he determines planned, authorized, committed, or aided the terrorist at-

tacks that occurred on September 11, 2001, or harbored such organizations or persons, in order to prevent any future acts of international terrorism against the United States by such nations, organizations or persons.” This AUMF remains in effect and provides the legal authority for certain U.S. military actions.

What is your understanding of the role of the USD(P) in interpreting the AUMF and in the application of the AUMF to military activities?

Answer. My understanding is that the USD(P) is a principal advisor to the Secretary of Defense on policy-related matters regarding the application of the AUMF to military activities.

Question. In your view, does DOD have the legal authorities it needs to conduct military operations against entities responsible for September 11 and against those who plan further attacks against the United States?

Answer. Yes.

Question. In your view, do existing authorities provide the U.S. military the flexibility it needs to respond to new and emerging terrorism threats?

Answer. Yes.

Question. Without the AUMF, would the U.S. military have the authority to use force, including deadly force against members of al Qaeda and associated forces? If so, under what circumstances?

Answer. I believe that the President may, in certain circumstances, direct the use of military force without the express authorization of Congress, but I would defer to the General Counsel on the more detailed analysis of the circumstances under which he could do so.

Question. What is the impact of the President’s Policy Guidance on Counterterrorism on the application of the AUMF with respect to counterterrorism operations?

Answer. As far as I am aware, the Presidential Policy Guidance on Counterterrorism had no impact on the Department’s application of the AUMF with respect to counterterrorism operations.

Question. In your view, would it be appropriate for the United States to use military force against terrorist groups that have not engaged in hostilities directly against the United States, but merely shown an intent to do so? If so, under what circumstances?

Answer. My understanding is that any decision to use such force against a terrorist group showing an intent to engage in hostilities directly against the United States would be fully informed by analysis from the Intelligence Community; policy deliberation, and appropriate legal review.

UNMANNED SYSTEMS

Question. Over the last 4 years, the administration has worked to establish a framework that governs our use of force against terrorists—insisting upon clear guidelines, oversight and accountability that is now codified in Presidential Policy Guidance the President signed on May 22, 2013. As a part of that effort, the President has indicated a preference that the U.S. military should carry out the use of force in active warzones, and beyond.

What are your views on whether DOD should assume greater responsibility for lethal strikes by remotely-piloted aircraft (drones)?

Answer. I support the view that the U.S. military is the part of government that should be responsible for using force against terrorist threats abroad.

Question. What benefits or risks to national security would be implicated if the Department were to take the lead role in operating unmanned systems?

Answer. I believe that close cooperation between DOD and its interagency partners can address risks to our security, while providing the benefits of improved transparency with Congress and the public and greater efficiency across our Government.

STRATEGY FORMULATION AND CONTINGENCY PLANNING

Question. One of the purposes of Goldwater-Nichols was to increase military and civilian attention on the formulation of strategy and contingency planning. DOD Directive 5111.3 specifically assigns a major role to the Deputy Under Secretary of Defense for Policy for those important matters.

What is your view of the civilian role, as compared to the military role, in the formulation of strategy and contingency planning?

Answer. In my opinion, defense strategy and contingency plans must be anchored in national security principles established by the President. Civilian leaders play an important role in providing necessary guidance to shape military planning, and then have a role reviewing that planning. Working within the parameters outlined by the

President and Secretary of Defense, military leaders provide their best military advice on how to achieve objectives.

Question. In your opinion, does the civilian leadership currently have an appropriate level of oversight of strategy and contingency planning?

Answer. Having not served previously in DOD, I am not in a position to evaluate the level of civilian oversight of strategy and contingency planning. If confirmed, I intend to play an active role in supporting the Secretary of Defense and the USD(P) as they establish the strategic direction for the Defense Department and fulfill their statutory responsibilities.

Question. What steps do you believe are necessary to ensure effective civilian control and oversight of strategy and contingency planning?

Answer. In my experience working with both civilian and military leaders of DOD, I believe it is important to have open discussions on both what we ask the military to achieve and the proposed military approaches to key security challenges. If confirmed, I intend to support the Secretary and Under Secretary fully in fostering such discussions.

DEPARTMENT OF DEFENSE STRATEGIC GUIDANCE

Question. The DOD strategic guidance, "Sustaining U.S. Global Leadership: Priorities for 21st Century Defense," announced by President Obama on January 5, 2012, sets out the defense priorities for the 21st century and the key military missions for which the DOD will prepare.

Do you agree with the defense priorities set out in that guidance? What changes, if any, would you recommend to those defense priorities?

Answer. Yes. Any changes to this guidance should be reviewed in light of an evolving future security environment, as well as the realities of the changing fiscal environment.

Question. The DOD strategic guidance includes a new emphasis on U.S. security interests and challenges in the Asia-Pacific region. Accordingly, the Department is taking steps to shape U.S. forces relative to the air and maritime demands of the Far East and deemphasizing readiness for prolonged or large-scale stability operations.

What is your understanding and assessment of the new strategic guidance's shift of emphasis to the Asia-Pacific and away from large-scale stability operations, and the implications of this shift for shaping U.S. force structure?

Answer. The United States has strong and longstanding ties with countries in the Asia-Pacific region, where the United States has supported security and stability with our military presence and partnerships. The rebalance reflects an understanding of the growing importance of Asia to the world economy and our own security and prosperity. In terms of force structure changes to support the rebalance, I understand that DOD is building resiliency in its regional operating bases, enhancing capacity for long-range strike, and making investments in cyber and space capabilities. DOD also continues to invest in advanced capabilities for undersea operations and fifth-generation fighter aircraft.

I understand that U.S. ground forces will retain sufficient capacity to undertake limited counterinsurgency and stability operations, if required. DOD is also ensuring that it has the ability to mobilize and regenerate forces if a larger-scale stability operation becomes necessary in the future. Finally, the institutional elements of the ground forces are seeking to retain and refine the lessons learned and specialized capabilities that have been developed over the past 10 years in Iraq and Afghanistan.

COMBATING TERRORISM

Question. What is your assessment of the threat posed by al Qaeda and its associated forces to the U.S. Homeland, U.S. interests overseas, and Western interests more broadly?

Answer. Al Qaeda and its associated forces continue to pose a persistent threat to the U.S. Homeland, U.S. interests overseas, and Western interests more broadly.

Question. What do you believe is the terrorism threat from al Qaeda and affiliated groups in each of the geographic combatant commands? Of these threats, what do you consider the highest counterterrorism priorities?

Answer. I believe the highest counterterrorism priorities remain in the CENTCOM AOR. Core al Qaeda and its affiliates and adherents in Afghanistan and Pakistan remain a persistent and serious threat. Al Qaeda in the Arabian Peninsula has proven its capability to initiate attacks against the United States, and is the most lethal al Qaeda affiliate. Al Qaeda's continued persistence in Iraq and Syria raises regional concerns.

In the U.S. Africa Command AOR, al-Shabaab remains a threat to U.S. and Western interests in the Horn of Africa, and has staged high-profile attacks against Western targets in the region. My understanding is that there is no current, credible evidence that al Qaeda in the Islamic Maghreb is a direct threat to the U.S. Homeland. AQIM and its associates do, however, threaten U.S. persons and interests abroad, as well as those of our European allies.

In the remaining geographic combatant command AORs, I understand that the threat from al Qaeda is less pronounced. If confirmed, I would work with the Intelligence Community, the Department's interagency partners, and our foreign partners to disrupt and dismantle any emerging threats from al Qaeda in the regions.

Question. What is your understanding of the Department's role in the U.S. strategy to combat terrorism?

Answer. DOD supports the President's National Strategy for Counterterrorism principally by building partner capacity and, when appropriate, capturing or killing terrorists who pose a continuing, imminent threat to U.S. persons.

Question. Are you aware of any nexus between non-state actors and criminal networks?

Answer. Yes, it is my understanding that a strong nexus exists between illicit non-state actors and global criminal networks. In locations such as Colombia, Peru, Afghanistan, and the Sahel, there is plenty of evidence of instability fostered and funded by the convergence of criminal networks and terrorist organizations. These relationships pose threats to the national security of the United States and to our allies and partners.

Question. Given your current knowledge of DOD's programs, do you believe resources are aligned in a manner consistent with these counterterrorism priorities?

Answer. I understand the Department has appropriately aligned its counterterrorism resources with the priorities outlined in the National Strategy for Counterterrorism. If confirmed, I look forward to working on this issue in greater detail and ensuring we remain agile in our ability to address emerging threats.

MASS ATROCITIES PREVENTION

Question. President Obama identified the prevention of mass atrocities and genocide as a core U.S. national security interest, as well as a core moral interest, in August 2011 under Presidential Study Directive 10.

Among interagency partners, what is DOD's role in addressing atrocity threats, and what tools does DOD have for preventing or responding to atrocities?

Answer. As President Obama noted in April 2012, preventing and responding to atrocities is a core national security interest of the United States. I understand that the Department has played an active role in the efforts of the Atrocities Prevention Board and has worked to strengthen support to emerging atrocity situations. If confirmed, I would continue these efforts and ensure that the Department plays an active role in supporting the Atrocities Prevention Board.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent legislation, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of the overall effectiveness of this authority?

Answer. Although I understand that DOD section 1208 programs are widely supported by both interagency partners in the field and our foreign partners, I would make it a priority—if confirmed—to ensure that the Department has objective measures for assessing the program's strategic effectiveness.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS ACTIVITIES

Question. On an annual basis, DOD's counternarcotics (CN) program expends more than \$1.0 billion to support U.S. CN operations, build the capacity of certain foreign governments around the globe, and analyze intelligence on CN-related matters.

What is your understanding and assessment of the DOD CN program?

Answer. DOD is assigned the mission of lead U.S. agency for the detection and monitoring aerial and maritime drug traffic bound for the United States. It is my understanding that DOD provides militarily unique capabilities to support law enforcement organizations, both foreign and domestic, in their efforts to combat illicit drug trafficking. The revenues generated by illicit narcotics trafficking provide support for terrorists, insurgents, and other criminal groups that threaten U.S. national

security interests. The Department's counternarcotics program serves as a cost-effective way to protect these interests.

Question. What is your understanding of the Department's CN authorities?

Answer. It is my understanding that the Department's CN authorities allow DOD to provide critical enablers to law enforcement and partner nations' security forces to confront the threat posed by illicit narcotics trafficking, and terrorism. The use of these authorities often provides ancillary benefits to law enforcement efforts in other areas including addressing other forms of transnational organized crime. As the lead agency for the detection and monitoring of aerial and maritime drug traffic bound for the United States, the Department also has authority to assist our State, local, tribal, Federal, and international law enforcement partners. DOD CN authorities also support our geographic combatant commanders' CN programs, covering regions in Central and South America as well as Afghanistan. CN authorities also allow for the provision of CN programs and activities through the National Guard Counterdrug Programs of 50 States and 3 Territories. If confirmed, I look forward to working with Congress to preserve these authorities.

Question. Should the United States reassess ongoing efforts to combat the trafficking of illegal narcotics in the Western Hemisphere given the increasing concerns of many of the Nations in the Hemisphere about the lack of results from the decades old war on drugs?

Answer. In my view, DOD has played a key role in supporting U.S. and partner nation counternarcotics efforts that have made progress against cocaine use and distribution throughout the Western Hemisphere. According to the Office of National Drug Control Policy, DOD counternarcotics efforts helped reduce the amount of cocaine reaching the United States, which has contributed to declines in cocaine overdose deaths, positive workplace drug tests, retail drug purity, and cocaine seizures in the United States. Nevertheless, continued high levels of cocaine, heroin, and methamphetamine trafficking, and the growing threat of synthetic drugs, continue to present a difficult challenge, and there is room for improvement. If confirmed, I would work to find better ways to disrupt the production and trafficking of illegal drugs, which in turn can contribute to reduced stability in affected countries.

TRAINING AND EQUIPPING FOREIGN SECURITY FORCES

Question. The fiscal year 2014 defense appropriations act makes a number of changes to the prohibitions and vetting process required for training, equipping, or providing other assistance to foreign security forces that have committed gross violations of human rights.

What is your assessment of these changes and their possible effect on the Department's ability to provide needed training, equipment, or other assistance, especially in countries such as Mexico, Afghanistan, and Myanmar?

Answer. I strongly support the Leahy law, and I am aware that the Secretary of Defense, and the Secretary of State strongly support it also. If confirmed, I would review the impact of fiscal year 2014 changes to the Leahy law on DOD activities.

Question. What concerns, if any, do you have regarding the changes to the law?

Answer. I do not have any concerns at this point with the changes to the Leahy law made in the fiscal year 2014 act.

Question. Would it be beneficial to have an exception to the prohibitions on training and providing assistance to allow the Department to provide limited training on human rights, rule of law, the English language, and the law of armed conflict?

Answer. I am not aware that the administration is recommending any changes to the Leahy law.

NATIONAL STRATEGY TO COMBAT TRANSNATIONAL ORGANIZED CRIME

Question. Transnational criminal organizations are having a debilitating impact on the ability of our foreign partners to govern their nations and provide opportunities for their people. Last July, President Obama released the first National Strategy to Combat Transnational Organized Crime. DOD is not a law enforcement agency, but it does bring unique enabling capabilities to our Nation's Federal law enforcement agencies.

What role, if any, should DOD play in combatting transnational criminal organizations?

Answer. The President stated in his Strategy to Combat Transnational Organized Crime that transnational organized crime is a threat to our national security. I agree with the Strategy's call for the U.S. Government to build, balance, and integrate the tools of national power to combat transnational organized crime and related threats. DOD has a supporting role to play in this effort. Although DOD does not, and should not, serve as the lead U.S. Government agency for transnational or-

ganized crime, it is my view that DOD should continue to provide unique support to U.S. law enforcement and foreign partners in our common efforts against transnational organized crime.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate.

What are your views on U.S. accession to UNCLOS?

Answer. I support U.S. accession to the Law of the Sea Convention. The United States has a significant interest in promoting a rules-based international order, including the international law of the sea. Dating back to the Nixon administration, the United States played a substantial role in drafting and negotiating the Law of the Sea Convention and its 1994 Implementing Agreement. The Convention effectively preserves our interests as both a coastal nation and a maritime nation.

Question. From a national security standpoint, what do you see as the advantages and disadvantages to being a party to UNCLOS?

Answer. The Convention advances the interests of the United States as a global maritime power. Specifically, the Convention codifies the rights, freedoms, and uses of the sea, including rights of innocent passage in the territorial sea, transit passage in straits used for international navigation, archipelagic sea lanes passage, and the traditional freedoms of navigation and overflight beyond the territorial seas of any coastal State. I am unaware of any disadvantages of the United States joining the Convention.

Question. What is your understanding of the principal arguments against ratifying UNCLOS, and what is your response to those arguments?

Answer. The Senate Foreign Relations Committee twice approved the Convention during the last decade, in 2004 and in 2007. The arguments against the Convention, and the responses to those arguments, are fully developed in the reports of the committee. I agree with the arguments set forth by the majority of members who twice approved the Convention, which are reflected in those reports, specifically S. Exec. Rept. 108-10 (2004) and S. Exec. Rept. 110-9 (2007).

CYBERSPACE

Question. What is your understanding of the role of the Office of the Under Secretary of Defense for Policy (OUSD(P)) in the development of policy and strategy for military operations in cyberspace and in exercising oversight of U.S. Cyber Command (CYBERCOM) and the National Security Agency?

Answer. My understanding is that the OUSD(P) plays an important role in providing senior-level civilian oversight of CYBERCOM, working closely with U.S. Strategic Command and CYBERCOM on cyberspace strategy and policy, contingency planning, and policy oversight of cyberspace operations. In accordance with the National Defense Authorization Act for Fiscal Year 2014, OUSD(P) will work closely with the Secretary's principal cyber advisor. Finally, OUSD(P) works closely with and supports the Office of the Under Secretary of Defense for Intelligence in its role overseeing NSA.

Question. In the cyberspace domain, for each of the mission areas of cyber network defense, cyber network exploitation, and cyber network attack, what is your understanding of the relationship between the OUSD(P) and each of the following: the Chief Information Officer; the Under Secretary of Defense for Acquisition, Technology, and Logistics; and the Under Secretary of Defense for Intelligence?

Answer. My understanding is that, to defend DOD networks, the OUSD(P) and the Chief Information Officer frequently work together to support initiatives such as the Joint Information Environment that improve the resiliency of DOD networks. OUSD(P) also works closely with the Office of the Under Secretary of Defense for Acquisition, Logistics, and Technology (OUSD(AT&L)), in particular through the Cyber Investment Board, which addresses resource allocation issues across the cyber mission areas. OUSD(P) has a strong relationship with the Office of the Under Secretary for Intelligence (OUSD(I)) because of the nexus between intelligence and cyber operations, which also support activities across the cyber mission areas.

Question. What is your assessment of the maturity and adequacy of policy and doctrine governing defensive, offensive, and intelligence-gathering operations in cyberspace, both within DOD and the interagency? What gaps or deficiencies remain, in your view?

Answer. My understanding is that DOD continues to refine doctrine, policies, and organizational relationships to enable CYBERCOM to execute its missions in cyberspace. In particular, CYBERCOM continues to refine its concepts of operations and employment, command and control structure, and training and readiness standards.

These efforts represent a significant maturation of the policy and doctrine that govern cyberspace operations. DOD also supports the newly released framework developed by the National Institute of Standards and Technology and the Department of Homeland Security (DHS) to improve the defenses of critical infrastructure upon which the Department depends.

Question. What is your assessment of the appropriate roles and responsibilities of DOD, vis-a-vis other government agencies (such as the Department of Homeland Security, the Intelligence Community, and the Justice Department) and the private sector in preparing for, and the conduct of, the defense of government and critical infrastructure networks in cyberspace?

Answer. DOD is responsible for defending the Nation against attacks in all domains, including cyberspace. When directed by the President or the Secretary of Defense, DOD conducts cyberspace operations to enable military operations, to operate and defend military systems, and to secure DOD critical infrastructure. If and when directed, DOD provides support to State and local governments and to the private sector. Departments and agencies across the Federal Government coordinate with the private sector to develop cybersecurity solutions and to mitigate risks and vulnerabilities.

It is my understanding that DHS has the primary responsibility for coordinating domestic cyber incident prevention, protection, mitigation, and recovery. In addition, DHS is responsible for securing unclassified Federal civilian networks and systems. DOD and the Department of Justice (DoJ) provide technical support to DHS as it carries out these missions. DoJ investigates, attributes, disrupts, and prosecutes cybercrimes outside of military jurisdiction. The Intelligence Community provides cyber threat information to agencies of the U.S. Government as they carry out their missions.

ILLICIT ARMS TRAFFICKING

Question. What is your understanding of the problem of illicit arms trafficking and the role of the United States to deal with the problem?

Answer. The trafficking of illicit arms is a serious, worldwide problem. Because of the United States' experience in this area and our strong and well-developed arms export control system, we can be a leader in engaging partner countries on ways to combat illicit arms trafficking more effectively.

Question. In your view, to what extent, if at all, does the lack of national controls and enforcement on arms flows contribute to the illicit trafficking problem, and could efforts to respond to illicit trafficking be improved if other countries adopted and enforced national regulations on arms import, export, and transit similar to those of the United States?

Answer. Where illicit trafficking is pervasive, partner countries should improve their arms transfer processes. If confirmed, I would encourage other countries to improve the standards of their controls, to make them closer to those of the United States, so that the international trafficking of illicit arms would become much more difficult.

Question. Do you think the arms trade treaty would enhance U.S. national security interests?

Answer. Yes. The Arms Trade Treaty would help to establish higher international standards for the transfer of arms that are based on the standards that apply in the United States, thus making it much more difficult for terrorists or other illicit actors to obtain them. It is in the interest of U.S. national security to have fewer weapons in the hands of illicit actors.

ARMS CONTROL

Question. What role do you see for arms control as a means of improving U.S. national security?

Answer. Arms control can contribute to U.S. national security by providing predictability and stabilizing the strategic or military balance between the United States and other nations at lower levels of weapons, including strategic nuclear forces. I believe such agreements, and their attendant verification provisions, make the United States safer and more secure, as they provide mutual transparency and predictability regarding military forces.

Question. What are your views on the possible next steps to address nuclear weapons issues between the United States and Russia?

Answer. The President determined after a review of our nuclear strategy that we can ensure the security of the United States and our allies and partners and maintain a strong and credible nuclear deterrent while safely pursuing up to a one-third reduction in deployed nuclear weapons below the limits established in the New

START treaty. The administration is seeking to pursue such reductions through negotiations with the Russian Federation. The United States has made clear our interest in seeking reductions in all categories of nuclear weapons, including non-strategic nuclear weapons.

Question. What conditions, if any, do you believe need to be met to further reduce strategic and tactical nuclear stockpiles through arms control?

Answer. We require a willing partner, but to date, Russia has not shown interest in pursuing such discussions. The administration will continue to engage with Russia to gauge interest in pursuing opportunities for arms control relating to both strategic and non-strategic nuclear stockpiles.

Question. What might be the risks and benefits of pursuing reductions below New START force levels?

Answer. Further reductions in the nuclear forces of Russia and the United States offer a number of benefits, including reducing the number of nuclear weapons that can be targeted against the United States and promoting our nuclear non-proliferation objectives. Reducing nuclear forces also benefits the United States by permitting us to maintain strategic stability and predictability at lower force levels. Such a posture, supported by modernization programs to maintain the credibility of our deterrent force, will provide the United States sufficient forces to deter or respond to 21st century threats.

BALLISTIC MISSILE DEFENSE

Question. In February 2010, the Defense Department issued its report on the first-ever comprehensive review of U.S. ballistic missile defense policy and strategy, the BMDR, as required by Congress. The BMDR established a number of policy priorities, including establishing defense against near-term regional missile threats as a top priority of missile defense plans, programs and capabilities. It also stated the policy of sustaining and enhancing the ability of the Ground-based Midcourse Defense system to defend the homeland against attack by a small number of long-range missiles by countries such as North Korea and Iran, and of hedging against future uncertainties.

Do you support the policies, strategies, and priorities set forth in the BMDR?

Answer. Yes.

Question. Do you agree that our missile defense must be fiscally sustainable?

Answer. Yes, we have an obligation to invest in effective, affordable missile defense systems. If confirmed, I would continue to implement DOD's commitment to deploying capabilities that have been proven through testing and assessment and that are affordable over the long term.

Question. In September 2009, President Obama announced that he had accepted the unanimous recommendation of the Secretary of Defense and the Joint Chiefs of Staff to pursue a Phased Adaptive Approach (PAA) to missile defense in Europe. This approach is intended to defend all of Europe against existing and emerging threats from Iranian missiles, increasing in capability with each of its four phases. Phase 4 of the European PAA is intended to provide a capability to defend against potential future long-range missiles from Iran that could reach the United States, thus augmenting the existing homeland missile defense capability.

Do you support the PAA to Missile Defense in Europe and, if confirmed, will you implement it?

Answer. Yes, I support the European Phased Adaptive Approach and the plans for it that Secretary Hagel announced on March 15, 2013. If confirmed, I would continue to implement those plans.

Question. Do you agree that any ballistic missile defense systems that we deploy operationally must be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat?

Answer. Yes.

Question. Do you agree that ballistic missile defense testing needs to be operationally realistic, and should include Operational Test and Evaluation, in order to assess operational capabilities and limitations of ballistic missile defense systems, prior to deploying such systems?

Answer. Yes.

Question. The United States and NATO are seeking options to cooperate with Russia on missile defense, including the possibility of sharing radar and early warning data. President Obama has announced that such cooperation would not limit U.S. or NATO missile defense capabilities.

Do you agree that such cooperation could enhance the security of the United States, NATO, and Russia against common missile threats from Iran, and could

send a powerful signal to Iran that could help persuade Iran not to pursue long-range missiles or nuclear weapons?

Answer. Yes. U.S./NATO cooperation with Russia on missile defense has the potential to improve our mutual security against the threat of Iranian ballistic missiles and nuclear weapons and would send a strong signal to Iran of our common resolve.

Question. Do you agree that, notwithstanding Russian concerns, the United States is committed to the continued development and deployment of U.S. missile defense systems, including qualitative and quantitative improvements to such systems, needed to meet our security needs?

Answer. Yes. I believe that the proliferation of ballistic missiles is a real and growing threat to the United States, our deployed forces, and our allies and partners. If confirmed, I would work to improve our missile defense forces to meet our national security needs.

NATIONAL SECURITY SPACE POLICY

Question. What role, if any, do you believe the PDUSD(P) should play in the establishment of a national security space policy?

Answer. The role of the PDUSD(P) is to support the USD(P) in carrying out the responsibilities of overseeing implementation of existing national security space policy in coordination with other agencies and with Congress. The Principal Deputy Under Secretary also supports the Under Secretary in carrying out responsibilities for overseeing development of new policy when circumstances warrant.

SPECIAL OPERATIONS FORCES

Question. The previous two Quadrennial Defense Reviews (QDR) have mandated significant growth in our Special Operations Forces (SOF) and enablers that directly support their operations.

Do you believe QDR-directed growth in the size of SOF can and should be maintained in light of current fiscal challenges?

Answer. I understand that SOF are a highly-efficient and effective capability that the Department intends to preserve. If confirmed, I would work with the Service Chiefs, the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (ASD(SO/LIC)), and the Commander, U.S. Special Operations Command (SOCOM) to ensure the SOF community is appropriately sized to meet the full range of missions assigned globally.

Question. Special Operations Forces heavily rely on enabling capabilities provided by the GPFs to be successful in their missions.

In light of current fiscal challenges, do you believe sufficient enabling capabilities can be maintained within the GPFs and that such capabilities will remain available to Special Operations Forces when needed?

Answer. If confirmed, I would work closely with the Service Chiefs, the ASD(SO/LIC), and the Commander, SOCOM to ensure the Department is appropriately structured and resourced to make enablers available to both SOF and the GPFs.

Question. Do you believe Special Operations Forces should develop additional organic enabling capabilities in addition or in place of those currently provided by the GPFs?

Answer. If confirmed, I would work with the ASD(SO/LIC) and the Commander, SOCOM to examine this issue.

Question. The Commander of U.S. Special Operations Command (SOCOM) has sought more control over the deployment and utilization of Special Operations Forces. For example, the Secretary of Defense modified policy guidance for the combatant commands earlier this year that gave SOCOM, for the first time, responsibility for resourcing, organizing, and providing guidance to the Theater Special Operations Commands of the geographic combatant commanders and Special Operations Forces assigned to them. It has been reported that the Commander of SOCOM is also seeking new authorities that would allow him to more rapidly move Special Operations Forces between geographic combatant commands.

Please provide your assessment of whether such changes are appropriate and can be made without conflicting with civilian control of the military, infringing upon authorities provided to the geographic combatant commanders, or raising concerns with the State Department.

Answer. I understand that SOCOM resources deployments of SOF personnel to the geographic combatant commands, but that the geographic combatant commanders continue to exercise operational control over those deployed forces. If confirmed, I would work closely with the Department of State and other relevant inter-agency partners to understand the contours of this issue more fully.

Question. Do you believe SOCOM is appropriately resourced to adequately support the Theater Special Operations Commands and Special Operations Forces assigned to them?

Answer. If confirmed, I would work with ASD(SO/LIC) and the Commander, SOCOM, to understand more fully the resourcing issues associated with the Theater Special Operations Commands and their assigned forces.

INTERAGENCY COLLABORATION

Question. The collaboration between U.S. Special Operations Forces, GPFs, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan, Iraq, and elsewhere?

Answer. The lessons learned on interagency efforts over the past decade have led to well-informed, transparent, constant communication and collaboration at multiple levels. If confirmed, I would work to ensure we continue operating under a common strategic framework and build long-lasting, multi-departmental relationships with our interagency partners.

Question. How do you believe these efforts can be improved?

Answer. I strongly support a whole-of-government approach to counterinsurgency and counterterrorism operations. If confirmed, I would work to maintain and expand the capacities and institutions that have supported successful, collaborative interagency efforts over the course of the past decade.

Question. If confirmed, what would be your role in encouraging greater interagency collaboration between U.S. Special Operations Forces, GPFs, and other U.S. Government departments and agencies?

Answer. I believe that interagency collaboration is the most important contributing factor to many SOF achievements. If confirmed, I would work with the ASD(SO/LIC) and the Commander, SOCOM, to help them oversee, maintain, and build upon the important relationships developed over the past decade.

MULTILATERAL PEACEKEEPING OPERATIONS

Question. In testimony before the House Committee on Foreign Affairs (July 29, 2009), Ambassador Susan Rice, U.S. Ambassador to the United Nations, stated that the United States “is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to U.N. peacekeeping operations.”

What is your view on whether the United States should contribute additional military personnel to both staff positions and military observers in support of U.N. peacekeeping operations?

Answer. If confirmed, I would support additional contributions of U.S. military personnel to staff officer positions, provided that they are positions that would add significant value to the mission, and that the mission is a strategic priority for the United States.

Support for international peacekeeping remains an important security objective for the U.S. Government, and the United States has a stake in the success of U.N. peacekeeping operations. I believe that, where practical, the United States should continue to provide military personnel for U.N. peacekeeping operations, especially for key staff positions that can help shape the direction and success of the mission. If confirmed, I would carefully evaluate any proposals to contribute military or civilian personnel to a U.N. peacekeeping operation, weighing the potential positive impact of U.S. participation in the mission against other military commitments we have around the globe, and the estimated cost of U.S. involvement.

Question. What are the advantages and disadvantages of contributing additional military personnel to U.N. operations?

Answer. Contributing additional military personnel to U.N. missions can provide the opportunity to shape U.N. missions and enhance mission success. Successful U.N. peacekeeping operations are in the core national security interest of the United States, as they generally are cost effective, reduce the burden on U.S. forces, and in many cases directly advance U.S. security interests. Additionally, the Department gains real-time information and insights on emerging threats and crises from places where there might not otherwise be a U.S. presence. We must be mindful, however, of the additional demands these assignments could impose on the Department.

DETAINEE TREATMENT POLICY

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2–22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. Yes.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the PDUSD(P)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

SEQUESTRATION

1. Senator INHOFE. Mr. McKeon, I believe we can all agree that sequestration has had a devastating impact on our Nation's military readiness. However, I also believe many are under the mistaken impression the Ryan/Murray agreement solved this problem. It did not. It helped, but DOD is still subject to \$76.96 billion in sequester cuts in fiscal year 2014 and fiscal year 2015. Even with the small relief in fiscal year 2014 and fiscal year 2015, do you think we can execute the current Defense Strategic Guidance? If you believe we can execute the strategy but with greater risk, can you explain what you mean by risk? To me, risk equals lives, the lives of our men and women in uniform.

Mr. MCKEON. I am not yet in a position to evaluate the Department's updated defense strategy in the 2014 Quadrennial Defense Review (QDR). However, if confirmed for this position, I will focus on ensuring the Department can fulfill our defense strategy, based on the means provided, and identify clearly the risks we are not able to mitigate for our country and for our servicemembers.

NATIONAL SECURITY AND DEFENSE STRATEGY

2. Senator INHOFE. Mr. McKeon, a new QDR should be published soon. This is a critical document which sets DOD's strategies and priorities. Recently, DOD conducted a Strategic Choices Management Review, commonly called the Skimmer. The Skimmer explored different military capabilities based upon various funding scenarios. Both of you have watched the Skimmer process closely and Ms. Wormuth you have worked on the QDR itself. Many are concerned that in an effort to seek defense cuts, the new QDR will expose the United States to risks which recently would have been unthinkable. Therefore, will the QDR articulate where we are going to be taking additional risks?

Mr. MCKEON. Although I have not reviewed the 2014 QDR, I understand that it articulates risk to some missions at various defense funding levels. These include the President's fiscal year 2015 budget request, as well as the risk if sequestration-level funding returns, proposed reforms are rejected, and budget uncertainty continues.

3. Senator INHOFE. Mr. McKeon, will the defense cuts cause major changes to our National Security Strategy and National Military Strategy?

Mr. MCKEON. The Department of Defense (DOD) is working closely with the White House as the National Security Council Staff updates the National Security Strategy. This close coordination will ensure that the National Security Strategy, the 2014 QDR, and the President's fiscal year 2015 budget request will be consistent and mutually reinforcing. I am currently unfamiliar with the state of development of the National Military Strategy.

4. Senator INHOFE. Mr. McKeon, how can you tell when a strategy has gone from being budget-informed to being budget-driven?

Mr. MCKEON. A strategy goes from being budget-informed to budget-driven when it sets investment priorities without a logical connection to how these investments support the Department's primary missions or U.S. national security interests. Strategies should be informed by the budget to ensure realistic expectations on what the Armed Forces can achieve. Strategies should not be driven by the budget because doing so risks developing a future force that is not aligned with the President's expectations of what the Armed Forces should be prepared to do.

5. Senator INHOFE. Mr. McKeon, how are our risks affected when you change from being budget-informed to being budget-driven?

Mr. MCKEON. In a budget-informed approach, risk can be defined in terms of the ability of military forces to conduct the missions called for by the defense strategy. In a budget-driven approach, risk is more difficult to assess or reduce because the methodology does not allow for the development of different approaches to meet the objectives of the strategy.

 QUESTIONS SUBMITTED BY SENATOR ROGER F. WICKER

POTENTIAL RUSSIAN TREATY VIOLATION

6. Senator WICKER. Mr. McKeon, in Berlin last year, President Obama gave a speech calling for further cuts to our nuclear deterrent. He stated that we need to work with Russia on new arms control agreements that go below the New Strategic Arms Reduction Treaty (START) levels. What role did you play in the drafting of this speech?

Mr. MCKEON. As I testified on February 25, I may have reviewed some of the drafts of the speech, and may have offered comments to the speechwriter.

7. Senator WICKER. Mr. McKeon, did the President call for these cuts and for working with Russia while he knew Russia was violating a major arms control agreement? Wasn't this disingenuous on the White House's part?

Mr. MCKEON. Based on your questions during the public hearing, I believe you are referring to the Intermediate-Range Nuclear Forces (INF) Treaty. As I testified, and indicated in my letter of February 24, the administration is concerned about Russian activity that raises concerns about Russian compliance with the INF Treaty; a formal compliance review is ongoing but has not yet been completed.

8. Senator WICKER. Mr. McKeon, in December 2012, the administration threatened to veto the NDAA because of section 1035(c) of that Act. Specifically, this provision stated that the United States could not reduce its nuclear deterrent until the

President certified that Russia was in compliance with its Arms Control Treaty obligations. Were you on the National Security Staff at the time?

Mr. MCKEON. Yes.

9. Senator WICKER. Mr. McKeon, in light of the New York Times story on the INF Treaty, is it fair to say that the President issued that veto threat because he could not certify that Russia was complying with its treaty obligations?

Mr. MCKEON. The administration released two Statements of Administration Policy (SAP) in connection with the National Defense Authorization Act (NDAA) for Fiscal Year 2013. The first was issued on May 15, 2012, in connection with H.R. 4310; the second one was issued on November 29, 2012, in connection with S. 3254. The former expressed strong objections to sections 1053–1059, because they “would impinge on the President’s ability to implement the New START treaty and to set U.S. nuclear weapons policy.” The latter does indicate that the President’s senior advisers would recommend the President veto the bill in its current form but there is no mention in the SAP of provisions relating to Russia or arms control treaty obligations.

The President signed the NDAA for Fiscal Year 2013 in January 2013 (Public Law 112–239), section 1035, as modified by section 801(a) of the American Taxpayer Relief Act of 2012 (Public Law 112–240), adds a new section 495 to title 10, United States Code. On January 3, 2013, in signing the NDAA, the President issued a signing statement which said—

Section 1035, which adds a new section 495(c) to title 10, is deeply problematic, as it would impede the fulfillment of future U.S. obligations agreed to in the New START treaty and hinder the executive’s ability to determine an appropriate nuclear force structure. I am therefore pleased that Congress has included a provision to adequately amend this provision in H.R. 8, the American Taxpayer Relief Act of 2012, which I will be signing into law today.

I believe the concern expressed at the time by the administration about this provision related to the fact that the administration was unable to certify Russian compliance with certain treaties, including the Conventional Forces in Europe Treaty and the Chemical Weapons Convention, and, as expressed in the President’s statement, that the executive branch could not accept constraints on the President’s ability to set U.S. nuclear policy.

10. Senator WICKER. Mr. McKeon, were you aware that in October 2012, the chairmen of the House Armed Services and House Intelligence Committees had written to the President with their concerns about Russia’s violation of the INF Treaty?

Mr. MCKEON. I was likely aware of it at the time the letter was received in the White House.

11. Senator WICKER. Mr. McKeon, you were a central staff member behind the administration’s push to ratify the New START treaty in 2010. You recalled, I assumed, the letter the President wrote to Senators on December 20th of that year stating: “I recognize that nuclear modernization requires investment for the long-term, in addition to this 1-year increase. That is my commitment to Congress—that my administration will pursue these programs and capability for as long as I am President.” Can you assure us that the National Security Staff, under Ms. Sherwood Randall, is not undertaking any reviews of how to walk away from that commitment for the sake of the President’s nuclear disarmament legacy?

Mr. MCKEON. Yes, the President stands behind the commitment made in the letter. The administration remains fully committed to the investments required to ensure that our nuclear arsenal remains safe, secure, and effective.

12. Senator WICKER. Mr. McKeon, do you agree that the United States has an obligation to keep our allies, such as the North Atlantic Treaty Organization (NATO), fully and timely informed on matters that impact their national security, such as a violation of the INF Treaty?

Mr. MCKEON. The United States has obligations to our NATO allies under the North Atlantic Treaty. Included in the treaty is a commitment in Article 3 that the parties will “separately and jointly maintain and develop their individual and collective capacity to resist armed attack”. Accordingly, we regularly inform and consult with our allies about matters affecting their security and the security of the Alliance.

13. Senator WICKER. Mr. McKeon, in 2012, NATO undertook a Deterrence and Defense Posture Review, which included a full examination of their nuclear posture. Did the United States have important information on the INF Treaty which we did not share with NATO?

Mr. MCKEON. The United States keeps our NATO allies informed about matters that affect their national security and the security of the Alliance, including treaty compliance issues. Throughout the Deterrence and Defense Posture Review (DDPR) process, the United States consulted closely with our NATO allies about the overall security environment and the capabilities we and our allies require to meet the challenges we face, and we continue to do so.

14. Senator WICKER. Mr. McKeon, would you please explain why we wouldn't inform our Article V mutual defense and security allies of a violation, which is a threat to their security more than ours, especially during their consideration of a review focusing on deterrence and defense?

Mr. MCKEON. Throughout the DDPR process, the United States consulted closely with our NATO allies about the overall security environment and the capabilities we and our allies require to meet the challenges we face, and we continue to do so. As noted previously, a compliance review regarding Russian compliance with the INF Treaty is ongoing.

15. Senator WICKER. Mr. McKeon, on January 30th, a New York Times article described a previously undisclosed Russian violation of the INF Treaty. When State Department spokeswoman Ms. Jen Psaki was asked about the facts of the New York Times report, she stated: "I don't have anything to refute." We take this to mean that the facts of the article are accurate. Do you have anything to refute?

Mr. MCKEON. As I stated in the February 25 hearing, and in my letter to you of February 24, we have concerns about Russian compliance with the INF Treaty. As I cannot comment on the details of these concerns in an unclassified form, I refer you to my letter of February 24 for additional information.

16. Senator WICKER. Mr. McKeon, the Senate received a classified briefing in late 2010, prior to its vote on the New START treaty, regarding a potential arms control issue with Russia. What role did you play in organizing that briefing?

Mr. MCKEON. I recall two classified briefings in September 2010 related to a potential arms control issue with Russia.

One occurred on or about September 15, 2010, for the senior staff of the Senate leadership and the national security committees. I understand that this briefing was conducted by officials from the Intelligence Community (IC). I do not recall having any role in organizing it.

The second occurred on September 29, 2010, when the Director of National Intelligence briefed an all-Senators session on the National Intelligence Estimate on the IC's ability to monitor the New START treaty. I included an excerpt of Director Clapper's statement in my letter of February 24. As part of the administration's efforts to ensure that all Senators were briefed on the treaty and relevant issues, I believe that I worked with the Office of the Director of National Intelligence (ODNI) as well as the Departments of State and Defense to arrange for this briefing to occur prior to the adjournment of that session of the Senate, in response to a request from the Senate leadership staff.

17. Senator WICKER. Mr. McKeon, can you assure me that all possible issues and facts, of which Ms. Jen Psaki had nothing to refute, were fully briefed to the Senate as it was considering the New START treaty?

Mr. MCKEON. I believe that the Senate had access to, or was provided, a range of unclassified and classified information about the New START treaty, about Russian compliance with treaties in force at the time, and about Russian activities relevant to the New START treaty. I understand that on February 27, 2014, the Director of National Intelligence testified in closed session before your committee regarding what had been shared with the Senate while the New START treaty was being considered, and will be providing additional classified information about information made available to Congress in 2010 and in the years prior.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

INTERMEDIATE-RANGE NUCLEAR FORCES TREATY

18. Senator AYOTTE. Mr. McKeon, in Berlin last summer, President Obama gave a speech calling for further cuts to our nuclear deterrent. Did the President call for these cuts and for working with Russia while knowing Russia was potentially violating the INF?

Mr. MCKEON. On June 19, 2013, the President gave a speech in Berlin on a range of issues. Among other things, he announced the results of a review of our nuclear employment guidance, stating that he had determined that we can “ensure the security of America and our allies, and maintain a strong and credible strategic deterrent, while reducing our deployed strategic nuclear weapons by up to one-third”. He further expressed an intention to seek “negotiated cuts with Russia to move beyond Cold War nuclear postures”.

Prior to June 2013, the administration had submitted reports to Congress in unclassified and classified form setting forth information about Russian compliance with all arms control obligations, including those contained in the INF Treaty.

RELATIONSHIP WITH RUSSIA

19. Senator AYOTTE. Mr. McKeon, I am interested in your responses to the advance policy questions related to Russia. You were asked, “What in your view are the major security issues in the U.S.-Russia relationship?” In your response, you proceeded to list several areas in which you believe we have cooperated well with the Russians including strategic arms reductions. You did not mention any specific challenges in the relationship with Russia. In the next question you were asked, “Where do you see U.S. and Russian security interests aligning and where are they diverging?” In your response to this question you mentioned working with the Russians on the removal of Syrian chemical weapons as evidence of good collaboration. You mentioned areas of friction but did not mention any specifics. What is your assessment of the U.S. relationship with Russia?

Mr. MCKEON. The bilateral relationship with Russia is marked by pragmatic cooperation where our interests converge and one of disagreement where they do not. The United States has worked closely with Russia in the P5+1 (permanent five members of the U.N. Security Council plus Germany) in connection with that group’s efforts to prevent Iran from obtaining a nuclear weapon. We have cooperated with Russia when we can in the United Nations Security Council, where it is a permanent member. At the same time, we have made clear our concerns about a number of issues, such as the current Russian military activities in Crimea. We have expressed our strong concern about this violation of Ukrainian sovereignty and territorial integrity, which we firmly believe is destabilizing. We have criticized in public and in private Russia’s decision to allow Edward Snowden to remain in Russia. As noted above and in my testimony, we have made clear to Russia our concerns about its compliance with certain treaties, including questions concerning its obligations under the INF Treaty. We also strongly criticized Russia’s clampdown on civil society and its intimidation of the political opposition.

20. Senator AYOTTE. Mr. McKeon, do you believe the President’s reset policy with Russia has failed?

Mr. MCKEON. I do not believe that the “reset” policy failed. In President Obama’s first term, the “reset” policy yielded several important results, including the negotiation and ratification of the New START treaty, the expanded use of the Northern Distribution Network for the transport of supplies needed by the U.S. Armed Forces fighting in Afghanistan, the cancellation of the sale of the S-300 air defense system by Russia to Iran, Russian cooperation in the imposition of new sanctions against Iran and North Korea, Russian cooperation in the P5+1 in that group’s effort to prevent Iran from obtaining a nuclear weapon, and Russia’s entry into the World Trade Organization. These achievements have helped to enhance global security and economic prosperity. At the same time, the administration has expressed its concerns about several issues, particularly Russia’s increasingly authoritarian stance at home and its aggressive behavior towards its neighbors.

21. Senator AYOTTE. Mr. McKeon, where are the U.S. and Russian security interests diverging?

Mr. MCKEON. The administration has a serious disagreement with Russia on the right of all countries—including those in Russia’s neighborhood—to exercise their rights fully as sovereign States and in accordance with the democratic will of their

people. We reject Russia's use of economic and military threats against its neighbors to try to influence decisionmaking of independent States. We likewise reject Russia's continued decision to base military forces in Moldova and Georgia against the will of their governments, and its deployment of military forces on Ukrainian territory to which the Government of Ukraine has not consented, and which is a clear violation of Ukrainian sovereignty and territorial integrity. We also criticize the politically motivated trade restrictions Russia has imposed on its neighbors and other States, including the United States.

TREATY CLAUSE OF THE CONSTITUTION

22. Senator AYOTTE. Mr. McKeon, in your answers to the advance policy questions, you reiterate the administration's interest in pursuing, "a one-third reduction in deployed nuclear weapons below the limits established in the New START treaty". Can you assure us that any cuts of this nature will adhere to the Biden-Helms standard and will only be done with the advice and consent of the Senate treaty ratification process?

Mr. MCKEON. The President said in his Berlin speech that he intends to seek negotiated reductions in strategic weapons with Russia. Should conditions in the future become conducive to negotiating such an agreement with Russia, I fully expect that it would be submitted to the Senate for its advice and consent to ratification, as has been the case with all other strategic arms reduction treaties in the last several decades, with the exception of the Strategic Arms Limitation Talks Agreement (SALT I).

NUCLEAR MODERNIZATION

23. Senator AYOTTE. Mr. McKeon, I understand that you were a central staff member supporting the administration's push to ratify the New START treaty in 2010. You may be aware of the letter the President wrote to Senators on December 20, 2010, stating: "I recognize that nuclear modernization requires investment for the long-term, in addition to this 1-year increase. That is my commitment to Congress—that my administration will pursue these programs and capability for as long as I am President." Can you assure us the National Security Staff, under Ms. Sherwood Randall, is not undertaking any reviews of how to walk away from that commitment for the sake of the President's nuclear disarmament legacy?

Mr. MCKEON. Yes, the President stands behind the commitment made in the letter. The administration remains fully committed to the investments required to ensure that our nuclear arsenal remains safe, secure, and effective.

KEEPING OUR ALLIES INFORMED

24. Senator AYOTTE. Mr. McKeon, do you agree that the United States has an obligation to keep our NATO allies informed in a full and timely manner regarding matters that impact their national security, such as a potential violation of the INF Treaty?

Mr. MCKEON. The United States has obligations to our NATO allies under the North Atlantic Treaty. Included in the treaty is a commitment in Article 3 that the parties will "separately and jointly maintain and develop their individual and collective capacity to resist armed attack". Accordingly, we regularly inform and consult with our allies about matters affecting their security and the security of the Alliance.

25. Senator AYOTTE. Mr. McKeon, in 2012, NATO undertook a Deterrence and Defense Posture Review (DDPR), which included a full examination of their nuclear posture. Did the United States have important information on the INF Treaty which we did not share with NATO?

Mr. MCKEON. The United States keeps our NATO allies informed about matters that affect their national security and the security of the Alliance, including treaty compliance issues. Throughout the DDPR process, we consulted closely with our NATO allies about the overall security environment and the capabilities we and our allies require to meet the challenges we face, and we continue to do so.

26. Senator AYOTTE. Mr. McKeon, would you please explain why we wouldn't inform our Article V mutual defense and security allies of a violation, which is a threat to their security more than ours, especially during their consideration of a review focusing on deterrence and defense?

Mr. MCKEON. Throughout the DDP process, we consulted closely with our NATO allies about the overall security environment and the capabilities we and our allies require to meet the challenges we face, and we continue to do so. As noted previously, a compliance review regarding Russian compliance with the INF Treaty is ongoing.

27. Senator AYOTTE. Mr. McKeon, if Russia is not in compliance with this treaty 1 year from now, in your current position or in the position for which you are nominated, do you believe the United States should continue to comply with the INF Treaty?

Mr. MCKEON. I refer you to my response to this question in my letter of February 24.

QUESTIONS SUBMITTED BY SENATOR DEB FISCHER

SECTION 8128: ENVIRONMENTAL STUDIES OF INTERCONTINENTAL BALLISTIC MISSILE
SILOS

28. Senator FISCHER. Mr. McKeon, section 8128 of the Fiscal Year 2014 Consolidated Appropriations Act (H.R. 3547, Public Law 113-76) expressed congressional opposition to any environmental study relating to the silos of Minuteman III Intercontinental Ballistic Missiles (ICBM). Specifically, it states: "None of the funds available to DOD shall be used to conduct any environmental impact analysis related to Minuteman III silos that contain a missile as of the date of the enactment of this act." Please state DOD's interpretation of this section.

Mr. MCKEON. I understand the Department was interested in conducting an Environmental Assessment in order to help inform the decision of what force structure is best for U.S. national security. I also understand that the provisions in both the Fiscal Year 2014 Consolidated Appropriations Act and the NDAA for Fiscal Year 2014 are currently under review by the DOD General Counsel, and that there is no final position on whether the Department will proceed with the Environmental Assessment this fiscal year.

