16. Senator MCCAIN. General Selva, to the best of your knowledge, what will be the disposition of any equipment left in Afghanistan after the departure of U.S. forces?

General SELVA. CENTCOM, in coordination with the Military Services, will determine the disposition of U.S. military equipment in Afghanistan after the departure of U.S. forces. Final disposition of this equipment will be influenced by national level decisions associated with an approved and signed Bilateral Security Agreement, which will significantly impact the equipment-set required to execute any enduring U.S. and coalition mission in Afghanistan. CENTCOM will determine final disposition based on operational requirements and transportation cost-benefit analysis in coordination with Office of the Secretary of Defense and Joint Staff. If strategic transportation is required, TRANSCOM is postured to fully support retrograde/redeployment of U.S. military equipment from Afghanistan, as well as Foreign Military Sales movements and Excess Defense Articles transfers when authorized and approved at appropriate DOD and congressional levels.

17. Senator MCCAIN. General Selva, please list the commands or agencies that provide guidance to TRANSCOM regarding retrograde of military equipment. In other words, do the combatant commander, the component commanders, the Services, or some combination of these have authority to decide what equipment is retrograded from Afghanistan?

General SELVA. TRANSCOM provides common-user strategic lift on a global basis to our supported geographic combatant commands (GCCs), based on transportation requirements that have been validated for movement by the GCC-in this case CENTCOM. While TRANSCOM determines strategic sea, air, and surface lift feasibility to meet the transportation needs of CENTCOM, we are not involved in determining which equipment will or will not be retrograded from Afghanistan. CENTCOM, in coordination with the Military Services, Office of the Secretary of Defense, and Joint Staff, will determine which U.S. military equipment will remain in Afghanistan for any enduring mission post-2014. As the strategic transportation provider, TRANSCOM is postured to generate the required strategic lift capacity to meet the Commander International Security Assistance Force drawdown timelines. We also continually present transportation feasibility and costing data to all stakeholders for their consideration when making final decisions on retrograde equipment disposition and transportation.

18. Senator MCCAIN. General Selva, you noted in testimony that five routes are used to get equipment and personnel in and out of country and that you are developing courses of action to bypass Russia. What is the status of the alternative logistics plan?

General SELVA. TRANSCOM has a flexible strategic network consisting of various lines of communication both in and out of Afghanistan. With multiple air and surface routes available, bypassing Russia for transit will have no significant impact on overall theater operations. If access to Russian air or surface routes becomes unavailable, we will route cargo to an alternate route with little to no affect on inbound or outbound flow.

19. Senator MCCAIN. General Selva, what assumptions with regard to the so-called southern route through Pakistan and northern routes through Russia are included in your assessment that TRANSCOM will have all necessary equipment out of Afghanistan by the end of 2014?

General SELVA. Currently, TRANSCOM moves less than 10 percent of retrograde cargo from Afghanistan via the Northern Distribution Network (NDN) through Russia, all of which can be diverted to other routes if required.

The Pakistan ground lines of communication (PAKGLOC) has achieved great velocity, but has also experienced challenges resulting in limited cargo flow in the past. Although the PAKGLOC is the preferred method of moving retrograde due to speed and cost, TRANSCOM is prepared to shift cargo to multi-modal and air direct operations as required. Albeit challenging with reduced ground line of communication access, TRANSCOM has the capacity to retrograde all necessary equipment from Afghanistan utilizing alternate transportation modes and routes provided the cargo is properly identified for strategic lift and prepared for movement in a timely manner.

20. Senator MCCAIN. General Selva, what would the impact be on TRANSCOM's equipment retrograde estimates if the northern ground road and rail routes were closed?

General SELVA. TRANSCOM supports warfighter and service priorities by providing a scalable transportation network that maximizes strategic flexibility and reduces operational risk across a variety of routes and modes, both into and out of Afghanistan. We continue to execute a variety of movement options utilizing both air and ground routes across the Northern Distribution Network, but historically these routes have accounted for a very low percentage of overall cargo. Loss of any strategic option increases risk, but ultimately TRANSCOM would be minimally affected by closure of the northern ground road and rail routes.

21. Senator MCCAIN. General Selva, what would the impact be on TRANSCOM's equipment retrograde estimates if the southern route was closed?

General SELVA. TRANSCOM works with its strategic partners to maintain an effective and flexible transportation network that includes air, ground and multimodal routes with organic and commercial capabilities. This robust structure minimizes reliance on any one nation, values fair and open competition, is reconfigurable and scalable, facilitating economic development and diplomatic engagement. The southern surface route (the Pakistan ground lines of communication) provides a low cost, potentially high volume option for retrograde operations, but ongoing issues (e.g. religious holidays, floods, political strife, and security concerns) have historically affected the volume of cargo and velocity of the route. TRANSCOM has successfully routed retrograde and redeploy cargo away from the PAKGLOC in the past with little to no affect on the strategic transportation network.

22. Senator MCCAIN. General Selva, you indicated during testimony that a business case would be applied to determine whether or not military equipment should be retrograded, disposed of via FMS, or given to allied or partner nations as grants. Do you have an accurate accounting of all U.S. military equipment in Afghanistan?

General SELVA. The Services are in the best position to provide an answer on their remaining equipment levels in Afghanistan. TRANSCOM will assist in transporting that equipment once disposition decisions are made.

23. Senator MCCAIN. General Selva, who makes the final disposition decision to lift, sell, or grant?

General SELVA. The Services are responsible for disposition decisions for their equipment. TRANSCOM then transports the equipment as needed. If U.S. defense articles are declared excess they can be made available for sale through the Foreign Military Sales program under the statutes of section 21 of the Arms Export Control Act or for grant transfer to eligible countries under the provisions of section 516 of the Foreign Assistance Act. The ultimate responsibility for determining if an item should be identified as excess rests with the Service having cognizance over the item.

When a country submits a request (via grant or sale) for excess defense articles (EDA), the Service evaluates and endorses the country request and submits it for review and staffing via Defense Security Cooperation Agency (DSCA) through the State Department, Commerce Department, and Office of the Secretary of Defense-Policy regional offices. If approved, DSCA prepares any required Congressional Notification. At the end of Congressional Notification, DSCA authorizes the Service to offer/transfer the EDA. Each fiscal year, the State Department Bureau of Political-Military Affairs, Office of Regional Security and Arms Transfers in coordination with DSCA identifies the countries eligible for grant EDA to Congress.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

STRATEGIC AIRLIFT AIRCRAFT

24. Senator AYOTTE. General Selva, in your responses to the advance policy questions, you state that you support the plan to reduce the number of strategic airlift aircraft to a level of 275 aircraft. Yet, you acknowledge that certain scenarios presented some mobility challenges. Please describe what kind of scenario would present a challenge if our strategic airlift fleet drops to that level.

General SELVA. A force of 275 strategic airlift aircraft will support the national military strategy with acceptable risk. A force of 275 aircraft will be challenged to support the strategy in a situation where we are unable to produce sufficient functional aircraft operated by fully qualified crews. This could happen if crews have in-

sufficient flying hours to maintain qualifications or the aircraft are not maintained at adequate readiness levels.

25. Senator AYOTTE. General Selva, in your responses, you state that the Quadrennial Defense Review (QDR) recommended a force structure for the Air Force in fiscal year 2019 of 211 strategic airlift aircraft, 39 C-5s and 172 C-17s. If 275 strategic airlift aircraft presents challenges to TRANSCOM, what kind of challenges would 211 present?

General SELVA. The force of 39 C-5s and 172 C-17s referenced in the QDR 2014 reflect U.S. Air Force "combat coded" inventory; that is aircraft assigned to units for the performance of their wartime missions. That force becomes 275 total aircraft inventory (TAI) if backup aircraft inventory (BAI) and primary training aircraft inventory (PTAI) are included.

26. Senator AYOTTE. General Selva, would 211 strategic airlift aircraft be sufficient to support one and a half major combat operations?

General SELVA. The force of 211 strategic airlift aircraft (39 C-5s and 172 C-17s) referenced in the QDR 2014 reflects U.S. Air Force "combat coded" inventory; that is aircraft assigned to units for the performance of their wartime missions. That force of 211 "combat coded" inventory becomes 275 TAI if BAI and PTAI are included. A force of 275 strategic airlift aircraft will support the national military strategy with moderate risk.

27. Senator AYOTTE. General Selva, if our number of strategic airlift aircraft declines to 211, and a major combat operation were to begin, what kinds of delays might we confront in deploying Army ground units to a contingency in Korea, for example?

General SELVA. Based on TRANSCOM's analysis, we would expect any delays to be minor, but acceptable. Although the number of "combat coded" aircraft will decrease to 211 (with 24 additional aircraft assigned to BAI), the total size of the strategic airlift fleet remains at 275 (223 C-17s and 52 C 5Ms) TAI. During major combat operations, these additional 24 BAI aircraft are still available for contingency missions, but once added back to the fleet, would operate at a lower crew ratio, inducing manageable risk to force closure during sustained combat operations.

28. Senator AYOTTE. General Selva, would the delay in airlift be longer than is required to activate and train National Guard units?

General SELVA. No, the bulk of Army units moved at the onset of major crises are from the Active Component. However, those early deploying Army Reserve component units (U.S. Army Reserve and National Guard), as with the other Services' Reserve component units, are currently programmed to be ready to meet their planned early availability dates. Reserve component units requiring formal training or more lengthy activation processes prior to deploying are not generally associated with this early deployment period.

[The nomination reference of Gen. Paul J. Selva, USAF, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 6, 2014.

Ordered. That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the U.S. Air Force to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General.

Gen. Paul J. Selva, USAF, 0000.

[The biographical sketch of Gen. Paul J. Selva, USAF, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GEN. PAUL J. SELVA, USAF

General Paul J. Selva is Commander, Air Mobility Command (AMC), Scott Air Force Base, IL. Air Mobility Command's mission is to provide rapid, global mobility and sustainment for America's Armed Forces. The command also plays a crucial role in providing humanitarian support at home and around the world. The men and women of AMC—Active Duty, Air National Guard, Air Force Reserve, and civilians—provide airlift, aerial refueling, special air mission and aeromedical evacuation.

General Selva graduated from the U.S. Air Force Academy in 1980, and completed undergraduate pilot training at Reese Air Force Base, TX. He has held numerous staff positions and has commanded at the squadron, group, wing and headquarters levels. Prior to his current assignment General Selva was the Vice Commander, Pacific Air Forces, Joint Base Pearl Harbor-Hickam, HI.

General Selva is a command pilot with more than 3,100 hours in the C-5, C-17A, C-141B, KC-10, KC-135A, and T-37.

Education:

1980 - Bachelor of Science degree in aeronautical engineering, U.S. Air Force Academy, Colorado Springs, CO.

1983 - Squadron Officer School, Maxwell Air Force Base (AFB), AL.

1984 - Master of Science degree in management and human relations, Abilene Christian University, Abilene, TX.

1992 - Distinguished graduate, Air Command and Staff College, Maxwell AFB, AL.

1992 - Master of Science degree in political science, Auburn University, Montgomery, AL.

1996 - National Defense Fellow, Secretary of Defense Strategic Studies Group, Rosslyn, VA.

Assignments:

From	To	Assignment
June 1980	July 1981	Student, undergraduate pilot training, Reese AFB, TX.
July 1981	December 1984	Co-pilot and aircraft commander, 917th Air Refueling Squadron, Dyess AFB, TX.
January 1984	December 1988	Co-pilot, aircraft commander, instructor pilot, and flight commander, 32nd Air Refueling Squadron, Barksdale AFB, LA.
January 1989	July 1991	Company grade adviser to Commander, Strategic Air Command, later, manager of offensive aircraft systems and executive officer, Deputy Chief of Staff, Plans and Resources, Headquarters Strategic Air Command, Offutt AFB, NE.
August 1991	July 1992	Student, Air Command and Staff College, Maxwell AFB, AL.
July 1992	June 1994	Instructor pilot and flight commander, 9th Air Refueling Squadron, later, Commander, 722nd Operations Support Squadron, March AFB, CA.
June 1994	June 1995	Commander, 9th Air Refueling Squadron, later, Deputy Commander, 60th Operations Group, Travis AFB, CA.
July 1995	June 1996	National Defense Fellow, Secretary of Defense Strategic Studies Group, Rosslyn, VA.
July 1996	August 1998	Assistant to the Director, Office of the Secretary of Defense for Net Assessment, the Pentagon, Washington, DC.
August 1998	July 2000	Commander, 60th Operations Group, Travis AFB, CA.
July 2000	June 2002	Commander, 62nd Airlift Wing, McChord AFB, WA.
June 2002	June 2003	Vice Commander, Tanker Airlift Control Center, Scott AFB, IL.
June 2003	November 2004	Commander, Tanker Airlift Control Center, Scott AFB, IL.
December 2004 ...	August 2006	Director of Operations, U.S. Transportation Command, Scott AFB, IL.
August 2006	June 2007	Director, Air Force Strategic Planning, Deputy Chief of Staff for Strategic Plans and Programs, Headquarters U.S. Air Force, Washington, DC.
June 2007	October 2008	Director, Air Force Strategic Planning, Deputy Chief of Staff for Strategic Plans and Programs, Headquarters U.S. Air Force, and Director, Air Force QDR, Office of the Vice Chief of Staff, Washington, DC.
October 2008	October 2011	Assistant to the Chairman of the Joint Chiefs of Staff, Washington, DC.
October 2011	November 2012	Vice Commander, Pacific Air Forces, Joint-Base Pearl Harbor-Hickam, HI.
November 2012 ...	Present	Commander, Air Mobility Command, Scott AFB, IL.

Summary of joint assignments:

From	To	Assignment
September 1996 ..	August 1998	Assistant to the Director, Office of the Secretary of Defense for Net Assessment, the Pentagon, Washington, DC, as a lieutenant colonel.

From	To	Assignment
November 2004 ...	July 2006	Director of Operations and Logistics, U.S. Transportation Command, Scott AFB, IL, as a brigadier general.
October 2008	October 2011	Assistant to the Chairman of the Joint Chiefs of Staff, Washington, DC, as a lieutenant general.

Flight information:

Rating: Command pilot
Hours flown: More than 3,100
Aircraft flown: C-5, C-17A, C-141B, KC-10, KC-135A, and T-37

Major awards and decorations:

Defense Distinguished Service Medal
Distinguished Service Medal
Defense Superior Service Medal
Legion of Merit with two oak leaf clusters
Defense Meritorious Service Medal
Meritorious Service Medal with three oak leaf clusters
Air Force Commendation Medal
Air Force Achievement Medal
Joint Meritorious Unit Award
Combat Readiness Medal with two oak leaf clusters
National Defense Service Medal with bronze star
Armed Forces Expeditionary Medal with two bronze stars
Southwest Asia Service Medal with bronze star
Global War on Terrorism Service Medal
Armed Forces Service Medal

Effective dates of promotion:

Second Lieutenant, May 28, 1980
First Lieutenant, May 28, 1982
Captain, May 28, 1984
Major, January 1, 1990
Lieutenant Colonel, March 1, 1994
Colonel, September 1, 1998
Brigadier General, January 1, 2004
Major General, June 2, 2007
Lieutenant General, October 8, 2008
General, November 29, 2012

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Gen. Paul J. Selva, USAF, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Paul J. Selva.
2. **Position to which nominated:**
Commander, U.S. Transportation Command.
3. **Date of nomination:**
February 6, 2014.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
September 27, 1958; Biloxi, MS
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Ricki S. Selva (Maiden Name: Smith).
7. **Names and ages of children:**
None.
8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational, or other institution.
None.
10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Air Force Association - Member.
Airlift Tanker Association - Member.
11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.
None.
12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?
Yes.
13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?
Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

PAUL J. SELVA, GENERAL, USAF.

This 5th day of November, 2014.

[The nomination of Gen. Paul J. Selva, USAF, was reported to the Senate by Chairman Levin on March 26, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on April 8, 2014.]

[Prepared questions submitted to VADM Michael S. Rogers, USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. The integration of joint capabilities under the Goldwater-Nichols Act has been remarkable. All the warfighting benefits we enjoy from fighting as a joint force in air, land, sea—we are extending to cyberspace. In addition, it has improved civilian oversight of the Department of Defense (DOD) and fostered our military success over the last generation. Today U.S. military forces are more interoperable than ever before, and they set a standard for other militaries to attain. I see no need to modify the Goldwater-Nichols Act at this time.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not believe modifications to the Goldwater-Nichols Act are currently needed.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, U.S. Cyber Command?

Answer. The Commander, U.S. Cyber Command (CYBERCOM) is responsible for executing the cyberspace missions specified in section 18.d.(3) of the Unified Command Plan (UCP) as delegated by the Commander, U.S. Strategic Command (STRATCOM) to secure our Nation's freedom of action in cyberspace and to help mitigate risks to our national security resulting from America's growing dependence on cyberspace. Subject to such delegation and in coordination with mission partners, specific missions include: directing Department of Defense Information Networks (DODIN) operations, securing and defending the DODIN; maintaining freedom of maneuver in cyberspace; executing full-spectrum military cyberspace operations; providing shared situational awareness of cyberspace operations, including indications and warning; integrating and synchronizing of cyberspace operations with combatant commands and other appropriate U.S. Government agencies tasked with defending our Nation's interests in cyberspace; provide support to civil authorities and international partners. All these efforts support DOD's overall missions in cyberspace of defending the Nation against cyber attacks, supporting the combatant commands, and defending DOD networks.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I am humbled and deeply honored that the President has nominated me to be the 2nd Commander of CYBERCOM and the 17th Director of the National Security Agency (NSA). Over the past 3 decades, I have served in a wide variety of Joint and Navy positions that have prepared me well for the challenges ahead if confirmed by the U.S. Senate.

First, I have more than 32 years in the profession of arms, serving in various command, staff, and intelligence positions afloat and ashore. I have been the director for Intelligence for both the Joint Chiefs of Staff and U.S. Pacific Command, special assistant to the Chairman of the Joint Chiefs of Staff, and commanded at multiple levels. I have over 27 years of dedicated experience in the SIGINT arena as an In-

formation Warfare Officer and have held significant responsibilities in the cyber arena for much of the past 12 years.

In particular, my experiences and knowledge gained over the last 2½ years while serving as Commander of both Fleet Cyber Command and Tenth Fleet have done much to prepare me for the challenges of this new complex warfighting domain that is cyberspace. I should note that my responsibilities there include the command of the U.S. Navy's cryptologic capabilities, and so I have seen firsthand the relationship between cryptology and cybersecurity, and the importance of partnerships with interagency capabilities, with our allies, and with industry to strengthen the defense of our collective networks. My service at Fleet Cyber Command/Tenth Fleet afforded me direct experience, particularly in the realm of deliberate and crisis action planning, to ensure the effective execution of cyberspace responsibilities as directed by the Secretary of Defense through the Commander, STRATCOM.

Finally, my academic background has also helped prepare me for the challenges of high-level command, national security decisionmaking, and international engagement. I hold a Master of Science in National Security Strategy and am a graduate of both the National War College and the Naval War College. I was also a Massachusetts Institute of Technology Seminar XXI fellow.

Question. Does the Commander of CYBERCOM have command of or exercise operational control of the Defense Information Systems Agency's (DISA) and Military Services' communications networks?

Answer. If confirmed as Commander, CYBERCOM, I will be responsible for directing the operation and defense of DOD's information networks as specified in the UCP and as delegated by Commander, STRATCOM. The DISA provides, operates, and assures command and control, information sharing capabilities, and a globally accessible enterprise information infrastructure in direct support to national leaders, joint warfighters, and other mission and coalition partners across the full spectrum of operations. As a Combat Support Agency, DISA maintains a close working relationship with CYBERCOM, providing expertise on the networks, communications and computing infrastructure that it operates. I will not exercise command or operational control over DISA communications networks.

Question. As a career intelligence officer, what qualifications do you have to command these networks?

Answer. As noted in my biography, much of my career has involved not only intelligence duties but the command, administration, use, and employment of information networks and the data they carry, process, and store to protect and guard our Nation. Over the course of my services, I have witnessed and helped further the revolution in information technology that has helped make our military second-to-none in its ability to communicate and control forces while providing decisionmakers with unprecedented situational awareness. I have also devoted a great deal of my service to understanding and mitigating the vulnerabilities that our dependence on information networks can create for our military and our Nation. In my current duties as Commander, Fleet Cyber Command I exercise operational control over Navy's networks and have done so for 30 months.

Question. What qualifications do you have to command military forces and military operations?

Answer. As noted above, I have exercised command previously at both junior and senior levels. I currently command Fleet Cyber Command and Tenth Fleet, a global team of nearly 15,000 men and women. Their operating environment is dynamic, and demanding; Fleet Cyber Command/Tenth Fleet has literally been "in action" against capable and determined adversaries seeking access to our networks since the day I assumed command in 2011. The planning and operations we have conducted to protect our networks and provide the Navy and our military and government freedom of maneuver in cyberspace have been complex.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, CYBERCOM?

Answer. Any individual can learn more to enhance his or her expertise and abilities, and I have found that truth amply applies to me in understanding the very complex and rapidly evolving domain that is cyberspace. If confirmed, I shall meet with the combatant commanders to ascertain how CYBERCOM can better support their missions. Additionally, I would engage with key officials and personnel within the executive and legislative branches of the U.S. Government, leaders throughout the Intelligence Community, Law Enforcement, the Department of Homeland Security (DHS), and senior allied officials to hear their ideas about how we can work together to identify, assess, and mitigate the cyber threats we all face.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the commanders of the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, CYBERCOM, to the following officials:

The Secretary of Defense.

Answer. Pursuant to title 10, U.S.C., section 164, and subject to the direction of the President, the Commander, STRATCOM performs duties under the authority, direction, and control of the Secretary of Defense and is directly responsible to the Secretary for the preparedness of the command to carry out missions assigned to the command. As a sub-unified command under the authority, direction, and control of the Commander, STRATCOM, CYBERCOM is responsible to the Secretary of Defense through the Commander, STRATCOM. If confirmed, I will work closely with the Secretary in coordination with Commander, STRATCOM.

Question. The Deputy Secretary of Defense.

Answer. In accordance with title 10, U.S.C., section 132, the Deputy Secretary of Defense performs such duties and exercises powers prescribed by the Secretary of Defense. The Deputy Secretary of Defense will act for and exercise the powers of the Secretary of Defense when the Secretary is disabled or the office is vacant. If confirmed, I will work closely with the Deputy Secretary, in coordination with Commander, STRATCOM.

Question. The Director of National Intelligence.

Answer. The Intelligence Reform and Terrorist Prevention Act of 2004 established the Director of National Intelligence to act as the head of the Intelligence Community, principal advisor to the President and the National Security Council on intelligence matters pertaining to national security, and to oversee and direct the implementation of the National Intelligence Program. Pursuant to title 50, U.S.C., section 403, subject to the authority, direction, and control of the President, the Director of National Intelligence coordinates national intelligence priorities and facilitates information sharing across the Intelligence Community. If confirmed, I will work closely with the Commander, STRATCOM and through the Secretary of Defense to coordinate and exchange information with the Director of National Intelligence as needed to ensure unified effort and synergy within the Intelligence Community in matters of national security.

Question. The Under Secretary of Defense for Policy.

Answer. Title 10, U.S.C. and current DOD directives establish the Under Secretaries of Defense as the principal staff assistants and advisors to the Secretary of Defense regarding matters related to their respective functional areas. Within these areas, the Under Secretaries exercise policy and oversight functions, and in discharging their responsibilities, the Under Secretaries may issue instructions and directive memoranda that implement policy approved by the Secretary. If confirmed, I look forward to working with the Under Secretary of Defense for Policy, in coordination with Commander, STRATCOM, on all policy issues that affect CYBERCOM operations.

Question. The Under Secretary of Defense for Intelligence.

Answer. Title 10, U.S.C. and current DOD directives establish the Under Secretaries of Defense as the principal staff assistants and advisors to the Secretary of Defense regarding matters related to their respective functional areas. Within these areas, the Under Secretaries exercise policy and oversight functions and, in discharging their responsibilities the Under Secretaries may issue instructions and directive memoranda that implement policy approved by the Secretary. If confirmed, I shall work closely with the Under Secretary of Defense for Intelligence, in coordination with Commander, STRATCOM, on matters in the area of CYBERCOM's assigned responsibilities.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. Title 10, U.S.C. and current DOD directives establish the Under Secretaries of Defense as the principal staff assistants and advisors to the Secretary of Defense regarding matters related to their respective functional areas. Within these areas, the Under Secretaries exercise policy and oversight functions and, in discharging their responsibilities the Under Secretaries may issue instructions and directive memoranda that implement policy approved by the Secretary. If confirmed, I shall work closely with the Under Secretary of Defense for Acquisition, Technology, and Logistics, in coordination with Commander, STRATCOM, on matters in the area of CYBERCOM's assigned responsibilities.

Question. The Assistant Secretary of Defense for Homeland Defense.

Answer. The Assistant Secretary of Defense for Homeland Defense executes responsibilities including overall supervision of the homeland defense and defense support of civil authorities activities of the DOD while serving under the Under Secretary of Defense for Policy. Any relationship the Commander, CYBERCOM requires with the Assistant Secretary of Defense for Homeland Security would exist with and through the Under Secretary of Defense for Policy. If confirmed, I shall work with the Assistant Secretary of Defense for Homeland Defense in concert with Commander, STRATCOM; Commander, U.S. Northern Command; and Commander, U.S. Pacific Command, on related national security issues.

Question. The Chief Information Officer.

Answer. Under the authority of Department of Defense Directive 5144.02 and consistent with titles 10, 40, and 44, U.S.C., the DOD Chief Information Officer (CIO) is the Principal Staff Assistant and advisor to the Secretary of Defense and Deputy Secretary of Defense on information resources management and position, navigation, and timing matters. The DOD CIO is tasked with improving the combat power of the Department—as well as its security and efficiency—by ensuring that the Department treats information as a strategic asset and that innovative information capabilities are available throughout all areas of DOD supporting war fighting, business, and intelligence missions. The DOD CIO is the Department's primary authority for the policy and oversight of information resources management, to include matters related to information technology, network defense, and network operations, and it also exercises authority, direction, and control over the Director, DISA. If confirmed, I look forward to working closely with the Chief Information Officer through the Secretary and Deputy Secretary of Defense and Commander, STRATCOM, on matters in the area of CYBERCOM's assigned responsibilities.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman is the principal military advisor to the President, National Security Council, and Secretary of Defense. Title 10, U.S.C., section 163 allows communication between the President or the Secretary of Defense and the combatant commanders to flow through the Chairman. By custom and tradition, and as instructed by the UCP, if confirmed, I would normally communicate with the Chairman in coordination with the Commander, STRATCOM.

Question. The Secretaries of the Military Departments.

Answer. Under title 10, U.S.C., section 165, subject to the authority, direction, and control of the Secretary of Defense, and subject to the authority of the combatant commanders, the Secretaries of the Military Departments are responsible for administration and support of forces that are assigned to unified and specified commands. The authority exercised by a sub-unified combatant commander over Service components is clear but requires coordination with each Secretary to ensure there is no infringement upon those lawful responsibilities which a Secretary alone may discharge. If confirmed, I look forward to building a strong and productive relationship with each of the Secretaries of the Military Departments in partnership with Commander, STRATCOM.

Question. The Chiefs of Staff of the Services.

Answer. The Service Chiefs are charged to provide organized, trained, and equipped forces to be employed by combatant commanders in accomplishing their assigned missions. Additionally, these officers serve as members of the Joint Chiefs of Staff and as such have a lawful obligation to provide military advice. Individually and collectively, the Service Chiefs are a tremendous source of experience and judgment. If confirmed, I will work closely and confer regularly with the Service Chiefs.

Question. The combatant commanders and, specifically, the Commanders of STRATCOM and U.S. Northern Command.

Answer. CYBERCOM is a subordinate unified command under STRATCOM. The Commander, CYBERCOM, has both supported and supporting relationships with other combatant commanders, largely identified within the UCP, the Joint Strategic Capabilities Plan, execute orders, and operation orders. In general, the Commander, CYBERCOM, is the supported commander for planning, leading, and conducting DOD defensive cyber and global network operations and, in general, is a supporting commander for offensive missions. Specific relationships with Commander, U.S. Northern Command will be delineated by the President or the Secretary of Defense in execute and/or operation orders. If confirmed, I look forward to working with the combatant commanders to broaden and enhance the level and range of these relationships.

Question. The Director of the Defense Information Systems Agency.

Answer. The DISA is a DOD Combat Support Agency that provides, operates, and assures command and control, information sharing capabilities, and a globally accessible enterprise information infrastructure in direct support to national leaders,

joint warfighters, and other mission and coalition partners across the full spectrum of operations. Commander, CYBERCOM must maintain a close relationship with the Director, DISA to coordinate and represent requirements in this mission area, in order to accomplish STRATCOM-delegated UCP missions. If confirmed, I shall work closely with the Director of DISA on matters of shared interest and importance.

OVERSIGHT

Question. The resourcing, planning, programming and budgeting, and oversight for CYBERCOM's missions is fragmented within the Defense Department, the executive branch as a whole, and within Congress. Section 932 of the National Defense Authorization Act (NDAA) for Fiscal Year 2014 requires the Secretary of Defense to appoint a Senate-confirmed official from the Office of the Under Secretary of Defense for Policy to act as the principal cyber advisor to the Secretary.

What is your view of this legislation? Do you believe that it will improve oversight, planning, and resource allocation for the cyber mission within DOD?

Answer. I believe this legislation provides an opportunity to streamline cyber policy analysis and oversight within DOD, and its implementation will support DOD's long-term goals in cyberspace. Cyber is a complex issue that touches many parts of the Department and one single point of contact within the Office of the Secretary of Defense will reduce duplicative efforts and keep all offices that work on cyber issues in sync.

Question. What changes to the legislation, if any, would you recommend?

Answer. I do not recommend any changes at this time. If confirmed, I can assure you that I will work closely with the principal cyber advisor selected by the Secretary of Defense.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the Commander, CYBERCOM?

Answer. I believe the major challenge that will confront the next Commander, CYBERCOM, will be dealing with the changing threat in cyberspace. Adversaries today seek persistent presences on military, government, and private networks for purposes such as exploitation and potentially disruption. We as a military and a nation are not well positioned to deal with such threats. These intruders have to be located, blocked, and extracted, sometimes over long periods of time. We have seen the extent of the resources required to wage such campaigns, the planning and intelligence that are essential to their success, and the degree of collaboration and synchronization required across the government and industry (and with our allies and international partners). We in DOD are creating capabilities that can adapt to these uses and others, but we have some key capability gaps in dealing with increasingly capable threats. Our legacy information architecture, for instance, is not optimized for defense in its current form, and our communications systems are vulnerable. U.S. military forces currently lack the training and the readiness to confront advanced threats in cyberspace. Finally, our commanders do not always know when they are accepting risk from cyber vulnerabilities, and cannot gain reliable situational awareness, neither globally nor in U.S. military systems.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I plan to continue CYBERCOM's current course of building cyber capabilities to be employed by senior decisionmakers and combatant commanders. In accordance with the DOD Strategy for Operating in Cyberspace, CYBERCOM with its mission partners and allies has been helping the DOD to build:

1. A defensible architecture;
2. Trained and ready cyber forces;
3. Global situational awareness and a common operating picture;
4. Authorities that enable action;
5. Doctrine and concepts for operating in cyberspace.

I would plan to assess these current priorities, which are DOD-wide, with an eye to shifting emphases across them as necessary and appropriate, and as computer and communication technologies continue to evolve.

Question. What are your priorities for the CYBERCOM?

Answer. CYBERCOM is helping to accomplish something that our military has never done before. With the Services, allies, and a host of partners, it is putting in place foundational systems and processes for organizing, training, equipping, and operating military cyber capabilities to meet cyber threats. CYBERCOM and the

Services are building a world class, professional, and highly capable force in readiness to conduct full spectrum cyberspace operations. Its Cyber Mission Force (CMF) is already engaged in operations and accomplishing high-value missions. It is no longer an idea on a set of briefing slides; its personnel are flesh-and-blood soldiers, marines, sailors, airmen, and coastguardsmen, arranged in military units. That progress is transforming potential capability into a reliable source of options for our decisionmakers to employ in defending our Nation. Future progress in doing so, of course, will depend on our ability to field sufficient trained, certified, and ready forces with the right tools and networks to fulfill the growing cyber requirements of national leaders and joint military commanders. If confirmed, my highest priority will be continuing and expanding this progress toward making CYBERCOM capable of protecting our Nation's freedom of maneuver in cyberspace.

THE FUNDAMENTAL PROSPECTS FOR DEFENDING AGAINST CYBER ATTACKS

Question. The ease with which nation-states, terrorists, and criminals, are able to penetrate corporations and government organizations to steal information suggests that the prospects for cyberdefense, using current techniques at least, are poor. Nonetheless, CYBERCOM has been assigned the mission of defending the Homeland, which at least implies that a defensive mission is practical and achievable. It may be possible to build resilience into critical infrastructure to recover from an attack, through back-up systems and redundant control systems that are less automated or electronically connected, but the Government so far has not emphasized resilience over defense for our most critical infrastructure.

On a sustained basis in a conflict with a very capable nation-state, should we expect CYBERCOM to be able to prevent cyber attacks from reaching their targets or causing great damage?

Answer. The United States possesses superior military might across all warfighting domains, cyberspace included. In truth, however, there has been no large scale cyber conflict yet in history, and the state of strategy and execution of cyber warfare is evolving as we speak. Our decision to collocate key intelligence operations and cyberspace capability serves as a force multiplier, if properly authorized and supported by policy, resources, and willpower. Our force construct is such that it provides the United States the flexibility to engage, both offensively and defensively, in specific areas of hostility or on a transnational basis. We are building or further developing our international partnerships and relationships for mutual support and recognition of norms of behavior. We know there are other nation-states who have equal or near-equal capability to ours; we have to be sure that we have the capabilities, processes, authorities, and, where appropriate, delegation and pre-approvals in place to prevent and respond to malicious activity. In a conflict where risk to our systems, information, and critical infrastructure was in play, that the United States would need to optimize our ability to see, block, and maneuver against attackers in a streamlined and efficient fashion. We still have significant work to do to build out our forces and capabilities. However, given the circumstances, yes, I believe it is realistic to expect that U.S. CYBERCOM could effectively engage the adversary to prevent attacks and severe damage.

Question. Is it reasonable to expect the private sector nonetheless to build defenses to prevent serious impacts on critical infrastructure?

Answer. Yes, I believe that mission assurance and the protection of our critical infrastructure is an inherent obligation of all, not just DOD, DHS, DOJ/Federal Bureau of Investigation (FBI) and our Government. In many cases, mission assurance relies on the provision, management, or facilitation of critical infrastructure lies in the private sector. Defensive measures could include not just automated capabilities to prevent or respond, but also adherence to proper standards of network security, administration, sharing of threat and vulnerability information, and compliance. These are as critical to protection of infrastructure as is military or cyber might. In almost any scenario, collaboration and information sharing across private and public, governmental and non-governmental organizations will be a key to successful outcomes.

Question. In your view, could such cyber attacks be prevented through the development of offensive capabilities and the principles of deterrence?

Answer. Yes, the development of both offensive and defensive capabilities can serve to deter an adversary from cyber attack. Strong capabilities can deter an attack by preventing an adversary from achieving his objectives and demonstrating the ability to impose costs on the adversary.

Question. Should we expect CYBERCOM to be able to prevent the more limited attacks that could be expected from powers with lesser cyber capabilities, such as North Korea and Iran?

Answer. Adversarial activities over recent years have shown that the level of expertise required to conduct potentially damaging operations has steadily lowered, enabling less capable actors to achieve some level of effect. Although we continue to build and develop our forces and capabilities, I believe that CYBERCOM has the capability to prevent such attacks, yes, whether from a capable or less capable adversary, given the order and provided that the supporting policies, authorities, relationships, and will to act are in place.

Question. In your view, can cyber warfare capabilities provide an asymmetric advantage for such rogue nations, providing them the potential to strike the American people and economy?

Answer. Yes. Regardless of the target—assuming that the adversary has somehow developed the access—the physics of the cyberspace domain and the technology supporting it make it easier for an adversary to hide or obfuscate his capability, attack vector, and location, and deliver an effect on his target either singularly or repeatedly within milliseconds. If he or she has subverted any number of proxies from which to operate, that further multiplies the advantage enjoyed. When the victim is placed in a reactive posture by processes which constrain the ability to respond, the advantage is multiplied. Internal defensive measures can mitigate that advantage to an extent, of course.

Question. If so, how should we demonstrate or clarify our retaliatory capability as a means of contributing to deterrence? Should the U.S. Government be more forthcoming about the nature of cyber warfare, and the balance between offensive and defensive capabilities?

Answer. I believe the recent disclosures of a large portion of our intelligence and military operational history may provide us with opportunity to engage both the American public and our international partners in discussion of the balance of offense and defense, the nature of cyber warfare, norms of accepted and unacceptable behavior in cyberspace, and so forth.

SUPPORT TO CIVIL AUTHORITIES

Question. CYBERCOM has a mission to support civil authorities, such as DHS and law enforcement agencies, to help defend government networks and critical infrastructure networks owned and operated by the private sector.

Please describe the ways that CYBERCOM should assist civil authorities and the capability of CYBERCOM to provide that assistance.

Answer. I believe that a request for support to civil authorities for cyber related assistance normally occur as a response to a request for assistance from DHS to DOD, and in close coordination with the Commanders of STRATCOM and NORTHCOM. That support could be technical assistance in a number of different ways, such as recommendations for improved network configurations, information assurance measures, or specific defensive response actions. Other technical assistance could be in the form of mitigation options, forensics, or data analysis.

Question. U.S. Northern Command was established to serve as the focal point for DOD support to civil authorities.

Will cybersecurity support to civil authorities be provided through U.S. Northern Command, as a supported command, or otherwise? If not, why not?

Answer. Depending on the nature of the national emergency or crisis, and the requirement for cybersecurity support, the Secretary of Defense would determine which combatant commander would be supported and supporting and CYBERCOM would comply with that determination. In any scenario with respect to cyber security support to civil authorities, a close collaborative relationship between U.S. Northern Command and CYBERCOM will be key.

USE OF FORCE IN CYBERSPACE

Question. Does the Defense Department have a definition for what constitutes use of force in cyberspace, and will that definition be the same for our activities in cyberspace and those of other nations?

Answer. DOD has a set of criteria that it uses to assess cyberspace events. As individual events may vary greatly from each other, each event will be assessed on a case-by-case basis. While the criteria we use to assess events are classified for operational security purposes, generally speaking, DOD analyzes whether the proximate consequences of a cyberspace event are similar to those produced by kinetic weapons.

As a matter of law, DOD believes that what constitutes a use of force in cyberspace is the same for all nations, and that our activities in cyberspace would be governed by Article 2(4) of the U.N. Charter the same way that other nations would be. With that said, there is no international consensus on the precise definition of

a use of force, in or out of cyberspace. Thus, it is likely that other nations will assert and apply different definitions and thresholds for what constitutes a use of force in cyberspace, and will continue to do so for the foreseeable future.

Question. Has the Defense Department, or the administration as a whole, determined what constitutes use of force in cyberspace in relation to the War Powers Act, the exercise of the right of self-defense under the U.N. Charter, and the triggering of collective defense obligations?

Answer. It is up to the President to determine when, based upon the circumstances of any event, including a cyberspace event, and the contemplated response that the President intends to proceed with, what consultations and reports are necessary to Congress, consistent with the War Powers Act.

The United States would evaluate its individual self-defense rights, as well as the self-defense rights of other nations, consistent with international law and Article 51 of the U.N. Charter. This analysis would assess whether an illegal use of force had occurred, and whether a State's inherent right of self-defense was triggered. If the United States held a collective defense obligation to the state that was subject to the illegal use of force, then the United States would evaluate its obligations consistent with its treaty obligations, keeping in mind that the U.N. Charter recognizes a state's inherent right of individual and collective self-defense. After all, collective self-defense obligations apply when another state is threatened or subject to a use of force in the cyber domain just as they would in other warfighting domains.

Question. Could CYBERCOM employ offensive cyber weapons against computers located abroad that have been determined to be sources of an attack on the United States or U.S. deployed forces if we do not know who is behind the attack (i.e., a foreign government or non-state actors)? Without confident "attribution," under international law, would the Defense Department have the authority to "fire back" without first asking the host government to deal with the attack?

Answer. International law does not require that a nation know who is responsible for conducting an armed attack before using capabilities to defend themselves from that attack. With that said, from both an operational and policy perspective, it is difficult to develop an effective response without a degree of confidence in attribution. Likely, we would take mitigating actions, which we felt were necessary and proportionate, to defend the Nation from such an attack. I'd note that in such an event, CYBERCOM would be employing cyber capabilities defensively, in the context of self-defense.

POLICIES GOVERNING ACCESS TO SENSITIVE TARGETS FOR INTELLIGENCE COLLECTION AND TARGETING

Question. Traditionally, espionage has not been regarded as a use of force or an act of war. However, in cyberspace operations, experts agree that gaining access to a target for intelligence collection is tantamount to gaining the ability to attack that target. If a penetration were detected, the victim may not know whether the purpose of the activity would be limited to espionage only, or would also constitute preparation for an attack.

Are there classes of foreign targets that the U.S. Government considers should be "off-limits" from penetration through cyberspace?

Answer. My view is that the U.S. Government should only conduct cyberspace operations against carefully selected foreign targets that are critical to addressing explicitly stated intelligence and military requirements, as approved by national policymakers and the national command authority.

Question. Would or should such targets be immune to penetration by the United States in peacetime even for intelligence collection? Should there be a review process outside of DOD for such potential targets?

Answer. Intelligence collection is conducted in response to specific needs expressed by policymakers and military commanders for information. Those needs are vetted through a formal requirements process managed by the Director of National Intelligence that includes a review of sensitive policy equities.

Question. How does the NSA currently consider these issues when making decisions about targeting for intelligence collection?

Answer. NSA conducts intelligence collection operations in response to specific requirements that are vetted through a formal process managed by the Director of National Intelligence. That process includes an interagency review of sensitive policy equities.

Question. What role do the White House and the interagency coordination process play in this decision process?

Answer. The White House and the interagency community are directly involved in approving foreign intelligence requirements and determining what targets are ap-

propriate for cyberspace and other Signals Intelligence (SIGINT) operations. All cyberspace operations conducted by NSA and CYBERCOM are governed by the policy constraints set by the White House and the interagency coordination process. President Obama recently announced improvements to this process in Presidential Policy Directive PPD-28.

NSA and CYBERCOM (under its delegated intelligence authorities) conduct intelligence collection operations in response to specific requirements that are vetted through a formal process managed by the Director of National Intelligence. That process includes an interagency review of sensitive policy equities.

Question. Do you see a need for a change in the decisionmaking process?

Answer. I believe that the recent improvements to the policy review process described in PPD-28 should be sufficient to ensure that all U.S. Government and privacy interests are considered prior to engaging in cyberspace operations. I have no specific recommendations for additional changes at this time.

AUTHORITIES OF COMMANDER, U.S. CYBER COMMAND

Question. Offensive cyber warfare weapons or operations could have devastating effects, depending on the target of the attack and the method used, that could be comparable to those caused by weapons of mass destruction.

Under what circumstances, if any, would you as Commander, CYBERCOM, have the authority to use offensive cyber weapons without prior approval by the President?

Answer. Under current policy, Commander, CYBERCOM, would not use cyber capabilities for offensive purposes without prior approval by the President.

Question. Are CYBERCOM forces the only forces permitted to conduct offensive military cyber operations?

Answer. The President or Secretary of Defense could authorize any combatant command to direct assigned cyber forces to conduct military cyberspace operations. At present, we are building a CMF, which will be able to conduct these operations under the command and control of whichever combatant command to which they are assigned.

Question. Are there official rules barring non-CYBERCOM forces from, for example, causing cyber effects against battlefield weapons systems, as an extension of traditional electronic warfare capabilities?

Answer. As far as I am aware, there are none.

Question. Are there clear distinctions between cyber warfare and electronic warfare?

Answer. While there are clear distinctions between electronic warfare and cyber warfare, there may also be avenues to achieve greater operational synergy between these two missions and to examine the policy implications of their synchronized use in warfare.

LAWS OF WAR

Question. Has DOD determined how the laws of armed conflict (including the principles of military necessity in choosing targets, proportionality with respect to collateral damage and unintended consequences, and distinguishing between combatants and non-combatants) apply to cyber warfare, with respect to both nation-states and non-state entities (terrorists, criminals), and both when the source of an attack is known and unknown?

Answer. Per DOD guidance, all military operations must be in compliance with the laws of armed conflict—this includes cyber operations. The law of war principles of military necessity, proportionality and distinction will apply when conducting cyber operations.

Question. If not, when will the Department produce authoritative positions on these issues?

Answer. N/A.

EQUITIES

Question. There have been many instances in history where military and political leaders had to struggle with the choice of acting on intelligence information to save lives or forestall an enemy success, but at the cost of the enemy learning that their classified information or capabilities had been compromised. These choices are referred to as “balancing equities” or “gain-loss” calculations.

Who is in charge of the equities/gain-loss process for cyberspace within the military?

Answer. There is a clear framework established to adjudicate the equities/gain-loss and is part of both crisis and deliberate planning efforts on the part of the com-

batant commanders. The risk-loss equation in DOD is made after comprehensive consultation with the Intelligence Community and the impacted commander. CYBERCOM is the lead for DOD cyberspace deconfliction and is directly involved in cases of disagreement as part of the processes directed in key interagency documents. If the interagency disagreement is not resolved at this level, the issue goes to the Chairman, Joint Chiefs of Staff, the Secretary of Defense, NSC Deputies, and later to the President where the issue is resolved.

Question. If these decisions rest with the Commander of CYBERCOM, how will the combatant commands, the military Services, and other defense agencies be persuaded that their interests will be fairly balanced with those of NSA?

Answer. PPD-20 allows for representation from other agencies, giving each a voice in the process. When gain-loss issues arise, all parties have the responsibility to comprehensively state the issues and impacts with these discussions beginning at the action officer level. Formal disagreements unresolved after CYBERCOM review follow a clear path to department and national decisionmakers, to include the President if need be.

Question. Since NSA personnel are filling a large number of key positions within CYBERCOM, how can you be confident that equity issues make it to senior levels in CYBERCOM, and are fully and fairly examined?

Answer. The value of NSA's contribution to the CYBERCOM mission in terms of manpower and mission support is vitally important; however, I believe that the military and civilian personnel in the current CYBERCOM workforce contains a broad mix of experience and background from across the defense, intelligence, operations and law enforcement communities. Within the intelligence directorate for example, the Defense Intelligence Agency is the primary provider of personnel, with a senior executive from that agency holding the deputy director position. Staffing the leadership from a wide range of sources is a strength that has resulted in a more diverse level of input into the equities process than ever before. All issues requiring senior leadership attention are fully and fairly vetted through a rigorous system of boards and working groups, made up of representation from across our diverse leadership cadre.

Question. How are equities/gain-loss decisions made for the Nation as a whole? How will the interests of the vulnerable private sector, critical infrastructure, and civil agencies be weighed in the selection of targets for intelligence collection and attack?

Answer. The Tri-lateral Memorandum of Agreement contains a deconfliction mechanism involving DOD, DOJ, the Intelligence Community and agencies outlined in, and reinforced by PPD-20. Disagreements are handled similar to those internal to DOD; the issue is forwarded from the Seniors involved to the Deputies then on to the Principals Committee with the final stop being the President in cases where equities/gain-loss are ultimately resolved.

Question. As a foreign intelligence agency, NSA has a mission to find vulnerabilities in the networks of our adversaries. However, the NSA's Information Assurance Directorate is responsible for securing national security systems and CYBERCOM has the responsibility of defending DOD networks and the Nation.

How do you believe these responsibilities should be balanced?

Answer. The basis for handling discovered vulnerabilities must be the national interests of the United States. Understanding particular vulnerabilities, and how they may impact our national interests, requires deep understanding of the technology, the risks a vulnerability can pose, options for mitigating these risks, and the potential for foreign intelligence if the vulnerability remains open. But the balance must be tipped toward mitigating any serious risks posed to the U.S. and allied networks. NSA has always employed this principle in the adjudication of vulnerability findings, and if confirmed, I intend to sustain the emphasis on risk mitigation and defense.

Question. What are the policies and processes that apply to the discovery and disclosure of so-called "0-day" vulnerabilities in software?

Answer. Within NSA, there is a mature and efficient equities resolution process for handling "0-day" vulnerabilities discovered in any commercial product or system (not just software) utilized by the United States and its allies. The basis for it is documented in formal NSA policy, which includes the adjudication process. The policy and process ensure that all vulnerabilities discovered by NSA in the conduct of its lawful missions are documented, subject to full analysis, and acted upon promptly.

NSA is now working with the White House to put into place an interagency process for adjudication of 0-day vulnerabilities. If confirmed, I will support this process.

Question. What is the impact of not disclosing these vulnerabilities? What is the impact of disclosing them?

Answer. When NSA discloses a vulnerability discovery to a vendor, the goal is to achieve the most efficient and comprehensive mitigation of the risk. Upon disclosure, vendors usually fix the vulnerability, and issue an update or patch. The risk is mitigated only when users actually install the patch. Since adversaries frequently study industry patches to learn about underlying vulnerabilities that will remain in unpatched systems, NSA disclosure of a vulnerability may temporarily increase the risk to U.S. systems, until the appropriate patches are installed.

When NSA decides to withhold a vulnerability for purposes of foreign intelligence, then the process of mitigating risks to U.S. and allied systems is more complex. NSA will attempt to find other ways to mitigate the risks to national security systems and other U.S. systems, working with stakeholders like CYBERCOM, DISA, DHS, and others, or by issuing guidance which mitigates the risk. If confirmed, I intend to strengthen collaboration with other Government stakeholders, under the auspices of the planned interagency process.

Question. What is the impact of not disclosing these vulnerabilities? What is the impact of disclosing them?

Answer. NSA currently follows its equity resolution process, as required under NSA policy. Technical experts document the vulnerability in full classified detail, options to mitigate the vulnerability, and a proposal for how to disclose it. The default is to disclose vulnerabilities in products and systems used by the United States and its allies. The information assurance and intelligence elements of NSA jointly participate in this process.

DETERRENCE AND ESCALATION CONTROL

Question. Does the U.S. Government have a cyber warfare deterrence strategy or doctrine?

Answer. Deterrence in cyberspace is achieved through the totality of U.S. actions, including the United States overall defense posture and the resilience of our networks and systems. As the President stated in his International Strategy for Cyberspace, the United States reserves the right to defend itself against cyberattacks. Whenever possible, the United States will exhaust all options prior to military force, and will always act in accordance with U.S. values and in a manner consistent with the Constitution and international law. This administration has articulated these policies consistently since the International Strategy for Cyberspace was published in 2011. The establishment of CYBERCOM is an element of a deterrence strategy, but more work and planning will be required to evolve a solid national strategy.

Cyber warfare is a complex and evolving discipline, and the subject of deterrence is drawing increasing attention at all levels of government and the Interagency, and in our discussions with our international partners. If confirmed, I will work with DOD, DHS, DOJ/FBI and others as we work to establish the relationships and engagement necessary to build such a strategy and policy.

Question. Would you agree that promulgating such a doctrine requires at least some broad statements of capabilities and intentions regarding the use of offensive cyber capabilities, both to influence potential adversaries and to reassure allies?

Answer. Classic deterrence theory is based on the concepts of threat and cost; either there is a fear of reprisal, or a belief that an attack is too hard or too expensive. Cyber warfare is still evolving and much work remains to establish agreed upon norms of behavior, thresholds for action, and other dynamics. A broad understanding of cyber capability, both defensive and offensive, along with an understanding of thresholds and intentions would seem to be logical elements of a deterrence strategy, both for our allies and our adversaries and as they are in other warfighting domains. I believe we'll see much discussion of the structure and implementation of our cyber deterrence strategy from DOD and Intelligence Community experts, along with Interagency engagement.

Question. How do you reconcile the utility of speaking more openly and candidly about cyber warfare capabilities in the interest of promoting greater public knowledge and the development of deterrence doctrine with the continued need to classify U.S. cyber capabilities?

Answer. I believe that as we communicate more with the public, the understanding that the United States will defend and deter in cyberspace, in accordance with law and international agreement, is more important than understanding the intricacies of the capabilities it will use to do so. I believe the public will understand that we do not want to telegraph our strategy for action to the adversary. As cyberspace matures as a warfighting domain, I believe our classification policies will also evolve to support growing domestic and international partnerships and relationships. Regardless, we will adhere with all classification policies and practices dictated by Executive order.

Question. Most experts believe that the attacker has a substantial advantage over the defender in cyber warfare. It is also widely believed that striking first against an adversary's networks offers an advantage if the adversary's command and control networks can be degraded, and because the attacker can take steps to protect itself from a retaliatory attack. These considerations suggest that cyber warfare is currently "unstable" from the perspective of classic deterrence theory and escalation control.

What are your views of these dynamics?

Answer. There is no doubt that the dynamics of offense and defense in cyberspace are complex, simply due to the physics of the engagement space. Automated capabilities, human response cycles, and many other factors make them even more so. These considerations are discussed and debated by experts across the whole of government, industry, and academia on a near-constant basis. The science and the philosophy are evolving. Just as it took time for doctrine, strategy, and concepts of deterrence and escalation to evolve in the other warfighting domains, so it is with cyber warfare. I believe we are making progress.

IMPLICATIONS OF U.S. DEPENDENCE ON CYBER NETWORKS

Question. Many experts assert that the United States is the most vulnerable country in the world to cyber attack because we are the most networked nation and the one that has most fully exploited computer networks for business, government, and military functions.

How could the Department compensate for U.S. dependence on vulnerable cyber networks in developing effective deterrent strategies?

Answer. We have effective deterrent strategies in place in the other warfighting domains, in the form of our demonstrated military might and capability. Cyber deterrence should evolve in the same way; demonstrated capability to defend, respond, or be able to attack when necessary is a key to deterrence. Our dependence on our networks can be compensated for by having a strong, viable defense in the form of both traditional military strength and cyber capability. We have the ability to respond proportionately and discriminately in both kinetic and non-kinetic modes when we can meet attribution requirements.

We need, however, to move from what is currently a reactive posture, to a proactive one. We are integrating and synchronizing our military operations and supporting intelligence capabilities for optimal detection, analysis, assessment, and response to mitigate threats and vulnerabilities on a near real-time basis. The concepts we are maturing in the form of multi-layered approaches and scalability, in coordination with DHS and others, are expandable to the rest of our Government and critical infrastructure.

Our networks are inherent to our way of life; their vulnerability is the key concern. A strong and deterrent defense, along with robust, resilient networks, will alleviate that vulnerability.

Question. Given our vulnerabilities, is it in our interest to avoid engaging in certain kinds of offensive cyber warfare—so that we do not set precedents by example for others to follow?

Answer. Any decision to engage in offensive cyber operations must reflect careful consideration and due diligence of the range of potential impacts, including adversary responses and the impact upon norms and precedents in cyberspace. Even as we must be prepared to undertake offensive cyber operations, these are important considerations in the decision to undertake such operations.

THE CHALLENGE OF ATTRIBUTION

Question. An essential feature of military, intelligence, and criminal or malicious activities in cyberspace is the ease with which the origin and the identity of those responsible for an attack can be concealed—the problem of "attribution".

Can deterrence be an effective strategy in the absence of reliable attribution?

Answer. Yes, I believe there can be effective levels of deterrence despite the challenges of attribution. Attribution has improved, but is still not timely in many circumstances. We must employ several approaches to this challenge. A healthy, engaged partnership with the Intelligence Community is vital to continued improvement in attribution. Second, is development of defensive options which do not require full attribution to meet the requirements of law and international agreement. Cyber presence, being forward deployed in cyberspace, and garnering the indications and warnings of our most likely adversaries can help (as we do with our forces dedicated to Defend the Nation). We must ensure we leverage the newest technology to identify our attackers before and during an attack—not just after. Last, and perhaps most important, we need to make our networks and supporting architectures robust,

resilient, and defensible by establishing and encouraging adherence to cybersecurity and information assurance standards. This last is a national problem across all of our networks, and is one which we should actively work to resolve.

There are other actions that need to be taken, too, in order to advance our defensive capability and support a deterrent posture. These include partnerships with nation-states who share common goals and expectations for behavior in cyberspace. From these partnerships, we can build normative standards, thresholds for action, and evidential frameworks on which to base response. We also need to improve our relationships with private and industrial sector partners through information sharing regarding threat and vulnerabilities.

I believe the United States may be considered an easier mark because our own processes and criteria for response lead the adversary to believe, rightly or wrongly, that we do not have the will to respond in a timely or proportionate manner, even when attribution is available. This is within our capacity to fix.

The bottom-line is that we have much we can do to increase our posture to prevent attacks, mitigate them to at least a reasonable extent, or deter them outright, without full attribution.

Question. Can the attribution problem be solved without comprehensive information sharing among the private sector and with the government?

Answer. I believe that the difficulty of attribution is compounded without a close relationship with the private sector, and full information sharing to the degree that policy and law allow. Most of our national information systems and networks ride on or are composed of infrastructure that is privately owned; we need their engagement to build attribution capability.

SYSTEMS ACQUISITION

Question. Combatant commands by design play a limited role in the acquisition process. However, the Commander of CYBERCOM is dual-hatted as the Director of the NSA, which is a large enterprise with substantial resources for developing, procuring, and supporting new equipment, systems, and capabilities. In addition, the Commander exercises operational control of DISA networks, and DISA is also an agency that acquires systems and capabilities.

Is there a precedent for a combatant commander to exercise this degree of direct control over acquisition organizations, aside from Special Operations Command, which Congress expressly provided with acquisition authority?

Answer. As confirmed as the Commander, CYBERCOM, I will rely upon the acquisition authority of other organizations, (e.g., the Services and Defense Agencies) to equip the cyber forces to satisfy validated operational requirements and comply with DOD policy and capability development guidance. This is the same process used by the other combatant and sub-unified commands, with the exception of U.S. Special Operations Command.

Question. What measures have been taken to ensure that Commanders of CYBERCOM do not circumvent the requirements process and the established acquisition process by directing subordinates at NSA or DISA to directly address needs perceived by CYBERCOM without the rigor required by the DOD requirements and acquisition processes?

Answer. CYBERCOM, NSA, and DISA are all separate organizations with their own, ability to acquire personnel and equipment, processes and staffs. Due to the separate nature of these three organizations, the oversight, accountability chains, and the ability to audit will ensure I follow the CYBERCOM requirements process and the Director of NSA follows the established NSA acquisition process. As mentioned earlier, CYBERCOM will operate under the same authorities and oversight as other combatant commands and sub-unified commands.

Specifically regarding rigor, CYBERCOM adheres to all laws and policies regarding acquisition and if confirmed, I will ensure DOD requirements and acquisition processes will continue to be followed.

Specifically, I understand the Department directed CYBERCOM to establish the DOD Cyber Operational Capabilities Board (COCB) to better integrate military cyber capabilities requirements into cyber capability development. The COCB is in its infancy and the draft Charter is still being staffed, but it will be fully alignment with the Department's Joint Capabilities Integration and Development System to ensure future cyberspace capability development supports the Combatant Commands.

It is important to note that although CYBERCOM, as a sub-unified command, does not have its own acquisition authority, it has the management controls necessary to ensure Command activities for funding capability developments satisfy validated operational requirements and comply with DOD policy and capability de-

velopment guidance. While CYBERCOM does not have the acquisition authority to designate a Milestone Decision Authority (MDA), the Command makes investment decisions that result in starting, continuing, suspending, or terminating its investments in cyberspace capability developments. These decisions are made in concert with executing MDAs and reflect the Command's focus on funding only those capability developments that will deliver required operational cyberspace capabilities within the timeframes needed. As discussed previously, CYBERCOM will rely upon the acquisition authority of other organizations, e.g., the Services and Defense Agencies.

Question. The NDAA for Fiscal Year 2011 required the Secretary of Defense to establish a strategy for streamlining the acquisition and oversight process for cyber warfare capabilities, which resulted, among other things, in the establishment of the Cyber Investment Management Board (CIMB).

Three years after the passage of this legislation, how would you characterize DOD's progress in establishing an agile acquisition process to provide capabilities for CYBERCOM?

Answer. The CIMB was established in 2012 and has been meeting on a quarterly basis. The CIMB is chartered to provide strategic guidance and recommendations to support integration and synchronization of cyber capabilities across science and technology requirements, acquisitions, development, test and evaluation, and sustainment to ensure that cyber warfare investments are efficiently planned, executed, and coordinated across the Department. The CIMB continues to mature and is working to demonstrate a streamlined acquisition and oversight process for cyber warfare capabilities. Currently, they have identified pilot programs to demonstrate the proof of principle for rapid acquisition of cyber capabilities.

MILITARY SERVICE ROLES IN U.S. CYBER COMMAND

Question. Each of the Military Services is producing cyber operations units for assignment to CYBERCOM to defend the Nation, support the other combatant commands, and to defend DOD networks.

Are these Army, Navy, Marine Corps, and Air Force units geographically organized and assigned, or is there also specialization among the Military Services by mission or type of target?

Answer. Service provided CMF Teams are both geographically aligned and specialized depending upon their assigned mission area.

The Cyber National Mission Force is comprised of National Mission Teams, National Support Teams, and National Cyber Protection Teams. They are assigned to the "Defend the Nation" in cyberspace mission area and, if directed, defend our critical infrastructure and key resources against nation state and non-state actors.

The Combat Mission Forces are comprised of Combat Mission Teams and Combat Support Teams. They are assigned to the "Provide Support to Combatant Commands" mission area. Combat Mission Forces are geographically and functionally aligned under one of four Joint Force Headquarters-Cyber (JFHQ-C) in direct support of geographic and functional combatant commands. They are aligned as follows:

- JFHQ-C Washington supports U.S. Special Operations Command, U.S. Pacific Command, and U.S. Southern Command
- JFHQ-C Georgia supports U.S. Central Command, U.S. Africa Command, and U.S. Northern Command
- JFHQ-C Texas supports U.S. European Command, STRATCOM, and U.S. Transportation Command

The Combat Protection Forces are comprised of Service, DISA, and Combatant Command Cyber Protection Teams. They are assigned to the "Secure, Operate, and Defend the Department of Defense Information Networks" mission area. These teams are specialized to prepare and protect key cyber terrain to provide mission assurance.

Question. Would, for example, Army units be assigned to operate against naval or air targets, and vice versa?

Answer. Yes, targets developed for fires and effects delivered in and through cyberspace do not necessarily correspond with traditional Service domains much as an Air Force unit may be tasked to attack a naval vessel. The cyberspace domain often intersects with multiple elements of a single target. A Target System Analysis that yields multiple aimpoints provides a commander flexibility on how best to prosecute the target with the least risk. These options may require an Army unit to operate against naval or air targets and vice versa. Ultimately, the Joint Force Commander will determine how best to engage a target with the cyber mission forces at his/her disposal.

Question. Will each geographic combatant command have a mix of units from each Military Service?

Answer. Each geographic combatant command is supported by a Joint Force Headquarters-Cyber with personnel from all Services, and with the exception of U.S. Africa Command, all GCCs have a combination of Service established CMF teams aligned. Currently, all U.S. Africa Command CMFs are U.S. Army provisioned.

Question. Will geographic combatant commanders be permitted to execute cyber operations under their own authorities?

Answer. Geographic combatant commanders already have authority to direct and execute certain Defensive Cyberspace Operations (DCO) within their own networks. These actions consist of internal defensive measures to prepare and protect mission critical networks. In the event of hostilities or contingency operations, combatant commanders would be permitted to execute full spectrum cyber operations as approved by the President and directed by the Secretary of Defense.

FOCUS ON INTELLIGENCE GATHERING VERSUS FOCUS ON WARFIGHTING

Question. The NSA, as an intelligence agency, appropriately places the highest importance on remaining undetected, and accordingly invests in high-end—and therefore expensive and hard-to-develop—technical tools and tradecraft, following a deliberate methodology for developing and maintaining capability. CYBERCOM, as a military combatant command, has very different interests and objectives. For example, it must have the capability to act rapidly, it may need tools and processes that do not require computer scientists to operate them, and it may need to act in a fashion that makes it clear that the operation is an attack by the United States.

Do you believe that you could direct CYBERCOM wartime operations effectively if CYBERCOM were only able to use the NSA infrastructure to support those operations?

Answer. It depends. We must ensure we have the tools and infrastructure needed to accomplish our mission whenever necessary. CYBERCOM should leverage the NSA platform where appropriate and cost-effective, while developing additional infrastructure to accomplish military operations that are unique and distinguishable from the Intelligence Community.

Question. How scalable are NSA infrastructure, personnel, and tools for supporting combat operations in cyberspace?

Answer. NSA's infrastructure and tools could be scaled to support combat operations in cyberspace. To most effectively manage risks across military and intelligence operations in cyberspace, CYBERCOM and the Services need to leverage NSA expertise to build cyberspace capabilities for combat operations which could include additional tools and infrastructure that are unique and distinguishable from the Intelligence Community.

Question. On what schedule should CYBERCOM develop the capability to take offensive actions that do not require hiding the fact that the operations are being conducted by U.S. forces?

Answer. As the Services field CMFs in accordance with Joint Staff guidance, capability development should occur concurrently to ensure the CMF have the requisite facilities, platform, equipment, and tools needed to accomplish their assigned mission. In many cases, Cyber forces, to be operationally effective, would need to retain the capability to operate in a manner which conceals the detailed specifics of U.S. military capabilities. If we were to operate “in the clear,” we may expose our tradecraft, tools, and infrastructure. If we do that, our enemy can deny us our capability and, in some cases, replicate it and use it against us.

Question. Section 932 of the NDAA for Fiscal Year 2014 requires the Secretary of Defense to provide CYBERCOM with infrastructure to enable CYBERCOM to independently access global networks to conduct military operations.

What are your views on this requirement?

Answer. There is no doubt that collocating CYBERCOM with NSA, and dual-hatting the Commander and Director, allows for efficient use of available platform capabilities and technical expertise. I do believe; however, that CYBERCOM needs additional infrastructure to accomplish military operations that are unique and distinguishable from the Intelligence Community. The Department has made significant progress recently in identifying and planning for development of alternative, diverse, scalable, deployable, and disposable platforms that can be available on demand to the CMF for mission accomplishment.

Question. What is your understanding of the Department's plan for complying with the legislation?

Answer. My understanding is that CYBERCOM has already been tasked by the Deputy Secretary of Defense and has made measurable progress in laying out a

strategy for identifying the numbers and mix of alternative platforms required to meet operational requirements, both for steady state and contingency purposes. These platforms will give the CMF the diversity and scalability needed to address the threat, apart from the intelligence platform. Additionally, since they do not require the breadth and sophistication of the existing platform, they should be less expensive to build and deploy.

Question. Do you believe DOD can implement the legislative direction in an effective and affordable manner?

Answer. Yes, there has been a significant amount of effort expended by the Department toward meeting this requirement.

DEVELOPMENT OF CYBER OFFICER CORPS

Question. In a forthcoming article, the J-3 of CYBERCOM, Major General Brett Williams, argues that: "We have a pressing need to develop cyberspace operators who are credible and effective in the J-3 and J-5, within both the Joint Staff (JS) and the combatant commands (CCMD). Just for emphasis, that is the J-3 and J-5, not just the J-2 and J-6; and at all of the CCMDs, not just CYBERCOM . . . Joint staffs consist of what we typically think of as operators, members of the combat arms who are educated, trained and experienced in operations. Cyberspace expertise usually comes from people with intelligence, communications or cryptology backgrounds; career fields typically categorized as support forces. If we are going to treat operations in cyberspace like operations in the other domains, the Services must commit to unique career fields for cyberspace . . . Cyberspace, like the other domains, requires officers who are developed across their careers in a way that positions them to lead at senior levels in both command and staff. Cyberspace officers should spend their first 10 years becoming tactically proficient in all aspects of cyberspace operations, complete service and joint military education, serve on joint staffs, command in their area of operational specialty and do all of the other things necessary to produce general and flag officers whose native domain is cyberspace."

What are your views about whether cyber officer career development should be distinct from both intelligence and communications officer development?

Answer. Specialized expertise in our officer ranks is critical to mission accomplishment. At the same time, a shared understanding across the team is essential. The way we have deliberately approached this in the Navy has been the establishment of Cyber Warrant Officers and Cyber Warfare Engineers. These individuals are purposefully selected to join our ranks from either our enlisted force, the Intelligence Community, academia, or industry. We then train and employ them to leverage their specialized expertise. They serve side by side with Officers from varied career fields, but primarily intelligence and communications specialists although combat arms officers could be trained as cyber officers as well. I believe all officers should have an appreciation for cyberspace operations. Intelligence and communication officers must have a clear understanding of the same, and we have a responsibility to develop specialized expertise in a core of cyber officers.

Question. Is it advisable to develop cyberspace officers as we do other combat arms or line officers? Why or why not?

Answer. I am a strong proponent of diversity across the team and quick to recognize all have a responsibility to both understand and contribute in this mission area. We must find a way to simultaneously ensure combat arms and line officers are better prepared to contribute, and cyberspace officers are able to enjoy a long, meaningful career with upward mobility. A meaningful career should allow them to fully develop as specialized experts, mentor those around them, and truly influence how we ought to train and fight in this mission space. I am especially interested in the merit of how a visible commitment to valuing cyberspace officers in our ranks will affect recruitment and retention. I believe that many of today's youth who are uniquely prepared to contribute (e.g. formally educated or self-developed technical expertise) do not feel there is a place for them in our uniformed services. We must find a way to strengthen the message of opportunity and I believe part of the answer is to do our part to ensure cyberspace officers are viewed as equals in the eyes of line and combat arms officers; not enablers, but equals. Equals with capabilities no less valued than those delivered by professional aviators, special operators, infantry, or surface warfare.

ALIGNMENT OF MILITARY CYBER OPERATIONS WITH CYBER INTELLIGENCE COLLECTION

Question. Do you think that, as CYBERCOM matures and as cyber military art develops, military cyber operations and cyber intelligence operations should be distinct operations?

Answer. Intelligence is a joint function integral to all military operations. Intelligence operations are conducted in cyberspace to inform military operations in all domains, including cyberspace.

Question. In the long term, what are the pros and cons of treating the Services' cyber organizations and the service cryptologic elements as distinct entities?

Answer. Just as there is a dynamic partnership between CYBERCOM and NSA, and the disciplines of military cyber operations and cyber intelligence operations are interwoven, there is a similar relationship and advantage to be had in the partnerships between the service cryptologic and cyber organizations. They provide key capability to their Services as independent focal points for warfighting and intelligence, but together provide the additive cyber capability for each Service. If confirmed, I will continue to assess the cyber force model as it develops in view of this synergism.

Question. Do you think that military cyber operations personnel assigned to CYBERCOM units should, in the long term, continue to be funded mainly in the intelligence budget and competing with intelligence priorities?

Answer. In view of our current fiscal environment and challenges, if confirmed, I would examine and assess all CYBERCOM funding streams and processes, including personnel.

RANGE SUPPORT FOR U.S. CYBER COMMAND

Question. Section 932 of the NDAA for Fiscal Year 2014 requires the Secretary of Defense to ensure that there are adequate range capabilities for training and exercising offensive cyber forces in operations that are very different from cyber intelligence operations.

What is your understanding of CYBERCOM's range requirements for individual and unit training, and exercises, and the capabilities and capacity of the joint cyber range infrastructure to satisfy those requirements?

Answer. It is my understanding that the persistent training and test environment is being developed based on requirements from CYBERCOM's exercise continuum of Cyber Knight, Cyber Guard, and Cyber Flag. This continuum is designed to train and/or certify CMF teams. Unfortunately, these exercises are executed using not only ad hoc range support, but also ad hoc facilities. Though the lack of a range continues to be a limiting factor, so does the lack of a physical infrastructure. Though the main effort in building the teams is individual training and qualification right now, collective training and certification will quickly make the lack of efficient range even more glaring than it is today. Our cyber forces need a persistent training environment they can depend on every day of the week to train. We must continually train against a high end adversary and not only in CJCS level exercises. The key to success here is training. A persistent range is a must have if we want to build a professional cyber force.

Question. What is your view of the NDAA legislation?

Answer. The Department continues to fully realize the potential of the DOD Enterprise Cyber Range Environment (DECREE) governance body to oversee Cyber Range issues. The main effort of DECREE is the establishment of a persistent test and training environment that will effectively meet the growing demand of the CMF teams. It is essential that we provide these teams, which are quickly reaching IOC and FOC in greater numbers, by providing on-demand environments for training in both offensive and defensive cyberspace operations. It is my understanding that the Department is on pace to deliver an assessment of the required cyber range capacity and capability to support CMF training by October 2014.

INFORMATION ASSURANCE

Question. The President's Review Group on Intelligence and Communications Technologies recommended that the Information Assurance Directorate (IAD) of the NSA be separated from NSA and subordinated to the cyber policy component of DOD. The Senate version of the NDAA for Fiscal Year 2014 included a provision that would transfer supervision of the IAD from the Under Secretary of Defense for Intelligence (USD(I)) to the Chief Information Officer (CIO). The committee's rationale for this transfer was that the IAD conducts cyber protection-related duties, which fall under the responsibility of the CIO, not the USD(I).

What do you see as the pros and cons of these proposals?

Answer. I support the President's decision for the IAD to remain part of NSA. NSA has developed (and continues to develop) an extremely deep cadre of computer scientists, mathematicians, software engineers, etc. whose skills are translatable across the breadth of the Information Assurance (IA) and SIGINT missions. IAD and the Signals Intelligence Directorate (SID) operate in a common trade space, the

global telecommunications network. NSA offensive and defensive missions have a proven track record of success at working together to counter the cyber threat. Code making and code breaking are two sides of the same coin. Breaking them apart will have significant consequences to the U.S. Government's ability to develop secure communications based on the understanding of how those communications might be attacked.

NSA has developed an infrastructure that supports both Information Assurance and SIGINT missions. Creating a separate agency that would need to develop and build its own infrastructure and expertise would be extremely inefficient and costly in a time of constrained resources. IAD guidance and technology helps secure the NSA enterprise. The work IAD performs benefits the security of the Nation and the world. Current Media Leaks have unfortunately caused degradation in our trust relationships with industry. If confirmed, I am committed to restore the trust and will deepen the partnerships with the DOD CIO and the USD(I) to demonstrate oversight procedures and processes function appropriately.

DUAL HATTING OF DIRECTOR OF THE NATIONAL SECURITY AGENCY AND THE
COMMANDER, U.S. CYBER COMMAND

Question. The President's Review Group on Intelligence and Communications Technologies recommended that the positions of Director of NSA and the Commander of CYBERCOM be separated and that the President appoint a civilian to be Director of NSA. The President decided against separating these two positions at this time. According to press reports, the President based his decision, in part, on his perception that CYBERCOM was not yet mature enough to stand on its own without a very strong institutional connection to NSA.

If CYBERCOM remains too dependent on NSA for their leadership to be bifurcated, does it follow that CYBERCOM is not mature enough to become a full unified command?

Answer. My focus on sub-unified or unified will rest on what allows CYBERCOM to achieve the most effective cyber force—one that is best postured to defend the Nation and our national interests.

The decision by Secretary of Defense to redesignate the position of Director, NSA as both Commander, CYBERCOM and Director, NSA enabled DOD to leverage the similarities and overlaps between the capabilities needed for the conduct of NSA's core missions—SIGINT and IA—and those of CYBERCOM to provide for the defense and secure operation of DOD networks; and, upon order by appropriate authority, to operate in cyberspace to defend the Nation. The strength of this arrangement as the most effective approach to accomplishing both organizations' missions was re-affirmed with the President's December 2013 decision to retain the dual-hat position.

Question. To the extent that military operations in cyberspace should evolve to be different and distinct from intelligence collection in cyberspace, is it possible that NSA's strong influence over CYBERCOM's development could hinder, as well as support, the proper maturation of the Command? What are your views on this issue?

Answer. I will ensure NSA, as a combat support agency, continues to support CYBERCOM's ability to execute its mission as well as its maturation. For example, there is a high correlation between the knowledge, tools, and techniques necessary for meeting military objectives and those for enabling intelligence collection. This correlation allows economy of scale in tool and technique development. In addition, I will ensure that CYBERCOM has control over the assets it needs and I will work within DOD to ensure CYBERCOM has the support it needs to be successful. As the dual-hatted Director/Commander, I will empower the Deputy Director, NSA and Deputy Commander, CYBERCOM to focus on running their respective organization with mission equities in mind, while I maintain accountability with insight into both missions and direct collaboration when necessary.

Question. As NSA is a combat support defense agency subject to the authority, direction, and control of the Secretary of Defense, and NSA is subordinate to the Secretary of Defense in his capacity as the President's executive agent for SIGINT under Executive Order 12333, is there any reason to expect that NSA's support for CYBERCOM and the other combatant commands would be questionable if the dual-hat arrangement were ended?

Answer. NSA has a long history of supporting combatant commands with SIGINT and IA products and services, well before CYBERCOM was established. I will ensure NSA provides mission critical support to all combatant commands, with or without the dual-hat arrangement.

U.S. CYBER COMMAND AS A SUB-UNIFIED COMMAND

Question. The UCP establishes CYBERCOM as a sub-unified command reporting to STRATCOM. We understand that the administration considered modifying the UCP to establish CYBERCOM as a full combatant command.

What are the best arguments for and against taking such action now?

Answer. I understand that there was discussion at the CJCS and Service Chiefs' level in 2012 to establish CYBERCOM as a full unified command, and that discussion of this option has continued.

I don't believe there are any major impediments to elevating CYBERCOM to full unified command status, with the exception of adding approximately 112 personnel to our headquarters manning (currently 912) required to accomplish administrative functions that would accompany unified command status, such as workforce recruitment, Planning, Programming, Budgeting and Execution (PPBE); and Global Force Management. In addition, there are formal processes that would have to be executed, including revision to the current UCP language, but cyberspace operations comprise both a warfighting and enabling discipline and domain in and of itself. CYBERCOM is working incredibly hard every day to develop its forces, processes, and capability, so perhaps the best argument against elevating the command is the need to focus energies in these areas.

The argument for full unified command status is probably best stated in terms of the threat. Cyber attacks may occur with little warning, and more than likely will allow only minutes to seconds to mount a defensive action seeking to prevent or deflect potentially significant harm to U.S. critical infrastructure. Existing department processes and procedures for seeking authorities to act in response to such emergency actions are limited to unified combatant commanders. If confirmed, as the Commander of CYBERCOM, as a sub-unified combatant commander I would be required to coordinate and communicate through Commander, STRATCOM, to seek Secretary of Defense or even Presidential approval to defend the Nation in cyberspace. In a response cycle of seconds to minutes, this could come with a severe cost and could even obviate any meaningful action. As required in the current Standing Rules of Engagement, as a combatant commander, I would have the requisite authorities to directly engage with the Secretary of Defense or President of the United States as necessary to defend the Nation.

There are some inherent inefficiencies in not elevating, also, in the form of redundant processes and timeliness. Elevation to full unified status would improve resource advocacy, allocation and execution by improving input to Department processes and eliminating competition in prioritization. Additionally, alignment of responsibility, authority, situational awareness, and capability under a single commander would improve cyberspace operations and planning.

Question. What authorities for operating in cyberspace that are allocated to STRATCOM have been pre-delegated to CYBERCOM?

Answer. CYBERCOM has been delegated by Commander, STRATCOM, the responsibility to conduct specified cyberspace missions as detailed in section 18(d)(3) of the UCP. The specific missions delegated include: directing DODIN operations, securing and defending the DODIN; maintaining freedom of maneuver in cyberspace; executing full-spectrum military cyberspace operations; providing shared situational awareness of cyberspace operations, including indications and warning; integrating and synchronizing of cyberspace operations with combatant commands and other appropriate U.S. Government agencies tasked with defending the Nation's interests in cyberspace; provide support to civil authorities and international partners.

SUPPORT FOR THE COMBATANT COMMANDS

Question. The Secretary of Defense has ordered the Military Services and CYBERCOM to develop operational military cyber teams to support the missions of defending the Nation against cyber attacks, supporting the war plans of the geographic and functional combatant commands, and defending DOD networks against attacks. The mission teams that will support the combatant commanders ultimately will be under the operational control of those commanders. The committee understands that, to date, the combatant commands have not committed to creating cyber component commands to direct the operations of those units.

In your opinion, can the combatant commanders properly direct the operations of assigned cyber mission teams without a component command element?

Answer. Geographic combatant commanders already have the authority to direct and execute certain DCO within their own networks. These actions consist of DCO internal defensive measures (DCO-IDM) to prepare and protect mission critical networks. The current Joint Staff C2 model provides an interim construct to direct DCO-IDM through a Joint Cyber Center/Cyber Support Element. Combatant com-

manders direct full-spectrum Cyberspace operations (ISR, OPE, Attack and Defend) through a Joint Cyberspace Component Command to ensure actions are synchronized and integrated throughout all warfighting domains. A JFCCC also provides for accountability through legal oversight and compliance—a requirement for Cyberspace Operations. Until a JFCCC is established, a Joint Force Headquarters directly supports combatant command planning, execution, and oversight.

Question. Four years after the creation of CYBERCOM, to what extent have cyber operations been integrated into the operations plans of the combatant commands?

Answer. My understanding is that progress has been made in integrating cyberspace capabilities into the operations plans of the combatant commands. Although much work remains, CYBERCOM has been successful in this effort by coordinating and cooperating with the combatant commands directly, by integrating cyberspace capabilities when the plans are undergoing Department-wide review, and also by drafting cyberspace support plans that supplement the higher level combatant command plans.

Additionally, CYBERCOM is building 27 CMF teams assigned to the combatant commands to achieve exactly this kind of capability.

Question. How would you assess the progress of the Department in developing cyber capabilities for the use of the command cyber teams to support the specific needs of the combatant commands?

Answer. The Services have made progress developing capabilities to equip their CMF teams. At the Department's direction, CYBERCOM has established, and now chairs, the DOD Cyber Operational Capabilities Board (COCB) which will integrate military cyber capability development into existing requirements processes.

In accordance with Department direction, CYBERCOM has also begun implementing changes to the Cyber Capabilities Registry (CCR). The CCR is now populated and accessible, providing military planners a compendium of available cyberspace capabilities for use in support of mission requirements. Ultimately, the CCR will become an informative source for all DOD cyberspace capabilities.

CYBERCOM recognized that we needed to make progress faster in developing the tools our warfighters need in cyberspace. As such we stood up a J9 inside the command and staffed it with the best and most qualified military and NSA personnel (lead by a NSA senior and U.S. Army Colonel both with Ph.Ds) to work with the Services, industry, academia, the IC and our DOD labs to bring new ideas and tools to our cyber forces in the shortest time possible. This effort is starting to bear fruit delivering cyber tools our warfighters are already training with and integrating in tactical training exercise.

While the Department has made progress in this area, there is still much work to be done to ensure we develop joint, interoperable cyberspace capabilities to equip the CMFs as they become operational.

Question. What priority has been assigned to the development of capabilities for national versus command cyber mission teams?

Answer. The prioritization of capability development for national and combatant command CMFs flows directly from CYBERCOM's three mission areas: (1) defend the Nation; (2) secure, operate, and defend DOD information networks (DODIN); and (3) provide support to combatant commands. CYBERCOM's highest priority is to defend the Nation. This is done in parallel with activities dedicated to securing the DODIN and supporting combatant commands. We are building out a robust cyber force over the next 3 years. While we rightfully have first focused on the DTN mission, we have simultaneously begun the buildout and IOC of our Combatant Command CMTs and CPTs. All of these mission areas are resourced in a balanced way in accordance with a continuous threat assessment and fiscal limitations.

Question. Who would you say is responsible for developing cyber capabilities to support joint task forces and lower echelons?

Answer. The Services are responsible for developing capabilities to equip their forces. That said, CYBERCOM plays a role coordinating operational and technical requirements to ensure interoperability for CMFs and compatibility with mission infrastructures. The DOD Cyber Operational Capabilities Board (COCB) provides a venue for much of the coordination to standardize military cyber capability development and leverage existing programs to avoid duplication of effort across the DOD. In its unique position, CYBERCOM can and should form a community of operational and technical subject matter experts from across DOD and the IC to inform policy and resourcing decisions.

DEVELOPMENT OF CYBER CAPABILITIES

Question. CYBERCOM has depended heavily to date on NSA for technology, equipment, capabilities, concepts of operations, and tactics, techniques, and procedures.

Are you satisfied that DOD is organized and resourced to provide a broad base of innovation and capability development in the cyber domain that includes the Military Service's research and development organizations, Defense agencies such as the Defense Advanced Research Projects Agency, and the private sector?

Answer. While the Department has made much progress, more work certainly remains to ensure that DOD is organized and resourced to provide military-specific cyber capabilities. However, I believe the Department is moving in the right direction through a series of decisions to prevent redundancy and to ensure cyber innovation in both the public and private sectors can be leveraged. One of these decisions was to establish the aforementioned COCB to identify and track dependencies among capability requirements and to validate and prioritize all cyberspace capability requirements.

CYBERCOM's Advanced Capabilities Directorate, J-9 has existing relationships with the Services and their dedicated research and development labs, DARPA, federally-funded research and development centers, the defense industrial base, the private sector, and other entities, allowing CYBERCOM to leverage their expertise to provide and build diverse capability to enable full-spectrum military operations. As a member of the COCB, the J-9 also helps enforce a process to ensure there is no redundancy of effort, and that several DOD entities can use the same capability multiple times when possible to get more return on investment.

DELEGATION OF SIGNALS INTELLIGENCE AUTHORITIES

Question. How important will it be for CYBERCOM personnel to be able to operate with SIGINT authorities that are not necessarily tied to NSA personnel who may be working temporarily for CYBERCOM?

Answer. The ability of CYBERCOM personnel to operate under delegated SIGINT authorities and leverage the national cryptologic platform is a critical capability, enabling the command to fully execute its cyberspace mission in an informed, timely, and coordinated manner. SIGINT information remains vital to support cyber operations. Effective "net-speed" operations as conducted by an expanded U.S. CMF require ready access to the technical streams of information that SIGINT provides. Providing SIGINT information at the lowest possible level in a distributed force environment makes the delegation effort especially important. Time delay increases the potential for mission failure. It is important to note that under delegated SIGINT authorities, CYBERCOM personnel adhere to the same uniform techniques, training and standards, as well as intelligence oversight and compliance programs, as those who work for the NSA. We will not sacrifice our legal and security obligations to accomplish these goals.

JOINT INFORMATION ENVIRONMENT

Question. The DISA advertises the Joint Information Environment (JIE) programs as delivering:

"... the largest restructuring of information technology (IT) management in the history of the DOD. The end state is a secure, joint information environment comprised of shared IT infrastructure, enterprise services, and a single security architecture. JIE will enable DOD to achieve full-spectrum superiority, improve mission effectiveness, increase security, and realize IT efficiencies."

To realize this potential, the CYBERCOM will have to operate within the JIE.

Has CYBERCOM developed plans for integrating its warfighting operations into the JIE?

Answer. In the JIE Management Construct (approved at the TANK), CYBERCOM is responsible for identifying requirements and concepts of operation which enable and align with the Command and Control (C2) and defense of the DODIN. JIE is a framework for which standards are being designed and built to meet these specified operational requirements.

Question. Will the JIE systems architecture support a full range of potential CYBERCOM warfighting operations?

Answer. The JIE systems architecture supports the full range of operations 'of and 'on' the DODIN. The JIE will shift focus from protection of Military Service-specific networks, systems, and applications to securing data and its uses; a paradigm shift from the traditional net-centric to a data-centric environment. Key secu-

urity features that will be employed under the JIE framework include: an enterprise-wide Single Security Architecture (SSA), a secure Out-of-Band Management network; standardized identity and access management; and the integration of thin-client and cloud-based (virtualization) technologies.

JIE changes the way the Department delivers IT capabilities in the largest, most complex operational environment in the world. Common services and capability will provide users information at the point of need from any networked device and from the enterprise level for all users. The ultimate beneficiary of the JIE will be the commander in the field and forces at the tactical edge. JIE will allow better integration of information technologies, operations, and cyber security at a tempo that supports today's fast-paced operational conditions. The operational capabilities delivered through the JIE will enable commanders to blend the art of command with the science of control, enabling JF 2020 to address emerging military challenges through the flexible integration of warfighting functions as required.

JIE will afford organizations responsible for operating and defending this complex environment end-to-end visibility and situational awareness for security from strategic to tactical as well as down to the desktop. It will eliminate the barriers which prevent information sharing and consolidate computing power and storage capabilities while enabling support for low-bandwidth/disadvantaged users.

Question. Should DOD approach the JIE as more of a "weapons system" than a pure IT system in order to support the range of CYBERCOM's warfighting plans?

Answer. JIE is not a system, but is a framework of standards which the DOD Services and Agencies are using to procure, operate, and defend the DODIN. JIE is focused on helping the DOD achieve full spectrum superiority, improved mission operational effectiveness and increased security while realizing IT efficiencies. The JIE focuses on creation of a secured joint environment, comprised of a shared Information Technology infrastructure that will deliver common services from the enterprise, bound and secured by a single security architecture. The environment will be operated in accordance with responsibilities and authorities identified in the UCP based on common, enforceable standards and specifications, as well as common tactics, techniques, and procedures. The primary objective of creating the JIE is to provide DOD and mission partners secure access to Department IT capabilities at the point of need; i.e., home, work or deployed; by creating a Joint Enterprise Information Environment that encapsulates computing power; common enterprise services and mission applications; and access to data anywhere in the enterprise with the ability to extend the same capabilities in the deployed environment. However, once we build the underlying architecture(s) within the JIE framework, we need to look at them as a weapons system: measure its readiness, garner mission assurance, produce trained and ready operators, et cetera.

SECURITY OF NAVY NETWORKS

Question. The Wall Street Journal last September reported that Iran had compromised the Navy Marine Corps Intranet (NMCI), an unclassified but important and pervasive internal communications network. The Navy has made an award for the successor to NMCI, called the Next Generation Enterprise Network (NGEN). The winning contractor is the same company that bought the original contractor for NMCI.

Is the NMCI properly architected and constructed against external cyber attacks? If not, why not?

Answer. Yes, NMCI is properly architected and constructed against external cyber attacks. Since its inception the NMCI architecture has evolved to respond to the threat environment. The threat environment has clearly changed and cyber security improvements have been made to NMCI over the years. The Navy and DOD defense in depth cyber security architecture, when combined with NMCI security layers, provide appropriate protection. As with all networks, the NMCI security architecture continues to mature as technology and threats evolve. Based upon operations over the last 8 months and in collaboration with NSA, USCC, and DISA, I have identified additional network hardening and cyber security requirements for current and future Navy Networks that are currently being planned and programmed for implementation.

Question. Is the NGEN architecture more secure than NMCI, and if so, in what respects?

Answer. Yes, NGEN benefits from lessons learned and technological advances but is designed on the same solid security principles used to develop NMCI. Its increased security will be the byproduct of three important factors: increased Navy Command and Control (C2) of a network the Navy "bought back" as a result of the transition from a contractor-owned/contractor-operated model to a government-

owned/contractor-operated model; an increase in the Navy's ability to make and implement critical decisions about the selection of enterprise services under a more agile and innovative contract; and a firm commitment to align those services with the higher level JIE and Intelligence Community (IC) Information Technology Enterprise. The NGEN contract also allows us to add, modify, and delete services in addition to lowering overall operating costs through competition.

Question. Is the NGEN program fully aligned with the security architecture of the JIE initiative? If not, why not?

Answer. Yes, NGEN is designed and architected to current security standards and will leverage Technical Refresh and additional security funding to align to the JIE SSA as it becomes better defined, documented, and tested. Navy is participating actively in DOD's drive to define the SSA and the other components that will come together to form JIE. It has been playing a particularly active and important role in defining how the emerging SSA and related components will apply to JIE Increment II, which will properly secure U.S. and multinational information flows under the transformational Mission Partner Environment. As the definitions take shape, Navy will take decisive action to bring NGEN into alignment with JIE's SSA.

Question. What steps and how much time and investment will it take to align NGEN with JIE?

Answer. The Navy supports the concept of JIE and is working in coordination with the other Services, DISA, COCOMs, and OSD to fully develop this concept into a joint enterprise capability. By continuing such engagement, Navy will develop better insights regarding the time and money required to bring its NGEN into alignment with these higher-level architectures. At present, we are of the belief that our agile and innovative contracts and the investments we've already programmed across the Future Years Defense Program within NGEN and our other IT infrastructure and network programs (e.g., Consolidated Afloat Networks and Enterprise Services (CANES) and OCONUS Navy Enterprise Network (ONE-Net)) constitutes a sufficient response to the challenge at hand. As the standards for JIE mature, Navy will be able to provide cost and schedule estimates using NGEN as our path to meet JIE standards.

CYBER PERSONNEL

Question. What is your understanding of the direction DOD has given to the Military Services regarding the quality and existing skill levels of the personnel they will provide for the CMFs?

Answer. On behalf of the DOD (IAW CJCSI 3500.01G), CYBERCOM establishes CMFs joint standards for individual and collective training. These standards are contained in three foundational documents; the Joint Cyberspace Training and Certification Standard (JCT&CS), the Individual Training Pipelines, and the Training and Readiness Manual (T&R Manual). The JCT&CS identifies the unique Knowledge Skills and Abilities (KSAs) for each work role on the CMF Teams. The individual training pipelines outline an optimal path to achieving the required KSAs to satisfy the JCT&CS requirements. The T&R Manual provides the tasks, conditions and standards required to demonstrate individual and collective proficiency.

Question. So far, does it appear that there is a satisfactory match between the skills and aptitudes of the personnel provided by the Services and the training programs developed by CYBERCOM?

Answer. The CMF build out, when complete, will include over 6,100 personnel organized across 133 teams in the CMFs. As we build this force, work roles have unique training requirements and we must continue to create sustainable, repeatable training programs to meet this demand. Over the past 18 months, we've come a long way working out training pipeline bottlenecks. Additionally, over the next 2½ years of the CMF build, the Services must continue for the Services to incorporate CYBERCOM training requirements into their training programs, and ensure their workforce meets the CMF standards.

If confirmed, one of my first priorities will be to work closely with NSA and the Services to expand existing training classes, identify training equivalencies, and establish alternate training venues. I think we should also look collectively at increasing the time on station requirements to retain trained and fully qualified personnel until sufficient training programs are in place.

Question. What direction has been given to the Services regarding recruiting goals and priorities for individuals with skills and aptitudes relevant to the needs of CYBERCOM?

Answer. Senior DOD leadership directed the Services to establish management processes that identify, recruit, retain and provide incentivized career advancement paths for military and civilian personnel. This allows the high-end advanced skills

that CYBERCOM has identified to work in the CMF. Progress is being made by each Service and the issue is monitored closely in monthly reporting by CYBERCOM to the Joint Staff. DOD is addressing one of the more significant challenges by looking at options pertaining to the civilian workforce that would establish a flexible and responsive workforce that improves the ability to attract, develop, motivate and retain a high quality Cyber workforce.

Question. Has the Department considered delegating personnel authorities to CYBERCOM that are similar to those that are exercised by U.S. Special Operations Command to ensure that the Services manage the careers of their servicemembers with cyber skills appropriately?

Answer. SOCOM's Article 167 Authorities continue to prove essential to their ability to work with the Services to develop truly Joint capabilities that meet Joint Standards. CYBERCOM continues to do a great job facilitating progress without such authority, but eventually delegating these authorities could greatly enhance their ability to meet the Nation's needs.

Question. What would be the pros and cons of providing CYBERCOM such authorities?

Answer. While there are no real cons in my opinion, the pro for CYBERCOM is the same as for SOCOM. This authority would allow CYBERCOM to shape the cyber force and ensure cyber training and capabilities are standardized and inherently Joint across the man, train, and equip spectrum. Once trained, these personnel are highly skilled and valuable commodities. They are bona fide high-demand, low-density assets—just as our Special Operations Forces are.

We are growing a highly-skilled, highly-qualified standardized workforce.

CYBERCOM, empowered with these types of authorities can more effectively advocate and ensure that we do everything in our power to retain these exceptional forces even as our manpower, promotion, and retention systems may be slow to recognize this.

DESIGNING THE INTERNET FOR BETTER SECURITY

Question. How could the Internet be redesigned to provide greater inherent security?

Answer. Advancements in technology continually change the architecture of the Internet. Cloud computing, for instance, is a significant change in how industry and individuals use Internet services. As evidenced by the growth of security conferences, companies and media attention, security is at the forefront of Internet use as businesses and government strive to protect intellectual property and citizens desire to protect their privacy. To put it simply, the environment is ripe for significant attention to inherent security and government, industry, and academia all have an interest in achieving this objective.

I believe there are options for the Internet to provide greater inherent security. Several major providers of Internet services are already implementing increased security in email and purchasing services by using encryption for all transmissions from the client to the server. It is possible that the service providers could be given more responsibility to protect end clients connected directly to their infrastructures. They are in a position to stop attacks targeted at consumers and recognize when consumer devices on their networks have been subverted. The inability of end users to verify the originator of an email and for hackers to forge email addresses have resulted in serious compromises of end user systems. If confirmed, I look forward to working with this committee, as well as industry, academia and government leaders, on the advancement of security measures for the Internet.

Question. Is it practical to consider adopting those modifications?

Answer. I believe modifications to enhance security on the Internet will evolve and strengthen over time. Industry is developing and deploying solutions today to maintain the trust of their clients. Events such as recent payment card breaches are highlighting the concerns and accelerating solution deployment. These advancements in commercial technologies provide a benefit to all who use them, including government. Public-private working groups have and will continue to address hard problems and implementable solutions to strengthen security on the Internet.

Question. What would the impact be on privacy, both pro and con?

Answer. I believe the Government should strive to implement advanced security measures that enhance privacy. Tensions between security and privacy are not new, but I believe we cannot accept one without the other. Increased security should help protect identities, reduce cyber attacks, and assure the transmission and storage of private data; in turn, this enhanced security will ultimately improve individual and corporate privacy in the Internet. If confirmed, I look forward to working with this

committee and industry and Government leaders to protect privacy while making the Internet as secure as possible.

THE SECTION 215 PROGRAM

Question. In January, 2014, the President ordered a transition to end the section 215 telephone metadata collection program as it currently exists, to “preserve the capabilities we need” without the government collecting and holding the data on call detail records.

What are your views on what specific capabilities need to be preserved as the program is transitioned?

Answer. The program grew out of a desire to address a gap identified after September 11. One of the September 11 hijackers—Khalid al-Mihdhar—made a phone call from San Diego to a known al Qaeda safe-house in Yemen. NSA saw that call, but it could not see that the call was coming from an individual already in the United States. The telephone metadata program under section 215 was designed to map the communications of terrorists so we can see who they may be in contact with as quickly as possible. It does not involve the content of phone calls or the names of the people making the calls.

I believe that we need to maintain an ability to make queries of phone records in a way that is agile and provides results in a timely fashion. Being able to quickly review phone connections associated with terrorists to assess whether a network exists is critical.

Question. From your perspective, what are the pros and cons, and problems, involved in the establishment or designation of a private “third party” to hold the data, on the one hand, and the service providers keeping the data, on the other?

Answer. Both options are technically feasible and, if implemented in a manner that addresses mission requirements, could be viable alternatives for the current program. I anticipate that either would require significant upfront costs. However, if a private “third party” holds the data, I expect it would be at greater expense and could introduce other complexities. For example, as the President noted in his speech on 17 January 2014, it could require companies to alter their procedures in ways that raise new privacy concerns. If the service providers keep the data, I understand that this may require statutory changes for any data retention requirements which may be levied upon them.

Question. What is your assessment of the impact on the program of the President’s order to have the Foreign Intelligence Surveillance Act (FISA) Court make individual Reasonable, Articulate Suspicion (RAS) determinations prior to non-emergency database queries?

Answer. Before the President’s speech on January 17, 2014, this approval process was done internally at NSA and both DOJ and ODN1 conducted post-approval reviews of RAS determinations on a quarterly basis. Since 17 January, NSA has been working closely with DOJ to establish processes and procedures to obtain RAS approvals from the FISA court.

Question. The Federal Communications Commission requires service providers to keep telephone call detail records for 18 months. The government currently keeps the records collected under section 215 for 5 years. Section 215 expires next year. If Congress does not renew the provision, the executive branch could continue to access call records under other authorities, but only through the service provider’s repositories.

Is that a viable alternative?

Answer. The other authorities, as currently established, do not fully replicate the current ability under section 215 to obtain telephony metadata records in a way that is agile and timely. However, I believe it’s possible that, if new legal authorities were established or existing authorities were modified to enable more flexible acquisition of such records, these could serve as a viable alternative.

Question. How critical is it in your opinion to have guaranteed access to records more than 18 months old from all service providers?

Answer. Currently, NSA retains the metadata for 5 years, but it is my understanding that NSA has assessed that the 5-year retention period could be reduced to a shorter period without significantly decreasing operational utility. In his January speech, the President directed a study of how to restructure the program for the longer term. The work of that study, with participants from multiple agencies, is now ongoing. While specific options are under development, there is further work to be done.

Question. What concerns do you have, if any, about leaving the metadata records with the service providers, and having them produce records responsive to Court-approved queries?

Answer. My main concern is whether such an arrangement would produce records in a timely fashion. Being able to quickly review phone connections associated with terrorists to assess whether a network exists is critical. The ongoing interagency review is looking at ways to address this risk.

SECTION 215 UTILITY VERSUS PRIVACY CONCERNS

Question. The Privacy and Civil Liberties Oversight Board (PCLOB) and the President's Review Group On Intelligence and Communications Technologies ("Review Group") characterized the section 215 program as useful but not critical. The PCLOB stated that "We have not identified a single instance involving a threat to the United States in which the program made a concrete difference in the outcome of a counterterrorism investigation."

What is your understanding of the utility of the program, and how that utility compares to the level of concern among the American people about its perceived impact on privacy and civil liberties?

Answer. One of the key vulnerabilities identified after September 11 was the lack of a sufficient and timely capacity to detect when a known foreign based terrorist threat was in contact with someone inside the homeland. The section 215 program was designed to provide that capability by enabling the government to quickly review telephone connections to assess whether a terrorist network exists and the President has stated that it is critical the capability that this program was designed to meet is preserved. The President has also been clear about expectations that such a capability be conducted in a manner that addresses the concerns of the American people about the potential impact on privacy and civil liberties. I support the ongoing interagency effort in response to the President's direction to seek to find an ability for this necessary capability to exist within an acceptable privacy and civil liberties regime.

Question. The Review Group also stated on multiple occasions that the 215 program, contrary to many public reports, actually only collects "a small percentage of the total telephony metadata held by service providers."

How do the costs compare for expanding the government's capacity to ingest all telephony call records, on the one hand, versus the cost of enabling comprehensive access to needed records through the service providers, on the other?

Answer. In the summer and fall of 2013, NSA performed some analysis of the relative costs of having the Government collect the data in bulk with the costs of searching data retained at the providers. I have not been briefed on the details or the results of that analysis, or how it might apply to specific proposals now under consideration. If I am confirmed for this position, it will be my responsibility to thoroughly and accurately communicate costs and benefits to those who set policy and establish appropriations. Cost will be a factor taken into consideration in the development of options for the President. If confirmed, I will ensure that Congress will be informed of the cost of any successor programs.

REFORM OF THE FISA COURT

Question. The President's Signals Intelligence Directive (PPD-28) announced in January called for Congress to authorize a panel of advocates from outside the government to "provide an independent voice in significant cases" before the FISA Court. A similar approach has been recommended by the PCLOB and the President's Review Group.

Do you have any concerns about introducing an adversarial element in the proceedings of the FISA Court as the President and others have urged?

Answer. I concur with the President's view that responsible actions which will help increase the transparency of and confidence in the government's conduct of extraordinary authorities—like those performed under statutory authority with the Foreign Intelligence Surveillance Court—are an important element of government's relationship with the American people. If the legislative and judicial branches of government introduce changes to the FISA court or its proceedings, and if I am confirmed, I will be fully prepared to work with them and alongside others in the executive branch. Whatever approach is considered, I believe must also address the necessary timeliness and operational integrity of national security activities.

STANDARDS FOR SEARCHING NSA DATABASES USING U.S. PERSONS' PERSONALLY IDENTIFIABLE INFORMATION

Question. NSA collects foreign intelligence information under multiple authorities, including Executive Order 12333, traditional individualized FISA Court orders, and programs such as section 702 of the FISA Amendments Act, and section 215 of the Patriot Act. Unlike EO 12333 collection, traditional FISA wiretaps must meet a

probable cause standard and are very specifically targeted. The section 215 program involves bulk collection, but only of non-content metadata, and the bulk data is queried under the RAS standard that the target of the query is associated with terrorist groups. Section 702 content collection is based on the “reasonable belief” standard that the specific target of the collection is a non-U.S. person located outside the United States. The President’s Review Group On Intelligence and Communications Technologies (“Review Group”) and the PCLOB have raised issues about the standards under which the government can search through data holdings acquired under these authorities using U.S. persons identifiers.

Is NSA permitted to search data acquired under EO 12333 authorities using U.S. persons identifiers without probable cause?

Answer. Minimization procedures that are reasonably designed to protect the privacy interests of United States persons. The full procedures are classified, but generally prohibit selection of the content of communications of or concerning a U.S. person absent probable cause. However, there are exceptions, such as when there is a threat to life or when the search is limited to querying information under which there is no reasonable expectation of privacy (e.g. metadata).

Question. If so, what is your understanding of the legal justification? Does the review group’s recommendation, relate to or cover queries of data acquired under EO 12333?

Answer. I defer to the Department of Justice (DOJ) for any legal interpretation of the procedures approved by the Attorney General.

Question. Is NSA allowed to search data acquired under traditional FISA individual wiretap orders using U.S. persons identifiers without probable cause?

Answer. Information acquired by NSA under traditional FISA orders must be handled in accordance with the Court-approved minimization procedures, as defined by FISA, that are reasonably designed to protect the privacy interests of U.S. persons. NSA’s Court-approved minimization procedures for traditional FISA orders do not permit data searches using U.S. person names or identifiers. Any exceptions to these procedures would require approval by the Federal Intelligence Surveillance Court (FISC).

Question. If so, what is your understanding of the legal rationale?

Answer. I defer to the DOJ for any legal interpretation of the procedures approved by the FISC for individual FISA wiretap orders.

Question. What is your understanding of the legal rationale for NSA to search through data acquired under section 702 using U.S. persons identifiers without probable cause?

Answer. Information acquired by NSA under section 702 of FISA must be handled in strict accordance with minimization procedures adopted by the Attorney General and approved by the Foreign Intelligence Surveillance Court. As required by the statute and certifications approving Section 702 acquisitions, such activities must be limited to targeting non-U.S. persons reasonably believed to be located outside the United States. NSA’s Court-approved procedures only permit searches of this lawfully acquired data using U.S. person identifiers for valid foreign intelligence purposes and under the oversight of the DOJ and Office of Director of National Intelligence.

Question. What is your understanding of the legal rationale for searching through the “Corporate Store” of metadata acquired under section 215 using U.S. persons identifiers for foreign intelligence purposes?

The section 215 program is specifically authorized by orders issued by the Foreign Intelligence Surveillance Court pursuant to relevant statutory requirements. (Note: the legality of the program has been reviewed and approved by more than a dozen FISC judges on over 35 occasions since 2006.) As further required by statute, the program is also governed by minimization procedures adopted by the Attorney General and approved by the FISC. Those orders, and the accompanying minimization procedures, require that searches of data under the program may only be performed when there is a Reasonable Articulate Suspicion that the identifier to be queried is associated with a terrorist organization specified in the Court’s order.

INFORMATION SHARING LEGISLATION FOR CYBERSECURITY

Question. Several proposed cybersecurity bills have been introduced to authorize the collection and sharing of information on cybersecurity threats—including malware, command and control, exfiltration of data, and other evidence of compromise—between the public and private sectors for the purpose of enabling the private sector and Government to defend themselves, enabling law enforcement agencies to detect criminal activities and identify and prosecute perpetrators, and, in the

case of nation-states, enabling the Government to attribute attacks and hold aggressors accountable. To date, none of these proposals have been enacted.

In your view, would it be helpful for Congress to enact more limited legislation to enable the private sector to collect and share cyber threat information within the private sector, leaving the issue of sharing with the Government for the future?

Answer. The nature of malicious cyber activity against our Nation's networks has become a matter of such concern that legislation to enable real-time cyber threat information sharing is vital to protecting our national and economic security. Incremental steps such as legislation that addresses only private sector sharing would have limited effectiveness, because no single public or private entity has all the necessary authorities, resources, or capabilities to respond to or prevent a serious cyber attack. Therefore, we must find a way to share the unique insights held by both government and the private sector. At the same time, legislation must help construct a trust-based community where two-way, real-time sharing of cyber threat information is done consistent with protections of U.S. person privacy and civil liberties.

Question. What restrictions would you recommend be imposed on what information could be shared with the Government regarding cyber threats, and the uses to which the Government could apply that information?

Answer. Protecting the security and the privacy of Americans is not a mutually exclusive proposition. The information provided to the Government should be limited to that which is necessary for the Government to understand or take action to counter a cyber threat and to which all appropriate mechanisms have been applied to protect the privacy and civil liberties of U.S. persons. If confirmed, I would expect to engage fully in discussions on how to accomplish these objectives.

Question. What transparency measures and institutional checks would you recommend to increase confidence that allowing the sharing of cyber threat information would not lead to abuses of privacy and civil liberties?

Answer. Transparency can be ensured by establishing procedures for receiving, retaining, using, and disclosing cyber threat information. In turn, compliance with these procedures should be subject to independent review and oversight by cleared trusted U.S. Government and private sector third parties. Due to the criticality of real-time sharing of cyber threat information, we must also leverage technology that enables a transparent, policy-based, machine-speed infrastructure that automatically enforces the rules for use and any lawful restrictions on sharing.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Commander, CYBERCOM?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR JOE MANCHIN III

WHISTLEBLOWER PROTECTION

1. Senator MANCHIN. Vice Admiral Rogers, the disclosure of classified and sensitive information by Edward Snowden certainly highlighted serious flaws in the National Security Agency's (NSA) internal security. There are those that would call Snowden a whistleblower, but I am curious as to whether he made an attempt to address his concerns through existing whistleblower channels in the NSA. What were those channels at that time and how have they changed since?

Admiral ROGERS. The Intelligence Community Whistleblower Protection Act (ICWPA) and Presidential Policy Directive-19 (PPD-19) describe specific steps to be taken to file a complaint. It provides employees and contractors of intelligence agencies with a mechanism for reporting alleged wrongdoing in IC agencies and associated programs to Congress. Congress specifically extended whistleblower protection to contractors in 2009 and those protections remain in place today. Mr. Snowden did not follow the processes established by the ICWPA or PPD-19 and therefore is not a "whistleblower" as that term is defined.

In the case of Mr. Snowden, he had the option reporting through his chain of command or contacting any Inspector General. There are also Congressional committees and mechanisms in place. After extensive investigation, we have not found any evidence to support Mr. Snowden's contention that he brought these matters to the attention of anyone.

 QUESTIONS SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

RECRUITING TALENT IN U.S. CYBER COMMAND

2. Senator GILLIBRAND. Vice Admiral Rogers, the National Commission on the Structure of the Air Force recently released their findings, which highlighted the importance of the National Guard and Reserve in the U.S. cyber mission. Specifically, it noted that the Guard and Reserve were uniquely positioned, because of their part-time status, to attract and retain the best and the brightest in the cyber field. Additionally, the National Defense Authorization Act (NDAA) for Fiscal Year 2014 has directed the Department of Defense (DOD) to look at the integration of the Guard in all its statuses into the cyber workforce. I have long agreed with this assessment, and introduced the Cyber Warrior Act which would establish National Guard cyber teams in each State to leverage this talent pool. If confirmed, what is your vision for the roles of both the Guard and Reserve in U.S. Cyber Command (CYBERCOM) and within the distinct Service cyber elements?

Admiral ROGERS. CYBERCOM envisions the Guard and Reserve will play a vital role in our cyber mission by working through the Services for the opportunity to leverage their civilian skill sets, the dual mission of the Guard, and the complementary nature of reservists to address specific needs, fill gaps and provide a surge capability within the Active component.

3. Senator GILLIBRAND. Vice Admiral Rogers, I want to be helpful to DOD in recruiting the best talent and acquiring the best tools for our cyber mission. In your opinion, what can Congress do to assist DOD in this effort?

Admiral ROGERS. The Cyber Mission Force (CMF) construct and the corresponding planning documentation, identifies the size and scope of the CMF, the associated knowledge, skills, and abilities required for the various work roles that make up the CMF, the schedule for manning the teams, and the work role priorities. Together this information provides the Services with their targeted recruiting goals and priorities.

4. Senator GILLIBRAND. Vice Admiral Rogers, what do you believe DOD needs in order to remain on the cutting edge of cyber defense?

Admiral ROGERS. DOD requires trained and ready cyber teams that can take a more proactive approach rather than the reactive approach. DOD also requires a more defensible, data-centric architecture with cloud-enabled analytics, and a dynamic and reconfigurable network. CYBERCOM requires appropriate authorities to defend U.S. national interests in cyberspace. Additionally, policy is required that clearly establishes roles and responsibilities across agencies that provide the authority to see and defend systems outside of the DOD Information Systems.

CYBER DEFENSE

5. Senator GILLIBRAND. Vice Admiral Rogers, you are nominated to serve as both Commander, CYBERCOM, and Director, NSA/Chief, Central Security Service, giving you a unique role and perspective on cyber issues. What do you think are DOD's two most important cyber needs for the next 5 years?

Admiral ROGERS. Recently, General Alexander described to the House Armed Services Committee five key things we need to do without further delay, namely: promote a defensible architecture; develop a trained and ready workforce; pass cyber legislation that enables two-way, real-time information sharing among and between private and public entities; set up a seamless cyber command and control structure from the President on down; and, build a common picture to strengthen our Nation's cybersecurity defenses.

6. Senator GILLIBRAND. Vice Admiral Rogers, if confirmed, how will you incorporate cyber forces, especially in the National Guard, into our Homeland defense strategy?

Admiral ROGERS. The CYBERCOM Guard Reserve office is diligently working with the National Guard Bureau and U.S. Northern Command to develop a cyberspace strategy framework that incorporates relevant portions of our Homeland defense strategy involving the protection of our Nation's critical infrastructure and key resources.

7. Senator GILLIBRAND. Vice Admiral Rogers, what are your thoughts on the relationship between the Department of Homeland Security (DHS) and DOD in terms of global cybersecurity roles and responsibilities?

Admiral ROGERS. Global cooperation on cybersecurity is necessary to address the threat, build consensus on the norms of responsible conduct in cyberspace, and address ongoing malicious activity. CYBERCOM strongly endorses the U.S. Government's team approach, leveraging all of our homeland security, law enforcement, and military authorities and capabilities, which respectively provide for domestic preparedness, criminal deterrence and investigation, and national defense. As such, Department of Justice (DOJ), DHS, and DOD each have specific, critical roles and responsibilities as part of the Federal whole-of-government effort to counter cyber threats. Moreover, all three departments are involved with private and international partners within their areas of responsibility, and whether their activities are at home or abroad, the departments support one another to address cyber issues. As with threats to the United States, our allies, and our interests in other domains, DOD has the mission to defend the Nation, to include the protection of national security systems. This responsibility logically extends to all domains, including cyberspace. DHS is responsible for securing unclassified Federal civilian Government networks and working with owners and operators of critical infrastructure to secure their networks through risk assessment, mitigation, and incident response capabilities. DOJ is the lead Federal department responsible for the investigation, attribution, disruption, and, and as appropriate, prosecution of cybersecurity incidents. As authorized by the President, and consistent with the law, DOD defends, deters, and takes decisive action in cyberspace to defend national interests; supports DHS in homeland security (i.e., personnel, equipment, and facilities); and supports Federal agencies pursuant to the Defense Support of Civil Authorities process.

8. Senator GILLIBRAND. Vice Admiral Rogers, the dynamic nature of the cyber threat presents a unique problem in that we typically find ourselves in a perpetual game of catch-up, always chasing our adversary. As soon as one system fix is introduced, countless other vulnerabilities, some known, many unknown, become all the more magnified. If confirmed, how do you intend to address the continually morphing requirements distinct to the cyber threat facing both DOD and the United States as a whole?

Admiral ROGERS. [Deleted.]

9. Senator GILLIBRAND. Vice Admiral Rogers, what do you project as the main over-the-horizon cyber threat?

Admiral ROGERS. [Deleted.]

CYBER TRAINING

10. Senator GILLIBRAND. Vice Admiral Rogers, I am interested in the training our cyber warriors are receiving. What is your understanding of the training capacity at the Service academies and in the current pipeline?

Admiral ROGERS. Each Service Academy educates our future Service and joint leaders slightly differently and for good reason. The mission of the Service Academies is to educate our next generation of military leaders and cyber related skills are core to every officer regardless of their chosen career. Given the many requirements levied upon midshipmen and cadets, I believe the investment currently being made in cyber education to be appropriate.

11. Senator GILLIBRAND. Vice Admiral Rogers, do you see room for improvement in the training pipeline and at the Service Academies?

Admiral ROGERS. There is always room for improvement, and each Service Academy is integrating cyber education to meet Service specific needs. Because I am a Naval Officer, I am far more aware of how the Naval Academy has embraced cyber related education. 100 percent of their graduates will receive at least two semesters of technical cyber education with a large percentage of them earning a STEM degree. I believe that is the right path and one that each academy should consider implementing.

12. Senator GILLIBRAND. Vice Admiral Rogers, is there a role for Congress to assist in making improvements, such as a need for additional authorities?

Admiral ROGERS. Providing CYBERCOM with the oversight authorities it needs to ensure that it can enforce common, joint architectural components to support both CYBERCOM strategic requirements and unique Service specific requirements remains critical. I am still investigating the need for additional authorities and won't hesitate to make requests known if we deem them to be necessary.

RETENTION OF CYBER PERSONNEL

13. Senator GILLIBRAND. Vice Admiral Rogers, since cyber is a relatively new field, it seems like the Services are not having any trouble recruiting talent at this point. However, the issue of retention is of concern to me. If confirmed, what would you recommend for retention of these servicemembers across the total force?

Admiral ROGERS. CYBERCOM remains engaged with each of the Services to address current and projected Active Duty requirements as needed. This includes designating servicemember re-enlistment and career field bonuses for cyber career fields, along with associated Active Duty service commitments to assist with retention. Additionally, the Command continues to utilize civilian temporarily expanded hiring authorities and is in negotiation with the Air Force to expand the current internship program to include universities offering cyber-specific expertise. The National Guard and Reserves offer servicemembers the opportunity to continue contributing to the cyber mission in uniform after they have completed Active Duty service. We will continue to work with the Services to develop plans to integrate the National Guard and Reserves into the cyber domain, including recruitment and retention strategies for Reserve component members.

14. Senator GILLIBRAND. Vice Admiral Rogers, do you believe that current retention strategies are useful to the cyber force, or should we be considering different strategies?

Admiral ROGERS. While to date overall retention has not been a concern, strategically, we will continue to work with the services to address assignment policies and career management for highly technical/highly trained cyber professionals with the desired result to maintain skill currency and utility. Strategies are still being developed/implemented, once implemented, retention rates will be monitored.

JOINT INFORMATION ENVIRONMENT

15. Senator GILLIBRAND. Vice Admiral Rogers, in some of my conversations, I have heard that the Joint Information Environment is a good idea, but there are some concerns about the challenges of implementing it effectively. What challenges do you see, and if confirmed, what would you do to address concerns about implementation?

Admiral ROGERS. The Joint Information Environment (JIE) will transform the DOD Information Network (DODIN) into a defensible and operationally effective architecture by shifting the focus from protection of individual Military Service-specific networks, systems and applications to securing data and its uses. I support the JIE approach. Given these challenges, the threat, and the need for efficiency, we must move in this direction. I see three key challenges to JIE implementation. First, transferring responsibility and authority for network command, control, and security of an organization's operational network to a third party is a new paradigm that

will be challenging to overcome. Second, the Department must leverage finite resources to design and implement JIE while continuing to operate and maintain the existing DODIN infrastructure. JIE will demand the involvement of some of our best technical experts even as we rely on these same people for current operations. Additionally, it will need to include the design and implementation of a strong security infrastructure. Third, implementation of the JIE framework is being accomplished without a program of record and corresponding dedicated funding line. This intentional, strategic decision introduces a degree of complexity in maintaining alignment of the various IT acquisition programs across the Department, but the risk appears to be manageable and will allow the Services and combatant commands to retain control of their individual information technology budgets while providing capabilities that enable the entire enterprise. We are addressing these challenges through a combination of rapid capability implementation and optimization of existing governance constructs. We are leveraging the lessons learned from implementing JIE Increment 1 in U.S. European Command and U.S. Africa Command, streamlining development processes, minimizing the time required of our technical experts, and ensuring critical path activities minimize impact on Department components. Additionally, in partnership with the DOD Chief Information Office, we are leveraging established governance forums to apply the collective expertise of the entire JIE team toward solving tough challenges and making informed decisions.

CIVILIAN CYBER RECRUITING AND RETENTION

16. Senator GILLIBRAND. Vice Admiral Rogers, during the hearing, you identified recruitment and retention of civilian cyber personnel as a greater challenge than recruitment and retention of military cyber personnel. What specifically are the challenges and what do you believe is needed to recruit and retain civilian cyber warriors in DOD?

Admiral ROGERS. We are faced with a couple of recruiting and retention challenges. The recent furlough situation created uncertainty for recruiting prospective new hires and retaining our talented cadre workforce. While Federal employment has traditionally been seen as a secure career, both NSA and CYBERCOM experienced employee turmoil directly attributed to an absence of appropriations at the beginning of fiscal year 2014. Given our close relationship with NSA, many employees experienced the furlough while others did not. This had a negative impact on morale and caused employees to search for perceived “non-furloughed” positions to mitigate their employment risk. This of course results in skewing the workforce mix, and also leads to some critical work roles remaining vacant. We also continue to experience difficulty hiring personnel with the skills we need while competing with industry, academia, and other non-Federal and Federal organizations. We have had success using the “Schedule A Expedited Hiring Authority” that was granted CYBERCOM over the past 3 years and expires 31 December 2014. However, we continue to have great difficulty competing with outside agencies and companies due to the speed at which they can hire and the generally higher level of salary that they can offer.

17. Senator GILLIBRAND. Vice Admiral Rogers, do you see a need for Congress to grant additional authorities to DOD to recruit and retain civilians?

Admiral ROGERS. Yes. In order to address the challenges of recruitment and retention of civilian cyber warriors, CYBERCOM needs additional authorities such as:

- (1) Rank-In-Person: The ability to assess and act on the knowledge, skills and abilities (KSA) an individual brings to the job, rather than focusing principally on assessing a position against rigid job classification factors.
- (2) Performance Focused Pay: Designed to compensate and reward employees based on performance, contribution or competencies; enhances ability to compete with the private sector for high quality candidates, including college graduates.
- (3) Market Informed Pay: Pay ranges tied to pay rates for comparable positions with CYBERCOM’s private/public competitors; grade levels replaced with career levels and varied by occupation; OPM classification standards are aligned with CYBERCOM career levels.
- (4) Extended Probationary Period: Allows the 1 year probationary period to be extended for up to 3 years determined by the type of work.
- (5) Training and Development (Critical Skills): Expanded CYBERCOM authority to provide funding for degree and certificate programs.

In order to stay competitive in the work place and execute the CYBERCOM mission effectively, the Commander, CYBERCOM, needs greater flexibility to recruit, hire and retain a highly skilled work force. Under Title 10 excepted authorities, the Director, NSA/Chief CSS has that flexibility and is thus able to recruit and retain some of the Nation's most talented technical PhDs, Computer Scientists, Engineering and Physical Scientists and Mathematicians, business and support professionals. Commander, CYBERCOM, needs these same authorities to build a similar civilian work force.

In addition, the previous commander in an open hearing identified, ".with respect to personnel, I think we need to come up with a personnel system that puts all of our cyber team in one personnel construct, especially for the NSA CYBERCOM team."

QUESTION SUBMITTED BY SENATOR MAZIE K. HIRONO

CYBERSECURITY VITAL TO NATIONAL SECURITY

18. Senator HIRONO. Vice Admiral Rogers, cybersecurity plays a vital role in the security of our Nation. With \$5.1 billion in the fiscal year 2015 budget request, there are many opportunities to incorporate, both Active and Reserve cyber units to play critical roles in cybersecurity. With cybersecurity and intelligence infrastructure already in place on Oahu and many cyber threats originating in the Pacific region, I believe that the Hawaii National Guard would be an ideal candidate to establish a cyber force. Please share your thoughts on the National Guard's role in the cybersecurity mission at the national level as well as specifically for the State of Hawaii?

Admiral ROGERS. Regarding the role of the National Guard, to include the State of Hawaii, in State-specific cyber missions we are looking at two distinct areas of concern. One, we continue to work with the Services on how the National Guard Forces are employed by CYBERCOM specifically, and integrated with the CMF. Second we are looking to develop a CMF capability that included the National Guard and its role in support civil authorities in resiliency, recovery, and aid in investigations. One concept for consideration, subject to appropriate mission analysis, feasibility study, authorities analysis, and requisite DOD approvals, would be to establish cyberspace situational awareness and capabilities for protecting Critical Infrastructure and Key Resources (CIKR) within the States' utilizing the Reserve Force construct. Additionally, we recognize Reserve component civilian experience and certifications are a critical benefit in the quickly evolving cyberspace domain which enhances military based training programs.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

NETWORK VULNERABILITY

19. Senator INHOFE. Vice Admiral Rogers, U.S. Transportation Command (TRANSCOM) has been subject to a growing number of cyber attacks. TRANSCOM's reliance on unique contracts—such as the CRAF program where U.S. civil air carriers agree to augment organic military airlift during a crisis in exchange for access to peacetime defense business—creates unique challenges. In a contingency, TRANSCOM's ability to move troops or supplies could be hindered if a vendor's network were compromised. Today there appears to be little sharing of threat and network vulnerability information. Do you share these concerns?

Admiral ROGERS. I do share these concerns, and that is why efforts to enable asset owners to strengthen these networks and hold them accountable are so important. DOD and NSA have long worked to address these issues through voluntary and contractual means including sharing information directly with participating companies in the Defense Industrial Base Cybersecurity/Information Assurance program. DOD further supports broader industry information sharing efforts by providing threat and vulnerability information through DHS. Executive Order 13636 continues to advance information sharing, but legislation is still needed to enhance information sharing among and between private and public entities, and to protect privacy and civil liberties. The end goal is to achieve machine speed cybersecurity and to enable coordinated preventative and response options across the U.S. Government and private sector to protect and defend the United States and our interests in cyberspace.

20. Senator INHOFE. Vice Admiral Rogers, what other unique cybersecurity challenges do you believe we should be aware of?

Admiral ROGERS. The United States faces adversaries that seek persistent presences on military, government, and private networks for purposes such as exploitation and potential disruption and destruction. These adversaries have displayed increasing capacities and sophistication in their capabilities designed to steal, manipulate, and destroy U.S. information and hold our critical infrastructure on which our military and nation rely at risk. This is a constantly changing environment that requires we generate the capability and agility needed to operate in this dynamic environment. In addition to improved information sharing among public and private sector entities, we need to establish timely decision-making structures and processes to provide senior decision makers and operational commanders with a full range of options within the cyber arena. This requires that we partner with our allies, the private sector, within DOD, and across the U.S. Government. These partnerships can assist us in countering common threats and addressing shared vulnerabilities at a larger scale than any one organization can do alone.

21. Senator INHOFE. Vice Admiral Rogers, what steps are TRANSCOM and CYBERCOM taking to address these vulnerabilities?

Admiral ROGERS. Across DOD, we are creating capabilities that can help mitigate these vulnerabilities, but some key capability gaps remain in dealing with highly adaptable and increasingly capable threats. Because the architecture must be agile, secure, reliable and rapidly deployable, DOD is currently involved in efforts to leverage computing technology that can dramatically increase our ability to safely and securely store and access data. In order to create effective cyber teams, we need enough trained and ready cyber experts to perform all the responsibilities; therefore, CYBERCOM is in the process of assembling a workforce that understands how to perform necessary threat management in this domain. We must also have the ability and the confidence to share this common operating picture among government organizations, industry partners, and foreign partners as appropriate. We continue to work across DOD and with other departments and agencies to enact policy changes such as the work under the Executive order that will enhance our ability to strengthen our cybersecurity, but cyber legislation is still needed to enhance information sharing among public and private entities and protect privacy and civil liberties.

22. Senator INHOFE. Vice Admiral Rogers, can TRANSCOM and DOD enact a policy change that can make the fixes that you envision?

Admiral ROGERS. CYBERCOM is collaborating with TRANSCOM and other DOD entities to work with private sector partners to improve network security that will ensure reliable worldwide logistics operations. In the past year, DOD has extensively re-written cybersecurity policies to incorporate National Institute of Standards and Technology (NIST) standards and ensure compatibility across not only the department, but the entire Federal Government. These new policies are currently being disseminated and enacted across DOD, and promise to significantly alter the way DOD evaluates and manages risks across our enterprise. DOD is also working with its U.S. Government counterparts to enact policy and process changes that will enable the coordinated employment of existing homeland security, law enforcement, and military authorities and capabilities, as appropriate. Also, we continue to focus on improving information sharing between the private and public to the greatest extent feasible in the current environment, noting that cybersecurity information sharing legislation would do much to enable and enhance two way real time information sharing.

23. Senator INHOFE. Vice Admiral Rogers, do you feel that TRANSCOM and DOD need more legislative authority to fix this persistent threat brought about by the current cyber intrusion problem?

Admiral ROGERS. The President has the necessary authority to order military action to defend our Nation against all attacks whether they come from terrorists or nation states and in any domain from sea, air, land or cyberspace. Since the President can delegate appropriate authorities to the Secretary of Defense to use the Department's operational capabilities, including CYBERCOM, to defend the Nation from cyber attack, additional legislative authority for DOD or CYBERCOM is not necessary. That said, the operations of TRANSCOM and its close industry partnerships serve to highlight that with so much of the critical infrastructure owned and operated by the private sector, the government has limited visibility and thus is often unaware of the malicious activity targeting our critical infrastructure. These blind spots prevent the Government from being positioned to either help the critical

infrastructure to defend itself or to defend the Nation from an attack, if necessary. This can best be overcome through legislation that removes existing barriers and disincentives and facilitates two-way real time information sharing between the private sector and the government.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

CYBER DETERRENCE

24. Senator AYOTTE. Vice Admiral Rogers, when DOD endures a cyber attack, how would you characterize our ability to determine who conducted the attack?

Admiral ROGERS. Our ability to determine who conducts cyber attacks depends upon several factors including sophistication of the malicious actors, information sharing capabilities and policies and available trained manpower. Attribution involves an examination of malicious activity based on technical, behavioral, and personal characteristics. Our ability to determine attribution does not solely rely on the mechanical process of geo-location of physical networks or nodes. The possibility always exists the adversary has exploited/hijacked what appears to be the origin and is directing the cyber attacks from a remote location, anywhere in the world. We employ significant resources and manpower to analyze network and intelligence data to determine the true aggressor. Over the past decade, our ability to identify malicious cyber actors has improved significantly as we have adopted a federated approach in the analysis of data necessary to pinpoint the nexus for a given cyber operation. To stay ahead of the adversary, there are currently processes in place to share information and analytic insight across DOD and the Intelligence Community. In addition, defense contractors and other civilian defense organizations have their own sets of information which could lead to the attribution of cyber threat actors and their capabilities and intentions.

25. Senator AYOTTE. Vice Admiral Rogers, how long does it take to identify the attacker?

Admiral ROGERS. Analysis of network traffic is one key element in the attribution process. Analysis of malicious network traffic over time provides valuable clues in the hunt for a nexus in the case of nefarious activity. Developing “signatures” using the aforementioned network analysis techniques, combined with multi-source intelligence information, allows for rapid identification and notification—often within minutes.

The process for identifying top level cyber actors using advanced tools is much more complicated. Attribution can take days to months as the forensic review of the operation is conducted by multiple organizations within DOD and the Intelligence Community. It must be noted, however, that the distributed nature of the Internet combined with the blinding pace in the evolution and growth of cyber tools and associated programs makes timely attribution of the most advanced actors particularly difficult.

26. Senator AYOTTE. Vice Admiral Rogers, how can we improve our attribution capability?

Admiral ROGERS. Attribution of the individuals and/or organizations responsible for malicious cyber activity can run the gamut of difficulty. In order to improve our attribution capability it is imperative we employ highly skilled and trained individuals working with advanced and consistently updated technologies across and between Whole of Government.

Training and recruitment of effective information technology and analysis personnel is critical to building and maintaining an effective cyber force. Our current build-up of National Mission Teams and Cyber Protection Teams are a step in the right direction. It is also important that we continue to strengthen the cyber ranks of existing agencies by hiring the most qualified individuals and providing working environments that are competitive with the private sector.

Substantial investment in research and development of new capabilities by private enterprise, educational institutions, and government agencies is also critical to improving our attribution capability. Attribution capability is highly dependent upon our mastery and dominance of communication and system technologies.

Finally, sharing of malicious cyber activity and associated intelligence across Federal agencies is a key part in the process of understanding the cyber adversary. As attribution models and frameworks continue to mature and are shared and agreed across agencies, each agency’s unique insights and information can be shared and organized to deliver more rapid and accurate attribution.

CYBER THREAT

27. Senator AYOTTE. Vice Admiral Rogers, what is your greatest concern in regards to CYBERCOM?

Admiral ROGERS. My greatest concern is dealing with the evolving threat in cyberspace. Our adversaries seek to establish persistent access to military, government, and private-sector networks in order to extract sensitive information and, potentially, to disrupt or destroy critical infrastructure and key resources. As a military and a nation, we are not well positioned to counter such threats. Detecting, containing and expelling capable, persistent intruders can require a commitment of resources and a degree of information sharing and collaboration among government and private-sector entities that is often limited by questions of legal authorities, liability and regulatory necessity.

DOD is improving development of cyber capabilities to detect and respond to the evolving threats; however, key gaps remain. Our legacy information architecture, for instance, is not optimized for defense in its current form and our capability for shared situational awareness across DOD networks are not yet sufficient. We have not yet built trained and ready cyberspace forces in the quantity needed to counter the full range of threats we face. Finally, existing authorities and legal frameworks are not adequate for the public-private threat information sharing and timely responses needed for defense of the Nation in cyberspace. Additional legislation is needed to allow greater public-private information sharing while protecting privacy and civil liberties.

28. Senator AYOTTE. Vice Admiral Rogers, from a DOD perspective, what steps do you think are most important to take in the short-term to better protect our warfighting capability from cyber attacks?

Admiral ROGERS. The most important short-term actions to better protect our warfighting capability mirror DOD's enduring priorities to build a defensible architecture, employ trained and ready CMFs, and maintain global situational awareness and a common operating picture, but with a slightly different order of emphasis. One of my first priorities will be to work closely with NSA and the Services to accelerate the training and deployment of trained and fully qualified personnel to man the CMFs. Effectively employing our CMFs and better focusing their secure and defend efforts requires that we continue to identify and prioritize assets that constitute the critical cyber components or cyber dependencies of our warfighting capabilities. Finally, an improved understanding of critical warfighting cyber components and cyber dependencies is essential for enhancing our efforts to build and maintain global situational awareness in cyberspace.