29. Senator FISCHER. Mr. McKeon, what interactions has DOD had with other Federal agencies or parties outside of the Federal Government to prepare for conducting any environmental studies on the ICBM silos?

Mr. MCKEON. I am unaware of discussions with other Federal agencies or outside entities about preparations to conduct environmental studies on ICBM silos.

30. Senator FISCHER. Mr. McKeon, does DOD believe the decisions with respect to New START treaty force structure depend on the results of an environmental study of ICBM silos?

Mr. MCKEON. An Environmental Assessment would help to inform the decision that the President must make on a nuclear force structure that meets New START treaty requirements.

[The nomination reference of Mr. Brian P. McKeon follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 30, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Brian P. McKeon of New York, to be a Principal Deputy Under Secretary of Defense, vice Kathleen H. Hicks, resigned.

[The biographical sketch of Mr. Brian P. McKeon, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF BRIAN P. MCKEON

Education:

University of Notre Dame

- Attended 1981–1985
- B.A. awarded, May 1985

Georgetown University Law Center

- Attended 1991–1995
- J.D. awarded, May 1995

Employment Record:

March 2012 to present: Deputy Assistant to the President, Executive Secretary of the National Security Council, and Chief of Staff for the National Security Staff, the White House.

January 2009 to March 2012: Deputy National Security Adviser, Office of the Vice President, Executive Office of the President.

January 1997 to January 2009: Democratic Chief Counsel, Committee on Foreign Relations, U.S. Senate. In 2007–2008, also served as Deputy Staff Director, and during the fall of 2008 also served as Acting Staff Director.

September 1996 to November 1996: full-time volunteer, foreign policy office, Clinton-Gore 1996 campaign.

August 1995 to August 1996: Law clerk to U.S. District Judge Robert G. Doumar, Eastern District of Virginia, Norfolk Division.

July 1988 to June 1995: Legislative Assistant for Foreign Policy and Defense, Office of Senator Joseph R. Biden, Jr., U.S. Senate.

February 1988 to June 1988: researcher, Community of the Peace People, Belfast, Northern Ireland.

October 1985 to February 1988: Legislative Correspondent, Office of Senator Joseph R. Biden, Jr., U.S. Senate.

June 1985 to September 1985: Intern, Washington Office on Latin America.

Honors and awards:

Academic Awards

- Cum Laude graduate of Georgetown University Law Center
- Associate Editor, Georgetown Law Journal

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Mr. Brian P. McKeon in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior

to the hearings and will also be published in any hearing record as well as made available to the public.

1. Name: (Include any former names used.)

Brian Patrick McKeon.

2. Position to which nominated:

Principal Deputy Under Secretary of Defense for Policy.

3. Date of nomination:

January 30, 2014.

4. Address: (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

February 11, 1964; Auburn, NY.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Lizabeth Tankersley.

7. Names and ages of children:

None.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Auburn High School (NY), 1977–1981; high school diploma awarded June 21, 1981.

University of Notre Dame, 1981–1985; B.A. awarded May 19, 1985.

Georgetown University Law Center, 1991–1995; J.D. awarded May 29, 1995.

I took Spanish language courses at the USDA Graduate School in the mid-1980s. I do not recall the precise dates but it was for either one or two semesters. No degree awarded.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

March 2012 to present: Deputy Assistant to the President, Executive Secretary of the National Security Council, and Chief of Staff for the National Security Staff, the White House.

January 2009 to March 2012: Deputy National Security Adviser, Office of the Vice President, Executive Office of the President.

January 1997 to January 2009: Democratic Chief Counsel, Committee on Foreign Relations, U.S. Senate. In 2007–2008, also served as Deputy Staff Director, and during the fall of 2008 also served as Acting Staff Director.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

November 2008 to January 2009: member of Obama/Biden transition team, Department of State.

August 1995 to August 1996: Law clerk to U.S. District Judge Robert G. Doumar, Eastern District of Virginia, Norfolk Division.

July 1988 to June 1995: Legislative Assistant for Foreign Policy and Defense, Office of Senator Joseph R. Biden, Jr., U.S. Senate.

October 1985 to February 1988: Legislative Correspondent, Office of Senator Joseph R. Biden, Jr., U.S. Senate.

Summer 1984: employed by Auburn (NY) Water Department.

June 1983 to August 1983: Intern, Office of Senator Daniel Patrick Moynihan, U.S. Senate.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Admitted to practice law in the District of Columbia (active status) and Maryland (inactive status).

Member of Notre Dame Monogram Club

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

2011–2012: \$1,010 to Obama for America

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Awarded New York State Regents Scholarship, April 1981

Auburn High School Achievement Award, June 1981

Kellogg Institute for International Studies (Notre Dame), awarded human rights internship, 1985

Georgetown University Law Center, graduated cum laude.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

“Need for Reform of Life Sentence Review Process,” oped, *The Independent* (UK), July 8, 1988.

Letter to the Editor, *Ms. Magazine*, November 1989 (letter was in response to an article about an NGO in Northern Ireland for which I had volunteered).

“Twenty-Second Annual Review of Criminal Procedure: United States Supreme Court and Courts of Appeals 1991–1992.” *Georgetown Law Journal* (81 *Georgetown L.J.* 853, 1356–70) (April–May 1993) (as a member of the *Law Journal*, I updated the chapter on Prosecutorial Misconduct).

“A New START in Prague,” blog post on White House web site, April 8, 2010.

“The New START Treaty Sent to the Senate,” blog post on White House web site, May 13, 2010.

While a student at the University of Notre Dame, I had a regular oped column in the student newspaper, *The Observer*, during much of my senior year. I also wrote a guest column or two prior to becoming a regular columnist for the paper. Titles of articles that I have found are as follows:

“Notre Dame Election System Needs Change,” February 27, 1984.

“Improve Social Life Through Coed Dorms,” September 18, 1984.

“The Significance of the Next President,” October 2, 1984.

“College Football’s Motto: Anything for the Money” (1984/precise date uncertain but likely October).

“Reagan’s Foreign Policy is Nothing to Applaud,” November 7, 1984.

“United States Should Obey World Court Ruling,” December 11, 1984.

“Today’s Concern Seems to be Making the Most” January 22, 1985.

“Freshman, Year Program Needs Some Changes,” February 5, 1985.

“Napoleon Duarte Faces a Very Rocky Road,” February 19, 1985.

“Does Rice Serve the Best Interests of Campus?,” March 5, 1985.

“Are the Democrats Doomed to Suffer Defeats?,” April 12, 1985.

“U.S. Affluence Cannot Hide World Poverty,” May 17, 1985.

While working as a volunteer for the Community of the Peace People, a cross-community nongovernmental organization in Belfast Northern Ireland, in the spring of 1988, I wrote two articles that appeared in their monthly newsletter. Their titles and dates:

“Deja-Vu,” April 1988 (related to the political situation at the time in Northern Ireland)

“The Way of the Cross,” May 1988 (reporting on a march on Good Friday of that year by members of the organization that traversed both Catholic and Protestant neighborhoods in Belfast).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Speech to Phi Kappa Phi (honors society) spring awards luncheon, U.S. Military Academy (April 21, 2011)

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

BRIAN P. MCKEON.

This 10th day of February, 2014.

[The nomination of Mr. Brian P. McKeon was reported to the Senate by Chairman Levin on April 8, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 28, 2014.]

[Prepared questions submitted to Hon. David B. Shear by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not believe that modifications to the Goldwater-Nichols Act provisions are necessary at this time. However, if confirmed, I would consider this question as it relates to my area of responsibility as I perform my duties as Assistant Secretary of Defense for Asian and Pacific Security Affairs (ASD(APSA)).

DUTIES

Question. Department of Defense Directive 5111.17 assigns the responsibilities, functions, relationships and authorities of the ASD(APSA). The directive establishes ASD(APSA) as the principal advisor to the Under Secretary of Defense for Policy (USD(P)) and the Secretary of Defense on various matters relating to the Asian and Pacific regions, their governments, and defense establishments.

What is your understanding of the duties and functions of the ASD(APSA)? Will they differ in any way from those described in DOD Directive 5111.17?

Answer. As I understand it, the ASD(APSA) is the primary advisor to the USD(P) and the Secretary of Defense on defense matters related to the Asia and Pacific region. The ASD(APSA) is responsible for developing regional security and defense strategy; formulating and coordinating regional defense policies in support of the Secretary's objectives; overseeing operational execution of the Secretary's approved policies for the region; and fostering bilateral and multilateral security relationships in the region. This position is the focal point for Asia policy within the Department of Defense (DOD) for DOD components, the U.S. Pacific Command (PACOM), and the U.S. Central Command. The ASD(APSA) also represents the Office of the Secretary of Defense (OSD) in interagency policy deliberations and defense-related international negotiations in the Asia and Pacific region.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have worked closely and effectively with the Military Services and DOD components in the Asia and Pacific throughout my career.

As a political officer in the U.S. Embassy in Tokyo, I worked with U.S. forces to strengthen our alliance while adjusting our presence in Japan. As the Deputy Director of the Office of Korean Affairs, I coordinated U.S.-Republic of Korea (ROK) alliance issues with the Joint Staff, and most recently, as Ambassador to Vietnam, I helped build a new partnership that includes a growing military-to-military component. Assignments as a Deputy Chief of Mission in Kuala Lumpur and as Ambassador to Vietnam have allowed me to hone my skills as a leader and manager of large groups of people in a constrained fiscal environment. Finally, as Deputy Assistant Secretary in the Bureau of East Asian and Pacific Affairs at the State Department, I worked closely with DOD and interagency partners to develop national policy for the Asia-Pacific region.

I believe that my background and experience demonstrate that close coordination between the diplomatic and military arms of government is essential for a successful security policy. If confirmed, I look forward to serving my country in a new capacity by representing the OSD and carrying forward our national security objectives in the region.

RELATIONSHIPS

Question. If confirmed, what will be your relationship with:

- The Secretary of Defense
- The Deputy Secretary of Defense
- The Under Secretaries
- The Chairman of the Joint Chiefs of Staff
- Commander, U.S. Pacific Command
- Commander, U.S. Central Command
- Commander, U.S. Special Operations Command
- Other Combatant Commanders
- The Service Secretaries and Service Chiefs
- The Regional and Functional Assistant Secretaries
- Commander, U.S. Forces Korea
- Commander, U.S. Forces Afghanistan/Commander, International Security Assistance Force
- Director of the National Guard Bureau

Answer. If confirmed, I would report to the Secretary of Defense and Deputy Secretary of Defense through the USD(P). I would also work closely with the Principal Deputy Under Secretary of Defense for Policy. I expect to develop and maintain close working relationships with Under Secretaries and Assistant Secretaries across the Department, the General Counsel of DOD, the Secretaries of the Military Departments, the Chairman and Vice Chairman of the Joint Chiefs of Staff, the Service Chiefs, and the commanders of the combatant commands, particularly U.S. Central Command, PACOM, and U.S. Special Operations Command and, as appropriate, with the Commanders of U.S. Forces Korea and U.S. Forces Afghanistan on policy and strategy issues involving Korea and Afghanistan.

If confirmed, I would also work closely with and coordinate with the other Assistant Secretaries of Defense within the Office of the USD(P). Many policy challenges in the Asia-Pacific region involve resources and expertise that are distributed across the regional and functional portfolios of OSD. Examples of this coordination include working with the Assistant Secretary of Defense for International Security Affairs on the role of the North Atlantic Treaty Organization (NATO) in Afghanistan; the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict on

counterterrorism; and the Director of the National Guard Bureau on disaster relief efforts.

CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next ASD(APSA)?

Answer. I believe that the most significant challenge is managing a changing and dynamic security environment in one of the most critical parts of the world. The President has rightly acknowledged the importance of Asia to U.S. prosperity and security interests.

Toward that end, the major challenges the next ASD(APSA) will face include: managing an effective drawdown in Afghanistan; continuing to work with partners in Afghanistan and Pakistan to combat the threat of al Qaeda; continuing to monitor closely the evolving North Korean threat; continuing to work with China to encourage greater transparency about how it will use its growing military capabilities; negotiating the peaceful resolution of territorial disputes in accordance with international law; and ensuring that the countries in the region adhere to key norms and principles that benefit all nations.

Meeting these challenges requires continued implementation of the rebalance to the Asia-Pacific region as well as modernizing and enhancing U.S. regional security Alliances and partnerships to address both traditional and non-traditional threats.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. I believe that the administration and DOD have sound strategies in place for dealing with the challenges that the ASD(APSA) will face, particularly through the continued implementation of the rebalance to the Asia-Pacific region.

If confirmed, I would work closely with others in the Department, interagency partners, Congress, and our international allies and partners to understand more fully ways to address these challenges more effectively. This would include, among other things, analysis of current strategies and assessments, involvement in ongoing policy reviews, and continued senior-level engagement with allies and partners in the region. If confirmed, I look forward to collaborating closely with Congress on the range of challenges and opportunities in the region.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the ASD(APSA)?

Answer. If confirmed, I would be carefully evaluating the current strategies to determine if a reordering of priorities, applicable to ASD(APSA), is in order. That said, the key priorities to focus on would include ensuring the successful drawdown and transition of U.S. forces in Afghanistan to a train-advise-assist role and continuing to make progress against al Qaeda and its affiliates with our partners in Afghanistan and Pakistan; continuing implementation of the rebalance to the Asia-Pacific region—modernizing existing Alliances, enhancing our relationships with emerging regional frameworks and partners, working on a constructive relationship with China, advancing key norms and principles—to address shared regional challenges; and ensuring that the U.S. military is postured to protect and advance U.S. interests.

ENGAGEMENT POLICY

Question. One of the central pillars of our national security strategy has been military engagement as a means of building relationships around the world. Military-to-military contacts, joint combined exchange training exercises, combatant commander exercises, humanitarian assistance operations, and similar activities are used to achieve this goal.

If confirmed, would you support continued engagement activities of the U.S. military? If yes, would you advocate for expanding U.S. military-to-military engagement? If not, why not?

Answer. If confirmed, I will support continued U.S. military-to-military engagement with nations in Asia. Throughout my career, including during my recent time serving as U.S. Ambassador to Vietnam, I have seen firsthand the importance of DOD engagement with the militaries of our allies and partners in the region. I also believe the current and emerging security environment presents important opportunities to build productive relationships with many countries with whom our past military-to-military engagements have been limited or entirely absent. U.S. military engagement helps professionalize and improve standards of conduct and capabilities of partner nation militaries, and is vital to advancing U.S. national security interests in the region.

Question. Do you believe that these activities contribute to U.S. national security?

Answer. Yes, I do believe that these important activities directly contribute to U.S. national security.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided a number of authorities to provide security assistance to partner nations, including the global train and equip authority ("section 1206") and the Global Security Contingency Fund.

In your view, what are our strategic objectives in building the capacities of partner nations in the Asia and Pacific region?

Answer. My understanding is that these temporary DOD authorities are intended to address emerging threats. That being the case, I believe that our strategic objective should be to help our partners develop effective and legitimate defense and security institutions. If our partners each can provide for their own country's security, this will help reduce the burden on U.S. forces responding to security threats outside the United States and promote interoperability between U.S. forces and allied and partner forces. If confirmed, my goal would be to ensure that DOD building partner capacity programs can fulfill defined strategic requirements and address vitally important capability gaps and ensure that these objectives are directly in line with the 2012 Defense Strategic Guidance.

Question. In a resource-constrained fiscal environment, how would you prioritize the types of programs or activities that should receive support under these security assistance authorities?

Answer. In a resource-constrained fiscal environment, I believe it would be important to continue to improve military-to-military and defense-civilian relations, while continuing to evaluate and re-calibrate the nature and substance of our relationships to ensure they are consistent with U.S. values and advance U.S. national interests.

If confirmed, it would be my aim to ensure our assistance programs supporting partner nations can fulfill defined strategic requirements and close important capability gaps; these objectives are directly in line with the 2012 Defense Strategic Guidance.

Question. In your view, what should be the role of DOD, vis-a-vis other civilian departments and agencies of the Government, in the exercise of instruments of soft power (civilian expertise in reconstruction, development, and governance)?

Answer. As I experienced firsthand during my time as an Ambassador in Southeast Asia, building the capacity of foreign security forces is a shared responsibility within the executive branch, particularly between the Departments of State and Defense. Close collaboration between the Departments is a key characteristic of the Section 1206 authority, and one of its greatest strengths. I believe the Global Security Contingency Fund epitomizes this shared responsibility and provides an opportunity for the Departments of State and Defense to establish a new business model for interagency planning of security sector assistance.

FORCE POSTURE IN THE U.S. PACIFIC COMMAND AREA OF RESPONSIBILITY

Question. Significant changes to the U.S. force posture in the region are planned over the next several years, including movement of marines from Okinawa to Guam and the relocation of U.S. forces within South Korea. There are also plans to increase presence in southern parts of the Asia-Pacific, including in Australia and Singapore, and to develop comprehensive engagement strategies with a number of other countries in the region. These initiatives will likely compete with other global commitments for increasingly constrained funding.

In your opinion, what should be the national security priorities in the Asia-Pacific?

Answer. I believe that U.S. national security priorities in the Asia-Pacific region, as outlined in the 2010 National Security Strategy and 2012 Defense Strategic Guidance, include protecting U.S. territory, citizens, and allies and partners; deterring aggression and maintaining regional stability; maintaining free and open access to the maritime, air, and space domains; deterring and defeating violent extremism; and preventing the proliferation of weapons of mass destruction and their associated materials.

Question. In your view, what strategic criteria, should guide the posture of U.S. military forces in that region to best address those priorities at acceptable risk?

Answer. It is my understanding that DOD's strategic criteria include the development of a defense posture that is geographically distributed, operationally resilient, and politically sustainable. The continuing U.S. Marine Corps rotations in Australia and the Littoral Combat Ship rotations in Singapore are examples of initiatives that support a more geographically dispersed posture in the Asia-Pacific region. Increas-

ing the resiliency of U.S. forces in the region will require long-term investments in key capabilities. Reducing the U.S. Marine Corps presence on Okinawa will result in a more politically sustainable force posture in Japan.

Question. How, if at all, do the methods of forward basing, rotational forces, and agreements with allies for training and logistics activities support our national security priorities throughout the region?

Answer. As I saw firsthand during my time as Ambassador to Vietnam, bilateral and multilateral defense engagements with allies and partners in the region strengthen these relationships and support broader regional objectives. Pursuing agreements (e.g., such as access arrangements) can increase the ability of U.S. forces to operate out of strategic locations and support the U.S. commitment to long-term engagement in the region. These forward operating forces engage in regular training events and exercises with allies, such as Japan and Korea, and contribute to regional stability and security.

Question. In your view, is the right mix of these forward presence methods necessary to achieve an affordable theater posture at acceptable levels of risk? If so, how would you propose broadly assessing each method relative to its cost and benefit?

Answer. Yes, I believe it is important to evaluate the best way to leverage DOD's forward presence in the region and balance the demands on the force globally. I understand that DOD has established processes for deciding how U.S. forces are assigned and allocated globally, based on strategic priorities outlined in the guidance documents. Commander, PACOM, also develops regional plans that prioritize the type and frequency of military engagements with allies and partners in the region.

Question. How important is a forward basing strategy to the ability of PACOM to execute its day-to-day mission? Its operational contingency plans?

Answer. I believe that forward-stationing U.S. forces in the Asia-Pacific region is vitally important to our national security interests, as it increases contingency responsiveness; deters adversaries and assures allies and partners; and contributes to security cooperation activities as well as day-to-day joint training events and exercises. In the event of a crisis, these forces can provide Commander, PACOM additional response options due to their proximity in the region.

Question. What do you see as the implications, if any, of the force posture changes in Korea, Japan, and Guam on the U.S. commitment to the Asia-Pacific region in general? How does the planned relocation of U.S. forces from Okinawa to Guam and other locations in the Pacific improve U.S. security in the region? How does the planned relocation of U.S. forces on the Korean Peninsula improve security?

Answer. It is my understanding that ongoing force posture changes will serve to strengthen U.S. presence in the region in line with the key principles of being geographically distributed, operationally resilient, and politically sustainable. For instance, the reduction of the U.S. Marine Corps presence on Okinawa supports all three of these principles, most notably by developing a long-term U.S. posture in Japan that both sides agree is politically viable. In the Republic of Korea, U.S. forces will continue to work closely with the South Korean military to maintain a robust presence and provide unique capabilities to sustain security and stability on the Peninsula.

Question. What is your understanding of the plans for the U.S. military presence in Australia and how, in your view, does the presence advance U.S. security interests?

Answer. In 2011, President Obama and then-Prime Minister Gillard announced two force posture initiatives designed to expand the cooperation between the U.S. Air Force and the U.S. Marine Corps with the Australian Defence Force. In the first initiative, DOD would rotate up to a 2,500 Marine Air Ground Task Force (MAGTF) through Australia, and I understand that DOD has concluded two company-sized rotations of approximately 250 marines each at Darwin. It is my understanding that in April 2014, DOD will increase the rotation to approximately 1,100 marines.

The second initiative decided upon by the United States and Australia was for greater access for U.S. military aircraft to the Royal Australian Air Force facilities in northern Australia. These posture initiatives strengthen the Alliance and increase opportunities for U.S. forces to engage throughout the region. I support a more distributed presence in Southeast Asia that will better prepare the United States for the types of missions its forces are likely to face in the future, including humanitarian assistance and disaster relief (HA/DR).

Question. In your view, are the levels of funding, manning and military-to-military engagement in the Asia-Pacific region appropriate to the management of current and future risk to U.S. strategic interests in the region? Do you foresee a requirement to increase or to decrease those funding levels in the coming years?

Answer. If confirmed, I would work with others in DOD to assess the levels of investment and engagement that is required and sustainable to achieve U.S. strategic interests in the region. As the United States continues to execute defense initiatives, including developing advanced capabilities with direct applicability in the region, continued investment will be critical to demonstrating the U.S. commitment to the strategy.

CHINA

Question. China is viewed by some in the United States as an emerging adversary that poses a potential threat to security in the region, and by others as a constructive international partner that should be welcomed and integrated into the international economic and political community. Others yet believe we are at a crossroads somewhere between those two scenarios.

How would you characterize the current U.S. relationship with China?

Answer. As the President said when hosting President Xi Jinping last summer, the United States welcomes the continuing peaceful rise of China as a world power and that, in fact, it is in the U.S. interest that China continues on the path of success, because we believe that a peaceful and stable and prosperous China is not only good for the Chinese people but also good for the world and for the United States. I would describe the U.S. relationship with China as having elements of cooperation and competition. The United States continues to pursue opportunities to engage where there is mutual benefit, while constructively managing those areas where we may have differences. Moreover, I believe that getting this relationship right will be critical to the future of U.S. national security as well as international security for decades to come.

Question. To what extent do you believe the policies and actions of the United States and other major regional and international actors will affect the direction in which the U.S. relationship with China develops?

Answer. I believe that U.S. policies and actions can influence the direction of China's development. The United States has done more than any other country to assist, facilitate, and encourage China's national development and integration into the international system. However, U.S. policy and actions alone will not determine China's future, which will ultimately be based upon the choices that China's leaders make. I do think that there are opportunities for the United States to help shape the environment in which China makes its strategic choices and, in so doing, encourage China to adhere to international norms and standards of behavior in the region and globally.

Question. What do you see as the impact of current global economic challenges on stability and security in China specifically, and in the Asia-Pacific region generally?

Answer. The full impact of the global economic crisis on stability and security in China and in the Asia-Pacific region more broadly will continue to play out over time. I believe that those who manage defense and security issues must be attentive to the connections between security and economic issues. If confirmed, I would actively work with colleagues in economic and diplomatic fields, both to guard against negative outcomes and also to seek positive ways forward where they may exist.

Question. China's defense spending has had double-digit increases annually for about the past 20 years. While a certain amount of military growth is to be expected for a country experiencing the kind of economic growth that China has had over about that same period, the types of platforms and capabilities China is developing have been interpreted by some as designed to project power, limit freedom of movement by potential adversaries, and conduct military operations at increasing distances. Such developments, coupled with strident rhetoric and a lack of transparency, stoke growing concerns about China's intentions in the region.

What do you believe are the objectives of China's steady increase in defense spending and its overall military modernization program?

Answer. As documented in DOD's annual Reports to Congress on Military and Security Developments Involving the People's Republic of China, China appears to be conducting a long-term, comprehensive military modernization program which is focused on enabling the People's Liberation Army to fight and win high-intensity, but short duration, military operations in the Asia-Pacific region. Taiwan appears to be the driver of much of China's military modernization, but China's leaders, under the rubric of the "New Historic Missions," have tasked the military to also be prepared for missions and contingencies beyond China's periphery. If confirmed, I will continue to press for greater transparency from China in its military and security affairs.

Question. How should the United States respond to this Chinese military growth and modernization?

Answer. I believe that the United States should continue to monitor China's military modernization program while encouraging China to increase transparency in the military and security domains. The U.S. response to China's military modernization should be flexible and supported by our sustained presence in the Asia-Pacific region, through continued evolution of our force posture; maintenance of our global presence and access; modernization of our own capabilities in such areas as countering anti-access and area denial; and strengthening of our alliances and partnerships. The United States has been and should remain the preeminent military power in the Asia-Pacific region. If confirmed, ensuring that DOD maintains an effective and flexible approach to China's military growth and modernization will be one of my top priorities.

Question. What do you believe are the Chinese political-military goals in the Asia-Pacific region? Globally?

Answer. In my view, the overriding objectives of China's leaders appear to be the following: ensuring the continued rule of the Chinese Communist Party; continuing China's economic development; maintaining the country's domestic political stability; defending China's national sovereignty and territorial integrity; and securing China's status as a great power. Within this context, preventing any moves by Taiwan toward de jure independence remains a key part of China's strategy. Within each of these dimensions there lies a mix of important challenges and opportunities for the United States that will continue to deserve priority attention.

Question. What effect is China's military growth having on other countries in the region?

Answer. The scale and character of China's military modernization program are increasingly becoming a source of concern. Other countries in the region are closely watching the growth of China's military, and how its military acts. China's annual defense budget is growing faster than its economy—with average annual increases in defense spending topping 10 percent over the past decade. In certain respects, China's growing military capabilities create opportunities to partner and cooperate where U.S. interests, regional states' interests, and China's interests converge.

However, China's rapid rise and the relative lack of transparency surrounding its intentions creates uncertainty, especially as maritime tensions between China and its neighbors in the East and South China Seas increase. Security concerns regarding Chinese military intentions have contributed to a greater focus on regional forums, where issues may be addressed multilaterally and the need to adhere to international law and norms can be amplified. Such security concerns have also led to stronger demand signals from regional countries to the United States as a security partner of choice.

Question. How do you assess the current cross-strait relationship between China and Taiwan, and how can we help prevent miscalculation on either side?

Answer. Since Taiwan President Ma took office in 2008, Taiwan has made considerable progress to reduce tension across the Taiwan Strait. In February of this year, representatives from Taipei and Beijing held their first official talks in mainland China since 1949. The meeting marked a symbolic development in the continued easing of cross-strait tensions. I believe the United States consistent policies, based on the three joint U.S.-China Communiqués and the Taiwan Relations Act—which include making available to Taiwan “such defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability”—have provided the security and confidence necessary for an easing of cross-Strait tensions.

Question. How do China's efforts to establish a strategic presence in the Indian Ocean by securing and maintaining access to various seaports in South and Southeast Asian countries affect its political-military posture and influence in the region?

Answer. China looks to South and Southeast Asia as an area of strategic importance, which includes political objectives, access to resources, trade, and investment. With regard to South and Southeast Asian seaports, the important question is how China intends to use its presence. The United States retains strong relationships in South and Southeast Asia, and we do not view each of our respective activities in those areas in zero-sum terms.

Question. What are your views of China's deployment of warships to counter piracy in the western Indian Ocean and how does this deployment contribute to China's ability to project power?

Answer. Generally speaking, I see China's participation in counter-piracy operations as a positive development: it contributes to addressing a global security challenge; demonstrates China's ability to use its military in a positive, constructive, and responsible manner; and increases opportunities for contact between our navies.

To your second question, from this experience China could begin to develop capabilities to enhance its ability to sustain a deployed force over an extended period of time.

Question. What is the role of DOD in helping to ensure that China's nuclear power industry does not contribute to the proliferation of nuclear weapons in the region?

Answer. The administration has reiterated that preventing the proliferation of weapons of mass destruction and delivery systems, along with related technologies and materials, is a key goal for the United States. I believe that DOD should continue to work with interagency partners and through existing processes to ensure that any proliferation concerns relating to China, including its nuclear power industry, are expressed to the Chinese Government clearly, consistently, and directly in appropriate forums, and should similarly support the development of appropriate interagency responses in the event that China takes steps that do contribute to nuclear proliferation.

Question. Our military-to-military relations with the Chinese military can be characterized as modest at best and the Chinese approach to these relations can be accurately described as "on again, off again".

What is your assessment of the current state of U.S.-China military-to-military relations?

Answer. The U.S.-China military-to-military relationship appears to have experienced modest improvements in recent years, highlighted by a series of senior-level visits and exchanges, and cooperative activities such as counter-piracy exercises. If confirmed, I would look for ways to strengthen the U.S.-China military-to-military relationship consistent with U.S. interests and values—and within the context of our overarching strategy in the Asia-Pacific region—to improve our ability to cooperate with China while managing our differences.

Question. Do you believe that the United States should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. I believe that military exchanges with China can be an important mechanism to improve mutual understanding, enhance communications, and reduce the risk of miscalculation between the United States and China. If confirmed, I would look for ways to strengthen our program of defense contacts and exchanges with China, consistent with our interests and with relevant laws, to explore areas of cooperation, encourage China to act responsibly in world affairs, and to manage our differences constructively.

Question. What is your view regarding the longstanding U.S. policy of selling defense articles and services to Taiwan despite objections and criticism from China?

Answer. U.S. policy on arms sales to Taiwan is based on the 1979 Taiwan Relations Act, which provides that the United States will make available to Taiwan such defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. The Act also provides that the President and Congress shall determine the nature and quantity of such defense articles and services based solely upon their judgment of the needs of Taiwan. That policy has contributed to peace and stability in the region for more than 30 years and is consistent with the longstanding U.S. calls for peaceful resolution of the Taiwan issue in a manner acceptable to the people on both sides of the Taiwan Strait. I believe our arms sales have been carried out in a responsible manner.

Question. In your view, to what extent, if at all, should China's possible reaction to such sales be considered by the United States when making decisions about the provision of defense articles and services to Taiwan?

Answer. We should continue U.S. policy under the Taiwan Relations Act to provide Taiwan with "such defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability" without considering China's potential reaction.

Question. By most accounts, China has become more assertive in its claims of sovereignty in various domains, including maritime, air and space. There are numerous examples of this assertiveness, including China's increased aggressiveness in asserting its maritime claims in the South China Sea and the recent declaration of its Air Defense Identification Zone (ADIZ).

What role should the United States play in the ongoing maritime dispute in the South China Sea?

Answer. The United States is a Pacific nation that has a national interest in freedom of navigation, open access to Asia's maritime domain, the maintenance of peace and stability, free and open commerce, and respect for international law in the South China Sea.

I agree with the assessments of the Departments of State and Defense that the United States should not take a position on the competing territorial claims over land features in the South China Sea. I also believe all parties should resolve their disputes through peaceful means and in accordance with customary international law, without resorting to the threat or use of force. The United States should sustain its presence in the South China Sea and uphold its commitments to its allies and partners in order to maintain peace and stability in the region.

Question. How does the presence of the U.S. Navy in the South China Sea influence this maritime dispute and, in your view, would an increase in U.S. activity in that region serve to stabilize or destabilize the situation?

Answer. The U.S. Navy is a key provider of the military presence that underlies peace and stability across the globe, including in the East and South China Seas. Although the United States does not take a position on the territorial and maritime disputes, I believe it is essential for the U.S. Navy to maintain a visible presence and assert its freedom of navigation and overflight rights in the South China Sea in accordance with customary international law.

If confirmed, I would work with our military commanders to evaluate the appropriate level of naval activities in the South China Sea to maintain regional peace and stability as well as unimpeded access for lawful commerce and economic development.

Question. What should the United States do to help prevent dangerous encounters in the South China Sea?

Answer. To reduce the risk of conflict in the South China Sea, I believe that the United States should use its position in several regional organizations, including the East Asia Summit, the Association of Southeast Asian Nations (ASEAN) Regional Forum, and the ASEAN Defense Ministers Meeting Plus, to facilitate initiatives and confidence-building measures that will help generate momentum for claimant states to reach agreement on a binding Code of Conduct in the South China Sea.

Question. How should the United States view China's recent declaration of an ADIZ zone that includes the area over the Senkaku Islands and does the declaration increase the risk for instability in the region?

Answer. As Secretary Hagel has made clear, the United States does not recognize and does not accept China's ADIZ. The announcement was provocative and raised tensions. If confirmed, I would support the DOD position that China's announced ADIZ will not change how the United States conducts military operations in the region.

Question. Cyber space has become a critical realm for civilian and military applications and, as a result, it represents a potentially substantial vulnerability. There are reports that China is aggressively pursuing cyber warfare capabilities, and would likely seek to take advantage of U.S. dependence on cyber space in the event of a potential conflict situation.

What is your understanding of China's efforts to develop and deploy cyber warfare capabilities?

Answer. I understand that in recent years, numerous computer systems around the world, including some owned by the U.S. Government, have been the target of intrusions, some of which appear to have originated within China. Increasingly, U.S. businesses are calling attention to sophisticated, targeted theft of confidential business information and proprietary technologies through cyber intrusions emanating from China on an unprecedented scale. The international community cannot tolerate such activity from any country. Government-sponsored cyber-enabled theft for commercial gain is outside the bounds of acceptable international behavior.

Question. If confirmed, what would you do to help ensure our military is protected in cyber space and prepared to defend against a cyber attack?

Answer. The United States, like many other nations, has been the target of innumerable malicious activities via cyberspace. I understand that numerous steps have been taken to increase network defense and monitoring capabilities. If confirmed, I would work closely with the Assistant Secretary of Defense for Global Strategic Affairs, the current lead for cyber policy, to take action to protect our economy and national security against cyber-threats so that we are better able to protect our networks, critical infrastructure, and value private and public sector property.

Question. Since 2009, DOD has been funding, under the Minerva Initiative, academic research focusing on the evolving relationship between technology and national security in China. The goal of this research is to create a better understanding of China's dynamic science, technology and innovation enterprise and its impact on its military.

Are you aware of this research and in your view, should DOD continue to fund activities like this to increase the breadth and depth of its understanding of the Chinese military-industrial enterprise?

Answer. I am aware of this research, and believe that DOD would benefit from similar investments in the future. China's military growth concerns us, and we are paying particular attention to Chinese investments in technology development as well as what they are fielding. We must do more than watch and analyze actions. To help understand future developments, it is also important to understand what is shaping those investments. As I understand it, Minerva Initiative research efforts in China help DOD understand the social, cultural, and historical factors that define China's strategic priorities in science and technology, drive its approaches to international engagement, and shape state-internal balances of power between political, military, and industrial forces.

Question. In January 2007, China used a ground-based missile to hit and destroy one of its weather satellites in an anti-satellite test creating considerable space debris and raising serious concerns in the international community. Since then, China has continued its active pursuit of ballistic missile and anti-satellite technology.

What is your view of China's purposes for its pursuit of these capabilities?

Answer. In my view, this test was just one element of China's military modernization effort to develop and field disruptive military technologies, including those for anti-access/area-denial, as well as for nuclear, space, and cyber warfare.

Question. What do you see as the long-term implications of such developments for the U.S. military, for U.S. national security, and for U.S. interests in space?

Answer. The question highlights the importance to U.S. national security and strategic stability of increasing the resilience of national security systems against threats to space-based architectures and developing space control capabilities. If confirmed, I would continue to pursue partnerships with commercial suppliers, collaboration with international partners, and changes in our own architectures and operational tactics that can improve the resiliency of our systems and strengthen strategic stability in space. I would also work closely with Congress in implementing Presidential and DOD guidance that directs DOD to retain counter space capabilities to address the growing space capabilities of potential adversaries, including anti-satellite capabilities.

Question. What are your views regarding the potential weaponization of space and the international agreements and efforts to prevent space weaponization?

Answer. I support the principles outlined in the 2010 National Space Policy, including that all nations have a right to explore and use space for peaceful purposes, and that all nations should act responsibly in space to help prevent mishaps, misperceptions, and mistrust.

Space is vital to U.S. national security and that of our allies and partners. I support our longstanding national policies of affirming the right of all nations to use outer space for peaceful purposes, the right of free passage through space, and the right to protect our forces and our Nation from those that would use space for hostile purposes.

TAIWAN

Question. Much of the recent discourse regarding Taiwan has involved the state of Taiwan's defensive military capabilities and the U.S. commitment to do what is "necessary to enable Taiwan to maintain a sufficient self-defense capability" as required by the Taiwan Relations Act. In particular, much of the debate about how best to enhance Taiwan's current defensive capabilities has revolved around fighter aircraft and what air defense capabilities are most prudent and appropriate under the circumstances.

What is your view of the current state of the U.S.-Taiwan security relations?

Answer. I believe that U.S.-Taiwan security relations have never been stronger. DOD works closely with Taiwan to ensure it maintains the defensive capabilities to deter and, if necessary, resist coercion from China. Since 2010, the United States has made available to Taiwan defense equipment and services of more than \$12.5 billion. If confirmed, I would ensure that DOD continues to make available to Taiwan the defense articles and services necessary to maintain its self-defense capability.

Question. What do you believe should be the priorities for U.S. military assistance to Taiwan?

Answer. Our priority should be to assist Taiwan in implementing an asymmetric and innovative defense strategy to deter aggression from China. Taiwan's military must develop a defense force that can challenge a larger adversary and undermine China's ability to coerce Taiwan.

Question. What is your opinion of the Taiwan Relations Act (TRA)? Enacted 30 years ago this year, do you see any need to modify the TRA to reflect the current state of affairs in the region? If so, how?

Answer. In my view, the Taiwan Relations Act has helped maintain peace and stability in Northeast Asia for 35 years, and it continues to serve the United States well. Consistent with the act, the United States will continue to make available to Taiwan such defense articles and services necessary to maintain its self-defense capability, and at the same time maintain the capacity of the United States to resist any resort to force or other forms of coercion that would jeopardize the security, or the social or economic system, of the people on Taiwan.

Question. Given the increasing military imbalance across the Taiwan Strait, do you think Taiwan is making appropriate investments in its defensive capabilities? If not, what is the best way to encourage Taiwan to invest more appropriately in its military?

Answer. I believe that Taiwan should increase its defense budget to 3 percent of its gross domestic product (GDP) and use these funds to implement an innovative defense strategy and adequately man, train, and equip its military, particularly as it transitions to an All-Volunteer Force. Low defense expenditures send the wrong message to China; and, it sends the wrong signal to the U.S. Congress and the U.S. public, who could be asked to come to Taiwan's defense in the future.

Question. What military capabilities do you believe would be most effective in improving Taiwan's self-defense capability over the next 5 to 10 years?

Answer. Taiwan should implement a defense strategy with asymmetric capabilities that undermine the offensive capabilities by potential adversaries. To be effective, Taiwan's military needs to be resilient, which can be accomplished through increasing mobility, redundancy, camouflage, concealment, deception, decoys, hardening, and joint operations.

Question. What do you believe should be appropriate criteria for the consideration of potential United States sales of military aircraft to Taiwan?

Answer. I understand that DOD is mindful of Taiwan's air defense needs and remains committed to supporting Taiwan Air Force's efforts to address the challenge posed by China's growing quantity and quality of fighter aircraft. If confirmed, I would continue to work closely with Taiwan counterparts to address Taiwan's air defense capabilities to ensure it is able to maintain a sufficient self-defense capability.

NORTH KOREA

Question. North Korea still represents one of the greatest near-term challenges to security and stability in Asia and deterring conflict on the Korean peninsula remains a top U.S. priority.

What is your assessment of the current security situation on the Korean peninsula and of the diplomatic efforts to date to persuade North Korea to comply with international mandates regarding its ballistic missile and nuclear weapon programs?

Answer. The security situation on the Korean Peninsula remains serious and warrants our constant vigilance. North Korea's December 2012 missile launch and February 2013 nuclear test demonstrate that the country has both the capabilities and the will to undermine regional stability in pursuit of its national interests.

Although a year has passed since the last cycle of provocation, North Korea's provocative behavior, large conventional military, pursuit of ballistic missile and weapons of mass destruction (WMD) programs, and proliferation activities continue to be serious concerns for the United States and our allies and partners in the region. Also, the murky nature of the North Korean regime and the unpredictability of the young leader Kim Jong Un add to our concerns.

If confirmed, I would support the longstanding U.S. effort to ensure that North Korea meets its international obligations. If confirmed, I would ensure that our military deterrence of North Korean aggression continues to support our diplomatic efforts to end North Korea's nuclear and missile programs.

Question. What is your understanding of the threat posed to the United States and our allies by North Korea's ballistic missile and WMD capabilities, and the possible export of those capabilities?

Answer. As documented in the DOD Report to Congress on Military and Security Developments Involving the Democratic People's Republic of Korea, North Korea's continued pursuit of ballistic missile and WMD capabilities, and its proliferation of these capabilities to others, poses a serious threat to U.S. forces in the Asia-Pacific region as well as our regional allies and partners. Moreover, these capabilities, although largely untested at longer ranges, could also pose a direct threat to U.S. territory.

If confirmed, I would do my best to ensure that DOD uses the full range of our resources and capabilities to defend against these threats.

Question. How has the new government of Kim Jong Un changed the Department's risk assessments of North Korea?

Answer. If confirmed, I would actively review DOD's risk assessments of North Korea to ensure that we are prepared for all contingencies. This being said, my sense is that the Kim Jong Un regime has demonstrated some unpredictability, particularly with the purge and execution of Jang Song-thaek. We must remain vigilant against North Korean provocations given Kim Jong Un's continuing efforts to consolidate power, North Korea's tactic of escalating tension to draw parties to the negotiating table, and the onset of the spring military training cycle.

REPUBLIC OF KOREA

Question. The longstanding alliance between the United States and the Republic of Korea (ROK) has been a key pillar of security in the Asia-Pacific region. This relationship, while strong, is undergoing substantial changes in terms of command and control and force laydown over the next several years.

What is your understanding of the current status of the U.S. security relationship with South Korea?

Answer. My sense is that the U.S.-ROK Alliance is very strong and is a linchpin of peace and stability in the Asia-Pacific region. The United States and the ROK are making shared investments in the security of the Korean Peninsula in order to enhance our combined ability to deter North Korean aggression. At the same time, our security relationship represents one part of a comprehensive, strategic Alliance and plays an important role in contributing to stability not only on the Peninsula but also throughout Northeast Asia and globally.

Question. If confirmed, what measures, if any, would you take to improve the U.S.-South Korean security relationship?

Answer. The U.S. alliance with the Republic of Korea stands as a linchpin for peace and stability in the Northeast Asia and, increasingly, in the Asia-Pacific region and globally. I understand that DOD and the Republic of Korea Ministry of National Defense have been focused in recent years on improving the ability of the alliance to deter and if necessary, respond to, North Korean aggression or provocation, including by enhancing combined planning, increasing interoperability, strengthening capabilities for missile defense, command and control, and intelligence, surveillance, and reconnaissance, and realigning our forces on the Korean Peninsula. If confirmed, I would work to continue to make progress in these areas, as well as our combined efforts to assess and prepare the alliance for the transition of wartime operational control to the Republic of Korea.

Question. Do you believe South Korea is providing sufficient financial contributions to U.S. Forces Korea under the current Special Measures Agreement (SMA) and the recently negotiated SMA for future years?

Answer. Based on the press reports I have seen, the recently negotiated SMA provides for a tangible increase in the ROK's support to offset the costs associated with stationing U.S. forces on the Peninsula and also promotes a more stable stationing environment by improving various aspects of the cost-sharing programs. It is critical that the ROK shares in the investments the Alliance makes to defend South Korea, and my impression is that the SMA sends an important signal in that regard. Additionally, the support provided through the SMA represents only one aspect of the ROK's investment in the Alliance and, if confirmed, I would work hard to advocate for continued shared investments in the combined defense.

Question. What is your view regarding the timing of the transfer of wartime operational control from the United States to South Korea, planned for December 2015, and what will you do to ensure this transition takes place by the end of 2015?

Answer. I understand that the United States and the ROK remain committed to the transfer of wartime operational control on the timeline identified in the Strategic Alliance 2015 (SA2015) plan. Wartime operational control and transition have always been conditions-based. If confirmed, I would support the continued assessment and review of the security situation on the Korean Peninsula in the context of implementing SA2015.

Question. How do we ensure that we continue to protect our vital regional interests, while continuing meaningful progress toward the transfer of command and control to the Republic of Korea and the relocation of U.S. forces on the Korean Peninsula?

Answer. As Secretary Hagel and ROK Minister of Defense Kim noted at the last Security Consultative Meeting on October 2, 2013, the transition of wartime operational control should sustain and enhance the Alliance's combined defense posture and capabilities. Also at that meeting, I understand that Secretary Hagel reaffirmed the continuing U.S. commitment to provide specific capabilities until the ROK ob-

tains full self-defense capabilities. Similarly, Minister Kim reaffirmed that the ROK is committed to developing or acquiring the critical military capabilities necessary to assume the lead of the combined defense. I support all of these positions.

Question. Do you believe that the security relationship with South Korea should remain focused on defense of the Korean Peninsula, or should U.S. forces stationed in Korea be available for regional or global deployments?

Answer. U.S. military forces on the Korean Peninsula play a critical role in deterring conflict and supporting the defense of the Republic of Korea consistent with U.S. treaty obligations, and I believe that this should remain our principal focus. At the same time, the U.S. military forces stationed on the Korean Peninsula—as well as the armed forces of the Republic of Korea—have played important roles both regionally and globally in places such as Iraq and Afghanistan, and, I believe, they should be available to continue to do so in future.

Question. What is your assessment of the security benefits of the force repositioning agreed to under the Land Partnership Plan and the Yongsan Relocation Plan and how does repositioning U.S. forces change the way they will operate on the Korean Peninsula?

Answer. Both of these plans are predicated on the security benefits of being outside the tactical effective range of North Korean artillery. By being outside the range of North Korean artillery, U.S. forces gain operational advantages regarding force protection, survivability, and consolidation of personnel and equipment. If confirmed, I would look into potential costs savings to be found in this consolidation of U.S. forces on the Korean Peninsula that include efficiencies, reduced costs, and contribution to the political sustainability of our forward presence on the Korean Peninsula.

Question. What is your understanding of the U.S. obligations in the event of an attack on South Korea by North Korea, and under what circumstances do you believe U.S. Armed Forces should be committed to engage North Korean forces in response to an attack on South Korea?

Answer. Under the Mutual Defense Treaty of 1953, when the political independence or security of the Republic of Korea or the United States is threatened by an external armed attack, both of our countries will maintain and develop appropriate measures to deter and defeat armed attack. Patterns of North Korean rhetoric and provocations necessitate that the two sides continue to consult closely so that Alliance responses are effective.

Question. The February 2010 Ballistic Missile Defense Review Report established a policy and program priority for defending against near-term regional ballistic missile threats, and elaborated on the Phased Adaptive Approach to regional missile defense, including to defend against North Korean ballistic missile threats.

Do you support the missile defense policies and priorities established in the Ballistic Missile Defense Review, including the Phased Adaptive Approach to missile defense in the Asia-Pacific region to defend against North Korean regional ballistic missile threats?

Answer. Yes. Development of our regional missile defenses is an important element of our deterrence and defense strategies as it provides essential capabilities for defending U.S. forces abroad as well as our allies and partners.

JAPAN

Question. How would you characterize the U.S.-Japan security relationship?

Answer. I understand that U.S.-Japan security relationship is very strong and remains the cornerstone of our security strategy in the Asia-Pacific region. The U.S.-Japan relationship has underwritten the peace, stability, and prosperity of the region for more than a half century. Japan is a valued ally and anchor of democracy and prosperity in the region. The Joint Statement that followed the October 3, 2013, Security Consultative Committee meeting in Tokyo captures our full range of cooperative activities, which I fully support.

Question. How does Japan's relationship with its regional neighbors, mainly China, North Korea and South Korea influence the U.S.-Japan relationship?

Answer. I understand that DOD encourages, to the fullest extent possible, a healthy and open trilateral relationship between Japan, the Republic of Korea, and the United States, in order to facilitate better relations with our two closest allies in Northeast Asia. A strong trilateral relationship is an important element of deterrence against North Korean challenges. We also continue to encourage both China and Japan to increase the level of communication between the two sides in order to reduce the possibility of mistakes or miscalculation in contested areas.

Question. What steps, if any, do you believe Japan ought to take to become a more active partner in security activities with the United States and in the international security arena?

Answer. As described in the October 3, 2013 Joint Statement of the Security Consultative Committee in Tokyo, the United States would welcome any steps that Japan chooses to take that will enable it to play a larger role in the Alliance, and to increase its contributions to regional and global security. If confirmed, I would work with my Japanese counterparts to identify ways in which Japan could partner with the United States and others in contributing to peace and stability, including by examining the potential future roles, missions, and capabilities needed to meet the challenges of the 21st century.