CYBERCOM AND U.S. NAVY RESERVES

29. Senator AYOTTE. Vice Admiral Rogers, the Military Services provide many of our Nation's cyber professionals. What role do you believe the Reserve component—including the National Guard—should play in cyber operations?

Admiral ROGERS. We are engaged with the Services on the proper role of Reserve component cyber forces. The ability to identify, leverage, and employ these forces can provide a critical enabler for national cyber defense. The Air Force and Army are planning to have the Reserve component forces part of their respective CMF build. These plans are currently being vetted within each of the respective Services.

The Reserve component, to include the National Guard, plays an essential role in physical defense and public security. The cyber mission provides an opportunity for the Services to leverage the dual nature of guardsmen and the complementary nature of reservists to address specific needs, fill gaps and when required, supplement the Active Force in a surge capacity. A significant contribution to the national cyber defense mission is the ability of guardsmen and reservists to leverage their civilian expertise, professional knowledge, and established relationships in order to support Federal, State, or local mission tasks as assigned by appropriate authorities.

30. Senator AYOTTE. Vice Admiral Rogers, what specific role do you think the U.S. Navy Reserves should play in cyber operations?

Admiral ROGERS. Since 2012, the Navy Reserve (NR) fulfills a significant role in Fleet Cyber Command/Commander Tenth Fleet (FCC/C10F) efforts to build and deploy its CMF structure. Reserve personnel are sourced from across all FCC/C10F Reserve units, Selected Reserves, and a mix of volunteers from Voluntary Training Units, a subset of the Inactive Ready Reserve. The FCC/C10F's utilization of Navy Reserve personnel includes the drafting of CMF team-specific Concepts of Operations, as well as the strategy for development and formalization of a plan for the

Active component Navy CMF team build, which is currently under review by FCC/C10F. Additionally, Navy Reserve personnel currently augment headquarters functions on both the cyber plans and targeting, and fires efforts. Navy reservists currently support Active component cyber exercises such as Cyber Flag and Cyber Guard, and serve as a critical force augmentation by providing immediate, trained, and experienced operators.

CYBERSECURITY AND THE PRIVATE SECTOR

31. Senator AYOTTE. Vice Admiral Rogers, under the cybersecurity Executive order that President Obama signed in February 2013, the Government was tasked with improving the manner in which it shares information with the private sector. From a cyber perspective, how would you assess the information flow between the U.S. Government and the private sector?

Admiral ROGERS. In the last few years, and most recently under Executive Order 13636, the U.S. Government has made important progress in providing information to the private sector. Notable examples include the Enhanced Cybersecurity Services program for sharing threat and technical information from the Government to critical infrastructure sectors, and the release in February 2014 of the Cybersecurity Framework. Yet, without two-way sharing between the private sector and the Government, the Government may not have insight to malicious cyber activities within privately owned and operated networks in time to enable the private sector to defend itself, or to defend the United States, if necessary.

32. Senator AYOTTE. Vice Admiral Rogers, does the Government share enough information with the private sector?

Admiral ROGERS. No, despite the recent progress, there is room for improvement in what cybersecurity information the U.S. Government shares with the private sector, as well as what the private sector shares with the U.S. Government. The U.S. Government needs to improve its information sharing policies and processes in a manner that is timely, respects privacy and civil liberties, is sensitive to competitive advantage concerns, and protects intelligence and law enforcement sources, methods, operations, and investigations.

33. Senator AYOTTE. Vice Admiral Rogers, if confirmed as Director of the NSA and Commander of CYBERCOM, what more would you do to have a better flow of information to private sector companies so they can best protect their systems from cyber attacks?

Admiral ROGERS. As the Commander, CYBERCOM and the Director, NSA/Chief CSS, I will partner with DOD, DHS, FBI, and the Office of the Director of National Intelligence to improve machine-speed cybersecurity information sharing with the private sector. To this end, I will continue to support the goals of Executive Order 13636, namely: provide threat information to DHS, DOD, and other sector-specific agencies; assist in expanding the DHS-managed Enhanced Cybersecurity Services program to all critical infrastructure sectors; and move expeditiously to implement secure sharing of classified cybersecurity information with appropriately cleared private entities.

34. Senator AYOTTE. Vice Admiral Rogers, on the flip side, when a defense company endures a cyber attack, is that being shared with DOD? In other words, do we really understand the degree to which our defense industrial base is under cyber-attack?

Admiral ROGERS. The Department is adapting its DOD-Defense Industrial Base Voluntary Cybersecurity/Information Assurance (DIB CS/IA) Activities program (32 CFR Part 236) to incorporate mandatory incident reporting requirements under section 941 (NDAA for Fiscal Year 2013) while maintaining the voluntary cyber threat information sharing. This amended program will strengthen DOD's ability to safeguard DOD information on contractor unclassified information systems and provide contractors increased incentive to join the voluntary DIB CS/IA program for more robust cybersecurity collaboration with DOD. However, all stakeholders in the public and private sectors will remain disadvantaged in understanding the full scope of the threat without legislation to enhance information sharing among and between private and public entities while protecting privacy and civil liberties and clarifying liability and anti-trust issues.

35. Senator AYOTTE. Vice Admiral Rogers, countless jobs, investments, and dollars are being lost from the theft of intellectual property each year due to cyber hacks. How can we help our defense industrial base better protect itself?

Admiral ROGERS. I agree that the theft of intellectual property is a real and growing problem that negatively impacts the technological competitiveness, economic health, and national security of the United States. Several initiatives are underway to help the Defense Industrial Base (DIB) better protect itself. Cybersecurity information sharing occurs within the voluntary DIB Cybersecurity and Information Assurance (DIB CS/IA) Program and its optional DHS-managed Enhanced Cybersecurity Services (ECS) component. In addition, DOD, as the Sector Specific Agency for the DIB, works with DHS to implement the National Infrastructure Protection Program sector partnership model and risk management framework. While these partnerships help to improve the security of the DIB, and improve our collective strength against the theft of our Nation's intellectual property, additional steps are needed to remove barriers to cybersecurity information sharing and encourage industry to harden its networks.

INTERAGENCY INFORMATION SHARING

36. Senator AYOTTE. Vice Admiral Rogers, what role should CYBERCOM play in coordinating with other agencies such as DHS to make sure the U.S. Government has a common picture of the threat and can develop a well-coordinated response?

Admiral ROGERS. As part of the Comprehensive National Cybersecurity Initiative (CNCI), Federal cybersecurity operations centers across the U.S. Government were linked to foster improved information sharing and shared situational awareness of cyber threats. CYBERCOM's Joint Operations Center is and should continue to be a key member facilitating that linkage across the whole of government, particularly when DOD is the designated lead for a cyber-related operation. In those circumstances where another agency has the lead, then CYBERCOM should act in a supporting capacity, as needed.

It is important to note that developing well-coordinated responses to potential cyber incidents begins long before an incident comes to light. Ideally, the U.S. Government would have pre-coordinated response options to cyber incidents available to respond to the most likely and most dangerous cyber threats. This requires advanced planning, capability development, machine-speed information sharing, whole-of-government exercises, and timely and agile decision-making processes that allow national leaders to assess and manage risks both during steady state and crisis operations. CYBERCOM is—as part of a broader DOD and U.S. Government effort—well-suited to support the development and exercise of pre-coordinated response options needed to defend the United States and its interests in cyberspace.

37. Senator AYOTTE. Vice Admiral Rogers, based on your preparation for your nomination hearing, how would you characterize CYBERCOM's current relationship with DHS?

Admiral ROGERS. CYBERCOM's relationship with DHS is good and growing. DHS, the lead for national protection, is a key partner to DOD, the lead for national defense. Efforts to protect and defend the United States and its interests in cyberspace must go hand-in-hand. As the nature of conflict and competition in cyberspace evolves, so, too, must CYBERCOM's relationship with DHS in order to ensure our Nation's ability to operate, defend, and protect ourselves in the domain. CYBERCOM's relationship with DHS will continue to grow both in importance and strength over the coming months and years. I look forward to working with my DHS counterparts to this end.

[The nomination reference of VADM Michael S. Rogers, USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 30, 2014

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment to the U.S. Navy to the grade indicated while assigned to a position of importance and responsibility under Title 10, U.S.C., section 601:

To be Admiral.

VADM Michael S. Rogers, USN, 0000.

[The biographical sketch of VADM Michael S. Rogers, USN, which was transmitted to the committee at the time the nomination was referred, follows:]

RÉSUMÉ OF SERVICE CAREER OF VADM MICHAEL SCOTT ROGERS, USN

28 Aug 1981	Ensign
28 Aug 1983	Lieutenant (junior grade)
01 Sep 1985	Lieutenant
01 Sep 1991	Lieutenant Commander
01 Sep 1997	Commander
01 Sep 2002	Captain
02 Nov 2007	Designated Rear Admiral (lower half) while serving in billets commensurate with that grade
01 Feb 2008	Rear Admiral (lower half)
01 Oct 2010	Rear Admiral
30 Sep 2011	Vice Admiral, Service continuous to date

Assignments and duties:

	From	To
NROTC Unit Auburn University (Asst Admin Officer)	Aug 1981	Sep 1981
USS <i>Caron</i> (DD 970) (Acting Division Officer)	Sep 1981	Dec 1981
Surface Warfare Officers School Command, Newport, RI (DUINS)	Jan 1982	May 1982
Naval Justice School, Newport, RI (DUINS)	May 1982	Jun 1982
USS <i>Caron</i> (DD 970) (Combat Information Center Officer) (Anti-Submarine Warfare Officer)	Jun 1982	Jan 1985
Commander, Naval Military Personnel Command, Washington, DC (Navy Affirmative Action Plan Manager)	Feb 1985	Nov 1986
Naval Security Group Dept, Naval Comm Station, Spain (Surface/Subsurface Direct Support Officer) (Electronic Warfare Officer)	Nov 1986	Dec 1989
Commander, U.S. Atlantic Fleet (Assistant Shore and National Cryptologic Systems Officer)	Jan 1990	Jan 1993
Armed Forces Staff College (Student)	Jan 1993	Apr 1993
Naval Technical Training Center, Pensacola, FL (Student)	May 1993	May 1993
Commander, Carrier Group Two (Staff Cryptologist)	Jun 1993	May 1995
Bureau of Naval Personnel, Washington, DC (Cryptologic Junior Officer Detailer)	May 1995	May 1997
Commander, Naval Security Group Command (Executive Assistant)	May 1997	Jun 1998
CO, Naval Security Group Activity, Winter Harbor, ME	Jul 1998	Jul 2000
Commander, Sixth Fleet (Fleet Information Operations and Cryptology Officer)	Jul 2000	Jul 2002
National War College (Student)	Jul 2002	Jun 2003
Joint Staff (Head, Computer Network Attack/Defense Branch)	Jun 2003	Oct 2003
Joint Staff (Chief, Information Operations Division)	Oct 2003	Feb 2004
Joint Staff (Executive Assistant, Director for Operations) (J-3)	Feb 2004	Aug 2004
Joint Staff (Executive Assistant, Director, Joint Staff)	Aug 2004	Aug 2005
Joint Staff (Special Assistant to CJCS/Director, Chairman's Action Group)	Aug 2005	Nov 2007
Commander, U.S. Pacific Command (Director for Intelligence) (J2)	Dec 2007	Sep 2009
Joint Staff (Director for Intelligence) (J2)	Sep 2009	Sep 2011
Commander, Fleet Cyber Command/Commander, 10th Fleet	Sep 2011	To date

Medals and awards:

Defense Superior Service Medal with two Bronze Oak Leaf Clusters
 Meritorious Service Medal with two Gold Stars
 Joint Service Commendation Medal
 Navy and Marine Corps Commendation Medal with one Silver Star
 Joint Meritorious Unit Award with three Bronze Oak Leaf Clusters
 Navy Unit Commendation
 Meritorious Unit Commendation with two Bronze Stars
 Navy "E" Ribbon

Navy Expeditionary Medal with three Bronze Stars
 National Defense Service Medal with one Bronze Star
 Armed Forces Expeditionary Medal with one Bronze Star
 Global War on Terrorism Expeditionary Medal
 Global War on Terrorism Service Medal
 Military Outstanding Volunteer Service Medal
 Sea Service Deployment Ribbon with two Bronze stars
 Overseas Service Ribbon with four Bronze Stars
 Expert Rifle Marksmanship Medal
 Expert Pistol Shot Medal

Special qualifications:

BS (Business Administration) Auburn University, 1981
 MS (National Security Strategy) National Defense University, 2003
 Designated Surface Warfare Officer, 1983
 Designated Cryptologic Officer (Information Warfare), 1986
 Designated Joint Qualified Officer, 2006
 Designated Level IV Joint Qualified Officer, 2009
 CAPSTONE 2009-4 13JU
 Pinnacle 2012-1

Summary of joint duty assignments:

Assignment	Dates	Rank
Joint Staff (Head, Computer Network Attack/Defense Branch)	Jun 03–Oct 03	CAPT
Joint Staff (Chief, Information Operations Ops Division)	Oct 03–Feb 04	CAPT
Joint Staff (Executive Assistant, Director of Operations, J-3)	Feb 04–Aug 04	CAPT
Joint Staff (Executive Assistant, Director, Joint Staff)	Aug 04–Aug 05	CAPT
Joint Staff (Special Assistant to CJCS/Director, Chairman's Action Group)	Aug 05–Nov 07	CAPT
Commander, U.S. Pacific Command (Director for Intelligence) (J2)	Dec 07–Sep 09	RDML
Joint Staff (Director for Intelligence) (J2)	Sep 09–Sep 11	RDML/RADM

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by VADM Michael S. Rogers, USN, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
 Michael S. Rogers.

- 2. Position to which nominated:**
Director, National Security Agency/Chief, Central Security Service/Commander, U.S. Cyber Command.
- 3. Date of nomination:**
January 30, 2014.
- 4. Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
- 5. Date and place of birth:**
October 31, 1959; Chicago, IL.
- 6. Marital Status:** (Include maiden name of wife or husband's name.)
Married to Dana M. Rogers (Maiden Name: Walck).
- 7. Names and ages of children:**
Justin, age 25.
Patrick, age 21.
- 8 Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
- 9. Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational, or other institution.
None.
- 10. Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Member, U.S. Naval Institute
Member, Auburn University Alumni Association
- 11. Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.
None.
- 12. Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?
Yes.
- 13. Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?
Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MICHAEL S. ROGERS.

This 16th day of January, 2014.

[The nomination of VADM Michael S. Rogers, USN, was reported to the Senate by Chairman Levin on March 16, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 31, 2014.]

NOMINATIONS OF DR. LAURA J. JUNOR, TO BE PRINCIPAL DEPUTY UNDER SECRETARY OF DEFENSE FOR PERSONNEL AND READINESS; MR. GORDON O. TANNER, TO BE GENERAL COUNSEL OF THE DEPARTMENT OF THE AIR FORCE; MS. DEBRA S. WADA, TO BE ASSISTANT SECRETARY OF THE ARMY FOR MANPOWER AND RESERVE AFFAIRS; MS. MIRANDA A.A. BALLENTINE, TO BE ASSISTANT SECRETARY OF THE AIR FORCE FOR INSTALLATIONS, ENVIRONMENT, AND ENERGY; AND DR. MONICA C. REGALBUTO, TO BE ASSISTANT SECRETARY OF ENERGY FOR ENVIRONMENTAL MANAGEMENT

THURSDAY, JUNE 19, 2014

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:37 a.m., in room 216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Nelson, Donnelly, Hirono, Kaine, King, Inhofe, Sessions, and Ayotte.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

The committee meets this morning to consider the nominations of Dr. Laura Junor to be Principal Deputy Under Secretary of Defense for Personnel and Readiness; Gordon Tanner to be General Counsel of the Department of the Air Force; Debra Wada to be Assistant Secretary of the Army for Manpower and Reserve Affairs; Miranda Ballentine to be Assistant Secretary of the Air Force for Installations, Environment, and Energy; and Dr. Monica Regalbuto to be Assistant Secretary of Energy for Environmental Management.

We welcome you and your family members this morning. The committee always recognizes the tremendous contributions that are made by the support of engaged family members that we are all so blessed to have. We thank you all for joining us and for joining

your family members here today. We encourage our nominees, during your opening statements, to introduce family members and others who might be here to support you.

The positions to which today's witnesses have been nominated are important and challenging assignments.

The Principal Deputy Under Secretary of Defense for Personnel and Readiness' responsibilities include recruitment, retention, pay and benefits, health care, readiness, and quality of life for the men and women of our Armed Forces. If confirmed for this position, Dr. Junor will play a critical role in the Department's efforts to address the difficult issues, ranging from reductions in end-strength, the increasing cost of military health care, sexual assaults in the military, and changes in assignment policies relating to women in the Armed Forces, and that is just naming a few.

The General Counsel of the Department of the Air Force is the chief legal officer and chief ethics official in the Air Force. He will provide legal advice and guidance to the Secretary of the Air Force, as well as legal services throughout the Air Force in a variety of disciplines. He will also provide oversight of intelligence and other sensitive activities and investigations.

The Assistant Secretary of the Army for Manpower and Reserve Affairs is responsible for the supervision of the manpower and Reserve component affairs of the Army. If confirmed, Ms. Wada will face many challenges, among them ensuring that the Army executes end-strength reductions in a way that preserves readiness and protects against a hollow force, prevention and response to sexual assaults in the Army, and assignment policies for female soldiers.

The Assistant Secretary of the Air Force for Installations, Environment, and Energy has a diverse portfolio that includes several issues directly impacting the readiness of our Air Force. Ms. Ballentine will have responsibility for overseeing the construction and maintenance of facilities in a time of increased budget austerity, ensuring that the Air Force is maximizing energy efficiency and security, and navigating environmental issues relating to installations safety and occupational health.

I believe that your great success, Ms. Ballentine, has its roots in your formative years that you spent in Michigan. I am pleased that your parents, who are also Michigan residents, could be with us today. We give them a special welcome. My colleagues will forgive me for that, I know.

The Assistant Secretary of Energy for Environmental Management will oversee the ongoing cleanup at 16 former Cold War-era defense production sites spread across 11 States. Upholding the Federal Government's commitment to remediate these sites is of critical importance to the States and local communities in which they are located. Dr. Regalbuto, if confirmed, will play a central role in carrying out that commitment.

We welcome our nominees here today. We look forward to their testimony and, hopefully, their swift confirmation.

Senator Inhofe?

STATEMENT OF SENATOR JAMES M. INHOFE

Senator INHOFE. Thank you, Mr. Chairman. Let me just say that I concur in the comments that you made and the significance of each position. I look forward to hearing from each one of you. I just hope that you recognize, all five of you, that we are in a situation that, certainly in my 20 years in the U.S. Senate and on this committee, I have never seen a more stressed time, in terms of budget problems and all of that.

I am sure you will keep that in mind. I hope that you will.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Senator Inhofe.

Dr. Junor?

STATEMENT OF LAURA J. JUNOR TO BE PRINCIPAL DEPUTY UNDER SECRETARY OF DEFENSE FOR PERSONNEL AND READINESS

Dr. JUNOR. Good morning, Chairman Levin, Ranking Member Inhofe, and members of the committee. I am honored to be here before you today, and I appreciate the confidence that President Obama has expressed in nominating me to be the Principal Deputy Under Secretary of Defense for Personnel and Readiness.

I would also like to thank my family, who is with me here today: my mother, Phyllis Gladhill; my 17-year-old daughter, Madeline; my husband and an incredibly patient man, T.J.; my sister, Ann; and my brother-in-law, Michael Santorios; and my friends and co-workers, who are also here today.

My 7-year-old couldn't be here. She is training for a musical this afternoon, so today is a very big day in our house.

I also would like to recognize and thank the soldiers, sailors, airmen, and marines, and their families, with whom I have the honor to serve during my career. Their selfless commitment to our Nation and to each other is testament to the strength of our military community and to our Nation.

It has been a privilege for me to have served the Nation in the Department of Defense (DOD) for over 20 years and currently as the Deputy Assistant Secretary of Defense for Readiness.

The Office of Deputy Assistant Secretary for Readiness is the focal point of the Department on all issues and activities related to the readiness of America's Armed Forces.

As the Deputy Assistant Secretary, my primary responsibility is to ensure that our military is effectively manned, trained, and equipped for all missions.

During my career, I have been part of the military buildup in support of conflicts in two theaters, and subsequently the draw-down of both. Balancing the need to reduce budgets while maintaining a healthy and ready military is the mission that senior Department leaders must not fail.

In the Office of the Under Secretary of Defense for Personnel and Readiness, that is our commitment to the men and women who put themselves in harm's way. The competition for resources should not degrade our ability to respond to conflicts that may threaten the safety of our Nation and those who took oaths to defend.

I believe my experience has prepared me to fill the position of the Principal Deputy Under Secretary of Defense for Personnel and Readiness.

I am an economist, both by training and practice, and favor an analytic approach to most problems. My work has directly influenced policy on a range of topics, including spares and maintenance, aviation, training, contingency sourcing, recruiting and retention, and response options for domestic emergencies.

Finally, I grew up a military dependent and married a naval officer. In that sense, I am familiar with the scope of issues facing military families.

I am grateful to the members of the committee and to all Members of Congress for their support, the support that they have given to our men and women in uniform and their families.

If confirmed, I pledge to you that I will work diligently on behalf of the Nation's servicemembers, their families and our civilian workforce that supports them, along with this committee and Congress.

Thank you, and I look forward to your questions.
Chairman LEVIN. Mr. Tanner?

**STATEMENT OF GORDON O. TANNER TO BE GENERAL
COUNSEL OF THE DEPARTMENT OF THE AIR FORCE**

Mr. TANNER. Thank you, Chairman Levin, Senator Inhofe, and members of the committee. It is a great honor to be before you as the nominee for General Counsel of the Air Force.

I would also like to thank President Obama, Secretaries Hagel and James for the trust they have placed in me. I want to thank the staff and members of this committee for the great courtesy they have shown during this process. I realize that this is a very busy time, and I appreciate the hard work it took to make this hearing happen.

I would also like to thank my family and friends, whose continued support through the years has been essential. In particular, I appreciate my mother, husband, and sister being here with me today.

Finally, I want to thank the airmen, soldiers, sailors, marines, and their families, with whom I have had the honor to serve during my career as an Active Duty and Reserve Judge Advocate as well as a member of the civil service.

My life has been enriched by the opportunity to serve with them.

I am deeply humbled and honored by this nomination. The most fulfilling job that I have had in my career to date was as Principal Deputy General Counsel of the Air Force, and I am excited by the prospect, if confirmed, of serving as the Air Force General Counsel.

The challenges facing the Department of the Air Force are many, and I look forward to helping Secretary James, Under Secretary Fanning, and the rest of the Air Force team as they grapple with these challenges.

But most of all, I am especially happy to be nominated for a position that will allow me to improve the lives of dedicated Air Force personnel who work to protect America and, when called upon, put themselves in harm's way for our country.

I am committed to continuing and enhancing the close and productive working relationship and partnership with the Air Force Judge Advocate General and other military lawyers in the Department. I am proud that I had a great relationship with the Air Force Judge Advocate leadership during my tenure as Principal Deputy General Counsel. Its senior leadership were not merely great colleagues, but close friends.

I am firmly convinced that the leadership of the Air Force is best served when the civilian and military lawyers work together as a team to offer the best possible legal advice to our mutual clients.

Should I be confirmed, I look forward to working with this committee in addressing any legal issues that may arise during my tenure. I am grateful for your consideration, and I look forward to your questions.

Thank you very much.

Chairman LEVIN. Thank you very much, Mr. Tanner.

Ms. Wada?

STATEMENT OF DEBRA S. WADA TO BE ASSISTANT SECRETARY OF THE ARMY FOR MANPOWER AND RESERVE AFFAIRS

Ms. WADA. Mr. Chairman, Senator Inhofe, members of the committee, I am honored that the President has nominated me for the position of the Assistant Secretary of the Army for Manpower and Reserve Affairs. It is a privilege to be here today to respond to any questions or issues with respect to my nomination.

I would like to thank President Obama, Secretary of the Army John McHugh, Representatives Smith and Davis, as well as Chairmen McKeon and Wilson, for their support of my nomination.

I would also like to recognize my family and friends for providing me their unwavering love and support for me to pursue my dreams. I would also be remiss if I did not recognize my colleagues who have provided me their wise counsel over the years.

If confirmed, it would be an honor for me to continue my service on the behalf of the soldiers, civilians, contractors, survivors, and families. I believe that my 27 years on Capitol Hill, including 14 years on the House Armed Services Committee, provide me the depth of experience and expertise to successfully execute the responsibilities of this position.

I look forward to continuing my work with this committee and Congress to address the personnel challenges the Army is facing and will continue to face in the next several years.

Thank you for your consideration, and I look forward to your questions.

Chairman LEVIN. Thank you very much, Ms. Wada.

Ms. Ballentine?

STATEMENT OF MIRANDA A.A. BALLENTINE TO BE ASSISTANT SECRETARY OF THE AIR FORCE FOR INSTALLATIONS, ENVIRONMENT, AND ENERGY

Ms. BALLENTINE. Good morning, Chairman Levin, Ranking Member Inhofe, Senators. Thank you for the opportunity to appear before this committee as nominee for Assistant Secretary of the Air Force for Installations, Environment, and Energy.

I would like to start by thanking my family: my husband, Roger Ballentine, who knows the rigors of Government service all too well and, nonetheless, has supported my nomination wholeheartedly; my kids, stepdaughter Eliza, who is 10, and daughter, Grace, who is 4½, who are always very forgiving of my time.

Here today also are my parents, Bob and Dina Anderson, who, Senator Levin, as you point out, drove from Michigan to support me today, and from whom I learned the importance of Government service.

I am grateful to President Obama, Secretary Hagel, Secretary James, and Under Secretary Fanning for their support of my nomination.

Although I have never experienced the gravity of signing on the dotted line, committing my very life if necessary to protect my country, I do know what it means to be a profoundly grateful citizen of the United States. Since my nomination, I have voraciously read the writings of Iraq and Afghanistan veterans, trying to put my feet in their boots, trying to see through their eyes and the eyes of their families.

Thus, if confirmed, I would consider this role as an opportunity to serve those who serve, to serve my President, my country, and, most of all, the men and women of the U.S. Air Force. This nomination is also an opportunity for me to honor those in my family who have served in the military, my father, my father-in-law, and my late grandfather, a World War II vet who served in the Army with one of the Air Force's founding fathers, General Claire Chennault.

I believe that many of the skills I have built in my private sector career transfer well to the job of Assistant Secretary of the Air Force for Installations, Environment, and Energy. Today's airmen depend on installations that operate effectively and efficiently, and I understand that the Secretary and the Chief have had to make hard choices in this tight fiscal environment to maximize mission effectiveness while making every dollar count.

If confirmed, I understand that I would face multifaceted, difficult decisions with few clear-cut solutions. My time at America's largest company gives me proven experience in leading global teams to develop and execute winning strategies for facilities, environment, and energy.

Coming from a company with over 11,000 facilities in over two dozen countries, I bring a history of successfully working with top leadership to balance competing priorities, manage limited resources, and drive mission-oriented solutions to complex problems.

If confirmed, I pledge to make every dollar count in the Air Force's installation management portfolio, handle environmental issues with integrity and speed, and help drive energy efficiency improvements in DOD's largest energy bill.

Thank you for your service and for considering my nomination, and I look forward to taking your questions.

Chairman LEVIN. Thank you so much, Ms. Ballentine.
Dr. Regalbuto?

**STATEMENT OF MONICA C. REGALBUTO TO BE ASSISTANT
SECRETARY OF ENERGY FOR ENVIRONMENTAL MANAGE-
MENT**

Dr. REGALBUTO. Thank you, Chairman Levin, Ranking Member Inhofe, and members of the committee. I appreciate the opportunity to appear before you today as President Obama's nominee for Assistant Secretary for Environmental Management (EM) of the U.S. Department of Energy (DOE).

I would like to begin my statement by expressing my gratitude to the President for his confidence demonstrated by this nomination. I am honored and humbled to be here. Should I be confirmed, I will do my best to meet that confidence.

I would like to thank Secretary Moniz for his support and for his leadership of the Department of Energy.

Professional achievement is seldom an individual effort. I have had the privilege of working with a multitude of talented people throughout my career as a chemical engineer. There are countless family members, friends, mentors, and colleagues who have done so much over the years to make this day possible.

I want to especially thank and recognize my husband, John, for always being supportive and patient, and to my adult children, Ricky, Carol, and Robby, for their sense of humor as they grew up in a hybrid culture, hearing my daily use of science-based Spanglish.

Lastly, I would not be here without the love and support of my parents, Horacio and Conchita, for instilling in me great values during my childhood, and for my parents-in-law, John and Carole, who I consider my second set of parents.

Mr. Chairman, I began my studies in Mexico, where, through great economic sacrifice of my family, I attended private schools, which offered a better education. In high school, I discovered an interest and gift in math and science, and started college seeking a degree in chemical engineering and computer science at Monterrey State.

At the time, there were very few women in engineering with limited job opportunities. This reality has heavily influenced me. As such, I have always supported and led efforts that substantially enhance employment opportunities for women and minorities.

I met my husband, John, while I was a student and eventually married him and moved to the United States and proudly acquired my U.S. citizenship.

After completing my Ph.D. at the University of Notre Dame, I joined Argonne National Laboratory in Chicago in 1988. I started my career supporting the development of technologies for the treatment of high-level waste at the Department of Energy plutonium production sites.

After developing strong technical skills, I joined BP-Amoco in 1996, where I enhanced my skills in managing complex projects, large projects, and multidisciplinary staff in an industrial setting.

I returned to Argonne in Chicago in 2001 and became the head of the process chemistry department where I worked on new technologies for the treatment of used nuclear fuel.

In addition, I was a member of the fuel cycle study team of the Massachusetts Institute of Technology. My participation in this

study not only allowed me to gain experience working with high-level officials and nongovernmental organizations but brought to my attention the need for safe, permanent disposal of all types of radioactive waste.

In 2008, I had the unique opportunity to join the Department of Energy Office of Environmental Management, where I served as senior project manager supporting their strategic mission in the waste processing area.

I also served as the Deputy Assistant Secretary for Fuel Cycle Technologies within the Office of Nuclear Energy. In this position, I was responsible for directing the research and development programs involving 10 national laboratories, 32 universities, over 400 students, and 300 professors.

The last few years have been an eventful period with respect to nuclear energy. I was directly involved in providing and coordinating emergency responses to the Fukushima Daiichi nuclear power plant disaster, focusing on opportunities to mitigate the highly contaminated water resulting from emergency cooling of the reactors damaged by the earthquake and subsequent tsunami.

Over the past few decades, I have seen our various nuclear waste management programs from a variety of vantage points. As a scientist at Argonne, I have worked on and led efforts to identify technical solutions to difficult waste management issues. In my previous role, I had been responsible for formulating and articulating the strategic options to expedite the resolution of our waste management needs.

I have also experienced the intricacy of nuclear waste management from a perspective of a waste generator and from a waste disposal specialist during my time at DOE.

Mr. Chairman, the Manhattan Project was a critical component of our success in World War II and the Cold War. The communities and regions that were home to these sites have made sacrifices for our Nation, and their environmental remediation is both a legal and moral obligation.

2014 marks the 25th anniversary of the EM program. During my time at Argonne and now at the Department of Energy, I have watched the environmental management mission complete 91 sites and have made significant progress in the remaining 16.

But great challenges still remain, which require innovative strategies to clean up efforts while ensuring that work is completely done safely.

I believe my background and experience and commitment have prepared me to lead the Office of Environmental Management during this particularly critical time. I welcome the opportunity to continue my service to the Nation as Assistant Secretary for Environmental Management.

If confirmed, I pledge to work closely with this committee and others in Congress to continue and ensure that our safe cleanup of the environmental legacy remains a priority.

Mr. Chairman, thank you again for the opportunity to appear before you and your committee today, and I look forward to answering your questions.

Chairman LEVIN. Thank you, Dr. Regalbuto.

I am going to ask all of you the standard questions and then turn it over to Senator Inhofe, who has to leave here for a few minutes for another commitment.

These questions, you can all answer at the same time.

Have you adhered to applicable laws and regulations governing conflicts of interest?

Dr. REGALBUTO. Yes.

Ms. WADA. Yes.

Ms. BALLENTINE. Yes.

Dr. JUNOR. Yes.

Mr. TANNER. Yes.

Chairman LEVIN. Have you assumed any duties, or undertaken any actions, which would appear to presume the outcome of the confirmation process?

Dr. REGALBUTO. No.

Ms. WADA. No.

Ms. BALLENTINE. No.

Dr. JUNOR. No.

Mr. TANNER. No.

Chairman LEVIN. Would you ensure that your staff complies with deadlines established for requested communications, including questions for the record, and hearings?

Dr. REGALBUTO. Yes.

Ms. WADA. Yes.

Ms. BALLENTINE. Yes.

Dr. JUNOR. Yes.

Mr. TANNER. Yes.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Dr. REGALBUTO. Yes.

Ms. WADA. Yes.

Ms. BALLENTINE. Yes.

Dr. JUNOR. Yes.

Mr. TANNER. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Dr. REGALBUTO. Yes.

Ms. WADA. Yes.

Ms. BALLENTINE. Yes.

Dr. JUNOR. Yes.

Mr. TANNER. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Dr. REGALBUTO. Yes.

Ms. WADA. Yes.

Ms. BALLENTINE. Yes.

Dr. JUNOR. Yes.

Mr. TANNER. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with a committee regarding the basis for any good-faith delay or denial in providing such documents?

Dr. REGALBUTO. Yes.

Ms. WADA. Yes.

Ms. BALLENTINE. Yes.

Dr. JUNOR. Yes.

Mr. TANNER. Yes.

Chairman LEVIN. Thank you.

Senator Inhofe?

Senator INHOFE. Thank you, Mr. Chairman.

In looking at the five of you, I think the one that arguably would have the toughest job is you, Dr. Junor, because of the real problem, the key word there is readiness. There was an article that I read last night, I will quote from it. This was in Politico. It said: "Authorizers and appropriators have so far mostly ignored the Defense Department's budget plans in favor of protecting big-ticket weapons programs, home district allocations, and troop pay benefits and personnel programs."

Then, on the other hand, we have heard from all of the Service Chiefs, all of them, in uniform plus the Secretaries, that we have a real dire situation. I will read you a quote from General Dempsey, who is the very top person. He says: "Our force is so degraded and so unready that it would be immoral to use force."

We are in a situation now that we have certainly never been in, as I said in part of my opening statement. We have a crisis on our hands.

I would ask you, first of all, do you recognize the severity of our readiness shortfall at the present time, and do you have any thoughts about how you are going to address that, keeping in mind this is not your fault? You inherited this mess, but what are you going to do?

Dr. JUNOR. Sir, I am very familiar with it. The conflicts that we have been in for more than a decade now have exhausted our capacity. We have so focused, and correctly so, on meeting the demands of Iraq and Afghanistan, we have very little residual capacity in full spectrum operations.

This has been a concern. I have been in this position for 3 years, and it has been my daily commitment to understand this problem better, to find out not just how it affects the unit, but the pipeline processes that generate that manpower.

Senator INHOFE. I think that that is key there, because when you go over there, and you have gone over and everyone up here has gone over, those who are on the frontlines, they are ready. It is that pipeline that is important.

Dr. JUNOR. That is exactly right. The readiness of the unit is, in effect, a lagging indicator. It is the readiness of the pipelines where the real problems lie.

When I first started as a readiness analyst, it was in the 1990s, and I watched how a problem would grow.

For example, in the Navy, we had a problem with spare parts, and that spare parts created a bow wave that it took literally years to fix.

Fast forward now, in my career, I have never seen so many simultaneous readiness problems.

Senator INHOFE. Exactly.

Dr. JUNOR. There are negative synergies, and I am at my wits end trying to figure out exactly how they will manifest.

That said, the Department has put everything—we recognize where we need investments, and even with our PB15 submission, we tried to find and free up the resources to fix the most acute problems. That is going to be our plan going forward.

Over the last almost 13 years now, our servicemembers and their families have borne the brunt of the cost of these wars, and they deserve as much as a grateful Nation can afford. But we have also promised that we would never again send our servicemembers into harm's way, and the current budget environment makes it really difficult to balance those two imperatives.

Senator INHOFE. In fact, I would give another quote of the second man down, Admiral Winnefeld. He said there could be a time, for the first time in his career, of instances where we will be asked to respond to a crisis and we will have to say we cannot.

I think that is the main thing, that you recognize that and you are, certainly, equipped to handle that, and I appreciate that very much.

Dr. JUNOR. Thank you.

Senator INHOFE. Ms. Wada, there has been a lot of discussion as to what we are doing with the Reserve component and changing around responsibilities between the regular Services and the Reserve component.

Have you been following that, in our defense authorization bill and the discussion that has surrounded that issue?

Ms. WADA. Yes, sir, I have.

Senator INHOFE. Do you have any thoughts about it? Are we going the right direction, in terms of shifting some of the responsibilities in order to meet the crisis that Dr. Junor is talking about? Do you think that we are going in the right direction?

Ms. WADA. In terms of—

Senator INHOFE. In terms of shifting responsibilities to and from the Reserve component to the regular?

Ms. WADA. Sure. Sir, the Secretary of the Army signed onto a total force policy. If confirmed, I would be responsible for implementing that policy.

Senator INHOFE. Yes, okay.

I notice, and I have addressed this to Ms. Ballentine and Dr. Regalbuto, in both of your titles, the word “environment” is there. I am not real sure how you divide that up? What areas of the environment do each of you have exclusive to the other?

Dr. REGALBUTO. I work for the Department of Energy, and the environmental component for DOE is exclusively for the cleanup of the legacy from the weapons production sites. It does not include environmental like the Environmental Protection Agency for other chemicals. It is exclusively for contaminated former weapons production sites.

Senator INHOFE. Okay. Do you have any comment on that, Ms. Ballentine? I think I understand from her response what your duties would be.

Ms. BALLENTINE. Yes, sir. My duties would be to oversee and create policy for all environmental laws for the Air Force.

Senator INHOFE. Okay, that is fine.

What I would ask of each of you is to be aware of the thing that we are talking about with Dr. Junor, the severity of the situation

that we are in right now. While there is always a temptation to use our resources, our very limited resources, in the military for the environmental agenda, resist that temptation as much as you can, and we will be watching and hope we can help you out in that respect, okay?

Ms. BALLENTINE. Thank you, sir.

Dr. REGALBUTO. We will. Thank you, sir.

Senator INHOFE. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Inhofe.

Dr. JUNOR, you have discussed the readiness shortfalls and the need to make sure that whenever we send our men and women into harm's way, that they are fully ready even though we may have a smaller force, that we are never going to send our forces into action unless they are fully ready and equipped. Would you agree that should be our goal?

Dr. JUNOR. Yes, sir.

Chairman LEVIN. One of the ways in which the funding is being shifted around a little bit this year, in order to try to reduce the pressure on readiness and to try to restore some of the readiness and modernization shortfalls created by the Budget Control Act and sequestration, which Congress approved, one of the ways that we are looking to try to reduce the impact of sequestration—and I think it was a terrible way to budget and we ought to get rid of it. But in any event, one of the ways we are looking at to reduce the impact is to save about \$31 billion in the budget request over the Future Years Defense Program (FYDP) in the area of personnel and health care costs. Are you familiar with that budget request?

Dr. JUNOR. I am.

Chairman LEVIN. Okay. If we delay enacting those proposals, it will cost the Department \$10 billion over the FYDP, if we delay it by 1 year. A 2-year delay in agreeing to those requests will cost about \$15 billion. That, of course, means it will be even harder to overcome some of the readiness and modernization shortfalls, which you have identified and Senator Inhofe has identified and I think all of us have identified.

Would you agree that we have to slow the growth of personnel costs, if we are going to buy back readiness and modernization shortfalls?

Dr. JUNOR. I do.

Chairman LEVIN. Okay. Our authorization bill slows some of those costs, not all of them, as requested, but at least we did some of them. We made an effort. I think we made some progress.

Now, in terms of sequestration, what would be the impact on the Department's ability to meet the national defense and strategic objectives if sequestration occurs again in fiscal year 2016?

Dr. JUNOR. It is my understanding that we could not meet the defense strategy.

Chairman LEVIN. Ms. Ballentine, you, for the last 5 years, served as Director of Sustainability, Renewable Energy, and Sustainable Facilities at Wal-Mart. Can you tell us what your experience is as to whether or not there are circumstances which make it very economically sensible for us to invest in energy conservation and alter-

native energy sources, and how those views are informed by your experience in the private sector?

Ms. BALLENTINE. Thank you, sir.

First of all, I would like to say that, if confirmed, I want to give my assurance to this committee that I would make every taxpayer dollar count in our installation management.

I do currently work for one of, if not the largest private energy consumer in the United States, and we have developed a strategy that emphasizes saving money in the energy portfolio as a way to contribute to our underlying mission of saving people money so they can live better.

There are really multiple elements to that. Energy conservation and energy efficiency, making every BTU [British Thermal Unit] count toward the mission, is job number one.

Renewable energy, we have found at Wal-Mart, can be a reliable, viable, and affordable piece of a broader energy puzzle.

I will tell you that Wal-Mart has more solar rooftops than any other company in this country, and every single one of those projects meets or beats brown power prices over the course of the contract.

Renewable energy does not work everywhere. It is really a piece of a broader puzzle.

Chairman LEVIN. Thank you.

Ms. WADA. I think we all deeply believe that servicemembers who are wounded or injured in combat operations deserve the highest priority from the Army and the Federal Government for support services; for healing and recuperation; rehabilitation; evaluation for return to duty; successful transition from Active Duty; if required, continuing support beyond retirement or discharge.

Now, despite the enactment of legislation, our Wounded Warriors legislation, and renewed emphasis over the past several years, there are a lot of challenges that remain.

First of all, I want to commend the Army for proactively providing the Department of Veterans Affairs (VA) with additional staff to help the VA process servicemembers through its portion of the integrated disability evaluation system more quickly.

Would you anticipate, if confirmed, continuing such collaboration?

Ms. WADA. Sir, yes. If confirmed, I will work with the Department of Veterans Affairs and the Secretary of the Army.

Chairman LEVIN. In the National Defense Authorization Act (NDAA) for Fiscal Year 2008, so that is 6 years ago now, Congress required the Department of Defense to utilize the VA schedule for rating disabilities. Do you know whether the Army is complying with that requirement?

Ms. WADA. Sir, I believe that the Army is complying with that requirement, but if confirmed, I will confirm that and respond back to the committee.

Chairman LEVIN. Thank you.

Let me ask now both Mr. Tanner and you, Ms. Wada, about the pilot program that the Air Force initiated to provide victims of sexual assault with their own attorney and to represent them during the investigation and prosecution of perpetrators.

This program has now been implemented by all the Military Services.

First, Mr. Tanner, you have been working on sexual assault prevention and response issues in the Air Force for several years. Were you involved in the development of the Air Force's pilot program to provide the special victim's counsel to victims of sexual assault?

Mr. TANNER. Yes, sir. If confirmed, I would look forward to continuing to assist the Air Force and advise the Air Force in the further development of its sexual assault program.

Chairman LEVIN. What is your assessment of that particular Special Victims' Counsel Program?

Mr. TANNER. My assessment is that it is a very successful program for several reasons, not the least of which is that it provides an arm for the commander to care for victims who may be in that commander's unit.

It is the role of the commander to not only hold certain members accountable for sexual assault, but also to care for victims of sexual assault within that commander's unit.

I believe a special victim's counsel not only provides a meaningful way for victims to be assisted throughout this process, but also healthy feedback to commanders of ways that the commander can improve the climate and the service to its members.

Chairman LEVIN. Ms. Wada, do you have a different view of it all, or do you agree with what Mr. Tanner said?

Ms. WADA. Sir, I understand that the Army has implemented the special victim counsel, according to the law. At this point, that is the extent of my knowledge as to the success.

Chairman LEVIN. All right. Will you find out for us and let us know?

Ms. WADA. Certainly, sir.

[The information referred to follows:]

Based upon information provided to me by the Army, the Special Victim Counsel (SVC) Program appears to be successful and well-received in providing legal representation to victims of sexual assault. The Army's SVC program has resulted in SVCs serving worldwide, including the U.S. Central Command's area of responsibility. These services are available to all victims, regardless of whether they file a restricted or unrestricted report. I have been informed that the feedback from victims and commanders is that this program is valuable in helping victims make informed decisions as they navigate the administrative, medical, and justice systems within the Army.

Chairman LEVIN. Thank you very much.

I am going to act as though I came first. I am going to call on another Democrat, who is next, so it will be Senator Hirono.

Senator HIRONO. Thank you, Mr. Chairman.

Ms. Ballentine, energy security in the Department of Defense and the Air Force are vitally important for our future. As we all know, DOD is the biggest user of energy of all of the departments.

As Assistant Secretary in this area, what initiatives will you pursue to continue sound energy conservation practices and ensure energy security for the future in the Air Force?

Ms. BALLENTINE. I understand that the Air Force has the largest energy bill within the Department of Defense, and that the Department of Defense has the largest energy bill within the U.S. Government.

Likewise, I happen to come from one of the largest private energy consumers. I think that putting mission first, there are really three areas to develop a comprehensive energy strategy that can drive down costs in our operations, as well as build some resilience.

First, fuel efficiency, making every BTU count. If we can accomplish a cargo mission in one sortie instead of two, that is a mission win.

Second and third kind of go together, fuel flexibility and fuel supply assurance. Having airplane engines that can fuel up on all different types of fuels anywhere in the world where they happen to be, and with any type of fuel that is available to them builds fuel flexibility.

Assurance of supply in the case of supply disruptions is also an important element of a comprehensive energy strategy, and something that we think about quite a lot in the private sector as well.

If confirmed in this position, one of my first orders of business would be to look across the portfolio of activities that have already been undertaken both within the Air Force and across the other branches, and accelerate those projects that are winning already today, saving us money and contributing to efficiency, flexibility, and supply assuredness.

Senator HIRONO. I am particularly intrigued by your fuel flexibility focus. Is the Air Force doing research and development (R&D) on alternative, sustainable kinds of fuels?

Ms. BALLENTINE. I am not currently familiar with the details of the R&D portfolio. If confirmed, it is something that I would look into.

I do understand that the engines are currently certified to fly on a number of different fuels.

Senator HIRONO. I think that is very important.

For Mr. Tanner, Chairman Levin asked you about your sexual assault prevention and response program, which I believe you said is working well. We want to make sure that the Department of Defense takes very seriously the changes that were in NDAA that addresses the issue of sexual assault.

Could you tell us where DOD is with regard to implementation of the changes that were made in NDAA on this issue?

Mr. TANNER. Senator, if confirmed, as the Air Force General Counsel, I would look forward to guiding the Air Force in its implementation of those changes. My sense is that the Air Force has made huge progress in its sexual assault program, but there is more to do, including changes in the NDAA.

I would look forward to working with the sexual assault prevention response team that has now been elevated to a direct report to the Vice Chief of Staff, so that it gains direct senior leadership interest in working with that team to implement those changes.

Senator HIRONO. I should have asked that broader question to Dr. Junor. What would be your priority in implementing the changes that we made in NDAA sexual assault treatment?

Dr. JUNOR. Yes, Senator. Our number one focus is on victim support, and so making sure that we have enacted and are successful in providing victim support and analyzing case data, for example, to see if our programs we have implemented are working the way they are supposed to.

I am also greatly interested in prevention, making sure that we know what the current climate is and that it is a climate of dignity and respect, and a climate where sexual harassment and sexual assault are unlikely to happen in the first place.

Finally, I'll be looking for ways to hold both commanders and perpetrators accountable for these incidents.

Senator HIRONO. I think the prevention aspect is one where I would really like to see more specific kinds of programs, because we know the alcohol is very much involved in these assaults. The prevention part of it, the command climate is very critical, so I will be probably following up with you on how that is going.

Ms. Wada, aloha.

That gives you an indication she is from Hawaii. [Laughter.]

With the Army facing significant end strength reductions from 520,000 to 490,000, drawdowns over the next several years, what are the most significant challenges as the Army reduces its total force? How will this impact future Army recruiting and retention?

Ms. WADA. If confirmed, I would work with the Secretary of Army to look at the balance between the reduction in force of the total force between the Active, National Guard, and Reserve.

At this time, there is a total force policy that the Secretary has laid out, and I think, though, that it would have to be addressed further since sequestration still exists.

Senator HIRONO. I have a question for Dr. Junor. At one point, the Departments of Defense and Veterans Affairs spent \$1 billion, basically, to have the DOD and VA medical records be much more compatible if not the same kind of system.

Where are we with that? The whole point of that is to make sure that, as the Active Duty person transitions to veteran status, that this information goes with him or her. With all of the emphasis on health care in the VA system, where are we with making those records compatible?

Dr. JUNOR. I believe that electronic health records is under the purview of the Under Secretary of Defense for Acquisition, Technology, and Logistics, at this point. I don't have the details, but I do understand that that is still in development.

The larger issue, even with the Integrated Disability Evaluation System (IDES) and with the service treatment records for folks who have already left and claimed disabilities, there is a larger issue of information-sharing between DOD, even within the Services within DOD, and then from DOD to VA. There is still a lot of work to be done there.

Improvements have been made. The IDES timeline is shorter than it was. It was about 1½ years and now it is down to just a little over a year, which is still too long.

But there is a lot of work to do. This is something that, if confirmed, I would consider a priority.

Senator HIRONO. Thank you.

My time is up.

Chairman LEVIN. Thank you very much, Senator Hirono.

Senator SESSIONS?

Senator SESSIONS. Thank you, Mr. Chairman. I appreciate this opportunity.

Thank all of you for being willing to serve. You are going to be taking office in a time of great national importance, and in a time when our budget is very tight. We don't have the money we have had. We are running unacceptable debts.

Interest on the debt last year was \$220 billion. That is almost half the defense budget.

But in just a few years, we are projected, I think by 2019, to have interest on the debt that passes the entire Defense Department budget, and the Congressional Budget Office says that it will reach \$876 billion in 1 year, interest, in 10 years from today.

I would just say that we are very anxious and concerned about your difficulties in trying to help the Defense Department manage effectively. But every department and agency will have to tighten its belt.

In my opinion, the Defense Department, to date, has undertaken more cuts than any other department in Government.

My question, first, would be to all of you. Do you understand the financial challenge we face? Will you do your best in managing your department to produce the needed capabilities for the Defense Department, while reducing costs, wherever possible?

Dr. JUNOR. Yes, sir.

Ms. WADA. Yes, sir.

Ms. BALLENTINE. Yes, sir.

Mr. TANNER. Yes, sir.

Dr. REGALBUTO. Yes, sir.

Senator SESSIONS. Thank you.

Ms. Ballentine, did you say "yes"?

Ms. BALLENTINE. Yes, sir.

Senator SESSIONS. Good. You are running a private business. I know you know there are limits to what you can spend.

Let me just say, Mr. Chairman, how much I respect Gordon Tanner's legal ability and skill. He has the background that we need for this office.

I have known him as a private practitioner in Mobile. I know his family. He has been in Washington for a number of years now. He is the former Principal Deputy Assistant Secretary of the Air Force for Manpower and Reserve Affairs. From 2012 to 2013, he was the Principal Deputy General Counsel of the Air Force and served in a variety of positions before that. He retired in March and then has been called back now after 27 years of service. He had many years in Air Force Reserve.

He came from an excellent law firm. Got his undergraduate degree at Alabama and his law degree at Vanderbilt.

Mrs. Tanner, his mother, is here. We lost his father, Mr. Cecil Tanner, a great American, last fall.

Mrs. Tanner, it is so great to see you.

Among other good qualities they have, they were wonderful Methodists, I have to say.

Mr. Chairman, I think that is the kind of background you look for in a position as important as General Counsel for the Air Force.

I have to get to the floor. I thank you all for your willingness to serve, and we are all going to be watching our dollars, aren't we?

Thank you so much.

Chairman LEVIN. Thank you very much, Senator Sessions.

Senator Kaine?

Senator KAINE. Thank you, Mr. Chairman.

Thank you to all the witnesses for your service.

Dr. Junor, I have some questions for you about personnel matters. One of my highest priorities as a member of the Armed Services Committee is working with my colleagues and folks at the Pentagon to try to tackle the veterans' unemployment rate.

Some work on that is done in the Veterans' Committee, but I tend to believe that a lot of the way we tackle veterans' unemployment is by what happens when folks are in Active service. In particular, I focused on issues surrounding credentialing of our military members for the skills they attain at the moment they attain them, on the theory that, in a Nation where only 1 percent of the people serve in the military, if you go into a hiring hall and say I was a gunnery sergeant in the Marine Corps, or petty officer, people will thank you for your service, but they won't necessarily know what skills and talents you bring to the table.

But if you can get a commercial driver's license or physician's assistant degree or a welding certificate, if you have an ordnance specialty, that can help you immediately get traction in the civilian workforce.

I want to ask you a little bit about that, because there is a lot of effort underway to make that happen, but there are some concerns that I have.

In your advance policy questions, you mentioned that tuition assistance, the current military tuition assistance program, can be used to pay for academic coursework that supports earning a credential or licensure when part of an improved academic degree plan.

My understanding is that tuition assistance benefit is up to about \$4,500 per fiscal year, if approved. Am I right about that?

Dr. JUNOR. I am actually not sure, but I can find out for the record for you.

[The information referred to follows:]

Tuition assistance is \$4,500 per fiscal year.

Senator KAINE. I think that is more or less the case.

But one of the things I have discovered in looking at this is this issue that you can only access the tuition assistance if it is part of approved academic degree plan.

Let me give you an example. At Fort Lee in Virginia, we train all these logistics specialists, in the ordnance school that is there. Ordnance school personnel in the Army take machining and ironworking and welding training.

It takes \$300 to pass the American Welding Society welding certificate exam. That is not an improved academic degree, but it is an accepted credential at any employer in the United States and with some international employers, as well.

Currently, under the military tuition assistance program, you can use \$4,500, I believe that number is correct, to take coursework at a community college or college, but you can't use \$300 to get a Welding Society certification that will enable you to get a job and probably earn more money than just about anything you could get with a degree from a community college.

One of the things I really want to work with you all on is the notion that certifications, technical certifications, they are not all part of academic degree programs.

Probably the best educational program, in my view, for the money in the United States is the shipbuilding apprenticeship program at the Newport News shipyard. These guys build nuclear subs and aircraft carriers. There is a 4-year program, which is 2 years in class and 2 years on the line, where you end up with a certificate, but no academic degree. But you can earn a great living for the rest of your life. There is a 5-year program where you get a community college degree, too.

But you couldn't use military tuition assistance benefits for the 4-year program, even though it is the kind of program that will help somebody get a job.

Can I work with you on this, to try to make sure, because it is not just within the Pentagon, but more generally, we give second-class status to career and technical education in this country, and we have done it for very long time.

I see it in the K-12 world, and I see it in the higher ed world. But I am also seeing it within DOD. I would like to work with you to try to erase any second-class stigma around career and technical education.

The certification has to be a validated one. We don't want to give tuition assistance benefits for certifications that don't mean anything. But for things like Culinary Institute of America, most of the folks who train at Fort Lee as chefs and cooks are now getting training that they can convert into a Culinary Institute of America certification. That is not an approved academic degree program, but I can assure you, with that certificate, you can get a job just about anywhere.

I would love to work with you on that initiative in your new position.

Dr. JUNOR. Sir, I would be honored to. Like you, I absolutely value tradecraft, and there are so many empty jobs in this country for tradesmen that we cannot fill and this would be an excellent opportunity for many of our servicemembers. I would absolutely love to work with you on this.

Senator KAINE. Great. This affects veterans' benefits as well. The G.I. Bill, you can use them for colleges. If you wanted to take a code academic course and learn to be a computer coder, you can't use the benefits for that.

Again, I think we have to break down some old notions about what is a valid kind of credential.

The mission should be, if it helps you get a meaningful job faster, and it is validated, then it ought to be accessible to military members who want to choose it. I look forward to working with you on that.

I want to ask you a question, Mr. Tanner, about the special victims' counsel pilot project within the Air Force that is now being used more broadly as a result of the NDAA reforms that we have done.

In particular, I am curious about your experience about the interaction of the Special Victims' Counsel Program with the creation, with the support of Congress, of the restricted report that

can be filed. Generally, someone complaining about crime within a military context files a complaint and it is a unrestricted complaint, and that enables an investigation to go forward and a perpetrator to be punished.

Because of the unique nature of crimes of sexual violence or sexual assault, we created a restricted report where somebody can seek help and get assistance they need, without necessarily saying they want the investigation to go forward.

I understood from some testimony earlier from folks associated with the Air Force that, at least preliminarily, there is some evidence that if somebody gets a special victims' counsel who can walk them through the process and explain their rights and explain what is going to happen, it actually leads many who file restricted complaints to decide "Okay, I am now comfortable enough with the process, and I know that I am protected from retaliation, that I am able to move from a restricted into an unrestricted complaint," which is better in terms of being able to go after a perpetrator, and hopefully stop that individual from perpetrating assaults on others.

This is a number of months ago that there was that discussion. Am I generally right about that? What are you seeing about the restricted/unrestricted complaint filings? Is the special victims' counsel assistance making a difference in that?

Mr. TANNER. Yes, sir. Your recollection is correct.

I believe there are two factors that are affecting an increase in reporting, overall.

The Air Force in fiscal year 2013 reported a 33 percent increase in total reporting, in restricted and unrestricted. The Air Force, I understand, believes that that is due to two things. First is the Special Victims' Counsel Program, which was implemented at that time, which created greater confidence on the part of the victim in the process and protections within the system. Second, I believe the Air Force is committed to enhanced training of all of its members, including its most senior commanders.

The fact that more people understand the program and the Air Force's commitment to solving this problem, I believe that has created a climate in which reporting has been increased. Again, in fiscal year 2013, not only did we see a 33 percent increase in overall reporting, but we saw a 41 percent increase in unrestricted reporting.

To your point, some of that was due to those who had previously filed restricted reports and converted those to unrestricted, which enabled us to then pursue those parties that may be accountable for that. But it is also due to increased training.

Senator KAINE. Great. Thank you very much.

Thank you very much, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Kaine.

Senator Ayotte?

Senator AYOTTE. Thank you, Mr. Chairman.

Let me just say that I fully agree with Senator Kaine about this technical careers issue in terms of the trades, because we see it in New Hampshire. There are a lot of jobs that are open, and it makes sense that our veterans can have the opportunity to get this training in our military, because we have such a need in our workforce for this, and there are very good paying jobs. I want to thank

you for raising that issue, and I hope that we do change that, so that we can really give veterans the opportunity that really fits our workforce as well. It is fantastic. Thank you.

Mr. Tanner, I wanted to ask you, in the position as General Counsel to the Air Force, obviously, your primary responsibility is to advise the Air Force and to comply with the laws that Congress puts together.

You would agree, correct?

Mr. TANNER. Yes, that is correct.

Senator AYOTTE. There is a law that was passed in the 2014 defense authorization that said that the Department of Defense may not retire, prepare to retire, or place in storage A-10 aircraft before December 31, 2014.

Are you familiar with the provision?

Mr. TANNER. I was not in the General Counsel's office at the time of that enactment. I am generally familiar with it, but have given no advice, nor have I studied that provision.

Senator AYOTTE. If you are confirmed to this position, you will have to give advice to comply with all of our laws. This law says that the Department of Defense can't retire, prepare to retire, or place in storage, A-10 aircraft, not just by the end of the fiscal year, but by the end of the actual calendar year.

In fact, myself and Senator Chambliss have written Secretary James twice, because we keep receiving numerous reports of efforts by the Air Force to actually make steps to retire, prepare to retire, or place in storage, in our view, the A-10 aircraft before Congress has made its decision on what it will do with the A-10.

It is probably no secret, I am a strong supporter of the A-10. I believe it is the best close air support platform. But this is a debate that has been happening in Congress.

We have written Secretary James on January 24 of this year, on April 4 of this year, on a variety of issues that have been brought to our attention, that we believed were in violation of the law.

Secretary James has written back to us, and I appreciate that. In one instance, at least, she has said, in responding to our concerns, that she would not implement some of the changes that were being made through the budget year.

But as the new potential General Counsel, I would ask you to really look at the fact that the law doesn't just say that. It says through the calendar year.

Now if Congress acts differently, then obviously you will take that into account. But will you commit to me to carefully review that law and to follow it?

Mr. TANNER. Yes, ma'am. As General Counsel, it is my job to ensure that the Air Force fully complies with the plain meaning of the laws and regulations by which it is bound, and to advise its senior leadership on what compliance with those laws really means.

Senator AYOTTE. Thank you. I appreciate it, because I can assure you, we will be watching.

I wanted to also ask you about the special victims' counsel. We have now extended that throughout all the Service branches. You said that you have had a good experience in the Air Force, which is really what led our committee to extend the special victims'

counsel. I was honored to work on that with Senator Murray, as well, across the branches.

Have you had contact with your other counterparts in the other branches? Because it is my sense that they are going to be coming to the Air Force for advice on how to properly implement this provision. Can you give us some insight on that?

Mr. TANNER. I have not had any contact with my counterparts in the other Services, as I had retired in early spring. But, if confirmed for the position of General Counsel of Air Force, I would look forward to working with my colleagues in the other Services and share with them the lessons learned from the successful implementation of the Special Victims' Counsel Program in the Air Force.

Senator AYOTTE. That would be great. I think it would be important because, really, the Air Force has been the leader on this issue. Now we are going to be applying this program across the branches, so your advice will be needed to help the other branches on this, to make sure that every victim of sexual assault has their own counsel and has that advocate within the system to ensure that their rights are protected within the system, so it is important.

Mr. TANNER. If I am confirmed, I will look forward to doing that.

Senator AYOTTE. Thank you.

Now, I just wanted to say, finally, Ms. Ballentine, as you may be aware, Pease Air National Guard Base was selected to be the first Air National Guard base to receive the new KC-46A. We are very proud of that.

It is pending a successful outcome of the environmental impact study. We had Secretary James up to visit the 157th Air Refueling Wing in May and to show her what we are doing at Pease.

The Air Force issued the environmental impact study for the second main operation of the KC-46 beddown this month. There weren't any significant issues identified.

I just want to say to you, if confirmed, I look forward to working with you to base the KC-46A, the beddown, as the first Air National Guard unit in the country at Pease.

We look forward to working with you, because I think that the new tanker is one of the success stories we have of how important it is to replace our Eisenhower-era tankers for the country.

Our refueling capability really distinguishes us from other military and air forces. A lot of things distinguish us in terms of our Air Force compared to the world, but our refueling capability in the conflicts that we have been involved in has really stood out. I look forward to working with you on that.

Ms. BALLENTINE. Thank you, Senator. If confirmed, I would look forward to working with you as well.

Senator AYOTTE. Thank you all. I appreciate it.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Donnelly?

Senator DONNELLY. Thank you, Mr. Chairman.

Thanks to all of you for stepping up and serving our country. It is very important to all of us.

Dr. Junor, the most recent Department of Defense suicide report found we lost 522 servicemembers to suicide in 2012. You have

noted that the average Active Duty servicemember gets to see a mental health professional about once a year.

I introduced legislation earlier this year that ensures that this average becomes a minimum, not only for Active Duty, but for Guard and Reserve.

I was wondering what your plans are for easing access to quality care for members of the Guard and Reserve?

Dr. JUNOR. Sir, this is a huge priority. The Guard and Reserve suicide continues to be a problem. Even last year, when our numbers were slightly better, we still had a downward turn in Guard and Reserve.

The peer support, the homegrown, the State-based peer support initiatives, are some that have been very helpful, especially in the sense that it is a brotherhood. It is somebody who knows your problem, and so it helps reduce the stigma.

The stigma reduction is another big issue that we are having to face.

Then when it comes to just access to care, I think the Department has increased the number of behavioral health providers, but I am still concerned about whether it is enough.

These are all issues I would like to address, if confirmed.

Senator DONNELLY. The other question I wanted to ask you is how can we increase the role of frontline supervisors, more peer-to-peer information?

As we discussed before, I had met with the Israeli defense forces, and they said one of the keys is a bottom-up approach, where more of the squad leaders, platoon leaders, get to see that.

I was wondering about your ideas on the kind of plans we can use to have more frontline supervisors' help in this process.

Dr. JUNOR. One of our initiatives is going to have to be, and I think we are moving in this direction, is going to have to be ensuring that frontline leaders recognize what signs of stress are and cultivate a climate that will encourage help-seeking behavior.

There are probably 180 or so programs, DOD-wide. A fair amount of them are trying to provide this type of training.

Senator DONNELLY. One part of the legislation is that we try to figure out what are the best practices of all of those, and that we hone in on those, as opposed to just running on 180 willy-nilly.

Dr. JUNOR. They were all born for the right reasons.

Senator DONNELLY. Exactly.

Dr. JUNOR. But you are right. We have to figure out what is working, what is not, and hone in on them.

You are very right, going back to that garrison mindset that we had before these complex conflicts, where commanders knew the folks under their command, almost like a family relationship, and so they knew signs of stress early on and were able to encourage that help-seeking behavior. I think that is what we are all looking to go back to.

Times have changed. The millennials are different. But I think we are moving in that direction.

Senator DONNELLY. Thank you.

Ms. Wada, thank you for being here. I was fortunate enough to serve with Ms. Wada over at the House. We worked together, trav-

eled overseas to see our troops together. I want to thank you for your efforts here.

Having that background, how critical do you think it is to ensure transparency and timeliness in your dealings with this committee and with Congress? Can we count on you to do that?

Ms. WADA. Sir, you certainly can.

Senator DONNELLY. Okay. Additionally, one of the things that we have been blessed with is having military fellows in our office. This year we have an Army fellow who is a noncommissioned officer. In a town where there are so many officers, it is a refreshing perspective to have.

We were wondering about the Army's commitment to trying to have a real diverse group of people be part of the fellows program.

Ms. WADA. Sir, if confirmed, I understand that the Army has initiated a diverse fellowship program, and I would assume that it would continue.

Senator DONNELLY. Okay.

One other question for you, and that is, how do we maintain a high level of readiness in the Guard as we go through decreasing budgets, decreasing deployments? You have this balancing act, and how do we keep our Guard sharp and ready at the same time that we balance the needs of the Army?

Ms. WADA. Sir, at this point, I am not sure that I could answer that question specifically. If confirmed, I think I would say that I would work with the Secretary, obviously, the Secretary of Defense, and Congress to make sure we have a balanced approach to our Armed Forces, to make sure it is a comprehensive total force.

Senator DONNELLY. I think you are going to see in this position that that is one of the things you will be spending an amazing amount of time on, trying to get that right, and trying to make sure that we take a forward look at what we are going to need, how we are going to implement, how do we use our Guard and Reserves after these many, many years.

We have great confidence in your ability to do that, but I think that is going to be a big portion of your time.

Mr. Tanner, I wanted to ask you about privacy protection for servicemembers seeking mental health support.

One of the concerns that servicemembers have had over the years is, if they go seek to talk to somebody, feel like they are having some personal challenges, there has been a real hesitancy to do that, thinking, "I might not be able to get to the next step in the rung on promotion. People may look at me a little different."

You have a unique position that can have an effect on this, so I was wondering your views on how we maintain the privacy protection of our servicemembers while still making sure that they are willing to talk to us to seek help.

Mr. TANNER. The Air Force encourages its members who are dealing with tough issues, whether they are mental health issues or other related issues, to seek counsel and advice from peers, from trained professionals, from its leaders.

If confirmed, I would work very hard with the Air Force leadership to ensure that not only are all current laws fully enforced, and that there be training on those laws about privacy protections for

members and, in some instances, their dependents, but to enhance those to encourage that full and free flow of information.

Senator DONNELLY. The last thing we want to see is somebody who is struggling be hesitant to seek help, because they are worried about, "Will people start to look at me sideways because of this?"

My feeling is, if they are struggling and they go seek help, that is a positive thing, as opposed to any type of black mark on their career.

Mr. TANNER. Yes, sir. If confirmed, I would look forward to working with you and this committee, if changes were necessary to the present law to increase the opportunity for that engagement.

Senator DONNELLY. Great.

In conclusion, I want to thank all of you again for stepping up to serve your country.

To all the families, thank you for your family's sacrifices. This is very, very important work you are going to be doing.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Donnelly.

We are all set?

Okay, we thank you all for your testimony, for your willingness to serve, for your patriotism, for your family's support. We thank them, including some children who were attempting very hard to look interested. [Laughter.]

Chairman LEVIN. It is really important, and I hope the kids understand how important it is that they be here, and how grateful their mom is for their being here today.

Now if they are here instead of school, then maybe I will be less flattering. But my hunch is they are done with school for the year, is that correct?

Senator DONNELLY. Mr. Chairman, do you have authority to write a note, just in case? [Laughter.]

Chairman LEVIN. I think you just gave me authority to write a note, just in case. I don't know if I have it, but I do now.

Thank you all, and we will stand adjourned.

[Whereupon, at 10:51 a.m., the committee adjourned.]

[Prepared questions submitted to Dr. Laura J. Junor by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? Answer. I do not see the need for any modifications. I believe that the Goldwater-Nichols Act has significantly contributed to the strong framework for today's joint warfighting capabilities. It has considerably improved interservice and joint relationships, promoting greater effectiveness of the military departments and combatant commands.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Currently I am unaware of any areas where modifications are needed. If I am confirmed, I will continue to assess any further need to legislative modifications.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. For the last 3 years I have served as the Deputy Assistant Secretary of Defense for Readiness. In this capacity, my primary responsibility is to ensure that our military is effectively manned, trained, and equipped to safely and effectively perform its assigned missions.

I've spent the last 20 years of my career specifically focused on understanding and managing military readiness. I've been part of the build-up of conflicts in two theaters, and the drawdowns of both. In addition, I gathered experience understanding some of the issues facing the Reserve component. I spent several years after Hurricane Katrina supporting the Department of Homeland Security, the National Guard Bureau, and the National Guards of several States understanding and effectively articulating the Nation's preparedness for responding to a homeland crisis.

I also understand, and have seen empirically that there is no greater readiness determinant than the quality of our force. Effectively recruiting and retaining a superior military and civilian workforce is our single most effective hedge against a host of negative factors. In that sense, the opportunity to more directly influence the policies supporting these men and women will be a natural extension of my efforts to create a ready and resilient force.

I began my career in readiness as an analyst at the Center for Naval Analyses in 1994 and have also served previously as a readiness analyst in the Office of the Secretary of Defense (OSD). I am an economist both by training and practice and favor an analytic approach to most problems. This perspective serves me well in providing defensible and reproducible means for solving even the most complex problems. My work has directly influenced policy on a range of topics including spares and maintenance, aviation training, contingency sourcing, recruiting and retention, and response options for domestic emergencies.

I was born a military dependent and married a naval officer. In that sense I am familiar with the scope of issues facing military families, and am sensitive to the unique circumstances, challenges, and sacrifices made as part of the commitment to service to our Nation.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Principal Deputy Under Secretary of Defense for Personnel and Readiness (USD(P&R))?

Answer. The Office of the USD(P&R) oversees one of the most complex and diverse portfolios in the Department. We are responsible for servicemember support from recruiting, educating, health care, transitioning, and retirement. During this Service lifecycle, we educate military children and care for families through child care, healthcare, on-base schools, commissaries, and morale, welfare and recreation services. Each of these areas will be affected by budget choices and will subsequently affect the lives of our servicemembers.

The Department is facing a host of challenges, but no matter is more urgent than resolving the critical issues of sexual assault, suicide prevention, and the treatment of the spectrum of mental/behavioral health disorders—especially those that are a product of the wars we've been in for the last 13 years. These issues not only matter on moral and compassionate grounds, but they threaten our ability to generate resilient, cohesive, and predictably ready units.

The Department must also prepare for the likelihood of a more competitive labor market not just in highly technical fields like space and cyber, but also in high-demand fields like special operations, aviation, and the range of health services. In doing so, we must continue to evolve how we manage, compensate, and support our workforce so that we can attract, recruit, and retain an exceptionally qualified force.

The Department is also in the midst of a profound transition from the longest war in our Nation's history. For the last decade, the vast majority of our force generation capabilities have been uniquely focused on meeting the intense demand for counterinsurgency and irregular warfare missions, and for that mission, we have been exceptionally prepared. The cost of this sustainment, however, has been our ability to maintain the full-spectrum capabilities required for a high-end conflict. It will take considerable time and focused investment to regrow these capabilities. This is chal-

lenging under any circumstance, but it is especially difficult in a fiscally austere environment. The competition for resources should not degrade our ability to respond to conflicts that threaten the safety of our Nation and those who took an oath to defend it.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. Acting Under Secretary Wright, Secretary Hagel, and Deputy Secretary Work have clearly said that addressing the challenges identified above are among their highest priorities. If confirmed, I will support those initiatives. For example, I look forward to supporting Secretary Hagel's and Acting Under Secretary Wright's proactive, individual-focused, and multi-disciplinary approach to supporting victims of sexual assault. I also strongly support the Department's plans to intensify efforts to prevent these crimes in the first place. Similarly, I would be proud to support ongoing efforts in the area of suicide prevention and providing help for those suffering from post-traumatic stress disorder. Those efforts include getting in front of the problem by building resilience and coping skills that target risk factors; furthering our understanding through data and analysis, ensuring front line leaders create a climate that encourages members to seek help, and improving access to quality care.

If confirmed, I also look forward to the findings of the Military Compensation and Retirement Modernization Commission and supporting a comprehensive approach to providing benefits and support to our servicemembers. A comprehensive approach would recognize the criticality of providing the training and equipment they need to come home as well as reflects the realities of a competitive and evolving labor market and the immense sacrifices already paid by those in our ranks. In the course of my current responsibilities, I am already deeply committed to evolving our military capabilities from the wars we've been in to a broader and less certain set of requirements that we will inevitably face—all without forgetting the hard fought lessons of our past. If confirmed, I look forward to expanding this work to include a deeper understanding of how to protect our most valuable asset: the quality of our workforce.

I understand the power of collaboration, both within and outside the building. I have a track record of transparent, inclusive, and cooperative approaches to resolving issues. I intend to continue this practice by working closely with Congress, colleagues in OSD, the Joint Staff, the Services, other governmental agencies, and advocacy groups.

DUTIES

Question. Section 136a of title 10, U.S.C., provides that the Principal Deputy USD(P&R) shall assist the USD(P&R) in the performance of his or her duties.

Assuming you are confirmed, what duties do you expect to be assigned to you?

Answer. If confirmed, I intend to carry out my responsibilities, functions, relationships, and authorities, in accordance with the law and consistent with DOD Directive 5124.08, "Principal Deputy Under Secretary of Defense for Personnel and Readiness." Under the direction of the USD(P&R), I would support with all responsibilities in providing staff advice and assistance to the Secretary of Defense, including but not limited to Total Force management; National Guard and Reserve component affairs; health affairs; readiness and training; military and civilian personnel requirements; language; dependents' education; equal opportunity; morale, welfare, and recreation; and quality-of-life matters.

Question. In carrying out these duties, what would be your relationship with the following officials:

The Secretary of Defense.

Answer. If confirmed, I expect the Secretary of Defense to assign me my duties, through the USD(P&R), functions, and responsibilities currently mandated by law and specified in the Department's directives for the position of Principal Deputy Under Secretary of Defense for Personnel and Readiness.

Question. The Deputy Secretary of Defense.

Answer. If confirmed, I would expect my relationship with the Deputy Secretary to be fundamentally the same as that with the Secretary of Defense.

Question. The Assistant Secretary of Defense for Health Affairs (ASD(HA)).

Answer. If I am confirmed, the ASD(HA) would be my principal advisor for all DOD health policies, programs, and force health protection activities.

Question. The Assistant Secretary of Defense for Reserve Affairs (ASD(RA)).

Answer. If I am confirmed, the ASD(RA) would be my principal advisor for all Reserve component matters in the Department of Defense (DOD).

Question. The Department of Defense General Counsel.

Answer. If confirmed, I would anticipate regular communication, coordination of actions, and exchange of views with the General Counsel and the attorneys assigned to focus on personnel and readiness policy matters. I would expect to seek and follow the advice of the General Counsel on legal, policy, and procedural matters pertaining to the policies promulgated from the USD(P&R).

Question. The Department of Defense Inspector General.

Answer. The DOD Inspector General is in charge of promoting integrity, accountability, and improvement of DOD personnel, programs and operations to support the Department's mission and serve the public interest. If confirmed, I will fully assist in any investigations or issues that relate to personnel and readiness.

Question. The Service Secretaries.

Answer. If confirmed, I would hope to work closely with the Secretaries of the military departments on all matters relating to the management, well-being, and readiness of military and civilian personnel in the DOD Total Force structure.

Question. The Chief of the National Guard Bureau.

Answer. The Chief, National Guard Bureau is a principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff, on matters involving non-Federalized National Guard forces and on other matters as determined by the Secretary of Defense. If confirmed, I would work through ASD(RA) to ensure effective integration of National Guard capabilities into a cohesive Total Force.

Question. The Assistant Secretaries for Manpower and Reserve Affairs of the Army, Navy, and Air Force.

Answer. If confirmed, I would intend to further strengthen the partnership with these officials in carrying out the human resource obligations of the Services for the Total Force.

Question. The Deputy Chiefs of Staff of the Army and Air Force for Personnel, the Chief of Naval Personnel, and the Deputy Commandant of the Marine Corps for Manpower and Reserve Affairs.

Answer. If confirmed, I intend to partner in effective working relationships with these officers to ensure that DOD attracts, motivates, and retains the quality people it needs.

Question. The combatant commanders.

Answer. If confirmed, I would foster mutually respectful working relationships that translate into providing the Total Force capabilities and readiness needed to complete combat missions.

Question. The Joint Staff, particularly the Director for Manpower and Personnel (J-1).

Answer. If confirmed, I would seek a close coordinating relationship and open channels of communication with the Joint Staff regarding personnel and readiness policy issues.

SYSTEMS AND SUPPORT FOR WOUNDED WARRIORS

Question. Servicemembers and civilians who are wounded or injured in combat operations deserve the highest priority from their Service and the Federal Government for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support after retirement or discharge. Despite the enactment of legislation and renewed emphasis over the past several years, many challenges remain.

What is your assessment of the progress made to date by DOD and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. The Department has made progress by actively working with the Department of Veterans Affairs (VA) to establish joint policy guidance, processes, and metrics for coordination. However, there is still more work to do. If confirmed, I will ensure we will continue to work toward a seamless transition from recovery to reintegration or transition for our wounded, ill or injured. Additionally, I will continue the Department's collaborative efforts with the VA on compensation and benefits, transition assistance and care coordination. If confirmed, I would look forward to working with Congress on this critical issue.

Question. What are the strengths upon which continued progress should be based?

Answer. Our covenant with our wounded warriors and their families is perhaps one of the Department's greatest strengths, and one that we must continue to build upon. This commitment must guide our efforts to refine care and case management, including how to continue improving all aspects of the process online to reduce complexity and processing times.

Question. What are the weaknesses that need to be corrected?

Answer. Going forward we'll need to figure out how to accommodate the unique needs of each Service and be able to scale our support based on the evolving needs of our servicemembers. As we reduce our combat operations, we must ensure that we do not lose the capabilities and capacity to provide that support.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded servicemembers and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. Caring for and supporting servicemembers and their families will always be a top priority for the Department. If confirmed, I will work to execute this core mission of the Office of the USD(P&R), continually evaluating our programs and efforts, examining what resourcing and authorities are needed to further that goal. Linking efforts with community-based resources continues to be vital to ensure full re-integration into civilian life.

Question. Studies conducted as a result of the revelations at Walter Reed Army Medical Center in 2007 pointed to the need to reform the disability evaluation system. The Integrated DES (IDES) program was established to integrate the DOD and Department of Veterans Affairs (VA) disability systems to improve and expedite processing of servicemembers through the disability evaluation system. While the processing times under the IDES were initially encouraging, servicemembers are now mired in long VA disability rating and case disposition wait times, and the VA's portion of the system appears to be overloaded.

What is your assessment of the need to further streamline and improve the IDES?

Answer. DOD continually evaluates IDES to identify and implement process improvements. DOD completed an initial congressional study on the feasibility of a Consolidated Disability Evaluation System in 2013. An additional key initiative underway is the development of a joint IT solution to provide new capabilities that will support end-to-end IDES case management—tracking, reporting, and electronic case file transfer. If confirmed, we will continue to work with VA to ensure system interface requirements are identified and planned for, from conception to deployment.

Question. If confirmed, how will you address any need for change?

Answer. We will continue to work toward a more efficient IDES by engaging senior leadership within OSD and the Services, as well as capitalizing on information and recommendations presented to us by the Department of Defense Task Force on the Care, Management, and Transition of Recovering Wounded, Ill, and Injured Members of the Armed Forces, Government Accountability Office, and Military Department Inspector Generals. Most importantly, if confirmed, I will hear directly from the servicemembers themselves going through the IDES process. Where there are redundancies or gaps that need to be addressed by changing policy, we will do so. We will continue to collaborate with our VA partners to identify necessary changes and appropriately address them.

Question. If confirmed, what role would you expect to play in ensuring that the Departments of Defense and Veterans Affairs (VA) achieve the administration's objectives in DOD and VA collaboration?

Answer. If confirmed, I will continue the partnership efforts embraced by Acting Secretary Wright and her VA counterpart. I will ensure the DOD continues to work closely with VA in supporting our men and women in uniform and their families, and our Veterans. I will continue the DOD's engagement with VA to consider a complete range of issues as we seek process improvements and information exchanges, and use of key enablers to provide a seamless lifetime experience for our Service men and women, and our Veterans.

VOLUNTARY EDUCATION PROGRAMS

Question. The Department continues to seek ways to improve oversight of its tuition assistance programs, including standardizing eligibility criteria among the Services and requiring all schools who accept tuition assistance funding, whether for online courses or on-post, to sign a Memorandum of Understanding with the Department which will, among other things, subject online schools to Departmental audits.

What is your assessment of the tuition assistance program in light of the needs of the Services and the current budget environment?

Answer. The Tuition Assistance program is important to DOD because it enables off-duty professional and personal academic development of our servicemembers. It has the added benefit of facilitating their transition to the civilian workforce when they are ready to leave the military. If confirmed, I will continue the work with the Services to sustain the appropriate level of resources for this program.

Question. What is your view of tuition assistance as a transition benefit for servicemembers to obtain civilian licenses and credentials?

Answer. Tuition Assistance (TA) is a very valuable tool in assisting servicemembers to earn civilian licenses and credentials prior to separation from military service. TA can be used to pay for academic coursework that supports earning a credential or licensure when part of an approved academic degree plan. Furthermore, earning a professional credential or license broadens servicemembers' occupational knowledge and furthers their contribution to the military "profession of arms". If confirmed, I look forward to working with the military departments to increase opportunities for servicemembers to use their tuition assistance.

Question. What is your view of proposed changes to the so-called 90/10 rule that would require academic institutions to derive no more than 85 percent of their revenue from Federal sources, including DOD tuition assistance and VA GI Bill funding?

Answer. I have no objection to the proposal to include title 10 Tuition Assistance funds in the Federal portion of the 90/10 calculation. However, it would be appropriate that any statutory changes to the proposed 90/10 rule reside with the Department of Education.

RELIGIOUS GUIDELINES

Question. In your view, do DOD policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other beliefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. In my view, current DOD policies appropriately accommodate the free exercise of religion for all servicemembers. The Department respects and supports, by its policy, the rights of servicemembers to their own religious beliefs, including the right to hold no beliefs.

Question. In your view, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Existing DOD policies provide military chaplains with the guidance to allow prayer in accordance with the tenets of their faith, while respecting, in both formal and informal settings, the rights of others who may hold different or no religious beliefs. The Chaplaincies of the Military Departments train and equip chaplains with the knowledge and skills to fulfill this responsibility. Specifically, the Department protects, and supports by its policy, the rights of a chaplain to refuse, without any adverse action, any duty that is contrary to his or her conscience, moral principles or religious beliefs.

Question. Section 533 of the National Defense Authorization Act (NDAA) for Fiscal Year 2013 (P.L. 112-239), as amended by section 532 of the NDAA for Fiscal Year 2014 (P.L. 113-66) protects rights of conscience of members of the Armed Forces and chaplains of such members, and prohibits, so far as possible, use of such beliefs as the basis of any adverse personnel action, discrimination, or denial of promotion, schooling, training, or assignment. Members of some religious denominations have sincerely held beliefs in opposition to same-sex marriage.

In your view, may a member of the Armed Forces who has a sincerely held belief in opposition to same-sex marriage be subject to adverse personnel action or similar other adverse action, if he or she shares those personal views on the subject in a personal capacity?

Answer. No. Servicemembers are entitled to express their personal views in personal conversations. However, servicemembers speaking in their official capacities are expected not to use their positions as a forum to express their personal views, especially when dealing with subordinates.

READINESS RESPONSIBILITIES

Question. Section 136 of title 10, U.S.C., gives the Under Secretary of Defense for Personnel and Readiness certain responsibilities for military readiness. Some important issues that affect military readiness, however, such as logistics and materiel readiness, have been placed under the jurisdiction of the Under Secretary for Acquisition, Technology, and Logistics.

What is your assessment of the impacts and challenges to DOD readiness as a result of sequestration?

Answer. The sequester-imposed cuts in fiscal year 2013, coupled with having to operate under a 6-month continuing resolution, contributed to degraded readiness and hindered our initial readiness recovery plans. In addition, sequestration impacted the DOD's ability to generate the ready forces necessary to meet the require-

ments of a rapidly evolving and complex security environment. Although we are meeting current operational requirements with well trained and equipped units, this is getting more difficult. The brunt of the sequester effects our ability to generate forces to meet contingency surge requirements. This is a serious concern. Some of these effects will take considerable time and resources to reverse. The Secretary has stated for the record that sequestration-level funding limits would yield a force that is too small and not ready enough to meet the Nation's security objectives.

Question. What is your assessment of the current readiness of our Armed Forces to execute the National Military Strategy?

Answer. The investments made in our Armed Forces have helped maintain our military's standing as the most formidable force in the world. We remain able to meet the most critical ongoing operational and presence requirements that the Nation asks of us, however this is getting more difficult as we continue to feel the after-effects of sequester and more than a decade of war. What is at risk is our ability to generate the surge required for a high-end emergent crisis and this is a serious concern.

Question. In your view, what are the most significant challenges to the current readiness of our Armed Forces?

Answer. The defense strategy outlines three primary pillars—defend the homeland, build security globally, and project power and win decisively when called upon.

The most significant challenge is that current budget constraints and the after-effects of sequestration will inhibit the Services' efforts to regain full-spectrum readiness in order to successfully meet the tenets of the defense strategy.

The Services made deliberate plans to shift from counterinsurgency-focused operations to address more globalized, full spectrum warfighter requirements, but those plans will require time and consistent funding to materialize. A return to Budget Control Act levels of funding in fiscal year 2016 and beyond will put readiness recovery at risk. Specifically, training opportunities and equipment condition are our primary concerns in preserving readiness across the force.

Question. What is your understanding of the responsibilities of the Under Secretary of Defense for Personnel and Readiness and relationship to the Assistant Secretary of Defense for Logistics and Materiel Readiness in ensuring military readiness, including materiel readiness?

Answer. One of the responsibilities of the USD(P&R) is to oversee the total readiness of the force. There are many pipelines across the Department that come together to create readiness. The Assistant Secretary of Defense for Logistics and Materiel Readiness oversees a critical portion of the readiness pipelines. Total force readiness depends on materiel readiness and logistics. We have a strong working relationship that I currently enjoy and will absolutely maintain. If confirmed, I will continue to build this relationship and thereby build a greater understanding of readiness across the Department.

Question. What are the most critical objectives to improve readiness reporting and monitoring of the military forces, and if confirmed, how would you work with the Military Departments as well as other OSD offices to achieve them?

Answer. Although monitoring the status of unit readiness and how that fits into overall joint readiness is important, the most critical element of readiness management is the ability to monitor the health of the pipelines that support it. Metrics in these areas provide a more complete picture of readiness as well as provide key indicators that are essential to forecasting readiness problems. In my current capacity, I have overseen dramatic improvements in the Department's ability to monitor readiness along these lines.

If confirmed, I will continue my close partnership with the Services, the Joint Staff, the combatant commanders, and other OSD partners to systematically monitor these pipelines, articulate the likely operational consequences, and provide mitigation options.

Question. Do you believe the current system adequately sets and documents standards for military readiness and provides for timely, accurate readiness reporting to establish necessary confidence that our regular and Reserve Forces are not only "ready with what" but "ready for what"?

Answer. Yes. The Defense Readiness Reporting System directly addresses the "ready for what" question by focusing on mission capability as expressed by a units' mission essential task list. It assesses the readiness of all organizations throughout the Department to perform not only their high end combat mission but also their assigned missions such as counterinsurgency or disaster relief and humanitarian assistance.

Question. What do you believe is the role of the Under Secretary of Defense for Personnel and Readiness in advocating for Readiness resources during the DOD

budget build process. Do you believe that the appropriate level of resources are being allocated to readiness accounts?

Answer. The USD(P&R), as the Department's lead readiness advocate, provides direct input to the budget build process each year. It is our responsibility to monitor the Services' ability to generate ready forces and the combatant commanders' ability to execute assigned priority plans and ongoing operations. In keeping with this responsibility, USD(P&R) must understand and clearly articulate the consequence of readiness degradations and what is causing them. The USD(P&R) is also responsible for providing a complete range of mitigation options as part of the Department's formal program budget review process. This responsibility benefits from constant collaboration with the Joint Staff, the Services, as well as other offices within OSD.

Thanks to congressional action to raise the discretionary caps posed by the Budget Control Act of 2011, the 2013 Bipartisan Budget Agreement has afforded the Department the opportunity to restore healthy levels of readiness funding for fiscal year 2014 and fiscal year 2015. Overseas Contingency Operations funding in fiscal year 2014 also supported the Services' ability to begin addressing their most acute readiness deficiencies.

The fiscal year 2015 budget proposal reflects the Services' resolve to slow the readiness decline. Specifically, they shifted funding so that they could start climbing out of personnel, training, and maintenance backlogs. In doing this, the Services almost universally moved money out of procurement and facilities sustainment accounts. While this strategy is defensible in the near-term, this imbalance across resourcing areas is untenable in the long-term. Future budget uncertainty marked by the looming return of BCA-level funding is by far our greatest readiness concern.

If confirmed, I will continue to work tirelessly in promoting a responsible resource strategy that allows for viable and sustainable readiness across the Department.

Question. What is your understanding of the responsibilities of the Under Secretary of Defense for Personnel and Readiness (USD(P&R)) with respect to the Global Response Force?

Answer. The USD(P&R) monitors the readiness levels of units across the Services and articulates the capacity of the Services to provide forces. USD(P&R) collaborates with the Joint Staff to evaluate sourcing solutions, which include the Global Response Force (GRF), in order to balance risk to force generation with risk to mission requirements and presents mitigation options to the Secretary of Defense. Additionally, the USD(P&R), in its role as the DOD-wide sponsor for joint training and combatant command exercises and engagement, facilitates the exercise of the GRF across all echelons of the force.

MEDICAL MARIJUANA

Question. What is your assessment on the need for legitimate scientific study of the efficacy of medical marijuana in alleviating the symptoms of post-traumatic stress disorder (PTSD) experienced by servicemembers and veterans?

Answer. The Department supports only rigorously designed, scientifically sound, and lawful research efforts that adequately protect human subjects and align with programmatic requirements. A research proposal with the potential to help improve the lives of those affected by PTSD and meeting these requirements would be given consideration. We note with interest that the Public Health Service has recently approved such a study to provide 50 veterans diagnosed with chronic, treatment-resistant PTSD with marijuana in various potencies. It is awaiting final approval from the U.S. Drug Enforcement Administration. If confirmed, I will review the results of that study, if the study is approved.

DEPARTMENT OF DEFENSE SCHOOLS IN THE CONTINENTAL UNITED STATES

Question. Some have questioned the continuing need for DOD-operated schools for military dependent children within the Continental United States (CONUS).

In light of the administration's request for additional Base Realignment and Closure authorities and fiscal constraints, should DOD establish or update its criteria for the continued operation of DOD schools within CONUS?

Answer. The Department understands the importance of education and the role it plays in the success, stability, readiness, and retention of servicemembers and their families. The Department is committed to quality educational opportunities for all military children, while balancing cost and exploring all options and alternatives.

In 2013, the Department initiated a study to consider the need for DOD to own and operate DOD Schools within the United States and to evaluate other options. The study findings will be provided to the Department in September 2014.

Question. If so, and if confirmed, how would you approach this task?

Answer. If confirmed, I will consider the study's findings in addition to direct feedback from the military community, and advocacy and professional groups, and force management projections in determining the best options for providing education support for military families. I will do this in consultation with the Military Departments and in collaboration with Congress.

SEXUAL ASSAULT PREVENTION AND RESPONSE POLICY

Question. The fiscal year 2013 Department of Defense Annual Report on Sexual Assault in the Military reflects that reports of sexual assault in the military increased by 50 percent from fiscal year 2012 to 5061 reports of sexual assault.

What is your assessment of this report?

Answer. We are encouraged that more men and women are coming forward to report a sexual assault, get care and support, and give us an opportunity to hold offenders appropriately accountable. That being said, we have much more to do to prevent this horrible crime. There is evidence supporting the hypothesis that this unprecedented increase is the result of increased confidence victims have in the system. I have not seen evidence that the recent spike in reporting is due to a concurrent increase in crime.

The survey being conducted by RAND this summer will give us an indication what kind of impact we're having on the prevalence of sexual assault.

Question. What is your assessment of DOD sexual assault prevention and response program?

Answer. Senior leader focus has fundamentally improved the Department's approach in the past 2 years. The Services have implemented a number of programs designed to improve victim confidence, including reforms to the military justice system, the creation of dedicated legal support to victims, enhanced access to victim advocacy, and increased training and awareness for the entire force. While many of the recent changes have been response focused, the best thing we can do is to prevent the crime. To this end, last month Secretary Hagel directed the implementation of an updated Department-wide Sexual Assault Prevention Strategy that was developed in collaboration with civilian experts and is intensely focused on shaping the environment where servicemembers live and work.

Sexual assault is a complex problem, with no easy solutions. The Department continues to implement a multi-disciplinary approach, and, if confirmed, I will be committed to ensuring sustained progress, persistence, and innovation as we work to eliminate sexual assault from the military. We will continue to work closely with Congress to address this problem. The resulting reforms and policy changes are going to take time to implement and assess.

Question. What is your view of the provision for restricted and unrestricted reporting of sexual assaults?

Answer. Giving victims reporting options is at the heart of the DOD Sexual Assault Prevention and Response (SAPR) Program. Restricted and unrestricted reporting was recommended to us in 2004 by a panel of experts, and we implemented these options in 2005. Since that time, a quarter of reports made to us each year are in the form of restricted reports. While the Department desires an environment where all victims feel free to make an unrestricted report, some victims will never be comfortable accessing care and support in that way. As a result, restricted reporting was enacted to provide victims a means to heal while respecting their privacy. Since 2005, more than 5,000 servicemembers have used the restricted reporting option, underscoring the need for the option as a way to provide critical medical care and support to victims.

Many civilian jurisdictions have adopted similar reporting options. Confidential reporting—or in our case restricted reporting—appears to be becoming standard practice in this country.

Question. What is your view about the role of the chain of command in providing necessary support to the victims of sexual assault?

Answer. Commanders and leaders at all levels are key to our professional response to this crime. Victims must know that they will be respected and supported throughout the justice process. We believe that some of the increase in reporting that occurred last year was because victims heard the messages of our leadership and believed that in coming forward they would be provided the full range of timely and responsive care, and treated with the sensitivity and privacy they deserve. The Department has taken a number of steps in order to educate frontline leaders about their responsibilities—not just to victims of sexual assault—but also in creating a command climate free of sexual assault.

Question. What is your understanding of the adequacy of DOD resources and programs to provide victims of sexual assault the medical, psychological, and legal help they need?

Answer. We have made a lot of progress in this area, but we are going to have to watch closely to make sure the changes we've made are working and that no gaps in support remain. Nevertheless, we can and should do more. We've benefited from a number of organizations looking at how we are providing victims with the many kinds of help they need—the Government Accountability Office, the Defense Task Force on Sexual Assault in the Military, and soon, the Response Systems Panel. We have accepted almost every recommendation made to us—and instituted additional services and reforms as a result of our own evaluative work—learning from the perspectives of these groups is a very good thing.

Some of the specific reforms include offering special victims counsel to provide victims with legal representation, providing professionally certified responders, offering expedited transfers, ensuring that every case is treated as a medical emergency, updating our sexual assault examination protocols, combatting negative treatment and retaliation, and ensuring the availability of anonymous worldwide 24/7 crisis support through Safe Helpline. These are just a few of the services available to victims.

Victim support is critical part of healing the trauma caused by these incidents. It's also critical in increasing the odds that a victim will be willing and able to meet the very intense demands of the criminal justice system (military or civilian). Victims have to believe that we will support them, and then we have to deliver on that support. If confirmed, I look forward to working on this issue. Specifically, working with Congress and learning from the perspective of groups inside and outside of the Department.

Question. What is your view of the steps the Department has taken to prevent additional sexual assaults both at home station and deployed locations?

Answer. My view is that the Department is taking a comprehensive, evidence-informed approach to preventing this crime. The Secretary of Defense, the Secretaries of the Military Departments, and the Joint Chiefs have all been working together on the 28 initiatives enacted over the past 2 years to improve our approach to sexual assault. We have also welcomed the assistance we've received from Congress and the 60+ provisions of law enacted that has fundamentally changed how the Department responds to sexual assault. Many of these provisions have focused on enhancing our care for victims and improving our ability to hold offenders appropriately accountable. However, experts tell us that improved response and deterrence are just part of a much larger approach that must include dedicated work of prevention. In order to solve a complex problem like sexual assault in an institution as large and spread out as the U.S. Armed Forces, we need a comprehensive approach—one that leverages every amount of influence, planning, and persistence the Department can muster. Consequently, the Department tasked itself with updating its Sexual Assault Prevention Strategy—a Department wide roadmap that reflects a wide range of integrated policies and programs to influence behavior, shape the environment, and reduce the crime of sexual assault.

In developing this updated strategy, the Department has been working with the Centers for Disease Control and Prevention, the Department of Justice, State sexual assault coalitions, civilian colleges and universities, and other researchers to identify and incorporate the best practices in sexual assault prevention. The updated sexual assault prevention strategy is designed to take action at every level of military society to advance a comprehensive prevention approach. Our military leaders are at the core of this approach and must work every day to create a healthy command climate in their units; ensure deterrence and accountability for misconduct consistent with military values; provide training and empowerment for all personnel to intervene in incidents they believe to be at risk for sexual harassment and assault; and mentor their personnel using leadership and role-modeling as a way to develop healthy work and personal relationship skills.

In sum, prevention is a comprehensive, sustained focus on creating an environment that actively deters and interferes with a perpetrator's attempts to commit a crime. We are committed to producing such an environment in the Department.

Question. What is your view of the adequacy of the training and resources the military departments have in place to investigate and prosecute allegations of sexual assault?

Answer. Last year, each Service established a Special Victims Capability to improve the investigation and prosecution of allegations of sexual assault, child abuse, and serious domestic violence, and to provide specialized support for victims of such offenses. The capability consists of investigators, prosecutors, paralegals, victim/witness program professionals who are selected, trained, and certified to respond to sexual assault. Through these capabilities, the Services are training and equipping

professionals to improve and enhance victim care, victim support, and prosecution support, and provide a more comprehensive, integrated, and standardized response to allegations of these crimes.

Over the last year, we also dedicated additional resources to continue specialized training on trauma-impacted memory and interviewing techniques to ensure military criminal investigators are using research-proven best practices when questioning victims. Also, as of 1 January 2014, each Service now offers victims of sexual assault a dedicated attorney to provide representation and consultation throughout the military justice process. There are currently 185 trained attorneys in place to support victims of each military Service, ensuring victims know their rights and understand the justice system.

Question. What is your view about the role of the chain of command in changing the military culture in which these sexual assaults occur?

Answer. As we have seen in other recent military culture changes, establishing appropriate culture starts at the top with commanders and leaders, leading by example and enforcing standards of conduct. Central to our approach is requiring leaders at all levels to foster a command climate where sexist behaviors, sexual harassment, and sexual assault are not condoned or ignored; where dignity and respect are core values we live by and define how we treat one another; where victims' reports are treated with the utmost seriousness, their privacy is protected, and they are treated with sensitivity; where bystanders are motivated to intervene to prevent unsafe behaviors; and where offenders know they will be held appropriately accountable by a strong and effective system of justice.

Secretary Hagel has recently directed important new initiatives to make the command structure more accountable. These reforms include fielding methods to better assess command climate, mandatory forwarding of command climate surveys to the next level in the chain of command, and elevating status reports of sexual assault allegations to the first general/flag officer in the chain to ensure appropriate response to every case (victim care, investigative actions, unit climate, and actions taken).

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted?

Answer. We talk about sending our servicemembers into "harm's way" a lot and the need for servicemembers to follow the orders of their commanders. The crux of this concept rests on the principle that every person in a unit has to believe in an instinctive and immediate sense that when a commander tells them to do something: (a) that the order is lawful, ethical, moral, and exactly the right thing to do for the successful accomplishment of that mission; and (b) the commander places the welfare of every person in the command before his/her own. A commander who would interfere with the successful investigation or disposition of a crime based on his or her own welfare is simply intolerable. Similarly, a commander who allows the routine harassment, ridicule, or discrimination of servicemembers trusted in his/her care is equally unfit and must be fired from that position.

Based on this logic, absolving a commander of the responsibility of doing the right thing is a big thought. It would suggest a lack of confidence in command. My fear is that it will inject doubt where we need that instinctive and immediate faith. I strongly prefer that the disposition authority remain in the command structure. That said, I also strongly support requiring senior level review of decisions not to proceed with prosecution of sexual assault cases. I expect a series of NDAA changes over the last few years to help the Department better address allegations of sexual assault and help ensure appropriate accountability.

If confirmed, I am committed to increasing victim confidence and ensuring that dignity and respect are guaranteed attributes of every organization in this Department. More specifically, I'd look forward to supporting Secretary Hagel's efforts on prevention, including those involving gauging and improving command climate.

Question. What additional steps would you take, if confirmed, to address the problem of sexual assaults in the military?

Answer. If confirmed, I will support the Department's efforts to prevent the occurrence of sexual assault. But, when crimes do occur, we must have comprehensive, effective, accessible, and responsive investigative and victim assistance services available.

I will work to ensure that our program continues to educate all servicemembers, frontline commanders and leaders and hold them accountable in establishing a climate of dignity and respect. I will also support our DOD Sexual Assault Prevention Strategic Plan and the 28 Secretary of Defense directives to address this crime. The Department must sustain our current level of attention, focus, and emphasis throughout the entire organization.

We recognize how difficult this problem is to solve and that it will take a multi-disciplinary approach. There have been a lot of beneficial changes to law, policy, and processes over the last few years. We should continue to collect and monitor command climate, prevalence, and case data to ensure that the changes we've made are working as intended and to look for areas we've missed. I also support staying tuned to the research literature and victims' groups for exactly the same reason.

SERVICE ACADEMIES

Question. What do you consider to be the policy and procedural elements that must be in place at each of the Service Academies in order to prevent and respond appropriately to sexual assaults and sexual harassment and to ensure essential oversight?

Answer. Sexual assault has no place at the Military Service Academies. To advance a cadet and midshipman culture that embraces dignity and respect, Secretary Hagel directed each Academy to implement sexual assault and sexual harassment prevention and response strategic plans that are aligned with the strategic plans of their respective Service. These strategic plans ensure a coordinated effort of instilling our future leaders with the ability to take action when faced with situations at risk for sexual assault, sexual harassment, and inappropriate behavior of any kind. If confirmed, I will review and assess these efforts, as well as ensure that each Academy provides appropriate support for victims of this crime.

Question. What is your assessment of measures taken at the Service Academies to ensure religious tolerance and respect, and to prevent sexual assaults and sexual harassment?

Answer. In the past few years, the Academies' leadership has emphasized the need for greater respect for the rights of others to their own religious beliefs, including the right to hold no beliefs.

In January, Secretary Hagel directed a number of initiatives to enhance the Academies' climates of dignity and respect. If confirmed, I will remain committed to ensuring that the Department trains its future leaders to establish and be committed to fostering a climate where sexual assault, sexual harassment, and inappropriate behavior and attitudes are not tolerated.

ASSIGNMENT POLICIES FOR WOMEN IN THE MILITARY

Question. The Department, in January 2013, rescinded the policy restricting the assignment of women to certain units which have the primary mission of engaging in direct ground combat operations, and gave the Military Services until January 1, 2016, to open all positions currently closed to women, or to request an exception to policy to keep a position closed beyond that date, an exception that must be approved by the Chairman of the Joint Chiefs of Staff and the Secretary of Defense. The Services are working now to develop gender-free physical and mental standards for all military occupations, presumably with the goal of allowing individuals, regardless of gender, to serve in those positions if they can meet those standards.

If confirmed, what role will you play in the development of these standards?

Answer. If confirmed, I will monitor the progress the Services are making toward integration of females into previously closed occupations and positions, and will work with the Chairman of the Joint Chiefs of Staff and the Service Chiefs as this effort progresses. The Department will continue to notify Congress before opening additional positions.

Question. If confirmed, will you ensure that the standards are realistic and preserve, or enhance, military readiness and mission capability?

Answer. Absolutely. Public Law 103-160, section 543, prohibits DOD from changing an occupational performance standard for the purpose of increasing or decreasing the number of women in that occupational career field. The Department is aware of, and complying with, this law. We are committed to opening positions and occupations when and how it makes sense, while preserving unit readiness, cohesion, and the quality of the All-Volunteer Force.

Question. Do you believe that decisions to open positions should be based on bona fide military requirements? If so, what steps would you take to ensure that such decisions are made on this basis?

Answer. Absolutely, they should be based on a scientific determination of the requirements to perform each occupational specialty. If confirmed, I will fulfill the responsibilities of my office by reviewing each request to open positions and evaluate such requests for compliance with statutory requirements and impact on the readiness of the All-Volunteer Force.

Question. Some family members have expressed concerns about assigning women to what are currently male-only combat units.

To what extent do you believe that this will be a problem in the implementation of this policy?

Answer. I expect our commanders to select the best qualified personnel for assignment regardless of gender, and to create a command climate that focuses on mission accomplishment while treating each person under their command with dignity and respect. Since mid-2012, we have successfully integrated women into formerly male-only units. We are incorporating this experience as we progress.

MENTAL HEALTH CARE

Question. Senior military leaders have long recognized the need to reduce the stigma for military personnel and their families and veterans in seeking mental health care, yet we continue to hear from servicemembers that the stigma persists.

If confirmed, what actions will you take to reduce the stigma associated with seeking mental health care by military personnel and their families?

Answer. I am deeply committed to countering the stigma associated with getting help for mental and behavioral health concerns. The thought of our servicemembers or their dependents creating or suffering from a barrier in receiving care is heart-breaking. Simply put, getting quality care works; these conditions can be treated. I look forward to the time where Americans approach mental health with the same comfort level that they approach physical health.

The Department provides a number of self-help initiatives and other resources to meet the needs of servicemembers and their families for mental health care and is working to address the barriers (real or perceived) that may prevent them from seeking help. If confirmed, I will continue to support the Department's efforts designed to reduce the stigma associated with seeking mental health care, encourage help-seeking behavior and increase the use of available resources among servicemembers and their families. I am also prepared to work across the Services to ensure an integrated approach with necessary resources for ongoing mental health research, prevention, and evidence-based treatment efforts that will continue to allow the Department to provide high-quality, timely mental healthcare services.

Question. In your view, are DOD's current mental health resources adequate to serve all Active Duty and eligible Reserve component members and their families, as well as retirees and their dependents?

Answer. Absolutely. Since September 11, with the support of Congress, DOD has increased the outlays for mental health care by a 12 percent compounded annual rate, roughly quadrupling care rendered between the beginning of fiscal year 2002 to the beginning of fiscal year 2014. On average, each member of the active Duty force is seen by a mental health professional one and a half times per year. Care is embedded into primary care clinics and fighting units. Mental health providers in Military Health System (MHS) Military Treatment Facilities (MTFs) have been increased by 50 percent, to nearly 10,000. Further, TRICARE network assets have been bolstered to better serve reservists, dependents, and retirees. A total of 65,000 mental health providers are available in the purchased care network. DOD provides state of the art substance abuse care, including medical therapies for addiction and confidential alcohol abuse treatment, and one of the finest benefits for autism spectrum disorders in the Nation, including care to provide early intervention.

SUICIDE PREVENTION

Question. The number of suicides in each of the Services continues to be of great concern to the committee.

If confirmed, what role would you play in shaping DOD policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all servicemembers and their families?

Answer. Suicide among our men and women in uniform is one of the greatest concerns of our entire leadership across DOD, and one I share closely. In the last few years, and under my early direction, the department has taken several steps to address suicide. It has issued new policies, identified key roles and responsibilities for prevention and resilience, addressed rate calculations, established new partnerships with other Federal agencies, particularly with the Department of Veterans Affairs, and collaborations with community organizations, and has led the Nation in suicide prevention research.

If confirmed, I intend to improve data collection that can better inform risk and protective factors within our force and their families and ensure that programs are evaluated, aligned to a strategy, and show effectiveness. Continued outreach, peer support, and resilience skills training are efforts that I will ensure reach all of our active and Reserve components and that their families understand what resources are available to them as well. The resilience of the force must be equal to the readi-

ness of the force and the same successful approaches I have had with ensuring readiness, I will apply to resilience.

END STRENGTH REDUCTIONS

Question. In this year's budget request and Future Years Defense Program, the Department proposes making additional cuts to the Army's Active and Reserve component end strengths, as well as the Marine Corps' Active Duty end strength. The Department proposes reducing the Army Active component to 450,000 by 2019, and further to 420,000 if sequestration continues in fiscal year 2016 and beyond, and the Marine Corps to 182,000, or 175,000 if sequester continues.

In your view, can the Army and the Marine Corps meet national defense objectives at the strength levels proposed without sequestration? What about at the strength levels proposed with sequestration?

Answer. Yes, the Army and Marine Corps can meet national defense objectives at the force levels associated with the Department's proposed fiscal year 2015 budget submission. The 2014 Quadrennial Defense Review articulates the Department's commitment to transitioning to a smaller but capable and ready force over the next 5 years. Towards that end, end strength proposed in the President's Budget for fiscal year 2015, specifically a 440–450K Active Duty Army and 182K Active Duty Marine Corps, allows the Army and Marine Corps to maintain a balanced ready and modern force.

A return to sequestration would force the Army and Marine Corps to further reduce their end-strength numbers to 420K and 175K, respectively. This would undoubtedly jeopardize the Army and Marine Corps' ability to fully implement the defense strategy.

Question. If the Army and Marine Corps must reduce their Active component end strengths to 420,000 and 175,000, respectively, where does the Department take risk with respect to the national defense strategy?

Answer. If the Army and Marine Corps were compelled to further reduce their end strength beyond their existing drawdown plans, there would be additional risk in conducting a broad range of military operations worldwide. Specifically, their decreased ability to respond to a major contingency operation could result in extended timelines and increased casualties.

Furthermore, the Army and Marine Corps would be hard-pressed to maintain acceptable deployment-to-dwell rates to meet unrelenting global operational demands. This would place added stress on a smaller force and jeopardize our continued pledge to take care of our men and women in uniform.

Question. What is your understanding of the need for additional force shaping tools requiring legislation beyond what Congress has provided the past 3 years?

Answer. Congress has supported the Department with the force shaping tools necessary to meet the drawdown under its current plan. However, as we have progressed through the drawdown, we learned where and how minor changes to the existing authorities could make our force shaping both more effective and more efficient. If confirmed, I will continue to work with Congress to effect these minor changes to legislation to meet reduced end strengths.

The Department remains concerned that continued budget reductions may make it necessary to revisit the size of all components of the Total Force—Active Duty military, Reserve component military, DOD civilians, and contractors. Consequently, future assessment may require us to request additional Congressional authorization for force shaping tools.

MILITARY QUALITY OF LIFE

Question. The committee is concerned about the sustainment of key quality of life programs for military families, such as family support, child care, education, employment support, health care, and morale, welfare and recreation services, especially as DOD's budget declines.

How do you perceive the relationship between military recruitment and retention and quality of life programs and your own top priorities for the Armed Forces?

Answer. Our most valuable resource is our people. If I am confirmed, the programs that support our servicemembers and their families will remain one of my top priorities. We must care for our people, particularly as our ability to recruit and retain the very best servicemembers becomes more challenging.

If confirmed, what military quality of life programs would you consider a priority, and how do you envision working with the Services, combatant commanders, family advocacy groups, and Congress to sustain them?

Answer. Military quality of life programs comprise a vast range of services that support servicemembers and their families in many different ways. Programs such

as Morale, Welfare and Recreation fitness opportunities and Child and Youth Programs, for example, help minimize stress on the force. These programs should promote a work-life balance and address the unique challenges associated with military service, such as deployments, frequent relocations and financial readiness. The Department is working with a host of interagency and non-governmental collaborators, as well as Congress, to efficiently close gaps and reduce overlaps in programs. We also have made a deliberate effort to communicate effectively to ensure that families know how to access available support when they need it.

If confirmed, I will continue to work to promote interagency collaboration and Service coordination and advance these objectives.

FAMILY READINESS AND SUPPORT

Question. Servicemembers and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of concerns among military families as a result of the stress of deployments and the separations that go with them.

What do you consider to be the most important family readiness issues for servicemembers and their families, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. We must recognize that every family has unique needs, requiring a flexible and responsive network of services to deliver support at the right time, using the most effective methods. Following more than a decade of war and the ongoing draw down, we must be ready to continue supporting families. In particular, it is important to assist the surge of Active component servicemembers and families transitioning from military to civilian life; and for our Reserve component servicemembers and families, the focus must remain on reintegration. It is critical that servicemembers, their families, and their survivors receive information about available support services and resources through communication vehicles they prefer and trust. The Yellow Ribbon Reintegration Program will continue to provide support for the Reserve component servicemembers in remote locations. We must continue outreach, education, awareness, and engagement strategies to promote servicemember and family readiness programs.

Question. How would you address these family readiness needs in light of global rebasing, Base Realignments and Closings (BRAC), deployments, and future reductions in end strength?

Answer. We must be capable of enabling Services, staff, and resources to be surged or evolved, as needed, to respond swiftly and effectively to the changing needs of servicemembers and their families during peacetime, war, periods of force structure change, relocation of military units, base realignment and closure, crisis, natural disaster, and other emergency situations. Close collaboration with and between the Services, as well as interagency and non-governmental resources providing family support needs, will ensure that we continue to provide timely support while finding the most effective and efficient ways of doing so.

Question. If confirmed, how would you ensure support is provided to Reserve component families related to mobilization, deployment and family readiness, as well as to active duty families who do not reside near a military installation?

Answer. I consider the needs of geographically dispersed military families, including those who serve in the Reserve component, of equal importance to the needs of all other military families. Implementation of quality assurance measures for Reserve component family readiness programs that meets national accreditation standards supports the overall mission of military family readiness. This approach requires constant coordination with the Services and each of the Reserve components to ensure that we are responsive and inclusive. Since 2008, the Yellow Ribbon Reintegration Program has led our support efforts with this population, providing access to deployment cycle information, resources, programs, services, and referrals to more than 1.3 million servicemembers and their families. The Yellow Ribbon Reintegration Program eases transitions for servicemembers and families as they move between their military and civilian roles. Our geographically diverse populations are also supported by the Joint Family Support Assistance Program which works to build capacity to identify and meet evolving needs at the local community level where these families live, work, and attend school. To augment and enable that local support, Military OneSource provides support to military families, military leadership, and military and civilian service providers through delivery of information, referrals, and non-medical counseling.

Question. If confirmed, what steps will you take to sustain family support programs, given current fiscal constraints?

Answer. Family support programs that are flexible, responsive, and communicate and coordinate with interagency and non-governmental family services are critical to meet the enduring needs of our servicemembers and their families, whether they live on, near, or far from military installations. If confirmed, I will continue to work to ensure that resources are used efficiently and effectively to support our families. Our collaboration with others who share our interest in the support of military families is key. Working together with the Services, we can find efficiencies and enhance the accessibility of support when and where it is needed and at the right level.

Question. In your view, does the U.S. Special Operations Command (SOCOM) have unique family readiness and support requirements? If so, in your view, are those needs adequately being met by each of the Military Services at this time? If they are not adequately being addressed, if confirmed, how would you address these unique needs?

Answer. I believe SOCOM families do have unique support requirements. The deployment rates are among the highest in the Department. Even when they are home, they have arduous training requirements. Deployment locations tend to be extremely austere and they are far less likely to be able to maintain reliable contact with families. We know that suicide rates, divorce rates, and incidents of risky behavior have remained high over the last few years. Aside from being ethical and compassionate concerns, these are also increasingly impacting unit readiness.

P&R components continue to work closely with SOCOM to identify family support requirements that are unique to this community, analyze current support provided by the Services, and identify and address gaps in family support provided to the SOF community. If confirmed, I look forward to expanding my support for this issue.

OFFICE OF COMMUNITY SUPPORT FOR MILITARY FAMILIES WITH SPECIAL NEEDS

Question. In the NDAA for Fiscal Year 2010, Congress required the establishment of an Office of Community Support for Military Families with Special Needs within the Office of the Under Secretary of Defense for Personnel and Readiness. The purpose of this office is to enhance and improve DOD support for military families with special needs, whether educational or medical in nature.

In your view, what should be the priorities of this Office of Community Support for Military Families with Special Needs?

Answer. The Office of Community Support for Military Families with Special Needs endeavors to strengthen personnel readiness for military families with special needs through the development of comprehensive and uniform policies, oversight of programs, identification of gaps in services, and facilitation of access to resources that support military families with special needs. The Exceptional Family Member Program (EFMP) currently supports military families with special health and/or educational needs in three component areas: identification/enrollment, assignment coordination to determine the availability of services at a projected location, and family support to help families identify and access programs and services.

If confirmed, I look forward to reaching the Departments goal of enabling military families with special needs to have the same level of access to EFMP support, regardless of Service affiliation or location, with a particular emphasis on military families stationed at joint or sister Service installations.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of deployments. These programs must be relevant and attractive to all eligible users, including Active Duty and Reserve personnel, retirees, and their families.

What challenges do you foresee in sustaining MWR programs, particularly in view of the current fiscal environment and, if confirmed, are there any improvements you would seek to achieve?

Answer. Our ability to deliver Morale, Welfare, and Recreation (MWR) programs to our military families is impacted by changes in our basing, deployment patterns and force structure. With more than 75 percent of military families now living off installation, there is an increasing need for partnerships and support from local governments, school systems and businesses to ensure we continue to provide comprehensive, accessible, and affordable recreation programs. To explore improvements further, we are conducting a major assessment of MWR programs to ensure they are being operated in as efficient and cost-effective manner as possible. If confirmed, I will work to ensure that we continue to provide these important services to our servicemembers and their families.

COMMISSARY AND MILITARY EXCHANGE SYSTEMS

Question. Commissary and military exchange systems are significant quality of life components for members of the Active and Reserve Forces, retirees, and their families.

What is your view of the need for modernization of business policies and practices in the commissary and exchange systems, and what do you view as the most promising avenues for change to achieve modernization goals?

Answer. Commissary and exchange programs and policies must continue to evolve to meet the needs and expectations of our changing force and marketplace. Efforts should be aimed at reducing overhead and pursuing new avenues to reach our military families who do not live on military installations. The military resale community must continue to work, individually and collaboratively, to adapt marketing and selling practices, invest in technologies, and improve merchandise availability to be responsive to the evolving needs of their military customers. They should continue to deliver customer savings, strive to achieve high customer satisfaction ratings, and deliver exchange dividends in support of our MWR programs.

The Department takes great care to weigh the potential effects of any proposed changes on our servicemembers and their families as we consider efficiencies that may impact the commissary and exchange benefits.

Question. What is your view of the proposals by some to consolidate or eliminate Commissaries and Exchanges in certain areas where they are underused or duplicative of services readily available at reasonable cost in the community?

Answer. If confirmed, I would review any proposals aimed at reducing overhead, which may include closing underutilized locations or eliminating duplicative services.

I recognize that commissary and exchange programs are important elements of the servicemembers' compensation package and contribute to the quality of life of military personnel and their families. The fiscal realities facing DOD today and in the foreseeable future require that we evaluate all options that will maximize the effectiveness of our compensation benefits while reducing costs. If confirmed, I will proactively engage with the committee if we believe a change in statute is needed to operate our military resale system more efficiently and effectively.

Question. In the Ronald W. Reagan NDAA for Fiscal Year 2005, Congress required the Secretary of Defense to establish an executive governing body for the commissary and exchange systems to ensure the complementary operation of the two systems.

What is your understanding of the purpose and composition of the executive governing body?

Answer. To fulfill the requirement of the law, the Department established the DOD Executive Resale Board as the governing body to provide advice to the USD(P&R) regarding the complementary operation of the commissary and exchange systems. The Board reviews and advises on cross-functional matters important to the military resale system. The Board is invaluable in leading cooperative efforts and resolving issues of concern resulting in increased efficiency and effectiveness of the overall system.

The Board is chaired by the Assistant Secretary of Defense for Readiness and Force Management, and members include both the senior military officers and civilians who oversee and manage the commissary and exchange systems.

Question. If confirmed, what would your role be with respect to the governing body, and what would your expectations be for its role?

Answer. If confirmed, I would ensure the Board continues to meet regularly to review operational areas of interest across the military resale system and continues to promote significant efficiencies through cooperative efforts. The Board is crucial to balancing competing needs and providing consistent and coordinated input to inform any decisions to be made regarding these important benefits.

CIVILIAN PERSONNEL SYSTEMS

Question. Section 1113 of the NDAA for Fiscal Year 2010 provides DOD with extensive personnel flexibilities for its civilian employees that are not available to other agencies. In particular, section 9902(a) of title 5, U.S.C., as added by section 1113, directs the Department to establish a new performance management system for all of its employees. Section 9902(b) directs the Department to develop a streamlined new hiring system that is designed to better fulfill DOD's mission needs, produce high-quality applicants, and support timely personnel decisions.

What is your understanding of the current status of the Department's efforts to implement the authority provided by section 1113?

Answer. I understand the Department's plans for the performance management system, workforce incentives, and hiring flexibilities were informed by recommendations developed by DOD employees, supervisors, and managers representing labor and management from across the Department. Our plans were submitted to the Armed Services Committees at the end of March 2013. The collaborative labor-management pre-decisional recommendations for the personnel authorities were widely adopted by the Department.

Leaders in the Department continue to make good progress toward the implementation of their decisions on the personnel authorities. Working with our national unions, we are developing the new appraisal system, which will be a multi-level rating pattern characterized by a uniform appraisal period for covered employees, and the ability to make meaningful distinctions in levels of performance. If confirmed, I will continue to support the work that is underway to comply with statute.

Question. If confirmed, will you make it a priority to implement these flexibilities in a manner that best meets the needs of the Department and promotes the quality of the Department's civilian workforce?

Answer. Yes, if confirmed, I will make it my priority to implement those flexibilities that would promote the quality of the Department's civilian workforce to ensure accomplishment of the Department's missions.

Question. Section 1112 of the NDAA for Fiscal Year 2010 directs the Department to develop a Defense Civilian Leadership Program to recruit, train, and advance a new generation of civilian leaders for the Department. Section 1112 provides the Department with the full range of authorities available for demonstration programs under section 4703 of title 5, U.S.C., including the authority to compensate participants on the basis of qualifications, performance, and market conditions. These flexibilities are not otherwise available to DOD.

Do you agree that the Department needs to recruit highly qualified civilian personnel to meet the growing needs of its acquisition, technical, business, and financial communities?

Answer. Yes, I agree that recruiting highly qualified civilian personnel both in mission critical occupations, such as acquisition, human resources, information technology, and financial management, and in leadership positions across the Department is essential to mission success.

Question. In your view, has the existing civilian hiring process been successful in recruiting such personnel and meeting these needs?

Answer. While I believe the Department currently has a highly talented workforce, I also wholeheartedly support initiatives to further streamline the civilian hiring process. The Department embraces a simplified, transparent hiring system that meets the needs of stakeholders, attracts quality candidates, and reduces the time to fill a vacancy. If confirmed, I will ensure the Department continues to actively engage in pursuing continued improvements in the civilian hiring process.

Question. If confirmed, will you make it a priority to implement the authority provided by section 1112 in a manner that best meets the needs of the Department and promotes the quality of the Department's civilian workforce?

Answer. If confirmed, I will make it a priority to continue implementing the authority provided by section 1112. The Department recognizes the need for a sound leader-development model to attract, retain, and develop civilian leaders to support readiness, enhance bench strength, and promote the quality of the Department's civilian workforce. I will continue implementing the authority provided to ensure a successful framework for developing the next generation of innovative leaders to meet the Department's future needs.

HUMAN CAPITAL PLANNING

Question. Section 115b of title 10, U.S.C., as added by section 1108 of the NDAA for 2010, requires the Secretary of Defense to develop and update in every even-numbered year a strategic human capital plan that specifically identifies gaps in the Department's civilian workforce and strategies for addressing those gaps. Section 115b requires that the plan include chapters specifically addressing the Department's senior management, functional, and technical workforce and the Department's acquisition workforce.

Would you agree that a strategic human capital plan that identifies gaps in the workforce and strategies for addressing those gaps is a key step toward ensuring that the Department has the skills and capabilities needed to meet future challenges?

Answer. Yes. I believe such planning helps to position the Department to acquire, develop, and maintain the workforce it needs to meet current and future mission challenges.

Question. Do you see the need for any changes in the requirements for a strategic human capital plan under section 115b?

Answer. At this time we appreciate the help of past legislation that put the Department on a biennial reporting cycle. We continue to progress on meeting the requirements for a strategic human capital plan under section 115b, and will continue to institutionalize our processes and assess the need for any changes as we continue in this important endeavor.

Question. If confirmed, will you ensure that DOD fully complies with these requirements?

Answer. Yes, if confirmed, I will work toward ensuring the Department fully complies with statutory strategic workforce planning requirements.

Question. Since the time that the Department's most recent strategic human capital plan was issued, its civilian workforce plans have been significantly altered by the changed budget environment and extensive efficiencies initiatives.

What role do you believe human capital planning should play in determining where reductions in the civilian workforce can be taken with the lowest level of risk?

Answer. Any reductions in the civilian workforce should be informed by the Department's strategic workforce plan to determine where reductions can be taken with the lowest level of risk, with the understanding that short-term exceptions may be necessary due to emerging dynamics in this fiscal environment. In the future, the forecasts for the Department's workforce must be based on validated mission requirements and workload, both current and projected, and any reductions in the civilian workforce must be made in the context of the Total Force and directly linked to workload so as to not adversely impact overall mission capabilities.

Question. Would you agree that the strategic human capital plan required by section 115b should be updated to more accurately reflect the Department's current workforce plans and requirements?

Answer. Yes. The planning process should be updated to be more aligned and integrated with the Department's programing and budget process, and meet the requirements for a total force mix and competencies assessments. In preparing for fiscal year 2013 through 2018, we conducted a pilot study that examined the total force mix based on the workforce requirements and relationships in high risk mission critical occupations. We have launched a tool to collect competency gap information for all mission critical occupations to analyze gaps that will lead to strategies for mitigation. These processes will take several planning cycles, and functional communities are preparing for further assessment and implementation.

Question. What steps if any will you take, if confirmed, to ensure that civilian workforce levels are determined on the basis of careful planning and long-term requirements, rather than by arbitrary goals or targets?

Answer. If confirmed, I will emphasize that civilian workforce levels must be planned based on long-term strategic planning requirements. Forecasts for the Department's workforce must be based on validated mission requirements and directly linked to workload so as to not adversely impact overall mission capabilities.

DOD CIVILIAN PERSONNEL WORKFORCE

Question. Section 955 of the NDAA for Fiscal Year 2013 required the Secretary of Defense to develop a plan to reduce the size of the civilian personnel workforce by 5 percent over the next 5 years. The plan developed by the Secretary does not meet this objective. Since the time that section 955 was enacted, the Department has implemented hiring freezes and furloughs as a result of sequestration. As a result, the DOD civilian personnel workforce is substantially smaller than it was on the date of enactment or at the time the plan was submitted.

Do you agree that DOD's civilian employee workforce plays a vital role in the functioning of the Department?

Answer. I absolutely agree that civilians are vital to the Department. They help provide the critical equipment maintenance, base support, logistics and engineering expertise, family programs, and medical care that ensure our soldiers, sailors, airmen, and marines are ready to deploy, world-wide, and answer the call of our commanders in executing the national defense posture. Additionally, we have dedicated civilians serving as critical enablers in essential functions such as acquisition, contract management, quality control, auditing, engineering and design, and financial management. Moreover, civilians are a key element of our national security strategy, serving as operators in areas such as intelligence, cybersecurity, security assistance, and stability operations.

Question. Do you agree that if sequestration continues through fiscal year 2014 and beyond, the Department will need to further reduce the size of its civilian workforce?

Answer. I believe that if we are faced with further budgetary reductions as a result of sequestration, we will see significant adverse and untenable impacts on all areas and programs of the Department, including the civilian workforce. If confirmed, I will work to ensure that any reductions to the civilian workforce are balanced and executed in the context of the Department's Total Force management principles, ensuring the appropriate and most cost effective alignment of work.

Question. In your view, would it be preferable for the Department to make planned, prioritized reductions to its civilian workforce, or to continue with arbitrary reductions based on hiring freezes and workforce attrition?

Answer. Yes, planned and prioritized reductions to the civilian workforce aligned to mission divestiture and a decrease in workload are preferable. Reductions based on hiring freezes and workforce attrition may result in unintended consequences such as loss of required skills and competencies, unnecessary gaps in mission execution, and inappropriate realignment of workload to other elements of the Department's Total Force.

BALANCE BETWEEN CIVILIAN EMPLOYEES AND CONTRACTOR EMPLOYEES

Question. DOD employs many contractors whom now play an integral role in the performance of functions that were once performed exclusively by government employees, including the management and oversight of weapons programs, the development of policies, the development of public relations strategies, and even the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as Federal employees. Contractors continued to be hired as many civilian positions remained on a hiring freeze over the past few years.

Do you believe that the current balance between civilian employees and contractor employees is in the best interests of the Department?

Answer. The Department uses a Total Force approach to manage its workload. Contractors are an important element of the Total Force and provide flexibility and technical competence. However, we must be careful to ensure work is appropriately assigned to military personnel (Active/Reserve), civilian employees, or contract support.

If confirmed, I will work to ensure the Department continues its efforts to implement a Total Force strategy that aligns functions and work to military, civilian, and contract support in a cost effective and balanced manner, consistent with workload requirements, funding availability, laws, and regulations.

Question. In your view, has the Department become too reliant on contractors to perform its basic functions?

Answer. We must be constantly vigilant in assessing the extent of our reliance on contractors and ensuring that we do not have an erosion of critical skills and competencies, particularly in our scientific, technology, and engineering communities all of which are critical to maintain operational readiness and superiority.

If confirmed, I will work to ensure the Department continues to implement robust workforce review processes that are geared to ensuring the Department is not overly reliant on contracted services and is making the most economical workforce alignment decisions.

Question. Do you believe that the Department should undertake a comprehensive reappraisal of "inherently governmental functions" and other critical government functions, and how they are performed?

Answer. No, I do not believe a comprehensive reappraisal is necessary. The Department's policies are aligned to recent Federal Government-wide policy, which was published in 2011 in response to congressional direction. If confirmed, I will ensure that the Department meets its statutory obligations to review annually the alignment of workload to ensure that inherently governmental functions are properly aligned to the government workforce. Further, I will endeavor to ensure that critical functions of the Department are being performed by the appropriate workforce, with sufficient oversight and management, and in a manner that meets operational needs, while mitigating risk and reducing unnecessary cost.

Question. If confirmed, will you work with other appropriate officials in the Department to review the contractor and civilian force mix?

Answer. Yes, if confirmed, I will work with my colleagues across the Department to ensure reviews of workforce mix are conducted, as required by statute and the Department's policies.

Question. Would you agree that the balance between civilian employees and contractor employees in performing departmental functions should be determined by the best interests of the Department and not by artificial constraints on the number of civilian employees?

Answer. Yes, I agree.

Question. If confirmed, will you work to remove any artificial constraints placed on the size of the Department's civilian workforce, so that the Department can hire the number of employees most appropriate to accomplish its mission?

Answer. Yes, if confirmed, I will work to ensure policies and procedures for workforce shaping are consistent with statutory requirements and that the workforce is managed to available budget and workload.

SERGEANT BOWE BERGDAHL

Question. Following the recent repatriation of Sergeant Bergdahl after 5 years of captivity with foreign fighters there have been questions about the circumstances under which he became separated from his unit in Afghanistan in 2009.

If confirmed, what is your understanding of your role as Principal Deputy Under Secretary of Defense for Personnel and Readiness, concerning review of the facts and circumstances of Sergeant Bergdahl's capture and his status as a member of the U.S. Army?

Answer. If confirmed, my role would be to provide the Secretary of Defense and the Secretary of the Army with appropriate recommendations regarding DOD statutes, regulations, and policies.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Principal Deputy Under Secretary of Defense for Personnel and Readiness?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR ROGER F. WICKER

PROPOSED PRESIDENTIAL BUDGET FOR FISCAL YEAR 2015

1. Senator WICKER. Dr. Junor, the fiscal year 2015 President's budget request (PBR) for the Defense Language Institute Foreign Language Center (DLIFLC) cuts the budget by \$26.4 million from the fiscal year 2014 baseline of \$24.3 million. This cut includes a reduction of 385 full-time equivalents (ref: p. 307 of the Department of the Army fiscal year 2015 President's budget submission). As the Joint National Committee for Languages and the National Council for Languages and International Studies (JNCL-NCLIS) understand the situation, the manpower reduction at DLIFLC is necessitated by an Army Training and Doctrine Command (TRADOC) manpower review, which asserts that the stated mission requirement for DLIFLC is 2/2/1+ (Listening/Reading/Speaking) on the Interagency Language Roundtable Proficiency Scale. Under PBR-721, DLIFLC was tasked with a mission requirement of 2+/2+/2, based on a classified inter-Service Language Needs Assessments and a needs assessment by the National Security Agency. Meeting the higher language proficiency requirements identified in these needs assessments requires implementation of new levels of people, equipment, and funding.

There is an apparent mismatch between TRADOC's understanding of requirements for DLIFLC and the requirements assigned DLIFLC by the Intelligence Community (IC). In your role as the Senior Language Authority for the Department of Defense (DOD), you have oversight of all DOD policy related to language (ref: DOD Directive 5160.41E, Defense Language Program). How will you ensure that valid and accurate requirements for both the strategic needs of the IC and the tactical needs of the Services are reflected in the DOD guidance for DLIFLC and that DOD guidance is funded under current executive agency's Service-level budgeting processes?

Dr. JUNOR. Documenting valid and accurate strategic and tactical language requirements and then ensuring that budgeting processes reflect those requirements is essential to ensuring the viability of this capability across the Department. Language capability, like so many other critical operational capabilities, is in the midst of a transition from the intense focus on the wars we've been in to a broader operational spectrum spanning the entire globe. At the same time we are negotiating intense budget pressures that make affording the readiness we know we need exceptionally difficult.

That said, we have a responsibility to first know what our requirements are, second communicate them effectively, and third advocate for those requirements during the budget process. Here's how we intend to meet this responsibility:

Specific guidelines for capturing language requirements are contained in DOD policies and the 2011–2016 DOD Strategic Plan for Language Skills, Regional Expertise, and Cultural Capabilities, which represents the Services, the combatant commands, the Intelligence Community, and other key DOD agencies. One of my current focus areas is to ensure that these requirements stay current and are accurately documented so we know how much of what type of language capabilities we must create or maintain.

With these requirements in mind, I review and assess the DLIFLC continuously with Army, as the Executive Agent of the DLIFLC, and key DOD stakeholders including other Services and the Intelligence Community. I host an annual program review of DLIFLC past, current, and future year budgets, issues, and achievements while working closely across the Services to ensure Department-wide language requirements are addressed and resourced. When necessary, we recommend resourcing solutions to meet highest priority mission requirements outlined in DOD guidance.

For example, in 2013 I sought and received over-hire authority for the Army to increase the teaching staff at DLIFLC to ensure the training mission would not be disrupted during Budget Control Act considerations. At the same time, I established special working groups to review the end-to-end processes of language training, including requirements identification, Service assignments to DLIFLC, and academic instruction.

In fiscal year 2014, I established an agency-wide working group to review the entire career field of language professionals within the Services, the Intelligence Community, and the Defense agencies. At the heart of this review is improving the processes to better identify Intelligence Community and Service language requirements; how the Services and the Executive Agent make assignments to DLIFLC; and the utilization and retention of DLIFLC graduates in their career fields in the Defense department. Based on these analyses, I will continue to work with all the stakeholders to ensure that DLIFLC is adequately staffed and resourced.

[The nomination reference of Dr. Laura J. Junor follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 27, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Laura J. Junor of Virginia, to be a Principal Deputy Under Secretary of Defense, vice Jo Ann Rooney, resigned.

[The biographical sketch of Dr. Laura J. Junor, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. LAURA J. JUNOR

Education:

Prince George's Community College

- 1984–1986

Goucher College

- 1986–1988
- MA Economics (1988)

George Mason University

- 1988–1993
- MA Economics (1992)
- PhD Economics (1993)

Employment Record:

Office of the Under Secretary of Defense (Personnel & Readiness)

- Deputy Assistant Secretary of Defense (Readiness)
- June 2011–Present

Office of the Director, Cost Assessment & Program Evaluation

- Special Assistant
- October 2009–June 2011

Readiness Logic LLC (Self Employed)

- Consultant
- August 2007–September 2009

Office of the Under Secretary of Defense (Personnel & Readiness)/CNA Corporation

- Analytic Advisor/Interagency Director (IPA)
- November 2003–July 2007

CNA Corporation

- Deputy Team Lead for Readiness
- July 1994–November 2003

Tulane University

- Visiting Assistant Professor in Economics
- June 1993–July 1994

Honors and awards:

- Research Assistant/Teaching Assistant; George Mason University Economics Department
- Dissertation Fellowship; George Mason University Center for Public Choice
- Department of Defense Exceptional Civilian Service Award (Two Awards, both awarded in 2011)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Dr. Laura J. Junor in connection with her nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228
 Washington, DC 20510-6050
 (202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
 BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
 Laura Jean Junor
 Laura Jean Thompson (maiden name)
2. **Position to which nominated:**
 Principle Deputy Under Secretary of Defense, Personnel and Readiness.
3. **Date of nomination:**
 February 27, 2014.
4. **Address:** (List current place of residence and office addresses.)
 [Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
 May 26, 1966; Andrews Air Force Base, MD.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
 Married to Thomas J. Junor III.
7. **Names and ages of children:**
 Madeline Ann Junor; age: 16.
 Evelyn Larue Junor; age: 7.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
 George Mason University, 1988-1993: Ph.D. Economics (1993), MA Economics (1992).
 Goucher College, 1986-1988: MA Economics (1988).
 Prince George's Community College, 1984-1986.
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Title	Employer	Location	Dates
Deputy Assistant Secretary of Defense (Readiness).	Under Secretary Personnel & Readiness	4000 Defense Pentagon, Washington, DC 20301	06/2011-present
Special Assistant	Director, Cost Assessment & Program Evaluation	1800 Defense Pentagon, Washington, DC 20301	10/2009-06/2011
Consultant	Self (Readiness Logic LLC)	6113 Lemon Thyme Drive, Alexandria, VA 22310	8/2007-9/2009
IPA/Analytic Advisor	CNA Corporation	4000 Defense Pentagon, Washington, DC 20301	11/2003-7/2007

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

See positions listed in question 9.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Research Assistant/Teaching Assistant; George Mason University Economics Department

Dissertation Fellowship; George Mason University Center for Public Choice

Two Department of Defense Exceptional Civilian Service Awards (both 2011).

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

With Thomas Dyches. "Lowering the Spigot on the Beer Keg: Strategies for Contingency Sourcing Under Uncertainty" In *The New Guard and Reserve*. Edited by John Winkler and Barbara Bicksler, Falcon Books, 2009.

"The Defense Readiness Reporting System: A New Tool for Force Management," *Joint Forces Quarterly*, 2005.

With Jessica Oi, "Understanding Aircraft Readiness: An Empirical Approach", CNA Corporation, 1997.

With Jim Jondrow, Peter Francis, and Jessica Oi, "A New Approach to Modeling Ship Readiness", CNA Corporation, 1996.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) if confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

LAURA J. JUNOR.

This 24th day of March, 2014.

[The nomination of Dr. Laura J. Junor was reported to the Senate by Chairman Levin on June 24, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 31, 2014.]

[Prepared questions submitted to Gordon O. Tanner by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. At this time I am unaware of any reason to amend the Goldwater-Nichols Act. If I am confirmed and I identify areas that I believe merit changes, I will propose those changes through the established process.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. See my prior answer.

DUTIES

Question. What is your understanding of the duties and functions of the Air Force General Counsel?

Answer. The duties and functions of the General Counsel are determined and assigned by the Secretary of the Air Force. The General Counsel provides legal advice and guidance to the Secretary, the Under Secretary, the Assistant Secretaries, their staffs, and other offices within the Office of the Secretary, as well as to the Chief of Staff and the rest of the Air Staff. The General Counsel also provides legal services throughout the entire Department in a variety of disciplines including fiscal law, ethics, dispute resolution, contract law, environmental law, international law, intellectual property law, real property law, personnel law, labor law, and litigation. The General Counsel determines the controlling legal positions of the Department of the Air Force. The General Counsel also serves as the Designated Agency Ethics Official, the Suspension and Debarring Official for the Department of the Air Force, and the Dispute Resolution Specialist and exercises oversight of intelligence and other sensitive activities and investigations.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I believe that my education and over 40 years of practice—in both public service and private practice—have well prepared me for the challenges of this office. I received a Bachelors of Arts degree from the University of Alabama and was commissioned as a Distinguished Graduate through its Air Force ROTC program. I attended the Vanderbilt University School of Law where I received a J.D. degree. While in law school I worked for the Tennessee Legislative Council to assist mem-

bers of the Tennessee Legislature to draft proposed legislation. Upon passing the State bar examination, I began 4 years of Active Duty military service as a Judge Advocate at Tyndall Air Force Base, FL. At the expiration of my Active Duty commitment, I returned to my hometown and joined the law firm of McDermott, Slepian, Windom & Reed and undertook my first assignment in the Air Force Reserve as the Staff Judge Advocate of the 926 Tactical Fighter Group in New Orleans, LA. I remained with the same law firm and its successor, Sirote & Permutt for approximately 20 years. Likewise, I remained in the Air Force Reserves and retired as a colonel after 24 years of service. I believe that my experience as both an Active Duty and Reserve judge advocate; my 12 years of service in the Air Force General Counsel's office, culminating with 22 months as the Principal Deputy General Counsel; my opportunities to serve as both a Deputy Assistant Secretary of the Air Force (Reserve Affairs) and the Principal Deputy Assistant Secretary of the Air Force (Manpower and Reserve Affairs); as well as my experience in private practice at a law firm with national and international clients, have prepared me for the challenging and diverse legal issues that will face the Department of the Air Force.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Air Force General Counsel?

Answer. I believe I have the necessary legal training, experience and leadership abilities to be the General Counsel. This is especially true given my experience as the Principal Deputy General Counsel and the Principal Deputy Assistant Secretary of Manpower and Reserve Affairs, as well as my career as a Reserve Air Force judge advocate. I am also a firm believer, however, that the best lawyers work hard to completely understand the operations of their client. If confirmed, I will benefit from the extraordinary talent, expertise and experience of the civilian and military lawyers in the Department as I broaden my understanding of the issues the Air Force faces every day.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Air Force would prescribe for you?

Answer. If confirmed, I anticipate Secretary James will expect me to provide timely, accurate, and candid legal advice and counsel, ensuring compliance with the law and the protection of the legal prerogatives of the Department. I expect the duties and functions of the office will cover the wide range of legal issues and responsibilities prescribed by the Secretary. I anticipate the Secretary would expect me to manage the General Counsel's Office efficiently and effectively. Additionally, I anticipate the Secretary would expect me to foster an atmosphere of professionalism and responsiveness regarding all legal matters and services while working with the Office of The Judge Advocate General, the General Counsels of the Department of Defense (DOD) and the other military departments, as well as the legal staffs of other government agencies.

Question. In carrying out your duties, how will you work with the General Counsel of the Department of Defense?

Answer. If confirmed, I will work closely and collaboratively with the General Counsel of the Department of Defense. Although the General Counsel of the Department of the Air Force does not have a direct reporting relationship with the DOD General Counsel, the DOD General Counsel is by law (title 10 U.S.C. section 140(b)) and by regulation (DOD Directive 5145.01), the chief legal officer of the Department of Defense. If confirmed, I anticipate having a close and professional relationship with the DOD General Counsel, characterized by continuing consultation, communication, and cooperation on matters of mutual interest, in furtherance of the best interests of DOD.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the Air Force General Counsel?

Answer. The challenges facing the Department of the Air Force as a whole, as well as DOD, will largely determine the challenges that will confront the General Counsel of the Air Force. Secretary Hagel has made clear that institutional reform will be a priority in the near term, and I expect that to be a priority for the General Counsel of the Air Force as well. Secretary Hagel's concept of institutional reform has three components: (1) Reform and reshape our defense enterprise; (2) Direct more resources to military capabilities and readiness; and (3) Make organizations flatter and more responsive. Secretary James is working on reshaping our defense enterprise. Under her leadership the Air Force budget execution and budget submission are shifting more resources to military readiness and modernization. Finally, she has made significant efforts to flatten our organization by reducing our manage-

ment staff by 20 percent in a single year. Secretary Hagel and Secretary James will continue to make these efforts priorities and therefore they will be mine as well.

Although the current environment makes it difficult to anticipate all specific legal questions, I also expect to confront issues relating to operational matters, intelligence, privatization initiatives, military and civilian personnel policies, and compliance with environmental laws. In addressing these challenges, I think it will be critically important that the Office of the General Counsel and the Office of The Judge Advocate General have a cooperative and professional partnership.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I plan on working closely with the Secretary, the Chief of Staff, The Judge Advocate General, and the talented and dedicated attorneys in the Department of the Air Force to candidly evaluate the challenges and to ensure responsive and accurate legal services are provided to meet and address these challenges. In addition, if confirmed, I will work to expertly staff the Air Force legal community, in order to guarantee decisionmakers at all levels access to the best legal advice possible.

Question. What do you see as the greatest legal problems facing the Air Force in the coming year?

Answer. In a time of declining budgets, the Air Force is being forced to make hard decisions. All of these decisions will require consultation with Congress and a careful reading of the laws passed by Congress. If confirmed, I will ensure the Office of the General Counsel facilitates communication with Congress. I will also ensure that the Office of the General Counsel provides timely, accurate, and candid legal advice, ensuring compliance with the law and protection of the legal prerogatives of the Air Force. It is imperative that the Air Force has the legal support necessary to build and maintain the very best air, space and cyberspace capabilities possible.

Question. Does the Air Force Office of the General Counsel have the resources to deal with these problems?

Answer. Yes. The Office of the General Counsel, like the rest of the management structure of the Air Force, participated in the Secretary of Defense-directed 20 percent reduction in management resources. While these cuts will present challenges, I believe we have adequate resources to provide good legal advice to Air Force senior leaders as we work together to resolve significant legal challenges. I also believe that there are lessons to be learned from the Office of the Judge Advocate General, private law firms and the legal staffs of other Federal agencies that could maintain and even improve the existing high quality of service by the Air Force General Counsel's office in this time of reduced manning and resources.

Question. What broad priorities will you establish in terms of issues which must be addressed by the Air Force Office of the General Counsel?

Answer. I plan to continue the work underway in the Office of the General Counsel to refine a strategic plan. This plan starts by simply stating the mission of this organization—to wit: The Office of the General Counsel enables the Air Force to achieve its mission through the provision of independent and candid legal advice, effective advocacy, and problem-solving. The draft Strategic Plan focuses on four areas that will help the Office of the General Counsel achieve its mission: (1) Talent Management; (2) Customer Satisfaction; (3) Program Execution; and (4) Knowledge Management. If confirmed, I will provide the leadership necessary to refine, approve and implement the Office of the General Counsel strategic plan.

RELATIONSHIP WITH THE JUDGE ADVOCATE GENERAL

Question. In carrying out your duties, if you are confirmed, how will you work with the Judge Advocate General of the Air Force?

Answer. Throughout my career of military and civil service, particularly during the nearly 15 years of my civil service, I have enjoyed an excellent working relationship with The Judge Advocate General's Corps that resulted in the delivery of high quality legal services to Air Force leadership at all levels. I learned first-hand about the unique and vital experiences and expertise that civilian and military lawyers bring to the table, and that the final legal advice given to the client benefited greatly from our close working relationship. I was very proud to be a member of the team that delivered those services. If confirmed, I will work to maintain a close professional relationship with The Judge Advocate General. Consultation on matters of mutual import and interest should characterize that relationship. It is imperative that the two offices work well together to provide the highest quality of legal support to the Department of the Air Force.

Question. How are the legal responsibilities of the Department of the Air Force allocated between the General Counsel and the Judge Advocate General?

Answer. My career of military and civil service convinced me that it is critical that The Judge Advocate General and the General Counsel work as collaborative partners to provide the best possible legal services to our common client. If confirmed, I will make maintaining such a partnership a priority. In recognition of the unique expertise and experiences provided by the Office of the General Counsel and The Judge Advocate General, both offices provide legal advice to the Secretary of the Air Force and other Department officials. In addition, The Judge Advocate General is responsible for the activities of The Judge Advocate General's Corps and is primarily responsible for providing legal advice and services regarding the Uniform Code of Military Justice. The law expressly prohibits interference with the ability of The Judge Advocate General to give independent legal advice to the Secretary of the Air Force. Even in the absence of that statutory requirement, I would welcome the expression of independent views on legal issues by The Judge Advocate General.

Question. How will you ensure that legal opinions of your office will be available to Air Force attorneys, including judge advocates?

Answer. Close professional cooperation between the civilian and uniformed members of the Air Force's legal community is absolutely essential to ensure appropriate legal opinions issued by the Office of the Air Force General Counsel will be available to all Air Force attorneys and Judge Advocates, and vice versa. If confirmed, I will survey existing avenues for sharing information and consult with The Judge Advocate General on ensuring the thorough and timely dissemination of key advice.

Question. In response to attempts within the Department of Defense to subordinate legal functions and authorities of the Judge Advocates General to the General Counsels of the Department of Defense and the military services, Congress enacted legislation prohibiting any officer or employee of the Department of Defense from interfering with the ability of the Judge Advocates General of the military services and the legal advisor to the Chairman of the Joint Chiefs of Staff to provide independent legal advice to the Chairman, Service Secretaries, and Service Chiefs. Congress also required a study and review by outside experts of the relationships between the legal elements of each of the military departments.

What is your view of the need for the Judge Advocate General of the Air Force to provide independent legal advice to the Secretary of the Air Force and the Chief of Staff of the Air Force?

Answer. The Judge Advocate General's ability to provide independent legal advice has been statutorily recognized as essential to the effective delivery of legal services. I share that view. Uniformed attorneys bring another perspective and can provide insight and advice shaped by years of service throughout the Air Force.

Question. What is your view of the responsibility of Air Force judge advocates to provide independent legal advice to military commanders?

Answer. Air Force Judge Advocates have a critical responsibility to provide independent legal advice to commanders, given the missions they perform. I think this is well stated by The Judge Advocate General's Corps mission statement, which emphasizes the importance of professional, candid and independent legal advice.

Question. If confirmed, would you propose any changes to the current relationships between the uniformed judge advocates and General Counsel?

Answer. If confirmed, I will make sustaining the collegial and effective relationship that currently exists between the General Counsel and The Judge Advocate General a top priority, to ensure the effective delivery of legal services to the Department of the Air Force.

Question. Are legal opinions of the Office of the Air Force General Counsel binding on all Air Force lawyers?

Answer. Within the areas of responsibility and functions assigned to me by the Secretary under title 10 U.S.C. § 8019, the opinions rendered by the General Counsel are equally binding on all members of the Air Force legal team. If confirmed, I will endeavor to engage the full breadth of professional expertise and experience of Air Force legal professionals, both civilian and judge advocates, to ensure that sound professional inputs are considered in the development of opinions provided to senior Air Force leadership. During my tenure as the Principal Deputy Air Force General Counsel, my practice was to ensure that such opinions were drafted in collaboration with The Judge Advocate General (TJAG) and his staff. I cannot recall a single instance during my service as Principal Deputy General Counsel where any differences weren't resolved through discussions between the staffs. If there were to be such a disagreement, since the General Counsel and The Judge Advocate General both act under the authority of the Secretary, The Judge Advocate General would always have the ability to offer independent advice to the Secretary and seek resolution of the disagreement. Any resulting legal opinions would thus be rendered under the authority of the Secretary.

Question. How will you ensure that such legal opinions are available to Air Force lawyers?

Answer. Final opinions are published through a cooperative General Counsel and TJAG process. As for proposed opinions, if confirmed, I would ensure close cooperation between General Counsel and TJAG offices to ensure they are available to those whose coordination and consultation are appropriate to the subject matter and potential impacts of the opinion.

Question. If confirmed, are there specific categories of Air Force General Counsel legal opinions that you expect to reconsider and possibly revise? If so, what categories?

Answer. At this time I am not aware of any specific categories that require revision. If confirmed as the General Counsel of the Air Force, I will undertake the responsibilities of the office with an open mind. Only after a thorough review and assessment of existing opinions, as well as appropriate consultation, will I consider revision of existing opinions. I believe one of the responsibilities of the General Counsel is to constantly assess opinions rendered in areas of the law and particular issues that may need reconsideration and/or revision based on current events and legal, regulatory and policy development.

Question. Article 6 of the Uniform Code of Military Justice gives primary jurisdiction over military justice to the Judge Advocates General of the Army, Navy, and Air Force.

How do you view your responsibilities in the performance of military justice matters with regard to the Judge Advocate General of the Air Force?

Answer. The Judge Advocate General has the primary responsibility for providing legal advice and services regarding the Uniform Code of Military Justice and the administration of military discipline. Article 6 of the Uniform Code of Military Justice requires The Judge Advocate General or senior members of his staff to make "frequent inspections in the field" in furtherance of his responsibility to supervise the administration of military justice. If confirmed as the General Counsel, I will consult with The Judge Advocate General on matters of mutual interest or concern relating to military justice, recognizing his statutory duties and special expertise in this area, and will provide advice to the Secretary of the Air Force as needed.

ATTORNEY RECRUITING AND RETENTION ISSUES

Question. How do you assess your ability to hire and retain top quality attorneys and provide sufficient opportunity for advancement?

Answer. If confirmed, I plan to work to maintain the Air Force's ability to recruit and retain the highest quality civilian and military attorneys both in the General Counsel's Office and The Judge Advocate General's Corps. If confirmed, I want to make Federal service as a civilian attorney in the Air Force as attractive and professionally rewarding as possible. I will also work with The Judge Advocate General to ensure the Air Force has the tools we need to continue to recruit and retain the best and most diverse attorneys available to support the mission.

Question. In your view, does the Department of the Air Force have a sufficient number of attorneys to perform its missions?

Answer. If confirmed, I will work closely with The Judge Advocate General to evaluate the adequacy of the number of attorneys to ensure that there are a sufficient number of attorneys in the Department of the Air Force to accomplish the Air Force's missions. We must ensure that we continue to develop and maintain the right balance of legal skill sets and properly develop future leaders needed for our full-spectrum legal support that enables Air Force mission success.

For example, The Judge Advocate General's Corps has both a significant home-station (military justice, litigation support) and contingency (operations, Rule of Law, detention ops) legal support mission. The JAG Corps has averaged 234 deployment requirements per year for the past 12 years. Sustained legal support operations over the past 12 years in every combatant commander AOR translate into reduced capacity for the home station mission. In addition, while the Air Force looks to reduce overall end strength to meet budgetary constraints, missions continue to grow for Air Force legal professionals. For example, the Corps continues to lead the Air Force in its efforts to combat sexual assault through the Special Victims Counsel program and with a cadre of highly trained sex assault prosecutors. Sustainment of those valuable programs, as well as other important missions such as civil litigation and legal advice to commanders at all echelons, requires a steady, reliable, and predictable stream of JAG and GC accessions.

Question. In your view, what incentives to successful recruiting and retention of attorneys, if any, need to be implemented or established?

Answer. If confirmed, in consultation with The Judge Advocate General, I will look at this area very carefully and support initiatives that enhance the Air Force's ability to recruit and retain the best legal talent available.

DETAINEE ISSUES

Question. What role do you expect to play, if confirmed, in helping the Department of Defense and the Department of the Air Force address legal issues regarding detainees?

Answer. The legal issues regarding detainees are of critical importance to DOD and the Department of the Air Force. These issues need to be handled with great care, and with a clear focus on the rule of law. If confirmed, I will work closely with the DOD General Counsel in executing the President's directives. Additionally, in consultation with The Judge Advocate General, I will provide advice to the Secretary regarding detainee issues affecting the Air Force, with particular focus on our obligation to treat all detainees humanely.

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the United States Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the prohibition in the best interest of the United States? Why or why not?

Answer. Yes, this prohibition is in the best interest of the United States. Prohibiting the cruel, inhumane, or degrading treatment or punishment of individuals in our custody or under our physical control upholds our ideals and obligations, and reinforces our moral authority around the world.

Question. Do you believe that the phrase "cruel, inhuman, or degrading treatment or punishment" has been adequately and appropriately defined for the purpose of this provision?

Answer. I understand that considerable attention has been given to this issue within DOD. If confirmed, I will play an active part in ensuring the Department's implementing directives make clear what conduct is prohibited.

Question. What role do you believe the General Counsel of the Air Force should play in the interpretation of this standard?

Answer. The appropriate role of the General Counsel is to provide advice to the Secretary of the Air Force and her staff on policies that implement this standard. If confirmed, I will ensure Air Force implementation is and remains consistent with the law.

Question. What role do you believe the Judge Advocate General of the Air Force should play in the interpretation of this standard?

Answer. The Judge Advocate General provides advice on policies that implement this standard. The Judge Advocate General should also continue to train and supervise the judge advocates in the field, who are instrumental in maintaining this standard.

Question. If confirmed, will you take steps to ensure that all relevant Air Force directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. I will. The requirements of section 1403 and Common Article 3 of the Geneva Conventions remain essential to maintaining a disciplined Air Force, bound by the Rule of Law.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. I do.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

In your view, does section 2441 define these terms in a manner that provides appropriate protection from abusive treatment to U.S. detainees in foreign custody and to foreign detainees in U.S. custody?

Answer. This statute is intended to provide criminal sanctions for specific war crimes as provided under international law and also violations of the Uniform Code of Military Justice. Even apart from our obligations to prosecute these violations, however, the United States also has the obligation to "take all measures necessary for the suppression" of all other violations of the Geneva Conventions, even those that are not grave breaches, and I believe the Department must continue to hold military members accountable for violations of these standards as well. I think that

this statute, in addition to robust and vigilant training of airmen of our legal obligations, will protect against abusive treatment of foreign detainees in U.S. custody, as well as provide proper criminal sanctions against those who do not likewise secure reciprocal protection of U.S. detainees in foreign custody.

CRIMINAL JURISDICTION OVER CONTRACTORS ON THE BATTLEFIELD

Question. The Military Extraterritorial Jurisdiction Act (MEJA) was enacted in 2000 to extend the criminal jurisdiction of the U.S. courts to persons employed by or accompanying the Armed Forces outside the United States.

In your view, does MEJA provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. I understand that MEJA was intended to address the jurisdictional gap in U.S. law regarding criminal sanctions, as applied to civilians employed by or accompanying the Armed Forces outside the United States, including contractors and servicemembers' dependents. In my opinion, MEJA provides an effective means of exercising extraterritorial criminal jurisdiction over contractor employees in Iraq, Afghanistan, and other areas of combat operations who engage in conduct that would constitute a felony-level Federal crime in the United States.

Question. What changes, if any, would you recommend to MEJA?

Answer. If confirmed, I will study this issue and assess what changes to MEJA may be appropriate, if any.

Question. What role would you expect to play, if confirmed, in developing administration recommendations for changes to MEJA?

Answer. If confirmed, I expect to play an active role in the development of any proposals to change MEJA. I would also coordinate closely with The Judge Advocate General in the development of any such proposals given the complementary and sometimes overlapping availability of jurisdiction under the Uniform Code of Military Justice (UCMJ).

Question. Section 552 of the National Defense Authorization Act for Fiscal Year 2007 extended criminal jurisdiction of the military courts under the UCMJ to persons serving with or accompanying an armed force in the field during time of declared war or a contingency operation, such as our current operations in Iraq and Afghanistan.

In your view, does the UCMJ provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. The UCMJ provides commanders the tools necessary to maintain good order and discipline and ensure the morale, welfare and safety of all those under their jurisdiction during military operations. Because misconduct by contractors can undermine good order and discipline, Congress extended UCMJ jurisdiction over such individuals in times of declared war or contingency operations. In turn, the Secretary of Defense published guidance on the prudent exercise of such jurisdiction. This guidance ensures that the Department of Justice and DOD each play an appropriate role in resolving whether, and under which system, jurisdiction might be better exercised in each potential case.

Question. What is your view of the procedures agreed upon by the Department of Defense and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ?

Answer. I have not had an opportunity to review the procedures agreed upon by DOD and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ. If confirmed, I will, in coordination with The Judge Advocate General, assess the effectiveness of the procedures and whether further refinement of these procedures is necessary.

Question. What changes, if any, would you recommend to the UCMJ to ensure appropriate jurisdiction for alleged criminal actions of contractor employees?

Answer. At present, I am not aware of any specific provisions in need of change. It is my understanding, however, that the Secretary of Defense has appointed a working group staffed with personnel from each of the Services to undertake a complete review of the UCMJ. If confirmed, I will do all that I can to support this review and offer resources, opinion and counsel as appropriate.

RELIGIOUS GUIDELINES

Question. In your view, do Department of Defense policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other beliefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. Yes. However, I am aware that there is congressional concern about whether or not the Air Force implementation and execution of the Department of Defense policies are adequately protecting individual expressions of belief. I am also aware that the Air Force is taking these concerns seriously and is currently reviewing its policies. If confirmed, I will study this issue to determine if changes or further changes are necessary under the law.

Question. In your view, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Yes. I know from my previous working relationship with leaders of the Air Force Chaplain Corps that Air Force chaplains are never compelled to offer prayers that are inconsistent with their faith. I further know that they are expected to remain sensitive to the needs of, and provide care for, all the Air Force members they serve. Military chaplains have always had the prerogative to pray according to their endorsing faith group traditions inside or outside of religious services. Chaplains are trained and equipped to consider the setting and audience in preparation of prayers outside of religious services. Additionally, they have always had the freedom and protection to decline the opportunity to offer a prayer at a ceremony that may conflict with their personal beliefs without fear of discipline or discrimination. If I am confirmed, I will consult with the Chief of Chaplains about whether any adjustments are necessary or advisable.

Question. Section 533 of the National Defense Authorization Act for Fiscal Year 2013 (P.L. 112-239), as amended by section 532 of the National Defense Authorization Act for Fiscal Year 2014 (P.L. 113-66) protects rights of conscience of members of the Armed Forces and chaplains of such members, and prohibits, so far as possible, use of such beliefs as the basis of any adverse personnel action, discrimination, or denial of promotion, schooling, training, or assignment. Members of some religious denominations have sincerely held beliefs in opposition to same-sex marriage.

In your view, may a member of the Armed Forces who has a sincerely held belief in opposition to same-sex marriage be subject to adverse personnel action or similar other adverse action, if he or she shares those personal views on the subject in a personal capacity?

Answer. No. A member of the Armed Forces who has a sincerely held belief in opposition to same-sex marriage should not be subject to adverse personnel action if he or she shares those personal views in a personal capacity, as long as the member's expression, in his or her personal capacity, is not disruptive to good order and discipline, respects the dignity of those with whom he or she may disagree, and is not coercive in nature.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination.

If confirmed, what role, if any, would you play in the officer promotion system, particularly in reviewing general and flag officer nominations?

Answer. I understand that, for general officer promotions, the Office of the General Counsel reviews the following:

- A. Memoranda of Instruction that govern the conduct of promotion selection boards and subsequent promotion selection board reports.
- B. Adverse information that is not in an officer's official military personnel file that may be presented to the promotion selection board. I have been advised that this information is reviewed to ensure it is accurate and comports with the requirements of title 10 such that the information is "substantiated, relevant information that could reasonably affect the deliberations of the selection board".
- C. Adverse information related to general officers. In general officer cases, the standard for adverse information that must be presented to a promotion selection board is "any credible information of an adverse nature". I have been advised that the Office of the General Counsel participates in a detailed screening process in which all credible information related to officers whose records will be reviewed by a promotion selection board for promotion to a general officer grade. The process ensures that all adverse information is properly identified for presentation to the promotion selection board.

D. Adverse information that becomes available after a promotion selection board makes its recommendations. I have been advised that the Office of the General Counsel provides legal advice to the Secretary of the Air Force so that she may determine whether a promotion review board should be convened to consider whether to continue to support the promotion of the considered officer or take steps to remove the officer from the board report or promotion list.

Question. What is your understanding of the role of the General Counsel of the Department of the Air Force in ensuring the legal sufficiency of statutory selection board processes?

Answer. I understand that, prior to approval by the Secretary of the Air Force, all Memoranda of Instructions for officer promotion selection boards are reviewed by the Office of the General Counsel to ensure the Secretary's instructions conform to statutes and accurately reflect her guidance regarding attributes necessary for service in the next grade. All reports of promotion selection boards are reviewed by the Office of the General Counsel prior to final action on the report by the Secretary. The General Counsel must determine that the Air Force has met applicable statutory standards, DOD direction and Secretary of the Air Force guidelines and that individual selection board reports conform to the law. The General Counsel must advise the Secretary of the Air Force of any case in which a selection board report fails to adhere to the statutory standards, either generally or with regard to a particular officer being considered for promotion. In advising the Secretary of the Air Force and the Office of the Assistant Secretary of the Air Force (Manpower and Reserve Affairs), the General Counsel helps to ensure that Air Force promotion policies properly implement applicable laws and regulations and are fairly applied.

Question. What is the role, if any, of the General Counsel of the Department of the Air Force in reviewing and providing potentially adverse information pertaining to a nomination to the Senate Armed Services Committee?

Answer. It is my understanding that, under current practice within the Department of the Air Force, the General Counsel's office reviews each selection board report, as well as departmental communications to the committee, the President, and the Secretary of Defense concerning nominations, to ensure that the reports and communications comply in form and substance with law and regulation. If confirmed, I will ensure that the General Counsel's office gives special attention to cases of nominees with substantiated or potentially adverse information, in order to ensure that such information is reported to the Senate Armed Services Committee in a timely, accurate, and comprehensible manner.

MILITARY PERSONNEL POLICY AND CASES

Question. In your view, what role, if any, should the General Counsel play in military personnel policy and individual cases, including cases before the Board for Correction of Military Records?

Answer. If confirmed, I will work closely with the Secretary of the Air Force, the Assistant Secretary of the Air Force (Manpower and Reserve Affairs), and other senior Department leaders to ensure that the Department of the Air Force military personnel policies are formulated and applied uniformly, fairly, and in accordance with applicable laws and regulations. If confirmed, it will be my duty to take appropriate action if I become aware of an individual case in which military personnel policies were not fairly and lawfully applied. If confirmed, I will coordinate with the Assistant Secretary of the Air Force (Manpower and Reserve Affairs), who exercises overall supervision of the Air Force Review Boards Agency, regarding the legal sufficiency of the determinations made by the Air Force Board for the Correction of Military Records. In addition, I am aware of, and fully respect, the independent role that the Air Force Board for the Correction of Military Records plays in the correction of military records.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The fiscal year 2013 Department of Defense Annual Report on Sexual Assault in the Military reflects that reports of sexual assaults in the Air Force increased by 33 percent from fiscal year 2012 to 1,047 reports of sexual assault.

What is your assessment of this report?

Answer. I have been working on sexual assault prevention and response in the Air Force for many years now. Victims are now reporting in unprecedented numbers and we view that as a positive sign.

Historically, reports of sexual assault have increased about 5 percent per year since 2006. As you note, in fiscal year 2013, reports are up an unprecedented over 30 percent. Our best assessment is that this increase is consistent with growing confidence in our response system. As the Department of Defense and the Air Force

continue to collect information, I believe we will be able to provide concrete evidence to show that the increase reflects growing confidence in Air Force response systems that provide victims with supportive services and hold offenders appropriately accountable. I believe the success of the Special Victim's Counsel program is playing a significant role in the growing confidence.

Question. What is your assessment of the Air Force sexual assault prevention and response program?

Answer. The Air Force Sexual Assault Prevention and Response program has dramatically improved over the past 2 years. Now directly aligned under the Air Force Vice Chief of Staff reflecting broad Air Force support from the highest levels of leadership, and with the dedication of new resources to address this issue, the program is moving forward very quickly. This office is working hard to implement many new congressional and Department of Defense initiatives, as well as its own. The Air Force is becoming an innovative leader in this area with initiatives that are being adopted across the Department of Defense, such as its Special Victim's Counsel program that provides victims an unprecedented level of service and support.

Question. What is your view of the provision for restricted and unrestricted reporting of sexual assaults?

Answer. Expanded reporting is necessary to provide enhanced care, increase awareness and understanding of the issue, and hold perpetrators accountable. Restricted reporting is a valuable option which ensures that victims who are otherwise not ready to participate in the investigative process have access to the care they desperately need, while at the same time leaving open the possibility to pursue accountability for the offender at a later time.

Question. What is your view about the role of the chain of command in providing necessary support to the victims of sexual assault?

Answer. The chain of command is critical to making progress to prevent instances of sexual assault. Caring, empathetic support by the chain of command is the key to building victim confidence and ensuring victims are encouraged to avail themselves of free legal representation, expedited transfers, and professional responders. The chain of command also plays a significant role in building airmen's awareness of resources available outside the chain of command.

Question. What is your understanding of the adequacy of Air Force resources and programs to provide victims of sexual assault the medical, psychological, and legal help they need?

Answer. As victims of one of society's most underreported crimes continue to come forward in increasing numbers, the resources required to continue the necessary quality of medical, psychological, and legal help may need to be revisited. If confirmed, I will work with senior Air Force leadership to ensure the Air Force continually monitors the adequacy of the resources dedicated to supporting victims.

Question. What is your view of the steps the Air Force has taken to prevent additional sexual assaults both at home station and deployed locations?

Answer. Sexual Assault Prevention and Response is a full-time, worldwide commitment for the Air Force. Airmen receive both pre- and post-deployment briefings, and the Air Force has fully qualified military personnel who are worldwide deployable and prepared for constant rotation to contingency areas to ensure awareness of this program and its importance.

Question. What is your view of the adequacy of the training and resources the Air Force has in place to investigate and prosecute allegations of sexual assault?

Answer. The Air Force has increased its emphasis on both training and resources dedicated to response to allegations of sexual assault. Congress has been very supportive in dedicating funds for this purpose and the Air Force has been quick to develop courses, curriculum, studies, techniques, and specialized training to hone the skills of its investigators and qualify experts who can better support victims and hold perpetrators accountable—while at the same time protecting the rights of all parties involved. If confirmed, I will continue to work with other Air Force leaders to ensure continued availability of adequate training and resources.

Question. What is your view about the role of the chain of command in changing the military culture in which these sexual assaults occur?

Answer. My nearly 30 years of Active Duty, Reserve, and civilian Air Force experience taught me that the chain of command is the catalyst for cultural change in the military. In part, this is because of the responsibility and accountability commanders have for all aspects of their commands, with multiple layers of observation and higher-level oversight. Commanders are specifically charged with maintaining climates of dignity and respect, as well as supporting sexual assault prevention and victim-care principles. Air Force regulations now require commanders to be graded on their success in this endeavor on their annual performance reports.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted?

Answer. I do not have sufficient information or expertise to accurately assess the potential impact. Because of the importance of the chain of command in all prevention and response efforts, I believe it is critical that the chain of command remain significantly involved in holding perpetrators of sexual assault accountable for the crimes they commit.

Question. What additional steps would you take, if confirmed, to address the problem of sexual assaults in the Air Force?

Answer. Given the importance of this issue to the Nation, its Air Force and all its airmen, if confirmed, I will make it my top priority to work with senior leaders to explore and implement new initiatives and seek improvements to our current programs and processes.

WHISTLEBLOWER PROTECTION

Question. Section 1034, title 10, U.S.C., prohibits taking retaliatory personnel action against a member of the Armed Forces as reprisal for making a protected communication. By definition, protected communications include communications to certain individuals and organizations outside of the chain of command.

If confirmed, what actions will you take to ensure that senior military leaders understand the need to protect servicemembers who report misconduct to appropriate authorities within or outside the chain of command?

Answer. If confirmed, I will work with the Inspector General and The Judge Advocate General to ensure that military leaders are fully and accurately advised of the whistleblower protections accorded by law and regulation, and that they understand their legal responsibilities in this important area. In addition, if I become aware of any particular cases involving reprisals, I will ensure that they are addressed in accordance with the law. Whistleblower protections for military personnel are essential to the integrity of the Air Force, and merit serious attention by the General Counsel.

REAL ESTATE TRANSACTIONS

Question. Recent budget cuts continue to adversely impact availability of funds for Air Force military construction projects. To mitigate, the Air Force has used innovative methods to continue to meet the infrastructure requirements of the warfighter. For example, this included working with Oklahoma State officials to lease a former automotive plant to accommodate additional work performed by the Oklahoma City Air Logistics Complex and the purchase of property contiguous to the base for KC-46 depot maintenance. Another initiative is the Enhanced Use Lease project at Hill Air Force Base. However, as with any new public/private endeavor, questions have arisen as to the projects' compliance with statutes written long ago and designed to regulate other practices. Resolving these questions has greatly slowed the approval process for a number of these projects.

How might the law and regulations be modified to facilitate approval of innovative projects based on their merits rather than delayed to ensure compliance with potentially obsolete legal and administrative requirements?

Answer. As the committee is aware, I have a good deal of hands-on experience in public-private partnerships. Specifically, my work in Privatized Military Housing and Enhanced Use Leases, has given me a unique understanding of the opportunities and risks associated with this area of the law. I know that there have been varying interpretations of the intent of legislation within the Air Force and the Department of Defense—often resulting in a “risk averse” interpretation of statute. This sometimes means that innovative initiatives have been subject to time consuming and costly processes . . . which can result in not pursuing or deferring an initiative. If confirmed, my intent is to work with my counterparts across the Air Force and the Department of Defense to identify where these situations exist, and to help them either clarify Air Force interpretation of statute or request legislative change (or support) where needed. Additionally, if confirmed, I will undertake a comprehensive review of the laws and regulations in this area to identify areas that need modification to enhance the ability of the Air Force to take advantage of public-private partnerships and will work closely with the Army, Navy, and Department of Defense to secure their support for legislation to modify, clarify or expand existing authorities in this area.

SUPPORT TO AIR FORCE INSPECTOR GENERAL

Question. What role, if any, do you think the General Counsel of the Air Force should have in reviewing the investigations and recommendations of the Air Force Inspector General?

Answer. If confirmed, I will establish and maintain a close, professional relationship with the Inspector General, and will provide candid, independent, and objective legal advice. As part of my responsibility to review legal and policy issues arising from the Air Force intelligence and counterintelligence activities, I will advise the Inspector General concerning proper reporting of the Air Force intelligence oversight activities. Of course, given the Inspector General's mandate for independence and candor in advising the Secretary as to his investigative findings and recommendations, the Inspector General has final authority over matters within his functional purview.

CIVILIAN ATTORNEYS

Question. Judge advocates in the Armed Forces benefit from an established career ladder, substantial training opportunities, and exposure to a broad spectrum of legal areas and problems. By contrast, civilian attorneys in the Military Departments normally do not have established career programs and may do the same work for many years, with promotion based solely upon longevity and vacancies.

In your opinion, does the personnel management of civilian attorneys need changing? If so, what do you see as the major problems and what changes would you suggest?

Answer. Comprehensive and deliberate professional development of career civilian attorneys and paralegals is an important building block to ensure the Air Force receives the highest quality legal services. In December 2006, the Air Force General Counsel and The Judge Advocate General co-signed an Air Force Civilian Legal Personnel Development Advisory Council Charter that established a program to provide policy and guidance regarding: career progression, training, assignments, program objectives, general operation requirements, and career management actions proposed or initiated in support of legal civilian force management objectives. I served as chair of that Council for 2 years and updated its charter in 2012 to establish and define the role of a development team in pursuing the above-mentioned objectives. I can assure you that the General Counsel and The Judge Advocate General have placed great emphasis on the personnel development of civilian attorneys. The nomination and selection of civilian attorneys to attend Civilian Development Education opportunities has quadrupled since these charters were signed. If confirmed, I will continue to emphasize the importance of an organized and comprehensive approach to the management, training, and development of civilian attorneys.

CLIENT

Question. In your opinion, who is the client of the General Counsel of the Department of the Air Force?

Answer. The client of the General Counsel of the Department of the Air Force is the Department of the Air Force, acting through its authorized officials.

ACQUISITION ISSUES

Question. What role should the General Counsel play in ensuring that Air Force procurement programs are executed in accordance with the law and DOD acquisition policy?

Answer. If confirmed, I will work closely with the Secretary of the Air Force, the Assistant Secretary of the Air Force (Acquisition), and other senior officials to ensure the Department of the Air Force's acquisition and procurement programs are executed in accordance with applicable provisions of law, as well as DOD guidance. Participation by Air Force lawyers should start in the earliest stages of program development. They should seek out potential legal issues and, where appropriate, identify lawful alternative courses of action. Air Force attorneys should also be able to anticipate emerging issues and provide future-oriented guidance that improves the procurement system's ability to provide warfighters with mission-critical systems at prices that are affordable for the taxpayer.

Question. What role should the General Counsel play in ensuring that ethics provisions on conflict of interest are followed both by Air Force personnel and by Air Force contractors?

Answer. Ethics training, acquisition ethics training, and fostering a culture of ethics throughout the Air Force are paramount in creating an organizational climate that is sensitive to the need of avoiding conflicts of interest and that reacts appro-

privately when such issues arise. If confirmed, I will work closely with the Secretary of the Air Force, the Assistant Secretary of the Air Force (Acquisition), The Judge Advocate General, and other senior officials to promote an organizational climate that is sensitive to the need to avoid conflicts of interest and that reacts appropriately when specific issues arise. This also extends to ensuring that Air Force personnel adhere to the letter and spirit of the law relating to post-employment restrictions. Air Force lawyers can make a significant contribution to these endeavors through provision of training, early and sustained involvement in the Department's acquisition programs and procurement activities, and continued instructional outreach to industry.

DETECTING ORGANIZATIONAL CONFLICTS OF INTEREST

Question. Organizational conflicts of interest have become a major concern with the growing use of private contractors being tasked to perform key functions that the services had formerly performed in-house. This has been seen in cases in which highly qualified individuals who expect to be hired as government employees need a salary pending completion of the hiring process.

What do you think the Air Force should do, and what should the General Counsel's role be, in ensuring that the Air Force identifies organizational conflicts of interests and takes the appropriate steps to avoid or mitigate them?

Answer. If confirmed to serve as the General Counsel, I will work with Air Force senior leadership to educate our personnel to understand the circumstances that can lead to an organizational conflict of interest and to identify those circumstances at the earliest opportunity. I will help ensure that all circumstances of potential organizational conflicts are promptly addressed in a manner consistent with appropriate guidance. Our goals need to include avoidance of conflicting roles that might bias a contractor's judgment and prevention of circumstances that may result in an unfair competitive advantage.

Question. What is your understanding of steps the Air Force has taken to address the problems created by delays in the hiring process under circumstances in which the Air Force intends to hire an individual into government service?

Answer. I understand that Air Force leadership has engaged with the Office of Personnel Management, DOD, and associated liaison offices to address factors that can delay hiring actions. If confirmed, I look forward to working with Air Force leadership to continue this effort to minimize or eliminate delays.

LEGAL ETHICS

Question. What is your understanding of the action a Department of the Air Force attorney or an Air Force Judge Advocate should take if the attorney becomes aware of improper activities by a Department of the Air Force official who has sought the attorney's legal advice and the official is unwilling to follow the attorney's advice?

Answer. The attorney should immediately bring the matter to the attention of the attorney's supervisor and, if not satisfactorily resolved, to higher-level supervisory lawyers or authorities in the chain of supervision or command.

Question. Do you believe that the present limits on pro bono activities of government attorneys are generally correct as a matter of policy or does the policy need to be reviewed?

Answer. I understand that Government attorneys may participate in pro bono activities on their own time, consistent with statute, regulation, or other rule or guidelines. I also understand that specific guidance applicable to the JAG Corps permits pro bono work with supervisory approval so long as the representation does not occur on Government time or at its expense, does not interfere with official duties, and does not create a conflict of interest or the appearance of a conflict of interest. Although I am not aware of the need to address pro bono activities, if confirmed, I would review the current policy with The Judge Advocate General.

Question. In your view, do the laws, regulations, and guidelines that establish the rules of professional responsibility for attorneys in the Department of the Air Force provide adequate guidance?

Answer. I understand that all DOD lawyers are required to be members in good standing of a State Bar and are therefore subject to the rules of professional responsibility of their particular jurisdiction. Lawyers engaged in litigation must also comply with the rules of the court in which they appear. All military and civilian lawyers in The Judge Advocate General's Corps must comply with the specific rules applicable to them. If confirmed, I will review the rules of professional responsibility applicable to Air Force lawyers to assess if changes are required.

ROLE IN THE OFFICER PROMOTION AND CONFIRMATION PROCESS

Question. In your view, what is the role of the General Counsel of the Department of the Air Force in ensuring the integrity and proper functioning of the officer promotion process?

Answer. I understand that, under title 10 of the U.S.C., the Secretary of the Air Force is responsible for the proper functioning of the Department of the Air Force promotion selection process. In addition to the legal review of memoranda of instruction and selection board reports to ensure they comport with statutory standards, DOD policy and Secretary of the Air Force guidance, the Air Force General Counsel must also ensure the conduct of the board process conforms to all legal requirements. Additionally, the General Counsel must advise the Secretary of the Air Force of any case in which a selection board report or selection board process fails to adhere to the statutory standards, either generally or with regard to a particular officer being considered for promotion. In advising the Secretary of the Air Force and the Office of the Assistant Secretary of the Air Force (Manpower and Reserve Affairs), the General Counsel helps to ensure that Air Force promotion policies properly implement applicable laws and regulations and are fairly applied.

LITIGATION INVOLVING THE DEPARTMENT OF THE AIR FORCE

Question. In your opinion, what is the relationship between the Department of the Air Force and the Department of Justice with respect to litigation involving the Department of Defense?

Answer. The Department of Justice represents the Department of the Air Force in civil litigation. If confirmed, I will work with The Judge Advocate General to ensure the continuation of a collaborative relationship with the Department of Justice with respect to litigation involving the Department of the Air Force.

Question. In your view, does the Department need more independence and resources to conduct its own litigation or to improve upon its current supporting role?

Answer. It is my understanding that the Air Force's interests in civil litigation are effectively protected and defended by the Department of Justice. If confirmed, I will work with The Judge Advocate General to ensure that adequate resources are available to ensure that the Air Force is able to provide the appropriate level of support to the Department of Justice and protect the Air Force's interests in civil litigation in which the department is involved.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the General Counsel of the Department of the Air Force?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[The nomination reference of Gordon O. Tanner follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 7, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Gordon O. Tanner, of Alabama, to be General Counsel of the Department of the Air Force, vice Charles A. Blanchard, resigned.

[The biographical sketch of Gordon O. Tanner, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GORDON O. TANNER

Education:

Vanderbilt University School of Law

- Attended September 1970–December 1972
- J.D. (Doctor of Jurisprudence) granted December 1972

University of Alabama

- Attended September 1966–May 1970
- B.A. (Political Science) Degree granted May 1970

Employment Record:

Principal Deputy Assistant Secretary (Manpower & Reserve Affairs), Department of the Air Force, Pentagon, Washington DC, November 2013 to Present

Principal Deputy General Counsel, Department of the Air Force, Pentagon, Washington DC, February 2012 to November 2013

Deputy Assistant Secretary (Reserve Affairs), Department of the Air Force, Pentagon, Washington DC, June 2011 to January 2012

Deputy General Counsel (Environment and Installations), Department of the Air Force, Pentagon, Washington DC, February 2008 to June 2011

Chief Counsel, Housing Division, Air Force Center for Engineering and the Environment, Department of the Air Force, Brooks City-Base, San Antonio, TX, July 2000 to February 2008

Senior Partner, Sirote & Permutt Law Firm, Mobile AL, 1988 to 2000

Partner, McDermott, Slepian, Windom & Reed Law Firm, Mobile, AL, 1977–2000

Captain, Judge Advocate, U.S. Air Force, Tyndall AFB FL, June 1973–May 1977

Honors and awards:

Legion of Merit

Outstanding Civilian Career Service Award

Meritorious Service Medal with four oak leaf clusters

Air Reserve Forces Policy Council Exceptional Service Award

Air Force Commendation Medal

Air Force Achievement Medal

Air Force Outstanding Unit Award

Armed Services Reserve Medal

Longevity Service Ribbon with one device

Outstanding Reserve Judge Advocate-Strategic Air Command

Outstanding Reserve Judge Advocate-Eighth Air Force

Who's Who on the Gulf Coast

Best Lawyers in America

Who's Who Among Students in American Colleges and Universities

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Gordon O. Tanner in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Gordon Owen Tanner.

2. **Position to which nominated:**
General Counsel, Department of the Air Force.

3. **Date of nomination:**
April 7, 2014.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
October 28, 1948; Mobile, AL.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Robert Luis Patlan.

7. **Names and ages of children:**
Brooke Tanner Battle, Daughter, (40).
Lindsey Ford Tanner, Daughter (38).
Hampton Lovejoy Tanner, Son (33).

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Vanderbilt University School of Law

- Attended September 1970–December 1972
- J.D. (Doctor of Jurisprudence) granted December 1972

University of Alabama

- Attended September 1966–May 1970
- B.A. (Political Science) Degree granted May 1970

Mary G. Montgomery High School

- Diploma (with honors) granted May 1966

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Principal Deputy Assistant Secretary (Manpower & Reserve Affairs), Department of the Air Force, Pentagon, Washington DC, November 2013 to Present

Principal Deputy General Counsel, Department of the Air Force, Pentagon, Washington DC, February 2012 to November 2013

Deputy Assistant Secretary (Reserve Affairs), Department of the Air Force, Pentagon, Washington DC, June 2011 to January 2012

Deputy General Counsel (Environment and Installations), Department of the Air Force, Pentagon, Washington DC, February 2008 to June 2011

Chief Counsel, Housing Division, Air Force Center for Engineering and the Environment, Department of the Air Force, Brooks City-Base, San Antonio, TX, July 2000 to February 2008

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Admitted, District of Columbia Bar

Admitted, Tennessee Supreme Court

Admitted, U.S. Court of Military Appeals

Admitted, Alabama Supreme Court

Admitted, U.S. Federal District Court (So. Dist. AL)

Admitted, U.S. Tax Court

Admitted, U.S. Court of Appeals (5th Circuit)

Admitted, U.S. Court of Appeals (11th Circuit)

Admitted, U.S. Supreme Court Bar Reserve Officer Association American Bar Association Alabama State Bar Human Rights Campaign (member)

Theta Chi social fraternity

Omicron Delta Kappa (Leadership Honorary Society)

Jasons (University of Alabama Leadership Society)

Pi Sigma Alpha (Political Science Honorary Society)

The University Club of Washington, DC (member)

Kings Creek Country Club, Rehoboth Beach, Delaware (member)

Black Tie Club International (member)

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

2012 - \$600 - Primary Campaign - Andy Staton for State Senate, Delaware

2012 - \$600 - General Election - Andy Staton for State Senate, Delaware

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Legion of Merit

Meritorious Service Medal with four oak leaf clusters

Air Reserve Forces Policy Council Exceptional Service Award

Air Force Commendation Medal

Air Force Achievement Medal

Air Force Outstanding Unit Award

Armed Services Reserve Medal

Longevity Service Ribbon with one device

Air Force Training Ribbon

Donald C. Rasher Award (for outstanding achievement by a Reserve Forces Judge Advocate in the field of continuing legal education.)

Who's Who In American Law (6th through 30th editions)

Who's Who of Emerging Leaders in America Outstanding Reserve Judge Advocate-Strategic Air Command Outstanding Reserve Judge Advocate-Eighth Air Force

Who's Who on the Gulf Coast Best Lawyers In America

U.S. Air Force Reserve Judge Advocate of the Year

Who's Who Among Students in American Colleges and Universities

Outstanding Young Men of America

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Several entries posted on Air Force General Counsel Blog (official site closed)

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. Commitments regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

GORDON OWEN TANNER.

This 25th day of April, 2014.

[The nomination of Gordon O. Tanner was reported to the Senate by Chairman Levin on June 24, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 16, 2014.]

[Prepared questions submitted to Debra S. Wada by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. The Goldwater-Nichols Act changed Department of Defense and Army operations in a positive manner. The Goldwater-Nichols Act's framework has promoted the effective execution of responsibilities and improved inter-service and joint relationships. I do not see the need for modifications at present, but if confirmed will be able to better assess whether any changes are required in today's environment.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not believe modifications are needed at this time.

DUTIES

Question. Section 3016 of title 10, U.S.C., provides that the Assistant Secretary of the Army for Manpower and Reserve Affairs shall have "as his principal duty the overall supervision of manpower and Reserve component affairs of the Department of the Army."

If confirmed, what duties do you expect that the Secretary of the Army will prescribe for you?

Answer. By statute, the Assistant Secretary of the Army for Manpower and Reserve Affairs' principal duty is the overall supervision of manpower and Reserve component affairs. If confirmed, I expect the Secretary will ask me to perform the duties assigned to the Assistant Secretary of the Army for Manpower and Reserve Affairs set forth in Headquarters, Department of the Army, General Orders 2012-01, which include setting the strategic direction for and ensuring Army policies plans and programs for personnel, force structure, manpower management, training, military and civilian personnel readiness, Reserve affairs, and Army protection are executed consistent with law, regulation, and policy.

Question. What actions will you take to enhance your ability to perform the duties of the Assistant Secretary of the Army for Manpower and Reserve Affairs?

Answer. Although my present position has well prepared me to perform these duties, should I be confirmed, I will work to further my knowledge of the Army, its organization, its people, and the necessary resources to perform its mission and meet future challenges. To accomplish this, I will work with the dedicated military and civilian staff, as well as staff throughout the Department, to thoroughly understand the issues the Army currently faces and to best position it for future sustainment and transformation.

Question. In carrying out these duties, what would be your relationship with the following officials:

The Secretary of the Army.

Answer. If confirmed, I will provide timely and accurate advice to the Secretary in the areas of manpower and Reserve affairs. My relationship would be close, direct, and supportive. I would effectively communicate the advice and views of the Secretariat and Army Staff to him. I would ensure I understood his vision for the Army and would oversee the implementation of this vision throughout the Army. I understand I would be subject to his authority, direction, and control.

Question. The Under Secretary of the Army.

Answer. If I am confirmed, my relationship with the Under Secretary of the Army would be close, direct, and supportive. I would communicate the advice and views of the Secretariat and Army Staff to the Under Secretary and oversee the implementation of his decisions falling within my area of responsibility. Because the Under Secretary is the Chief Management Officer of the Department of the Army, I would particularly work closely with the Under Secretary of the Army with respect to his duties in the areas of human capital management and other "business operations" under my purview.

Question. The other Assistant Secretaries of the Army.

Answer. The Assistant Secretaries of the Army set strategic direction for and have principal responsibility for overall supervision of functions within their purview. They lead the development of Army strategic guidance and plans and recommend priorities for programming decisions and budget execution to the Secretary of the Army. If confirmed, I will establish and maintain a close and professional relationship with each of them and work cooperatively in addressing any matter falling under their areas of responsibility.

Question. The General Counsel of the Army.

Answer. The General Counsel is the chief legal and ethics officer of the Department of the Army. The General Counsel's duties include providing both legal and policy advice to officials of the Department of the Army, to include determining the position of the Army on any legal question or procedure. If confirmed, I will establish and maintain a close and professional relationship with the General Counsel.

Question. The Inspector General of the Army.

Answer. The Inspector General of the Army is charged with inquiring into and reporting on the discipline, efficiency, readiness, morale, training, ethical conduct, and economy of the Army. If confirmed, I will establish and maintain a close and professional relationship with the Inspector General of the Army.

Question. The Chief of Legislative Liaison of the Department of the Army.

Answer. The Chief of Legislative Liaison is responsible for all legislative affairs for the Department of the Army, to include developing, coordinating, and supervising policies and programs related to the Army's relations with Congress. If I am confirmed, I will establish and maintain a close and professional relationship with the Chief of Legislative Liaison.

Question. The Under Secretary of Defense for Personnel and Readiness.

Answer. The Under Secretary of Defense for Personnel and Readiness is the principal staff assistant and advisor to the Secretary and Deputy Secretary of Defense for Total Force Management as it relates to readiness, National Guard and Reserve component affairs, health affairs, training, and personnel requirements and management. These responsibilities include the issuance of guidance to the Military Departments. If confirmed, I will develop a close and professional relationship with the Under Secretary of Defense for Personnel and Readiness. I will continuously communicate and coordinate with the Under Secretary of Defense for Personnel and Readiness on matters of mutual interest, articulating the views of the Department of the Army. I will ensure that the Department of the Army is administered in accordance with guidance and direction from the Department of Defense.

Question. The Principal Deputy Under Secretary of Defense for Personnel and Readiness.

Answer. The Principal Deputy Under Secretary of Defense for Personnel and Readiness advises the Under Secretary of Defense for Personnel and Readiness and, from time to time, performs responsibilities that require the issuance of guidance to the Military Departments. If confirmed, I will continuously communicate and coordinate with the Under Secretary of Defense for Personnel and Readiness on matters of mutual interest and in furtherance of the best interest of the Army and the Department of Defense.

Question. The Chief of Staff of the Army.

Answer. The Chief of Staff of the Army is the senior military advisor to the Secretary of the Army and the senior military officer of the Army. He is directly responsible to the Secretary of the Army in the performance of his duties, which include the effective and efficient functioning of Army organizations and commands in performing their statutory missions. If confirmed, I would work closely with the Chief of Staff to supervise the implementation of the Secretary's decisions.

Question. The Deputy Chief of Staff of the Army for Personnel.

Answer. The Deputy Chief of Staff, G-1, is the principal military advisor to the Assistant Secretary of the Army for Manpower and Reserve Affairs. He develops and executes Army strategy, policy, plans, and programs in the areas of manpower, human resources, and personnel readiness issues. I will develop a close and professional relationship with the Deputy Chief of Staff, G-1, if I am confirmed. I expect that, if confirmed, we will work together closely and communicate openly and frequently as we perform our prescribed duties.

Question. The Surgeon General of the Army.

Answer. The Surgeon General is the principal advisor to the Secretary of the Army, the Chief of Staff of the Army for the medical aspects of manning, training, and equipping the Army. She develops and executes Army strategy, policy and plans related to health affairs. Given this role, if I am confirmed, I intend to work closely with her to ensure an effective and efficient military health service system and a medically ready force. One of my focus areas for collaboration would be ensuring quality health care for Wounded Warriors.

Question. The Chief, National Guard Bureau.

Answer. The Chief of the National Guard Bureau is the principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff, on matters involving non-Federalized National Guard forces. The Chief of the National Guard Bureau also is the principal adviser to the Secretary of the Army and the Chief of Staff of the Army on matters related to the National Guard. If confirmed, I will communicate with him openly to strengthen the Army by utilizing the talents and skills available in the Reserve components.

Question. The Director of the Army National Guard.

Answer. The Director of the Army National Guard supports the Chief, National Guard Bureau in his role as the principal advisor on National Guard matters to the Secretary of the Army and the Chief of Staff of the Army. If confirmed, I will develop a close, professional relationship with him and seek his input on all matters of policy and procedure impacting Army National Guard soldiers.

Question. The Chief, Army Reserve.

Answer. The Chief, Army Reserve, is the principal military advisor to the Secretary of the Army and the Chief of Staff of the Army on all U.S. Army Reserve matters. If I am confirmed, I will develop a close, professional relationship with him and seek his input on supervision of Reserve matters across all aspects of Army business.

Question. Soldiers and their families.

Answer. Those men and women who answer the call to duty and service are our Nation's most valuable national security assets. If confirmed, I will work to ensure soldiers are fully trained and ready when called upon and to work diligently to care for soldiers and their families across the total Army and ensure their quality of life is commensurate with their service.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. If confirmed, I believe that my political policy background and experiences have prepared me for the extraordinary opportunity to serve as and execute the duties of the Assistant Secretary of the Army (Manpower and Reserve Affairs).

It is with great honor and pleasure that I currently serve as a professional staff member for the House Armed Services Committee. In my position, it is my responsibility to ensure the passage, defeat, or modification of any legislation that supports the interest and goals of Members of the U.S. House of Representatives with respect to the Department of Defense. Part of that responsibility is to also ensure that such goals and interests support the Department, and are in the best interests of the Nation's national security and servicemembers and their families. In my 15 years with the committee, I have had the tremendous opportunity to work with and for some extraordinary members on key legislative actions, such as the repeal of "don't ask, don't tell," the military's health care program known as TRICARE, and on recruitment and compensation for our servicemembers.

Prior to joining the committee, it was my distinct honor and privilege to serve as a legislative assistant to Senator Daniel Akaka. During my 13 years with him, I was responsible for defense, veterans' affairs, and small business issues. From the onset of my career, I have been passionate about and dedicated to ensuring this Nation's extraordinary servicemembers (Active component, Reserve, and National Guard) receive the support, resources, and recognition they so richly deserve. It is a source of great personal satisfaction and pride to know that my actions may have helped, in some small way, improve their lives.

In 2008, I received the National Military Families Association's Support of Military Families Award and the National Guard Association of the United States' Patrick Henry Award. In 2007, the Military Coalition, a consortium of veterans groups, presented me the Freedom Award. In 2005, I was privileged to be recognized by the Military Officers Association of America, along with my colleague Michael Higgins, with the Colonel Paul W. Arcari Meritorious Achievement Award for our work on pay equity, health care, and the survivor benefit plan. In 2004, the Enlisted Association of the U.S. National Guard presented me the Militia Award in recognition of my actions to improve their pay and benefits. While I have been deeply grateful to be recognized for my work on behalf of our Nation's servicemembers and their families, I never cease to be humbled and amazed by the men and women serving our Nation and the strength of their family members.

If confirmed as the next Assistant Secretary of the Army for Manpower and Reserve Affairs, I pledge to use my 28 years of experiences and policy making skills to effectively and efficiently perform the duties of this position. I vow to be as com-

mitted and dedicated in serving the Department of the Army as our soldiers have been in serving our Nation. It would be a distinct honor to become an official member of the Army family.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Assistant Secretary of the Army for Manpower and Reserve Affairs?

Answer. In my view, the fundamental challenge facing the Assistant Secretary of the Army for Manpower and Reserve Affairs is manning the entire force, which equates to balancing military readiness with the requirements of drawdown. Manning the force with the right mix of manpower in terms of qualified military and civilian personnel, with the requisite contractor support, in the current fiscal environment will be a critical challenge. The Army must continue to recruit, train, and retain the very best; this is critical to the success of our Total Force.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would begin to address these challenges by ensuring full engagement and integration across all organizations that have a role in the process. This would include the entire Army Enterprise, the Office of the Secretary of Defense and, when appropriate, Congress. My efforts would focus on ensuring we articulate requirements, allocate resources, and develop executable policies and programs that are measurable and manageable within the Total Army. I would build upon the accomplishments of the leaders before me and join my other civilian and military counterparts to further refine successful future strategies.

SYSTEMS AND SUPPORT FOR WOUNDED SOLDIERS

Question. Servicemembers who are wounded or injured in combat operations deserve the highest priority from the Army and the Federal Government for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from Active Duty if required, and continuing support beyond retirement or discharge. Despite the enactment of legislation and renewed emphasis over the past several years, many challenges remain.

What is your assessment of the progress made to date by the Army to improve the care, management, and transition of seriously ill and injured soldiers and their families?

Answer. I have been advised that the Army has made great strides by implementing and continuously improving three programs: the Warrior Care and Transition Program, the Integrated Disability Evaluation System, and the Soldier for Life program. All three programs are designed to address the care and transition of wounded, ill, and injured soldiers. If I am confirmed, I will ensure that the Army continues to support these vital programs for Wounded Warriors and their families.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Army's support for wounded soldiers, and to monitor their progress in returning to duty or to civilian life?

Answer. If I am confirmed, I will work closely with the Secretary of the Army, the Chief of Staff of the Army, the leadership of the Warrior Transition Command, and the rest of the Army to ensure that we maintain and enhance the world class support the Army provides to each wounded, ill, and injured soldier. The Nation and the Army owe our soldiers no less.

Question. The Army has proactively provided the Department of Veterans Affairs (VA) with additional staff to help process servicemembers through its portion of the Integrated Disability Evaluation System more quickly.

If confirmed, would you anticipate continuing such collaboration with the VA in order to expedite processing of soldiers through the Integrated Disability Evaluation System?

Answer. I believe sustained communications between the Army and the VA are integral to improve processing of soldiers through the Integrated Disability Evaluation System. I understand the Army has established a number of mechanisms to improve and sustain collaboration with the Veterans Administration at multiple steps in the disability evaluation system process. If I am confirmed, I will ensure the Army maintains soldiers at the DRAS until the end of the fiscal year when the VA believes it will meet joint DOD/VA timeliness standards for case processing.

OFFICER MANAGEMENT ISSUES

Question. As the Assistant Secretary of the Army for Manpower and Reserve Affairs you would have significant responsibilities with regard to officer management policies, the promotion system, and recommending officers for nomination to positions of authority and responsibility.

If confirmed, what changes, if any, would you make to the officer management system?

Answer. I understand that the Army has a robust officer personnel management system that is designed to develop officers throughout their careers. If confirmed, I would pursue enhancements to these policies that would further allow the Army to leverage the unique talents of its officers against emerging mission and unit requirements.

Question. Do you believe the current Army procedures and practices for reviewing the records of officers pending nomination by the President are sufficient to ensure the Secretary of the Army, the Secretary of Defense, and the President can make informed decisions?

Answer. It is my understanding that the Army's processes and policies to identify eligibility and suitability for appointment or re-appointment as officers are sound and provide sufficient information for these decisions. If confirmed, I would fully support current efforts to enhance personnel suitability screening, ensuring rapid information vetting associated with nominations for appointments to higher positions of leadership, trust and responsibility.

Question. In your view, are these procedures and practices fair and reasonable for the officers involved?

Answer. I am informed that the Army's current procedures for vetting personal and professional information protect both individual officer rights and the interests of the Army to advance only those officers who have clearly demonstrated their character, competence, and commitment to the Nation's values. If confirmed, I would support these vetting processes and for any changes proposed, ensure that the due process rights of individual officers are protected.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination.

If confirmed, what role would you play in the officer promotion system, particularly in reviewing general officer nominations?

Answer. If confirmed, I have been told that I will review all O-6 and below promotion lists. With regard to general officer nominations, I will have the opportunity to review every U.S. Army Reserve promotion nomination and all Army National Guard Federal Recognition nominations prior to the Secretary of the Army making a decision.

Question. What is your assessment of the ability of the Services to timely document credible information of an adverse nature for evaluation by promotion selection boards and military and civilian leaders?

Answer. I understand that all officers are screened for potential adverse information prior to being considered for promotion to any general officer grade. If credible adverse information exists, it is reviewed by the promotion board. If an officer with adverse information is then selected for promotion, the adverse information is shown to the military and civilian leadership prior to making a determination on whether to recommend the officer for promotion. I understand that this process continues until the officer is promoted. If confirmed, I will continue full support to this process.

Question. If confirmed, what steps will you take to ensure that only the best qualified officers are nominated for promotion to general and flag officer rank?

Answer. It is my understanding that selections for promotion to general officer are determined by a promotion selection board convened by the Secretary of the Army. The Secretary of the Army and the Chief of Staff of the Army devote considerable time and thought to ensuring that these selection boards select the best qualified officers. The Chief reviews and the Secretary approves board membership and the written guidance provided to the board. The written guidance is specifically designed to ensure the best officers are selected to meet the senior leadership needs of the Army and DOD. If confirmed, I believe my role as the Assistant Secretary of the Army for Manpower and Reserve Affairs would be to ensure that the promotion and personnel utilization system that serve as the foundation for those ultimately selected provide for the developmental needs and progression potential for officers with multiple skills and from diverse backgrounds.

TECHNICAL TRAINING OF GENERAL OFFICERS

Question. In your view, do a sufficient number of Army general officers have advanced training and degrees in scientific and technical disciplines?

Answer. While I believe the Army is able to meet current senior officer requirements in the scientific and technical disciplines, I was advised that the Army's military and civilian leadership has directed a review of these requirements and is awaiting recommendations on providing opportunities/programs directed at ensuring the Army continues to meet these requirements in the years ahead. If confirmed, I will support the implementation of any recommendations approved by the Secretary of the Army.

Question. Are the career paths for officers with technical skills appropriate to ensure that the Army can execute complex acquisition programs, adapt to a rapidly changing technological threat environment, and make informed investment decisions on DOD and Army resources? If not, what will you do to address this deficiency?

Answer. I have been informed that the career paths are appropriate. The goal is to develop an officer corps with the right mix of skills and experiences to provide a capacity of acquisition excellence to the Army. Developmental assignments expose an acquisition officer to a full spectrum of experiences within a primary Acquisition Career Field allowing an acquisition officer to develop acquisition skills and become technically proficient.

As I understand the process, the Army provides career development opportunities, such as Advanced Civil Schooling and Training with Industry programs, to ensure the best and brightest candidates continue to rise to new levels educationally, functionally, and technically. I was told that nearly all of the Army Acquisition Officers in the grade of lieutenant colonel and above have advanced degrees.

END STRENGTH REDUCTIONS

Question. In this year's budget request and Future Years Defense Program, the Department proposes making additional cuts to the Army's Active and Reserve component end strengths. The Department proposes reducing the Army Active component to 450,000 by 2019, and further to 420,000 if sequestration continues in fiscal year 2016 and beyond.

In your view, can the Army meet national defense objectives at the strength levels proposed without sequestration? What about at the strength levels proposed with sequestration?

Answer. I understand that Army leaders have testified that the Army can meet its national defense objectives with an end-strength of 450,000 with significant risk, provided the Army is funded to allow appropriate balance in modernization, procurement, readiness, and manpower accounts. Although the Bipartisan Budget Act partially mitigates impacts from sequestration in fiscal year 2014 and fiscal year 2015, I understand Army leaders have testified that the implementation of sequestration in fiscal year 2016 and beyond would result in an Army unable to meet the Defense Strategic Guidance.

If confirmed, I will focus on how I can best help to ensure the Army is as ready and able as it can be, within fiscal constraints, to accomplish its mission.

Question. If the Army must reduce its Active component end strength to 420,000, where does the Department take risk with respect to the national defense strategy?

Answer. I am aware that both the Secretary of the Army and the Chief of Staff of the Army have testified that reduction to 420,000 in the Active component would leave the Army without the appropriate depth and capacity to successfully meet the Defense Strategic Guidance. If confirmed, I will do all possible to make the Army as capable as possible, and I will work with other senior leaders to ensure that Congress fully understands the consequences of an end strength reduction to such a level.

Question. What is your understanding of the need for additional force shaping tools requiring legislation beyond what Congress has provided the past 3 years?

Answer. I believe Congress has given the Army the authorities necessary to accomplish its present drawdown. If confirmed, I will continually assess our processes and results to ensure the Army reduces end strength in a smart, measured way and identifies any additional legislative changes needed in a timely manner.

Question. In your view, should the number of general officers in the Army be reduced commensurate with the drawdown of total Army end strength?

Answer. I understand that the Army is already decreasing the number of general officers serving internal to the Army from 230 to 219 by March 2016 to meet policy directives from the Secretary of Defense's General Officer (GO) efficiency review. If units led by GOs are part of the end strength reductions, a commensurate reduction in the number of GOs seems logical. If confirmed, I will ensure future GO reductions are based on the needs of the Army considering the nature of responsibilities associated with any specific position.

ARMY FORCE GENERATION MODEL

Question. The Army relies on a force generation model (ARFORGEN) in which units are manned, equipped, and trained to appropriate readiness levels over time as they cycle through “reset and train,” “ready,” and “available for deployment” force pools.

What is your understanding and assessment of the manpower and personnel management requirements of the Army’s force generation methodology?

Answer. I was advised that the current ARFORGEN model has produced the readiness required for persistent conflict over the past 8 years by providing a continuous supply of units available for deployment from across the Total Army. If confirmed, I will ensure the Army reviews the results of this process and considers whether modifications to, or replacement of, ARFORGEN is necessary to meet future requirements.

Question. In your view, what are the greatest manpower and personnel management challenges, if any, in implementing ARFORGEN?

Answer. I believe that the fundamental personnel challenge in implementing ARFORGEN is assigning the right soldier to the right place at the right time. Future challenges to implementing ARFORGEN include meeting the manpower and readiness requirements of the Army during an end strength reduction and during an era of greater unpredictability. If confirmed, I will ensure the Army continues to provide sufficient ready forces to accomplish all assigned missions.

Question. If confirmed, what actions or changes would you propose, if any, to the design, implementation, or management of ARFORGEN?

Answer. If confirmed, I will work to ensure ARFORGEN sustains unit readiness. The Army must meet steady-state requirements, while maintaining readiness to meet the Defense Strategic Planning Guidance: defeating an adversary in one theater while simultaneously denying an adversary victory in another. A sustained readiness for a greater proportion of the Army is our goal. Readiness is especially important as the Army faces the prospect of reducing in size beyond the currently approved fiscal year 2015 levels. Regardless of its final form, I believe ARFORGEN must support the Army Total Force and provide sufficient and ready structure to meet Joint Force requirements.

INDIVIDUAL READY RESERVE

Question. The Department of Defense established a policy in 2005 mandating the discharge of officers in the Individual Ready Reserve (IRR) who are beyond their military service obligations (MSO) unless the officer positively elects to remain in the IRR. Meanwhile, the Commission on the National Guard and Reserves has found that accessing the IRR as a viable source of manpower for the war has been problematic, and that using the IRR as a solution for unit manning is a failed concept.

What are your views on the proper role of the IRR in Army force management planning?

Answer. The Individual Ready Reserve has provided essential, trained manpower that has supported all three components of the Army in times of war. IRR soldiers have also recently been used as Individual Mobilization Augmentees to support operational and Army headquarters. If confirmed, I will ensure the Army thoroughly examines the proper role of the IRR in Army force management planning.

Question. If confirmed, what changes, if any, do you foresee making to the Army’s IRR recall policy?

Answer. I understand that the entire Reserve component has been and remains critical to the Army’s mission accomplishment. If confirmed, I will ensure the Army thoroughly examines the proper role of the IRR in Total Force planning. Careful consideration of all sources of manpower is critical in the present environment of declining end strength and reduced resources.

Question. What are your views about policies affecting continued service by officer and enlisted personnel in the Reserve components who have fulfilled their MSO?

Answer. In my view, retaining quality soldiers should always be one of the Army’s top priorities. As the Army draws down over the next several years, it is more important than ever to retain the training and experience of the best soldiers somewhere in the Total Force. If confirmed, I will ensure the Army carefully considers and effectively manages all sources of manpower given the present environment of declining end strength and reduced resources.

Question. What is your assessment of the adequacy of the system in place for members in the IRR receiving orders to Active Duty to request a delay or exemption for that activation, including the procedures in place for appealing the Army’s decision on that request?

Answer. I am informed there is system for soldiers to request relief from orders based on personal circumstances and a system to appeal decisions. If confirmed, I will do my utmost to ensure this process works efficiently and fairly.

Question. What is your assessment of the value of the IRR to the All-Volunteer Force?

Answer. Careful consideration of all sources of manpower is critical in the present environment of declining end strength and reduced resources. I understand that the entire Reserve component has been and remains critical to the Army's mission accomplishment. If confirmed, I will ensure the Army thoroughly examines the proper role of the IRR for current and future mission requirements.

LESSONS LEARNED

Question. What do you believe are the major personnel lessons learned from Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) which you would seek to address if confirmed as Assistant Secretary of the Army for Manpower and Reserve Affairs?

Answer. I realize that over last 12 years, the Army has faced both operational and readiness challenges resulting from two simultaneous conflicts. When manning the force, I understand the Army has learned valuable lessons on Active component/Reserve component integration, employing and managing the Inactive Ready Reserve, and managing large-scale wartime manning programs such as Stop Loss. To support these operations, the Army developed systems over time that improved and maintained readiness during high OPTEMPO periods, such as the ARFORGEN cycle. If confirmed, I would support this and other efforts to ensure that the hard lessons learned from the past 12 years of conflict are captured in Army doctrine and not forgotten.

NATIONAL GUARD ORGANIZATION, EQUIPMENT, AND READINESS

Question. Legislative proposals introduced in recent years and recommendations of the Commission on the National Guard and Reserves have proposed numerous changes to the roles and responsibilities of the National Guard and Reserves. Several of the proposed changes have been implemented, and numerous others are under consideration.

How do you assess the changes in the role and authorities of the Chief of the National Guard Bureau?

Answer. I recognize that the changes that Congress authorized in the 2008 and 2012 National Defense Authorization Acts, the roles and authorities of the Chief, National Guard Bureau have indeed changed significantly. I believe that the National Guard Bureau is working hard to reorganize the staff to better support the Chief, National Guard Bureau, in his roles as a member of the Joint Chiefs of Staff and as a principal advisor to the Secretary of Defense on matters involving non-Federalized National Guard forces. If confirmed, I look forward to working closely with Army senior leaders; the Chief, National Guard Bureau; and the Director, Army National Guard to ensure that the National Guard remains a full partner in the Total Force.

Question. How do you assess the changes in the roles and mission of the Army National Guard?

Answer. I know that the Army leaders have repeatedly stated that the goal of the Army is to sustain the Army National Guard and Army Reserve as an operational reserve in their capacity as part of the Total Army Force. If confirmed, I will ensure that any end strength reductions to the Reserve component will not compromise its current record high levels of readiness and modernization.

Question. In your view, do the current Army processes for planning, programming, and budgeting sufficiently address the requirements of the Army National Guard? What is the appropriate role of the Chief of the National Guard Bureau and the Director of the Army National Guard in this regard?

Answer. I have been informed that Army National Guard requirements are sufficiently addressed during the Total Army Program Objective Memorandum process. Title 10, U.S.C., provides the authority for the Secretary of the Army to manage the Reserve component, to include responsibility for funding, manning and force structure decisions. The Director of the Army National Guard participates at the highest levels and advises the Secretary of the Army and Chief of Staff of the Army on Army National Guard priorities and requirements and provide assessments of the capabilities and risks associated with Army National Guard allocated funding as a part of the Total Army strategy. The Chief of the National Guard Bureau advises the Joint Staff and Secretary of Defense on National Guard issues based on the

input from the Director of the Army National Guard. I believe these roles are appropriate for the Army's processes.

Question. In your view, what should be the Chief of the National Guard Bureau's role in the assignment of Directors and Deputy Directors of the Army and Air National Guard?

Answer. In my view, the Chief, National Guard Bureau should play an important role in the selection of the Director and Deputy Director of the Army National Guard. The Secretary of the Army convenes an advisory board to provide recommendations regarding the officer to be nominated as the Director of the Army National Guard, and if possible, the Chief, National Guard Bureau should serve as a member of that board or otherwise make recommendations on the officers to be nominated. If confirmed, I will support this process to ensure the Army has the best qualified officers nominated for these important positions.

SUICIDE PREVENTION

Question. The numbers of suicides in each of the Services continue to be of great concern to the committee.

If confirmed, what role would you play in shaping suicide prevention programs and policies for the Department of the Army to prevent suicides and increase the resiliency of soldiers and their families?

Answer. If confirmed, I will focus on providing clear guidance and policy, while championing the Army's efforts under the Ready and Resilient Campaign to ensure that the Army identifies, resources, and sustains the right complement of training and services to build the personal resilience and foster unit and personal readiness of soldiers and their families. It is my understanding that the Ready and Resilient Campaign employs a holistic approach to strengthening the inherent resilience skills, abilities, and capabilities of soldiers and family members. Additionally, the strategy strives to influence bystanders to become interveners standing ready to help others in need of assistance to get the resources they need to overcome life's challenges.

FAMILY READINESS AND SUPPORT

Question. Soldiers and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of concerns among military families as a result of the stress of deployments and the separations that go with them.

What do you consider to be the most important family readiness issues for soldiers and their families, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced, especially in light of current fiscal constraints?

Answer. I am aware that for more than a decade, the Army has continuously asked its soldiers to be apart from their families during long deployments and to cope with the challenges of a high operational tempo. In order for soldiers to serve so selflessly and be effective under these conditions, they must have peace of mind that their families are well cared for at all times. I understand that family readiness is the state of being prepared to effectively navigate the challenges of daily living in the unique context of military service—this is the essence of what is most important for the Army to deliver.

I have been advised that the Army has invested in a wide array of family programs in support of family readiness. Initiatives such as the Exceptional Family Member Program (which considers family members with special needs during the assignments process), Child Development Centers (which provide soldiers with affordable, quality day care), and the Financial Readiness Program (which offers soldiers financial counseling) are just a few examples of the ways the Army is committed to helping its soldiers and families. If confirmed, I will work diligently to support these important programs.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for soldiers and their families, especially in light of deployments. These programs must be relevant and attractive to all eligible users, including Active Duty and Reserve personnel, retirees, and families.

What challenges do you foresee in sustaining Army MWR programs, particularly in view of the current fiscal environment and, if confirmed, are there any improvements you would seek to achieve?

Answer. I understand the MWR income stream could be impacted by the current austere fiscal climate. If confirmed, I will monitor MWR programs and work to pro-

tect them to the greatest extent feasible, and I will work to ensure that available resources are applied to sustaining existing programs and services.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The fiscal year 2013 Department of Defense Annual Report on Sexual Assault in the Military reflects that reports of sexual assaults in the Army increased by 51 percent from fiscal year 2012 to 2,149 reports of sexual assault.

What is your assessment of this report?

Answer. I have been advised that the Army views the increase in reporting in fiscal year 2013 as an indication of a growing level of confidence in the Army's response system and as a sign that victims have increased trust in their chain of command and in the Army's commitment to treat and care for them. An indicator of the growing trust is the increase of sexual assault reports between fiscal year 2012 and fiscal year 2013 that were from incidents occurring prior to military service or involve allegations in which more than a year elapsed between the incident and the report. I share the Army's view that there is still more to do in order to eliminate sexual assaults. If confirmed, I intend to provide my full support in helping the Army achieve this goal.

Question. What is your assessment of the Army's sexual assault prevention and response program?

Answer. I understand that the Army has made substantial progress in addressing the issue of sexual assault. Through the combined efforts of military and civilian leaders at all echelons, I am informed that the Army has implemented an unprecedented number of program and policy initiatives—more than 30 since January 2013—to address this insider threat. These initiatives are enhancing the reporting, investigation and prosecution of sexual assault offenses, increasing the accountability of leaders at all levels—officer, enlisted, and civilian—in fostering a cultural change that will lead to a positive command climate.

If confirmed, I will lead and support the Army's commitment to a holistic approach to effectively change culture, prevent sexual assault and harassment in the ranks, support and advocate for victims, and prosecute offenders to the fullest extent of the law.

Question. What is your view of the provision for restricted and unrestricted reporting of sexual assaults?

Answer. I believe the Army's system for receiving and processing reports of sexual assault, including both restricted and unrestricted reports, is effective. I am informed that since implementing the "restricted" reporting option (which does not initiate a law enforcement investigation) in 2004, the number of total reports has continued to increase. Although the Army prefers for reports to be "unrestricted" so that it may hold perpetrators accountable, by giving victims control over triggering the investigation, the restricted option allows victims time to understand the process, seek the counseling and care they need, and to consult with an attorney if they wish. I understand the conversion of restricted reports to unrestricted is continuing to increase, which I believe is evidence of the success of numerous initiatives and is an indication that victims are gaining more trust in the system. If confirmed, I will ensure that the Army continues to improve upon its response system and continues to enhance victim support.

Question. What is your view about the role of the chain of command in providing necessary support to the victims of sexual assault?

Answer. In my view, the commander, his/her subordinate commanders, and staff members are charged with the ultimate responsibility of caring for soldiers in their charge and ensuring the needs of victims are met. As such, the chain of command must play a vital role in providing compassionate care and support to victims. I understand that the Army is working hard to foster a climate in which victims trust their chain of command to support them if and when sexual offenses occur. The commander-driven change in unit culture as well as compassionate, comprehensive support of victims is critical to assuage victims' fears. I also believe that the Army must hold accountable commanders who fail to do their duty in this regard.

Question. What is your understanding of the adequacy of Army resources and programs to provide victims of sexual assault the medical, psychological, and legal help they need?

Answer. I believe the Army is dedicated to providing soldiers who are the victims of sexual assault with extensive medical, psychological, and legal support services. I have been informed that sexual assault victims are offered the services of a Sexual Assault Response Coordinator (SARC) and a Victim Advocate (VA). When a victim of sexual assault presents at any Military Treatment Facility in the Army, his or her medical needs are managed by a Sexual Assault Clinical Provider and his or

her behavioral health care is provided by the Sexual Assault Behavioral Health Provider.

On the legal support side, I understand that the Special Victims Counsel Program is adequately staffed and resourced to provide victims with the counsel that they require. Special Victims Counsel provide the full range of legal assistance services to victims.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults both at home station and deployed locations?

Answer. I fully understand that both the Secretary of the Army and the Chief of Staff of the Army have listed the prevention of sexual assault as their top priority and are putting actions against those words. As a result, leaders at every echelon and in every location are committed to preventing sexual assaults and caring for victims, and the Army is working diligently to ensure that all soldiers share these commitments. I believe that in order to eliminate the crime of sexual assault, the Army must change the culture of the force, which includes eliminating the stigma associated with reporting these crimes, regardless of whether the reporting soldier is a victim or a bystander. If confirmed, I will be committed to helping the Army drive this cultural change, and will continuously look for innovative ways to combat this difficult problem.

Question. What is your view of the adequacy of the training and resources Army has in place to investigate and prosecute allegations of sexual assault?

Answer. I have been advised that the Army has sufficient training and resources in place to properly investigate sexual assault allegations and prosecute military offenders. Recognizing the critical importance of this issue, if confirmed, I will closely monitor all aspects of the current efforts to prevent sexual assaults, increase reporting, care for victims, and the investigation and prosecution of perpetrators.

Question. What is your view about the role of the chain of command in changing the military culture in which these sexual assaults occur?

Answer. I believe that the chain of command, beginning with senior leaders, is responsible for ensuring that our military culture does not tolerate sexual assault. Commanders are responsible for everything their command does or fails to do, which includes training soldiers on how to prevent sexual assault and holding all leaders accountable for creating a culture that does not tolerate sexual assault. I am told the Army has recently published policies on Command Climate Assessments and Assessing Officers and Non-Commissioned Officers on Fostering Climates of Dignity and Respect as tools to enable commanders and leaders to assess and affect the culture within their units.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted?

Answer. I have been advised that requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted would in effect create a parallel justice system for sexual assault cases. This risks generating confusion and inefficiencies in the military justice system and may undermine the Army's efforts to change the military culture in which sexual assaults have occurred. If confirmed, I will make every effort to ensure that any changes to the military justice system are implemented in a manner that continues the trust and confidence commanders, soldiers, and victims currently have in our administration of military justice.

Question. What additional steps would you take, if confirmed, to address the problem of sexual assaults in the Army?

Answer. If confirmed, I will be an ardent supporter of the Army Sexual Harassment/Assault Response and Prevention Program, and will work with the Secretary of the Army, the Chief of Staff of the Army, the Deputy Chief of Staff, G-1 and the other Headquarters, Department of the Army elements and commanders to ensure that eliminating sexual assault remains a top priority throughout the Army. I will also work to strengthen the faith of the American public and Congress in the Army's prevention and response efforts with regard to sexual assault and sexual harassment.

RELIGIOUS GUIDELINES

Question. In your view, do Department of Defense policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other beliefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. I believe the Army and the Department of Defense take very seriously the Constitutional freedom expressed in the First Amendment for the Free Exercise

of Religion on the part of all citizens, including members in military service. Commanders, leaders, and chaplains work to ensure those protections are afforded to all of our soldiers and families and Department of Army civilians, and that the varied religious practices of soldiers are accommodated, including those with no religious beliefs.

Question. In your view, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Yes. The Army's well-trained Chaplain Corps provides religious support to the Army. That support is provided on the basis of the Soldier's Free Exercise rights. Chaplains provide prayers on many occasions in both private and public settings. Chaplains are never required to pray outside of their individual convictions, beliefs, or religious tradition, or the tenets of the religious organization that provides their endorsement to the Department of Defense and the Department of the Army. I understand that there are no Army policies that either promote or restrict prayers, either in manner or content.

Question. Section 533 of the National Defense Authorization Act for Fiscal Year 2013 (P.L. 112-239), as amended by section 532 of the National Defense Authorization Act for Fiscal Year 2014 (P.L. 113-66) protects rights of conscience of members of the Armed Forces and chaplains of such members, and prohibits, so far as possible, use of such beliefs as the basis of any adverse personnel action, discrimination, or denial of promotion, schooling, training, or assignment. Members of some religious denominations have sincerely held beliefs in opposition to same-sex marriage.

In your view, may a member of the Armed Forces who has a sincerely held belief in opposition to same-sex marriage be subject to adverse personnel action or similar other adverse action, if he or she shares those personal views on the subject in a personal capacity?

Answer. It is my understanding that current policies regarding servicemembers' individual expression and free exercise of religion have not changed since the repeal of the Defense of Marriage Act. If soldiers wish to express their personal views about this issue in an open forum and caveat those as such, then that is purely within their right to do so. I further understand that soldiers may be subject to disciplinary or administrative action only if they advocate racial, gender, or ethnic hatred or intolerance; if they advocate, create, or engage in illegal discrimination based on race, color, gender, religion, or national origin; or if they advocate the use of or use force, violence, or unlawful means to deprive individuals of their rights under the U.S. Constitution. These rights are fundamental, and if confirmed, I will ensure that all Army policies incorporate and protect these rights.

OFFICER ACCESSIONS

Question. What, in your view, is the appropriate relative distribution from the sources of commission to meet the Army's officer accessions requirements and sustain the viability of the Military Academy, Reserve Officer Training Corps, and the Officer Candidate School?

Answer. In my view, there is no single distribution that is appropriate for all circumstances for the Total Army. It is my understanding that each source of commission brings to the force a slightly different strength in terms of academic background, diversity, military cultural indoctrination, and prior military experience. In order to reflect our society's range of talents and strengths and to meet fluid national defense missions and priorities, the Army must periodically adjust the proportion of accessions between all sources of commission. I understand this framework is likely to remain consistent as long as the Nation's needs do not change significantly. However, if confirmed, I will continuously monitor the relative distribution of officers from these commissioning sources.

Question. As Army end strength goes down potentially to numbers as low as 420,000 in the regular Army, 315,000 in the Army National Guard, and 185,000 in the Army Reserve, if confirmed, how would you evaluate and make adjustments, if any, to the relative distribution among sources of commission to meet lower officer accession requirements?

Answer. Should commissioning requirements decrease significantly, I understand that the Reserve Officer Training Corps would be the primary lever for adjusting the Army Officer Accessions. In this regard, I have been told the U.S. Military Academy (USMA) could reduce accessions only slightly without losing the cost effectiveness of their infrastructure, and the Officer Candidate School has already been re-

duced to a minimum sustainment level to accommodate current budget considerations.

U.S. MILITARY ACADEMY

Question. What is your assessment of the policies and procedures at the USMA to prevent and respond appropriately to sexual assaults and sexual harassment and to ensure essential oversight?

Answer. In my assessment, the USMA at West Point possesses effective policies and procedures to prevent and respond appropriately to sexual harassment and sexual assaults and to ensure essential oversight.

USMA has aligned its Sexual Harassment and Assault Response Program along the five lines of effort identified by the Department of Defense as well as the Department of the Army including prevention, advocacy, investigation, accountability, and assessment. Only through this holistic approach, coupled with committed leaders, will the culture change. Leading and supporting this culture change will be one of my top priorities, if confirmed.

Question. What is your assessment of the policies and procedures at the U.S. Military Academy to ensure religious tolerance and respect?

Answer. It is my understanding that the USMA has policies and procedures in place that effectively ensure religious tolerance and respect and support cadets, faculty, and staff in their personal faith choices. I fully support this Constitutional right and appreciate its importance to the Nation and the Army. If confirmed, I will take all necessary steps to ensure the policies of the Army continue to ensure religious tolerance for all faiths.

ASSIGNMENT POLICIES FOR WOMEN IN THE MILITARY

Question. The Department in January 2013, rescinded the policy restricting the assignment of women to certain units which have the primary mission of engaging in direct ground combat operations, and gave the Military Services until January 1, 2016, to open all positions currently closed to women, or to request an exception to policy to keep a position closed beyond that date, an exception that must be approved by the Chairman of the Joint Chiefs of Staff and the Secretary of Defense. The Services are working now to develop gender-free physical and mental standards for all military occupations, presumably with the goal of allowing individuals, regardless of gender, to serve in those positions if they can meet those standards.

If confirmed, what role will you play in the development of these standards?

Answer. If confirmed as the ASA(M&RA), my role would be to provide oversight of the process by reviewing and recommending approval and disapproval of actions regarding the assignment of women to newly opened positions and occupations.

Question. If confirmed, will you ensure that the standards are realistic and preserve, or enhance, military readiness and mission capability?

Answer. Yes. I understand the Army is scientifically evaluating closed combat arms occupations to determine physical performance requirements to ensure the best qualified soldiers have the opportunity to serve in any position for which they are qualified regardless of gender. If confirmed, I will focus on implementing a Total Army Policy that ensures future force capability and readiness by maximizing every soldier's potential, performance and contribution to a ready and modern Army.

Question. Do you believe that decisions to open positions should be based on bona fide military requirements? If so, what steps would you take to ensure that such decisions are made on this basis?

Answer. Yes, I believe success in the Army based solely on ability, qualifications and performance is consistent with Army values and enhances military readiness. That is why the Army is committed to scientifically evaluating the requirements of the job in order to select and train soldiers, regardless of gender, who can meet the requirements of their military occupational specialty. If confirmed, I will do my utmost to ensure the Army maximizes every soldier's potential.

Question. Some family members have expressed concerns about assigning women to what are currently male-only combat units.

To what extent do you believe that this will be a problem in the implementation of this policy?

Answer. As I understand it, the Army is currently developing plans for successfully integrating women into all male units. I am told that in some units with newly opened positions, the Army has assigned more senior female soldiers prior to assigning junior female soldiers and has conducted training for these units. By removing barriers to serve and succeed in the Army, the Army is enhancing military readiness and ensuring that success is based solely on ability, qualifications, and performance.

FOREIGN LANGUAGE PROFICIENCY

Question. A Foreign Language Transformation Roadmap announced by the Department of Defense on March 30, 2005, directed a series of actions aimed at transforming the Department's foreign language capabilities, to include revision of policy and doctrine, building a capabilities based requirements process, and enhancing foreign language capability for both military and civilian personnel.

Answer. Despite this increased emphasis since 2005, the Department appears to have made only modest progress in implementing that transformation. A 2010 GAO report indicated that DOD's efforts to meet the language requirements "had yielded some results but had not closed the persistent gaps in foreign language-proficient staff and reflected, in part, a lack of a comprehensive, strategic approach."

Question. In your view, what should be the priorities of the Federal Government to expanding the foreign language skills of civilian and military personnel and improving coordination of foreign language programs and activities among the Federal agencies?

Answer. I believe that efficiency across all government agencies and departments is valuable, especially in this financially difficult time. If confirmed, I will ensure the Army, as the Executive Agent for the Defense Language Institute Foreign Language Center, continues to provide foreign language training to all government personnel who require it while simultaneously meeting Army and Department of Defense requirements.

Question. If confirmed, what steps would you take to ensure that the Army contributes to implementing a comprehensive, strategic approach to closing the gaps in foreign language proficiency?

Answer. If confirmed, I will ensure that the Army, as the Executive Agent for the Defense Language Institute Foreign Language Center, continues to work closely with the other members of the Department of Defense to provide required training opportunities. I will also work closely with the Army Senior Language Authority in my role as oversight of Army Language programs to assure that there is a continued focus on providing necessary training in foreign language and culture to soldiers and civilians. Additionally, I will assure the Army is involved in Department of Defense working groups designed to review and assess the training, assignment and utilization of professional linguists.

Question. The GAO report also stated that, "On the basis of their operational experiences in Afghanistan and Iraq, ground commanders have expressed the importance of language and culture skills for general purpose forces in counterinsurgency and stability operations, stressing, for example, that language training is as important as marksmanship."

Is there any evidence the institutional Army is giving languages and cultural skills the same high priority as marksmanship in its career development efforts? If more needs to be done, what steps would you propose to take to achieve higher levels of importance for language and cultural training?

Answer. It is my understanding that since 2010, the Army has made language and culture training a requirement for all soldiers deploying to Afghanistan. Additionally, I understand the Army is concluding a review of the career path for professional linguists, and is reviewing language required positions across the total force. If confirmed I will ensure that the Army will meet the established goals for language professionals, while providing necessary training in language and culture for those who are deploying to foreign countries.

LEGISLATIVE FELLOWSHIP PROGRAM

Question. Each year, the Services assign mid-career officers to the offices of Members of Congress under the Legislative Fellows Program. Upon completion of their legislative fellowships, officers are required to be assigned to follow-on positions in their Services in which they effectively use the experience and knowledge they gained during their fellowships.

What is your assessment of the process for the recruitment, selection, preparation, and assignment to Members of Army officers in the Legislative Fellows program?

Answer. It is my understanding that the recruitment, selection, preparation, and final assignment of Army Congressional Fellows to Member of Congress offices is designed to provide the best Army officers, senior noncommissioned officers, and Department of the Army civilians to support both Chambers of Congress with mature and combat experienced (regarding the soldiers) fellows. This is an important program, and if confirmed, I will ensure that the program continues to meet the needs of the Army.

Question. What is your assessment of the value of the Legislative Fellows program to the Army and the utilization of officers who have served as legislative fellows?

Answer. It is my understanding that the Army leader development model is premised on the three pillars of training, education and experience. The Legislative Fellows program, in particular, provides an invaluable opportunity to develop officers, senior noncommissioned officers and Department of the Army Civilians with a unique skill set and critical understanding of the legislative branch. After 1 year as an Army Fellow in a Member of Congress office, a 2-year utilization follows with duty in the following agencies: OCLL (Hill Divisions/Pentagon Offices), Budget Liaison, Army Reserve and National Guard Legislative Liaison offices here in the National Capitol Region.

MANAGEMENT AND DEVELOPMENT OF THE SENIOR EXECUTIVE SERVICE

Question. The transformation of the Armed Forces has brought with it an increasing realization of the importance of efficient and forward thinking management of senior executives.

What is your vision for the management and development of the Army senior executive workforce, especially in the critically important areas of acquisition, financial management, and the scientific and technical fields?

Answer. I believe the Army must ensure that all senior executives have a diverse portfolio of experiences and strong skills to lead and operate effectively in achieving Army's mission and organizational goals. I understand that Army has instituted an enterprise approach to senior executive management through establishment of an annual Talent and Succession Management process. This process is designed to optimally align executive positions with the most critical Army imperatives and priorities, to include acquisition, financial management, and the scientific and technical fields. In the end, the Army's senior executive workforce must be capable of partnering with senior military leaders to lead the Army during these challenging times. If confirmed, I will endeavor to enhance policies to ensure the Army attracts, retains, and develops the best senior executives for all positions.

BALANCE BETWEEN CIVILIAN EMPLOYEES AND CONTRACTOR EMPLOYEES

Question. The Army employs many contractors whom now play an integral role in the performance of functions that were once performed exclusively by government employees, including the management and oversight of weapons programs, the development of policies, the development of public relations strategies, and even the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as Federal employees. Contractors continued to be hired as many civilian positions remained on a hiring freeze over the past few years.

Do you believe that the current balance between civilian employees and contractor employees is in the best interests of the Army?

Answer. I believe achieving a "balance" between civilian and contractor employees is in the best interest of the Army. Achieving balance will be an ongoing process subject to emerging defense requirements, rather than something that is achieved on specific date. In my view, the Army must consider the most appropriate and effective source of labor for functions on a case-by-case basis informed by mission requirements, rather than the implementation of specific manpower quotas.

Question. In your view, has the Army become too reliant on contractors to perform its basic functions?

Answer. In my view, it is critical that the Army use the most appropriate and effective source of labor for individual functions, while also carefully scrutinizing the process to ensure that no inherently governmental functions are outsourced. Functions must be evaluated on a case-by-case basis in order to determine which type of manpower to use. If confirmed, I will work with the Secretary of the Army, the Under Secretary and other Army leaders to assess the extent of the Army's reliance on contractors and ensure compliance with law and policy.

Question. Do you believe that the Army should undertake a comprehensive reappraisal of "inherently governmental functions" and other critical government functions, and how they are performed?

Answer. I understand that the Federal Activities Inventory Reform (FAIR) Act and the Federal Acquisition Regulation (FAR), as well as the Total Force Management statutes of title 10, govern the proper sourcing of labor. Ensuring that the Army complies with the FAIR Act and the FAR is an ongoing process. I believe that the Army must continue to analyze its functions to guarantee an appropriate workforce mix, while ensuring that inherently governmental functions are not

outsourced. If confirmed, I will monitor and scrutinize this area and assess whether any reappraisal is necessary.

Question. If confirmed, will you work with other appropriate officials in the Army to review the contractor and civilian force mix?

Answer. If confirmed, I will work with other appropriate officials in the Army to review the contractor and civilian force mix. Pursuant to title 10, U.S.C., section 129a, I will also work closely with the Under Secretaries of Defense for Personnel and Readiness, Comptroller, and Acquisition, Technology and Logistics, to ensure that the Army continues to operate in a manner consistent with Department of Defense guidance.

Question. Would you agree that the balance between civilian employees and contractor employees in performing Army functions should be determined by the best interests of the Army and not by artificial constraints on the number of civilian employees?

Answer. Yes. In all instances, the Army must execute its missions to the best of its abilities within the available resources in order to best serve our soldiers and the Nation. A key component in Army's overall effectiveness lies in ensuring Army functions are performed with the most appropriate source of labor available.

Question. If confirmed, will you work to remove any artificial constraints placed on the size of the Army's civilian workforce, so that the Army can hire the number of employees most appropriate to accomplish its mission?

Answer. If confirmed, I will meet assigned missions within available funding and using the most appropriate source of labor as required by title 10, U.S.C. sections 129 and 129a. If confirmed, I would support all efforts to ensure compliance with the law and to remove inappropriate constraints on the size of the Army civilian workforce.

SERGEANT BOWE BERGDAHL

Question. Following the recent repatriation of Sergeant Bergdahl after 5 years of captivity with foreign fighters there have been questions about the circumstances under which he became separated from his unit in Afghanistan in 2009.

If confirmed, what is your understanding of your role as Assistant Secretary of the Army for Manpower and Reserve Affairs, concerning review of the facts and circumstances of Sergeant Bergdahl's capture and his status as a member of the U.S. Army?

Answer. I am aware of the recent reports concerning the repatriation of Sergeant Bergdahl and that there are a number of Departmental efforts to clearly establish the facts and circumstances related to this matter. If confirmed, I will provide all support necessary to the combatant commander, the Office of the Secretary of Defense, and the Department of the Army to ensure that any decisions in this matter are fully informed, well analyzed, and coordinated with all the interested parties.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Army for Manpower and Reserve Affairs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided in a timely manner to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

INVOLUNTARY SEPARATIONS

1. Senator AYOTTE. Ms. Wada, under the President's budget request (PBR), the Army is dramatically reducing the size of the force over the Future Years Defense Program. In your answer to the advance policy questions, you state that your fundamental challenge, if confirmed, will be "manning the entire force, which equates to balancing military readiness with the requirements of a drawdown."

According to a report received by the Senate Armed Services Committee, pursuant to section 525 of the National Defense Authorization Act (NDAA) for Fiscal Year 2013, I understand that in the second half of calendar year 2013, the Army involuntarily separated six soldiers. These included two sergeants first class and four staff sergeants—who had 16 or 17 years of service. Over their time of service, these staff sergeants had deployed overseas for contingency operations (presumably Iraq and Afghanistan) for an average of 30 months—2 years away from their loved ones, serving our country and keeping us safe.

I understand that the Army is being forced to reduce its end strength and this requires difficult decisions you would rather not make. How do you view the use of involuntary separations to achieve end strength reduction goals?

Ms. WADA. Involuntary separations are a last resort, but I understand they may be necessary to reduce personnel in a responsible and measured manner. If confirmed, I would ensure the Army uses precision, care, and compassion as it applies all the tools and authorities available in achieving the directed end strength without jeopardizing the success of combat operations and other critical missions.

2. Senator AYOTTE. Ms. Wada, based on your preparation for this hearing, as the Army reduces its end strength this year and next year, how many well-performing officers, noncommissioned officers (NCO), and soldiers—who are not eligible for retirement—will be involuntarily separated from the Army? Please provide specific numbers.

Ms. WADA. I am informed that during fiscal year 2014–2015, a total of 140 non-commissioned officers who are not retirement eligible are programmed for involuntary separation from the Army. I am further told that there will be approximately another 1,300 captains and approximately 400 majors who will separate as a result of separation boards.

I also understand the Army plans to conduct additional Officer Separation Boards in fiscal year 2015, planning to select approximately 1,000 captains for separation. There is additional analysis ongoing to determine which year groups should be considered.

3. Senator AYOTTE. Ms. Wada, will you give me your commitment that you will do everything in your power to minimize the use of involuntary separations for well-performing servicemembers, especially those who are not eligible for retirement?

Ms. WADA. I am committed to doing everything in my power to minimize the use of involuntary separations, in the context of the resource constrained environment in which the Army is operating.

[The nomination reference of Debra S. Wada follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
May 5, 2014.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Debra S. Wada, of Hawaii, to be an Assistant Secretary of the Army, vice Thomas R. Lamont, resigned.

[The biographical sketch of Debra S. Wada, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DEBRA S. WADA

Education:

Drake University, 1980–1984, B.A. in Economics and Political Science, degree granted 1984

Naval War College, Non-resident Seminar Program, diploma June 1997

Employment Record:

House Armed Services Committee, U.S. House of Representatives, Washington, DC, Professional Staff Member, November 1999–January 2007 and January 2011 to present.

House Armed Services Committee, U.S. House of Representatives, Washington, DC, Lead Staff Member for Subcommittee on Military Personnel, January 2007–March 2010.

House Armed Services Committee, U.S. House of Representatives, Washington, DC, Deputy Staff Director, March 2010–December 2010.

National Park Service, Office of Congressional and Legislative Affairs, Washington, DC, Legislative Specialist, January 1999–November 1999.

Senator Daniel K. Akaka, U.S. Senate, Washington, DC, Legislative Assistant, April 1990–December 1998.

Representative Daniel K. Akaka, U.S. House of Representatives, Washington, DC, Legislative Assistant, July 1987–April 1990.

Chemical Manufacturers Association, Washington, DC, Assistant, January 1986–July 1987.

Honors and awards:

Naval Reserve Association, Legislative Proponent Award, December 2008

National Military Families Association, NMFA Support of Military Families Award, September 2008

National Guard Association of the United States, Patrick Henry Award, 2008

The Military Coalition, Freedom Award, October 2007

Military Officers Association of America, Colonel Paul W. Acari Meritorious Achievement Award, 2005

Enlisted Association National Guard of the United States, Militia Award, July 2004

Federal Asian Pacific American Council, September 1991

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Debra S. Wada in connection with her nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior

to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Debra S. Wada.

2. **Position to which nominated:**

Assistant Secretary of the Army (Manpower and Reserve Affairs).

3. **Date of nomination:**

May 5, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

October 31, 1962; Honolulu, HI.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Single.

7. **Names and ages of children:**

N/A.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

St. Andrew's Priory, (6th–12th), 1974–1980, high school diploma, degree granted, 1980.

Drake University, 1980–1984, B.A. in Economics and Political Science, degree granted, 1984.

Drake University, 1984, Masters in Business Administration, no degree American University, August–December 1989, Masters in International Business Management, no degree.

Naval War College, Non-resident Seminar Program, diploma, June 1997.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Professional Staff Member, House Armed Services Committee, U.S. House of Representatives, Washington, DC, 1999–2007 and 2011 to present.

Lead Staff Member for Subcommittee on Military Personnel, House Armed Services Committee, U.S. House of Representatives, Washington, DC, 2007–2010.

Deputy Staff Director, House Armed Services Committee, U.S. House of Representatives, Washington, DC, 2010.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Legislative Affairs Specialist, National Park Service, U.S. Department of Interior, January–October 1999.

Legislative Assistant, Senator Daniel K. Akaka, U.S. Senate, 1990–1999.

Legislative Assistant, Representative Daniel K. Akaka, U.S. House of Representatives, 1987–1990.

Intern, State of Hawaii, summer 1981 and 1982.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

N/A.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

- Wolf Trap
- Kennedy Center
- National Zoo
- Smithsonian Institute
- Congressional Asian Pacific American Staff Association
- Asian American Pacific Islander Ladies on the Hill
- Japanese American Citizens League
- Naval War College

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

N/A.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Volunteered for Obama for President Campaigns, and re-election.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Esther Puakela Kia'aina, Kia'aina for Congress, \$250.00 (2012).

Democratic Congressional Campaign Committee \$250.00 (2010).

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

- Naval Reserve Association, Legislative Proponent Award, December 2008
- National Military Families Association, NMFA Support of Military Families Award, September 2008
- National Guard Association of the United States, Patrick Henry Award, 2008
- The Military Coalition, Freedom Award, October 2007
- Military Officers Association of America, Colonel Paul W. Acari Meritorious Achievement Award, 2005
- Enlisted Association National Guard of the United States, Militia Award, July 2004
- Federal Asian Pacific American Council, September 1991

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DEBRA S. WADA

This 23rd day of May, 2014.

[The nomination of Debra S. Wada was reported to the Senate by Chairman Levin on June 24, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 17, 2014.]

[Prepared questions submitted to Miranda A.A. Ballentine by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I believe the Goldwater-Nichols defense reforms have been very effective, and I am not aware of the need for any modifications.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I am not aware of the need for any modifications to Goldwater-Nichols, but if confirmed, I will work with the Secretary of the Air Force and Under Secretary of the Air Force on any proposed changes that pertain to Air Force installations, environment, and energy.

DUTIES

Question. What is your understanding of the duties and functions of the Assistant Secretary of the Air Force for Installations, Environment, and Energy?

Answer. The Assistant Secretary of the Air Force for Installations, Environment and Energy (SAF/IE) formulates policy and procedures for effective management of the Air Force energy programs, real property, housing and other facilities; environmental protection; and safety and occupational health for both military and civilian personnel. This position is also responsible for the timely completion of closures and realignments of installations under base closure laws. This position manages the strategic basing process.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I bring nearly 2 decades of experience in the private and non-profit sectors. Most recently, I have spent the last 6 years at America's largest corporation, Walmart Stores Inc, which is also the largest private energy user in the United States. I lead a global team of 100+ engineers in over 25 countries who manage the environmental impact and energy portfolio of 11,000 facilities. I am a trusted advisor to top corporate leaders (Walmart's version of "top brass"), and I bring a proven aptitude in developing and implementing energy and environmental strategies, successfully balancing competing priorities between organizational mission, economics and community impact. I have a history of successfully collaborating within complex, matrixed, geographically-disperse organizations, as well as developing successful partnerships with outside stakeholder groups.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Assistant Secretary of the Air Force for Installations, Environment, and Energy?

Answer. One can always enhance one's ability to perform at a higher level. If confirmed, the most immediate actions I intend to take to enhance my abilities include:

- meeting with Members of Congress to ensure their top priorities are factored into policies;
- visiting bases to build a deeper understanding of the state of the Air Force's infrastructure;
- spending time with airmen and their families, to align the SAF/IE policies with our warfighters' needs;

- analyzing existing programs and priorities to assess which programs ought to be accelerated and where there are areas of challenge or vulnerability;
- building relationships with the SAF/IE team, as well as other key partners across the Air Force and the Department of Defense (DOD).

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Air Force would prescribe for you?

Answer. If confirmed, I would expect the Secretary of the Air Force to prescribe the duties and functions stated above. Additionally, I would expect that the Secretary will request that I rely upon my years of experience to assist her in developing and implementing programs to meet the goals and priorities she has laid out for the Department.

RELATIONSHIPS

Question. If confirmed, what would be your professional relationship with: Secretary of the Air Force.

Answer. If confirmed, I will seek to carry out the goals and priorities of the Secretary of the Air Force. Additionally, I expect to be the Secretary's advisor on matters related to installations, environment and energy, and to elevate important issues to her in a timely fashion.

Question. Under Secretary of the Air Force.

Answer. If confirmed, I will work closely with the Under Secretary and seek his counsel and guidance as I work to support his efforts to carry out the goals and priorities of the Secretary of the Air Force. Additionally, I expect to be the Under Secretary's advisor on matters related to installations, environment and energy, and to elevate important issues to him in a timely fashion.

Question. Air Force Chief of Staff.

Answer. If confirmed, I will provide the support that the Chief of Staff of the Air Force requires to execute his duties and responsibilities and achieve the Air Force mission. I and my staff will partner closely with the Chief and his staff as appropriate on his specific areas of focus.

Question. Air Force Vice Chief of Staff.

Answer. If confirmed, I will similarly work closely with the Vice Chief of Staff of the Air Force to execute his duties and responsibilities. I and my staff will partner closely with the Vice Chief and his staff as appropriate on his specific areas of focus.

Question. Other Assistant Secretaries of the Air Force

Answer. If confirmed, I will work as part of the team to ensure that we present the best collaborative approach to supporting the goals and priorities of the Secretary of the Air Force.

Question. Under Secretary of Defense for Acquisition, Technology, and Energy

Answer. If confirmed, I will work with the Under Secretary of Defense for Acquisition, Technology, and Energy to develop and execute the policies and initiatives of the President, the Secretary of Defense, and the Secretary of the Air Force.

Question. Deputy Under Secretary of Defense for Installations and Environment.

Answer. If confirmed, I will work with the Deputy Under Secretary of Defense for Installations and Environment to develop and execute the policies and initiatives of the President, the Secretary of Defense, and the Secretary of the Air Force.

Question. The Assistant Secretary of Defense for Operational Energy Plans and Programs.

Answer. If confirmed, I will work with the Assistant Secretary of Defense for Operational Energy Plans and Programs to develop and execute the policies and initiatives of the President, the Secretary of Defense, and the Secretary of the Air Force.

Question. The Assistant Secretaries of the Army and Navy for Energy, Installations, and Environment.

Answer. If confirmed, I will work closely with the Assistant Secretaries of the Army and Navy for Energy, Installations, and Environment to strengthen the cooperation between the Services. I will work to foster a cordial and productive working relationship with these colleagues, and seek to leverage both knowledge and implementation wherever feasible and viable.

Question. General Counsel of the Air Force.

Answer. If confirmed, I will work closely with the General Counsel of the Air Force to ensure that the programs we execute, and the policies we develop, are consistent with the law.

Question. Judge Advocate General of the Air Force.

Answer. If confirmed, I will work closely with the Judge Advocate General of the Air Force to ensure that the programs we execute with the policies we develop are

consistent with the areas of law contained within his purview. I would also expect to work directly with the Judge Advocate General of the Air Force on areas of mutual interest.

Question. Deputy Chief of Staff of the Air Force for Logistics, Installations and Mission Support.

Answer. If confirmed, I will work with the Deputy Chief of Staff for Logistics, Installations, and Mission Support to identify and implement policies and practices that best support the needs of the Department of the Air Force.

Question. Civil Engineer of the U.S. Air Force.

Answer. If confirmed, I will work with the Air Force Civil Engineer to identify and implement policies and practices that best support the needs of the Department of the Air Force, our airmen and their families.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that confront the Assistant Secretary of the Air Force for Installations, Environment, and Energy?

Answer. Many significant challenges confront the next Assistant Secretary of the Air Force (Installations, Environment, and Energy). Chief among them is ensuring our installations and infrastructure enables the Air Force's mission now and in the future. Enhancing readiness while controlling cost is a challenge in any environment, and I understand the Air Force had to make difficult choices while building this year's budget request and took risk in installation support.

With the largest energy bill in DOD, the Air Force will continue to be challenged to optimize energy productivity to ensure every dollar counts.

Environmental and occupational safety and health issues are of top concern for our people and installations as well.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I plan to work closely with Congress, the Secretary of the Air Force, the Chief of Staff of the Air Force, the Deputy Under Secretary of Defense (Installations and Environment), as well as other governmental and non-governmental organizations to devise solutions to address these challenges. I intend to promptly examine existing policies and procedures to accelerate winning solutions and to identify and repair less successful policies.

Question. What do you consider to be the most significant problems in the performance of the functions of the Assistant Secretary of the Air Force for Installations, Environment, and Energy?

Answer. I am not aware of any significant problems in the performance of the functions of the Assistant Secretary of the Air Force for Installations, Environment, and Energy.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. Again, I am not aware of any significant problems in the performance of the functions of the Assistant Secretary of the Air Force for Installations, Environment, and Energy. If confirmed, I would initiate a review of Air Force programs within the SAF/IE portfolio immediately, evaluate the risks and prioritize the most pressing problems that will require focused attention. I will collaborate with my counterparts in DOD, the Military Services, and within the Air Force where those issues overlay or may impact the responsibilities of others and develop a plan to address these issues.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Assistant Secretary of the Air Force for Installations, Environment, and Energy?

Answer. If confirmed, I will establish priorities consistent with those of the President of the United States, the Secretary of Defense, and the Secretary of the Air Force. In broad terms, I will assist the Secretary of the Air Force in focusing on people, making every dollar count, and balancing readiness for today's fight with modernization to meet tomorrow's challenges. I will lead the Air Force in meeting the energy goals laid out for the Department, seek to allocate funding to develop the right infrastructure at the right time at the right cost to support the mission of the Air Force, our airmen and their families, and work closely with Members of Congress, State and local officials, and the public when considering projects and processes with environmental impacts.

Question. Do you have any specific plans to help improve the quality of life for Air Force families who are under considerable strain as a result of repeated deployments?

Answer. I am not in a position at present to develop specific plans with respect to improving the quality of life of our airmen and their families. However, I clearly recognize the pressures repeated deployments have placed on our Air Force families. If confirmed, I will work in concert with the Secretary of the Air Force to identify and implement quality of life initiatives that can be influenced by the installations, environment, and energy portfolio. Whenever possible, I will seek the insight and views of airmen and their families directly.

The Assistant Secretary of the Air Force for Installations, Environment, and Energy has responsibility for, among other things, construction and maintenance of installations, family housing, energy, weapon system energy, and environmental protection.

Question. In the competition for resources inherent in the Defense Department budget process, how do you believe funding for these various responsibilities should be balanced?

Answer. I am not in a position at present to comment on the relative funding priorities of these programs. Although they would certainly compete for the same limited resources, the development of these programs must be done in conjunction with each other. All of these programs must work hand-in-hand to further the strategic vision and goals of the Secretary of the Air Force.

My previous professional experience of developing strategies within limited capital budgets prepares me well to, if confirmed, execute thoughtful, open, transparent processes for budget-allocation decisionmaking.

MILITARY CONSTRUCTION

Question. What would be your highest priorities, if confirmed, for allocating military construction (MILCON) funding for the Department of the Air Force over the next several years?

Answer. The military construction program priorities should fall in line with overall Air Force priorities. If confirmed, I will work to ensure that those top priorities receive appropriate military construction funding. I understand that the Air Force MILCON budget bore risk in fiscal year 2015 as the Secretary and Chief were forced to make difficult funding decisions. If confirmed, I would work closely with the Air Force's leadership team to thoughtfully, openly, and transparently make decisions about capital allocation that best supports the mission.

BUDGET PRESSURES

Question. In difficult budget times, funding for military construction and facilities sustainment is often deferred in favor of other near-term priorities. However, over the long-term, underfunding of these accounts increases the number of failed and failing facilities, escalates the risk that facilities will fail prematurely, and results in higher restoration and replacement costs.

Do you believe that current funding levels dedicated to military construction and facilities sustainment are adequate to support the operational, housing, and quality of life requirements of the Air Force?

Answer. The Air Force, like all the Services, is making difficult investment trade-offs as budgets decrease. If confirmed, I will review the current and future requirements for infrastructure, to ensure that the Air Force can support its mission requirements and the Secretary of the Air Force's priorities.

BASE CLOSURE AND REALIGNMENTS

Question. DOD has requested another Base Realignment and Closure (BRAC) round.

Do you believe another BRAC round is necessary? If so, why?

Answer. It is my understanding that prior to BRAC 2005, the Office of the Secretary of Defense (OSD) reported 24 percent in excess capacity for the Air Force. BRAC 2005 had little impact in reducing Air Force infrastructure, and since 2005 there has been significant drawdown in both personnel and number of aircraft, indicating the Air Force likely continues to maintain excess infrastructure. It appears another BRAC round would reduce infrastructure and allow the Air Force to concentrate its resources on personnel and mission capabilities.

Question. It has been noted repeatedly that the 2005 BRAC round resulted in major and unanticipated implementation costs and saved far less money than originally estimated.

What is your understanding of why such cost growth and lower realized savings have occurred?

Answer. As I understand BRAC 2005, the key factor that drove the cost of the last BRAC round was the willingness of the Department, the BRAC Commission, and Congress to accept recommendations that were not designed to save money. From my current understanding of BRAC 2005, it appears this round focused on both transformation and efficiencies.

Question. How do you believe such issues could be addressed in a future BRAC round?

Answer. If confirmed, I would work with DOD to ensure Air Force BRAC recommendations meet Department and congressional guidelines in any future round of BRAC if authorized by Congress.

PHASING OF MILITARY CONSTRUCTION PROJECTS

Question. In some cases, the Department has proposed phasing, as opposed to incrementing, large military construction projects over multiple fiscal years even when each distinct phase does not satisfy the overall requirement of the Department. It has been shown that phasing large military construction projects, rather than requesting a single authorization for the complete facility and then seeking incremental authorization of appropriations over multiple fiscal years, can result cost growth of 10 percent or more if all phases are executed independently.

Do you believe phasing, as opposed to incrementing, large military construction projects is appropriate? If so, when?

Answer. I am not currently familiar with difference between phasing and incremental funding of military construction projects. If confirmed I will work to ensure that Air Force policy drives sound decisions regarding authorization and appropriation requests for large military construction projects.

Question. Do you believe phasing of large military construction projects can be justified even when it results in cost growth for the complete facility? If so, how?

Answer. Again, I am not familiar with the specifics of phasing large military construction projects.

OVERSEAS FACILITIES

Question. Do you believe the Department of the Air Force currently maintains excess infrastructure overseas? If so, how would you seek to address this issue?

Answer. I am aware a European Infrastructure Consolidation capacity analysis was directed by OSD last year, however, I have not been briefed on the Air Force or OSD results. I am also aware the report is due to be delivered to Congress this summer.

IN-KIND MILITARY CONSTRUCTION

Question. The committee released a report on April 15, 2013, titled "Inquiry into U.S. Costs and Allied Contributions to Support the U.S. Military Presence Overseas." Among other things, the committee's inquiry found that in-kind payments from Germany, South Korea, and Japan have been used to fund questionable military construction projects. The National Defense Authorization Act for Fiscal Year 2014 requires that future military construction projects funded using in-kind payments or in-kind contributions pursuant to bilateral agreements with partner nations be submitted for congressional authorization in the Military Construction Authorization Act.

If confirmed, how would you ensure that in-kind payments are utilized only for identified U.S. priorities to offset costs that the Department of the Air Force would otherwise pay with appropriated funds?

Answer. If confirmed I would work to ensure Air Force payment-in-kind projects are selected which support identified U.S. priorities, in accordance with National Defense Authorization Act requirements.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in the past have testified that the Military Services under-invest in both the maintenance and recapitalization of facilities and infrastructure compared to private industry standards. Decades of under-investment in DOD installations has led to substantial backlogs of facility maintenance activities, created substandard living and working conditions, and made it harder to take advantage of new technologies that could increase productivity.

If confirmed, what recommendations would you have for restoring and preserving the quality of our infrastructure?

Answer. If confirmed, I will closely examine the way the Air Force manages its facilities and infrastructure and will work with the Secretary of the Air Force and the Chief of Staff of the Air Force to make sure our infrastructure supports the warfighter.

ENHANCED USE LEASES

Question. Congress has provided the authority for each of the Service Secretaries to lease underutilized non-excess property and to use revenues generated by those leases to enhance infrastructure and operating costs on those installations. This so-called “enhanced use lease” (EUL) authority is being used in different ways and for different purposes by each of the Military Departments.

What is your understanding of the EUL authority?

Answer. My understanding is that the enhanced use lease authority is a valuable tool in the Department’s infrastructure management toolbox. My understanding is that the Air Force can use this authority to partner with industry and the outside community to maximize the value and use of Department property.

Question. What do you see as the future of the Department of the Air Force’s EUL program?

Answer. I understand that there are several promising EUL opportunities that the Department of the Air Force is currently examining. If confirmed, I will seek to continue the success of the Air Force’s EUL program.

Question. What Air Force EUL projects do you see as most viable in the near term?

Answer. Because I am not aware of all the current projects or those projects being considered, I could not identify the most viable in the near term. If confirmed, I will examine all of our projects more fully before making such an assessment.

Question. If confirmed, what would be your priorities for the Department of the Air Force’s EUL program?

Answer. Without yet fully evaluating the existing EUL projects, I am not yet in a position to state what my priorities would be, if confirmed. I will however, look to leverage lessons of both successful Air Force projects and those of other branches. If confirmed, I will leverage the EUL program to ensure our warfighters and their families have the highest quality environment in which to live and work and that the Department’s real estate is put to the highest valued uses.

Question. If confirmed, would you consider the authority to provide support to energy initiatives?

Answer. It is my understanding that the Air Force is already actively using the EUL authority for energy initiatives, specifically renewable energy project development, and I support such an approach.

Question. The Congressional Budget Office has expressed concern that EUL authority could be used to acquire expensive facilities through long-term leases that commit DOD to make payments (rather than receiving payments) over an extended period of time. Additionally, the National Defense Authorization Act for Fiscal Year 2011 included a provision designed to ensure that EULs cannot be used to commit future years DOD funds for long-term projects that have not received approval through the normal budgeting process.

Do you believe that it would be appropriate to use EUL authority to commit future years DOD funds for long-term projects to acquire facilities that have not received approval through the normal budgeting process?

Answer. I have not yet had an opportunity to study this issue, but if confirmed, I certainly will do so.

Question. If confirmed, how would you address proposals to use EUL authority in this manner?

Answer. Since I have not had an opportunity to study this issue, I do not know how I would address such proposals if confirmed, but I would ensure that EULs meet legal requirements

REAL ESTATE TRANSACTIONS

Question. Recent budget cuts continue to adversely impact availability of funds for Air Force military construction projects. To mitigate, the Air Force has used innovative methods to continue to meet the infrastructure requirements of the warfighter. For example, this included working with Oklahoma State officials to lease a former automotive plant to accommodate additional work performed by the Oklahoma City Air Energy Complex and the purchase of property contiguous to the base for KC-46 depot maintenance. Another initiative is the Enhanced Use Lease project at Hill

Air Force Base. However, as with any new public/private endeavor, questions have arisen as to the projects' compliance with statutes written long ago and designed to regulate other practices. Resolving these questions has greatly slowed the approval process for a number of these projects.

How might the law and regulations be modified to facilitate approval of innovative projects based on their merits rather than delayed to ensure compliance with potentially obsolete legal and administrative requirements?

Answer. If confirmed, my intent is to identify where these situations exist and identify ways to streamline processes or request legislation that enables doing so.

BASE OPERATING SUPPORT

Question. What is your understanding of the base operating support requirements of the Department of the Air Force?

Answer. My understanding is that Base Operating Support (BOS) requirements of the Department of the Air Force are critical to the overall mission readiness. BOS funding finances installation activities that support operations, critical training, facilities infrastructure maintenance, public safety, and family programs for both Active and Reserve components.

Question. In your view, is the Department of the Air Force receiving adequate funding for base operating support?

Answer. I have not had an opportunity to review BOS funding in detail, but if confirmed, I will closely examine funding levels to ensure the highest quality living and working conditions for our airmen and their families.

How might the Department of the Air Force distribute base operating funds to best ensure sound investment of constrained resources?

Answer. If confirmed, I am committed to learning the methods and processes in place across the Department to guide investment decisions and distribution of resources.

FACILITIES SUSTAINMENT, RESTORATION, AND MODERNIZATION

Question. What is your understanding of the facilities sustainment, restoration, and modernization (FSRM) requirements of the Department of the Air Force?

Answer. My understanding is that facilities sustainment, restoration, and modernization (FSRM) funds maintenance, repairs, and minor modification to facilities and infrastructure.

Question. In your view, is the Department of the Air Force requesting and receiving adequate funding for FSRM?

Answer. I have not had an opportunity to review FSRM funding in detail, but if confirmed, I will closely examine funding levels to ensure the highest possible quality living and working conditions for our airmen and their families within resource constraints and operational imperatives.

Question. How might the Department of the Air Force distribute FSRM funds to best ensure sound investment of constrained resources?

Answer. If confirmed, I am committed to learning the methods and processes in place across the Department to guide investment decisions and distribution of resources.

FAMILY HOUSING AND PRIVATIZATION

Question. In recent years, DOD and Congress have taken significant steps to improve family housing. The housing privatization program was created as an alternative approach to speed the improvement of military family housing and relieve base commanders of the burden of managing family housing. If confirmed for the position of Assistant Secretary of the Air Force for Installations, Environment, and Energy you will have a key role in decisions regarding military family housing.

What are your impressions of the overall quality and sufficiency of Air Force family housing both in the United States and abroad?

Answer. My understanding is that major improvements have been made to the overall quality and sufficiency of family housing, both domestically and overseas.

Question. What are your views regarding the privatization of family housing?

Answer. I believe the use of the housing privatization authorities was an important and necessary tool to revitalize a large inventory of inadequate homes.

Question. What is your view of the structure and general goals of the Department of the Air Force's current housing privatization program?

Answer. I understand the Air Force met its planned privatization goal at the end of fiscal year 2013. If confirmed, I will do all within my power to ensure the continued success of the Air Force housing privatization program.

Question. Do you believe the housing program should be modified in any way? If so, how?

Answer. I have not had an opportunity to review the housing program in detail to determine if it should be modified in any way, but if confirmed, I will closely examine it to ensure the highest quality living conditions for our servicemembers and their families.

ENVIRONMENTAL RESTORATION

Question. The Department of the Air Force's environmental restoration budget remains a significant part of the Air Force's overall environmental program budget.

What do you see as the main priorities for clean-up within the Department of the Air Force program?

Answer. I understand the Department of the Air Force's priorities for clean-up follow priorities established by DOD which are to clean up sites that pose the greatest threat to safety, human health, and the environment first. If confirmed, I will work closely with the Deputy Under Secretary of Defense for Installations and Environment to ensure that those priorities are implemented in the Air Force.

Question. What will you do to ensure that adequate funding is requested and received so that clean-ups under the Installation Restoration Program and under the Military Munitions Remediation Program continue apace?

Answer. If confirmed, I will ensure that I fully understand the Air Force clean-up program needs as they relate to DOD priorities previously referenced, and that adequate funding requests are prepared and submitted to meet those needs in accordance with those priorities; if confirmed, I will advocate for funding to support a program pace commensurate with DOD cleanup performance goals to put cleanup remedies in place and cleanup responses complete.

ENCROACHMENT ON MILITARY INSTALLATIONS

Question. Encroachment by commercial and residential development on military installations can negatively impact Air Force operations at military airfields, training ranges, and the development of new facilities.

What do you see as the main constraints on the Department of the Air Force's ability to use its facilities, including training ranges?

Answer. I am not aware of any specific constraints on the Department of the Air Force's ability to use its facilities, including training ranges. However, if confirmed, I will ensure the Air Force monitors development around Air Force installations, including ranges, and works to actively establish long-term relationships with our local communities and participate in the local land use planning process.

Question. If confirmed, what policies or steps would you take to ensure energy development avoids negatively impacting Air Force missions and, where possible, enhances operations and training?

Answer. I believe that military operations and energy development are not mutually exclusive. If confirmed, I would work closely with Federal, State, and local governments as well as the energy developers to meet the needs of the Department while enabling access to new sources of energy.

Question. How can the Department of the Air Force address the issues of encroachment around its bases in the United States, particularly with respect to encroachment caused by residential development?

Answer. I believe the best way to address the issues of incompatible development is to actively establish long-term working relationships with our local communities and participate in the local land use planning processes.

Question. What is your understanding of the Air Force's ability to receive information and plans from potential developers in a timely and effective manner?

Answer. I am not aware of any specific concerns but, as I stated previously, I believe the best way to address the issues of timeliness of potential development information is to actively establish long-term working relationships with our local communities and participate in the local land use planning processes.

ENERGY POLICY

Question. If confirmed, what would your responsibilities be for setting and implementing energy policy within the Department?

Answer. If confirmed, I will oversee implementation of the energy program throughout the Air Force. My responsibilities would include working with the Secretary and the Under Secretary of the Air Force, the other Assistant Secretaries, and the Air Force Chief of Staff and Vice Chief of Staff to develop overarching energy policy and provide oversight within the Air Force to ensure energy priorities and goals are addressed.

As previously mentioned, with the largest energy bill in DOD, the Air Force will continue to be challenged to optimize energy productivity to ensure every dollar counts.

Question. What is your view of the adequacy of Department of the Air Force funding to meet statutory and regulatory energy conservation goals?

Answer. I am not in a position at present to comment on the relative Air Force funding to meet statutory and regulatory energy conservation goals against overall Air Force priorities. If confirmed, I will review the requirements for Air Force energy programs to ensure they are adequate to meet the challenges the Air Force faces while enhancing mission effectiveness.