Question. What is your view of the United States-Japanese joint development of the Standard Missile-3, Block IIA missile defense interceptor, and of the overall program of cooperation between the United States and Japan on ballistic missile defense?

Answer. I understand that Japan is one of the United States' closest ballistic missile defense partners. The significance of this partnership is reflected in the U.S.-Japan cooperation on development of the SM-3 Block IIA to which Japan has already committed over \$1 billion, Japan's hosting of one ballistic missile defense radar and plans to host a second by the end of 2014, Japan's co-production of the PATRIOT PAC-3 missile, as well as hosting a number of the U.S. Navy's ballistic missile defense-capable Aegis ships. This cooperation is significant in enhancing the ability of the United States to defense of the Homeland, U.S. forces deployed forward, and U.S. allies and partners from regional missile threats.

Question. The current plan is for the closure of the Marine Corps Air Station on Okinawa after the construction of a Futenma Replacement Facility (FRF) at Camp Schwab on Okinawa. While the Governor of Okinawa has signed the landfill permit to allow construction of the FRF to go forward, local opposition and a long construction timeline make the completion of the FRF uncertain.

What is your opinion of the prospects for the successful construction of the FRF at Camp Schwab on Okinawa?

Answer. In short, I am encouraged by the prospects for successful construction.

Following the approval by the Governor of Okinawa [Nakaima] on December 27, 2013, we are continuing to work closely with Japan to implement our realignment plans, including the construction of the FRF. As I understand it, for the FRF, the plan is simple—once it is fully operationally capable, we can leave Marine Corps Air Station (MCAS) Futenma and begin the process for return. The Government of Japan is motivated to move quickly on this project, and we will work hand-in-glove to see it through. Until that time, my understanding is that we will continue to work with Japan on sustaining MCAS Futenma so that it supports our operational needs.

Question. Is the cost-sharing arrangement between the United States and Japan to pay for the relocation of U.S. forces from Okinawa to Guam and the costs associated with the continued presence of U.S. forces in Japan equitable and appropriate? Why or why not?

Answer. A revision to the Guam International Agreement signed last year by the Secretary of Defense and Secretary of State with their Government of Japan counterparts reaffirmed Japan's commitment to provide \$3.1 billion (in fiscal year 2012 U.S. dollars) in cash toward the construction of Marine Corps facilities on Guam and the Commonwealth of Northern Mariana Islands (CNMI). I believe that this level of support is appropriate as it helps to ensure a strong U.S. military presence in the region while improving the political sustainability of the U.S. presence in Okinawa.

The Japanese funds will not only assist in the construction of operational and administrative facilities for the U.S. Marines, but also contribute to the construction of training areas in Guam and the CNMI to ensure the operational readiness of our regional forces. If confirmed, I would also support opportunities for Japan to train at these facilities.

Question. How, in your view, does building an unpopular new airfield on Okinawa, one that could take 7 to 10 years to finish at a cost of approximately \$3 to \$4 billion, serve to improve the U.S.-Japan relations in general and the U.S. military-Okinawa relations in particular?

Answer. Since at least 1996, the United States and Japan have shared the view that there is a need to relocate the existing Marine Corps Air Station at Futenma, around which a significant population has grown over the years. Since 1999, we identified a replacement site in the vicinity of Camp Schwab. This was confirmed most recently in the Joint Statement issued by the October 3, 2013 Security Consultative Committee meeting in Tokyo.

I understand that once this facility is completed and operational, there will be substantial benefits to the areas of Okinawa south of Kadena Air Base, where the vast majority of the Okinawa population resides. At the same time, this facility will allow the Marine forces on Okinawa to maintain their operational readiness and be able to respond quickly as the regional emergency force. The marines will be able to continue to train as they fight, as a combined arms team.

Question. Is Japan carrying a fair share of the burden of the cost of the U.S. presence in Japan under the current Special Measures Agreement?

Answer. My understanding is that Japan is meeting its obligations as negotiated under the 2011 Special Measures Agreement. If confirmed, I would monitor implementation to ensure that Japan continues to do its part to sustain the U.S. presence.

AFGHANISTAN

Question. If confirmed, what would your role be with respect to U.S. activities in Afghanistan?

Answer. As the ASD(APSA), I would be the principal advisor to the USD(P) and the Secretary of Defense on security strategy and policy related to Afghanistan, including defense relations with the Government of Afghanistan and coalition partners. I would also be responsible for the oversight of security cooperation programs in Afghanistan.

Question. What are the key objectives of the campaign in Afghanistan and in your view are we on track to successfully achieve those objectives?

Answer. I have not received a full briefing on the current status of the U.S. efforts in Afghanistan, but understand that the Coalition and Afghanistan National Security Forces (ANSF) are meeting campaign objectives. The Government of Afghanistan is in control of all of Afghanistan's major cities and provincial capitals. The Coalition and the ANSF successfully blunted the insurgency's 2012 and 2013 summer offensive, and I understand we continue to make progress on our counterterrorism objectives.

Question. What is your assessment of the performance of the ANSF in assuming the lead for security throughout Afghanistan?

Answer. I understand that Afghan security forces conduct the vast majority of operations unilaterally, and are in the lead for security across their country. I understand they performed well in the 2013 fighting season and held ground against the Taliban. This is a fundamental shift in the conflict. I am mindful that the ANSF has made progress but they are not yet fully self-sustainable, and they require continued support.

Question. Do you support the transition of full responsibility for the security of Afghanistan from coalition forces to the ANSF by the end of 2014?

Answer. Yes. The only sustainable and long-term solution to the security challenge facing Afghanistan is an ANSF that is capable of providing security for a legitimate Afghan Government. ISAF and the ANSF have been working towards this goal for years, and I believe that they will succeed.

Question. Do you support the retention of a limited U.S. military presence in Afghanistan after 2014?

Answer. The President has described two missions for post-2014 Afghanistan; a narrowly focused counterterrorism mission against al Qaeda and its affiliates; and a NATO-led train, advise, and assist (TAA) mission to support the ANSF. The President has also made it clear that the United States must conclude an agreement with Afghanistan in order to remain in Afghanistan; this agreement would secure the necessary privileges and protections for our forces. I support the U.S. commitment to a long-term relationship with Afghanistan, as outlined by the Strategic Partnership Agreement concluded in May 2012.

Question. If so, what in your view should be the size, mission, objectives, and duration of such residual U.S. forces in Afghanistan after 2014?

Answer. Any post-2014 forces should be tailored to support the counterterrorism mission and the train, advise, and assist (TAA) mission described by the President. As the President outlined in his State of the Union Address, a small U.S. force could remain in Afghanistan with NATO allies to train and assist Afghan forces, as well as conduct counterterrorism operations, if the Afghan Government signs the bilateral security agreement that has been negotiated.

The exact size and duration of that commitment remain at the discretion of our national leaders.

Question. If the United States and Afghanistan are unable to conclude a Bilateral Security Agreement that ensures legal protections for such residual U.S. forces, should the United States withdraw its military forces from Afghanistan?

Answer. My understanding is that the administration continues to seek to conclude the Bilateral Security Agreement (BSA) promptly.

As the President outlined in his State of the Union Address, a small U.S. force could remain in Afghanistan with NATO allies to train and assist Afghan forces, as well as conduct counterterrorism operations, if the Afghan Government signs the BSA that has been negotiated.

The President will make the decision regarding the post-2014 U.S. force presence. My understanding is that he continues to weigh options, with input from military officials, the Intelligence Community, diplomats, and development experts.

The longer it takes to conclude the BSA, options for a post-2014 force presence become more costly and may become more narrow for the United States and our NATO partners.

The United States is prepared to sign the agreement and to support the long-term security and stability of Afghanistan through a continuing partnership.

Question. In your view, what would be the consequences for Afghanistan's security and stability if the United States were to reduce its post-2014 military presence in Afghanistan to a "normal" Office of Defense Cooperation under chief of mission authority?

Answer. If confirmed, I would work with DOD and State Department counterparts to understand what we could accomplish through an Office of Defense Cooperation.

Question. What is your understanding, as a legal matter, of when the current agreements that provide legal protections for the U.S. military between the Afghan Government and the U.S. Government expire? If a residual U.S. military force were to remain in 2015, would it have the same legal protections as the current U.S. military force does now even without the signing of the Bilateral Security Agreement?

Answer. It is my understanding that the current Status of Forces Agreement between the United States and Afghanistan does not expire. However, the President has made clear that for a small U.S. force to remain in Afghanistan after 2014, the United States must have an invitation from the Afghan Government.

If the Afghan Government signs the security agreement that has been negotiated, the President could decide that a small U.S. force would remain in Afghanistan to train and assist Afghan forces and conduct counterterrorism operations.

Question. The current end strength of the ANSF is around 350,000 personnel. At the NATO Summit in Chicago in May 2012, coalition participants discussed a proposal to reduce the future size of the ANSF to around 230,000, with an annual cost of \$4.1 billion.

Do you agree that any future reductions in the ANSF from the 352,000 troop level should be based on the security conditions in Afghanistan at the time the reductions would occur?

Answer. It is my understanding that the Department conducts a review every 6 months to evaluate the size of the ANSF. The Department considers both the operational and security conditions to ensure that the ANSF force level is appropriate for the environment. If confirmed, I would participate in this review process and any decision concerning the final size and structure of the ANSF, including force reduction.

Question. Would you support reinvesting a portion of the savings from the drawdown of U.S. forces into sustaining the Afghanistan security forces at an end strength at or near their current level of 350,000 if necessary to maintain security in Afghanistan?

Answer. If confirmed, I would discuss these issues with our military commanders to develop recommendations for the Secretary.

Question. What would be your priorities for building the capabilities of the ANSF after 2014?

Answer. If confirmed, my priorities for building the capabilities of the ANSF after 2014 would depend on the President's decision on a U.S. force presence and mission, as well as on the level of Afghanistan Security Forces Fund resourcing. Depending on these variables, priorities could include ministerial institutional development, ministerial logistics and sustainment capacity, and moving Afghanistan to traditional security assistance.

Question. What do you see as the United States' long-term strategic interests in Afghanistan after 2014?

Answer. The United States has committed to a long-term partnership with Afghanistan. Beyond the primary goal of defeating al Qaeda and disrupting other extremists who present a serious threat to the United States, overseas interests, and allies and partners, the United States has pledged to support the development and stability of the Government of Afghanistan as it takes responsibility for its own future. Once the Afghan Government signs the BSA, a contingent of U.S. personnel

could remain in Afghanistan with our NATO allies to conduct two specified missions: training and assisting Afghan forces, and counterterrorism operations.

PAKISTAN

Question. What is your assessment of the current relationship between the United States and Pakistan?

Answer. Since Pakistan reopened the Ground Lines of Communication to Afghanistan in July 2012, the bilateral relationship has improved significantly, although there is still room for improvement. If confirmed, I would support focusing the defense relationship on defeating al Qaeda, promoting peace and reconciliation in Afghanistan, and supporting Pakistan's fight against militant and terrorist networks that threaten both the United States and Pakistan. Although there is room for improvement in the relationship, it is stronger today than it has been in recent years. However, Pakistan must take greater action to combat militant groups operating from its territory—like the Haqqani Network—who do not openly target the Pakistani state. These militant groups undermine regional stability and threaten U.S. and coalition personnel.

Question. Do you see opportunities for expanded U.S.-Pakistan cooperation on security issues? If so, how would you prioritize these areas of cooperation?

Answer. We should continue to work with Pakistan to promote regional security and counter the threat of al Qaeda. If confirmed, I would work to maintain cooperation in areas where our strategic interests align, while pressing Pakistan to take more direct action against all terrorist groups operating in its country.

Question. What is your assessment of Pakistan's efforts to combat the threat of international terrorism?

Answer. Pakistan has invested its military in fighting terrorism and has suffered enormous military and civilian casualties. The Pakistan military has deployed more than 140,000 personnel to the western border to conduct counterinsurgency (COIN) and counterterrorism (CT) operations. If confirmed, I would engage Pakistani defense officials to expand their COIN and CT efforts to target militant groups operating in Pakistan more directly.

Question. What additional steps, if any, do you believe Pakistan should take to address the threat posed by violent extremist groups such as the Haqqani Network and the Taliban Quetta Shura that currently use their safe haven in Pakistan to launch cross-border attacks on U.S., coalition, and Afghan forces?

Answer. I believe that Pakistan must prevent these terrorist networks from planning and executing attacks against U.S. and Afghan targets. This should involve a stronger effort to target militant groups and prevent them from acquiring the necessary material to execute attacks. Pakistan also needs to restrict more effectively these groups' ability to move across the border and throughout the region.

Question. What conditions, if any, should the United States place on its security assistance to Pakistan?

Answer. If confirmed, I would work the Department of State and other interagency partners to assess the level of our assistance to Pakistan, the return on that investment, and whether there is value in attaching conditions.

Question. What impact do you believe the end of coalition combat operations in Afghanistan will have on: (1) U.S.-Pakistan relations after 2014; and (2) U.S. strategic interests in the South Asia region? After 2014, assuming safe havens for international terrorists in Afghanistan don't grow, will Pakistan's relative importance to U.S. interests eclipse that of Afghanistan due to the presence of nuclear weapons in Pakistan?

Answer. I do not believe that the end of the International Security Assistance Force's (ISAF) combat operations in Afghanistan is a signal of U.S. disengagement from South Asia or a weakening of the bilateral relationship with either Afghanistan or Pakistan. In fact, U.S. engagement with both countries will remain important to support regional stability and secure our interests in the region. Vibrant defense relationships across South Asia will deter international terrorists from using South Asia as a safe haven to strike the U.S. Homeland or attempting to acquire a nuclear weapon.

BURMA

Question. There has been a lot of discussion recently about increasing military to military engagements between the U.S. and Burmese military, which has a long history of human rights abuses.

What is the strategic importance of Burma to PACOM and how does it fit within PACOM's overall Southeast Asia strategy?

Answer. Burma's openness after decades of self-imposed isolation—its size, its strategic location between South and Southeast Asia as well as India and China, and its wealth of natural resources—has the potential to alter the geopolitics of the region. A strong, prosperous, and ideally democratic Burma could become a major player within ASEAN and in the region. Additionally, a successful transition to democracy could serve as a powerful model for many other countries around the world struggling to become more responsive to its people and a testament to U.S. willingness to assist with such transitions.

More immediately, Burma is the current chair of ASEAN, one of the cornerstones of U.S. engagement in the region. As ASEAN chair, Burma sets the ASEAN agenda for the year—including on such issues as the South China Sea—and is the host for all its meetings. It is my understanding that DOD is seeking to craft limited and calibrated reengagement with the Burmese military in support of reforms.

Question. How would you characterize current military to military engagement with Burma and how do you assess its effectiveness?

Answer. I would characterize engagement with the Burmese military as crucial to the overall success of the ongoing reform movement in Burma. The military remains a key constituency in Burma, and without military support, the reform movement and transition to democracy will likely falter. I understand that the current limited military-to-military engagement is designed to incentivize support for reforms and improve the military's ability to institute greater respect for human rights, adhere to international standards of behavior, and submit to civilian control. I believe DOD should move forward with the calibrated and conditional engagement and continue to be clear-eyed about the Burmese military's poor human rights record and history of dominating Burmese politics and the economy.

In terms of effectiveness, I believe that the institutional changes the U.S. Government is seeking to promote in Burma will take time to implement and will thus require some patience. However, I agree with the current policy approach that makes any expansion of bilateral defense engagement contingent upon further progress by Burma on democratization, improving its human rights record, national reconciliation, and ending its military trade with North Korea.

VIETNAM

Question. What are the greatest challenges for greater engagement with Vietnam?

Answer. Vietnam's human rights record remains a major concern and, as U.S. Ambassador, I have supported the current policy of withholding lethal assistance until we see further progress in this area. Meanwhile, Vietnamese leaders will continue to attempt to balance its relationships with the United States and with China. We should continue to respect this reality and the pace of engagement with which Vietnam is comfortable.

We have come a long way in building a bilateral relationship based on mutual trust, respect, and understanding. I am confident that our two countries will continue to find ways to deepen engagement and promote our mutual interest in peace and stability in the region.

Question. What is the strategic importance of Vietnam to PACOM and how does it fit within PACOM's overall Southeast Asia strategy?

Answer. As Ambassador, I have seen first-hand what an important role Vietnam plays in South East Asia, and have been pleased to support our strengthened bilateral security relationship. It's been an honor to serve as Ambassador during a time in which we have expanded defense relations. Vietnam occupies a geo-strategically crucial location along the South China Sea and its busy sea lanes. As a South China Sea claimant, it is also a key player in one of the world's most sensitive and important political issues. Its large population and dynamic economy make it a growing economic force in the region.

Vietnam often acts as one of ASEAN's most strategic thinkers on regional geopolitics. It founded the ASEAN Defense Ministers' Meeting Plus (ADMM+) forum in 2010, has developed new Experts Working Groups under ADMM+, and has been keen to develop ASEAN as a leading multilateral institution in many other ways.

INDIA

Question. What is your view of the current state of the U.S.-India security relations?

Answer. The United States is investing in a long-term relationship with India—what the President has called one of the defining partnerships of the 21st century—and our bilateral defense relations play a key role in advancing this strategic partnership. I know that the Secretary of Defense is committed to continuing to build a relationship where close cooperation with India is normal, expected, and routine

in areas such as joint military exercises, defense trade, as well as co-production and co-development of defense articles. If confirmed, I would work to support this commitment and to build upon the progress made by former Deputy Secretary Carter in taking our already strong defense relationship to the next level.

Question. If confirmed, what specific priorities would you establish for this relationship?

Answer. If confirmed, I would continue to strengthen our military-to-military cooperation, work together on broader regional stability, and expand cooperation in areas such as maritime security, HA/DR, defense trade, collaborative science and technology, and co-production and co-development of defense articles.

Question. What, in your view, is the effect on DOD interests, if any, of the civil nuclear cooperation agreement with India?

Answer. It is my understanding that DOD does not have direct equities in the civil nuclear agreement. That said, it shows us that big leaps forward are often possible with India—which extends to security cooperation. Of note, the 2005/2006 defense cooperation agreement that set the course for the bilateral defense relationship was signed the same year as the civil nuclear agreement, and the past decade has seen an incredible increase in military-to-military engagement, senior-level interactions, and defense trade.

Question. What is your assessment of the relationship between India and China and how does that relationship impact the security and stability of the region?

Answer. As with the United States, China's military modernization presents both challenges and opportunities for India. The relationship between these two rising powers—both engaged in serious military modernization efforts—has broad influence on greater regional security. We are pleased to see high-level visits over the last year as well as increased economic and commercial engagement, and we will continue our engagement with both countries to encourage positive contributions to Asian stability and security.

Question. What do you believe the United States should do to assist the Indian Government in the prevention of and response to terrorist events in India?

Answer. The United States and India have a shared interest in working together on counter-terrorism. Current U.S. counterterrorism efforts with India are led predominantly by the Department of State and the Department of Homeland Security, with support from DOD. If confirmed, I would continue support for these initiatives.

Question. What is your assessment of the current relationship between India and Pakistan?

Answer. The United States does not view the security situation in South Asia as a "zero sum" game between India and Pakistan, and we value our relationship with each country. We believe that peaceful cooperation between India and Pakistan benefits the entire region, and are hopeful that the two countries can focus on confidence-building measures that help resolve tensions peacefully.

Question. In your view, what impact has the ongoing tension between Pakistan and India had on the stability of Central and South Asia generally, and on the prospects for lasting security in Afghanistan?

Answer. Regional security cannot be achieved in isolation, and we believe that Afghanistan must build positive relationships with all of its neighbors. India and Afghanistan have their own bilateral relationship; we do not view this partnership as any kind of threat to Pakistan, and we have continued to encourage India to be transparent with Pakistan on this relationship. As for lasting security in Afghanistan, if confirmed, I would encourage Indian leadership to provide continued support to Afghanistan through trade and investment, reconstruction, and assistance to the Afghan Security Forces.

REPUBLIC OF THE PHILIPPINES

Question. What is your view of the current state of U.S.-Philippine military-to-military relations?

Answer. U.S.-Philippine Alliance relations are strong. In recent years, both countries have worked to hone bilateral defense activities to improve cooperation on mutual security challenges and assist the Armed Forces of the Philippines' long-term military modernization.

Question. What do you believe the U.S. goals should be in the Republic of the Philippines and how best can we achieve those goals?

Answer. With respect to security-related issues, I believe we should cooperate with the Government of the Philippines to ensure that the Philippines is secure internally; has a modern, professional, and externally focused military; and is an active contributor to addressing mutual security challenges in the region and globally.

Question. What is your assessment of recent U.S. military efforts in the Philippines and the effectiveness of the U.S. assistance being provided to the Philippine military in its fight against insurgent groups?

Answer. For more than a decade, DOD has cooperated closely with the Armed Forces of the Philippines (AFP) to strengthen its counterterrorism capabilities in the southern Philippines. I think that the ongoing effort to transition responsibility for internal security to the Philippine National Police is a testament to the impressive security gains made by the AFP and enabled by U.S. military support. I understand that DOD continues to assess the requirements for the counterterrorism mission in the southern Philippines as security in that region improves.

Question. Has Super Typhoon Haiyan affected U.S. plans to increase partner capacity in the Philippines, especially with regard to maritime awareness?

Answer. Bolstering Philippine maritime domain awareness capabilities is an important goal, which predates the storm; however, I understand that identifying lessons learned from the typhoon response could be valuable and incorporated into future Alliance activities.

Question. What policy guidelines, if any, would you establish, if confirmed, to ensure that U.S. personnel do not become involved in combat or law enforcement in the Republic of the Philippines?

Answer. Philippine security forces are already capably responding to internal security threats and reducing instability in that country. Through security cooperation and assistance, DOD aims to bolster the capabilities of Philippine forces.

Question. In your opinion, how important is the Global Security Contingency Fund to U.S. security assistance efforts in the Philippines?

Answer. The Global Security Contingency Fund is an important tool in our capacity-building efforts, which will help to reinforce Government of the Philippines successes in the south and strengthen that country's maritime security and maritime domain awareness capabilities.

INDONESIA

Question. Indonesia is a key Asian power and is the largest Muslim country in the world. Consequently, it is important to build on opportunities to improve and expand U.S. relations with Indonesia where possible.

What is your view of the current state of military-to-military relations with Indonesia?

Answer. U.S.-Indonesia military-to-military relations are very strong and focused around the four focus areas of HA/DR, peacekeeping operations (PKO), military reform, and extensive security assistance or cooperation engagements. This growing relationship is apparent in the increased complexity within exercises and the recent Foreign Military Sales cases between the United States and Indonesia.

Question. What is your understanding of the extent to which the Indonesian Government is cooperating with the United States in the war on terrorism?

Answer. It is my understanding that Indonesia has taken steps to improve its ability to respond to indigenous terrorist activities according to the rule of law and has been concentrating its institutional efforts on an active campaign to counter violent extremism.

Question. Do you favor increased U.S.-Indonesian military-to-military contacts? If so, under what conditions? Why?

Answer. We encourage increased military-to-military contacts as the U.S.-Indonesia relationship continues to strengthen. Our interactions have grown in complexity and frequency over the last decade, and we look forward to building on this momentum. This enhancement is contingent to Indonesia's continued progress in the area of preventing human rights violations and appropriately addressing violations when they occur.

Question. What is your view of the commitment of the Indonesian military leadership to professionalization of its armed forces, adhering to human rights standards, improving military justice, and cooperating with law enforcement efforts to investigate and prosecute those military personnel accused of human rights abuses?

Answer. I commend Indonesia for the strides it has made to institutionalize respect for human rights and accountability for abuses.

It is my understanding that, over the last few years, the U.S.-Indonesia military-to-military relationship has continued to deepen and expand. Support from the U.S. Congress is critical for ensuring that we can continue to deepen our cooperation with a key regional actor. If confirmed, I look forward to working with Congress on the next steps.

Question. If confirmed, what would you do to encourage respect for human rights and accountability in the Indonesian military?

Answer. We would continue to enhance our institutional linkages with the Indonesian Ministry of Defense through increased engagement, subject matter exchanges, and professional military education. We would also continue to emphasize recent progress in addressing human rights violations, including: suspending from active duty military officials credibly accused of human-rights abuses; removing from military service any member convicted of such abuses; and cooperating with the prosecution of accused military members.

CENTRAL ASIA

Question. What in your view are the U.S. strategic interests in the Central Asian region?

Answer. As long as the United States has forces in Afghanistan or is supporting the Afghan National Security Forces (ANSF), it is in the U.S. strategic interests that we maintain alternative supply lines through Central Asia so that we do not remain dependent solely on supply lines through Pakistan.

It is important that we continue to support the independence and territorial integrity of these nations, and ensure that they are capable of defending their own territory against extremists and narco-traffickers.

Beyond that, it is in our strategic interest to help ensure that these nations develop defense institutions similar to our own and with which we can work together to address future security challenges.

Question. What opportunities, if any, do you see for expanding security cooperation with the countries of Central Asia?

Answer. I understand that the countries of Central Asia are interested in modernizing their militaries and learning from U.S. counterinsurgency experiences in Afghanistan and Iraq. It is in the interest of the United States to assist them in this effort, within the limitations of increasingly tight budgets.

Question. What is your assessment of the New Silk Road Initiative? Do you believe that increased economic integration among the Central Asian countries contributes to improved security and stability in the region?

Answer. I understand that the DOD's Northern Distribution Network (NDN) and Local Procurement initiatives have helped to develop habits of trade and transit within Central Asia and Afghanistan. Increased economic integration of the Central and South Asian region could enhance stability, and the State Department's New Silk Road Initiative has the potential to build on these habits and promote greater economic integration within the region.

COMBATING TERRORISM

Question. The administration's National Strategy for Counterterrorism highlights the need to maintain pressure on al Qaeda's core while building the capacity of partners to confront mutual threats. The strategy also underscores the need to augment efforts to counter threats from al Qaeda-linked groups "that continue to emerge from beyond its core safe haven in South Asia".

If confirmed, what would be your role within DOD with respect to counter terrorism?

Answer. I understand there is still a great need to maintain focus on pressuring al Qaeda's core while building foreign partnerships and capacity to strengthen our resilience against this threat. If confirmed, I would work closely with the countries in Asia to build enduring partnerships and capabilities, eliminate safe havens, and degrade links between al Qaeda and its affiliates and followers.

Question. What do you believe is the terrorism threat from al Qaeda and affiliated groups in the Asia-Pacific region?

Answer. There has been significant success in the last few years in the fight against al Qaeda, but al Qaeda continues to pose a persistent and evolving threat to the United States. Al Qaeda is still adapting to losses in its command structure, utilizing its safe havens for attack planning, communicating guidance to its operational cells in the region, soliciting logistical and financial support, and providing training and indoctrination to new recruits.

Question. Is there a nexus between terrorist groups and criminal networks in the Asia-Pacific?

Answer. During my time as a U.S. Ambassador in Southeast Asia, it was clear that the nexus between illicit non-state actors and criminal networks is strong. It can be found throughout the globe. Terrorist organizations are using criminal networks, including narcotics trafficking and arms smuggling, as pathways to move people and resources across the region. Criminal networks can provide financial support to terrorists, insurgents, and other adversaries, and contribute to global in-

stability by undermining legitimate government institutions, fostering corruption, and distorting legitimate economic activity, including in the Asia-Pacific region.

In Southeast Asia, most notably in the Philippines and Indonesia, U.S. engagement with these partner nations has helped combat violent extremist ideology and activities. The integration of operations by host nation security forces with U.S. capacity building, development, and information support operations has dramatically reduced the ability of violent extremist organizations to operate.

Question. What more can the United States do in Southeast Asia to help combat the threat of terrorism perpetrated by violent extremists?

Answer. Our partners in Southeast Asia have successfully maintained pressure on the region's most lethal terrorist organizations, but the region still remains fertile ground for local terrorists who share al Qaeda's ideology and motivations. I support efforts to continue to build the capacity of governments that demonstrate their commitment against al Qaeda and its affiliates and adherents. If confirmed, I would work with others in the Department, other U.S. departments and agencies, Congress, and partners in the region to continue to make progress on this issue.

Question. Which Southeast Asian countries are most important in the fight against terrorism in that region and what should the United States do to enhance relations with those countries?

Answer. Consistent with the National Strategy for Counterterrorism, the United States has developed a robust network of bilateral counterterrorism relationships with key countries in Southeast Asia, including Indonesia, Philippines, Singapore, Thailand, and Australia. It is my understanding that Indonesia and the Philippines continue to be top priorities for counterterrorism capacity-building assistance. I support continued efforts to work closely to enhance relationships with the Governments of Indonesia and the Philippines through continued policy dialogues, security cooperation, and support to action-oriented regional frameworks that address CT issues.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent legislation, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of the overall effectiveness of this authority?

Answer. My understanding is that section 1208 provides the Secretary of Defense with the authority to combat terrorism in a wide range of operational environments where U.S. Special Operations Forces are often operating under austere conditions and require specialized support from indigenous forces. Although I have not been briefed on the particulars of these activities, from my time as a U.S. Ambassador, I am aware that combatant commanders and Chiefs of Mission place a high value on this program.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS ACTIVITIES

Question. On an annual basis, DOD's counternarcotics (CN) program expends approximately \$1 billion to support CN operations, build the capacity of certain foreign governments in Asia and around the globe, and analyze intelligence on CN-related matters.

What is your understanding and assessment of the DOD CN program?

Answer. From my time in Asia, I am aware that the DOD's role in U.S. counternarcotic efforts is to employ militarily unique knowledge, skills, and capabilities to confront the range of national security threats associated with drug trafficking and related forms of transnational crime. I believe that DOD's CN programs are a cost-effective tool to build the capacity of our partners and allies' security forces but also serve to deter broader conflicts that could require more costly military involvement. Given the networked nature of threats we face today, it is evident that the expertise, authorities, and skill of our law enforcement partners are essential enablers in efforts to achieve national security objectives.

Question. What is your understanding of the illegal narcotics industry in Asia?

Answer. From my time as U.S. Ambassador to Vietnam, I am aware that Asia-Pacific criminal enterprise activities, including drug-trafficking, are organized on a business model of networked criminal service providers. There are a number of drug trafficking organizations that see the Asia-Pacific region as a lucrative market for the illicit products and attempt to buy influence and subvert governmental institutions. In addition to trafficking drugs, these organizations exploit their global net-

work to traffic precursor chemicals globally. This can create instability, put civilian populations at risk, and undermine democratic processes.

Question. What role, if any, should DOD play in countering—either directly or by, through, and with our Asian partners—the illegal narcotics industry in Asia?

Answer. I believe that DOD plays a critical role in countering the illegal narcotics industry in Asia. I understand that the Joint Interagency Task Force-West (JIATF-W) is PACOM's executive agent for countering narcotics, and works by, with, and through the U.S. embassy country teams to identify our Asian partners' needs in-country. JIATF-W works with foreign and domestic law enforcement partners to provide training and support. Capacity-building efforts are the hallmark of JIATF-W engagement with Asian partners and contribute to a whole-of-government effort to hinder the growth of transnational criminal organizations, thereby reducing the risk to the U.S. Homeland. I believe DOD should continue efforts to address the threats posed by narcotics and narcotics trafficking in the Asia-Pacific region.

Question. On an annual basis, DOD spends approximately \$400 million building the capacity of the Afghanistan Government to counter the illegal narcotics trade. Despite this sizable annual investment, Afghanistan remains the "well-spring of the global opium trade, accounting for 93 percent of all opium poppy cultivation" according to the United Nations Office of Drugs and Crime (UNODC). UNODC has also found that about 80 percent of the drugs derived from Afghan opium poppies are smuggled out by transnational organized criminal groups through the Islamic Republic of Iran and Pakistan; the rest flow through Central Asia.

What is your assessment of DOD's CN program in Afghanistan?

Answer. It is my understanding that the CN programs in Afghanistan developed an Afghan capacity to conduct CN investigations and interdiction operations with little U.S. support. This capacity was developed by building vetted Afghan CN police units and the Special Mission Wing. Afghan border units were trained and equipped to interdict drug trafficking and other illicit goods crossing the Afghan border and at Afghan ports of entry, including airports. Prosecutions of drug traffickers in Afghanistan have put narco-traffickers supporting the insurgency in jail and removed them from the battle space. The narcotics trade has been a key resource for the insurgency. CN efforts have been able to reduce that resource flow.

DOD has also established CN capacity-building programs in Pakistan and Central Asia to interdict drugs and networks trafficking Afghan-origin narcotics. A regional approach is required to ensure a greater impact on transnational criminal organizations and to disrupt the narcotics flow.

Question. Do you think the DOD CN program in Afghanistan has been successful to date?

Answer. My understanding is that DOD's CN programs in Afghanistan have been successful. DOD, in coordination with the Departments of State and Justice, has been able to build the CN capacity of the Afghan National Security Forces. These forces are now capable of planning and executing law enforcement CN operations with minimal help from the United States, and Afghan-only CN operations are occurring more frequently and with greater success. If confirmed, I would work with others in the DOD and in other departments and agencies to assess whether we should provide continued support to these forces post-2014 to ensure they remain capable in the future.

LAW OF THE SEA

Question. Do you support U.S. accession to the United Nations Convention on the Law of the Sea? If so, why?

Answer. I believe accession by the United States to the United Nations Convention on the Law of the Sea would send a clear signal that the United States remains committed to advancing rule of law, in the world's oceans. The United States is at the forefront of promoting rule of law and under the Convention the United States would have the legal foundation for navigational rights needed to project power, respond to crises, reassure our allies and partners, sustain deployed forces, and secure sea and air lines of communication. Supporting the Convention would further sustain our economic prosperity and trade worldwide.

Question. Would U.S. accession to the United Nations Law of the Sea Convention benefit the U.S. military's mission in the Asia-Pacific region? If so, how?

Answer. It is my belief that U.S. accession to the Law of the Sea Convention would be of great benefit to the U.S. military's mission in the Asia-Pacific region. Accession would enhance the United States' exercise of the Convention's freedom of navigation and overflight rights. Accession to the United Nations Law of the Sea Convention would also support combined operations with Asia-Pacific partners and the Proliferation Security Initiative, strengthen the U.S. position in discussions with

China, substantiate undisputed title to our extended continental shelf area, and further establish the United States as a leader in future developments in the law of the sea. Additionally, accession would further add to U.S. credibility in a myriad of Asia-focused multilateral venues where Law of the Sea issues are debated.

PRISONER OF WAR/MISSING IN ACTION ACCOUNTING EFFORTS

Question. Recovery of remains of U.S. servicemembers from World War II, the Korean War, and the Vietnam war continues to be a high priority.

If confirmed, what steps, if any, would you take to enhance Prisoner of War/Missing in Action (POW/MIA) recovery efforts in the PACOM area of responsibility?

Answer. As I can personally attest to from my time as the U.S. Ambassador to Vietnam, POW/MIA recovery is a whole-of-government effort. If confirmed, I would work closely with the Deputy Assistant Secretary for POW/Missing Personnel Affairs, the State Department, and PACOM to provide the utmost support.

FOREIGN LANGUAGE POLICY

Question. In 2005, DOD approved the Defense Language Transformation Roadmap to improve the Department's foreign language capability and regional area expertise. Since then, the Department has been working toward implementing that roadmap.

How many Mandarin and/or Cantonese speakers does DOD have in intelligence analyst positions?

Answer. Unfortunately, I have not yet examined this issue in detail. If confirmed, I look forward to working with Congress and the Office of the Under Secretary for Personnel and Readiness to assess DOD requirements for capabilities in foreign languages and regional areas of expertise.

Question. Is this number sufficient to ensure good intelligence assessments for use by the Office of Asian and Pacific Security Affairs?

Answer. See previous answer.

Question. In your view, how should the United States expand the foreign language skills of civilian and military personnel in order to improve the quality of intelligence input to, and policy output by, the Office of Asian and Pacific Security Affairs?

Answer. See previous answer.

COUNTER THREAT FINANCE

Question. A number of officials in DOD and the intelligence community (IC) have called for investing significantly more resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking.

What are your views on the role of DOD in counter-threat finance (CTF) activities?

Answer. Our Nation's adversaries require access to financial networks to conduct their operations. To counter these activities, U.S. Government departments and agencies must cooperate together, using their respective capabilities, to trace and stop the flow of money to our adversaries, and to interdict adversaries' funding sources in non-kinetic ways. Although DOD is not the lead U.S. agency for conducting CTF actions, DOD does have unique capabilities that can assist other U.S. departments and agencies and partner nations in accomplishing the CTF mission. I believe that DOD should continue to support U.S. law enforcement agencies, the Department of the Treasury, the Intelligence Community, and others with these unique DOD capabilities, which include planning, intelligence analysis and tools, and the integration of intelligence into operations.

Question. In your view, should DOD seek to expand its support to other U.S. Government departments and agencies conducting CTF activities?

Answer. I believe DOD should continue to support U.S. Government efforts and international partners with CTF assistance, within existing DOD resources, while ensuring that DOD CTF support reflects U.S. defense priorities. Through this support, DOD can enhance the U.S. Government's ability to target our adversaries successfully through financial and law enforcement actions.

Question. The Haqqani Network in the Afghanistan-Pakistan border region poses a major threat to the security of U.S., coalition, and Afghan forces in Afghanistan, both by conducting direct attacks on those forces and by providing sanctuary to other militant extremists.

In your view, should additional steps be taken to track and counter the financial activities of the Haqqani Network, and if so, what role, if any, should DOD play?

Answer. The Haqqani Network poses a grave threat to U.S. persons and to U.S. interests. This threat requires a whole-of-government response. I believe that DOD

should continue to provide support in order to assist U.S. Government efforts to target the financial activities of terrorist networks such as the Haqqani Network.

Question. Transnational criminal organizations are having a debilitating impact on the ability of our foreign partners to govern their nations and provide opportunities for their people.

Do you think expanding CTF activities in the Asia-Pacific region would be beneficial? If so, what role, if any, should DOD play in those activities?

Answer. I believe that CTF cooperation with allies and partners in Asia and the Pacific benefits our Nations' security. If we are to succeed in stopping transnational criminal organizations, we must pursue transnational cooperation. If confirmed, I would recommend that DOD continue to provide support, within available authorities and resources, to other departments and agencies and to foreign partners, so that we can strengthen our collective capabilities to interdict the flow of financial resources to Asia-Pacific region transnational criminal organizations.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ASD(APSA)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR MAZIE K. HIRONO

ASIA-PACIFIC CENTER FOR SECURITY AFFAIRS

1. Senator HIRONO. Ambassador Shear, as the next Assistant Security for Asian and Pacific Security Affairs, you will oversee the Asia-Pacific Center for Security Studies (APCSS) in Honolulu, HI. Would you share both your short-term and long-term visions for the Center, and what role it can play in the administration's rebalance to the Asia-Pacific?

Ambassador SHEAR. Regional partners hold the APCSS in very high regard, and, if confirmed, I look forward to assessing additional ways in which the APCSS can play a greater role in the rebalance to the Asia-Pacific region. The APCSS is a valuable tool for bilateral and multilateral research, communication, and exchange of ideas focused on security issues in the region. It provides a unique venue for discussions and engagement with partners in the region. If confirmed, I would work with my colleagues in Office of the Secretary of Defense Policy as well as U.S. Pacific Command to identify opportunities to enhance partnerships and strategic thinking in the region.

JAPAN-SOUTH KOREA RELATIONS

2. Senator HIRONO. Ambassador Shear, as you are well aware, relations between our treaty allies, Japan and South Korea, remain strained. Please provide an assessment of the situation between the two countries and your thoughts on how the United States can better foster bilateral cooperation between the two countries and trilateral cooperation to address regional threats.

Ambassador SHEAR. Relations between Japan and the Republic of Korea, two of our closest treaty allies, remain strained. The United States has made a concerted

effort to promote dialogue and cooperation between Japan and the Republic of Korea. I understand that the Department of Defense (DOD) has encouraged, to the fullest extent possible, a healthy and open trilateral relationship among Japan, the Republic of Korea, and the United States in order to insulate defense cooperation from larger political issues in the bilateral Japan-Republic of Korea relationship. I believe that a strong trilateral relationship can be an important deterrent against regional threats such as those posed by North Korea. If confirmed, I would work to ensure that trilateral security cooperation with Japan and the Republic of Korea remains a priority for DOD.

TAIWAN

3. Senator HIRONO. Ambassador Shear, under President Ma Ying-Jeou, Taiwan continues its historic steps toward closer cross-strait ties. What implications do you see for the U.S. relations with both sides, considering our commitments under the Taiwan Relations Act (TRA)?

Ambassador SHEAR. I believe that closer ties between the People's Republic of China and Taiwan are a positive development and contribute to a reduction in cross-Strait tensions. In this respect, I believe that U.S. policy, based on the three joint U.S.-China Communiqués and the TRA, which includes making available to Taiwan "such defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability," has enabled Taiwan to enter into cross-Strait dialogue with confidence and in the absence of coercion. If confirmed, I would continue to support this policy.

CHINA

4. Senator HIRONO. Ambassador Shear, Admiral Locklear of the U.S. Pacific Command has mentioned a desire to have a direct line of communication with his counterparts in China. What are your thoughts on such a system and what steps would be needed to create it?

Ambassador SHEAR. I support open lines of communication between our two defense establishments. As I understand it, the Secretary of Defense has a direct line of communication with his Chinese counterpart through the Defense Telephone Link. I believe that this system may be used by Commander, U.S. Pacific Command, to facilitate direct communications with his counterpart as well, and I would look into this if confirmed.

 QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

REBALANCE TO ASIA-PACIFIC

5. Senator INHOFE. Ambassador Shear, thank you for your service as U.S. Ambassador to Vietnam. From your time in the region, you can evaluate the rebalance to the Asia-Pacific called for in the Defense Strategic Guidance. A rebalance toward the Asia-Pacific would seem to signal an increase in presence and resources. But despite the rhetoric due to resource constraints, if there is a minimal increase in presence or a perceived U.S. commitment to the Asia-Pacific region, what do you think the impact will be on our Asia-Pacific allies and partners?

Ambassador SHEAR. Despite resource constraints over the past year, the United States—including DOD—has prioritized efforts such as modernizing our alliances and partnerships, increasing partner capabilities to respond to common challenges such as humanitarian disasters, and strengthening multilateral cooperation—which all demonstrate the United States' enduring commitment to the Asia-Pacific region.

Should resources be further constrained, it would likely require the administration to adjust the timing or intensity of specific activities; however, I believe that the United States will continue to prioritize resources and efforts that will affect the Asia-Pacific region.

6. Senator INHOFE. Ambassador Shear, I think that if we don't follow through on the rhetoric of a rebalance, that we will cause significant damage to our regional security relationships. Like the Middle East where we have left a leadership vacuum, our friends won't trust us and our enemies won't fear us. The Defense Strategic Guidance says "the growth of China's military power must be accompanied by greater clarity of its strategic intentions . . ." Do you think that China's unilateral declaration of an air defense identification zone (ADIZ) covering the airspace of Japan,

South Korea, and Taiwan, has given us greater clarity on China's strategic intentions?

Ambassador SHEAR. China's announcement of an ADIZ was provocative and raised tensions in one of the world's most geopolitically sensitive areas, and it suggests that China is willing to risk friction with its neighbors—and with the United States—to advance its regional policy goals. As Secretary Hagel has made clear, the United States does not recognize and does not accept China's ADIZ. If confirmed, I would support the DOD position that China's announced ADIZ will not change how the United States conducts military operations in the region.

7. Senator INHOFE. Ambassador Shear, what strategy do you suggest to counter those aggressive intentions? A slow and weak response by the United States to Chinese bullying in the East and South China Seas decreases confidence in U.S. commitment to the security of our partners and allies in a region which is supposed to be seeing more, not less, U.S. attention. The lack of a strategy supported by inadequate resources will further erode U.S. leadership and influence in an important region of the world.

Ambassador SHEAR. The U.S. response to provocative actions by any country, including China, should be firm and grounded in the principles of support for international law; open access by all to the global maritime domains; free and open commerce; and peaceful resolution of disputes. To achieve this, the United States should continue to evolve our force posture in the region, maintain a robust regional and global presence and access, modernize our own capabilities, and strengthen alliances and partnerships, while also promoting the expectation that disputes are resolved diplomatically without aggression, coercion, or retribution.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

TAIWAN RELATIONS ACT

8. Senator CHAMBLISS. Ambassador Shear, this year marks the 35th anniversary of the TRA. The TRA forms the basis of U.S. policy towards Taiwan and affirms the U.S. commitment to maintain Taiwan's self-defense capability. This has successfully ensured peace in the Taiwan Strait and contributed to stability in the U.S. Pacific Command. With the People's Republic of China's continued military advances and the U.S. Air Force's anticipated decision to defund the combat avionics programmed extension suite (CAPEs) program—which upgrades Taiwan's F-16 fleet with advanced avionics—how do you plan to continue to implement the security partnership the United States has with Taiwan?

Ambassador SHEAR. The TRA has helped maintain peace and stability in Northeast Asia for more than 35 years, and it continues to serve the United States well. If confirmed, I would continue our policies, based on the three joint U.S.-China Communiqués and the TRA, which includes making available to Taiwan “such defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability.” In this regard, I would look to explore ways in which the United States could support Taiwan's ambitions to adopt asymmetric and innovative concepts and capabilities as part of its defense strategy. With respect to the CAPEs program, if confirmed, I would look into the matter to determine what, if any, effects there could be on our commitments under the TRA and seek ways to mitigate them, if necessary.

REBALANCE TO THE PACIFIC

9. Senator CHAMBLISS. Ambassador Shear, in November 2011, then-Secretary of State Hillary Clinton gave an address titled “America's Pacific Century” and stated that the United States has “a strong relationship with Taiwan, an important security and economic partner”. How will you build on the existing foundation and further enhance our important relationship with Taiwan as we rebalance to the Pacific and look to bolster regional alliances?

Ambassador SHEAR. In my view, the best way to build on the existing foundation and further enhance our important relationship with Taiwan is to maintain consistency with our longstanding policy based on the three joint U.S.-China Communiqués and the TRA, which provides that the United States will make available to Taiwan “such defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability.” That policy has contributed to peace and stability in the region for more than 35 years and is consistent with the longstanding U.S. calls for peaceful resolution of the Taiwan issue in a manner

acceptable to the people on both sides of the Taiwan Strait. If confirmed, I would work to ensure that the United States continues to assist Taiwan, consistent with the TRA.

QUESTION SUBMITTED BY SENATOR RICHARD BLUMENTHAL

TAIWAN RELATIONS ACT

10. Senator BLUMENTHAL. Ambassador Shear, this year marks the 35th anniversary of the TRA. The TRA forms the basis of U.S. policy towards Taiwan and affirms the U.S. commitment to maintain Taiwan's self-defense capability. This policy has successfully ensured peace in the region and contributed to the stability and prosperity in the Asia-Pacific region. With the People's Republic of China's arms buildup and naval modernization shifting the cross-strait military balance in its favor as well as the U.S. Air Force planning to defund the CAPES program—which serves to upgrade Taiwan's F-16 fleet with advanced avionics—how do you and the administration plan to continue to implement the security commitment the United States has to Taiwan under this framework?

Ambassador SHEAR. The TRA has helped maintain peace and stability in Northeast Asia for more than 35 years, and it continues to serve the United States well. If confirmed, I would continue our policies, based on the three joint U.S.-China Communiqués and the TRA, which includes making available to Taiwan “such defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability.” In this regard, and consistent with the provisions of the TRA and our unique relationship with Taiwan, I would look for ways to support Taiwan's ability to maintain an effective deterrence and adopt asymmetric and innovative concepts and capabilities as part of its defense strategy. With respect to the CAPES program, if confirmed, I would look into the matter to determine what, if any, effects there could be on our commitments under the TRA and seek ways to mitigate them, if necessary.

[The nomination reference of Hon. David B. Shear follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 7, 2014.

Ordered. That the following nomination be referred to the Committee on Armed Services:

David B. Shear, of New York, to be an Assistant Secretary of Defense, vice Mark William Lippert, resigned.

[The biographical sketch of Hon. David B. Shear, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DAVID B. SHEAR

Education:

Earlham College

- September 1971–June 1975 (Estimated)
- Bachelor's Degree

Waseda University

- July 1973–June 1974 (Estimated)

Paul Nitze School of Advanced International Studies

- September 1980–June 1982 (Estimated)
- Master's Degree

Johns Hopkins Nanjing Center

- January 1987–June 1987 (Estimated)

Georgetown University

- July 1998–June 1999

Employment record:

- U.S. Department of State
 - Foreign Service Officer
 - January 1982–Present
- Institute of International Education
 - Administrative Assistant
 - February 1980–September 1980
- American Institute in Taiwan
 - Contract Visa Clerk
 - June 1979–December 1979
- American National Red Cross
 - Flood Relief Volunteer
 - February 1977–June 1977
- Jiyu Foreign Language Center, Tokyo
 - English Teacher
 - August 1975–December 1976

Honors and awards:

- State Department Superior Honor Award (individual), May 2001
- State Department Superior Honor Award (individual), February 1997
- Superior Honor Award (group), January 2001
- Defense Civilian Meritorious Service Award, October 1995
- State Department Superior Honor Award (group), November 1989

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Hon. David B. Shear in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES
 Room SR-228
 Washington, DC 20510-6050
 (202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
 BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
David Bruce Shear.
2. **Position to which nominated:**
Assistant Secretary of Defense for Asia/Pacific.
3. **Date of nomination:**
January 7, 2014.
4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

May 25, 1954; Cobleskill, NY.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Barbara Chai Shear (Maiden name: Barbara Chai).