Question. Do you believe that significant additional funding will be needed in future years to meet such goals?

Answer. If confirmed, I will work with Air Force leadership and the corporate structure programming and budgeting process to ensure adequate funds are available to meet Air Force energy goals.

DEPARTMENT OF THE AIR FORCE LABORATORY AND TEST CENTER RECAPITALIZATION

Question. There has been concern over the adequacy of recapitalization rates of the Department's laboratory facilities and test centers. Historically, Air Force technical centers, laboratories and test centers do not appear to have fared well in the internal Air Force competition for limited military construction and facility sustainment funds.

What metrics would you use to assess the amount of investment in the recapitalization of Air Force technical centers, laboratories and test centers to determine its adequacy?

Answer. I have not had an opportunity to assess the amount of investment required, but if confirmed, I will closely examine the issue and work with the Assistant Secretary of the Air Force (Acquisition) to determine the appropriate metrics to use.

Question. If confirmed, how would you work to properly recapitalize the Air Force's technical centers, laboratories and test centers?

Answer. If confirmed, I will work directly with the Assistant Secretary of the Air Force (Acquisition) to gain a better understanding of the requirement and within the Air Force Corporate Structure to ensure they have the necessary information to make sound funding decisions.

SECTION 2808 AUTHORITY

Question. Section 2808 of title 10, U.S.C., allows the Secretary of Defense, in the event of a declaration of war or national emergency, to undertake military construction projects supporting the use of Armed Forces with otherwise unobligated military construction funds.

What is your assessment of this authority?

Answer. I believe this authority is vital to provide construction projects necessary under a national emergency or declaration of war.

Question. From a policy standpoint, what restrictions do you believe are appropriate for the use of this authority?

Answer. I am not fully versed in policies regarding this statute. If confirmed, I will ensure the Department is executing any projects under this statute in accordance with applicable guidance.

Question. Do you believe it is appropriate to use this authority outside theaters of armed conflict? If so, in what instances?

Answer. I believe the statute is necessary to allow the department flexibility in executing urgent construction projects in the event of a declaration of war or national emergency. I have not had an opportunity to study it in detail and cannot provide a specific example today. If confirmed, I will evaluate and ensure the authority is used appropriately.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate

and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Air Force for Installations, Environment, and Energy?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[The nomination reference of Miranda A.A. Ballentine follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 30, 2014.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Miranda A.A. Ballentine of the District of Columbia, to be an Assistant Secretary of the Air Force, vice Terry A. Yonkers, resigned.

[The biographical sketch of Miranda A.A. Ballentine, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF MIRANDA A.A. BALLENTINE

Education:

Bachelor of Science, Colorado State University (Magna cum Laude)

- Attended: August 1992–May 1996
- Degree bestowed: May 1996

Masters of Business Administration, George Washington University (top 5 percent)

- Attended: January 2002–December 2003
- Degree bestowed: May 2004

Employment Record:

Walmart Stores, Inc.

- Director of Sustainability, Renewable Energy & Sustainable Facilities + External Stakeholder Engagement
- January 2008–Present

David Gardiner & Associates, LLC

- Vice President of Investor Analysis, Chief Operating Officer, Senior Consultant
- December 2003–January 2008

Environment 2004

- Director of Operations, Assistant Treasurer, and Member of the Board
- February 2004–January 2005

Solar Electric Light Fund

- Operations Director
- 2001–2004

Cellular Junction

- Retail Store Manager
- 1997–2000

Honors and awards:

Academic:

- Magna cum Laude, CSU, 1996

- Golden Key Honor Society, 1996
- George Washington University Distinguished Alumni Award, 2009
- Awarded Best MBA Paper in Corporate Citizenship by Boston College and Net-Impact, 2003

World Economic Forum class of 2013 Young Global Leaders, selected as one of 200 leaders (from 5,000 candidates) from over 70 countries

Walmart professional leadership recognitions:

- Corporate Affairs Key Leader's, 2009
- Leadership Academy, 2011
- Global Leadership Institute, 2012
- Walton Institute, 2013
- Currently ranked in the highest promotable quadrant of Walmart's talent and leadership succession grids

Current and Former Board Service:

- (Former) Chair of renewable energy committee of World Economic Forum's Global Growth Action Alliance (G2A2);
- Member of WEF's Global Agenda Council on New Energy Infrastructure;
- (Former) Chair of The Sustainability Consortium's External Relations Committee;
- (Former) Net-Impact Corporate Advisory Council.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Miranda A.A. Ballentine in connection with her nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Current: Miranda A.A. Ballentine.

Maiden: Miranda Alice Anderson.

Prior Married Name: Miranda Anderson Kinney.

2. **Position to which nominated:**

Assistant Secretary of the Air Force for Installations, Environment, and Energy.

3. **Date of nomination:**

January 30, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

December 28, 1973; Petoskey, MI.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Roger Scott Ballentine.

7. Names and ages of children:

Elizabeth Grose Ballentine, Step-Daughter, age 9.

Grace Marie Ballentine, Daughter, age 4.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Bachelor of Science, Colorado State University (Magna cum Laude)

- Attended: August 1992–May 1996
- Degree bestowed: May 1996

Masters of Business Administration, George Washington University (top 5 percent)

- Attended: January 2002–December 2003
- Degree bestowed: May 2004

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Walmart Stores, Inc.

- Director of Sustainability, Renewable Energy & Sustainable Facilities + External Stakeholder Engagement
- January 2008–Present
- Washington, DC and Bentonville, AR

David Gardiner & Associates, LLC

- Vice President of Investor Analysis, Chief Operating Officer, Senior Consultant
- December 2003–January 2008
- Washington, DC

Environment 2004

- Director of Operations, Assistant Treasurer, and Member of the Board
- February 2004–January 2005
- Washington, DC

Solar Electric Light Fund

- Operations Director
- 2001–2004
- Washington, DC

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Walmart (employer). Director of Sustainability.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

World Economic Forum

- Member of WEF's Forum for Young Global Leaders

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Kathleen McGinty for Governor of PA, 2013, \$500.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Academic:

- Magna cum Laude, CSU, 1996
- Golden Key Honor Society, 1996
- George Washington University Distinguished Alumni Award, 2009
- Awarded Best MBA Paper in Corporate Citizenship by Boston College and Net-Impact, 2003

World Economic Forum class of 2013 Young Global Leaders, selected as one of 200 leaders (from 5,000 candidates) from over 70 countries

Walmart professional leadership recognitions:

- Corporate Affairs Key Leader's, 2009;
- Leadership Academy, 2011;
- Global Leadership Institute, 2012;
- Walton Institute, 2013;
- Currently ranked in the highest promotable quadrant of Walmart's talent and leadership succession grids.

Current and Former Board Service:

- (Former) Chair of renewable energy committee of World Economic Forum's Global Growth Action Alliance (G2A2);
- Member of WEF's Global Agenda Council on New Energy Infrastructure;
- (Former) Chair of The Sustainability Consortium's External Relations Committee;
- (Former) Net-Impact Corporate Advisory Council.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

2008–present, while at Walmart few publications have been published in my name. I have made significant contributions and led copywriting for dozens of Walmart publications, but few have been attributed to me.

- World Economic Forum Blog 2013: The Secret to Affordable Renewable Energy, <http://forumblog.org/2012/11/the-secret-to-affordable-renewable-energy/>

Academic publications:

- Corporate Water Policies: The Business Case for Strategic Water Management. 2003 Awarded Best MBA Paper in Corporate Citizenship 2004 by Boston College and Net-Impact examined the economic, social and competitive advantages of water management for multinational corporations, with focus on risk mitigation, cost control, competitive positioning, and stakeholder and shareholder wealth.
- The Grand Partnership Experiment: ChevronTexaco/USAID in Angola. 2003 Analyzed a multi-million dollar public-private alliance, incorporating cutting-edge scholarship on multisectoral partnerships to examine this initiative from the perspective of WSSD's Type II outcomes.

Solar Electric Dreams. Published in Sustainable Development International, 2002 Analysis of a Solar Electric Light Fund project in the Xixuau-Xiparina Ecological Reserve in Brazil.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

During the last 5 years, I have given several speeches on Walmart's energy policies, careers in the energy/sustainability fields and other topics related to Walmart and my job duties. These speeches have not been reduced to writing, and are presented from PowerPoint slides with notes.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.
(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.
(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MIRANDA A.A. BALLENTINE.

This 9th day of April, 2014.

[The nomination of Miranda A.A. Ballentine was reported to the Senate by Chairman Levin on June 24, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 11, 2014.]

[Prepared questions submitted to Dr. Monica C. Regalbuto by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. What is your understanding of the duties and functions of the Assistant Secretary of Energy for Environmental Management (EM)?

Answer. The mission of the Office of Environmental Management is to complete the cleanup of the environmental legacy of over five decades of nuclear weapons development and nuclear research efforts sponsored by the Federal Government. As the Assistant Secretary for the Office of Management, if confirmed, my paramount duty would be to advance this cleanup work while ensuring the safety of workers.

Additionally, I understand that the Assistant Secretary is responsible for managing Federal staff, Federal budget requests and implementation, overseeing the mission units and keeping abreast of technology developments that could stretch cleanup dollars farther and shorten the time needed to accomplish the mission.

Question. Assuming you are confirmed, what duties and functions do you expect that Secretary Moniz would prescribe for you?

Answer. If confirmed, I expect that Secretary Moniz will continue his focus on project management, including the large EM constructions projects. I expect he will also ask me to focus on overarching issues such as worker safety, continued efforts to improve safety culture throughout the EM complex, and the efficient cleanup of waste throughout the system. I also expect that, if confirmed, I will spend significant time working on recovery efforts to reopen the Waste Isolation Pilot Plant (WIPP).

QUALIFICATIONS

Question. What qualifications and experience do you have that would qualify you to perform the duties of the Assistant Secretary of Energy for Environmental Management?

Answer. I have worked on nuclear energy issues for much of my career, starting in 1988 when I joined Argonne National Laboratory after completing my Ph.D. at the University of Notre Dame. I began my work supporting the development of technologies for the treatment of high-level waste at the Department of Energy pluto-

niium production sites. After developing strong technical skills, I joined BP-AMOCO in 1996, where I enhanced my skills at managing complex projects, large budgets and a multi-disciplinary staff in an industrial setting. I returned to Argonne in 2001, and became the Head of the Process Chemistry and Engineering Department where I worked on new technologies for the treatment of used nuclear fuel and led efforts to identify technical solutions to difficult waste management issues.

In addition, I participated in the Massachusetts Institute of Technology 3-year Fuel Cycle Study Team, published in 2010, which allowed me to gain experience working with high level officials and nongovernment organizations, and also brought to my attention the need for the safe, permanent disposal of all types of radioactive wastes. In 2008, I had the unique opportunity to join the Department of Energy's (DOE) Office of Environmental Management, where I served as a senior program manager supporting their strategic mission in the waste processing area.

In my role as the Deputy Assistant Secretary for Fuel Cycle Technologies within the Office of Nuclear Energy, I was responsible for formulating and articulating strategic options to expedite the resolution of waste management issues.

I have also experienced the intricacies of nuclear waste management from the perspective of a waste generator and from a waste disposal specialist during my time at DOE. One of our Nation's biggest challenges remains to ensure the public that the government is able to fulfill its responsibility regarding the timely handling and cleanup of the nuclear waste originated from both its defense and civilian programs.

I believe my background, experience and commitment have prepared me to lead the Office of Environmental Management during this particularly critical time and I welcome the opportunity to continue my service to the Nation as Assistant Secretary for EM. If confirmed, I pledge to work closely with this committee and others in Congress to ensure that we continue the safe cleanup of the environmental legacy.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the Assistant Secretary of Energy for Environmental Management and the Environmental Management program?

Answer. There is no doubt that the Environmental Management program has its share of challenges. While each EM site faces its own unique set of issues, I have observed large scale challenges across the complex, including project management and the need to execute a critical mission in a time of fiscal constraints. Additionally, a current ongoing challenge is the February 2014 radiological event at WIPP and the continuing efforts to determine the cause of the release, remediate the mine and, reopen the facility.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If I am confirmed, I will be committed to advancing EM's cleanup work while ensuring the safety of workers and the public, and protection of the environment. If confirmed, I would address the aforementioned challenges, including:

- **Project management:** From technology maturity, construction issues to cost estimates, building large projects is difficult. Secretary Moniz has recognized this challenge, and during his reorganization of the Department he created the position of Under Secretary for Management and Performance to, in large part, address project management issues. The Office of Environmental Management was moved from Nuclear Security into the purview of Management and Performance, a signal of the Secretary's commitment to addressing these issues. If confirmed, I would work with the Office of the Under Secretary for Management and Performance to address matters associated with some of EM's largest construction projects, including the Waste Treatment and Immobilization Plant at Hanford and the Salt Waste Processing Facility at Savannah River.
- **Fiscal Constraints:** As the Federal Government continues to face fiscal constraints there have been significant effects throughout the EM complex. DOE must make difficult decisions about prioritizing cleanup work and meeting milestones while ensuring worker and public safety.
- **WIPP:** As the Nation's first operating repository, WIPP is a critical asset to the Department and our country. It is very important that the recovery efforts are done as safely and efficiently as possible while ensuring the safety of the workforce and the public, and protection of the environment. EM and the Department must take a close look at the Accident Investigation Board reports and other independent investigations for both the fire and radiological release incidents to determine what improvements can be made

to ensure that WIPP will be reopened and operated safely. If confirmed, I expect to be very involved in the WIPP recovery effort and I pledge to work closely with you, this committee and the New Mexico delegation on this important issue.

MANAGEMENT ISSUES

Question. The Assistant Secretary for Environmental Management is responsible for cleanup activities occurring at Department of Energy (DOE) sites across the country.

What are your views on the roles and responsibilities of field managers relative to those of Environmental Management (EM) headquarters managers?

Answer. Field managers are responsible for ensuring that the cleanup work is done in a safe and effective manner, and in compliance with applicable laws and regulations. Headquarters managers are responsible for budget formulation, developing policy, and supporting a system-wide approach to accomplish the overall mission and facilitate and enable the field work. Headquarters managers also provide oversight of the field activities to ensure the work is carried out consistent with the use of the most cost effective technologies and the Department of Energy and EM policies.

Question. What is your view of EM's organizational structure? Is there a well-delineated and consistent chain of command and reporting structure from the field staff to headquarters staff, from the contractors to DOE officials, and from the Office of Environmental Management to the Secretary of Energy and other DOE officials?

Answer. I understand the Office of Environmental Management has modified its Headquarters organizational structure to place greater emphasis on budget formulation and strategic planning, acquisition and project management, safety, and technical expertise. I also understand that EM's organizational structure focuses on supporting a system-wide approach to accomplish the overall mission and to facilitate and enable field work within three Mission Units: Site Restoration, Tank Waste, and Nuclear Material and Waste Management. I believe the organizational structure supports its goals by establishing clear lines of responsibility and accountability to improve overall program performance. I also believe that organization and management systems need to be designed in ways that are mutually supportive and should provide structure flexibility to address new challenges as they evolve.

The nature of many of the Department's operations, the complexity of its mission, and its organizational size and structure require a well delineated chain of command to ensure that the program offices and mission support offices in headquarters and the field sites work together to identify and meet mission requirements and to establish greater accountability for results. It is also critically important that in spite of its size, the organization functions in an integrated matter for the benefit of the overall system to accomplish the mission. If confirmed, I will continue to evaluate how the organization is meeting its goals and adjust if needed.

Question. Do the field offices have enough autonomy and flexibility to work with the contractors at the sites to get the cleanup finished in a safe and efficient manner?

Answer. I believe sufficient autonomy and flexibility exist within field offices to enable Federal staff to work with site contractors effectively in completing cleanup activities in an efficient manner. If I am confirmed, I will ensure field office staff and headquarters staff have a clear understanding of their roles and responsibilities within this process to maximize the effective use of their capabilities to get the job done safely and effectively.

It is important to me that EM's sites work throughout the complex to apply lessons learned from one site to another as not every challenge that remains after 25 years of experience is still one of a kind. For example, while Savannah River's tank waste composition is very different than the tank waste at Hanford, technologies that are being used at Savannah River today can and should be explored for use at Hanford. If confirmed, I will work to facilitate knowledge and integration of best practices and successes across field offices.

Question. In your opinion, should the field offices have more autonomy than they currently have?

Answer. I do believe that it is important to delegate as much authority as possible and appropriate to the field offices and their managers, as they are responsible for day-to-day operations. However, the additional authority comes with the responsibility to deliver on performance goals and learn from the experience of and implement best practices from other field offices. Performance is measured by the results obtained, the manner in which they are obtained, and return on investment. If con-

firmed, I will ensure the EM program aligns authority with performance at each site to deliver on its goals and requirements.

Question. The Environmental Management program has used a variety of contracting methods, including management and operating contracts, cost plus award fee contracts, cost plus incentive fee contracts, performance-based, fix-priced contracts, and closure contracts, among others.

What is your view of the utility and appropriate role of these, or other, contracting methods, and what principles do you believe DOE should follow when entering into EM contracts in the future?

Answer. I believe to select the best contract type for a particular DOE requirement, EM must take into account the nature of the risks involved with the work to be performed, the complexity of the requirement, the general technical capability of contractors within the marketplace to perform the work, the work scope needed to meet the contract requirements, and DOE's ability to oversee the work.

My understanding is that since 2013, EM has used a complex-wide, standardized acquisition process that takes into account the nature of EM work, the desire to maximize contractor performance on closure/completion contracts by incentivizing contractors to complete the remaining cleanup work. I am aware that EM currently has over 35 major contracts that are predominately cost type, and 2 Management & Operating contracts.

In December 2013, the Deputy Secretary of Energy issued a policy memo that requires use of fixed price contracts whenever feasible and alignment of contract incentives with taxpayer interests. I believe that EM should be driving to get as close as possible to a fixed price contracts portfolio. However, it is my understanding that the current difficulty of the mission, including cleaning up waste streams that are not completely documented, requires EM to use a variety of contract types and even hybrids of those types to fairly allocate risk, provide an opportunity for reasonable profit rates, cover a wide range of technical difficulty and performance risk and continue to attract contractors. I also recognized that current contracting methods have room for improvement and that better characterization of clean up waste streams and process technology maturity will facilitate this effort, and as such if confirmed, I will support investments in this area.

MISSION

Question. DOE has offered changing views, over the lifetime of the EM program, as to whether the program should focus on cleaning up the sites within its purview as of a date certain or whether the program should have an ongoing mission of cleaning up all surplus DOE facilities, as the facilities become excess, over time.

Do you believe there is a point at which the EM program should stop taking surplus buildings, facilities, or waste streams from other components of the DOE into the EM program for decommissioning, decontamination, and disposal?

Answer. I believe EM should continue its decommissioning, decontamination, and waste disposal missions of legacy installations. It is the most efficient means for DOE to deal with surplus buildings and facilities and waste streams, and during the past 25 years, EM has developed and is continuously improving the core capabilities, including expertise, processes, equipment, and facilities, necessary to deactivate and decommission surplus buildings and facilities and treat and disposition waste. However, as new facilities come on line the cost of waste disposal and end of life decommissioning, decontamination, and disposal must be built into the facility cost structure to minimize the overall future impact to DOE.

From an organizational perspective, it is more effective to have one organization within the Department whose mission is focused on cleanup conduct these activities than having the responsibilities spread among several organizations. I believe the work in EM enables other crucial DOE missions to continue across the United States. By focusing on reducing our cleanup footprint, EM is lowering the overall Department cost of security, surveillance, infrastructure, and overhead costs that would otherwise continue for years to come. In addition, by building the cost of waste disposal and end of life decommissioning, decontamination, and disposal of new facilities, EM, and as a result DOE, will become a much more cost effective organization as it moves from legacy cleanup to sustainability of the DOE complex.

Question. If confirmed, what requirements would you place on the other DOE programs before you would take additional buildings, facilities or waste into the EM program?

Answer. I understand that DOE already has policies and procedures in place that other DOE programs have to meet in order for EM to accept the transfer of additional buildings and waste streams into the EM program. If confirmed, I will continue to ensure any additional facilities proposed to be added to the EM program

be clearly identified and segregated from the current baseline, cleanup costs and schedules for those facilities be determined, and cleanup of those facilities be prioritized according to the principles of the Top-to-Bottom Review. If confirmed, I will ensure that acceptance of additional buildings, facilities or waste into the EM program will be well-reviewed and that future facilities take into account the cost of waste disposal and end of life decommissioning, decontamination, and disposal.

Question. Do you believe it is an appropriate policy for the EM program to “go out of business” at some point and leave the remainder of newly generated waste as the responsibility of existing DOE programs?

Answer. It is the mission of the Office of Environmental Management to complete the safe cleanup of the environmental legacy brought about from 5 decades of nuclear weapons development and government-sponsored nuclear energy research.

EM’s mission will be ongoing for at least the next 35 years. This does not include work that is not currently within the EM baseline. As previously discussed, any additions to the EM program of newly non-legacy generated waste will be well-reviewed and the decision made consciously with an emphasis on cost recovery. When EM’s mission is complete, our elected officials, regulators and the Department of Energy will determine the appropriate path forward for EM. If confirmed, I pledge to work with this committee and others in Congress on this issue.

Question. If not, in your view, how should newly generated wastes be managed and which program (EM or the program generating the waste) should budget for these activities?

Answer. These are important issues, not only for the EM program, but for the Department as a whole. If confirmed, I will continue to ensure any additional facilities proposed to be added to the EM program be clearly identified and segregated from the current baseline, cleanup costs and schedules for those facilities be determined, and cleanup of those facilities be prioritized according to the principles of the Top-to-Bottom Review. In addition I will work to ensure that future facilities take into account the cost of waste disposal and end of life decommissioning, decontamination, and disposal. If I am confirmed, I will be happy to work with you on this issue.

Question. Do you believe that making the program responsible for newly generated waste would incentivize the program to minimize the amount of waste created or, conversely, would it result in the program storing waste, perhaps indefinitely?

Answer. I believe that these are important issues that, if I am confirmed, would require further exploration, analysis and discussion before I could offer an informed opinion. I can say, however, that it is my understanding that the Department remains subject to Federal waste management and other environmental laws, as well as Departmental directives regarding radioactive wastes, all of which will continue to apply, and to govern how waste is stored and managed regardless of which program office has primary responsibility. If I am confirmed, I will be happy to work with you on this very important and relevant issue.

Question. The EM program demonstrated that accelerating cleanup at specific sites could result in a more cost effective approach to cleanup over the long term. After the Rocky Flats and the Fernald Sites were completed, the accelerated approach was abandoned.

If confirmed would you look at renewing an accelerated approach for specific sites if significant long-term cost savings could be achieved?

Answer. Based on my understanding of the successes of Rocky Flats, Fernald, and Mound, I would be willing to consider this approach, particularly if it accomplishes site cleanup in a safe, compliant, and more cost-effective manner. I also understand that EM was able to accelerate certain work with funding from the American Recovery and Reinvestment Act, and accelerate its footprint reduction significantly. However, given the current fiscal constraints, it may be difficult to balance competing risk-based priorities across the EM complex. If confirmed, I would certainly look at this approach and would be happy to work with you on this issue.

Question. Do you believe this promise of accelerated cleanup has yet been realized, and if not, why not?

Answer. The Department of Energy has achieved several successes in its accelerated cleanup efforts, including significant footprint reduction across the EM complex during the American Recovery and Reinvestment Act. However, given the current fiscal constraints and that the bulk of remaining work includes the most difficult cleanup challenges, it may be difficult to balance competing risk-based priorities across the EM complex. If confirmed, I look forward to working with you on this issue.

TECHNOLOGY DEVELOPMENT

Question. Do you believe that the EM program has conducted sufficient technology development so that a treatment and disposition pathway exists for all identified waste streams under the program?

Answer. As mentioned the most difficult challenges are what remain of EM's mission. As characterization technologies evolved during the last 25 years, they have informed the complexity of the treatment needed for waste stabilization. The mission of the Office of Environmental Management has always been challenging, and developing and implementing first-of-a-kind technologies to find further efficiencies in cleaning up waste streams and optimizing disposition pathways will always be an area in which EM will look to improve its ability and enhance its efforts. In short, I do not think that we have done all we can do, and if confirmed, I will work to ensure that the Technology Development and Deployment program continues to make strides in creating innovating solutions to our challenging nuclear waste issues, especially as we address the most difficult waste streams of the mission.

Question. If any orphan waste streams—those for which there is no identified disposition pathway—exist within the EM program, what technology development or other efforts would you undertake, if confirmed, to address them?

Answer. In my capacity as Deputy Assistant Secretary for Fuel Cycle Technologies, I recently led a study that addresses and identifies potential disposal pathways for DOE-managed waste. The report, "Evaluation of Options for Permanent Geologic Disposal of Spent Fuel and High-Level Waste in Support of a Comprehensive National Nuclear Fuel Cycle Strategy," can be found at: <http://www.energy.gov/ne/downloads/evaluation-options-permanent-geologic-disposal-spent-nuclearfuel-and-high-level>. There are a few waste categories that require further evaluation, including sodium-based waste within the EM program.

As you may know, I started my career working on tank waste at Argonne National Laboratory. Our national laboratories provide unique experience in the development of technical solutions that currently don't exist or are not yet fully mature and proven. The Technology Development and Deployment (TDD) program within EM enables the development of first-of-a-kind technologies for cleanup efforts of unique waste streams. I strongly believe that utilizing the DOE national laboratories and other organizations for TDD activities is crucial to addressing challenging waste streams and effectively remediating waste.

If confirmed, I will actively engage and leverage that expertise in executing EM's cleanup mission.

Question. What, in your view, are the continuing requirements for developing and fielding new technologies, and what are the highest priorities?

Answer. I began my career working on tank waste at Argonne National Laboratory in 1988. Twenty-six years later, I can tell you that the retrievability, treatment, processing, and disposition of tank waste is still the most complicated, challenging, and expensive component. As such any effective TDD strategy must target optimization of tank waste treatments. In addition, as mentioned before there are some other waste streams that may require future technology development such as sodium-based waste streams, including "sodium-bonded spent nuclear fuel" from the Fermi lab and the Fast Flux Test Facility at Hanford.

While focusing on specific targeted areas like tank waste and other unique waste streams, subsurface remediation and disposal investigations, an effective TDD strategy can be developed. In addition, a unified systems approach to technology development that incorporates advanced modeling techniques—will facilitate the decision making process. Focused Technology development investments can position EM to optimize cleanup investments as we face continued constrained budgets. If confirmed, I look forward to using my knowledge of the DOE-managed waste inventory and my technical expertise to move the TDD program forward.

WORKFORCE RESTRUCTURING

Question. If confirmed, your duties could involve the review and approval of workforce restructuring plans at sites under the EM program.

Please describe your general approach and philosophy in reviewing workforce restructuring plans.

Answer. My general approach and philosophy is to balance being a good steward of taxpayer resources with attracting and maintaining the staffing needed to carry out our complex and hazardous work. When contract funding is such that the contractor determines it needs to restructure its workforce, I expect the contractors to do so in accordance with the terms of their contracts and the laws prohibiting discrimination. If confirmed, I will ensure that DOE provides balanced oversight of the

contractors' compliance while encouraging innovative approaches to get the best value for taxpayer dollars while minimizing disruption to the contractor workforce.

Question. Given the nature of their work, cleanup workers are fundamentally in a position of "working themselves out of a job".

How do you believe this particular challenge is best handled from both a corporate perspective and as a manager of these workers?

Answer. This is a significant challenge to the workforce from many perspectives. The Department has significant experience in closing down sites, including Rocky Flats, Fernald and Mound, and I understand that EM has found that contractors have a variety of creative and effective tools to manage this situation. If confirmed, I would be happy to work with this committee and other Senators on this important issue.

WASTE INCIDENTAL TO REPROCESSING (WIR)

Question. One of the biggest challenges of DOE's Environmental Management program is emptying the large tanks of highly radioactive waste that exist at defense nuclear sites in South Carolina, Washington, and Idaho. In the National Defense Authorization Act for Fiscal Year 2005, Congress granted DOE, in consultation with the Nuclear Regulatory Commission (NRC), the authority to determine that portions of this waste are not high level radioactive waste and thus DOE may leave residue that meets the requirements of the provision at the bottom of the tanks in South Carolina and Idaho after these tanks are otherwise emptied.

How is DOE using this new authority?

Answer. I understand that DOE has successfully worked with the Nuclear Regulatory Commission (NRC) and State regulators using the section 3116 authority and it will close all of the tanks in Idaho and nearly half the tanks in South Carolina. Further, I understand the NRC will be issuing its consultative report soon for the remainder of the tanks in South Carolina. DOE will then complete the remainder of the regulatory discussions with the State of South Carolina and EPA regarding closure of those tanks. I have been told that to date, 7 out of 11 large tanks in Idaho have been closed and 4 tanks in South Carolina have been closed, with 2 more South Carolina tanks scheduled to be closed in the relatively near term. If confirmed, I look forward to learning more about this authority, and I would be happy to work with you on this issue.

Question. If confirmed will you ensure that the NRC has full access to documents and information at these sites that the NRC determines is needed to allow them to conduct their responsibilities?

Answer. It is my understanding that all communication between DOE and the NRC to date has been public, and if confirmed I will continue that practice. I am aware that the NRC has indicated that it has received all requested information in a timely and complete manner. If confirmed, I will ensure that DOE continues to communicate with the NRC, and to provide all requested documents and information.

WASTE DISPOSAL

Question. Completion of cleanup at a number of EM sites depends on the timely shipment of quantities of transuranic waste to the WIPP in New Mexico for disposal. In some cases, DOE is under regulatory deadlines for completing shipments to WIPP.

What regulatory deadlines does the EM program currently face related to WIPP shipments and what is the current progress against those deadlines?

Answer. I understand the Department is carefully evaluating the impacts of the WIPP shutdown to the transuranic (TRU) generator sites, including impacts on commitments with State regulators. Currently, sites are continuing to characterize and certify transuranic waste for shipment to WIPP. Impacts to cleanup deadlines will depend on the length of the WIPP shutdown.

It is my understanding that the Department is evaluating specific potential impacts, including the Department's ability to meet: the removal of all legacy transuranic (TRU) waste from the Idaho National Laboratory by December 31, 2018; and, certain milestones for the WIPP certification of legacy and contact-handled TRU located at the Oak Ridge Reservation beginning September 30, 2015. The Department announced recently that it would not be able to meet the 3706 Framework Agreement project milestone of June 30, 2014 for the removal of 3706 cubic meters of TRU waste from the Los Alamos National Laboratory. If confirmed, I expect to be very involved in WIPP issues, including the evaluation of potential impacts to cleanup agreements.

Question. Are you aware of any issues that jeopardize DOE's ability to meet these deadlines? If so, what is DOE doing to address these issues?

Answer. It is my understanding that the TRU generator sites are continuing to characterize and certify transuranic waste for shipment to WIPP. As previously mentioned, the major factor affecting the ability to meet the cleanup milestones will depend on the length of the shutdown of the WIPP facility. The Department is working hard with the Los Alamos National Laboratory and its contractors to reopen WIPP in a safe, efficient manner, and if confirmed, I pledge to continue this important work.

Question. What, if any, additional permits or permit modifications are needed for WIPP in order to meet these deadlines?

Answer. I am not aware that any additional permits or permit modifications are necessary at this time. If confirmed, I expect to be very involved in WIPP issues, including this one.

Question. Given the recent fire and then a release of radioactivity at WIPP, if confirmed, will you commit to this committee to review the safety of WIPP, including its culture and material requirements in conjunction with new Office of Independent Enterprise Assessments to determine what actions, if any should be taken and to brief this committee on it in a timely manner?

Answer. As you may know, the Department created two Accident Investigation Boards to investigate the events at WIPP. To date two Accident Investigation Board reports have been released. It is my understanding that a third investigation is currently underway into the cause of the February 14 radiologic event. I understand that the Office of Independent Enterprise Assessments has already been engaged in this issue, and if confirmed, I will make sure they remain engaged.

Question. If WIPP is severely delayed in re-opening what will you do to meet consent order milestones at various defense sites to move transuranic waste off the site?

Answer. It is my understanding that the Department is carefully evaluating the impacts of the WIPP shutdown to the TRU generator sites, including impacts on commitments with State regulators. Currently, sites are continuing to characterize and certify transuranic waste for shipment to WIPP. Impacts to cleanup deadlines will depend on the length of the WIPP shutdown.

HANFORD WASTE TREATMENT PLANT AND THE OFFICE OF RIVER PROTECTION

Question. The prior Office of Health, Safety, and Security performed numerous studies of the safety culture at the Hanford Waste Treatment Plant. Of concern to Congress is the recent firings, by contractors of persons who are considered "whistle blowers", the most recent being in February 2014.

If confirmed will you work with the Department Inspector General to review these firings and report your findings to Congress?

Answer. I am aware of the studies completed by the former Office of Health, Safety, and Security, now called the Office of Independent Enterprise Assessment addressing safety culture issues at the Hanford site.

I understand that the Department has requested that the Inspector General investigate the February 2014 termination of an individual who worked for a subcontractor on the Waste Treatment and Immobilization Plant (WTP) at Hanford. If confirmed, I would closely study any results of this IG investigation.

Question. What is your assessment of the construction at the Waste Treatment Plant of the: (1) pre-treatment facility, (2) High Level Waste Facility, and (3) Low Level Waste Treatment Facility?

Answer. It is my understanding that due to unresolved technical issues construction at the Pretreatment and High-Level Waste Facilities has been largely stopped. As you may know, the technical issues turned out to be much more complex and difficult to resolve than originally envisioned and some require full scale testing. I understand that the Department is actively working toward resolution of these technical issues, including recently issuing a full scale testing plan for some of the toughest technical issues, including those around pulse jet mixing. Regarding the Low-Activity Waste Facility, it is my understanding that construction has continued.

Question. The Department is considering the construction of a Tank Farm Waste Characterization and Staging Facility to pre-treat and homogenize waste from the Tank Farm before entering pretreatment.

If you are confirmed, will you commit to brief the committee at earliest possibility on your assessment of the cost and feasibility of this facility and the ability to treat the low level waste to meet the consent milestones with the State of Washington?

Answer. If confirmed, I would be happy to brief the committee on this issue at the appropriate time.

Question. Do you support the design build process at the waste treatment plant?

Answer. It is my understanding that DOE entered into the design-build process at the WTP many years ago, and to date the project is approximately 65 percent complete overall. It is also my understanding that the Department recently directed that all major construction projects are to adhere to the DOE Order 413 process, whereby 90 percent of design must be completed to move forward with construction. My experience shows that this is a more sustainable approach to large construction projects, and if confirmed, I will monitor this important issue.

Question. Tank AY-102 was discovered last month to have additional leakage, it is double walled tank.

Given constrained budget, what are your views regarding the construction of additional tanks for removal of the waste in this and future leaking tanks vice the construction of the waste treatment plant?

Answer. The best way to address the risk associated with tank waste is to immobilize its contents as soon as possible. I am very conscious of the constrained fiscal situation, and am aware that building additional storage tanks will divert resources from the ultimate solution of immobilizing the waste. I am also aware that specific situations may require more in depth study. This is a difficult balance, and if confirmed, I expect to be very involved in this issue and would look forward to working with this committee and others in Congress on this important issue.

SALT WASTE PROCESSING FACILITY

Question. The Salt Waste Processing Facility (SWPF) at the Savannah River Site has had a series of cost overruns associated with production of processing tanks at the facility.

This facility is critical to removing the high level waste for the underground waste storage tanks. What is your assessment of this program?

Answer. The SWPF is a large, complex, first-of-a-kind radioactive waste treatment facility, and I worked on the development of the technology being implemented at SWPF while at Argonne National Laboratory. I understand that the construction delays and increased project costs were due to the delay in equipment delivery and adequate quality of required infrastructure that affected the targeted construction completion schedule and the project cost. I also understand that the Department of Energy worked with the contractor to develop a project plan which would complete construction of SWPF by December 2016, and cap the taxpayer's liability for completion of the construction.

I believe there is always room for improvement in project and contract management by using clear and enforceable metrics to monitor performance and mitigate cost overruns in construction projects. If I am confirmed, I will ensure contract terms and conditions provide additional emphasis on performance and cost control and improved construction performance and productivity.

CONSENT ORDER MILESTONES

Question. As you are aware most if not all the defense cleanup sites are under agreements with their host states to achieve well defined milestones.

If confirmed will you inform this committee in a timely fashion when the Department determines it will miss major consent order milestones?

Answer. If confirmed, I will maintain open communications with the committee.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Energy for Environmental Management?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[The nomination reference of Dr. Monica C. Regalbuto follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
March 10, 2014.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Monica C. Regalbuto, of Illinois, to be an Assistant Secretary of Energy (Environmental Management), vice Ines R. Triay, resigned.

[The biographical sketch of Dr. Monica C. Regalbuto, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. MONICA C. REGALBUTO

Dr. Monica C. Regalbuto is the Deputy Assistant Secretary for Fuel Cycle Technologies in the Office of Nuclear Energy at the Department of Energy (DOE), a position she has held since 2011. She is currently detailed to DOE from Argonne National Laboratory. Prior to this role, Dr. Regalbuto was Senior Program Manager for the Office of Waste Processing in the Office of Environmental Management at DOE from 2008 to 2010. From 2003 to 2008, Dr. Regalbuto was the head of the Process Chemistry and Engineering Department in Argonne's Chemical Sciences and Engineering Division and from 1996 to 2001, she was a Senior Research Engineer at BP Amoco Oil Company. Dr. Regalbuto received a B.S. in Chemical Engineering from the Instituto Tecnológico y de Estudios Superiores de Monterrey and an M.S. and Ph.D. in Chemical Engineering from the University of Notre Dame.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Dr. Monica C. Regalbuto in connection with her nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Monica Cristina Regalbuto.

Monica Cristina Gonzalez de Regalbuto.

Monica Cristina Gonzalez Banos.

2. **Position to which nominated:**

Assistant Secretary of Energy for Environmental Management .

3. **Date of nomination:**

March 10, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

July 30, 1961; Monterrey Nuevo Leon, Mexico.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to John Robert Regalbuto.

7. **Names and ages of children:**

Jose Ricardo Regalbuto, age 27.

Maria Carolina Regalbuto, age 24.

Jose Roberto Regalbuto, age 21.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

University of Notre Dame, IN, 06/1986–05/1988, Ph.D., Ch.E., 05/1988

University of Notre Dame, IN, 01/1984–05/1986, MS., Ch.E., 05/1986

ITESM*, 08/1979–05/1983, BS., Ch.E., 06/1983

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Dates	Title	Name of employer	Location
11/2011–present ...	Deputy Assistant Secretary for Fuel Cycle Technologies-Intergovernmental Personnel Act agreement.	Department of Energy's (DOE) Office of Nuclear Energy (NE).	Washington, DC
11/2008–11/2011	Senior Program Manager-Intergovernmental Personnel Act agreement.	Department of Energy (DOE) Office of Environmental Management (EM).	Washington, DC
01/2009–09/2010	Research Affiliate (no pay)	Massachusetts Institute of Technology.	Boston, MA
04/2009–04/2013	Board Member (no pay)	Illinois High School District 255	Glenview, IL
01/2001–Present ...	Department Head	Argonne National Laboratory	Argonne, IL
12/1996–01/2001	Research Engineer	Amoco Oil Company now BP (British Petroleum).	Naperville, IL
09/1988–12/1996	Chemical Engineer	Argonne National Laboratory	Argonne, IL

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

- American Nuclear Society
- American Institute of Chemical Engineers

*Instituto Tecnológico y de Estudios Superiores de Monterrey (Monterrey Nuevo Leon, Mexico)

- American Chemical Society
- Society of Women Engineers
- Sigma Xi Scientific Research Society

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

- 2014, U.S. Department of Energy Secretary's Achievement Award
- 2011, U.S. Department of Energy Secretary's Achievement Award
- 2010, Powerful Hispanics in Energy, Hispanic Engineer & Information Technology Magazine
- 2009, 25 Outstanding Hispanic Women in Business, HispanicBusiness.com
- 2007, Professional Achievement Award, Hispanic Engineer National Achievement Award Corporation (HENAAC)
- 2007, Jane Oestmann Professional Women's Achievement Award, American Nuclear Society
- 2005, Outstanding Engineering Achievement by the Illinois Engineering Council

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

See attachment.

[Nominee responded and the information is contained in the committee's executive files.]

16. Speeches: Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. Commitments regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth

in the Appendix to this volume. The nominee's answers to Parts B-F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MONICA C. REGALBUTO.

This 9th day of April, 2014.

[The nomination of Dr. Monica C. Regalbuto was reported to the Senate by Chairman Levin on June 24, 2014, with the recommendation that the nomination be confirmed. The nomination was returned to the President at the end of the 113th Congress on December 17, 2014, under provisions of Senate Rule XXXI, paragraph 6 of the Standing Rules of the Senate.]

**NOMINATIONS OF ADM WILLIAM E. GORTNEY,

GENERAL AND COMMANDER, U.S. SPECIAL
OPERATIONS COMMAND**

THURSDAY, JULY 10, 2014

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:33 a.m. in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Nelson, McCaskill, Udall, Manchin, Gillibrand, Donnelly, Kaine, King, Inhofe, McCain, Sessions, Ayotte, Fischer, Graham, and Cruz.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

The committee meets today to consider the nominations of Admiral William Gortney to be Commander, U.S. Northern Command (NORTHCOM) and Commander, North American Aerospace Defense Command (NORAD); General John Campbell to be Commander, International Security Assistance Force (ISAF) and Commander, U.S. Forces, Afghanistan; and Lieutenant General Joseph Votel to be Commander, U.S. Special Operations Command (SOCOM).

Welcome to all of you and to each of you, and we thank you for your many, many years of great service to our Nation and for your willingness to continue to serve in these positions of huge responsibility. We thank you and your family members. Our senior military officers are asked to undertake long hours and immense workloads,

and we know, as you do, that your success in these roles would not be possible without the support of your families. Please feel free to introduce those members who are with you today when it comes to be your turn.

All three nominees have impressive records of service and are well qualified for the positions to which they have been nominated. Admiral Gortney has been the Commander of U.S. Fleet Forces Command, including U.S. Naval Forces Northern Command; the Director of the Joint Staff at the Pentagon; and the Commander of U.S. Naval Central Command/U.S. FIFTH Fleet.

General Campbell has been the Vice Chief of Staff of the Army; Deputy Chief of Staff of the Army; and Commander of the 101st Airborne Division in Afghanistan.

General Votel has been Commander of the Joint Special Operations Command; Deputy Commander of the Joint Improvised Explosive Device (IED) Defeat Organization; and Chief of Staff of the Special Operations Command.

Our nominees will assume some of the most demanding positions in our military. Admiral Gortney's NORTHCOM responsibilities will include defense of the Homeland and supporting civil authorities in case of natural and manmade disasters. Admiral Gortney will also be dual-hatted as the Commander of NORAD, our binational command with Canada, which has the mission of providing aerospace warning, aerospace control, and maritime warning for North America.

General Campbell will assume his position in a time of significant transition in Afghanistan. He will be tasked with implementing the withdrawal of U.S. combat troops by the end of the year, while simultaneously supporting counterterrorism (CT) operations and sustaining the mission to train, advise, and assist the Afghan Security Forces as they continue to assume responsibility for their nation's security.

The current political uncertainty in Afghanistan stemming from the allegations of election fraud threatens to derail significant gains made throughout the country. The two presidential candidates in Afghanistan have stated publicly and to me personally last Sunday that a comprehensive audit of the election results is needed—they both agree on that—and that they will abide by the results of such an audit. Regardless whether the candidates can agree on the details of the audit process, it is the duty of the Afghan election commissions to move forward to identify and eliminate fraudulent ballots so that they can announce a credible election result. General Campbell, I would appreciate hearing your views on the ongoing political events and what impacts they could have on the security situation in Afghanistan.

General Votel will assume the helm of a force that has sustained an exceptionally high operational tempo for nearly 13 years of war. As we draw down our forces in Afghanistan, we will need to give particular attention to the role of special forces and their continued ability to carry out the counterterrorism mission in Afghanistan. General, I will look forward to hearing from you how you will address these challenges while also ensuring that the men and women of the special operations community are not shouldering an undue burden.

I want to thank our nominees again for being with us, for your great service to our Nation. We look forward to your confirmation. I will now call on Senator Inhofe.

STATEMENT OF SENATOR JAMES M. INHOFE

Senator INHOFE. Thank you, Mr. Chairman.

I thank all three of you for the time that you gave me and the rest of us up here at the dais.

General Campbell, as the Commander, you are going to be tasked with overseeing the mission in Afghanistan. Certainly General Dunford has done a great job. It is a serious thing that we are dealing with over there.

The recent presidential elections have been marred by allegations of widespread voter fraud. For example, in the province here, they went from 17,000 votes that were cast in the first election. It jumped to 170,000 in the runoff. Then, keeping in mind that Ghani's force and influence probably is greater in the rural areas, during the last election—this is unprecedented. Everyone up here has gone through elections, and we do not remember a time that you have a larger percentage of turnout in a rural area than you do in an urban area. Yet, it was 30 to 1. You know that is wrong, you have voter fraud.

I am very much concerned about the perception of the people in Afghanistan if this is not cleared out. We are going to be really pushing hard to get an audit in that case. I have talked to you about this, and I am sure you agree with that.

I am also troubled by the President's plan to draw down our forces based on arbitrary timelines instead of the best advice of military commanders and the facts on the ground. The President tried the same policy in Iraq in 2011, and I hope we are not doomed to make the same mistake again.

General Votel, contrary to the claims of some that al Qaeda is on the run, it is clear they are now operating in more countries and control more territory than ever before. Iraq and Syria have become the largest terrorist safe haven in the world and are serving as a breeding ground for the next generation of jihadis. It is only a matter of time before the thousands of foreigners who traveled to join the fight will return back home to places like Africa, battle-hardened and ready to perform.

Admiral Gortney, as Commander of NORTHCOM, you will be accountable for one of the most solemn responsibilities of our Government. That is defending the Homeland. That is what most people are concerned with, and that is what has to be the top priority. I am concerned and want to hear your views on the growing ballistic missile threat from North Korea and Iran and the effectiveness of our Homeland missile defense system to protect us against the improving capabilities of our adversaries. North Korea continues to develop delivery systems for its nuclear weapons arsenal, and public intelligence reports still assess that Iran could have the means to deliver a nuclear weapon by 2015. In fact, our intelligence back prior to 2010 said that they would have the ability to produce a weapon and a delivery system by 2015. That is on us now. That has to be the major concern that we all have at this time.

I look forward to hearing from the nominees and resolving these very difficult problems.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Inhofe.

Let me call first on Admiral Gortney.

STATEMENT OF ADM WILLIAM E. GORTNEY, USN, FOR RE-APPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE COMMANDER, U.S. NORTHERN COMMAND/COMMANDER, NORTH AMERICAN AEROSPACE DEFENSE COMMAND

Admiral GORTNEY. Good morning, Mr. Chairman, Ranking Member Inhofe, and distinguished members of the committee. It is a distinct honor and privilege to appear before you today.

I would like to thank the President for nominating me and thank Secretary Hagel and Chairman Dempsey for the trust they have placed in me. If confirmed, I look forward to serving as the Commander, U.S. Northern Command and Commander of the North American Aerospace Defense Command.

I also thank the Senate Armed Services Committee for their work and their support to our servicemembers and their families.

I am joined this morning by my wife, and with your permission, I would like to introduce her. Sherry and I have known each other since high school in Orange Park, FL, and this past Saturday we celebrated our 34th anniversary. She is active in the education and mentoring of Navy spouses who, along with our family, are the very stitches that hold the cloth of our Nation together. Her dedication to our family and the sailors and marines is simply remarkable. I would not be here today without her.

Mr. Chairman, over the last few years, my good friend, General Chuck Jacoby, has led the U.S. NORTHCOM and NORAD teams with distinction. He has set the gold standard for combatant command leadership. If confirmed, I look forward to building upon his terrific efforts.

I would like to make two simple but important points before receiving your questions.

First, working hand in hand with Congress, there is no greater responsibility for a military officer than to defend the Nation that we call home. The Commander of U.S. NORTHCOM is charged with being our Nation's last line of defense and providing support to Federal, State, and local levels when the American people are in their greatest need. I view these missions as a sacred trust and that, if confirmed, I will faithfully and passionately execute them.

Second, cooperation is paramount to the mission of NORTHCOM. I have spent a significant part of my career building joint and international coalitions to solve the challenging problems that confront us all. These experiences have prepared me for engaging with our close friends and neighbors in Canada, Mexico, and the Bahamas. Of course, this is a team sport, and therefore, if confirmed, I will work closely with the combatant commanders, the Service Chiefs, our citizen soldiers in the National Guard and Reserve, the Governors of our States, and our teammates at the Department of Homeland Security and other inter-agencies. If confirmed, I also look forward to working together with the members of this com-

mittee to identify and take action on the tasks required to defend our Homeland and provide support to civil authorities.

Thank you again for this opportunity, and thank you, Mr. Chairman and Ranking Member Inhofe, the members of this committee, and the highly talented members of your staff, for the work you all do every day to provide our men and women in uniform the things they need to do our Nation's bidding. I look forward to your questions.

Chairman LEVIN. Thank you so much, Admiral. General Campbell?

STATEMENT OF GEN JOHN F. CAMPBELL, USA, FOR RE-APPOINTMENT TO THE GRADE OF GENERAL AND TO BE COMMANDER, INTERNATIONAL SECURITY ASSISTANCE FORCE/COMMANDER, U.S. FORCES, AFGHANISTAN

General CAMPBELL. Thank you, sir. Good morning. Chairman Levin, Ranking Member Inhofe, distinguished members of the committee, thank you for the opportunity to appear before you today. I appreciate your support and your commitment to our servicemembers, our families, and our veterans, and I am truly honored and humbled that the President has nominated me to command the International Security Assistance Force and U.S. Forces in Afghanistan.

I would also like to thank Secretary of Defense Hagel and Chairman Dempsey for the trust and confidence they have given me in supporting my nomination.

I want to acknowledge General Joe Dunford for the great work he has done over the last year and a half and his personal sacrifice for our Nation's efforts in Afghanistan. I also want to thank Joe's wife Ellen who has been a true source of inspiration and support of her husband.

I must acknowledge my wife who could not be here today. She is recovering from knee surgery. She is actually up at Walter Reed with my daughter, she had surgery yesterday. But I want to thank her for her strength and sacrifice throughout our 30 years of marriage, for being a great mom to our two children, and for her tireless advocacy for our military families. I could not be where I am today without her, and she has had an immeasurable effect on so many of our soldiers and their families.

Our Nation has been at war in Afghanistan for nearly 13 years. This conflict has defined much of my career and I am honored to be considered to lead during the next important phase.

In 2003, I deployed to Afghanistan while I commanded the 1st Brigade of the 82nd Airborne Division when we only had one brigade in the country.

I returned to Afghanistan from 2010 to 2011 in command of the 101st Airborne Division in Regional Command East. In this capacity, I led 30,000 U.S. allied troopers in 14 provinces. I saw firsthand the incredible sacrifice of our soldiers and of our families. Unfortunately, I also had hundreds of heroes that paid the ultimate sacrifice under my command. These warriors and all those that have deployed to Afghanistan have had an enormous impact by bringing hope to the people of that nation and by denying al Qaeda

their favorite sanctuary. I am absolutely committed to completing this mission.

As we transition to a resolute support mission and draw down our forces, there will be many challenges, but I have confidence in the strength of the Afghan National Security Forces (ANSF). They have held strong, despite significant casualties during the 2013 and the current 2014 fighting season. They have succeeded in securing the recent election, and I am confident in their ability to remain firm through the upcoming political transfer of power.

I also have faith in the strength of the coalition that has held together over this long conflict. I am committed to working closely with our North Atlantic Treaty Organization members. If confirmed, I will proudly lead our service men and women in Afghanistan.

I thank you again for your steadfast and generous support of our men and women of the U.S. military. I look forward to working closely with this committee, and if confirmed, I anxiously await arriving in Afghanistan. I look forward to your questions. Thank you.

Chairman LEVIN. Thank you very much, General.
General Votel?

**STATEMENT OF LTG JOSEPH L. VOTEL, USA, TO BE GENERAL
AND COMMANDER, U.S. SPECIAL OPERATIONS COMMAND**

General VOTEL. Chairman Levin, Ranking Member Inhofe, members of the committee, thank you for the opportunity to appear before you today regarding my nomination to be the next Commander of U.S. Special Operations Command. I am honored to be included on a panel of senior officers with whom I have had a long professional acquaintance and who I deeply respect and admire.

I am especially pleased that my wife of 34 years, Michele, is able to be here with me today. She and the other spouses present represent decades of service caring for our servicemembers and their families. Michele has been a constant source of inspiration and support to me, and I could not have imagined making this journey without her.

I am deeply honored to be considered by the committee for this position. I firmly believe that Special Operations Forces (SOF) perform a vital function within the Department of Defense (DOD), supporting our geographic combatant commanders and providing our leadership with unique solutions to challenging problems. If confirmed for this position, I look forward to working with this committee to address the needs and requirements of our SOFs, ensuring that they remain the very best in the world.

Thank you again, Mr. Chairman. I look forward to answering your questions.

Chairman LEVIN. Thank you very much, General Votel.

Now I will ask the standard questions that we ask of our nominees.

First, have you adhered to applicable laws and regulations governing conflicts of interest?

Admiral GORTNEY. I have.

General CAMPBELL. I have.

General VOTEL. I have.

Chairman LEVIN. Do you agree, when asked, to give your personal views even if those views differ from the administration in power?

Admiral GORTNEY. I do.

General CAMPBELL. I do.

General VOTEL. I do.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Admiral GORTNEY. No, I have not.

General CAMPBELL. No, I have not.

General VOTEL. No, I have not.

Chairman LEVIN. Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record and hearings?

Admiral GORTNEY. Yes, sir.

General CAMPBELL. Yes, sir.

General VOTEL. Yes, sir.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Admiral GORTNEY. Yes, sir.

General CAMPBELL. Yes, sir.

General VOTEL. Yes, sir.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Admiral GORTNEY. Yes, sir.

General CAMPBELL. Yes, sir.

General VOTEL. Yes, sir.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Admiral GORTNEY. Yes, sir.

General CAMPBELL. Yes, sir.

General VOTEL. Yes, sir.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Admiral GORTNEY. Yes, sir.

General CAMPBELL. Yes, sir.

General VOTEL. Yes, sir.

Chairman LEVIN. Okay. Let us have a 7-minute first round of questions, and we can get to a second round here, if necessary.

Admiral Gortney, let me start with you. We have had a lot of failures and a lot of successes in our ground-based midcourse defense (GMD) system, and so my question to you is, do you believe that it is important to follow a "fly-before-you-buy" approach and to conduct operationally realistic testing of the ground-based missile defense system, including the kill vehicle, to provide confidence that it will work as intended?

Admiral GORTNEY. Yes, sir, I do. I believe in the fly before you deploy.

Chairman LEVIN. Would you also agree that our highest priority investment at this time is to further improve the capability of the

GMD system by improving its sensor and discrimination capabilities?

Admiral GORTNEY. Yes, sir. Given the nature of the mission, it is critical that we improve that which we have to make sure the kill vehicle is as effective as possible in our ability to discriminate the threats that are coming to the Homeland. After that, it is expansion of our capacity in order to do that. I agree with Admiral Syring's third priority, which is to then look at future technologies to improve our ability.

Chairman LEVIN. Thank you. Admiral, I understand that the Department of Health and Human Services is now seeking substantially increased DOD support for our housing, temporary housing, needs at the southern border because of the influx of the young people particularly. I hope that there can be a positive response to the request of the Department of Health and Human Services, but of course, NORTHCOM needs to have the ability to provide that increased support before it offers it. Do you believe that NORTHCOM has the ability to provide the increased support requested by the Department of Health and Human Services?

Admiral GORTNEY. Yes, sir. It is my understanding we have the capacity to provide all the help that is required in order to do that.

Chairman LEVIN. There is a new request. Are you familiar with that that just came?

Admiral GORTNEY. Pardon me, sir?

Chairman LEVIN. There is a new request from Health and Human Services for a significant increase.

Admiral GORTNEY. I have not heard about the latest increase, but currently we are at about 2,600 and so we can go up a bit from that. Yes, sir.

Chairman LEVIN. General Campbell, you have given us your assessment of the performance of Afghan National Security Forces ongoing and during the fighting season and in securing recent elections. Can you just expand on that a bit?

General CAMPBELL. Sir, absolutely. Thank you for the question.

Sir, the last time I was in Afghanistan personally was in April, but I have kept in contact with Joe Dunford and the other commanders on the ground, have talked to them about the Afghan Security Forces. Everything I have seen, read, heard, and as I talked to some commanders on the ground when I was there in April, the Afghan Security Forces have continued to progress in all their capabilities as evidenced by the recent election where actually the coalition forces provided very, very little support and the Afghans really took on the security. It brought a sense of pride to them to be able to do this, and I think they continue to progress every single day.

So far, as the new plan will show, we will move off of the tactical train, advise, and assist and move up to the corps level. I think that shows that the campaign has been working. The difference when I left in 2011 to what I saw just this past April was very, very significant.

Chairman LEVIN. General, in your answer to the prehearing questions, you said that you support the President's decision on the size of the U.S. troop presence in Afghanistan during the next 2 years. Is that correct?

General CAMPBELL. Sir, I was not in on the decisionmaking, but I support the numbers there. I think that shows that we will continue to have a presence in Afghanistan for the next couple years, and I think that is very good.

Chairman LEVIN. You also said that you support the pace of reductions outlined by the President, "with an understanding that we should continue to validate the assumptions and assess the conditions on the ground as the drawdown takes place." Do I understand from that that you will recommend changes in the pace of the drawdown if you find in your best military judgment that the pace should be modified?

General CAMPBELL. Sir, what this committee expects of me and what I owe to our soldiers on the ground is my true assessment, once I get on the ground, of how the mission is going. I will provide that input to U.S. Central Command (CENTCOM) and to the Chairman of the Joint Chiefs, yes, sir.

Chairman LEVIN. If you determine in your best military judgment that the pace should be changed and that the date should be changed, you would then make that recommendation?

General CAMPBELL. Sir, I would provide my best military advice on the pace of the change, the pace of the drawdown. Yes, sir.

Chairman LEVIN. Even if it differs from the current pace?

General CAMPBELL. Sir, that is what you expect me to do. Absolutely. Yes, sir.

Chairman LEVIN. Now, after 2016, the U.S. military presence in Afghanistan is planned, at the moment, to be a normal embassy-based presence. It has also been reported that the size of the future Office of Security Cooperation in Afghanistan could be as large as 1,000 personnel.

My question now relates to the plans for post-2016. If at any point in your military judgment circumstances change or assumptions underlying the post-2016 plan do not prove valid, will you also let those above you in the chain of command know?

General CAMPBELL. Absolutely, sir.

Chairman LEVIN. General Votel, there is going to be a consolidation of basing locations inside of Afghanistan, and I want to get your view as to how that consolidation is going to impact the ability of assault teams, airborne ISR [intelligence, surveillance, and reconnaissance], to reach remote provinces like Kunar and Nuristan where al Qaeda has sought safe haven.

General VOTEL. Mr. Chairman, we have been closely following the basing plans that General Dunford and his staff have made, and I assess we have adequate locations at this time to continue to do the operations, counterterrorism and partnership operations, that we need to continue to apply the pressure against the networks that we are dealing with.

Chairman LEVIN. All right. Can you give us your understanding of the progress in training the Afghan special operations Kandaks and the timeline for achieving their full operational capability?

General VOTEL. My command has been responsible for training a portion of the SOFs, and I assess that we are moving very quickly and effectively to make them capable partners on the battlefield not only their ability to execute operations, but more importantly, the ability of their leaders to direct operations and to properly su-

pervise the execution of those. I think we are making very good progress there.

I have long watched the special operations Kandaks and have been hugely impressed by their ability to conduct operations and to be with their Afghan countrymen and work very, very closely with them. I assess we are on the right path with that, Senator.

Chairman LEVIN. Thank you.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

General Campbell, during my opening statement, I made a comment about I could not recall which province it was, and I found it was Wardak province that Ashraf Ghani's vote count went from 17,000 in April to 170,000 in this runoff, which is absurd. We all know that that could not have happened, and certainly the Afghan people know that too. I do not think we can find any place where the turnout is greater in the rural areas than it is in the urban areas. This came out where the strength of Ghani is in the rural areas, and it was 3 to 1 over the urban areas. We know that is not true. If there are so many of these deficiencies, I am sure that the different ethnic groups have the same concern as I do and hopefully as you do.

We have to push real hard to get an audit, a genuine audit, one that has oversight from outside groups. I would ask you, first of all, if you think that is a good idea. Second, what would happen if the people do not understand and appreciate this as a legitimate election? What would happen in the country in your opinion?

General CAMPBELL. Sir, thanks for the question.

Sir, this is really the runoff. They had the first election in April, and this was a runoff between Abdullah and Ghani. It is absolutely critical that the Afghan people and the rest of the world see this as a viable, transparent election process.

Senator INHOFE. Do you think they see that now as viable and transparent?

General CAMPBELL. Sir, I think both of the candidates have said there has been some corruption there and they are working hard to come together to find this audit. I think the difference now is the number of polling stations whether it is 2,000 or 6,000. Yes, sir.

Senator INHOFE. Okay, that is good.

General Votel, you and I talked about U.S. Africa Command (AFRICOM), and we remember when the continent of Africa was divided in three different commands. It was not workable at all. We understand that. Now, the problem is with AFRICOM, they do not have their own resources. In my opening statement, I commented that a lot of the people from Africa are sucked up into this war that is going on in Afghanistan and elsewhere. They will return as hardened fighters. Does this concern you? Without the resources that you and I talked about, what are you going to do?

General VOTEL. Senator, thank you.

It certainly does concern me, as we discussed yesterday. I think what we can do, while we continue to prioritize our precious ISR resources that are used in a variety of locations, is continue to build the relationships on the ground that will allow us to assist our partners where we can to provide information, to share infor-

mation with them, to better enable them to deal with the challenges of returning fighters to their—

Senator INHOFE. Yes, I think that is right. But you mentioned ISR, and General Rodriguez, as you already know, has said that they only have the ISR capability to meet 11 percent of the needs that they have in the continent. Do you agree with that? Have you talked to him? Do you agree with that assessment?

General VOTEL. I have, Senator. General Rodriguez and I talk frequently, and I do agree. We definitely need more ISR.

Senator INHOFE. Are you prepared to try to come and express that so that we can try to get more there?

General VOTEL. If confirmed, I look forward to working with this committee and with AFRICOM to address that.

Senator INHOFE. Okay. That's good.

Admiral Gortney, the chairman talked about the GMD program and the fact that we need to have more updates and modernization and all that, which we have been talking about in this committee for a long period of time. We actually put additional funding in there for that purpose, but it is not, in my opinion, nearly adequate. In terms of the resources that will be available there, where do you think we are now on that program? Do you think that we are making sufficient investments in the maintenance and reliability of the GMD system?

Admiral GORTNEY. Yes, sir. I think the Missile Defense Agency's (MDA) priorities are absolutely correct. Necessary investments into the proper maintenance and modernization of the existing ground-based interceptors (GBI) is absolutely the number one requirement.

The second one, investment after that would be to improve again the kill vehicle itself and then improvement to the sensors that would allow us to better discriminate the threats that might be coming to the Homeland.

Senator INHOFE. If you go back, as I mentioned to you in my office, to 2008, our funding for the GMD has declined from \$2 billion then to about half that now. Does that concern you?

Admiral GORTNEY. Yes, sir, that does concern me. Once again, the first priority should be the necessary investments into the maintenance and modernization of the existing facilities that we have.

Senator INHOFE. Yes. I appreciate that.

General Campbell, I will get into something that is kind of controversial here. There is a big difference of opinion among the members up here, and that is concerning the Mi-17. We have several quotes, and frankly, I have looked into it and I kind of agree with the Special Inspector General for Afghan Reconstruction that said the Afghans lacked the capacity in both the personnel numbers and expertise to operate and maintain the existing and planned special mission. If we were to change, what position would we be in in terms of our training if we were to drop in new vehicles and discard that particular program?

General CAMPBELL. Sir, if we were to change the Mi-17 as the primary lift platform for the Afghans, we would be several years, I think, behind. They would have to start a whole new training program.

Senator INHOFE. Several years behind.

General CAMPBELL. Yes, sir.

Senator INHOFE. I have a real hard time thinking about something that is there now, they are trained now, and I know it is more popular to say, let us go into another group of vehicles and not support people that we question. But I think it is very significant that you feel that we could actually be years behind.

General CAMPBELL. Sir, I have talked to General Dunford on the ground there.

Senator INHOFE. He agrees with that?

General CAMPBELL. Sir, absolutely. The Mi-17 provides the Afghans with the capability to stretch, to get out, to get into the hinterland to go after the insurgents for the Afghans, and it also provides the coalition forces that outer ring of security, so force protection. I know General Dunford is very concerned about the loss of the Mi-17 and what it does to not only coalition force protection but the ability of the Afghans to get out and conduct all their missions.

Senator INHOFE. I appreciate it very much and I am hoping that all of the members of this committee have heard you loud and clear. I appreciate your honesty. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Inhofe.

Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

Gentlemen, thank you and your families for your distinguished service to the Nation and to the men and women you lead.

Admiral Gortney, we are constantly under cyber attack. Today's headline is that the Chinese are hacking into the Office of Personnel Management. NORTHCOM plays a critical role in defending the Homeland from any type of attack. Are we doing the exercises and the wargaming on a regular basis to assure that you can respond to these threats?

Admiral GORTNEY. Yes, sir. NORTHCOM's responsibility is to assure that our systems, our defense systems, are operable to the assurance that we can do the command and control and that the facilities are protected, military facilities are able to defend themselves. We work that closely with the Services to make sure that happens.

Our second responsibility, if confirmed, at NORTHCOM is to respond to the physical responses to a cyber attack to the civilian pieces. We exercise that throughout the year under our defense support to civil authorities on how well we can respond to that.

Senator REED. But there is a gap because a lot of the targets that would be prime on the list would not be military facilities. They would be financial institutions, public utilities, transit systems. Have you coordinated at least a planning level, if not an operational level, of how you might defend against these?

Admiral GORTNEY. Those would be, say, to the power grid, to the water, to the rail, all of that. We are responsible for responding to the physical consequences of that. That is very similar to the defense support to civil authorities for earthquake, weather, things of that nature. Those sort of response capabilities are the same.

Senator REED. A final question. Who is responsible for the active defense of these facilities, or is anybody responsible?

Admiral GORTNEY. For our civil infrastructure, to be honest, sir, Homeland Security has that responsibility. It is my professional opinion that we are a little bit behind. We as a Nation are behind in our ability to defend that critical infrastructure.

Senator REED. Do you have a coordination with Homeland Security? Again, if they are the ones responsible, there should be at least a joint planning effort, not just in response but in deterrence or prevention.

Admiral GORTNEY. Homeland Security is our closest interagency partner in the defense of the Homeland and our responses there. But I do not know if we have a formal coordinating, and if confirmed, I will make sure I understand that, sir.

Senator REED. General Campbell, your experience on the ground in Afghanistan is going to be absolutely critical as you go forward. There are so many different aspects of the issue, but one I would like to just get your opinion upon is the role of Pakistan. They have undertaken significant offensive operations in what was formerly referred to as the tribal areas in North Waziristan. But they will play a key role in anything that happens there. Can you give me your impression now of where they are headed and how you might work with them?

General CAMPBELL. Yes, sir. Thank you for the question.

Sir, you are absolutely right. You cannot talk Afghanistan unless you talk about Pakistan as well. It is critical to have that partnership not only with the coalition in Pakistan but, really more important, with the military-to-military between Afghanistan and Pakistan. I can only speak really from my time in 2011. I know that coordination and the cooperation continues to get better at the senior levels. At the tactical level right on the border in Regional Command (RC)-East where I was at, the colonels, the brigadier generals, they worked that daily and that continued to progress. We had Pakistani liaisons in our talks, and I would visit Pakistan once a quarter. I know that General Dunford and the senior leadership in Afghanistan today continue to work those relationships, and that will be really key not only for the border but also for all the counterterrorism reasons.

Senator REED. Thank you, sir.

General Votel, Special Operations Command has been operating flat out for more than a decade now, and as we reset our conventional forces you are going to still operate at mach speed. Admiral McRaven, in fact, has suggested there might be a fraying on the force. What is your impression of the effect of these operations on your force in terms of operational capability?

General VOTEL. Senator, thanks for the question.

I agree with Admiral McRaven's assessment. I do think that the force, as you said, has been very operationally active for a long period of time. That said, I think we continue to be very, very effective in the operations that we continue to ask to be performed. Key to this I think has been Admiral McRaven's focus on ensuring that we do address the pressure on our force and families and provide them mechanisms that allow them to continue to serve their country but also take care of the needs that are generated by years of combat, of years of service overseas.

Senator REED. One other aspect of this is that in a rough dichotomy there are covert missions and then there are traditional training missions that special operations performs. In some of those traditional training missions will you shift to conventional forces, or is that a way to sort of lessen the pressure from your forces?

General VOTEL. I think that is an option for us. Senator, if confirmed, I would look forward to working with the Services, particularly the Army who I know is developing regionally aligned forces that would be great partners in developing our partners across the globe.

Senator REED. Thank you.

Admiral Gortney, if I could, a final question. We have a new theater of operations, the Arctic Ocean, which for anybody my age seemed inconceivable, but it is there. How well prepared are we? For example, I do not think we have a heavy icebreaker in the Navy, and I do not think we have any plans to build one.

Admiral GORTNEY. Yes, sir. The Arctic is truly a wilderness, and in order to operate there, we have to have the ability to communicate, navigate, sustain ourselves, and then have the ability to operate our ships and our aircraft up there. That is going to require some significant investments for the Department in order to do that. We need to figure out when is the time that we have to put all those capabilities in place and POM [program objective memorandum] them appropriately. But we do not have an icebreaker in the Navy. The Coast Guard only has one. It requires study. It is the President's priority. It is NORTHCOM. It is a tasked mission for NORTHCOM, and so NORTHCOM, and in my current job working with the Office of the Chief of Naval Operations (OPNAV), we are working very heavily to figure out those particular timelines.

Senator REED. Thank you very much, gentlemen.

Thank you.

Chairman LEVIN. Thank you, Senator Reed.

Senator Sessions.

Senator SESSIONS. Thank you, Chairman Levin.

I thank all of you for your service to the country. We are the finest military in the history of the world in my opinion. It is exceedingly well trained, very well led. I think our modern Army, Navy, Air Force, Marine Corps leaders are more engaged with their troops, more leading from the front, more in tune to what is happening than ever before. I think we have gone through some very tough times to maintain cohesiveness and morale in a way that would be difficult to have expected actually considering the deployments that have been imposed on our soldiers. I am real proud of them.

I would thank Senator Levin for his comments and questions, General Campbell, to you about your duty, as we understand it in this republic, to tell the truth to Congress and to your superiors as you see it. History also would indicate I think that leaders on the battlefield are ignored at great peril. You are going to have to make some recommendations in the months to come concerning reduction in force policies that are going to be challenging. We appreciate your commitment to do that.

I would ask the other two. Admiral Gortney, would you also answer in the affirmative as General Campbell did to Senator Levin's questions?

Admiral GORTNEY. Absolutely, sir.

Senator SESSIONS. General Votel?

General VOTEL. Yes, Senator.

Senator SESSIONS. The Mi-17—that is the Russian helicopter. We are way down the line now. Maybe it is too late to reverse that decision. The Defense Department made up its mind early, was rock solid on it, refused to listen to any other suggestions about it, and now we have Russia invading the Crimea. I am personally not very pleased with that decision. We talked about it, General Campbell, yesterday. But it may be too late to reverse that decision, but that is my 2 cents' worth about that issue.

General Votel, you were asked about how healthy your force is. Is it about 67,000 now in our SOF forces?

General VOTEL. Senator, that is about right and growing to about 69,000-plus.

Senator SESSIONS. We know we are going to be drawing down varying different estimations of our total force. Is it your opinion that in a restructured force, as a result of budget decisions and other decisions, that we ought not to reduce the special operating forces below that level and we ought to stay at or about that level, more or less?

General VOTEL. Senator, as we discussed yesterday, I think the level that we are going to be at is appropriate for the task that we are being asked to perform on behalf of all the geographic and other commanders out there that we support. I think staying at the level that we are is the right answer.

Senator SESSIONS. Thank you.

Admiral Gortney, I understand a recent test in the Pacific of our missile defense system was a very successful test involving some complexities, and it was still effective. What can you tell us about that?

Admiral GORTNEY. I have limited detail in my capacity right now to know it. I do know that it was a successful test. It was one of the most complex tests of the total weapons system for it to work and that it did work. That gives us better confidence in our ability to defend the Homeland.

Senator SESSIONS. That was a hit-to-kill technology?

Admiral GORTNEY. Yes, sir.

Senator SESSIONS. I think that is important. We have had some concern about our hit-to-kill technology, and it has been proven in the past but we were concerned about it. This successful test, I think, is important because it represents a newer and more effective system, I believe. You and I talked about your belief that with regard to making a decision to launch, which will be your decision?

Admiral GORTNEY. That is correct, sir.

Senator SESSIONS. If we have an incoming missile, you would be the person to make the decision to launch?

Admiral GORTNEY. The NORTHCOM commander owns the trigger. Yes, sir.

Senator SESSIONS. How do you plan to ensure that that system works well, that quick decisions can be made 24 hours a day? You

gave me an indication yesterday, but I thought it would be good to share that.

Admiral GORTNEY. You test and exercise what is important, sir, and you need to test and exercise that entire weapons system, all the muscles involved in making that an effective engagement. You need to test and exercise it continuously. A key element is the exercising of the command and control of that facility because the shot window is so narrow from the detection to when the decision has to be made. If you do not exercise everybody in that chain of command routinely, you are not going to be able to make or have the confidence that you are going to make that decision in time.

Senator SESSIONS. I think you are exactly right. We certainly have invested a tremendous amount in that system, and we do not need to have a glitch in the management of it that would neutralize its value.

General Campbell, this is going to be such a challenge. Thank you for your continued service. I am very pleased that you have extensive knowledge of Afghanistan, and I believe you will be in a position to be most effective. Senator McCain predicted in 2011 openly and directly that if we pulled out so rapidly in Iraq, as we ended up doing, that there would be grim consequences. His grim predictions, unfortunately, have been proven true.

We are going to be watching and remembering the soldiers you have led and the soldiers that have been wounded and soldiers who have lost their lives in Afghanistan. We have reached a point where I believe that country can be successful, but it is fragile. Can you give us your best judgment of what the prospects are for establishing a decent government there that is not hostile to the United States?

General CAMPBELL. Sir, thank you for the question.

I think the key point is that we will have a continued presence in Afghanistan for the next couple of years, and I look forward to getting over there and making my own assessment when I get on the ground. There are two missions that General Dunford and ISAF are working now as they move to the end part of 2014 into 2015 and that is on the training, advise, and assist at a higher level, at the corps and the ministerial level, then of course, a counterterrorism mission. I will continue to work hard on those two missions. I will give you my best military advice on where we stand on that, but I think we have some time to continue to work on some of those gaps that General Dunford and the team over there has identified that they will continue to work. There has been great progress by the Afghan Security Forces, and I look forward to getting on the ground there.

Senator SESSIONS. Our mission is not to get to zero troops at a certain date. Our mission is—and what we have committed to and what we have invested in in blood and resources—a successful outcome. I hope that we do not lose sight of that. Thank you.

General CAMPBELL. Thank you, sir.

Chairman LEVIN. Thank you, Senator Sessions.

Senator KAINE.

Senator KAINE. Thank you, Mr. Chairman.

Thank you to the witnesses and your families for your service.

General Campbell, I am on the Foreign Relations Committee and co-chaired a subcommittee meeting on Afghanistan a few months ago. General Allen said—and this was kind of a surprising bit of testimony, he was one of our witnesses—that he viewed corruption as more of an existential threat to the future of Afghanistan than terrorism. Terrorism and the Taliban are certainly threats, but he viewed corruption as a more significant threat.

I filed that away in the back of my head, but as I have watched what has played out in terms of presidential elections, I found it to be an interesting observation. The Taliban threatened to disrupt the elections. They made efforts to but they were not able to do it. I give credit to the ANSF for doing a good job of protecting the physical security of the elections. But the elections have been threatened by allegations of corruption of the process by political leaders, potentially the outgoing Karzai administration.

Am I correct in my view that the ANSF did a pretty good job in protecting the physical integrity of these elections despite the Taliban's pledge to disrupt them?

General CAMPBELL. Sir, absolutely. Thank you for the question. The Afghan National Security Forces protected all the polling sites, and I think just based on the number of incidents that I read about—I talked to commanders on the ground—they did an absolutely excellent job. I think their progression from where they were and where they continue to go continues to get better. That is a great news story but it is really because the great men and women of the coalition have continued to be side by side, Shona ba Shona with them to help them through the last almost 13 years of doing that. It is not by happenstance it has happened. It is because of this great work by the men and women, and they continue to work that. You are absolutely right, sir.

Senator KAINE. I think it is important for the members of this body, this committee, to recognize that the challenges going forward in Afghanistan are not simply military challenges if the ANSF is performing at a level where they can protect the physical integrity of the elections, that the elections are still called into question because of political corruption. There are other tools that we are going to need to explore if we want to make sure that the progress that we have been a part of continues. I wish you well in that and look forward to working with you in that capacity.

General Votel, you and I talked a bit the other day. I am also concerned, as Senator Reed is, about the force and the fraying of the force after the incredible amount of work that has been done over the last 13 years. I had a veterans roundtable recently in Hampton Roads, VA, where a widow, whose husband was a special forces veteran who had committed suicide in March, came and talked about the stress on him and on their family.

If you could just share a little bit more about—you are so familiar with these folks and what the challenges they are under—how as the head of this command you intend to deal with those issues both for people who are active but then once people separate from special forces. I know that you have a continuing commitment to them.

General VOTEL. Thank you, Senator.

Certainly I do think the pressure that has been put on the force is not exclusive to our SOF. It has affected all of our forces.

That said, I do think there are some things that we ask our special operators to do, manners in which they operate, the secrecy with which they operate that do not allow them the normal opportunities to talk about things afterwards. I think we do have to address that aspect of it when it comes to our SOFs and families and making sure that we provide those appropriate outlets for them. As we talked about the other day, the Special Operations Command does have the Care Coalition which is designed to take care of our members that are wounded physically or otherwise in these situations. I think that is a great way to continue to take care of folks while they are in the service and beyond.

I think continuing to look at veterans organizations outside of the military is also a great partnership that we need to have in place. I am familiar with some organizations of retired military people and just concerned Americans out in the communities who are very willing to work with and reach out to our veterans across the country to ensure that they and their families are well taken care of.

If confirmed, Senator, I look forward to continuing to strengthen those relationships and ensure that our members on Active service and beyond Active service continue to get the care that they require.

Senator KAINE. Thank you, General. Let us know the strategies that we can also help you in as we pursue that important goal.

One more comment for you. I want to offer my congratulations really. Senator King and I traveled through the Middle East in February, and in many of the Nations where we were, we heard over and over again about the value of the U.S. Special Forces in training special forces in other nations. I imagine in the context of the defense budget, the training that our special forces do with other nations' special forces has to be a drop in the bucket. But the value of those investments is very significant. We certainly heard a tribute to that during our travels. I know that that is an important part of your mission as well.

General VOTEL. Thank you, Senator. I really attribute that to our people. They are our most precious and important resource, and when we allow them to get out and do their jobs, they always amaze us and do fantastic things.

Senator KAINE. Thank you.

Admiral Gortney, in your oral testimony today and your written testimony as well, you talked about the mission of NORTHCOM in terms of protecting the Homeland. It is obviously becoming clear, just reading the headlines every day, that one of the most important borders in the world for the protection of the American Homeland is the border not between the United States and Mexico but the border between Mexico and the Central American neighbors whose children are fleeing violence and gangs and trying to come to the United States. Talk a little bit about the U.S.-Mexico military relationship and how that relationship can potentially deal with some of those border issues on Mexico's southern border.

Admiral GORTNEY. Yes, sir. In my current capacity, I am the naval component to General Jacoby, and so we work very closely

with the Mexican Navy. I just had Admiral Soberon in the headquarters just a couple days ago. I would say that the mil-to-mil relationship both with the navy and the army is much better. It is strong and it is a growing relationship thanks to the leading edges of both Admiral Winnefeld and the great work that General Jacoby has had. It is important that it is day to day. It is the same confidence that you just mentioned with the special forces that will pay us long-term dividends moving at the pace that they are able to go at, doing the things that they find important. I feel that we are in a very good direction and a positive trend.

Senator KAINE. Do they view that border on their south as significantly a challenge as we do?

Admiral GORTNEY. With my discussions with their leadership, they see their border to the south as the bigger issue. That is where their threat is coming from causing the disruption in their society. They are very focused to the south. That means that the relationship between NORTHCOM and U.S. Southern Command (SOUTHCOM) has to be very strong to ensure there is no seam there that can be used against us, that we work together with all of the Nations there to counter those shared threats.

Senator KAINE. Great. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Kaine.

Senator Chambliss.

Senator CHAMBLISS. Thanks, Mr. Chairman.

Gentlemen, thank you for your continued great service, and to your families, thanks for sharing your husbands with us. We know this is a family obligation. We appreciate very much your allowing us to have their leadership.

General Campbell, I will tell you exactly what I told Lloyd Austin as he was preparing to go into Iraq to make sure that we closed it down the right way. In my opinion, that was the most dangerous command of all the commands in Iraq because, as you pull out, our troops become less in number and the situation becomes more dangerous. Obviously, I think you are going to have that same situation, but I think also you are the right person to meet that challenge. We will look forward to your continued leadership in that role.

Something took place over there recently that gives me a little bit of concern, and that is the release of about a dozen individuals from the prison at Parwan. Ten of those dozen were Pakistanis. I understand all of these dozen were returned to their home countries. Can you tell us anything about the release of those detainees, why it was decided to release individuals that we know are hard core combatant enemies of the United States?

General CAMPBELL. Sir, I do not have the exact details on which individuals were released. I know that there are third country nationals in Afghanistan that over time we have to return back out of Afghanistan. I do not have details on those exact 10. But I know that we have been working with all different countries, with the State Department, and with the country of Afghanistan to make sure that when we do release individuals, that there are mitigating effects to make sure they cannot impact the fight again.

Senator CHAMBLISS. I believe they have 38 non-Afghans still at that prison at Parwan, all of which are pretty hard core enemy combatants. Have you been briefed on any plans to release the remaining 38?

General CAMPBELL. Sir, I know the number 38. I know that there is a figure within that 38 that are really determined to be very hard core. I do not know the plan on how we will release them, but if confirmed, sir, I will make sure that I am tied into that process. But that is more than just a military piece. That is a whole-of-government operation that will take place. Sir, I do not have the details on that at this time.

Senator CHAMBLISS. As you prepare to go to Afghanistan to assume this command, you are obviously going in at a time when we are going to have a new president. The political winds are shifting somewhat. Can you give us your analysis of the political situation now as we prepare to conclude this election and have a new president sworn in?

General CAMPBELL. Sir, I can tell you that I think both of the candidates, whoever eventually becomes the president, have both indicated that they want to continue to have a long-term relationship with the coalition and with the United States in particular. That is very encouraging. They understand the importance of how important Afghanistan is in that part of the world and the impact of showing that they do have a democratic process, political transfer of power, the first time in that country, to make sure that is very transparent.

I think everything I see, sir, is good news and that we are on a good road, but we have to get through this 50-meter target and get through the election and identify the president and show not only the people of Afghanistan but the people of the world that Afghanistan has gotten through this piece and they want to be part of the international community here for a stable, secure, and a democratic Afghanistan as we go forward. Sir, I am looking forward to getting over there, and I think we are on a positive path right now.

Senator CHAMBLISS. One reason I feel good about your being up to the challenge is your statement earlier, and I know this has been your commitment to assess the situation on the ground and to monitor that as we move along towards the end of 2016 and that you are going to give your recommendation, which I think will be a real recommendation and honest reflection of your opinion as to what we should do with respect to the drawdown. Thank you for that commitment.

General Votel, you and I have had an opportunity to work very closely together in your current capacity, and I thank you for your leadership. You have done an outstanding job, and I know you are going to continue to do that.

In your new position here with respect to the Special Operations Command, I am concerned about ISR and the lack thereof as we move forward. It is such an integral part of your command now. Having heard from General Rodriguez recently that only 11 percent of his ISR requirements are being met with AFRICOM and he is having to depend on other combatant commanders, I know that you are going to be facing the same situation.

We have just gone through the budget of the Department of Defense recently, and one of the requests of the Air Force was to reduce the Joint Surveillance Target Attack Radar System (STARS) fleet by 40 percent. Do you think that was a wise decision?

General VOTEL. Senator, thank you for the question.

I am not sure I know the details of what went into that decision. But to your point, I do think there is a vital need to look at our ISR posture and ensure that we have the resources, all of the resources starting with our most low-density, high-demand systems, all the way down to systems that support our troops on the ground. I do think there is a need to constantly look at this, and if confirmed, I look forward to working with the committee and the geographic combatant commanders to address that, particularly as it affects our SOFs.

Senator CHAMBLISS. To you and General Campbell, what portion of the 9,800 post-2014 troops that have been announced by the President will be made up of special forces operating in the CT world in Afghanistan? Also, tell us our goal with respect to CT operations aimed at al Qaeda and al Qaeda affiliates in Afghanistan between now and the end of 2016 and how you think we are going to get there.

General VOTEL. Senator, I will start here on that. Of the 9,800, approximately 2,000 of those are SOFs. Of those 2,000, about half of that, just around 980 or so, are anticipated to be forces that would be directly supporting the CT effort. The current planning that we have done with General Dunford's staff and with Admiral McRaven's staff and with the other elements forward in Afghanistan I think has allowed us to ensure that we have the right capabilities within that mix to continue to do the operations that we need to do for General Dunford and in the future for General Campbell as we continue to do that. That will involve continuing to do unilateral operations to keep heavy pressure on al Qaeda networks and other networks that are supporting them and importantly will allow us to maintain the relationships with our Afghan partners that we have worked for many years and which we are seeing now come to full fruition in their ability to get out and conduct operations not only tactically but actually lead and direct operations of their own forces.

Senator CHAMBLISS. General Campbell, anything you want to add?

General CAMPBELL. Sir, I concur with everything that General Votel said there. Those are the numbers that I am tracking at this point in time and will be able to make recommendations as we move forward if we have to adjust those numbers if the mission changes.

On the counterterrorism side, sir, I would only add that as we move forward and take a look at past 2014, it is really about Pakistan and their capacity, Afghanistan and their capacity, and then our Government and really what we want to get done. I look forward to working with General Votel and all the special operating forces. We do know, as we go forward, that train, advise, and assist with the counterterrorism mission is a really, really important mission there as well. I look forward to working with General Votel.

Senator CHAMBLISS. Thanks, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Chambliss.
Senator Udall.

Senator UDALL. Good morning, gentlemen. It is good to see you here. Thank you for your willingness to serve the country in these three important commands that await you.

Admiral Gortney, I wanted to turn to you initially and thank you for taking the time to visit with me earlier this week. We talked about NORTHCOM and how instrumental it has been in facilitating planning, training, and coordination between DOD and other agencies, whether Federal or local or State, in responding to natural disasters. We have had a number of those natural disasters in Colorado here over the last few years. We have had floods and wildfires. The losses we suffered surely would have been greater if not for the work done before, during, and after those disasters by NORTHCOM, the National Guard, Active Duty units, and as I alluded to, the Forest Service and many other officials.

I would like to ask you for your views on these efforts, and I would like your assurance that you will continue to make them a top priority of the command once you are confirmed.

Admiral GORTNEY. Yes, sir. I have found in my career that soldiers, sailors, airmen, and marines, Active and Reserve and from the Guard, find no greater enjoyment than to help the American people in their time of need and to support the civil authorities. I think the work that the National Guard and the Active have done before your fires and then during the execution and then in preparations for anything that might come in the future is outstanding, and I will continue to support that effort.

Senator UDALL. Thank you for that assurance. I know we have really upgraded the communication that we have seen, and yet there is more we can do and I know we are up to the task.

Let me turn to NORTHCOM more broadly and its mission. What do you consider to be the greatest threat to the United States?

Admiral GORTNEY. The threat to the United States in my current capacity and then, if confirmed, at NORTHCOM—I think the greatest threat that we have is the cyber threat to our critical infrastructure, to our power grid, to our banking system. That I see as the greatest threat. The job of NORTHCOM is to handle the physical consequences of that particular threat.

Senator UDALL. As per your conversation with Senator Reed, I think we cannot right now do enough when it comes to cybersecurity.

Let me turn to General Votel. As you are aware, Congress has expressed concern recently with what is seen by many as the lack of sufficient justification for budget requests in recent years, especially in light of the significant budget increases for SOF over the past decade. What are your views with respect to the congressional language requiring SOCOM to provide more detail and meaningful information in its budget justification?

General VOTEL. Senator, I absolutely agree that we should be able to defend our requests, and if confirmed, I look forward to working with the committee to ensure that they understand what the SOF forces require and why we need it.

Senator UDALL. You would, as a starting point, believe that Congress, in providing its oversight role, ought to have the same level

of visibility into SOCOM's funding as is provided by the Services more generally?

General VOTEL. I absolutely believe that they should.

Senator UDALL. Thank you for that assurance.

Gentlemen, let us turn to sequestration, if we could. It looms. Many on this committee—I think all of us are very concerned about it. It goes back into effect in 2016. Could you give us your perspectives on the effect of sequestration if it were to take effect again?

Admiral GORTNEY. Sir, I will take that first. In my current capacity as Commander of U.S. Fleet Forces Command, the effect of sequestration was on readiness. The means that it goes about targets the readiness, the operations and maintenance accounts that are out there. It impacts today's readiness, and any impact on today's readiness impacts tomorrow's readiness. The forces that we are going to fight with tomorrow—most of them we already own. When it comes to sequestration, that is our primary concern. If confirmed at NORTHCOM, it is the readiness of those forces to be able to defend the Homeland and then respond defense support for civil authorities where we have the ready forces to do that. Will they be at the proper readiness levels? We work through the components in order to ensure to be able to make those decisions to know those readiness status.

Senator UDALL. General Campbell?

General CAMPBELL. Sir, thank you for the question.

In my current job as the Vice Chief, I follow the sequestration piece of the budget every single day, sir. If we continue on the path and sequestration happens in 2016, as it is right now, it will have a great, great impact on all the Services, but I think especially on the Army. We have to balance force structure, end strength modernization, and then the readiness. In the near term, we are sacrificing modernization and we are trying to put what we can into the readiness and the short-term readiness. For the Army, our biggest platform is our people, and we cannot come down fast enough to bring out people in our Army to meet the numbers in the sequestration bill as we have.

I do not think we have done a particularly good job of articulating to the American people the impact of sequestration. In 2013, and the impact on readiness—General Odierno briefed one time we only had two brigade combat teams ready that he felt comfortable with deploying if asked at that particular time. We have since worked very hard on the short-term readiness and put any additional monies we have into that short-term readiness but, again, at the expense of our modernization accounts as move forward.

It was in the paper today, sir, it talked about an impact of sequestration, and that was on the drawdown of the forces and particularly of our captains and then of our majors here shortly, but recently we had announced 1,100 majors that we have to take out of the force from year groups 2006, 2007, and 2008. Some of these are men and women that are currently serving in Afghanistan that could be company commanders in Afghanistan that we are asking that they have to leave the force. That is hard-hitting. We are going to see that continue. Those numbers and the impact of just those captains and what it means to those families has to bring your Army down from 570,000 down to 490,000. We have not even

started talking about 490,000 down to 450,000 and then potentially down to 420,000 if sequestration stays in effect.

Sequestration will be disastrous, I believe, for your Army. We will not be able to do the Defense Strategic Guidance if sequestration continues to go on after 2016, sir.

Senator UDALL. General Votel?

General VOTEL. Thank you, Senator.

First of all, I agree with the comments of my colleagues up here with regard to readiness and the impact on our ability to support the broader plans and requirements that we have.

I would add two specific things from a SOF standpoint. First of all, effects to the general purpose force do affect SOF forces because one of the key lessons we have learned over the last 12 or 13 years has been that SOF forces are hugely dependent on our general purpose forces for a variety of activities that they conduct that allow us to do the things that we need. If confirmed, that would be something I would really want to look at.

The second piece would be the impact on our people. We certainly have generated a great amount of experience and leadership over the last 10 to 12 years. As we had to reduce forces, I would be very concerned about making sure that we do that very, very carefully and do not lose the experience that we have developed over the last 10 to 12 years.

Senator UDALL. Thank you, gentlemen, for that very sobering analysis of sequestration if it were to be put in place again. Thank you.

Chairman LEVIN. Thank you, Senator Udall.

Senator McCain.

Senator MCCAIN. I want to thank the witnesses.

To follow up, General Campbell, as you and I discussed, we now have captains in the U.S. Army who are serving in Afghanistan in combat and danger that are now being notified that they are being involuntarily separated from the U.S. Army. Is that correct?

General CAMPBELL. Sir, that is correct.

Senator MCCAIN. That has to hurt morale. Would you agree?

General CAMPBELL. Absolutely, sir.

Senator MCCAIN. Admiral Gortney, your area of responsibility ends at the Mexican-Guatemalan border. Right?

Admiral GORTNEY. Yes, sir, it does.

Senator MCCAIN. Okay. But is it your information that neither the Government of Mexico nor the Government of Guatemala and the Government of Mexico at either the Guatemala border or the U.S. border are doing anything to stem the flow of illegal immigrants into this country?

Admiral GORTNEY. I do not have any specifics as to that, but in my dealings with their navy, I know they are very concerned about that.

Senator MCCAIN. They are concerned. Are they doing anything to stem the flow that you know of or not expediting?

Admiral GORTNEY. If confirmed, I will get you that answer, sir, if confirmed.

Senator MCCAIN. I think you should know a little more about it before you come before this committee.

I would like to have that answer quickly.

Because the facts are stubborn things, Admiral Gortney, and that is that they are expediting these people across the Guatemalan border and the U.S.-Mexican border. A glance at the evening news can tell you that.

General VOTEL, we are hearing from inside Syria and from outside Syria that the equipment that Islamic State of Iraq and Syria (ISIS) was able to get a hold of due to their lightning-like success in Iraq is now flowing into Syria. In fact, we have even seen on the Internet pictures of the mine-resistant ambush-protected (MRAP) vehicles that are now inside Syria fighting on behalf of ISIS. Do you have any information about that?

General VOTEL. Senator, at an unclassified level, I have seen some of that reporting that would indicate that it is moving across what were the former borders there between Iraq and Syria back into Syria.

Senator MCCAIN. You would agree if, indeed, MRAP vehicles are there, that is really a very effective tool if fallen into the hands of ISIS people who know how to operate them. They are not that difficult to operate. Would you agree?

General VOTEL. I would agree with that, Senator.

Senator MCCAIN. Now we find our Free Syrian Army fighting on two fronts, Bashar Assad and his barrel bombs and now ISIS with equipment that they captured in Iraq now flowing into Syria, which has had, I can assure you—and I do not know what your information is—has had a devastating effect on the morale of the Free Syrian Army. Do you have any information about that?

General VOTEL. Senator, I do not have any specific information about that effect.

Senator MCCAIN. But maybe experience shows that it could have that effect?

General VOTEL. I do think experience would indicate that, Senator.

Senator MCCAIN. Thank you.

General Campbell, do you know any senior military leader who personally recommended the policy of a complete withdrawal by January of 2017?

General CAMPBELL. Sir, I have not talked to any senior leaders that have recommended a complete withdrawal by 2017.

Senator MCCAIN. I am sure that Senator Graham, who just spent his Active Duty tour over in Afghanistan, will pursue this further. But is a serious concern not about not only capabilities that the Afghans cannot acquire in the next couple years such as air evacuation, certain logistics capabilities, but one of our big concerns should be the total disappearance of CT capabilities? Is that a concern?

General CAMPBELL. Sir, it would absolutely be a concern. We have a couple years to continue to work on the gaps and seams that the Afghan army and their government has. Aviation, ISR, and logistics, as you said, are certainly three of the top things that we have to continue to work the Afghan army. The CT piece, as we talked earlier, very, very important not only for Pakistan and Afghanistan, but for our Nation.

Senator MCCAIN. In our meetings last week with both candidates for president, both of them expressed, one, a desire for a bilateral

security agreement (BSA), but two, a very deep concern about a date certain withdrawal as opposed to conditions-based. Both Abdullah Abdullah and Ashraf Ghani said that they were concerned about even signing the BSA, with their ability to control particularly parts of Afghanistan that you are very familiar with, Helmand and others. Do you think that that concern on their part is legitimate?

General CAMPBELL. Sir, I believe whoever becomes president would have great concern on what support that any of the coalition forces would continue to provide for them. I have not discussed with them any sort of timeline, but as I mentioned earlier, I think my job and what my senior leadership and what the committee would expect of me is to provide continuous updates based on our mission and our resources and then my best military advice on where we go from that.

Senator MCCAIN. One would hope that the President of the United States would look at the nightmare in Iraq today and the ability that we could have had to provide some stability there and perhaps reevaluate his decision not for American combat troops but for the much needed capabilities of support and counterterrorism that we can provide, which they simply do not have.

My other question to you, do you remain deeply concerned about the role that Pakistan plays in all of this with the Haqqani Network and Inter-Services Intelligence (ISI) of Pakistan and the whole support capabilities for the Taliban/al Qaeda that remain there?

General CAMPBELL. Sir, absolutely. As I said earlier, Afghanistan and Pakistan—you cannot separate the two. I am concerned about the sanctuary in Pakistan. If confirmed, I will continue to work with the Afghan military and the Pakistan military to continue to ensure that we can reduce that, but that we have the great mil-to-mil cooperation between the Afghans and the Pakistanis.

Senator MCCAIN. I thank you, Mr. Chairman.

I thank the witnesses.

Chairman LEVIN. Thank you, Senator McCain.

Senator KING.

Senator KING. Thank you, Mr. Chair.

I have to note in passing, General Votel, you used a phrase that sort of startled me. I think it was realistic, but I think it is something that we should take note of. You referred to the former border between Syria and Iraq. Unfortunately, I think that is a factual assessment.

General Campbell, this committee made a decision in its markup of the National Defense Authorization Act a month or so ago that essentially eliminated the Mi-17 support both in terms of purchases of the remaining group of helicopters and also spare parts. We got a letter 2 weeks ago from General Dunford that characterized this. The loss of the Mi-17 capability would have a catastrophic effect on the military campaign. He said effective ANSF counterterrorism operations are dependent upon the Mi-17 and, most chilling, he said any loss of ANSF operational reach would, therefore, degrade our force protection. Those are our people that he is talking about.

Would you agree with his assessment that this would be a catastrophic blow to the ability of the ANSF to do their job in Afghanistan?

General CAMPBELL. Sir, I would agree with General Dunford's assessment on the Mi-17 and the impact it would have on both the Afghan military and their ability to carry out their mission and the impact on our own force protection.

Senator KING. I think it is important that the provision adopted by this committee not only would prohibit the buying of the remaining group, but immediately cut off spare parts which would, in effect, over a fairly short period of time, ground the entire fleet. Is that correct?

General CAMPBELL. Sir, that is correct. I think the estimate I have seen is anywhere between 6 months to 12 months.

Senator KING. They would be grounded?

General CAMPBELL. They would become combat-ineffective.

Senator KING. Thank you, General. I appreciate that.

Admiral Gortney, you are going to be in charge of NORTHCOM as we have been discussing. I am concerned about the Arctic. You mentioned in answer to your prior questions that we really do not have the infrastructure that we need up there. Do you know off-hand how many icebreakers the Russians have in operation in the Arctic?

Admiral GORTNEY. I think it is somewhere between five and seven, sir.

Senator KING. We have one 45-year-old Coast Guard icebreaker. Is that correct?

Admiral GORTNEY. That is correct.

Senator KING. The Navy has no icebreaker capacity in the Arctic?

Admiral GORTNEY. That is correct.

Senator KING. A brief question. I believe you indicated in your prior submission that you felt it would be important for our country to accede to the Law of the Sea Treaty. Could you affirm my understanding of your position?

Admiral GORTNEY. Yes, sir. It has been a longstanding position of the Department of Defense that joining that commission would be a good idea to put us on the same footing with the other signatories and not relying on the longstanding traditional law of the sea.

Senator KING. Does this particularly not take on some level of urgency given the opening of the Arctic to commerce, exploitation, energy, and all of the other potential areas of conflict?

Admiral GORTNEY. Yes, sir, but particularly in the Arctic because it would put us on the same footing as the other signatories of the Arctic Council.

Senator KING. General Campbell, there have been a number of questions about Afghanistan and our time frame there. As I understand it, there was intelligence that indicated ISIS was building up its strength and had designs on moving into Iraq. What we did not know was how weak the Iraqi army would be. I would suggest—and I hope you agree—that one of your missions is to continually assess the readiness and effectiveness of the ANSF because it was not ISIS so much as the collapse of the Iraqi army that led to the debacle currently unfolding in Iraq. Would you agree?

General CAMPBELL. Sir, I would agree. Today it is an assessment. They do have an assessment process in place to continually evaluate the Afghan Security Forces. That will get a little bit tougher. As our forces draw down, they will not have that day-to-day contact with them. But I agree with you there, sir.

Senator KING. I would like to associate myself with Senator McCain's comments and questions. It strikes me that rather than an arbitrary date for leaving Afghanistan, it should be based upon conditions on the field. Would you agree with that?

General CAMPBELL. Sir, I think any military commander would want the flexibility to provide an operational assessment. If that is conditions on the ground, then I would agree with that, sir. But I owe this committee and I owe my leadership my best military advice based on the mission at hand and the resources I have at that time. I do have some time to make that assessment, and in that time, I also have time to continue to take a look at the Afghan forces and the missions that we have and the resources tied to that to continue to upgrade their capability.

Senator KING. I am not going to ask you to assess the political situation in Afghanistan. I think that is unfolding before our eyes and is difficult for anyone to assess. But one question. Do you have any assessment of the ethnic makeup of the ANSF in terms of broad support in the populace? One of the problems we are seeing, of course, in Iraq is the exclusion of the Sunnis and the Kurds from both the government and most of the defense forces. Is potentially the same mistake being made in Afghanistan or not? I do not know the answer. I am interested in your view.

General CAMPBELL. Sir, I can get you the composition of the ANSF. I do not have that here. My gut tells me it follows probably the pattern of the country itself. The great majority of the ANSF would be probably 40–45 percent Pashtun, but I can get those for you.

[The information referred to follows:]

General CAMPBELL. I know that is a grave concern to General Dunford and the leadership there to make sure that the ANSF continues to be, for lack of a better word, apolitical and that they continue to have the best interests of the country at hand. I know so far, from what I have seen and talked to the leadership there on the ground, that is exactly what they are seeing. The leadership is

keyed with the ANSF and I know they have made great strides with the Afghan leadership there on that.

Senator KING. I think that is a very important ball to keep our eye on because if the government that is left in place is not broadly representative of the country, if we have learned anything in the last month, it is that that is a crucial element in the stability of the country that we leave behind.

General CAMPBELL. Absolutely, sir.

Senator KING. General Votel, very quickly. How do we take sufficient advantage of the capabilities that the SOFs have without exhausting them? I see your force as particularly important in the future. General Dempsey in a briefing the other day used the term “tailored response” to situations. I think he was talking about you when he used that term.

General VOTEL. Yes, Senator. As you and Senator Kaine saw when you visited some of our locations, we are able to be very effective with a very light touch. I think what we always have to do is look at the situation that we are putting our SOF forces in and ensure that we provide the right capability without overdoing it and putting undue pressure on our forces.

I think part of that is also working with our other Department of Defense forces and, where we can, leveraging their capabilities as well to ensure that we take advantage of all of the capabilities.

Senator KING. What appears to be a future of unconventional non-state actor forces—your men and women are going to be the point of the spear, General Votel. I commend you for taking this command and look forward to working with you on it.

General VOTEL. Thank you, Senator.

Chairman LEVIN. Thank you, Senator King.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

I want to thank all of you for your willingness to serve and for your leadership and for your distinguished service and for all of the sacrifices that you and your families have made for the country and will continue to make. Thank you.

I wanted to ask General Campbell. I know that you served in Afghanistan, had at least two or three tours there, in Iraq as well. As we look at our situation that is happening in Iraq right now with ISIS and obviously the huge security challenges that we have there that are very threatening not only to us but to the entire region, what can we learn from having the withdrawal that we had in 2011 toward what has happened in Iraq as we look forward to our continued engagement in Afghanistan?

General CAMPBELL. Thank you, ma'am, for the question.

Two times in Afghanistan: This will be the third—and about a 19-month tour in Iraq. I think all of the veterans of Iraq would tell you, as they watch this unfold, it is very disheartening to see that.

I am committed in Afghanistan to ensuring that the two missions, the train, advise, assist, and also the CT, that we continue to do everything we can with the coalition to continue to improve the Afghan capability there so they can stand on their own. I will continue to provide my assessments as we go forward.

We ought to take a look at Iraq and look at the lessons learned from there. I think your military, all of our Services—on anything

we do we critique ourselves. We look very hard at after-action reviews. We always go back and look at the lessons learned. I think this is no different. We will take a hard look at this and see what we can learn from this and apply that to Afghanistan. If confirmed, I am committed to doing that, ma'am.

Senator AYOTTE. I appreciate it.

I know you have received a number of questions, taking over the command in Afghanistan, about the CT mission. Can you put in perspective what the CT mission means to your average American in terms of the protection of this country, what we have done in Afghanistan and why it is such an important mission?

General CAMPBELL. Yes, ma'am. I think if you just want to boil it down to very simplistic—and I probably told you this when you were there in 2010, maybe 2011—is that we have not had another September 11 attack on the Homeland. We have not had that since 2011 when we talked as well. We should not take that for granted, and that is not by happenstance, and that is because you have great men and women from all the Services out there every single day working hard. The CT piece of that on a daily basis continues to strike after these networks that want to do harm to our country. I believe the CT piece, if you want to just boil it down to simplistic terms, is it protects the Homeland.

Senator AYOTTE. Thanks, General.

I guess I would ask this question of both you and General Votel. Thinking about the President on May 27th had made the announcement that by the end of 2016 that the presence we will have in Afghanistan will be at the embassy in Kabul, which will be a security component. Basically just a normal embassy presence is how he described it. In fact, it has been further described by the administration that the number of personnel that will be present as of January 1, 2017, at the embassy for security there and cooperative efforts will be 1,000 people.

My question to both of you is as I hear General Votel talk to us about the numbers on the CT mission in Afghanistan that we have now, that we will plan to have there in 2015—and you also discussed the importance of it, including unilateral operations, CT operations—how do we do that based on a Kabul operation only? How do we do that with 1,000 people and which part of that 1,000 people will fulfill this important mission to protect the Homeland? I guess the real question is—we just heard your testimony about how important this is to protect our country and to have the CT mission—what happens after January 2017?

General CAMPBELL. Ma'am, thank you for the question. I will start and let General Votel provide his comments.

I do not know the number at the end of 2016. I understand and acknowledge what you said and the numbers the President said. Again, I have not looked at the composition. I know for the next 2 years, we will continue to improve the capability of the Afghan forces. We will continue to work with Pakistan. That is going to be a relationship there that will help on the CT piece. We will grow some capability there. But as I said earlier, I will need some time to get on the ground to give you an assessment of where we will be, but I think we have to put in light of that there will be some time to improve the capability that is already there. That may or

may not help us reduce the numbers. I could not talk in terms of the exact numbers at the end of 2016 that would be required just for the CT mission. I can come back to you as I make that assessment.

Senator AYOTTE. General Votel, how does the CT mission—just having it be Kabul-based with the numbers I just talked to you about—obviously, there is a lot you have to do at an embassy. We do not even know if any of those individuals would be designated for CT.

General VOTEL. Thank you, Senator, for the question.

First off, as General Campbell said, I think what we have to continue to do is look at the conditions as time progresses here and continue to provide our very best military judgment and advice on the way forward with that.

I do think we have some models of where we conduct operations in other areas where we do use an embassy-based approach fairly effectively to continue to apply pressure against our networks.

I think maintaining relationships to the degree that we can with our Afghan partners in this particular situation here is hugely important to continue to support our CT objectives. I do think we have to look at a broader regional approach as well. There are the Central Asian states. There is certainly Pakistan and there are other people in the region who we have to continue to have relationships with and continue to work with to address our broader CT objectives.

Senator AYOTTE. General Votel, in your view do you think that we will be able to accomplish all that we need to accomplish now, knowing what you know on the conditions in Afghanistan, with solely a Kabul-based approach where 1,000 people are at the embassy and who knows what that number within would be designated to CT?

General VOTEL. Senator, I do not think I can answer that question accurately for you right now. I think it really depends upon the situation as it evolves. That is why I think we have to look at the conditions, we have to provide our best advice on what it is that we need to sustain, what we need to have in an embassy-based approach in order to continue to protect the Homeland and accomplish our objectives.

Senator AYOTTE. I appreciate both of your testimony. What you both said makes a lot of sense is that how we could possibly make the announcement from the administration of exactly how many people are going to be at that embassy and where they are going to be, given the importance of the CT mission to protecting our country, helping us avoid another attack on our country, when we do not even know what the conditions will be at the time is—it is really hard to come up with a word for it. But it is certainly not a military-based decision based on the announcement of our President. I am glad to hear both of you say that you are going to have to hear what the conditions are on the ground.

I hope that our President will heed the conditions on the ground so that we can continue to perform this important mission of protecting our country and ensuring that we have this intelligence that has helped us prevent future attacks after September 11 against this country.

Thank you.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Donnelly.

Senator DONNELLY. Thank you, Mr. Chairman.

I want to thank all of you and your families for their sacrifice.

General Votel, Admiral McRaven stated that suicide rates among SOFs are hitting record highs. He put in place the Preservation of the Force and Family Program to try to help with that. What I want to find out is do you plan on continuing that? Do you see it as a success? Do you see anything that is more effective or other avenues that can help with this?

General VOTEL. First of all, Senator, thanks for the question.

I absolutely do continue to apply the same level of effort onto this and as more as I can onto this particular problem of suicide with our SOF servicemembers and our servicemembers in general. I do think we have to continue to look at every potential resource that can help us to, one, understand the problem and then identify ways that we can deal with this for our servicemembers. The numbers are alarming, and I think it is our number one focus with respect to preserving the force.

Senator DONNELLY. One of the things I would also ask you to do to take a look at is the things you learn from this program, if you see any of it that you say this has been really successful or this might be something that is transferable, if you would continue to share that with all of the other commands, it would be very, very helpful I think.

General VOTEL. Absolutely, Senator.

Senator DONNELLY. General Campbell, to follow up on Senator Levin's point, it is obviously of a critical nature that you continue to give us your unvarnished opinion as you see, going forward, where there might be glitches, where there might be problems, what the actual numbers need to be. If the plan is not coming together, let us know. General Dunford has been great in saying here is where we are on all of our metrics, here is where the problems are, here is where they are not. I am sure we can continue to count on you for that.

General CAMPBELL. Sir, absolutely.

Senator DONNELLY. Following up on that, one of the things if you could—and I know you will—keep an eye on and let us know about is one of the distressing things that happened in Iraq is so many of the real generals who were trained by you and many others were replaced by folks who, through connections or friendship or whatever, wound up in those posts. I think that caused significant damage to the Iraqi army. We want to make sure the same thing does not happen in Afghanistan, and if you could continue to let us know, as you look at the force, getting better, getting worse, the leadership, those kind of things. I know you will keep an eye on it and it would be helpful to us because it will also tell us if something is starting to go sideways there.

General CAMPBELL. Sir, absolutely. I know that General Dunford and the rest of the team there have put into place some programs to really look hard at the professionalism of the Afghan officers. They have their own academy. They now have a non-commissioned officer course that they send folks through. They look at that very

hard. They understand that one of the main things with any military in the world is the trust and the trust between the military and the people, trust between the military and their leadership. I know they continue to work that, and I am absolutely committed to continue to work that hard, sir.

Senator DONNELLY. One of the things we have seen recently is—and it is somewhat unique in recent times—the Pakistan army has just pushed into Miranshah, has moved people out of there. The nature of whether they have gone elsewhere or were captured is still up for discussion. But it seems that there is a real interest on the Pak side to do something in those areas.

Do you see this as a window we have not had for a while to try to create some form of security in that region of Afghanistan and Pakistan?

General CAMPBELL. Sir, absolutely. Anytime that Pakistan will continue to work their own operations inside their borders there, coordinate those also on the Afghan side, I think it is a win. We tried to do that in 2010 and 2011 on a much smaller level. I do think this is a great opportunity for the military-to-military engagement between the Afghans and the Pakistanis. They have to continue to work that. Sir, I am committed to helping where I can on that.

Senator DONNELLY. In a way, this is the furthest I have seen them push in a very long time, and I am hopeful that that can make—in terms of “easy” being a general term—your life a little bit easier in those regions that if they clean up some of the mess on their side, there may be less leaking over to your side.

General CAMPBELL. Sure, absolutely. The Pakistan army has suffered great casualties themselves in this war on terror here for the last—

Senator DONNELLY. They have.

General CAMPBELL. Yes, sir.

Senator DONNELLY. In the Status of Forces Agreement (SOFA), I am sure you will continue to tell them—we talk about how many troops will remain, but if we do not have a SOFA, it completely changes the whole discussion. I trust that one of your primary efforts over there will be to continue to tell whoever will be their leader how critical this is and that basically everything else, all the other efforts kind of line up with this.

General CAMPBELL. Sir, I believe both candidates have expressed their desire to sign the BSA and the SOFA to make sure that they have continued coalition presence in Afghanistan. They know the consequences if they do not do that. Hopefully that will get done before I get there, sir, but if not, I will continue to work that hard.

Senator DONNELLY. Thank you.

Admiral Gortney, one of the concerns I have when I see what is going on with ISIS and the Islamic State of Iraq and the Levant (ISIL) and al Nusra Front in that whole region is that there are also Americans fighting with them over there, Americans who have passports. My fear is if they take a look back to our country and they can be people who can be extraordinary weapons against us. I am wondering about your efforts in coordinating with Homeland Security, with the Federal Bureau of Investigation, with everybody

else to try to keep an eye on what is going. Even though it is not here in NORTHCOM, it directly affects our Homeland.

Admiral GORTNEY. Sir, we all share your concern on that one. The defense of the Homeland starts at the away game and working with our combatant commanders and the interagencies in the away game so that we stop it there before it comes to the Homeland, inside the Homeland, Homeland Security, and we are going to have to deal with the consequences if we fail in that regard.

Senator DONNELLY. One last question that I have time for is this, we have seen a huge influx of heroin into my home State, into other States, much of it coming up across the border. We have seen drugs coming in through the Straits of Florida and other areas. We have had testimony that there is not near enough equipment, men, women, personnel, things needed to try to stop that.

Would you give us, in a perfect world, your best plan as to how to make a change in this area or how to beef up our efforts in this area?

Admiral GORTNEY. It requires a whole-of-government approach that includes all of the interagencies, as well as very, very close cooperation between Pacific Command, Northern Command, and Southern Command in order to work to close any of those seams that are out there between the geographic commanders and seams between the commanders and the interagency process, interagency partners in order to stem this flow. It has to go to the far reaches. You are not just going to be able to stop it at our borders. You have to go to the root cause of the problem and try and stem it from there, sir.

Senator DONNELLY. Thank you very much. I hope you keep an eye—and I know you will—on that effort as well.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Donnelly.

Senator FISCHER.

Senator FISCHER. Thank you, Mr. Chairman.

First of all, I would like to thank you gentlemen and your families, the Service personnel that you represent for truly dedicating your lives to serving the people of this country and keeping us safe. Thank you very much.

General VOTEL, in your written comments, you speak about the greatest threat that ISIL is to the Governments of Syria and Iraq and then it threatens to destabilize the entire Levant region and their connections are growing throughout north Africa and Europe and also Southeast Asia. If this situation on the ground in Iraq does not improve significantly, when do they become a threat to the United States? Are we there already?

General VOTEL. Senator, thank you for that question.

I think they threaten some of our regional interests. They certainly threaten some of our key partners in the region and in Europe right now. I do think as they continue to grow strength, that they will ultimately present a threat to the Homeland. As we have talked about a little bit earlier, the threat of foreign fighters that have gone to Syria and now into Iraq I think poses a very significant problem not only for us but also for our partners that we rely on. I think that it is posing a threat to us right now.

Senator FISCHER. The Admiral spoke about the away game. Do we have the eyes on the ground in order to make the assessment on what is happening in Iraq and how we are going to address it? I know we are looking at all the options that are out there. Are we starting to narrow those down? Are we reaching the time of a tipping point already when it may be too late even to take advantage of some of those options that are there?

General VOTEL. Senator, first off, I do not think it is too late to do anything right now. As you may be aware, we are just completing the assessment phase here in Iraq, and so we have been working with our Iraqi security force partners there both up in Kurdistan and down in the Baghdad area and the places that we can get to, to ensure that we understand what the situation on the ground is, what their capabilities are, and then what options we might have to assist them, to address this threat here in the future.

Senator FISCHER. I heard a comment made recently that perhaps we should take the Machiavellian approach and let the militias and the terrorists fight each other, just stand back and let our enemies fight each other. Are there not risks to that? Did we not do that in Syria?

General VOTEL. In general, I think there are risks to allowing things just to try to resolve themselves particularly when there are interests that could affect our country.

Senator FISCHER. Would you think that would be an option the United States should look at with regard to Iraq?

General VOTEL. I think we should look at all options that might be available to us, Senator, and how we can address this particular problem.

Senator FISCHER. Would that be your option, would you say, at this point?

General VOTEL. Senator, I think as we kind of complete the assessments here right now, I would certainly want to have discussions with General Austin as part of his assessment on this to ensure that we have had an opportunity to look at everything before reaching any conclusion.

Senator FISCHER. Thank you.

The President has requested \$5 billion for the Counterterrorism Partnership Fund. What top priorities would you like to see this fund accomplish?

General VOTEL. I think the Counterterrorism Fund can certainly help us with some of our partnership activities, and I think it could also help us with gaining the additional resources that we might need to enable our partners such as ISR, which I think would be very helpful in really enabling our partners in a variety of different ways.

Senator FISCHER. How do you see our SOFs evolving, given the demand? Senator King touched on that and touched on the pressures that you are looking at. You had mentioned to Senator Ayotte about the size of the force that you would look at in different countries, including Afghanistan. Do you see the special ops evolving—I guess I will just ask you. How do we see them evolving?

General VOTEL. I think, first of all, the level of strength that we are going to be at is adequate, I think it allows us to meet the re-

quirements that we have out there right now. I think it is important that we continue to focus on some of the work that has excellently been done by Admiral McRaven in his role, and that is continuing to strengthen our relationship with other SOF and military partners out there so that we do have trusted, dependable relationships and partners out there that we can work with and we can depend upon to accomplish the broader CT efforts. I do think it is important that we continue to have SOF forces forward deployed in locations where they can assess, they can understand, and they can, most importantly, work with our international partners who share our interests.

Senator FISCHER. I would ask you, General Votel and also General Campbell, if we are going to be conducting CT operations outside of Afghanistan, how effective is that going to be?

General VOTEL. Senator, just to clarify, conducting operations into Afghanistan from locations outside of Afghanistan?

Senator FISCHER. Yes or throughout the region as well if you would lose all your forces within the country.

General VOTEL. I think that would be very challenging. That would be a very challenging approach for us to continue to effectively do that. Certainly there are things that we can certainly look at, and we would have to look at all the conditions with that, but I think it would be challenging to try to address problems in one country from other regions, from other countries.

Senator FISCHER. Would that be a priority of yours to explain to the administration the importance of keeping your forces there?

General VOTEL. Senator, I think it is one of my primary responsibilities, to always advise on how we best use our precious SOF forces in a manner that gives us the most effect.

Senator FISCHER. General Campbell, your thoughts on that as well?

General CAMPBELL. Ma'am, I would agree with General Votel. As I said earlier, I have not taken a look at what that end result would be in 2016 on the numbers, but as I said earlier, if you are talking about Afghanistan, it involves the relationship and capability of Pakistan, the capability of Afghanistan, and really what our Government is trying to do in the CT arena there. I look forward, if confirmed, to working with General Votel to provide those assessments as we move forward and the resources that would be required to continue to accomplish that mission.

Senator FISCHER. I appreciate both of you, your comments to Senator McCain and also Senator Ayotte on expressing your desire to have that flexibility and also to be able to make decisions based on what is happening on the ground. Thank you very much.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Fischer.

Senator McCaskill.

Senator MCCASKILL. Thank you.

First for Admiral Gortney. Are smugglers moving through Mexico right now with just impunity?

Admiral GORTNEY. I am sorry, ma'am?

Senator MCCASKILL. Are the smugglers moving these children through Mexico with impunity right now?

Admiral GORTNEY. I would say the effect of the Mexican Government and their armed forces are not as effective as they could be. Whether or not they are trying to interdict them—not trying to interdict them, I do not have any specifics on that, but I seriously doubt it. They are just not being effective.

Senator MCCASKILL. I think it is important, once you are confirmed, that you get a handle on this because it appears to me—all the information is these are cartel-based smugglers. It is the same enemy that we have been funding Mexico to fight for as long as I have been in the U.S. Senate. At a certain point in time, the American people deserve some metrics on how successful the money that we have been pouring into Mexico has actually been in enabling the Mexican military to do the basics of interdiction. It is obvious that buses and trains are moving loaded with thousands of children for miles through Mexico. Clearly somebody has decided in Mexico they do not give a damn.

Admiral GORTNEY. I would say that the cartels do control areas of Mexico that gives them the freedom of movement to do what you are saying. Yes, ma'am.

Senator MCCASKILL. The border?

Admiral GORTNEY. Yes.

Senator MCCASKILL. They have the freedom on the border?

I think that is certainly a priority. If we look at our national security, if we have a neighbor to the south that has decided this is acceptable, it means that there is a whole lot of other things they think is acceptable that frankly threaten our national security. I hope you would make that a priority.

For General Campbell and for General Votel, I look macro at our counterinsurgency (COIN) strategy and the pillars of our COIN strategy. If you look in Iraq, there was a belief that the pillars—if we did the political piece, we did the security piece, and we did the economic piece, it would be successful. The political piece did not turn out so well, and the economic piece is an abject failure because we spent literally hundreds of billions of dollars building infrastructure and facilities that are in crumbles now, that are inoperable.

Is there any movement among your level of leadership in the military to take another look at the COIN strategy—and by the way, I predict we are going to have the same problem in Afghanistan. I have just been highlighting that ridiculous power plant that we spent \$300 million on. We have the highway. It is almost as if we are so good as a military and we are so focused on our mission, that we just get blinders on and say we can impose this, we can build these highways, we can build these power lines, we can build these power plants, we can build these health facilities, we can build these schools, we can impact while we are there the functioning capability of a government or of a military. But it appears to me that we have put a band aid on a cancer and that it really is not something that is being successful.

Is it time to take another look at the COIN strategy?

General CAMPBELL. Ma'am, I will take a shot at that. What I would tell you is I think that your military continues to take a look at all of its doctrine, all of its tactics, techniques, and procedures to continue to adapt to that to make sure that we are flexible. They

are always looking forward to see what that next fight would be. We always have to remain cognizant that there are lessons learned to continue to grow.

I think on the COIN piece, though, as you mentioned, this really is not just a military piece of it. It is a whole-of-government approach. The military could look at one piece, but we have to bring in the entire interagency to continue to learn those lessons and then apply those resources to make sure that we can continue to sustain that. As we work whatever country that we are working in to build capacity in the country, it is a whole-of-government piece, not just the military piece. Whatever country that is, the people of that country have to want that, and they have to put forth effort as well. I think in the end, as evidenced here I think in Iraq, is leadership makes a difference, and we have to work with that very hard.

Senator MCCASKILL. That is one of the things that happened both in Iraq and Afghanistan is the blurring of the lines between the interagency. The Commanders' Emergency Response Program funds morphed into the infrastructure in Iraq, and then of course it moved into major league infrastructure in Afghanistan where you—I know the power plant was USAID. But some of the highway building—we took that over. The military did. We were doing those things. Now we have some of those projects that are going to be outside the wire. We are not even going to be able to oversee those projects. There is a percentage of the projects that you are going to inherit, General Campbell, that we cannot have any oversight over because we are not going to be able to get the oversight as to where they are with the drawdown that we are embracing.

I watched and analyzed the mistakes in Iraq, and I think many of them are going to come to pass again in Afghanistan. I am wondering if we are going to do the exact same thing again.

General CAMPBELL. Ma'am, if confirmed and go into Afghanistan, I will absolutely take a hard look at that. I spent many months in Iraq as well. I do not want to see what is happening in Iraq today happen in Afghanistan in the future, and I will work hard at that.

Senator MCCASKILL. They are less equipped than Iraq was in terms of, this is not a country that ever even had a highway department. Iraq was much further along in terms of having some kind of central ability to impact government than Afghanistan.

I admire all of you so much. I am so proud of our military and what you are capable of. I stand in awe of your leadership capacity. But I think you are being given an impossible task in Afghanistan in light of what the reality is in that country in terms of the American taxpayers ever realizing the investment we hoped that we would realize from the things we have built in Afghanistan, the money we spent on building things for them.

General VOTEL?

General VOTEL. Senator, I would only add I think that is an inherent responsibility for all of us as military commanders to always intellectually challenge ourselves about our operating concepts and the way we think about the missions that we are giving. I do think we have to look at our lessons learned, and that has to inform our way forward.

At my current level of leadership here at the Joint Special Operations Command, I do know that SOCOM is looking very carefully at all of these concepts, counterinsurgency, unconventional warfare, and a variety of other things that we think will be important operational concepts for us in the future. If confirmed, I look forward to working within my community and within the general purpose forces and with this committee to make sure that those concepts are well vetted and well understood.

Senator MCCASKILL. Yes. I really hope that it is a gut-check moment at the War College about COIN and what has worked and what has not and why the failures have occurred.

The one thing you guys are bad at is saying we cannot do this. You are given something to do and you just figure out some way to do it. I am proud of that, but it works against you in terms of acknowledging that maybe there are some things we are trying to do that under the circumstances just does not make sense for us to try.

Thank you both. Thank you all three for your service.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCaskill.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

Again, thank you, all three of you, for the service to our country and your families.

Are you familiar with the National Justice Center at Parwan, General Campbell?

General CAMPBELL. Sir, I have been to Parwan and I know of the National Justice Center. That came about after I left in 2011, I believe.

Senator GRAHAM. I would urge you to go visit. It is probably the crown jewel of criminal justice in that part of the world, and it is a very modern facility, well run. The hope is that in the future, when an insurgent is captured, they will not be put in a provincial jail if they are really a threat to Afghanistan. They will go to the justice center in Parwan where they will be secured and they will have well-trained judges dispose of their cases. I would urge you to take a visit. I think it is very important in defeating the insurgency.

General CAMPBELL. Sir, I will do that, absolutely.

Senator GRAHAM. To defeat the insurgency, they have to believe they are going to get killed or captured. Is that fair to say?

General CAMPBELL. Sir, they have to understand that there is going to be some sort of repercussions.

Senator GRAHAM. If they get captured, they are likely to go to jail. Without that, it is going to be pretty hard to defeat these guys. Do you agree with that?

General CAMPBELL. I do, sir.

Senator GRAHAM. Okay.

Let us look at Afghanistan as a line of defense for America. Does that make sense to you?

General CAMPBELL. Sir, it makes sense that in the past there has been sanctuary there that has created the conditions to allow organizations to attack our Homeland. Yes, sir.

Senator GRAHAM. Do you agree with that, General Votel?

General VOTEL. I do agree with that, Senator.

Senator GRAHAM. The forces that attacked our country on September 11—they had safe haven in Afghanistan—the leadership. Is that correct?

General VOTEL. That is correct.

General CAMPBELL. That is correct.

Senator GRAHAM. We have had at least one attack generated by the Pakistan Taliban that failed in New York. The bomb did not go off at Times Square, but apparently the Pakistani Taliban want to reach America. Is that still accurate, do you think?

General CAMPBELL. Sir, I believe there are many organizations that want to do harm to the Homeland, and I do believe that every single day the great military and the other services are impacting other attempts that nobody here even knows about.

Senator GRAHAM. Yes. Many of those organizations reside in the Afghan-Pakistan border regions. Is that correct?

General CAMPBELL. Sir, I would concur with that assessment.

Senator GRAHAM. General Votel, is al Qaeda decimated, non-operational in Pakistan and Afghanistan?

General VOTEL. I am not sure I can say they are completely non-operational. I think we have certainly applied a significant amount of pressure on them in Afghanistan in the area which we are responsible for, and I think we have limited their ability to do things that they would desire to do or to use that as a safe haven. That said, I think we have to continue to apply that pressure.

Senator GRAHAM. If we completely left on the CT front by 2017, January 2017, is it possible they could regenerate?

General VOTEL. I think it is possible, Senator, that they could regenerate if the conditions were not in place for the Afghans to be able to continue to provide that pressure themselves.

Senator GRAHAM. Let us just lay out the plan for the American people. By the end of the year—January 2015, how many troops are we going to have in Afghanistan? General Campbell?

General CAMPBELL. Sir, by the end of 2014, it is 9,800. The current plan by the end of 2015—the proposal right now is half of that, probably 5,500.

Senator GRAHAM. What percentage of counterterrorism forces exist today? How many counterterrorism forces, special forces do we have in Afghanistan today?

General CAMPBELL. Sir, General Votel gave the number of about 900 earlier today.

General VOTEL. Yes. I think the total number of SOFs of the 9,800 is approximately 2,000, Senator. Of that—

Senator GRAHAM. I am talking about today.

General VOTEL. Today we are roughly 3,000-plus that are focused on the counterterrorism.

Senator GRAHAM. Does that include the enablers?

General VOTEL. It includes some of our enablers, but of course we are very reliant on general purpose forces.

Senator GRAHAM. Can you get back with me on that? Because we were told 7,000 yesterday.

General VOTEL. I think 7,000 is the total SOF effort that is present in country. That includes the efforts we do to train and advise and then a subset of that—

Senator GRAHAM. So 7,000 SOF-type forces, including enablers. January 2015, you are down, I was told yesterday, 1,800. You say 2,000. Is that about right?

General VOTEL. Approximately, Senator.

Senator GRAHAM. Let us fast forward to January 2017. How many do we expect to have given the current plan?

General VOTEL. I do not know that we have the answer to that question yet.

Senator GRAHAM. Let us just look at what we could have. Under the current construct, January 2017, we are down to a security cooperation force. Is that true, General Campbell?

General CAMPBELL. Sir, that is the current plan. Yes, sir.

Senator GRAHAM. How many security cooperation forces did we leave behind in Iraq?

General CAMPBELL. Sir, I believe the rough number is probably in the neighborhood of 200–250.

Senator GRAHAM. Let us say it is 1,000 in Afghanistan. What will their chief mission be?

General CAMPBELL. Sir, the chief mission, if it follows the example of the Iraq piece, was really an FMS piece, foreign military sales.

Senator GRAHAM. How many counterterrorism forces were involved in the security cooperation team in Iraq?

General CAMPBELL. Sir, I do not have that number.

Senator GRAHAM. How about zero?

General CAMPBELL. Sir, I know it was a very low number and zero may be it in fact, but I do not have that number, sir.

Senator GRAHAM. This is the plan. The question is do we change the plan. Who fills in the delta between where we are at today and where we are going in 2017? Rate on a scale of A to F the ability of the Pakistani army and the Afghan army to cooperate together to provide counterterrorism capabilities to protect our Homeland.

General CAMPBELL. Sir, I have not looked at it in those terms, but my gut would tell me that it is not very good. It would be on the low end of the scale.

Senator GRAHAM. I have been told a D by some very prominent people.

General Votel, does that make sense to you?

General VOTEL. I agree with General Campbell's comments.

Senator GRAHAM. If we cannot rely on the Afghans and the Pakistani elements to defend America from a regenerated al Qaeda-type force and, if being outside the country is not advisable, it seems to me that the line of defense that America enjoys today is going to vanish if something does not change. Is that a fair statement, General Campbell?

General CAMPBELL. Sir, following your analogy, it would be a fair statement.

Senator GRAHAM. The question for the committee is do we want it to vanish and the consequences to the Nation of it vanishing.

Finally, General Campbell, if the election process is not resolved within the constitutional process and somebody does not accept being Robert E. Lee and somebody accepting being Grant, what is the likelihood of Afghanistan holding together?

General CAMPBELL. Sir, if they cannot get through this election process to show the Afghan people and the rest of the world that they have done this political transfer of power peacefully, then right now the coalition forces will not continue to stay there after 2014. I think it greatly increases the risk for Afghanistan to fracture.

Senator GRAHAM. I could not agree with you more.

One final question as to the ethnic makeup of the Afghan Security Forces. About 45 percent are Pashtun, but most of them are from the east, very few from the southern region around Kandahar. What percentage of the senior military leadership in the Afghan Security Forces are Tajik? Is it disproportionately large?

General CAMPBELL. Sir, I do not have the exact percentage. I would think that it is probably low, but I do not have that number, sir.

Senator GRAHAM. I think it is actually high. What I fear is if there is a failure of the two sides to reconcile the election process, the army will fracture along sectarian lines. Do you agree with that as being a concern?

General CAMPBELL. Sir, it would be a concern. I think right now that the ANSF has been holding strong, and they have become, for lack of a better term, apolitical, a tribal.

Senator GRAHAM. Would that be in jeopardy if you do not get an election resolved quickly and fairly?

General CAMPBELL. Sir, I think if the election does not get resolved, then what will probably happen is that—again, my opinion only—they will revert to what they have done for years and years and go back to the tribal affiliation.

Senator GRAHAM. That is my fear too.

Thank you very much for your service.

Chairman LEVIN. Thank you, Senator Graham.

Senator Cruz.

Senator CRUZ. Thank you, Mr. Chairman.

Gentlemen, thank you for being here.

General Campbell, how would you describe the level of terrorist threat in Afghanistan and Pakistan right now whether from the Taliban, from the Haqqani Network, or others?

General CAMPBELL. The level directed against the United States, sir, or the level directed inside of Afghanistan?

Senator CRUZ. Both.

General CAMPBELL. Sir, I could not put a percentage or high-, medium-, low-threat level. What I would tell you is because of the great work of the men and women in the SOFs, the general purpose forces, interagency, the threat to the Homeland, because we keep the pressure on the networks there, continues to be mitigated. As I said earlier, we have not had another September 11-type attack, but that is not because people have not been trying to do that. But to give you a percentage on how it is inside there, I have not been on the ground since April. I would have to get on the ground to give you a better assessment myself.

Senator CRUZ. If I understand your testimony correctly, it is that the threat to the Homeland has been mitigated because of the pressure that we are putting on them currently. If that is right, that raises an obvious question, which is we have been advised that in

2016 the troop level will be reduced to 1,000 troops and in 2017 reduced to nothing. If that plan is carried out, what will be our capability to engage in counterterrorism operations and to keep that pressure you described on them to prevent terrorists from carrying out a serious threat on the Homeland?