7. Names and ages of children:

Jennifer Shear, age: 26.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Georgetown University, Rusk Fellow, 1998–1999 no degree

Nanjing University, student, 1987, no degree

Johns Hopkins School of Advanced International Studies, 1980–1982, M.A. degree

National Taiwan University, Chinese language student, 1978–1979, no degree

Cornell University, Chinese language student, 1977–1978, no degree

Waseda University (Tokyo), Japanese language student, 1973–1974, no degree

Earlham College, 1971–1975, B.A. degree

Clayton A. Bouton Jr.-Sr. High School, Voorheesville, NY, 1967–1971

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Joined Department of State in August 1982.

Last 10 years:

August 2011–Present: U.S. Ambassador to Vietnam

March 2011–April 2011: Vietnamese Language Training

May 2009–February 2011: Deputy Assistant Secretary of State, East Asia-Pacific Bureau, Department of State

August 2008–May 2009: Director, Office of Chinese Affairs, East Asia-Pacific Bureau, Department of State

August 2005–July 2008: Deputy Chief of Mission, U.S. Embassy Kuala Lumpur

August 2001–July 2005: Political Minister, U.S. Embassy Tokyo

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

July 1999–July 2001: Deputy Director, Office of Korean Affairs, Department of State, July 1997–July 1998: Special Assistant to Under Secretary for Political Affairs Tom Pickering

August 1994–July 1997: Political/Military Unit Chief, U.S. Embassy, Tokyo

July 1992–August 1994: Political/Military Officer, Office of Japanese Affairs

July 1990–June 1992: Deputy Director, Office of East Asian Regional Affairs

August 1989–April 1990: Political Officer, U.S. Embassy, Tokyo

June 1987–July 1989: Political Officer, U.S. Embassy, Beijing

August 1986–January 1987: Chinese Language Training, Foreign Service Institute, Taipei, Taiwan

July 1984–July 1986: Desk Officer, Office of Chinese Affairs, Department of State

February 1983–July 1984: Vice Consul, U.S. Consulate, Sapporo, Japan

November 1982–January 1983: Trainee, U.S. Mission to the United Nations

August 1982–November 1982: Trainee, Foreign Service Institute, Washington, DC

June 1979–December 1979: Contract Employee, Consular Section, American Institute in Taiwan, Taipei, Taiwan

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, American Foreign Service Association (AFSA)

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

\$200 to the campaign for President Obama, 2012.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

State Department Superior Honor Award (individual), May 2001

State Department Superior Honor Award (individual), February 1997

Superior Honor Award (group), January 2001

Defense Civilian Meritorious Service Award, October 1995

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

I have given several speeches during the last 5 years. Three representative speeches are provided, and additional speeches can be made available upon request. I also have a record of written and oral testimony before Congressional oversight committees all of which are included in the Congressional Record.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DAVID B. SHEAR.

This 15th day of January, 2014.

[The nomination of Hon. David B. Shear was reported to the Senate by Chairman Levin on March 26, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 17, 2014.]

[Prepared questions submitted to Mr. Eric Rosenbach by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I do not see a need to amend any provisions of the Goldwater-Nichols Act. Since its adoption in 1986, Goldwater-Nichols has met its intended goals of improving civilian oversight of the Department of Defense (DOD) and creating a joint environment among the Services.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Currently, I do not believe that modification to the Goldwater-Nichols Act is required.

DUTIES AND QUALIFICATIONS

Question. DOD Directive 5111.13 of January 16, 2009 states that the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs (ASD(HD&ASA)), "under the authority, direction, and control of the Under Secretary of Defense for Policy (USD(P)), serves as the principal civilian advisor to the Secretary of Defense and the USD(P) on homeland defense activities, Defense Support of Civil Authorities (DSCA), and Western Hemisphere security matters." It further elaborates that the ASD(HD&ASA) shall provide overall supervision of homeland defense activities of DOD which include "Defense Critical Infrastructure Program (DCIP); domestic antiterrorism; the Defense Continuity Program; other homeland defense-related activities; and alignment of homeland defense policies and programs with DOD policies for counterterrorism and counternarcotics."

The Secretary of Defense has announced a plan to reorganize the Office of the USD(P), under which the ASD for Homeland Defense is located. What is your understanding of the duties and functions of the Assistant Secretary of Defense (ASD) for Homeland Defense position to which you have been nominated, and do they differ from those described in DOD Directive 5111.13?

Answer. My understanding of the duties and functions of the Assistant Secretary of Defense for Homeland Defense is consistent with those described in DOD Directive 5111.13, as well as other applicable DOD directives, with the exception of the duties and functions for Western Hemisphere security policy, which has been transferred within the Office of the USD(P) to the Assistant Secretary of Defense for International Security Affairs (ASD(ISA)). In the future, the Assistant Secretary of Defense for Homeland Defense will assume some of the duties and functions currently assigned to the Assistant Secretary of Defense for Global Strategic Affairs (ASD(GSA)), including the duties and functions for cyberspace, space, and countering weapons of mass destruction (WMD) policies.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. My professional background includes nearly 20 years of experience working on national security issues in the military, private sector, academia, and Federal Government. I believe that both my substantive expertise and leadership experience provide me with the background necessary to serve successfully, if confirmed, as Assistant Secretary of Defense for Homeland Defense.

My substantive background includes extensive practical and academic work in intelligence, counterterrorism, homeland security, and cyber policy. As the commander of an Army intelligence unit, I gained invaluable experience about military and intelligence operations. I gained a deep understanding of U.S. counterterrorism and homeland security efforts as a professional staff member on the Senate Intelligence Committee. At the Harvard Kennedy School, I taught classes on national security policy and authored a book focusing on counterterrorism. Over the last 2½ years at the Pentagon, I gained a deep understanding of the cybersecurity challenges facing the Nation.

I believe that I also have the strong leadership and management skills necessary to serve effectively as Assistant Secretary. As a senior executive at a large international telecommunications firm, for example, I managed complex projects across fifteen nations. Later, I served as the Executive Director of a large center at the Kennedy School, where I was responsible for managing all aspects of the center's operations. Prior to my work in the Pentagon, I was a senior executive at an international consulting firm working with Fortune 500 executives.

Question. What additional actions do you believe you need to take, if any, to prepare yourself to fulfill these duties?

Answer. If confirmed, I am prepared to undertake fully the duties and functional areas within the Office of the Assistant Secretary of Defense for Homeland Defense and anticipate working with the congressional defense committees to fulfill my responsibilities under title 10.

RELATIONSHIPS

Question. What do you see as the relationship between the Assistant Secretary of Defense for Homeland Defense and each of the following:

The Secretary of Defense.

Answer. Under the authority, direction, and control of the USD(P), the Assistant Secretary of Defense for Homeland Defense serves as the principal civilian advisor to the Secretary of Defense on homeland defense activities and Defense Support of Civil Authorities. In the future, I understand that this responsibility will expand to serving as the principal civilian advisor on DOD cyber, space, and countering WMD policy.

Question. The Deputy Secretary of Defense.

Answer. The Assistant Secretary of Defense for Homeland Defense provides support to the Deputy Secretary similar to that provided to the Secretary, as described above.

Question. The Under Secretary of Defense for Policy.

Answer. The Assistant Secretary of Defense for Homeland Defense functions under the authority, direction, and control of the USD(P) and provides the USD(P) with advice and support on homeland defense policy formulation, interagency deliberations, engagement with interagency interlocutors, and the Planning, Programming, Budgeting, and Execution (PPBE) processes and strategic reviews within the Department. In the future, the ASD's role will be expanded to include DOD cyber, space, and countering WMD policy matters.

Question. The Under Secretary of Defense for Intelligence.

Answer. Under the authority, direction, and control of the USD(P), the Assistant Secretary of Defense for Homeland Defense works closely with the Under Secretary of Defense for Intelligence (USD(I)) to achieve the Secretary of Defense's objectives, particularly the defense of the United States from attack upon its homeland.

Question. The Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict.

Answer. The Assistant Secretary of Defense for Homeland Defense works closely with the Assistant Secretary of Defense for Special Operations & Low-Intensity Conflict to provide the USD(P) and the Secretary of Defense with advice and recommendations on policy issues regarding combating terrorism within the United States and homeland defense policy oversight to ensure that the Secretary's guidance and decisions are implemented.

Question. The Assistant Secretary of Defense for International Security Affairs.

Answer. The Assistant Secretary of Defense for Homeland Defense works closely with the ASD(ISA) to provide the USD(P) and the Secretary of Defense with advice and recommendations on issues regarding emerging threats to the United States and homeland defense policy oversight to ensure that the Secretary's guidance and decisions are implemented.

Question. The Assistant Secretary of Defense for Reserve Affairs and the civilian officials of the Military Departments in charge of Reserve Affairs.

Answer. The Assistant Secretary of Defense for Homeland Defense works closely with the Assistant Secretary of Defense for Reserve Affairs and civilian officials of the Military Departments in charge of Reserve Affairs in the areas of DOD policy regarding the development, readiness, and employment of National Guard and other Reserve component forces within the United States, as well as homeland defense policy oversight to ensure that the Secretary of Defense's guidance and decisions are implemented properly.

Question. The Chief of the National Guard Bureau, and the Directors of the Army and Air National Guard.

Answer. The Assistant Secretary of Defense for Homeland Defense works closely with the Chief of the National Guard Bureau, and the Directors of the Army and Air National Guard, on the roles, capabilities, and readiness of the National Guard to support the homeland defense and civil support priorities and objectives of the Secretary of Defense.

Question. The Director of the Defense Intelligence Agency.

Answer. Under the authority, direction, and control of the USD(P), the Assistant Secretary of Defense for Homeland Defense works closely with—and provides advice on homeland defense, Defense Support of Civil Authorities, DOD cyber, space, and countering WMD policy to—the Director of the Defense Intelligence Agency to achieve the Secretary of Defense's objectives in defense of the United States.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff and the Joint Staff.

Answer. As the principal military advisor to the Secretary of Defense, the President, the National Security Council, and the Homeland Security Council, the Chairman of the Joint Staff (CJCS) has a unique and critical military role. If confirmed as the Assistant Secretary of Defense for Homeland Defense, I would work closely with the Chairman and Vice Chairman to support the efforts of the Secretary and Deputy Secretary, and to ensure that their military advice is taken into account in an appropriate manner.

Question. The Commander of U.S. Northern Command (NORTHCOM) and the North American Aerospace Defense Command.

Answer. The Assistant Secretary of Defense for Homeland Defense works closely with the Commander of the North American Aerospace Defense Command and NORTHCOM to support the efforts of the Secretary, Deputy Secretary, and USD(P), particularly in the areas of homeland defense, Defense Support of Civil Authorities strategy and policy, contingency planning, and policy oversight of operations.

Question. The Commander of U.S. Pacific Command (PACOM).

Answer. The Assistant Secretary of Defense for Homeland Defense works closely with the Commander of PACOM to support the efforts of the Secretary, Deputy Secretary, and USD(P), particularly in the areas of homeland defense and Defense Support of Civil Authorities strategy and policy, contingency planning, and policy oversight of operations.

At the direction of the USD(P) and in coordination with the CJCS, the Assistant Secretary of Defense for Homeland Defense works with the Commander of PACOM on a broad range of issues that affect strategy and policy for countering the proliferation of WMD, as well as for the space and cyberspace domains.

Question. The Commander of U.S. Strategic Command (STRATCOM).

Answer. At the direction of the USD(P) and in coordination with the CJCS, the Assistant Secretary of Defense for Homeland Defense works with the Commander of STRATCOM on a broad range of issues that affect strategy and policy for countering the proliferation of WMD, as well as for the space and cyberspace domains.

Question. The Commander of U.S. Cyber Command (CYBERCOM).

Answer. At the direction of the USD(P) and in coordination with the CJCS, the Assistant Secretary of Defense for Homeland Defense works with the Commander of CYBERCOM on a broad range of issues that affect the Department's activities in cyberspace. As I understand it, once duties that are currently performed by the Assistant Secretary of Defense for Global Security Affairs (OASD(GSA)) become part of the responsibilities of the Assistant Secretary of Defense for Homeland Defense, the Assistant Secretary of Defense for Homeland Defense would provide senior-level civilian oversight of CYBERCOM. If confirmed, I look forward to continuing to ensure that the relationship with CYBERCOM remains close and would facilitate coordination as the Department's role in the cyber domain evolves.

Question. The Director of the Defense Threat Reduction Agency (DTRA).

Answer. The Assistant Secretary of Defense for Homeland Defense, in coordination with the Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics, works closely with the Director of the DTRA, particularly regarding efforts in chemical, biological, radiological, and nuclear threat reduction and defense, counter-proliferation, and emergency response support and training. This close coordination is necessary to ensure that the Assistant Secretary of Defense for Homeland Defense is able to provide policy oversight and guidance to the DOD's Cooperative Threat Reduction Program, which is implemented by DTRA.

Question. The Assistant Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs.

Answer. The Assistant Secretary of Defense for Homeland Defense works closely with the Assistant Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs (ASD(NCB)) on DOD's chemical, biological, and nuclear defense pro-

grams as they relate to homeland defense, antiterrorism/force protection, and Defense Support of Civil Authorities.

Question. The Department of Homeland Security (DHS).

Answer. The Assistant Secretary of Defense for Homeland Defense (and my current office) has a close working relationship with the DHS due to the complementary responsibilities of homeland defense and homeland security missions and the need for a close, habituated, and well-exercised relationship for the rapid execution of Secretary of Defense-approved defense support of civil authorities missions as requested by the DHS and the Federal Emergency Management Agency (FEMA).

Question. The State Governors.

Answer. The Assistant Secretary of Defense for Homeland Defense serves as the principal DOD representative to State Governors on policy matters pertaining to homeland defense activities, Defense Support of Civil Authorities, and DOD security matters, including but not limited to: defense domestic consequence management; activities commonly referred to as mission assurance (Defense Critical Infrastructure Program, Defense Continuity Program, Defense Crisis Management); the alignment of homeland defense activities with counterterrorism and counternarcotics policy and programs; and DOD cyberspace activities, space policy, and WMD counterproliferation.

In 2010, the Secretary of Defense designated the Assistant Secretary of Defense for Homeland Defense as the Executive Director of the Council of Governors. If confirmed, I would, as Executive Director, be responsible for coordinating the activities of the Council.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the ASD for Homeland Defense?

Answer. If confirmed, my primary challenge and top priority would be to continue and improve the outstanding efforts DOD has devoted to protecting the homeland from a major terrorist attack. I would be particularly focused on preventing an attack using a weapon of mass destruction and on planning and preparing for the response to catastrophic incidents in the United States, including WMD.

One of the most pressing challenges that I would immediately face, if confirmed, once duties of OASD(GSA) are transferred to the Office of the Assistant Secretary of Defense for Homeland Defense, would be managing the Department's efforts to help eliminate Syria's chemical weapons.

I believe that DOD has a crucial role in planning for complex catastrophic incidents; thus, I would devote extensive attention to the Department's preparations for catastrophes like Super Storm Sandy.

If confirmed, I would also devote special attention to the challenge of building the cyberspace workforce, growing DOD's operational capabilities, and continuing to rationalize the complex funding streams that support cyberspace initiatives.

Question. If you are confirmed, what priorities and plans do you have for addressing these challenges?

Answer. If confirmed, I would maintain support for the key issues I outlined above by actively addressing them in key DOD and interagency processes, including the PPBE processes, strategic reviews inside the Department, and the Interagency Policy Committee (IPC) process.

Once duties that currently reside in OASD(GSA) become part of the responsibilities of the Assistant Secretary of Defense for Homeland Defense, I would address challenges in cyberspace initially by streamlining senior-level oversight of workforce, capabilities, and funding issues to improve efficiency throughout the Department for how the cyber force is organized, trained, and resourced.

I am committed to continuing my close working relationships with partners across DOD, with other departments and agencies throughout the executive branch, and with Congress, to address whatever issues and concerns arise to implement the new policies and strategies.

Question. What do you anticipate will be the most serious problems in the performance of the responsibilities of the ASD for Homeland Defense?

Answer. If confirmed, I would initially focus my efforts on the changes that will be made to the Office of the Assistant Secretary of Defense for Homeland Defense as a result of the reorganization of the Office of the USD(P) that Secretary Hagel announced last December. There are many synergies that will occur as a result of this reorganization and, if confirmed, I would ensure that we maximize the collective talents of the staff in the new Homeland Defense organization.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. If confirmed, and upon implementation of the reorganization of the Office of the USD(P), I would work with each Deputy Assistant Secretary of Defense (DASD) under the Assistant Secretary of Defense for Homeland Defense to identify the synergies between the homeland defense issues and cyberspace, space, and WMD policy issues and establish a unified vision for the organization.

COMBATING TERRORISM ROLES AND RESPONSIBILITIES

Question. Section 902 of the National Defense Authorization Act (NDAA) for Fiscal Year 2003, which established the position of Assistant Secretary of Defense for Homeland Defense, also transferred the responsibility for the “overall direction and supervision for policy, program planning and execution, and allocation and use of resources for the activities of the Department of Defense for combating terrorism” to the USD(P).

Please specify what combating terrorism activities will be under the jurisdiction of the Assistant Secretary of Defense for Homeland Defense, particularly domestic antiterrorism activities.

Answer. It is my understanding that the specific counterterrorism activities that reside under the Assistant Secretary of Defense for Homeland Defense include providing critical staff support to the Secretary of Defense regarding support requested by the Attorney General, or as directed by the President of the United States to combat domestic terrorism. Also, as I understand it, the Assistant Secretary of Defense for Homeland Defense advises the Secretary of Defense on all domestic consequence management matters.

Question. What DOD official or officials will be responsible for DOD combating terrorism activities not under the jurisdiction of the ASD for Homeland Defense?

Answer. The USD(P) has the overall lead for DOD combating terrorism policy oversight. If confirmed, I would work closely with the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict (ASD(SO/LIC)) and the Under Secretary of Defense for Intelligence (USD(I)) to achieve the Secretary of Defense’s objectives and proper alignment of DOD combating terrorism activities.

The geographic combatant commanders have tactical control (TACON) for Force Protection of all DOD personnel within their areas of responsibility, with the exception of DOD personnel for whom the chiefs of U.S. diplomatic missions have security responsibility. If confirmed, I would work closely with both the Combatant Commanders and the Department of State to ensure that all DOD personnel serving overseas, including those at U.S. missions and embassies, have appropriate anti-terrorism protection.

Question. What steps will you take to ensure that the Department’s efforts are focused and well-coordinated in this critical area of Homeland defense?

Answer. If confirmed, I would work closely with the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict and the Under Secretary of Defense for Intelligence to achieve the Secretary of Defense’s objectives in this critical area of Homeland defense.

I would also use DOD’s Mission Assurance Coordination Board, which the ASD for Homeland Defense leads, to ensure that the Department’s efforts are focused and coordinated on antiterrorism and force protection issues. DOD’s Mission Assurance Senior Steering Group integrates mission-related security issues of mutual interest with other executive committees and efforts within the Department.

DIFFERENCE BETWEEN HOMELAND DEFENSE AND HOMELAND SECURITY

Question. DOD is responsible for Homeland defense, and the DHS is responsible for Homeland security.

Please describe your understanding of the differences between the two different missions.

Answer. DOD is responsible for the protection of U.S. sovereignty, territory, population, and critical infrastructure against external threats and aggression, or other threats as directed by the President. The Department’s missions are executed to deter, defend against, and defeat those who threaten the United States.

DHS leads the Nation’s efforts to prepare for, protect against, respond to, recover from, and mitigate against the risk of terrorist acts, natural disasters, and other natural and manmade disasters. DHS also secures the Nation’s borders, ports, and airports; and ensures that the Federal Government works with States, localities, and the private sector as a partner in prevention, mitigation, and response.

As necessary, and consistent with the law, DOD provides support to DHS in the execution of its missions.

Question. Do you agree that DOD should not be responsible for Homeland security, but may serve in a supporting role to assist civilian Federal agencies, as directed by the President or Secretary of Defense?

Answer. Yes. In enacting the Homeland Security Act of 2002, Congress assigned responsibility to DHS for preventing terrorist attacks within the United States; reducing the vulnerability of the United States to terrorism; and minimizing the damage and assisting in the recovery from, terrorist attacks within the United States. As necessary, and consistent with the law, DOD provides support to DHS in the execution of its missions.

RELATIONSHIP WITH THE DEPARTMENT OF HOMELAND SECURITY

Question. The establishment of the DHS was one of the U.S. Government's largest cabinet-level reorganizations in the last 50 years. Despite this reorganization, DOD will continue to play an important role in providing Defense Support of Civil Authorities for Federal response to certain domestic incidents, as directed by the President or the Secretary of Defense.

Please describe your understanding of the relationship between DOD and DHS, particularly with respect to Defense Support of Civil Authorities and cyber security.

Answer. DOD has a strong, mutually supporting relationship with DHS that dates back to its inception. As I understand it, the preponderance of requests for assistance that the Department receives comes from one of DHS's operational components. Since the Office of the Assistant Secretary of Defense for Homeland Defense was created in 2003, FEMA has submitted to DOD more requests for assistance than all other sources combined. The Secret Service, Customs and Border Protection, and the Coast Guard have also made multiple requests each year.

In the area of cyber security, DOD provides personnel, equipment, and facilities in order to increase interdepartmental collaboration in strategic planning for the Nation's cybersecurity, mutual support for cybersecurity capabilities development, and synchronization of current operational cybersecurity mission activities. The formal Memorandum of Agreement between the Departments focuses national cybersecurity efforts to increase the overall capacity and capability of both DHS's homeland security and DOD's national defense missions, while providing integral protection for privacy, civil rights, and civil liberties.

Question. If confirmed, what role do you expect to play in the direction and coordination of DOD activities with DHS and its component elements?

Answer. If confirmed, I would build on the strong professional relationships that have been developed between the Departments. I would represent DOD in senior-level discussions with colleagues from DHS and its operational components. I understand that key areas of collaboration and coordination include working with the U.S. Coast Guard on maritime domain awareness, Customs and Border Protection on support to border security, the Secret Service on Presidential and dignitary protection, and DHS's Office of Cyber Security and Communications on national cyber policy.

DEFENSE SUPPORT OF CIVIL AUTHORITIES

Question. The ASD for Homeland Defense has primary responsibility for Defense Support of Civil Authorities (DSCA), particularly support to the DHS and its components, for response to natural and manmade disasters in the United States.

Please describe your general understanding of the roles and responsibilities of DOD in providing DSCA, and the roles and responsibilities of other Federal agencies in responding to domestic disasters.

Answer. Defense Support of Civil Authorities is one of the primary missions of the Department as articulated in the latest National Defense Strategy, "Sustaining U.S. Global Leadership: Priorities for 21st Century Defense," dated January 2012. When directed by the President or approved by the Secretary of Defense, the Department has robust capabilities and capacity that can be used to support civilian authorities at the Federal, State, and local levels.

For domestic emergencies and disasters, FEMA has statutory responsibility to coordinate the Federal support to State, tribal, and local authorities. When requested by FEMA, or when directed by the President or Secretary of Defense, the vast capabilities of the Department can be used to supplement FEMA support to local, tribal, State, and other Federal departments and agencies.

Question. Under current law, when DOD provides Defense Support to Civil Authorities, what are the responsibilities of other Federal agencies for paying for or reimbursing the Department for such support?

Answer. During an emergency or disaster, when the Department is asked to support FEMA under the terms of the Robert T. Stafford Disaster Relief and Emer-

gency Assistance Act, the Department is reimbursed by FEMA for civilian overtime, temporary duty expenses, and the operational and maintenance costs of providing the support. DOD is not reimbursed for the pay and allowances of personnel providing the support.

Under the Presidential Protection Assistance Act of 1976, when the Department provides temporary support to the Secret Service that is directly related to the protection of the President or Vice President, the support is provided on a non-reimbursable basis. When support is provided to the Secret Service for other protected persons, DOD is reimbursed for its expenses.

When we support other Federal departments and agencies under the Economy Act (title 31, U.S.C., section 1535), DOD is reimbursed for all of our support costs, including the pay and allowances of the personnel providing the support.

DEFENSE CRITICAL INFRASTRUCTURE PROGRAM

Question. The ASD for Homeland Defense is responsible for overseeing DOD efforts and programs to protect defense critical infrastructure in the United States.

If confirmed, what plans, approaches, and priorities would you have for ensuring that the Defense Critical Infrastructure Program is functioning properly?

Answer. I am familiar with the importance of the DCIP and worked closely with this program while leading the Cyber Policy office. If confirmed, one of my priorities would be to integrate this program further with other risk management programs across the Department to ensure DOD's ability to execute missions. I would review such plans, approaches, and priorities, and make recommendations to the USD(P) to ensure that adequate measures are taken for the protection of defense critical infrastructure in an all-hazards environment to ensure mission execution.

INSTALLATION SECURITY

Question. The security of U.S. military installations—both at home and abroad—has been a longstanding priority for the Senate Armed Services Committee.

If confirmed, what would be your priorities for ensuring an adequate level of security for military installations in the United States?

Answer. If confirmed, I would work to ensure the effectiveness of DOD antiterrorism and protection policies in detecting, deterring, and responding to threats directed at DOD installations, facilities, and personnel, including their families. I would also work to ensure that adequate resources are provided to execute these policies and that DOD is working closely with its Federal, State, local, and tribal partners in establishing a mutually supportive protective posture inside and outside DOD installations and facilities.

Although the Under Secretary of Defense for Intelligence is the principal staff assistant for physical security, if confirmed, I would support an antiterrorism approach to physical security, focused on risk mitigation, which defends in-depth using technology and manpower to reduce risk and mitigate potential threats. In addition, I would encourage DOD components to share access control information and continuously vet individuals against U.S. criminal and terrorist databases. Moreover, I would help to ensure that antiterrorism policy is consistent with DOD physical security and installation emergency management policy, as part of the overall DOD Mission Assurance effort.

DEFENSE CONTINUITY AND MISSION ASSURANCE

Question. The ASD for Homeland Defense has primary responsibility for the Defense Continuity Program and for DOD Mission Assurance in the United States.

What is your understanding of the roles and responsibilities of the ASD for Homeland Defense with respect to the Defense Continuity Program and Mission Assurance?

Answer. It is imperative that the Department has the ability to provide senior leaders a clear understanding of risks to mission accomplishment and that we possess the tools and processes needed to develop effective options to reduce associated risks. Defense Continuity and Mission Assurance provide this important capability to ensure resiliency and readiness.

Under the authority, direction, and control of the USD(P), the Assistant Secretary of Defense for Homeland Defense has two major responsibilities for the Defense Continuity Program. The first is to develop, coordinate, and oversee implementation of Defense continuity policy (which includes activities supporting continuity of operations, continuity of government, and enduring constitutional government). The second is to develop and oversee a comprehensive continuity program, including continuity plans to support the Secretary, the Deputy Secretary, and their senior and

supporting staffs, and the DOD components in coordination with the Chairman of the Joint Chiefs of Staff.

Question. If confirmed, what would be your priorities for accomplishing these important missions?

Answer. If confirmed, one of my mission assurance priorities would be to review how DOD prioritizes risk mitigation efforts to eliminate unnecessary redundancies, achieve closer integration of key activities, and more effectively inform the resourcing of existing programs and future investments related to mission assurance.

If confirmed, one of my Defense Continuity Program priorities would be to continue modernization of selected DOD continuity capabilities to improve readiness and resilience while incorporating operational efficiencies.

CBRN CONSEQUENCE MANAGEMENT ENTERPRISE

Question. Among the specialized capabilities that the Defense Department can provide to civil authorities are the Chemical, Biological, Radiological, and Nuclear (CBRN) consequence management response forces. These comprise a mix of National Guard and Active component forces and units, both large and small.

Please describe your understanding of the composition and role of the DOD CBRN consequence management enterprise, the circumstances under which they could be used, and the role of National Guard capabilities in responding to both state and Federal CBRN incidents.

Answer. The consequence management enterprise is composed of approximately 18,500 Active and Reserve component forces on alert to support civilian authorities in rapidly responding to mitigate the consequences of a domestic CBRN incident (e.g., nuclear plant, chemical facility, or biological attack).

Consequence management enterprise capabilities reside in the Active components and Reserve components, including National Guard forces under State command and control (some of which are DOD-funded). Maintaining capabilities in the National Guard better enables a rapid response in support of local and State responders.

Each State and territory hosts at least one National Guard Weapons of Mass Destruction-Civil Support Team, and there are larger, regionally positioned National Guard forces, including CBRN Enhanced Force Packages and Homeland Response Forces, all prepared to provide immediate response capabilities, including casualty search and extraction, medical triage, and decontamination.

Question. If confirmed, what would be your role with regard to the oversight, training, certification, coordination, and employment of the Defense Department's CBRN consequence management response forces?

Answer. As I understand it, elements of the CBRN force participate in ambitious training, standardization, and evaluation programs. If confirmed, I would work closely with NORTHCOM and the National Guard Bureau to ensure that DOD's consequence management forces maintain their full operational capability.

CYBER SECURITY

Question. You are currently the DASD for Cyber Policy, and have experience working with the DHS and other Federal agencies that have domestic cyber security responsibilities. The planned reorganization of the Office of the USD(P) envisions the ASD for Homeland Defense having primary responsibility for DOD cyber security policy.

What is your understanding of the roles and responsibilities of the DOD for cyber security, and how do they compare to the roles and responsibilities of the DHS?

Answer. Ensuring the Nation's cybersecurity is a shared responsibility across the U.S. Government. DHS is the lead Federal department responsible for national protection against, mitigation of, and recovery from domestic cybersecurity incidents, for which both DOJ and DOD provide support. DHS is further responsible for the security of unclassified Federal civilian systems. DOJ is responsible for the investigation, attribution, disruption, and prosecution of cyber crimes outside of military jurisdiction. All three Departments share cybersecurity information with each other, and each coordinates with public, private, and international partners.

DOD is responsible for defending the Nation from attack in all domains, including cyberspace. As such, DOD plans, coordinates, and conducts cyberspace operations to operate and defend DOD critical infrastructure and military systems. When directed, DOD can conduct cyberspace operations to defend the Nation and defend and enable military actions in all domains. Upon request, DOD may also assist in providing Federal support to the private sector and State and local governments.

Question. Given that cyber threats can be inherently global in nature, and that cyber security is not a mission limited to the Homeland, how do you view the relationship of cyber security to homeland defense?

Answer. Homeland defense includes the protection of U.S. sovereignty, territory, domestic population, and defense critical infrastructure against external threats and aggression, or against other threats as directed by the President. DOD is responsible for homeland defense. As with threats to the United States, our allies and partners, and our interests in other domains, DOD has the mission to defend the Nation in cyberspace. Because many cybersecurity threats allow would-be adversaries to attack the Nation from overseas, I believe cybersecurity is a key part of homeland defense. Of course, the Department must continue to work with other Federal departments and agencies, the private sector, and international partners to ensure the Department can carry out its assigned missions in cyberspace as well as in other domains.

SUPERVISION AND MANAGEMENT OF THE CYBER MISSION

Question. The NDAA for Fiscal Year 2014 requires the Secretary of Defense to appoint a Senate-confirmed official from the Office of the USD(P) to act as the principal cyber advisor to the Secretary. This official must be responsible for overall supervision of cyber activities, including policy and operational considerations, resources, personnel, and acquisition and technology. This official also must assemble a small cross-functional team to integrate cyber expertise across the Department to enable sound decisions while leaving execution of decisions to existing organizations and officials.

The description of the duties of the office to which you have been nominated provided to the committee does not mention these responsibilities and authorities.

Has the position to which you have been nominated been designated as the principal cyber advisor to the Secretary? If not, which position has been so designated?

Answer. At this time, the Secretary has not formally designated his principal cyber advisor. However, along with many colleagues throughout the Department, I am involved in deliberations that have studied how best to implement this legislation. Once the reorganization of the Office of the USD(P) is complete, the Assistant Secretary of Defense for Homeland Defense will be responsible for cyber policy matters.

Question. How does DOD intend to implement the NDAA legislation? As the incumbent Deputy Assistant Secretary for Cyber in USD(P), have you taken any actions to begin implementation?

Answer. Yes, as Deputy Assistant Secretary, I have initiated a Department-wide process to develop options for implementation of the legislation, but the Secretary has not yet made any formal decisions. The opportunity provided by this legislation to streamline oversight of cyber policy within DOD is crucial, so we want to ensure implementation reflects long-term goals for the Department in cyberspace, as well as short-term needs for effective organization and management. We remain mindful of the guidance from the committee contained in the Joint Explanatory Statement that accompanied the legislation.

INFRASTRUCTURE FOR U.S. CYBER COMMAND

Question. The NDAA for Fiscal Year 2014 requires the Secretary of Defense to provide CYBERCOM with infrastructure to enable CYBERCOM to independently access global networks to conduct military operations. Congress intends for CYBERCOM to have infrastructure for conducting operations that has attributes that are different from those of the intelligence community, including the ability to scale rapidly, to be disposable, and to cause minimal impacts on our capabilities if discovered by adversaries.

What are your views on this requirement?

Answer. I believe that it is essential for CYBERCOM to have infrastructure that allows it to accomplish military operations that are unique and distinguishable from the Intelligence Community. Over the past several months, the Department made significant strides in developing plans for diverse, highly-scalable, easily deployable, and disposable platforms, available on demand for the Cyber Mission Force to carry out its missions.

Question. What is the Department's plan for complying with the legislation?

Answer. DOD has already made significant progress toward achieving this 2014 NDAA requirement. In October 2013, the Deputy Secretary of Defense tasked CYBERCOM to create a strategy for determining the right mix and number of diverse platforms specifically for use by the Cyber Mission Force. These platforms will provide diversity from the intelligence platform, are able to scale quickly to address

specific requirements, and, because they do not need to be overly sophisticated, can be inexpensive to build and deploy.

Question. Do you believe DOD can implement the legislative direction in an effective and affordable manner?

Answer. Yes. DOD has already taken large strides toward achieving this 2014 NDAA requirement.

Question. Do you believe this can be implemented in a way that is not redundant or duplicative of existing infrastructure?

Answer. It is fiscally prudent for DOD to leverage all existing capabilities, which is why CYBERCOM is working with the National Security Agency (NSA) to ensure there are not duplicative efforts. To ensure the intelligence community can execute its missions free of fear from being exposed by military actions, a CYBERCOM-dedicated infrastructure on demand is not only reasonable, it is mission critical.

CYBERCOM is creating a unified architecture plan to ensure there are not redundant efforts, find ways to leverage previous investments, and ensure the Cyber Mission Force has the infrastructure it needs to carry out its missions. In my current position, I would be happy to provide additional detail about anything related to the "diverse platform" plan in a classified setting at a later time.

DEVELOPMENT OF CYBER OFFICER CORPS

Question. In a forthcoming article, the J3 of CYBERCOM, Major General Brett Williams, argues that: "We have a pressing need to develop cyberspace operators who are credible and effective in the J3 and J5, within both the Joint Staff (JS) and the Combatant Commands (CCMD). Just for emphasis, that is the J3 and J5, not just the J2 and J6; and at all of the CCMDs, not just CYBERCOM . . . Joint staffs consist of what we typically think of as operators, members of the combat arms who are educated, trained and experienced in operations. Cyberspace expertise usually comes from people with intelligence, communications, or cryptology backgrounds; career fields typically categorized as support forces. If we are going to treat operations in cyberspace like operations in the other domains, the services must commit to unique career fields for cyberspace . . . Cyberspace, like the other domains, requires officers who are developed across their careers in a way that positions them to lead at senior levels in both command and staff. Cyberspace officers should spend their first 10 years becoming tactically proficient in all aspects of cyberspace operations, complete service and joint military education, serve on joint staffs, command in their area of operational specialty and do all of the other things necessary to produce general and flag officers whose native domain is cyberspace."

What are your views about whether cyber officer career development should be distinct from both intelligence and communications officer development?

Answer. I believe, just like in other areas of combat arms, DOD needs to develop its enlisted, officer, and civilian force from a wide variety of career fields, including but not limited to the intelligence and communications communities.

Question. Is it advisable to develop cyberspace officers as we do other combat arms or line officers? Why or why not?

Answer. Yes. I believe cyber officers, as well as our enlisted forces and civilians should have well-defined career paths focused on operations. Over the past 18 months, the Services have invested extensive attention toward growing our force, and developed plans to recruit and retain our most highly-skilled enlisted and officer forces in the cyberspace operations workforce. Just as we do for other unique military career fields including pilots, cyberspace operators should receive certain incentives to remain in the field. If confirmed, I will continue to work with the Services for cyberspace operations military and civilian forces to be competitive, in both rank and position, with those whose operational focuses have been the other domains.

ALIGNMENT OF MILITARY CYBER OPERATIONS WITH CYBER INTELLIGENCE COLLECTION

Question. For the most part, the military service cyber organizations have been formed from the service cryptologic elements, and in general cyber warfare operations have been regarded as an extension of signal intelligence operations. More recently, however, there is a growing perception that military cyber operations, and the tools and techniques employed in them, should be different from those employed in intelligence operations in cyberspace.

Do you think that, as CYBERCOM matures and as cyber military art develops, military cyber operations and cyber intelligence operations will diverge?

Answer. Because the type of targets for military operations may be different than those targets for intelligence operations, I am inclined to think that these operations

are likely to diverge in the future. However, a small subset of targets may remain common, such as foreign cyber adversaries.

Question. In the long term, what are the pros and cons of treating the services' cyber organizations and the service cryptologic elements as distinct entities?

Answer. Both communities play vital roles within the Services. An important benefit of the distinction is that cyber organizations will tend to have a more explicit focus on warfighting, while cryptologic elements are likely to focus more on their core intelligence-related competencies. However, one drawback of over-emphasizing this distinction would be to neglect the important nexus between warfighting and intelligence in the conduct of cyber operations. If confirmed, I would be sure to continue assessing the cyber force model in light of this distinction as that model evolves.

Question. Would you expect that military cyber operations personnel assigned to CYBERCOM units will continue to be funded mainly in the intelligence budget and compete with intelligence priorities?

Answer. If confirmed, I will likely conduct an assessment to determine the optimal methods to ensure appropriate funding for CYBERCOM personnel.

RANGE SUPPORT FOR CYBER COMMAND

Question. The NDAA for Fiscal Year 2014 included a provision requiring the Secretary of Defense to ensure that there are adequate range capabilities for training and exercising offensive cyber forces in operations that are very different from cyber intelligence operations. The committee understands that the community responsible for planning and managing cyber range capabilities has developed a plan for acquiring the range capabilities that CYBERCOM requires, but has not programmed funding to implement the plan.

From your position as DASD for Cyber Policy, how do you expect the Department will implement the NDAA legislation?

Answer. The Department is working to establish the DOD Enterprise Cyber Range Environment (DECRE) governance body to oversee Cyber Range issues. DECRE is currently working on establishing a persistent test and training environment intended to meet the demand of the Cyber Mission Force teams that are being fielded by providing on demand environments for training in both offensive and defensive cyberspace operations. The Department is also conducting an assessment to determine if we have the required cyber range capacity and capability to support Cyber Mission Force training. This assessment is expected to be completed by October 2014.

Question. What is your understanding of CYBERCOM's range requirements for individual and unit training, and exercises, and the capabilities and capacity of the joint cyber range infrastructure to satisfy those requirements?

Answer. It is my understanding that the persistent test and training environment is being developed based on requirements from CYBERCOM's Exercise CYBER FLAG, and represents our current best estimate of what cyber range capabilities are needed to train the Cyber Mission Force teams. Additionally, we are assessing the capacity needed to train all of the cyber forces as they are formed and will include requirements for large-scale exercises such as Cyber Flag, as well as National Mission Force Headquarters and Joint Force Headquarters-Cyber training, certification, and exercises.

INFORMATION ASSURANCE

Question. The President's Review Group on Intelligence and Communications Technologies recommended that the Information Assurance Directorate (IAD) of the NSA be separated from NSA and subordinated to the cyber policy component of the DOD. The Senate version of the NDAA for Fiscal Year 2014 included a provision that would transfer supervision of the IAD from the Under Secretary of Defense for Intelligence (USD(I)) to the Chief Information Officer (CIO). The committee's rationale for this transfer is that the IAD conducts cyber protection-related duties, which fall under the responsibility of the CIO, not the USD(I).

As the position to which you have been nominated is presumed to become the principal cyber advisor to the Secretary of Defense, what are your views on the pros and cons of these proposals?

Answer. I support the President's decision to maintain the IAD within NSA, as the synergy between information assurance and the signals intelligence missions should be maintained. Altering civilian relationships for oversight of the information assurance mission might risk creating divergent chains of oversight that are not synchronized with operational chains of command. However, it is undeniable that the CIO has a critical role to play as well. The interaction between CIO, USD(I),

and IAD is an important one, and it must be closely monitored to ensure that the current oversight structure is functioning effectively.

DUAL HATTING OF DIRECTOR OF THE NATIONAL SECURITY AGENCY AND THE
COMMANDER, U.S. CYBER COMMAND

Question. The President's Review Group on Intelligence and Communications Technologies recommended that the positions of Director of the NSA and the Commander of CYBERCOM be separated and that the President appoint a civilian to be Director of NSA. The President decided against separating these two positions at this time. According to press reports, the President based his decision, in part, on his perception that CYBERCOM was not yet mature enough to stand on its own without a very strong institutional connection to NSA.

Do you support the President's decision?

Answer. I support the President's decision against separating these two positions at this time.

Question. If CYBERCOM remains too dependent on NSA for their leadership to be bifurcated, does it follow that CYBERCOM is not mature enough to become a full unified command?

Answer. When CYBERCOM was established in 2009, the dual-hat arrangement allowed for the unification of leadership for organizations responsible for defending the Nation in cyberspace and for signals intelligence. We continue to do extensive analysis of whether CYBERCOM should remain a subunified command under STRATCOM or be unified to a full combatant command. We will continue to remain in close consultation with Congress if the Department believes the current arrangement should change to ensure CYBERCOM remains operationally effective. Regardless of CYBERCOM's potential status as a command in the future, if confirmed I will work with my colleagues throughout the Department to ensure CYBERCOM has the resources it needs to continue to mature.

Question. To the extent that military operations in cyberspace should evolve to be different and distinct from intelligence collection in cyberspace, is it possible that NSA's strong influence over CYBERCOM's development could hinder as well as support the proper maturation of the Command? What are your views on this issue?

Answer. In the coming years, I expect the Department will continue to closely assess CYBERCOM's maturation and its ability to execute its missions. This includes ensuring that CYBERCOM has control over those assets its needs to be successful. Given NSA's status as a combat support agency, I anticipate NSA will continue to be supportive of CYBERCOM's maturation. If confirmed, I will look forward to working with colleagues across the Department to ensure CYBERCOM has the support it needs.

Question. As NSA is a combat support defense agency subject to the authority, direction, and control of the Secretary of Defense, and NSA is subordinate to the Secretary of Defense in his capacity as the President's executive agent for signals intelligence under Executive Order 12333, is there any reason to expect that NSA's support for CYBERCOM and the other combatant commands would be questionable if the dual-hat arrangement were terminated?

Answer. I am confident that NSA will continue to provide mission-critical support to CYBERCOM and other combatant commands, regardless of the status of the dual-hat arrangement.

SUPPORT FOR THE COMBATANT COMMANDS

Question. The Secretary of Defense has ordered the military services and CYBERCOM to quickly develop operational military cyber teams to support the missions of defending the Nation against cyber attacks, supporting the war plans of the geographic and functional combatant commands, and defending DOD networks against attacks. The mission teams that will support the combatant commanders ultimately will be under the operational control of those commanders. The committee understands that, to date, the combatant commands have not committed to creating cyber component commands to direct the operations of those units.

In your opinion, can the combatant commanders properly direct the operations of assigned cyber mission teams without a component command element?

Answer. As the Department builds out the Cyber Mission Force and its teams, we will continue to evaluate and evolve command and control to ensure cyber capabilities are integrated and responsive to the combatant command operations.

Question. Have cyber operations been integrated into the operations plans of the combatant commands?

Answer. Yes, cyber capabilities are being integrated into planning the same as other capabilities from the physical domains. This is an area, however, in which the Department must continue to make steady progress.

Question. How would you assess the progress of the Department in developing cyber capabilities for the use of these command cyber teams to support the specific needs of the combatant commands?

Answer. Equipping the Cyber Mission Force teams is a work in progress. In addition to presenting trained personnel for the Cyber Mission Force, the Services are responsible for presenting real capability for the force. The Combat Mission Teams (CMTs), in particular, have unique requirements for full-spectrum military capabilities and the Services must continue to invest in capabilities to achieve cyber effects against DOD priority targets.

Question. What priority has been assigned to the development of capabilities for national versus command cyber mission teams?

Answer. Though the Cyber Mission Force build is still in its infancy, today, we have National Mission Teams (NMTs) and CMTs with fully trained personnel and equipped with sufficient technical capabilities needed to conduct their missions particularly against threats in the PACOM and CENTCOM areas of responsibility, based on the threat. The NMTs and CMTs have very different missions and therefore require very different sets of capabilities. As the force build continues, the Department will continue to develop capabilities for the NMTs, the CMTs, as well as the Cyber Protection Teams, since defending our networks is our top priority.

Question. Who would you say is responsible for developing cyber capabilities to support joint task forces and lower echelons?

Answer. Just as they man, train and equip for the combatant commanders in other domains, the Services will continue to be responsible for equipping CYBERCOM and the Combatant Commanders with cyber capabilities to conduct their missions.

Question. Is it your view that CYBERCOM forces would control all cyber operations regardless of target type and battlefield situation, including where cyber and traditional electronic warfare are intertwined?

Answer. I expect that control and employment of cyber operations will be in accordance with a model that will enable effective control and synchronization of cyberspace operations while balancing regional and global priorities. In regional situations where a combatant command is in the lead, CYBERCOM will provide direct support to ensure its cyber capabilities mesh with the supported command's operations. In a global situation, STRATCOM will be the supported command and, as STRATCOM's operational lead for cyber, CYBERCOM will direct the operations of regional units to ensure they are in synch with global priorities.

DEVELOPMENT OF CYBER CAPABILITIES

Question. CYBERCOM has depended heavily to date on NSA for technology, equipment, capabilities, concepts of operations, and tactics, techniques, and procedures.

Are you satisfied that DOD is organized and resourced to provide a broad base of innovation and capability development in the cyber domain that includes the military service's research and development organizations, defense agencies such as the Defense Advanced Research Projects Agency, and the private sector?

Answer. While the Department has made much progress, more work certainly remains to ensure that DOD is organized and resourced to provide military-specific capabilities for the Cyber Mission Force. Combined, the Services and their dedicated research and development labs, Defense Advanced Research Projects Agency, federally-funded research and development centers, the defense industrial base, and the private sector all contribute greatly to providing real, viable cyber capability to the DOD. As the build of the Cyber Mission Force continues, CYBERCOM will continue to leverage the expertise of these organizations to build diverse capability to enable full-spectrum military operations.

In October 2013, the Department made a series of decisions to enforce a process to ensure there is no redundancy of effort, and that several DOD entities can use the same capability multiple times when possible to get more return on investment.

CYBER PERSONNEL

Question. The Military Services have already provided thousands of service-members to man cyber mission units assigned to CYBERCOM. These personnel are going through training provided by the NSA. CYBERCOM, working with the Services, NSA, and others, has developed position descriptions, roles, and skills, and

training programs. Over the next couple of years, the Services will be identifying thousands more positions for additional units before the current force goals are met.

What direction has DOD given to the military services regarding the quality and existing skill levels of the personnel they shall provide for the cyber mission forces?

Answer. The Services have some personnel with existing cyber skills. The Department is working to determine and grant, as appropriate, training equivalencies for these qualified personnel assigned to the cyber mission forces. For future personnel, the Services are applying screening criteria to ensure those entering training programs have the skills and aptitude to succeed. The Services are employing recruiting and retention mechanisms to facilitate the build plan for the cyber mission forces, including those specifically meeting CYBERCOM's needs.

Question. So far, does it appear that there is a satisfactory match between the skills and aptitudes of the personnel provided by the services and the training programs developed by CYBERCOM?

Answer. This has been a priority for DOD's senior leadership, and the subject of recent senior-level decision forums over the past year. As a result of guidance from the Deputy Secretary of Defense, each Service provided assessments of their ability to meet CYBERCOM training requirements, and the Joint Staff has been closely tracking progress across the range of readiness categories, including training. There has been significant progress by each Service in meeting the training goals, but because this is a multi-year effort, we don't expect to see full maturation across the Cyber Mission Force until fiscal year 2016.

Question. What direction has been given to the services regarding recruiting goals and priorities for individuals with skills and aptitudes relevant to the needs of CYBERCOM?

Answer. As a result of recent senior DOD decision management processes, each Service was given direction to prioritize the establishment of personnel management mechanisms to identify, recruit, retain, and provide incentivized career advancement paths for both military and civilian personnel with the type of high-end, advanced operational skills that CYBERCOM has identified within the Cyber Mission Force. There has been steady progress by each Service toward meeting this guidance, and this issue continues to be followed closely in monthly reporting by CYBERCOM to the Joint Staff. One of the more significant challenges in implementing the guidance has been in the civilian workforce, where DOD is looking at options that may require the assistance of Congress.

Question. Has the Department considered delegating personnel authorities to CYBERCOM that are similar to those that are exercised by U.S. Special Operations Command to ensure that the Services manage the careers of their servicemembers with cyber skills appropriately?

Answer. If confirmed, I would work with Congress, the Military Departments, and the Services to examine where the potential delegation of personnel authorities might be appropriate for consideration to maximize CYBERCOM's mission effectiveness as it evolves.

RELATIONSHIP WITH U.S. NORTHERN COMMAND

Question. NORTHCOM was established in October 2002 with the mission of conducting operations to deter, prevent, and defeat threats and aggression aimed at the United States, its territories, and interests within the Command's assigned area of responsibility; and, as directed by the President or Secretary of Defense, to provide military assistance to civil authorities, including consequence management operations.

If confirmed, how do you anticipate you would coordinate roles and responsibilities with the Commander of NORTHCOM?

Answer. If confirmed, I would expect to work closely with the Commander of NORTHCOM to support the efforts of the Secretary of Defense on the broad array of issues touching on homeland defense, Defense Support of Civil Authorities, theater strategy and policy, contingency planning, and policy oversight of operations.

Question. How do you anticipate that the Assistant Secretary of Defense for Homeland Defense and the Commander of NORTHCOM will coordinate with other Federal and State entities in planning for response to catastrophic events that might require Defense Department support?

Answer. If confirmed, I look forward to working closely with the Commander of NORTHCOM to ensure that DOD support to Federal and State entities in response to catastrophic events, if required, is provided in a timely and coordinated fashion. It is my understanding that this begins with DOD positioning itself to support civil authorities during disaster response activities by building its own resilience against cascading failures of critical infrastructure. Moreover, this effort continues, through

the Secretary's complex catastrophe initiative, to ensure that the Department is able to provide its civil support capabilities from all components in support of civil authorities, making defense support of civil authorities faster and more effective when delivering life-saving and life-sustaining requirements.

PARTNERSHIP WITH THE NATIONAL GUARD AND THE STATES

Question. DOD has an important partnership with the National Guard because it has both Federal and State responsibilities. The Department has worked with the Council of Governors to establish procedures to ensure unity of effort between military forces operating in Federal and state status, including the creation of "dual-status commanders."

Please summarize your understanding of how this unity of effort is maintained through the dual status commander arrangement, so that the authorities of the President and Secretary of Defense are preserved for Federal military forces, and the authorities of Governors are preserved for National Guard Forces acting in a State capacity.

Answer. As I understand it, a signed memorandum of agreement between a Governor and the Secretary of Defense provides the terms, responsibilities, and procedures for the use of a dual-status commander, including the procedures for preserving the separate and mutually exclusive Federal and State chains of command. These procedures are tested in annual exercises and used in real-world operations such as the response to Super Storm Sandy in 2012.

NATIONAL GUARD AND RESERVE ROLE IN HOMELAND DEFENSE

Question. The ASD for Homeland Defense has policy responsibility for the participation of National Guard units or personnel in Homeland defense activities, when the Secretary of Defense determines that such participation is necessary and appropriate.

What role do you believe the National Guard and Reserves should have in Homeland defense, and how does their role relate to the role of the Active component?

Answer. I believe that Homeland defense is viewed as a Total Force Mission. The role of the National Guard and non-National Guard Reserve Forces is to integrate with Active component forces seamlessly to accomplish U.S. objectives. National Guard and non-National Guard Reserve units are organized, trained, and equipped to succeed in accomplishing assigned missions.

Question. What role do you believe the National Guard and Reserves should have in providing civil support assistance to other Federal agencies, and how does their role relate to the role of the Active component?

Answer. Civil Support—or "Defense Support of Civil Authorities" as DOD terms it—is a Total Force responsibility. All of the appropriate resources of the Department, including those of the various Defense Agencies, are integrated in support of other Federal departments and agencies for specific missions. With the recent authority provided in the NDAA for Fiscal Year 2012, non-National Guard Reserve Forces may now be activated to provide assistance to respond to Federal requests during responses to major disasters and emergencies.

USE OF ACTIVE DUTY AND RESERVE PERSONNEL FOR HOMELAND DEFENSE/POSSE COMITATUS

Question. What is your understanding of the legal issues and authority associated with using National Guard and Reserve personnel in security roles within the United States?

Answer. Under the authority of State Governors, in State Active Duty status or duty status under title 32, the National Guard is not subject to the restrictions imposed by the Posse Comitatus Act. However, when ordered to Active Duty, National Guard and non-National Guard Reserve Forces are subject to the restrictions imposed by the Posse Comitatus Act and DOD policy.

The National Guard, as a State militia, under the command and control of respective Governors and Adjutants General, may be used for any security role authorized under State law. When the Reserve components (including the National Guard) are mobilized under title 10, and placed under Federal command and control, they are subject to the same restrictions as other Federal military forces.

Question. In your opinion, does the Posse Comitatus Act (title 18 U.S.C. §1385) or chapter 18 of title 10, U.S.C. (which regulates the use of the Armed Forces in support of civilian law enforcement and related activities) require amendment to deal with the present homeland security situation?

Answer. No. I believe that current laws and policies governing DOD's role in support to civilian law enforcement-related activities are sufficient.

Question. Under what circumstances do you believe that it is appropriate for DOD to provide assistance to law enforcement authorities in response to a domestic terrorist event? What about a non-terrorist event?

Answer. As I understand it (under title 18, U.S.C., section 831), the U.S. Attorney General may request that the Secretary of Defense provide emergency assistance if an emergency situation exists in which civilian law enforcement personnel are not capable of enforcing the law to address certain types of threats involving nuclear materials, such as potential use of a nuclear or radiological weapon. This could be for either a domestic terrorist event or a non-terrorist event.

The Department does provide non-direct support to civilian law enforcement on a routine basis. As an example, DOD provides subject matter experts in the area of explosive ordnance disposal to detect and, if necessary, render safe an improvised explosive device that is of military origin. Further, DOD can provide logistics and training assistance to civilian law enforcement authorities.

In response to a domestic terrorist event, I believe it is appropriate to provide DOD assistance to law enforcement authorities under existing authorities when requested by the U.S. Attorney General or directed by the President of the United States.

For non-terrorist events, DOD does provide assistance to law enforcement authorities, consistent with the Posse Comitatus Act and other restrictions, to save human lives, mitigate human suffering, and prevent wide-spread property damage.

Question. If confirmed, what role do you expect to play in making such determinations and making such assistance available?

Answer. If confirmed, I would be the principal civilian advisor to the Secretary of Defense under the USD(P) on all matters related to Defense Support of Civilian Authorities. I expect that this would include support to civilian law enforcement agencies by DOD where appropriate. If confirmed, I would work with others in the Office of the Secretary of Defense, the Joint Staff, and heads of the DOD components and activities to facilitate informed decision-making by the Secretary of Defense.

POLICY TO COUNTER WEAPONS OF MASS DESTRUCTION

Question. The plan to reorganize the Office of the USD(P) envisions the ASD for Homeland Defense having primary policy and oversight responsibility for countering WMD, meaning nuclear, biological, and chemical weapons. This would be a new responsibility for the ASD for Homeland Defense.

Please describe your understanding of the programs and activities to counter WMD for which the ASD for Homeland Defense would have policy responsibility.

Answer. I understand that, in the future, the Assistant Secretary of Defense for Homeland Defense will be responsible for developing strategies and policies, and overseeing the execution of approved policies and programs, including chemical, biological, radiological, and nuclear (CBRN) defense; WMD and missile-related proliferation; and Cooperative Threat Reduction (CTR) program activities.

Question. What do you believe are the principal challenges in countering WMD and, if confirmed, what would be your priorities for DOD policy for countering WMD?

Answer. Preventing the proliferation or use of WMD by either state or terrorist actors is our principal challenge. The ability to respond to and mitigate WMD attacks remains essential, but our homeland, citizens, and interests are best protected by ensuring that these threats never fully materialize. I believe that by reducing incentives to proliferation, increasing the barriers to acquisition and use, and denying the effects of current and emerging WMD threats we can better protect our citizens and interests at home and abroad. If confirmed, I would prioritize DOD's efforts in these areas.

Question. If confirmed, what role do you expect to play in the creation of policy for, and oversight of, Defense Department programs to counter WMD, and how would you ensure effective policy coordination of the various DOD actors and programs to counter WMD?

Answer. If confirmed, my office would play a lead role in developing policies to prevent and counter WMD threats to our interests and citizens at home and abroad. This includes guiding Defense Department efforts to protect and defend our forces from such threats, bolstering the capabilities of allies and partners to deal with these challenges, ensuring appropriate support to civil authorities should these weapons threaten us at home, and developing the strategies, plans, and capabilities for DOD to prevent and mitigate these risks overseas. Countering WMD is a whole-of-government effort, and, if confirmed, I expect to partner with DOD, interagency,

and international partners to ensure that appropriate policy and oversight are in place to reduce these threats and protect our interests.

COOPERATIVE THREAT REDUCTION PROGRAM

Question. If confirmed, what will your role be in implementing and overseeing the CTR Program?

Answer. If confirmed, I would continue the role currently performed by the ASD for Global Security Affairs as that responsibility migrates to the Office of the Assistant Secretary of Defense for Homeland Defense. I would provide policy guidance to the director of the Defense Threat Reduction Agency for implementing the CTR Program and continue to coordinate with the ASD(NCB) on program implementation issues.

Question. If confirmed, what changes, if any, would you recommend to the CTR program, including changes in legislative authorities, programs, or funding?

Answer. My understanding is that the DOD CTR Program has had, for the most part, the authorities, programs, and funding needed to address emerging WMD threats appropriately. Most of the DOD CTR legislation has existed for about 20 years, and therefore, if confirmed, I would work with interagency partners and Congress to review the existing legislation to see if it requires updating.

Question. How do you envision the evolution of the program as it transitions away from Russia to countries outside the former Soviet Union?

Answer. WMD threats are global, and I envision that the CTR Program will continue to evolve to meet those threats. I understand that the CTR Program is focused on countering WMD terrorism threats. If confirmed, I would work to ensure that CTR is well-positioned to continue to address those threats while also responding to unique challenges such as those posed by chemical weapons stockpiles in Libya and Syria, in cooperation with U.S. Government and international partners.

CHEMICAL AND BIOLOGICAL DEFENSE

Question. One of the issue areas that will be placed under the Assistant Secretary of Defense for Homeland Defense is the Chemical and Biological Defense Program of the Defense Department.

What do you believe are the principal challenges in chemical and biological defense, and what would be your priorities for the DOD Chemical and Biological Defense Program?

Answer. As part of the Department's overall effort to counter WMD, the Office of the ASD/NCB manages the Chemical and Biological Defense (CBD) Program. I understand that the ASD for Homeland Defense would be responsible for development of policies to guide the program and would work to ensure close coordination between our offices. If confirmed, I would work to ensure that, given the constrained fiscal environment, the Department prioritizes capabilities that counter operationally significant risks, taking into consideration potential contributions from other partners in the U.S. Government or the international community.

Question. Do you believe the Chemical and Biological Defense Program should be closely coordinated with related efforts of the Defense Department's CTR program focused on reducing biological threats?

Answer. The President has highlighted the importance of countering biological threats, and my understanding is that both the CBD and CTR Programs strongly support this priority. I agree with these priorities, and if confirmed, would work to ensure awareness of and close coordination between the two Programs.

Question. Do you believe the Chemical and Biological Defense Program should be coordinated closely with the Department of Health and Human Services in their respective development of medical countermeasures against chemical, biological, and radiological hazards?

Answer. Yes, I believe that close coordination of the Department and HHS medical countermeasure efforts is required. I understand that both Departments are currently working together to ensure respective medical countermeasure efforts are transparent and mutually supportive, and if confirmed, I would continue this close coordination.

CHEMICAL DEMILITARIZATION

Question. DOD Directive 5160.05E states the DOD policy that "the Department of Defense shall be in full compliance" with the Chemical Weapons Convention (CWC) and the Biological Warfare Convention (BWC). In 2006, the Department announced that the United States would not meet even the extended deadline of April 2012 for destruction of its chemical weapons stockpile, as required under the CWC, and the United States does not expect to complete destruction until after 2020.

Do you agree that DOD and the U.S. Government should be in full compliance with the terms and obligations of the CWC and the BWC, including the deadline for destruction of the U.S. chemical weapons stockpile under the CWC?

Answer. I understand that in 2006 the United States informed the Organization for the Prohibition of Chemical Weapons (OPCW) that it did not expect to meet the 2012 CWC deadline for complete destruction of the U.S. chemical weapons stockpile. Since then, the United States has continued to follow a policy of transparency about the U.S. chemical weapons destruction program and has stressed U.S. efforts to complete chemical weapons destruction as safely and quickly as practicable. If confirmed, I would continue to support a policy of transparency and would support continued efforts to destroy the remainder of the U.S. chemical weapons stockpile as safely and quickly as practicable.

Question. If confirmed, will you work to ensure that the Department takes steps needed to minimize the time to complete destruction of the U.S. chemical weapons stockpile, without sacrificing safety or security, and that the Department requests the resources necessary to complete destruction as close to the deadline as practicable?

Answer. The Office of the USD(AT&L) and the Department of the Army continue to focus significant senior leadership attention on completing destruction of the U.S. chemical weapons stockpile as safely and quickly and practicable. If confirmed, I would work closely with these offices to ensure continued focus on meeting this objective.

PROLIFERATION SECURITY INITIATIVE

Question. The Proliferation Security Initiative (PSI) is an international effort to identify and interdict WMD and related materials.

If confirmed, would you recommend that the PSI program continue and, if so, do you believe that it should be modified in any way?

Answer. I support the PSI and, if confirmed, would work to implement President Obama's call to make PSI a more durable effort. PSI has led the way in building international consensus on the importance of countering proliferation-related shipments. I believe that PSI sends a strong deterrent message to proliferators, strengthens nonproliferation engagement with partners, and builds partner capacity to interdict illicit WMD-related shipments.

DEFENSE SPACE POLICY

Question. The plan to reorganize the Office of the USD(P) envisions the ASD for Homeland Defense having primary responsibility for DOD Space policy. This would be a new responsibility for the ASD for Homeland Defense.

Please describe your understanding of the space policy responsibilities intended for the ASD for Homeland Defense, and how those responsibilities would relate to cyber security policy responsibilities.

Answer. As I understand it, under the plan to reorganize the Office of the USD(P), the Space Policy functions will be overseen by a DASD responsible for Space and Cyberspace, who will report to the Assistant Secretary of Defense for Homeland Defense. In my previous experience as the DASD for Cyber Policy, I worked closely with the DASD for Space Policy and we reported to the same Assistant Secretary, so the reorganization would maintain the close alignment between these two offices. These days, cyber and space policy face similar challenges. If confirmed, I would continue the close collaboration between these two critical areas. I would also participate actively in the development and oversight of space policy and strategy for the Department, in the DOD space-related decisionmaking processes, and in the DOD PPBE processes to ensure space system architectures support our national security objectives effectively.

Question. If confirmed, what would be your priorities for DOD policy for space, and how would you ensure effective execution of DOD space policy?

Answer. If confirmed, I would place priority on U.S. space control capability and on increasing national security space resiliency against growing threats to space-based architectures. Both Presidential and DOD guidance directs the Department to retain counter-space capabilities to address the growing space capabilities of potential adversaries, including anti-satellite capabilities. Through partnerships with commercial suppliers, collaboration with international partners, and changes in our own architectures and operational tactics, we can improve the resiliency of our systems and strengthen strategic stability in space.

Question. If confirmed, what role will you play in establishing architectures for various space systems, such as those for communications and overhead persistent infrared?

Answer. If confirmed, I would participate actively in the development of space architectures and the PPBE processes of the Department to ensure space system architectures support our national security objectives effectively, including our National Security Space Strategy.

Question. If confirmed, what role will you play in developing a space protection strategy, and working with STRATCOM to implement that strategy, such as improving space situational awareness?

Answer. If confirmed, I would work closely with the Commander, STRATCOM, to ensure appropriate and effective strategies are in place to increase our space situational awareness and to ensure that critical space capabilities are resilient and redundant, in order to maintain the advantages provided by these capabilities. I believe that continually improving space situational awareness underpins our ability to operate safely in the increasingly congested and contested space environment and enables the protection of our space assets. In addition, if confirmed, I would look to partner with the Space Security and Defense Program and the efforts they have been undertaking to develop a space protection strategy.

Question. Over the course of the last several years there has been discussion about establishing international space rules of the road to deal with, mitigate, and reduce the generation of space debris.

What are your views on establishing space rules of the road?

Answer. Establishing non-legally binding norms for the responsible, peaceful, and safe use of space and preservation of the space environment is an important issue for all space-faring nations. Pragmatic guidelines, or rules of the road, could help avoid collisions and other debris-generating events, reduce radiofrequency interference, and strengthen safety, stability, sustainability, transparency, and security in the space domain. If confirmed, I would work to ensure that development of international norms strengthens safety and sustainability in space, consistent with U.S. national security interests.

SPACE POSTURE REVIEW

Question. If confirmed, what role will you play in overseeing and implementing the policies, strategies, and priorities established in the Space Posture Review?

Answer. If confirmed, I would support the USD(P) and the Secretary as they continue to implement the President's 2010 National Space Policy and the National Security Space Strategy, which included the Space Posture Review. I would help to develop and oversee implementation of DOD's space-related policies, and oversee implementation of strategy and plans related to space forces, systems, and activities in close coordination with other DOD officials, including by serving on the Defense Space Council.

TERRORIST THREAT TO THE HOMELAND

Question. In your view, what is the extent of the current threat to the Homeland of terrorist extremists both from outside the United States and from within the United States?

Answer. Based on my understanding of intelligence community judgments, there is no question that al Qaeda, its associates, affiliates, and adherents continue to maintain the intent to strike the United States, posing a persistent threat to the homeland. A relatively new phenomenon is the growth of homegrown violent extremists (HVE) who are motivated by al Qaeda ideology to conduct attacks in the homeland. The intelligence community assesses judges that the number one target of HVEs is DOD installations and facilities. Al Qaeda, its associates, affiliates, and adherents continue to produce English-language propaganda that inspires and encourages violent attacks, highlighting al Qaeda's de-centralized nature since there is no direct command and control over the plotting or conduct of this type of attack.

Question. How would you broadly characterize that threat—low, medium, or high?

Answer. I would characterize the threat as persistent. There are threat streams that at the time of receiving them run the range of threat from low to high. Al Qaeda, its associates, affiliates, and adherents publicly express and maintain the intent to attack the homeland, and they are constantly seeking the best capability to do so. If confirmed, I look forward to working closely with the Intelligence Community to help to prevent an attack against the United States.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information in a timely manner.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes. If confirmed, I would appear before the congressional defense committees or other appropriate committees on matters under the purview of the Assistant Secretary of Defense for Homeland Defense.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Homeland Defense?

Answer. Yes. If confirmed, I would appear and provide information to this committee, or its designated membership, on matters under the purview of the Assistant Secretary of Defense for Homeland Defense.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes. If confirmed, I agree to provide information to this committee and its staff on matters under the purview of the Assistant Secretary of Defense for Homeland Defense.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes. If confirmed, I would provide documents subject to appropriate and necessary security protection.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR KAY R. HAGAN

MODULAR AIRBORNE FIRE FIGHTING SYSTEM

1. Senator HAGAN. Mr. Rosenbach, I'm told by the North Carolina National Guard that the Deputy Assistant Secretary of Defense for Homeland Defense Integration and Defense Support of Civil Authorities, with the consent of the acting Assistant Secretary of Defense for Homeland Defense, has been trying for several years to change the authority under which the mission is conducted from its historic title 32 of the U.S. Code, to title 10 of the U.S. Code.

I asked the North Carolina National Guard about this. They tell me the mission as it has operated since its beginnings is not broken and does not require a fix. Further, they tell me title 32 affords them flexibility to quickly respond to a fire emergency, provides the maximum amount of benefits for their servicemembers and that all of the Modular Airborne Fire Fighting System (MAFFS) State National Guard commands—North Carolina, Wyoming, and California—along with the National Guard Bureau and even the U.S. Air Force, oppose this move and said as much following a study of the issue last year. If confirmed, would you continue to push this agenda over the objections of the States, the National Guard Bureau, and the others who have studied the issue?

Mr. ROSENBAACH. I am not very familiar with this issue, but, if confirmed, I would examine it fully with the States, the National Guard Bureau, the U.S. Air Force and Air Force Reserve, and others who have studied the issue. Further, I would work to ensure that MAFFS units have the maximum flexibility when responding to wildfires and saving U.S. lives and property. I can assure you that DOD support to wildland firefighting efforts would be one of my top priorities.

2. Senator HAGAN. Mr. Rosenbach, please tell me how this proposal improves America's ability to fight wildfires or save American lives and property.

Mr. ROSENBAACH. Please see answer #1 above.

QUESTIONS SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

CYBER SECURITY

3. Senator GILLIBRAND. Mr. Rosenbach, you currently serve as the Deputy Assistant Secretary of Defense for Cyber Policy, giving you a unique perspective on the cyber debate. What do you think are our two most important cyber needs for the next 5 years?

Mr. ROSENBACH. In my opinion, there are three cyber needs for the next 5 years that are most important to address: (1) for organizations across the U.S. Government and the private sector to invest in information systems that are more resilient, more difficult to attack, and easier to defend; (2) for the United States and its allies and partners to counter the proliferation of destructive malware; and (3) for Congress to pass legislation that will enhance information sharing between the U.S. Government and the private sector, among companies within the private sector, and between the private sector and the Government.

On the first point, U.S. companies and Government organizations have under-prioritized cybersecurity and network resilience in their business plans and investments. This leaves the Nation at risk. Although the trend has begun to change, over the next 5 years companies and organizations across the country, including the Department of Defense (DOD), need to increase their cybersecurity and resiliency investments significantly to mitigate the risk of intrusion and to recover from an operational disruption if a successful attack occurs.

On the second point, there is little international understanding regarding how to counter the proliferation of malware. Given the easily transferable nature of malicious computer code, I am concerned that destructive malware can easily be sold to dangerous actors. Working with our allies and partners, the United States should explore methods for keeping cyber weapons out of the wrong hands. Congress and the executive branch have both recognized this as an issue, and it is something that I am very focused on addressing.

On the last point, in the event of a cyber attack, the U.S. Government and the private sector must share situational awareness of the threat, and must be able to share information about the incident as quickly as possible. Threats in cyberspace emerge and spread rapidly, so more needs to be done to help companies and the government share information about specific threats in a timely manner.

4. Senator GILLIBRAND. Mr. Rosenbach, if confirmed, how will you incorporate cyber forces, especially in the National Guard, into our Homeland defense strategy?

Mr. ROSENBACH. The Department is currently undertaking a mission analysis to identify appropriate roles and missions for the National Guard and Reserve components in supporting DOD's cyber missions. In the Active component, we are developing National Mission Teams whose sole focus will be defending the U.S. Homeland from catastrophic cyber attacks. In addition, DOD, in partnership with the Department of Homeland Security, the Council of Governors, and the States, is developing an action plan for developing deeper ties to improve cybersecurity. I am confident that through these processes, as well as through U.S. Cyber Command's Cyber Guard exercises, the Department will develop a path to integrate cyber forces into our Homeland defense strategy.

5. Senator GILLIBRAND. Mr. Rosenbach, in your advance policy questions you said if confirmed, you would "devote special attention to the challenge of building the cyberspace workforce . . ." In your opinion, what are the challenges of building the cyberspace workforce?

Mr. ROSENBACH. I believe that a primary challenge to building the cyberspace workforce is retaining highly-skilled personnel. Last fall, the Deputy Secretary of Defense tasked the Military Departments and Services to create a plan to retain their most highly-skilled enlisted and officer forces. Each Service accounted for ways to incentivize these highly skilled individuals not only to stay in the Service, but to stay specifically in a cyber-focused career field. However, I believe this will continue to be an area to improve upon as the Department continues to build the Cyber Mission Force. If confirmed, I would work with the Military Departments and Services and other organizations throughout DOD to ensure that we recruit and retain a world-class civilian cyberspace workforce just as we recruit and retain well-qualified military personnel.

6. Senator GILLIBRAND. Mr. Rosenbach, what can Congress do to assist with building that workforce?

Mr. ROSENBACH. As we continue to grow our cyberspace cadre within the Department, if confirmed, I would work with Congress and the Military Departments and Services to identify any unique requirements that would warrant establishing alternative mechanisms, or that call for need special authorities, for attracting, recruiting, retaining, and sustaining a world-class cyberspace workforce.

7. Senator GILLIBRAND. Mr. Rosenbach, at some point in the future, the position you have been nominated for will include civilian oversight of U.S. Cyber Command

(CYBERCOM). How do you envision your role in this relationship with CYBERCOM?

Mr. ROSENBACH. If confirmed, I see my role as supporting the Secretary of Defense and Under Secretary of Defense for Policy in executing their statutory authorities for civilian oversight of CYBERCOM. In practical terms, I would engage in daily interaction with other Department offices, the Joint Staff, and CYBER's leadership to continue development of the Cyber Mission Force and associated capabilities, to mature processes and procedures for cyber operations, and to integrate cyber into joint operations across the Department. If confirmed, and if the Secretary of Defense designates the Assistant Secretary of Defense for Homeland Defense as the Principal Cyber Advisor, I would also develop the cross-functional team called for in the National Defense Authorization Act for Fiscal Year 2014 to support the Principal Cyber Advisor in streamlining oversight of cyber and to ensure we move forward in an integrated and organized fashion to support CYBERCOM's missions.

[The nomination reference of Mr. Eric Rosenbach follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 7, 2014.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Eric Rosenbach of Pennsylvania, to be an Assistant Secretary of Defense, vice Paul N. Stockton, resigned.

[The biographical sketch of Mr. Eric Rosenbach, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ERIC B. ROSENBACH

Education:

- Davidson College
 - 1991–1995
 - Bachelor of Arts
- Harvard Kennedy School
 - 2002–2004
 - Masters Public Policy
- Georgetown University Law School
 - 2004–2007
 - Juris Doctorate

Employment record:

- Fulbright Foundation, Sofia, Bulgaria
 - Fulbright Scholar
 - 08/1995–08/1996
- U.S. Army, Germany/Bosnia/Kosovo
 - Intelligence Officer
 - 09/1996–11/2000
- World Online/Tiscali Telecom, Frankfurt, Germany
 - Chief Information Security Officer
 - 11/2000–1/2002
- Booz Allen Hamilton, Washington, DC
 - Associate Consultant
 - 02/2002–02/2005
- Senate Select Committee on Intelligence, Washington, DC
 - Professional Staff Member
 - 02/2005–08/2007
- Harvard Kennedy School, Belfer Center for International Affairs, Cambridge, MA
 - Executive Director

- 08/2007–06/2010
Markle Foundation, Washington, DC
- Managing Director for National Security
- 06/2010–05/2011
Harvard Kennedy School, Cambridge, MA
- Adjunct Lecturer
- 09/2008–06/2011
Good Harbor Consulting, Washington, DC
- Principal
- 05/2011–09/2011
Department of Defense, Washington, DC
- Deputy Assistant Secretary of Defense for Cyber Policy
- 09/2011–Present

Honors and awards:

Military awards:

- Meritorious Service Medal, 2000. A military award presented to members of the U.S. Armed Forces who distinguished themselves by outstanding meritorious achievement or service to the United States.
- The Knowlton Award, 1999. The Knowlton Award recognizes individuals who have contributed significantly to the promotion of Army Military Intelligence in ways that stand out in the eyes of the recipients, their superiors, subordinates, and peers. These individuals must also demonstrate the highest standards of integrity and moral character, display an outstanding degree of professional competence, and serve the MI Corps with distinction.
- Distinguished Military Graduate, 1995. Presented to the most outstanding graduate of the Davidson College ROTC program.

Federal civilian awards: N/A.

Academic awards:

- Harvard Kennedy School Faculty Advisor of the Year, 2009. Presented each year to the faculty member selected by Kennedy School students as the best advisor.
- Fulbright Scholar, 1995–1996. The Fulbright U.S. Scholar Program sends distinguished American scholars to approximately 125 countries, where they lecture and/or conduct research in a wide variety of academic fields.

Other awards: N/A.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Mr. Eric Rosenbach in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Eric Brien Rosenbach.
2. **Position to which nominated:**
Assistant Secretary of Defense for Homeland Defense.
3. **Date of nomination:**
January 7, 2014.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
September 23, 1972; Colorado Springs, CO.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Cristina Alexandra Lopez-Casero.
7. **Names and ages of children:**
Sophia Marie Rosenbach, 6.
Maximillian Francisco Rosenbach, 3.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Davidson College, 8/1991–6/1995, BA granted 6/1995.
Harvard Kennedy School, 9/2002–6/2004, MPP granted 6/2004.
Georgetown University Law Center, 9/2004–12/2007, JD granted 6/2008.
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
Deputy Assistant Secretary of Defense for Cyber Policy, Department of Defense, Washington, DC, 9/2011–present.
Principal, Good Harbor Consulting, Washington, DC, 5/2011–9/2011.
Adjunct Lecturer, Harvard Kennedy School, Cambridge, MA, 9/2008–6/2011.
Managing Director for National Security, Markle Foundation, Washington, DC, 6/2010–5/2011.
Executive Director, Harvard Kennedy School, Belfer Center for International Affairs, 8/2007–6/2010.
Professional Staff, Senate Select Committee on Intelligence, Washington, DC, 2/2005–8/2007.
Associate Consultant, Booz Allen Hamilton, Washington, DC, 1/2002–2/2005.
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.
During my time at the Harvard Kennedy School I provided analysis for the Joint Staff Pakistan-Afghan Coordination Cell and the Director of National Intelligence.
11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Maryland Bar Association.
13. **Political affiliations and activities:**
 - (a) List all offices with a political party which you have held or any public office for which you have been a candidate.
None.
 - (b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.
None.
 - (c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.
\$100 - Juliette Kayyem for Governor of Massachusetts, 12/2013.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Fulbright Scholar, 1995–1996. The Fulbright U.S. Scholar Program sends distinguished American scholars to approximately 125 countries, where they lecture and/or conduct research in a wide variety of academic fields.

The Knowlton Award, 1999. The Knowlton Award recognizes individuals who have contributed significantly to the promotion of Army Military Intelligence in ways that stand out in the eyes of the recipients, their superiors, subordinates, and peers. These individuals must also demonstrate the highest standards of integrity and moral character, display an outstanding degree of professional competence, and serve the MI Corps with distinction.

Meritorious Service Medal, 2000. A military award presented to members of the U.S. Armed Forces who distinguished themselves by outstanding meritorious achievement or service to the United States.

Harvard Kennedy School Faculty Advisor of the Year, 2009.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Books:

“Find, Fix, Finish: Inside the Counterterrorism Campaigns That Killed Bin Laden and Devastated Al Qaeda” Public Affairs Books, 2011.

“Military Leadership: In Pursuit of Excellence” Westview Press, 2009.

“Confrontation or Collaboration? Congress and the Intelligence Community” Harvard Kennedy School, 2009.

“Trials By Fire: Counterterrorism and the Law” Harvard University, 2009.

“Defeating the Jihadists” Century Foundation Press, 2004.

Chapters:

“Securing Cyberspace: A New Domain for National Security” Aspen Institute Press, 2011.

“The New Find-Fix-Finish Doctrine” Joint Force Quarterly, 2011.

“The Incisive Fight: Recommendations for Improving Counterterrorism Intelligence” American Academy of Political Science. Volume 618, 2008.

Op-Eds:

“Afghan Security for Afghanistan” The Huffington Post: September 5, 2009.

“Pakistan Smart to Hit Taliban” Boston Globe: February 21, 2010.

“What Maliki’s Power Means for U.S.” The Boston Globe: July 24, 2009.

“China’s Cyber Warriors” Baltimore Sun; July 18, 2008.

“Real Intelligence Men Don’t Cry” Washington Post: May 28, 2008.

“Rethinking U.S. Foreign Policy” Globe and Mail: December 7, 2007.

“President Bush Reciting Bin Laden’s Script” The Huffington Post: November 2, 2007.

“After success in Bosnia, why failure in Iraq? Arrogance in the Pentagon” International Herald Tribune: September 4, 2004.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Event: Andreessen Horowitz, Software Eats DC, Technologies that will Change Government; Date: Thursday, May 9, 2013; 12:00–12:30; Topic/Description: Over the Horizon Challenges for Cybersecurity

Event: Georgetown International Engagement on Cyber; Date: April 10, 2013; Georgetown University; Topic/Description: Current International Cyber Affairs: Conflict or Consensus?

Event: AFCEA Cybersecurity Symposium 2013; Date: February 22, 2013; 09:00–09:35; Topic/Description: Combating the Proliferation of Destructive Malware

Event: FEDcyber.com Cyber Security Summit; Date: Nov 15, 2012, 08:10–09:00; Topic/Description: Addressing Cyber Workforce Challenges for a New Domain of Conflict

Event: SINET Workshop; Date: Thursday, October 25, 2012; 11:10–12:00; Topic/Description: “DOD, DHS, and the Private Sector: Defining Roles and Responsibilities and Improving Information Sharing”.

Event: Keynote at Minerva Project Conference; Date: September 13, 2012, 11:15–12:00; Topic/Description: “Theories of Power and Deterrence”.

Event: Panelist Discussion at RSA Conference; Date: February 2012; Topic/Description: The Roles and Responsibilities of Government in Cybersecurity.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ERIC ROSENBACH.

This 17th day of January, 2014.

[The nomination of Mr. Eric Rosenbach was reported to the Senate by Chairman Levin on March 26, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 18, 2014.]

**NOMINATIONS OF GEN. PAUL J. SELVA, USAF,
FOR REAPPOINTMENT TO THE GRADE OF
GENERAL AND TO BE COMMANDER, U.S.
TRANSPORTATION COMMAND; AND VADM
MICHAEL S. ROGERS, USN, TO BE ADMIRAL
AND DIRECTOR, NATIONAL SECURITY
AGENCY/CHIEF, CENTRAL SECURITY SERV-
ICES/COMMANDER, U.S. CYBER COMMAND**

TUESDAY, MARCH 11, 2014

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:37 a.m. in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Udall, Manchin, Blumenthal, Donnelly, Kaine, King, Inhofe, McCain, Chambliss, Wicker, Ayotte, Graham, Vitter, Lee, and Cruz.

Other Senator present: Senator Kirk.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nomination of General Paul Selva to be Commander of the U.S. Transportation Command (TRANSCOM); Admiral Michael Rogers to be Commander, U.S. Cyber Command (CYBERCOM), Director of the National Security Agency (NSA), and Director of the Central Security Service.

We welcome our nominees. We thank you for your many years of service and for your willingness to continue to serve in positions of great responsibility, and of course we thank your families, who give up so much to enable you to serve.

TRANSCOM, which encompasses the Air Force's Mobility Command, the Navy's Military Sealift Command, the Army's Surface Deployment and Distribution Command, is the linchpin of our strategic mobility. TRANSCOM has played a crucial role in supplying our operations in Iraq and Afghanistan. It has also taken the lead in bringing troops and equipment home from Afghanistan.

We'd be interested in the nominee's views on how long we can wait for a bilateral security agreement to be signed by President Karzai or his successor and still meet the December 31, 2014, deadline for removing all of our people and equipment from Afghanistan

in the event—and I emphasize—in the event we end up without an agreement.

Like other elements of the Department of Defense (DOD), TRANSCOM suffers from constant threats from cyber intrusions. Because of the command's reliance on the commercial sector to supplement its transportation capacity, it must be sensitive not only to the vulnerability of its own computer systems, but also to the vulnerability of the private companies that it relies on to mobilize, transport, and resupply our troops.

Our committee will soon release a report on cyber intrusions affecting TRANSCOM contractors and the extent to which information about such intrusion reaches TRANSCOM and other key entities within DOD. That's an issue which touches both of the nominees' prospective commands. We welcome your thoughts on dealing with this ongoing problem.

Last month, we heard testimony from General Alexander, the current CYBERCOM Commander, regarding a number of pressing issues currently facing the command. We look forward to hearing Admiral Rogers' views on many of the same issues, including the qualifications of the personnel that the Military Services are making available for their new cyber units, the tools and data sources these forces will have to work with, the ability of the Military Services to manage the careers of their growing cadre of cyber specialists, and the steps that should be taken to ensure that the Reserve components are effectively integrated into the cyber mission.

The committee will also be interested in Admiral Rogers' views on the collection of bulk telephone call records, the collection of the contents of Internet communications, and other NSA programs that have raised public concerns about threats to privacy and to civil liberties. For example, Admiral, we would like to know your reaction to the recent statement of the Privacy and Civil Liberties Oversight Board with respect to the section 215 telephone call record program that they have not, and this is the board saying this, that they have not, "identified a single instance involving a threat to the United States in which the program made a concrete difference in the outcome of a counterterrorism investigation."

We'd be interested in knowing what steps, Admiral, you would take if confirmed to assess the continuing value of this program and to weigh that value against its potential impact on privacy and civil liberties. Do you support the President's recent directive to modify the program so that bulk records are no longer held by the Government, while ensuring that these records can be accessed when necessary? What is your view on the threshold or standard that the Government should be required to meet to search through such data? Admiral Rogers will play a key role in providing advice on these and other issues.

Thanks again to both of our nominees for being here today, for your service to the Nation over many, many years, and your willingness to continue that service.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

Two weeks ago I expressed to General Alexander my support for the progress under way at CYBERCOM to normalize cyber planning and capabilities. Despite these critical strides, the lack of a

cyber-deterrence policy and the failure to establish meaningful norms that punish bad behavior have left us more vulnerable to continued cyber aggression. In particular, I'm deeply concerned about the two well-publicized events by Iran that involved an enduring campaign of cyber-attacks on U.S. banks and the financial sector and another involving the exploitation of a critical Navy network.

The administration's failure to acknowledge or establish penalties for these actions emboldens countries like North Korea, Russia, China, and places American infrastructure such as the power grid or Wall Street at greater risk. The President's going to have to get serious and develop a meaningful cyber deterrence policy.

General Selva, TRANSCOM provides the lifeline for every other combatant command by enabling them to execute a wide array of missions from combat operations to humanitarian relief, from training exercises to supporting coalition partners. I'm interested in your assessment of the readiness of TRANSCOM and its components, including the viability of the commercial sector to support TRANSCOM missions. I'm also interested in your assessment of TRANSCOM's ability to meet U.S. Central Command (CENTCOM) and International Security Assistance Force (ISAF) requirements.

General Fraser testified last year that the number of cyber-attacks against TRANSCOM had doubled from 45,000 in 2011 to nearly 100,000 in 2012. The committee has been investigating these incidents and it appears that there are a number of factors that should be addressed to ensure that TRANSCOM has the information necessary from its many contractors to defend its networks and protect mission-critical data.

I look forward to hearing from our nominees on how they intend to work together to ensure that these issues are corrected and TRANSCOM's classified and unclassified networks are secured. It's something that not many people know about, but I don't draw a distinction between a cyber-attack and a military attack in places. We'll have a chance to talk about that during the questioning.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Inhofe.

We're delighted to have Senator Kirk with us this morning to introduce one of our nominees. It's great to have you with this committee and to call on you now for your introduction.

**STATEMENT OF HON. MARK KIRK, U.S. SENATOR FROM THE
STATE OF ILLINOIS**

Senator KIRK. Thank you, Mr. Chairman. Mr. Chairman, I'm here to introduce Mike Rogers to the committee. I have known Mike Rogers for almost 40 years. We were in the same home room in high school together. I had the honor to work for Mike as a reservist when he was the head of intel for the Joint Chiefs of Staff.

I would say that you cannot pick a better guy, an officer who has a stronger work ethic or detail orientation, than Mike. I wanted to say that being a Republican, I have not supported a lot of the nominees of the President. I would say that this is the best American you could have picked for this job.

That would conclude my statement.

Chairman LEVIN. Thank you so much for that wonderful introduction.

The first question we're going to ask Admiral Rogers is what did he know about you in home room. He's going to tell us some secrets that you have now unleashed on yourself, I think.

Thank you for being with us, Senator Kirk.

All right. We'll call on, I think in order of their being listed, General Selva. Of course, Senator Kirk, you're free to stay or leave because we know you have a tough schedule. General Selva.

STATEMENT OF GEN. PAUL J. SELVA, USAF, FOR REAPPOINTMENT TO THE GRADE OF GENERAL AND TO BE COMMANDER, U.S. TRANSPORTATION COMMAND

General SELVA. Chairman Levin, Senator Inhofe, distinguished members of the Senate Armed Services Committee, it's a great honor to appear before you today as the President's nominee to be the Commander of U.S. Transportation Command. First I want to thank the members of this committee for their steadfast support of the airmen in Air Mobility Command, who throughout the last decade have literally moved mountains to support our soldiers, sailors, airmen, and marines in Iraq and Afghanistan. It's because of your continued support that they've been able to provide the global reach that's so important to this great Nation.

If confirmed, I look forward to working with you and other relevant committees to navigate the challenges of leading the men and women of TRANSCOM.

I'm proud today to introduce you to my wife Ricky, who's seated right behind me, who has served with me and by my side for our 34 years of marriage, since our graduation as classmates from the U.S. Air Force Academy. She served in uniform for 9 years and gives generously of her time now to support the amazing airmen and their families that are part of Air Mobility Command. She is the love of my life and, apart from my mother, is one of the very few people that can give me the unabashed feedback I need when I step away from centerline.

It's also a privilege to be here today with a friend and colleague, Admiral Mike Rogers, with whom I have served on the Joint Staff, and I can think of no better person to serve in the capacity for which he has been nominated.

If confirmed, I look forward to working with the soldiers, sailors, airmen, and marines of TRANSCOM, Active, Guard, Reserve, and their civilian counterparts, as well as the vast network of commercial partners that provide the distribution and logistics networks that make our Nation successful.

I appreciate the trust and confidence that the President, Secretary of Defense, and General Dempsey have put in me in considering me for this position. I'm grateful for the opportunity to be before you here today and I look forward to your questions. Thank you, Mr. Chairman.

Chairman LEVIN. General, thank you so much. Again, I'm glad you introduced your family. I should have indicated that you're both welcome to introduce family and anyone else who's here to support you. We're delighted you did that.

Admiral.

STATEMENT OF VADM MICHAEL S. ROGERS, USN, TO BE ADMIRAL AND DIRECTOR, NATIONAL SECURITY AGENCY; CHIEF, CENTRAL SECURITY SERVICES; AND COMMANDER, U.S. CYBER COMMAND

Admiral ROGERS. Chairman Levin, Ranking Member Inhofe, and distinguished members of the committee, thank you for the opportunity to appear before you today. I am honored and humbled that the President has nominated me for duty as Commander, U.S. Cyber Command, and designated me as the next Director of the National Security Agency. I also thank Secretary of Defense Hagel and Chairman of the Joint Chiefs of Staff General Dempsey for their confidence in my ability to assume these significant duties.

I'm joined today by my wife, Dana. One evening 30 years ago, in fact here in Washington, DC, she took a chance on a then-young Lieutenant Junior Grade Rogers, which just goes to show that truly great things can happen to a sailor on liberty. I want to very publicly thank her for her love and support, both for the past nearly 29 years of marriage and for her service to the Nation and, perhaps most importantly, her willingness to take on an even greater set of challenges if I am confirmed.

I have always believed that the life we lead in uniform is even more difficult for our spouses and our families than it is on us, and I am blessed to have a great partner in Dana.

Not with us today are our two sons, Justin, a serving naval officer currently on sea duty, which on a day like today sure sounds like a great place to be, and Patrick, a very hard-working college student.

I'm also honored to be here today alongside General Paul Selva, who, as he has indicated, we have had the pleasure of working together before and I can attest to his significant abilities firsthand.

If confirmed, I look forward to working closely with the members of this committee in addressing the significant cyber challenges facing our Nation today and into the future. We face a growing array of cyber threats from foreign intelligence services, terrorists, criminal groups, and hacktivists, who are increasing their capability to steal, manipulate, or destroy information and networks in a manner that risks compromising our personal and national security. They do so via a manmade environment that is constantly evolving and through the use of techniques and capabilities that are continually changing.

This is hard work and it requires change, something seldom easy either for individuals or for organizations. If confirmed as the Commander, CYBERCOM, my priority will be to generate the capabilities and capacities needed to operate in this dynamic environment and to provide senior decision makers and my fellow operational commanders with a full range of options within the cyber arena. I will partner aggressively with others in doing so, particularly with our allies and partners, those in the private and academic sectors, within DOD and agencies and organizations across the U.S. Government as well as Congress.

I am also mindful that CYBERCOM and the NSA are two different organizations, each having its own identity, authorities, and oversight mechanisms, while executing often related and linked mission sets. Each has the potential to make the other stronger in

executing those missions and I will work to ensure each is appropriately focused. When there is differing opinion between them, I will make the call as the commander, always mindful that the mission of each is to deliver better mission outcomes.

I will also be ever mindful that we must do all of this in a manner which protects the civil liberties and privacy of our citizens. I will ensure strict adherence to policy, law, and the oversight mechanisms in place. I will be an active partner in implementing the changes directed by the President with respect to aspects of the NSA mission, and my intent is to be as transparent as possible in doing so and in the broader execution of my duties if confirmed.

To the men and women of the NSA and CYBERCOM, I thank you for your commitment to the security of our Nation and for your professionalism. I believe in you and in the missions you execute in defending the security of the Nation and its citizens. I am honored to even be considered for duty as your leader and, if confirmed, I look forward to joining the team.

I also want to thank General Keith Alexander for his almost 40 years of commissioned service to this Nation. He has laid a solid foundation at CYBERCOM and the NSA for those who come behind him. He has made a huge contribution in this mission set and I thank him and Debby for all that they have given the Nation.

Finally, let me conclude by thanking those men and women, far too numerous to name individually, who have given me the love and support in my life to live the dream I have had since I was literally a young boy of being a serving naval officer. From those who shaped me in my youth to those who have led, mentored, guided, taught, or in some instances flat-out just kicked me in the tail in my time in uniform when I needed it most, I thank them. I fully realize that I am in no small part here today because of the efforts of so many others in my life.

Thank you again for the opportunity to appear before you and I look forward to answering your questions.

Chairman LEVIN. Admiral, thank you so much.

We have standard questions that we ask of our nominees and here they are: Have you both adhered to applicable laws and regulations governing conflicts of interest?

Admiral ROGERS. I have.

General SELVA. Yes, sir.

Chairman LEVIN. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

General SELVA. Yes, sir.

Admiral ROGERS. Yes, sir.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Admiral ROGERS. No, sir.

General SELVA. No, sir.

Chairman LEVIN. Will you make sure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

General SELVA. Yes, sir.

Admiral ROGERS. Yes, sir.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Admiral ROGERS. Yes, sir.

General SELVA. Yes, sir.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Admiral ROGERS. Yes, sir.

General SELVA. Yes, sir.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify before this committee?

Admiral ROGERS. Yes, sir.

General SELVA. Yes, sir.

Chairman LEVIN. Finally, do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

General SELVA. Yes, sir.

Admiral ROGERS. Yes, sir.

Chairman LEVIN. Thank you both.

Let's try 7 minutes for our first round of questions.

General, let me start with you. I asked this in my opening statement, asked you to consider this question: How long can the negotiations on a bilateral security agreement continue before TRANSCOM will be at risk of being able to get all of our cargo out of Afghanistan if there is no bilateral security agreement and we have to leave Afghanistan completely by the end of the year?

General SELVA. Senator, my understanding from consulting with the TRANSCOM staff on that question is that through the early fall we still have sufficient capacity in the variety of networks that we're using to redeploy cargo from Afghanistan to be able to make the decision at that point. To be able to give you a specific date, I'd have to consult with General Lloyd Austin down at CENTCOM, and if confirmed we'll be happy to do so and come back to you with a more definitive answer.

Chairman LEVIN. Thank you.

The next question for you, General, has to do with the intrusions, the cyber intrusions, and whether or not they affect DOD information. Is it not important that TRANSCOM know of cyber intrusions that can pose a risk to operations even if they don't immediately affect DOD data?

General SELVA. Yes, sir. As you're aware, the network that we use inside TRANSCOM consists significantly of our relationship with commercial transportation and logistics providers. Roughly 90 percent of the information in my current position as Air Mobility Command, and I suspect inside TRANSCOM as well, travels across unclassified networks. Being able to maintain the security of those networks through appropriate mechanisms inside those commercial companies is critical to our success.

We have an obligation to be able to assure the validity and veracity of the information that we pass on those networks. As a result, one of the initiatives that's been taken is to include in all of our commercial contracts a stipulation that commercial providers provide us with information on any intrusions into their networks.

I'm not aware of the details of the report that you spoke about, but I look forward to working with your staff on being able to work those details if confirmed.

Chairman LEVIN. Thank you.