General CAMPBELL. Sir, as General Votel mentioned earlier, we would have to take a look at other methods to do that, whether it is from outside of the country, other technologies. I think as he stated and as I stated earlier, for the next 2 years we will continue to work hard at building the capacity of the Afghan forces to have a better CT-type force. I know we are doing that now. We will continue to work on that. It also will depend upon what Pakistan does and how they continue to evolve over the next 2 years. But if we go to zero, as you stated, and we do have a threat at that point in time still, then we will have to come up with a different strategy to be able to keep and mitigate that threat.

Senator CRUZ. In your personal judgment, are you concerned about our ability to execute effective counterterrorism with a troop presence at zero?

General CAMPBELL. Sir, today again I am not the commander on the ground. I am very comfortable with where we are today based on everything I know and the great capacity of our special operating forces and the men and women on the ground. If confirmed and I get on the ground, CT continues to be one of the missions that we have, then I will make sure that this committee and my leadership understands the resources I believe that are required to carry out that mission.

Senator CRUZ. Let me ask a couple of questions of Admiral Gortney. I want to start out on missile defense. Since June 12, 386 rockets have been fired at Israel, and the threat facing both the United States and our allies is quite real. In last year's National Defense Authorization Act, the Senate required the Department of Defense to study missile defense threats from the south such as the Gulf of Mexico. Can you discuss the potential threats that may face the Homeland from the south and what NORTHCOM has or needs in order to deal with this threat?

Admiral GORTNEY. If confirmed, I am going to have to learn more about that particular mission, about the threats. I am not aware of the study of a ballistic missile threat from the south, but I have been focusing most against the North Korean and the Iranian threat. I will have to get back to you on that.

[The information referred to follows:]

U.S. North American Aerospace Defense Command (NORAD) and U.S. Northern Command (NORTHCOM) face potential threats every day from all directions, to include the south. I understand recent NORTHCOM exercises have addressed possible asymmetric air, cruise missile, and short/medium range ballistic missile threats from the south. NORAD and NORTHCOM are operationalizing a deployable integrated air and missile defense capability to counter these threats by fusing current naval, air, and army systems into a full spectrum package. I believe an initial operational capability will be fielded in the near future. It is my understanding that to further assure the success of this capability, improvements in persistent surveillance and timely and accurate indications and warnings would be useful to get the right forces in the right place at the right time to defend the Homeland.

Senator CRUZ. Thank you. I look forward to continuing that discussion.

Let us shift then to a different aspect which is border security. NORTHCOM helped secure the borders after September 11. In your judgment, what additional role could NORTHCOM play given the crisis that we are facing on the border right now?

Admiral GORTNEY. NORTHCOM is currently providing support to Borders and Customs who are doing the very best that they possibly can, and we are in support to them. We are currently providing them construction support, surveillance support, linguistic support, transportation support, and surveillance. We can continue to give as much as the Secretary asks of us in order to beef that up, but that is the limit of our authorities at this time.

Senator CRUZ. Given that over 50,000 unaccompanied children have illegally entered the country this year, do you think it is clear that international terrorist organizations are fully aware of our vulnerabilities along the border?

Admiral GORTNEY. I would have to assume they are, sir. There are seams. We were raised to find your seams and you will find your enemy. Whether there is the smuggling of children, whether it is smuggling of any kind, whether it is drugs, whether it is money, whether it is weapons, those seams can be exploited by terrorists as well. That is why it is important for us to look into those seams with our interagency partners. That gives us the surveillance and the ability to detect it, should it be occurring.

Senator CRUZ. Would you agree that the coyotes and the cartels that are smuggling in all of these little boys and little girls—that these are hardened, violent criminal organizations?

Admiral GORTNEY. Absolutely. Yes, sir, and operating in territories that they control that gives them the freedom of movement to do what they want to do, to move whatever they want to do. They will move whatever they want for money.

Senator CRUZ. In your judgment, could the equipment returning from the CENTCOM theater of operations be potentially utilized by NORTHCOM and integrated on the U.S.-Mexico border, specifically the tracking and ISR systems?

Admiral GORTNEY. Yes, sir, if those authorities are expanded to us, I would forward up a request to use as much of the capability that we feel is necessary in order to do it. The Department of Defense is providing to law enforcement agency a great deal of surplus equipment that is coming back from Iraq, that has come back from Iraq and will come back from Afghanistan.

Senator CRUZ. The magnitude of the threat on the border, the southwest border in particular, continues to grow. In 2011, Border Patrol apprehended over 300,000 people unlawfully crossing the southwest border. Nearly 50,000 of them were from countries other than Mexico. Of those, 255 were aliens from special interest countries. Between 2006 and 2011, nearly 2,000 aliens from special interest countries were apprehended along the southwest border.

Given those numbers, would you agree that establishing control of our border with Mexico has serious implications for national security?

Admiral GORTNEY. Yes, sir. Given the seams that are there that we talked about previously, we want to be able to close up all of those seams for the illegal movement of anything, be it terrorists or be it immigrants. But I think from the numbers that you de-

scribed, you described the magnitude, that it came from the border south of Mexico. That is why it is important working with SOUTHCOM and our partner nations down there to work on the conditions, the long-term conditions, to prevent the flow of their people north into our borders, through all the other borders and into our borders. That is a long-term commitment that our Nation has to make, and if confirmed, working very closely with SOUTHCOM, we are there to do everything we can.

Senator CRUZ. Absolutely. Thank you, Admiral. Thank you, Generals.

Chairman LEVIN. Thank you very much, Senator Cruz.

Senator MCCASKILL. I have one brief question.

Chairman LEVIN. Sure. Senator McCaskill?

Senator MCCASKILL. I did not get a chance on my first round. I wanted to talk to you about the Memorandum of Understanding (MOU), General Campbell, about detainees. We went into the one MOU in March 2012 with the Afghan Government, and then in an effort to reduce tensions, we signed another MOU in March 2013. It established the Afghan Review Board. That process has resulted in the release of hundreds of detainees that we can directly track to attacks on our forces. I believe and I believe our Government shares my belief that this is a flagrant disregard of the principles outlined in the MOU.

Do you have any ideas as to how we can in the BSA—or maybe it is envisioned in the BSA—that we can stop this release of these detainees who have attacked our military?

General CAMPBELL. Ma'am, thank you for the question.

I have not looked at it in those terms. Certainly if confirmed, I will work with the interagency and the authorities that would be required to ensure that we can put some controls on that. I think every military person on the ground there is concerned with the recidivism rate of detainees that are released and that come back into the fight. I think that is something that we have to continue to work with the Afghan Government on. Right now, based on the authorities, it is their call. We can continue to show them why this particular individual and what they have done and provide them the evidence that we have of their wrongdoing. But in the end right now, that is ultimately their sovereign country and their decision to release. We can continue to advise and I will continue to do that if confirmed, ma'am.

Senator MCCASKILL. I know we are in limbo now on the BSA because we are in limbo about who is going to lead the country and when we are going to know who is going to lead the country and whether or not Karzai's influence is going to continue to be significant.

But I would think it would have a dramatic impact on the morale if we are capturing those who have killed our most precious resource in this country and then they open the doors a day later and let them out. I just want to be on record that I know I share with the members of this committee that we want to do anything we can to help make sure that that situation does not become the norm.

General CAMPBELL. Thank you, ma'am.

Senator MCCASKILL. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCaskill.

We thank you for your testimony, for your service. I hope we can get to, as we say, mark up your nominations very promptly and hopefully can get you through the confirmation process in the Senate very promptly. We will do our very best. You have great support on this committee, deservedly so. You have great support from your families, which make it possible for you to serve as you do. We thank you. We thank them.

We will stand adjourned.

[Whereupon, at 11:52 a.m., the committee adjourned.]

[Prepared questions submitted to ADM William E. Gortney, USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Our Nation's military has been honed by decades of conflict, with our Armed Forces now operating at the highest degree of collaboration and cooperation that I have ever seen. I do not see the need for modification to any Goldwater-Nichols Act provisions.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Not applicable

DUTIES AND QUALIFICATIONS

Question. What is your understanding of the duties and functions of the Commander, U.S. Northern Command (NORTHCOM)?

Answer. The duties and functions of the Commander, NORTHCOM, include homeland defense, civil support, and security cooperation. The Commander is accountable to the President, the Secretary of Defense, and citizens of the United States to defend the Nation against external threats and aggression, or other threats as directed by the President. In addition, the commander is responsive to requests from lead Federal agencies for support during natural or man-made disasters when the capacity of local responders is exceeded. Finally, the commander is responsible for forging security relationships with our regional partners: Canada, Mexico, and The Bahamas.

Question. What is your understanding of the duties and functions of the Commander, North American Aerospace Defense Command (NORAD)?

Answer. Based on the longstanding partnership of binational cooperation in defense of North America, the responsibilities of the Commander, NORAD, include aerospace warning, aerospace control, and maritime warning. The Commander is accountable to the President of the United States and the Prime Minister of Canada for these responsibilities.

Question. What background and experience do you possess that you believe qualify you to perform these duties?

Answer. It has been my honor and privilege to dedicate 37-plus years of service to our great Nation. I believe the experience I've gained in a wide range of joint, coalition, and naval assignments has thoroughly prepared me to execute Commander of NORAD and NORTHCOM responsibilities, if confirmed. Of note, in my current assignment as Commander, U.S. Naval Forces Northern Command, I am General Jacoby's Naval Component Commander. I work alongside his other component commanders to integrate maritime capabilities into the NORTHCOM mission set. Additionally, as Commander, Naval Forces Central Command and Commander,

U.S. Fifth Fleet, I served as the Naval Component Commander to Commander, U.S. Central Command, during the execution and support of missions in Afghanistan and Iraq; and I also led the navy element of the Combined Air Operations Center at the initiation of combat actions in Iraq. Lastly, my experience as Director of the Joint Staff reinforced the value of teamwork and close working relationships with the combatant commands, the Services, National Guard Bureau, Federal Reserve Forces, and the full spectrum of the interagency community in executing homeland defense, civil support, and security cooperation missions. Each of these assignments has given me a clear understanding of the value of combined and joint operations, particularly in time of crisis.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, NORTHCOM, and Commander, NORAD?

Answer. If confirmed as Commander of NORTHCOM, I will aggressively pursue options to further expand my knowledge and experience levels in the Command's mission areas. Understanding that homeland defense is the first priority, I will build on NORTHCOM's decade of experience in developing trusted partnerships with domestic and hemispheric partners to defend the Nation in depth. I will ensure the Command is ready to support the Nation's call during natural or man-made disasters through established relationships with Governors and The Adjutants General, as well as leaders of primary Federal agencies, such as the Federal Emergency Management Agency. If confirmed as Commander of NORAD, I will build on my many years executing aerospace and maritime missions. As tasked in the NORAD agreement, the Command will continue to adapt to future shared security threats.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the commanders of the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, NORTHCOM, to the following officials:

The Secretary of Defense.

Answer. The NORTHCOM Commander is responsible to the Secretary of Defense for missions assigned in the Unified Command Plan (UCP). The Commander of NORTHCOM retains title 10 authority under the direct control of the Secretary of Defense. If confirmed, I plan to work closely with the Secretary of Defense to ensure missions are executed consistent with the Secretary's intent and direction.

Question. The Deputy Secretary of Defense.

Answer. The NORTHCOM Commander coordinates with the Deputy Secretary of Defense on major homeland defense, civil support, and security cooperation issues. The Commander provides timely information on the Command's mission areas to the Deputy Secretary in alignment with the Secretary of Defense's direction.

Question. The Under Secretary of Defense for Policy.

Answer. The NORTHCOM Commander coordinates with the Under Secretary of Defense for Policy on strategic policy issues for homeland defense, defense support of civil authorities, and theater security cooperation. The Commander communicates NORTHCOM priorities in support of the Under Secretary's role as an advocate for the Command's requirements.

Question. The Under Secretary of Defense for Intelligence.

Answer. The NORTHCOM Commander coordinates with the Under Secretary of Defense for Intelligence to communicate the Command's intelligence requirements, obtain actionable threat estimates, and receive timely warning of threats against the homeland.

Question. The Assistant Secretary of Defense for Homeland Defense.

Answer. The NORTHCOM commander works frequently with the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs and the Assistant Secretary of Defense for International Security Affairs on significant matters regarding homeland defense, defense support of civil authorities, and theater security cooperation, while reporting directly to the Secretary of Defense.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. Although the Chairman of the Joint Chiefs of Staff is not in the chain of command from the NORTHCOM Commander through the Secretary of Defense to the President, title 10 directs communications from combatant commanders to flow through the Chairman. The Secretary may also delegate certain oversight activities of combatant commanders to the Chairman. If confirmed, I will closely com-

municate with the Chairman to enable him to fulfill his role as principal military advisor to the President, Secretary of Defense, and National Security Council.

Question. The Secretaries of the Military Departments.

Answer. The NORTHCOM Commander provides requirements to the Secretaries of the Military Departments so that the Commander is able to meet his missions of homeland defense, defense support of civil authorities, and theater security cooperation. The Secretaries resource the combatant command's requirements by organizing, training, and equipping Active and Reserve component forces.

Question. The Chiefs of Staff of the Services.

Answer. The NORTHCOM Commander communicates with the Service Chiefs and their respective Secretaries on the combatant command's mission requirements. The Chiefs provide forces to resource the Command's requirements in fulfillment of their Service responsibility to organize, train, and equip. The Commander also seeks the advice and judgment of the Chiefs on matters of mutual interest, including force protection within the NORTHCOM area of responsibility (AOR).

Question. The other combatant commanders, particularly U.S. Southern Command (SOUTHCOM).

Answer. The NORTHCOM Commander has regular dialogue with other combatant commanders and enjoys the benefits of common support, regular information exchange, and frequent personal interaction. The Commander of NORTHCOM has a uniquely close relationship with SOUTHCOM due to issues of mutual interest in the hemisphere. The NORTHCOM and SOUTHCOM commanders annually testify before this committee together. If confirmed, I will be committed to strengthening existing relationships with all combatant commanders.

Question. The Chief of the National Guard Bureau.

Answer. The NORTHCOM Commander coordinates closely with the Chief of the National Guard Bureau on matters concerning homeland defense and defense support of civil authorities. I believe a trusted relationship and strong teamwork between the Commander of NORTHCOM and the Chief of the National Guard Bureau are critical to the continued success of NORTHCOM mission accomplishment. If confirmed, I will be committed to building on an already strong relationship with the Chief of the National Guard Bureau.

Question. The State Governors and Adjutants General.

Answer. The NORTHCOM Commander maintains regular dialogue with State Governors and The Adjutants General and if confirmed, I will continue to build on the strong relationships established by General Jacoby. It is my understanding that the Command regularly hosts meetings with The Adjutants General and facilitates integration of Department of Defense (DOD) disaster response planning with State-level plans, consistent with the National Response Framework. As a Federal participant in the Council of Governors, the NORTHCOM Commander participates in twice-yearly council meetings, works to advance its initiatives, and reports progress on Command action items.

Question. If confirmed, in carrying out your duties, how would you work with the Department of Homeland Security (DHS), the Homeland Security Council, and other Federal agencies, as well as State and local authorities and representatives from the private sector?

Answer. If confirmed, I would make it a priority to expand my relationships with senior leaders in DHS, the National Security Council, other Federal agencies, State, local, and tribal authorities, and the private sector. I developed a close relationship with Secretary Johnson when I served as the Director of the Joint Staff, and if confirmed, I would continue to strengthen this particularly important relationship. I view this as essential because NORTHCOM's missions to defend the Homeland and provide support to civil authorities depend on solid, trusted partnerships. Through personal interaction, I would work closely with every relevant agency to ensure NORTHCOM is fully prepared to defend the homeland. I would do the same to provide defense support of civil authorities to the lead Federal agency, in accordance with the National Response Framework and at the direction of the President and/or the Secretary of Defense.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the next Commander, NORTHCOM?

Answer. Defense of the Homeland is inextricably linked to efforts in the forward regions. While defending forward is the preferred method to secure the Homeland, any retraction in forward regions must have a corresponding increase in requisite capability and capacity at home to balance global strategic risk. I believe the next NORTHCOM Commander is likely to be confronted by disparate threat streams, in-

cluding violent extremist organizations intent on attacking the Homeland and weapons of mass destruction in the hands of rogue nations or violent extremists. Additionally, I believe the threats of cyber attack on institutions and critical infrastructure is real. Transnational criminal organizations and their associated global threat networks also pose a persistent threat to national security, manifested in violence carried out by transnational criminal organizations within Mexico and along the southwest border. Lastly, the next NORTHCOM Commander may be called to provide Department of Defense support to civil authorities (DSCA) in response to complex natural disasters.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will look to strengthen the partnerships built by my predecessors with the other combatant commands and the National Guard, as well as interagency, State, local, and international partners for a layered defense of the Homeland. I will advocate for resources to defend against these threats and ensure the Command's plans are robust enough to confront evolving threats. I will ensure the Command's exercise program is sufficiently structured to address the full spectrum of threats to the Homeland.

MISSION OF U.S. NORTHERN COMMAND

Question. What is the mission of NORTHCOM?

Answer. NORTHCOM partners to conduct homeland defense, civil support, and security cooperation—particularly in managing the military-to-military relations with Canada and Mexico—to defend and secure the United States and its interests. The Command also advocates for Arctic capabilities as assigned in the UCP.

Question. How does NORTHCOM's mission relate to the mission of DHS?

Answer. NORTHCOM's mission is distinct, but related and complementary to the mission of DHS. DHS is responsible for preventing terrorism and enhancing security, securing and managing our borders, enforcing and administering our immigration laws, safeguarding and securing cyberspace, and strengthening national preparedness and readiness. NORTHCOM is responsible for detecting, deterring, and preventing external threats to the United States, and when directed by the President or Secretary of Defense, providing defense support of civil authorities. The Command's mission requires close coordination with DHS to provide whole-of-government approaches to protect and secure the Nation.

Question. Are there circumstances under which you would anticipate NORTHCOM would have the lead Federal role in responding to a domestic terrorist incident or disaster consequence management response? Or do you believe NORTHCOM would operate only in support of other Federal departments and agencies?

Answer. The President may direct DOD into a lead role in defending the Nation, including the event of an armed terrorist attack. Since NORTHCOM is the combatant command responsible for the Homeland, the Command could be designated as the supported command. However, typically NORTHCOM would be in support of another Federal agency such as DHS or the Department of Justice in the event of a domestic terrorist event. For disaster consequence management, NORTHCOM is always in support of another Federal agency.

Question. What responsibility, if any, does NORTHCOM have with respect to the Defense Critical Infrastructure Program?

Answer. NORTHCOM is responsible for protecting defense critical infrastructure within its AOR necessary to support the projection of forces and capabilities used to seize the initiative and conduct decisive operations. To accomplish this task, NORTHCOM, in collaboration with its mission partners, identifies and prioritizes the physical infrastructure and associated network assets, national and commercial, critical to the successful execution of our operational plans. If confirmed, I will be responsible for developing mitigation plans for all defense critical assets in the NORTHCOM AOR to ensure mission continuity.

ORGANIZATION AND AUTHORITY

Question. NORTHCOM has been assigned responsibility for force protection and antiterrorism within its AOR.

What actions would you take, if confirmed, to mitigate force protection vulnerabilities, and what force protection challenges do you anticipate you would face within NORTHCOM's AOR?

Answer. If confirmed, I will assess ongoing efforts to improve information sharing, both within DOD and with our interagency partners, to detect emerging threats and synchronize the collective efforts of the Department to protect the force, our critical mission capabilities, and the Nation. Recent shootings on DOD installations and the

Federal Bureau of Investigation arrest of individuals who had intended to cause us harm, continue to remind us of the force protection challenges we face. Our security environment is always changing and we must be ready to challenge assumptions, think creatively, and meet future threats.

Question. What actions would you take, if confirmed, to ensure efficiency in the use of funding for force protection and to prevent unnecessary duplication of efforts between NORTHCOM, the Military Services, and the office of the Assistant Secretary of Defense for Homeland Defense?

Answer. If confirmed, I will ensure that we are properly postured to defend the Homeland in a fiscally responsible manner. I will work with the Joint Staff, the Services, and the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs to address limited resources and eliminate duplication of effort, while sustaining a baseline force protection posture.

Question. What specific forces, if any, have been assigned to NORTHCOM?

Answer. The specific forces assigned to NORTHCOM are the headquarters staff and the forces from certain subordinate and component commands including U.S. Army North, U.S. Naval Forces Northern Command, Marine Forces North, Air Forces Northern, Joint Task Force North, Joint Task Force Civil Support, Joint Task Force Alaska, and Joint Force Headquarters National Capital Region. Recently (within the past few months), the Secretary of Defense assigned five tactical-level Army brigade and battalion-level Combat Service Support units to NORTHCOM to support execution of any short-notice homeland defense or defense support of civil authorities missions.

Question. How has the assignment of forces to NORTHCOM changed since NORTHCOM was established on October 1, 2002?

Answer. Since establishment, the increase in the number of permanently assigned forces to NORTHCOM has significantly improved the capability of the Command to conduct its highest priority missions. Subordinate Army, Navy, Marine, and Air Force Service component command headquarters are focused on homeland defense, defense support of civil authorities, and theater security cooperation in the NORTHCOM AOR. The other assigned joint task forces I mentioned in the previous question provide geographic and functional mission expertise. Each of these headquarters and forces have allowed NORTHCOM to more effectively plan and execute missions in defense of the Homeland and in support of the American people in time of need.

NORTH AMERICAN AEROSPACE DEFENSE COMMAND

Question. What is the mission of the NORAD?

Answer. NORAD conducts aerospace warning, aerospace control, and maritime warning in the defense of North America. Aerospace warning includes the detection, validation, and warning of attack against North America whether by aircraft, missiles, or space vehicles, through mutual support arrangements with other commands. Aerospace control includes ensuring air sovereignty and air defense of the airspace of the United States and Canada. Maritime warning consists of processing, assessing, and disseminating maritime intelligence and information, and warning or advising the Governments of the United States and Canada of maritime threats to, or attacks against, North America.

Question. How has NORAD's mission evolved since the creation of NORTHCOM?

Answer. Since NORTHCOM was established in 2002, NORAD's mission has evolved to include a maritime warning mission. This new mission includes dissemination of intelligence and information on maritime threats in the approaches to the United States and Canada. NORAD's traditional aerospace warning mission has always included warning against aircraft, missiles, or space vehicles, and this critical information is now also used to support NORTHCOM's operation of the Ground-Based Midcourse Defense System.

Question. How does NORAD's mission relate to NORTHCOM's mission?

Answer. The commands' missions, though distinct and derived under separate authorities, are interconnected and complementary. The commands share a common security environment, have largely integrated staffs, and enjoy close coordination with one another.

Question. How does NORAD's mission relate to the mission of DHS?

Answer. NORAD supports the mission of DHS by detecting and deterring threats in the aerospace domain. Additionally, in accordance with the National Maritime Domain Awareness Plan, NORAD collaborates and shares information with DHS as part of a global maritime community of interest, developing a shared understanding of the maritime operational environment.

Question. Do you believe that NORAD should continue to have a combined operations and planning staff, and a consolidated command center, with NORTHCOM? Why or why not?

Answer. While I am not deeply familiar with the staff arrangements or the operation of the consolidated command center, I generally believe integration results in greater effectiveness and efficiency. I understand the commands are distinct, yet the staffs are fully integrated except for the operations directorates. If confirmed I will review the current structures and look for opportunities to improve operational effectiveness.

Question. What is the relationship of the Commander of NORAD to the Canadian component of NORAD, and what role does Canada play in NORAD operations and planning?

Answer. The United States-Canada NORAD Agreement is the gold standard for cooperation between nations on common defense. As NORAD is a bi-national command, Commander NORAD is responsible to the senior defense leadership in both the Government of the United States and the Government of Canada. Commander NORAD exercises operational control over forces provided by both countries to accomplish NORAD's missions. The Canadian NORAD Region provides command and control of forces in Canada that support NORAD's missions. At the headquarters level, representatives from both countries work side-by-side in the planning and execution of NORAD's missions.

NORTHCOM JOINT TASK FORCES

Question. Since the establishment of NORTHCOM, several multi-service task forces, e. g., Joint Task Force-Civil Support (JTF-CS), Joint Task Force-North (JTF-North), have been placed under its authority.

What is the current status of the Joint Task Force organizations under NORTHCOM in terms of mission, organization, planning, personnel allocation, and capability?

Answer. NORTHCOM has four task forces that operate under NORTHCOM's authority. These task forces are manned to conduct homeland defense and defense support of civil authorities operations, as directed by the President or the Secretary of Defense.

One joint task force, Joint Task Force Civil Support, is aligned under NORTHCOM's Army component command, U.S. Army North. It provides command and control of DOD incident management forces responding to chemical, biological, radiological, and nuclear events.

A second task force, Joint Task Force North (JTF-N), was recently realigned from U.S. Army North to headquarters NORTHCOM as the command's countertransnational organized crime lead. Presently, JTF-N leads DOD counterdrug operations in support of law enforcement agencies within the NORTHCOM AOR. Their main areas of support at present are the southwest border, Puerto Rico, and The Bahamas, based on law enforcement priorities.

Additionally, NORTHCOM's Joint Force Headquarters National Capital Region is postured to provide land-based homeland defense, civil support, and incident management in the National Capital Region.

NORTHCOM also has Joint Task Force Alaska responsible for homeland defense and civil support tasks in their Joint Operations Area. Joint Task Force Alaska provides the Command's primary subject matter experts for Arctic matters.

U.S. SPECIAL OPERATIONS COMMAND, NORTH

Question. On December 31, 2012, the Secretary of Defense established a Theater Special Operations Command to support NORTHCOM, known as Special Operations Command North (SOCNORTH). According to the Secretary's memorandum, SOCNORTH's objective is to "enhance command and control of Special Operations Forces throughout the NORTHCOM AOR" as well as "improve support to interagency counterterrorism operations."

What is your understanding of current and planned Manning, organization, and mission of SOCNORTH?

Answer. I understand SOCNORTH was stood up from existing NORTHCOM manpower and has been augmented by United States Special Operations Command (SOCOM) personnel realigned from headquarter SOCOM staff. Current permanent Manning is less than 50 individuals. I believe the final size of SOCNORTH has not been determined, but understand it should top out at just over 100 permanently assigned personnel, with augments and interagency liaisons adding approximately 10-20 personnel.

Question. What is your understanding of the current requirements for Special Operations Forces in the NORTHCOM AOR?

Answer. Since the establishment of NORTHCOM in 2002, there has been a gap in the capability to command and control Special Operations Forces operating in the NORTHCOM AOR. The establishment of SOCNORTH has afforded the command increased accountability of actions and developed a hub for special operations capabilities for NORTHCOM. SOCNORTH works with allies and partners to expand interoperability.

Question. What is your understanding of how SOCNORTH is to “improve support to interagency counterterrorism operations”?

Answer. It is my understanding the establishment of SOCNORTH provides a “single point of entry” for Federal counterterrorism agencies to coordinate on NORTHCOM AOR-specific challenges. This synergy is already evident, as improved relationships with the Federal Bureau of Investigation, Department of Energy, and others have been demonstrated through exercise collaboration and various workshops. I believe DOD/interagency collaboration and cooperation are the keys to protecting the Homeland. SOCNORTH, as an integral node of the global SOF network, provides NORTHCOM with facilitated access to additional intelligence and information resources.

COUNTER-NARCOTICS EFFORTS

Question. Each year DOD spends several hundred million dollars to counter the flow of illegal drugs into the United States, yet the availability of drugs on the street has not been significantly reduced, and some countries continue to face internal security challenges in responding to this threat. Some of these funds are executed within the NORTHCOM AOR, and some have questioned the effectiveness and focus of our counter-narcotics programs.

What is your view of the appropriate role of DOD in countering transnational drug cartels and gangs?

Answer. In my view, the current role of DOD in a support role to law enforcement is appropriate. DOD largely supports U.S. law enforcement agency (LEA) efforts to counter transnational drug cartels and gangs through information sharing, detection and monitoring illicit trafficking, and analytical support. In addition, DOD is helping partner countries build capacity to address narcotics trafficking and related transnational organized crime within their borders.

Question. What role does NORTHCOM play in the Defense Department’s overall counterdrug mission and organization?

Answer. NORTHCOM supports the Department’s global counterdrug mission, cooperating closely with U.S. Southern Command (SOUTHCOM) and U.S. Pacific Command (PACOM) through information sharing and situational awareness of drug-related threats to national security. NORTHCOM provides DOD support to domestic law enforcement agencies in counternarcotics operations. NORTHCOM also works with Mexican military and civil authorities to enhance their capability. NORTHCOM partners with Mexico, Canada, and The Bahamas to build capability and capacity to fight drug trafficking organizations.

Question. What is your assessment of the ongoing counter-narcotics operations within the NORTHCOM AOR and the geographic seam NORTHCOM shares with SOUTHCOM?

Answer. My understanding is that ongoing counternarcotics operations with interagency and host nation partners in the NORTHCOM AOR are appropriately focused. The geographic border NORTHCOM shares with SOUTHCOM is a key route for drugs entering Mexico en route to the United States. I believe that the two commands collaborate closely on this issue and work hand-in-hand with the Nations on Mexico’s southern border. If confirmed, I will continue this coordination to ensure a seamless effort across the border between the two AORs, to include further strengthening the relationships among Joint Interagency Task Force South, NORTHCOM’s Intelligence Directorate, and Joint Task Force North.

Question. How would you recommend that the success of the Department’s counternarcotics programs be measured?

Answer. One of the primary things I’ve learned in my career is that program success directly correlates with an ability to measure performance against programmatic goals, which for counternarcotics (CN) programs stem from several sources, including the National Security Strategy, the National Drug Control Strategy, and the Strategy to Combat Transnational Organized Crime are realized in NORTHCOM’s Theater Campaign Plan. It is my understanding that performance measurement has been a point of emphasis for the Department’s CN program, and

NORTHCOM already has a clear understanding of what desired outcomes most directly contribute to the national strategy.

I believe what is most critical here is to continue to develop, collect, and analyze operational outputs to better measure the desired outcomes of reducing the flow of drugs into the United States and to diminish the national security threat of transnational organized crime in our Hemisphere.

Question. Compared to other missions that you would be responsible for as Commander, NORTHCOM, if confirmed, where would you rank counternarcotics in terms of its contribution to our national security and the ability of DOD to make a meaningful contribution?

Answer. I would rank the counternarcotics mission as a critical enabler to the defense of the Homeland, as it supports the development of trust and confidence with critical mission partners through combined training opportunities and information sharing. In addition, it provides early warning of potential threats through enhanced information and intelligence sharing. I believe it's critical that we constantly evaluate the operational intersects between varying criminal organizations and terror networks to determine threats to national security and prevent attacks in the Homeland.

SECURITY RELATIONSHIPS WITH CANADA AND MEXICO

Question. The NORTHCOM AOR includes the land areas of the United States, Canada, and Mexico. The binational NORAD Command ensures close cooperation between the United States and Canada on security matters. NORTHCOM has been working with the Mexican military on security cooperation related to Mexico's efforts to counter Transnational Criminal Organizations that are involved in trafficking and causing extraordinary violence. Joint Task Force North (JTF-N) has established itself as a active partner with U.S. law enforcement, mitigating cross border threats posed by trafficking in narcotics, weapons, and humans.

What is your assessment of the current security relationship between the United States and Canada?

Answer. I believe our security relationship with Canada is exceptional in all facets. The NORAD agreement exemplifies the mutual trust and confidence our Nations have in each other that NORAD forces execute every day. Canada has been a vital partner in the North Atlantic Treaty Organization and has played a critical role in the International Security Assistance Force's work in Afghanistan. I understand NORTHCOM enjoys a very strong relationship with its Canadian counterpart, Canadian Joint Operations Command. If confirmed, I look forward to advancing and strengthening this long-standing partnership.

Question. What is your assessment of the current security relationship between the United States and Mexico?

Answer. In my view, the security relationship between the United States and Mexico has never been stronger. General Jacoby has set the stage for historic growth in the levels of cooperation and trust. Just a couple of weeks ago, I hosted the Mexican Secretary of the Navy at Norfolk, and I can attest that we can have as honest a dialog on security issues as we do with any of our allies. NORTHCOM has witnessed an exponential increase by the Mexican military in requests for training, subject matter expert exchanges, and U.S. equipment purchases through Foreign Military Sales. If confirmed, I will continue to capitalize on the personal and professional relationships established by my predecessors, and those I established as NORTHCOM's naval component.

Question. What is your assessment of the security challenges to the United States posed by Transnational Criminal Organizations (TCOs) in Mexico?

Answer. I agree with the President that TCOs "constitute an unusual and extraordinary threat to national security, foreign policy, and economy of the United States . . ." POTUS Executive Order, July 2011. The more we learn about TCOs in Mexico, the more we come to understand that they operate across a broad spectrum of illicit activities that goes beyond drugs, to include human smuggling, human trafficking, weapons trafficking, illicit financing, coercion and corruption of public officials and erosion of the rule of law. Clearly drug demand in the United States fuels their capabilities. Mexico based TCOs have influence that extends into hundreds of U.S. cities. This presents a substantial security challenge.

Question. What is your assessment of the security situation along the U.S.-Mexico border?

Answer. I would defer to DHS for assessment of the security situation along the U.S.-Mexico border. Nonetheless, I understand NORTHCOM monitors threat intelligence to ensure we are prepared for any threat that may seek to exploit border vulnerabilities. NORTHCOM is a committed partner in this effort on both sides of

the border. I believe security on the border is measured in degrees, and the Nation should never be satisfied that the border is secure enough. If confirmed, I look forward to working with DHS, our Mexican partners, and others in the interagency community and, when directed by the President or the Secretary of Defense, providing requested military support.

Question. Would you characterize NORTHCOM's efforts to protect our southern border, specifically JTF-N's countering of TCOs, as a success?

Answer. Yes. NORTHCOM and its subordinate command Joint Task Force North (JTF-N) bring military-unique capabilities to bear against Transnational Criminal Organizations in alignment with the priorities of DHS. JTF-N operations also provide tasked units with valuable and relevant training benefits.

Question. What is your understanding of NORTHCOM's support to civil authorities operating along the southern border, including the current DOD support to the Department of Health and Human Services in providing temporary housing for unaccompanied immigrant children coming across the border?

Answer. NORTHCOM supports civil authorities, principally the DHS, when directed by the President or the Secretary of Defense. NORTHCOM partners with U.S. Customs and Border Protection and other interagency community partners to provide DOD capabilities along the U.S. southern border in accordance with DHS priorities.

DOD has been supporting DHS and the Department of Health and Human Services (HHS) in responding to the unaccompanied children coming across the border. Commander, NORTHCOM, is designated as the supported commander for DOD's efforts to provide temporary housing, transportation, and planning support to the Primary Agencies (DHS and HHS) for assistance in resolving the situation. In my current capacity as NAVNORTH, monitoring current efforts has been part of our daily battle rhythm.

Question. What improvements in border protection capability, if any, would you recommend?

Answer. Since DHS is the lead Federal agency responsible for advocating for border protection capabilities, I would defer this question to DHS. If confirmed, I look forward to partnering with DHS to support their efforts on the border, and will look to support requests where unique military skills and capabilities can be incorporated into law enforcement partner border operations.

Question. If confirmed, what would be your goals as Commander of NORTHCOM for improving security relations with Mexico, and how would you plan to achieve them?

Answer. If confirmed, my primary goal will be to stand with the Mexican military to combat mutual security threats, while always fully respecting Mexican sovereignty. Thanks to General Jacoby, NORTHCOM enjoys an unprecedented level of dialog with both SEDENA [Secretaría de la Defensa Nacional] and SEMAR [Secretaría de Marina] leadership. Using the current authorities granted to NORTHCOM, if confirmed, I plan to further cement this relationship. Specific goals that I would focus on to improve security relations are enhancing support to Mexico's strategy to improve security along its southern border with Guatemala and Belize, ensuring requested equipment and training are delivered in the most efficient manner possible, and assisting with opportunities to expand Mexico's regional and global posture.

UNMANNED AERIAL VEHICLES

Question. Unmanned Aerial Vehicle (UAV) flight within the continental United States is severely restricted including portions of the Canadian and Mexican borders. The Federal Aviation Administration is studying how to integrate unmanned systems and conventionally piloted aircraft in the same airspace.

In your view, have airspace restrictions on unmanned aerial systems hindered the development and evolution of these aircraft?

Answer. No. The Federal Aviation Administration, Office of Secretary of Defense, and the Services are aggressively pursuing efforts to fully integrate unmanned aerial systems (UAS) into the National Airspace System, allowing UAS to be available to support NORTHCOM's missions of homeland defense and defense support of civil authorities. The development and evolution of these platforms has been unimpeded.

Question. Would you recommend opening larger parcels of airspace within the continental United States to UAS/UAV overflight?

Answer. Not at this time. However, the NORTHCOM is currently conducting a joint test to validate airspace and flight procedures for UASs to operate safely within National Airspace System.

U.S. NORTHERN COMMAND-STATE RELATIONS

Question. NORTHCOM has the primary military responsibility to provide Defense Support of Civil Authorities (DSCA) when directed by the President and the Secretary of Defense, including consequence management operations. Such military assistance would support Federal assistance to State and local emergency response units.

What is your understanding and assessment of NORTHCOM's awareness and coordination for the support of the emergency response capabilities and contingency plans of the States and territories before a crisis arises?

Answer. NORTHCOM coordinates with the States mainly through two avenues: the Federal Emergency Management Agency (FEMA) and its FEMA Regional Headquarters and also the National Guard Bureau to individual State National Guard Joint Force Headquarters. NORTHCOM also has liaison personnel from various Federal agencies that greatly assist in interagency emergency response capability awareness efforts. It has been my experience during my tours as Director of the Joint Staff and as Commander, U.S. Fleet Forces Command that NORTHCOM has leveraged these avenues to develop good relationships with key response partners and to gain visibility on their planning and plans.

Question. In your view, do NORTHCOM's plans, policies, and programs optimize DOD's consequence management support to civil authorities?

Answer. It is my observation that NORTHCOM has worked diligently to ensure its civil support mission area plans, policies, and programs are appropriately supporting civil authorities. Of note, NORTHCOM has integrated its civil support planning with FEMA's Regional Planning and has significantly enhanced its relationships with key partners through planning, training, and exercises. As with any endeavor, there are often opportunities for additional improvement, and if confirmed, I will work to that end.

Question. If not, and if confirmed, how would you ensure that NORTHCOM has sufficient knowledge of State and inter-State emergency response capabilities, including capabilities of National Guard units, capabilities of title 10 regular and Reserve component forces, and a good working relationship with State emergency response leaders?

Answer. If confirmed, I plan to extend my predecessor's work to develop "playbooks" for foreseeable emergency response situations in the States. Additionally, I will look to enhance relationships with defense coordinating officers, State emergency management officials, and the States' National Guards through the National Guard Bureau. Finally, if confirmed, I would continue to advance the Dual Status Commander program as the usual and customary command arrangement to achieve unity of effort between Federal and State military forces in the event of a domestic disaster requiring support from DOD.

PROCESS FOR DEFENSE SUPPORT OF CIVIL AUTHORITIES REQUESTS AND FUNDING

Question. What is your understanding and assessment of the policies and procedures by which States and territories request, employ, and fund Defense Support of Civil Authorities (DSCA), including reimbursement of DOD for operations in support of the States?

Answer. As I understand them, current policies and processes provide for the Governor of an affected State to request Federal assistance from the President via a formal Disaster Declaration. This enables a lead Federal agency, usually DHS/FEMA, to request DOD assistance for the affected area or State, and the Secretary of Defense will normally direct NORTHCOM to provide the requested capability. In such cases, DOD is appropriately reimbursed via the Stafford Act. There are also mechanisms, prior to or in the absence of a Presidential Disaster Declaration, for providing DOD assistance to local civil authorities under Immediate Response Authority to save lives, prevent human suffering and mitigate great property damage. Additionally, DOD may provide assistance under the Economy Act as requested between Federal agencies.

Question. If confirmed, what policy or procedural changes would you propose, if any, for the processes for requesting, employing, and determining funding sources for DSCA?

Answer. I do not see a need in the near future to propose any policy or procedural changes with respect to funding sources for defense support of civil authorities.

FORCE PROVISION FOR NORTHCOM

Question. NORTHCOM has the mission of conducting military operations for homeland defense and, when directed by the President or Secretary of Defense, for

providing military assistance to civil authorities, including consequence management for natural disasters and Chemical, Biological, Radiological, and Nuclear (CBRN) incidents. Yet NORTHCOM has relatively few military forces assigned to it on a permanent basis.

What is your understanding and assessment of how forces are allocated or planned to be allocated to NORTHCOM for its full range of mission requirements?

Answer. Forces and authorities are provided in relevant Joint Staff Execute Orders (EXORDs), which have been approved by the Secretary of Defense. Forces required for these EXORDs are requested in accordance with Global Force Management (GFM) policies and procedures. NORTHCOM then receives trained and ready forces necessary to execute these EXORDs for its full range of mission requirements.

Question. If confirmed, how do you intend to ensure that NORTHCOM will have sufficient forces available to it, properly trained and equipped, to accomplish its assigned missions?

Answer. If confirmed, I will work with the Joint Staff and the Services to ensure NORTHCOM force requirements can be met in support of its UCP-assigned missions.

Question. If confirmed, how will you monitor the personnel, equipment and training readiness of U.S. military forces (Active and Reserve) for homeland defense mission-essential tasks in support of NORTHCOM's contingency plans, and for its DSCA missions?

Answer. If confirmed, I will use the standing Force Allocation Process to identify NORTHCOM's force requirements for assigned missions. In coordination with the joint force providers, I will employ the Chairman's Readiness System to ensure NORTHCOM's mission requirements, capabilities, and shortfalls are properly reflected and assessed in the Defense Readiness Reporting System.

NORTHCOM-DHS RELATIONSHIP

Question. DHS is still a relatively new Federal agency, and is continuing to improve its ability to meet its homeland security missions.

As DHS improves and matures its homeland security capabilities, do you expect that will reduce the demands on NORTHCOM to provide DSCA, including support for crisis response planning?

Answer. I believe NORTHCOM has an enduring mission to provide DOD capabilities to civil authorities, as an integral component of the National Preparedness System. I expect that the planning for and response to complex natural or manmade disasters will remain whole of community efforts. My view is DOD and NORTHCOM will continue to have a supporting role in those efforts.

Question. What do you consider to be the appropriate role for DOD and NORTHCOM's vis-a-vis DHS and State authorities in identifying and validating the dual-use equipment and other requirements associated with defense and homeland security missions?

Answer. I defer to the Secretary of Defense on formal dual use equipment policy. However, I think the current role is appropriate, wherein NORTHCOM, in coordination with other DOD entities, identifies dual-use equipment needed to support civil authorities in natural or man-made disasters.

Question. By what process should DOD define requirements for the armed services to train and equip forces that NORTHCOM would use to support to civil authorities?

Answer. The Services are responsible to organize, train, and equip forces for combatant command missions. For DSCA, the Chairman of the Joint Chiefs of Staff, with the approval of the Secretary of Defense, publishes DSCA orders that capture the relevant requirements for Service programs. In addition, the elements of the Chemical, Biological, Radiological, and Nuclear Response Enterprise undergo a training and exercise evaluation program that is developed and executed in close coordination among NORTHCOM, the National Guard Bureau, and the Services in their title 10 U.S.C. "train and equip" responsibilities. This program ensures the entire enterprise is trained and equipped in a way that ensures a high state of readiness, but which is also standardized and aligned to ensure units are interoperable and able to integrate during execution.

NATIONAL GUARD

Question. There is still debate about the role the National Guard should play in homeland security and defense. In an April 21, 2008 letter to the committee concerning the recommendations of the Commission on the National Guard and Reserves, Admiral Mullen, the Chairman of the Joint Chiefs of Staff, wrote that, "I have some concerns about the Commission's ideas on enhancing the Defense Depart-

ment's role in the Homeland. While Reserve component civil support requirements are important, they should not be of equal importance to DOD combat responsibilities."

Do you agree with this view of Admiral Mullen?

Answer. Yes. The principal duty of the Armed Forces is to defend the Nation. Civil support is a vital responsibility, but secondary to fighting and winning the country's wars.

Question. Do you believe that defending the Homeland or civil support should become the National Guard's primary missions?

Answer. I believe the National Guard remains a critical component of the Total Force and should be oriented to the DOD's priorities and the three pillars emphasized in the Defense Strategy: homeland defense, building global security, and projecting power and winning decisively.

Question. What is the current status of the working relationship between NORTHCOM, the National Guard Bureau, and individual State National Guard headquarters?

Answer. General Jacoby has forged incredible partnerships between NORTHCOM, the National Guard Bureau, and The Adjutants General. If confirmed, I will endeavor to continue this legacy through regular coordination and engagement.

Question. If confirmed, what type of liaison relationships for planning and operational purposes would you advocate between NORTHCOM, DHS, the National Guard Bureau, Federal, State, and local first responders, and National Guard units under State authority?

Answer. If confirmed, I would enhance existing liaison relationships that NORTHCOM currently employs with these organizations and where appropriate, build new liaison relationships with key mission partners. In general, I believe liaison officers must be empowered and prepared to build relationships, conduct mutual planning, and transition seamlessly to cooperative execution.

DISTRIBUTION OF NATIONAL GUARD END STRENGTH AND FORCE STRUCTURE AMONG THE STATES

Question. What is your understanding and assessment of the distribution of responsibility and authority for the measurement and analysis of requirements and risk, course of action development, recommendation, and decision for the distribution of Army and Air National Guard end strength and force structure among the States and territories?

Answer. If confirmed, my first and foremost responsibility as a combatant commander will be to assess and determine the mission requirements for homeland defense and defense support of civil authorities. I am very confident the Secretaries of the Army and the Air Force, their respective Service Chiefs and the Chief of the National Guard Bureau will effectively train, equip, and make available the very best forces to meet the mission requirements for NORAD and NORTHCOM.

Question. In your view, does this distribution appropriately assign responsibility and authority among national civilian leaders and military staff? Does this distribution of responsibility and authority, and the analysis and decisionmaking process, provide an appropriate level of transparency and openness that takes into account the risks and requirements of the States and territories?

Answer. It is my view that we have established the necessary balance within the Department to ensure appropriate distribution of responsibilities and authorities between our civilian and military decisionmakers. I am confident our DOD planning and budgeting processes afford required transparency and openness, while addressing risk and requirements within the current fiscal environment.

Question. If confirmed, what changes, if any, would you recommend to the allocation of responsibility and authority, or the analytical and decisionmaking processes, for the distribution of National Guard end strength and force structure among the States and territories?

Answer. If confirmed, I believe my role as the NORAD and NORTHCOM commander is to determine required capabilities for homeland defense and defense support to civil authority mission areas. Whether Active Duty, National Guard, or Reserves, I am confident the Service Secretaries and Chiefs of Staff, along with input from the Chief of the National Guard Bureau, will establish the proper force structure and end strength to support the vital missions of NORAD and NORTHCOM.

Question. In your view, is the current allocation of National Guard end strength, force structure, capacities and capabilities among the States and territories appropriate to their historical requirements and risks? If not, and if confirmed, what changes would you propose to the allocation to best or better deal with the challenges of historical requirements and risk?

Answer. I believe civilian and military leadership will balance requirements and risks within the present fiscal environment in order to ensure we can defend the Nation and respond during natural and man-made disasters. If confirmed, my role as a combatant commander will be to work with the Services and National Guard Bureau to ensure NORAD and NORTHCOM mission requirements are addressed in the Total Force planning calculus.

ARMY AVIATION RESTRUCTURE INITIATIVE

Question. What is your understanding and assessment of the Army's Aviation Restructure Initiative and its potential impact on the capability and capacity of DOD and the States and territories to deal with domestic emergencies or provide DSCA?

Answer. I believe this Army initiative attempts to meet budgetary limits, while maximizing readiness across the Total Force and improving States' ability to respond to domestic emergencies and provide support to civil authorities. From my perspective, airlift capabilities supporting rescue, evacuation, personnel movement, and logistical transport are critical to success when providing defense support of civil authorities. Additionally, increasing airlift capabilities, such as Black Hawk helicopters, resident in the National Guard, gives Governors and The Adjutants General ready access to a capability that should improve States' capacity to respond to natural or manmade disasters.

Question. One feature of the Aviation Restructure Initiative would transfer all Army National Guard AH-64 Apache attack helicopters to the regular army by the end of fiscal year 2019.

What is your understanding and assessment of the relevance and utility of the Apache attack helicopter to the aviation requirements needed to support civil authorities for domestic emergencies or crises? In your view, are there any capabilities of the Apache helicopter relevant to support for civil authorities that are not or cannot be provided by other aviation platforms in the National Guard?

Answer. In my view, the Apache attack helicopter has limited value when conducting the defense support of civil authorities (DSCA) mission. In a DSCA role, the Apache does not meet the most crucial rotary wing aviation mission needs for airlift to support rapid movement of people and supplies.

CHEMICAL, BIOLOGICAL, RADIOLOGICAL, OR NUCLEAR RESPONSE CAPABILITIES

Question. NORTHCOM has two primary missions: Homeland Defense and DSCA, including preparation for and response to an incident or attack involving CBRN materials or weapons, in the NORTHCOM AOR.

If confirmed, how would you approach the challenge of ensuring adequate military forces, capabilities, and plans to respond to such incidents in support of civil authorities?

Answer. If confirmed, I will work closely with the Joint Staff, Services, National Guard Bureau, and The Adjutants General to ensure adequate forces are assigned or allocated to this mission and that they are properly trained, resourced, and tested by robust exercise programs in order to answer the call, if needed.

Question. If confirmed, how would you plan to manage this mix of capabilities to ensure the best possible response force to support civil authorities in the event of a CBRN incident, and to avoid unnecessary duplication?

Answer. I understand the organizations designed to respond to a CBRN incident are structured to provide a graduated response capable of responding to a range of scenarios. Some are Federal forces, while others are National Guard forces typically under the control of State governors. Each echeloned element is designed to respond under different timelines to build upon and integrate with the others to provide capability to civil authorities.

If confirmed, I will work closely with the Joint Staff, Services, National Guard Bureau, and the States to ensure all forces designed to accomplish this mission are properly manned, trained, equipped to execute it, and that timelines and command and control relationships are appropriate.

Question. What is your assessment of the ability of the revised DOD Consequence Management Response Forces (DCMRF), as currently constituted, to provide a significant capability to support Federal civil authorities in the event of a CBRN incident?

Answer. The Federal military's Defense CBRN Response Force (DCRF) is one element (5,200 personnel) of the larger combined Federal title 10 and State National Guard CBRN Response Enterprise (over 18,000 personnel total). The DCRF represents an extremely capable force within that Enterprise. It has the highest density of critical lifesaving capabilities within the Enterprise, consisting of ground search and rescue; decontamination; emergency medical triage, treatment and sta-

bilization; and ground and air medical evacuation. This capability has two force packages ready to deploy within 24 hours and 48 hours, respectively, providing the Nation with a rapid response and highly trained technical response force. If confirmed, I will report this committee if I determine there are any significant concerns with this vital capability.

Question. How would you ensure the necessary level of coordination and planning between the DCMRF and National Guard Homeland Response Forces to ensure an adequate response to a CBRN incident?

Answer. If confirmed, I intend to sustain NORTHCOM's close relationship with the National Guard Bureau (NGB), and through the NGB, with State National Guard Joint Force Headquarters. It is my understanding that these relationships are as strong as they have ever been—in large part due to General Jacoby's leadership. It is through these relationships and through close coordination with our partners that we achieve the alignment of efforts that will synchronize operations during plan execution.

Question. Do you believe that U.S. military forces providing DSCA in the event of CBRN incidents should be under the command of the Commander, NORTHCOM?

Answer. Yes. I believe Federal military forces conducting defense support of civil authorities missions should remain under the command of the Commander, NORTHCOM. Federal military forces responding to a chemical, biological, radiological, or nuclear incident do so in support of the lead Federal agency and at the request of State governors. I support the Dual Status Commander arrangement as the usual and customary way to command and control Federal military and non-Federalized State National Guard forces to achieve unity of effort amongst forces assigned to these distinct chains of command.

WEAPONS OF MASS DESTRUCTION-CIVIL SUPPORT TEAMS AND CBRN ENHANCED RESPONSE FORCE PACKAGE

Question. Do you believe the Weapons of Mass Destruction-Civil Support Teams (WMD-CST) and CBRN Enhanced Response Force Packages (CERFP) are appropriately organized, sized, trained, and equipped to accomplish their assigned missions?

Answer. Each State has at least one WMD-CST. It is my understanding that they are appropriately organized, manned, trained and equipped to accomplish their assigned mission. If confirmed, I will continue the strong partnership with the National Guard Bureau and The Adjutants General to maintain the readiness of WMD-CSTs and CERFPs and continue to reassess the mission, and the requirements, based on the existing threats.

Question. If not, what changes do you believe are needed?

Answer. If confirmed, I will assess the state of the entire CBRN Response Enterprise and seek for opportunities to make improvements as deemed necessary. The WMD-CSTs and CERFPs have a no-fail mission and I will support the Services, National Guard Bureau, and The Adjutants General in advocating for them.

CYBERSECURITY

Question. DOD has issued its cybersecurity strategy. Cyber threats could affect both our military and civilian sectors in the United States, public and private.

What is NORTHCOM's current role in cybersecurity within its Area of Operations, and how does it relate to the cybersecurity role of DHS?

Answer. NORTHCOM's role is to detect, deter, and prevent malicious cyber activity targeting the Command's assigned missions. This is accomplished through inherent cyberspace capabilities and relationships with mission partners such as U.S. Strategic Command (STRATCOM), U.S. Cyber Command (CYBERCOM), DHS, National Security Agency, the National Guard, and Canada.

DHS's primary cybersecurity role is to coordinate the national protection, prevention, mitigation of, and recovery from cyber incidents, as well as serve as the Federal lead for the protection of critical infrastructure. DHS provides domestic cyber threat awareness, which NORTHCOM leverages to enhance understanding and mitigate the Command's operational risk.

Question. What should be NORTHCOM's role in cybersecurity operations?

Answer. My understanding is that NORTHCOM's current role in cybersecurity is appropriate. The overall lead for cyber within DOD is STRATCOM and CYBERCOM, which have a global responsibility. By contrast, NORTHCOM has a theater focus, ensuring successful operations in a denied or degraded cyberspace environment.

Question. What is the relationship between NORTHCOM and CYBERCOM?

Answer. I believe NORTHCOM has a close relationship with CYBERCOM, collaborating on cyber threats, defensive measures, world-wide situational awareness, and cyber planning. CYBERCOM provides support to NORTHCOM in executing its assigned missions, such as homeland defense and defense support of civil authorities. NORTHCOM leverages the cyberspace capabilities of CYBERCOM to achieve operational objectives.

WESTERN HEMISPHERE INSTITUTE FOR SECURITY COOPERATION

Question. The Western Hemisphere Institute for Security Cooperation (WHINSEC), which replaced the School of the Americas in 2001, has the mission of contributing to theater cooperation activities through the education and training of students in the Western Hemisphere from Canada to Chile. If confirmed, you will be a member of the WHINSEC Board of Visitors.

What is the relationship between NORTHCOM and WHINSEC?

Answer. I understand that NORTHCOM interacts with WHINSEC to ensure the NORTHCOM Theater Campaign Plan is supported through their resident and mobile training team courses. Additionally, it has been a Command priority to have both Canadian and Mexican instructors on the staff at WHINSEC and if confirmed, I will continue to encourage the participation of our partner nations.

Question. In your view, does WHINSEC promote the national security interests of the United States in the Western Hemisphere?

Answer. Yes. WHINSEC is an enabler to the NORTHCOM Theater Campaign Plan and supports national security interests. WHINSEC provides the next generation of military and civilian leaders in the Western Hemisphere education and training that promotes peace, human rights, and democratic values while providing meaningful training and education in the Profession of Arms.

Question. In your view, how should NORTHCOM participate in command oversight and curriculum development?

Answer. It is my understanding that the 2008 Nation Defense Authorization Act added the Commander of NORTHCOM as a WHINSEC Board of Visitors member. NORTHCOM oversight is provided through this annual meeting on academic instruction, resource application, and to ensure WHINSEC remains focused on national security objectives relevant to the Western Hemisphere. If confirmed, I look forward to participating in this annual meeting along with the Commander of SOUTHCOM and other board members.

Question. In your view, what more, if anything, does WHINSEC need to do to emphasize human rights in its curriculum?

Answer. WHINSEC embeds human rights training in all current curriculums. I understand that annually, at the Board of Visitors meeting, existing curriculum is reviewed and recommendations are taken for action by the Board of Visitors. This forum serves to ensure human rights are emphasized throughout WHINSEC's curriculum.

Question. If confirmed, will you attend the WHINSEC Board of Visitor's annual meeting?

Answer. Yes. If confirmed, I look forward to attending the Board of Visitor's meetings.

INTELLIGENCE SHARING/NATIONAL COUNTERTERRORISM CENTER

Question. What is NORTHCOM's role and involvement in developing intelligence assessments regarding terrorist threats?

Answer. I understand the NORAD and NORTHCOM Intelligence Directorate assesses and appraises the Commander, senior staff, and NORAD Regions and NORTHCOM components of all foreign terrorist threats to North America that could impact NORAD and NORTHCOM missions or compel a requirement for the Commands to respond when directed or required. The accuracy and timeliness of these assessments hinge on a small contingent of dedicated terrorism analysts and daily intelligence collaboration with the other combatant commands, Defense Intelligence Agency, and national counterterrorism intelligence, and law enforcement agencies.

Question. What intelligence agencies are involved in providing input to NORTHCOM's staff for the development of intelligence assessments?

Answer. It is my understanding that NORTHCOM is well integrated throughout the intelligence and law enforcement communities. I have been informed that our terrorism assessments rely heavily on intelligence and perspectives provided by national counterterrorism agencies, particularly the Federal Bureau of Investigation, the National Counterterrorism Center (NCTC) and the Defense Intelligence Agency's Defense Combatting Terrorism Center. It is normal practice to coordinate as-

assessments with these agencies, and command analysts frequently draft and publish joint terrorism assessments with these agencies. To facilitate these essential partnerships, each of the key national counterterrorism agencies has assigned a senior representative to NORAD and NORTHCOM, and the Intelligence Directorate has assigned senior intelligence analysts to work within the NCTC, the Federal Bureau of Investigation, and with the Canadian Defense Intelligence Staff.

Question. What is the current relationship between NORTHCOM and the NCTC?

Answer. It is my understanding that NORAD and NORTHCOM and the NCTC have a close and collaborative relationship. The command has two officers embedded at NCTC: one in the Directorate of Intelligence and the other in the Directorate of Strategic Operational Plans. Additionally, the commands' Operational Intelligence Watch is in continuous contact with the NCTC Operations Center, and the commands' terrorism analysts are in daily contact with counterparts at NCTC. I understand the commands frequently host NCTC analysts for briefings on threats of mutual concern and also send analysts to support NCTC working groups. All of this collaboration ensures command visibility on developing terrorist threats to the aviation sector, Force Protection, or threats with potential weapons of mass destruction and consequence management implications. It also ensures that NCTC is cognizant of command missions and can facilitate information sharing on topics of mission relevance.

Question. Does NORTHCOM have representatives located at the NCTC on a daily basis? If so, what are their functions and responsibilities? If not, why not?

Answer. Yes. I understand the NORAD and NORTHCOM Intelligence Directorate has a full-time civilian intelligence officer assigned to NCTC Directorate of Intelligence, who produces homeland threat analysis. NORTHCOM also has an active duty officer assigned as an operations representative to the Directorate of Strategic Operational Planning at the NCTC. Both serve as advocates for NORTHCOM by conveying our mission equities and intelligence needs, and provide the command visibility to national-level counterterrorism threats and policy issues.

Question. Do you believe NORTHCOM representatives at NCTC have the access to intelligence needed to fully perform their functions?

Answer. Yes. It is my understanding the NORAD and NORTHCOM representatives at NCTC have the same access to information as NCTC cadre. This includes access to terrorism threat information not shared directly with the command or other DOD elements. NORTHCOM representatives at NCTC maintain the balance between protecting sensitive case work, investigations, and operations information, with information sharing and collaboration.

Question. How do posse comitatus, privacy restrictions, and other laws and regulations concerning the collection of intelligence within the United States, affect the way NORTHCOM receives and uses intelligence?

Answer. From my experience working for NORTHCOM as Commander of Naval Forces North, I know first-hand the importance of conducting all intelligence activities in full compliance with intelligence oversight law and policy. If confirmed, I will continue to ensure all NORTHCOM intelligence activities are reviewed by intelligence oversight specialists, thereby making certain they are conducted lawfully, consistent with all laws and policies.

BALLISTIC MISSILE DEFENSE

Question. One of NORTHCOM's missions is the defense of the United States against the threat of limited ballistic missile attack from nations such as North Korea and Iran. The February 2010 Ballistic Missile Defense Review report stated as one of its policy priorities: "Before new capabilities are deployed, they must undergo testing that enables assessment under realistic conditions."

Do you agree that it is essential that our deployed ballistic missile defense systems are operationally effective?

Answer. Yes. In view of evolving threats, the capability to defend the Nation with an effective ballistic missile defense system is paramount. Operationally realistic testing underpins the confidence we have in this system and is critical to mission readiness.

Question. Do you agree that it is important to conduct operationally realistic flight tests to demonstrate the operational capability and reliability of the Ground-based Midcourse Defense (GMD) system?

Answer. Yes. Flight testing is one of the most important, and visible ways of demonstrating the operational capability and reliability of the GMD system to improve warfighter confidence and mission readiness of the system. I understand the NORTHCOM staff has worked closely with the Missile Defense Agency and STRATCOM in the formation of the Integrated Master Test Plan to provide a plan

for an adequate test cadence. If confirmed, I look forward to being a participant in the conversation.

Question. Do you agree that, if the recent flight test of the GMD system (flight test FTG-06b) demonstrates the successful correction of the problems that caused previous flight test failures, that the Missile Defense Agency should deploy the additional 14 Ground-Based Interceptors in Alaska, as announced by Secretary of Defense Hagel in March 2013?

Answer. Yes. In all regards, it appears the recent flight test was a success. This successful test is an important step in gaining valuable knowledge that will help improve the Ballistic Missile Defense System (BMDS) as we move forward. The additional 14 Ground-Based Interceptor's (GBIs) will provide an increased capacity to defend our homeland and I support the timely deployment of these interceptors.

Question. Do you support the continued modernization and sustainment of the GMD system, including the planned re-design of the Exo-atmospheric Kill Vehicle, and continued improvements to sensor and discrimination capabilities?

Answer. Yes. Modernization and sustainment of the GMD system hedges against future threats by ensuring capabilities will be available when needed. Advancing missile technologies by rogue adversaries demands continuous improvement in our systems. Redesigned Exo-atmospheric Kill Vehicle (EKV) and discrimination improvements are two crucial areas where I believe the Ballistic Missile Defense System needs to continue to focus.

Question. The committee is aware that a recent independent assessment of the GMD system indicated that a number of important reliability and maintenance functions are not included in the current GMD program of record. Therefore, the committee recommended an increase of \$30 million in fiscal year 2015 for these efforts.

Do you agree that additional attention and funding is needed to ensure the reliability of the GMD system?

Answer. Reliability and maintenance are both factors that improve our overall confidence in the Ground-based Midcourse Defense system. As the system evolves, I believe we need to continue to focus on improvements that increase overall confidence and effectiveness of the Ground-based Midcourse Defense program.

CRUISE MISSILE DEFENSE

Question. NORTHCOM and NORAD have responsibilities for warning and defending the United States against airborne threats, including cruise missiles.

Relative to cruise missile defense, what do you believe should be the relationship between the Joint Integrated Air and Missile Defense Organization (JIAMDO) of the Joint Staff, on the one hand, and NORTHCOM and NORAD, on the other hand?

Answer. I believe the JIAMDO and NORAD and NORTHCOM should continue to partner on cruise missile defense. If confirmed, I would aim to carry forward the great working relationship previous commanders have developed with JIAMDO.

Question. Relative to the full spectrum of threats to the United States, how would you assess the cruise missile threat to the United States and its territories?

Answer. I assess that a cruise missile attack is possible, though unlikely to occur without indications and warnings registering with the Intelligence Community. I believe the cruise missile threat to be low; however, increasing capability and proliferation make the cruise missile problem increasingly more dangerous. If confirmed, I will be committed to development of a robust capability for cruise missile defense.

Question. If confirmed, what capabilities would you prioritize to address this threat?

Answer. I understand NORAD developed a Defense Design for Cruise Missile Defense of the National Capital Region and is currently evaluating emerging technologies to defend against the cruise missile and other air breathing threats. Technologies from the Defense Design are intended to be scalable for expansion across North America. If confirmed, I would closely monitor progress on cruise missile defense programs and emphasize the importance of an integrated air and missile defense capability to secure key terrain and critical infrastructure.

Question. What role do you believe the planned operational exercise of the Joint Land-Attack Cruise Missile Defense Elevated Netted Sensor (JLENS) system will play in establishing improved capabilities to detect and defend against evolving cruise missile threats to the Homeland?

Answer. I believe JLENS will play an extremely important role in establishing improved capabilities. As part of the Operational Exercise, efforts are underway to integrate this system into the existing NORAD air defense architecture. This will

significantly improve the capability to detect, track, and warn, and in the near future engage cruise missiles.

CONTINENTAL AIR DEFENSE

Question. How has the continental air defense mission changed since the end of the Cold War and the events of September 11, 2001?

Answer. In the Cold War era, NORAD was focused primarily on deterring, detecting, and defending against external threats approaching the continent from beyond our borders. Since September 11, 2001, NORAD's focus has evolved to also look at potential terrorist attacks originating from both inside and outside the borders of the United States and Canada.

Question. Do you believe that current U.S. continental air defense capabilities are adequate to meet national security needs?

Answer. Yes. Through a network of alert fighters, tanker aircraft, command and control platforms, and ground-based air defense systems, NORAD stands watch over the Homeland. I understand NORAD continues to evolve and regularly evaluates and updates its air defense capabilities in order to outpace threats and ensure the air defense of the United States and Canada.

Question. If confirmed, what capabilities and programs would you prioritize to address any identified deficiencies?

Answer. If confirmed, I will assess NORAD's air defense capabilities to confirm that they meet national security requirements. At that time, I will work to eliminate any identified deficiencies and ensure we maintain continuity of the aerospace warning and aerospace control mission.

MARITIME WARNING AND MARITIME DOMAIN AWARENESS

Question. NORAD has gained the mission of Maritime Warning for North America. How does this mission fit into the larger Maritime Domain Awareness mission, and what role do you expect NORAD and NORTHCOM to have in Maritime Domain Awareness in the near term?

Answer. The NORAD Maritime Warning mission relies upon Maritime Domain Awareness to develop a comprehensive shared understanding of the maritime operational environment and to issue bi-national warnings of maritime threats or attacks against North America. The Commander of NORAD and NORTHCOM coordinates with a global maritime community of interest to expand information sharing and Maritime Domain Awareness through agreements, plans development, cooperative training, and acquisition of Maritime Domain Awareness sensors/tools. In my current job, I'm also dual-hatted as Commander, U.S. Naval Forces Northern Command, and support NORTHCOM and NORAD to ensure that we share a very high degree of Maritime Domain Awareness.

ARCTIC REGION MISSION

Question. The 2011 UCP realigned the boundaries of combatant command AORs in the Arctic region. NORTHCOM's AOR now includes the Bering Strait and the North Pole. NORTHCOM was also tasked to become DOD's advocate for Arctic capabilities.

What is the practical effect of this assignment, and how has it changed NORTHCOM planning and operations?

Answer. The practical effect of the 2011 changes to the UCP is greater emphasis on planning for operations in the Arctic. The Arctic is an historic approach to the Homeland. It demands unique attention in light of the recent increase in accessibility and human activity in the region. I understand that NORTHCOM has undertaken significant planning and exercise efforts dedicated to a range of safety, security, and defense considerations. If confirmed, I will work to translate these plans and the lessons learned from exercises into a realistic, prioritized list of DOD requirements.

Question. What specific programs, if any, will you put in place if confirmed to identify and develop capabilities to protect and defend American sovereignty and interests in the Arctic region?

Answer. If confirmed, first I would focus on improving our awareness of human activity and operations in the region, encompassing a whole-of-government and whole-of-community approach. Information on current/pending Arctic activity resides with many U.S. Federal, State, and private sector entities, as well as counterpart organizations in Canada. I believe we need to understand what information is available, who has it, how we can get it, and how we can turn it into actionable information when needed. Next, I would look to improve communications at the high latitudes throughout the year and during severe weather conditions. Finally,

I would work to identify realistic requirements for defense infrastructure and ways to maintain presence.

Question. By what process will you identify requirements for support from other government agencies, such as the Coast Guard, in fulfilling requirements for the Arctic region?

Answer. I understand there is good interagency coordination already underway regarding the Arctic, and if confirmed, I will certainly work to further enhance that collaboration and cooperation. General Jacoby and former U.S. Coast Guard Commandant, Admiral Papp jointly signed an Arctic Capabilities Assessment White paper that recommended capability gaps, on which both the DOD and DHS should focus. Further, I understand NORTHCOM sponsors a working group that focuses on Arctic issues and routinely brings together various Federal and Alaska State agencies.

LAW OF THE SEA CONVENTION

Question. Do you support United States accession to the Law of the Sea Convention? If so, please explain why.

Answer. Yes. United States accession to the Law of the Sea Convention would provide a forum for protecting and advancing U.S. interests, including freedom of access and offshore resources. The Convention would support NORTHCOM's interest in the peaceful opening of the Arctic in a manner that strengthens international cooperation.

Question. Given NORTHCOM's responsibilities for the Arctic region, do you believe that accession to the Law of the Sea Convention would help the United States protect its interests in the Arctic, including against competing claims from foreign nations?

Answer. Yes, for several reasons. At the geostrategic level, I believe we should not be the only Arctic nation that is outside the Convention. In addition, all the other countries bordering the Arctic Ocean are Parties and have made (or are preparing) submissions regarding continental shelves beyond 200 miles to the Convention body. We are working on the outer limits of the U.S. shelf, the largest single portion of which is in the Arctic, but can only get a formal blessing if we join the Convention. Lastly, as Arctic warming enables a wide range of human activity (shipping, oil/gas, tourism, fishing), it becomes more important that we put our ocean rights on a treaty footing and have a larger voice in the interpretation/development of rules.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Commander, NORTHCOM, and Commander, NORAD?

Answer. Yes

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR SAXBY CHAMBLISS

WESTERN HEMISPHERE INSTITUTE FOR SECURITY COOPERATION

1. Senator CHAMBLISS. Admiral Gortney, as a member of the Western Hemisphere Institute for Security Cooperation (WHINSEC) Board of Visitors, I was pleased to read in your advance policy questions about your strong support of their mission and your eagerness to further strengthen our cooperation with our partner nations. As we continue to focus on strengthening the security capacities of our partners in South and Central America, what additional roles can WHINSEC play in that endeavor?

Admiral GORTNEY. I believe additional roles for WHINSEC and the leaders it influences include the continuing evolution of human rights education, as well as implementation of lessons learned from military/law enforcement operations and outreach with civilian institutions. WHINSEC contributes to the profession of arms of partner nations through a curriculum that is grounded in rule of law and human rights, ultimately supporting NORTHCOM's mission where partner nations contribute to the cooperative defense of North America.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

EAST COAST MISSILE DEFENSE

2. Senator AYOTTE. Admiral Gortney, the current Commander of U.S. Northern Command (NORTHCOM), General Jacoby, stated: "The third site, if you built it, would give us better weapons access, it'd give us increased inventory and increased battle space with regards to a threat coming from the direction of the Middle East." Do you agree with General Jacoby?

Admiral GORTNEY. I agree with his assessment, as well as his comments that conducting the Environmental Impact Studies at all four potential sites puts us in a favorable position to make a fielding decision in a timely fashion, should the Department decide to do so.

3. Senator AYOTTE. Admiral Gortney, are you aware of section 227 of the National Defense Authorization Act for Fiscal Year 2013, the requirement for the Director of the Missile Defense Agency (MDA) to develop a contingency plan for the deployment of a Homeland missile defense interceptor site? If yes, please explain your thoughts about this contingency plan.

Admiral GORTNEY. I understand the MDA plans to complete the Environmental Impact Studies at all four potential sites by the end of 2015. The data from these studies will be used by MDA to inform the contingency plan that will then be presented to Congress.

4. Senator AYOTTE. Admiral Gortney, do you commit to working with the MDA to develop the contingency plan and coming back and briefing me on it, once you are confirmed?

Admiral GORTNEY. If confirmed, I am committed to working with MDA in all endeavors related to homeland defense. Regarding the contingency plan, I believe that we need to wait for completion of the Environmental Impact Studies at the four sites and then make an informed decision on which site makes the most sense. While this process unfolds, we will continue to watch the threat so that we will be in a position to make an informed decision when required. I believe MDA is best positioned to brief you on the contingency plan as the Department of Defense (DOD) lead for this effort, but if confirmed, should you have any residual questions for NORTHCOM, I would be happy to talk to you at your convenience.

JOINT LAND ATTACK CRUISE MISSILE DEFENSE ELEVATED NETTED SENSOR SYSTEM

5. Senator AYOTTE. Admiral Gortney, the Joint Land Attack Cruise Missile Defense Elevated Netted Sensor System (JLENS) engineering and manufacturing development successfully concluded in December 2013. What capabilities would JLENS provide the NORTHCOM commander?

Admiral GORTNEY. The JLENS (aerostat radar) at Aberdeen Proving Ground will provide persistent surveillance and fire control; cueing for defense against cruise missile, aircraft, Unmanned Aircraft System, and large caliber rockets; as well as wide area surveillance for the Northeast United States.

6. Senator AYOTTE. Admiral Gortney, I understand that DOD is deploying a JLENS at Aberdeen Proving Ground (APG). What are the goals for this deployment?

Admiral GORTNEY. The goals for this deployment are to surveil, detect, track, identify, and provide fire quality tracks to our air defense structure. By taking advantage of JLENS wide area surveillance, the overall objective is to increase decision time available to respond efficiently and accurately for the defense of Washington, DC.

7. Senator AYOTTE. Admiral Gortney, what does NORTHCOM expect to learn from the deployment at APG?

Admiral GORTNEY. The operational exercise will demonstrate JLENS integration into NORAD's air defense structure to detect, track and identify potential air threats to the greater Washington DC area, as well as new technologies to safely employ the current rules of engagement for Operation Noble Eagle. The operational exercise objectives include: use JLENS for wide-area surveillance in order to support current decisions and intercept timelines; provide precision cue to fighters and Ground-Based Air Defense (GBAD) to aid in acquiring and prosecuting tracks of interest; use current Operation Noble Eagle and NORAD rules of engagement and timelines; focus on the cruise missile threat to the Homeland; include general aviation, Unmanned Aerial Systems and ultra-lights, as time allows; and, consider surface moving targets in the maritime domain.

8. Senator AYOTTE. Admiral Gortney, what are the metrics that will be used to evaluate the deployment at APG?

Admiral GORTNEY. I understand NORAD staff is drafting an assessment plan for the JLENS operational exercise, which will document the approach, data, and analysis being used to assess how the system supports the NORAD air defense mission. The plan will support the 2014 National Defense Authorization Act requirement to provide a report to the congressional defense committees that identifies planned data and analysis for the demonstration. This report is due no later than 90 days after initiation of the JLENS demonstration and if confirmed, I plan to submit it in the 2nd quarter of fiscal year 2015.

9. Senator AYOTTE. Admiral Gortney, what is the timeline for the deployment at APG?

Admiral GORTNEY. The JLENS consists of two aerostats: a surveillance system and a fire control system. The surveillance system is expected to fly in mid-December 2014, followed approximately 6 weeks later by the fire control system. An initial operational capability is estimated for late second quarter/early third quarter fiscal year 2015. During the 3-year test window, JLENS capabilities will be fully explored as part of the NORAD air defense structure.

10. Senator AYOTTE. Admiral Gortney, what will be the next step after the deployment at APG?

Admiral GORTNEY. I understand the next step will be a decision by the Secretary of Defense whether to transition JLENS to operational status. The deployment and operational exercise will provide the information needed for the Secretary to make this determination.

NATIONAL GUARD

11. Senator AYOTTE. Admiral Gortney, the National Guard plays an essential role in responding to manmade and natural disasters here at home. What is your assessment regarding the role of the National Guard in helping NORTHCOM accomplish its Homeland missions?

Admiral GORTNEY. NORTHCOM's homeland missions directly align with the first of three pillars emphasized in the defense strategy: protect the Homeland. To protect the Homeland, NORTHCOM is prepared to deter and defeat attacks on the United States and to support civil authorities in mitigating the effects of potential attacks and natural disasters. As a component of the Total Force, the National Guard plays an essential role in all aspects of NORTHCOM's homeland missions. Daily, members of the Air National Guard stand ready, or actively fly, missions directly supporting Operation Noble Eagle. For defense support of civil authorities, NORTHCOM recognizes and supports the vital role that the National Guard plays in the National Response Framework.

12. Senator AYOTTE. Admiral Gortney, will you make it a priority to develop a strong relationship with the National Guard, once you are confirmed?

Admiral GORTNEY. Yes. I believe a trusted relationship and strong teamwork between the Commander, NORTHCOM and the Chief of the National Guard Bureau are critical to the continued success of NORTHCOM mission accomplishment. If confirmed, I will be committed to building on an already strong relationship with the National Guard Bureau.

[The nomination reference of ADM William E. Gortney, USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 23, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the U.S. Navy to the grade indicated while assigned to a position of importance and responsibility under Title 10, U.S.C., section 601:

To be Admiral

ADM William E. Gortney, 0000.

[The biographical sketch of ADM William E. Gortney, USN, which was transmitted to the committee at the time the nomination was referred, follows:]

TRANSCRIPT OF NAVAL SERVICE FOR ADM WILLIAM EVANS GORTNEY, USN

02 Sep 1977 Ensign
02 Sep 1979 Lieutenant (junior grade)
01 Oct 1981 Lieutenant
01 Jul 1987 Lieutenant Commander
01 Sep 1992 Commander
01 Dec 1998 Captain
01 May 2005 Rear Admiral (lower half)
01 Nov 2007 Rear Admiral
05 Jul 2008 Vice Admiral
14 Sep 2012 Admiral, Service continuous to date

Assignments and duties:

	From	To
Training Squadron Six (DUINS)	Sep 1977	Dec 1977
Naval Aviation Schools Command, Pensacola, FL (DUINS)	Dec 1977	Jan 1978
Training Wing One (DUINS)	Jan 1978	Jan 1979
Training Squadron Two Six (Flight Instructor)	Jan 1979	Jun 1980
Attack Squadron One Seven Four (Ready Replacement Pilot)	Jun 1980	Mar 1981
Attack Squadron Eight Two (Weapons Training Officer)	Apr 1981	Mar 1984
Strike Fighter Squadron One Two Five (Strike Phase Head)	Mar 1984	Sep 1987
Naval Post Graduate School, Monterey, CA (DUINS)	Oct 1987	Nov 1987
Strike Fighter Squadron Eight Seven (Maintenance Officer)	Nov 1987	Jul 1989
Office of the Chief of Naval Operations (Aide to Assistant Chief of Naval Operations for Air Warfare)(OP-05).	Jul 1989 ..	Mar 1991
Strike Fighter Squadron One Zero Six (DUINS)	Mar 1991	May 1991
XO, Strike Fighter Squadron One Three Two	May 1991	Jun 1992
XO, Strike Fighter Squadron One Five	Jun 1992	Oct 1993
CO, Strike Fighter Squadron One Five	Oct 1993	Jan 1995
Naval War College, Newport, RI (DUINS)	Feb 1995	Mar 1996
CO, Strike Fighter Squadron One Zero Six	Mar 1996	Jul 1997
Joint Staff, Washington, DC (Operations Officer)(J3)	Jul 1997 ..	Jul 1999
Strike Fighter Squadron One Zero Six (DUINS)	Jul 1999 ..	Oct 1999
Joint Task Force Southwest Asia, Eskan Village, Riyadh, Saudi Arabia (Deputy for Current Operations).	Oct 1999	Feb 2000

	From	To
Strike Fighter Squadron One Zero Six (DUINS)	Feb 2000	May 2000
Commander, Carrier Air Wing Seven (Deputy Commander)	May 2000	Jan 2002
Commander, Carrier Air Wing Seven	Jan 2002	Feb 2003
Commander, Fifth Fleet/Commander, U.S. Naval Forces Central Command (Chief of Staff)	Feb 2003	Aug 2004
Commander, U.S. Fleet Forces Command (Director for Operations, Plans, Policy, and Training) (N3/5/7).	Aug 2004	Jul 2006
Commander, Carrier Strike Group Ten	Jul 2006 ..	Apr 2008
Commander, Second Fleet (Special Assistant)	Apr 2008	Jul 2008
Commander, U.S. Naval Forces, Central Command and Commander, Fifth Fleet	Jul 2008 ..	Jul 2010
Director, Joint Staff	Jul 2010 ..	Aug 2012
Commander, U.S. Fleet Forces Command	Sep 2012	To Date

Medals and awards:

Defense Superior Service Medal
 Legion of Merit with one Gold Star
 Bronze Star Medal
 Defense Meritorious Service Medal with one Bronze Oak Leaf Cluster
 Meritorious Service Medal with two Gold Stars
 Air Medal with one Gold Star and numeral 3
 Joint Service Commendation Medal with two Bronze Oak Leaf Clusters
 Navy and Marine Corps Commendation Medal
 Navy and Marine Corps Achievement Medal
 Joint Meritorious Unit Award with one Bronze Star
 Navy Unit Commendation
 Meritorious Unit Commendation with one Bronze Star
 Navy Expeditionary Medal
 National Defense Service Medal with one Bronze Star
 Armed Forces Expeditionary Medal with one Bronze Star
 Southwest Asia Service Medal with one Bronze Star
 Global War on Terrorism Expeditionary Medal
 Global War on Terrorism Service Medal
 Armed Forces Service Medal
 Humanitarian Service Medal
 Sea Service Deployment Ribbon with one Silver Star and two Bronze Stars
 Navy and Marine Corps Overseas Service Ribbon
 NATO Medal
 Kuwait Liberation Medal (Kuwait)

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by ADM William E. Gortney, USN, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
William E. Gortney.
2. **Position to which nominated:**
Commander, U.S. Northern Command/Commander, North American Aerospace Defense Command.
3. **Date of nomination:**
June 24, 2014.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
September 25, 1955; La Jolla, CA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Sherry Ann Gortney.
Sherry Ann Burdeshaw (Maiden Name).
7. **Names and ages of children:**
William Gortney, age 32.
Stephanie Gortney, age 27.
8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the Service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
KAPPA SIGMA - Elon University, Tailhook Association, Naval Institute.
11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.
2013 KAPPA SIGMA Man of the Year.
12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?
Yes.
13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?
Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

WILLIAM E. GORTNEY.

This 13th day of May, 2014.

[The nomination of ADM William E. Gortney, USN, was reported to the Senate by Chairman Levin on July 22, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 23, 2014.]

[Prepared questions submitted to GEN John F. Campbell, USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. What is your understanding of the duties and functions of the Commander, North Atlantic Treaty Organization (NATO) International Security Assistance Force (ISAF)?

Answer. The Commander, ISAF (COMISAF) is the senior NATO uniformed officer in Afghanistan. He is the in-theatre operational commander exercising operational control of all ISAF forces in Afghanistan. COMISAF employs assigned forces, through a strategic partnership with Government of the Islamic Republic of Afghanistan (GIROA), to conduct functionally based security force assistance (train, advise, assist) to enable credible, capable and increasingly sustainable Afghan Security Institutions and Afghan National Security Forces (ANSF) that are capable of preventing terrorist safe havens in Afghanistan.

ISAF is a NATO-directed operation conducted under U.N. Security Council Resolution (UNSCR) 1386 (2001), which authorizes the establishment of ISAF to assist the Afghan Government in maintaining security in Kabul and surrounding areas and to take all necessary measures to fulfill this mandate. Following a U.N. and NATO/North Atlantic Council agreement, NATO assumed strategic command of ISAF on 11 August 2003 under the authority of UNSCR 1386 and successor UNSCRs. Subsequently, UNSCR 1510 (2003) geographically expanded the ISAF mandate established in UNSCR 1386 to cover all of Afghanistan.

Question. What is your understanding of the duties and functions of the Commander, U.S. Forces Afghanistan (USFOR-A) and how do those duties and functions relate to those of the Commander, NATO ISAF?

Answer. The Commander of USFOR-A is the senior U.S. officer in Afghanistan with duties distinct from his duties as COMISAF. The USFOR-A Commander exercises National Command Element and National Support Element authorities and responsibilities for ensuring that U.S. forces have the guidance, equipment, and funding they need to conduct their missions. He ensures unity of effort among all U.S. forces including those under the ISAF command and those forces not under ISAF command, such as those U.S. forces conducting U.S. detention operations and U.S. counterterrorism operations.

COMISAF employs the forces that troop-contributing nations provide to ISAF of which the United States remains the largest troop-contributing nation. The Commander, USFOR-A, directs and oversees the United States' military contributions within ISAF while COMISAF duties include ensuring the operations of all troop-contributing nations, including those of U.S. forces, are coordinated.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have had the opportunity to work very closely on Afghanistan in several of my assignments as a general officer to include my current position as the Vice Chief of Staff of the Army and my previous position as the Deputy Chief of Staff G3/5/7, specifically focused on personnel, retrograde, and resourcing our forces. I commanded RC-East in 2010–2011 as the Division Command of the 101st Airborne, and also deployed my Brigade there in 2003 when in Command of 1st Brigade, 504th Parachute Infantry Regiment, 82nd Airborne Division. My command in RC-East in 2010–2011 was during the surge and consisted of a combined force of approximately 30,000 U.S. and allied servicemembers in 14 provinces in Eastern Afghanistan, and shared more the 300 miles of border area with Pakistan. This provided me with critical coalition leadership experience and relationships. We also successfully partnered with two Afghan National Army Corps, a large contingent of Afghan Police and Afghan Border Police, and routinely worked with the Pakistan Army to facilitate complementary operation against insurgents in the border areas.

Since leaving command in 2011, I have traveled to Afghanistan on multiple occasions and dedicated a great deal of time to self study of the Afghanistan/Pakistan region. In my current assignment I frequently represent the Chief of Staff of the Army in Tank sessions where our Afghanistan-Pakistan strategy is addressed and I contribute to the development of best military advice to the Secretary of Defense and the President. I have also interacted extensively with Congress as the Vice Chief of Staff and feel I understand the Civil-Military relationship that must exist to achieve success.

Finally, I believe my experience as a deputy Division commander and a General Officer in Iraq in 2006 and 2007 was valuable combat leadership experience and enhanced my understanding of the nature of counterinsurgency operations and the associated challenges. All of these experiences, if confirmed, will serve as a foundation for my leadership as the ISAF Commander.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, NATO ISAF, and/or Commander, USFOR-A?

Answer. A professional military officer should never stop listening or learning. If confirmed, I will continue to deepen my knowledge of the strategic environment and seek input from a wide range of military and civilian experts. If confirmed and before taking command, I will also spend a great deal of time visiting our forces on the ground and leaders from across NATO to enhance my understanding of the fight and to assist me in refining my personal framing of the problem.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Commander, NATO ISAF/Commander, USFOR-A, to the following:

The Secretary of Defense.

Answer. The USFOR-A Commander reports to the CENTCOM Commander, who, in turn, reports directly to the Secretary of Defense. This reporting relationship is prescribed in title 10, U.S.C., section 164(d)(1). COMISAF does not have a formal relationship with the Secretary of Defense because COMISAF reports to the NATO chain of command through the Commander of Joint Forces Command-Brunssum, who reports to the Supreme Allied Commander Europe (SACEUR).

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The USFOR-A Commander does not have a formal command relationship with the Chairman of the Joint Chiefs of Staff but coordinates with him through the CENTCOM Commander on a regular basis. The Chairman is the principal military advisor to the President, the Secretary of Defense, and the National Security Council and while he is the Nation's senior military officer, he is not in the chain of command. The USFOR-A Commander sends his advice and opinions on military operations to the Chairman through the CENTCOM Commander.

Question. Commander, U.S. Central Command.

Answer. The Commander, USFOR-A works very closely with the Commander, CENTCOM on all aspects of U.S. military operations in Afghanistan. By law, the Commander, USFOR-A reports directly to the Commander, CENTCOM. The Commander, CENTCOM exercises authoritative direction and control over all U.S. Forces in the CENTCOM area of responsibility, which includes all U.S. Forces in Afghanistan. The Commander, CENTCOM provides authoritative direction over all aspects of military operations, joint training, and logistics. He has delegated National Command Element and National Support Element authority and responsibilities to the Commander, USFOR-A.

Question. NATO Supreme Allied Commander, Europe.

Answer. NATO Supreme Allied Commander, Europe, is the NATO strategic-level commander of all NATO forces, including those assigned to the NATO mission in Afghanistan. He provides the Commander of Joint Forces Command-Brunssum (JFC-B) with strategic guidance and direction. Joint Forces Command-Brunssum is NATO's operational level command responsible for the mission in Afghanistan. In short, SACEUR provides strategic direction and campaign objectives and the Commander of JFC-B directs COMISAF to attain these objectives and perform key military and supporting tasks, as mandated by the North Atlantic Council.

Question. Commander, ISAF Joint Command.

Answer. ISAF Joint Command (IJC) is ISAF's operational-level command and is subordinate to HQ ISAF. As such, the commander of IJC, reports to COMISAF. The IJC Commander is also dual-hatted as the Deputy Commander of USFOR-A, and retains certain U.S. command authorities. IJC was established in November 2009.

Question. Commander, NATO Training Mission-Afghanistan.

Answer. NTM-A oversees training and equipping of Afghan forces across Afghanistan and is subordinate to IJC. NTM-A trains, advises, and assists ANSF training in order to support the creation of a capable and enduring force that protects the Afghan population and denies safe haven to the insurgency. NTM-A was established in April 2009, merged into the Combined Security Transition Command-Afghanistan (CSTC-A) in March 2010, and then reassigned to IJC in 2013.

Question. Commander, Joint Interagency Task Force Afghanistan.

Answer. Commander, Combined Joint Interagency Task Force-Afghanistan (CJIATF-A) is a subordinate headquarter to headquarter ISAF. CJIATF-A provides operational advice, recommendations, and synchronizes strategic Counter Corruption, Counter Narcotics, Counter Threat Finance, and No Contracting with the Enemy activities in order to deny resources to the enemy, enhance transparency and accountability within GIRoA, and strengthen the International Community's confidence in GIRoA. CJIATF-A accomplishes these missions through two sub task forces, two mentoring teams, and two partnered interagency units.

Question. U.S. Ambassador to Afghanistan.

Answer. The USFOR-A Commander provides operational assistance and advice, to include U.S. military views and recommendations, to the U.S. Ambassador. He maintains a close working relationship with the Ambassador to ensure that military and civilian efforts are synchronized and mutually supporting. This is particularly important in the Rule of Law arena where the Department of State has the lead for the United States Government. The Commander, Combined Joint-Interagency Task Force 435 (who reports directly to the USFOR-A Commander), provides support to the Coordinating Director for Rule of Law and Law Enforcement, who reports directly to the U.S. Ambassador.

Question. U.S. Special Representative for Afghanistan and Pakistan.

Answer. The USFOR-A Commander provides operational assistance and advice, to include U.S. military views and recommendations, to the U.S. Special Representative for Afghanistan and Pakistan. He maintains a close working relationship with the Special Representative to ensure that military and civilian efforts are synchronized and mutually supporting. This relationship is particularly important to the ongoing security and political transition, as well as re-integration and reconciliation efforts, which will facilitate an inclusive Afghan political solution to the conflict in Afghanistan.

Question. The Secretary General of NATO.

Answer. The NATO Secretary General chairs the North Atlantic Council, the highest political authority in NATO. The North Atlantic Council is responsible for the overall decisions and direction of NATO policy and operations and is comprised of ambassador-level representatives of all NATO members, including the United States. The Council is advised on military matters and the conduct of operations by the Military Committee, which is also composed of senior military representatives from each member state. The North Atlantic Council, under the Secretary General's leadership, provides overall direction and guidance to the military chain of command. In practical terms, the SACEUR leads all NATO military operations and advises NATO's Military Committee. Thus, in the case of the ISAF mission, the Secretary General, following consultations and decisions by the North Atlantic Council, provides guidance and direction to SACEUR through the Military Committee, and the SACEUR communicates those directives and guidance through NATO's military chain of command. COMISAF and the Secretary General confer and consult regularly, including formal updates to the Secretary General and the North Atlantic Council on the progress of military operations in Afghanistan.

Question. NATO Senior Civilian Representative for Afghanistan.

Answer. The NATO Senior Civilian Representative (SCR) for Afghanistan is the civilian counterpart to COMISAF. As the NATO Secretary General's direct representative in Afghanistan, the SCR is charged with carrying forward the political aspects of NATO's engagement in Afghanistan. Although there is no formal command relationship, the SCR and COMISAF work in close concert and with full transparency in accordance with the North Atlantic Council-approved Terms of Reference for the SCR and SACEUR as well as JFC-B's guidance for COMISAF. In short, this cooperative relationship is critical to underwrite NATO's operational military and political engagement in Afghanistan and can help to improve cooperation between ISAF and international civilian agencies in Afghanistan.

Question. United Nations Special Representative in Afghanistan.

Answer. U.N. Special Representative of the Secretary-General (SRSG) for Afghanistan is an important leader in the international community's efforts in Afghanistan. While no command relationship exists between COMISAF and the U.N. SRSG, the ISAF mission was authorized by U.N. Security Council Resolution to assist the Afghan Government in the establishment of a secure and stable environment. Simi-

larly, the U.N. SRSG has a mandate to lead the U.N. Assistance Mission in Afghanistan (UNAMA) supporting the Afghan Government in its efforts to improve critical areas, including security, governance, economic development, and regional cooperation, as well as to support the full implementation of mutual commitments made on these issues at the London Conference in January 2010 and the subsequent Kabul Conference in July 2010. The SACEUR OPLAN states that COMISAF is expected to work in close coordination with both the NATO SCR and the U.N. SRSG. These partnerships support efforts to work with the Afghan Government to ensure progress towards the goal of a self-sufficient Afghanistan.

MAJOR CHALLENGES

Question. What are the major challenges and problems you foresee, if confirmed as the next Commander, NATO ISAF/Commander, USFOR-A, in the implementation of the mission in Afghanistan?

Answer. I believe there are three major challenges. Our first challenge is to manage the transition from the ISAF mission and force level to the 2015 Resolute Support mission and force level. The Resolute Support mission posture reduces our footprint to fewer bases in four regions and the Kabul-Bagram area. This will be a significant transition for both the Coalition and the Afghans, as the ANSF takes full responsibility for security even as they work to build long-term capability. The second challenge involves the shift of advisory efforts from combat advising to developing the Afghan Security Institutions to sustain a modern army and national police force. Our third challenge will be to continue effective counterterrorism operations to dismantle, defeat, and disrupt al Qaeda in the region.

Question. If confirmed, what plans do you have for addressing these challenges and problems?

Answer. If confirmed, I will work with the U.S. Government, NATO, and other troop-contributing nations, and our Afghan partners to execute a mutually agreed-upon framework for the transition process and capacity-building within the ANSF and the broader Afghan system. I will work closely with security ministers and other key leaders to help them prioritize requirements and focus on developing Afghan self-sustainability of an effective security force. We will decisively counter insurgent narratives of coalition abandonment through these and other transition actions.

Question. What is your understanding of U.S. vital interests and strategic objectives in Afghanistan currently and the changes, if any, after 2014?

Answer. The U.S. presence in Afghanistan aims to defeat al Qaeda and its affiliates, contribute to regional and international peace and stability, and enhance the ability of Afghanistan to deter threats against its sovereignty, security, and territorial integrity. Our mission provides time and space for the ANSF and GIRoA to increase capacity and assume full responsibility for Afghanistan's security by the end of 2014.

Diplomatic efforts continue to complement military efforts. The United States and the international community continue to encourage Afghan reconciliation efforts with the Taliban as a means to a political solution to the conflict.

Question. What is your understanding of U.S. strategy to achieve these objectives?

Answer. The International Security Assistance Force's primary task is to develop the capacity and capability of the ANSF to provide security for Afghanistan. The campaign remains a comprehensive counterinsurgency but is now Afghan-led. The coalition continues its efforts to deny safe havens for AQ and supports expanding GIRoA efforts to disrupt terrorist safe havens. The primary means to achieve this is through the development and fielding of a capable, sustainable ANSF.

SECURITY SITUATION IN AFGHANISTAN

Question. What is your assessment of the security situation in Afghanistan and the nature, size, and scope of the insurgency?

Answer. The insurgency is an enduring threat to Afghanistan. However, the insurgency's operational effectiveness has been degraded in some parts of the country so far this year, due in part to improved ANSF performance and growing divisions within the Taliban. As a result, the 2014 summer fighting season violence levels are below historical norms. Most notably, the Taliban failed to derail the Afghan Presidential elections, as Afghans voted in record numbers despite Taliban threats of violence. However, the insurgents are resilient. They maintain safe havens in Afghanistan and leverage them to train and plot future attacks. Additionally, the presence of numerous insurgent/terrorist groups (e.g., Taliban, Haqqani Network, al Qaeda, Lashkar-e-Tayyiba, etc.) allows for the sharing of tactics, techniques and procedures. The insurgents also have access to significant internal resources

through religious taxation, illicit mining, narcotics trade, and other criminal enterprises (kidnapping, human trafficking, etc. . . .).

While the insurgency is by no means popular among the Afghan population, it continues to attract Afghans to join its ranks through coercion, disenfranchisement, or the lack of an alternative means to support their family. Recruitment may decline as the ISAF presence decreases and as battle fatigue sets in amongst Taliban rank-and-file. Nonetheless, expect the insurgents to attempt to capitalize on any political missteps to undermine popular faith in GIRoA.

Question. What is your assessment of the role and importance of Pakistan to the security situation in Afghanistan? In what areas do you think Pakistan could improve to enhance the security situation in Afghanistan?

Answer. Pakistan is postured to occupy a significant role in the security situation in Afghanistan. Pakistan's first priority is its eastern border with India, but it also continues to be concerned over growing Indian influence in Afghanistan. Pakistan is and will continue to be a critical partner in the region. The stability of the entire region requires cooperation between Pakistan and Afghanistan. Both nations face common threats that attack their civilian populations and threaten their long-term development. Both nations must work together to reduce cross border militancy and resolve conflicts to enhance the security of each nation and the region as a whole. I will continue to work with both nations to support a constructive bilateral relationship to support these two allies and enhance long-term stability throughout the region.

U.S. MILITARY PRESENCE IN AFGHANISTAN AFTER 2014

Question. In May, President Obama announced that, if the U.S.-Afghan Bilateral Security Agreement is concluded, the United States would plan to retain 9,800 U.S. servicemembers in Afghanistan, along with our allies and partners. The mission of these U.S. forces would be training, advising and assisting Afghan security forces and supporting counterterrorism operations against al Qaeda. The President also announced that this U.S. troop level would be reduced by approximately half by the end of 2015, consolidating forces in Kabul and at the Bagram air base. By the end of 2016, U.S. forces would be drawdown to an embassy presence in Kabul, with a security assistance component.

Do you support the President's decision on the size of the U.S. military presence in Afghanistan after 2014?

Answer. Yes, I support the President's decision.

Question. Do you support the pace for the reduction of those forces between the end of 2014 and the beginning of 2017?

Answer. Yes, with an understanding that we should continue to validate the assumptions and assess the conditions on the ground as the drawdown takes place.

Question. The President said that "our military will draw down to a normal embassy presence in Kabul" by the end of 2016.

What is your understanding of what a "normal embassy presence" looks like?

Answer. A normal embassy presence will consist of a Defense Attaché Office and a Security Cooperation Office under a Senior Defense Official with a military reporting chain through the CENTCOM. A deliberate and measured transfer of enduring security cooperation activities is required to maintain continuity of ANSF development and maintain our relationship with Afghanistan as an enduring counterterrorism partner. Planning for the Security Cooperation Office-Afghanistan is underway at CENTCOM and its size will depend upon factors such as security cooperation objectives, ANSF capabilities, GIRoA requests, security assistance funding oversight requirements, and force protection concerns.

Question. What is your understanding of what a "normal" security relationship with Afghanistan will look like?

Answer. A normal security relationship with Afghanistan will come to resemble security cooperation organizations that operate in other parts of the world out of U.S. Embassies. The Security Cooperation Office-Afghanistan will contain a security force assistance capability tailored to the needs of the ANSF and Afghan Security Institutions. Over the long term, I see the United States and Afghanistan establishing an enduring strategic partnership, with many facets in addition to the military, that furthers U.S. strategic objectives in the region.

Question. What are the major challenges you foresee, if confirmed, in the implementation of the plan announced by the President?

Answer. I believe there are three major challenges. Our first challenge is to manage the transition from the ISAF mission and force levels to the 2015 Resolute Support mission and force level. The second challenge involves the shift of advisory efforts from combat advising to developing the Afghan Security Institutions to sustain

a modern army and national police force. Our third challenge will be to continue effective counterterrorism operations, both training, advising, and assisting our Afghan partners and through bilateral operations with the Afghans to dismantle, defeat and disrupt al Qaeda in the region.

Question. If confirmed, what plans do you have for addressing those challenges?

Answer. If confirmed, I will work with United States, NATO and other troop contributing nations, and the Afghans to ensure we posture the force for Resolute Support. I will continue the effort with NATO and the Services to build a Resolute Support advisory team that will strengthen the Afghan Security Institutions. I will ensure the counterterrorism mission in Afghanistan remains effective through the transition period.

Question. You have experience leading combat operations in both Iraq and Afghanistan. What are the key lines of effort and key dynamics that will ensure Afghan security conditions will be better after 2014 than the circumstances we are seeing in Iraq today?

Answer. Afghanistan and Iraq are two different places, with different cultural and security dynamics at play. The key dynamic is the possibility of a stable political transition that results in a new Afghan President who is seen as legitimate both in the eyes of the Afghan people and of the international community. The Afghan people have demonstrated their rejection of the insurgents through their overwhelming participation in the recent elections. The Afghan Security forces have developed a sense of responsibility and accountability for the security of all of the Afghan people. The Afghan people have returned this sentiment with a sense of national pride and ownership of the security forces. The ANSF have proven their combat capability through success in two fighting seasons, two national elections, and multiple high profile events. The key line of effort I see after 2014 is ministerial level training, advising, and assistance, which will ensure the sustainability of the ANSF and institutionalize long-term security for Afghanistan. An effective counterterrorism partnership between Afghanistan and the United States is essential to address our most dangerous adversaries in the region.

NATO AND PARTNER NATION PRESENCE IN AFGHANISTAN AFTER 2014

Question. What do you anticipate will be the NATO and other partner force levels in Afghanistan after 2014?

Answer. For 2015, the total NATO contribution will be approximately 12,500 troops. For military planning and force generation purposes, a two-thirds/one-third methodology is expected to apply, where the United States will contribute roughly two-thirds (up to 9,800 personnel) and NATO will provide one-third (approximately 4,500) of the total Resolute Support mission force.

Question. Will those forces be covered under the Bilateral Security Agreement (BSA) or under their own agreements?

Answer. The BSA covers U.S. forces. The draft NATO-Afghanistan status of forces agreement (SOFA) covers all NATO forces, as well as non-NATO operational partners. Non-NATO operational partners include nations such as Australia and New Zealand. U.S. forces will be covered under both the BSA and the NATO-Afghanistan SOFA. Both agreements stipulate that the sending state, in our case the United States, will retain exclusive jurisdiction over their forces.

Question. What roles and missions do you anticipate for partners and allies after 2014?

Answer. In addition to the U.S. mission in southern and eastern Afghanistan, other Framework Nations will control three of five areas of responsibility across the remainder of the country. Germany will lead the Train Advise Assist Command (TAAC) in the North, based out of Mezar e Sharif; Italy will lead the TAAC in the west, based out of Herat; and Turkey will command the Central area of operations from Kabul. The execution of train, advise, and assist (TAA) will entail the development of the Afghan Security Institution programs and processes, through facilitation and counseling. It will also develop the provision of assistance in administration, planning, and financial management.

Non-Framework Nations will also contribute to the mission through bilateral initiatives in support of the train, advise, and assist effort; such as the UK-led training team at the Afghan National Army Officer Academy in Qargha. Other Troop Contributing Nations will provide individual augmentees across the full spectrum of staff functions, having bid for specific appointments through the NATO 'Flags to Posts' process. These personnel will contribute to the combined minimum target of 12,000 for the Resolute Support mission. In addition to these roles, partner nations will continue to provide training and advising assistance to the Afghan Special Security Forces (ASSF) within the terms of the NATO SOFA authorities.

BILATERAL SECURITY AGREEMENT

Question. Do you support the conclusion of a bilateral security agreement with Afghanistan?

Answer. Yes.

Question. Do you agree that, without the legal protections against prosecution in Afghan courts that the Bilateral Security Agreement would provide our troops, the United States should withdraw its military forces from Afghanistan?

Answer. Yes, I do. If we are unable to secure adequate status protections for U.S. Department of Defense military and civilian personnel, critical operational authorities for U.S. forces, and necessary U.S. access to and use of Afghan facilities, we will need to withdraw.

PROGRESS OF AFGHANISTAN OVER THE PAST DECADE

Question. What is your assessment of Afghanistan's progress over the past decade that our troops have operated in that country?

Answer. The people of Afghanistan, the Afghan Government, and international supporters have contributed to the significant progress within Afghanistan over the last decade. Of note, the ANSF has taken full responsibility for the security of Afghanistan and earned the respect of the population, while improved access to education and medical care has increased the quality of life for Afghans. The November 2013 Loya Jirga's overwhelming endorsement of the Bilateral Security Agreement (BSA) and the high turnout for the April and June 2014 elections were indicative of popular support for representative government and a continued international partnership and presence.

PERFORMANCE OF THE AFGHANISTAN NATIONAL SECURITY FORCES

Question. In mid-2013 the Afghanistan National Security Forces (ANSF) assumed lead responsibility for security throughout Afghanistan.

What is your assessment of the performance and capabilities of the ANSF since assuming the lead for Afghanistan's security?

Answer. The ANSF have more than held their own against the insurgency, sustaining the gains made in the 2013 fighting season. They successfully secured the presidential and provincial council elections on April 5, 2014, as well as the run-off elections on June 14, 2014. The ANSF continue to demonstrate that they are a competent and confident force, and have embraced their role in securing Afghanistan. The ANSF enjoy the support and confidence of the majority of the Afghan people. While their capabilities have expanded rapidly since 2009, they are not yet self-sustainable. Based on current assessments I have reviewed, four key high-end capability gaps that will remain after the ISAF mission ends on December 31, 2014: close air support; intelligence enterprise; special operations; and Afghan security ministry capacity. International funding and coalition force assistance will be critical to sustaining the force after 2014 and ensuring that Afghan Security Institutions continue to marginalize the insurgency by maintaining ANSF's tactical overmatch. If confirmed, I will focus the forces' efforts towards these challenges, building on the progress that has already been made.

Question. What do you consider to be the most significant challenges the ANSF face in assuming and maintaining their security responsibilities in the next few years?

Answer. ANSF must adapt to operations without coalition enablers as ISAF forces phase out of the battle space over time. Our primary task has changed from leading combat operations to providing Security Force Assistance (SFA) to the ANSF. As we enter the final stages of the ISAF mandate and prepare to execute Resolute Support, the ANSF have reached an important threshold. Evidence increasingly indicates that over 4 years of investment in combat-oriented mentoring and advising has paid off. The ANSF still have room for improvement, but there are capable leaders at every echelon who understand the fundamentals of their profession; despite this, many significant challenges remain.

Gaps and developmental shortfalls exist within the Afghan Security Institution (ASI). Capability gaps remain in ANSF aviation, intelligence, and special operations, along with developmental shortfalls in systems maintenance, requirement forecasting, and human capital. The ASI lacks the capacity to conduct tasks such as planning, programming, multi-year budgeting and execution; logistics; acquisitions; and human resource management. Systemic issues require advisory support for sustainment, specifically in Inspector General/Transparency Accountability Oversight and strategic plans and policy. ASI development may slow down without ro-

bust advisory support during the anticipated period of high personnel turnover associated with the post-election transition of power.

Critical ANSF capability gaps include: aviation, intelligence and ISR, and special operations, Casualty Evacuation and Medical Evacuation (CASEVAC/MEDEVAC), engineering (sustainability, bridging), Combined Arms Route Clearance Operations, and Counter-Improvised Explosive Devices.

Additionally, the Afghan Security Institution will need to evaluate their force posture with respect to maintenance of its infrastructure. A significant amount of their budget and manpower could be consumed in power generation, facilities maintenance, sustainment and force protection if this issue is not addressed.

The ANSF will continue to play a crucial role in securing what could be Afghanistan's first peaceful transition of political power. While the Afghan population spoke clearly during the electoral process, the fact is the Taliban led insurgency remains a resilient and relevant threat and will continue to threaten a peaceful transition of power.

BUILDING AND SUSTAINING THE AFGHAN NATIONAL SECURITY FORCES

Question. The ANSF are near their target end strength level of 352,000, consisting of an Afghan National Army (ANA) of 195,000 and Afghan National Police (ANP) of 157,000.

In your view, do the ANA and ANP have the right size and capabilities to address the current security situation on the ground in Afghanistan?

Answer. Yes, the ANA and ANP are the right size and are developing the right capabilities, with our enabling support, to address the security situation in Afghanistan. Based on current assessments, the ANSF still requires aviation, intelligence, and sustainment support beyond this year. We continue to work with the ANSF and GIROA to address these capability gaps.

Question. What in your view are the greatest challenges to building and sustaining the capabilities of the ANSF over the next 2 years?

Answer. There are two major challenges the government will face in the next 2 years that could threaten the sustainability of the ANSF; budgeting and accountability.

Planning, programming, budgeting, and execution capabilities are seen as the greatest challenge to the building and sustaining ASI sustainability over the next 2 years. Resource Management and Procurement departments across ANSF suffer from lack of qualified and experienced leadership and low institutional prioritization for planning and budget matters.

Second, the Afghans are building processes and systems that will ensure a transparent and accountable budget execution process. International community requirements for third party oversight of government processes are central for continued International Community (IC) support. Without that support the government risks losing IC funds required to build and sustain the capabilities of the ANSF and the ASI.

Question. If confirmed, what would be your priorities for building the capabilities of the ANSF, including the key enablers that the ANSF need to develop and maintain?

Answer. The size, structure, and posture of the Resolute Support mission is configured towards the development of sustainable Afghan systems focused at the Corp level and reaching up to the ministerial and institutional levels. The Resolute Support plan is built around functionally-orientated advising, designed to facilitate the horizontal and vertical integration of Eight Essential Functions:

- (1) Plan, Program Budget, and Execute; generate requirements, develop a resource informed budget, and execute a spend plan.
- (2) Develop and implement internal controls to assure Transparency, Accountability, and Oversight.
- (3) Maintain/enhance civilian governance of the ASI, including adherence to the rule of law.
- (4) Force Generate: recruit, train, retain, manage, and develop a professional ANSF.
- (5) Sustain the force through effective facilities management, maintenance, medical, and logistics systems.
- (6) Plan, resource, and execute effective security campaigns and operations.
 - a. Inter-ministerial and joint coordination, and
 - b. Command, control, and employ Ground, Air, and Special Operating Forces.
- (7) Develop and mature sufficient intelligence capabilities and processes.
- (8) Maintain internal and external strategic communications capabilities.

These functions are interdependent and, taken as a whole, contribute directly to Afghan sustainability. They span across all levels of conflict, from the tactical to the strategic. The key enabler to this effort is the ongoing provision of quality advisors to focus on the delivery of Functionally-Based Security Force Assistance (FB-SFA).

Through the advisory efforts associated with the Eight Essential Functions we will improve the Afghan Security Forces' capabilities in those areas where we are currently providing enabler support: aviation, intelligence, and special operations.

Question. At the North Atlantic Treaty Organization (NATO) Summit in Chicago in 2012, the ISAF participating countries discussed a model for the future size of the ANSF of around 228,000, a reduction of about one third from the current ANSF end strength.

What is your understanding regarding current assumptions for the size of the Afghan security forces during and after the completion of the post-2014 train, advise and assist mission?

Answer. The current authorized "surge" end strength of 352,000 will be maintained at least through the end of 2015. We will continue to coordinate with the Afghans and international partners on force planning beyond that point based on a review of the anticipated security environment, ANSF performance and capacity, and available funding.

Question. Do you agree that any future reductions in the size of the ANSF post-2014 need to be based on the security conditions in Afghanistan at the time those reductions would occur?

Answer. Yes.

Question. If confirmed, do you agree to conduct a review of the plans for the future ANSF force levels to assess whether the size and capabilities of those forces are appropriate to address security conditions in Afghanistan post-2014?

Answer. If confirmed, I will continue the process of assessing future ANSF force levels to determine what size and capabilities are appropriate to address evolving security conditions in Afghanistan. As conditions on the ground change we will, in partnership with GIRoA, continue to assess the necessary size of the ANSF to ensure the success of the mission and the success of the ANSF post-2014.

Question. How long after 2014 do you anticipate that the United States and international donors will have to provide significant funding to sustain the ANSF?

Answer. We helped build an Afghan Security National Force to meet the current security environment. We believe that as the security environment continues to improve and the ANSF becomes more efficient, forces can be scoped differently and thereby allow GIRoA to meet the cost of the ANSF sooner. However, I expect that GIRoA will require significant contributions to support their national security forces for a number of years beyond 2014. Although most major equipment purchases and facilities construction are all but complete, there are significant sustainment costs associated with maintaining the current force structure and capability of the ANSF. While I cannot say exactly how long, or at what level, these contributions will be required, I can describe what we are doing to address it.

TRAIN, ADVISE, AND ASSIST MISSION

Question. What is your understanding of the role that U.S. and coalition trainers and advisers will play in building the capabilities of the ANSF after 2014?

Answer. U.S. and coalition personnel will continue to train, advise, and assist the Afghan Security Institutions and the ANSF to improve systems, processes and organizations, with the goal of developing a self-sustainable ANSF and decreasing the need for U.S. and coalition support. The majority of Afghan systems and processes are functional; however, there are friction points and maturity issues within these systems. If confirmed, I will conduct further review on these efforts to determine possible improvements to the process.

Question. What is your understanding regarding the percentage of the train, advise, and assist mission force structure that will be for actual trainers and advisers, and what percentage will be for other functions, such as force protection, support, or command and control?

Answer. The 12,500 NATO personnel that will constitute the Resolute Support mission in January 2015 will be broadly attributed to one of the three campaign Lines of Effort: the development of the ANSF and the Afghan Security Institution; protection of the force; and posturing of the force. Of the 12,500 personnel, 18 percent will be in a direct train, advise, and assist role, developing the ANSF and the Afghan Security Institution. Protection will be provided by 32 percent of the overall force. Enablers, or those responsible for posturing the force, will constitute approximately 50 percent of personnel.

Question. At West Point on 28 June, President Obama said, “And at the end of this year, a new Afghan President will be in office and America’s combat mission will be over.”

What is your understanding of what specific lines of effort (e.g. close air support, medevac) that would be terminated as a result of the combat mission being over?

Answer. U.S. forces will continue to have enabler support, including close air support, medevac, and intra theater lift.

Question. What are the key institutional development areas that must be addressed after 2014 to ensure sustainability of the ANSF?

Answer. The Afghan Security Institutions, namely the Ministry of Defense and the Ministry of Interior, are lacking in two key areas. First, the lack of experience with plan, program, budget, and execute processes is holding back their ability to sustain security and combat forces within the ANSF. The second key institutional development area is Transparency, Accountability, and Oversight.

POST-2014 COUNTERTERRORISM MISSION

Question. What is your understanding of roles and missions for U.S. military personnel engaged in counterterrorism operations in Afghanistan after 2014?

Answer. With appropriate authorities and a signed BSA, U.S. military personnel will continue a counterterrorism (CT) mission against the remnants of al Qaeda after 2014. Additionally, U.S. SOF will continue training, advising and assisting Afghan CT forces to develop their CT capacity.

INSIDER THREAT

Question. What is your assessment of the measures that have been taken by ISAF and Afghan leaders to address the insider threat?

Answer. The combined efforts of ISAF and the ANSF have stopped numerous insider attacks before they could occur and limited casualties through adherence to force protection policies. No single countermeasure can prevent insider attacks; therefore, ISAF and the ANSF have introduced a program of countermeasures which, when applied collectively, can reduce the threat posed by insider attacks. These measures include: strengthened vetting and screening processes for ANSF new recruits and those returning from leave; increased numbers and training for counterintelligence agents; cultural awareness training for both ISAF and ANSF personnel; and enhancing force protection for personnel advising Afghans or in remote areas. Insider attacks by ANSF against ISAF (Green-on-Blue) have declined substantially since 2012. This is partly due to the reduction of ISAF personnel in contact with ANSF forces and partly due to increased force protection and ISAF counterintelligence measures. Insider attacks by ANSF against ANSF (green-on-green) spiked in 2013. As a direct result of ISAF counterintelligence training of ANSF forces, green-on-green attacks in the first 6 months of 2014 have dropped 25 percent when compared to the same 6 month period in 2013. Positive metrics for both green-on-blue and green-on-green insider attacks indicate our force protection efforts are working. The joint, integrated ISAF-ANSF approach and the level of the Afghan Government’s commitment to reducing this mutual threat are encouraging. For example, ISAF and the ANSF have a three-star Insider Threat Action Group; they have formed joint casualty assessment teams to study incidents and identify lessons; and the ANSF vetting programs have stopped hundreds of insider threats before they became attacks by identifying suspected attackers.

Question. If confirmed, what additional steps, if any, would you recommend to address this threat?

Answer. If confirmed, I will continue to make countering this threat a top priority. There is nothing more important than protecting the force. I intend to maintain the complex, layered, security system in place in Afghanistan today which leverages not only coalition force protection capabilities but also those of the ANSF and other governmental agencies. I will continuously monitor and assess the nature of insider threats and potential vulnerabilities and ensure coalition personnel are properly resourced to counter this threat, particularly as ISAF becomes smaller. We are not alone in suffering the effects of insider attacks; our Afghan partners have also suffered considerably from this threat. Therefore, I will continue to strengthen and leverage our partnership with the Afghan Government in implementing a comprehensive, combined, and integrated approach by continuing our support for cultural awareness and language training for both coalition and ANSF personnel as well as strengthening intelligence sharing.

AFGHAN SPECIAL OPERATIONS FORCES

Question. According to the most recent quarterly report on Progress Toward Security and Stability in Afghanistan (the “Section 1230” report), Afghan Special Operations kandaks now lead 99 percent of all special operations in Afghanistan. The report also states “while they are tactically proficient units, they continued to operate closely with NATO Special Operations Component Command-Afghanistan (NSOCC-A) partners to conduct missions.”

What is your understanding of the progress in training the Afghan Special Operations kandaks and the timeline for achieving full operational capability of these units?

Answer. NSOCC-A remains focused on the continued development of the Afghan Special Operations Kandaks (SOKs) to ensure their viability as a long-term counterterrorism force. The SOKs continue to play a crucial role in the security of Afghanistan and have proven their ability to conduct complex special operations with limited coalition enabler support.

The Afghan National Army Special Operations Command (ANASOC) School of Excellence (SOE) has evolved from a coalition-led effort to an all Afghan-instructed training institution which provides an organic force generation capability for the SOKs. The Military Intelligence Kandak and General Support Kandak are currently at their Initial Operational Capability (IOC) and both will achieve Full Operational Capability (FOC) in 2015. Moreover, ANASOC is developing an operations center which will reside at ANASOC headquarters and provide a command and control capability for SOK independent operations.

As ANASOC demonstrates progress in core warfighting skills, the NSOCC-A advisory effort remains focused on the development of Afghan sustainable systems and SOK critical capabilities, such as intelligence, fires, sustainment and mobility. Through these combined efforts, the SOKs continue to meet development milestones and are projected to achieve full operational capability in early 2016.

Question. What are the most critical enabling capabilities needed by the Afghan Special Operations kandaks to ensure successful mission execution post-2014?

Answer. The most critical enabling capabilities needed by the Afghan Special Operations Kandaks post-2014 are intelligence support and tactical mobility.

U.S. SPECIAL OPERATIONS FORCES IN AFGHANISTAN

Question. How do you see the role of U.S. Special Operations Forces in Afghanistan evolving as conventional forces continue to draw down post-2014, assuming a Bilateral Security Agreement is in place?

Answer. It is my view that Special Operations Forces (SOF) will continue to play a vital role in Afghanistan in a number of ways. SOF will be the only force conducting the TAA mission at the tactical level. NSOCC-A will continue its TAA efforts with ASSF while the Resolute Support (RS) basing will enable tactical TAA, and then transition its focus to institutional TAA in later phases of RS. Through their advisory efforts, they will enable the ASSF to disrupt insurgent networks, maintain ASSF operational tempo, and build capable, self-sustaining Afghan SOF. SOF TAA of the ASSF will also help mitigate the operational risk associated with a drawdown of conventional forces.

Question. If confirmed, how would you ensure adequate enabling capabilities for Special Operations Forces as general purpose forces continue to draw down in Afghanistan?

Answer. Providing SOF with adequate enabling capabilities is one of my highest priorities. Most SOF will be stationed at or near conventional bases. These bases will provide all requisite logistic requirements and medical evacuation. As the regional bases are closed or transitioned to the ANSF, SOF will retrograde with conventional forces. ISR requirements for SOF will be also addressed based on the operational need. I am confident that the allocated ISR capabilities located in-theater, as well as additional ISR support available from outside the theater will meet the SOF requirements.

AFGHAN LOCAL POLICE/VILLAGE STABILITY OPERATIONS

Question. The Village Stability Operations and Afghan Local Police (ALP) programs have been called critical to ISAF’s counterinsurgency strategy in Afghanistan.

What has been the effect of these programs on rural Afghan populations and what has been the response from the Taliban?

Answer. Per Presidential Directive, the ALP is a force composed of Guardians, recruited from the same local villages where they work, who can readily distinguish locals from insurgents. Since the ALP are recruited, vetted, and employed locally,

the Elders and local populations trust them for protection. The ALP has contributed to an increased perception of security by denying insurgent access to the population and disrupting insurgent freedom of movement. Public perception polling from December 2013 reflected that the “ALP’s value to community security are overwhelmingly positive.” Furthermore, the same polling found that local Afghans have referred to the ALP as being “The first enemy of the Taliban.” The Taliban remain focused on targeting the ALP because they threaten insurgent access to the population and insurgent freedom of movement.

Question. What is your understanding of the commitment of the Government of Afghanistan to continue its support of these programs through 2014 and beyond?

Answer. The Government of Afghanistan recognizes the value of ALP in providing security in rural areas. The ALP served a significant security role during the recent national election and subsequent Presidential run-off. The Government of Afghanistan noted the ALP in the 2-year National Police Plan (NPP) and the 5-year National Police Strategy (NPS). Both the NPP and NPS call for keeping the ALP through 2017 and then transitioning the ALP into the other Afghan National Police pillars in 2018. The best way for the GIRoA to demonstrate commitment to the ALP would be for Ministry of the Interior to take full responsibility for the command and control, administration, and logistical sustainment of the ALP.

Question. If these programs continue beyond 2014, what is your understanding of the role, if any, that U.S. Special Operations Forces will play in supporting them?

Answer. After 2014, NSOCC-A will support the ALP Headquarters in Kabul through the ALP Special Operations Advisory Group (ALP SOAG). The ALP SOAG will continue mentoring the ALP Headquarters Commander and Staff in the areas of administration, training, pay, budget, and logistics. Additionally, ALP SOAG will conduct command and staff assistance visits to the Provincial Police Headquarters where feasible.

CONTRACT OVERSIGHT

Question. The United States has implemented a number of efforts to reduce the risk that U.S. contracting practices will be subject to corruption, which helps fuel the insurgency and undermines the legitimacy of the Afghan Government. These efforts include the establishment of the Combined Joint Interagency Task Force-Shafafiyat (Transparency) to coordinate ISAF anti-corruption activities.

What is your assessment of ISAF’s anti-corruption efforts and understanding of criminal patronage networks, and what additional steps, if any, do you believe should be taken to improve those efforts and to ensure adequate oversight of ISAF and U.S. contracts is in place?

Answer. Corruption poses a strategic threat to the long-term stability of Afghanistan as it undermines security, government legitimacy, and prospects for economic development. Recognizing that Afghan political will is a necessary component of dealing with corruption, I believe ISAF has implemented a number of essential steps for addressing this issue. For example, countering corruption and organized crime is a specific line of operation in the ISAF campaign. If confirmed, I will reinforce a command climate that takes those responsibilities seriously.

Question. Section 841 of the National Defense Authorization Act for Fiscal Year 2012 provided CENTCOM with new tools to avoid contracting with the enemy, as requested by the Department of Defense. This authority has been expanded in subsequent National Defense Authorization Acts.

What is your understanding of the extent to which the new authorities authorized in section 841 have been implemented?

Answer. Section 841 of the National Defense Authorization Act for Fiscal Year 2012 provided CENTCOM with new tools to avoid contracting with the enemy, as requested by the Department of Defense. This authority has been expanded in subsequent National Defense Authorization Acts. Since section 841 does not sunset until the end of 2014, the anti-corruption Task Force 2010 has continued to use 841 authorities in their proposals and has matured its vendor vetting processes to the point that it fulfills the requirements that section 841 addresses. Vendor vetting has been implemented successfully to prevent contracting with the enemy.

Question. What role do you expect to play, if confirmed, in carrying out the authorities provided in section 841?

Answer. Section 841 of the National Defense Authorization Act for Fiscal Year 2012 prohibits contracting with the enemy in the CENTCOM theater of operations. If confirmed, I will uphold my responsibilities required under section 841, to include fulfilling reporting requirements, and will support the efforts of others, up and down my chain of command, in the execution of their duties.

Question. What are any lessons learned from use of this authority both within CENTCOM and for other combatant commands?

Answer. While section 841 has been an effective tool in preventing U.S. monetary support to the insurgency, there are two key lessons for other combatant commands worth noting. The first lesson is that combatant commands should place strong emphasis on thorough vendor vetting processes which, if implemented properly, preempt fraud and prevent contracting with the enemy. The second lesson has to do with the importance of coordination between the COCOM, the intelligence task force, and the Head of the Contracting Activity (HCA). Each of these links provides vital information on the second- and third-order effects of the program at both the operational and strategic levels.

AFGHAN PUBLIC PROTECTION FORCE

Question. In March the Government of Afghanistan announced that it would dissolve the Afghan Public Protection Force (APPF), the government-established guard force for protecting convoys and international reconstruction projects.

What is your understanding of the impact of the Government of Afghanistan's decision to dissolve the APPF on the security of our military and civilian personnel in Afghanistan?

Answer. The security of our military and civilians is at the forefront of everything we do. Our commanders on the ground, at the tactical and operational levels, constantly analyze their respective operational environments, building in risk mitigation strategies, and aligning their forces to accomplish their missions.

While the dissolution of the State Owned Enterprise has created points of concern, the impacts to fixed site security have been mitigated as our legal, financial, and advisor teams reconcile the processes and our leaders engage the ministries to bring them in line with agreed upon acceptable standards. Site security operations continue for both ISAF and other coalition developmental projects as these matters are worked through with GIRoA.

Question. If confirmed, what steps, if any, would you recommend for addressing any security concerns arising from the dissolution of the APPF?

Answer. Convoy and site security services will remain a small but important subset of the larger security concerns and anti-corruption efforts we have in Afghanistan. Our Afghan partners are in the lead for the security of their country and our efforts should remain focused on the development of Afghan security forces capability.

DOD-FUNDED COUNTERNARCOTICS EFFORTS IN AFGHANISTAN

Question. According to the United Nations Office of Drugs and Crime, drugs from Afghanistan account for more than 90 percent of the world's heroin trade.

As it relates to the drug trade in Afghanistan, what is your understanding of the role of the Commander of ISAF and Commander of USFOR-A respectively in counternarcotics efforts?

Answer. Under U.S. and NATO authorities, COMISAF/COMUSFOR-A counters the drug trade in Afghanistan by strengthening, developing, and enhancing the institutional capabilities of key Afghan ministries, like the Ministry of Counter-Narcotics. By working across interagency and International Community lines of effort, ISAF/USFOR-A assists GIRoA in preventing the Afghan drug trade from funding the insurgency, fuelling corruption, and undermining security, governance, and development.

Question. In your view, what role, if any, should the Department of Defense have within broader U.S. Government counternarcotics efforts beyond the current calendar year?

Answer. DOD has assets and resources that it can apply to counternarcotic efforts that are helpful and supportive. In Afghanistan, CENTCOM is actively engaged in mentoring the Counternarcotics Police of Afghanistan and other specialized Afghan counternarcotics units. If confirmed, I will evaluate how USFOR-A might be able to contribute to improving counternarcotics efforts in Afghanistan.

Question. What is your understanding of the nexus, if any, between the drug trade and the various insurgent groups in Afghanistan? Is the nexus, in your view, sufficient to conclude that the drug trade is a primary source of funding for the insurgency?

Answer. The Taliban has been involved in opium and hashish cultivation and trafficking for years in Afghanistan. In many areas of Afghanistan, the insurgency intimidates the farmers to cultivate additional acres. By working and controlling drug trafficking organizations and other criminal elements associated with the Afghan

drug trade, the Taliban has profited greatly. We have also seen the inclusion of criminal patronage networks into this narcotics-insurgency nexus.

COUNTER THREAT FINANCE ACTIVITIES IN AFGHANISTAN

Question. What is your assessment of the efforts by the U.S. Government to identify and counter the sources of financing for the insurgency in Afghanistan, including the financial networks of the Haqqanis?

Answer. Since the fall of 2013, the level of interagency communication and allocation of resources has significantly increased in an effort to combat Haqqani Network (HQN) financial mechanisms and revenue streams. However, despite increased interagency collaboration, no major financial actions have been completed against the HQN since the network was designated a Foreign Terrorist Organization (FTO) by the U.S. Department of State in September 2012.

Question. If confirmed, what changes, if any, would you recommend to enhance U.S. counter threat financing efforts in Afghanistan?

Answer. To safeguard U.S. interests in Afghanistan, we must maintain and improve our capacity to track and disrupt threat finances originating in Afghanistan, Pakistan, and from the Persian Gulf states. Future efforts need to be focused on targeting sources of terrorist funding and providing evidence to support criminal indictments and law enforcement prosecutions.

GENERAL PURPOSE FORCES USED FOR SECURITY FORCE ASSISTANCE

Question. Building the security forces of foreign nations has traditionally been a Special Operations Forces mission. However, in both Iraq and Afghanistan, general purpose forces have been performing this mission for some time.

What is your understanding and assessment of the preparation and performance of Army and Marine Corps general purpose forces operating in Afghanistan in a security force assistance role?

Answer. In my current position as the VCSA, and in my previous assignment as the Army G3, I have been responsible for ensuring Army general purpose forces were well prepared for the security force assistance (SFA) mission. In Afghanistan, the performance of Army and Marine Corps general purpose forces in a SFA role has been outstanding, as evidenced by the ANSF's development into a confident force capable of securing their nation. This progress would not have been possible without the training, advising, and assisting efforts of Army and Marine Corps general purpose forces.

Question. How do you envision the use of general purpose forces in the security force assistance role, if at all, as U.S. forces complete the drawdown through 2014 and as part of the planned residual force for supporting the continued building of the capabilities of the Afghan security forces?

Answer. General purpose forces will continue to TAA their Afghan National Security Force (ANSF) counterparts for the remainder of 2014; however the emphasis will shift to improving ANSF organizations, systems and processes. We refer to the new mission as functionally based-SFA (FB-SFA), and we have developed eight essential functions to focus our FB-SFA efforts. Specifically, these functions include: (1) Plan, program, budget and execute; (2) Assure transparency, accountability and oversight; (3) Civilian governance of Afghan Security Institutions, including adherence to the rule of law; (4) Force generate; recruit, train, retain, manage and develop a professional ANSF; (5) Sustain the force through facilities management, maintenance, medical and logistics systems; (6) Plan, resource, and execute effective security campaigns; (7) Sufficient intelligence capabilities and processes; and (8) Maintain internal and external STRATCOM capability. By using the eight essential functions to focus FB-SFA, we will help the ANSF develop and strengthen institutional capabilities and capacity, while vertically integrating systems and processes from the national to the regional-level for the remainder of 2014 and beyond. To augment our functional specialists, AF-PAK hands and Foreign Area Officers will be integrated into task-organized functional advising teams to ensure that our functional expertise can be appropriately transmitted in a way that our Afghan partners can assimilate. In some specific roles, we will reach back to our professionals in our civilian DOD force to provide critical expertise for particularly technical processes, like the planning, programming, budgeting, and execution function.

ASSIGNMENT POLICIES FOR WOMEN

Question. What restrictions, if any, do you believe should be imposed with respect to the assignment of combat-related duties to women in uniform, or the assignment of women to combat units?

Answer. I fully support the efforts of the Military Services to assess all military occupational specialties and unit assignment restrictions and look forward to seeing their recommendations for policy changes.

DEPLOYMENT HEALTH

Question. The committee is concerned about the stress on military personnel resulting from deployments and their access to mental health care in theater to deal with stress, as well as the prevention and care for traumatic brain injury.

What is your assessment of the adequacy of health care and mental health capabilities supporting servicemembers in Afghanistan?

Answer. It is USFOR-A's mandate to provide a level of health care that is on par with the care our servicemembers receive at home, and we are achieving that standard for primary and specialty care regardless of location. In the area of trauma care, USFOR-A greatly exceeds that standard; our Joint Theater Trauma System, as well as the Tactical Combat Casualty Care (TCCC) guidelines for point of injury care, are among the best trauma systems in the world. We adhere closely to the 'golden hour' standard for our MEDEVAC missions, and the speed with which we evacuate patients out of Afghanistan, whether after combat injury or for care beyond what is available in theater, is exceptional. If confirmed, I will endeavor to maintain this high standard.

U.S. Forces Afghanistan (USFOR-A) provides both in-person and virtual resources to care for our deployed servicemembers with behavioral health concerns. We consistently exceed the recommended provider-to-deployed Soldier ratio (Standard is 1/700 and we are currently at 1/531). We continue to utilize video technology that allows access to behavioral health specialists for servicemembers even in remote locations. Additionally, the Military Crisis Line headquartered in CONUS provides reach-back to Afghanistan, and affords 24/7 access to counselors via phone and computer. USFOR-A maintains vigilance to identify servicemembers at risk both before and after deployment through rigorous medical screening and frequent contacts in both formal and informal settings. I am confident that we are meeting the mental health needs of our deployed personnel in Afghanistan.

Question. What is your assessment of suicide prevention programs and resources available to support these programs in Afghanistan?

Answer. USFOR-A maintains a significant effort to develop and deploy suicide prevention programs and resources for servicemembers and civilians serving in Afghanistan. These programs are in place and personnel know where to get help. We keep our behavioral health assets mobile in order to effectively push services forward where they are needed, and we provide crisis intervention as well as the full spectrum of psychiatric services that would be available to servicemembers at risk in any environment. Command involvement is critical for the successful employment of these programs and the support from commanders has been key to getting the word out and reducing any stigma from seeking behavioral health services. Suicide prevention is something that I take very seriously, and, if confirmed, it will be a high priority for me.