Admiral, in January the President ordered a transition to end the section 215 telephone metadata collection program as it currently exists, to, "preserve the capabilities that we need," but without the Government collecting and holding the data on call detail records. Let me ask you this, what in your view are the essential capabilities that need to be preserved in transitioning the program as the President directed? What are those essential capabilities?

Admiral ROGERS. Sir, there's a process ongoing to work through that. I'm not part of that process, but one of my thoughts in particular would be the idea of speed, the ability to query the data, to work with the new mechanisms that we will put in place, and to do so in a timely manner to generate information and insight in a way that enables us to act in a timely manner.

Chairman LEVIN. Now, do you agree that the Government itself does not need to hold all the metadata records in order to determine whether terrorist suspects overseas are communicating with persons located in the United States? In other words, is it possible that a third party could be designated to hold the data on the one hand and then have the service providers keep the data on the other hand?

Admiral ROGERS. I believe, sir, with the right construct we can make that work.

Chairman LEVIN. You could have a third party other than the service providers, or would it be limited to the service providers holding that data?

Admiral ROGERS. Again, I think those are options all under consideration. I believe we could make either scenario work, whether the service providers did it or a third party did it. There are definitely some challenges we'll need to work through, but I'm confident in our ability to do so.

Chairman LEVIN. As I mentioned in my opening statement, the Privacy and Civil Liberties Oversight Board and the President's Review Group on Intelligence and Communications Technology characterized the section 215 program as useful but not critical. The Oversight Board said that, "We have not identified a single instance involving a threat to the United States in which the program made a concrete difference in the outcome of a counterterrorism investigation."

First of all, do you have an assessment of the utility of the program, and how that utility compares to the level of concern that the American people have about its perceived impact on privacy?

Admiral ROGERS. Sir, first, as the nominee I'm not in a position to really yet be able to comment on the value of 215. But if confirmed I certainly intend to be able to do so. I believe one of the most important functions of the Director of the NSA is to be able to articulate just that, what is the value of our efforts, so that we can make well-informed and smart decisions.

Chairman LEVIN. Do you have an opinion as to whether or not there has been an instance involving a threat to the United States

in which the 215 program made a concrete difference? Do you have an opinion going in on that subject?

Admiral ROGERS. Sir, nothing specific. I have not had a chance to sit down and particularly review the events, although if my memory is correct General Alexander has testified before this committee last month, as you indicated, in which he outlined a number of instances in which he thought 215 generated value.

Chairman LEVIN. This is also for you, Admiral. Do you think DOD is doing enough to provide capabilities for our defensive cyber units by exploiting commercial technology?

Admiral ROGERS. I will use my own experience right now as the Navy component, if you will, to CYBERCOM, where we have a continual outreach to the broader commercial and industry sectors in an attempt to identify just what technologies are available that we could use in the missions. There is an aggressive effort to do so.

Chairman LEVIN. Thank you. Thank you both.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

We've expressed many times our concern about Iran and the threat that they pose to us and that our intelligence, unclassified intelligence, as far back as 2007 indicated that they would have a capability of a weapon and a delivery system by 2015. Then it was even more forcefully expressed in a report that was unclassified by our intelligence in 2010 reaffirming their suspicions earlier.

I've been concerned about that for a long period of time. I'm concerned that we have a President that somehow thinks that there is an opportunity to get them to join the global community and reform their ways. A recent Wall Street Journal article suggested that the Iranians were able to successfully infiltrate the critical Navy computer network. The February 17 article raises serious questions, suggesting Iran was able to access the bloodstream of the Navy network. Now, I'm going to quote from that report:

"Iran's infiltration of a Navy computer network was far more extensive than previously thought. It took the Navy about 4 months to finally purge the hackers from its biggest unclassified computer network."

Now, if that's true, the geopolitical consequences of such an attack should really be profound. However, it remains unclear what, if anything, this administration would do in response to such behavior. Would a similar penetration by the Iranians' warplanes into American air space be treated with such ambivalence? I would hope not.

Admiral Rogers, your current job as Commander of the Fleet Cyber Command means that you are the one responsible for defending Navy networks. This happened on your watch, correct?

Admiral ROGERS. Yes, sir, it did.

Senator INHOFE. What are the consequences of Iranian action in cyber space?

Admiral ROGERS. First, sir, as a matter of policy and for operational security reasons we have never categorized who exactly, publicly, penetrated the network. I would be glad to discuss this with you in a classified session.

Senator INHOFE. No, this has been discussed in an unclassified session for quite some time, that we're talking about Iran in this case. So go ahead.

Admiral ROGERS. I'm sorry, sir. Not to my knowledge. I apologize.

Specifically, a segment of our global unclassified network was compromised. An opponent was able to gain access to the system. In response to that, I generated an operational requirement not just to push them out of the network, but I wanted to use this opportunity to do a much more foundational review of the entire network, to use this as an opportunity to drive change within my own Service.

Senator INHOFE. What is the administration doing now in response to this attack?

Admiral ROGERS. I'm sorry, I apologize, but I'm not in a position to comment.

Senator INHOFE. In my opening statement I quoted General Fraser. He testified last year that the number of cyber-attacks on TRANSCOM had doubled from 45,000 in 2011 to nearly 100,000 in 2012. Now, that's not very good, is it? Does that concern you, and to what level, General Selva?

General SELVA. Senator, in my current position as Air Mobility Command Commander I'm aware of those statistics. We've taken pretty aggressive action to secure our networks. As I discussed before, the nature of our network that ties us to commercial providers of transportation requires us to have access to the information from their networks as well, and we have been working diligently with those contractors and commercial providers to secure those networks.

The number of attacks doesn't actually equate to the number of actual intrusions and data exfiltrated, but to the number of probes and attempts to get into the network. If confirmed for the position of TRANSCOM Commander, I'll continue to work that issue hard with Admiral Rogers' team at CYBERCOM as well as with our 24th Air Force team, which is the designated unit that essentially provides the external security for our networks.

Senator INHOFE. All right. When we had a hearing on February 27—General Alexander and I have become good friends over the years and we've had a chance to have a lot of conversations, personal conversations—he was asked when a cyber-attack is actually an act of war and to explain what sort of actions an adversary might take in crossing that threshold. He answered that he believes that if an attack destroys military or government networks or impacts our ability to operate, you have crossed that line.

Admiral Rogers, do you agree with his characterization?

Admiral ROGERS. I would agree.

Senator INHOFE. Do you agree that they've crossed that line?

Admiral ROGERS. I'm sorry? The "they"?

Senator INHOFE. They have crossed that line in the actions that they have taken?

Admiral ROGERS. What "they" you're referring to, sir?

Senator INHOFE. I'm talking about, when General Alexander was asked when a cyber-attack does cross that line and become an act of war, and he said that, impacts our ability to operate, you have

crossed that line. Do you agree with that characterization and do you believe that we've crossed that line?

Admiral ROGERS. No, I do not believe we have crossed that line.

Senator INHOFE. Do you agree with the statement that was made by General Selva that the number of attacks, cyber attacks against TRANSCOM, doubling from 45,000 in 2011 to nearly 100,000 in 2012 doesn't properly express our deterrent against these attacks? Does this concern you, that we have doubled in that period of time in the number of cyber-attacks on us?

Admiral ROGERS. I apologize. Is your question to the General or myself, sir?

Senator INHOFE. The question is for you. I'm saying that General Fraser testified that the number of cyber-attacks on TRANSCOM, or let's say cyber-attacks period, has increased from 45,000 to 100,000 in a period of a year. Isn't that concerning? Doesn't that mean that perhaps we're not doing the job we should be doing?

Admiral ROGERS. It is concerning. I think it's reflective of the level of investment that the Department is making in this cyber mission set. Even as we face challenging budget times, cyber remains one of the areas in which the Department remains committed to actual growth in capability.

Senator INHOFE. My only concern here is that, first of all, I believe a lot of the things that I've gotten from the unclassified media and classified media, that Iran is very active in this area. I've been concerned about their capabilities and I've expressed that concern, and it appears to me that a statement such as we have from the administration, "If Iran seizes this opportunity and chooses to join the global community, then we can chip away at the distrust that exists." I just think that we need to be talking about the fact that we have an enemy out there, and he's demonstrated that very clearly.

A few years ago nobody knew what a cyber attack was. But I think we all understand now it can be just as critical, just as damaging to our country, as an attack with weapons on this country. I think you all agree with that, don't you?

Admiral ROGERS. Yes, sir.

Senator INHOFE. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator Udall.

Senator UDALL. Thank you, Mr. Chairman.

Good morning, gentlemen. Thank you for your distinguished service to our Nation.

Admiral Rogers, I want to turn to you and your written testimony and advance policy responses. In those, I noted that you stated if the Government could continue to access phone records through phone service provider repositories that could serve as a viable alternative to the current bulk phone records collection program. I was glad to read that.

You also wrote that the business records 215 program, "grew out of a desire to address a gap identified after September 11," since one of the hijackers, Khalid Al-Midhar, made a phone call from San Diego to a known al Qaeda safe house in Yemen. You noted that the NSA saw that call, but it could not see the call was coming from an individual already in the United States.

I'm concerned by the implication that somehow the section 215 program could have prevented September 11 and I want to set the record straight from my point of view. As the 9/11 Commission pointed out, the Central Intelligence Agency knew about Al-Midhar, but did not tell the Federal Bureau of Investigation. So the argument that business records data could have been the key to identifying Al-Midhar doesn't stand up in my view.

Also, I don't know why the NSA couldn't have gained the authorization on an individualized basis to determine whether this Yemeni number was in contact with anyone in the United States, and I don't see why a bulk collection authority would have been necessary.

As I'm sure you'll agree, the Constitution is not an impediment to our security; it's the source of our security. We can end bulk collection and focus on terrorists and spies without infringing on the constitutional rights of law-abiding Americans. Last year the President acknowledged what I've been saying: The status quo must change. I look forward to working with you to make those changes.

If I might, in looking ahead I want to turn to the 702 program and ask a policy question about the authorities under section 702. It's written into the Foreign Intelligence Surveillance Act (FISA). The committee asked your understanding of the legal rationale for the NSA to search through data acquired under section 702 using U.S. person identifiers without probable cause. You replied that the NSA court-approved procedures only permit searches of this lawfully acquired data using U.S. person identifiers for valid foreign intelligence purposes and under the oversight of the Justice Department and the Director of National Intelligence.

The statute's written to anticipate the incidental collection of American communications in the course of collecting the communications of foreigners reasonably believed to be located overseas. But the focus of that collection is clearly intended to be foreigners' communications, not Americans'.

But declassified court documents show that in 2011 the NSA sought and obtained the authority to go through communications collected under section 702 and conduct warrantless searches for the communications of specific Americans. My question is simple: Have any of those searches ever been conducted?

Admiral ROGERS. I apologize, sir, that I'm not in a position to be able to answer that as the nominee. But—

Senator UDALL. Yes?

Admiral ROGERS. But if you would like me to come back to you in the future, if confirmed, to be able to specifically address that question, I would be glad to do so, sir.

Senator UDALL. Let me follow up on that. You may recall that Director Clapper was asked this question at a hearing earlier this year. He didn't believe that an open forum was the appropriate setting in which to discuss these issues. The problem that I have, Senator Wyden's had, and others is that we've tried various ways to get an unclassified answer, simple answer, a yes or no to the question. We want to have an answer because it relates, the answer does, to Americans' privacy.

Can you commit to answering the question before the committee votes on your nomination?

Admiral ROGERS. Sir, I believe that one of my challenges as the Director, if confirmed, is how do we engage the American people and by extension their representatives in a dialogue in which they have a level of comfort as to what we are doing and why. It is no insignificant challenge for those of us with an intelligence background, to be honest. But I believe that one of the take-aways from the situation over the last few months has been as an intelligence professional, as a senior intelligence leader, I have to be capable of communicating in a way that highlights what we are doing and why to the greatest extent possible.

Perhaps the compromise is, if it comes to the how we do things and the specifics, those are best addressed perhaps in classified sessions, but that one of my challenges is I have to be able to speak in broad terms in a way that most people can understand. I look forward to that challenge.

Senator UDALL. I'm going to continue asking that question, and I also look forward to working with you to rebuild the confidence, as you pointed out, that the public has in the very vital mission that you have.

If I might, let's turn to cyber for the last half of my time. Before I ask a specific question—and I don't want to steal Senator McCain's thunder, although that's impossible, to steal Senator McCain's thunder. I think he has a very creative idea in setting up a special committee on cyber security, so that we could cut through some of the jurisdictional tensions that exist.

In a more specific context, you noted in your comments that we have to really work to develop and train a significant number of highly capable cyber personnel to meet the Nation's needs. There's no doubt if we're going to achieve dominance that we have to have those personnel. We've done it in the physical world and in the kinetic world, and we can do it in cyber space. Do you believe we're doing enough to cultivate cyber professionals in the early stages of their career?

The Air Force Academy, which is located in my State, has given cadets the opportunity to fly small aircraft in their college years. They enter pilot training then already familiar with the fundamentals and the feel of flying an airplane or a helicopter. I'm afraid we're not giving that same level of attention to cyber training programs. Should we be investing in more hands-on real world training opportunities at our academies for the next generation of cyber warriors?

Admiral ROGERS. Yes, sir. As a naval officer, currently as the Navy component commander, I have worked with our own Naval Academy on doing just that. In fact, right now the requirement at the Naval Academy is there is a baseline cyber course requirement for every midshipman to graduate from the Naval Academy now. That's a new requirement laid down within the last couple of years.

Senator UDALL. I look forward to working with you in that area as well, because we will achieve dominance, but we have to make those investments upfront. I think you and I violently agree.

Admiral ROGERS. Yes, sir.

Senator UDALL. Thank you again, both of you, for your willingness to serve in these important positions.

Thank you.

Chairman LEVIN. Thank you, Senator Udall.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

I thank the witnesses for their outstanding service. Just to follow up, Admiral Rogers, General Alexander when I asked, he said because of the overlapping jurisdictions of many committees of Congress that he thought that a select committee to investigate this entire issue, which covers a wide spectrum, would be a good idea. Do you have a view?

Admiral ROGERS. Sir, steps which would try to bring together those focused—

Senator MCCAIN. I would ask if you have a view on whether we should have a select committee or not, Admiral. I'm not used to obfuscation here, okay? Let's not start out that way. Would you or would you not agree that a select committee would be a good idea?

Admiral ROGERS. Yes, sir.

Senator MCCAIN. Thank you.

General, are you on track to remove all the necessary equipment and armaments from Afghanistan by the end of 2014 that you are tasked to do?

General SELVA. Yes, sir.

Senator MCCAIN. You are confident?

General SELVA. Yes, sir.

Senator MCCAIN. You're on track right now?

General SELVA. Yes, sir.

Senator MCCAIN. Thank you.

Admiral, I want to bring up this issue again of the Iranian hack of Navy computers. According to a Wall Street Journal article, the Iranian hack of the Navy's largest unclassified computer network reportedly took more than 4 months to resolve, raising concern among some lawmakers about security gaps exposed by the attack.

The paper reported that the hackers were able to remain in the network until this past November. That contradicts what officials told the Journal when the attack was first publicly reported this past September. At that time, officials told the paper that the intruders had been removed. "It was a real big deal," a senior U.S. official told the Journal. "It was a significant penetration. It showed a weakness in the system."

Can you help out the committee on that whole scenario here?

General SELVA. Yes, sir. It was a significant penetration, which is one of the reasons why over the last few months multiple updates to staffers on this committee, because one of the things I wanted to do was, how do we learn from this, how do we work hard to make sure it doesn't happen again. As a result, I directed a rather comprehensive operational response to that. That response was much broader than just be able to come back and say they're not there anymore. I wanted to use this as an opportunity to try to drive change. We put a much more comprehensive, much longer term effort in place than if I had just said, I want to immediately remove them. I wanted to do more than that.

Senator MCCAIN. Was the damage done in your view, significant?

General SELVA. I'm not sure that I would agree with significant, but it is of concern, because in this case they did not opt to engage

in any destructive behavior. My concern from the beginning was, what if they had decided that was their intent?

Senator MCCAIN. I thank you.

Admiral, we have a real problem here, at least from the standpoint of those of us who feel that our ability to monitor the behavior of possible attackers of the United States of America is vital. Mr. Snowden has done some really significant damage. There were polls in the January Quinnipiac Survey, 57 percent of Americans branded Mr. Snowden as a whistleblower, and 34 percent called him a traitor.

A Fox News poll taken the same month found 68 percent of Americans were glad to know about the NSA programs Snowden revealed, while CBS' survey found those disapproving of Snowden's conduct outnumbered those approving 54 to 31. Still, it's a very significant number of Americans that view Mr. Snowden as a whistleblower and a significant portion of Americans as a patriot and approve of his conduct.

What do you think we need to do to counter that impression the American people have, when I'm sure that you and I are in total agreement that this individual violated a solemn oath that he made not to reveal this information and has damaged our ability to defend this Nation?

Admiral ROGERS. Yes, sir, I would agree with your assessment. I think in general there's a couple things here. The first is this idea of transparency, as Senator Udall mentioned, this idea that we have to have a dialogue that talks about what are we doing and the why.

In addition, we have to ensure strict accountability on the part of the NSA. We have to make sure that we do in fact follow those processes appropriately, and when we make a mistake, if we fail to meet those requirements, that we're very upfront about how and the why.

Senator MCCAIN. Do you have any thoughts about the allegations that the FISA courts are just a rubber stamp for the administration?

Admiral ROGERS. I don't believe that to be the case.

Senator MCCAIN. Do you believe that they are exercising sufficient oversight?

Admiral ROGERS. Yes, sir.

Senator MCCAIN. Do you appreciate the fact that we have, at least with a large number of Americans and people around the world, a significant problem with the public relations aspect of the work that you and your organization will be doing?

Admiral ROGERS. Yes, sir, which is why, for example, while my personal opinion is that the FISA structure has worked well, I am open to the idea that, with the view of instilling greater confidence, we should look at a range of potential options to improve that transparency.

Senator MCCAIN. If I had a recommendation for you it would be as much as possible, given the aspects of national security, that you give some speeches in various venues where you could explain better to the American people exactly what you're doing, perhaps not exactly what you're doing, but why you're doing it, and these

threats, including this one that hacked into the Navy on your watch, which I doubt if hardly any Americans are aware of.

I don't think Americans are aware of the extent of the penetration that is not only accomplished, but being attempted, by our adversaries and potential adversaries around the world. Do you agree?

Admiral ROGERS. Yes, sir, I think you're correct.

Senator MCCAIN. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator Blumenthal.

Senator BLUMENTHAL. Thank you, Mr. Chairman.

Thank you both for your service to our Nation in the past and for what you're going to be doing in the future in very demanding and critical jobs. Thank you to your families as well.

Admiral, the White House recently announced the creation of a voluntary framework to establish a cyber-security guide for organizations involved in running the Nation's critical infrastructure. This effort and framework standardizes the cyber security defensive measures to assist in identifying, protecting, detecting, responding to, and recovering from potential intrusions.

How effective do you think that this voluntary framework will be in protecting us from cyber-attack, and what additional measures should the Senate or the NSA take?

Admiral ROGERS. Sir, I think it's a step in the right direction, but I do believe that in the end some form of legislation which addresses both the requirement and need to share information, as well as trying to address the issue of setting standards for critical infrastructure for the Nation, in the long run is probably the right answer. If confirmed, I look forward to working along with a host of other people who would be a party to that.

Senator BLUMENTHAL. I agree with you very, very strongly that legislation will be necessary. There have been efforts to achieve it, bipartisan efforts, I should emphasize, and some of them have been opposed by representatives of the business community on the ground that either there's no need for it, there's no urgency, or other reasons that I think are specious.

I thank you for your offer of cooperation and I look forward to working with you. How urgent do you think it is that we have this kind of legislation?

Admiral ROGERS. The sooner the better. It's only a matter of time, I believe, before we start to see more destructive activity and that perhaps is the greatest concern of all to me.

Senator BLUMENTHAL. Are there areas of our private defense industrial base or even financial, utilities, and so forth that you regard as most vulnerable?

Admiral ROGERS. There's certainly core infrastructure that's critical for us as a Nation. In an unclassified forum I'd be leery of providing specific insights as to where do I think the greatest vulnerability is, but I would be glad to discuss that.

Senator BLUMENTHAL. If the chairman at some point does have a briefing in another setting, a more classified setting, that may be an area that I'd like to explore with you. Thank you.

Let me shift to the role of the National Guard in cyber security. The CYBERCOM Commander, General Alexander, frequently

talked about the critical value of the National Guard as a resource and the role that it could play in expanding our military cyber warfare and defense capabilities. Do you agree with him and how would you define the value that the National Guard can bring to this effort?

Admiral ROGERS. Yes, sir, I do agree. At the present, the Department as a matter of fact is in the process of doing the analysis right now to address that very question. If confirmed, I'll be a part of that process and I intend to dig deeper into it, because one of my take-aways after 30 months right now as the naval commander, if you will, for General Alexander in the cyber mission set is that in the end this is about how do you build an integrated team that harnesses the power and the expertise of every element of that team.

While the U.S. Navy does not have a Guard structure, the Reserve structure we use has been very effective for us. I have worked hard to try to apply it in my current duty.

Senator BLUMENTHAL. Frequently those members of the Naval Reserve or of the Army National Guard or the Air Force National Guard bring capabilities, training, education, skills that are very valuable.

Admiral ROGERS. Oh, yes, sir.

Senator BLUMENTHAL. Turning to another area, if I may, the use of contractors. Following up on the very important questions asked by my colleague Senator McCain, just to state the obvious, here was a contractor who was entrusted with responsibilities that never should have been, and I think many of us are concerned by the scope and scale of the use of private contractors even to screen and evaluate other contractors.

Are you concerned?

Admiral ROGERS. Yes, sir, I share your concern. If confirmed, this is an area that I think I need to ask some hard questions. Why are we where we are today? What led us to this, and are we comfortable with the position we find ourselves in with respect to the role of contractors?

Senator BLUMENTHAL. Are there obvious defects that you can see right away that need to be corrected?

Admiral ROGERS. Nothing comes to mind immediately, although to be honest in my current duties this has not been the same issue on the Navy side that I have seen it on the joint side, as it were.

Senator BLUMENTHAL. Do you think that concern is shared widely in the Intelligence Community?

Admiral ROGERS. I would believe so.

Senator BLUMENTHAL. General Selva, if I can ask you a question, the chairman began by asking some questions about how quickly we need to make determinations about our presence in Afghanistan. What's your assessment now about how flexible we are in determining our timeframe there in drawing down and withdrawing the equipment and personpower that we have?

General SELVA. Senator, today I'd say we have the greatest flexibility that we've had in the past several months. But as each day passes, as you're probably aware, our options decrease. There is a limit to the capacity of the networks to bring that equipment and those personnel out. I will commit to consulting with General Aus-

tin for his assessment and for General Dunford's assessment in ISAF of the specific limits of those networks. In TRANSCOM, our obligation is to make sure that the transportation layer and the distribution layer of those networks is prepared for whatever capacity comes at us.

Senator BLUMENTHAL. Thank you.

My time has expired. I thank you both for your very helpful answers and again for your service. I look forward to working with you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Blumenthal.

Senator Chambliss.

Senator CHAMBLISS. Thanks, Mr. Chairman.

Gentlemen, to both of you, thank you for your service and your commitment to freedom. We appreciate the great job you do.

I just want to make a comment for the record first, Admiral Rogers, with regard to some comments that Senator Udall made. I don't want to leave a false impression with the American people here that if we had had 702 and 215 in place in 2001 there is a strong probability that we would have been able to determine that a major attack was going to occur, and there's the probability that we would have picked up on conversation between Al-Midhar and those in Yemen with whom he was planning the attack.

Knowing that he was in country versus knowing that he was in communication with terrorists planning an attack are two different things. We didn't have 215, we didn't have 702. We knew that a phone call came to the United States. We did not know it went to San Diego.

It's pretty clear that if we had had more definitive information that we would have gleaned from these programs, that there is strong probability within the Intelligence Community that we might have picked up on that. I won't ask you to make a comment on it, but I want to make sure the record really reflects the actual facts on the ground relative to Al-Midhar.

Now, Admiral Rogers, you and I discussed something that Senator McCain mentioned a little earlier, and that is with respect to trying to communicate these programs to the American people. It's going to be very difficult. He mentioned doing speeches and what-not. I think you and I agree that that's part of it.

But I'd like for you to elaborate a little bit more on really what you think we can do to show more transparency and to let the American people understand how these programs work.

Admiral ROGERS. As I said, I think we can be a little more communicative with why we're doing this, what led us to these kinds of decisions. I also think it's important that dialogue needs to be much broader than just the Director of the NSA, regardless whoever that individual is. There's a lot more aspects of this discussion than just the intelligence piece.

In the end, this fundamentally boils down to an assessment of risk, both in terms of our security as a Nation as well as our rights as individuals. We value both and we have to come up with a way to enable us to ensure that both sides of that risk coin are addressed. But we should never forget that there's a threat out there that aims to do us harm, that does not have the best interests of

this Nation in mind, and wants to defeat what this Nation represents.

Senator CHAMBLISS. You're exactly right. It's truly unfortunate that General Alexander was put out there on a limb by himself by the administration to seek to explain these programs. While he did a very good job of it, had the President with the bully pulpit been out there with him I think we would have already had a better understanding on the part of the American people of, number one, the misrepresentation of the facts regarding what information is collected on individuals, what's done with that information, and how very difficult it is to be able to access personal information on any single American. It simply is extremely difficult and requires the same process virtually that you would have to go through if you were a U.S. Attorney seeking to get information on an individual American.

The FISA court is not a rubber stamp. All you have to do is look at the makeup of the court, as well as look at the decisions, now which some of them are going to be made public, and I think that's a good idea, as long as we don't reveal sources and methods.

The fact that the administration did not give General Alexander the kind of support they should is really pretty disturbing on my part, and as I mentioned to you yesterday, I have expressed this to the administration. I hope they will give you more support in explaining these programs than they have given to General Alexander, and I have confidence that maybe they will.

Let's talk for a minute about information sharing. We've been working on a cyber bill for years now. We're getting very close to an agreement within the Senate Intelligence Committee between the chairman and myself on a cyber bill that is much needed. One of the key provisions and the last remaining obstacle we have is the immunity provision or the liability protection provision. Would you talk for a minute about your opinion regarding how necessary liability protection is to companies who will share privileged and personal information if we're truly going to have a program that works relative to cyber?

Admiral ROGERS. Yes, sir. I'm not a lawyer, but my sense is it's a critical element in any legislation. I believe to be successful we ultimately have to provide the corporate partners that we would share information with some level of liability protection.

Senator CHAMBLISS. Do you think that firms will participate in the sharing of information if they are not granted pretty much blanket liability protection?

Admiral ROGERS. I would think they'd be much less inclined to do without it.

Senator CHAMBLISS. Thank you very much.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator Donnelly.

Senator DONNELLY. Thank you, Mr. Chairman.

Admiral, thank you. General, thank you, and your families.

The chairman mentioned an article in the New York Times today. I thought one of the interesting quotes was where they said, why would somebody want to be the head of CYBERCOM now? It reminded me very much of the movie Apollo 13 where they said:

This might be one of the worst things that could ever happen to us. They looked and they said: "Well, this could be the best."

This could be the most amazing time, and we have more challenges maybe than ever before. We are giving you the football and expecting big things from both of you on this.

I wanted to ask you, General. In regards to what we have seen in Ukraine and the dealings we've had with Russia before, are you making alternate plans in terms of TRANSCOM as to the work we do with Russia? Are you gaming out worst case scenarios as to how we proceed in the future?

General SELVA. Sir, not yet being in the seat at TRANSCOM, I'd have to say if confirmed that is a priority. I do know as the air component to TRANSCOM and working directly with the TRANSCOM director of operations that we have been building alternative plans. The Northern Distribution Network, part of which flows through Russia, consists of five different options for how we move cargo in and out of Afghanistan. We'll have to look at using other options than the overflight or transit through Russia should the conduct in Ukraine continue.

Senator DONNELLY. I would recommend we get working on that right away, in light of what we have seen going forward these days.

Admiral, when you look at what happened with Mr. Snowden, I know we have done reviews. Have you continued to look and ask what-if about this or about that in regards to where we are now, our operations now, to make sure we are not going to face this again internally?

Admiral ROGERS. As the nominee I haven't done that for CYBERCOM or the NSA, sir.

Senator DONNELLY. Have you thought that through?

Admiral ROGERS. If confirmed, yes, sir, I do believe we need to ask ourselves, so given this compromise, what would be the indicators that would highlight to us, that in fact would point out that now we've been compromised, now we're seeing changes in behavior, and how are we going to have to change that to stay ahead of the threats that face us as a Nation.

Senator DONNELLY. I would suggest that one of the first things you do is sit down and determine where did we go off the highway? How do we fix it? How do we square it away?

One of the areas of interest to me is contractors. You're not in the position yet, but why is it that we have contractors in those positions, as opposed to perhaps military personnel or other Government personnel who are expert in those areas? Is it a lack of individuals who can fill those positions?

Admiral ROGERS. I can't speak to the specifics of Mr. Snowden, the function he was fulfilling, as to why that was chosen to become a contractor vice Government, if you will. But I think it is reflective of a trend over the last decade or so where, as we looked at the size of Government, as we looked at the size of our workforce, some decisions were made that perhaps some of these functions could be executed on a contractor basis vice using permanent Government employees.

I have always believed as a commander that what you should use contractors for are for those functions that are either so specialized that you don't have the capability or skill resident within the Gov-

ernment workforce, whether that be uniformed or civilians, or it is prohibitively expensive to try to achieve that capability, but that what we consider to be core operational functions, those need to be Government.

Senator DONNELLY. In regards to Mr. Snowden's area, will there be a review through all of these contractor areas as to what is core to what we need to do and when we regard and review expense? The next question is what is the expense of what we're dealing with now, with the situations that have been created by Mr. Snowden's conduct?

Admiral ROGERS. I apologize, but I don't know the answer to that.

Senator DONNELLY. No, I understand. I'm just trying to lay out, here are some things as we move forward that we look at.

Mr. Snowden also remarked recently: The U.S. Government has no idea what I have and will not know what I have, and they'll find out as it goes on, in effect, not his exact words. But when we look at Ukraine one of the concerns that has to come up is how much of Mr. Putin's actions were based on knowledge that may have been given to him by Mr. Snowden.

How good a handle do we have at this point on what Mr. Snowden has and what he does not have?

Admiral ROGERS. We have an in-depth analytic effort ongoing within the Department to determine that and ask that question. I haven't been party to that review, although I've seen some of the initial work, which has highlighted where the data he took exactly where it came from. We've tried to identify exactly what the implications are of what he took. That operation is ongoing and will take some period of time to finish.

Senator DONNELLY. In another area, it would be remiss of me not to ask you about supply chain integrity. It's something of concern to me, counterfeit parts, and this would be for both. How are we going to partner with industry? How are we going to work together with our intelligence officials and others to secure the integrity of the supply chain of what we have? We see counterfeit parts in missiles, in planes. It is an extraordinarily dangerous situation, and I was wondering what your plans are as we move forward to try to get this squared away.

General SELVA. Senator, our obligation in TRANSCOM is to work as the distribution process owner under the unified command plan. Part of that obligation is to work directly with the Defense Logistics Agency (DLA) on the issue of supply chain management and integrity of the supply chain. It's out of the lane that I've been in for the last year and a half as the commander of Air Mobility Command. It is one of the areas that I have committed to spend time with with Admiral Harnitchek, to get at the details of the supply chain integrity process.

It's more than just the data. It is in fact the ability of counterfeiters to bring to that market parts that appear to be genuine, but in fact aren't. It's a physical issue as well as a data security issue. It goes right to the heart of our industrial capacity and the ownership of the intellectual rights and being able to produce the products that our soldiers, sailors, airmen, and marines use in battle.

Senator DONNELLY. I would ask you to make that a priority, because we are one counterfeit part away from disaster on a constant basis.

General SELVA. Yes, sir.

Senator DONNELLY. Thank you very much. Thank you both for your service and to your families.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Donnelly.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

I want to thank both of you for your service to our country, and to your families as well for their support and sacrifices.

General Selva, with regard to DOD's air refueling capability, how important is it to our military capabilities and our national security?

General SELVA. Senator, the capacity of Air Mobility Command to operate at TRANSCOM's behest and provide refueling around the world is critical to being able to move our forces to the places they need to be when they need to be there. The Air Force, as you've probably heard over months and years, talks about global vigilance, global reach, and global power. Tankers are what make us global.

Senator AYOTTE. I'm really pleased the 157th Air Refueling Wing at Pease, the New Hampshire Air National Guard Base, has been chosen as the top Air National Guard unit to receive the new tankers, the KC-46A. I want you to know we had a very positive public hearing for the basing of the KC-46A last week in New Hampshire.

I wanted to ask you, in your role as Commander, Air Mobility Command, what's your assessment of the 157th Air Refueling Wing at Pease? How have they performed and how important is the Guard in all of its capabilities as we go forward?

General SELVA. Senator, the 157th has a pretty storied heritage in the tanker world, and they're a high performing organization. They're one of the units to which we've appended an Active Duty associate unit and the unit is performing quite well. The base and the unit exist in an area of fairly high demand for tanker services and as a result their performance speaks for itself. They're a great unit and we look forward to being able to base the KC-46A Pegasus at Pease, subject to the outcome of the environmental impact statement.

Senator AYOTTE. Fantastic. I think you're going to get a very positive outcome. The whole community is really excited and very supportive of having the new tanker there, and I look forward to working with you on that. It's incredibly important to our national security.

I noted Senator Donnelly asked you about the issue of the Northern Distribution Network with regard to our retrograde from Afghanistan. In light of what's happening in the Ukraine, the President, many of us, are pushing for further economic sanctions, other types of sanctions against Russia for their invasion of Crimea.

If the Russians were to take retaliatory action as a result of that to shut down the Northern Distribution Network with regard to the transit operations on those roads, what impact would that have to

us and how would we address it? Because I think it's something we have to understand and be prepared to address.

General SELVA. Yes, ma'am. If the Russians were to take action to constrain our access to the Russian segments of the Northern Distribution Network, we have other options to move that cargo in and out of Afghanistan. The singular item that moves across that network that would concern me at this point is the subsistence cargoes in the form of food and non-combat articles. I'm told about 20 percent of the subsistence cargoes move through that network. We'd have to use another option to get it in. We do have several options in the Northern Distribution Network that do not include transitting Russia.

Senator AYOTTE. If for some reason, which obviously I would hope that they wouldn't take that type of action, but we'd be prepared to use other options if we had to and could do so?

General SELVA. Yes, Senator, we would.

Senator AYOTTE. Thank you. I appreciate it.

Admiral Rogers, thank you for taking on at a very challenging time this important position. Last week it was reported in the press that Russia is using cyber-attacks against the Ukrainian telecommunications system to block the Ukrainian leadership from accessing the country's phone network. To what extent do you believe Russia is conducting cyber-attacks against the Ukraine, and what could the United States do to help the Ukraine better defend itself against attacks from Russia?

Admiral ROGERS. Ma'am, in an open, unclassified forum, I'm not prepared to comment on the specifics of nation state behavior. Clearly, cyber will be an element of almost any crisis we're going to see in the future. It has been in the past. I believe we see it today in the Ukraine. We've seen it in Syria, Georgia. It increasingly is becoming a norm.

As we work to partner with others to develop norms of behavior and expectations for what is acceptable and what is not acceptable, examples like this highlight to us I think what is not acceptable. As we work with the Ukrainians and other nations to attempt to figure out what's the best way to address them, whether the Ukrainians ask for specific technical assistance, I think we'd have to work through everything on a case by case basis.

Senator AYOTTE. Do you believe we should help our allies in situations like this if they are receiving cyber-attacks, and working with them to combat these attacks?

Admiral ROGERS. Yes, ma'am.

Senator AYOTTE. I think that's very important, particularly with what's happening in the Ukraine right now, that we are active in this area in countering any type of actions by the Russians, cyber-attacks or otherwise.

I wanted to ask you about DOD's vulnerability overall to a cyber-attack. In January 2013, the Defense Science Board issued a task force report titled "Resilient Military Systems and the Advanced Cyber Threat". The report concluded that, "The United States cannot be confident that our critical information technology systems will work under attack from a sophisticated and well-resourced opponent utilizing cyber capabilities in combination with all of their military and intelligence capabilities."

In other words, we're not confident that many of our military systems would work if we were attacked by a high-end peer-to-peer adversary.

Do you share that assessment and how can we make sure that DOD is more resilient to cyber-attacks?

Admiral ROGERS. I certainly share that concern, which is one reason why I believe creating a defensible architecture has to be one of the most important things we do. The reality is the network structure of today reflects a different time and a different place. I have experienced that firsthand in my current duties in the Navy as the operational commander for the Navy's networks. I have watched that challenge across the entire Department.

That's why the Joint Information Environment (JIE) I think is so critical to the future for us. We have to get to a defensible architecture.

Senator AYOTTE. We have to work with you on that.

Finally, there's been a lot of discussion about Edward Snowden here today. Do you believe that the disclosures that he made have potentially put at risk the lives of Americans and our allies, or at greater risk, because he has released this type of classified information?

Admiral ROGERS. Yes, ma'am.

Senator AYOTTE. Yes is the answer to that?

Admiral ROGERS. Yes.

Senator AYOTTE. I think that people need to understand that, that he has put potentially at risk American lives and the lives of our allies. That is very, very important for people to understand in terms of what we are addressing and what we're dealing with and how we characterize his behavior.

Thank you both.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator KING.

Senator KING. Thank you, Senator.

General Selva, it's good to see you again. If I was in an airplane out of gas over the North Atlantic, I'd call the guys from Bangor. Forget about those guys from Pease. [Laughter.]

Senator AYOTTE. I don't think so. [Laughter.]

Senator KING. The 101st could take care of you quite adequately.

As you look across the broad range of commercial assets, military assets, that TRANSCOM employs across the globe, what do you feel are the greatest risks and vulnerabilities to TRANSCOM today to execute its responsibilities? How about the vulnerability of commercial carriers to events like cyber intrusions? Going into this new job, what's going to keep you awake at night?

General SELVA. Senator, I think there's probably two things that worry me the most over the coming couple of years. The first is once we have completed whatever retrograde operation happens in Afghanistan, whether we have a residual force or no force remaining behind, the demand signal for lift, surface and air, will diminish significantly. We've already seen in the last year nearly a 50 percent reduction in the requirement for sustainment cargoes into and out of Afghanistan, combat articles as well as just regular sustainment.

That has an implication for our organic fleets, sealift, airlift, as well as surface, and for our commercial partners whose networks we access to make that entire distribution network work. That decline in requirements, a return to a more stable environment, if you will, actually has some negative readiness implications across the enterprise. We're studying those in all of the organic and commercial sectors of the market to try and understand those implications. They have significant impacts on the commercial cargo carriers, both sealift and airlift, who have been such an integral part of that network into and out of Afghanistan.

Senator KING. What percentage of TRANSCOM's assets are organic versus commercial at this moment?

General SELVA. That's a difficult number to quantify, but I'll take a stab at it. Roughly 40 percent of our capacity is organic in the air environment and about 50 percent, if we access all of the available assets through the Civil Reserve Air Fleet (CRAF), would be brought to us by our commercial partners. I don't have the specific statistics.

Senator KING. As the demands of Afghanistan diminish, is there an industrial base issue here in terms of the commercial carriers? Are they going to go away? Are they going to be able to find other business? Is there a risk of not having the capacity when we need it?

General SELVA. There are two dynamics at play, Senator, in that environment. One is the health of the airline industry as a whole, both commercial cargo carriers and commercial passenger carriers, and two segments within that, that industry, the charter carriers and the scheduled carriers.

The decline in the demand signal on those commercial carriers will change the economics of that industrial segment. The second thing that's changing is the very nature of commercial charter cargo across all of the global economy. With the introduction of large aircraft with large cargo bays below the passenger decks, we now see commercial passenger carriers reentering the charter cargo market. That has changed the dynamic of our CRAF partners and we have to understand the impacts of that change in the economy on their capacity to be with us in crisis.

Senator KING. That's an issue that we're just going to have to watch as it evolves?

General SELVA. Yes, sir. To be fair, right now we have an ongoing study. We're about a year into working with our commercial partners to understand the economic dynamics of what's changing in the cargo and passenger markets. We are right now in about a 3-month period of receiving their comments on the work we've done. We owe this committee a report in mid-June, if I understand correctly, on the outcome of that discussion.

Senator KING. Thank you.

Admiral Rogers, I'm going to ask a question that I don't think you're prepared to answer, but I may ask it again in a year. I've been in a number of hearings both in the Intelligence Committee and in this committee on cyber issues, CYBERCOM and the NSA. How can you possibly do both of these jobs?

Admiral ROGERS. There is no doubt it's a challenge, and I'll be in a much better position, as you indicate, if confirmed, to look

back and say how hard has it been and what have been the challenges. But I just believe that where we are right now, many of the missions and functions are so intertwined and related that to not do it this way would create real concern. Right now, in my current duties in the Navy I work for General Alexander both as CYBERCOM and as NSA leader, and so I have experienced these same challenges firsthand within my own service.

Senator KING. But you understand how over the past year both jobs have grown in responsibility. You have to be a spokesman, you have to manage. I just think it's something that we're going to really have to think about along with the administration going forward. I understand the desire to have it in one person, but, boy, I would think running the NSA itself is more than a full-time job.

Admiral ROGERS. We'll be busy, sir.

Senator KING. One of the major issues that we've been discussing again for the past year and a half, actually for the past, I don't know, years before I was here, is the necessity of some kind of cyber legislation that allows better coordination between the private sector and the Government. How do you assess the importance of that kind of legislation coming out of this Congress?

Admiral ROGERS. Sir, I believe that legislation is a key for our future. We have to change the current dynamic.

Senator KING. I certainly hope people are listening around here, because ever since I've been here everybody's been saying that, but it doesn't seem to change. My father used to say if you drove straight at the Pentagon it kept getting further and further away. I feel like that's where we are with this legislation. Everybody's talking about it. I certainly hope you'll work with us to try to develop that legislation in the multiple committees that have jurisdiction.

I believe one of our greatest vulnerabilities is to cyber-attack. I think the next Pearl Harbor is going to be cyber. The problem is we're more vulnerable than many other places. It's an asymmetrical disadvantage because we're so advanced in terms of our linked-up, networked society. How do we prevent that or what are the tools and are we where we should be? I certainly don't want to have a hearing or a set of hearings here about why we were asleep at the switch.

Admiral ROGERS. I think clearly we're not where we want to be. We're generating capability, we're generating capacity, and those are all positive steps in the right direction. But in the end I believe we have to get to some idea of deterrence within the cyber arena.

Senator KING. I think you're absolutely right about that, and we have the whole strategy of deterrence on the nuclear side and I think we have to develop a strategy of deterrence on the cyber side, that if somebody comes into our networks they're going to have some serious problems with their networks.

Thank you, Admiral.

Chairman LEVIN. Thank you, Senator King.

Senator Lee.

Senator LEE. Thank you, Mr. Chairman.

Thanks to both of you for joining us today and for your service to our country. Admiral Rogers, I thank you in particular for vis-

iting with me in my office. I appreciated the opportunity to discuss those important issues.

There does have to be a balance struck between achieving our national security goals and protecting the constitutionally guaranteed rights of American citizens. Ultimately, I agree with my friend Senator Udall that, properly understood, these two things are the same thing. Our security lies in our constitutional protections and so we can't overlook constitutional protections in the interest of national security without compromising a good deal of what is embodied in our national security interests.

In our well-intended efforts to recover and move forward past September 11, 2001, we have at times tried to strike a balance in a way that I find troubling. As I've stated before, I have some pretty deep-seated concerns with some of the things that have been revealed in recent months to the public, things that previously were known only to Members of Congress and to other people with the right security clearance within the Government.

I worry about the NSA's surveillance and metadata collection programs and the risks that such programs could pose to the constitutionally protected rights of American citizens. The Fourth Amendment stands to safeguard those rights, and even if one assumes for purposes of this discussion that currently the only people employed at the NSA are people with only our best interests at heart, we still run a risk, even if that assumption is made, that at some point in the future, whether it's a week from now, a month from now, a year from now, 10 or 20 years from now, unless we have the right safeguards in place those powers will be abused. They will be abused with respect to American citizens.

Particularly given the fact that the NSA's mission is related to foreign intelligence-gathering, we need to make sure that we protect American citizens in their constitutionally protected rights.

Admiral Rogers, if confirmed to this position how would you work to protect the constitutionally protected rights of American citizens while doing your job?

Admiral ROGERS. Yes, sir. I would attempt to be as transparent as possible with the broader Nation about what we're doing and why. I would try to ensure a sense of accountability in what the NSA does. The Nation places a great deal of trust in this organization. It has an incredibly important mission. It's a mission that involves a tension in our society, given the fact that the fundamental rights of the individual are so foundational to our very concept of the Nation.

I welcome a dialogue on this topic. I think it's important for us as a Nation. I look forward to being part of that dialogue. As you and I have previously discussed, I am committed to trying to be a good partner in that effort.

Senator LEE. I understand that a certain level of confidentiality must almost unavoidably surround many of the NSA programs that might be of concern to the American people, to ensure the effectiveness and to keep our enemy actors from working around our systems. But the public has developed a certain distrust of many of those programs.

In discussing this concept with Senator McCain a few minutes ago, you mentioned that there might be a range of options avail-

able to us. Can you describe what some of those options might look like in balancing the need for confidentiality on the one hand, in order to protect our programs, and the need for transparency on the other?

Admiral ROGERS. I'd be looking at what are the mechanisms we use to assess the value portion of this and how can we do this potentially in a more public way. I haven't fully formed my own thoughts in this regard, but I think it's something that's incredibly important and I think is very specific to the duties as the Director of the NSA, if confirmed, the ability to be able to lead an honest and open dialogue about just what is the value of these efforts as we try to move forward.

As I said, I'm not on the job yet. I need to get much smarter, but I'm committed to doing so.

Senator LEE. The President's directed that the Government start to transition out of having the Government itself hold onto the bulk metadata collected pursuant to section 215 of the Patriot Act. Can you give me an update on how that process is going and how it might unfold?

Admiral ROGERS. Sir, as the nominee I haven't been part of that process, so I'm not in a position to give you a sense of how it's unfolding. I know it is ongoing. The President set a deadline of the 28th of March, indicating he wanted feedback on how the best way to move forward was. The issue that's among the many that's important to me as we move forward is this, and we try to figure out the best way, is how do we address the idea of speed, the ability to query the data in a way that both protects the rights of the individual, but also enables us to get answers in a quick, reasonable time period.

Senator LEE. Thank you.

President Obama stated in a speech in January the following. He said: "I've directed the Attorney General to work with the Foreign Intelligence Surveillance Court so that during this transition period the database can be queried only after a judicial finding or in case of a true emergency."

What do you think might constitute a "true emergency" in this context?

Admiral ROGERS. Potential loss of life, hostage, criminal kind of scenarios.

Senator LEE. I assume that in those scenarios there would have to be a time component, an urgency component for that to qualify.

Admiral ROGERS. Yes, sir, I would think so.

Senator LEE. Not a mere inconvenience to the Government personnel involved, but some practical reason that would make it impossible, rather than just inconvenient, to go to the FISA court. Is that your understanding?

Admiral ROGERS. Inconvenience is clearly not the standard that's intended.

Senator LEE. I see my time has expired. Thank you very much, Admiral.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Lee.

Senator Manchin.

Senator MANCHIN. Thank you, Mr. Chairman.

I want to thank both of you and congratulate you on your nominations. I've read your resumes, quite impressive. Thank you for the service to our great country.

I also want to acknowledge the passing on Sunday, March 9, 2014, of one of your fellow Air Force officers, one of your fellow comrades, if you will, at the Air Force Academy, in the passing of Major General Stewart. We're very sorry for that, and a loss for all of us.

If I can, General Selva, to start with, the equipment in Iraq, where did it go, the equipment that we should have taken out? How much did we leave behind? Where did it go? What have we done with it?

That leads right into what we're going to do in Afghanistan. I'm hearing that we're going to leave so much stuff behind. The State of West Virginia is kind of watching its p's and q's and its pennies, nickels, and dimes. How does that fare?

General SELVA. Sir, I'm not in a position to comment on what we left behind in Iraq.

Senator MANCHIN. Is that because of security?

General SELVA. No, sir. I wasn't party to those decisions.

Senator MANCHIN. Could you get some information on that?

General SELVA. I could try to find out for you.

[The information referred to follows:]

The majority of equipment in Iraq was transported back to the United States or to Afghanistan based on military operational and training requirements. The Department of Defense (DOD) transferred equipment and property to the Government of Iraq (GoI) under a number of authorities to build up the security forces of Iraq. Specifically, DOD transferred \$319.7 million (fair market value) worth of foreign excess personal property (FEPP) to the GoI under the authority of title 40 U.S.C. § 704. Examples of these items are installation and base life support equipment (e.g., commercial vehicles, power generators, living containers, security barriers, and air conditioners). DOD achieved an estimated cost avoidance in excess of \$605 million by not transporting these items back to the U.S. Additionally, DOD transferred over 24,000 pieces of "excess" equipment under the authority of title 22 U.S.C. § 2321j (grant transfers of Excess Defense Articles) to the GoI. Examples of this equipment are helmets, older version weapons (M16), body armor, tools, and commercial vehicles. DOD also transferred 1,305 pieces of "non-excess" equipment to the GoI under the authority of § 1234 of Public Law 111-84. Examples of this equipment are High Mobility Multipurpose Wheeled Vehicles, 40 ton trailers, maintenance trucks, and airfield support equipment.

Finally, DOD transferred 759 items valued at approximately \$10.8 million to 20 different U.S. State and Local organizations through the National Association of State Agencies for Surplus Property. Examples of this equipment are: non-tactical vehicles, light sets, generators, dozers, bobcats, and forklifts. The equipment is provided on an "as-is, where-is" basis to the States, with the States funding all packaging and transportation costs. Items not claimed by any organization were disposed of in Iraq.

Senator MANCHIN. Thank you, sir.

General SELVA. I will let you know that in the current discussions we're having with ISAF on what we might leave behind in Afghanistan, one of the key issues that we have to address is the residual value of the equipment and whether or not the cost of lifting it out of Afghanistan is worth that investment. We have to do that, essentially a business case.

Senator MANCHIN. Do we have any buyers in that part of the world for it or are we just going to give it away?

General SELVA. Sir, in some cases the equipment will be disposed of through foreign military sales. In others it will be through grants. But I don't have the specifics.

Senator MANCHIN. If you could do that, I'd appreciate it.

General SELVA. If confirmed, I will get with the DLA team and get you that information.

[The information referred to follows:]

Equipment that is required to meet future military operational and training requirements is being transported back to the United States. Equipment that is excess to the Department of Defense (DOD) requirements is offered to the Government of the Islamic Republic of Afghanistan (GIROA) and other eligible countries under various authorities. As of March 30, 2014, DOD has transferred \$91 million (fair market value) worth of foreign excess personal property to the GIROA under the authority of title 40 U.S.C. § 704. Examples of these items are installation and base life support equipment (e.g., commercial vehicles, power generators, living containers, security barriers, and air conditioners). DOD achieved an estimated cost avoidance in excess of \$1.1 billion by not transporting these items back to the United States. As with the equipment in Iraq, excess military equipment is made available to GIROA and other eligible countries on an "as-is, where-is" basis under the authority of title 22 U.S.C. § 2321j (grant transfers of Excess Defense Articles) or title 22 U.S.C. § 2751 (Foreign Military Sales). Non-excess military equipment may be transferred to GIROA under the authority of § 1222 of Public Law 112-239. DOD is providing lists of excess equipment to the National Association of State Agencies for Surplus Property (NASASP) for potential transfer to U.S. State and local organizations on an "as-is, where-is" basis. To date, no equipment has been requested by NASASP due to the high transportation costs.

Commercial equipment that has no trade security controls may be sold to local Afghan vendors beginning in April 2014. Finally, equipment with trade security controls that is not disposed of in any of the methods above will be demilitarized and disposed of in Afghanistan.

Senator MANCHIN. Admiral Rogers, if you can, give me an overview of the cyber-attacks from Russia, and especially with the Ukraine situation we have right now that we're dealing with, and how that escalates to concerns and maybe more activity into the former Soviet Union countries, such as Kazakhstan and some of the others that are very much concerned, and even Poland, at what's going on. Are you seeing an uptick in those type of cyber-attacks there?

Admiral ROGERS. We clearly see that there's an ongoing cyber element to the challenges in the Ukraine at the moment. In terms of specifics, I would respectfully ask that this is something that would perhaps be best shared in a classified setting.

Senator MANCHIN. Okay. I was just wanting to see, I would assume there has been. If you can do that, I'd appreciate it, sir.

Also, my State of West Virginia has gone through a water crisis, if you will, because of a spill. I've said this before. If anyone wanted to know the effects it has on the population and the concerns and the hysteria—and we had no loss of life, no one seriously ill—what a cyber-attack would do to the confidence of the people, we're a perfect example, if you would come down and work with us and help us on that.

But with that being said, our most vulnerability I see is in our water, our food, and our grid system. Since a lot of this is privately owned or corporately owned, are you interacting and how much are you interacting with those concerned to beef up the security?

Admiral ROGERS. Sir, it's clearly not in my current duties, but if confirmed that would be an aspect of the mission. Absent legislation, we're attempting to do that on a voluntarily-in partnership

basis. Those partnerships in some areas are working very well, in others clearly not as mature as we would like.

Senator MANCHIN. Maybe you can even elaborate more. I know that Senator King had mentioned you probably wouldn't be able to answer it today, you could a year from now. Tell us what all has been thrown into the mix, if you will, of what you're expected and how you can bring everything together with the demands and the growth, I think is what we're concerned about, and if we should still stay under one umbrella? I think right now we're going down that direction. But how much more has been thrown at you?

Admiral ROGERS. Clearly, it's a demanding set of duties. I'd also highlight the Director of NSA and the Commander of CYBERCOM does not operate alone by themselves. There's a strong team in place. I've had the honor of working with that team on both the CYBERCOM side and the NSA side for the last 2½ years in my current duties. They're a real strength for the team.

Senator MANCHIN. It's amazing to me—and I don't see this in West Virginia at all—they're trying to lift Snowden up to any type of hero. He is basically a traitor in our eyes and what he's done to our country.

But with that being said, there had to be a frustration level to where he felt that that was the direction for him to go, because there was no outlet. Are you able to in your new position looking at how you can work, because you're going to have contractors involved and it looks like you're going to have more contractors—are they able to come and have their concerns and do you have any type of an outlet there that would work with them, so that we don't continue to go down this road?

Admiral ROGERS. Yes, sir, there are avenues both within the NSA chain of command, there are avenues both with an inspector general structure, both within NSA and CYBERCOM as agencies.

Senator MANCHIN. Did Snowden ever take those avenues and try to air his concerns?

Admiral ROGERS. I don't know, but I'm sure in the ongoing investigation as we review the particulars of the Snowden case that'll be one of the questions of high interest.

Senator MANCHIN. Yes, because basically he just went down the sabotage route. You've said before some of the things he's done and has continued to do is irreparable.

Admiral ROGERS. I'm not sure I said irreparable, but I believe it has significant risk, damage, and consequences for us.

Senator MANCHIN. Would you look at him as a traitor?

Admiral ROGERS. I don't know that I would use the word traitor, but I certainly do not consider him to be a hero.

Senator MANCHIN. Thank you.

Chairman LEVIN. Thank you, Senator Manchin.

Senator Graham.

Senator GRAHAM. Thank you both for your service and I look forward to working with you in the future. I have every confidence that you'll be confirmed, and these will be difficult, but I think very rewarding, jobs.

General, on the transportation side, what effect will sequestration have on the ability of Air Transportation Command to meet our defense needs over the next 8 years?

General SELVA. Senator, I think there's two significant impacts sequestration will have. The first will be as an industrially funded organization, where our users that use transportation services pay out of their operation and maintenance (O&M) accounts for those services, the decrease in the availability of those funds is likely to cause a decrease in that demand signal. The corollary to that is that will force then our organic capacity, the training and seasoning of the people that do that work, whether it's Military Sealift Command or Air Mobility Command, to spend more of their O&M dollars to achieve that training they could as a byproduct of moving transportation requirements around the world. There is a bit of a two-sided coin there on the impact of sequestration on the readiness of those fleets.

Senator GRAHAM. In simpler terms, would it be really damaging?

General SELVA. Yes, sir.

Senator GRAHAM. From an Air Mobility Command point of view, which you are very familiar with, how has our air fleet been affected by the operational tempo (OPTEMPO) over the last 10 years?

General SELVA. Senator, we've had a fairly high OPTEMPO, particularly in our airlift and air refueling fleets. The fleets are holding up pretty well. We do a continuous assessment of the structures in our large airlift aircraft. But the OPTEMPO is showing its—

Senator GRAHAM. Is it fair to say that when we accepted each plane into the fleet—the operational tempo has been really unprecedented since World War II probably, and that when it comes time to evaluate our future needs, we're flying the wings off of these planes basically? I know they're structurally sound, but I want the committee to understand that no one envisioned this level of operational tempo before September 11, and we're going to have to make accommodations for it.

Admiral, are we at war?

Admiral ROGERS. I wouldn't use the word war, but there is no doubt we are in a conflict.

Senator GRAHAM. If it's not a war what is it?

Admiral ROGERS. War has a very—

Senator GRAHAM. Is it a disagreement?

Admiral ROGERS. I apologize, Senator. I didn't understand the question.

Senator GRAHAM. I said, are we at war? You said, no, I think it's something else, conflict. How could you say we're not at war?

Admiral ROGERS. War has a very specific legal definition and I don't believe we've met that.

Senator GRAHAM. Do you believe that we're at war with al Qaeda and their affiliates?

Admiral ROGERS. Yes, sir. Senator, if I could, I apologize. I assumed you were talking in the cyber arena. Please accept my apologies.

Senator GRAHAM. Absolutely. My bad, my bad.

Admiral ROGERS. Yes, sir, there is no doubt—

Senator GRAHAM. No, I got you. You don't want to go down the road. I got you, no.

But we are at war in terms of radical Islam being the enemy of the Nation?

Admiral ROGERS. Yes, sir.

Senator GRAHAM. The NSA program is designed to protect us against an enemy who is hell-bent on attacking our Nation at home and throughout the world, do you agree with that?

Admiral ROGERS. Yes, sir.

Senator GRAHAM. Is it likely that there are fifth column movements already in the United States, embedded in our country, sympathetic to the enemy?

Admiral ROGERS. We've seen those kinds of actions by people in the United States sympathetic to that previously.

Senator GRAHAM. Do you believe if we had had the NSA capabilities in effect in September 2001 that we have today there's a high likelihood that we would have intercepted the attack on September 11?

Admiral ROGERS. The potential certainly would have been much greater.

Senator GRAHAM. As we reform the program, will you keep in the forefront of your thinking not to take us back to pre-September 11 capabilities?

Admiral ROGERS. Yes, sir.

Senator GRAHAM. When it comes to monitoring content of an American citizen on a phone, the NSA program is very restrictive in that regard; is that a true statement?

Admiral ROGERS. Very restrictive, sir.

Senator GRAHAM. The threat we face is very real. Major Hassan, are you familiar with that gentleman?

Admiral ROGERS. At Fort Hood, I believe, yes, sir.

Senator GRAHAM. How could he, a major in the U.S. Army, communicate on the Internet with Anwar Awlaki, a leader of al Qaeda in Yemen, an American citizen, and we not understand that or not find out about, detect that? Do you know?

Admiral ROGERS. No, sir, other than to say in general I believe he took advantage of the protections afforded to our citizens.

Senator GRAHAM. Could you do me a favor and evaluate how we missed Major Hassan? Because I believe in privacy and transparency, but I believe that any system that's going to protect America from an attack has to be able to pick up a communication from a major in the U.S. Army with one of the leading terrorists in the world. If we can't do that, something's wrong. Would you please go back, evaluate how we missed Major Hassan? If we need to change the law to catch future Major Hassans, I would like to help you in that endeavor.

[The information referred to follows:]

Many factors contributed to the outcome of the 2009 Fort Hood incident and I'm not in a position to identify the specific or primary ones. This has been the subject of extensive study by the Department of Defense Independent Review Panel and by the Senate Homeland Security and Government Affairs Committee and I refer you to the reports that detail their respective investigations into the Fort Hood shooting and recommendations to prevent future incidents. Both reports are authoritative and comprehensive.

Senator GRAHAM. The Boston attack. Is it fair to say that our ability to pick, intercept communications, identify the perpetrators

fairly quickly, gave us some lead time about anything they may have been planning in New York?

Admiral ROGERS. Yes, sir.

Senator GRAHAM. When it comes to being at war with radical Islam, do you consider the Homeland one of their chief targets?

Admiral ROGERS. Yes, sir.

Senator GRAHAM. If they could attack any place in the world, the top priority would probably be here at home?

Admiral ROGERS. Yes, sir.

Senator GRAHAM. Now, when it comes to reforming this program, how much can we talk about how the program works before we destroy its ability to protect us?

Admiral ROGERS. There's clearly always an element there that we don't want to divulge sources and methods.

Senator GRAHAM. Would you say that the discussions about how this program works and the details probably have already helped the enemy in terms of being able to adapt?

Admiral ROGERS. It's given them greater insights into what we do and how we do it.

Senator GRAHAM. Is it fair to say that the enemy, when they communicate, uses commercial networks like the rest of us?

Admiral ROGERS. Yes, sir.

Senator GRAHAM. The only way we'll be able to detect what they're up to is to be able to access these commercial networks in a reasonable fashion?

Admiral ROGERS. Yes, sir.

Senator GRAHAM. Do you agree with me that the only way to deter them is to prevent them from attacking us, because killing them is not a deterrent? They welcome death. The best way to protect us against radical Islam is to find out what they're up to and hit them or stop them before they hit us? Is that the world in which we live in?

Admiral ROGERS. Yes, sir.

Senator GRAHAM. Thank you.

Chairman LEVIN. Thank you, Senator Graham.

Senator Reed.

Senator REED. Thank you very much, Mr. Chairman. Thank you, gentlemen and your families, for your devoted service to the Nation.

Let me begin with General Selva. General, one of the important components to TRANSCOM is the CRAF. Your agency is studying the relationships and what we do now, as we reset after significant extensions in Afghanistan and Iraq and around the globe. Can you give us an idea, a preliminary idea at least, of what we have to do to ensure the CRAF program continues to support our wartime needs, and any highlights of the study that are ready for prime time?

General SELVA. Senator, inside the relationship with the CRAF we have 28 separate carriers that provide cargo and passenger services, each with their own business plan, each with their own motivation for how they run their businesses. Part of the study was to get at the eachs of how the industry runs and get at the broad macroeconomics of how the industry is going to evolve over time.

We've put those two big pieces together. We're now working with the senior executives in those individual carriers to come to some agreement on what a contract mechanism might look like to incentivize their volunteer service in the CRAF. As you may be aware, the policy that governs how we manage, National Airlift Policy, was last updated in 1987. This study is the first major effort post-Desert Storm to get at what the economics of the industry look like and how they affect our relationship with the CRAF.

I fully expect, based on my interaction with senior executives from many of the airlines, that their volunteerism will continue. The question is how do we make it a meaningful business incentive for them to do that.

Senator REED. Do you anticipate any legislative requirements that you would have that would help you achieve a more efficient outcome for the Government?

General SELVA. Senator, based on the preliminary work we've done in the study and our interaction with the carriers, I don't believe any legislative changes are required to the National Airlift Policy to make us successful.

Senator REED. But if they do, you will inform us?

General SELVA. Yes, sir, absolutely.

Senator REED. Thank you.

Admiral Rogers, congratulations. I don't know if that's in order or not, but congratulations.

Admiral ROGERS. Thank you.

Senator REED. You have two huge responsibilities, CYBERCOM, which is a DOD function, and the NSA. In your organization are you going to have, or are you contemplating having, principal deputies that would essentially focus exclusively on one or the other?

Admiral ROGERS. Yes, sir. Each organization has its own deputy and a complete operational organization.

Senator REED. There are no changes at this time in those deputies?

Admiral ROGERS. I believe you may see the CYBERCOM deputy changing in the course of the next few months. But that's again part of the normal rotation.

Senator REED. Part of the anticipated rotation, et cetera. There'll be the overlap, et cetera.

Let me change gears slightly. We've all recognized the growing importance of cyber in every capacity, and I think the lessons of history suggest that the more we practice the better we are when the game starts. To my mind, I don't think we've had the kind of coordinated exercises between CYBERCOM, the NSA, the Department of Homeland Security, every other agency, which basically would confirm what we believe and maybe give us some surprises about what we don't know. Is that your impression, too?

Admiral ROGERS. I think we've done a good job of exercising within the Department. As we bring more capability, more capacity, on line, I think the next major evolution for us is how do we exercise more broadly across the U.S. Government in applying those capabilities.

Senator REED. Then also there's the issue of not only across the U.S. Government, but also reaching out to utilities, both financial utilities and public utilities. Is that something where again you

would need either funding or authorization or encouragement from Congress?

Admiral ROGERS. At this stage of the game, I don't know. But I do make the commitment that if I am confirmed I will assess that, and if I believe that money or authorities or support from the legislative side is required I will approach you.

Senator REED. I would encourage you to do that, because again I think there are so many different moving parts in these issues that you're addressing, not just in terms of operational, but privacy, constitutional, policy, commercial enterprises versus Government enterprises, not-for-profits, that I think this exercise would be hugely important. This is probably not the most precise analogy, but when we saw war beginning in 1939 and 1940 we learned a lot in the Louisiana maneuvers. In fact, we discovered some very capable leadership down there that was in the junior ranks and vaulted over some others very quickly when the war started.

I don't sense we've actually done that in the scale that we talked about. I would urge you to look very quickly and get back to us very quickly in terms of what we have to do to assist you.

Again, I think both of you gentlemen bring extraordinary dedication and service, and not just yourselves personally but your families. Also, I think you bring appreciation that all of what we do ultimately is about the young men and women who wear the uniform, that really are in harm's way. For what you do for them, I thank you.

Chairman LEVIN. Thank you, Senator Reed.

Senator WICKER.

Senator WICKER. Thank you, Mr. Chairman.

Thanks to both of our witnesses today. Let me try to be brief.

General Selva, I want to talk about moving C-130Js from Keesler Air Force Base. But let me say that DOD wants to do another base realignment and closure (BRAC) round, and often we hear Defense officials say it's not going to be like the 2005 BRAC round. They say: Our days of spending lots of money just moving things around that won't result in financial savings, those days are over. Yet with the Air Force plans to shut down the 815th Airlift Squadron and their Active Duty partners, the 345th Airlift Squadron, and move the squadron of C-130J aircraft away from Keesler Air Force Base, it seems to me the reasons have never been fully explained.

The official announcement came yesterday. I have a news report from WLOX of Biloxi, MS, which says Keesler Air Force Base will lose 10 aircraft from the 403rd Wing under proposed defense cuts presented to Congress on Monday. The Air Force Reserve Command plans to transfer the 10 C-130J aircraft to the newly reactivated—newly reactivated—913th Airlift Group in Little Rock.

First, I'm willing to work with the Air Force in making overall savings. Every Senator is going to defend our own bases. But if this is going to help the greater good, count me in to be your teammate here.

But first these aircraft were going to go to Dobbins in Georgia. The Air Force abandoned that, and then they were going to send them to Pope Field to the 44th Airlift Wing in North Carolina. Now that wing's going to be deactivated, and we're newly reactivating

an airlift group at Little Rock and sending these C-130Js from Keesler to Little Rock Air Force Base, to this newly reactivated group.

The taxpayers have spent millions of dollars to provide Keesler Air Force Base with state of the art modern hangars and facilities. As a matter of fact, Keesler has enough space to house two squadrons. Yet the Air Force continues to propose to spend millions of dollars to move these aircraft away.

I just want you to help us understand at the committee level the reason for this. Of course, the move would also cause serious disruptions to the unit's personnel and their families, and that happens every time there's a move. I just want to ask you three direct questions, General:

How much will this move cost?

General SELVA. Senator, my understanding is that the move itself is cost-neutral to Little Rock. The savings are on the order of 600 manpower billets across the Air Force Reserve specifically as the Reserves looked at this decision, which equates to about \$100 million across the Future Years Defense Program (FYDP) for savings.

Senator WICKER. Okay. Is there going to be any military construction (MILCON) needed at Little Rock to accomplish this move?

General SELVA. Not to my knowledge.

Senator WICKER. Now, I want you to supply me a statement then on the record, not to your knowledge. I want you to be able to look us in the eye on this committee, General, and assure us that not \$1 of MILCON is going to be needed to accomplish this move.

General SELVA. Sir, I'll look into the costs of the move from the specifics of what might be required at Little Rock that wouldn't either be required at Pope or any other location where we would base that unit.

Senator WICKER. It is your testimony that moving these 10 aircraft from a base where there's already modern hangars and facilities to a new base is actually going to save enough money to offset the cost of making this move?

General SELVA. Senator, based on the consultations I've had with the Air Force Reserve Command in their making this decision and recommending it to the Air Force, my understanding is that they will save upwards of 600 manpower billets and that will save us \$100 million across the FYDP, and that it's a reasonable thing to do.

Senator WICKER. I want you to get back to us with the specific numbers there.

[The information referred to follows:]

Proposed C-130 fleet reductions in the fiscal year 2015 President's budget, including deactivation of Air Force Reserve Command's 440th Airlift Wing at Pope Army Air Field and Air Force Reserve Command's consolidation at Little Rock Air Force Base from 15 C-130Hs to 10 C-130Js, combined with the existing infrastructure at Little Rock Air Force Base results in no additional MILCON needed to integrate Air Force Reserve Command's 10 C-130J aircraft at Little Rock Air Force Base.

Senator WICKER. Let me just follow up on Senator Manchin's question about equipment being left in Afghanistan. I think your

testimony was that you really weren't in a position to comment about equipment left in Iraq, is that correct?

General SELVA. Sir, I'm not in a position to testify about the details of the equipment left in Iraq because I wasn't in that decision process.

Senator WICKER. Okay, but you are going to get back with the committee and with Senator Manchin on some follow-up answers regarding equipment being left in Afghanistan, is that correct?

General SELVA. Senator, the decisions on equipment left in Afghanistan will be up to General Austin in CENTCOM and General Dunford in ISAF, as well as our DOD leadership. The comment I made to Senator Manchin was there is some equipment that would normally be left in Afghanistan as a result of the value of the equipment, the residual value of the equipment, being less than the transportation costs in having to bring it home.

Senator WICKER. Are you going to be able to get back to the committee about the factors there or do you suggest that Senator Manchin and I look elsewhere?

General SELVA. Sir, I would have to consult with General Austin and General Dunford—

Senator WICKER. It's a question for another command?

General SELVA. Yes, sir.

Senator WICKER. Okay. But it goes without saying—number one, we're going to leave friends there. Hopefully we're going to leave a follow-on force.

General SELVA. Yes, sir.

Senator WICKER. Hopefully, we're going to try to continue to be successful in Afghanistan. There are some forces that are going to need this equipment.

Second, there would be a cost to the taxpayers of transporting some of this equipment back that's not going to be necessary for us to be successful in the long haul, and it would make no sense to spend the money to bring it back if it's going to cost more. Would that be a fair statement?

General SELVA. That's correct, sir.

Senator WICKER. Thank you very much. Good luck to both of you.

Chairman LEVIN. Thank you, Senator Wicker.

Let me interrupt just for one second. The first vote has now begun. I believe it's the first of four that are scheduled. After Senator Vitter, I think that Senator Kaine is coming back, and if there are no other Senators I'm then going to ask Senator Kaine, who is coming back I understand, to close off, unless Senator Inhofe has a different plan. Thank you.

Senator Vitter.

Senator VITTER. Thank you, Mr. Chairman, and thanks to our witnesses for all of your service and for being here.

Admiral Rogers, do you think that CYBERCOM has the necessary supporting policies and authorities and relationships and the will to act? Are all of those in place, and if you would supplement any of those what additional authorities or policies would you like to see?

Admiral ROGERS. In general, my immediate answer would be yes. I think as I've already indicated, that the things I think we need to continue to work on are this idea of deterrence, this idea of de-

veloping norms within the cyber arena. That's going to be much broader than just CYBERCOM, but clearly CYBERCOM I believe is part of that dialogue.

Senator VITTER. But within CYBERCOM, do you have the authorities and the policies you need to do all of that effectively?

Admiral ROGERS. Yes, sir.

If I could, and if I am confirmed and my experience leads me to believe otherwise in actually executing the mission, I will come back.

Senator VITTER. Okay. In your statement you said, "The level of expertise required to conduct potentially damaging operations has steadily lowered, enabling less capable actors to achieve some level of effect." How does this impact our allies and foreign partners and our ability to work with them?

Admiral ROGERS. I think it increases the level of risk for all of us, for all of our partners.

Senator VITTER. Is it in particular a problem when we have allies and partners with less capable defenses than we do, and how do you handle that?

Admiral ROGERS. Yes, sir, and I think one of the ways we handle that is through strong, broad partnerships. We have a strong dialogue in the cyber arena now with many of our allies and partners. We need to continue to build on that.

Senator VITTER. I know the Pentagon, for instance, wants more NATO members to have more access to unmanned aircraft. Are there particular issues or threats or vulnerabilities related to that, given these advanced opportunities for our enemies to have an effect?

Admiral ROGERS. Yes, sir, there clearly is a risk there.

Senator VITTER. How do we mitigate and hedge against that risk?

Admiral ROGERS. I think we ask ourselves what can we do to try to mitigate that risk, whether it's changes to the physical systems on those aircraft themselves, whether it's asking ourselves what kind of tactics, techniques, and procedures are we doing that can help maximize our attempts to mitigate that risk.

Senator VITTER. Are those risks ever such that, with regard to particular systems, we would change our mind in terms of a transfer to an ally?

Admiral ROGERS. Clearly it would be on a case-by-case basis. None that I'm currently aware of.

Senator VITTER. Okay. Last week the press reported that Russia had used cyber-attacks against Ukrainian telecommunications, to hamper Ukrainian leadership's ability to access that. Do you agree that Russia has very sophisticated cyber capabilities, and if they use them that could impart considerable damage to Ukraine's critical infrastructure?

Admiral ROGERS. Yes, sir, I would agree with both of those statements.

Senator VITTER. I want to move to Guard and Reserve, Admiral Rogers. A lot of us are interested in better integrating and using, leveraging, Guard and Reserve capabilities. Clearly it's a long-term trend that the Guard and Reserve are much more in the middle of any effort, any fight we have. What specifically is CYBERCOM

doing to ensure that the Guard and Reserve components are being fully utilized and maximized?

Admiral ROGERS. First, CYBERCOM is part of that broader departmental discussion, that review that's ongoing right now, that is scheduled to be finished by July, that's designed to take a look at the mission analysis associated with asking ourselves just what kind of Reserve capability in the cyber arena do we need, how do we bring it to bear, how do we structure the Reserve component to maximize its effectiveness and its part in this mission.

In addition, CYBERCOM currently has an ongoing series of exercises designed to exercise with Guard units in the cyber arena. CYBERCOM also has an ongoing dialogue and is part of a broader dialogue with governors and the adjutant generals as we work our way forward to figure out what's the best way to maximize that capability, and we have to maximize that capability.

Senator VITTER. I would underscore and encourage that with regard to CYBERCOM in particular. As I hope you know, there's particular language in the last defense authorization bill requiring maximization of that with regard to the Guard and Reserve. I would really commend that to your focus and attention.

A final question. I think some of your comments have gone to the fact that appropriate leadership needs to make the case more fully and publicly and persuasively for the use of important authorities that do exist and lay that out in layman's terms, if you will, why it's important. In that spirit, can you talk to a capability that has been fairly hotly debated, which is the use of geographic information regarding cellphones?

Admiral ROGERS. To be honest, sir, it's not an issue I have yet delved deeply into. It's one of those things I need to get specifically smarter on to be prepared to discuss very publicly. I think that's an important part of that public discussion.

Senator VITTER. If you could look at that and maybe supplement the record in writing with regard to your thoughts on that, I would appreciate it.

Admiral ROGERS. Yes, sir.

[The information referred to follows:]

I appreciate that there has been some concern raised about whether the National Security Agency (NSA) would seek to obtain Cell Site Location Information (CSLI) under section 215 of the Patriot Act. CSLI provides identifying information for the cell tower used initially to place or receive the call. While CSLI identifies the tower, it does not reveal the precise location of the mobile device used to place or receive the call. As detailed in several declassified court orders by the Foreign Intelligence Surveillance Court (FISC), NSA is not authorized to obtain CSLI as part of the section 215 Telephony Metadata Program. Accordingly, should NSA seek to obtain CSLI under section 215 at a future point in time it would need to obtain the approval of the FISC. It is important to note, however, that CSLI is potentially useful intelligence information in many other contexts, such as counterterrorism investigations and in support of U.S. military and intelligence operations abroad. For example, it could well be that knowing the general location where a terrorist was located or where an individual in contact with a terrorist was located when a call was made would be a key piece of information to those responsible for protecting the Homeland.

Senator VITTER. That's all I have. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Vitter.

Senator Kaine, when you're done, we're in the middle of a vote now—you have voted on this one, have you?

Senator Kaine. I have, Mr. Chairman.

Chairman Levin. If you could then turn it over to whoever is here next in line, I'd appreciate it.

Senator Kaine. I will. Thank you, Mr. Chairman.

Thanks to the witnesses for your service and for your testimony today. My questions will be primarily for Admiral Rogers.

I have a little bit of an unorthodox view of some of these challenges about NSA programs. Many of my colleagues talk about these programs as if the solution to controversies is fixing the programs themselves, and I actually think the bigger challenge is many of these programs are being carried out pursuant to a vaguely defined war or conflict.

Admiral Rogers, twice during your testimony today I think your testimony has at the vague notion of what we are, in fact, in. You indicated that you thought Edward Snowden's revelations were wrong and that they cost American lives, but you hesitated about whether to use the word traitor to describe Edward Snowden. When you were asked by Senator Graham whether we were at war, you said we're in a hostility or disagreement. But then there was a misunderstanding in terms of what he was asking. You thought he was asking about a cyber-war in particular; you understood that we're in a war on terror.

My concern is we are carrying out a whole series of military actions and intelligence programs that are being done pursuant to an authorization for use of military force that was done on September 14, 2001, that has no temporal limitation, that has no geographic limitation, and that has been defined by both the Bush and Obama administrations to extend to taking action not only against those who planned the September 11 attack, but against associated forces. That language does not appear in the authorization, but it has been the administrations', both administrations', decision about what that authorization means.

We are currently in a war, but the war does not have a geographic limitation. It does not have any kind of a temporal limitation. It doesn't have an expiration date. This committee held a hearing on the authorization for use of military force in May. I asked Obama administration witnesses when does this war end, and they said: We're not sure; it could be 25 or 30 years.

I asked Obama administration witnesses: If someone who is born in 2020 and when they're 15 years old in 2035 joins an organization that is associated with al Qaeda that only popped up then, that has no designs against the United States, does the authorization allow us to take military action against that individual or that group? The answer was yes.

There is no reform that we're going to be able to make to any of these NSA programs that I think will answer the questions of our citizens or civilians if our intelligence-gathering operation is done in a significant way pursuant to an open-ended military authorization. The questions that you received about the dual-hatted nature of your job—you're part of a military command that is executing an authorization that has no limitation whatsoever for all practical purposes, and you're also in an NSA position where you're gathering intelligence.

I feel like the challenge about limiting these NSA programs or trying to find the right balance between fighting terrorism, stopping evil, and protecting citizens' rights—we can do anything we want within the four corners of the programs. If we do not as a Congress revisit the 2001 authorization and try to put some sense of definition and scope to it—open-ended, it could be a war for another 25 or 30 years—we'll continue to have witnesses, sharp witnesses who are very talented, who will come before us and will have difficulty describing exactly what we're in the middle of because the primary job of Congress is to give some definition at the front end in terms of what the mission is. It's the military and the Commander in Chief that have to execute the mission.

But Congress has given no definition of what it is we are doing at this point, and we will always have controversies in my opinion going forward.

Now, Admiral Rogers, in your advance policy questions you were asked about what constitutes use of force in cyber space in relation to the War Powers Act, the exercise of the right of self-defense under the United Nations (U.N.) Charter, and also the triggering of collective defense obligations. I'd like if you could just elaborate a little bit on that answer today, use of force in cyber space and how in your view that triggers either the war powers or other obligations that the United States has.

Admiral ROGERS. I'd be first to admit, I apologize, of the 120 questions I was asked, I don't remember word for word the specifics. Please, accept my apologies.

Senator KAINE. Yes, indeed. What are unique challenges in defining "war" in cyber space, what war is, what hostilities are, what military action is?

Admiral ROGERS. Clearly, from a policy perspective we are still trying to work our way through those issues. The tenets I think that are applicable here are the fact that, whatever we do within the cyber arena, international law will pertain; that if we find ourselves getting to a point where we believe that cyber is taking us down an armed conflict scenario, that the rules and the law of armed conflict will pertain every bit as much in this domain as it does in any other.

I don't think cyber is inherently different in that regard. I think those sets of procedures, those sets of policies and law, as a Nation have stood us in good stead. I think they represent a good point of departure for us.

Senator KAINE. The phrase you used I think is an interesting one: If we believe that cyber activity is taking us down the path to armed conflict, then international law would apply. Would it be your view then that pure cyber war—somebody wipes out our grid and then we think about taking activity to respond—is that not war? It could have huge effect on human life. It could have huge effect on the economies of the two nations. Is that not war unless it then leads to armed conflict?

Admiral ROGERS. No, certainly I believe that an offensive, destructive act that has significant impact for us, I believe now we're starting to get on the boundaries of is that an act of war. Now, everything varies on a case by case basis and I'm always concerned about broad general statements.

Senator KAINE. Right. It is just that question. We do have some important definitional work to do. The absence of a cyber-bill makes this all harder for all of us.

Let's switch topics. Yesterday I visited Northern Virginia Community College and was fortunate to be there at a time where there was a meeting of the DC-based organization CyberWatch, which was set up a number of years ago to help colleges, community colleges, and the private sector, coordinate what they think are the skills that our cyber professionals need. It's a work force organization.

I was interested that someone from DOD is not commonly around that table and I might want to follow up separately to suggest that that would be a good avenue for participation.

There has been testimony—General Alexander was here last week—on the need for 133 cyber mission teams managed by 6,000 highly trained personnel by 2016. As the leader of CYBERCOM, what will be your approach on these recruiting and training issues? Because, first, the need is intense; and second, the competition from the private sector is also very intense for people with this skill set. What will your approach be to staffing out this important mission?

Admiral ROGERS. First, each of the Services continues to pay particular attention to this in their responsibilities to man, train, and equip the cyber force. As the Navy individual right now, to be honest, on the uniformed side our experience has exceeded our expectations. We have been able to recruit quality individuals and retain them. It's something I, in my current duties, continue to pay close attention to: What are the indicators that would suggest that potentially that is changing?

In some ways, the civilian side I think represents an even potentially greater challenge. I think we need to look at incentives, whether that be pay, whether that be the ability to focus these individuals in particular areas for extended periods of time, in ways that traditionally we don't do now. I think we'll need to look at all of that.

Senator KAINE. When you say the civilian side, you mean to do the work of CYBERCOM it takes a real balance of Service branch personnel, but also DOD civilians.

Admiral ROGERS. Yes, sir.

Senator KAINE. There has to be a good mixture.

Admiral ROGERS. Yes, sir.

Senator KAINE [presiding]. My time is up and all who are here for first rounds of questions are done. Is there a second round of questions? Ranking Member Inhofe?

Senator INHOFE. Yes, Mr. Chairman. If you'd like to go ahead and continue, you could. I know that Senator Cruz is coming back, although you were involved, starting to talk about something that I unsuccessfully was trying to get at during my time, and that is this threat. I just fail to see that there's a major difference between someone who is attacking us, depending on what kind of weapon they're using, and this weapon of cyber attack.

Let me ask you, Admiral Rogers, do you believe we're deterring or dissuading our adversaries in cyber space and out? Do you think we're deterring them?

Admiral ROGERS. Not to the extent we need to, sir, no.

Senator INHOFE. Do you know what cyber deterrence looks like?

Admiral ROGERS. No, sir. We're still working our way—

Senator INHOFE. That's the problem. There's not a lot of the public out there that is aware of the significance of what's going on. When I talk to people out there about what Iran's capabilities are, what they're going to be next year. We talk about a weapon, we talk about a delivery system, they understand that, but not cyber attack. I look at this and I just think that the Senator from Virginia was really onto something. A war is a war, and I think we're going to have to elevate the threat that we're talking about in this committee and you'll be dealing with, both of you are going to be dealing with, to the level of a military threat, because I think most people are not really aware of that.

General Selva, DOD uses rail primarily for large training exercises and deployments. It also depends on the rail industry to be ready to meet DOD's surge requirements. What is your assessment of the rail industry to support DOD's requirements?

General SELVA. Senator, I'm not in a position as the Air Mobility Command Commander to give you a definitive answer other than to say that, having consulted with TRANSCOM, the recent work that's been done to look at the number of available rail cars and the status of the rail infrastructure in the Nation is in the hands of the TRANSCOM Evaluation and Assessments Division. I'll be happy to take a look into that data once I have an opportunity to do that if confirmed. But it's so far out of the area of my expertise right now, it wouldn't be appropriate for me to give you a definitive comment.

Senator INHOFE. Admiral Rogers, I mentioned earlier that I have gotten to know the outgoing man in charge, General Alexander, quite well, and I've had a chance to talk to him some time ago, early on. I think he's really done an excellent job and he has informed me that you have the type of background that is going to be able to do the same thing. I would just hope that we could work together in getting this, raising this in the eyes and the views of the public so that people understand how real the threat is out there. I look forward to working with you.

Senator KAINE. Thank you, Ranking Member Inhofe.

Senator Cruz.

Senator CRUZ. Thank you, Senator Kaine.

General, Admiral, thank you both for being here. Thank you both for your long and distinguished service to our Nation.

Admiral, I'd like to talk some about the NSA's policies. I have long expressed concerns about the NSA's policies on really two fronts: one, an overbroad intrusion into the privacy rights of law-abiding citizens; and two, a pattern of not focusing sufficiently on bad actors and not collecting the information, the intelligence needed to prevent terrorist acts. It seems to me the focus overall of our intelligence and defense community and law enforcement community is directed far too much at law-abiding citizens and far too little at individualized bad actors. I'd like to ask you questions on both fronts.

Starting out with the citizenry at large: As you're aware, President Obama's Review Group on Intelligence and Communications

Technology has said that the bulk metadata collected by the NSA should be held by a third party, and the Privacy and Civil Liberties Oversight Board has recommended ending bulk metadata collection altogether. Do you agree with either of these proposals?

Admiral ROGERS. In terms of pulling the data from the NSA, yes, I believe that there is a standard that we can work toward that would enable us to do that while still meeting the requirements of generating the intelligence we need and ensuring the protection of U.S. citizens.

Sir, would you mind repeating the second portion?

Senator CRUZ. The second portion was that the Privacy and Civil Liberties Oversight Board recommended ending bulk metadata collection altogether, and I was asking if you agree with that recommendation.

Admiral ROGERS. No, sir, I would not. I believe we can still do this in a way that ensure the protection of our citizens while also providing us insights that generate value.

Senator CRUZ. But you believe that the information should not be held by the U.S. Government, is that correct?

Admiral ROGERS. I support the President's decision to shift that from the NSA.

Senator CRUZ. If confirmed, what would be a timetable for implementing that reform?

Admiral ROGERS. To be honest, sir, I don't know. I'm just not smart enough yet about the particulars. It'll be driven by the solution that we come up with. That dialogue is ongoing right now. I haven't been a part of that as a nominee.

Senator CRUZ. Will you commit, if confirmed, to working with members of this committee to implement it expeditiously?

Admiral ROGERS. Yes, sir.

Senator CRUZ. I want to ask more generally. The Fourth Amendment protects the privacy of law-abiding Americans. What is your view of the appropriate limitations on the ability of the Government to search through phone or email communications of law-abiding citizens not accused or under suspicion of any wrongdoing?

Admiral ROGERS. I believe such searches should not be done without a corresponding legal framework for their execution.

Senator CRUZ. Does that framework in your judgment require individualized suspicion?

Admiral ROGERS. I think it varies by the specifics of the threat that we're talking about, which is one reason why the metadata approach I think was taken to try to address that, to deal with no content, no names, no geographic locations, to try to strike that balance, if you will.

Senator CRUZ. Would you agree that for the Government to intercept content from telephones or emails requires under the Fourth Amendment individualized suspicion and some form of judicial oversight?

Admiral ROGERS. I don't know that I would make a blanket statement. Again, sir, I apologize; I am not a lawyer and you're asking me about the specifics of the law and it's just not an area of my expertise.

Senator CRUZ. I would ask after this hearing if you would follow up and answer that question in writing, and you can certainly con-

sult with counsel. But the relevance of the Fourth Amendment in terms of how you would implement the policies at the NSA I think is a question of great interest to a great many citizens, and the Government collecting metadata or even more so the content of communications between law-abiding citizens is an issue that the Constitution I believe speaks very directly to. I would appreciate your expanded answer in writing after this hearing.

[The information referred to follows:]

Admiral ROGERS. It is certainly the case that Americans are protected by the Fourth Amendment from unreasonable searches and I am fully committed to protecting this and all other rights of Americans. As to the requirements of the Fourth Amendment for the Government to intercept content from telephone calls or emails, I understand that this legal doctrine is the subject of numerous Supreme Court decisions and that those requirements would depend on the particular facts and circumstances of a given situation. Under the Foreign Intelligence Surveillance Act, absent limited exceptions such as an emergency, the National Security Agency may not target any unconsenting U.S. person anywhere in the world under circumstances in which the U.S. person would enjoy a reasonable expectation of privacy without an individualized determination of probable cause by a Federal judge that the target is a foreign power or agent of a foreign power.

Senator CRUZ. I'd like to shift to the other side, to the concern that I have that we are devoting far too many resources looking at law-abiding citizens and far too few resources looking at the bad guys. With regard, for example, to the Boston bombing, the Tsarnaev brothers, we had been notified by Russia that in their judgment they were having communications and may be radical Islamic terrorists. The elder Tsarnaev brother posted and advertised his desire for jihad on YouTube, not exactly a secure, hidden communication, but publicly for the world to see.

Yet, even though we knew this individual or had reason to know this individual was a radical Islamic terrorist, and even though he was publicly proclaiming his desire for jihad, we failed to prevent that tragic bombing in Boston. I'd like to ask you, why do you think that was and what can we do to correct it so we don't fail to prevent the next Boston bombing?

Admiral ROGERS. The reality is, sir, I don't know the specifics of the Boston bombing. It's not an element of my current duties and it's not something I have express direct knowledge of. I think to comment knowingly I would need that kind of knowledge.

Senator CRUZ. A second example deals with Major Nidal Hassan and the Fort Hood murders. In that instance, Hassan had traded some 18 emails with radical Islamic cleric Anwar al-Awlaki, a known terrorist leader who was a spiritual adviser of the September 11 bombers. This is not some extraneous person. This is someone known to be a serious threat to this country, and a major in the military is communicating repeatedly by email with him.

Despite all of our surveillance capabilities, we failed to prevent that horrific terrorist attack at Fort Hood that claimed the lives of 14 innocents. In your judgment, why was that? What could we have done better to prevent that?

Admiral ROGERS. To be honest, I answered that question to Senator Graham.

Senator CRUZ. Let me suggest more broadly on both of these that it would be a far better allocation of resources in the NSA and in our efforts to prevent terrorism generally if much more resources were directed to targeting those who we have reason to know are

dangerous, we have reason to know are or may be radical Islamic terrorists, and less resources were devoted and less energy was devoted to broader interception and surveillance of the law-abiding citizenry.

It has struck me for some time that the priorities have been backwards and we ought to be targeting the bad guys and protecting innocents from terrorist attacks and at the same time respecting the constitutional rights of every American.

Thank you, Admiral. Thank you, General.

Senator KAINE. Thank you, Senator Cruz.

Senator Inhofe, any additional questions for a second round of questioning?

Senator INHOFE. No.

Senator KAINE. Seeing none, I thank the witnesses for your appearance today and for your patience as we were going back and forth to vote. We appreciate your service and this hearing is adjourned.

[Whereupon, at 12:00 p.m., the committee adjourned.]

[Prepared questions submitted to Gen. Paul J. Selva, USAF, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I believe Goldwater-Nichols has transformed the Department of Defense (DOD) for the better and it has led to an unprecedented level of cooperation and understanding between the Services. Over the last 28 years, DOD and the military have fully embraced joint, interdependent operations. Having the opportunity to serve in multiple joint tours and now as Commander of Air Mobility Command, I have seen first-hand how we continue to improve our joint capabilities, ultimately producing a more effective means to grow the officers who are capable of leading our soldiers, sailors, airmen, and marines as a joint force.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I have no suggestions for altering Goldwater-Nichols at present, but I do recognize the need to continuously review and improve the framework in which DOD operates. If confirmed, I will work with Congress, the Secretary of Defense and other senior leaders of our military to ensure Goldwater-Nichols continues to meet the needs of our Armed Forces and champion any changes to the legislation that might become necessary.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, U.S. Transportation Command (TRANSCOM)?

Answer. The mission of the Commander, TRANSCOM is to provide air, land and sea transportation for DOD, in peace, crisis, and war. TRANSCOM relies on three Component Commands—Air Mobility Command (AMC), Military Sealift Command (MSC), and the Military Surface Deployment and Distribution Command (SDDC)—to accomplish this mission. The Commander has been assigned numerous responsibilities in the Unified Command Plan (UCP) to include the Distribution Process Owner (DPO) mission to improve the worldwide DOD distribution system; DOD single manager for global patient movement; Global Distribution Synchronizer (GDS)

mission for synchronizing Phase 0 distribution operations; and facilitating the rapid establishment of joint force headquarters for combatant commanders through its subordinate command, Joint Enabling Capabilities Command. The TRANSCOM Team utilizes a blend of Active and Reserve Forces, civilian employees, and commercial industry partners to meet the command mission in support of a full range of military operations.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. Throughout my military career, I have had the opportunity to be in positions that have prepared me, if confirmed, to perform the duties as the Commander of TRANSCOM.

As the Assistant to the Chairman, Joint Chiefs of Staff, I had the opportunity to serve as an advisor to the Secretary of State and senior State Department leaders. In that capacity I worked directly with senior diplomats strengthening our relationship with allies, partners and friends, and building partnerships with foreign governments and international and non-governmental organizations.

As a previous Director of Operations in TRANSCOM, I directed and synchronized the Defense Transportation System with national distribution processes to meet national security objectives. During my tenure I was responsible for day-to-day operations of the transportation and logistics networks that supported our forces engaged in combat in both Iraq and Afghanistan and supported humanitarian relief and disaster response operations at home and abroad.

Finally, in my current capacity as Commander, Air Mobility Command, the Air Component of TRANSCOM, I command over 130,000 airmen from across our Air Force, Active, Reserve, and Air National Guard who provide worldwide cargo and passenger delivery, aerial refueling, special air mission and aeromedical evacuation. This includes the crucial role of humanitarian assistance and disaster relief to victims of natural disasters both at home and around the world.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, TRANSCOM?

Answer. As a previous Director of Operations for TRANSCOM and as the current commander of one of TRANSCOM's Service components, I am aware of the command's global responsibilities. If confirmed, I will personally engage with all of TRANSCOM's component commands, DOD agencies, and commercial partners to ensure I fully understand the scope of the issues they face in order to execute this critical duty.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, U.S. Transportation Command to the following offices:

The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense has full power and authority to act for the Secretary of Defense when serving as his designated representative in the Secretary's absence. As such, the Commander TRANSCOM will report to and through the Deputy Secretary when serving in that capacity. The Deputy Secretary also serves as the Chief Management Officer of DOD to optimize the business environment across the Defense enterprise. TRANSCOM supports such optimization to improve our support to the other combatant commands, at best value to the Nation.

Question. The Under Secretaries of Defense.

Answer. Under Secretaries of Defense coordinate and exchange information with DOD components, including combatant commands, which have collateral or related functions. In practice, this coordination and exchange is normally routed through the Chairman of the Joint Chiefs of Staff. In addition, as the DPO, the TRANSCOM commander receives oversight from the Under Secretary of Defense for Acquisition, Technology, and Logistics in his role as the Defense Logistics Executive via the Defense Logistics Board. If confirmed as a combatant commander, I will act accordingly.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman is established by title 10 as the principal military advisor to the President, the National Security Council, the Homeland Security Council, and Secretary of Defense. The Chairman serves as an advisor, and is not, according to the law, in the chain of command, which runs from the President through the Secretary to each combatant commander. The President normally directs communica-

tions between himself and the Secretary of Defense to the combatant commanders via the Chairman of the Joint Chief of Staff. This keeps the Chairman fully involved and allows the Chairman to execute his other legal responsibilities. A key responsibility of the Chairman is to speak for the combatant commanders, especially on operational requirements. If confirmed, I will keep the Chairman and the Secretary of Defense promptly informed on matters for which I would be personally accountable.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. Although the Vice Chairman does not fall within the combatant command chain of command, he is delegated full power and authority to act for the Chairman in the Chairman's absence. If confirmed as a combatant commander, I will keep the Chairman informed, but if the Vice Chairman is representing the Chairman I will keep him informed as I would the Chairman.

Question. The Director of the Joint Staff.

Answer. The Director of the Joint Staff assists the Chairman in managing the Joint Staff. The Director of the Joint Staff does not fall within the combatant commander's chain of command. However, he enables important decisions to be made as the combatant commander's staff interacts with the Joint Staff. The Director is also a key interface with Office of the Secretary of Defense principles and inter-agency leadership, and can assist combatant commanders working issues below the Chairman's level.

Question. The Secretaries of the Military Departments.

Answer. Each Service Secretary is responsible for equipping, training, maintaining, and administering forces in the Secretary's Service. Close coordination with each Service Secretary is required to ensure that there is no infringement upon the lawful responsibilities held by a Service Secretary.