Question. What is your assessment of the implementation of the Department of Defense policy on management of mild traumatic brain injury throughout Afghanistan?

Answer. USFOR-A is consistently monitoring the comprehensive in-theater evaluation process for mild traumatic brain injury (mTBI) and has shown significant progress in how we screen for and treat these injuries. The medical treatment system begins at the point of injury with MACE screening for all suspected mTBI through unit providers who perform extended evaluations. If necessary, they can refer cases to one of two fully staffed 24/7 Concussion Care Centers, one at each of our Role III medical facilities. These centers are equipped with CT scans for evaluation and diagnosis and can treat servicemembers for up to 21 days. They are staffed by a neurologist as well as occupational therapy support staff to optimize rehabilitation and have demonstrated consistently high return to duty rates. mTBIs are closely tracked throughout the CJOA-A (Combined/Joint Operations Area-Afghanistan) via the BECIR (Blast Exposure Concussion Incident Report). Additionally, we are investigating and employing technologies such as helmet and vehicle sensors to identify potentially concussive events among our servicemembers.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assaults, including providing appropriate resources and care for victims of sexual assault.

What is your view of the steps taken to prevent and respond to sexual assaults in Afghanistan, including assaults by and against U.S. civilian and contractor personnel?

Answer. Victims of sexual assault need to be protected and receive timely access to appropriate treatment and services, regardless of their location. The current policy, education, training, and commander involvement at all levels ensure we're on the right course in eradicating this crime from our force, including all U.S. personnel in Afghanistan, whether military, government civilian, or contractor. If confirmed, I will ensure that if any deployed servicemember, civilian or contractor is assaulted, he or she will receive appropriate and responsive support and care. As importantly, I will do all I can to prevent incidents of sexual assault.

Question. What is your view of the adequacy of the training and resources in place in Afghanistan to investigate and respond to allegations of sexual assault?

Answer. The Services recently enhanced their resources for investigating and responding to allegations of sexual assault. Combat zones and other overseas environments present special challenges that require coordination to ensure we are applying those resources effectively and efficiently. If confirmed, I will review our sexual assault prevention and response program to ensure it meets the needs of our deployed servicemembers and commanders; that resources are appropriately provided so that reports of sexual assault are fully investigated and commanders are fully capable of appropriately adjudicating allegations of sexual assault; and I will ensure deployed victims have full access to treatment and victim care services.

Question. What is your view of the willingness and ability of military leaders to hold assailants accountable for their acts?

Answer. While I have served as Vice Chief of Staff, Army commanders have prosecuted the most serious sexual assault cases at a rate more than double that of our civilian jurisdictions, including many cases that civilian authorities refused to pursue. If confirmed, I will expect all military leaders to ensure allegations of sexual assault are referred for independent law enforcement investigation, to provide appropriate care for the victims, and to ensure that alleged perpetrators are held appropriately accountable. The Department's policy emphasizes the command's role in an effective response. Special training is provided to commanders, investigators, and prosecutors to ensure they are prepared to address incidents of sexual assault. Our policies seek to balance victim care with appropriate command action against offenders in order to build victim confidence in assisting investigations.

Question. What is your understanding of the adequacy of the resources and programs in Afghanistan to provide victims of sexual assault the medical, psychological, and legal help they need?

Answer. Victims of sexual assault need to be protected and receive timely access to appropriate treatment and services, regardless of their location. The current policy, education, training, and commander involvement at all levels ensure we're on the right course in eradicating this crime from our force, including all U.S. personnel in Afghanistan, whether military, government civilian, or contractor. Requirements vary across the Services, but currently, all units in Afghanistan are required to provide Sexual Assault Response Coordinators and Victim Advocates. The Secretary of Defense has directed each service to establish Special Victims Counsel (SVC) to provide victims the option of legal advice, representation, and advocacy services. If confirmed, I will ensure that if any deployed servicemember, civilian or contractor is assaulted, he or she will receive appropriate and responsive support, care, and legal assistance. As importantly, I will do all I can to prevent incidents of sexual assault.

Question. What is your view about the role of the chain of command in providing necessary support to the victims of sexual assault?

Answer. Initiatives reinforce the Department's commitment to eradicating sexual assault from our ranks. If confirmed, I will promote a leadership climate that encourages reporting without fear and holds perpetrators appropriately accountable for their actions. Whether deployed abroad or at home, commanders and leaders at every level must fully understand their authority, responsibilities, and obligations to establish positive command climates that safeguard all members within their units from predatory behavior. Facilitating this climate is an inextricable part of that bond of trust we share with our fellow brothers and sisters in arms. If confirmed, I will ensure commanders have the resources they need to provide care and support for victims and fairly adjudicate each case.

Question. What is your view about the role of the chain of command in changing the military culture in which these sexual assaults have occurred?

Answer. Combating sexual assault and harassment remains our top priority. The commander of U.S. Forces-Afghanistan developed a Sexual Assault Prevention and Response Information Plan that requires leaders to engage Coalition Forces, DOD

civilians, contractors, and third country nationals about the DOD position on sexual harassment and sexual assault. Units conduct focus groups, sensing sessions and sexual assault review boards quarterly to foster an environment based on mutual respect and trust. The sexual assault review boards are instrumental in demonstrating that leaders will take action in sexual assault cases. We continue to take this issue very seriously, and also know how much work remains to be done.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted?

Answer. Removal of the commander's authority to prosecute sexual assault removes a key mechanism to respond to the needs of soldiers within the command, especially the victims.

The commander's role in the military justice system is simply essential. The Commander is responsible for good order, discipline, health and morale and welfare of the force. The commander needs the ability to take timely and appropriate action, locally and visibly, which impacts the overall discipline of the force. Particularly in a deployed environment, adding a complex, external approval process for appropriate action will impede the commander's ability to deal swiftly and fairly with investigated incidents of sexual assault, and consequently impede the commander's ability to protect victims and prevent further assaults.

Question. Do you consider the current sexual assault policies and procedures, particularly those on restricted reporting, to be effective?

Answer. The Department has put considerable effort into the development of policies and procedures designed to address sexual assault and improve reporting. The Department faces the same challenges that society faces in dealing with incidents of sexual assault—balancing care to victims with offender accountability. The Department's restricted reporting allows victims who wish to remain anonymous to come forward and obtain the medical, legal, and advocacy support they need following an allegation of sexual assault.

Question. If confirmed, what actions will you take to reassess current policies, procedures and programs and to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults in Afghanistan?

Answer. If confirmed, as part of my assessment, I will ensure that all commanders in theater evaluate the sexual assault prevention and response capabilities for their areas of responsibility. Further, this assessment will solicit feedback from those below Commander-level to ensure we create an atmosphere which aims to eliminate assault.

STANDARDS FOR TREATMENT OF DETAINEES

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the United States Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

If confirmed, will you take steps to ensure that all relevant Department of Defense directives, regulations, policies, practices, and procedures applicable to U.S. forces in Afghanistan fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes, if confirmed, I will ensure that U.S. forces in Afghanistan fully comply with all relevant provisions of Department of Defense directives, regulations, policies, practices, and procedures applicable to U.S. forces in Afghanistan, and that they fully comply with the requirements of section 1403 of the Detainee Treatment Act of 2005 and with Common Article 3 of the Geneva Conventions. Conducting detention operations in the most humane manner possible remains a strategic component of our campaign that directly reflects upon our Nation's values and the ideals we espouse to our Afghan counterparts.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes, if confirmed, I understand and support the existing standards for the treatment of detainees and will adhere to them. All detainees shall be treated humanely, and in accordance with U.S. law, the Law of War, and applicable U.S. policy. Humane treatment entails the following: no violence, no cruelty, no torture, and no humiliating or degrading treatment. Under U.S. law, humane treatment also consists of providing detainees with adequate food, drinking water, shelter, clothing, medical care, and protection of personal property. I believe these humane treatment policies, as practiced at the Detention Facility in Parwan, have adequately protected

detainees, provided for actionable intelligence, contributed to mission success, and enhanced U.S. forces' reputation in the global community.

Question. How would you ensure a climate that not only discourages the abuse of detainees, but that encourages the reporting of abuse?

Answer. I believe that engaged and active leadership grounded in the requirements of Common Article 3 of the Geneva Convention and DOD Directive 2310.01E is required for the secure and humane care, custody and control of detainees. If confirmed, I will ensure these elements remain the cornerstone of U.S. Law of Armed Conflict detainee operations. I will also reinforce the obligation to prevent abuse and the duty to report abuse as non-negotiable elements in our guard force training and ensure all detainees are informed of their rights upon entry into the detention facility, to include their right to report any type of abuse free from retribution. The use of medical providers to screen for signs of abuse, and the integration of a robust self-assessment program bolstered by external assessments from the International Committee of the Red Cross/Red Crescent further creates an open and transparent command climate fused with timely feedback. Finally, if confirmed, I will ensure my command team has internalized their professional responsibility to track and investigate any allegations of abuse and take swift action when appropriate. Furthermore, we will continue to assist the Afghan National Army (ANA) in developing their detainee abuse reporting systems and sustain the use of U.S. advisors in ANA controlled facilities.

Question. What is your understanding of the agreement between the United States and Afghanistan regarding detainees in Afghanistan currently and going forward after 2014?

Answer. As noted by the President on June 12, 2014, in a letter submitted to Congress consistent with the War Powers Resolution, U.S. forces have turned over all Afghan nationals detained by U.S. forces in Afghanistan to Afghan custody pursuant to a Memorandum of Understanding (MOU) signed on March 25, 2013. Under this MOU, U.S. forces in Afghanistan transfer any new Afghan captures to Afghan custody and control within 96 hours after capture. Additionally, U.S. forces in Afghanistan continue to detain approximately 38 non-Afghan nationals under the Authorization for the Use of Military Force (AUMF) (Public Law 107-40), as informed by the law of war. After 2014, U.S. forces will retain the authority to detain both Afghan nationals and non-Afghans in accordance with the law of war.

The BSA would provide context, if it has entered into force, and it includes a prohibition on the maintenance or operations of detention facilities by U.S. forces in Afghanistan. It is my understanding that this provision was among the most extensively discussed aspects of the BSA text. Within the context of the entire BSA text, this provision was intended to reflect existing U.S. policies and practices with respect to the conduct of military operations in Afghanistan and to preserve the authority of U.S. forces to take necessary action for self-defense and force protection purposes, which would include the authority to detain as referenced above.

Furthermore, U.S. forces will retain the ability to transfer dangerous insurgents who they detain to Afghan authorities for further action, such as investigations and prosecution.

PRISONER EXCHANGE FOR SGT. BERGDAHL

Question. What are your views on the prisoner exchange of five Afghan Taliban detainees for the release of Sgt. Bowe Bergdahl?

Answer. Our Nation demonstrated what we have told our people for years: we don't leave a servicemember behind.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ISAF Commander/Commander, USFOR-A?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR CARL LEVIN

CLEARANCE OF UNEXPLODED ORDNANCE AT U.S. TRAINING RANGES IN AFGHANISTAN

1. Senator LEVIN. General Campbell, at the request of the Department of Defense (DOD), the committee included in its markup of the Defense Authorization Request for Fiscal Year 2015 the authority in section 1229 to use up to \$250 million of DOD funds over the next 2 fiscal years to clear training ranges used by U.S. Armed Forces in Afghanistan of unexploded ordnance. Do you support this proposal and will you make this a priority as U.S. forces continue to draw down in Afghanistan?

General CAMPBELL. Mr. Chairman, I want to thank you, Senator Inhofe, and the members of this committee for including section 1229 in the National Defense Authorization Act (NDAA) and for the clarifying language contained in the committee's report. I strongly support the 1229 authority as a first step in addressing unexploded ordnance (UXO) on U.S. training ranges in Afghanistan.

I say first step because the authority would provide for the surface clearing of UXO, which is of course the most immediate risk to life and safety. However, as these training ranges are closed, some land will be transferred back to the Afghan people. In areas where intrusive activities, such as construction and farming, frequently occur, sub-surface UXO will continue to pose a risk to civilians. There is also the very real potential that the explosive components of UXO can be harvested to build IEDs for use against U.S. and coalition forces, Afghan troops, and civilians. Expanding the authority to include sub-surface clearing activities would mitigate additional risk to our forces and demonstrate our dedication to executing a responsible drawdown.

Following an initial evaluation of training ranges, U.S. Forces Afghanistan (USFOR-A) determined that both surface and subsurface UXO clearance could be accomplished within 2 years; however, we would like to complete clearing activities as quickly as possible. There is concern that the imposition of a per-year cap will unnecessarily limit our ability to execute on an expedited timeline. It is my understanding DOD sent the committee some suggested language that offers a more flexible funding option for these UXO activities.

Protecting U.S. and coalition forces, as well as the civilian population, is one of the highest priorities for USFOR-A. Clearing UXO from U.S. training ranges is one more way we can provide for the safety and security of our forces and the Afghan people alike. You have my commitment that, if confirmed, I will make clearance of UXO a priority.

QUESTION SUBMITTED BY SENATOR JEANNE SHAHEEN

AFGHANISTAN

2. Senator SHAHEEN. General Campbell, we have all been struck by the poor performance of the Iraqi Security Forces over the last month, including recent news reports citing an unreleased U.S. Central Command (CENTCOM) study that indicates the Iraqi Security Forces are so deeply infiltrated by Sunni extremists and Shiite personnel trained in Iran that it may be too dangerous for U.S. Special Operations Forces (SOF) to provide assistance. How do we impress upon the Afghan civilian leadership the importance of maintaining professional and cohesive security forces as we draw down and after we depart?

General CAMPBELL. I will work closely with the U.S. Embassy and other troop contributing nations to make sure this remains a key focus for our engagements with the Afghan civilian leadership, both in the President's office and the Ministry of Defense. My understanding is that current efforts on this matter involve emphasizing to Afghan civilian and military leaders the importance of a professional and

disciplined force which is apolitical and committed first and foremost to the security of the country. This includes the concept of civilian control of the military, adherence to rule of law and the implementation of processes, systems, and organizations which ensure transparency, accountability, and oversight.

Most recently, during the political turmoil associated with the run-off election, the ANSF leadership has consistently demonstrated their ability to maintain unity throughout the force, while maintaining their focus on combat and security operations. Furthermore, recent discussions with senior government officials reveal an understanding of the importance of separating the military from politics and a general willingness to achieve the aforementioned objectives. Also encouraging is the fact that senior ANSF officials have publically refused to comment on the ongoing political process.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

EQUIPMENT RESET FROM AFGHANISTAN

3. Senator AYOTTE. General Campbell, from a readiness standpoint, what is the danger of not resetting our equipment as it returns from Afghanistan?

General CAMPBELL. Our equipment has been operating in extreme environmental and operational conditions since operations commenced in Afghanistan. Operations under these conditions subject equipment to unusual wear patterns and damage due to heat, dust and OPTEMPO that must be corrected during a Reset process upon return to home station. Past experience has shown that failure to address these conditions using a disciplined maintenance process such as Reset results in continued degradation of our most modern and capable equipment, increased maintenance burden to maintain readiness and adversely impacts availability to meet future contingency requirements.

NEVER CONTRACT WITH THE ENEMY

4. Senator AYOTTE. General Campbell, I successfully included the “No Contracting with the Enemy” legislation in section 841 of the NDAA for Fiscal Year 2012 to provide the ability to avoid red tape and expeditiously cut off contracting funds that we are flowing to our enemies. I also worked to expand these authorities to all geographic combatant commands in the NDAA for Fiscal Year 2014. General Austin has testified that these authorities have been used to save the taxpayers \$31 million—preventing these funds from going to our enemies. As we draw down the number of servicemembers in Afghanistan, we may become more reliant in some areas on contractors. It is important that money from these contracts and subcontracts not be diverted to our enemies and used to kill our troops or our Afghan partners. Avoiding this requires an aggressive effort that includes intelligence, contracting, and criminal investigation personnel working together to follow the money. This requires command emphasis. Once problematic contracts or subcontracts are identified, section 841 authorities should be used to terminate contracts without delay. Once confirmed, do you commit to me that, as Commander of U.S. Forces in Afghanistan, you will look at this issue closely, ensure the effort is properly resourced and staffed, and encourage your subordinates to look for opportunities to exercise section 841 authorities?

General CAMPBELL. Yes, I will look at this effort closely and ensure that it is properly resourced and staffed consistent with the requirements of my mission and the resources available.

5. Senator AYOTTE. General Campbell, I am supportive of the work of Task Force 2010 and others in identifying contracts and subcontracts that are benefitting our enemies and that need to be expeditiously terminated without paying penalties to the very people we are trying to ensure don't receive our tax dollars. To do that, I believe that Task Force 2010 needs to have the investigators, forensic auditors, and intelligence personnel in Afghanistan, not just in Qatar or the United States. Will you look at ensuring the Task Force 2010 investigators, forensic auditors, and intelligence personnel are working in Afghanistan and that they have the command support needed to operate effectively?

General CAMPBELL. Yes, I will look at ensuring that all my forces, including any counter-contracting with the enemy forces such as TF 2010, are resourced and located to best accomplish the mission, within my force levels and other constraints set by my higher headquarters.

[The nomination reference of GEN John F. Campbell, USA, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 17, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the U.S. Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General

GEN John F. Campbell, USA, 0000.

[The biographical sketch of GEN John F. Campbell, USA, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GEN JOHN F. CAMPBELL, USA

Source of commissioned service: USMA.

Educational degrees:

U.S. Military Academy - BS - No Major
Golden Gate University - MPA - Public Administration

Military schools attended:

Infantry Officer Basic and Advanced Courses
U.S. Army Command and General Staff College
U.S. Army War College

Foreign languages:

None recorded.

Promotions:

Promotions	Dates of appointment
2LT	6 Jun 79
1LT	21 Feb 81
CPT	1 Jun 83
MAJ	1 Oct 90
LTC	1 Apr 95
COL	1 Jun 00
BG	1 Oct 05
MG	7 Nov 08
LTG	6 Sep 11
GEN	8 Mar 13

Major duty assignments:

From	To	Assignment
Mar 13	Present	Vice Chief of Staff, U.S. Army, Washington, DC
Sep 11	Mar 13	Deputy Chief of Staff, G-3/5/7, U.S. Army, Washington, DC
May 11	Aug 11	Commanding General, 101st Airborne Division (Air Assault), Fort Campbell, KY
Jun 10	May 11	Commanding General, 101st Airborne Division (Air Assault)/Combined Joint Task Force-101, Operation Enduring Freedom, Afghanistan
Jul 09	Aug 11	Commanding General, 101st Airborne Division (Air Assault), Fort Campbell, KY
Feb 08	Jul 09 ...	Deputy Director for Regional Operations, J-3, Joint Staff, Washington, DC
Jul 05	Feb 08 ..	Deputy Commanding General (Maneuver), 1st Cavalry Division, Fort Hood, TX and Deputy Commanding General (Maneuver), Multi-National Division Baghdad, Operation Iraqi Freedom, Iraq
Jul 03	Jun 05 ..	Executive Officer to the Chief of Staff, Army, U.S. Army, Washington, DC
May 01	Jun 03 ..	Commander, 1st Brigade, 82d Airborne Division, Fort Bragg, NC, and Operation Enduring Freedom, Afghanistan
Jul 99	May 01	Operations Officer, Current Operations Directorate, J-3, Joint Staff, Washington, DC

From	To	Assignment
Aug 98	Jun 99 ..	Student, U.S. Army War College, Carlisle Barracks, PA
Jun 96	Jun 98 ..	Commander, 2d Battalion, 5th Infantry, 25th Infantry Division (Light), Schofield Barracks, HI
May 94	May 96	Aide-de-Camp to the Commanding General, XVIII Airborne Corps, later Chief, Unit Training, G-3 (Operations), XVIII Airborne Corps, Fort Bragg, NC, and Operation Uphold Democracy, Haiti
Jun 92	May 94	G-3 (Training), later S-3 (Operations), 2d Brigade, 82d Airborne Division, Fort Bragg, NC
Aug 91	Jun 92 ..	Student, U.S. Army Command and General Staff College, Fort Leavenworth, KS
Sep 88	Jun 91 ..	Assistant Professor of Military Science, later Professor of Military Science, U.S. Army 4th Reserve Officers Training Corps Region, University of California, Davis, CA
Apr 86	Jun 88 ..	Commander, B Company, 3d Battalion, 505th Parachute Infantry Regiment, later G-3 (Air), 82d Airborne Division, Fort Bragg, NC
Apr 84	Mar 86	Battalion S-1 (Adjutant), later Battalion S-5 (Civil Affairs), later Commander, A Detachment, 1st Battalion, 5th Special Forces Group (Airborne), Fort Bragg, NC
Nov 83	Apr 84 ..	Student, Special Forces Officer Qualification Course, U.S. Army John F. Kennedy Special Warfare Center, Fort Bragg, NC
Apr 83	Oct 83 ..	Student, Infantry Officer Advanced Course, U.S. Army Infantry School, Fort Benning, GA
Jan 80	Dec 82 ..	Rifle Platoon Leader, later Weapons Platoon Leader, C Company, later Executive Officer, later Anti-tank Platoon Leader, Combat Support Company, 3d Battalion, 28th Infantry (Mechanized), 8th Infantry Division (Mechanized), U.S. Army Europe, Germany

Summary of joint assignments:

	Date	Grade
Commanding General, 101st Airborne Division (Air Assault)/Combined Joint Task Force-101, Operation Enduring Freedom, Afghanistan.	Jun 10–May 11	Major General
Deputy Director for Regional Operations, J-3, Joint Staff, Washington, DC	Feb 08–Jul 09	Brigadier General
Operations Officer, Current Operations Directorate, J-3, Joint Staff, Washington, DC.	Jul 99–May 01	Lieutenant Colonel/ Colonel

Summary of operational assignments:

	Date	Grade
Commanding General, 101st Airborne Division (Air Assault)/Combined Joint Task Force-101, Operation Enduring Freedom, Afghanistan.	Jun 10–May 11	Major General
Deputy Commanding General (Maneuver), 1st Cavalry Division/Deputy Commanding General (Maneuver), Multi-National Division Baghdad, Operation Iraqi Freedom, Iraq.	Aug 06–Dec 07	Brigadier General
Commander, 1st Brigade, 82d Airborne Division, Fort Bragg, NC, and Operation Enduring Freedom, Afghanistan.	May 01–Jun 03	Colonel
Aide-de-Camp to the Commanding General, XVIII Airborne Corps, later Chief, Unit Training, G-3 (Operations), XVIII Airborne Corps, Fort Bragg, NC, and Operation Uphold Democracy, Haiti.	May 94–May 96	Major/Lieutenant Colonel

U.S. Decorations and Badges:

Distinguished Service Medal
 Defense Superior Service Medal
 Legion of Merit (with Oak Leaf Cluster)
 Bronze Star Medal (with two Oak Leaf Clusters)
 Defense Meritorious Service Medal (with Oak Leaf Cluster)
 Meritorious Service Medal (with six Oak Leaf Clusters)
 Air Medal
 Joint Service Commendation Medal
 Army Commendation Medal (with Oak Leaf Cluster)
 Army Achievement Medal
 Combat Infantryman Badge
 Combat Action Badge
 Expert Infantryman Badge
 Master Parachutist Badge
 Pathfinder Badge
 Ranger Tab
 Special Forces Tab
 Joint Chiefs of Staff Identification Badge
 Army Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by GEN John F. Campbell, USA, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

John F. Campbell.

2. **Position to which nominated:**

Commander, International Security Assistance Force/Commander, U.S. Forces Afghanistan.

3. **Date of nomination:**

June 17, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

11 April 1957; Loring Air Force Base, ME (Limestone, ME).

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Ann Kay Dalton (Maiden name: Ann Dalton).

7. **Names and ages of children:**

Jennifer K. Campbell; age 27.

John F. Campbell, Jr.; age 25.

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member of:

(1) AUSA-Association of the U.S. Army (no office held)

(2) 504 Parachute Infantry Regimental Association (no office held)

(3) 101st Airborne Division Association (no office held)

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JOHN F. CAMPBELL.

This 13th day of May, 2014.

[The nomination of GEN John F. Campbell, USA, was reported to the Senate by Chairman Levin on July 22, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 23, 2014.]

[Prepared questions submitted to LTG Joseph L. Votel, USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and subsequent reforms related to Special Operations Forces have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders’ responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Perhaps. In my time as Chief of Staff at U.S. Special Operations Command (SOCOM), I saw many examples where we were challenged in our dealings with peculiarities of each of the Services on personnel, readiness, and training issues. If confirmed, I will work closely with the Service Chiefs to align our processes as much as possible under the current legislation before I would consider seeking a modification to Goldwater-Nichols.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Whether through changes to policy or legislation, in my view SOCOM still needs greater personnel management authority to shape mid- and senior-grade Special Operations Forces (SOF) operators to meet SOCOM defined requirements. Promotions, selection for command, selection for advanced educational opportunities, foreign language testing policy, and foreign language proficiency bonus payment pol-

icy all differ significantly by Service and are all primarily crafted to support Service needs.

Question. Do you believe that the role of the combatant commanders, including the Commander, SOCOM, under the Goldwater-Nichols legislation is appropriate and the policies and processes in existence allow that role to be fulfilled?

Answer. Yes. I have had the pleasure to work very closely with each of our geographic and functional combatant commanders, particularly in the past 3 years, and I believe there is tremendous synergy built into the system created by Goldwater-Nichols.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. By experience, training and education I have the requisite skills to lead this combatant command now and in the future. I have commanded at multiple levels throughout the special operations community including assignments as a Ranger Battalion Commander, the Ranger Regiment Commander, as a forward Special Operations Task force Commander in Iraq and Afghanistan and most recently as the Commander of the Joint Special Operations Command. I've also served as Deputy Commanding General for the Army's 82nd Airborne Division, and have throughout my career as an Infantry Officer maintained close ties to my Service colleagues outside the realm of Special Operations. My joint service as the Chief of Staff at U.S. Special Operations Command as well as my experience as both Deputy and Commander at Joint Special Operations Command has prepared me to operate at the senior levels of Government. Throughout my service, I have gained valuable experience and built useful relationships with international, interagency, and Intelligence Community partners.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander of SOCOM to the following offices:

The Secretary of Defense.

Answer. The Secretary of Defense is the SOCOM Commander's next superior command authority in the chain of command, as your introductory paragraph stated. If confirmed, I will look to the Secretary of Defense for the operational authority, and the resources, to develop and employ the most well-trained and capable Special Operations Forces our Nation can muster to meet the challenges of a highly uncertain global security environment now and in the future. The SOCOM Commander owes the Secretary of Defense his best military advice on all aspects of recruiting, training, equipping, managing and employing Special Operations Forces in support of his, and the President's, national security objectives.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The SOCOM Commander coordinates activities through the Chairman of the Joint Chiefs of Staff. As the senior military advisor to the President and Secretary of Defense, the Chairman is essential in communicating Special Operations Forces capabilities and requirements to the President and Secretary of Defense. Coordination of SOCOM activities ensures that the Chairman remains fully informed in support of his responsibilities and for coordination of SOCOM staff and the Joint Staff efforts to meet Presidential and Secretary of Defense directed tasks.

Question. The Under Secretary of Defense for Policy.

Answer. The Under Secretary of Defense for Policy (USD(P)) is the principal staff assistant and advisor to the Secretary of Defense and the Deputy Secretary of Defense for all matters on the formulation of national security and defense policy. The USD(P) develops, coordinates and oversees the implementation of a wide variety of Department policy, including matters related to planning, programming, budgeting, and execution of special operations activities. USD(P) also exercises authority, direction, and control over the assistant Secretary of Defense for Special Operations and Low-Intensity Conflict (ASD(SO/LIC)), who is responsible for overall supervision of Special Operations activities. If confirmed, I will work closely with USD(P) to ensure SOCOM activities are closely aligned with Department policies.

Question. The Under Secretary of Defense for Intelligence.

Answer. The Under Secretary of Defense for Intelligence (USD(I)) is the principal staff assistant and advisor to the Secretary of Defense regarding intelligence, coun-

terintelligence, security, sensitive activities, and other intelligence-related matters. If confirmed, I will continue to work closely with USD(I), particularly to ensure the intelligence requirements of Special Operations Forces in the field are met.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. The Under Secretary of Defense for Acquisition, Technology, and Logistics, USD(AT&L), is the principal staff assistant and advisor to the Secretary of Defense for all matters relating to the DOD Acquisition System, including procurement; research, development, test and evaluation (RDT&E); military construction; and nuclear, chemical, and biological defense programs. If confirmed, I will closely coordinate SOCOM acquisition activities with USD(AT&L) to ensure SOCOM procurement efforts are closely aligned with Department procurement processes and priorities.

Question. The Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict.

Answer. ASD(SO/LIC) is the principal staff assistant and civilian advisor to the USD(P) and the Secretary of Defense on Special Operations and low intensity conflict matters. The principal duty of the ASD(SO/LIC) is the overall supervision of Special Operations activities within the Department of Defense, including SOCOM. As I state in subsequent responses, the SOCOM Commander works closely with ASD(SO/LIC) in the execution of his "Service-like" authorities under title 10, U.S.C., section 167.

Question. The Assistant Secretary of Defense for International Security Affairs.

Answer. If confirmed, I will continue to work with the assistant Secretary, and with U.S. European Command, U.S. Central Command, and U.S. Africa Command, to ensure the effective employment of Special Operations Forces capability in support of national security objectives in Europe, the Middle East, and Africa. I am particularly interested in continuing the enduring relationship with the NATO Special Operations Forces Headquarters (NATO SOF HQ), and look forward to working with the Assistant Secretary in developing policies in support of NATO SOF HQ.

Question. The Assistant Secretary of Defense for Asian and Pacific Security Affairs.

Answer. If confirmed, I will continue to work with the Assistant Secretary, and with U.S. Pacific Command, to ensure the effective employment of Special Operations Forces capability in support of national security objectives in the Asian and Pacific regions.

Question. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

Answer. If confirmed, I will continue to work with the Assistant Secretary in developing SOCOM's role in Homeland Defense, and in support of civil authorities, to determine the Special Operations support necessary to protect the United States and its citizens during domestic emergencies.

Question. The Assistant Secretary of Defense for Global Strategic Affairs.

Answer. If confirmed, I look forward to working with the assistant Secretary in support of her efforts to develop policy on countering weapons of mass destruction and cyber security issues, two areas of abiding interest for Special Operations Forces.

Question. The Service Secretaries.

Answer. The SOCOM Commander's authority over the Service components, and those forces assigned to him, is clear in the Goldwater-Nichols Act, but requires close coordination with the Service Secretaries to ensure that SOCOM does not intrude upon each Service Secretary's legal responsibilities. Close coordination between the SOCOM Commander and each of the Service Secretaries is also essential to gaining and maintaining the Services' support of Special Operations Forces with support units from the General Purpose Forces and with service-common materiel.

Question. The Service Chiefs.

Answer. Without the full support and cooperation of the Service Chiefs, the SOCOM Commander cannot ensure the preparedness of his assigned forces to execute his assigned missions. The Joint Chiefs are also a source of experience and judgment that every combatant commander may call upon. If confirmed, I will continue a full and frank dialog with the Service Chiefs.

Question. The other combatant commanders.

Answer. Successive SOCOM Commanders have fostered an atmosphere of teamwork and trust in their relationships with the combatant commanders. These relationships have only strengthened over the last 15 years as transregional threats have emerged and certainly since SOCOM has been responsible for synchronizing planning for global operations against terrorist networks. If confirmed, I will continue to work closely with the other combatant commanders to achieve our common

objectives against transnational threats and violent extremist organizations. I will be committed to providing the geographic combatant commanders trained and ready Special Operations Forces to support national and theater security objectives.

Question. The Director of the National Counterterrorism Center.

Answer. SOCOM is actively engaged in support of the National Counterterrorism Center (NCTC), and has been since it was established after September 11. SOCOM also relies upon NCTC estimates and reports in the refinement and synchronization of counterterrorist operations, and will continue to assist NCTC to achieve our common objectives against transnational terrorist threats and violent extremist organizations.

Question. The Director of the Central Intelligence Agency.

Answer. SOCOM and its subordinate elements are consumers of Central Intelligence Agency products and analysis. If confirmed, I will ensure that SOCOM continues to develop interoperable capabilities so that, when directed by the President or Secretary of Defense, we may work efficiently in close partnership to accomplish our assigned missions.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges confronting the next Commander of SOCOM?

Answer. Winning the current fight, including Afghanistan and other areas where SOF is engaged in conflict and instability is an immediate challenge—SOCOM has forces in danger on an almost daily basis. This will continue to be a major challenge and one which, if confirmed, I will ensure is adequately resourced with trained and ready forces.

Terrorism remains the most present threat to the security of Americans at home and abroad. The growth and expanding influence of transregional threats including violent extremist organizations (VEOs) and transnational organized crime remains a very challenging threat. VEOs have proven themselves highly resilient and adaptable, and less reliant on nation-state sponsors for funding and safe havens. Our Special Operators will be called upon to protect the Nation from these threats, and to build the capacity of partners and allies to deny terrorists and violent extremists from the safehavens they need to develop and launch attacks.

As a force provider for SOF, the SOCOM commander must prepare his forces and sustain a high state of readiness for the full range of conflict and contingency scenarios. So we must balance the steady-state requirements to meet current challenges while preparing for an uncertain future. Doing so effectively requires the right level of resources, and the right approach to sustaining our force.

Managing and preserving SOCOM's Major Force Program-11 funding within the current budget and future budget discussions. At the forefront of this discussion is the recognition that many of the current expenditures are funded by the overseas contingency operations funds. The other part of this challenge includes monitoring and understanding the stress the Service Budgets are facing and the impacts it will have on their ability to meet present and future SOCOM requirements for forces, capabilities and platforms.

None of this can happen if we do not preserve and protect our Special Operations Forces and the families that support them. After nearly 13 years of sustained high operational tempo, our people need help with mending their mind, body, and spirit. The nation asks much of our Special Operators and their families, and they have always delivered. Much more will be asked of them, and, if confirmed, I will seek to preserve our most precious asset—our people.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. I will continue to place my priority on the Preservation of the Force and Family (POTFF) initiative. With the support of Congress, the Department of Defense, and the Services, I will fully support what Admiral Olsen and Admiral McRaven have started. Aggressively, I will reach out to our SOF families and listen to their concerns to ensure, between the Services and SOCOM, there are solutions available to meet their needs. One of the key causes of stress for our families is the unpredictability of training and deployment schedules. To help mitigate this stress and provide families with more predictability, I will continue to support the policy on Personnel Tempo Tracking and enforce the SOCOM threshold of 250 days at home station (head on pillow) in a 24-month period.

In order to win the current fight, I will place a premium on the organization, training, education, and equipping of our Force as we face new and rapidly growing challenges. SOF's readiness also hinges upon our ability to preserve our force and care for our families.

In order to thwart expanding trans-regional threat networks and VEOs, SOCOM must outpace the growth of threat networks with friendly networks across cultures. In this vein, we must continue to develop our global SOF network. Investing in our network allows us to share the burden more appropriately. We must engage, not only where problems occur, but also in places critical to our vital national interests where no visible threat currently exists. Success in meeting these challenges demands unprecedented levels of trust, confidence, and understanding built through persistent engagement.

To offset resourcing shortages, while maintaining the best trained and educated force, we must use technology to meet our immediate and long-term challenges. SOF must be internally innovative and take advantage of innovations that could enhance our ability to conduct SOF activities. It is critical that our use of new technology outpaces our adversaries. In this sense, acquisition speed and agility is paramount.

Question. What are the most important lessons you have learned during your tenure in senior leadership positions in the special operations community?

Answer. The most important lesson I have learned is the value of open and transparent relationships and communication with all parties who influence the special operations community. Good relationships build trust and understanding and allow for better mutual support of all U.S. Government objectives.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Commander of SOCOM?

Answer. As the Commander of Joint Special Operations Command and a member of the SOCOM and SOF Board of Directors I believe in the Command's current touchstone priorities of preserving the force and families, winning the current fight, strengthening the global SOF network, and responsive resourcing/acquisition. These have served the Command well and will continue to do so in the future.

CIVILIAN OVERSIGHT OF SOCOM

Question. The legislation creating SOCOM assigned extraordinary authority to the Commander to conduct some of the functions of both a Military Service and a unified combatant command.

Which civilian officials in the Department of Defense (DOD) exercise civilian oversight of the "service-like" authorities of the Commander, SOCOM?

Answer. ASD(SO/LIC) is the principal staff assistant and civilian advisor to the Under Secretary of Defense for Policy (USD(P)) and the Secretary of Defense on Special Operations matters. The principal duty of the ASD(SO/LIC) is the overall supervision of Special Operations activities within the Department of Defense, including SOCOM.

SOCOM also coordinates with the USD(P), USD(AT&L), and Under Secretary of Defense (Comptroller) on matters within their jurisdiction which touch upon the SOCOM Commander's "Service-like" authorities under title 10, U.S.C., section 167. The SOCOM Commander and his staff works closely with USD(P), USD(AT&L), and the Comptroller, and their staffs, to ensure SOCOM's programs are aligned with Department of Defense acquisitions policies and are appropriately funded.

Question. In your view, what organizational relationship should exist between the assistant Secretary of Defense for Special Operations and Low-Intensity Conflict (ASD(SO/LIC)) and the Commander, SOCOM?

Answer. There's two sides to this—oversight and advocacy. The ASD(SO/LIC) provides oversight on behalf of the Secretary of Defense, to ensure the SOCOM Commander and the activities of the Command are aligned to the Department's policies, directives, and regulatory requirements. At the same time, the ASD(SO/LIC), as the Secretary's principal civilian advisor for Special Operations is an advocate for SOF to ensure the views and interests of the SOCOM Commander are represented in the formulation of policy and allocation of resources within the Department and with Congress.

Question. What should be the role of the ASD SOLIC in preparation and review of Major Force Program 11 and the SOCOM's Program Objective Memorandum?

Answer. ASD(SO/LIC) is directed by the Deputy Secretary of Defense to provide overall supervision of the preparation and justification of Special Operations Forces (SOF) programs and budget; review and approve memoranda of agreement governing the SOCOM program, budget, and execution process; approve the U.S. Special Operations Command recommendations concerning which programs the SOCOM Commander will execute directly; review the SOCOM Program Objectives Memoranda (POM) and budget prior to submission to the Director for Program Analysis and Evaluation and the DOD Comptroller, respectively; and present and defend the SOF program to Congress, with the advice and assistance of the SOCOM

Commander. I believe these duties describe the appropriate role for ASD(SO/LIC) in oversight and support of SOCOM.

Question. What is the appropriate role of the ASD(SOLIC) in the research and development and procurement functions of the SOCOM?

Answer. Working with the SOCOM Commander and the SOCOM Acquisition Executive, the ASD(SO/LIC) advises and coordinates with the USD(AT&L), on acquisition priorities and requirements for special operations-peculiar material and equipment. I do not presently recommend any changes to ASD(SO/LIC)'s role in research and development and procurement functions of SOCOM.

Question. What is the appropriate role of the ASD(SO/LIC) in the operational planning of missions that involve Special Operations Forces, whether the supported command is SOCOM, a geographic combatant command, or another department or agency of the U.S. Government?

Answer. Through his broad policy, coordination and oversight roles as the principal staff assistant and civilian advisor to the Secretary of Defense on Special Operations matters, the ASD(SO/LIC) reviews the procedures and provides policy guidance to the SOCOM Commander on all aspects of Special Operations planning, including contingency planning when directed by the President or Secretary of Defense.

NATIONAL SECURITY BUDGET REDUCTIONS

Question. The Budget Control Act, as amended by the recent Murray-Ryan budget agreement, calls for reductions in defense spending in excess of \$900 billion.

How do you believe such budget reductions would impact Special Operations Forces?

Answer. The Bipartisan Budget Act (BBA) will alleviate many of the harshest fiscal year 2014 readiness impacts that would have been realized under full sequester, but the standing reductions to the Department of Defense will continue to impact SOCOM and our enablers. Even with the support of DOD, SOCOM has not gone without impact from the BBA. SOCOM has already reduced all non-essential travel and training, curtailed replenishment of non-mission critical supplies, and reduced period of performance on all non-severable contracts. The potential decreases in Service end strength, capabilities, and installation support will also directly affect SOF enablers and potentially affect future Special Operations missions.

The Department of Defense continues to show support for Special Operations by allowing the SOCOM portion of the fiscal year 2015 President's budget request to remain approximately level with the fiscal year 2014 President's budget request in both manpower and resources. This allows SOCOM to fully meet the Nation's most critical requirements as highlighted in the fiscal year 2012 Defense Strategic Guidance (DSG) and the fiscal year 2014 Quadrennial Defense Review (QDR), while still remaining less than 2 percent of the Department of Defense's top-line budget. With the fiscal year 2015 President's budget request, SOCOM will be able to limit continental United States (CONUS)-based readiness impacts and fully support global operations and deployments in support of the geographic combatant commands (GCC). Continuing to emphasize readiness and focusing on creating competent SOF is imperative to providing a SOF force built to provide a robust range of options for the President and the Secretary of Defense.

COMBATING TERRORISM

Question. The National Strategy for Counterterrorism highlights the need to maintain pressure on al Qaeda's core while building the capacity of partners to confront mutual threats. The strategy also underscores the need to augment efforts to counter threats from al Qaeda-linked threats "that continue to emerge from beyond its core safe haven in South Asia." The President signed new Policy Guidance on Counterterrorism (CT) on May 22, 2013, that established a framework governing the use of force against terrorists.

What are the roles and responsibilities of the Commander of SOCOM within the Department's combating terrorism strategy and how would you fulfill such responsibilities if confirmed?

Answer. The primary role for the Commander of SOCOM is to synchronize DOD CT plans and planning efforts. Practical implementation of synchronization occurs throughout the development of the DOD Global CT Campaign Plan (CAMPLAN 7500) and its revisions and in the parallel development of the GCCs' subordinate regional CT plans. Specifically, regional objectives/intermediate military objectives, tailored 7500 Lines of Operation (LOO), and planning and assessment tasks are agreed upon through the Joint Planning Working Groups which are comprised and

represented by all GCCs and Functional Combatant Commanders (FCCs) and led by Headquarters SOCOM.

Question. Are there steps DOD should take to better coordinate its efforts to combat terrorism with those of other Federal departments and agencies?

Answer. DOD continues to take appropriate steps to expand relationships between the DOD and the Interagency. I want to highlight the superb relationships DOD has built with the Director of National Intelligence (DNI) and the Interagency over the past decade. The strong leadership provided by the DNI and the partnerships built with the Intelligence Community has been invaluable for providing coordinated responses to international threat streams as well as defending the Homeland. As future threats become more decentralized these relationships and the timely sharing of intelligence will become even more pivotal. The integration of our closest international partners will also prove vital to our ability to disrupt and defeat violent extremism on a global scale. While intelligence sharing and release authority has improved, we must continue to build on this effort.

AL QAEDA

Question. What is your assessment of the threat posed by al Qaeda and its associated forces to the U.S. Homeland, U.S. interests overseas, and Western interests more broadly? Which affiliates are of most concern?

Answer. Al Qaeda and its affiliates and adherents remain the greatest terrorist threat to the United States and to its national interests around the world. Al Qaeda has adeptly exploited the deteriorating geostrategic environments and has expanded its network into every geographic combatant commander's theater of operations, including al Qaeda in the Arabian Peninsula (AQAP), al Qaeda in the Islamic Maghreb (AQIM), Jabhat al-Nusrah in Syria, and al-Shabaab in Somalia. AQAP continues to present the greatest terrorist threat to the U.S. Homeland due to their proven capabilities, continued threat planning, and ability to recruit operatives.

The Salafi-jihadist ideology is the common link binding al Qaeda, affiliates, and adherents into a transnational brotherhood of believers. The ideology retains its legitimacy within a small portion of the Muslim community because it incorporates a potent mix of anti-Western/anti-Zionist fervor, utopianism, and socio-political grievances into a common narrative, and provides the religious justification for the use of violence in defense of the Muslim nation. Al Qaeda's Jihad 2020 grand strategy offers an asymmetric approach to remove U.S. and Western influence from Muslim nations through prolonged engagements of attrition designed to exhaust the political will and financial resources of the United States.

AFGHANISTAN

Question. What is your assessment of the current security situation in Afghanistan?

Answer. The security situation in Afghanistan is stable yet tenuous. I remain concerned with high profile attacks, particularly those involving very large vehicle born improvised explosive devices (IEDs) as facilitated by the Haqqani Network. Taliban senior leaders are committed to regaining power following the drawdown of coalition forces and are secure within safe-havens in Pakistan. We expect the Afghan National Security Forces (ANSF) will continue to control major population and economic centers despite the continuance of the Taliban led insurgency. ANSF sustainment will be the greatest mid- to long-term challenge. I am also concerned with the current political crisis involving voter fraud allegations related to the recent Presidential runoff elections. These allegations could adversely affect the timely, peaceful transfer of power from President Karzai to a successor. A reasonable Afghan political response to pervasive election fraud could lessen chances of violence and avoid widespread ethnic disenfranchisement.

Question. What is your assessment of the current effort to combat terrorism and insurgency in Afghanistan and what changes, if any, would you recommend to strengthen that effort?

Answer. As General Dunford testified in March of this year, U.S. and Coalition forces have placed constant pressure on the terrorist and insurgent networks operating in and around Afghanistan. At the same time, our significant train, advise, assist (TAA) efforts to develop capable and credible ANSF will ensure that Afghanistan will be able to maintain its own security long-term and prevent the reemergence of safe havens from which al Qaeda can launch attacks against the United States or our allies. We must maintain both of these efforts as long as possible to meet U.S. objectives in the region.

Today, the ANSF are securing Afghanistan with limited to no coalition support. They are taking the brunt of attacks but continue to stand strong against the

enemy. This fighting season will be a test of their strength, but their confidence continues to build with each successful security operation. The ANSF's increasing capabilities were recently on international display during the successful execution of two elections. During the run-off election this June, the ANSF led all aspects of security, securing approximately 6,200 polling centers across the country. This was a historic accomplishment.

There is as much reason to be optimistic about the ANSF now as ever, but the situation is not decided. There are areas that we must continue to support in order to close developmental gaps and shortfalls in the ANSF. In order to ensure ANSF longevity, General Dunford has re-oriented coalition efforts from combat advising at the unit level to functionally-based security force assistance (SFA). Our advisors are now focused on building Afghan ministerial capacity in planning, programming, budgeting, and acquisition as well as working to improve integration between the different security pillars—army, police, and intelligence—at all levels. In the fielded force, the focus is on further developing critical enabling capabilities such as intelligence, aviation and special operations. These are critical efforts for ANSF's long-term ability to continue the CT and counterinsurgency (COIN) fight. We must continue to provide advisors in support of these efforts for the long-term.

Question. How do you see the role of U.S. Special Operations Forces in Afghanistan evolving as conventional forces continue to draw down and post-2014, assuming a Bilateral Security Agreement is in place?

Answer. In line with COMISAF's functionally-based SFA, U.S. and coalition SOF have adjusted their focus to advising at the ministerial, organizational and institutional level as well as critical enabling capabilities in our Afghan Special Security Force (ASSF) partners—these include aviation, logistics, intelligence, and command and control. This will be the primary focus into 2015, pending the signature of the Bilateral Security Agreement (BSA).

The NATO Special Operations Component Command/Special Operations Joint Task Force-Afghanistan (NSOCC-A/SOJTF-A) has five Special Operations Advisory Groups (SOAGs) focused on mentoring and advising our ASSF partners at the operational level in order to ensure they have the ability to command, control, maintain and sustain their tactical units spread across the country. These special military and police units are our most capable partners in the CT fight. In order to ensure our ASSF partners continue to take the fight to our enemies, U.S. SOF must be able to continue to do some advising at the tactical level post-2014 with select units in select locations. This will reinforce ASSF capabilities to address the terrorist networks which are the greatest threat to U.S./Western/GIRoA interests.

We must show our continued commitment to Afghan security efforts in order to maintain the mutually beneficial relationships we need to meet U.S. objectives in the region. To do this, SOF will continue to depend on the enabling capabilities and footprint provided by conventional forces.

SYRIA

Question. What is your assessment of the security situation in Syria and its impact on the region?

Answer. In the past 3 years the Syrian crisis has descended into a sectarian regional conflict pitting the Assad regime, Lebanese Hizballah and Iran against a mosaic of competing Sunni combatants. The proliferation of armed groups and the opening up of additional fronts in the region, particularly ISIL's control of eastern Syria and western Iraq allows for the free flow of fighters and arms across the border. Left unchecked this situation will continue to fuel sectarian violence and increase instability and humanitarian concerns beyond Syria's border, as observed in Iraq.

Question. What is your assessment of Jabhat al Nusra and other like-minded groups?

Answer. Jabhat al-Nusra, also referred to as al-Nusra Front (ANF), is al Qaeda's newest affiliate in Syria and has rapidly matured as an effective fighting force. ANF is closely connected to multiple Syrian opposition groups and is coordinating operations against the Assad regime. ANF and other extremist groups in Syria are attracting record numbers of foreign fighters and the anticipated backflow of these fighters will present an enduring counterterrorism challenge as al Qaeda seeks to conduct external terrorist attacks.

Question. In your view, what is the most appropriate role for the U.S. military in assisting regional friends and allies respond to the situation in Syria?

Answer. I believe the U.S. military can help our regional friends and allies respond to the situation in four key areas. First, we can Build Partner Capacity to better understand the situation on the ground, share intelligence, conduct IO, and

enhance border security. We can also develop the network of military-to-military relationships to build a common understanding of the threats and encourage common cause. We should continue our efforts to illuminate the foreign fighter threat and enable our partners to create action to disrupt foreign fighters and the networks that facilitate them. Finally, we could pursue options to provide additional support to strengthen the moderate elements of the Syrian opposition, if authorized and directed.

Question. In your view, what—if any—role should the U.S. military, including Special Operations Forces, play with respect to the situation in Syria?

Answer. In my view the U.S. military should facilitate interagency and international efforts to disrupt the flow of foreign fighters into and out of Syria and Iraq, facilitate intelligence fusion with partners, and employ authorized methods and resources to better understand the situation inside Syria. We should also help Build Partner Capacity, train and equip vetted opposition units, posture for CT operations, and in concert with DOS conduct a regional IO campaign to reassure our allies, reduce the foreign fighter flow, and reduce support to the extremists.

IRAQ

Question. What is your assessment of the current threat posed by the Islamic State of Iraq and the Levant (ISIL)?

Answer. ISIL represents the greatest threat to the governments of Iraq and Syria, and threatens to destabilize the entire Levant region by fomenting a sectarian war. ISIL's transnational connections are growing throughout North Africa, Europe, and Southeast Asia. The majority of the foreign fighters appear attracted to the success of ISIL and present a growing threat to global security as veteran fighters return to their home countries.

Question. What is your assessment of the capabilities of the Iraqi security forces, including the Iraqi Army, the Iraqi Police, and the Counterterrorism Services, to respond to the threat posed by ISIL and other security challenges?

Answer. The Iraqi Security Forces (ISF) are currently unable to expel ISIL and associated opposition groups from areas where they have seized territory and infrastructure. While the ISF is relatively well-equipped there are considerable political challenges that are severely impacting the ISF's strategic direction and operational readiness.

The Iraqi Army faces shortfalls in intelligence, troop mobility, and faces logistics problems severely impacting operational maneuver and resupply of munitions. Iraqi Counterterrorism Services have been over-used and miscast as conventional military forces inhibiting their ability to conduct counterterrorism missions. Iraqi police forces have largely capitulated in Sunni dominated regions allowing anti-GOI forces to assume control over the northern and western provinces. Compounding these problems, the remaining military forces loyal to the government have been withdrawn from border regions and provinces to defend Baghdad.

Question. What in your view are the main "lessons learned" from Operation Iraqi Freedom and Operation New Dawn as they pertain to Special Operations Forces?

Answer. These operations provided many lessons learned that we have incorporated into our current operations. These lessons include the need for whole-of-government approaches, active and integrated interagency coordination and collaboration, the necessity for culturally attuned forces, and the need for combined operations. It is critical to maintain enduring partnerships, especially with newly formed military establishments, once our general purposes forces have redeployed. Special Operations Forces are uniquely designed to conduct low visibility, small footprint, but high pay-off persistent military-to-military engagement with partner nations. These activities contribute to enduring partnerships and enable access and a better understanding of the political landscape and overall threat environment in country. To maintain these relationships and partnerships funding and authorities are crucial.

YEMEN AND AL QAEDA IN THE ARABIAN PENINSULA

Question. What is your assessment of the current U.S. strategy in Yemen and what is your understanding of the role of DOD within that strategy?

Answer. Yemen is in a strategic location on the Bab El Mandeb strait and is struggling with AQAP and internal threats to stability. The United States is Yemen's strongest supporter and is providing support on many levels to strengthen the government and build stability. DOD is a key element of modernizing the Yemeni military by providing equipment, training, and mentorship.

Question. Given the continuing political instability and slow progress of the national dialogue in Yemen, what are your views on the United States continuing to provide security training and assistance to Yemeni counterterrorism forces?

Answer. The political instability and external threats from al Qaeda are the reasons we must continue to provide security training and assistance to Yemen. The political and military progress is slow, but the Yemenis continue to move forward. If we are willing to continue providing the support that helps the Yemenis move towards stability Yemen has the potential to be a small but important victory in defeating extremist organizations in the Middle East.

SOMALIA AND AL SHABAB

Question. What is your assessment of the threat posed by al Shabab?

Answer. Al Shabaab (AS) is a significant regional threat in East Africa. AS can conduct attacks outside of Somalia and has demonstrated this by launching attacks against regional neighbors in Djibouti, Kenya, and Uganda. AS has proven to be a significant regional threat to Western interests and is striving to extend its reach internationally.

Question. In your view, does al Shabab pose a threat to the United States and/or western interests outside of its immediate operational area?

Answer. Yes, the group has demonstrated the capability to stage complex, high-profile attacks against Western targets outside of Somalia and to harm U.S. citizens abroad. Since 2008, Al-Shabaab has vowed to attack U.S. interests in Somalia and to conduct attacks against the U.S. Homeland. The United States and Europe host a large diaspora of Somalis, which AS could recruit, radicalize, and train personnel for attacks against the United States or other western interests.

Question. What is your understanding of the current U.S. strategy in Somalia and the role of DOD in that strategy?

Answer. U.S. foreign policy objectives in Somalia are to promote political and economic stability, prevent the use of Somalia as a haven for international terrorism, and alleviate the humanitarian crisis caused by years of conflict, drought, flooding, and poor governance. The United States is committed to helping Somalia's Government strengthen democratic institutions, improve stability and security, and deliver results for the Somali people. It has urged the Somali leadership to continue to consolidate gains by helping local governance structures emerge through community dialogue and reconciliation, rapidly providing services, and drafting legislation to facilitate implementation of the provisional constitution. The United States also has welcomed the African Union Mission in Somalia's (AMISOM) success in driving the al-Shabaab terrorist organization out of strategically important population centers, and has underscored the continued U.S. commitment through DOD to support AMISOM and the Somali national forces in their responsibility of extending security throughout Somalia.

Question. Should the United States establish military-to-military relations and consider providing assistance to the Somali national military forces?

Answer. At the right time we certainly should establish a military-to-military relationship with Somalia. We should look first to resume full diplomatic relations, including establishing a full time presence once security conditions are acceptable. Concurrently the United States should continue its support to Somali National military forces through AMISOM and the Department of State's training program. If the situation continues to improve, I would welcome working with AFRICOM and the Department of State to determine the best course of action for incorporating Special Operations Forces into this effort.

AL QAEDA IN THE ISLAMIC MAGHREB

Question. What is your assessment of the threat posed by AQIM?

Answer. AQIM is a threat to Western and U.S. interests throughout North and West Africa. AQIM's objectives include cleansing North Africa of Western influence; overthrowing apostate governments to include Algeria, Libya, Mali, Mauritania, Morocco, and Tunisia; and installing fundamentalist regimes that follow strict, Sharia law.

Question. In your view, does AQIM pose a threat to the United States and/or western interests outside of its immediate operational area? What capacity has AQIM demonstrated to plan and carry out actions threatening U.S. interests?

Answer. AQIM poses a low threat to the Homeland, however, it has the intent and capacity to carry out attacks against U.S. interests throughout North Africa with the greatest threat to U.S. interests being kidnapping for ransom. Although AQIM has not specifically targeted U.S. interests, it has kidnapped 20 Europeans over the last 10 years, gaining \$50 million USD in ransom payments.

Question. In your view, what has been the impact of the recent expansion of AQIM's area of operations in northern Mali on the group's capacities and aims?

Answer. AQIM made significant gains during the Tuareg rebellion and subsequent coup in northern Mali in March 2012; however, these gains and their capacity in northern Mali are being degraded by ongoing French counterterrorism operations and U.N. stabilization mission.

OPERATION OBSERVANT COMPASS AND THE LORD'S RESISTANCE ARMY

Question. Despite pressure by the Ugandan People's Defense Forces (UPDF) and efforts by U.S. Special Operations personnel to support them, elements of the Lord's Resistance Army (LRA)—including Joseph Kony—continue to operate and commit atrocities against civilian populations in the Central African Republic, Democratic Republic of the Congo, and South Sudan. Some observers have identified operational concerns with this mission, including that: (1) supported forces are trying to find an elusive foe in an area roughly the size of California, much of which is covered in thick jungle; (2) technical support to U.S. forces and their UPDF partners from the defense and intelligence community continues to be inadequate; and (3) limitations continue to be placed on the ability of U.S. Special Operations personnel to accompany UPDF partners outside of main basing locations, thereby limiting the level of direct support they can provide.

In your view, what is the objective of Operation Observant Compass (OOC)?

Answer. The objective of OOC, the U.S. military advise and assist mission with AU-RTF forces including the UPDF, DRC and South Sudan, is to better enable African militaries of the region to counter the Lord's Resistance Army, and ultimately to dismantle the LRA and eliminate the threat to the civilian populations of the Central African Republic, Democratic Republic of the Congo, and South Sudan. The LRA has waged violent insurgency in the region since the 1980s, manning its army by kidnapping children and forcing them to take up arms against government troops. Since October 2011, joint U.S. and Ugandan operations against the LRA have significantly marginalized the group's activities.

Question. In your view, how can DOD support, particularly SOF support, to OOC be more effective in meeting these objectives?

Answer. DOD can best support OOC by continuing to support U.S. Government Strategic Objectives, based on President Obama's Counter-Lord's Resistance Army (C-LRA) strategy through continued funding and resourcing. To be more effective in achieving these objectives, U.S. SOF C-LRA operations should focus on increasing UPDF and regional forces' capabilities to counter terrorists and insurgents and increase their range and capability to reach remote areas where the LRA continue to find safe haven and if directed, prepare for a transition of training responsibilities from U.S. SOF to U.S. and/or international and regional partner nation conventional forces. Information operations including leaflet drops, radio broadcasts and loud speaker operations conducted in close coordination with partner nations and regional NGO's have been extremely effective in influencing LRA members to defect, including the recent defection of high level LRA leader Lt Col Opio Sam. These operations have significantly reduced the LRA's capabilities and should be continued, to deplete the LRA's ranks and reintegrate former LRA members. These activities, coupled with conventional and interagency activities, will directly and indirectly contribute to increased protection of civilians in the region, neutralizing the threat from the LRA, promoting the integration/re-integration of former LRA members, and building the international humanitarian relief to affected communities in the region.

Question. Do you support the continuation of DOD's current level of support to this mission?

Answer. SOCOM supports AFRICOM and SOCAFRICA's current persistent engagements and Operation Observant Compass mission in Central Africa, and recognizes that DOD actions are an integral part of the overall U.S. Government approach to achieve national objectives. The current level of support has been successful in significantly marginalizing the LRA through persistent Joint Combined Exchange Training (JCET) events engagements and advise, assist and accompany missions with UPDF, DRC and South Sudan forces as they counter the LRA. These engagements with the UPDF have resulted in the enhancement of a UPDF conventional forces, South Sudan Commandos and DRC Forces Regionale d'Intervention (FRI) troops, who have clearly demonstrated increased counterterrorism and counterinsurgency capabilities throughout the region. The pressure applied by U.S.-trained forces has resulted in a large number of defections from the LRA, as well as effective UPDF actions on named objectives throughout the region.

Question. What in your view are the key U.S. strategic interests with regard to Pakistan?

Answer. As a declared nuclear-weapons state, Pakistan's internal stability is of paramount strategic interest to the United States. Violence associated with insurgent and political attacks have been trending generally downward since national elections in May 2013; however, attacks as of April 2014 are still unacceptably high. As the United States draws down in Afghanistan, a more stable Pakistan will contribute to a more peaceful transition in Afghanistan. Regionally, the Central Asian States of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan are increasingly important in terms of security and counterterrorism, the flow of narcotics and other drugs (which fuel corruption and violent extremist groups), and the flow of hydrocarbons. Save for Turkmenistan, the Central Asian States are members of the Shanghai Cooperation Organization (the SCO)—with focus on regional security, military cooperation, and mutual economic interests. Pakistan is an observer nation in the SCO, and a trading partner with all five. How Pakistan interacts with the regional powers of India, China, and Russia is of vital strategic interest to the United States. How the United States manages bilateral relations with each of these three—India in particular—will influence our relationship with Pakistan.

Question. Does the United States have a strategic interest in enhancing military-to-military relations with Pakistan? Why or why not?

Answer. Our primary strategic interest in enhancing military-to-military relations with Pakistan lies in the potential proliferation of nuclear weapons. Pakistan is not a signatory in the Nuclear Weapons Non-Proliferation Treaty (although is a member in good standing in the IAEA). As a nation of nearly 200 million, 96 percent-Muslim, and 90 percent of those Sunni, northwest Pakistan and eastern Afghanistan remain susceptible to Taliban (Sunni) influence. In parallel, most of the primary components for calcium ammonium nitrate (fertilizer)-based IEDs have originated in or transited through Pakistan over the past 10–12 years. Enhancing military-to-military relations would offer more chance of guiding Pakistan in positive directions than not.

Question. If so, what steps would you recommend, if confirmed, for enhancing the military-to-military relationship between the United States and Pakistan?

Answer. Around the core of Special Operations Command's warrior diplomats is a unique world of relationships with partner nation Special Operations and conventional forces, government agencies in intelligence, law enforcement, policy and diplomacy, universities, think tanks, private sector enterprises and non-governmental organizations. Our partner nation liaison officers who travel to the United States to work with SOCOM and attend our professional military education programs have the opportunity to interact with many of these organizations, and as a result commonly return to their home countries with a greater sense of trust in U.S. capabilities and intentions. Likewise, our Special Operations Liaison Officers return from overseas assignments with a deeper appreciation of countries and regions to which they are detailed. These exchanges, as well as continuing legacy SOF training missions prove to be of enormous value in breaking down barriers to future communication and understanding.

Question. What is your assessment of Pakistan's cooperation with the United States in counterterrorism operations against militant extremist groups located in Pakistan?

Answer. Pakistan has become increasingly cooperative. Pakistan's central government appears to have changed its stance toward militant extremist groups, specifically the Tehrik-i-Taliban Pakistan, the Haqqani Network, the East Turkistan Islamic Movement, and the Islamic Movement of Uzbekistan. Within the last few weeks, Pakistan's military (both air and ground forces) conducted successful missions in the federally Administered Tribal Areas region of Pakistan in an effort to defeat extremist groups. In addition, Pakistan's populace has been very supportive of its governmental/military efforts, as they have become increasingly frustrated with militants targeting civilians, exacerbated by the recent complex attack on Karachi's airport.

Question. What is your assessment of Pakistan's efforts to counter the threat improvised explosive devices, including efforts to attack the network, go after known precursors and explosive materials?

Answer. Pakistan has an extremely complex and volatile climate of political, military and industrial relationships and it is understood that dual-use precursors are finding their way into IEDs. While strides have been made to better control production and distribution of materials, more needs to be done to illuminate the networks that provide precursors for the lethal devices. This will require building trust and

identifying the benefits of curbing the shipping of these materials by both military-to-military and diplomatic means to include, perhaps, offering alternative technologies as mitigation.

REPUBLIC OF THE PHILIPPINES

Question. What is your view of the effectiveness of U.S. assistance provided through the Joint Special Operations Task Force-Philippines to the military of the Republic of the Philippines in its fight against terrorist groups?

Answer. The short answer is that I believe Operation Enduring Freedom-Philippines (OEF-P), executed through Joint Special Operations Task Force-Philippines (JSOTF-P), has been a text-book example of the effectiveness of the “by, with, and through” strategy.

The effort has employed the full range of military activities—ranging from Direct Action/Kinetic operations to building partner capacity—and utilized numerous capacity building funding authorities.

In the initial years of OEF-P, USSOF worked at the tactical level, actively patrolling and advising the Armed Forces of the Philippines (AFP) in operations against ASG and Jemaah Islamiya (JI). After 6 months of FID operations, JTF-510 completed its mission and redeployed while Special Forces Security Assistance modules continued with a focus on facilitating connections between elements of the AFP and U.S. SOF. JTF-510 was replaced by JSOTF-P, which continued to execute the full range of operations to include advise, train, equip, and civil-military support through building partner capacity venues. The intent of these operations was to go at the heart of the ASG and JI support zones and eliminate their ability to operate by improving government legitimacy, separating terrorists from the populace, and assisting in CT targeting. This method was sustained for 9 years. As the AFP skills progressed, U.S. SOF refocused their efforts on operational planning and higher headquarters C2 techniques. Our successes in the Philippines is no doubt based on the full range of operations, actions, and activities with both Ministry of Defense and Ministry of Interior forces to include direct action, advise/assist, train, equip, minor construction, ISR, CASEVAC, CMO, CNT, info ops, and aviation support.

Our Philippine partners have now progressed to a point where they can maintain security and stability with minimal advisory support and international ties to ASG and JI have been severed. Within the past year, JSOTF-P elevated their support to the institutional training centers of select Philippine National Police (PNP) and AFP partner units who can now wage the CT fight on their own.

Question. Do you expect the necessity for or mission of the JSOTF-P to change in the coming years? If so, how?

Answer. Yes. JSOTF-P will deactivate and the named operation OEF-P will conclude in fiscal year 2015. OEF-P and JSOTF-P will transition because of a change in the threat picture, and more importantly, due to the significant enhancement of PSF capabilities. Throughout this transition, our ability to maintain a good rapport with PSF and internal networks built over the past 11 years has been critical to our partnership.

A smaller number of U.S. military personnel operating as part of a U.S. Pacific Command Augmentation Team will continue to improve the abilities of the PSF to conduct their CT missions, build PSF capacity through long-term SOF partnership, and to partner at critical locations to ensure a level of sustainable competence.

SPECIAL OPERATIONS AUTHORITIES

Question. The current Commander of SOCOM has sought and received more control over the deployment and utilization of Special Operations Forces. For example, the Secretary of Defense modified policy guidance for the combatant commands that gave SOCOM, for the first time, responsibility for resourcing, organizing, and providing guidance to the Theater Special Operations Commands of the geographic combatant commanders and Special Operations Forces assigned to them.

Do you believe the Commander of SOCOM needs additional authorities to optimize the utilization of deployed Special Operations Forces?

Answer. No, receiving COCOM of Theater Special Operations Commands enables resourcing, organizing, and guidance supporting geographic combatant commanders while increasing effectiveness of Special Operations Forces assigned to them.

Question. If confirmed, how would you seek to utilize authorities provided to the Commander of SOCOM without conflicting with civilian control of the military, infringing upon other authorities provided to the geographic combatant commanders, or raising concerns with the State Department.

Answer. I'll address each of the three potential conflicts listed above.

I fully understand and will comply with the military chain-of-command, which eliminates conflict with civilian control.

When Special Operations Forces deploy, OPCON is transferred to the GCC who then employs the forces. This clear transfer of control eliminates any conflict with the GCCs.

All of the various events and activities that employ SOF (JCET, CNT, Section 1208, Section 1207, JCS Exercise) require COM concurrence, thereby eliminating any possible conflict with State.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act (NDAA) for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent bills, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of this authority?

Answer. Section 1208 is critical to our combating terrorism efforts. It is a force multiplier—allowing a small number of U.S. Special Operators to enlist the support of regular and irregular forces to facilitate U.S. military operations, particularly to access areas where a larger U.S. presence would be counter to our objectives. 1208 authority is ideally aligned to our defense strategy, which calls for small-footprint, distributed operations to counter terrorist threat networks. From a historical perspective, we have achieved tremendous effects across a wide range of operating environments for a fraction of the cost of other programs. Section 1208 authority fills a critical gap in our ability to train and equip regular and irregular forces in uncertain environments where terrorists thrive and establish sanctuary. I am extremely appreciative of Congress' continued support for this authority.

Question. The Senate Armed Services Committee (SASC)-passed NDAA for Fiscal Year 2015 (S. 2410) increased the cap for section 1208 operations to \$60 million from its current level of \$50 million.

What is your view of this proposed increase?

Answer. I am encouraged by the SASC's effort to increase our authority cap as an indicator that we share similar perspectives on section 1208. As we transition out of combat operations in Afghanistan and begin to implement the President's vision of increasing efforts by, with, and through foreign partners to address the expanding threat of terrorism, section 1208 authority will become ever more essential. Section 1208 will be in increasing demand by the combatant commanders as they seek low-cost, small-footprint, discreet SOF elements to carry out enabled partner operations. I also see the need for longevity in the authority—by way of multi-year extensions—and incremental increases in the cap to accommodate expanding requirements so that we are able to meet the current demand and posture ourselves to respond quickly in the event of emerging crises.

Question. Are there any other changes that should be made to section 1208 to improve the effectiveness of this authority?

Answer. I'm continually impressed with the foresight of those in Congress that wrote 1208 authority, as it continues after nearly 10 years to provide us with tremendous flexibility in supporting our combating terrorism operations, while affording the Department of Defense and congressional leadership with complete visibility on the program through existing notifications and reporting requirements. I believe that as long as we adhere to the spirit and letter of the law, with careful management and oversight, this authority will continue to serve us well into the future as written.

DEPARTMENT OF DEFENSE COUNTERNARCOTIC AUTHORITIES

Question. What is your understanding of the Department of Defense's counter-narcotics authorities?

Answer. SOF forces conduct counter narco-terrorism (CNT) training missions under DOD counternarcotics authorities. Known as section 1004 authority (§1004, of the NDAA for Fiscal Year 1991), U.S. SOF CNT missions enable foreign partners to develop skills and capabilities to interdict smuggling activities. SOF CNTs address the narco-trafficking and associated transnational criminal organization (TCO) threats in regions such as West Africa, Central America, and the Central Asian States. These are regions where SOF has a continuous forward presence under CN authority. SOCOM helps support the Department's Counternarcotics and Global Threats Strategy through conducting CNTs and other activities.

Question. In your view, does SOCOM benefit from these authorities and associated funding?

Answer. Yes. CN authorities and funding enable SOF forces to build partner capacity and enable SOF forward presence in areas threatened by narcotics trafficking. CN authorities and funding also enable the SOF community to perform Counter Threat Finance (CTF) analysis of illicit proceeds of the drug trade.

Question. Would you recommend any changes to the Department of Defense counternarcotics authorities?

Answer. I believe current DOD counternarcotics authorities are appropriate, and have proven to be useful tools to accomplish national security objectives. I would note that because the current authorities are tied to counternarcotics, they do not currently enable DOD to directly support other U.S. Government efforts to counter transnational organized crime that lacks a narcotics or terrorist connection

COUNTER THREAT FINANCE

Question. Identifying and disrupting key individuals, entities, and facilitation routes enabling the flow of money that supports terrorism, production of IEDs, narco-trafficking, proliferation, and other significant national security threats could have an outsized impact on confronting these threats. In August 2010, the Department issued a CTF Policy Directive which recognized the CTF discipline as an essential tool in combating criminal networks and terrorist organizations and called for the integration of CTF capabilities into future force planning and the continued support to interagency partners conducting CTF operations.

What is your assessment of the value of CTF activities?

Answer. Identifying and disrupting the enabling means, specifically the resources of our adversaries, is a critical line of effort to the National Counterterrorism Strategy and the Strategy to Combat Transnational Organized Crime. CTF directly supports these objectives through highlighting the illicit activities and vulnerabilities of threat networks. Additionally, financial data is a powerful tool in understanding a network's capabilities and relationships. In this context, CTF activities provide significant value in our efforts to protect the United States and U.S. interests abroad.

Question. What do you believe is the appropriate role, if any, of SOCOM in supporting CTF activities?

Answer. SOCOM is the DOD lead component for synchronizing transnational DOD CTF activities. In this role, SOCOM is well positioned to support interagency and partner CTF efforts. Our ability to understand our adversaries and advance whole-of-government efforts will remain an important aspect of our enabling role, and will shape our ability to operate effectively alongside and in support of our interagency partners.

NATIONAL STRATEGY TO COMBAT TRANSNATIONAL ORGANIZED CRIME

Question. Criminal networks are not only expanding their operations, but they are also diversifying their activities, resulting in a convergence of transnational threats that has evolved to become more complex, volatile, and destabilizing. The Director of National Intelligence recently described transnational organized crime as "an abiding threat to U.S. economic and national security interests," and stated that "rising drug violence and corruption are undermining stability and the rule of law in some countries" in the Western Hemisphere. In July 2011, the President released his Strategy to Combat Transnational Organized Crime: Addressing Converging Threats to National Security. One of the priority action areas designated in the strategy is "enhancing Department of Defense support to U.S. law enforcement."

What is your understanding of the President's strategy to combat transnational criminal organizations?

Answer. The U.S. National Strategy to Combat Transnational Organized Crime is grounded in the increasing threat transnational criminal organizations pose to U.S. and international security and governance. It highlights the threat posed by the convergence of transnational organized criminal activities. Therefore, the Strategy to Combat Transnational Organized Crime centers on efforts to build, balance, and integrate the tools of American power to combat this threat. Depriving threat networks of their enabling means must be integrated into current and future operations, including special operations missions. It takes a network to combat this, and the approach we must take is a whole-of-government networked approach. The Threat Mitigation Working Group led a Strategic Coordination Meeting hosted at SOCOM to explore this very topic on May 9, 2014. There is still work to be done to synchronize our whole-of-government response to CTOC.

Question. What is your understanding of the SOCOM's role within the President's strategy?

Answer. SOCOM is a partner with interagency efforts to:

- Enhance intelligence and information sharing;
 - SOCOM's global perspective can provide unique expertise in defining and describing the scope of the threat posed by transnational criminal organizations.
- Strengthen interdiction, investigations, and prosecutions;
 - Special Operations Forces (SOF) provide unique capabilities in support of the Department of Defense's detect and monitor responsibilities as outlined in title 10, U.S.C., section 124. Additionally, an expansion of the DOD rewards for information program to include transnational organized crime, would permit SOF to provide additional support in gathering information to support arrest or conviction of top transnational criminals.
- Disrupt drug trafficking and its facilitation of other transnational threats; and
 - SOF have a long history in providing support to U.S. Government counter-drug activities globally. SOF maintain established relationships with counter-drug partners worldwide and execute sustained counter-drug capacity development missions.
- Build international capacity, cooperation, and partnerships
 - SOF have unique qualifications and capabilities to directly interact with and enhance international partners' capacity to address the challenges related to transnational organized crime.

Question. In your view, should SOCOM play a role in providing support to the U.S. law enforcement and the Intelligence Community on matters related to transnational organized crime?

Answer. Yes. Transnational organized crime can destabilize partner nation governments, while also enabling our adversaries. To effectively counter these threats, we need to undertake a comprehensive approach that includes mutually supporting priorities among DOD, other U.S. Government departments and law enforcement agencies, and the Intelligence Community. Furthermore, once the mutually supporting priorities are identified, SOCOM should continue to develop capabilities and integrate those capabilities into mission planning in support of whole-of-government solutions, including working directly with U.S. Law Enforcement agencies.

SOCOM ACQUISITION AUTHORITIES

Question. SOCOM is unique within the DOD as the only unified command with acquisition authorities and funding. Further, the Commander of SOCOM is the only uniformed commander with a subordinate senior acquisition executive.

If confirmed, how would you ensure SOCOM requirements are adequately vetted and balanced against available resources before moving forward with an acquisition program?

Answer. SOCOM has a robust requirements and programming process that is vetted through the special operations Strategic Planning Process (SPP) and leadership from each of the component commands. This disciplined process allows SOCOM to align available resources with validated requirements, and to prioritize these requirements within our budget and future year programs.

Question. In your view, are there ways in which the SOCOM acquisition system can be reformed to more expeditiously address emerging requirements?

Answer. SOCOM prides itself on an acquisition workforce of recognized experts and trusted providers, as well as a rapid and focused acquisition system built on streamlined processes. Although effective, we continue to look for collaborative opportunities and more innovative ways of doing business with the Services, international partners, and the industrial complex.

Some recent examples include open collaborative forums between the SOF operators, acquirers, industry and academia, 3D modeling and prototyping, and various contracting strategies.

Question. What role can SOCOM's development and acquisition activities play in broader Service and DOD efforts?

Answer. SOCOM is a microcosm of the entire Defense Department, and our challenges are very similar to investment requirements among the Services. SOCOM also has mature processes to conduct rapid evaluations of technology, systems, and concepts of operations, the results of which benefit SOF and are transferrable to the rest of the Department. Special Operations Forces Acquirers specialize in the integration of emerging off-the-shelf technologies.

This integration allows SOCOM to take the best from each Service, as well as industry, and modify or customize the equipment to meet special operations needs and

rapidly field it to the force. Our success can then be shared with the Services to improve their capabilities.

Some of the SOF technologies that have been transitioned to the Services include the M-3 Multipurpose Anti-Armor, Anti-Personnel Weapons System to the U.S. Army, the MK48 Machine gun to the U.S. Navy, and the LA-10 Handheld Laser Marker to the U.S. Air Force National Guard.

Question. If confirmed, how would you ensure that special operations capabilities and requirements are integrated into overall DOD research, development, and acquisition programs?

Answer. Although SOCOM generates and validates all SOF requirements, these requirements are provided to the Joint Staff for inclusion in the Joint Requirements Knowledge Management System. In addition, SOCOM has initiated acquisition summits with OSD, drawing together SOCOM, USD(AT&L), and the Service Acquisition Executives (SAE) to discuss acquisition issues of common interest. For example, the SAEs regularly synchronize technical and programmatic plans among all investment portfolios, as well as explore initiatives to develop common architectures and standards across different future SOF and Service platforms. Additionally, OSD(AT&L) has led efforts on behalf of SOF to standardize certification and other Service test requirements between Services and SOCOM to gain efficiencies and promote common process reciprocity. Continuing that dialogue/exchange will remain one of my priorities.

Question. If confirmed, how would you ensure sufficient resources are dedicated to the development of special operations-unique platforms, when required?

Answer. Ensuring SOF not only has the resources to conduct today's operations but preparing ourselves for the future environment is one of my top priorities. The SOCOM SPP allows the Command to take a strategic view of future requirements and achieve a balance. Since September 11, the MFP-11 budget has kept pace with operations, and the investment funding has allowed SOCOM to support these increased demands and acquire equipment as required.

Question. If confirmed, what metrics will you use to determine the effectiveness of SOCOM technology development investments and whether SOCOM is investing sufficient resources in these efforts?

Answer. We have created a series of technology roadmaps that assist us in identifying promising solutions to our problems. These roadmaps are schedule-oriented, containing both the technology development timelines and the formal acquisition program schedules. As such, they have quantifiable metrics (cost, schedule, performance, and technology readiness) embedded in them.

Question. If confirmed, how will you ensure that SOCOM has an acquisition workforce with the skills, qualifications, and experience needed to develop and manage its acquisition and research and development programs?

Answer. The SOCOM Acquisition Executive manages the SOF Acquisition workforce similar to the Service Acquisition Executives. SOF Acquirers are specialists in science and technology, acquisition, contracting, and logistics. They are operationally oriented, professionally trained and certified, and experts in the SOF-unique processes required to meet the equipping needs of SOF. SOCOM has been recognized as a leader in acquisition workforce development, and has received DOD-level awards in this area for the last 3 years.

SPECIAL OPERATIONS PERSONNEL MANAGEMENT

Question. Some have argued that the Commander of SOCOM should have greater influence on special operations personnel management issues including assignment, promotion, compensation, and retention of Special Operations Forces. One proposal would modify section 167 of title 10, U.S.C., to change the role of the SOCOM Commander from "monitoring" the promotion, retention, and career progression of special operations officers to "coordinating" with the Services on personnel and manpower management policies that directly affect Special Operations Forces.

What is your view of this proposal?

Answer. In 2010, the Defense Department published DODD 5100.01, Functions of the Department of Defense and Its Major Components, which implemented SOCOM's recommendation, specifically citing "coordinate," vice monitoring as title 10 states. SOCOM must continue to work with the Services and ASD(SO/LIC) to ensure the most effective personnel management policies are codified in all applicable directives.

SIZE OF SPECIAL OPERATIONS FORCES

Question. The 2006 and 2010 Quadrennial Defense Reviews mandated significant growth in Special Operations Forces and enablers that directly support their oper-

ations. However, as a result of the Budget Control Act and Bipartisan Budget Agreement, SOCOM will truncate its growth at 69,700 personnel, almost 3,000 fewer than had been previously planned.

What is the impact of these cuts to special operations capabilities—particularly with regard to organic enabling capabilities like combat support and combat service support?

Answer. The Budget Control Act and Bipartisan Budget Agreement truncated SOCOM's growth by approximately 2,201 personnel. After conducting a detailed analysis, it was determined that primarily USASOC's end strength would be affected (specifically three Ranger companies, an MH-47 company of eight helicopters, and one of two ISR Gray Eagle companies cut; and a halt in programmed growth of civil affairs capacity), so that cuts to combat support and combat service support (CS/CSS) requirements could be minimized. Additionally, while not specifically reduced, NSW and MARSOC did not realize programmed growth.

Although the cuts were managed to ensure minimal effects on CS/CSS, SOCOM will need to define its requirements farther in advance, in order to allow the Services to plan for the employment of habitually aligned units in support of SOF. A reduction of our emergent requests and an increase in habitually aligned Service Provided Capabilities (SPCs) will go a long way to resolve this problem. We remain committed more than ever to working with the Services as part of their Service force generation processes and GFM to ensure the necessary SPCs are programmed for, trained and ready to deploy with SOF to meet operational requirements.

STRESS ON THE FORCE AND FAMILIES: FMD POTFF (DR NEFF)

Question. In recent years, Special Operations Forces have experienced higher suicide rates than those in the general purpose forces and continue to face significant numbers of divorces. The current Commander of SOCOM has focused significant effort and resources on addressing the stress on special operators and their families through the Preservation of the Force and Families (POTFF) initiative.

If confirmed, how would you seek to address issues associated with the stress of difficult and repeated deployments on special operators and their families?

Answer. I will continue to place my priority on the POTFF initiative. With the support of Congress, the Department of Defense and the Services I will fully support what Admiral Olson and Admiral McRaven have started. Aggressively, I will reach out to our SOF families and listen to their concerns to ensure, between the Services and SOCOM, there are solutions available to meet their needs. One of the key causes of stress for our families is the unpredictability of training and deployment schedules. To help mitigate this stress and provide families with more predictability, I will continue to support the policy on Personnel Tempo Tracking and enforce the SOCOM threshold of 250 days at home station (head on pillow) in a 24-month period.

Question. Do you believe families of special operators face “special operations-unique” challenges when compared to other military families?

Answer. All military families face challenges associated with supporting their servicemember. A combination of high operational tempo (OPTEMPO), exacting standards for operational proficiency, and mission sensitivity places unique stressors on SOF members and their families. In accordance with President Obama's strategic guidance, this burden will not decrease. I will continue to alleviate the impact of these challenges by working closely with the Services and, where gaps are identified, work with Congress to implement programs geared towards meeting SOF requirements.

SOF members are subject to no-notice recall and immediate deployments without clear end dates which adds unpredictability to the families. SOF members routinely practice high-risk skills and collective training events with personal injury a persistent career factor and added stress on families. A higher degree of operational activity and enemy contact (personally eliminating combatants) brings an increased opportunity for traumatic exposure compared with GPF. Many SOF members are deployed to remote locations without traditional psychological, medical, or religious support. SOF lives within a short-term deployment & training cycle that result in little or no reintegration period with families . . . we are always at war. Many SOF members work on classified missions which cannot be shared with spouses . . . this brings added stress on the relationship. SOF spouses endure a greater percentage of parenting duties from high PERSTEMPO. In time the SOF family adapts to the high OPTEMPO, and then the SOF member retires or moves to a “desk job”, which can bring difficulties in adapting back to a “normal life”.

RECRUITING AND RETENTION

Question. How successful have the services been in recruiting and retaining the special operations personnel that are needed?

Answer. In today's operating environment, the demand is much greater for SOF operators who speak various languages and are culturally attuned. Service recruitment efforts face many challenges as selection from the pool of eligible U.S. citizens and legal permanent residents are limited due to medical, educational, or conduct reasons. However, Service recruiting commands, in coordination with SOF component commands continue to be generally successful in recruiting SOF operators.

Continued support for programs like Military Accessions Vital to National Interest (MAVNI), has great potential to alleviate some critical strategic language and cultural gaps. Your current and continued support of this program is not only appreciated but vital to ensure future SOF success. Looking forward, the Services' must increase recruitment for those candidates who will bring ethnic, business, academic, technical and experimental diversity to SOF. Operating in an uncertain global environment requires a broad pool of personnel with deep and diverse global awareness and understanding. It is paramount for Services and SOCOM to remain receptive and flexible to initiatives which enable the recruitment of these types of individuals.

Question. What are the biggest challenges to retention you see in the SOCOM community?

Answer. Past focus groups identified a primary reason personnel consider leaving the force is the lack of predictability for deployments to both named operations and to GCC theater security cooperation program missions. Specifically, this is often created by late shifts in deployment schedules and the insertion of new requirements. In order to address this challenge, SOCOM recently implemented a Personnel Tempo (PERSTEMPO) tracking policy that establishes a 250 days at home station (head on pillow) threshold in a 24-month period (730 days) with a 12 months back and 12 months forward sliding scale. Any waivers must be personally approved by the SOCOM Commander.

Question. What steps need to be taken, in your view, to meet the recruiting and retention goals of each of the Services' Special Operations Forces?

Answer. The Services need increased flexibility to incentivize qualified individuals to choose the path to become special operators. We need continued support for programs that are beneficial to SOF and also in maintaining recruiting budgets for the Services. Consequently, SOCOM must continue to facilitate comprehensive solutions and engagement with our components and the Services to ensure the SOF community is attracting the very best. We must also retain those SOF Operators who demonstrate future potential service to their respective Service.

Question. What monetary or non-monetary incentives do you believe would be most effective in this regard?

Answer. SOCOM currently has a set of recruiting and retention incentive programs focused on accessing new personnel, keeping both our mid-career SOF personnel as well as maintaining our most senior and experienced SOF personnel: Enlistment Bonus (EB), Selective Reenlistment Bonus (SRB), Critical Skills Retention Bonus (CSR), Special Duty Assignment Pay (SDAP), Assignment Incentive Pay (AIP) and Critical Skills Accession Bonus (CSAB). These programs have been effective in accessing and retaining their target demographic. SOCOM will continue to advocate for the SOF Service Components, via OSD and the Joint Staff, with the Services in order to maintain these important SOF incentives programs.

TRAINING CAPABILITY

Question. What capabilities do you consider most important for effective training of special operations personnel?

Answer. Professional Military Education remains an essential element to the development, sustainment, and advancement of SOF. Additionally, language skills and cultural knowledge continue to be key to establishing effective relationships with foreign forces, organizations and individuals with which SOF will interact.

Training, such as JCETs, Realistic Military Training (RMT) off Federal property, and operational exercises are critical in maintaining SOF core capabilities. JCETs fulfill critical language, regional expertise, and cultural training requirements, and at the same time they build person-to-person and unit-to-unit relationships, and contribute towards persistent engagement with partner nations. RMT provides environments that replicate those encountered in actual operations that may not be available in the size or desired level of realism on Federal property. Further, these exercises are a great opportunity to enhance interagency relationships.

Operational exercises rehearse mission essential tasks that are critical across the spectrum of conflict. From an aviation perspective, this includes the frequency, vol-

ume, and quality of training to maintain currency, proficiency, and expertise across a variety of tactical skillsets from aircrew primary and advanced flight skills to Joint Terminal Attack Controller qualifications to culturally-attuned Combat Aviation Advisors. This consists of, among other things, access to appropriate ranges, airspace and the ability to operate off real Federal property to effectively replicate operational requirements. SOF is conducting engagements and building partner capacity in several countries with a wide-array of aviation platforms, many of which are not in the DOD inventory, which require our forces to continually expand and refine their knowledge and expertise of aviation platforms and their capabilities.

Question. What improvements are necessary, in your view, to enhance training for special operations personnel?

Answer. SOCOM must continue the reframing of the force from a primarily threat-focused approach to a population-centric approach. To achieve U.S. strategic objectives, we must continue to posture for and execute an approach based on population-centric engagement.

The continued use of technology has resulted in tangible tactical benefits to the force. For instance, SOCOM's acquisition of the latest Simulation-Based Training devices has provided an alternative or complementary method to conduct SOF training. This training uses virtual environments to augment or replace portions of the real environment, reducing risk to the participants and potentially reduce overall training costs. The use of these simulations at home stations will reduce the requirement to travel to train thus reducing time away from home and shortening training timelines.

Question. What are the most significant challenges in achieving effective training of special operations personnel?

Answer. Access to and availability of Service training areas and ranges in proximity to SOF home bases continue to be a challenge. While there are excellent joint training areas in CONUS, the resources required to access these areas and limited range scheduling availability create additional strain on training time, training budgets, and PERSTEMPO. Given SOF's normal OPTEMPO and un-forecasted mission requirements, SOF requires priority over General Purpose Forces at Service and joint training installations.

From a Presentation of the Force perspective, pre-mission and pre-deployment training with relevant Service-Provided Capabilities (SPCs) is critical. SOF utilizes SPCs to travel to and participate in training at various venues. Coordinating available transportation and training assets with non-prioritized scheduling is difficult and creates delays in training and inefficient use of training resources. The lack of available CONUS-based fixed and rotary/tilt wing platforms presents a significant challenge to train in the spectrum of SOF required capabilities.

Question. What, if any, training benefits accrue to U.S. Special Operations Forces from training foreign military personnel?

Answer. SOF conducting training in regional synchronization, intelligence sharing, planning and coordination for counterterrorism related operations are invaluable tools for improving the language and cultural expertise of U.S. Special Operations Forces while providing opportunities to practice skills needed to conduct a variety of missions, including foreign internal defense, unconventional warfare, and counterterrorism. The training of foreign military forces also facilitates more persistent and enduring engagement with partner nation security forces building relationships, trust and interoperability with our global SOF partners.

Question. To what extent, in your view, is it appropriate for the United States to rely upon contractors for training foreign military personnel? What do you see as the primary risks and advantages in such contractor training?

Answer. Training of foreign forces, as a general rule, must be conducted as a part of the Department of State title 22 funded Security Assistance or Security Cooperation programs. SOF support to these programs usually does not include the use of contracted personnel. The use of contractors in many cases may make sense from a cost perspective, as well as relieving military assets from these tasks. The risk to SOF in using contracted personnel is the possible disclosure of tactics, techniques, and procedures (TTP) which SOF has developed based on our battlefield successes. SOF reviews contracts for training to foreign forces to ensure TTPs are protected from disclosure. The problem is trying to monitor contracted training that is being done by other countries for foreign forces. Frequently, former U.S. Military personnel accept employment with one of 46 foreign companies that conduct SOF training. It is very difficult to monitor disclosure in these cases. Contractors are not a SOF substitute. They should only be used in a support role such as logistics and administration. Contractors operating separate or leading the training of foreign forces may not represent SOF in the best light and cannot represent the U.S. Government. The advantages are they free up SOF from routine logistical and admin

support functions and allow them to concentrate on operational mission accomplishments.

DIVERSITY IN SOCOM

Question. How do you define diversity in SOCOM?

Answer. SOCOM's definition of diversity includes the traditional categories of minority representation and more. The ability to speak foreign languages, blend into foreign environments, and understand the local cultures of our operating regions are invaluable skills which creates a broader, operation-specific diversity in SOCOM.

Question. Do you believe that achieving greater diversity in SOCOM is a priority?

Answer. Diversity is absolutely a priority for SOCOM and for subordinate SOF units. Having people on the team from diverse backgrounds only makes the team as a whole stronger. Specifically, diversity is operationally necessary for SOF as SOF engagements continue to expand across populations with different cultural nuances. SOF success is impacted by our ability to assess and adapt on multiple fronts, and benefit from those that possess a broad range of skills and backgrounds.

Question. If confirmed, what steps would you take to ensure that continued progress toward diversity goals is achieved without violating reverse discrimination principles of law?

Answer. If confirmed, I will work with my component commanders, Senior DOD leadership and the Services to identify future operational requirements and support diversity marketing, awareness, and outreach to meet those operational requirements. In addition, senior SOCOM leaders are putting a focus on increasing cultural and ethnic diversity.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. What is your assessment of current sexual assault prevention and response policies and procedures in SOCOM?

Answer. The Military Services have primary responsibility to ensure sexual assault response personnel (Sexual Assault Response Coordinators, Victim Advocates, medical and mental health providers, and criminal investigation personnel) are well-trained to support victims and investigate and respond to allegations of sexual assault. If resources are not readily available where the alleged incident occurred, victims are transported to a facility where there is appropriate victim advocate support, medical and psychological care (regardless of Service), and investigative/legal support.

The Joint Staff remains a key partner with the Services and OSD in the campaign against sexual assault. Additionally, the Joint Staff works closely with the combatant commands during the development of operational plans and personnel policy guidance to ensure the prevention and response to incidents of sexual assault is addressed.

Prevention of sexual assault is a leadership responsibility. Commanders at all levels must remain committed to eliminating sexual assault within our forces by sustaining robust prevention and response policies; by providing thorough and effective training to all assigned service members, by identifying and eliminating barriers to reporting; and by ensuring care is available and accessible.

Question. Do you consider current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. Yes. For a multitude of reasons, sexual assault has historically been an under-reported crime. Restricted reporting has been effective. Although the use of restricted, or confidential, reporting doesn't allow law enforcement to investigate alleged assaults, it does allow a sexual assault victim to confidentially receive medical treatment and counseling without triggering the official investigation process.

Unrestricted reporting supports a sexual assault victim who desires medical treatment and counseling—but also provides for official investigation of his or her allegations by law enforcement with the support of the victim's chain of command or Sexual Assault Response Coordinator (SARC).

As our military members' confidence in the reporting and investigative policies and procedures improve as well as the implementation of the victim's attorney programs (i.e., the Air Force Special Victim's Counsel) over the past 18 months, I believe and certainly hope that increasing progress is being made in the effort to increase unrestricted reports and victim cooperation during investigations/prosecutions. This will ultimately increase offender accountability.

Question. What is your view of the adequacy of the training and resources SOCOM has in place to investigate and respond to allegations of sexual assault?

Answer. The Services are responsible for training sexual assault response personnel to ensure they are well-trained to investigate and respond to allegations of

sexual assault. The services have been trying to increase the number of Victim Advocates to support special operators who are deployed to more remote locations. Improved training for investigators is also a priority and this includes investigative resources in deployed areas. As you may imagine, deployed operations and the combat environment are very dynamic and investigative resources are often strained by other mission requirements. Remoteness of locations, availability of transportation, or the level of ongoing operations may complicate access to resources. I believe the DOD training network in place now prepares investigators to handle sexual assault cases in a caring, responsive, and professional manner. Our ability to respond and support victims is critical.

ASSIGNMENT POLICIES FOR WOMEN IN THE MILITARY

Question. In January 2013, the Department rescinded the policy restricting the assignment of women to certain units which have the primary mission of engaging in direct ground combat operations, and has given the Military Services until January 1, 2016, to open all positions currently closed to women, or to request an exception to policy to keep a position closed beyond that date, an exception that must be approved by the Chairman of the Joint Chiefs of Staff and the Secretary of Defense. The Services and SOCOM are working now to develop gender-free physical and mental standards for all military occupations, presumably with the goal of allowing individuals, regardless of gender, to serve in those positions if they can meet those standards.

If confirmed, will you ensure that the standards are realistic and preserve, or enhance, military readiness and mission capability?

Answer. Yes. Our success requires a highly qualified, talented and motivated special operations force. Our standards are a reflection of the challenges we face every day, on and off the battlefield, and are the hallmark of our organization. I view the process of developing and validating standards as an opportunity to ensure our standards are operationally relevant to current and future special operations.

Question. Do you believe that decisions to open positions should be based on bona fide military requirements? If so, what steps would you take to ensure that such decisions are made on this basis?

Answer. Our highest priority and most important responsibility is national security. We must remain uncompromising in this regard when making decisions on assignment of personnel to all positions and occupations. History shows diversity enhances capability and will continue to be an integral part of SOF as we face future challenges. The standards validation process will ensure our forces are properly selected and trained to meet the demands for specific occupations and military requirements.

Question. Do you anticipate SOCOM or its components will need to recommend to a parent Service that the Service seek an exception to the policy to keep any of its units or occupations all male?

Answer. The recommendation for exceptions to policy, in coordination with the recommendations of the Services, will be informed by the validation of occupational standards and SOCOM's studies of morale, cohesion, and unit readiness. These efforts are ongoing. Without these results, it is premature to anticipate exceptions to policy.

LANGUAGE AND CULTURAL AWARENESS CAPABILITIES

Question. Deployed special operations personnel remain heavily concentrated in the Central Command area of operations, including many who have been deployed outside of their regional area of expertise.

Are you concerned that the language and cultural skills among Special Operations Forces are being degraded because of repeated deployments outside their regional area of expertise?

Answer. While this remains a concern in the near term, the number of operators being deployed outside their regional area of expertise is decreasing and more of our language and cultural awareness training has been committed to improving our global capabilities. Despite repeated deployments to the Central Command area of operations, SOCOM's gross language capacity and capability are higher than they have ever been in the past 10 years. However, we need to finish rebalancing specific language densities by operational unit to better serve all geographic combatant commands. Additionally, based on our assessment of the global operational environment, we must maintain our efforts to improve in language capabilities needed to develop our foreign partners.

Question. If so and if confirmed, what, if anything, would you do to ensure these unique skills are adequately maintained?

Answer. Effectively enabling our foreign partners and allies to address internal threats mandates that SOCOM training, mentoring, and coordination efforts are directed at planning, intelligence, and other topics well beyond the simple mechanics of teaching rifle marksmanship. This means we must increase our intermediate and higher level capacities. To address this, we will continue our partnership with the Department and the Services on related issues and increase efforts within the Service SOF components. SOCOM works closely with the Department and the Services to optimize and increase diversity recruiting efforts, such as the MAVNI pilot program which brings advanced language and cultural capability into SOF and SOF enabler specialties at low or no cost. We also count on the Services for testing capacity and incentive pays. Both are necessary components of our overall language program.

Rebalancing our language capabilities and continuing to develop the necessary higher proficiencies means strengthening our Service SOF language and culture instruction programs, and monitoring them closely to ensure efficiencies without sacrificing critical capabilities. We will also work with the Service SOF components and Services to optimize career management that capitalizes on initial training and increases capability through work-related exposure.

SPECIAL OPERATIONS MISSIONS

Question. In recent years, Special Operations Forces have taken on an expanded role in a number of areas important to countering violent extremist organizations, including those related to information and military intelligence operations. Some have advocated significant changes to SOCOM's title 10 missions to make them better reflect the activities Special Operations Forces are carrying out around the world.

What current missions, if any, do you believe can and should be divested by SOCOM, and why?

Answer. SOCOM and SOF senior leaders are in a constant process of reviewing and prioritizing SOF core activities as outlined in DOD Directive 5100.01. This process encapsulates reviewing current directives and capabilities, as well as studying the ever-changing global environment in order to provide feedback to re-shape future directives. This process is reported in updates to the Directive and other key documents. SOCOM will continue to prepare SOF as directed.

Question. Are there any additional missions that you believe SOCOM should assume, and, if so, what are they and why do you advocate adding them?

Answer. SOCOM and SOF senior leaders are in a constant process of reviewing and prioritizing SOF core activities as outlined in DOD Directive 5100.01. This process encapsulates reviewing current directives and capabilities, as well as studying the ever-changing global environment in order to provide feedback to reshape future directives. This process is reported in updates to the Directive and other key documents. SOCOM will continue to prepare SOF as directed.

MILITARY INTELLIGENCE OPERATIONS

Question. In your view, how are intelligence operations carried out by special operations personnel different from those carried out by others in the Intelligence Community?

Answer. At the Tactical level intelligence support to SOF operations focuses on sustaining the Find, Fix, Finish, Exploit, Analyze intelligence cycle that has been tailored to meet the requirements of speed and flexibility associated with SOF operations. At the Operational and Strategic levels intelligence operations carried out by special operations personnel focus more on developing and incorporating tailored intelligence products to support SOF unique mission sets. SOF intelligence support is different than that provided by the rest of the Intelligence Community because it provides tailored intelligence analysis supporting Unconventional Warfare planning and operations, uniquely builds detailed diplomatic facility diagrams and models to support SOF NEO or threat based contingency planning, and produces focused analytical products in support of SOF persistent engagement activities with ethnic groups, tribes, or micro-populations, a mission set that is uniquely SOF in duration and focus.

Question. If confirmed, how would you ensure intelligence activities carried out by Special Operations Forces are coordinated adequately with other activities carried out by those in the Intelligence Community?

Answer. SOCOM will continue to follow all applicable Intelligence Community directives, will report required sensitive activities to the USD(I), and will maintain the robust intelligence oversight processes in place involving our Inspector General, Staff Judge Advocate, and our Command Oversight Review Board. I intend to main-

tain and build upon the relationships developed over time with the various Federal intelligence and law enforcement agencies represented in our Interagency Task Force in Tampa. Additionally, SOCOM will continue to employ and leverage our liaison officers, which we call Special Operations Support Team members, in order to coordinate with agencies in the NCR. Interagency collaboration is a significant contributing factor in many of our operational successes.

Question. What is your understanding and assessment of the authorities and agreements which are in place to allow U.S. military personnel to carry out missions under the authorities contained in title 50, U.S.C.?

Answer. Title 50 of the U.S.C., also known as the National Security Act of 1947 does not specifically grant to the Commander of SOCOM the authority to conduct intelligence operations. However, title 50 contains many of the Secretary of Defense's intelligence statutory authorities which provide the Secretary of Defense a basis to direct SOCOM assets to conduct operations or allow him to delegate authority to the Commander of SOCOM. The authorities are either broadly delegated such as Defense HUMINT Executor authority, or narrowly tasked through orders such as title 10 executive orders. Recognizing the need to fuse the military's need for tactical and strategic intelligence with the policy need for political and strategic intelligence, title 50 bifurcates the responsibilities for the intelligence function between Secretary of Defense and DNI.

SPECIAL OPERATIONS PERSONNEL IN EMBASSIES

Question. SOCOM deploys personnel to work with country teams in a number of priority countries where the United States is not engaged in direct action operations, but rather trying to stop the spread of violent extremism. Their mission is to support the priorities of the Ambassador and the geographic combatant commander's theater campaign plan against terrorist networks.

If confirmed, how would you seek to ensure the goals of special operations personnel deployed to these countries are aligned closely with those of the Ambassadors they are working with?

Answer. Essential to the success of the efforts you describe is absolute commitment to ensuring the goals of the Ambassador, the GCC and any deployed SOF are one in the same, at all times. I completely concur deployed SOF's mission is to support the priorities of the Ambassador and SOF does nothing without the express approval of the U.S. Ambassador/Chief of Mission to that country. In the case of section 1208 authority, we must gain written concurrence from the U.S. Chief of Mission prior to the application of that authority in support of our operations.

In certain countries, Special Operations Liaison Officers (SOLOs) provide additional coordination. SOLOs are SOCOM-sourced, U.S. SOF-qualified officers, placed under Chief of Mission authority as part of the Embassy Team, via an U.S. Ambassador (USAMB)-approved NSDD-38 agreement. These are permanent change of station assignments where the duties and responsibilities of the SOLO are derived from the USAMB's Integrated Country Strategy and consistent with the GCC's Theater Security Cooperation Plan. There are currently fourteen serving SOLOs (Australia, Brazil, Canada, Colombia, El Salvador, France, Israel, Italy, Jordan, Kenya, Poland, Peru, Turkey, United Kingdom). The program is funded for 40 positions by 2019 at locations based on GCC-identified requirements and USAMB concurrence via the NSDD-38 process.

Since 2007, the program has been highly successful in developing key SOF partners, preparing for future contingencies, and building mutually beneficial global relationships in support of U.S. Embassy, Geographic Combatant Command and Theater Special Operation Command engagement strategies. With a very small footprint, SOLOs enable U.S. Embassies to provide their host nation Special Operations Forces with a more efficient relationship with the U.S. interagency, GCCs, and SOCOM on SOF specific issues. Additionally, the existing network of SOLOs facilitates coordination between U.S. SOF leadership and strategic partner nation SOF globally.

Question. In your view, what is the value of these special operations personnel to their respective geographic combatant commands and the country teams they are supporting?

Answer. U.S. SOF brings unique capabilities to further U.S. policy, goals, and regional/country objectives. We do this in coordination with our interagency partners from across the U.S. Government, ensuring a synchronized whole-of-government approach. As such, U.S. SOF have become an integral part of every GCC TCP.

INFORMATION OPERATIONS

Question. The Government Accountability Office reports that DOD has “spent hundreds of millions of dollars each year” to support its information operations outreach activities. Many of these programs are in support of operations in Afghanistan, but Military Information Support Teams from SOCOM also deploy to U.S. embassies in countries of particular interest around the globe to bolster the efforts of the Department of State and the U.S. Agency for International Development. Further, the geographic combatant commands are increasingly moving into this operational space.

What are your views on DOD’s military information support operations and influence programs and their integration into overall U.S. foreign policy objectives?

Answer. Military Information Support Operations (MISO) are a key capability that DOD provides in support of U.S. foreign policy objectives. SOCOM provides MISO forces to geographic combatant commanders in support of specific military objectives within their assigned AORs. Given the breadth and depth of the information environment coupled with Violent Extremist Organizations’ unhindered access and use of it, we believe DOD must be engaged in this aspect of the fight.

SOCOM is aware of the varying roles and missions of other U.S. Government agencies in the information realm, and through close coordination and focused planning, have been successful in executing mutually supportive operations. MISO activities are closely coordinated with the Department of State and are complementary to and supportive of U.S. foreign policy objectives, but do not address U.S. foreign policy directly. DOD maintains unique capabilities to reach audiences in denied areas and to disseminate information in ways that support not only our military objectives, but contribute to U.S. Government communication and engagement strategies.

The fiscal constraints of conducting large scale, DOD operations across the globe, combined with the rapidly evolving information environment, make small MISO teams a vital capability in achieving national security objectives.

Question. What is the role of DOD versus the Intelligence Community and the State Department?

Answer. DOD MISO teams provide unique capabilities which can support the entire U.S. Government information and influence efforts worldwide. They continue to be one of the most deployed SOF capabilities. An important process in developing MISO influence messaging is understanding the operational environment and the audiences’ perspective. MISO teams maintain awareness of the information environment by identifying current trends in local and regional media reporting, identifying hostile messaging, and measuring local populace reaction. DOD works in a concerted effort with the Intelligence Community and the State Department in a whole-of-government approach to achieve national security objectives.

Question. How do you believe the success of these programs should be measured, especially in light of the constrained budget environment?

Answer. Evaluating the success of MISO programs requires time and access in order to collect, process, analyze, and understand the changes in attitudes, perceptions and behavior. The efficient and appropriate evaluation of MISO programs relies on the integration and consideration of assessment early in the planning process and throughout the program’s execution. It requires strategic patience in order to give influence programs time to show effects.

CIVIL AFFAIRS OPERATIONS

Question. Civil affairs activities carried out by U.S. Special Operations Forces in partnership with host nation personnel play an important role in developing infrastructure, supporting good governance and civil societies, and providing humanitarian assistance, including medical and veterinary services to needy populations.

In your view, does SOCOM have sufficient personnel and resources to conduct the range of civil affairs missions required for today’s operations?

Answer. The demand for civil affairs teams continues to increase, even as they are one of the most deployed DOD capabilities. Even with the drawdown in Afghanistan, the GCC and Embassies demand for civil affairs doubles that of our current and expected capacity. As highlighted in an earlier response, our civil affairs growth programed in the 2006 and 2010 QDRs were halted as a result of the BCA and BBA. This has resulted in a prioritization of allocation and assumption of risk to support the increasing demands of the GCCs.

Question. If confirmed, how would you ensure Civil Affairs activities by special operations personnel are integrated into larger U.S. Government efforts?

Answer. SOCOM Civil Affairs activities are deeply integrated into the planning and operations conducted within Embassy country teams. We are currently embed-

ded in country teams at over 25 embassies across the globe, supporting the Chief of Mission in achieving specific effects within their country strategy.

Question. If confirmed, how would you ensure Civil Affairs and Military Information Support Operations are adequately coordinated to achieve a maximum impact?

Answer. The key to achieving maximum impact is a fully integrated and collaborative environment. Maintaining the ability to forward deploy both our CA and MISO capabilities, as well as others, in the same location within the TSOC or U.S. Embassy is critical to ensuring proper planning, coordination, de-confliction and execution in support of GCC and CoM objectives and strategies.

CAPABILITIES OF SPECIAL OPERATIONS FORCES AND GENERAL PURPOSE FORCES

Question. What is your assessment of the mix of responsibilities assigned to general purpose and Special Operations Forces, particularly with respect to security force assistance and building partner military capabilities?

Answer. Both Special Operations Forces (SOF) and General Purpose Forces (GPF) are capable and have supported these missions most recently in Iraq and Afghanistan. Many GPF like SOF have units that are now regionally focused and have a thorough understanding of the culture and are able to build relationships with the partner nations military. SOF are best utilized in areas which are politically sensitive environments and where a large U.S. presence or a sizeable force is unacceptable to a host country government. While GPF are best suited for delivering GPF capabilities to foreign military forces in environments where U.S. presence is acceptable to the host-country government and where large-scale U.S. presence is considered necessary and acceptable by the host-country government.

Question. Are there certain mission areas that should be reserved for Special Operations Forces only?

Answer. Missions involving the title 10 SOF Core Activities include: Direct Action, Special Reconnaissance, and Unconventional Warfare. These missions are highly specialized requiring extensive mental and physical training and a high degree of risk that the personnel conducting these missions accept. However, other agencies in the U.S. Government are also specialized in some of these missions particularly, Counterterrorism and Counter Proliferation of Weapons of Mass Destruction. SOF needs to partner closely with them in the conduct of these operations. Additionally, SOF is best suited for politically sensitive environments, where an overt large U.S. presence is unacceptable to the host nation's government, and to denied environments.

SPECIAL OPERATIONS ENABLING CAPABILITIES

Question. While SOCOM maintains organic enabling capabilities to support short duration missions, most special operations missions require enabling capabilities provided by the Services to be successful.

In your view, how should the responsibility for providing enabling capabilities for special operations missions be divided between SOCOM and the Services?

Answer. SOCOM and its components have limited enabling capabilities, especially in the Combat Support (CS) and Combat Service Support (CSS) organizations in our component force structure. This was by design. Our CS/CSS force structure is dedicated to providing direct support to our Special Operations Forces, primarily for short duration missions, often in remote austere locations supporting small unit operations distributed over large distances in the battle space. We rely upon the theater combatant commands and their Service components to provide SOF the theater level support for persistent SOF enabler requirements. That is precisely why we reiterate the importance of the fifth SOF Truth—"Most Special Operations require non-SOF support. When SOCOM was established by title 10, U.S.C., section 167, there was never the intent by Congress for SOCOM to fully replicate the enabler support provided by the Services and other strategic partners. In joint doctrine, common user logistics support was intended as a core responsibility of the Services.

SOCOM and the Services must work in concert, sharing responsibility for providing CS and CSS enabling capabilities for SOF missions. SOCOM's responsibility is to continue providing end strength for these conventional forces that serve as organic SOF enablers. SOCOM is also responsible to support the GCCs, via the TSOCs, in synchronizing demand signals to the Services in order to get these enablers for SOF missions. Based on these inputs Services can continue to recruit and train these crucial enablers in quantities sufficient to cover requirements for SOF and the Services. Because SOF relies on the Services for Combat Service Support, any lack of these enabling capabilities significantly limits SOF's ability to sustain operations.

Question. In light of current budget pressures, do you believe SOCOM and the Services are maintaining adequate enabling capabilities to support special operations missions?

Answer. SOCOM is maintaining adequate organic capabilities to provide direct support to special operations missions. However, I am concerned that with the significant budget constraints and drawdowns that are being imposed upon the Services in their manpower, equipment, readiness accounts which is degrading the enabling capabilities that they can provide to SOCOM. These degradations of enabler capabilities provided to SOCOM by the Services to conduct operations in support of the geographic combatant commanders represent high risk to support persistent distributed SOF operations in remote austere locations against increasingly sophisticated enemy networks and terrorist organizations.

Question. What enabling capabilities are in short supply or at greatest risk with current budget constraints?

Answer. Shortages of enabling capabilities for SOF are often similar to shortages in the rest of the deployed force. SOF faces challenges in ISR, C4I, theater-level logistics forces, intra-theater airlift, medical, combat engineering support to GCCs, operational contracting support (OCS). SOF manning shortages exist in many of our own critical skills and key enablers.

These manning shortages would be exacerbated by a slowdown or reduction in Service provided training due to budget constraints. SOF also relies on Service provided enablers for both initial and currency training (such as fixed wing close air support for Joint Terminal Attack Controllers) as well as forward deployed operations (such as Base Operating Support). These types of enablers are essential for SOF to perform their global missions with a ready and well trained force. SOCOM must continue to work with the Services in assessing future demand and adjusting programmed force structure.

RENDER SAFE PROFICIENCY

Question. The proliferation of weapons of mass destruction is a growing and especially concerning threat to our Nation. Select special operations units are assigned the task of interdicting and rendering-safe weapons of mass destruction should they ever fall into the wrong hands.

If confirmed, how would you ensure render-safe capabilities are adequately maintained by special operations units who may currently be heavily engaged in offensive kill/capture missions against high value targets in Afghanistan and elsewhere?

Answer. Currently, our capabilities are adequately maintained by special operations units. I will continue to use the current training and exercise programs in place. Special operations units participate in the Joint Operational Readiness and Training (JORTS) Cycle that incorporates worldwide deployments, individual training, collective training, and joint exercises (and evaluations) year round.

Question. Do you believe additional render-safe capabilities are needed within SOCOM?

Answer. Yes, but allow me to qualify that answer. As I stated before—our capabilities, training, and exercises are on track. We are abreast of the latest's threats. However we cannot rest. We must stay in front of the evolving threat through our research and development (R&D) programs. I am grateful for what we have, but as with any program, we are limited by funding. Increased funding for our R&D programs could potentially enhance our current capabilities within SOCOM.

SUPPORTED COMBATANT COMMAND

Question. Under certain circumstances and subject to direction by the President or Secretary of Defense, SOCOM may operate as a supported combatant command.

In your view, under what circumstances should SOCOM conduct operations as a supported combatant command?

Answer. In my opinion, the opportunity for SOCOM to conduct operations as a supported combatant command is limited to commitment of the National Mission Force. I do not anticipate circumstances where SOCOM would conduct operations as a supported combatant command outside of CONUS vice transferring operational control of Special Operations Forces to respective GCC commanders for execution.

Question. In your view, what resource, organization, and force structure changes, if any, are required in order for SOCOM to more effectively conduct both supporting and supported combatant command responsibilities?

Answer. As a supporting combatant commander, SOCOM recently received COCOM of the TSOCs. This organizational change has allowed SOCOM to better support GCC requirements. SOCOM as a Joint Force Provider will continue to orga-

nize, train and equip Special Operations Forces to the highest level in this supporting role.

INTERAGENCY COLLABORATION

Question. The collaboration between U.S. Special Operations Forces, general purpose forces, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan, Iraq, and elsewhere?

Answer. The requirement to have an interagency approach is well understood. We have learned that combating terrorism requires capabilities and expertise beyond those of any single agency. We should continue to integrate the elements of national power by leveraging each agency's core competencies. This requires knowing each agency's culture, method of operation and strength. Another critical lesson is to provide the right number, seniority, and skill sets of personnel from the various agencies. The common denominator is knowledge across the interagency.

Our ability to rapidly share information and intelligence in order to fully "see" our adversaries and subsequently, to take action against them with the most appropriate capabilities within the U.S. Government, is an important lesson learned from Afghanistan.

Additionally, we must ensure that we maintain strong relationships with operational and ministerial leaders following the conclusion of combat operations. Continued TAA efforts aimed at senior leaders across the IA will ensure the progress made endures.

We have learned a great deal over the last decade about the strength of collaboration. The organizational innovation of forming small task forces of subject matter experts from across the military, government, and partner nations allowed SOF in Iraq, Afghanistan and elsewhere to synchronize efforts with an efficient agility. These task forces all follow three simple principles: the practice of flattened, agile communications, extensive senior leader involvement across the U.S. Government and allies, and the leveraging of information dominance provided by these subject matter experts and their systems. These principles are our most important lessons learned.

Question. How do you believe these efforts can be improved?

Answer. The continued exchange of personnel across agencies, departments and services to build trust and interoperability before a crisis happens is critical to maintaining the cultural of cooperation across the U.S. Government which has formed in the war zones over the last decade. We can improve doctrine based on lessons learned from our experiences in Iraq and Afghanistan, continue to emphasize education across all government departments and agencies, continue to work toward a flatter, more agile communications enterprise, and extend senior leader involvement across the U.S. Government and allies. It is crucial that the right people are in place to achieve effective unity of effort to achieve the desired end state.

Question. Should these informal and ad hoc arrangements be made more formal (i.e. through legislation, DOD Directives or Instructions, etc . . .) or is their ad hoc nature the reason for their success?

There would be benefit to formalizing some aspects of these arrangements in order to prevent the loss of the cooperation that has grown out of necessity in the crucible of conflict. We must ensure that our personnel systems and agency/service/department cultures reward, not discourage (either formally or informally), cooperation and the assignments that support it. We should continue to develop a more formal full-time interagency arrangement to achieve greater coordination and integration of diverse policies during an operational deployment. The challenge is to ensure that any formalization retains enough flexibility to adjust to the nature of the crisis or challenge.

SOCOM continues to seek ways and means for increasing success in interventions through more formal interagency collaboration mechanisms. As part of that effort, SOCOM's Special Operations Support Teams work directly with and in our interagency partners, greatly facilitating intelligence sharing, operations, decision making and keeping lines of communication open. Our Interagency partners in turn have sent their LNOs to SOF organizations at the strategic and operational levels.

We're on the right track with doctrinal publications such as Joint Pub 3-08, "Interagency, Intergovernmental Organization, and Nongovernmental Organization Coordination During Joint Operations." Capturing the best practices of these horizontal interagency teams in future editions is critical.

Question. Interagency collaboration on an operational or tactical level tends to address issues on a country-by-country basis rather than on a regional basis (e.g. international terrorists departing Mali for safe havens in Libya).

How do you believe regional strategies that link efforts in individual countries can best be coordinated in the interagency arena?

Answer. SOCOM maintains persistent engagement and collaboration with individual Country Teams through the TSOCs and through the SOCOM Special Operations Liaison Officers which are placed under Chief of Mission authority as part of the Country Team via the NSDD-38.

In addition, the Department of Defense authorized the establishment of the SOCOM Interagency Partnership Program (IAPP) in 2006, which placed liaison teams known as Special Operations Support Teams (SOSTs) within Interagency headquarters to provide the strategic linkages necessary to ensure collaboration on regional and functional strategies within our partner Agencies and Departments. This program continues to allow SOCOM to provide senior experienced SOF personnel to our Interagency partners and provides linkages from the Strategic Level in Washington DC, to the Operational Level in conjunction with the TSOCs and their relationships with the Country Teams, to the tactical level through the various forward commands and Task Forces. The IAPP has been instrumental in flattening coordination among our SOSTs, our Interagency partners' headquarters and regional or functional divisions within those headquarters, and our operational and tactical level special operations headquarters and personnel.

DETAINEE TREATMENT POLICY

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes. Common Article 3, found in each of the four Geneva Conventions of 1949, provides a baseline of humanitarian principles that are to be applied in all armed conflicts, no matter how they might be described or characterized. I support the Deputy Secretary of Defense 2006 memorandum directing U.S. forces to adhere to the principles of Common Article 3.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. If confirmed, would you ensure that Special Operations Forces comply with the standards in the Army Field Manual, the DOD Directive, and applicable requirements of U.S. and international law regarding detention and interrogation operations?

Answer. Yes. I fully support these standards and will ensure that our publications and training reflect these standards. I will also ensure that operational plans and orders, and the execution of those plans and orders, are consistent with these standards. I will hold those who fail to follow the standard accountable for their actions. Prompt investigations into allegations of abuse and swift action are keys to ensuring strict compliance.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen or marines are treated, should they be captured in future conflicts?

Answer. Humane treatment of detainees is the right thing to do legally, morally, and ethically. We should endeavor to treat enemy personnel in our custody in a manner that we would want our own U.S. forces to be treated. Reciprocity may be interpreted as justification to condone abuse if U.S. detainees are being abused. I do not agree that enemy abuse of U.S. detainees dictates like treatment on our part. I do believe that if my forces provide humane treatment to those in our custody, there is a greater likelihood that our forces in the custody of our enemy may enjoy some greater degree of humane treatment as a result.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Commander of SOCOM?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JEANNE SHAHEEN

U.S. SPECIAL OPERATIONS COMMAND

1. Senator SHAHEEN. Lieutenant General Votel, you indicated in your testimony the possibility of sharing a portion of U.S. Special Operation Command's (SOCOM) traditional training missions with the general purpose forces, which could be a way to reduce demand on our Special Operations Forces (SOF). Would you please elaborate on that issue?

General VOTEL. I believe there are opportunities where SOF and general purpose forces (GPF) can work together on an engagement event with a host nation. In some select cases, trained and prepared GPF could be used in lieu of SOF for a given event to train foreign forces basic skill sets.

The two primary events that SOF engages with foreign forces are Counter Narcoterrorism (CNT) events and Joint Combined Exchange Training (JCET) events.

The purpose of CNT events is to focus on building the capacity of a foreign force. In these events, it is possible that some of the more basic skill sets (basic marksmanship, explosive ordnance disposal, medical, communications, et cetera) could be conducted by or augmented with GPF. A SOF unit augmented with a basic rifle platoon or squad could easily run a medium-size shooting range for partner nation training. The potential downside to this scenario is that GPF are not accustomed to deploying in the same way as SOF. By this I mean that GPF generally rely on base-like infrastructure (billeting, messing, transportation, etc.) being provided by a Service or Executive Agent. SOF, on the other hand, normally locally procure all required support. This is not to say that GPF are incapable of living on a minimal U.S. footprint, it is just not their normal deployment method.

The purpose of the JCET is to allow the SOF operators to hone their skills working in another country. Although the host nation usually benefits from the training provided by the SOF unit, the real value of the JCET is not necessarily the actual Program of Instruction (POI) being taught.

The SOF unit gains valuable training in language, cultural relationships, movement into and around a foreign country, interaction with an embassy, negotiating contracts for logistics support, medical screening, biometrics, remote communications, force protection, and many other skills. Even if GPF are available to augment SOF for actually teaching a POI, it is important to retain these training benefits for SOF. Additionally, the number of skillsets that are common to both SOF and GPF are somewhat limited. For example, SOF train foreign countries on fast-roping, small unit tactics, military operations urban terrain, et cetera. Not all GPF units train to these skills. There are some common areas such as marksmanship, military decisionmaking process, combat casualty care, jumpmaster, static line, engineering, demolition, and lifesaving that could be shared between SOF and GPF.

With the new section 1203 authority, GPF will be able to train foreign forces alongside SOF who are training under JCET authorities.

2. Senator SHAHEEN. Lieutenant General Votel, is there a process in place for SOCOM to coordinate with the general purpose forces to reduce duplication and maximize efficiency?

General VOTEL. Yes. The Joint Staff Global Force Management process prevents duplicative force sourcing by separating general purpose forces and Special Operations Force requirements submitted by combatant commands. This ensures that SOCOM is tasked to support only Special Operations peculiar requirements. Likewise, the Services are not tasked to provide Special Operations peculiar capabilities.

Regarding maximizing efficiency, SOCOM is currently refining the SOF Operational Requirements Consolidation Process that includes Service representation, which provides a forum to explore operational efficiencies. Additionally, SOCOM conducts recurring warfighter talks with each of the Services. During these talks, the executive-level staffs explore common initiatives and areas to collaborate in order to maximize efficiencies.

3. Senator SHAHEEN. Lieutenant General Votel, will the Army's Regionally Aligned Forces initiative provide additional opportunities for collaboration?

General VOTEL. Yes. Having regionally aligned forces will result in GPF Army soldiers receiving language and cultural training for the region where they deploy. In general, the SOF units will focus on those mission areas they are uniquely trained to address while the GPF will focus on their own skills. Augmentation of GPF into traditional SOF engagements would naturally result in a better product using a regionally aligned GPF soldier.

MIDDLE EAST

4. Senator SHAHEEN. Lieutenant General Votel, you mentioned in your testimony that there are risks associated with stepping aside and allowing Sunni and Shiite groups to continue to engage each other in armed conflict, particularly in Iraq and Syria. Would you please describe those risks in more detail?

General VOTEL. First, the conflict between these groups, particularly if it escalates or expands, threatens to destabilize the entire region, and with it the economies of our allies and partners in the region and their ability to manage the conflict. The effects on long-term regional stability cannot be overstated, and conflict that deepens to such a degree will undermine the ability of our allies and partners to adequately address the pervasiveness of violent extremists and their well-orchestrated efforts to delegitimize their governments. In the interconnected world in which we live, this will radiate through our economy and those of our closest trading partners.

Second, the conflict is attracting large numbers of foreign fighters. The unabated infusion of foreigners into particularly Syria and Iraq threatens to expand and escalate the conflict. The character of this conflict is such that it leverages networks of associated groups and recruiters and the passions of what is a growing youth bulge in the Middle East, most of whose future job prospects is not promising. Many foreign fighters do not fight per se, often serving in supporting roles that translate well to fueling growing instability at home upon their return (financial, communication, recruiting, et cetera). The foreign fighter networks weave a web over the entire globe, potentially bringing the fight and direct national security threats to the many nations they touch.

Finally, the spread of the conflict into Iraq and with it more direct involvement by Iran and the potential counter involvement by Persian Gulf states is a reminder that the conflict is essentially co-located with much of the world's supply of petroleum. Any compromise of the ability to ensure the flow of petroleum, which is the lifeblood of the global economy, threatens the prosperity of the United States, its allies, and trading partners, all of whom, regardless of rivalries, share a common interest in stability and economic growth. Among the markets, the mere perception that the production or transportation of petroleum is threatened is enough to send the price of a barrel sky-high, which will further aggravate instability and empower petroleum suppliers like Russia. Even though the United States has reduced its dependency on petroleum from the Persian Gulf, the interconnected nature of the world means that the impact of skyrocketing prices would be felt globally and substantially delay any return to a more durable stability in the region and a more robust U.S. economy.

However, I would be remiss if I did not emphasize that there are risks regardless of what we do. Yes, stepping aside puts at risk our allies and partners and very real humanitarian concerns.

However, there is a risk, for example, in taking sides in what is a delicate political situation, one that is rife with miscalculation. While Syria and Iraq may have formerly been recognized as “states,” we must acknowledge that each of their “governments” is now a representative of a particular sect, the unabashed support of which will be perceived, right or wrong, as taking a side. This, in turn, may very well prohibitively strain relationships with our key regional partners like Saudi Arabia and potentially upend the balance of U.S. relationships in the Middle East.

5. Senator SHAHEEN. Lieutenant General Votel, what direct U.S. national interests are at stake?

General VOTEL. Prime among our national interests is security. Our National Security Strategy retains the goals to disrupt, dismantle, and defeat violent extremists around the world, and advance peace and security in the Middle East. While the wars in Iraq and Syria do not pose an immediate existential threat to the United States, an expanding conflict has the potential to threaten Israel, Jordan, and other American allies in the region—including such countries as Bahrain and Kuwait where we have a forward presence. Also threatened are countries like Jordan, Kuwait, Saudi Arabia, Lebanon and the United Arab Emirates where we have on-going training agreements.

We have a vested interest in preserving the global economic system. Iraq’s stability and prosperity are not casually linked to American economic interests. As the United States continues to move toward “energy independence,” we are nonetheless impacted by global oil prices whether sourced from the Gulf of Mexico, Saudi Arabia or Iraq. Two years ago, Iraq was projected to reach in excess of 6 million barrels of oil per day by 2017—potentially \$5 trillion in revenue by 2035. Significant disruptions of current production would likely impact world energy prices and be felt in our own struggling economic recovery.

As the President and Secretary have stated, our strategic interests are to prevent the Islamic State of Iraq and the Levant or al Qaeda-related groups from attacking the Homeland and our national interests in the region, to protect the free flow of commerce, and preserving the security and stability of our key partners and allies in the region.

6. Senator SHAHEEN. Lieutenant General Votel, how would it affect our partners in the region?

General VOTEL. If the armed conflict in Iraq and Syria continues, it will significantly impact our partners and could destabilize the entire region. First and foremost, our partners could question our reliability, respect, and commitment to their security, stability and prosperity as a sovereign nations and key partners. Second, if the conflict continues, it will only embolden the actors of concern to expand their activity into several of our key partners’ sovereign territory. Our partners are not immune to the same social pressures that drove the “Arab Spring”. These states have been able to buy down risk to date, and while certainly not “fragile states,” they are probably best thought of as “brittle states”. While apparently stable, they lack the inherent resilience to resist an emboldened insurgency, thus potentially compelling our involvement. Finally, our partners’ interests may force their direct participation in the current conflict. This would significantly expand the scale and scope of the conflict, increasing the risks to our national security interests.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

PRESERVATION OF THE FORCE AND FAMILIES

7. Senator CHAMBLISS. Lieutenant General Votel, while the war draws down in Afghanistan, the SOF mission continues with SOF personnel and their families enduring operational tempos and unpredictability at unprecedented levels. SOCOM established the Preservation of the Force and Families (POTFF) Task Force to ensure its personnel have the resources available to deal with the physical, spiritual, mental, and social stresses associated with their unique service. Of course, that type of assistance for the servicemember also assists the family as a whole, but programs aimed directly at the families are limited because of legal restrictions on what SOCOM can spend money on. What, if anything, is SOCOM doing to expand access to programs for the families of SOF personnel, and is additional action required by Congress to further said access?

General VOTEL. SOCOM has taken several steps to improve access and availability of programs to our families. One of the major benefits of implementing the POTFF initiative has been the increase in awareness and collaboration SOCOM has

had with Service and Department family readiness agencies. These relationships have helped the command to identify and access existing programs and resources for our families.

Where the command's requirements cannot be met by existing Service or the Department of Defense (DOD) sponsored programs, there is still a substantial need to support our SOF forces and their families within legal authority and funding limitations. SOCOM needs the support of Congress to grant or continue to grant the authorities and funding required to maximize the readiness of our SOF members and their families (physical, psychological, and spiritual). SOCOM currently has the authority and funding to conduct family pilot programs through fiscal year 2016 and is grateful for this authority, which provides the means to assess our ability to support SOF families and be responsive to their needs. SOCOM strongly urges continued and expanded support in terms of authorities and funding to support SOF members and their families.

The Commander of SOCOM has an explicit responsibility to ensure the readiness of the Special Operations Forces. This definition of readiness does not currently include family members outside of the initial pilot program authorized by Congress. Given SOCOM's current statutory authorities, the command is limited in its ability to support family members when the need arises. Explicit authority that permits the Commander of SOCOM to support assigned families through services and programs funded with MFP-11 resources would benefit the readiness of the SOF community to meet its demands.

8. Senator CHAMBLISS. Lieutenant General Votel, how would you assess the effectiveness of the POTFF program?

General VOTEL. Early indications suggest that SOCOM's POTFF initiatives are having a positive impact on the readiness of SOF forces. Over the past year, the command saw a 5 percent increase in behavioral health treatment compared to the previous year. At the same time, reported symptoms of post-traumatic stress, depression and alcohol abuse declined, while scores on measures of resilience and marital satisfaction improved. The human performance aspect of the program also shows evidence of having a positive impact on the health of the special operator and the time needed to rehabilitate operators following injury has been reduced. We found that Human Performance Program participation is also associated with improved mental well-being.

As our assessment programs mature, we look forward to sharing our impacts with this committee in the future.

9. Senator CHAMBLISS. Lieutenant General Votel, how are initiatives under this program integrated with family support programs already provided by the Services?

General VOTEL. The POTFF team works very closely with their DOD and Service counterparts to promote existing programs and, where necessary, to develop activities to meet the special needs of the SOCOM community. Some of these activities are being tested under several of the family pilot programs currently being developed under the authority granted in the National Defense Authorization Act 2014, section 554. Many of these are supported by DOD in the form of planning and assessment assistance. Where there is the capacity for DOD or the Services to support the command, they do so without fail. For instance, this year's DOD sponsored parent-child camps for members of the SOF community at Fort Campbell, KY, and the expanded Military Family Life Consultant program for SOF units throughout the enterprise. In all instances, the command's family programs are coordinated with the Services and DOD prior to approval.

[The nomination reference of LTG Joseph L. Votel, USA, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 16, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the U.S. Army to the grade indicated while assigned to a position of importance and responsibility under Title 10, U.S.C., section 601:

To be General

LTG Joseph L. Votel, 0000.

[The biographical sketch of LTG Joseph L. Votel, USA, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LTG JOSEPH L. VOTEL, USA

Source of commissioned service: USMA.*Educational degrees:*

U.S. Military Academy - BS - No Major
 U.S. Army Command and General Staff College - MMAS - Military Science
 U.S. Army War College - MSST - National Security Studies

Military schools attended:

Infantry Officer Basic and Advanced Courses
 U.S. Army Command and General Staff College
 U.S. Army War College

Foreign languages:

French.

Promotions:

Promotions	Dates of appointment

 Army Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by LTG Joseph L. Votel, USA, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Joseph L. Votel.

2. **Position to which nominated:**

Commander, U.S. Special Operations Command.

3. **Date of nomination:**

June 16, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

February 14, 1958; Saint Paul, MN.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Michele Marie Votel (Maiden Name: Belair).

7. **Names and ages of children:**

Scott Joseph Votel; age 32.

Nicholas Patrick Votel; age 28.

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

I have held no advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

I have held no positions as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member of the Association of the U.S. Army (AUSA)

Member of the 75th Ranger Regiment Association

Member of the 82d Airborne Division Association

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

St. Maurice Medal from the National Infantryman's Association

St. Barbara Medal from the Artillery Association

William G. Knowlton Award from the Military Intelligence Association
 Honorary Medal from the Army Engineer Association
 Honorary Medal from the Ordnance Association
 Honorary Medal from the Army Aviation Association

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

I agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

I agree, when asked before any duly constituted committee of Congress, to give my personal views, even if those views differ from the administration in power.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JOSEPH L. VOTEL.

This 20th day of December, 2013.

[The nomination of LTG Joseph L. Votel, USA, was reported to the Senate by Chairman Levin on July 22, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 23, 2014.]