Question. The Chiefs of Staff of the Services.

Answer. The Chiefs of Staff of the Services organize, train, and equip their respective forces. No combatant commander can ensure preparedness of his assigned forces without the full cooperation and support of the Service Chiefs and their respective Reserve components. As members of the Joint Chiefs of Staff, the Service Chiefs have a lawful obligation to provide military advice. The experience and judgment the Service Chiefs provide is an invaluable resource for every combatant commander. If confirmed, as Commander, TRANSCOM, I will pursue an open dialogue with the Service Chiefs and the Commandant of the U.S. Coast Guard.

Question. The other combatant commanders.

Answer. Each combatant commander is assigned specific responsibilities in the Unified Command Plan. Given the complexity of today's security environment, it is essential that all the combatant commanders work together to execute U.S. national security policy. If confirmed, I will maintain open dialogue with the other combatant commanders to foster trust and build mutual support.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges confronting the next Commander, TRANSCOM?

Answer. TRANSCOM currently has the capability to meet all surge requirements, however, long-term budget uncertainty may erode this key, asymmetric military and logistics advantage. TRANSCOM is focused on providing logistics and transportation solutions and increasing efficiencies for all its customers but if the future budgets are not addressed, its readiness, particularly the readiness of commercial partners, could be negatively impacted. Maintaining the readiness of our organic lift and sustaining the readiness of our commercial partners in an uncertain budget environment will present significant challenges to our ability to respond to crisis or conflict.

The talent and skill of the men and women that make up TRANSCOM and its component commands is the foundation of the command's success. I take very seriously the challenge and responsibility as a commander to be the champion for their readiness and to keep the entire team prepared to respond to the needs of the Nation. If confirmed, I would take an active role in preserving and enhancing the quality and expertise of TRANSCOM's personnel resources and will actively address the demand to maintain the readiness of the transportation and distribution networks to respond to crisis or conflict.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will work with my fellow combatant commanders to assess risks and develop mitigation strategies to ensure we can meet steady state and surge requirements. I will work to improve TRANSCOM's global, end-to-end ability to deliver to the point of need in the most cost-effective way possible—projecting American influence and power when and where our national interests dictate. To

do this, I will work with TRANSCOM's commercial partners and the interagency to continue to build and maintain capacity and continue TRANSCOM's efforts around the world to secure diplomatic and physical accesses to ground and airspace infrastructure for logistics. I will also leverage ongoing multi-modal efforts to optimize our operations to support the warfighter while improving the performance and efficiency of the joint deployment and distribution enterprise.

Question. If confirmed, what broad priorities would you establish?

Answer. If confirmed, my main priorities will be to support the warfighter and preserve readiness to meet national objectives. Always mindful of our obligation to make the most of our existing resources, I will continue process improvement and enterprise synchronization efforts through relationships within the Department, across the U.S. Government, and with commercial and international partners.

Question. What do you consider to be the most serious problems in the performance of the functions of the Commander, TRANSCOM?

Answer. In a resource constrained environment, the most significant area I would focus on would be improving the coordination and synchronization of the entire Joint Deployment and Distribution Enterprise—a vast network of organizations both in and out of DOD that relies heavily on commercial partnerships with industry. TRANSCOM has made great strides in improving the economies and efficiencies toward this end, and if confirmed, I will continue this work by aligning enterprise responsibilities commensurate with assigned authorities and available resources; improving our ability to rapidly build strategic distribution networks; and, institutionalizing best practices and lessons learned during more than a decade of war.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. If confirmed, I will work early to deepen strategic and personal relationships with fellow combatant commanders, TRANSCOM's components, commercial and international partners, interagency leaders and with Members of Congress. We will be challenged with difficult decisions in the near future; however, we must balance costs and benefits, matching our actions to available resources in the near term and adapting our efforts for greater economies and efficiencies in the long term.

EXPERIENCE IN MANAGING LOGISTICS OPERATIONS

Question. You have served as the Commander of the Air Mobility Command.

What steps do you believe you need to take to achieve a more complete understanding of the logistics operations of the other component commands of the TRANSCOM?

Answer. Fortunately, as a previous Director of Operations for TRANSCOM and as the current commander of one of TRANSCOM's Service components, I have an in-depth knowledge of the missions, roles and responsibilities of all facets of the TRANSCOM team. If confirmed, I will make it a priority to offer continued engagement with the component commanders, DOD agencies, and commercial partners to increase my understanding of the issues they face in order to better execute TRANSCOM's critical worldwide mission.

DISTRIBUTION PROCESS OWNER

Question. In September 2003, following a review of logistics operations, the Secretary of Defense designated the Commander, TRANSCOM, as the Distribution Process Owner (DPO). As the DPO, TRANSCOM was tasked to improve the overall efficiency and interoperability of distribution related activities—deployment, sustainment, and redeployment support during peace and war.

What is your understanding of TRANSCOM's responsibilities as the DPO?

Answer. TRANSCOM, in partnership with the Defense Logistics Agency (DLA), General Services Agency, the Services, and combatant commanders others, is responsible for constantly working to improve the effectiveness and efficiency of the DOD Distribution Network. Working with all the network stakeholders, TRANSCOM must work carefully to optimize the effectiveness and efficiency of the entire military supply chain, from factory to end user.

Question. What is your assessment of the progress has TRANSCOM made in improving the distribution process?

Answer. In the last few years our DPO Strategic Opportunities team has focused on a number of cost avoidance initiatives on both the surface and air side. Through these efforts, we have successfully reduced the amount of containers moving globally through both better utilization and a decrease in the amount of less efficient 20 foot containers used. We applied similar utilization principles to aircraft movements to reduce the overall amount of air lift. Along the same lines, we expanded use of continental United States multi-modal hubs to maximize cheaper surface movements.

Finally, we have developed methods to better manage aircraft fuel usage/purchase which is the single largest expense in aircraft operations.

Question. Do you believe that the current system needs any changes to enhance the ability of TRANSCOM to execute the responsibilities of the DPO?

Answer. I believe TRANSCOM has the necessary authorities to execute the Unified Command Plan designated responsibility of the DPO. If confirmed, I will continue the work underway in TRANSCOM's execution of the DOD Global Campaign Plan for Distribution. TRANSCOM is in its first cycle of this recently approved plan which will identify distribution issues, assess their risks, prioritize these issues and finally pursue issue resolutions. The plan has a built-in annual update to ensure it is still enhancing the Global Distribution Network. The plan sets the stage for successful execution of TRANSCOM's DPO role.

STRATEGIC AIRLIFT

Question. According to DOD, the requirement for organic strategic airlift needed to support wartime requirements has fallen to a level of 275 aircraft.

Do you agree with the plan to reduce the number of strategic airlift to a level of 275 aircraft?

Answer. Yes. The Mobility Capability Assessment (MCA) and the Mobility Requirements Capability Study concluded that in general the mobility capabilities support the strategic objectives in the 2012 National Defense Strategy. While certain scenarios presented some mobility challenges, none precluded achievement of U.S. objectives with accepted timelines and risk.

Question. What is your view of the requirements in peacetime for such organic airlift aircraft?

Answer. In peacetime, the organic airlift force flies to maintain readiness to meet its wartime mission. The organic strategic airlift fleet is able to provide 80–90 aircraft per day to meet the DOD's airlift needs.

Question. Do you believe that the Air Force could, at reasonable costs and within reasonable timeframes, reactivate some portion of the fleet of C–5 aircraft if we discover that 275 strategic airlift aircraft is not sufficient to meet our peacetime and wartime needs?

Answer. Yes. C–5s not retained in service have been placed in the Aerospace Maintenance and Regeneration Center at Davis-Monthan Air Force Base in Arizona, where they can be returned to service if needed.

Question. If we decide that 275 strategic airlift aircraft is insufficient to meet our requirements, should we consider buying more C–17 aircraft?

Answer. The purchase of additional C–17s could be one of several alternatives to consider in an Analysis of Alternatives. This option will be increasingly expensive after the production line is shut down.

NORTHERN DISTRIBUTION NETWORK

Question. The Northern Distribution Network (NDN) has been important in delivering equipment and supplies to Afghanistan, in part to reduce the U.S. reliance on supply routes through Pakistan. Yet significant portions of the NDN go through certain countries, particularly in Central Asia, that have extremely poor track records on human rights and corruption.

What do you see as the major challenges to continued use of the NDN to deliver supplies to Afghanistan or withdraw equipment from Afghanistan as we draw down forces there?

Answer. Sustainment and retrograde cargo volumes have greatly reduced with the reduction of troops in Afghanistan and the increased use of both military and commercial multi-modal operations. Should events in Ukraine strain relationships between the United States and Russia and countries strongly influenced by Russia, access to routes north of the Black Sea both for surface and over-flight movement could be limited. Additional concerns include border crossing and convoy security within the country of Afghanistan which could affect surface movement in and out of the country; if the security situation deteriorates, surface access may become very limited.

The NDN accessed through the Mediterranean and the Caspian remain open and reliable as the countries involved are deeply interested in maintaining routes which will help them build the "New Silk Road" initiative.

Question. To what extent, if any, should concerns about the human rights and corruption records of authoritarian regimes, particularly in Central Asia, be taken into account in using access to supply routes along the NDN?

Answer. The DOD agencies, Department of State (DOS), and geographic combatant commands coordinate closely to develop and maintain NDN routes to ensure an

efficient and effective means of moving warfighter cargo into and out of Afghanistan. Human rights violations as determined by the DOS, and corruption records, should be considered for participation on the NDN.

STRATEGIC SEALIFT

Question. Strategic sealift has always played a significant role in providing support to our forces overseas. Typically, we have seen strategic sealift delivering 95 percent of the equipment transported to overseas contingencies.

An important component of our strategic sealift surge capability is the Ready Reserve Force (RRF). Many of the ships in the RRF are well beyond economic service life and may need to be replaced in the near future.

What plans do you believe would be appropriate for modernizing the RRF?

Answer. The capacity provided by the RRF is critical to TRANSCOM's ability to meet its wartime requirements. In the past, the fleet capacity was increased by using authorities to purchase vessels. The capacity was then maintained using selective Extended Service Life (ESL) programs on vessels where it was appropriate. For the future, we will explore all options to find a recapitalization strategy that is cost effective and minimizes the cost of ownership of the fleet for the long term, to include purchase and ESL where it makes sense.

Question. What will the 2014 Quadrennial Defense Review (QDR) recommend for both airlift and sealift requirements?

Answer. The QDR recommended combat coded inventory (i.e. PMAI) force structure for Air Force in fiscal year 2019 is 211 strategic airlift aircraft (39 C-5, 172 C-17) and 300 tactical aircraft (C-130). The sealift requirements were not defined as main elements in the Navy fiscal year 2019 force structure. If confirmed, I will work with the Navy, U.S. Maritime Administration (MARAD), and MSC to ensure we have adequate organic and commercial sealift capacity in the future. Moreover, I would reiterate the criticality of organic and commercial mobility capability and capacity, including robust sealift and aerial refueling, which remain the foundation of our Nation's ability to project power.

Question. What is your assessment of the effectiveness of the National Defense Sealift Fund (NDSF) to facilitate resourcing sealift?

Answer. Beginning in fiscal year 2015, Navy transferred NDSF funding to other appropriations, preserving the readiness of TRANSCOM's Surge Sealift assets. TRANSCOM supports Navy's effort to be auditable in accordance with Financial Improvement and Audit Readiness standards.

Question. What would be the impact to strategic sealift if the NDSF were closed out and sealift funded out of through other Navy appropriations?

Answer. It is my understanding that this change is an internal Navy funding realignment. Appropriated funds will be used by the Navy for our strategic sealift requirements. TRANSCOM will still have full visibility over these funds.

Question. If you believe the NDSF has worked well, what is your assessment of the potential benefits that could be achieved by establishing a similar or combined airlift-sealift mobility fund to provide resources for both sealift and airlift and promote cost effective tradeoffs?

Answer. TRANSCOM's Transportation Working Capital Fund (TWCF) was established to achieve land, sea and air cost effective tradeoffs while maintaining readiness. If confirmed I would explore options to improve transportation tradeoffs as well as afford better alternatives for readiness.

Question. Are there any initiatives that you would pursue, if confirmed, to modernize or sustain our strategic sealift capability?

Answer. TRANSCOM is currently examining various cost effective options to maintain our organic sealift capacity. If confirmed, I will work with the U.S. Navy, the Maritime Administration and the Office of the Secretary of Defense to implement a cost effective and timely recapitalization strategy to ensure critical vessel capacity is not lost in the organic fleets.

MARITIME SECURITY PROGRAM

Question. Through programs like the Maritime Security Program (MSP), the Voluntary Intermodal Sealift Agreement (VISA), and the Voluntary Tanker Agreement (VTA) administered by the Maritime Administration, DOD has maintained access to U.S. commercial capabilities and transportation networks while ensuring the continued viability of both the U.S.-flag fleet and the pool of citizen mariners who man those vessels.

What is your view of the importance of these Maritime Administration programs?

Answer. The MSP, VISA, and VTA are critical to TRANSCOM's ability to meet the needs of the warfighter and the Nation. For more than a decade of operations

in Iraq and Afghanistan, our commercial sealift partners have provided the vast majority of sealift for DOD. The vessel capacity, intermodal transportation networks and the U.S. Citizen Merchant Marine are key components to TRANSCOM and its global mission.

Question. What changes in these programs, if any, do you believe are appropriate and would make them more effective or more efficient in supporting DOD transportation requirements?

Answer. The ability of these programs to meet DOD needs is directly tied to the health of the U.S.-flag international fleet, which has been declining in size for some time. Additionally, as force drawdowns continue in Afghanistan, so will the deployment and sustainment cargoes which have become a valuable piece of our commercial partners' business. In recognition of these dynamics, Congress tasked the Maritime Administration with the development of a National Maritime Strategy to ensure the health of the fleet and the U.S. Merchant Marine. TRANSCOM is coordinating closely with MARAD to ensure these vital commercial programs remain effective in supporting DOD well into the future.

CIVIL RESERVE AIR FLEET

Question. The Air Force has in the past, and may very well in the future, rely heavily on the Civil Reserve Air Fleet (CRAF) to supplement its organic airlift. The National Defense Authorization Act (NDAA) for Fiscal Year 2014 requires the Secretary of Defense to provide an assessment of the requirement to maintain industrial base for CRAF carriers and ability of CRAF carriers to support the goals of the National Airlift Policy.

What is your assessment of CRAF's ability to meet requirements to transport any equipment, materials, or commodities for the use of U.S. military operations and respond to a humanitarian disaster?

Answer. We rely on our commercial partners as an integral part of providing global air lift assets to support military operations and in response to humanitarian disasters. In addition to our organic capability, commercial carriers that participate in CRAF provide the augmentation capability that allows us to say "Yes" to any call our Nation makes of us. The combined capability of military and commercial lift gives us the ability to transport equipment, materials, or commodities the warfighter will need to execute their mission to any point on the globe. To ensure the strength of our CRAF partnership and the program's continued viability, TRANSCOM conducts biannual Executive Working Group (EWG) conferences to bring together Chief Executive Officers, Presidents, and other representatives of the commercial airline industry to discuss vital issues affecting the program. The CRAF EWG will continue to meet on a regular basis to discuss future changes as we strive to maintain the readiness of the program to support our Nation. If confirmed, I will continue to work with our CRAF partners to ensure the business relationships remain solid and the contracts continue to support DOD requirements.

Question. Do the changes in the commercial airline industry, characterized by bankruptcies and a move toward smaller and shorter-range aircraft, impact the future viability of the CRAF system?

Answer. The commercial airline industry is dynamic and always has been. We have been able to adapt to carrier's fleet planning and benefited by having a commercial augmentation capability ready to answer the call when needed. It is accurate there are fewer carriers in the CRAF program now than 15+ years ago. I have, however, met with several airline executives over the past 18 months, and to the person, they have all said they will support the DOD and CRAF program because it is the right thing to do for our Nation. It is also accurate to say as we drawdown forces from Afghanistan, there will be excess capacity in the commercial sector that we expect to go away as carriers right size their fleets to meet the new business environment. Through AMC sponsored research, conducted as part of an extensive ongoing CRAF study, we are confident the CRAF program will remain viable and able to meet operational plans in the future.

Question. Do you think it is important to maintain an adequate industrial base for CRAF carriers?

Answer. CRAF has been a healthy program for over 60 years. It is a capability that no other nation can replicate and ensures we can meet national requirements that our organic assets alone cannot provide in times of crisis or conflict. It is critical we maintain both an organic airlift capability and commercial augmentation capability that is "ready" to answer the call when the next crisis arises. Striking a balance of airlift opportunities in this fiscally constrained environment is one of the biggest challenges we face going forward. If confirmed, I will work with all concerned to define a minimum business level for our commercial partners that will en-

sure we maintain readiness, not only for the carriers, but also for the Defense Transportation System.

Question. How much should we be relying on CRAF to meet our peacetime and wartime airlift requirements?

Answer. The CRAF program is a critical component in this nation's ability to rapidly deploy forces and equipment in times of crisis and peace. Because of the capability our commercial partners bring to the fight, we can deploy forces more rapidly and more efficiently than any other nation in the world. In peacetime, this workload changes from year-to-year due to dynamic customer requirements. Our forecast requirements are expected to be much lower starting in fiscal year 2016 compared to the past 13 years, which will impact both military and commercial capacity. We will continue to strive for the balance between military and commercial capacity.

Question. What changes, if any, do you think need to be made to CRAF—authorities, requirements, composition?

Answer. AMC, in coordination with TRANSCOM, chartered a study of the CRAF program to look at these specific issues. Throughout the study we engaged industry experts for their advice on where the airline industry is headed and what to expect. The study team provided recommendations to senior leadership and industry executives. We are in the process of analyzing carrier feedback and revising the appropriate recommendations for senior leaders' decision. The results of this study are expected to be complete no later than June of this year, and I have committed to report the results of that study to interested Members of Congress at that time.

QUADRENNIAL DEFENSE REVIEW

Question. What is your view of the QDR process? Was TRANSCOM asked to provide inputs to the QDR prior to it being finalized?

Answer. I view the QDR process as vital to the future success of DOD to prevail in current operations, deter our enemies, and ensure success in any future conflicts. It is essential for all the combatant commands and Services to meet, discuss strategic and current issues, and come to agreement on the direction ahead for DOD for defense of our Nation.

TRANSCOM was an active participant in the 2014 QDR process to include discussions on DOD strategy, implications of budget reductions, and Force Posture. In addition, TRANSCOM coordinated with Air Force leadership in the development of the tactical and strategic airlift requirements. As previously mentioned, the sealift requirements were not defined as main elements in the Navy fiscal year 2019 force structure.

READINESS

Question. Why did TRANSCOM recently downgrade its overall readiness assessment?

Answer. It's my understanding that TRANSCOM's overall readiness assessment has been the same for more than 3 years and the current overall assessment is consistent with that trend. While current readiness levels are assessed as sufficient for operations, projected readiness levels are of concern and must also take into account the long-term effects of sequestration and funding reductions. TRANSCOM's readiness is dependent upon the long-term health of strategic airlift, surge sealift and other enabling capabilities that face significant challenges in times of budget uncertainty. Modernization, recapitalization, and balanced use of both organic and commercial lift are necessary to maintain agreements and readiness levels across the transportation and logistics enterprise.

Also, because TRANSCOM must communicate over the unclassified networks with many private-sector entities in the transportation and shipping industry, protecting command and control systems from attack is a huge challenge to readiness. If I am confirmed, I will continue to advocate for improved security standards, incident reporting, and cyber defense capabilities across TRANSCOM's mission responsibilities.

TRANSCOM RISKS

Question. What is your assessment of TRANSCOM's critical risks and key issues based on sequestration budget funding level?

Answer. The reduced customer workload will drive impacts to organic and commercial capabilities that will likely be required in the future with potential readiness impacts on the organic and commercial transportation and logistics networks we rely on. Budgetary uncertainty makes it difficult to posture and plan for our customer's future transportation and logistics workload demand, as well as ensure all readiness and mobility capability aspects (people, infrastructure, assets) of our mission are preserved. The value of TRANSCOM being funded through a working cap-

ital fund (TWCF) is that the command can focus on long-term requirements and not make near-term suboptimal decisions.

CYBERSPACE OPERATIONS AND SECURITY

Question. Transportation Command must communicate over the unclassified Internet with many private-sector entities that are central to DOD's force generation and deployment operations—in the transportation and shipping industries in particular. Much of the rest of the critical communications and operations of the Defense Department can be conducted over the classified DOD internet service, which is not connected to the public Internet and is therefore much more protected against eavesdropping, espionage, and/or disruption by computer network attacks.

What do you believe are the critical needs of TRANSCOM for cyber security?

Answer. TRANSCOM moves vast amounts of information between military and commercial partners in its role as the distribution process owner for the Department. Command and control systems must get the right information to the right people at the right time, while protecting it from adversaries. If confirmed, I will continue the work to protect the command's information equities by working with our agency and commercial partners to further define roles, responsibilities, relationships and authorities for cyber security and to build trust and enhance information sharing.

Question. What plans do you have for addressing these critical needs?

Answer. TRANSCOM will need to continue addressing cyber issues on multiple fronts. Keeping command and control systems secure and protecting them from attack is a huge challenge. TRANSCOM has led the way in developing cyber language in its contracts to address security standards and incident reporting which, if confirmed, I will continue to push. In addition, I will continue the migration of component command and control systems inside the TRANSCOM security perimeter which will provide better situational awareness to my cyber security teams. I will also continue to collaborate with U.S. Cyber Command (CYBERCOM) and our Defense Information Systems Agency (DISA) partners to incorporate a solid command and control infrastructure that improves the accuracy and timeliness of cyber defense information providing synchronization of cyber operations across TRANSCOM's mission threats.

Question. How important is it that TRANSCOM be aware of cyber intrusions by advanced persistent threat (APT) actors into the networks of airlines, shippers, and other defense contractors that enable TRANSCOM operations?

Answer. Commercial partners provide volume, velocity and efficiency that make TRANSCOM's mission possible. Vulnerabilities within any organization's infrastructure, including cyber vulnerabilities, are a risk for all mission partners. TRANSCOM data that resides on our commercial partners' networks, if compromised by an APT, is a potential cyber security issue that, at minimum, provides insight into TRANSCOM operations. It is critical that we have awareness of these intrusions so that we can mitigate their operational impacts in the other domains.

Question. Are you concerned about the level of reporting of cyber events by command contractors or other U.S. Government agencies to TRANSCOM?

Answer. The level of reporting continues to be a concern. TRANSCOM has overcome some of these challenges with its cyber contract language and partnering efforts. The next step is to work with our commercial partners to develop a measurable standard of compliance.

Question. When TRANSCOM becomes aware of an APT intrusion into an operationally critical contractor, what steps should the command take to determine whether operational plans should be adjusted to mitigate the risk of the intrusion affecting military operations?

Answer. The level of reporting continues to be a concern. TRANSCOM has overcome some of these challenges with its cyber contract language and partnering efforts. If confirmed, I will work with all stakeholders, government, military, and commercial partners to define the steps necessary to adjust to cyber attacks, including APT intrusions.

Question. Is DOD taking adequate steps to address your special needs?

Answer. It is my understanding that TRANSCOM works very closely with DOD to share information on cyber security, intelligence and logistics operations to assess overall impact of cyber intrusions to the command's mission. Due to the high volume of the command's workload conducted on unclassified systems, the Department's use of cross-cutting teams including CYBERCOM, DISA, and various intelligence agencies is necessary to protect mission critical information.

RESEARCH AND DEVELOPMENT

Question. TRANSCOM's budget includes funding for a research and development activity designed to allow for examination and improvement of the entire supply chain as part of TRANSCOM's role as Distribution Process Owner.

What are the major gaps in capability related to TRANSCOM's mission that need to be addressed through research and development efforts?

Answer. Research and Development (R&D) investments will play an essential role in addressing a variety of challenges and capability gaps to ensure TRANSCOM's ability to accomplish its mission in an ever-increasing contested cyberspace and Anti-Access/Area Denial (A2/AD) environment. New technologies may allow TRANSCOM to improve the efficiency and effectiveness of distribution operations and lower the operating costs for our Nation's joint logistics enterprise. If confirmed, I will champion TRANSCOM's R&D investment priorities to address these challenges and capability gaps while improving our effectiveness and efficiency by exploring and further developing technologies in the areas of End-to-End Visibility, Command and Control/Optimization/Modeling and Simulation, Cyber, and Global Access.

Question. What unique processes and technologies do you feel TRANSCOM needs to develop through its own program and investments?

Answer. As the DOD's Distribution Process Owner and Global Distribution Synchronizer, TRANSCOM must continue the business process management work begun under the Agile Transportation for the 21st Century program. Distribution processes should be designed, documented and/or refined in three distinct areas (e.g. Requirements Management, Network Design, and Capacity Management). In addition, TRANSCOM continues to enhance warfighter support with a range of technologies with particular emphasis on addressing A2/AD challenges. If confirmed, I will pursue and support innovative solutions which improve efficiency, effectiveness, and maintain organic readiness to support the Nation's global missions.

Question. How will you work with other research and development organizations to ensure that TRANSCOM's current and future capability gaps are addressed?

Answer. TRANSCOM annually engages combatant commands, Services, Office of the Secretary of Defense, DLA, the Joint Staff, other Government agencies, and academia S&T communities for updates and validation of joint deployment and distribution technology gaps and focus areas which guides our Research, Development, Test, and Evaluation (RDT&E) investments. Nearly 75 percent of our RDT&E projects are collaboratively funded which greatly increases the transition of efficiency-gaining, life-saving, and cost-reducing capabilities to the warfighter. If confirmed, I will continue to partner with these organizations to identify, validate and recommend RDT&E projects that address validated capability gaps.

TECHNOLOGY PRIORITIES

Question. Serving the needs of the combatant commanders both in the near term and in the future is one of the key goals of the Department's science and technology (S&T) executives, who list outreach to commanders as an activity of continued focus.

What do you see as the most challenging technological needs or capability gaps facing TRANSCOM in its mission to provide air, land, and sea transportation to DOD?

Answer. Primary concern will be developing and exploiting emerging technologies that improve the Department's ability to provide timely and precise delivery of sustainment to our warfighters as well as humanitarian aid and relief anywhere, in moment's notice, and in a fiscally responsible manner. Additionally, we need to explore information security and assurance as well as new cyber technologies to ensure greater efficiency and mission accomplishment. Furthermore, reducing dependency on fossil fuels will also remain a major focus area for TRANSCOM.

Question. What would you do, if confirmed, to make your technology requirements known to the department's S&T community to ensure the availability of needed equipment and capabilities in the long term?

Answer. If confirmed, I will work through appropriate S&T community forums including Joint Interagency Field Experimentations, Defense Innovation Marketplace, technology symposiums, and collaborative interservice/agency partnerships to preserve our 90 percent transition rate of proven technologies.

TECHNOLOGY TRANSITION

Question. TRANSCOM has been active in the Joint Capability Technology Demonstration (JCTD) process.

What are your views on the JCTD process as a means to spiral emerging technologies into use to confront changing threats and to meet warfighter needs?

Answer. The Department's JCTD program is an extremely effective tool that combatant commands leverage to rapidly develop and insert emerging technologies to address warfighter needs and capability gaps. In contributing to TRANSCOM's successful JCTD track record, if confirmed, I will strongly advocate for innovative technologies which enhance warfighter support and success.

Question. What steps will you take, if confirmed, to enhance the effectiveness of technology transition efforts within your command and in cooperation with other Services and defense agencies?

Answer. If confirmed, I will continue to apply the Command's RDT&E investments, in partnership with other combatant commands, Services, Defense Agencies, academia, and industry to advance our Nation's war fighting capabilities. I will work with stakeholders in leveraging the Department's many programs (JCTD, Coalition Warfare Program, Joint Test & Evaluation, Small Business Innovative Research, etc.) to rapidly develop, field, and transition mature technologies that address near term needs and identified gaps. Specifically, I will partner with our stakeholders to vet projects, gain buy-in, and avoid duplication. Finally, I will ensure that all projects develop a viable transition strategy and emphasize rapid fielding from day one.

DEPLOYMENT CHALLENGES

Question. Multiple studies by TRANSCOM and the Army, and direct experience in Afghanistan and elsewhere, demonstrate that the airlift strategy and airlift platforms developed for the Cold War confrontation in Central Europe are not ideal to support operations in third-world regions. Unlike Europe, most of the world has few airfields with long runways, and there are fewer still that have parking space for more than a couple of cargo aircraft to unload at one time. This "Maximum-on-Ground" (MOG) metric is the critical measure of throughput capacity at airfields. The few airfields with MOG greater than 2 are scarce and are located within major urban areas, usually far from where ground forces would be employed. Traditional fixed-wing airlifters—even flexible ones like the C-17—cannot be effectively employed in large numbers to deploy and support ground forces in these regions because of these infrastructure limitations.

Previous analyses have indicated that alternatives to traditional fixed-wing transports, such as heavy-lift airships and heavy vertical take-off and landing (VTOL) rotorcraft, scored very high compare to current programs. These alternatives could deploy more forces faster, save lots of fuel, and increase sustainment. Because they deliver troops and supplies directly to the point of need, they could reduce the number of trucks on the road that are vulnerable to IEDs, as well as the length of supply lines. In other words, they would also reduce the vulnerability of our supply lines and save lives.

What is your view of these analyses?

Answer. My understanding is the Joint Future Theater Lift Technology Study (JFTL TS) was completed on 20 February 2013. The intent of the JFTL TS was to evaluate options to supplement the C-17, C-130, and C-27 capabilities to deliver medium weight combat vehicles into very austere environments. The JFTL TS assessed the overall value and cost of a variety of fixed wing aircraft, hybrid airships and tilt-rotor platforms as to how they might perform in emerging, future intra-theater airlift missions. The JFTL TS was comprehensive and provided insight to the cost effectiveness and risk of multiple technology options.

Question. We understand that the Army favors a heavy lift, second generation tilt rotor that would provide VTOL capabilities.

Answer. I understand that in the view of the JFTL TS, the Tilt Rotor (TR) technology alternative is the most operationally effective technology alternative because it is not restrained to fixed airfields; is capable of taking off and landing at more opportune landing sites (i.e., austere, short, unimproved landing areas), and is not limited by traditional Maximum on Ground (MOG) concepts. I believe it is reasonable to continue to examine these conclusions in the context of maturing CONOPs and anticipated schemes of maneuvers. It is also important to understand the maturity of the technologies that are necessary to develop heavy VTOL capabilities. If confirmed, I will assure that TRANSCOM will continue to monitor development of all emerging VTOL capabilities.

Question. Do you support development of such a platform?

Answer. Development of heavy lift Tilt Rotor or Hybrid Airship platforms will require careful consideration of our current and future warfighting needs, the planned fiscal environment, and our ability to mature both the technologies and operational

concepts to make these delivery options operationally viable. While these platforms may fill future capability gaps of emerging warfighting concepts, they both would require significant investment to develop and field. At this time, a hybrid airship configured for heavy cargo, equivalent to legacy lift platforms, does not exist. I believe the DOD should support technology development which may lead to a commercially produced hybrid airship capability in the future.

Question. In natural disasters, the airfields and roads and bridges that are required to fly in and distribute relief forces and supplies are frequently destroyed. Fixed-wing transports that need functioning airfields are not much use, but vertical lift aircraft or airships have the potential for continuing effective operations.

Do you believe that the TRANSCOM analyses have adequately factored disaster relief into their assessments?

Answer. Yes, the MCA included a number of disaster relief scenarios and found that “PB13 mobility forces do not materially constrain the U.S. objectives associated with conducting simultaneous operations in different theaters, and have sufficient capabilities to concurrently support a heightened defense posture in and around the United States or support U.S. civil authorities in response to a large-scale attack or natural disaster.

Question. How would you assess TRANSCOM’s ability to respond to domestic disaster relief?

Answer. Based on the results of the MCA and TRANSCOM’s ongoing planning with U.S. Northern Command, the Command, in partnership with the National Guard and local authorities, can effectively respond to and support domestic disaster relief efforts as needed.

DEFENSE PERSONAL PROPERTY SYSTEM

Question. For over 10 years, TRANSCOM and its subordinate command, Surface Deployment and Distribution Command, have been working to improve the process of moving servicemembers’ household goods and gaining the support of the transportation provider industry for needed changes. Implementation of the new system—Defense Personal Property System (DPPS)—uses a “best value” approach to contracting with movers that focuses on quality of performance, web-based scheduling and tracking of shipments, servicemember involvement throughout the moving process, and a claims system that provides full replacement value for damaged household goods. Successful implementation of this system depends on replacement of the legacy Transportation Operational Personal Property Standard System (TOPS) with the web-based DPPS.

What do you view as the most significant challenges that remain in continuing to implement DPPS?

Answer. TRANSCOM is currently incorporating the remaining functionality for Non-Temporary Storage, Intra-Country Moves, and Direct Procurement Method into DPPS while modernizing the architecture to enhance overall system performance and the user experience. TRANSCOM recently re-competed a development and sustainment contract, which was awarded 9 Oct 2013. One of the most significant challenges that remain is ensuring capability development maintains schedule to enable the sunset of the legacy TOPS in fiscal year 2018.

Question. What is your assessment of the performance of DPPS in achieving the requirement for full replacement value for damaged or missing household goods claims?

Answer. Full replacement value is implemented across the Services for all modes of shipments in support of the Defense Personal Property Program. It is my understanding that the existing claims module is scheduled for redesign and will be deployed in fiscal year 2016 to improve the user experience. If confirmed, I will ensure improvements such as this continue.

Question. What is your understanding under DPPS of the percentage of valid personal claims for damage or loss of household goods that is currently paid for by DOD and the percentage that is paid for by the movers who caused the damage?

Answer. In 2013 less than 9 percent of submitted claims were transferred to the Military Claims Offices (MCOs). The MCOs are normally able to recover approximately 80–90 percent of what they pay out from the Transportation Service Provider (TSP). My understanding is TSPs settle most claims directly with the servicemember.

Question. What is your assessment of the adequacy of the response rate on customer satisfaction surveys as a method for identifying best and worst performers?

Answer. Customer Satisfaction Survey response rates have risen to 40 percent. With 553,000 personal property moves in 2013, the survey response rates continue to be statistically significant. Survey response rates are the cornerstone for ensuring

that quality transportation service providers are participating in the program, and opportunities for struggling performers are minimized or eliminated. If confirmed, I will continue to work closely with the Service Headquarters to increase the survey response rates.

Question. If confirmed, what role would you play in ensuring that DPPS is fully funded and implemented and will you make every effort to ensure this program is successful in meeting its goals?

Answer. If confirmed, I will leverage DPPS to continue to improve our business processes for household goods and services. OSD, Joint Staff, and the Services have committed to fully fund the DPPS program development and sustainment between fiscal year 2014–2018. I will work to ensure the DPPS program successfully meets the Services' goals to fully support servicemembers' personal property moves.

SPACE AVAILABLE TRAVEL POLICIES

Question. DOD, in consultation with TRANSCOM, submitted a report to Congress on Space Available Travel for Certain Disabled Veterans and Gray-Area Retirees in December 2007. The report concluded that increases in space available eligibility would significantly impact DOD's ability to accomplish effectively the airlift mission and negatively affect support to active duty military space available travelers. Additionally, the report concluded that adding to the eligibility pool would increase support costs and displace the current policy that mandates that space-available travel not incur additional costs to doD.

Do you consider the conclusions and recommendations of the December 2007 report to still be valid?

Answer. I believe the conclusions and recommendations of the December 2007 report remain valid. Also, I believe DOD's concern with any expansion to the Space-Available program was also reiterated in the GAO review as directed by section 362 of the NDAA for Fiscal Year 2012. DOD data showed the five most used air terminals had limited seats available with the three most traveled destinations from each terminal were near capacity. An expansion to the current pool of eligible travelers limits the ability to support the primary objective of the space available program which is to enhance the morale and welfare of our Active-Duty Force.

Question. What are the constraints in today's operational environment of expanding the categories of individuals eligible for space available travel?

Answer. I believe the conclusions and recommendations of the December 2007 report remain valid. Also, I believe DOD's concern with any expansion to the space available program was also reiterated in the GAO review as directed by section 362 of the NDAA for Fiscal Year 2012. We will work closely with DOD as the Secretary of Defense reviews space available policy in accordance with the NDAA for Fiscal Year 2013.

Question. What recommendations, if any, do you have regarding changes to the existing policies controlling space available travel eligibility?

Answer. In today's operational environment, DOD has limited ability to support continued expansion of the space available program. We will work closely with DOD as the Secretary of Defense reviews space available policy in accordance with the NDAA for Fiscal Year 2013.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Commander, TRANSCOM?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR BILL NELSON

CIVIL RESERVE AIR FLEET

1. Senator NELSON. General Selva, in your response to the advance policy questions, you stated, "In peacetime, the [airlift] workload changes from year-to-year due to dynamic customer requirements. Our forecast requirements are expected to be much lower starting in fiscal year 2016 compared to the past 13 years, which will impact both military and commercial capacity." Based on the lowered requirement for airlift, can the Transportation Working Capital Fund accounts adequately support both crew readiness requirements and the Civil Reserve Air Fleet (CRAF) program?

General SELVA. Over the last 13 years of supporting Overseas Contingency Operation requirements U.S. Transportation Command (TRANSCOM) has been able to maintain organic crew readiness while also supporting the CRAF. However, the current and future workload projections are significantly decreased due to the Afghanistan drawdown and Services' constrained transportation budgets. When TRANSCOM reaches a point where it can no longer reduce capacity supplied to match lower workload due to Service readiness requirements, the Transportation Working Capital Fund will realize a loss and our component command readiness will be impacted as no revenue is generated. Working Capital Fund policy dictates these losses become the responsibility of the Services and/or recouped by increased future rates.

We have efforts underway regarding the CRAF to support the lower business levels. First, we have provided CRAF subscribers with business projections, which will help them size their fleets to meet their own requirements. Second, we are working to establish a minimum level of business to support commercial readiness and business. This will help support not only the CRAF subscribers, but also our military aerial ports to ensure they maintain readiness and familiarization with utilizing commercial aircraft.

2. Senator NELSON. General Selva, are the training needs of our current airlift fleet negatively affecting CRAF carriers?

General SELVA. Ensuring the readiness of the CRAF while maintaining an organic fleet capable of meeting all DOD requirements is a priority for us and it requires the right balance of workload between the military and commercial segments. Achieving that balance for the future requires a careful analysis of commercial and military readiness requirements, capabilities required for all levels of response, and an understanding of economic factors affecting the industry's ability to meet DOD requirements. We are working through that analysis now.

Recognizing the need to maintain a viable CRAF and the likelihood of both declining budgets and workload post-Afghanistan, our comprehensive review of the CRAF program is focused on the objective of developing recommended changes to assure the program's viability in the future and the readiness of participating carriers. We recognize the need for CRAF carriers to have business within the defense transportation system to maintain their readiness to support DOD.

We also need to continue to season Active Duty and Air Reserve component airman and maintain a ready organic airlift capability. Air Mobility Command is working to balance this requirement, as well as certain combatant commander requirements that dictate use of organic assets with the need to maintain a ready commercial augmentation capability.

3. Senator NELSON. General Selva, what are your plans to ensure the future viability of the CRAF program?

General SELVA. In the midst of declining business, TRANSCOM has made significant efforts to bolster relations with the commercial airline industry through military and industry joint venues. The CRAF Executive Working Group, National Defense Transportation Association, and the Military Aviation Advisory Committee are

examples of venues which work to develop solutions and exchange ideas to effectively ensure the future viability of the CRAF program.

We have listened to industry concerns and have pursued multiple avenues to maximize business opportunities, not only by pursuing CRAF preferences in policy, but adjusting operating procedures and guidance to maximize workload to our U.S. flag carriers. Additionally, we have been proactive and transparent in giving our industry partners the most accurate projected requirements during this drawdown period so commercial carriers can posture themselves appropriately. In addition to these efforts, we conducted a comprehensive review of the CRAF program with an objective of developing recommended changes to assure the program's viability in the future.

QUESTIONS SUBMITTED BY SENATOR JOE MANCHIN III

EQUIPMENT LEFT BEHIND IN IRAQ AND AFGHANISTAN

4. Senator MANCHIN. General Selva, I am very concerned about the amount of equipment that the United States will be forced to leave in Afghanistan. I understand that the United States will not be able to recover a substantial amount of military equipment from Afghanistan. What is your assessment of the amount of equipment the United States will be forced to leave in Afghanistan?

General SELVA. The Services have made decisions on some of their equipment that will be returning to the United States and TRANSCOM will transport it when and where needed. The Services are still deciding on disposition of equipment that may be destroyed in place or declared excess and offered to other countries as Excess Defense Articles.

5. Senator MANCHIN. General Selva, what is the value of this equipment and what will be the associated costs with removing and destroying the sensitive components among this arsenal?

General SELVA. The Services are in the best position to provide an overall cost analysis of equipment in theater. TRANSCOM assists the Services with calculating the transportation cost and readily supports equipment movement once the Services determine what is to be moved out of theater.

6. Senator MANCHIN. General Selva, is there an existing plan to recoup these losses, perhaps through Foreign Military Sales (FMS)?

General SELVA. The Services are in the best position to provide an answer on their equipment replacement plans. Defense Security Cooperation Agency is in the best position to provide an answer on any possible recoupment of funds through FMS sales to offset equipment losses.

7. Senator MANCHIN. General Selva, does this compare to the amount and value of equipment that the United States failed to retrograde from Iraq?

General SELVA. The Services are in the best position to provide an answer on the amount of equipment that was not retrograded from Iraq. TRANSCOM assisted in transporting equipment from Iraq once disposition decisions were made.

QUESTIONS SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

CYBER ATTACKS ON U.S. TRANSPORTATION COMMAND

8. Senator GILLIBRAND. General Selva, this committee is currently reviewing a report on cyber attacks on TRANSCOM dating from fiscal year 2011. I am highly concerned about this information in light of the fact that TRANSCOM will be instrumental as we leave Afghanistan. If confirmed, how do you intend to handle this issue?

General SELVA. We have migrated the critical Transportation Component Command systems behind the TRANSCOM security boundary and exercise command and control over the defenses of those systems. These efforts align with the Department's Joint Information Environment initiative, as we are implementing a security architecture that fits within DOD's security architecture, led by the DOD CIO and the Defense Information System Agency (DISA). We expect to achieve significant efficiencies by leveraging common enterprise services and improving our cyber security posture.

9. Senator GILLIBRAND. General Selva, from your perspective, what can we do to improve cyber defenses as they relate to contractors?

General SELVA. TRANSCOM actively engages with our commercial partners on cyber security; we have led multiple commercial partner outreach programs and highly encourage them to join the Defense Industrial Base Cyber Security/Info Assurance program. Of the 80 current TRANSCOM commercial partners that we encouraged to participate in the Defense Industrial Base Cyber Security/Information Assurance Program, only 7 are full participants. Three additional companies have requested further information and are considering joining. In addition we have developed cyber security contract language for both our commercial carriers and information technology (IT) support contracts that require notification in the event of an actual intrusion that impacts TRANSCOM mission data. In these cases we work with our commercial partners and through law enforcement and contracting channels to mitigate the threat to mission and improve cyber defenses. We have recently streamlined some of that language changing reporting requirements from reporting intrusions affecting DOD data to reporting intrusions on any systems in which DOD data resides or transits. We also welcome the opportunity to help validate security controls with our commercial partners through voluntary exercises that will strengthen dialogue and a shared understanding of the threat to the TRANSCOM mission.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

NETWORK VULNERABILITY

10. Senator INHOFE. General Selva, TRANSCOM has been subject to a growing number of cyber attacks. TRANSCOM's reliance on unique contracts—such as the CRAF program where U.S. civil air carriers agree to augment organic military airlift during a crisis in exchange for access to peacetime defense business—creates unique challenges. In a contingency, TRANSCOM's ability to move troops or supplies could be hindered if a vendor's network were compromised. Today there appears to be little sharing of threat and network vulnerability information. Do you share these concerns?

General SELVA. TRANSCOM has always shared this concern which is why we work to make substantial progress in organizing and resourcing our TRANSCOM cyber defense efforts. We stood up our Joint Cyber Center on our Fusion Center operations floor to ensure our cyber defense efforts are aligned with our transportation mission. CYBERCOM has provided a Cyber Support Element that gives us reach back into their capabilities, and Air Force Cyber Command has provided a Cyber Protection Team that has just reached Initial Operational Capability, with another on the way. In addition to these DOD cyber defense capabilities, our Joint Cyber Center has established relationships with law enforcement and other federal and state agencies to buttress our cyberspace defenses. There are opportunities for improvement of information sharing between the special investigations units within the Department and their counterparts within the Department of Justice. Both can benefit from understanding the TRANSCOM mission context and our current vendor list so they can address TRANSCOM national security equities in the course of their ongoing operations.

11. Senator INHOFE. General Selva, what other unique cybersecurity challenges do you believe we should be aware of?

General SELVA. The primary challenge continues to be protection of mission data residing in or transiting the information systems of our commercial partners, which lie outside of DOD and TRANSCOM visibility, control, or authorities. Historically, TRANSCOM has encountered threat actors penetrating our military and commercial partner networks to gain access to our mission data which could disclose DOD operations, disrupt command and control of logistics movements, and have the potential to deny or degrade operations. The fact that we do utilize commercial partners across the enterprise means that some of our data resides on information systems that exist in the commercial business community. These systems provide volume, velocity, and efficiency for our TRANSCOM mission. To mitigate vulnerabilities, we are actively engaged with our commercial partners on cyber security both in our contracts and in our relationships with these companies. We also work with our interagency partners to provide context to the execution of their authorities and ongoing activities because cyber defense is a team effort where one organization's vulnerabilities are potential vulnerabilities for all.

12. Senator INHOFE. General Selva, what steps are TRANSCOM and CYBERCOM taking to address these vulnerabilities?

General SELVA. TRANSCOM is integrating critical systems operated by our service components behind a common security boundary with common technology and policies and enhanced situational awareness for TRANSCOM and component network defenders. In addition, TRANSCOM is including the new Defense Federal Acquisition Regulation Clause, "Safeguarding of Unclassified Controlled Technical Information" in all of our new non-transportation contracts, while retaining the Cyber Security language we previously developed in our transportation contracts. We are continuing to build relationships with our commercial partners and law enforcement to increase collaboration and incorporate contract language based on industry best practices. Additionally, I am gaining operational control of cyber protection teams to augment our organic network defense forces. This will enable a better protective posture across the TRANSCOM enterprise. We are fully engaged with CYBERCOM and Defense Information Systems Agency to work through command and control of these assigned forces. The command is satisfied with our efforts to date and will continue to leverage opportunities to improve as they present themselves.

13. Senator INHOFE. General Selva, can TRANSCOM and DOD enact a policy change that can make the fixes that you envision?

General SELVA. DOD is working with its U.S. Government counterparts to enact policy and process changes that will enable coordinated employment of existing law enforcement and military authorities and capabilities, as appropriate. TRANSCOM continues to focus on improving information sharing between our network defenders and our commercial partners in the private sector to the greatest extent feasible in the current environment.

14. Senator INHOFE. General Selva, do you feel that TRANSCOM and DOD need more legislative authority to fix this persistent threat brought about by the current cyber intrusion problem?

General SELVA. The President has the necessary authority to order military action to defend our nation against all attacks including those in the cyber domain. The President can delegate authorities to the Secretary of Defense in order to use the Department's operational capabilities to defend against such an attack so additional legislative authority for DOD is not necessary. However, TRANSCOM and its industry partners serve to highlight that with so much of the critical infrastructure owned and operated by private industry, the government has limited visibility and thus is often unaware of the malicious activity targeting our critical infrastructure. These blind spots prevent the Government from being positioned to either help the critical infrastructure to defend itself or to defend the nation from an attack. The contract language in place at TRANSCOM, relationships we are building to enhance mission context with other agencies, and aligning our cyber defense resources are the ways in which we are addressing this issue.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

AFGHANISTAN EQUIPMENT RETROGRADE

15. Senator MCCAIN. General Selva, in your testimony, you agreed that TRANSCOM was "on track to remove all the necessary equipment and armaments from Afghanistan by the end of 2014." How much U.S. military equipment do you assume will be left in Afghanistan? Please provide your answer as a percentage of total equipment currently in theater, as a dollar amount, or by some other meaningfully quantitative measure.

General SELVA. TRANSCOM provides common-user strategic lift on a global basis to our supported geographic combatant commands (GCCs). While we determine strategic sea, air, and surface lift feasibility to meet the transportation needs of the GCCs, we are not involved in determining equipment levels they require to execute missions in their Areas of Operation. In the case of Operation Enduring Freedom drawdown and the post-2014 enduring mission in Afghanistan, U.S. Central Command (CENTCOM), in coordination with the Military Services, will determine how much U.S. military equipment will be required to execute their assigned missions. As a supporting command in this effort, TRANSCOM is postured to generate the required strategic lift capacity to meet the Commander International Security Assistance Force drawdown timelines, and will continue to rely on our ground forces to identify and generate cargo for strategic lift to meet CENTCOM requirements. National level decisions associated with an approved and signed Bi-lateral Security

Agreement will heavily influence the final mission set required for CENTCOM operations in Afghanistan.