**NOMINATION OF GEN. JOSEPH F. DUNFORD,
JR., USMC, FOR REAPPOINTMENT TO THE
GRADE OF GENERAL AND TO BE COM-
MANDANT OF THE MARINE CORPS.**

THURSDAY, JULY 17, 2014

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:32 a.m. in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Nelson, Hagan, Manchin, Gillibrand, Donnelly, Hirono, Kaine, King, Inhofe, McCain, Chambliss, Wicker, Ayotte, Fischer, Graham, and Cruz.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nomination of General Joseph Dunford to be the 36th Commandant of the Marine Corps. General Dunford, welcome to the Senate Armed Services Committee. Thank you for the many years of extraordinary service that you have provided to our Nation, also for your willingness to continue to serve. Please also extend our thanks to your family, part of whom is here today, for their dedication and support, which is so critical, as we all know, to your success and the success of all those who serve in important positions and pressured positions for our Nation. Please feel free to introduce any family members or other people who are with you here today.

General Dunford has an exemplary record of service, is highly qualified for the position to which he has been nominated. He has commanded marines from the platoon level to the Marine Expeditionary Force. He has served as the Assistant Commandant of the Marine Corps. He is currently the Commander, International Security Assistance Force (ISAF) and Commander, U.S. Forces Afghanistan.

In Afghanistan, General Dunford has commanded U.S. and coalition forces with great distinction. He is the latest in a line of distinguished commanders in that position. He has overseen the critical transition from U.S. and coalition-led combat operations to Afghan-led operations throughout Afghanistan. Under General Dunford's leadership, the drawdown of U.S. forces and a shift to a train, ad-

wise, and assist mission is being carried out with considerable effectiveness.

General Dunford has demonstrated remarkable skills as both a military leader and a diplomat in his interactions with the Afghan leadership, which have been essential to keeping the transition in Afghanistan on track.

General Dunford, as Commandant of the Marine Corps, you're going to be tasked with recruiting and retaining a quality force and ensuring that force contains the necessary structure and readiness levels to meet our Nation's current challenges and are postured to respond to tomorrow's crises and contingencies. These responsibilities are demanding enough on their own. However, you are also going to be asked to assume control at a time of immense fiscal challenge, particularly because of sequestration.

Thank you and your family again for your service to our Nation. We look forward to your testimony and your swift confirmation. I now recognize Senator Inhofe.

STATEMENT OF SENATOR JAMES M. INHOFE

Senator INHOFE. Thank you, Mr. Chairman.

Thank you, General Dunford, for the great job that you have done during arguably one of the most consequential periods of the war. With our Afghan partners, we're making important gains against the Taliban, and are solidifying our progress in building the capacity of the Afghan National Security Forces (ANSF) to defend their country.

Despite this progress, I'm still concerned about the future of Afghanistan. The recent agreement to perform a complete audit of the presidential runoff is encouraging. I hope that works out. You and I talked about this before. That is just really critical. The Afghan people are going to have to believe the results of this thing. Hopefully we can make that happen.

I remain very troubled by the President's plan to draw down our forces based on arbitrary time lines instead of the advice of our commanders and the facts on the ground. The President tried the same policy in Iraq in 2011. We can't afford to repeat that same mistake in Afghanistan.

As Commandant you take command of the Marine Corps as it's being challenged by rising global threats and budgetary crises at home. Budget cuts are degrading readiness and forcing a dangerous drop in the end strength. General Amos has said that these budget cuts mean that—and this is a quote—“We will have fewer forces, arriving less trained, arriving later to the fight. This is a formula for more American casualties.” I think he's probably right and I will ask you some questions on your agreement on that.

I'm glad you're the man at the helm. I appreciate very much your being here today.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

General.

STATEMENT OF GEN. JOSEPH F. DUNFORD, JR., USMC, FOR REAPPOINTMENT TO THE GRADE OF GENERAL AND TO BE COMMANDANT OF THE MARINE CORPS

General DUNFORD. Chairman Levin, Ranking Member Inhofe, and distinguished members of the committee, thanks for the opportunity to appear before you today. I'm truly honored to be nominated as the 36th Commandant of the U.S. Marine Corps (USMC).

Joining me today is my wife Ellyn. I'm fortunate to have her love and support. She's been a great mother to our three children, who are now young adults, and she's also served as a tireless advocate for military families. I always refer to her as the most valuable player of the Dunford family and she's certainly earned that title during the last 18 months of my deployment to Afghanistan. I'm also joined by my niece, Cara. Our sons Joseph, Patrick, and Kathleen, our daughter, are unable to be with us today, but Ellen and I are proud of all of them.

I'd like to begin by thanking the committee for your support of our soldiers, sailors, airmen, and marines now serving in Afghanistan. Due to your leadership, I have no doubt they are the best trained and equipped force our Nation has ever sent to war. Their performance and the strength of our military families bear testimony to that support.

I'd also like to recognize the 1,817 Americans who have made the ultimate sacrifice in Afghanistan and the nearly 20,000 who have been wounded. Each day the men and women of the U.S. Forces in Afghanistan work to bring meaning to their sacrifice.

I know this committee and the American people have high expectations for the U.S. Marine Corps. You expect your Marine Corps to serve as the naval expeditionary force in readiness, a force that is most ready when the Nation is least ready. You expect your Marine Corps that they be forward deployed and forward engaged, responding to crises and enabling our Nation to respond to contingencies. You expect your Marine Corps to fight and win in any climate and place and under any conditions, and you expect your marines to be physically and mentally tough. You expect your marines to demonstrate courage, honor, and commitment. You expect a lot of your marines and you should.

If confirmed as the Commandant of the U.S. Marine Corps, I will ensure that marines continue to meet your expectations and the expectations of the American people. I'll also ensure the well-being of our marines, sailors, wounded warriors, and their families. Over the past decade-plus of war, they have done all we have asked of them and more. It would be a tremendous honor to lead them.

Thank you again for the opportunity to appear before you this morning. I look forward to your questions.

Chairman LEVIN. Thank you so much, General.

We start with a set of standard questions which we ask of all of our nominees. These questions are asked so that this committee can exercise our legislative and our oversight responsibilities. Have you adhered to applicable laws and regulations governing conflicts of interest?

General DUNFORD. I have, Mr. Chairman.

Chairman LEVIN. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

General DUNFORD. I do, Mr. Chairman.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

General DUNFORD. I have not, Mr. Chairman.

Chairman LEVIN. Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record at hearings?

General DUNFORD. I will, Mr. Chairman.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

General DUNFORD. I will, Mr. Chairman.

Chairman LEVIN. Will these witnesses be protected from reprisal for their testimony or briefings?

General DUNFORD. They will.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

General DUNFORD. I do, Mr. Chairman.

Chairman LEVIN. Finally, do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

General DUNFORD. I do, Mr. Chairman.

Chairman LEVIN. Thank you.

We'll have a 7-minute first round of questions. General, in my view, Afghanistan has made remarkable progress over the past decade. It has improved the lives of the Afghan people. This includes increases many times over in the number of schools, the number of students and teachers, including female students and teachers, greater access to health facilities, a leap in Afghan life expectancy, expanded connections to electricity, water, and cell-phones, and growing income.

Can you briefly address the extent of the changes in Afghanistan over the past decade that the United States has been involved there and give us a sense of the significance of those changes to the Afghan people for the future of their country?

General DUNFORD. Mr. Chairman, thank you for that question. Probably the first thing I would say is that I think one of the most significant outcomes of our time in Afghanistan has been that we've put pressure on the terrorist networks, al Qaeda, and prevented another September 11. We've also developed capable and credible Afghan forces. In 2002, there were no effective Afghan security forces. Today there's an army and a police force of over 352,000, as well as another 30,000 Afghan local police, that are capable of providing security to the Afghan people.

We also have enabled, through those Afghan forces, the Afghan people the opportunity to determine their own future with the successful elections of the 5th of April and the 14th of June from a security perspective. While we still have some political issues to work through for those elections, there's no question that the Af-

ghan Security Forces afforded the Afghan people the opportunity to vote.

We have today over 8 million children in school, 2 million of those young girls. In 2001, there were less than a million people in school. Mr. Chairman, you mentioned some of the other advances in health care, communications, road networks, and so forth that will set the conditions for a secure, stable Afghanistan in the future.

I would say that the most profound thing that exists in Afghanistan today that didn't exist in 2001 is hope. The Afghan people actually have hope and confidence in the future that didn't exist under the oppression and the tyranny of the Taliban in 2001.

Chairman LEVIN. Thank you, General.

Is the Afghan army performing well in your judgment?

General DUNFORD. Mr. Chairman, they are performing well. Since what we described as Milestone 2013 last June, when they assumed responsibility across the country, the only unilateral operations that the coalition forces have conducted are for our own security, retrograde, and redeployment operations.

I would highlight one statistic that is indicative of the Afghans' performance. In 2012, we had over 140,000 coalition forces on the ground. That included 100,000 Americans. Today there are 40,000 coalition forces, of which 30,000 are Americans. In those 2 years, the security environment has actually slightly improved since 2012. The big difference, of course, is that the Afghan Security Forces now are responsible for security.

I feel very confident about the trajectory that Afghan Security Forces are on at this time.

Chairman LEVIN. Thank you.

General, the President has called for drawing down U.S. forces to 9,800 by the end of this year, reducing that force by approximately half by the end of 2015, and transitioning to an embassy-based military presence by the end of 2016. In your answers to prehearing questions you said that you support the President's decision on the size of the U.S. troop presence in Afghanistan post-2014. Is that correct?

General DUNFORD. Mr. Chairman, I do support the numbers of forces that will be on the ground in 2015 to both conduct counterterrorism operations and train, advise, and assist.

Chairman LEVIN. Now, also in your answers to prehearing questions you said that you support the pace of reductions outlined by the President, "with an understanding that we should continue to validate the assumptions and assess the conditions on the ground as the drawdown takes place." Now, is one of your assumptions that the full 9,800-personnel force will be available through the entire 2015 fighting season?

General DUNFORD. It is one of the assumptions I made, yes, Mr. Chairman.

Chairman LEVIN. Then the reductions under that assumption would occur only at the end of next year?

General DUNFORD. That's correct, Mr. Chairman.

Chairman LEVIN. All right. Can you share with us any other major assumptions which you made?

General DUNFORD. I can, Mr. Chairman. I think the critical assumptions that have to be continually validated as we move forward are: first and foremost, the counterterrorism capability and the will of Afghanistan; the nature of the threat. The counterterrorism capacity and the will of Pakistan also needs to be considered. The quality of political transition that we're in the midst of has to be considered, and also the international community's support, both fiscally as well as troops in support of the North Atlantic Treaty Organization (NATO) mission.

I think all of those are variables that would have to be considered when determining the adequacy of our force levels in the future.

Chairman LEVIN. There's also an assumption in your answers and in your statements that a bilateral security agreement will be signed in a timely manner; is that correct?

General DUNFORD. That's correct, Mr. Chairman.

Chairman LEVIN. Relative to the size of the U.S. counterterrorism mission in Afghanistan after 2014, what is your recommendation about the size of that mission, the counterterrorism mission?

General DUNFORD. Mr. Chairman, of the 9,800 U.S. forces—and it's probably important to highlight that the expectation is that there'd be approximately 4,000 NATO forces in addition to those 9,800. But of the 9,800 U.S. forces, approximately 1,000 would be dedicated solely to the counterterrorism mission. But there would be a total of 2,000 Special Operations Forces that are there, some of those working with the Afghan Special Operations Forces, who would also be participating in counterterrorism operations.

Chairman LEVIN. I want to change the subject slightly to the question of the Russian Mi-17 military transport helicopters. You recently wrote me, General, regarding a provision in the defense authorization bill which this committee marked up that would prohibit any contracts with the Russian corporation that exports the Mi-17 military helicopter.

You indicated that this prohibition could be catastrophic. Can you explain why?

General DUNFORD. I can, Mr. Chairman. Thank you for that question. The Afghan Air Force will consist of over 80 Mi-17s. All those aircraft have been purchased. The final delivery will be in September-October of this year. Those aircraft provide the Afghan forces with the operational reach to provide security and stability to the Afghan people, as well as to conduct effective counterterrorism operations.

Thirty of those 80 Mi-17s are for what we call a Special Mission Wing, which is the Afghan Special Operations Forces' capability to both conduct counterterrorism and counternarcotics operations. Without the operational reach of the Mi-17, the Afghan forces will not be successful in providing security and stability in Afghanistan and will not be an effective counterterrorism partner.

One of the second-order effects of that, Mr. Chairman, which is why I used the word "catastrophic," is that it will also have an adverse impact on our force protection in 2015. Among the assumptions that I make in 2015 is the Afghan Security Forces will contribute to the force protection of coalition forces in 2015, and their

ability to do that would be significantly degraded without the Mi-17.

Chairman LEVIN. It is the spare parts, as I understand it, the sustainment that is prohibited by that same language, which is so important.

General DUNFORD. There's two issues, Mr. Chairman. One of them is the ability to have spare parts and to sustain the Mi-17 fleet. The other is that Rosoboronexport, the Russian company, owns the plans and the blueprints, if you will, of the Mi-17. There's also safety of flight issues with subsequent modifications and refurbishment of aircraft that would require our dealing either directly with the contractor or the subcontractor, Rosoboronexport.

Chairman LEVIN. Thank you.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

I was going to bring that up. That probably is the most contentious issue on this up here. I agree with the chairman on this. I have seen some of the pretty extreme and courageous statements made. Whether or not some members up here agree with them is a different matter. But the Special Inspector General for Afghan Reconstruction (SIGAR) on June 13 reported a thing that was titled "The Afghan Special Mission Wing, DOD Moving Forward With This \$771 Million Purchase"; that the Afghans cannot operate and cannot maintain the aircraft.

Is there any way that this could be changed and moderated a little bit so that you could still use the spare parts of existing vehicles that are there, that are paid for, that are in existence, and still start toward something, another purchase? Have you thought about any kind of a combination that might work out where we could not lose the value of the helicopters we have, the 88 as I understand that are there, there are trained fighters to fly them, just as far as spare parts are concerned? Have you thought about that?

General DUNFORD. Senator, we have looked very hard. In fact, we've done a global search to see if it would be possible to sustain the Mi-17 fleet without directly dealing with Rosoboronexport or one of its subcontractors. My assessment is that that would not be possible.

Senator INHOFE. All right. I'm quoting now from Tuesday, the speech that was made before the Brookings Institute, when General Amos said, "It breaks our hearts," referring to the fall of the Anbar Province in Iraq, which the marines won in 2010. He noted that 852 marines were killed and another 8,500 injured in Iraq. I believe that they had made the difference.

I know all the work you did in Afghanistan and I'm sure you're observant as to what happened in Iraq. I mentioned to you when you were in my office that I have a young man named Brian Hackler who works for me now, but he actually had two deployments. They were in Fallujah. By coincidence, I didn't know who he was at that time, but I was there, as were many of these guys there, when they had the fingerprints and all of that.

I think, looking at it, that arguably could be considered to be the most violent, door-to-door, World War II-type of activity. When I called up Brian Hackler and told him that we had lost that after they had gained it, he talked about the blood, sweat, and tears.

He's been called by a lot of people since then. I just look at that taking place.

My concern obviously for bringing this up is that we don't want the same thing to happen in Afghanistan. I know, since you're a marine and you saw the mission that took place there, you agree with me.

What all has been done in your opinion to make sure that we don't have a repeat of that tragedy that took place in Iraq?

General DUNFORD. Thanks, Senator. I was one of the thousands of marines that did serve in the Anbar Province and feel the same way that Brian Hackler does. Senator, I think the biggest difference is we have an opportunity to do a transition in Afghanistan, a proper transition that will allow us to achieve our end state. In Iraq we withdrew, with the associated consequences. To me, that's the most significant change.

We knew when we left Iraq, there was work remaining to be done to develop sustainable Iraqi security forces, as well as to ensure that political stability existed in Iraq such that security and stability would continue. In Afghanistan, we have a chance to get that right, and my argument in fact is for us to do a responsible transition from Afghanistan as opposed to a withdrawal.

Senator INHOFE. That's good and I appreciate that. I think we need to get that on record, because it's awful hard to explain to people how that happened, including the Brian Hacklers around who were a part of it.

There's been a lot of discussion on the 38 amphibious ships and dropping that number down to 33. I have a letter, Mr. Chairman, I want to make part of the record right now at this point in the record.

Chairman LEVIN. It will be made part of the record.
[The information referred to follows:]

March 25, 2014

The Honorable Carl Levin
 Chairman
 Committee on Armed Services
 United States Senate
 Washington, DC 20510

The Honorable James Inhofe
 Ranking Minority Member
 Committee on Armed Services
 United States Senate
 Washington, DC 20510

Dear Chairman Levin and Ranking Member Inhofe:

We are writing to highlight concerns about two interrelated challenges that degrade our current national security capabilities and will have negative effects long into the 21st century.

For over a decade our national strategy has shifted towards forward engagement and immediate response when U.S. interests are threatened. These factors have placed increased demand on America's amphibious forces and resulted in longer at sea periods and concomitant wear on these critical warships. Reduced shipboard manning has degraded routine at sea maintenance. Increased intervals between Chief of Naval Operations maintenance availabilities; sharply reduced time in those availabilities; reductions in shore maintenance facility capabilities; and reductions in third party material readiness assessments have become the norm. As a result readiness of the amphibious force has suffered. This is exacerbated by the decline in the number of amphibious force warships because retirements of older vessels are exceeding the number of new deliveries. After 9-11 the actual requirement for 38 warships was fiscally constrained to 33 warships. At that time an assumption was made that improved maintenance concepts would yield higher force readiness and therefore the 33 warships would yield 30 ships immediately available or able to surge on short notice responding to urgent needs. The most recent Quadrennial Defense Review again validated the requirement for 38 amphibious warships. However, the assumed benefits of improved maintenance concepts have not materialized and current fiscal pressures are resulting in a decline from 33 to 28 warships. The latest Navy plans do not envision a force of 33 warships until at least the mid-2020s.

Experience over the past decade demonstrates that the demand for amphibious warships will not decrease. These "Swiss Army Knives" of the sea have proven to be much more than just troop transports. Their versatility and interoperability with our Allies have repeatedly caused them to serve as the cornerstone of America's visible forward presence, projecting metered power and response to crises ranging from non-combatant evacuations and humanitarian assistance to direct military intervention. Amphibious warships have conducted air and ship crew rescues; counter-piracy operations; embassy reinforcement; and support for partner nation naval forces. Continuous forward deployments in the Mediterranean Sea have been replaced by new demands in the littorals of Africa, East Asia, and Southeast Asia.

Navy funding has been inadequate to meet today's strategic requirements and to provide a modern Navy for the future. Maintenance and modernization costs have risen. The development costs for the SSBN(X) Ohio class ballistic missile submarine replacements will have significant impact on funds available for construction of other warships. Cost is an increasingly important consideration for the LX(R) class now planned to replace the LSD-41 Whidbey Island and LSD-49 Harpers Ferry class amphibious warships, which are nearing the end of their expected service lives. To reduce LX(R) costs consideration should be given to basing it on a proven warship design such as the LPD-17 San Antonio

class which is still under construction. The LPD-17 program was originally planned for 12 warships but was reduced to 11 vessels due to budget constraints. By using the proven LPD-17 design for a 12th warship we can leverage existing industry workforce and supplier relationships, thereby building a timely cost-effective bridge to LX(R) deliveries while also ensuring the health of our amphibious warship industrial base and labor force.

The challenges of diminished ship material readiness and the declining numbers of amphibious warships are interrelated and have cumulative effect on the nation's ability to support strategic imperatives. To address this we recommend that the Congress provide supplemental Overseas Contingency Operations funding to provide improved material readiness and reset for today's surface warships and funding for the proven LPD-17 design in the future LX(R) construction.

Very respectfully,

James T. Conway

Senator INHOFE. It's one that you have read and that each member up here has read, from these 20 generals, signing on saying that they think it's absolutely necessary not to deal with that reduction to 33. Any comments you want to make on that?

General DUNFORD. Senator, what I do know is that on a day-to-day basis the combatant commanders' requirements for amphibious ships greatly exceed the inventory. In fact, I'm a bit dated, but not too much, and I think there were close to 50 was the requirement on a day-to-day basis. The Chief of Naval Operations, the Secretary of the Navy, and the Commandant a few years ago concluded that 38 was the requirement, and we're now at the point where we have 33 in a fiscally constrained environment, but actually 31 in the inventory.

I would support anything that would allow us to maintain an effective amphibious ship inventory.

Senator INHOFE. A lot of good points were brought out in that letter. Do you agree with the letter?

General DUNFORD. Senator, I have not seen the letter.

Senator INHOFE. Oh, okay, that's fine.

Lastly, on the elections, a lot of us are partly responsible for the fact that there is going to be an audit and there's going to be a real effort there to make sure that not just justice is done and the right turnout is resulted, but also that the people of Afghanistan will accept this as a fair and honest election.

Do you have any thoughts—I know you're going into a different job now—on what needs to be done to make sure that that can happen?

General DUNFORD. I do, Senator, and I expect to still be there throughout the process.

Senator INHOFE. Sure.

General DUNFORD. I'm glad to report that we began yesterday to gather the ballots in accordance with the agreement that was made over the weekend. All 100 percent of the ballots will be brought back to Kabul to be audited. There's significant international community oversight, as well as candidate oversight, in the process of counting those ballots. I think that will give both the candidates and the Afghan people high confidence that all that can be done is being done to eliminate the fraudulent ballots and determine a good outcome.

I think the most encouraging thing—and I know some of the members recently spoke to both candidates. The most encouraging thing is both candidates are very responsible. They know the consequences of the political transition process and they have agreed to accept the outcome of the ballot with certain parameters. Those parameters are now in place, and so I'm optimistic that at the end of this process some weeks from now there will be a winner and a loser and the loser will accept the results of the election, as will the Afghan people.

Senator INHOFE. I appreciate that very much. We all know the significance of that election.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator REED.

Senator REED. Thank you very much, Mr. Chairman.

I want to join my colleagues, General, in commending you for your extraordinary service to the Marine Corps and to the Nation, and to thank your family for serving with you. Knowing you a little bit, I think you would first point to the soldiers, marines, sailors, airmen, and airwomen who serve as the real force of our success, and your predecessors'. But your role has been absolutely critical.

A year ago I don't think anyone would have said we'd have two relatively peaceful elections in that country, monitored principally by the Afghan National Security Forces, not by international personnel. Again, that's one significant aspect and contribution of your individual and personal command. Thank you, sir, for what you've done.

Can you talk as we go forward about the decision points and the flexibility we have to make adjustments with respect to our presence in Afghanistan, assuming of course that the status of forces agreement will be signed and the strategic partnership will be signed?

General DUNFORD. Again, Senator, as we've discussed earlier, there will be 9,800 U.S. forces in Afghanistan. The plan that we have right now would not begin to draw those forces down until the end of the fighting season in 2015. The first opportunity to change, make adjustments as you describe them would be in the fall of 2015, where you can effect change in the projected numbers in 2016.

Then whatever number you have in 2016, a similar construct would probably be in place for 2016, where the numbers that you would want to have in 2017 could be determined in the summer of 2016 to effect change in the plans for 2017. But it typically will run in a post-fighting season pattern over the next couple of years in terms of effecting change, which is not to say you couldn't add forces, but this is to make adjustments to the forces on the ground.

Senator REED. Not only forces on the ground, but facilities that may be occupied because of conditions in the country?

General DUNFORD. Senator, that's absolutely one of the drivers. What we have tried to do is make sure that the infrastructure doesn't drive our ability to provide train, advise, and assist in 2015. We've done some things to maintain a flexible posture in 2015. But at the end of the day, infrastructure is absolutely one of the drivers to the timeline.

Senator REED. There's two principal missions. One is the train, equip, and advise the Afghan National Security Forces and the other is the counterterrorism operations. You'll view the force structure in terms of both those missions; that's correct?

General DUNFORD. Absolutely, Senator. From my perspective they're inextricably linked.

Senator REED. You're comfortable with this going forward because of the built-in flexibility and you see no arbitrary constraints going forward? The review that will be done at the end of next year will be based upon the conditions on the ground, the two missions that we outlined, and the facts as the commander, presumably General Campbell, sees at that time?

General DUNFORD. Senator, I'm confident that the specific assumptions, the conditions, and the tasks that have to be accomplished, that drove our recommendations for 2015, all that's avail-

able to my successor and he'll have the opportunity to go back in 2015 and to revalidate those assumptions and to assess the conditions, one of the important conditions of course being the nature of the threat to our Nation after 2015.

Senator REED. Again, invariably parallels are drawn between the situation in Iraq and Afghanistan. But in Iraq, in 2008, President Bush signed a formal agreement with the Government of Iraq to withdraw all forces on a fixed date, the end of 2011. That is not going to be the policy in Afghanistan, as you understand it? In fact, we would have the flexibility for our own interests to change the mix and change the disposition of forces going forward, and that is, I would assume, a key difference?

General DUNFORD. Senator, it is a key difference. One of the key differences is that, one, the Afghan people want us to be in Afghanistan in overwhelming numbers. I've recently spoken to both presidential candidates and I can assure you that both presidential candidates also support a U.S. presence after 2014.

Senator REED. One of the key factors which you've already acknowledged is the role of Pakistan. One of the interesting developments which I think you appreciate very keenly and I wonder how much our colleagues in Pakistan do is as we draw down our forces and depend less and less on the lines of communication through Pakistan our relative leverage goes up. Is that a fair estimate in terms of getting their cooperation and getting their help?

General DUNFORD. Senator, it does. I think our footprint in Afghanistan has made us reliant on the ground lines of communication, and I think after 2014 we have an opportunity to reframe our relationship with Pakistan.

Senator REED. Right now they're conducting operations much more aggressively, but probably not as effectively as they would even want; is that a fair judgment?

General DUNFORD. Senator, they are conducting operations in North Waziristan, and we've certainly wanted them to do that for some years. They've had some success against the Pakistani Taliban and the IMU [Islamic Movement of Uzbekistan] in North Waziristan to the best that we can tell, but certainly have not had the effect against the Haqqani Network that we want to have seen, although it certainly has had a disruptive effect on the Haqqani Network in the sense that they have all been forced to move out of their sanctuary in the Miranshah area.

Senator REED. Let me just change quickly, because your new job as the Commandant of the Marine Corps touches upon issues of budget, potential sequestration effects. I'm sure you've thought about them, but not I presume in detail. Going forward, can you just give us your sense of the readiness challenges you will face and other challenges that the Marine Corps faces today?

General DUNFORD. Senator, thank you. I think as I look at the future of the Marine Corps, our leadership, the biggest challenge we're going to have is to balance readiness, the crisis response capability that you expect from the U.S. Marine Corps, with the ability to modernize the Marine Corps for tomorrow's fights, to sustain infrastructure, to maintain proper levels of training, and so forth for those units at home station.

Balancing all those in a fiscally constrained environment is going to be very difficult. I know that General Amos has prioritized readiness. I also know that he's been forced to make some decisions that create challenges in the future for modernization. I think balancing those things over the next couple of years is going to be difficult.

Senator REED. Thank you, sir.

Chairman LEVIN. Thank you, Senator Reed.

With thanks to Senators Chambliss and Wicker, Senator McCain.

Senator MCCAIN. Thanks to Senators Chambliss and Wicker. It shows if we live long enough—[Laughter.]

Thank you, General Dunford.

Chairman LEVIN. This is an in joke. I have to explain all this.

Senator MCCAIN. It's the only appropriate mark of respect that I have ever gotten from my two colleagues. Thank you. [Laughter.]

I thank you, General Dunford, for your outstanding service. We've had the opportunity of encountering many times over the past 12, 13, 14 years and I appreciate your service.

I really am reluctant to get back into this, but people keep trying to say that in 2008 we said we'd have everybody out, that we really wanted to stay in Iraq. The fact is that the President of the United States—there was never any public statement that the President made, the United States made, that said that he wanted to stay or have a residual force in Iraq.

The fact is—and Senator Graham and I were there and know full well—that if we had really wanted to we could have kept a residual force there. We're paying a very heavy price for not doing so. We were on the ground there when Maliki and Barzani and Alawi agreed and, in the words of the Chairman of the Joint Chiefs of Staff, it cascaded down to 3,500 troops that they wanted to leave behind, which was absolutely ridiculous.

We'll be fighting this for years to come, but facts are stubborn things and we could have left a residual force if we had wanted to do so. In fact, today your predecessor said—in the Brookings Institute, General Amos said: "I have a hard time believing that had we been there and worked with the government and worked with the parliament and worked with the minister of defense, the minister of interior, I don't think we'd be in the same shape we're in today." Those are just facts.

General Dunford, did you or any other senior military leader personally recommend the policy of everybody out by 2017 no matter what?

General DUNFORD. No, Senator.

Senator MCCAIN. No military, no ranking military officer that you know, recommended a hard date for everybody out of Afghanistan; is that right?

General DUNFORD. None that I know of, Senator. I think we still plan to have some presence after 2017. But no one recommended zero.

Senator MCCAIN. Did anybody recommend that we have a conditions-based decision about what kind of residual force we should leave behind?

General DUNFORD. Senator, I think you appreciate that every military leader would want to have the conditions on the ground and the assumptions be revalidated as a transition takes place.

Senator MCCAIN. Isn't it true that right now, the way that the counterterrorism capability of the Afghans are today, that we cannot abandon that? If you had to make the decision today, with the lack of counterterrorism capability the Afghans have, we would have to leave that kind of force behind at least for the counterterrorism mission?

General DUNFORD. Senator, there's no doubt that the Afghan forces today would not be capable of conducting the kind of operations we're conducting to put pressure on the network.

Senator MCCAIN. Nor right now do you envision them having that capability by 2017?

General DUNFORD. Not if you project the threat that exists today.

Senator MCCAIN. Including recent rocket attacks on the airport in Kabul show that the Taliban is still pretty resilient.

Isn't it a fact that as long as the Taliban have basically a sanctuary in Pakistan that this situation will remain extremely complex and dangerous?

General DUNFORD. Senator, absolutely. The resiliency of the Taliban movement is driven by their sanctuary in Pakistan.

Senator MCCAIN. Is there any doubt in your mind that the announcement of a complete withdrawal by 2017 has had effect on the morale of the Afghan army?

General DUNFORD. Senator, I think all of us in uniform, to include the Afghans, would have preferred that that be a bit more ambiguous.

Senator MCCAIN. In fact, we were told recently in Kabul by Afghan military officers, they say, "You are abandoning us." That's what they told me and Senator Graham, and I don't think they would have any reason to tell us otherwise.

The fact is that we need a conditions-based decision because we right now are not confident that the Afghans can take up the complete burden of their own security.

Very quickly, sequestration. Right now, as I understand it, Marine captains and Army captains who are in the field fighting right now as we speak are receiving notices that they're going to be involuntarily separated from the U.S. Army and Marine Corps. Is that true?

General DUNFORD. Senator, my understanding is that is what the Army has been forced to do as a result of the drawdown. The Marine Corps is not doing that at this time with captains that have forward deployed.

Senator MCCAIN. Obviously, that has to have an effect on morale of our officer corps.

General DUNFORD. It does, Senator.

Senator MCCAIN. A serious blow, I would think.

General DUNFORD. Absolutely. Probably more importantly, Senator, than just the officer corps is the message it sends to the young soldiers whose company commander is forced to redeploy as a result of a reduction in force.

Senator MCCAIN. Isn't it true from your time in the military and remembering worse times that it takes a long time to restore the

morale of the military when you take out, involuntarily, some of the best and the brightest that we have had. Haven't we seen that movie before in your early part of your career?

General DUNFORD. I have, Senator. In the late 1970s it took us some years, probably into 1983 or 1984, before we recovered from the effects of the post-Vietnam drawdown.

Senator MCCAIN. Would you agree that perhaps one of the greatest responsibilities that Congress and the military has today is to review this sequestration and its effects that it is having long-term on our ability to defend this Nation?

General DUNFORD. I would agree with that, Senator.

Senator MCCAIN. I look forward to working with my colleagues on both sides of the aisle and both sides of this podium, making that one of our highest priorities. Otherwise, I think that it is the unanimous opinion of every military leader that I have met that continued sequestration on the path we're on could have devastating effects on our ability to defend this Nation. Would you agree with that?

General DUNFORD. I would agree with that, Senator.

Senator MCCAIN. I thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator KING.

Senator KING. Thank you, Mr. Chairman.

General, the chairman covered the Mi-17 issue, but I just think it's really important to have your unequivocal view that, I think the word you used is, it will be catastrophic if we cut off spare parts. That would in effect ground the Afghan Air Force; is that true?

General DUNFORD. Senator, it is. The reason I used the word catastrophic, which I don't think is hyperbole, is because the inability for the Afghans to have the operational reach represented by the Mi-17 will seriously deteriorate their ability to take the fight to the enemy. But the more important reason I used the word catastrophic is that their inability to take the fight to the enemy actually will put young Americans in harm's way in 2015 and beyond.

Senator KING. Thank you General.

You've discussed this. Looking now at the lessons of Iraq, what do we learn from that so that we can avoid that future in Afghanistan? There are those who aren't as optimistic as the military about Afghanistan's future after our withdrawal. What do we learn from Iraq to avoid that fate?

General DUNFORD. I think the key thing that we have in Afghanistan, we're in the process of right now, is an effective political transition, but also the opportunity to continue to develop the sustainability of Afghan security forces. I'm very confident about the Afghan forces' ability to provide security on a day-to-day basis. I'm not confident that if we were to leave at the end of 2014 that those forces would be sustainable.

There are some significant capability gaps that have to be addressed in order for the Afghans to be able to do things that we have heretofore been doing for them. There's still a degree of what I describe as capability substitution. Many of those areas are planning, programming, budgeting, execution, things we take for grant-

ed, delivery of spare parts, delivery of fuel, pay systems, and those kinds of things that the army would need.

I think the key lesson is that, after all of the sacrifice and all the accomplishments over the past 13 years, what we need to do is ensure that the transition results in the Afghan forces being sustainable without our presence at some point in the future.

Senator KING. What's the ethnic makeup of the Afghan army? One of the problems in Iraq appears to be the unequal distribution ethnically or sectarian. Is the ethnic, tribal makeup of the Afghanistan security forces representative of the country, so that the security forces will have a broad support within the country?

General DUNFORD. Senator, thanks for that question. It is an important question. The officer corps in the Afghan army is about 40 percent Tajik, 40 percent Pashtun. The noncommissioned officer (NCO) corps is about the same. The forces are about the same. That's a slight overrepresentation of Tajiks in the sense that the Pashtun population represents some 40-plus percentage of the population and about 27 percent of the population is Tajik.

I would caveat those statistics by telling you that there hasn't been a census in Afghanistan for a long period of time. Those statistics are the best that we have available to us. But in general terms we have the foundation of a national army in Afghanistan that is in fact representative, not only of the various ethnic groups, but representative geographically.

Senator KING. Is this representation integrated throughout the force? In other words, are individual battalions or units balanced ethnically?

General DUNFORD. Senator, they are. They are balanced. There is a slight overrepresentation of forces from the northern part of the country and the eastern part of the country, slightly less from the southern part of the country. But the demographics in each of the units represents the Nation as a whole, as opposed to specific units being Tajik or Pashtun and so forth.

The assignment of people inside the Afghan army is not based on their geographic area. In fact, all serve away from home.

Senator KING. We tend to focus around here on problems. That's what we talk about. That's our job. But my sense is that Secretary Kerry and what happened last weekend was a big deal, and the avoidance of what could have been a disastrous situation. Could you share some thoughts about the importance of the uniform recount and, I understand there's a kind of a power-sharing agreement or a coalition government agreement of whatever the outcome. This could have been a disaster for us if it had gone the wrong way this past week.

General DUNFORD. Senator, thanks. Last week there was a lot of discussion in Afghanistan about one of the candidates establishing a parallel government, with the potential for civil war. I would assess that risk as having been significant. I don't think either one of the candidates wanted to do that, but there was certainly a sentiment, a strong sentiment by large numbers of people, that were so outraged at the fraud that took place in the election that they were willing to take extreme measures.

I think what happened this weekend was very encouraging in that both candidates have agreed to a framework for an audit proc-

ess that will deliver the cleanest vote possible. But as importantly, the candidates agreed on a political track as well as that technical track, and that political track will be some power-sharing arrangement so there's an inclusive government in Afghanistan. They believe that that is most suitable for Afghanistan at this particular time.

While the devil is in the details and much work remains to be done, particularly on the political framework, the discussion in Afghanistan now is not about civil war, it's not about insecurity; it's about a political deal in order to govern effectively in the future. I think that's fairly significant.

Senator KING. I've always felt that God is in the details, but that's a different topic.

Pakistan. You mentioned Pakistan. You've had to deal with Pakistan. Whose side is Pakistan on? Are they trying to suppress these terrorist organizations or are they working with them? I find Pakistan a puzzling—I was about to say ally, but I don't know how to characterize them.

General DUNFORD. Senator, in my time in Afghanistan I've met generally monthly with our Pakistan counterpart, and also he's now had the opportunity to travel to Afghanistan to meet with both me and our counterpart in the Afghan security forces. Numbers of hours of discussions. I'm convinced of a couple things, both from the intelligence and from my engagements in Pakistan.

First and foremost, I believe that the Pakistani army recognizes that extremism is an existential threat to the state of Pakistan and I think they are determined to do something about that threat. Less confident that they today have the capability to do all that needs to be done to deal with that threat inside of Afghanistan, which is why I think you see them focused narrowly on the most pressing threats to Pakistan, reflecting an inability to deal more broadly with extremism.

This is one of the reasons I think it's so important for us to develop an effective relationship between Afghanistan and Pakistan, and I think the United States can play a unique role in facilitating that relationship, because the way we will get after this problem is by, one, having a common definition of "extremism" in the region; and number two, then having an agreed-upon framework within which both Afghanistan and Pakistan can deal with the threat of extremism, as well as the very real political and economic challenges that exist between the two states.

Senator KING. As we draw down in Afghanistan, it's more important than ever to establish a good, strong working relationship with Pakistan?

General DUNFORD. Senator, an effective relationship between Afghanistan and Pakistan is critical to our long-term success in the region.

Senator KING. Thank you, General, and thank you for your extraordinary service.

Chairman LEVIN. Thank you, Senator King.

Senator Chambliss.

Senator CHAMBLISS. Thanks, Mr. Chairman.

General, thanks to you and your family for your continued commitment to America. We're very thankful that you have been where

you've been coming out of Afghanistan. You're the next in line of a number of great leaders to serve as Commandants. We look forward to your continued service there.

Taking up where Senator King left off on Pakistan, there is no long-term solution in Afghanistan without some sort of cooperation out of Pakistan; is that a fair statement?

General DUNFORD. Senator, that's absolutely a fair statement, and one of the critical components of our military campaign is to begin to develop effective military-to-military relationships between the two countries. I couldn't agree more.

Senator CHAMBLISS. I want to ask you about the detainees that were released recently. I understand 12 non-Afghans were released from Parwan. Ten of those were Pakistanis and they were all returned to their home country. I'm concerned because I know the serious nature of the alleged incidents that these prisoners were accused of, and we have 38 more non-Afghans, I understand. Can you address why these 12 were released and what's our long-term policy with Afghanistan regarding non-Afghan prisoners at Parwan?

General DUNFORD. Thanks, Senator. I can. First with regard to the 10 that were sent to Pakistan, we didn't release those individuals; we turned them over to Pakistan after the U.S. State Department got assurances from Pakistan that they would be properly handled in accordance with the nature of the crimes that they committed.

We have 38 third-country nationals right now and a similar process takes place, where the State Department deals with the Nation from which these individuals come, gains assurances, and then the Deputy Secretary of Defense will sign an authorization for them to be released after notifying Congress.

The challenge with this issue, Senator, is that our authority to hold these individuals will expire on December 31, 2014. We're working very hard now to ensure that we properly transition these individuals to a place where they can be held accountable for, again, the acts that they've committed.

Senator CHAMBLISS. Do you have confidence that the Afghans are going to treat them in the way that they should be treated because of the acts they've committed?

General DUNFORD. Senator, we're not planning at this time to turn them over to Afghanistan. We plan to turn them over to the countries from which they originated. My sense is that if we were to turn them over to Afghanistan today I couldn't guarantee you that they would be properly handled.

Senator CHAMBLISS. I want to again take off on something Senator McCain asked you about. We had General Campbell in the other day to talk about continuing operations in Afghanistan, and with the drawdown to the 9,800 this year, drawing down again next year, give me your view as to the long-term situation as you understand it right now as we head into the end of 2014, through 2015 and, more importantly, into 2016? What's your understanding of how this is going to work?

General DUNFORD. Senator, with regard to developing sustainable Afghan security forces, I think the pace of withdrawal right now could result in Afghan forces being sustainable. I'm comfortable that a regional approach to train, advise, and assist in

2015, where we help mature the institutions, the processes and systems that allow the ministerial-level organization to support tactical-level organizations, the work that needs to be done can be done in 2015.

I'm also confident that there's some work that will require a longer period of time, but much of that work can be done in Kabul inside the ministries. The issue that I really can't talk to you about with any degree of confidence is what the threat to the Homeland might be after 2016. That's certainly an area where I think the assumptions and the conditions that informed our current decision would have to be evaluated over time.

Senator CHAMBLISS. In that respect, if you had to rate the possibility of either al Qaeda or al Qaeda-affiliated operators inside of Afghanistan or migrating to Afghanistan as we draw down and resuming training operations, much like we saw before September 11, what degree would you rate the possibility of that taking place?

General DUNFORD. Senator, I can assure you, from what we see on a day-to-day basis and from the intelligence, that there are individuals in both Afghanistan and Pakistan who are determined to attack the Homeland. They're determined to replicate acts like September 11. The pressure that we have placed on those networks over the past decade is the reason they haven't been able to execute a September 11.

I would say that the risk, without continued pressure on those networks, of them regenerating and attacking the Homeland would be significant.

General DUNFORD. Is the Haqqani Network still enemy number one?

General DUNFORD. Senator, I would view al Qaeda as enemy number one. Haqqani is certainly the most virulent strain of the insurgency in Afghanistan and presents the greatest risk to the force because of their emphasis on high-profile attacks. The other thing that's significant about the Haqqani Network is they actually provide the network that allows al Qaeda in the region to have sanctuary and continue to resource itself. They're certainly, if not the most important group to the sustainability of al Qaeda, they are certainly one of the most significant groups that allows al Qaeda to sustain itself in the South Asia region.

Senator CHAMBLISS. Talk for a minute about the morale of American soldiers in Afghanistan now? What's your thought?

General DUNFORD. Senator, I am—and I mean this sincerely—extraordinarily honored to have the opportunity to lead the men and women that are in Afghanistan today. Their morale after 13 years of war has met or exceeded anybody's expectations over time. They're focused on what they're doing. They believe in what they're doing. They trust themselves. They know they're well trained and they're well equipped and they trust their leadership.

I would assess the morale of the forces in Afghanistan today and, frankly, in the force as a whole as something we can all be very proud of.

Senator CHAMBLISS. The 48th Brigade of the Georgia National Guard is charged with basically tearing down Camp Phoenix. I visited them when they got there and they were fired up about the

job that you had given to them to do that, and I trust they're doing well.

General DUNFORD. Senator, they are. The job we gave them to do is one of the more difficult jobs that needs to be done over this next year. It's a piece of infrastructure, Camp Phoenix, that they're down at, that we want to close. Closing a base is a challenging task, but they have taken that on with enthusiasm and they're doing a superb job.

Senator CHAMBLISS. Thank you, Mr. Chairman, and thanks for your leadership, General.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

General Dunford, welcome. I also know that your wife has played a very big role in your success, so we welcome Ellyn and your niece.

I am the daughter-in-law of a former major general in the Marine Corps Reserve and just know that so many people hold the Marine Corps in the highest, highest regard. We thank you for doing that. You have some big shoes to fill from Commandant Amos, who has certainly led the Marine Corps, I think, with very good leadership.

I did want to talk a little bit more about the Afghan National Security Force. As you wind down your tenure as head of ISAF, where you have seen the withdrawing of 20,000 troops in an environment with an unsigned bilateral security agreement and an election riddled by fraud that you've spoken about, tell me how prepared the Afghanistan National Security Forces are to take over, especially in light of what we have seen, the incapability of what's taking place in Iraq?

General DUNFORD. Senator, I would, and thanks for that question. I think, rather than just give you my personal assessment, maybe I'll just outline what the Afghan forces have done over the past few months, which in my mind is indicative of their current capability. First, we had over 300 campaign events involving thousands of people, some as large as 20,000. The Afghan forces secured all of those campaign events.

There was a Nowruz, or Persian New Year Festival, in the northern part of the country back in March, 100,000 people came. They secured that event. There was another event in the country that involved people from all over the region to attend, a number of significant threat streams. Those threat streams were disrupted and the Afghan forces were able to provide security.

Probably most significantly, what took place on the 5th of April and the 14th of June is indicative of the capabilities of the Afghan security forces. On both of those occasions, millions of people, despite being threatened by the Taliban, had the courage to go out and vote. That courage was drawn in my assessment from the confidence that the Afghan people and the sense of ownership that the Afghan people have for the Afghan security forces.

While I'm very aware of the challenges that must be addressed to have sustainable Afghan forces and the capability gaps that continue to remain, I'm equally confident that the Afghan forces today

are capable of providing security to the Afghan people. They have done that for the past year since they assumed lead responsibility.

They're in a tough fight this summer. Our forces when I arrived, we had over 100,000 forces on the ground. We have 40,000 right now. We're providing very little support on a day-to-day basis to the Afghan security forces. They are yet still able to be successful against the enemy.

Senator HAGAN. Can you talk about the participation of women in the Afghani forces?

General DUNFORD. I can, Senator. It's not a particularly good news story. There's a goal in the Afghan army and the police forces for 10 percent women. We have about 1 percent in both the army and the police force right now. There are some bright spots. We have the first female police chief in Kabul. We have a couple other senior-level officers. Both the Minister of Defense and Minister of Interior have taken this on as an area of personal interest, and they have a very aggressive recruiting plan.

Within ISAF, we recently received from Croatia a brigadier general whose singular responsibility will be to assist us with gender integration in the Afghan security forces. From a leadership perspective, I think there's an emphasis by the leadership in Afghanistan to make this better.

But I wouldn't for a minute understate, Senator, the very real cultural challenges that are going to make the progress for women in Afghanistan very slow and very deliberate and, quite frankly, contingent upon our continued presence after 2014, as well as some of the support that we provide being conditional in order for them to make progress in this particular area.

Senator HAGAN. How many women in the Marine Corps are serving in Afghanistan?

General DUNFORD. Senator, I don't know. That may be something good that I don't know, because we actually don't keep track of things like that.

Senator HAGAN. I want to move to the Camp Lejeune water contamination issue. One of my top priorities has been to get help and answers for those individuals in the Marine Corps that have been affected by this water contamination at Camp Lejeune. As many as a million marines, family members, and civilians that were stationed at the base from 1950s until the 1980s were exposed to some harmful chemicals that have certainly led to the development of cancer and other diseases.

It's been a long quest to get answers and we are finally beginning to get results of studies that have shed light on this tragedy. I know that you too have served at Camp Lejeune during this time. I hope you make this issue a personal priority. When you are confirmed, will you work with Congress to overcome any of these bureaucratic hurdles that we have had in the past—I feel good from the Marine Corps's perspective we're still working with the Agency for Toxic Substances and Disease Registry in some other areas—to overcome any of these hurdles that may halt or delay the pursuit of answers for the affected marines and their families?

General DUNFORD. Absolutely, Senator. We'll do all we can to be transparent with Marine families and, frankly, at the end of the day to do the right thing.

Senator HAGAN. Thank you.

To tuition assistance. I think that is a powerful program that allows our servicemembers to pursue education in their off time, and I think it enhances the professionalism when serving and certainly helps to prepare them for the civilian workforce when they transition out.

Congress has sent a very clear message about the importance of this benefit by restoring it in fiscal year 2013 and then by restricting the reprogramming of that in fiscal year 2014. In the Marine Corps' 2015 budget the request originally included a proposal to cut this tuition assistance by close to two-thirds and also included a 25 percent cost share by the individual marine.

It's a program that I support and I've defended it. I was pleased to see that the Marine Corps quickly changed course and then fully funded this tuition assistance for fiscal year 2015.

If confirmed, will you continue to show strong support for the tuition assistance benefit?

General DUNFORD. Senator, I have taken a look at the guidance that General Amos provided for the tuition assistance program and, if confirmed, the guidance that I would provide would be consistent with what General Amos has provided.

Senator HAGAN. Because this is a benefit that these men and women have really deserved and it has certainly helped from an educational standpoint for those individuals and, as I said, when they transition out. Thank you. I will look forward to working with you on that.

Chairman LEVIN. Thank you, Senator Hagan.

Senator WICKER.

Senator WICKER. Thank you.

General Dunford, thank you for your testimony and for your service. Let me just try to follow up on a few things that have been mentioned.

Senator Inhofe mentioned our amphibious fleet. It's clear that we're not anywhere near our requirements there. Let me ask specifically about the LPD-17 [landing platform/dock] program. It was originally planned for 12 warships. It was reduced to 11 vessels. This committee restored that 12th LPD. It's my understanding that the Senate Appropriations Committee has found the funds for that 12th LPD and that it's authorized in the House version of the National Defense Authorization Act.

Do we need that 12th LPD?

General DUNFORD. We do, Senator.

Senator WICKER. What's your assessment of the risk to the Marine Corps and our troops' ability to execute objectives around the world, and particularly the Asia-Pacific, if we do not get that number right?

General DUNFORD. Senator, we're both short of the numbers of ships required to meet the combatant commanders' day-to-day requirements, as well as to aggregate marines to conduct an amphibious assault. I believe that that 12th LPD will help mitigate the risk, not completely close the gap, but it will help mitigate the risk that we have right now in both of those areas.

Senator WICKER. Would it help you as the next Commandant if we would go ahead and get these bills on the President's desk for

his signature before the end of the fiscal year? What problems does it cause when we let the fiscal year expire and we haven't given you a National Defense Authorization Act and we don't have our Defense Department funded with an actual appropriation bill, but rather a continuing resolution?

General DUNFORD. Thanks, Senator. I know from my previous experience as Assistant Commandant what that frequently requires us to do is break programs. It's actually a very inefficient way to do business if you don't have a bill passed by the end of the fiscal year.

Senator WICKER. We have reported out of this committee the Carl Levin Defense Authorization Act and I know that he would like nothing better than to get it on the floor this month. I would join my colleagues in that.

Chairman LEVIN. If I could just correct that, I really wanted to get this on the floor last month.

Senator WICKER. But that was yesterday and yesterday's gone.

We need to get it done. I think you and the members of this committee are on the same page. I just implore the leadership of this Congress to do whatever's necessary to get these bills on the President's desk in a timely manner.

Let me follow up then on the question of the pace of our drawdown. Right now we have 30,000 U.S. troops in Afghanistan, is that correct?

General DUNFORD. That's correct, Senator.

Senator WICKER. Another 10,000 from various coalition allies, for a total of 40,000?

General DUNFORD. That's correct, Senator.

Senator WICKER. At what pace are we going to get to 9,800? What will it look like at the end of this calendar year?

General DUNFORD. It will be at 9,800 by the end of this calendar year, Senator.

Senator WICKER. It's going to be a pretty rapid drawdown?

General DUNFORD. It is, and this is the way it was planned, so that we could keep the maximum number of forces on the ground throughout the election period, as well as through the fighting season in the summer. But as we discussed a while ago, the infrastructure piece is one of the key drivers, and we've been simultaneously working the infrastructure reduction and transition plan throughout the last year. I'm not at all concerned about the pace of drawdown to get to 9,800. We have a good plan in place and we'll get there.

Senator WICKER. Are we going to be at 9,800 through most of calendar year 2015?

General DUNFORD. That is the plan, Senator.

Senator WICKER. Okay, so November, for example, of 2015?

General DUNFORD. We will have begun the drawdown by November 2015.

Senator WICKER. At that point how many of our coalition ally troops will be with us there?

General DUNFORD. We'll have 4,000, plus or minus, that'll be with us in 2015. As we collapse back to a Kabul-centric approach in 2016, I'd expect we'd have at least half of that number in 2016.

Senator WICKER. We'll have about 5,000 troops during 2016?

General DUNFORD. The guidance the President said was we would have about half in 2016 and the number 5,500 is out there, but the President's guidance has been about half.

Senator WICKER. Your testimony before the committee today, your best judgment to Congress, is that the numbers that we project for 2015 will be adequate to provide security during that calendar year; is that correct?

General DUNFORD. Senator, that is correct. The numbers in 2015 are consistent with the recommendation that I made to the President.

Senator WICKER. Okay. You reserve the right, as I understand it, to look at conditions on the ground and change that recommendation as it goes forward beyond calendar year 2015. Is that what I understand you to have told me yesterday?

General DUNFORD. Senator, I think any commander—and I certainly believe I have this responsibility. Any commander has the responsibility to provide the President with best military advice, which includes a continual reassessment of the assumptions and the conditions that were behind any recommendation that was made.

Senator WICKER. I hope you will. I tell you this, General. I think we're all impressed. We're impressed with your record, we're impressed with the answers that you've given us. We think the President has the right man here.

I just have to say, I implore you and I charge you with speaking truth to power. If it looks like, as Senator Inhofe said, if it looks like we're not getting it right, as we didn't get it right in Iraq, I hope you will come back to us and tell us we're not getting it right and that something needs to be done. We need to know that.

We didn't get the right advice, frankly, we got surprised, in Iraq. I have here a news item, which I think I'll ask to be inserted in the record, Mr. Chairman.

Chairman LEVIN. It will be.

[The information referred to follows:]

FP Top Marine Commander: Iraq Chaos Shows Costs of U.S. Withdrawal

- BY [Kate Brannen](#)
- JULY 15, 2014 - 05:17 PM

Stepping into an intensifying political debate, the head of the Marine Corps said the United States doesn't have the luxury of isolationism and said Iraq's deterioration may have been prevented if Washington had maintained a larger U.S. presence there.

The comments from Gen. James Amos, the outgoing commandant of the Marine Corps., come amid sharp divides over who bears responsibility for the takeover of much of Iraq by Islamist militants and whether the United States should pull back from its leadership role on the world stage.

Republican critics of Barack Obama's administration argue that the White House's decision to withdraw all U.S. combat troops from Iraq at the end of 2011 cleared the way for Prime Minister Nouri al-Maliki, a hard-line Shiite, to consolidate power and drive the country's Sunni minority into the arms of militants from the Islamic State, formerly known as ISIS, which has conquered broad swaths of central Iraq. The critics also argue that removing all U.S. forces allowed the Iraqi military's fighting capabilities to wither so significantly that many troops abandoned their posts and fled when ISIS militants attacked, leaving the armed group with large caches of advanced and U.S.-provided weaponry.

At the same time, the Republican Party itself has been riven by a fierce internal debate about whether the United States should maintain the type of muscular foreign policy that has characterized the party for decades or adopt a less interventionist approach. The dispute has pitted two presumed 2016 presidential candidates against each other, with Texas Gov. Rick Perry deriding Kentucky Sen. Rand Paul, the prime proponent of a more cautious foreign policy, as an isolationist whose views pose dangerous risks to U.S. national security. Paul, in turn, has said that Perry's approach would leave the United States enmeshed in long, messy wars like Afghanistan.

Amos, who is scheduled to retire this fall, offered strong views on both debates. On Iraq, Amos said he believes that the ISIS takeover of central Iraq -- and the growing political fissures between Maliki and the country's embattled Sunni minority -- may have been avoided if the United States hadn't completely withdrawn from the country in 2011.

"I have a hard time believing that had we been there, and worked with the government, and worked with parliament, and worked with the minister of defense, the minister of interior, I don't think we'd be in the same shape we're in today," Amos said during an event at the Brookings Institution.

Amos also had strong words for those who want the United States to pull back from its commitments and responsibilities around the globe.

"We may think we're done with all of these nasty, thorny, tacky little things that are going on around the world -- and I'd argue that if you're in that nation, it's not a tacky, little thing for you. We may think we're done with them, but they're not done with us," Amos said.

He said ISIS's capture of Anbar province, a former insurgent stronghold that had been cleared by U.S. Marines at great cost, was painful for him both personally and professionally.

"It breaks our hearts," Amos said, while quickly rattling off statistics showing what the war in Iraq cost the Marine Corps: 852 killed with another 8,500 injured.

He said that when the Marines left Anbar in 2010, handing operations over to the U.S. Army, they felt good about what they'd accomplished there.

"They believed that they'd made a difference," Amos said.

Now, the Islamic State controls Fallujah and parts of Ramadi, both cities where the Marine Corps spent years fighting and bleeding.

Marines are now in the midst of their withdrawal from Afghanistan's Helmand province, which holds a similar importance to them as Anbar did in Iraq, and it remains uncertain whether the Afghan security forces will be able to hold off Taliban attacks.

Amos said he is confident in the Afghan security forces' ability to fend off the Taliban, but he warned that Afghanistan could collapse like Iraq if the United States pulls out "lock, stock, and barrel."

"There's no question that [the Afghan security forces] would not be able to hold," Amos said.

Still, Amos said he's optimistic about Afghanistan because the administration has agreed to keep 9,800 U.S. troops there until the end of 2015. In May, Obama announced that half of those troops will remain in Afghanistan until 2016. Beyond that, a small military presence will remain at the U.S. Embassy in Kabul.

"I think now that the president has made the decision to leave 9,800, that there will be continued support for those great warriors and leaders," Amos said about the Afghan security forces.

The four-star rarely shies away from expressing his opinion, even when it contradicts the official White House or Pentagon position. When the Obama administration was pushing to repeal "don't ask don't tell," which forbade gays from serving openly in the military, Amos warned that doing so could have detrimental effects on the Marines' ability to fight. He later embraced the policy change and said his previous concerns were unfounded.

This year, the Pentagon recommended scaling back funding for military commissaries, reducing the average shopper's savings from 30 percent to 10 percent. The Joint Chiefs have defended the proposal on Capitol Hill, but Amos won't get behind it. At Brookings on Tuesday, Amos reiterated his opposition to the idea.

Senator WICKER. It's a statement by General Amos, your predecessor. I'm going to do you the favor of not asking you if you subscribe to his views, because I don't think that would get us anywhere. But basically, if I could just read a sentence or two:

"Stepping into an intensifying political debate, the head of the Marine Corps said the United States doesn't have the luxury of isolationism and said Iraq's deterioration may have been prevented if Washington had maintained a larger U.S. presence there. General James Amos, who is scheduled to retire this fall, offered strong views on both debates.

"On Iraq, Amos said he believes that the Islamic State of Iraq and Syria (ISIS) takeover of central Iraq and the growing political fissures between Maliki and the country's embattled Sunni minority may have been avoided if the United States hadn't completely withdrawn from the country in 2011. 'I have a hard time believing that, had we been there and worked with the government and worked with the parliament and worked with the minister of defense, the minister of interior, I don't think we'd be in the same shape today,' Amos said during an event at the Brookings Institute."

I agree with this distinguished military leader, and it breaks my heart, as it breaks the heart of General Amos and other marines and other troops, to see what has happened after all of the blood and sacrifice and treasure the United States has spent. If we had gotten the correct advice and we had been given a more realistic something, this disaster could have been avoided. It's up to people like you to help us understand the ways and means to prevent this type of disaster from happening in Afghanistan.

I believe you're the man to do it. But we look to you to come back to us and tell us the truth and give us your best guidance as a military expert on what we need to do to make the situation work in Afghanistan.

Thank you, sir.

Chairman LEVIN. Thank you very much, Senator Wicker, and I join you in feeling a level, a very strong level of confidence that that's exactly what General Dunford would do and, as he has testified this morning, has the obligation to do if the assumptions which have been made don't turn out to be correct. I join you in that feeling of necessity that we can count on our top military leaders to do just that. I talked to General Dunford about the same thing in my office and I thank you for your commentary here today.

Senator Kaine.

Senator KAINE. Thank you, Mr. Chairman.

General Dunford, congratulations on the appointment and thank you for your service. You have a lot to be proud of in the work that you've done together with American military and our coalition partners to enhance the capacity of the ANSF.

I had a hearing recently in the Foreign Relations subcommittee that I chair about Afghan civil life post-2014. Your predecessor, General Allen, said something that kind of made us all sit back in our chairs. After talking about continuing security challenges, General Allen said, but corruption is a bigger threat, existential threat, to Afghan society than security challenges are. He wasn't minimizing security challenges. He was elevating corruption challenges.

We all were struck by that. But when I've watched the playout of the elections in Afghanistan, the Taliban threatened them from a security standpoint, but, as you pointed out, the ANSF did a superb job in blocking the Taliban from being able to disrupt the elections. The challenge with the elections were allegations of corruption. The corruption threat proved to be more real or to be more impactful on this election process than the security challenge.

I think that is proof of the adage that General Allen made, but it's also proof of the good work that you've done, and I applaud you for it.

Questions about your role as Commandant should you be confirmed, and I have confidence you will be. You have to balance a lot of tough priorities: security priorities, personnel priorities, and budgetary priorities. The needs of today are usually readiness challenges and the needs of tomorrow modernization. Let me ask you about both of those.

What are your greatest concerns regarding readiness today in the Marine Corps?

General DUNFORD. Thanks, Senator. General Amos has ensured that all marines who are deployed in harm's way, forward deployed, forward engaged, deploy at the highest state of readiness. Those forces are absolutely well equipped and well trained.

Having said that, we've paid the cost over the years for making sure that those marines that are forward deployed, forward engaged, have the wherewithal to accomplish the mission, and that cost has been borne at home station. Today approximately 50 percent of our units at home station are in a degraded state of readiness. That's largely an equipment readiness issue today as a result of the years of war and wear and tear on our equipment.

Certainly one of the key things would be to ensure that we have the resources necessary to reset that equipment that'll be coming out of Afghanistan. As you may know, Senator, we've identified a minimum of 2 years as the window of time where we continue to need Overseas Contingency Operations funding for that very reason, to reset that force and to restore the Marine Corps to be the force that you expect it to be, which is not half ready, but completely ready to do whatever the Nation asks it to do.

Senator KAINE. What are your top priorities on the other side of the ledger, for force modernization, as you come into the role of Commandant?

General DUNFORD. Senator, I think, broadly speaking, the critical thing is that you expect us to be a naval expeditionary force in readiness. You expect us to be able to come from the sea in a wide range of conditions, again in every clime and place. I think today there's a number of areas where we're going to have to focus to ensure that we do have the amphibious and the expeditionary capabilities necessary to fight tomorrow's war as well as today.

I think balancing those requirements for modernization with today's readiness is going to be a significant challenge, and I know you'll help us with that, Senator.

Senator KAINE. Indeed, one of the challenges you have in the modernization side is acquisition programs. You inherit some acquisition programs, some that are working very successfully, some not as successful. What will be your philosophy as Commandant in

the acquisition area to make sure that the investments in technology and equipment that we make are well spent?

General DUNFORD. Senator, where I have seen acquisition programs work is where leadership is personally and decisively engaged in the acquisition program. If confirmed, I can assure you, particularly on the major defense acquisition programs, that the program manager, if not in fact, but certainly in practice, will be me.

Senator KAINE. Talk a little bit about the progress the Marine Corps has made in opening up combat-based Military Occupational Specialties to women since Secretary Panetta's announcement in early 2013?

General DUNFORD. It's clear to me that the Marine Corps understands the direction set by Secretary Panetta, and by January 2016 we'll be prepared to make recommendations as to exceptions to policy. I think the approach the Marine Corps has taken now, a deliberate and measured and responsible approach, is exactly the one that I would take were I to be confirmed. Certainly, at the end of the day you can be sure that the recommendations that I would make would be based on the impact to the combat effectiveness of the Marine Corps in order to meet the standards that you expect the Corps to meet.

Senator KAINE. Finally, General, just a compliment. Often as I travel I'm traveling in a Foreign Relations capacity, not an Armed Services capacity, and I interact with the Marine security guard at the various embassies we have around the world. That is a critical program that has been enhanced in the aftermath of the Accountability Review Board's (ARB) recommendations following the tragedy in Benghazi.

But I've just been enormously impressed with this program and with the Marines' ability to scale it up to meet the ARB recommendation. I don't know; it may be one of the few billets in the Marine Corps where you get to serve without a commissioned officer telling you what to do. It's, I think, all NCOs and enlisted personnel. But they do a superb job, and we just need to make sure we continue to pay attention to that program, help the Marine Corps as it needs budgetary resources to staff it up.

I just want to tell you that the appreciation of the State Department for the great work the Marine security guard folks does is very, very high and I share that.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Kaine.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

I want to thank you, General Dunford, for your incredible leadership in Afghanistan. I can't think of a better man to serve as Commandant. I also want to thank your wife, Ellyn, for everything that she's done for our country and the Marine Corps.

I wanted to ask you, General, if we follow the course of action that's been announced by the administration in Afghanistan without any changes in the reduction of forces—in other words, 9,800 to half at the beginning of 2016, to about 1,000 embassy presence in the beginning of January 2017—what's the best case scenario for what happens in Afghanistan? Then I would also like you to an-

swer: with no changes to the pace withdrawal, what's the worst case scenario, so we can understand what the two possibilities are.

General DUNFORD. Thanks, Senator. The best case scenario for the next couple years would be that, first, we have a successful political transition this year. The Afghan forces continue to be successful coming out of the fighting season. They have increased confidence and capability in the fall of 2014. The international community meets their Tokyo and Chicago commitments, so we have the resources necessary to sustain the force and to continue the development efforts that are critical to Afghanistan's future; that the relationship between Afghanistan and Pakistan improves such that they have a cooperative relationship in dealing with extremism; and that we minimize the risk of malign actors being involved inside of Afghanistan as they grow and develop.

The Afghan security forces in the best case scenario would be sustainable by 2017, such that a very small presence inside the U.S. embassy, in what we describe as a Security Cooperation Office that would manage foreign military sales, engagements, and so forth, with some amount of ministerial capacity advising as well, would be there.

But in effect, by 2017 we would have addressed those gaps that have identified for the Afghan forces, they would be sustainable, and again we would have stability as a result of political transition.

The worst case scenario over the next 2 or 3 years would be, first, it starts with the political transition and we don't have successful political transition. I think that's a foundational element to any success that we're going to have.

We also begin to lose international community support over time. The Af-Pak relationship doesn't go in a direction that we want it to and both states fall short of where we would want them to be in terms of being effective counterterrorism (CT) partners, both from a capacity perspective and from a will perspective.

If we then found ourselves in 2017 without a decisive presence in the region and without effective CT partners in the form of Afghanistan and Pakistan and those two nations cooperating with each other, I think what you would see in 2017 in a worst case scenario would be the space that al Qaeda would need to grow stronger and to plan and conduct operations against the West, something that they haven't been able to do over the last several years because of a combination of the pressure, largely the pressure that our U.S. Government interagency partners and our special operations have placed, but also contributed to by the support that we've had from Pakistan and Afghanistan.

Senator AYOTTE. Let me follow up on that. With the announcement by the administration, you talked about the 9,800 troops, our contribution, in 2015 you're satisfied with. The administration has announced that that would be cut in half in 2016. If that is followed through in terms of cut in half, one of the things you said in answer to Senator Chambliss is an important mission that we've had in Afghanistan is actually ensuring that al Qaeda could not replicate September 11, and the way we have done that is keeping up pressure, continued pressure, not only on those who would want to threaten us in Afghanistan, but for example their counterparts in the Haqqani Network in Pakistan.

If we go down to half at the beginning of 2016—the CT presence has been beyond Kabul, correct?

General DUNFORD. It has, Senator.

Senator AYOTTE. Absolutely, and it would be in 2015. What happens in the beginning of 2016 if we cut them in half? Where are we located?

General DUNFORD. In 2016, Senator, in accordance with the plan right now, we would have fundamentally a Kabul-centric approach. The bases that are outside of Kabul would be closed or transferred to the Afghan forces or the Afghan Government by 2016.

Senator AYOTTE. If we do that, that's pretty soon actually, if you think about it. That would be the beginning of 2016 we would go to a Kabul-based presence. What does that do overall to our ability to keep pressure on those networks on the CT mission, assuming something doesn't dramatically change with regard to those who would want to threaten us from Pakistan and Afghanistan?

General DUNFORD. Senator, that would reduce our collections capability, our signals intelligence, our human intelligence, and our strike capability. It would be a significant reduction in our overall counterterrorism capability.

Senator AYOTTE. If we have that significant reduction in our overall counterterrorism capability beginning in 2016, what does that do in terms of threats that we could potentially face to our Homeland?

General DUNFORD. Senator, I think the equation, you have to look at it in the perspective of what is Afghanistan's CT capacity, what's Afghanistan's CT capacity and will, and what's the nature of the threat. From my perspective, we would have to be in a position to close the gap between the Pakistani and the Afghan CT capacity and will versus the threat in 2016.

While I don't know what the threat will be in 2016, my sense is we'll still need an effective counterterrorism capability based on my projection of the threat and based on the growth of Afghan and Pakistani CT capacity and will.

Senator AYOTTE. Just to be clear, an effective CT strategy, unless the conditions dramatically change between now and the beginning of 2016, really has to be beyond Kabul for us to ensure that we can keep that pressure to protect our Homeland; is that true?

General DUNFORD. Senator, the only way that it will be successful for us to be in Kabul—probably a different way to say it—would be if Afghanistan and Pakistan are capable of dealing with the threat in 2016.

Senator AYOTTE. Let me just ask one final question, which is: If we think about the presence in Kabul and what's happening with regard to the counterterrorism strategy, what is it that they would have to accomplish between now and then? It seems like it would be quite a bit. If we wanted to change course, when would we have to make that decision, because obviously we have presence outside of Kabul and we're pulling into, if we cut the troops in half in 2016, back into Kabul. That takes some time.

When would you or General Campbell, who will be the new commander on the ground, have to come to us and the administration and say, we really shouldn't pull all back into Kabul, we're going

to have to keep a greater presence? What's our timeframe for that so we understand?

General DUNFORD. Senator, I'll answer that and then go back to the first part of your question. The timeframe from my assessment—and again, it's based on closing of infrastructure—would be in the September timeframe, October timeframe of next year, would be the latest time when you could actually effect the change, because what will happen subsequent to that is you'll begin to draw down the infrastructure, close or transfer those facilities that currently house our forces outside of Kabul. About a year from now would be when that discussion would probably have to take place.

With regard to what the Afghans would have to do to be successful in the counterterrorism fight in 2016, there's really two critical gaps that affect their CT capacity. One is their aviation capability and then the other is the intelligence enterprise as a whole. While those are developing, we still expect that the aviation enterprise will still have some capability gaps in 2016, as well as the intel enterprise. Those are longer-term challenges that we're addressing.

Senator AYOTTE. I thank you, General. I also would point out, I think you've said that some of our CT missions we conduct independently because our interests in protecting the Homeland—while the Afghans, we have a great partnership with them, ultimately it is our interest, and those need to be focused on as well. Their CT mission may not be as focused as we would be on that particular mission. Would you agree with that?

General DUNFORD. Senator, there are operations we conduct in the region unilaterally, yes.

Senator AYOTTE. Thank you, General.

Chairman LEVIN. Thank you, Senator Ayotte. Thank you also for pointing out that it'll be General Campbell who will be responsible for giving us his best military advice next year. Both Senator Wicker and I got commitments from General Dunford that he'll make those honest assessments, but it really will be General Campbell in terms of Afghanistan—who we got the same assurance from, by the way, as we did from General Dunford. But thank you for pointing that out.

Senator AYOTTE. Thank you. One thing I do know is, we know that General Campbell hopefully will call on General Dunford for his advice.

Chairman LEVIN. We do.

Senator AYOTTE. That would be appreciated. Thanks.

Chairman LEVIN. Thank you for smoothing over that little omission.

General Hirono—I mean, Senator Hirono. I made a General out of Senator Hirono. [Laughter.]

Senator HIRONO. Thank you. Thank you, Mr. Chairman.

General Dunford, I join my colleagues in thanking you for your decades of distinguished service and now taking on this new challenge. I'd like to also take this opportunity to thank the folks at Hawaii's Kaneohe Bay. There are 10,000 marines, 2,000 sailors, 4,000 family members, 1,400 civilian employees at Marine Corps Base Hawaii Kaneohe Bay. I certainly want to give a shout-out to them.

You have been asked a question earlier about the January 1, 2016, date to provide standards for the occupations within the Marine Corps for which all personnel, including women, will have the opportunity to compete. I just wanted to ask you, who in the Marine Corps is the lead person or persons coming up with these standards and where are you in this process?

General DUNFORD. Senator, the lead person who approves those standards is General Amos, our Commandant. I know from my previous experience as the Assistant Commandant that he's been personally and decisively engaged in approving those standards. There's certainly a staff down at Quantico that works this for him. Our Training Command is involved, our Combat Development Integration Command is involved, but at the end of the day in our Service the Commandant is the one who approves the standards.

Senator HIRONO. Thank you.

I think you also mentioned during your responses that training is very important, of course, to all of our Services, but to the Marine Corps. I understand that the availability of training ranges—and we have a big one on the Big Island called Pohakuloa Training Area (PTA). Could you share your thoughts on the importance of training ranges, especially as we rebalance to the Asia-Pacific?

General DUNFORD. Senator, I can, and thanks for that question. In two previous assignments, I was involved in what we describe broadly as the Pacific laydown. One of the critical elements as we reviewed the laydown was to ensure that we had sufficient ranges where we can do the kind of combined arms integrated training that allows our Marine air-ground task force that are forward deployed to be successful in combat.

It would not be an overstatement to say that training ranges, the opportunity to actually develop the skills of integrating combined arms, are inextricably linked to our success on the battlefield.

Senator HIRONO. We were told that the Marine Corps spends 63 cents on the dollar to pay for benefits, health care, and other personnel costs. There is a challenge to balance readiness and personnel costs. If confirmed, how would you come up with this balance of personnel costs with readiness while meeting the mission requirements of the Marine Corps? What would be the questions you would ask to come up with this balance?

General DUNFORD. Senator, first, I view all the money that we spend in the Marine Corps as going towards marines. Some of it is in the form of compensation. Some of it is in the form of ensuring that they have good equipment. Some is in the form of good training. Some goes to ensuring that the infrastructure that supports marines and their families is in good shape and provides the services necessary.

I think your question is how would I balance it. I would consider each of those variables to deliver an effect, and that effect is that we would have the force in readiness that you expect your Marine Corps to be.

Senator HIRONO. I think the sense is that 63 cents of every dollar going to personnel costs is not necessarily the kind of balance that you would want to have in order to make sure that your readiness needs are met.

General DUNFORD. Senator, there's no question. In fact, our procurement account, to put it in some context, is about 8 percent in the current fiscal year environment. Clearly in a perfect world we'd have more money going towards modernization and we'd have more money going towards infrastructure. Those are the two bill-payers right now as we focus on assuring that our marines that are in the fight today and forward deployed have good equipment, have good training. The bill-payers have been our modernization account as well as our infrastructure account.

Senator HIRONO. My best to you in achieving the balance and meeting the needs of the marines.

I want to turn to our force structure, because there are going to be a lot of questions asked about what is the appropriate mix for the Active and Reserve units in the Marine Corps. Other Services are having to ask those questions themselves. With the challenges to personnel drawdowns in the Marine Corps in the future, what do you believe will be the best approach to achieve a balanced force in both the Active and Reserve components of the Marine Corps?

General DUNFORD. Senator, thanks for that question. I actually believe that over the past decade we've validated both the size, the organizational construct, as well as the method of employment of our Marine Reserve Force. I wouldn't see any significant changes. I do know that the Commandant now has chartered a group to review the capabilities and capacities inside our Marine Forces Reserve to make sure that we've properly incorporated the lessons learned, to make sure that we have the right mix of forces inside the Marine Forces Reserve.

But we feel pretty comfortable that the overall size of the Marine Forces Reserve right now is just about right.

Senator HIRONO. This committee spent a lot of time on the issue of sexual assault in the military. You responded to a series of questions that have been put to you regarding the Marine Corps's efforts in combating sexual assault in the military and you noted that, while you're satisfied that you're proceeding ahead, but there is much more work to do.

I wanted to ask you, based on the changes that we've made to the statutes that apply and the Marine Corps's own efforts, how would you determine the success or the effectiveness of what the Marine Corps is doing to, one, prevent sexual assaults and, two, when they occur to take appropriate action and prosecute?

General DUNFORD. Thanks, Senator. I think the areas where I'm encouraged even from the outside looking at the Marine Corps and what they're doing is the changes in the command climate as it pertains to sexual assault. Both the surveys that have been conducted have indicated increased trust and confidence in Marine Corps in reporting sexual assault, confidence in the chain of command that proper action would be taken. The other statistic that is encouraging to me is the numbers of reported sexual assault, which, while it's increased, I think we all recognize that historically it has been underreported and so increased reporting over the last couple years is a positive step in the right direction.

But with regard to your question, when will I be satisfied, I'll be satisfied when there's no sexual assaults. The effect that we're trying to achieve in establishing the command climate, the effect we're

trying to achieve in ensuring that we have bystander training and bystander intervention, the effect we're trying to achieve to ensure that all marines are treated with dignity and respect, the results that we expect out of all of that and the results we expect from decisive leadership is that we won't have sexual assaults in the U.S. Marine Corps, and I think that's when we'd be satisfied.

Senator HIRONO. That's very commendable. My question had to do with, of course, as you go toward that goal of zero sexual assaults how are you going to make sure that that is happening and that you will continue to have a commitment to see those changes come about? I assume your answer is yes, that you will have a continuing commitment.

General DUNFORD. Senator, I will. I think probably the key piece from my perspective is that it's all about commanders, it's all about leaders, it's all about standards, and it's all about holding people accountable to those standards.

Senator HIRONO. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Hirono.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

General Dunford, to you and your family, you've done an extraordinary job in Afghanistan and every other assignment that you've taken on. The President chose wisely to make you the next Commandant of the Marine Corps and I think you will get an overwhelming vote in a bipartisan fashion because you've deserved it and you've earned it.

To your family, thank you for your service to our country.

As to Afghanistan: do you agree with me if there is a failure to get this election closed out in an acceptable fashion, where somebody acknowledges defeat, and there's a failure to form a unity government thereafter, no amount of American troops is going to make Afghanistan successful?

General DUNFORD. I agree with that, Senator.

Senator GRAHAM. As a matter of fact, if that doesn't happen I'd be the first one to say to get the hell out of there. To the Afghans, in case you're listening, that's my view.

Now, let's assume for a moment that that can all be accomplished, and I think it will. Two lanes: CT, train, advise, and assist, numbers. You're okay with the numbers in 2015, is that correct?

General DUNFORD. I am, sir.

Senator GRAHAM. You're okay with the regional approach being in place in 2015?

General DUNFORD. I am, Senator.

Senator GRAHAM. Let's talk about what we lose over time. We have about 7,000 Special Forces types in the mix right now on the ground today?

General DUNFORD. We do, Senator.

Senator GRAHAM. By January 2015, it will be 3,000?

General DUNFORD. Approximately, Senator.

Senator GRAHAM. By January 2017, it will be basically zero.

General DUNFORD. It isn't determined at this time, Senator.

Senator GRAHAM. Yes, it is. It is determined at this time. The President has announced he will go to a security cooperation force in 2017, or did I miss—

General DUNFORD. No. Roger, Senator. If you're talking the—

Senator GRAHAM. I'm talking about the plan in place. I'm not talking about changing the plan. I'm talking about the plan the President has adopted.

General DUNFORD. No, I understand.

Senator GRAHAM. You agree it will be virtually zero?

General DUNFORD. Certainly close to that, Senator.

Senator GRAHAM. Okay. Now let's look at the threats we face. Do you see by the end of 2016 any reasonable possibility that the al Qaeda types—al Qaeda core, al Qaeda-affiliated groups, other groups that live and thrive on the Afghan-Pakistan border—will be contained in such a fashion as to not represent a threat to the Homeland? Is that remotely possible?

General DUNFORD. I don't see it at this time, Senator.

Senator GRAHAM. Your view is that the threat by the end of 2016 that we face to the Homeland is going to be extinguished—I could not agree with you more—but our CT forces will be, unless somebody changes this. Do you agree that's a high-risk strategy, given the likelihood of the threat?

General DUNFORD. Unless it's mitigated by Afghan or Pakistan—

Senator GRAHAM. On paper it's a high-risk strategy?

General DUNFORD. From a CT perspective.

Senator GRAHAM. Yes. Now let's talk about the delta to be filled in from 7,000 to zero. If you had to grade the Afghan-Pakistan working relationship on anything, particularly counterterrorism, what grade would you give it?

General DUNFORD. Today a D.

Senator GRAHAM. D. The difference between our counterterrorism capability and the Afghans', how would you rate that difference?

General DUNFORD. Significant.

Senator GRAHAM. Yes. Okay.

Now let's talk about the other aspect, train, advise, and assist. You were asked to evaluate the plan on paper and you said if everything works out well that by 2017 on the train, advise, and assist lane we might be okay?

General DUNFORD. It would be possible to develop sustainability by that time.

Senator GRAHAM. Right. There's a lot of assumptions that have to be made and met; is that correct?

General DUNFORD. There are, Senator.

Senator GRAHAM. Some of these assumptions are pretty enormous, right?

General DUNFORD. There are significant assumptions.

Senator GRAHAM. To hit all the gates, would it be akin to kicking a 65-yard field goal?

General DUNFORD. Senator, it would be difficult to hit all the gates exactly as we've outlined.

Senator GRAHAM. I think it would be kicking a 65-yard field goal into the wind. But that's just my two cents' worth.

Now, this is on paper. My statement to the committee is that on paper there's a disaster in the making, to our Homeland and to losing all the gains we've fought for inside of Afghanistan, by drawing down too quick and not being able to help the Afghans in a reasonable fashion. If it does change, I will be the first to applaud the changes. But if it doesn't change, it is a complete absolute disaster in the making.

As to political reconciliation between the two candidates, are you optimistic that this will work out?

General DUNFORD. Senator, I am.

Senator GRAHAM. Are you optimistic that the Afghan people will continue to want us around?

General DUNFORD. I'm absolutely optimistic about that.

Senator GRAHAM. There is absolutely no reason for any American politician to believe that we're not welcome to stay in Afghanistan?

General DUNFORD. Senator, both presidential candidates, as well as the vast majority of the Afghan people, support the bilateral security agreement and a continued U.S. presence.

Senator GRAHAM. If al Qaeda is able to regenerate in this region and our CT presence goes down to virtually zero, would you expect an attack on our Homeland in the next 5 years?

General DUNFORD. Certainly based on the intent of the enemy, I would, Senator.

Senator GRAHAM. A lot's at stake, right?

General DUNFORD. There is, Senator.

Senator GRAHAM. Now, as we go into evaluating our force structure, what have we done to the Marine Corps in your opinion if we get back on the road to sequestration?

General DUNFORD. Senator, as I've looked at what sequestration does to the U.S. Marine Corps, at a force level of 175,000 it really gets to the issues that we've talked a little bit about here this morning. It's an inability to balance the need to be ready for today's crises with the requirement to meet at least a minimum threshold of investment for modernization, infrastructure, and other programs that support marines.

I think you're really on a path, without overstatement, to use General Meyer's comment from the 1980s, you're really on a path to a hollow force. If you have sequestration and you maintain a Corps of 175,000 marines, I don't think there's any question about that.

Senator GRAHAM. Would you agree with me that Congress will have done more damage to the Marine Corps than any enemy that you could face on the battlefield?

General DUNFORD. Senator, there isn't an enemy that has had much success against marines, so I would agree with that.

Senator GRAHAM. Thank you for your great service. I look forward to seeing you in the future.

Chairman LEVIN. Thank you, Senator Graham.

Senator Donnelly.

Senator DONNELLY. Thank you, Mr. Chairman.

General, thank you very much for your service. You've done extraordinary work. I've had the privilege of being with you in Afghanistan and have seen first-hand what you've done.

To your family, the time he spent there helped change the world for us. We know you missed him, but we were very grateful to have him there with us.

Sir, as Commander of the Marine Corps, this past year—we are so impressed by what you've done and you're going to get an overwhelming vote. As you walk in, in the last year we lost 45 marines to suicide. I think this is a critical issue. I hope you do. I was wondering your intention to work with your team to try to make a difference here.

General DUNFORD. Senator, thanks for that question. I will be personally engaged in it, as I was as the Assistant Commandant for 2 years. I think it's fair to say that at the beginning of the war our understanding of mental health was rudimentary at best, and over the past decade we've learned quite a bit. I think one of the more encouraging things is the National Intrepid Center of Excellence that's been established up at Walter Reed to do really some great research into both traumatic stress and traumatic brain injury. In terms of mental health, we'll certainly be engaged in that.

With regard to suicide, of course, there's other factors, because most of those suicides aren't related to the combat experience. But we'll do all we can to ensure that we have leadership that recognizes the warning signs of suicide. We'll make sure that we have proper medical care available when those warning signs are identified, that the leadership gets marines to proper help. We'll continue to work at what is in effect a scourge.

Senator DONNELLY. One of the most disheartening things we saw in Iraq was that a lot of the generals who we had worked with, helped train, were replaced by, in effect, pals of the people in charge. As we look at Afghanistan, we're trying to learn from the lessons that we've seen in Iraq. We have Abdullah Abdullah, Ashraf Ghani. Obviously, President Karzai still has a great amount of influence.

Obviously we think we have the right generals in place in the Afghan army now. Do you feel confident they can avoid that same type of situation, where talent and ability is taken out so they can have friends, in effect, come in?

General DUNFORD. Senator, thanks. Confident, but not complacent, in that particular area. Both candidates have made a commitment to pick the right people in the security ministries. I thought one of the more encouraging things that came out of this weekend's discussion is that, of the many areas they talked about in terms of the political track and the accommodation they would make, one of them was to stabilize the leadership inside the ministry of defense and ministry of interior during the transition. They both recognized the importance.

I know from Dr. Ghani, he was my counterpart during transition last year, and he certainly recognizes the importance of selecting the right leadership inside the security ministries. I've had enough conversations with Dr. Abdullah's people where I think he recognizes the same.

It won't be that we won't have a patronage network that has an effect on appointments inside of Afghanistan. That will be the case for some time to come. But what we have today in the form of the corps commanders, brigade commanders, and other key leaders and

also inside the ministry of interior with our police leadership is a recognition by senior leadership that, while they may have some other factors besides merit that would cause people to be selected for senior leadership positions, there has to be a foundation of merit for each of the appointments that are being made.

I'm encouraged by that, but that's certainly something that the next Government of Afghanistan is going to have to continue to emphasize and focus on.

Senator DONNELLY. You had a very specific assignment with Afghanistan, and now as Commandant of the Marine Corps, obviously all over the world. As you look at this, through your experience, where do you see the biggest threat to our country right now, the greatest source of potential danger to an attack here and where it would be coming from?

General DUNFORD. Senator, I think the greatest challenge today is the numbers of failed and failing states that provide sanctuary for extremists who create a threat to this country. Of course, it's not any longer geographically focused. It's focused in all those areas where the enemy has the space within which to plan and conduct operations against the West. I think that's certainly at this point the most critical near-term threat to our security.

Senator DONNELLY. Have you seen any indication—for instance a group like ISIS, they're involved in Iraq. But is it, from everything you've seen, do they still cast an eye toward over here, toward coming after us as well?

General DUNFORD. Senator, I think the very change that they made to their name indicates the risk that's greater than Iraq. They've changed their name to the "Islamic State" and declared a caliphate inside of Iraq, which clearly reflects aspirations for operations globally.

Senator DONNELLY. To go back to Afghanistan for a second, we've seen Pakistan pushing harder in the tribal areas, trying to go after a lot of the Pakistan Taliban. How has the effect of that been on Afghanistan? Has it pushed more over into the region that you've been in charge of or that you've been working with the Afghans on? Or how do you see that long-term having an effect?

General DUNFORD. Near-term, Senator, we have seen a large number of refugees. The estimates are probably between 70,000 and 100,000 refugees. We're also certainly aware of enemy forces moving from Pakistan into Afghanistan. We've had a disruptive effect on the extremists that were in North Waziristan. There's a positive effect as well as those challenges of the enemy moving to Afghanistan.

I think what remains to be seen and what we're watching very closely is, what will Pakistan do as these groups start to move back towards North Waziristan. We have a commitment from our Pakistani counterparts right now that they will not allow groups like Haqqani to come back, and they've taken visible measures to destroy the infrastructure of Haqqani in Miranshah and North Waziristan as a whole. But frankly, that's something that I think is to be determined, and we're watching that very closely. I think it's going to require that we stay engaged with our Pakistani counterparts to ensure that that does not happen again.

Senator DONNELLY. One final question is, what do you think will be your greatest challenge in inheriting this position as you move forward?

General DUNFORD. Senator, I think the greatest challenge is going to be to continue to provide a ready force of marines to the country today and at the same time make the kinds of decisions and the kinds of investments that ensure that we have a ready Marine Corps tomorrow.

Senator DONNELLY. Thanks again. You've been an inspiration to not only marines, but to our servicemembers all over the country, and to us as well. We're very, very proud of your work.

General DUNFORD. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Donnelly.

Senator Cruz.

Senator CRUZ. Thank you, Mr. Chairman.

General, thank you for being here, thank you for your testimony, and thank you for your service to our country.

I'd like to ask you questions about several national security threats across the globe, starting with what you and Senator Donnelly were just discussing, which is the situation with ISIS. Right now in Iraq, roughly how many Americans are on the ground in Iraq, both civilian and military?

General DUNFORD. Senator, I'm not sure how many exactly. I think it's somewhere short of a thousand.

Senator CRUZ. How would you characterize our ability right now to ensure the safety of those Americans?

General DUNFORD. I'm confident that General Austin, the Commander of the U.S. Central Command, who I speak to several times a week, has taken proper measures to provide force protection for those forces and in the environment that he's put them in he's made sure that there's measures to mitigate the risk to the force. Certainly a dangerous combat environment, always a risk. But I'm also confident in General Austin's leadership that he's done all he can to mitigate that risk.

Senator CRUZ. What about the American civilians who are in Iraq? What is our ability to ensure their safety?

General DUNFORD. Senator, at this time I'm not aware of our capacity to actually provide security for the civilians that are in Iraq, unless you're talking about U.S. Government civilians, in which case they're certainly part of the whole comprehensive force protection plan on the ground for both our diplomatic personnel as well as our uniformed personnel.

If you're talking about people that are there in a private capacity, then I think our ability to provide security to them on a day-to-day basis is fairly limited.

Senator CRUZ. To what extent is our ability to maintain security both for civilian and military personnel dependent upon the Shia militia that are there?

General DUNFORD. Senator, I think the security conditions in Iraq as a whole are absolutely linked to the political process and the viability of the government. That's, I think, how we get in the situation we're in. It's a manifestation of a lack of inclusive government and political challenges that spilled over into security. I think

it shows the inextricable link between stability and security as well as viable governance.

Senator CRUZ. General, I will share with you I am deeply concerned about our ability to protect the Americans who are there, particularly as the situation seems to be deteriorating and we find ourselves between two implacable foes: ISIS, who are so extreme that they were thrown out of al Qaeda, which is a pretty remarkable feat, and who have expressed an open desire to attack and kill Americans; and on the other side the Islamic Republic of Iran, who likewise are rabidly anti-American and have the same desire.

What nobody wants to see is a reprise of what we saw in the late 1970s, another hostage situation of Americans who find themselves in an incredibly hostile situation where enemy forces capture Americans and hold them hostage. Number one, I would certainly urge you and urge your colleagues in the military to continue doing—and I know you're endeavoring to do this—but to continue doing everything humanly possible to prevent against such a situation and to do everything we can to mitigate the risks of it spiraling out of control so that American citizens are not caught between two warring factions and trapped in a place from which we have no ready exit.

General DUNFORD. I'll do that, Senator.

Senator CRUZ. Let's shift to a neighboring country which is very much involved right now in what's happening in Iraq, and that is Iran. In your military judgment, how significant of a threat would you characterize the possibility of Iran acquiring nuclear weapon capability?

General DUNFORD. I think that would be extraordinarily significant, Senator.

Senator CRUZ. In your judgment, what would happen if Iran were to acquire nuclear weapons capability?

General DUNFORD. I think they would use the leverage of nuclear weapons to meet their expansionist objectives and destabilize the region.

Senator CRUZ. If, God forbid, Iran were to acquire nuclear weapons and if, God forbid, they were to make the second decision of being willing to use those weapons, based on the radical religious extremism that motivates so-called Supreme Leader Khamenei and the mullahs in Iran, in your view how much damage could Iran do to America or her allies if Iran was willing to use nuclear weapons to maximize the damage?

General DUNFORD. Senator, it would be hard for me to envision how they may use those or what might happen. But I can say that clearly that would be a threat to our vital national interest, which is the protection of the Homeland and the people of the United States.

Senator CRUZ. If Iran, say, were able to use a nuclear weapon launched from a ship offshore of the United States into the atmosphere to create an electromagnetic pulse (EMP) on the eastern seaboard, what would the impact be to this country?

General DUNFORD. Any nuclear weapon that would go off in the United States would have a horrific effect on people.

Senator CRUZ. An EMP in particular, how would that impact the civilian population if an EMP were detonated in the atmosphere above the eastern seaboard?

General DUNFORD. An EMP would essentially shut down our communications network, would be one of the more significant outcomes of EMP.

Senator CRUZ. Would there be additional impacts in terms of transportation, in terms of distribution of food, in terms of distribution of basic means for survival?

General DUNFORD. All those things, Senator, are impacted by our ability to communicate. My expectation is that all of them would be adversely affected.

Senator CRUZ. Let me finally shift to Afghanistan. How significant would you characterize the threat right now of radical Islamic terrorism both in Afghanistan and in neighboring Pakistan?

General DUNFORD. We are managing the threat to the Homeland now as a result of the pressure that we're putting on the networks, so I believe we are at moderate risk as a result of the extremists in the region. But again, that risk is assessed in the context of the force that we have on the ground inside of Afghanistan and our efforts with Pakistan.

Senator CRUZ. The final question on exactly that point: If we proceed with the plan that the President has laid out in 2016 to drop our forces to roughly a thousand in and 2017 to drop it to zero, what will be our capacity to engage in counterterrorism to limit the threat from the radical Islamic terrorists in that region?

Senator CRUZ. The tools that we'll have available to deal with or to conduct counterterrorism in 2017 in the scenario that you've outlined is the will and capacity of Pakistan and the will and capacity of Afghanistan.

Senator CRUZ. We would be dependent on their forces and unable on our own to defend ourselves from terrorist threats emanating from that region?

General DUNFORD. Again, Senator, if you're projecting a threat and you're projecting that we would not have any forces there, then we would be dependent on Afghanistan and Pakistan.

Senator CRUZ. That is a deeply troubling scenario.

Thank you, General.

Chairman LEVIN. Thank you, Senator Cruz.

Senator Gillibrand.

Senator GILLIBRAND. Thank you, Mr. Chairman.

Welcome, General. I want to talk a little bit about gender integration. If confirmed, what is your goal with regard to combat integration into the Marine Corps?

General DUNFORD. Senator, I'm aware of the direction that Secretary Panetta put forth in February 2013. Since that time General Amos has outlined a deliberate, a responsible, and a measured approach. There's analysis ongoing right now that would inform any recommendations for an exception to the direction that Secretary Panetta outlined in February 2013. I'm aware that that recommendation would have to be made by January 2016, and any recommendation that I make would be informed by the research that's being done and by the impact on the combat effectiveness of the Marine Corps.

Senator GILLIBRAND. Is the research that you're referring to the review of creating gender-neutral standards that reflect the physical needs of the task?

General DUNFORD. That is a piece of the research that's being done, Senator.

Senator GILLIBRAND. If confirmed, do I have your commitment to keep my office apprised of how that review is going and what the time line for integration is and whether there will be any exceptions?

General DUNFORD. You do, Senator.

Senator GILLIBRAND. What phase of implementation is the Marine Corps in now? What is your expected time line?

General DUNFORD. Senator, I would have to get back to you. I know that we're prepared to make a recommendation by the deadline of January 2016. I know the Marine Corps has just initiated an integrated task force that will in part inform any recommendation for exceptions to policy. I believe we're on path to make a recommendation by the deadline, but I'm not sure——

Senator GILLIBRAND. I thought the deadline was to actually have integration completed by January 2016.

General DUNFORD. Senator, my understanding was that the recommendation was due by January 2016. But I'd ask to take that for the record and get back to you.

Senator GILLIBRAND. Okay, that would be helpful.

[The information referred to follows:]

Please see attached letter.

HEADQUARTERS
 United States Forces-Afghanistan
 Kabul, Afghanistan
 APO AE 09356

18 July 2014

The Honorable Kirsten Gillibrand
 United States Senate
 Washington, DC 20510

Dear Senator Gillibrand,

Thank you for your questions yesterday during the confirmation hearing, particularly those on the Marine Corps' integration plan, and how the timing of its output supports the Secretary's direction.

My understanding is that the Marine Corps' integration plan fully supports compliance with the Secretary's direction. In his memorandum of 24 January 2013 directing the rescission of the 1994 Direct Ground Combat Definition and Assignment Rule, the Secretary of Defense wrote, "[i]ntegration into newly opened positions and units will occur as expeditiously as possible, considering good order and judicious use of fiscal resources, but must be completed no later than January 1, 2016." To support this timeline, the Marine Corps intends to forward any notification of intent to open a ground combat arms MOS or unit (with completed legal reviews) and, if necessary, any recommendation for an exception to policy, no later than 1 October 2015.

If confirmed, I assure you I will take personal responsibility for ensuring that the Marine Corps implements the Secretary's directive in a deliberate, measured, and responsible manner. I further assure you that I will make the decision to integrate, or provide a recommendation for an exception, based on rigorous, unbiased research. In making any decision, my foremost commitment will be to combat effectiveness and the welfare of our Marines.

Thank you again for your support to our Marines, and if confirmed, I look forward to the opportunity to work with you on these issues.

Very Respectfully,

A handwritten signature in black ink, appearing to read "J. F. Dunford, Jr."

J. F. Dunford, Jr.
 General, U.S. Marine Corps
 Commander
 International Security Assistance Force/
 United States Forces-Afghanistan

Senator GILLIBRAND. Turning to Afghanistan, we've seen a few difficulties with regard to the Afghanistan presidential election. Do you believe that's going to have an impact in our post-2014 planning, and if so how?

General DUNFORD. Senator, if we did not have successful political transition, an effective political transition, it would have a significant impact on our post-2014 presence. But I would quickly add that right now, in the wake of the agreement made over the weekend and where we are in fact, I'm happy to report that we started collecting ballots yesterday and our forces are currently supporting

the auditing of all the ballots, that we're on a path to have effective political transition and, frankly, in a positive sense, effective political transition I think will increase the prospects of our success in a post-2014 environment.

Senator GILLIBRAND. What do you think the major challenges will be for the next commander of the ISAF?

General DUNFORD. The major challenges, Senator, will be to address the capability gaps that the Afghan security forces have right now. First is what I broadly describe as ministerial capacity. That's the ability for the ministries to do the planning, the programming, the budgeting, the acquisition necessary to support tactical-level organizations, so that they have the spare parts and the ammunition and the pay and those things that will allow them to be sustainable.

The second capability gap that exists is in the aviation enterprise, and we still have a couple years to go before we complete the aviation enterprise. We have a number of pilots now that have been trained, a number of aircraft that have been delivered, but the overall enterprise requires additional work.

The third capability gap is the intelligence enterprise. Much of the intelligence that the Afghans have had available to them over the last few years has been a result of the coalition providing them with that intelligence, and so their organic capability to produce and have intelligence drive operations is another capability gap area.

Then the fourth area that I think my successor would have to focus on would be their special operations capability, which obviously are inextricably linked as well to that aviation and intelligence capability.

Those four areas are the areas I think of primary focus for a post-2014 presence.

Senator GILLIBRAND. Do you think there's any lessons we could learn from Iraq in terms of our withdrawal there that we could apply to Afghanistan? Is there any lessons learned that we should be mindful of?

General DUNFORD. Senator, I do. I think there's a significant lesson learned, and that is the need to do a transition to develop sustainable Afghan forces and to oversee the establishment of effective governance, as opposed to withdrawal. I think our withdrawal in Iraq did not allow us the time to develop sustainable Iraqi forces and to provide the environment within which effective governance would develop.

Senator GILLIBRAND. Now, in terms of our drawdown in Afghanistan, what do you think the impact will be on the region? Do you think it will undermine our ability to do antiterrorism work? Will it undermine any other broader security interests?

General DUNFORD. Senator, in 2015, the force that we have envisioned that will conduct both train, advise, and assist for the Afghans as well as counterterrorism operations, I think actually will have a stabilizing effect on the region. Most of the regional actors, probably less Iran have encouraged the United States to maintain a presence in 2015, and I think the size force that we have in 2015 will allow us to accomplish those two tasks that I just outlined. But

they will also contribute to a positive psychology in the region and a confidence that Afghanistan will not deteriorate.

Senator GILLIBRAND. What are your largest concerns in the region right now?

General DUNFORD. The single biggest concern I have right now is probably the sanctuary that al Qaeda has in—

Senator GILLIBRAND. In Iraq?

General DUNFORD.—in Pakistan.

Senator GILLIBRAND. Oh, in Pakistan.

General DUNFORD. When you talk the region writ large—I of course, Senator, was focused strictly on Afghanistan and Pakistan. But clearly, if you look at the region as a whole you'd have to be concerned with what's going on in Iraq today as well as what's going on in Iran.

Senator GILLIBRAND. With regard to Pakistan, what would your recommendations be? Pakistan has been so difficult to work with. They really have been reluctant to do missions we've asked them to do, to crack down on terrorist networks when we find them. They're very unwilling partners. What would your recommendation be to the President on how best to address the terrorism concerns in Pakistan?

General DUNFORD. Senator, I don't think any of us have an easy answer to Pakistan other than continued engagement and engagement based on support that we would provide with regard to specific conditions that have to be met. I do believe that Pakistan recognizes that extremism is an existential threat to Pakistan. I think they lack the capacity to deal with that threat completely. I don't personally see any alternative other than continued engagement with Pakistan to assist them in dealing with those problems inside of Pakistan, as well as to contribute to regional stability.

I think we've seen what we did in the 1990s when we isolated Pakistan in the wake of the Pressler amendment, which is the other alternative we could take at this particular time, and I don't think the results of our disengagement in the 1990s would cause us to want to go back to that. I think continued engagement would be what I'd recommend to the President, with a very clear framework within which we would have a partnership.

Senator GILLIBRAND. Thank you. Thank you, General.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

Just a couple questions for me. In terms of the counterterrorism after 2016, you indicated we would be dependent upon Afghanistan and Pakistan in that area. Does that answer not assume that none of the thousand or so people that we would have at the embassy would have a counterterrorism mission? Does it not also assume something else, which is that we would not have a Central Intelligence Agency (CIA) capability in that area?

General DUNFORD. Mr. Chairman, thanks for the opportunity to clarify on the 1,000. As I made an effort to say earlier, unsuccessfully, some number of those would be involved in counterterrorism, I would assume. But more importantly, those thousand that might be envisioned in the embassy in 2017 would also be contributing to Afghan security force counterterrorism capacity. One of the key tasks after 2017 would be continued development of those key ele-

ments of their special operations capability, the aviation and intelligence being two of the more important.

Chairman LEVIN. In terms of the possibility of CIA capability in that area?

General DUNFORD. Mr. Chairman, I don't know what the CIA would envision. We certainly know that unless there was a different laydown of forces in Afghanistan in 2017, they wouldn't have any significant bases in Afghanistan in 2017, I think is the President's plan right now.

Chairman LEVIN. But some of the thousand could be assisting them in a counterterrorism effort if they so decide?

General DUNFORD. If we have joint special operations capability there, I'd assume, Mr. Chairman, that they'd be operating in a collaborative manner with other elements of the government.

Chairman LEVIN. That could be part of the thousand as well?

General DUNFORD. Part of the thousand could be in support of the other elements of the U.S. Government, yes, Mr. Chairman.

Chairman LEVIN. There was a statement Senator McCain heard from some Afghan military leaders that they feel abandoned by us. That's not the sense I got from Afghan military leaders. I got the sense that, obviously, they'd like us to stay for a much longer period of time, but they are very grateful, number one; and that they feel that they have a capability going forward. I sense some sense of disappointment, obviously. We're their brothers in a lot of ways, but that they also feel a strong and capable as well.

How would you describe the Afghan military leaders in terms of their feelings towards us?

General DUNFORD. Mr. Chairman, in the wake of the announcement some were obviously disappointed that it was not longer. But the truth of the matter is that on a day-to-day basis right now the Afghan leadership is a lot more focused on the security challenges in 2014 and working with us to develop sustainable forces in 2015. But it's not a topic of routine conversation with our Afghan counterparts right now.

Chairman LEVIN. You're talking about the military counterparts?

General DUNFORD. I'm talking about the military counterparts specifically, Mr. Chairman.

Chairman LEVIN. Thank you.

Yes, Senator King.

Senator KING. A quick question and an observation, Mr. Chairman.

The question is: General, how long were you in Afghanistan? How long was your assignment?

General DUNFORD. Senator, I'm still there. I've been there 18 months.

Senator KING. When would you, if confirmed, when would you make the transition to Commandant?

General DUNFORD. Senator, I think probably sometime this fall.

Senator KING. Mr. Chairman, this is a thought that's crossed my mind several times during these hearings, but it's really come into focus today. This man is one of the most capable, intelligent, proven successful commanders that I've ever worked with or seen. More importantly, he has tremendous experience in Afghanistan. Any management system that arbitrarily moves somebody out of a job

after 19 months, given what he knows and experience—and I'm sorry to his good wife; don't worry, I'm going to vote to confirm him—that's nuts. That's a crazy management system.

This is one of the most important jobs in our country right now and we're taking a guy who really knows how to do it and has learned how to do it and the experience goes away. I just think this is something the committee ought to talk about. I understand the goal of the military of turning over assignments and not having people get stale and those kinds of things. But to get to the level that he's gotten to and with his leadership, I just think it's a management mistake to arbitrarily say, okay, no matter how well you're doing, no matter what your experience is, we're going to move you on. I just want to make that observation.

Thank you.

Chairman LEVIN. Thank you. I think that's intended to be and is, obviously, a huge compliment to you, General Dunford. While probably your predecessor, we could have said the same for him because he also had that huge experience which we didn't want to lose, nonetheless you came and provided amazing capability and competence. Your successor will as well in Afghanistan. We have confidence in General Campbell.

General Amos has been a fabulous Commandant and his successor, who I'm looking at right now, will add another extraordinary chapter to Marine Corps history.

What you're raising, Senator, is a fascinating issue. I don't have an easy answer to it other than so far we've seen a succession of amazing commanders in Afghanistan. I won't say we've lucked out because I think the system has produced those. It's not a matter of luck; it's a matter of real, intense effort to have a system which produces great leaders, and we've done that.

It's sort of ironic, however, to be looking at a general who has done an amazing job—and you and I have seen that first-hand—in Afghanistan. But on the other hand, I have at least the next set both in Afghanistan and as the Commandant. I think this amazing capability, competence, loyalty, patriotism to our country will continue. I know your experience in Afghanistan is not going to be lost in any event. It's going to be very much available.

What Senator King is raising is a very interesting issue, which perhaps in other circumstances we would have to say, well, whoops, is this really what we want? I think in the current circumstance at least, as Senator King says, he's going to be voting very affirmatively for you, for your confirmation, as I think every member of this committee will. The compliment, though, which he just paid to you is intended to be exactly that, which I think all of us feel about you. What he just said is a huge compliment to you and to the Marine Corps, and also to the system which produces leaders such as yourself.

We thank you, your family. We look forward to a confirmation which is timely so that General Amos, who deserves a great successor, will have one quickly and General Campbell can take his job, his responsibility, over.

We will stand adjourned.

[Whereupon, at 11:46 a.m., the committee adjourned.]

[Prepared questions submitted to Gen. Joseph F. Dunford, Jr., USMC, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I don't see a need for modifications at this time.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. N/A.

DUTIES

Question. What is your understanding of the duties and functions of the Commandant of the Marine Corps?

Answer. Section 5043 in title 10 of U.S.C. clearly prescribes the duties and functions of the Commandant of the Marine Corps. The Commandant, subject to the authority, direction, and control of the Secretary of the Navy, leads the recruiting, training, organizing, and equipping of the Marine Corps to support military operations by combatant commanders. As a member of the Joint Chiefs of Staff, the Commandant is responsible for advising the President, the National Security Council, the Homeland Security Council, and the Secretary of Defense.

Question. What background and experience, including joint duty assignments, do you possess that you believe qualifies you to perform these duties?

Answer. I have served in a variety of key service and joint assignments within the Department of Defense that I believe qualify me to perform the duties of Commandant. I have commanded marines from the platoon-level to the Marine Expeditionary Force and currently lead our joint and coalition partners as the Commander of both U.S. Forces and the International Security Assistance Force in Afghanistan. In addition to these leadership assignments, I have served as the Vice Director of Operations for the Joint Staff, the Deputy Commandant for Plans, Policies, and Operations, and the Assistant Commandant of the Marine Corps.

Question. Do you believe that there are any steps that you need to take to enhance your ability to perform the duties of the Commandant of the Marine Corps?

Answer. If confirmed, I will continue to study and seek to better understand the full range of issues affecting the Marine Corps and our broader national security.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next Commandant of the Marine Corps?

Answer. The major challenges that will confront the next Commandant of the Marine Corps include supporting marines at war in Afghanistan, ensuring the Marine Corps remains ready to immediately respond to any other crisis or contingency, all while balancing the need to modernize for tomorrow's crises and contingencies. It will be particularly important that the next Commandant ensure that the Marine Corps maintains and continues to develop the expeditionary and amphibious capabilities the Nation requires of its Corps of Marines. This will require making difficult decisions in a period of fiscal austerity.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will work with the Secretary of the Navy, the Chief of Naval Operations, and Congress to ensure that the Marine Corps is properly resourced to meet both today's and tomorrow's challenges.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Commandant of the Marine Corps?

Answer. If confirmed, I will emphasize the need to maintain high quality, well-trained marines and a high state of readiness. The first priority will be to provide

those marines in harm's way with all that they need to fight and win. I will also continue to build on the superb foundation established by the current and former Commandants in professional military education, junior leader development, wounded warrior programs, and family readiness. I will also prioritize the development and fielding of capabilities that will ensure that the Marine Corps remains a relevant, naval, expeditionary force-in-readiness in the context of the 21st Century Strategic Landscape.

ROLE OF THE MARINE CORPS IN COUNTERTERRORISM

Question. What do you see as the Marine Corps' role in countering the threat of international terrorism?

Answer. The Marine Corps is the Nation's crisis response force and stands ready to counter the full spectrum of threats to national security including international terrorism. Our perennially forward deployed Marine Expeditionary Units (MEU), as well as our newly-developed Marine Air/Ground Task Forces-Crisis Response (MAGTF CR), stand ready to counter terrorist threats and respond to instances of terrorist attack. In addition to these formations, the Marine Corps Security Force Regiment is a dedicated security and anti-terrorism unit that supports high-value naval units and facilities. It maintains specially trained Fleet Anti-terrorism Security Teams (FAST) in a high state of readiness to prevent or respond to terrorist threats worldwide.

The Marine Corps also provides the U.S. Special Operations Command with highly trained Critical Skills Operators from the Marine Corps Special Operations Command that are uniquely capable of supporting the fight against international terrorism.

Question. What role do you envision for the Marine Corps in homeland security and homeland defense?

Answer. The defense of the Homeland begins on far shores as part of a collaborative interagency defense-in-depth. The primary contribution of the Marine Corps is to protect the homeland by being forward deployed and forward engaged to shape the environment and respond to crises before the Homeland is threatened.

When and if directed by the President or Secretary of Defense, the Marine Corps uses its Active Duty and Reserve Forces to rapidly respond to natural disasters or other threats against the homeland.

Question. If confirmed, do you plan any major changes to Marine Corps warfighting doctrine?

Answer. If confirmed, I do not plan any major changes to Marine Corps warfighting doctrine. I believe it is fundamentally sound. I do believe we can and should make evolutionary changes as we internalize the lessons learned from the last decade of crisis and contingency response and as changes occur in the strategic landscape.

U.S. FORCES IN AFGHANISTAN

Question. The United States has been negotiating a Bilateral Security Agreement (BSA) with Afghanistan which would provide the framework for some U.S. forces remaining in Afghanistan after the end of 2014. President Obama has announced that, assuming a BSA is signed, the United States is prepared to retain 9,800 troops in Afghanistan after the International Security Assistance Force (ISAF) mission ends in December of this year. The President also announced that by the end of 2015, that U.S. military presence would be reduced by roughly half, and by the end of 2016, the United States would draw down its military personnel in Afghanistan to a normalized Embassy presence with a security assistance office.

Do you support the President's decision on a continuing presence for U.S. forces in Afghanistan after 2014?

Answer. Yes.

Question. Do you support the pace of the drawdown of the U.S. military presence in Afghanistan between December 2014 and the end of 2016, as announced by the President?

Answer. Yes, with an understanding that we should continue to validate the assumptions and assess the conditions on the ground as the drawdown takes place.

Question. Should the Marine Corps be supporting such a sustained deployment of forces if we continue a presence in Afghanistan?

Answer. Yes.

MARINE CORPS FORCES SPECIAL OPERATIONS COMMAND

Question. Marine Corps Forces, Special Operations Command (MARSOC), is a subordinate component command to the U.S. Special Operations Command (SOCOM) established in 2005.

What is your assessment of the progress made in standing up and growing MARSOC, and what do you consider to be the principal issues that you would have to address to improve its operations?

Answer. I believe that MARSOC has become a highly effective and fully integrated part of the Special Operations Command. I have personally observed MARSOC's significant contribution to the campaign in Afghanistan. Also, the feedback I have received from leadership within the special operations community has been uniformly positive. Improving MARSOC will require continued emphasis on screening, training, personnel assignment policies, equipping, and the integration of MARSOC within the special operations community, with the MAGTF, and with other conventional forces.

Question. The Marine Corps has a primary military occupational specialty for enlisted marines trained as special operators allowing these personnel to remain in MARSOC for their professional careers.

Do you believe officers should have a similar opportunity as enlisted marines to serve the duration of their military career in MARSOC rather than rotating through the command as they do currently?

Answer. I understand that the Commandant and Commander, SOCOM are in agreement that the current model of Marine officer assignment is not optimal. A joint Marine Corps-SOCOM assessment is in process to develop a more effective model. If confirmed, I will fully support that assessment and work with SOCOM to develop the most effective officer assignment policy.

EFFECTS OF DEPLOYMENTS ON READINESS

Question. What is your assessment of the current state of readiness of the Marine Corps?

Answer. I believe the Marine Corps has demonstrated its readiness over the past decade in responding to contingencies in Iraq and Afghanistan and to a wide range of crises across the world. That said, I know our home station readiness has been degraded as we have appropriately prioritized the readiness of those Marines who are forward deployed.

Question. In your judgment, are combat operations in Afghanistan adversely affecting the readiness or retention of marines on active duty and in the Reserve component?

Answer. The Marine Corps has preserved readiness of deploying and next-to-deploying units. This includes units and marines deploying to Afghanistan. I am not aware that combat operations in Afghanistan have adversely affected readiness or retention. Furthermore, Marine units assigned to Afghanistan have arrived prepared and ready for the mission.

Question. If confirmed, what will be your priorities for maintaining readiness in the near term, while modernizing the Corps to ensure readiness in the out years?

Answer. If confirmed, I will prioritize resetting Marine Corps equipment from the wear and tear of operations in Iraq and Afghanistan and restoring home station readiness. While near term readiness will remain the priority, I will work with the Secretary of the Navy and Congress to ensure that the Marine Corps is adequately resourced to deliver a ready Marine Corps tomorrow.

RECRUITING AND RETENTION

Question. What do you consider to be the key to the Marine Corps' success in recruiting the highest caliber American youth for service and retaining the best personnel for leadership responsibilities?

Answer. The key to Marine Corps' recruiting success is the continued focus on finding highly qualified young men and women who are seeking the challenge of serving their nation. Continued access by recruiters to high schools and colleges not only assures the opportunity to engage a diverse and quality market, but also a market with the proven mental abilities to serve in technically challenging fields. Another key component of our recruiting success is the Marine Corps' image of smart, tough, elite warriors. The time proven intangible benefits of service, pride of belonging, leadership, challenges, and discipline are what we offer. Those attributes are what allows us to remain America's Force in Readiness.

Question. What steps do you feel should be taken to ensure that current operational requirements and tempo do not adversely impact the overall readiness, recruiting and retention, and morale of the Marine Corps?

Answer. Effective recruiting will require that we continue to maintain a high quality and properly resourced recruiting force. I also believe sustaining an operational tempo of at least 1:2 will ensure that our readiness, retention, and morale remain high.

Question. What is your assessment of current recruiting standards, particularly DOD-wide criteria for tier-one recruits, and their propensity to accurately predict minimal attrition and future success in military service?

Answer. Existing DOD standards enable the Service to find young men and women who want to meet the challenge of becoming a U.S. marine. If confirmed, I will continue to monitor our recruiting and retention efforts.

Question. What impact, if any, do you believe the Department's proposals aimed at slowing the growth of personnel and health care costs will have on recruiting and retention in the Marine Corps?

Answer. If confirmed, I will carefully review the compensation reforms and the effects on recruiting and retention.

Question. Do you believe that if Congress does not support these proposals, the resultant pressure on training and modernization resources could begin to harm retention?

Answer. I believe that compensation reforms must be informed by the fundamental requirement to maintain our crisis response and warfighting capabilities. If confirmed, I will carefully review the compensation reforms and the effects on training, modernization, and retention if Congress does not support the reforms.

MILITARY COMPENSATION

Question. What is your assessment of the adequacy of military compensation?

Answer. The Marine Corps is meeting our recruiting and retention goals, and the current compensation package produces the force we need. If confirmed, I will continue to assess the adequacy of military compensation to ensure we recruit and retain the highest quality Marines.

Question. What recommendations would you have for controlling the rising cost of personnel?

Answer. Given the fiscal constraints on the Department of Defense, I believe that the compensation proposals put forward by the President in the 2015 budget request are reasonable measures to slow the growth in military compensation in order to strike a balance between personnel costs, training, and modernization that protects readiness.

Question. Do you personally support the administration's compensation and health care proposals?

Answer. Yes, I support these proposals. They slow the rate of compensation growth which is necessary for the Marine Corps to maintain readiness under current budget constraints. This budget achieves the necessary and appropriate balance in compensation, training, equipment, and modernization. It sustains the recruitment and retention of high-quality personnel needed to defend our Nation, while still providing quality compensation and health care benefits to our servicemembers. If confirmed, I will continually assess compensation and health care to ensure that we continue to maintain the balance between compensation, training, equipment, and modernization.

Question. As the Marine Corps has the highest percentage of servicemembers who leave after their first term, what is your assessment of the adequacy of compensation and benefits available for non-career servicemembers?

Answer. By design, the Marine Corps is a young Service and purposefully retains fewer servicemembers at the first reenlistment decision point than the other Services. Today, we are meeting all of our recruiting and retention goals and the quality of the force is extraordinary. Based on that fact, I believe compensation and benefits for non-career servicemembers is adequate.

EDUCATION FOR MARINES

Question. An important feature of the Post-9/11 GI Bill is the ability of career-oriented servicemembers to transfer their earned benefits to spouses and dependents.

What is your assessment of the effect of the Post-9/11 GI Bill on recruiting and retention of marines?

Answer. I believe that the Post-9/11 GI Bill positively contributes to recruiting and retaining high quality marines.

Question. In your view, what has been the effect of the transferability option on retention and career satisfaction of marines?

Answer. According to Marine Corps surveys, for all non-retirement eligible marines who were required to make a fiscal year 2015 reenlistment decision, 53 percent specifically indicated that the ability to transfer their benefits was an influence to stay in the Marine Corps.

Question. How important do you believe tuition assistance benefits are to young marines, and what trends do you see in the Marine Corps' ability to pay for such programs at current levels over the FYDP?

Answer. Post-secondary education is an important part of individual marines improving their personal and professional development. Encouraging well-qualified marines to utilize any and all resources to better themselves via education and training is part of the Marine Corps ethos. This leads to better marines and in turn better citizens. I understand that the Marine Corps is adequately funded to provide tuition assistance benefits to well-qualified marines.

Question. What changes, if any, would you recommend to current eligibility criteria for tuition assistance?

Answer. I believe the Marine Corps is properly executing the tuition assistance program and I have no recommendations to change current eligibility criteria.

ASSIGNMENT POLICIES FOR WOMEN IN THE MILITARY

Question. The Department in January 2013, rescinded the policy restricting the assignment of women to certain units which have the primary mission of engaging in direct ground combat operations, and gave the military Services until January 1, 2016, to open all positions currently closed to women, or to request an exception to policy to keep a position closed beyond that date, an exception that must be approved by the Chairman of the Joint Chiefs of Staff and the Secretary of Defense. The Marine Corps continues to develop gender-free physical and mental standards for all military occupations, presumably with the goal of allowing individuals, regardless of gender, to serve in those positions if they can meet those standards.

If confirmed, what role will you play in the development of these standards?

Answer. If confirmed, I will be decisively engaged in the development of gender-free standards for all military occupations to ensure that we continue to field the most capable Marine Corps possible.

Question. If confirmed, will you ensure that the standards are realistic and preserve, or enhance, military readiness and mission capability?

Answer. Yes.

Question. Do you believe that decisions to open positions should be based on military requirements? If so, what steps would you take to ensure that such decisions are made on this basis?

Answer. Yes, and all of my recommendations to the Secretary of the Navy, Secretary of Defense, and Congress will be made in that context.

RELATIONSHIP BETWEEN STAFF JUDGE ADVOCATE TO THE COMMANDANT OF THE MARINE CORPS AND COUNSEL FOR THE COMMANDANT, U.S. MARINE CORPS

Question. How are the legal responsibilities of the Marine Corps allocated between the Staff Judge Advocate to the Commandant and the Counsel for the Commandant?

Answer. The Staff Judge Advocate to the Commandant of the Marine Corps (SJA to CMC) is the senior uniformed legal advisor to the Commandant and Headquarters, Marine Corps staff and agencies. In particular, the SJA to CMC supervises and manages the practice areas of military justice, operational law, civil and administrative law, legal assistance, and ethics.

As detailed in Department of the Navy policy (SECNAVINST 5430.7Q), the General Counsel of the Navy provides the Marine Corps with legal advice in the following areas: acquisition law, business and commercial law, real and personal property law, civilian personnel and labor law, fiscal law, environmental law, intellectual property law, ethics, and Freedom of Information Act and Privacy Act law.

Question. Who has responsibility for providing legal advice on military justice matters in the Marine Corps?

Answer. The SJA to CMC is responsible for delivering military justice advice to the Commandant of the Marine Corps and Headquarters Marine Corps. In all other commands throughout the Marine Corps, judge advocates, exercising the same independence required by the law, are the only individuals responsible for providing legal advice to commanders on military justice matters.

Question. What is the role, if any, of the Counsel for the Commandant in the duty assignments of Marine Corps judge advocates?

Answer. The Counsel for the Commandant has no formal role in the duty assignments of judge advocates. The assignment of Marine Corps judge advocates remains with the Commandant.

Question. What is your view of the need for the Staff Judge Advocate to the Commandant to provide independent legal advice to the Commandant of the Marine Corps?

Answer. It is essential that the SJA to CMC provide independent legal advice to the Commandant. The SJA to CMC's legal advice is independent because he is not subject to evaluation or supervision in the content of his advice from anyone other than the Commandant. Fundamental to the duty to provide independent advice is the need for that advice to be provided without any form of interference by others.

Question. What is your view of the responsibility of Marine Corps judge advocates to provide independent legal advice to Marine Corps commanders?

Answer. Like the SJA to CMC, Marine Corps judge advocates at all levels must be able to provide—and commanders must receive—independent advice on the exercise of convening authority. Part of what gives Marine Corps judge advocates the ability to provide timely and accurate independent advice is their service as unrestricted line officers. The common culture and philosophy, gained through shared professional background, experiences and hardships, builds trust, credibility, and context between commanders and their judge advocates, improving both the quality and independence of that advice.

GENERAL OFFICERS

Question. At the request of the Secretary of Defense, Congress included a provision in the Duncan Hunter National Defense Authorization Act for fiscal year 2009 that designated up to 324 general and flag officer positions as joint duty assignments that are excluded from the limitation on the number of general and flag officers in each Service, and specified the minimum number of officers required to serve in these positions for each Service.

What is your view of the merits of this provision and its impact on the Marine Corps?

Answer. This provision allows expanded assignment opportunities for Marine Corps' general officers and the exemptions provided under section 526 provide increased flexibility for the Marine Corps and the Department to meet steady-state and emergent requirements. The "Joint Pool" enables us to satisfy the intent of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 by improving unification, cooperation, and coordination between the Services and the combatant commanders in joint training and education and in the execution of military operations.

Question. What impact has the implementation of this provision had on joint officer assignments of Marine Corps general officers?

Answer. While the number of assignment opportunities has not increased by an appreciable number, the strategic approach to joint officer resource management has increased the variety of opportunities available. This has improved the quality of officers in the joint community. This ensures the development of well-rounded, more effective senior officers, which benefits the Department of Defense and Marine Corps.

Question. In your view, does the Marine Corps have statutory authority for a sufficient number of general officers to meet mission requirements of the Corps and joint requirements?

Answer. Yes, the numbers currently authorized are adequate for our current and future obligations and aligned with our future force structure plans.

Question. The results of recent promotion selection boards for brigadier general have shown that a number of best qualified officers have not completed all requirements (i.e., joint professional military education, or joint tours of duty) before consideration by selection boards.

What factors do you consider most important in the difficulty experienced by field grade Marine Corps officers in satisfying joint requirements for promotion?

Answer. With the establishment a few years ago of the experience path to attain Joint Qualification, there is little difficulty for our best performing field grade officers to be fully qualified for consideration for selection to brigadier general.

Question. Do you think that in today's operational environment that these requirements for promotion to O-7 should be modified?

Answer. No.

Question. What steps are being taken to ensure that officers who are competitive for promotion to general officer rank are able to fulfill all joint education and experience requirements?

Answer. Field grade officers are assigned to Joint Duty assignments and to Joint Professional Military Education (JPME) II producing schools (War Colleges) based on their performance. Our most competitive officers are provided those assignments.

FAMILY READINESS AND SUPPORT

Question. Marines and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of concerns among military families as a result of the stress of deployments and the separations that go with them.

What do you consider to be the most important family readiness issues in the Marine Corps, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced, especially in light of current fiscal constraints?

Answer. The most important issues are providing timely and accurate communication to our marines and their families while properly resourcing the support functions on our bases and stations. If confirmed, I will ensure the Marine Corps remains committed to providing marines and families with a comprehensive and effective community based support system.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of deployments. These programs must be relevant and attractive to all eligible users, including active duty and Reserve personnel, retirees, and their eligible family members.

What challenges do you foresee in sustaining and enhancing Marine Corps MWR programs, particularly in view of the current fiscal environment and, if confirmed, are there any improvements you would seek to achieve?

Answer. Our greatest challenges are the fiscal realities of sequestration. If confirmed, I will ensure that we sustain priority programs that support the health, welfare, and morale of our marines and families. I will also maintain a dialogue with our marines and families to ensure that our MWR programs adapt to meet our highest priority needs.

SUICIDE PREVENTION

Question. The numbers of suicides in each of the Services continue to be of great concern to the committee.

If confirmed, what role would you play in shaping suicide prevention programs and policies for the Marine Corps to prevent suicide and increase the resiliency of marines and their families?

Answer. Suicide prevention is a leadership issue. If confirmed, I am committed to continue to set the climate to eradicate the stigma of getting help for this behavioral health issue. Our leaders must be engaged and knowledgeable of resources available to address this issue. We must also know our marines and be alert to the signs that they need help. The resiliency of our marines and their families will remain a priority.

WOUNDED WARRIOR REGIMENTS

Question. Servicemembers who are wounded or injured in combat operations deserve the highest priority from their service and the Federal Government for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge. Despite the enactment of legislation and renewed emphasis over the past several years, many challenges remain.

What is your assessment of the effectiveness of the Marine Corps Wounded Warrior Regiments in facilitating the treatment and management of wounded, ill, and injured marines?

Answer. I am extremely proud of the Marine Corps' focus on Wounded Warrior Care. As Assistant Commandant of the Marine Corps, I carefully tracked the progress of our Wounded Warrior Regiment, and if confirmed, will continue to expect the best care for our wounded, ill, and injured marines.

Question. If confirmed, are there additional strategies and resources you would pursue to increase service support for wounded marines, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, caring for our wounded, ill, and injured marines and sailors will remain one of my highest priorities. During my time as the Commanding General of I MEF and Assistant Commandant of the Marine Corps, I worked with our

Wounded Warrior Regiment leadership to ensure services were readily available to support our marines.

If confirmed, I will seek counsel from the Medical Officer of the Marine Corps and other medical experts to ensure that we are proactively identifying symptoms, and addressing psychological health needs. I view this as a continuing commitment from the Marine Corps to its marines.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The fiscal year 2013 Department of Defense Annual Report on Sexual Assault in the Military reflects that reports of sexual assault in the Marine Corps increased by 86 percent from fiscal year 2012 to 808 reports of sexual assault in fiscal year 2013.

What is your assessment of this report?

Answer. The DOD Annual Reports on Sexual Assault provide us with comparative snapshots that allow us to measure progress across years. I will carefully assess the report and be prepared to provide further input to the committee.

Question. What is your assessment of the problem of sexual assaults in the Marine Corps?

Answer. Sexual assault has no place in our Corps. Sexual assault not only has a long-lasting effect on the individual victim, but it also erodes unit readiness and command climate. The Commandant has placed particular emphasis on this issue and put measures in place to eliminate sexual assault. If confirmed, I will build on the current foundation.

Question. What is your assessment of the Marine Corps sexual assault prevention and response (SAPR) program?

Answer. I see positive progress and indicators that the Marine Corps SAPR Program is going in the right direction. However, I also believe that there is still much work to do. We must continue to increase reporting and decrease prevalence. We need to emphasize prevention to include focusing on potential offenders, implore all marines to be active and responsible bystanders, and integrate the SAPR Program with other aspects of behavioral health. Marines must all work together to create an environment in which crimes of misconduct are not tolerated in any form.

Question. What is your view of the provision for restricted and unrestricted reporting of sexual assaults?

Answer. Protecting the victim of sexual assault is imperative. Though unrestricted reporting provides a bridge to offender accountability, I respect that some victims do not want an investigation about these intensely personal details. Restricted reporting is a vital resource for these marines, who may not otherwise come forward to access advocacy, medical, mental health, and legal services. I believe that giving victims access to the services they need is vital, regardless of how they report the crime.

Question. What is your view about the role of the chain of command in providing necessary support to victims of sexual assault?

Answer. I believe that the chain of command is invaluable to victims of sexual assault. Furthermore, commanding officers are responsible for setting positive command climates that not only help prevent the crime of sexual assault but that also provide a safe environment where victims feel confident coming forward to report. Without that initial trust and faith in their chain of command, victims may not report.

The chain of command is absolutely critical in creating a climate that is non-permissive to sexual assault. The chain of command also ensures that victims are in a safe and non-retaliatory environment and facilitates access to all supportive services.

Question. What is your understanding of the adequacy of Navy and Marine Corps resources and programs to provide victims of sexual assault the medical, psychological, and legal help they need?

Answer. I understand that the Marine Corps provides and continues to expand each of these services, which aims to encourage more victims to participate in the military justice process. However, I fully understand that the true measure of the effectiveness of these programs is how well they meet the needs of the victim.

Question. What is your view of the steps the Marine Corps has taken to prevent additional sexual assaults both at home station and deployed locations?

Answer. I believe the Marine Corps has taken the right steps to combat sexual assaults within its ranks, however much work remains. I am committed to confronting this crime.

Question. What is your view of the adequacy of the training and resources the Navy and Marine Corps to investigate and prosecute allegations of sexual assault?

Answer. I am encouraged by the progress the Marine Corps has made in many areas of victim response, but the goal must be to further improve these services so that more victims stay engaged in the process and, as a result, offenders are held accountable.

Question. What is your view about the role of the chain of command in changing the military culture in which these sexual assaults occur?

Answer. I believe the role of the commander is central to sexual assault prevention within the military. The commanding officer of every unit is the centerpiece of an effective and professional warfighting organization. They are charged with building and leading their team to withstand the rigors of combat by establishing the highest level of trust throughout their unit.

Commanding officers are responsible for setting and enforcing a command climate that is non-permissive to sexual assault, a climate in which the spirit and intent of the orders and regulations that govern the conduct of our duties will be upheld. There are a number of leadership styles, but the result of any of them must be a group of marines and sailors who have absolute trust in their leaders. Trust in the commander and fellow marines is the essential element in everything we do. Developing this trust, dedication, and esprit de corps is the responsibility of the commanding officer. They do this by setting standards, training to standards, and enforcing standards.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted?

Answer. Removal of commanders' convening and disposition authority will adversely affect good order, discipline, and combat effectiveness. The commander is responsible for everything the unit does and fails to do. This responsibility cannot be overstated. When a unit enters combat, success is directly dependent on the commander's ability to enforce his or her orders and standards. The commander's authority to refer charges to court-martial, especially for the most serious offenses such as sexual assault, is essential.

Judge advocates outside the chain of command do not share the commander's responsibility for the unit, and have different priorities when determining what action to take in a particular case.

Question. What additional steps would you take, if confirmed, to address the problem of sexual assaults in the Marine Corps?

Answer. I am encouraged by the progress the Marine Corps' has made, however there is much work to be done. If confirmed, I plan to sustain the momentum and progress of Marine Corps' SAPR efforts, and ensure that all marines are committed to preventing this crime.

Question. What is your assessment of the effect, if any, of recent legislation concerning sexual assault on the capability of Marine Corps commanders to prosecute sexual assault cases, including cases where prosecution is declined by civilian prosecutors?

Answer. I believe enhancing the commanders' ability to prosecute sexual assaults is a step in the right direction. I am also encouraged by the provisions granting victims of sexual assault the right to participate more fully in judicial proceedings against their assailants. I expect that these new rights will make victims of sexual assault more willing to participate in sexual assault prosecutions. Greater participation by victims will likely enable Marine Corps' commanders to refer more cases to court-martial because better evidence will support such referrals.

RECAPITALIZATION

Question. The Marine Corps intends to concurrently recapitalize several of its front line systems. The MV-22 Osprey tilt-rotor aircraft and the Joint Strike Fighter are both scheduled to be in production at the same time.

Do you believe that these production plans are realistic in light of the demands on resources imposed by maintaining current readiness?

Answer. I understand the current production plans are realistic. I believe these platforms are vital to support marines on the battlefield.

Question. Do you believe that these modernization programs will survive unless Congress amends the Budget Control Act to eliminate or reduce the effects of sequestration for fiscal year 2016 and beyond?

Answer. I understand that sequestration will increase risk across all Marine Corps' modernization efforts.

Question. Is it your understanding that MV-22 readiness rates in Iraq, Afghanistan, and in the U.S. have achieved desired levels?

Answer. In my current assignment I have been incredibly pleased with the performance of the MV-22. They have demonstrated readiness levels sufficient for combat missions in Afghanistan. I understand that readiness rates in the United States are slightly lower, but sufficient to meet our requirements.

Question. In your view, will the MV-22 be sustainable over time at an acceptable cost?

Answer. Yes. If confirmed, I will seek to continue the trend in reduced operating costs.

ARMY AND MARINE CORPS CAPABILITIES

Question. What are your views regarding the joint development and acquisition of Army and Marine Corps equipment?

Answer. In my experience, the Marine Corps and the Army collaborate whenever our mission profiles converge. From a business perspective, collaboration leverages significant Army fiscal, manpower, and test resources in the refinement of operational capabilities requirements and the research, development, and acquisition of technical solutions to meet those requirements. Long-term benefits include lower average unit costs for both Services.

Question. Do you believe the Joint Staff should have a role in synchronizing Army and Marine Corps requirements and service programs?

Answer. The Army and Marine Corps Board (AMCB) works at every level to make sure both Services collaborate on best practices. I believe the AMCB provides sufficient oversight to synchronize requirements and programs.

Question. What programs would you consider to be candidates for joint program development for the Army and Marine Corps?

Answer. I do not have any recommendations to provide at this time.

MODERNIZATION OF AMPHIBIOUS CAPABILITIES

Question. The Marine Corps' current concepts for modernization of its amphibious capabilities includes ships, ship to near-shore or shore connectors—such as the LCAC—and armored amphibious combat vehicles. Modernization across these systems is complex, technically challenging, and potentially unaffordable given the budget environment today and for the foreseeable future.

What is your assessment of the current capability of amphibious maneuver and assault systems in the Navy and Marine Corps?

Answer. Marine Corps organic amphibious maneuver and assault capability and the preponderance of general support infantry mobility is provided by our Assault Amphibian Battalions equipped with 40-year old AAV-7A1 Assault Amphibious Vehicles. Without significant additional modifications and enhancements, these vehicles do not provide adequate force protection or lethality and will increasingly suffer declining readiness as subcomponents succumb to declining manufacturing sources and obsolescence.

Question. If confirmed, how would you propose to prioritize development and acquisition among needed capabilities for sea basing, connectors, and armored amphibious assault and tactical mobility ashore to achieve your vision for a full spectrum force?

Answer. The development and acquisition of a full spectrum naval expeditionary force involves the planning and programming of naval expeditionary capabilities across both Navy and Marine Corps planning and programming accounts. If confirmed, I will continue to work with our Navy counterparts in defining the Marine Corps' seabasing requirements. I will personally review the complete portfolio of capability development to ensure we balance our investments to reflect the Marine Corps' role as a naval expeditionary force-in-readiness.

Question. In your view, what is necessary to ensure that modernization of the amphibious force—ships, connectors, and vehicles—is achievable and affordable in the near and long term?

Answer. The key ingredient for achieving an effective and affordable amphibious force is the continued close collaboration between the Marine Corps and the Navy. I believe that we must continue development, planning, and programming of amphibious force required capabilities to meet assigned war plan tasks, as well as support the training and employment of forward deployed and rotational Amphibious Readiness Groups and Marine Expeditionary Units.

Specifically, to modernize our vehicle capabilities we must pay careful attention to capacity requirements and avoid over-investing, while paying particular attention to the intended performance and environmental requirements that will drive vehicle design.

Question. In your view, will projected reduction in Marine Corps end strength, if implemented, reduce the Navy and Marine Corps' requirement for LPD-17 class ships? At what level of reduced Marine Corps end strength would the Marine Corps have insufficient forces to fill up a 12th LPD?

Answer. The amphibious warfare ship requirement is based on forward presence and rotational Amphibious Ready Groups (ARG)/Marine Expeditionary Units (MEU) as well as to deploy and employ the Assault Echelons (AEs) of two Marine Expeditionary Brigades (MEBs). The 12th LPD is critical in meeting these requirements. I haven't seen any proposals that would relieve the Marine Corps of either requirement.

AMPHIBIOUS COMBAT VEHICLE

Question. The Navy/Marine Corps amphibious assault capability today includes a large number of self-deploying amphibious assault vehicles (AAV-7) to carry infantry ashore, and a smaller number of small vessels called connectors that can ferry other vehicles, such as tanks and artillery, and supplies from ships to shore.

The Marine Corps has recently changed its plans for development of a next generation armored combat vehicle. Instead of investing in development of a new self-deploying amphibious assault tracked combat vehicle, the Marine Corps intends to reduce technical and fiscal risk by acquiring a wheeled combat vehicle that would have to rely on connectors to get from ship to shore or near shore. This would place additional demand on connectors that are expensive and consume a lot of space inside amphibious ships. Indeed, the Navy is today not procuring enough amphibious shipping to meet existing amphibious assault requirements, much less buying more ships to provide additional connector carrying capacity.

Unless there is a large increase in the number of connectors procured to carry wheeled infantry fighting vehicles ashore, and an increase in the number of ships to carry those additional connectors, it would appear that this plan will result in a diminished amphibious assault capacity.

Do you support the Marine Corps' decision to develop and field a wheeled armored vehicle to replace the AAV-7, the current amphibious assault vehicle?

Answer. I support the decision to develop and field a wheeled armored vehicle as an interim step in modernizing our tactical ship to shore mobility.

Question. Will the Marine Corps decision to forego a self-deploying amphibious assault tractor lead to a diminution of amphibious assault capability? If not, why not?

Answer. If confirmed, I would not support forgoing an amphibious, self-deploying assault capability. I don't believe the current program reflects that.

Question. In your view, where does armored amphibious assault fit in the set of capabilities required for to field a credible amphibious operations capability?

Answer. The likelihood of operations in the littorals requires a continued focus on the Marine Corps' responsibility to be organized, trained, and equipped for amphibious operations. I believe that armored amphibious assault capabilities are integral to our ability come from the sea.

Question. Without self-deploying armored amphibious assault vehicles for Marine Corps infantry, what advantages would Marine Corps forces have over Army forces for conducting amphibious assaults in the future?

Answer. If confirmed, I will support the development of armored amphibious assault vehicles.

AMPHIBIOUS FLEET REQUIREMENTS

Question. In the spring of 2010, Secretary Gates made several public statements in which he appeared to question the need for and size of the Navy's amphibious fleet in future defense plans and budgets.

What is your view of the need for and size of the Navy's amphibious fleet?

Answer. The Navy and the Marine Corps have determined that 38 amphibious warships is required to support an assault echelon of two Marine Expeditionary Brigades.

Question. What are the alternatives if the amphibious fleet is allowed to decline in size or capabilities?

Answer. I am not aware of any alternatives that have been developed to mitigate the requirement for an amphibious fleet.

F-35 REQUIREMENTS

Question. The Marine Corps has stated that its F-35 requirement is 420 aircraft. The total number of F-35s planned for the Department of the Navy is currently set at 680.

Do you believe that the current plan for 680 aircraft can fully accommodate the needs of both the Navy and the Marine Corps?

Answer. Yes. My understanding from a previous assignment as the Assistant Commandant is that 680 F-35s meet the Navy and Marine Corps requirement.

NAVAL SURFACE FIRE SUPPORT

Question. The DDG-1000 program was initiated to fill the capability gap for naval surface fire support. The original requirement for 24 to 32 DDG-1000 ships, each with two 155mm Advanced Gun Systems, was reduced to 12 ships, then to 10 ships, then to 7 ships, and finally to 3 ships.

In your view, does the total Navy program, with this significant reduction in the number of DDG-1000 destroyers, meet the Marine Corps' requirement for naval surface fire support?

Answer. With the truncation of the DDG-1000 program a maximum of six 155mm Advanced Gun Systems will be available for service in the fleet when all three ships are fully operational at the end of the decade which will not support the doctrinal capacity requirements of a Marine Expeditionary Brigade.

Question. What other capabilities would you rely upon to help meet naval surface fire support requirements?

Answer. In the absence of adequate naval surface fire support capability and capacity, the Marine Corps will likely rely on aviation delivered fires to mitigate the gap.

JOINT ACQUISITION PROGRAMS

Question. What are your views regarding joint acquisition programs, such as the Joint Tactical Radio System and the Joint Strike Fighter?

Answer. I support joint development where common capability gaps exist. Working with other Services is, and always has been, a major element of the Marine Corps overall Research and Development (R&D) and Procurement strategy. Our limited budgets demand that we adhere rigorously to the well-established Department of Defense (DOD) hierarchy of materiel alternatives. If we cannot find a solution to our materiel needs in the commercial marketplace, we always look next to take advantage of investments that other Services, DOD components, or our foreign partners are making. This reduces our need to spend R&D dollars on unilateral efforts, and it gives all participants involved with joint programs the opportunity to reduce unit procurement costs, and ultimately, life-cycle operation and maintenance costs. The end result is realized in the form of commonality and affordability across the Services making it much easier to share sustainment resources such as training, maintenance equipment, and supplies.

Question. Do you see utility in encouraging the services to conduct more joint development, especially in the area of helicopters and unmanned systems?

Answer. Yes. Encouraging joint development begins with collaboration of requirements during the Joint Capabilities Integration and Development System process and the Joint Requirements Oversight Council (JROC). This is a key element of fostering joint development among the Services.

Question. If so, what enforcement mechanisms would you recommend implementing more joint program acquisition?

Answer. Within the Department of Defense, the enforcement mechanisms are already in place through the JROC which plays an important role in harmonizing the Services warfighting requirements and ensuring that joint program opportunities are fully examined.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Commandant of the Marine Corps?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

POST-2014 COUNTERTERRORISM AUTHORITIES

1. Senator INHOFE. General Dunford, the President has said there will be a counterterrorism mission in Afghanistan performed by our counterterrorism forces after 2014. The ability to conduct military operations such as the ability to take direct action when required, use information operations to shape the battlefield, and execute cyber operations is critical to the effectiveness of counterterrorism operations. The authorities must give our military forces the ability to conduct such operations so they match the operational environment in order to be effective. It appears that Afghanistan will be an area of active hostilities in part due to the scope and scale of Taliban and al Qaeda operations in Afghanistan after 2014. Do you agree?

General DUNFORD. Yes. Afghanistan will remain a very active area of hostilities, at least through 2015.

2. Senator INHOFE. General Dunford, what authorities do you believe will be required, suitable for the expected operational environment, to effectively accomplish the counterterrorism mission in Afghanistan in 2015?

General DUNFORD. At the unclassified level, I believe that we will continue to need authorities that allow our forces to rapidly strike al Qaeda and those who are operating with al Qaeda in Afghanistan. We will also need sufficient authorities to quickly strike those who threaten our forces in Afghanistan, as well as authorities to assist Afghan forces, where we have the capacity to do so and where our assistance is required to avoid an Afghan defeat.

3. Senator INHOFE. General Dunford, if you were given authorities similar to what is now used in Somalia or Yemen, in your professional military opinion, how severely would that limit the effectiveness of your counterterrorism (CT) mission in Afghanistan?

General DUNFORD. Afghanistan is a unique operational theater, with an al Qaeda presence and an active, nationwide insurgency that continues to claim the lives of United States, the North Atlantic Treaty Organization (NATO), and Afghan servicemembers and civilians. The nature of the mission here, as well as the threat, requires operational authorities that are tailored for this operational environment, including authorities that facilitate rapid response to threats as they arise. Proper authorities are critical for effective CT operations and force protection.

POST-2014 AFGHANISTAN THREAT

4. Senator INHOFE. General Dunford, do you think al Qaeda and the Taliban will remain a presence and a threat in the Afghanistan-Pakistan region after 2014?

General DUNFORD. Yes.

5. Senator INHOFE. General Dunford, do you believe al Qaeda and its affiliates will reestablish a safe haven in eastern Afghanistan if we withdraw our forces too quickly?

General DUNFORD. Yes.

U.S. MILITARY OPERATIONS

6. Senator INHOFE. General Dunford, on May 27, 2014, President Obama announced there will be 9,800 U.S. troops post-2014 (if the Bilateral Security Agreement is signed), half of that by the end of 2015, hundreds by end of 2016 (like Iraq).

Post-2014 missions are going to be train, advise, assist, and counterterrorism. The President said “. . . America’s combat mission will be over by the end of this year.” What do you think “end of combat mission” means?

General DUNFORD. After 2014, the United States will not conduct direct combat operations against the Taliban. United States and coalition personnel will train, advise, and assist the Afghan Security Institutions and the Afghan National Security Forces. However, we will continue to conduct counter-terrorism operations against al Qaeda and those who facilitate al Qaeda in order to protect the Homeland. We will also conduct operations to protect the force while it is in Afghanistan.

7. Senator INHOFE. General Dunford, will we still do close air support—and if so, under what conditions—for U.S. troops, for partner troops, for Afghan troops?

General DUNFORD. The United States will still conduct close air support to protect coalition and U.S. Forces. The decision to support Afghan troops is pending.

8. Senator INHOFE. General Dunford, out of the 9,800 troops at the beginning of 2015, how many do you expect will be doing force protection and support; and how many will actually be training, advising, and assisting?

General DUNFORD. The exact numbers won’t be known until we complete the NATO force generation process in the early fall. Approximately 20 percent of the force will be doing train, advise, and assist. The balance of the force will conduct counter terrorism, force protection, and support.

9. Senator INHOFE. General Dunford, troop numbers in Afghanistan at the end of 2016 are supposed to look like troop numbers in Iraq at the end of 2011—“a normal embassy presence”. What do you think that means?

General DUNFORD. A normal embassy presence will consist of a Defense Attaché Office and a Security Cooperation Office under a Senior Defense Official operating under the authority of the Chief of Mission with a military reporting chain through the U.S. Central Command.

DETAINEES

10. Senator INHOFE. General Dunford, what is the plan to deal with the disposition of the approximately 38 non-Afghan national detainees you said in your advance policy questions continue to be detained by U.S. forces in Afghanistan?

General DUNFORD. Most of the remaining non-Afghan detainees will be processed for repatriation to their home countries, transferred to the Government of the Islamic Republic of Afghanistan for prosecution, or transferred to another competent jurisdiction, subject to the receipt of appropriate security and humane treatment assurances. These repatriations and transfers will be conducted in accordance with previously established law and procedures which require State Department receipt of written assurances from the receiving country, transfer approval by the Deputy Secretary of Defense, and congressional notification.

11. Senator INHOFE. General Dunford, what happens if we capture additional non-Afghan nationals before the end of 2016, who is responsible for their detention and interrogation?

General DUNFORD. If U.S. forces capture a non-Afghan national in 2015 or 2016, I anticipate the captured individual will be turned over within 72 hours to Afghan officials for transfer to the Afghan National Security Justice Center in Parwan where the individual will be detained and investigated with a view towards prosecution in the Afghan criminal court at the Justice Center in Parwan. I further anticipate the U.S. advisors on the Rule of Law Development Team (who will be working at the National Security Justice Center at Parwan) will have ready access to relevant information obtained by the National Directorate of Security through their investigation and any interview of the detainee.

GEORGIA

12. Senator INHOFE. General Dunford, Georgia has been the largest per capita and non-NATO troop contributor to the NATO International Security Assistance Force (ISAF) mission, and is committed to support this mission until the end of the operations in Afghanistan. Moreover, Georgia is ready to continue engagement in the Resolute Support Mission with up to 750 soldiers. What is your assessment of the cooperation we enjoy with the country of Georgia in the defense field?

General DUNFORD. The support NATO and the United States has received from the Republic of Georgia throughout the ISAF mission, along with the pledged support to the Resolute Support Mission, has been unparalleled. Georgia continues to be one of the most flexible and willing NATO partners and has become a security exporter in the truest sense of the word, contributing forces to NATO missions wherever needed. As we transition from ISAF to the Resolute Support Mission, Georgia will be one of the largest troop-contributing nations. They have proven themselves to be stalwart partners to the United States, committing forces to combat operations abroad even when their own homeland came under attack in 2008.

13. Senator INHOFE. General Dunford, I understand that the U.S. Marine Corps has specifically developed an effective and close cooperative relationship with the Georgian Armed Forces. More than 11,000 Georgian soldiers have been trained for Afghanistan with support of the U.S. Marine Corps, and have participated in the ISAF mission. They have served with bravery and distinction, and 29 have lost their lives in the line of duty. Considering the commitment of the Nation of Georgia to the United States in Afghanistan, and to common Euro-Atlantic security and shared values, how can the United States support this nation to ensure that they have the capability to defend themselves against potential aggression, in light of recent events in Ukraine?

General DUNFORD. Our Georgian partners have served with distinction in Afghanistan. I understand that in addition to assisting them in preparation for service in ISAF, the United States has committed to assisting them in developing capabilities that will assist in their nation's defense.

14. Senator INHOFE. General Dunford, how do we specifically plan to continue and enhance our defense cooperation with Georgia to boost their defense capabilities?

General DUNFORD. I believe this question would be best answered by U.S. European Command.

READINESS AND END STRENGTH

15. Senator INHOFE. General Dunford, the current Commandant of the Marine Corps, General Amos, has testified that the Marine Corps would have difficulty in conducting a single major contingency operation as called for by the National Military Strategy should Marine Corps end strength fall to 175,000. It is projected the Marine Corps will have 175,000 marines at the end of this Future Years Defense Program. How will this impact the Marine Corps' ability to meet mission requirements?

General DUNFORD. The President's budget supports the 175,000 force at high operational risk. At this force level, the Marine Corps will maintain sufficient combat units to meet war plan requirements but places additional stress on the force to meet steady state global requirements. Any additional cuts due to sequestration in fiscal year 2016 with a 175,000 force would negatively impact the Marine Corps. Sequestration cuts on a force already deploying at 1:2 would reduce critical training and maintenance resources causing additional risk.

16. Senator INHOFE. General Dunford, what are your readiness concerns?

General DUNFORD. I believe the Marine Corps has demonstrated its readiness over the past decade in responding to contingencies in Iraq and Afghanistan and to a wide range of crises across the world. The Marine Corps has preserved readiness of deploying and next-to-deploying units. That said, I know our home station readiness has been degraded as we have appropriately prioritized the readiness of those marines who are forward deployed.

I will prioritize resetting Marine Corps equipment from the wear and tear of operations in Iraq and Afghanistan and restoring home station readiness. While near term readiness will remain the priority, I will work with the Secretary of the Navy and Congress to ensure that the Marine Corps is adequately resourced to also deliver a ready Marine Corps tomorrow.

AMPHIBIOUS COMBAT VEHICLE

17. Senator INHOFE. General Dunford, after spending billions of dollars on the Expeditionary Fighting Vehicle, the program was terminated due to technology immaturity and affordability. Its follow-on program, the Amphibious Combat Vehicle (ACV) has been recently restructured. Now, the Marine Corps plans to use the Marine Personnel Carrier program requirements to define the first increment of the

ACV program. Additionally, recent press reports question both the need and effectiveness of amphibious assault. Is it time to rethink the need to conduct amphibious assault operations?

General DUNFORD. Since 1990, the Marine Corps has conducted more than 120 amphibious operations across the range of military operations. Our Nation should always retain the capability to place and sustain forces on a foreign shore in a hostile environment. This is what amphibious assault capability provides. The Marine Corps will continue to develop our amphibious assault capability to ensure it remains relevant to our national security requirements in the context of the future security environment.

18. Senator INHOFE. General Dunford, what are your views on the requirement for the high water speed ACV?

General DUNFORD. The Marine Corps' requirement for a high water speed ACV persists, however, despite the best efforts of our combat and materiel developers, supported by academia and industry, the Marine Corps concluded that procurement of a high water speed ACV would require too many capability tradeoffs to be an acceptable solution at this time. I intend to continue to pursue the most capable, tactical ship to shore mobility possible.

19. Senator INHOFE. General Dunford, what is the operational impact to the Marine Corps if this program is deferred for several years?

General DUNFORD. Delaying the development of an effective vehicle for ship to shore mobility will adversely affect the ability of the Marine Corps to effectively support the needs of combatant commanders to conduct amphibious operations.

20. Senator INHOFE. General Dunford, the modernization of the amphibious force must include the ships, connectors, and vehicles necessary to conduct amphibious operations. I am concerned the Marine Corps' restructured approach to the ACV does not meet the needs of the Marine Corps, specifically, we hear about the ACV and we hear about amphibious ships. However, I find the third element, ship-to-shore connectors, lacking. Do you believe the Marine Corps has sufficient ship-to-shore connectors to meet operational needs of an amphibious assault?

General DUNFORD. I have been briefed that we currently have sufficient ship-to-shore connectors to meet combatant commander requirements for forward presence/rotational Amphibious Ready Group/Marine Expeditionary Unit deployment schedules, war plans, and independent, single-ship deployments. However, within the next 2 to 3 years, we may encounter a significant degree of risk as connector inventories begin to drop below levels necessary to fully meet operational requirements. I will personally engage on this issue after assuming my new responsibilities.

21. Senator INHOFE. General Dunford, the Marine Corps recently completed a year-long study to assess the technical feasibility and affordability of bringing that capability to the force. I understand the Marine Corps has restructured or refined the ACV strategy. What concerns do you have regarding the ground vehicle industrial base and its ability to meet the Marine Corps ACV requirements?

General DUNFORD. Industry has been unable to deliver an optimal ACV at an affordable price. I look forward to addressing this challenge after assuming my new duties.

SPECIAL PURPOSE MARINE AIR-GROUND TASK FORCE

22. Senator INHOFE. General Dunford, the Special Purpose Marine Air-Ground Task Force (MAGTF) construct responds to greater demand for multi-role crisis response forces in several combatant commands under the current security environment. The Marine Corps has stood up one unit and Spain will stand up two more to follow later this year. Is the Special Purpose MAGTF indicative that the Marine Corps does not have sufficient amphibious ships?

General DUNFORD. Yes. Land-based Special Purpose MAGTFs (SPMAGTFs) mitigate, but do not replace, amphibious shipping. SPMAGTFs improve the forward deployed Marine force posture and provide more flexibility in employing the Amphibious Ready Group/Marine Expeditionary Unit within each geographic combatant command. SPMAGTFs can mitigate the risk of sending less ready units to major contingencies by constituting the lead elements of a surge.

WOMEN IN COMBAT POSITIONS

23. Senator INHOFE. General Dunford, the Marine Corps has a very robust model to evaluate and obtain metrics for women in combat. The Marine Corps is taking a unique approach to integrating women into combat training. What steps has the Marine Corps taken to ensure that women will be placed in a gender-neutral training environment in which they can best succeed?

General DUNFORD. I know that the Marine Corps understands the direction set by the Secretary of Defense and it is taking a deliberate, measured, and responsible approach to researching, setting conditions, and integrating female marines into ground combat arms military occupational specialties and units. This research will allow me to be personally and decisively engaged in the development of gender-free standards for all military occupations to ensure that we continue to field the most capable Marine Corps possible.

24. Senator INHOFE. General Dunford, will you commit to this committee that your recommendation will be based solely on the operational capabilities our Nation requires of the Marine Corps, and that you will not tolerate lowering standards if that would compromise combat effectiveness?

General DUNFORD. Yes.

 QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

AFGHAN MI-17 FLEET

25. Senator AYOTTE. General Dunford, you indicated during the July 17, 2014, nomination hearing that we cannot sustain the Afghan Mi-17 fleet without dealing with the Russians. On July 16, 2014, President Obama announced a new round of Ukraine-related sanctions on a variety of Russian entities, including a number of Russian defense firms. The Russians may retaliate in various ways. If the Russians choose to cut the United States off from all parts and other support for these Mi-17s, what is the backup plan for making sure the Afghans have a viable fleet of helicopters?

General DUNFORD. Sustainment of the Afghan Mi-17 fleet requires access to Russian helicopter OEM (original equipment manufacturer) spare parts and technical design authority. If the Russians restrict U.S. access to OEMs, then ISAF will pursue options that allow Afghan access to Russian OEMs without U.S. involvement. There would be a significant operational impact for both U.S. and Afghan forces if such a situation occurred, and it is not clear how long it would take to identify alternative mechanisms and put them in place.

DANGER OF NOT RESETTING EQUIPMENT FROM AFGHANISTAN

26. Senator AYOTTE. General Dunford, from a readiness standpoint, what is the danger of not resetting our equipment as it returns from Afghanistan?

General DUNFORD. Due to the full support of Congress, I understand the Marine Corps is nearly 50 percent complete with the reset of ground combat equipment returned to date from Afghanistan. However, a significant amount of reset work remains to be accomplished. In the absence of funding to repair, recapitalize, and replace remaining ground combat equipment, the Marine Corps would face difficulty reconstituting the force.

Currently, over half of nondeployed units have equipment shortfalls as the Corps has prioritized equipping and enabling forward deployed forces. This imbalance of readiness across the Marine Corps would be further exacerbated if we did not complete our reset requirements. These nondeployed forces serve as an insurance policy—our bench—providing a timely response to unexpected crises or large-scale contingencies. If those units are not adequately equipped, a delayed response to a contingency or other operational requirement is much more likely.

READINESS OF NONDEPLOYED MARINE FORCES

27. Senator AYOTTE. General Dunford, what are your leading readiness concerns for the Marine Corps?

General DUNFORD. Based on steady state operations and emerging requirements, the Marine Corps has accepted risk to both personnel and equipment readiness of our nondeployed units to fully support forces forward deployed. Currently, slightly

more than 55 percent of our nondeployed units are experiencing degraded readiness in their ability to execute core missions principally due to equipment and personnel shortfalls necessitated by the effort to ensure that forward deployed units are manned and equipped. Such realities portray the imbalance of readiness across the Marine Corps. This, however, cannot be our long-term solution to the whole-of-force readiness: our nondeployed operating forces serve as an insurance policy, providing timely response to unexpected crises or large-scale contingencies.

28. Senator AYOTTE. General Dunford, how would you assess the readiness of our nondeployed Marine Corps forces?

General DUNFORD. I understand that approximately 55 percent of our nondeployed units are experiencing degraded readiness—principally due to equipment and personnel shortfalls created by ensuring forward-deployed units are fully manned and equipped.

29. Senator AYOTTE. General Dunford, the readiness of our nondeployed forces impacts our strategic depth and overall readiness. How can we improve the readiness of our nondeployed Marine Corps forces?

General DUNFORD. I intend to work closely with the Secretary of the Navy, the Secretary of Defense, and Congress to ensure we do everything possible to maximize the readiness of our nondeployed forces.

30. Senator AYOTTE. General Dunford, what impact will sequestration have on our nondeployed Marine Corps forces—and therefore on our strategic depth?

General DUNFORD. Full sequestration forces Marine Corps end strength down to 175,000. This size force accepts great risk when our Nation commits itself to its next major theater war. It makes significant reductions in aviation and ground combat units—further reducing our available infantry battalions in addition to the current reductions in critical combat support capability such as artillery, tanks, and assault amphibious vehicles.

SEXUAL ASSAULT

31. Senator AYOTTE. General Dunford, how is the Marine Corps doing in the effort to increase sexual assault prevention, reporting, and assistance for victims?

General DUNFORD. I see progress and indicators that suggest Marine Corps SAPR Program is making a positive impact. However, I also believe that there is still much work to do. We must continue to increase reporting and decrease prevalence. We need to emphasize prevention to include focusing on potential offenders, demand all marines be active and responsible, vice passive bystanders, and integrate the SAPR Program with other aspects of behavioral health.

32. Senator AYOTTE. General Dunford, what impact would removing commanders' convening and disposition authority have on good order, discipline, and combat effectiveness?

General DUNFORD. In my experience, every issue of good order and discipline in the Marine Corps that has been successfully addressed has featured commanders, and the chain of command, as the central facet of the solution. I believe that the chain of command is invaluable to victims of sexual assault. Commanding officers are responsible for setting positive command climates that not only help prevent the crime of sexual assault but that also provide a safe environment where victims feel confident coming forward to report. Without that initial trust and faith in the complete commitment and ability of their chain of command, victims may not report.

The chain of command is the mechanism for creating a climate that is non-permissive to sexual assault, for ensuring victims are in a safe and non-retaliatory environment, and for facilitating access to all supportive services.

Similarly, the chain of command is the primary and most effective mechanism through which I will maintain accountability in our sexual assault prevention efforts. Just as I expect you to hold me accountable, so will I hold my subordinate commanders accountable for ensuring that all marines are treated with dignity and respect.

POST-2014 FORCE POSTURE

33. Senator AYOTTE. General Dunford, any deployed force must be able to accomplish its mission and also protect itself. Is there a point at which the number of U.S.

troops in Afghanistan gets so small that our forces might not be able to fully protect themselves and our diplomatic personnel?

General DUNFORD. Yes.

MARINE CORPS END STRENGTH

34. Senator AYOTTE. General Dunford, the current Commandant of the Marine Corps, General Amos, testified that the Marine Corps would have difficulty conducting a single major operation as called for by the National Military Strategy should Marine Corps end strength fall to 175,000. Do you agree with that assessment?

General DUNFORD. Yes.

35. Senator AYOTTE. General Dunford, what specific risks would our Nation confront if we reduce the Marine Corps to 175,000 or below?

General DUNFORD. In order to prioritize emerging demands in a fiscally constrained environment, the Marine Corps accepted risk in major combat operations (MCO) and stability operations. The redesigned Marine Corps made tradeoffs in some high end capabilities, like armor and artillery, in order to concentrate on crisis response. Reducing force structure would increase risk as the requirements determined by the combatant commands would be unfulfilled, and in the event of a MCO, the Marine Corps would be unable to react to crises in other parts of the world.

CLOSE AIR SUPPORT

36. Senator AYOTTE. General Dunford, will the Afghans need U.S. close air support assistance in 2015 and beyond? If so, what is the specific U.S. plan to provide that assistance?

General DUNFORD. The Department of Defense (DOD) is addressing gaps in Afghan Air Force (AAF) close air support capabilities that the Afghan military leadership has recently identified. DOD is in the process of procuring 12 armed MD-530 helicopters and arming 5 that are already in the Afghan inventory which should be available to participate in operations during the next fighting season. These helicopters will enable the AAF to cover the priority close air support requirements within areas that are subject to the majority of the fighting. DOD continues to develop the AAF's fixed wing close air support capability and in January 2015 will begin training AAF pilots at Moody Air Force Base. The first of 20 AAF A-29s will arrive in Afghanistan in early 2016 to begin conducting close air support missions. We will continue to assess ANSF capabilities and shortfalls as part of the train, advise, and assist mission to determine if additional measures are required.

QUESTIONS SUBMITTED BY SENATOR LINDSEY GRAHAM

JUSTICE CENTER IN PARWAN

37. Senator GRAHAM. General Dunford, the Justice Center in Parwan provides a legitimate means for the Government of Afghanistan to handle current and future detainees considered to be national security threats. How important is the Justice Center in Parwan to the creation of an effective Rule of Law in Afghanistan?

General DUNFORD. As a component of the National Security Justice Center, the Justice Center in Parwan (JCIP) is critical to effective rule of law in Afghanistan for a number of reasons. One is that the JCIP serves as a model for the provincial criminal courts. The lessons learned at the JCIP are taught to investigators and prosecutors from the provinces by Afghan-led training teams coordinated by Combined Joint Interagency Task Force (CJIATF) 435. A second reason is that it is closely partnered with CJIATF 435 and has been since 2010. CJIATF 435's staff has daily contact with the investigators, lawyers, and judges at the JCIP. This close partnership creates a symbiotic relationship through which we can monitor cases and track developments, and our Afghan partners can request U.S. assistance when necessary. A third reason is the JCIP is free from corruption, a major problem for many provincial courts. Additionally, JCIP is physically protected by both U.S. and Afghan National Army forces, and closely monitored by CJIATF 435 and Department of State/Bureau of International Narcotics and Law Enforcement Affairs personnel, therefore it is very difficult for outside influences to affect judicial determinations. I expect the JCIP will continue to enhance rule of law development and

provide legitimacy in the eyes of the Afghan people into the Resolute Support mission and beyond.

38. Senator GRAHAM. General Dunford, what impact did U.S. forces have on its development?

General DUNFORD. The Justice Center in Parwan (JCIP) was constructed with U.S. funding in 2010, and has been operating continuously since then with U.S. funding. DOD and Department of State (DOS)/Bureau of International Narcotics and Law Enforcement Affairs (INL) have shared financial, administrative, and logistical responsibilities for the JCIP since early 2011. DOS/INL took the lead for funding, logistics, training, and mentorship at the JCIP in late 2013, and will maintain funding for the JCIP through 2014. The bulk of INL's legal training and mentorship roles ended in June 2014. We are working closely with the State Department to identify operations and maintenance funding for the JCIP in 2015. We will also continue training and mentoring our Afghan partners at the JCIP through the Rule of Law Development Team (15 uniformed personnel), CJIAF 435's follow-on force after its End of Mission in October.

[The nomination reference of Gen. Joseph F. Dunford, Jr., USMC, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 4, 2014.

Ordered. That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment to Commandant of the Marine Corps, and appointment to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 5043 and 601:

To be General

Joseph F. Dunford, Jr., 0000.

[The biographical sketch of Gen. Joseph F. Dunford, Jr., USMC, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GEN. JOSEPH F. DUNFORD, JR., USMC

Title:

Commander, International Security Assistance Force-Afghanistan; and Commander, U.S. Forces-Afghanistan

Assigned:

10 Feb 13

Education / qualifications:

Saint Michael's College, BA, 1977
Georgetown University, MA, 1985
Fletcher School of Law and Diplomacy, MA, 1992
The Basic School, 1977
Amphibious Warfare School, 1985
Marine Corps Command and Staff College Non-Resident, 1992
U.S. Army War College, 1999
CMC Fellowship—Johns Hopkins University, 1992
Capstone, 2005
Joint Forces Land Component Commander, 2007
Pinnacle, 2009
Senior Executive Equal Employment Opportunity Seminar, 2010
Infantry Officer

Date of rank:

23 Oct 10

Age:

58 years

Date commissioned:

29 May 77

MRD:

1 Jun 17 for Service

Commands:

Commanding General, I Marine Expeditionary Force; and Commander, U.S. Marine Corps Forces Central Command (LtGen: Sep 09–Oct 10)

Assistant Division Commander, 1st Marine Division (Col: Jul 04–Jun 05)

Commanding Officer, 5th Marines, 1st Marine Division (Col: May 01–May 03)

Commanding Officer, 2d Battalion, 6th Marines, 2d Marine Division (LtCol: Mar 96–Jul 98)

Joint assignments:

Special Assistant to the Chairman, Joint Chiefs of Staff (Gen: Dec 12–Feb 13)

Vice Director for Operations, J-3, Joint Staff (BGen: Jun 07–Aug 08)

Executive Assistant to the Vice Chairman of the Joint Chiefs of Staff; Chief, Global and Multilateral Affairs Division, J-5, Joint Staff (Col: Jun 99–May 01)

Service staff assignments:

Assistant Commandant of the Marine Corps (Gen: Oct 10–Dec 12)

Deputy Commandant for Plans, Policies, and Operations (LtGen: Aug 08–Aug 09)

Director, Operations Division (BGen: Aug 05–Jun 07)

Chief of Staff, 1st Marine Division (Col: May 03–Jul 04)

Executive Officer, 6th Marines, 2d Marine Division (LtCol: Jul 95–Mar 96)

Senior Aide-de-Camp to the Commandant of the Marine Corps (LtCol: Dec 92–Jul 95)

Marine Officer Instructor, College of the Holy Cross (Maj: Aug 89–Jun 91)

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Gen. Joseph F. Dunford, Jr., USMC, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Joseph F. Dunford, Jr.

2. **Position to which nominated:**

Commandant of the Marine Corps.

3. **Date of nomination:**

June 4, 2014.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
1955/12/23, Boston, MA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Ellyn A. Dunford (Maiden Name: Ellyn A. Sartucci).

7. **Names and ages of children:**
Joseph F. Dunford III; age 26
Patrick T. Dunford; age 24
Kathleen A. Dunford; age 22.

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, Marine Corps Association.

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

Awarded Colonel Donald Cook Award for Citizenship, from St. Michael's College, VT.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JOSEPH F. DUNFORD, JR.

This 4th day of June, 2014.

[The nomination of Gen. Joseph F. Dunford, Jr., USMC, was reported to the Senate by Chairman Levin on July 22, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 23, 2014.]

NOMINATIONS OF MR. ROBERT M. SCHER TO BE ASSISTANT SECRETARY OF DEFENSE FOR STRATEGY, PLANS, AND CAPABILITIES; MS. ELISSA SLOTKIN TO BE ASSISTANT SECRETARY OF DEFENSE FOR INTERNATIONAL SECURITY AFFAIRS; MR. DAVID J. BERTEAU TO BE ASSISTANT SECRETARY OF DEFENSE FOR LOGISTICS AND MATERIEL READINESS; MS. ALISSA M. STARZAK TO BE GENERAL COUNSEL OF THE DEPARTMENT OF THE ARMY; ADM HARRY B. HARRIS, JR., USN, FOR REAPPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE COMMANDER, U.S. PACIFIC COMMAND

TUESDAY, DECEMBER 2, 2014

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:42 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman), presiding.

Committee members present: Senators Levin, Reed, Nelson, McCaskill, Udall, Manchin, Shaheen, Gillibrand, Blumenthal, Donnelly, Hirono, Kaine, King, Inhofe, McCain, Wicker, Ayotte, and Fischer.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nominations of Robert Scher to be Assistant Secretary of Defense for Strategy, Plans, and Capabilities; Elissa Slotkin to be Assistant Secretary of Defense for International Security Affairs; David Berteau to be Assistant Secretary of Defense for Logistics and Materiel Readiness; Alissa Starzak to be General Counsel of the Department of the Army; and Admiral Harry Harris, Jr., to be Commander, U.S. Pacific Command (PACOM).

We welcome our witnesses and their families. We extend our gratitude to family members who support our nominees during the

long hours and the countless demands on their careers in public service.

To our witnesses, during your opening statements, please feel free to introduce family members and others who are here to support you today.

Each of our nominees has a record of public service. Mr. Scher has served as Deputy Assistant Secretary of Defense for South and Southeast Asia, a senior member of the Secretary of State's policy planning staff, and in his current role as both the Deputy Assistant Secretary of Defense for Plans and the Acting Deputy Under Secretary of Defense for Strategy, Plans, and Forces.

Ms. Slotkin, we give you and your parents—you are Michiganders—a special welcome here today. You have served in positions of distinction throughout your time in Government service, including as the Principal Deputy Assistant Secretary of Defense for International Security Affairs, a senior advisor on Iraq at the Department of State, and Director for Iraq on the National Security Council staff.

Mr. Berteau has held a variety of national security-related positions in Government, academia, and in the private sector. He is currently the Senior Vice President and Director of the National Security Program on Industry and Resources at the Center for Strategic and International Studies. Prior to that, he has directed the National Security Studies Program at Syracuse University and served as the Principal Deputy Assistant Secretary of Defense for Production and Logistics.

Ms. Starzak is currently the Deputy General Counsel for Legislation at the Department of Defense (DOD). She has also served as counsel and a professional staff member on the Senate Select Committee on Intelligence and as Assistant General Counsel at the Central Intelligence Agency.

Admiral Harris has spent 36 years in the Navy and served in every geographic combatant command region. He is currently the Commander of the U.S. Pacific Fleet. He has worked previously as the Assistant to the Chairman of the Joint Chiefs of Staff, Deputy Chief Naval Officer for Communication Networks, and the Commander, Joint Task Force Guantanamo.

There are going to be four votes, as currently planned, at 10:30 a.m. We are going to work through those votes. If it turns out that we cannot complete the hearing for any one or more of our nominees today, we will continue such hearing either later this week or next week.

We look forward to the testimony of our witnesses, of our nominees, and we also again thank their families for their support.

I turn this over to Senator Inhofe.

STATEMENT OF SENATOR JAMES M. INHOFE

Senator INHOFE. Thank you, Mr. Chairman.

We are getting into the last 2 years of the administration. It's clear, at least in my opinion, that our national security policies have been a disaster and the world becomes more dangerous. The President is focused on dismantling the military, appeasing our adversaries, abandoning our partners, and refusing to implement a new national security strategy.

That's kind of interesting. That's required by law, and I think, Mr. Scher, I'll have some questions for you on that because I think it's very important. We're supposed to do that every year. It's been 4 years now. Instead of taking responsibility and changing the course, the President is doubling down on the failed policies and blaming the Secretary of Defense.

Six years in, we still have no strategy in the Middle East and no plan to deter Russia, China, Iran, and the Islamic State of Iraq and Syria (ISIS), and no updated national security strategy. The New York Times reported that when Susan Rice was asked why there hasn't been a new national security strategy in 4 years, she said, "If we had put one out in February or April or July, it would have been overtaken by events 2 weeks later." I guess what she's saying is you can't build a strategy that can last more than 2 weeks. I think perhaps the President should have dealt with her instead of Secretary Hagel.

The problem is, as I see it, the President is relying on his political and his media advisors rather than his military leaders. I talked to a lot of the military leaders, as does everyone on this panel up here, and I've come to the conclusion that they're not really being listened to, and I think that's one of our major problems.

One of the most glaring examples has been the President's response to Russia's invasion of Ukraine. When asked on August 6th whether the United States should provide lethal assistance to Ukraine, he said no, but then he added—and this is a quote. Now, keep in mind, this is August 6th. He said, "Now, if you start seeing an invasion by Russia, that's obviously a different set of questions. We're not there yet." That was August. Putin started invading the Ukraine 5 months before that, and that's when he formally annexed Crimea, and that's 5 months before this. While Obama's on the sidelines, Putin continues to de-recognize Europe.

I probably shouldn't have done it. I was on the ballot myself this year, but for the whole week prior to our elections over here, I was in Lithuania, Latvia, Estonia, Ukraine, and those areas. They look at Ukraine and say it's not going to stop there. They're all concerned. They're all in that same situation.

It's clear that Russia, China, Iran, ISIS see weaknesses in the President's rhetoric and it's not going to deter them from taking more aggressive action. It's not just me who thinks that. I hear that constantly all over.

We're looking forward to the solutions you might suggest. I do think that having five significant nominees all at once during this lame duck session is probably not the best way to have done this. I'm anxious to get to know all of you better before any final vote for confirmation comes around.

I appreciate it very much, Admiral Harris, the time that you spent with me.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Inhofe.

I'll call first on Mr. Scher for your opening comments.

STATEMENT OF ROBERT M. SCHER, TO BE ASSISTANT SECRETARY OF DEFENSE FOR STRATEGY, PLANS, AND CAPABILITIES

Mr. SCHER. Thank you, Chairman Levin, and Senator Inhofe, and all the members of the committee. It's a privilege to appear before you this morning, and I appreciate the opportunity to answer any questions you may have regarding my nomination as Assistant Secretary of Defense for Strategy, Plans, and Capabilities.

I'd like to thank President Obama, Secretary Hagel, and Under Secretary Wormuth for their support of my nomination. I also owe a debt to the many colleagues, mentors, and friends with whom I've worked over the years and who have always supported me. Most of all I'd like to thank my family and friends, without whom I certainly would not be here today.

I would be remiss if I did not specifically thank my wife, Danielle Ewen, and my son, Maxwell. Danielle is taking time off from her job today to be here. She is a nationally recognized expert on child care and early education, and I'm very proud of her service. Maxwell, a freshman at Moray, decided that he gets to see me talk enough and really doesn't need to be here, so he'd rather go to school. Present or not, they provide me with my strength, my moral compass, and my motivation to continue to serve this Nation.

It has been my privilege to be able to serve in DOD as both a political appointee and a career civil servant for over 20 years. I have lived through or participated in four Quadrennial Defense Reviews (QDR), countless other strategic reviews, and have had the privilege to represent our Nation at international meetings throughout Asia. In all of these efforts, I have worked with some of the finest public servants and military officers we have as a Nation.

Our public servants are hardworking, patriotic individuals who serve this Nation with dedication and honor, but I can never forget that what we do in the Pentagon is all about how to better support the men and women that make up our Armed Forces, they who have volunteered to serve in our Nation's military and who continue to sacrifice for the freedoms we enjoy here in the United States. My allegiance to them is unwavering and, if confirmed, I believe it is my most important task to ensure that what we do in the Pentagon continues to best support our forces.

It is because of my past work and my deep respect and admiration for our military that I am so honored to sit here before you today. If confirmed, I would look forward to working with you all in Congress, with this committee in particular, and with others in the executive branch to advance U.S. national security interests in what can only be termed an uncertain and dynamic environment.

My role in this position would be to support the Under Secretary of Defense for Policy, the Deputy Secretary, and the Secretary of Defense in formulating the strategic guidance for the Department, and then working within the Department to make sure that the Secretary's guidance is effectively implemented by the Services and the combatant commanders, one of whom I am privileged to be here with on this panel, hopefully if confirmed, Harry Harris.

We must simultaneously be working to address the needs of current operations, planning for potential contingencies, and ensuring

that we build a military that is capable of responding to the threats and opportunities of the future. We do not have the luxury of only looking at today's problems or only looking at the future. We must do both.

In today's world and with the continued uncertainty over the resources that may be available to the Department, this is a difficult task but one that I am committed to getting right. If confirmed, I will make every effort to live up to the confidence that has been placed in me.

I am grateful for your consideration and look forward to your questions. Thank you.

Chairman LEVIN. Thank you very much, Mr. Scher.

Ms. Slotkin?

STATEMENT OF ELISSA SLOTKIN, TO BE ASSISTANT SECRETARY OF DEFENSE FOR INTERNATIONAL SECURITY AFFAIRS

Ms. SLOTKIN. Chairman Levin, Senator Inhofe, members of the committee, thank you for the opportunity to appear before you today. I am grateful for the confidence that President Obama has shown in nominating me, and I thank Secretary Hagel and Under Secretary Wormuth personally for their support.

I also want to thank my family, for I would not be here without them. My husband, Colonel David Moore, is here today, having just retired after 30 years as an officer in the Army; my step-daughters, who are just beginning their careers of service, Christine, who will soon be a rural doctor, and Jennifer, a West Point Cadet, who is helping to break down gender barriers every day. They are the source of my strength, and I thank them for their unending support.

I'd also like to thank my parents, Curt and Carole Slotkin, in from Michigan, who taught me the meaning of hard work and decency, as well as the legion of Slotkins, Singers, Moores, and Rosses who have shown unwavering love and understanding.

Mr. Chairman, members of the committee, the position of Assistant Secretary for International Security Affairs spans a huge area of responsibility. It covers Europe, the Middle East, Africa, and the Western Hemisphere. America's national security interests in these parts of the world are as profound as they are vast. From ensuring the transatlantic alliance and ensuring that it's prepared to meet the challenge of Russian aggressive behavior, to meeting the threats in the Middle East and the generational change taking place there, to the proliferating extremist groups in Africa, or the instability in Central America, I remain convinced that the United States must play a central role.

If confirmed, I look forward to working with the committee and Congress as a whole to develop the policies, partnerships, and posture the Department needs to address these challenges.

Mr. Chairman, the responsibility of the Assistant Secretary for International Security Affairs is profound and a mission I take extremely seriously. I believe my experience in the Intelligence Community, the Department of State, the National Security staff, and DOD have prepared me for the complexities of this account. I have benefitted both in the field and in Washington from close civil-mili-

tary cooperation, something I believe is critical to countering new threats. I have the benefit of learning from exemplary bosses such as John Negroponte, Jack Lew, and Michèle Flournoy, who I believe embody the meaning of committed leadership. If confirmed, I hope to live up to their expectations and those of the committee.

Mr. Chairman, if confirmed, I will make every effort to live up to the confidence placed in me and the excellence demonstrated by our men and women in uniform. Thank you for your consideration, and I look forward to your questions.

Chairman LEVIN. Thank you very much.

Mr. Berteau?

STATEMENT OF DAVID J. BERTEAU, TO BE ASSISTANT SECRETARY OF DEFENSE FOR LOGISTICS AND MATERIEL READINESS

Mr. BERTEAU. Thank you, Mr. Chairman, Senator Inhofe, members of the committee. It's an honor and a privilege for me to appear before you this morning.

I thank also President Obama for nominating me as the next Assistant Secretary of Defense for Logistics and Materiel Readiness, and I'm grateful for the support of Secretary Hagel, Deputy Secretary Wormuth, and Under Secretary Kendall.

I particularly want to express my gratitude to my family, my wife of 41 years, Jane, and my son, Stephen, here with me today, behind me. My daughter Celeste is overseas and is unable to be here in person this morning, but I suspect she's following as best she can.

I also owe a tremendous debt to my parents, Marvin and Patsy Berteau. Neither one lived to see me here this morning, but they instilled in me from an early age a powerful sense of the responsibilities of citizenship in America and of the call to public service that flows from those responsibilities, and I owe them gratitude for that.

Mr. Chairman, for most of my professional life I've been working on and studying and teaching defense and national security, and in that time it's become clear to me that without superior logistics, there is little chance of long-term success. The lessons of the wars in Afghanistan and Iraq have underscored the importance of logistics not only for the battlefield but also for the capability provided by the organic elements of the Military Services, as well as the support of a strong industrial base.

I believe that my background both in and out of Government has helped prepare me to help support the men and women in uniform as they undertake their varied missions around the world.

The Office of the Assistant Secretary of Defense for Logistics and Materiel Readiness has been providing support in all of these areas for years. If confirmed, I hope to be able to continue and improve on that performance.

I thank you for the opportunity to be here today. I thank my family for their support and encouragement. If confirmed, I look forward to working with this committee and the rest of Congress to ensure excellence in logistics and materiel readiness.

I'm grateful for your consideration, and I look forward to your questions.

Chairman LEVIN. Thank you, Mr. Berteau.
Ms. Starzak?

**STATEMENT OF ALISSA M. STARZAK, TO BE GENERAL
COUNSEL OF THE DEPARTMENT OF THE ARMY**

Ms. STARZAK. Good morning, Mr. Chairman, Ranking Member Inhofe, and members of the committee. I am honored to appear before you today.

I would like to begin by expressing my gratitude to President Obama for the confidence shown in me by this nomination, Secretary Hagel, Secretary McHugh, and Under Secretary Brad Carson for their support of my nomination.

I recognize that I would not be here today except for the family, friends, and co-workers who have supported me over the years. I want to especially thank my family here with me today: my wonderful, supportive husband, Andrew Ferguson, who is a law professor at the University of the District of Columbia David A. Clark School of Law; my parents, Michael and Andrea Starzak, who taught me the value of public service; and my sister, Jocelyn Starzak, who followed those same values into the non-profit world as an attorney for the Special Olympics.

I also want to thank those, both civilian and military, that I have had the privilege of working with during these past few years serving the DOD Office of General Counsel. Their commitment to protecting America and improving the lives of those dedicated men and women who serve all of us by putting themselves in harm's way is extraordinary.

The General Counsel of the Army advises Army leadership on the legal implications of the many challenges facing the Army. I believe my background and experience in the Department, Congress, and the private sector have well prepared me to serve in this role.

I am committed to working closely with the Army Judge Advocate leadership and strongly believe in the value of having civilian and military lawyers work together to provide the best possible legal advice to our clients.

If confirmed, I will make every effort to live up to the confidence that has been placed in me. I am grateful for your consideration, and I look forward to your questions.

Chairman LEVIN. Thank you very much, Ms. Starzak.
Admiral Harris?

**STATEMENT OF ADM HARRY B. HARRIS, JR., USN, FOR RE-
APPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE
COMMANDER, U.S. PACIFIC COMMAND**

Admiral HARRIS. Mr. Chairman, Ranking Member Inhofe, and distinguished committee members, I'm honored to appear before you today as the nominee to lead PACOM.

I want to thank President Obama for nominating me. I also want to thank Secretary Hagel, General Dempsey, Secretary Mabus, and Admiral Greenert. I am deeply humbled by their confidence in me.

I'm fortunate to be joined today by my wife, Bernie. I simply wouldn't be here without her love and support. Bernie served in the Navy herself for 25 years after she graduated from Annapolis in 1984. We met in Japan when we were both stationed there. I

chased her to Hawaii and thank God she agreed to marry me in 1989. Bernie represents a growing number of military spouses who serve our Nation in uniform.

The All-Volunteer Force is sustained by our families. I'd like to thank this committee for your enduring support of our servicemembers and their families, and I would be remiss in not specifically thanking Chairman Levin, who will retire in 2015. Sir, your 4 decades on this committee have made all the difference.

If confirmed, I look forward to working closely with this committee as our Nation confronts the complex and compelling challenges in the vibrant Indo-Asia-Pacific region. Our most volatile and dangerous threat is North Korea, with its quest for nuclear weapons and the means to deliver them intercontinentally. The dramatic rise of China's military, the uncertainty about how it will use its growing capabilities, and its provocative actions in the region represent our most enduring challenge.

As we continue to defend our national interests abroad, our efforts are bolstered by our teammates in the State Department and across the Government. Our collective efforts amid the challenges I mentioned underscore the importance of America remaining strong and engaged in the region. American leadership does matter.

Since our strategic rebalance was announced 3 years ago, we broadened our operations with Japan, deployed marines rotationally to Australia, and improved missile defense in cooperation with South Korea. We have also signed an important security agreement with the Philippines.

The rebalance is real, and although we all have concerns about the fiscal landscape, I believe that America has the staying power to sustain it.

But there is more work to do, and if confirmed, I will remain laser focused on deepening our regional alliances and partnerships to increase our combat agility and readiness. I am fortunate to have had operational and policy experience, command assignments, and educational opportunities that align completely with PACOM's mission. I believe they have prepared me well for the challenges ahead.

If confirmed, I will follow the trails blazed by some truly great leaders like Admiral Sam Locklear, Bob Willard, and Tim Keating, all of whom mentored me and shaped my understanding of this region. Admiral Locklear's leadership of PACOM for the last 3 years has been of critical importance, and I am proud to have served as his Navy component in the Pacific Fleet.

I look forward to serving alongside the world's best soldiers, sailors, airmen, and marines, civilians and their families, as well as working with this committee and Congress as a whole to address the national security challenges that we have.

Mr. Chairman and distinguished committee members, leading PACOM is a significant responsibility. If confirmed, I pledge to all of you that I will devote all of my energy and focus to the job. I look forward to your questions. Thank you, sirs.

Chairman LEVIN. Thank you very much, Admiral.

Now we have standard questions that we ask of our nominees, so I would ask each of you to respond. In order to exercise our re-

sponsibilities, we have to receive testimony, briefings, and other communications of information. First, have you adhered to applicable laws and regulations governing conflicts of interest?

Mr. SCHER. Yes.

Ms. SLOTKIN. Yes.

Mr. BERTEAU. Yes.

Ms. STARZAK. Yes.

Admiral HARRIS. Yes.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Mr. SCHER. No.

Ms. SLOTKIN. No.

Mr. BERTEAU. No.

Ms. STARZAK. No.

Admiral HARRIS. No.

Chairman LEVIN. Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Mr. SCHER. Yes.

Ms. SLOTKIN. Yes.

Mr. BERTEAU. Yes.

Ms. STARZAK. Yes.

Admiral HARRIS. Yes.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Mr. SCHER. Yes.

Ms. SLOTKIN. Yes.

Mr. BERTEAU. Yes.

Ms. STARZAK. Yes.

Admiral HARRIS. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Mr. SCHER. Yes.

Ms. SLOTKIN. Yes.

Mr. BERTEAU. Yes.

Ms. STARZAK. Yes.

Admiral HARRIS. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Mr. SCHER. Yes.

Ms. SLOTKIN. Yes.

Mr. BERTEAU. Yes.

Ms. STARZAK. Yes.

Admiral HARRIS. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

Mr. SCHER. Yes.

Ms. SLOTKIN. Yes.

Mr. BERTEAU. Yes.

Ms. STARZAK. Yes.

Admiral HARRIS. Yes.

Chairman LEVIN. Now, just for our uniformed military nominee, the question that we ask of our nominees in uniform, so just to him, do you agree, when asked, to give your personal views even if those views differ from the administration in power?

Admiral HARRIS. Yes, sir, I do.

Chairman LEVIN. Now we will have an 8-minute first round, and I emphasize first round because we will go to a second round. We will work through the four votes at 10:30 a.m., and as I said, if necessary, we will have a continuation of this hearing for one or more of these nominees either later this week or next week.

Mr. Scher, Deputy Secretary Wormuth recently was quoted as saying that “we need a strategic modernization infrastructure fund” to recapitalize the nuclear forces already in place. Can you tell us how that would operate? When would this committee first see it in a budget proposal?

Mr. SCHER. Senator, we have spent a lot of time working to ensure we understand the needs of the defense nuclear enterprise and actually are funding it at a rate that we think will make sure that we can preserve the modernization of it and fix some of the problems that were found in the multiple reviews.

I do not know the details of the fund of which the Deputy Secretary speaks, but I do know the commitment of the Department to maintain the funding, to maintain modernization and to, in fact, increase the funding, I think as the Secretary of Defense said, approximately 10 percent over the \$15 to \$16 billion per year for the nuclear enterprise at this moment. I can certainly get back to you with details on the specific fund after the hearing.

[The information referred to follows:]

The internal Nuclear Enterprise Review final report included the following recommendation:

“The Department of Defense should consider, in conjunction with the National Security Council (NSC) staff, the Office of Management and Budget (OMB) and Congress, instituting an ‘OCO-like’ fund. The Nuclear Infrastructure Recapitalization Fund would be a multiyear appropriation of ‘colorless’ money to rebuild critical nuclear support infrastructure. This fund would allow the Services to concentrate on simultaneously repairing current infrastructure and modernizing with new systems.”

The Department is following the review’s recommendation, and is considering such a fund in consultation with OMB and the NSC staff. However, more work needs to be done to determine what the scope of such a fund would be and how such a fund would operate before we can bring such a concept forward for legislative consideration. I do not expect that the administration will be prepared to propose such a fund in the fiscal year 2016 budget. Regardless of the future disposition of such a fund, the Department is committed to making the investments necessary to sustain the safety, security, and effectiveness of its nuclear enterprise.

Chairman LEVIN. Okay. Mr. Scher, a second question for you. Over the last few years, the Defense Department has been provided a number of authorities to build the defense capabilities of our partners and friendly nations, and these include the global train and equip authority, security assistance funds for a number of specific countries or regions, including Iraq and Afghanistan, the global security contingency fund, and in the bill before us we will have funding to train and equip the nongovernment forces, irregular forces.

In your view, is the Department properly organized to ensure coordination and deconfliction of these various security assistance au-

thorities? If confirmed, are there steps that you would take to improve on the oversight and the coordination of the Department's authorities?

Mr. SCHER. Senator, I believe that right now we currently, as a department, do a good job of coordinating the various authorities that we have been given over the course of the past decade plus, as well as do a pretty good job of coordinating with the State Department, realizing that, in fact, building partner capacity is a job that is shared between DOD and the Department of State.

However, I do accept that there are a lot of authorities that continue to come; and, in fact, if confirmed, I assure you I will look at this to see if we can do a better job of being sure they are coordinated and deconflicted. In fact, there is an office in the new organization of Strategy, Plans, and Capabilities that has been stood up that, if confirmed for that position, I will oversee their attempts to ensure and their efforts to ensure that we can get greater clarity of each of these authorities and how they will be used together.

Chairman LEVIN. Thank you.

Ms. Slotkin, media reports have indicated that the administration may be considering support for a Turkish request to create a no-fly zone or a buffer zone inside of Syria along the Turkish border. Now, I have long supported this idea, as a number of my colleagues on this committee have. We would very much welcome consideration of this request.

Can you tell us what is your understanding of the request and what is the view of the administration on the Turkish request?

Ms. SLOTKIN. Yes, Senator. The idea of a safe zone or a no-fly zone or a buffer zone is something that the Turks have been talking to us about for a couple of years now. They have raised it off and on for at least 2 years that I am aware of, and we are in regular discussion about their proposal. The Vice President was there last week. This is something that was discussed. Those talks are ongoing.

We don't currently think that a no-fly zone fits the bill, but it's something the elements of which we're looking at very closely to see if there is a proposal that advances our combined objectives.

Chairman LEVIN. What is the problem with the proposal?

Ms. SLOTKIN. Sir, I think that at this point we're still in conversation to understand exactly the elements that they're talking about. Their proposal has changed over time, and the Vice President had extensive conversations, including private conversations, about the details so that we understand exactly the elements they're proposing.

Chairman LEVIN. Do you know whether the proposal includes the use of Turkish troops on the ground inside Syria? Do you know if that proposal includes that element?

Ms. SLOTKIN. I think the proposal involves a full range of air and land elements, sir.

Chairman LEVIN. Would greater access and use of the Turkish military installations, particularly at Incirlik, be granted as part of the U.S. support for such a zone?

Ms. SLOTKIN. We're in regular conversation not just on this proposal but about our counter-Islamic State of Iraq and the Levant

(ISIL) strategy and how greater access to those bases would provide us additional resources for the counter-ISIL fight.

Chairman LEVIN. Do you know whether or not the use of Incirlik is part of the Turkish proposal?

Ms. SLOTKIN. I don't know that specifically, sir. I know that it's very much part of the conversation.

Chairman LEVIN. Okay. Mr. Berteau, in recent years there's been an increase in the number of DOD weapon system platforms that are contractor supported, particularly in the Air Force and the Navy. What are the most significant areas in which the Department could improve oversight and management to ensure that operating and support costs of a weapons system are reasonable and accurate, particularly given the fact that there is an increase in the number of platforms that are contractor supported?

Mr. BERTEAU. Mr. Chairman, a huge percentage of life cycle costs of any weapons system is pretty much determined by the time you get to what's known as Milestone B, the engineering and design development stage decision. The costs that are incurred later in cycle are largely determined upfront. The single greatest challenge is to make a better evaluation at the front end in the design process.

One of the decisions or implementations, if you will, from the Weapons Systems Acquisition Reform Act was a better job of cost estimating and better consideration of cost estimating inside the Department. What I don't know is how much that cost estimation improvement has extended into life cycle cost maintenance.

I think what I would do if confirmed is look most carefully at that question. Historically, that's generally determined through a parametric modeling of what it cost you on the previous weapon system. While that's important, it may not be sufficient to be able to maintain that.

The question of what is done under contract logistic support as opposed to organic support I think depends on each weapon system and the plan that's put into place at the time, and that has to be looked at again as part of the milestone review process in the acquisition. If confirmed, that's what I would intend to do, and that would be part of my responsibility as the Assistant Secretary.

Chairman LEVIN. Thank you.

Finally, Ms. Starzak, what is your view of the need for the Judge Advocate General to provide independent legal advice to the Secretary of the Army, including independent of the General Counsel?

Ms. STARZAK. Senator, I believe that is very important. It's obviously a statutory responsibility of the Judge Advocate General, and I support that.

Chairman LEVIN. Thank you.

Senator Inhofe?

Senator INHOFE. Thank you, Mr. Chairman.

Let me ask one question of all five of you, and you just answer starting with you, Admiral, since I know what your answer is going to be.

We're all concerned with the sequestration. We've been talking about that a lot, and prior to that we've had other problems with the administration in terms of the support of the military. I'll ask each one of you—do you agree that sequestration would significantly increase risk, and that risk is equated to lives?

Admiral?

Admiral HARRIS. Senator, I believe that if there is no relief to the sequester, it will, in fact, increase risk. It will increase the risk to the lives of our service men and women. I believe it will decrease the size, the reach, the lethality, and the technological edge that we enjoy today over our adversaries and potential adversaries.

Senator INHOFE. All right. A yes or no answer is fine. [Laughter.]

Ms. STARZAK. Senator, I believe that Army leadership and the Secretary of Defense has testified about the problems of sequestration for the Army.

Senator INHOFE. No, no. How do you feel about it?

Ms. STARZAK. I agree with those views. From a legal standpoint, we obviously will look to try to address them.

Senator INHOFE. Military sequestration would increase risk. Risk is lives. Do you agree with that?

Ms. STARZAK. Senator, I do agree with that.

Senator INHOFE. Yes.

Mr. Berteau?

Mr. BERTEAU. Yes, sir, I agree with that.

Senator INHOFE. Ms. Slotkin?

Ms. SLOTKIN. Yes, sir.

Mr. SCHER. I agree. It risks lives and other issues, but certainly lives are part of it.

Senator INHOFE. I think it's important for us to understand that that's what we're talking about. When we get General Odierno and others who come in here and they talk about the problems that we're going to have, what that is going to do, the people need to equate risk and lives. That's what we're talking about here.

Admiral, you and I have talked in my office about what's happening, and with the rebalance to the Pacific that's going to be in your responsibility, if this should go through, sequestration, would we have enough force structure to carry out that policy that you need to be doing and that you want to do?

Admiral HARRIS. If we get no relief from the sequester, it will affect the strength and the reach of our rebalance to the Pacific, in my opinion.

Senator INHOFE. Okay. The other thing I'm going to ask you because nobody seems to talk about this, when Kim Jong-un took office, I thought no one could be worse than his daddy, but nonetheless we're in a situation right now, and I'd like to know, do you think he would be more likely to be aggressive? Let's just put it this way. The carrier gaps that we're faced with right now and the reduced U.S. defense spending, do you think that would make him more militarily aggressive? Or how do you think he'd react to that?

Admiral HARRIS. I'm not sure how he would react to it, Senator, but I believe that he is a very opportunistic and very unpredictable and a ruthless leader, and I think therefore that if we face continuing carrier gaps or perhaps the loss of a carrier strike or two, as our Chief of Naval Operations has testified, if the sequester continues, then I believe he will take advantage of that.

Senator INHOFE. He is totally unpredictable.

Admiral HARRIS. Yes, sir.

Senator INHOFE. Ms. Slotkin, let me share with you, I was in Kiev. Their election was 1 week before our election, and I was

there during that timeframe. That was an incredible election that a lot of people are not aware of, and that is that Poroshenko was so supported in that election, as well as was Yatsenyuk, the Prime Minister.

A lot of people are not aware that if a party doesn't receive 5 percent, then they can't be in the Parliament. This is the first time in—let me make sure I get this right—the first time in 96 years that the Communist Party will not have a seat in Parliament. That's an incredible thing that's going on. We hear the bad news, and that's the good news.

But when the President, as I said in my opening statement, was asked whether the United States should provide lethal assistance to Ukraine, he said no but added, "Now, if you start seeing an invasion by Russia, that's obviously a different set of questions. We're not there yet." I think we are there yet. Do you agree?

Ms. SLOTKIN. Sir, I think that—

Senator INHOFE. Do you agree that 5 months before that, when they annexed Crimea, that that was an invasion of Ukraine?

Ms. SLOTKIN. I believe it was an illegal occupation and an unlawful annexation of Crimea. Yes, sir.

Senator INHOFE. Was it an invasion?

Ms. SLOTKIN. I don't know the actual definition of invasion. I know it was an unlawful occupation.

Senator INHOFE. Okay, I get your answer. If the administration asks whether you recommend that Ukraine be provided lethal assistance, will you answer yes or no, and why?

Ms. SLOTKIN. Sir, I think, as you may have heard last week, the option of providing lethal assistance, lethal defensive assistance, is currently being looked at. I support all options being looked at. Those—

Senator INHOFE. But we've been looking at it for quite a while now, and it's lethal assistance. I mean, I was over there and talking to them, and they have come out with incredible support of the West and of us in their elections, and they are begging for it. I mean, what more looking at it do we need to do?

Ms. SLOTKIN. Sir, again, from the Defense Department perspective, we've provided some considerations. Those are being looked at now. I think it is important to note that we have provided over \$116 million worth of security assisting the Ukrainians. I know it's not lethal assistance.

Senator INHOFE. It's not—

Ms. SLOTKIN. I understand.

Senator INHOFE. Okay.

Ms. SLOTKIN. I frankly think that much more important even than that is the joint commission we've set up with the Ukrainians, the 25 visits that our generals have made from U.S. European Command to work on the medium- and long-term needs of the Ukrainian military to build them into a truly substantial force, more than any one piece of equipment, sir.

Senator INHOFE. The question was if the administration asked whether you recommend that Ukraine be provided lethal assistance, knowing what you know now, would it be yes or no?

Ms. SLOTKIN. Again, I believe—

Senator INHOFE. Okay, that's fine.

Mr. Scher, in my opening statement I talked about a couple of things that are in the law. One is the QDR. We talk about doing that—I think that’s title 10—every 4 years. But also it specifically talks about the national security strategy. Now, reading from title 50 in section 3043, it says, “The President shall transmit to Congress each year a comprehensive report on the national security strategy of the United States.” I mean, that’s pretty specific, don’t you think?

Mr. SCHER. Yes, sir.

Senator INHOFE. What are your intentions of doing to see that they start following that law?

Mr. SCHER. If confirmed—

Senator INHOFE. It’s been 4 years now.

Mr. SCHER. If confirmed in this position, I look forward to working with the White House to help them produce a national security strategy. I will say—

Senator INHOFE. You don’t even work with them. I’d like to have a little stronger answer because you’re going to be responsible for this area.

Mr. SCHER. Certainly, Senator, and I will be responsible, if confirmed, for the QDR publication and drafting, which obviously gets approved by the Secretary, where we talk about the defense strategy. We make sure that whenever we develop that defense strategy, we do it in consultation with the White House and other inter-agency players throughout the administration. That is something I can assure you I will continue to do.

Senator INHOFE. Good, good. That’s good.

I’m out of time now, but I want to get an answer for the record on this, Mr. Berteau. It seems on acquisition reform I can remember 28 years ago, the 8 years I spent in the House and then the last 20 years in the Senate, we talked about that acquisition reform. We’ve done a lot of talking about it, and every time we come up with something, they want more regulations and this type of thing. I’m beginning to think that maybe you might be particularly suited for this in that you had this in your background but you left this area in government in 1993. Is that correct? Now you’re coming back. Does that give you a fresher look at this? For the record, if you could give me a report on what you might be able to do differently because of your unique background. Okay?

Mr. BERTEAU. Yes, sir. I would also refer you to my testimony before this committee back on April 30th, which already included some of that.

Senator INHOFE. Good.

[The information referred to follows:]

Senator Inhofe, you are correct that acquisition reform issues are in my background. My first position in the Pentagon in 1981 as a career civil servant was supporting the acquisition reform efforts known as the Carlucci Initiatives. I served as the executive secretary of the Packard Commission in 1985–1986, supporting Dr. William Perry’s writing of that commissions acquisition reform recommendations. More recently, since becoming a full-time scholar at the Center for Strategic and International Studies, I have testified on the subject three times, twice before the House Armed Services Committee and once before this committee:

- “Acquisition Improvements for 2015 and Beyond” Testimony by David J. Berteau before the Senate Armed Services Committee, April 30, 2014. Panel included Jonathan Etherton and Moshe Schwartz. Committee video at <http://www.armed-services.senate.gov/hearings/14-04-30-reform-of-the>

defense-acquisition-system. Statement at <http://csis.org/files/attachments/ts140430—Berteau.pdf>.

- “DHS Acquisition Practices: Improving Outcomes for Taxpayers Using Defense and Private Sector Lessons Learned.” Testimony by David J. Berteau before the House Homeland Security Committee, Subcommittee on Organization and Management Efficiency, September 19, 2013. Panel included Stan Soloway and Bill Greenwalt. <http://csis.org/testimony/dhs-acquisition-practices-improving-outcomes-taxpayers-using-defense-and-private-sector-le>

- “If These Are Such Good Ideas, Why Are They So Hard To Implement?” Testimony before the House Armed Services Committee, April 29, 2009. <http://csis.org/files/media/csis/congress/ts090430—berteau.pdf>

In addition, I was invited to contribute an essay on acquisition reform to the recently-released report from the Permanent Subcommittee on Investigations of the Senate Committee on Homeland Security and Government Affairs. The report is titled “Defense Acquisition Reform: Where Do We Go From Here? A Compendium of Views by Leading Experts. It was released October 2, 2014, and may be accessed at <https://acc.dau.mil/adl/en-US/714067/file/78423/Defense%20Acquisition%20Reform%20Where%20Do%20We%20Go%20From%20Here.%20US%20Senate%20Staff%20Report.pdf>, or through the subcommittee’s web site at <http://www.hsgac.senate.gov/subcommittees/investigations/media/senators-mccain-and-levin-release-permanent-subcommittee-on-investigations-psi-report-on-defense-acquisition-reform>.

From my work on acquisition issues in the Defense Department, as a contractor, and as an academic scholar, my perspective is that Congress and this committee could most usefully focus on streamlining and integrating what some have called the “patchwork quilt” of statutes that drive regulations on risk reduction, acquisition strategies, and sustainment. The recent draft of the Defense Department Instruction 5000.02 includes approximately 30 pages of such requirements, with many different timelines, thresholds, and reporting requirements. Complying with this mix of reporting requirements adds time and may even undermine accountability by making it more difficult to determine what was decided, when, and by whom.

As for what I would do differently if confirmed, I would focus on streamlining, by working to support current and planned efforts to address this need for streamlining by the Defense Department, the Under Secretary of Defense for Acquisition, Technology, and Logistics, the Administrator of the Office of Federal Procurement Policy, and Congress. I would also focus on acquisition practices that help meet the needs or requirements of deployed forces, as outlined in my previous statements noted above.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator REED?

Senator REED. Thank you very much, Mr. Chairman; and thank you, ladies and gentlemen.

Admiral Harris, just for the record, I think my understanding is that U.S. Forces Korea (USFK) is a subcommand under PACOM?

Admiral HARRIS. Yes, sir. It’s a subunified command under PACOM.

Senator REED. You were, in fact, in charge of our military response to the North Koreans?

Admiral HARRIS. In the USFK hat, but General Scaparrotti is also the Combined Forces Command and the United Nations commander for Korea independent of PACOM.

Senator REED. But you have this complementary relationship, and my sense is you’re working very closely together, both individually but also organizationally, so that you have a consistent view of the situation in Korea and you feel comfortable going forward with that arrangement.

Admiral HARRIS. Yes, sir. I have a very comfortable relationship with General Scaparrotti and with Admiral Locklear in my present hat as Pacific Fleet. If confirmed, I will continue that relationship with USFK. I believe that PACOM’s primary responsibility is to support USFK on the Peninsula in the case of a Korean contin-

gency, and that translates to all the components, to Pacific Fleet as well, that our mission has to be ready to fight tonight. We take that seriously in our preparations.

Senator REED. Can you comment on the cyber activity that may be emanating from North Korea? It's a new dimension, it's a new threat, relatively new, and it would be something I think in your command will be increasingly more persistent and troubling as you go forward.

Admiral HARRIS. Yes, sir. I believe that North Korea is seeking asymmetric advantages over us and our allies in the Pacific, and cyber is just one of those methods by which they're seeking to get that advantage.

Senator REED. Thank you, sir.

Turning to China now, they are increasing their budget militarily. They are increasing their actions in adjacent waters. Their strategy seems to be access denial, which raises, particularly for PACOM, the issue of how do you structure your fleets to respond to that, what weapons systems do you emphasize, particularly as the Chinese seem to be deploying more and more long-range precision missile systems that can effectively, very effectively attack surface ships. Can you comment on your ideas going forward about these issues?

Admiral HARRIS. Yes, sir. I believe that China's access area denial strategies are worthy of our taking a hard look at it. In the Navy perspective, I believe our fighter aircraft are key to us being able to get in there to do the missions that will be assigned by PACOM. I think the joint strike fighter is key to that. Our carrier strike groups form the heart of that and our submarines, which are inherently stealthy, provide a measure of advantage today and into the foreseeable future over China and any other adversary in the Pacific, sir.

Senator REED. You would say that, again, the critical ability of aircraft to penetrate is going to be important, but the submarines provide, at least at this point, the biggest sort of leverage we have in the Pacific?

Admiral HARRIS. I believe today the submarine force is our indisputable leverage over any potential adversary in the Pacific.

Senator REED. Let me ask you another question and that's about the amphibious capabilities of PACOM. Because of the conflict in Afghanistan and Iraq, our marines have been there almost continuously. Now they're starting to reorient, regroup, and begin to practice amphibious operations. Can you give us your sense right now of what our capabilities are for amphibious assault?

Admiral HARRIS. Yes, sir. Today we have five amphibious ready groups in the Pacific, one forward deployed, the Sasebo in Japan, to support the Marine Expeditionary Unit in Okinawa. We have four amphibious ready groups in San Diego, and we'll be building a fifth by 2018. We welcome the return of the Marine Corps to its amphibious routes, and we're working very closely, I am working very closely with Marine Corps Forces Pacific, Lieutenant General Toolan, ensuring that us the Navy, the Pacific Fleet, and the Marine Corps are marching side by side, if you will, in lockstep on the need for amphibiousness in our naval services.

Senator REED. Do you have a plan for increased amphibious training exercises in the Pacific going forward?

Admiral HARRIS. Yes, sir.

Senator REED. Thank you very much.

Ms. Slotkin, you just spent a great deal of time in Iraq, 2 years as an intelligence officer early in the conflict, and State Department work. Can you talk about the situation, the political situation now with Abadi versus the Maliki Government?

Ms. SLOTKIN. Of course. I think the good news is that Prime Minister Abadi is saying the right things and starting to do the right things on the critical issues of reform and reconciliation in Iraq. This is different from what Prime Minister Maliki did, particularly after 2011. In fact, Prime Minister Abadi has been deconstructing some of the things that Maliki did during his time.

We saw, again, he just removed another 20-plus Ministry of Interior officials today for corruption and mismanagement. That's on top of 36 general officers I think about a week ago. He's identified and made a big speech in front of his Parliament yesterday about the 50,000 ghost soldiers that were on the books. He's attacking corruption, and he's attempting to reach out particularly to the Sunni community.

This is a critical piece of any work we do and they do in Iraq against ISIL. Again, the countervailing winds in Iraq are strong, but he's doing and saying the right things.

Senator REED. Our troop presence today, what justification and what sort of precedent are we using as we're building up our forces? At the invitation, obviously, of the government, but also to protect our own resources?

Ms. SLOTKIN. Sure. Sir, are you referring to the missions that they're performing?

Senator REED. Not so much the missions, but we have forces there, and they are protected by the—let me ask, do we have a Status of Forces agreement in place?

Ms. SLOTKIN. We currently have an exchange of notes with the Government of Iraq that provides us privileges and immunities.

Senator REED. We feel with this government it's much more reliable than with the Maliki Government?

Ms. SLOTKIN. Yes. There's a much wider range of Iraqis who have invited us in on an emergency basis to come and help them take back part of their country. It's a wide range of Iraqis that support us and our interactions there.

Senator REED. Is it your view that without this political progress in Iraq, that military efforts would be very difficult to succeed?

Ms. SLOTKIN. I think the political piece, which is where the Iraqis really must lead, is critical, sir, to the success of the mission.

Senator REED. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

Senator FISCHER?

Senator FISCHER. Thank you, Mr. Chairman; and thank all of you for being here today. I appreciate your willingness to step forward.

I would like to begin with a discussion on the bilateral security assistance as a policy tool. Ms. Slotkin, if I could begin with you, please.

It appears that bilateral security assistance is occupying a greater role as we move forward with U.S. policy. Earlier this year General Dempsey spoke of doubling or even tripling our effort to build credible partners around the globe. How do you see this developing in the next few years, and do you think there's a ceiling on how much we can accomplish?

Ms. SLOTKIN. Ma'am, thank you for that. I think it's a critical question. We've all talked about the complexities of the world's problems, the unpredictability of the world, and there's nothing more important than the capacity and capability of partners in addressing those common threats. We are big believers in security assistance and building partner capacity. It's a cornerstone of the QDR and a cornerstone of almost everything we do around the world.

I don't know if there's a ceiling on what it can do because I think if the model is Europe, where we have our most capable partners working with us, that's what we'd like to see in every region of the world, truly capable partners working with us side by side.

Senator FISCHER. As we look at the program, though, we all realize it's an indirect way for the United States to accomplish its policy goals, and we look around the world and we see other countries that are more directly involved in many areas such as the Ukraine. Do you think there's a limit to what we can do with the bilateral security assistance in areas like that, where maybe we should be stepping forward in a more forceful and direct manner?

Ms. SLOTKIN. Again, I think in the places where our allies and partners are most capable, you see that as part of deterrence against these kinds of destabilizing behaviors. I don't think there's a ceiling. Whether the United States should get involved, I think it's always critical whether it threatens U.S. national interests directly, and I think in those places where it affects our Homeland, U.S. persons and interests abroad, we should act decisively, and I think we have.

Senator FISCHER. You feel our actions in Ukraine are appropriate at this time?

Ms. SLOTKIN. I think that we are doing quite a bit to support the Ukrainians. I know there's a debate about whether we should be doing more, but I think the work in particular that we're doing with advising and training the Ukrainian military is significant, and I think that it's showing effect.

Senator FISCHER. Thank you.

Mr. Scher, do you have anything to add on how you see this assistance developing in the future?

Mr. SCHER. Thank you, Senator. I believe it's a very important tool that we have to try to advance U.S. interests and take advantage of opportunities and protect ourselves against threats by working closely with countries around the world at different levels, depending on what that country is capable of doing, either helping themselves, helping them to help themselves, or helping them so that they can help in global priorities.

It is one tool. It's an important tool. It is not the only tool.

Senator FISCHER. Do you see a ceiling on when it should be used and when we may possibly have to move on to more direct assistance?

Mr. SCHER. I think it's a situation, Senator, that depends on each case, that in some cases we will have provided enough. But it's rare that we get to the point, that I have seen, where we have spent enough time on building partner capacity. But certainly you have to weigh that against the other tools that are appropriate given the situation at the time.

Senator FISCHER. Thank you.

Admiral Harris, can you speak to those programs in your area of operations on the bilateral security assistance programs?

Admiral HARRIS. Yes, ma'am. We have a lot of bilateral security arrangements in the Pacific. We have five, all of our Nation's five treaty allies, bilateral treaty allies are in the Pacific, and we work closely with them and our partners and friends.

I would add to what my colleagues at the table have said in that the United States is constrained—and I use “constrained” as a positive verb—we're constrained by law, regulation, and policy in what we can do. Other countries are not so constrained, and so they are doing things that may be more direct, and I would view some of their actions as illegal.

Senator FISCHER. Thank you, sir.

If I could continue with you, Admiral, with nuclear deterrence. China is continuing to modernize and also to expand its nuclear forces, and your predecessor often talked about the Chinese advancements in the submarine capabilities and the new submarines that they're putting online.

Are you concerned about the Chinese investments in those nuclear forces? Do you believe that more than reinforces our need to modernize our nuclear capabilities?

Admiral HARRIS. Yes, ma'am, I am concerned, and it reinforces my belief that we must continue to modernize our nuclear capabilities.

Senator FISCHER. Do you see that part as your mission to try to get that message out there, that the nuclear deterrence is still, I believe, one reason that we have remained safe in this country for over 60 years?

Admiral HARRIS. Yes, ma'am. It is my mission as the commander of the Pacific Fleet, and if confirmed I will continue to make that my mission as PACOM commander.

Senator FISCHER. I would hope you would be forthright and honest with this committee when you're questioned in regard to that.

Admiral HARRIS. Yes, ma'am.

Senator FISCHER. Thank you, sir.

Ms. Slotkin, can you speak to the importance of our deterrent in respect to our security commitments that we have?

Ms. SLOTKIN. Sure. Senator, I think that deterrence is a fundamental concept that we think about and work on every day in the Department, most recently with the reassurance initiatives that we have been partaking with the North Atlantic Treaty Organization (NATO) alliance, our strongest allies. We have come to Congress and asked for additional support for the European Reassurance Initiative so that we can do just that, we can absolutely back up this

critical deterrent threat against Russian aggressive behavior and anyone else who seeks to violate the Article 5 commitments of NATO.

I think it's a cornerstone of the transatlantic alliance. It's something we work on every day and we look forward to doing more of in light of Russian aggressive behavior.

Senator FISCHER. Thank you very much.

Thank you, Mr. Chairman.

Senator REED [presiding]. Thank you, Senator Fischer.

Senator Udall?

Senator UDALL. Good morning to all of you. Let me pick up where Senator Fischer just left off and, Mr. Scher, direct a question your way.

In your advance policy questions, you discuss the challenge of modernizing our nuclear forces in a cost-effective manner. There are a lot of varying estimates of the price involved, the cost involved, but it's clear we're going to have to make a significant investment.

Can you talk about why this is a necessary investment and what you think can be done to implement nuclear policy and strategies in a cost-effective manner? Because this is a very expensive undertaking.

Mr. SCHER. Yes, Senator. It is an expensive undertaking. In the broad scheme of the DOD budget, it is not a huge percentage. Importantly—and the Secretary and the Deputy Secretary have been very clear—this is the number-one priority for them. The nuclear enterprise, as we have seen with the reviews that were conducted, both the internal and the external review, we clearly see that we have underperformed in the nuclear enterprise. It remains safe, secure, and effective. But in order to continue that, we need to make sure that we invest in the DOD nuclear enterprise, as well as modernization.

The Secretary has stated when those reports were rolled out, we spend approximately \$15 to \$16 billion per year on the nuclear enterprise in DOD, and we are looking to plus that number up in the billions, not tens of billions but in the billions, and we're still making final decisions on the additional money that we put to that.

But importantly, I would note, it is money that is not coming out of future modernization but is coming out from other parts of the DOD budget because we recognize the importance of continuing to modernize the nuclear enterprise in DOD.

Senator UDALL. Let me follow up specifically in regards to your support for the “fly-before-you-buy” policy for the ground-based interceptors. We have in some cases rushed untested systems into production, and that's a costly decision. Can you talk specifically about how you're going to proceed in that context, particularly if we can't deal with the pitfalls that surround sequestration?

Mr. SCHER. Certainly. First of all, Senator, as I think we were asked and I would like to emphasize, sequestration throws all of this into question, and it is something the Department feels very strongly about broadly.

In terms of the “fly-before-you-buy,” that is part of our stated policy in the Ballistic Missile Defense Review. I, if confirmed, will continue to support that. Certainly we need a robust testing program,

but we do not want to be testing things that we are not comfortable will succeed, although obviously testing means that sometimes we'll fail. But "fly-before-you-buy" is stated policy and, if confirmed, I will continue that.

Senator UDALL. We have an objective through the President's leadership of reducing the total number of deployed nuclear weapons. We're working on bilateral negotiations with Russia. Can you elaborate on why it's possible to reduce the total number of deployed strategic weapons without jeopardizing our security or weakening the deterrent effect of our nuclear enterprise?

Mr. SCHER. Senator, right now we are looking to get down to the New Strategic Arms Reduction Treaty (START) levels, which we look to get to in the early part of 2018. The President has said that he believes that we could reduce that further, but he also made clear during that, that that was part of a negotiated process with the Russians, that we wouldn't seek to do that without that bilateral work with the Russians. Right now, it's hard to imagine that we are in that situation where we could talk to the Russians about that kind of work.

Senator UDALL. Thank you for that set of insights.

Before turning to Ms. Slotkin, I want to acknowledge Ms. Starzak. You did great work on the Senate Intelligence Committee. I've been proud to serve on that committee for 4 years, and I want to thank you for your work and for the work you're going to do in the future. You have certainly earned my respect and support for your efforts there.

Ms. STARZAK. Thank you, Senator.

Senator UDALL. I look forward to working with you when you are confirmed, shall we say.

Ms. Slotkin, you have an enormous portfolio which you've come to, I think, well prepared to handle. Would you talk a bit about the Sahel and the sub-Sahara and what's happening there and what we need to do to have an effective presence?

Ms. SLOTKIN. Sure. The Sahel and, in general, North and West Africa are an area where we're seeing the proliferation of extremist groups, some of them small, some of them medium sized, and it's something that we keep a very close eye on, particularly in Mali and the countries surrounding Mali.

I think, first and foremost, we direct our attention in our Intelligence Community on those changing threats. Second of all, we work closely with partners in the region, improving our relationships, improving our cooperation so that we can face the common threats. They are under most direct threat from these groups.

Additionally, as you've seen in Mali, we work very closely with our allies, particularly our European allies, in actually combatting the threat.

DOD is very engaged in supporting a French effort and a United Nations (U.N.) effort to try to bring stability back to Mali where we had real problems with extremists in the past year-and-a-half.

Senator UDALL. I believe Senator Fischer and others on the panel have already asked you about how we encourage our allies, shall we say, to do more. I think the NATO countries are well aware of the threats, and we need to see them make a greater investment in their military capabilities.

Talk about our Arab allies and what it will take for them to realize they cannot continue to play both arsonist and fireman when it comes to the threat of Islamic fundamentalism and the terrorism that follows.

Ms. SLOTKIN. Sure. We have robust relationships with our Arab allies, particularly the Gulf states. I think what we're seeing right now in operations in both Iraq and Syria is a real proof of concept of the work that we've done with the Gulf states in particular to build up their capabilities.

We now have a number of Arab states who are flying combat missions over Syria and Iraq. They're performing targeting. They're performing a number of activities that we do and that they're doing in our stead, and I think that that's critically important and different than the last time we were engaged in Iraq. I think we've made some progress on that score.

I do think that the states of the region see a real threat from ISIL and the extremists. They see a real threat from the instability emanating out of Syria, and we work very closely with those states to try and counter it in their neighborhoods and get them engaged to do more, both in Iraq and Syria.

Senator UDALL. I have a minute left. I know you're a student of history. I know you also have, as Senator Reed pointed out, experience on the ground in Iraq. Could you tell us what historical lessons that you believe we have either ignored or we've overemphasized in the past several years, particularly in regards to the Middle East?

Ms. SLOTKIN. Sure. I think that the greatest lesson that I've learned over the past 11 years in government is that military success must be complemented with political reconciliation and reform, or it certainly isn't lasting. I think we learned that before we decided to surge in Iraq. I think we learned the positive lessons during the surge and just after, and I think we saw that demonstrated when Prime Minister Maliki squandered the opportunities that we had provided him. I think that would be, sir, my bumper sticker lesson, political reform to complement military success.

Senator UDALL. Thank you for that insight.

Thank you all for your service.

Chairman LEVIN [presiding]. We have how long left on the vote? We have 3½ minutes plus 5 for the vote. So if you want to start—

Senator MANCHIN. I can start very quickly.

Chairman LEVIN. If there's nobody here, then just recess, if you would, until one of us comes back.

Senator MANCHIN. Yes.

Chairman LEVIN. Thank you.

Senator MANCHIN [presiding]. I'll start for a few minutes, and then we'll recess.

First of all, I want to thank all of you and recognize your outstanding service to the Nation. I want to thank you for accepting the nomination and thus shoulder the task to help ensure that our Nation's military remains the greatest in the world.

With that being said, Mr. Scher, if I may, I'll start with you. Having watched this year's Iraqi security forces fail to stop the in-

vasion of ISIS, I remain concerned as we draw down forces in Afghanistan. I want to be clear that I do not support keeping a large American force in Afghanistan indefinitely. It seems likely that we will need a counter-insurgency force, special forces if you will, there for some time.

How can we prevent Afghanistan ending the way Iraq did, sir?

Mr. SCHER. Senator, I believe that one of the important things is our continued commitment to Afghanistan and working very closely with the country and the leadership there. I have great faith and confidence in John Campbell, who is the International Security Assistance Force (ISAF) commander, and I think he has a great vision and working relationship with the Afghanistan leadership, and I expect that he will continue to provide advice and counsel to the Department and to the President about what the relationship should be and what military forces and military missions should be there for the President to make a final decision.

I also think that we will benefit from looking at the lessons of our engagement in Iraq and hopefully be able to apply them appropriately in Afghanistan.

Senator MANCHIN. Let me ask you about the Afghan security forces and securing their own territory, especially given the recent voluntary departure of the Kabul police chief.

Mr. SCHER. Senator, I don't have a direct view of how capable the Afghan security forces are. I know we've been working closely with them. There are certainly some forces that are quite capable and other forces that are probably still engaged in learning. I wouldn't have an assessment but would rely on the assessment of General Campbell about how effective they will be as we draw down our forces.

Senator MANCHIN. Concerning Ukraine, what more can be done there for us to help Ukraine, other than just the little bit of token help that we're giving right now and the supplies they've asked for and the type of armament?

Mr. SCHER. Senator, I think that, as Ms. Slotkin has said, we are providing a good amount of support to the Ukrainian forces. This is not solely a military condition that we are facing. This has to be addressed both by the military and political and diplomatic. There's a range of things from the perspective of DOD that could be brought forward, but certainly we'd have to do that in the context of the whole-of-government approach.

Senator MANCHIN. At this time we're going to go ahead and recess, and I'm going to go vote, and we'll come right back, and everyone should be back here in a few minutes, okay? Thank you.

Meeting recessed. [Recess.]

Senator SHAHEEN [presiding]. If I can call the hearing back to order. Since I'm the only one here and I'm up next, we'll get started until someone else comes.

Senator NELSON. I'm here.

Senator SHAHEEN. I know, but they told me I was ahead of you, Senator Nelson. [Laughter.]

They said I could go anyway.

Senator NELSON. We have another vote coming.

Senator SHAHEEN. Yes.

Thank you all very much both for your willingness to continue to serve our country and also for being here today.

I would like to start, Admiral Harris, with you, and thank you for taking the time to come in and meet with me. I very much appreciate that.

One of the things that we discussed in our meeting was the potential for Compass Call, which is the military's only standoff electronic weapons program, to be looked at as potentially coming back and providing for important electronic attack aircraft support in the Pacific generally. I ask this because this is a program that some of our businesses in New Hampshire are very involved in, and I just wonder if you could talk a little bit about the potential for this system and how it could be used in the Pacific.

Admiral HARRIS. Yes, ma'am. I have used or been associated with Compass Call in the past in some of my previous assignments. It's a fantastic platform and there's nothing like it for what it does. If confirmed, I believe that there's a real need for that electronic attack capability in the Pacific. If confirmed, I'll be asking for all that I can get for all the things that are out there in the electronic attack arena.

Senator SHAHEEN. Thank you very much. Anything that we can do to support that I certainly am interested in doing.

I want to follow up next on a question that Senator Inhofe asked and that a number of you have referred to around sequestration because obviously it's something that all of us on the committee are also very concerned about, and you all acknowledged the potential impact of sequestration. I wonder if you could define how long we have to solve this problem before it becomes long-term irreversible, or at least has a dramatic impact in the long term before we can address reversing the impacts of sequestration.

Admiral Harris, do you have any sense of how soon it becomes an increasing burden?

Admiral HARRIS. Senator, it's already a burden. We were sequestered in 2013, and we're still coming out of the burden to the maintenance of our ships and aircraft and our training of personnel, particularly our pilots. I believe that the sooner we can get the sequester reversed, the better off we are. If we wait until 2016, that will just be so much the more that we'll have to come out of the valley that we find ourselves in. If we wait until 2020 or 2021, I think it will be too late. I believe by then we'll be down to maybe 250 ships.

China is going to have 350 ships by 2020, and we're going to be down to 250 to 255. I believe that's dramatic, and that's globally. China is going to have them all there in the Pacific, and we're going to have 250 to 255 to meet all the demands of all the commands and commanders in the whole world. I think the sooner that the sequester can be reversed, the better off we will be.

Senator SHAHEEN. Would anyone else like to add to that?

Mr. SCHER. Senator, if I could, in addition to supporting everything that Admiral Harris has said, I think the other big piece is predictability, the fact that we go year to year not knowing exactly what we can plan for. It's very hard to do long-term strategic planning with short-term budgeting. In addition to sequester and the effects we are seeing right now and still trying to climb out of, get-

ting some level of predictability and avoiding Continuing Resolutions is very important to the defense budget.

Senator SHAHEEN. Thank you.

Ms. Slotkin?

Ms. SLOTKIN. I'd just echo those comments as someone who, if confirmed, would be responsible for a pretty fractious part of the world. The predictability is critical to making sure that we have the flexible, agile posture, presence, capabilities that we need to handle these threats. I'd just echo what Bob Scher has just said.

Senator SHAHEEN. Thank you.

Anyone else want to add to that? Mr. Berteau?

Mr. BERTEAU. Senator, thank you. I think one of the lessons we see from history from previous drawdowns is that each year you delay adding back, the more it costs. It's not a one-for-one tradeoff. I think that's part of the calculation that you have to bring into it there.

Senator SHAHEEN. Thank you.

Ms. Starzak, I'm not going to overlook you, but since you're part of the legal system, I'm going to go on to my next question, and this is for Ms. Slotkin.

You talked about lethal weapons as one of the options that was being considered in Ukraine. Deputy National Security Advisor Tony Blinken also talked about lethal assistance remaining an option that's under consideration.

The question that I have for you is under what circumstances would the administration consider that option and actually taking it off the table and actually providing lethal assistance?

Ms. SLOTKIN. Ma'am, I think that that conversation is going on now. Frankly, the failure of Russia to live up to the Minsk agreement, the agreement that they signed and then almost immediately started to violate, has just added urgency to the conversation, and those considerations are going on right now.

Senator SHAHEEN. Have you been part of those conversations?

Ms. SLOTKIN. I have, among a number of others in the building and throughout the interagency.

Senator SHAHEEN. It's still not clear to me what you're saying about what circumstances would suggest that lethal assistance is the best course of action.

Ms. SLOTKIN. Ma'am, I think there's quite a number of factors that need to be considered when we think about moving to providing—

Senator SHAHEEN. Yes, like what?

Ms. SLOTKIN. I think the reaction of the Russians is important, what we would do with other states around Russia. I think that there are larger policy implications that are being discussed, and those are important factors.

Senator SHAHEEN. One of the comments you made was about Prime Minister Abadi and efforts that he was making in Iraq to reach out to the Sunnis. What has been the response of Sunnis to those efforts?

Ms. SLOTKIN. I think the response has been mixed. In some cases it's been very positive. He named a Sunni minister of defense who is very capable and who spent quite a bit of time out in Anbar Province. He's committed to bringing in members of the tribes out

in Anbar into the security forces. But I think, as you can imagine, some of those tribal elements are concerned. They want to know what is truly in it for them, whether the government will follow through, because they've seen it go a different way in the recent past.

I think he's saying and doing the right things. The Sunnis are starting to get engaged, but they are skeptical.

Senator SHAHEEN. Are there any other measures that we think he could take in the short term or that he has suggested that might be helpful in reassuring the Sunnis that he's serious about trying to include them in the government?

Ms. SLOTKIN. Sure. I think actions speak louder than words. He has been very public about his intent to bring a large number of Sunni fighters into the Iraqi security forces. Given the losses that they've had in the Iraqi security forces, when he starts bringing folks in and actually paying them, putting them on the payroll, providing them with uniforms, which he is I think trying very hard to do, that to me is going to be something that will demonstrate to folks out there that this is someone who is serious—actions more than words.

Senator SHAHEEN. Thank you.

Senator KAINE?

Senator KAINE. Thank you, Senator Shaheen and members of the committee, and thank you all for your service and willingness to continue service in these important positions.

I'd like to ask some questions about the war against ISIL that's underway right now. Let me read a statement from the President from November 5th. "I'm going to begin engaging Congress over a new authorization to use military force against ISIL. With respect to the authorized use of military force (AUMF), we've already had conversations with members of both parties in Congress, and the idea is to right-size and update whatever authorization Congress provides to suit the current fight rather than the previous fights. We now have a different type of enemy. The strategy is different. So it makes sense for us to make sure that the authorization from Congress reflects what we perceive to be not just our strategy over the next 2 or 3 months but our strategy going forward."

Do any of you disagree with that statement by the President? [No response.]

I'll take that as a no.

I assert that there would be some wisdom in Congress debating and coming up with an authorization for the war against ISIL based upon the magnitude of the operation, the expected operations. Do any of you disagree with that point? [No response.]

No?

Do any of you disagree that a debate and a congressional vote about the war against ISIL would educate the American public about the threat that ISIL poses to the Nation and our allies? [No response.]

None disagree on that point.

Do any of you disagree that a debate and a congressional vote about the war against ISIL would actually offer some support to our troops that we're asking them to fight by suggesting that the

political leadership of the country is behind their mission? Do any of you disagree with that assertion? [No response.]

Senator Kaine. I have looked to see whether a president has suggested and actually engaged in the initiation of military action and said I want to have an authorization from Congress but has not sent a proposed authorization to Congress, and I can't find another example of that other than in this circumstance. Do any of you know of a circumstance where a president has said to Congress I want you to authorize this, but the White House has not offered a draft authorization? Are any of you aware of another instance prior to this? [No response.]

No?

Would you all agree with the assertion that the wording of an authorization against ISIL is something that's not only important for a Congress that passes it but it should be of critical importance to the administration? Would you agree with that assertion? [No response.]

Would you agree with the assertion that if it's important to the administration what the authorization contains, you're more likely to get what you think is right if you propose your draft version of it rather than just if you rely on a fairly dysfunctional bunch of Members of Congress of both parties to come up with a version? Would you agree that you'd be more likely to get your version if you offered a proposal? Does anyone disagree with that assertion? [No response.]

Do any of you know of any reason why the White House has not forwarded to Congress a draft authorization for a war against ISIL that commenced on August 8th and that is now nearly 4 months down the road? Do any of you know of any reason why the White House has not forwarded to Congress a draft authorization? [No response.]

No?

Admiral Harris, let me ask you a question about an aspect of your PACOM responsibility, which is the military-to-military relationship with India. As we've discussed, I recently returned with Senator McCain from a visit to India, and I was really struck for a variety of reasons with real opportunities we have to build a continuous strong relationship with the military in India in a very strategic part of the world. Could you offer your thoughts on that?

Admiral HARRIS. Yes, sir. I believe that India is a key nation in the region. I refer to my responsibilities as the Pacific Fleet commander as covering the Indo-Asia Pacific. I use that term intentionally because I believe in the strategic balance that's offered by India. It's a critical country, and it's an important country and, I believe, an important friend of the United States. I'll plan to visit India in January as the Pacific Fleet commander, and I'll look forward to that visit. I visited there before in the past, and I look forward to returning there. If confirmed as Pacific commander, my intention is to continue those relationships with my counterparts in India.

Senator Kaine. I think Senator King and I were both surprised when we were told in India that India does more joint military exercises with the United States than with any other nation. We

viewed that as a positive sign, and I'd like to encourage you to continue that and accelerate that trend.

Admiral HARRIS. It is a positive sign. This past summer, India was involved in a trilateral exercise with us and Japan called Malabar. They did it in the Western Pacific, which I believe is significant. India sent a ship to RIMPAC [Rim of the Pacific Exercise] for a Pacific exercise in Hawaii this year, and we welcome their presence there, their leaders there, and they have a terrific navy. I look forward to continuing my relationships with the navy and expanding those relationships with all of the Indian joint forces if confirmed as PACOM Commander.

Senator KAINE. Thank you.

Ms. Starzak, I'm interested in the integration of women into all the military occupation specialties (MOS), and especially combat MOSs that have previously been closed to women in service. Could you offer your perspective about the progress the Army has made on this integration of women into combat-related MOSs and what you see sort of future developments pertaining to this important topic?

Ms. STARZAK. Absolutely, Senator. Senator, my understanding after Secretary Panetta rescinded the 1994 direct combat definition of assignment women in January 2013, the Secretary of the Army provided a plan on how to move forward. The idea would be to complete the integration of women by January 2016, so that is the timeframe that we're currently looking at.

It's been a work in progress, as I understand it. I think we've looked at opening specific specialties, provided congressional notice as things have moved forward, and I think we will continue with that process through January 2016.

Senator KAINE. I hope we might have a status hearing at some point on this and have representatives from all the Services. I think a lot of good work is being done, and it's different Service to Service for obvious reasons, but I think it's something that the committee would really enjoy hearing about across Service. That's something that I may suggest in the next calendar year.

I have no further questions, Madam Chairman.

Senator SHAHEEN. Thank you.

Senator KING?

Senator KING. Thank you, Senator Shaheen.

Mr. Scher, for well over 60 years we've had a clearly delineated, widely understood strategy with regard to nuclear weapons around the world called deterrence, mutually assured destruction. Everybody understood that, and it was based upon an assumption that people were at least somewhat rational and that they would not want their country to be destroyed.

Unfortunately, we now seem to be moving into an era where there is at least a possibility of non-state actors acquiring nuclear weapons who would not necessarily be concerned about their destruction.

Where do you see us going in terms of a long-term strategic deterrent, if deterrent is the right word, or a long-term strategy for dealing with a proliferation of nuclear weapons to non-state actors?

Mr. SCHER. Senator, the situation you point out is one of the reasons that we spend so much time and effort on nonproliferation ef-

forts with the Department and the U.S. Government as a whole. The scenario you have painted is one that is frightening and also one that could be believable.

Obviously, nuclear weapons continue to have a modest but very important role in our overall strategy, but they are a part of the overall strategy and a part of what we bring to the table to deter adversaries. It is not simply the nuclear weapons.

I think that, as part of a broad whole, making sure that we have all of the capabilities of DOD, the U.S. Government as a whole to address the threats from terrorist groups, as well as a clear focus and work with other nations on deterring proliferation, that includes being part of the treaty structure, the nonproliferation treaty. That is how we look to approach hoping to stop proliferation and then dealing with the proliferants.

Senator KING. I agree with you that nonproliferation certainly is a first line of defense, along with intelligence and other areas. But I commend to you the task of developing a strategy because I think this is a future that, unfortunately, we may well face. It's my particular nightmare scenario, because if you have people who don't care about dying, the idea of mutually assured destruction doesn't really have much resonance. I hope that that's something you'll follow up on.

Mr. SCHER. Absolutely, Senator.

Senator KING. Ms. Slotkin, we don't want the Russians to invade Ukraine. Is that correct?

Ms. SLOTKIN. Correct, sir.

Senator KING. If you want to prevent an invasion, wouldn't the provision of lethal aid to the Ukrainian military be a way to help to deter that invasion rather than wait until the invasion occurs and then try to fight a rearguard action?

Ms. SLOTKIN. Sir, imposing costs on the Russians for their aggressive behavior is part of the response to the Russians, and hopefully to prevent them doing future activities along the same lines. Part of that—there is a military dimension to that, but there's also an economic dimension, there's also a political dimension. It's much more than just the stuff we can give them.

Senator KING. I understand that. But you're being proposed here—the title is advisor. As they used to ask on law school questions, the President or the Secretary of Defense walks into your office and says we're worried that the Russians are going to invade Ukraine and the possibility of lethal aid might help prevent that. What do you advise?

Ms. SLOTKIN. Sir, in this circumstance, no one piece of equipment is going to help the Ukrainians have military parity with the Russians. Unfortunately, there is no singular military solution to the problem.

Senator KING. There may be no one singular piece of equipment, but a general reinforcement and strengthening of their capability, whether it's with military hardware, whatever the panoply of weapons that they've looked for, wouldn't that make the Russians think twice?

Ms. SLOTKIN. Yes, I think that that's an important component, and that is why we've provided over \$100 million in security assist-

ance; and again, importantly, established this joint commission to try and get them to a new place in their military capability.

Senator KING. Let me move to ISIL. Can they be defeated entirely by air power?

Ms. SLOTKIN. No, sir.

Senator KING. It's going to require troops; is that not correct?

Ms. SLOTKIN. It will require local forces on the ground who are able to clear and hold the territory that we complement with air power.

Senator KING. What's your assessment of the timing of the local forces on the ground, by which I presume you mean principally the Iraqi military? When will they be ready to do house-to-house clearing in Mosul?

Ms. SLOTKIN. I think the situation with the Iraqi military is currently mixed. We sent assessors over in the summer to look at the Iraqi military and found that a little over half of the units that we looked at were capable of going on the offensive. I think the picture is mixed.

Senator KING. I'm interested in your assessment of how long it will take to get to the point where enough of their army is capable in order to carry out the second half of the mission.

Ms. SLOTKIN. First of all, we do have units already going on the offensive. They've taken back cities, dams, and strategic infrastructure. We do see units already moving out. But I think, sir, if your question is when do we really think we'll be able to destroy ISIL, I think this campaign will take years, not months.

Senator KING. A similar question in Syria. Who are going to be the troops in Syria?

Ms. SLOTKIN. Syria is a much more complicated picture, sir. We have the Syrian moderate opposition who are a diverse number of groups with different levels of capabilities, and we know that they are under real pressure. This is why we've sent a proposal to Congress for a train and equip program for the Syrian moderate opposition to start to build up those forces on the ground.

Senator KING. That train and equip program is rather modest and will be years in the making. I take it you're suggesting that the campaign in Syria may be also years.

Ms. SLOTKIN. I think, unfortunately, the struggles across both Iraq and Syria will take years, not months.

Senator KING. How are we doing in degrading ISIL's financial capability?

Ms. SLOTKIN. I think the good news story there, sir, is they were gleaming a significant amount of revenue from black market oil sales and their control of some key nodes in Iraq on the oil infrastructure, and through air power we have been able to destroy some of their heavy equipment, dislodge them from some of those key locations, particularly the Baiji Refinery. We've seen their revenues, monthly revenues, go down significantly.

Senator KING. Can we put a number on significantly? Is it 20 percent, 50 percent, 70 percent?

Ms. SLOTKIN. I don't have a number for you, sir. I'm happy to get back to you with what our current assessment is.

Senator KING. I would appreciate that.

Ms. SLOTKIN. Sure.

Senator KING. Because I think that's a very important part of this war.

Ms. SLOTKIN. Sure. Happy to do so.

Senator KING. Thank you.

[The information referred to follows:]

The U.S. Government estimates Islamic State of Iraq and the Levant (ISIL) earns millions of dollars per month through a range of sources, including oil sales, foreign donations, ransom payments, extortion, and other criminal activity—but, the average monthly totals have declined significantly. According to the Department of the Treasury, ISIL generated approximately \$1 million a day through oil and refined petroleum product sales until Coalition actions to degrade ISIL's capabilities in late-summer 2014. The Department of the Treasury now assesses ISIL earns less from stolen and smuggled oil sales—now averaging up to a few million dollars per week. Coalition airstrikes are impeding ISIL's freedom of movement and particularly their ability to pump, refine, and sell oil, thereby reducing their revenue stream. The U.S. Government has also imposed sanctions on anyone who trades in ISIL's stolen oil or refined product.

Senator KING. Admiral, you talked about China as an enduring threat. I'd like to ask you a question, sort of analogizing it to Russia and the Ukraine. China moves against one of its neighbors in the South China Sea. What can we as a practical matter do given their concentration of force in that region? Similar to what can we as a practical matter do about Russia's annexation of Crimea?

Admiral HARRIS. Senator, with regard to China moving against some of its neighbors, the potential for that to happen, we have treaty obligations with five of the countries in the Pacific, including Japan, Korea, Thailand, the Philippines, and Australia. If China were to move against one of those countries, then those treaty obligations would be brought to bear, I believe.

The best opportunity that we have to preclude China's expansionist tendencies in Asia is force presence, is to be there when it matters and where it matters.

Senator KING. Similar to what I was talking with Ms. Slotkin about, the deterrence of having force in the area.

Admiral HARRIS. Yes, sir. Force presence matters, and having forces, whether they are in my case today's naval forces or, if confirmed, the joint force there in the Western Pacific to be ready to respond immediately to our friends and allies, especially our allies there, matters. It matters on a fundamental level, and that's the value of force presence, and that is why I believe we must continue to maintain that presence in the Western Pacific.

Senator KING. I can't resist, in closing, pointing out the irony of if we were called upon to come to the aid of one of our allies in that region against an expansionist China, given our terrible financial condition, we would end up borrowing the money from China in order to arm our allies to fight China, but I won't pursue that.

Thank you very much, Admiral.

Admiral HARRIS. Sure.

Senator KING. Thank you all for your service.

Chairman LEVIN [presiding]. Thank you very much, Senator King.

Senator Donnelly?

Senator DONNELLY. Thank you, Mr. Chairman.

I want to thank all of you and your families for your sacrifice.

Ms. Slotkin, we recently passed another deadline in the P5+1 [five permanent members of the U.N. Security Council plus Ger-

many] discussions. This is the second time, and I know how important it is to get this right, and what a great benefit it is if we can get it right. But I'm starting to become concerned by this pattern, and what I'm wondering is with regard to the most recent extension, your views on this and what is the hang-up and what do we have to do to get this right now.

Ms. SLOTKIN. Sure. Sir, the negotiations and the extension, they still are under the hat of our overall policy, which is to prevent Iran from acquiring a nuclear weapon. We still believe negotiations are the clearest route to do that right now, but from a Department perspective, we underwrite those negotiations with our posture, with our capabilities, with our presence in the Gulf, and we continue to provide all options, including contingency planning for whatever the President may decide to do.

We believe the negotiations are the right way forward, but as the Department, we stand by with a whole range of options for the President.

Senator DONNELLY. How do these extensions impact our ability to manage Iran's influence with Iraq and with Syria in supporting the militias and the Assad regime?

Ms. SLOTKIN. The P5+1 negotiations are about the nuclear component, but what is separate are Iran's continuing destabilizing activities in the region, in the Middle East, and in other parts of the world. We haven't taken our eye off that ball. We continue, particularly from the Department's point of view, to go after the Iranians, to look at them very clearly in what they're doing in their meddling.

The nuclear negotiations are one area where the State Department has the lead, but there are lots of other things that we remain deeply concerned about with the Iranians' behavior.

Senator DONNELLY. Ms. Starzak, one of the issues that has almost burned a hole in my heart, I guess you would say, is the military suicide rate. As counsel for the Army, you have the ability to play a prominent role in continuing to bring that rate down. We all shoot for zero on that one. I want to know your commitment to making sure that happens, that there's legislation that's going to be coming through in the National Defense Authorization Act (NDAA), your implementation of it, and that there's a significant, in every way, commitment from the Army, and I know there is, to get this to zero.

Ms. STARZAK. Senator, I am absolutely committed to doing everything I can to help get it to zero, and I share your concern with the military suicide problem, particularly the suicide problem in the Army, and I will do whatever I can.

Senator DONNELLY. Okay. I hope when you see the NDAA come through you'll take a look at that and see the new clauses in there and do everything you can to implement it to make it as simple as possible for all of our servicemembers.

Ms. STARZAK. Thank you, Senator. Absolutely.

Senator DONNELLY. Ms. Slotkin, how closely are you working with Syrian tribal leaders and leaders in that country who may want to provide help for us? Because one of the things that you hear is a lack of human intelligence from Syria, which is extremely concerning because how do we know what's going on on the ground

if we don't have friends to talk to us about it? I know we're working with Sunni tribal leaders, to try to work with them and help move it in Iraq. Where are we, if anywhere, with Syrian tribal leaders?

Ms. SLOTKIN. Senator, the tribal leaders in Syria, I don't know the specifics of whether we deal with specific tribal leaders. I will tell you the good news is many of the tribes in Western Anbar in Iraq have families that span the border right there, so strong relationships with tribes on the Iraqi side of the border is particularly helpful with managing relationships with members of his family, of his tribe, on the other side of the border.

Senator DONNELLY. Do we have any programs with those Sunni tribal leaders in Iraq to find out what they know what's going on in Syria, to find out what they're doing with their relations in that area? Because Syria has been just an extraordinary killing field.

Ms. SLOTKIN. We are reestablishing many of our contacts with tribal leaders out in Western Anbar and, more importantly, we are assisting the Government of Iraq in their outreach to the tribal leaders. I know that Syria is a topic of regular conversation just because ISIL spans the border, the counter-ISIL campaign spans the border between Iraq and Syria. I'm not aware of the specifics, sir, but I'm happy to take that back.

[The information referred to follows:]

The Department of Defense has engaged in informal discussions with moderate elements of the Syrian opposition. The Department, however, does not engage directly with tribal leaders in Syria at this time. In preparation for the Syria train-and-equip program, we are working closely with the Department of State, the intelligence community, and foreign partners to identify local leaders in Syria and candidates for the program. The Department of State has also been working for years with local councils and nongovernmental organizations (NGOs) within Syria to deliver humanitarian aid and non-lethal assistance. Through these non-lethal assistance programs, Department of State is able to gain a better understanding of the current situation within different regions of Syria and identify potentially trustworthy partners willing to pursue local governance.

In Iraq, while the Department of State leads U.S. Government engagement with Sunni leaders, the Department of Defense also engages with tribal leaders on a range of security issues. Both Departments are clearly focused on supporting the Government of Iraq's efforts to build Iraqi Government and security forces inclusive of all elements of society, including Sunni Arabs. While some tribal leaders have insights on dynamics in the Iraq-Syria border region and eastern Syria, the primary focus of our tribal engagement in Iraq is to enhance the institutional relationship between local Sunni Arab leaders in Iraq and the Government of Iraq.

Senator DONNELLY. Another thing I'd like you to take back is the amount of resources you have to get the job done there, specifically aerial resources, because from all I have seen, there has been an incredible shortage of unmanned aerial vehicles and other products that are needed to find out what's going on. Our ability to function to the best of our capabilities is dependent on that, and it appears to me we are woefully short in that area, and I'd like to know why.

Ms. SLOTKIN. Definitely, sir, intelligence, surveillance, and reconnaissance (ISR), if that's what you're referring to, is an extremely high-density asset.

Senator DONNELLY. Yes.

Ms. SLOTKIN. Every combatant commander, I'm sure—Admiral Harris will tell you every COCOM commander wants more ISR. It's in deep competition among the COCOM commanders. I can tell you we have thrown significant amounts of ISR at the counter-ISIL

campaign. I think we are still at 24-hour coverage above Iraq, at a minimum.

But you're right, there is still competition for this resource. It's invaluable to us, and I hear your concerns.

Senator DONNELLY. You certainly don't have 24-hour coverage over Syria, do you?

Ms. SLOTKIN. We do not.

Senator DONNELLY. I would like to see, if you could provide me, your list of priorities, because I've been very, very concerned that the way we've been using them, and with the way priorities were lined up, we're really skewed, which has caused us extraordinary damage. I would like to see your ideas as to what should be prioritized right now, right now, and what is not.

Ms. SLOTKIN. I'm happy to take that back, sir. Thank you.

[The information referred to follows:]

Intelligence, Surveillance, and Reconnaissance (ISR) assets are some of the most in-demand worldwide assets that the Department of Defense manages—and are therefore assigned to missions in accordance with U.S. national security interests. Changes in ISR coverage are approved by the Secretary of Defense. At present, a significant amount of worldwide ISR is focused on the U.S. Central Command area of responsibility. The priorities for ISR missions in Iraq and Syria include disrupting terrorist plots against the United States, protecting U.S. persons and U.S. Government facilities, and supporting U.S. and coalition forces involved in Operation Inherent Resolve.

For an in-depth list of the Department's ISR priorities and allocation, we are happy to provide a classified briefing at your convenience.

Senator DONNELLY. Thank you very much.

Mr. Berteau, one of the things that we do in Indiana at Naval Warfare Center Crane in Southern Indiana, is we do a lot of work to detect counterfeit parts, and that's something that you get one part that's off, it can cause extraordinary damage to planes, to missiles, et cetera. I was wondering your views on counterfeit parts and the importance of continuing to make sure that what comes through comes through as what we bought for, what we paid for, and that we are getting what we were supposed to get.

Mr. BERTEAU. Senator, this has been an issue of some importance to this committee. In fact, statutory changes were put in place.

Senator DONNELLY. Right.

Mr. BERTEAU. I have not had the privilege of reviewing the data on where DOD stands today in terms of bringing down the incidence of counterfeit parts. I am aware of the role Crane plays. I've been there a number of times. But it's one of the issues that I would take as a high priority and look into, if confirmed.

Senator DONNELLY. That would be great, because as the logistics guru, we want to make sure that the stuff you're shipping is the right stuff.

Mr. BERTEAU. Absolutely.

Senator DONNELLY. Thank you so much.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Donnelly.

Senator HIRONO?

Senator HIRONO. Thank you, Mr. Chairman.

I thank all of you for being here this morning.

I'd like to start with Admiral Harris.

Admiral Harris, the March 14, 2014 U.S.-China Economic and Security Review Commission Report said that, "There is growing concern among U.S. allies and partners that the United States will be unable to follow through on its commitment to the rebalance due to declining defense budgets and continuing security challenges elsewhere. There is also the perception that the rebalance to the Asia Pacific region is a concept and not something that is a priority."

Admiral Harris, the regional stability in the Asia-Pacific area is very important, particularly as there is instability in so many other parts of the world, and I know that you said this morning in your testimony that the rebalance is real, and you cited some examples of decisions and actions that have been taken to reflect that reality.

From what you have seen, though, how is the rebalance progressing, and what are the future impacts of sequestration in 2016, and what have you heard about the rebalance from your counterparts in other countries?

Admiral HARRIS. Senator, I believe the rebalance is real and we're well into it. From the Navy perspective, our intent is to have 60 percent of the Navy rebalanced to the Pacific by 2020. We are at about 56 or 57 percent right now in terms of ships. We are already at 60 percent in terms of submarines. The Navy, if we continue on the path we're on, will actually increase in size by 2020 to about 308 ships from the present 289. This 60 percent would be 60 percent of a larger number, and I think that's significant.

If we are sequestered, if the sequester continues, then that number could be diminished dramatically, as I mentioned before, to as low as 250. The number of ships in the Navy that would be in the Pacific would be decreased. I think the sequester has an effect on that.

My relationships with my colleagues in uniform in the Pacific are strong, and I believe that they welcome the U.S. rebalance, and I believe that they are watching what we do very closely. They're watching our commitment to the rebalance, the types of ships, aircraft and submarines that we are putting forward in the Pacific, and I'll be happy to tell you that we are putting our best and our newest platforms forward, our *Virginia*-class submarines, our P8 Poseidons, EA-18 Growlers, our best aircraft, our best submarines, our best carriers are coming forward to the Pacific. But they are watching that very closely, as I am, and I think that they will be concerned should the sequester continue, just as I will be.

Senator HIRONO. Admiral, the rebalance is not just about the military context but it involves diplomatic, cultural, economic concerns. I do have a very specific question about what sequestration could bring and the impact to Hawaii. As the Army's Supplemental Programmatic Environmental Assessment explores the impact of reducing some 19,800 Army servicemembers and civilian personnel from Fort Shafter and Schofield Barracks in Hawaii, this scenario represents a population loss of 70 percent at Schofield Barracks and 34 percent at Fort Shafter.

Can you talk about the impact of these kinds of reductions on the capability and readiness of our 25th Infantry Division at Fort Shafter in Hawaii? Because I know you've talked about forward presence and how important that is.

Admiral HARRIS. Senator, I view with concern any reduction in any of the forces we have in the Pacific, including and especially Hawaii, and I'll review that even more if confirmed as the PACOM commander. I have said publicly that I think Hawaii is the key, is the gateway to the rebalance, and I think the sequester will affect that without a doubt.

Senator HIRONO. A reduction of 19,800, which is a scenario that is reflected, as I said, in the Supplemental Programmatic Environmental Assessment, is a cause of huge concern to not just our national security but, of course, to Hawaii, because it would have a significant impact on the economy. But sitting here, though, what we're focusing on is national security and our readiness with regard to this part of the world.

I just want to make a note for the record of this committee that sequestration in 2016 is an issue that we're going to need to deal with in a sensible way.

You noted in your testimony, and I quote you, "We should continue to use military engagement with China to demonstrate U.S. commitment to the security of the Asia-Pacific region and to encourage China to play a constructive role in the region, and to press China to partner with the United States and our friends in the region to address common security challenges."

Could you elaborate on how you will specifically accomplish, assuming that you are confirmed, a military-to-military engagement with China to encourage more collaboration for mutual security and/or humanitarian relief concerns?

Admiral HARRIS. Yes, ma'am. I believe that a strong China of itself, a strong military in China of itself is not a bad thing, and we welcome the rise of a strong China that participates in the international arena. I'm concerned, as I mentioned before, about the provocations that China has embarked on in the East China Sea and the South China Sea. At the same time, I want to acknowledge and applaud China's efforts in the removal of chemical weapons from Syria and the counter-piracy efforts in the Horn of Africa/Gulf of Aden region, their work in the search for the Malaysian airliner MH-370, their work in supporting the Philippines during the Haiyan Typhoon disaster last year. These are positive things.

But on the other hand, they're engaged in increasing provocations and tensions in the South China Sea and the East China Sea with their neighbors. They have put in place the Air Defense Identification Zone, which we believe is illegal. They are working counter to regional stability and peace in that area. I view that with concern.

I think it's important that we continue to have a military-to-military dialogue with China, and I believe that, if confirmed, I will pursue that in the joint arena, as I'm doing now in the Navy arena.

Senator HIRONO. I do recall that when Admiral Locklear testified before this committee, he said that one of the areas that he would like to improve is a better military-to-military relationship with China. At that time, he noted that he has that kind of relationship with Russia. That may have changed after Ukraine, but nonetheless we think it's really important.

Ms. Slotkin, Jordan is facing many challenges in a region that is filled with instability, and I know that they're taking in many refugees as a result of various conflicts, and most recently Syrian refugees. What is your assessment of the situation there, and what are we doing—we, our country doing—to assist our ally, Jordan?

Ms. SLOTKIN. Sure. We have a robust relationship and an enduring relationship with the Jordanians, military-to-military, Intelligence Community to Intelligence Community, political, economic, spans the whole gamut. We have engaged with them for quite some time right now about minimizing the instability coming out of Syria.

They are hosting a significant number of refugees, and our close military-to-military relationship has resulted in quite a bit of joint cooperative work on deterring threats coming out of Syria. They are supporting us in our operations in and around the region. We are in regular dialogue with them every day, and we are extremely concerned, particularly given that they also border Iraq, with their border security and have invested significant resources in bulking up their border efforts.

Senator HIRONO. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Hirono.

We'll have a 5-minute second round. I expect other colleagues are coming back, and there is a vote, I think our final vote. We're trying to find out if this is our final vote.

Let me ask a couple of questions of you, Admiral. You've testified about the problems in the South China Sea, and my question has to do with the Convention on the Law of the Sea, as to whether or not joining that convention would benefit the U.S. military operations in the Asia Pacific, and how does not being a party disadvantage the United States, if it does.

Admiral HARRIS. Senator, I'm a supporter of the Law of the Sea, and I believe that U.S. succession to the United Nations Convention on the Law of the Sea would be positive and would help me, if confirmed, in my responsibilities in the Western Pacific, especially in the South China Sea and in the East China Sea. I believe it gives us the moral high ground to be critical of other countries' actions there, and it shows support for the international norms and rules.

Being a member, acceding to the treaty does not mean that we're going to lose any of our rights or freedoms or ability to maneuver. But I believe that becoming a member of that treaty would be helpful in the region and would be perceived as positive by our friends and allies in the area.

Chairman LEVIN. Thank you.

Admiral, as it stands now, during a time of war on the Korean Peninsula, the United States would be in operational control of the combined U.S. and South Korean forces. That arrangement was put in place 60 years ago. Today, South Korea is a prosperous nation with a very capable military, and it should be responsible for its own national defense, with our support and the support of others.

Admiral, I've been promised on numerous occasions that there would be a transfer of wartime operational control from the United

States to the Republic of Korea. That commitment has been made to me many times over the last decades. While the most recent announcement characterizes this as a delay, it doesn't appear that operational control or OPCON transfer is ever going to happen. I hate saying that because I hope it will, and I hope it will soon. Nonetheless, I just don't see it happening, and I see a lot of broken commitments. They're unnecessary, in my judgment, because of the capability of the Korean army. Obviously, we would continue to be there in a supporting role, but that's different from having operational control.

Do you support the transfer of wartime operational control to South Korea?

Admiral HARRIS. Senator, I do support the concept of operational control transfer to South Korea when they are ready to take it, and I think that's an important consideration. I would defer to General Scaparrotti, of course, because he is there on the Peninsula. I would be concerned if they were to take it today. They think they're not ready, and operational control means that they would have control of our forces, of U.S. forces in Korea, and I would not want that to happen until we are both confident, us and Korea, we are both confident that they're ready to take it, sir.

Chairman LEVIN. I think they're always going to say they're not ready because that keeps us there in an operational control capacity, which is their preference apparently. But I think we have to, after all these decades, recognize the reality that they have a very prosperous nation, they have a capable military, and they should be responsible, with our help and support, for their own defense.

Let's see. In terms of a first round, in terms of Senator McCain and Senator Ayotte, we're on the first round. I've started the second round.

Senator McCain?

Oh, I'm sorry. Yes, it goes Senator McCain, then back to Senator Manchin to complete the first round.

Senator MCCAIN. Thank you, Mr. Chairman, and I apologize for being on the floor. There was an issue on the floor, and this is what we run into when we are having a hearing and floor votes as well. It's very regrettable because we have five nominees, the most I've ever seen, in a very truncated process here, and you and I have already discussed perhaps the need for additional hearing of these witnesses. It just doesn't work when we have votes on the floor and confirmation hearings at the same time because all of us should get the benefit of the responses to the questions by our colleagues.

Ms. Slotkin, in answer to previous questions, you said we are discussing a Turkish proposal. Is that correct?

Ms. SLOTKIN. Elements of a Turkish proposal. Yes, sir.

Senator MCCAIN. We don't have a proposal of our own?

Ms. SLOTKIN. I'm sorry. For the no-fly zone is what you're referring to?

Senator MCCAIN. No-fly zone and other aspects of what was described to me by General Allen.

Ms. SLOTKIN. We have robust conversations going on on—

Senator MCCAIN. I'm asking do we have a proposal?

Ms. SLOTKIN. Sir, I am not aware of a specific proposal.

Senator MCCAIN. We don't have a strategy?

Ms. SLOTKIN. I don't think that—that's not what I'm saying, sir.
 Senator MCCAIN. Tell me what the strategy is.

Ms. SLOTKIN. Our strategy against ISIL is, first and foremost, to defeat that organization across both of our—

Senator MCCAIN. That's an objective. That's not a strategy.

Ms. SLOTKIN. So our strategy—I mean, if you're asking what our goals are in Syria—

Senator MCCAIN. I'm not asking what the goals are. I'm asking what the strategy is.

Ms. SLOTKIN. Our strategy is to defeat ISIL, to—

Senator MCCAIN. I just repeated, that's a goal, that's not a strategy. I want to know what the strategy is, which entails what we deploy, what forces are necessary, what actions need to be taken in order to implement or to succeed in the goal that the President has articulated of degrading and defeating ISIS.

Ms. SLOTKIN. On defeating ISIS, we have an air campaign going on across both Iraq and Syria. We are looking to improve the capability of the Syrian moderate opposition through a train and equip program and ultimately force Assad into a political transition where he departs Damascus.

Senator MCCAIN. Are we bombing any Bashir Assad targets/forces?

Ms. SLOTKIN. My understanding is the targets at this time are ISIL targets.

Senator MCCAIN. I see, no attacks on—

Ms. SLOTKIN. ISIL targets—I'm sorry.

Senator MCCAIN. No attacks on Bashir Assad's forces while Bashir Assad is barrel bombing the free Syrian army.

Ms. SLOTKIN. My understanding is our targets are ISIL and—

Senator MCCAIN. I'm not asking for your understanding. Is it or not? I mean, you're working in the Pentagon. Your title is International Security Affairs. I'm not asking for your understanding. I'm asking for the facts.

Ms. SLOTKIN. Our targets are ISIL and other extremist groups, including the Khorasan group.

Senator MCCAIN. But not the free Syrian army.

Ms. SLOTKIN. Bombing the free Syrian army, sir, no.

Senator MCCAIN. Does that strike you as a bit immoral that we would ask thousands of young Syrians to go to Saudi Arabia and other places and be trained and equipped and sent back into the fight and be barrel bombed by Bashir Assad, and we leave Bashir Assad alone? Does that strike you as a little bit immoral, Ms. Slotkin?

Ms. SLOTKIN. Sir, I think what Bashir Assad is doing is immoral. I think he is the magnet for terrorism.

Senator MCCAIN. Is it not immoral when we don't try to stop him from barrel bombing innocent men, women, and children?

Ms. SLOTKIN. We are attempting to apply a strategy to force him to a political transition, sir.

Senator MCCAIN. By leaving him alone and not hitting him with air strikes? That's bizarre.

In one of your statements, you cited your work in helping to end the war in Iraq as among the most rewarding of your career. "I helped negotiate the U.S.-Iraqi Status of Forces Agreement in

2008, which for the first time established a concrete timetable for withdrawal from Iraq which President Obama completed in 2011. To see that agreement signed and our troops depart were important emotional events in my life." Is that an accurate quote?

Ms. SLOTKIN. Correct.

Senator MCCAIN. How is that working out?

Ms. SLOTKIN. Sir, I'm extremely disturbed about what ISIL was able to do in Iraq.

Senator MCCAIN. It sort of just happened, like a hurricane or an earthquake?

Ms. SLOTKIN. No, sir. No, sir, it did not just happen.

Senator MCCAIN. Did you support what most of us argued passionately for, and that was to leave a stabilizing force behind, which Ambassador Crocker and Secretary Gates and Secretary Panetta all said that we could have gotten? Don't take my and Joe Lieberman's and Lindsay Graham's word for it, their word for it, that we could have negotiated.

Ms. SLOTKIN. Sir, the administration attempted to negotiate with the Iraqi Government, and at the time they thought they could handle the threats on their own and they did not invite us in.

Senator MCCAIN. That's just patently false, Ms. Slotkin, because I was in Baghdad when we talked to Maliki, and they were ready. We came back and asked your superiors what is the force that we want to leave behind? In the words of Chairman Dempsey, 3,500 was the number agreed on, which was our final offer. We would not tell them the size of the force and what their mission would be. Now, those are facts, because we were there on the ground. For you to sit there and say that we tried obviously contradicts three of the most respected people in America, Ambassador Crocker, Secretary Panetta, and Secretary Gates. In all due respect to you, Ms. Slotkin, you either don't know the truth or you are not telling the truth to this committee, because we could have left a stabilizing force behind.

Now, if it's your opinion, then that's fine. But the facts are not that.

You are glad to see the agreement signed and our troops depart, and that was an emotional event in your life. How are your emotions now?

Ms. SLOTKIN. As I told you, sir, I'm extremely disturbed about what ISIL was able to do in that country.

Senator MCCAIN. So did the surge work?

Ms. SLOTKIN. Yes.

Senator MCCAIN. The surge worked, and you supported it?

Ms. SLOTKIN. I supported it because I lived it. I went and worked at the National Security Council under the Bush administration when we decided to surge.

Senator MCCAIN. Uh-huh. Did it succeed in achieving the goals as the President, General Petraeus, and Ambassador Crocker defined them at the time?

Ms. SLOTKIN. Yes. It was absolutely the catalyst that turned the tide in Iraq.

Senator MCCAIN. Are you ruling out the involvement of U.S. troops in combat roles, as General Dempsey said he thought U.S. troops may need to take on a combat role?

Ms. SLOTKIN. Do I support combat troops, sir? Is that—

Senator MCCAIN. Are you ruling out the involvement of U.S. troops in combat roles?

Ms. SLOTKIN. While I'm obviously not the ultimate decision-maker, sir, I think General Dempsey said that if he feels the need, he would recommend that. That is his right. We'd have to look at the conditions in the future on the ground.

Senator MCCAIN. How are the conditions now, Ms. Slotkin?

Ms. SLOTKIN. I think that they're better than they were in the early summer, but I think we still have a long way to go.

Senator MCCAIN. They're better than they were?

Ms. SLOTKIN. Yes, when Mosul fell in June.

Senator MCCAIN. In Kobani and the fact that they've taken additional places and they continue to attract thousands of young men and a few young women from around the world to their banner, and they continue to slaughter innocent men, women and children, declaring that enslavement of women is in keeping with Sharia law? I guess your view and my view are very different about how we're succeeding. The most powerful air force in the world has still been unable to allow the opposition to take Kobani back.

Do you know why that is, Ms. Slotkin? It's because we don't have air controllers on the ground. We don't have people identifying targets. We don't have the kind of close air support that is necessary to win these conflicts. When we give them a week's warning that we're going to attack them and then strike empty buildings, and with the small number of attacks that are carried out, we're not winning, Ms. Slotkin, because we're not succeeding in rolling back the enormous gains that they have made.

I have lots of additional questions for this witness, Mr. Chairman. I do not believe she is qualified. I believe that she can't articulate a strategy for the defeat of ISIS, and I will have many additional questions.

I see my time has expired.

Chairman LEVIN. Thank you.

We're in the middle of a second round. We're having the end of the first round and the second round going on simultaneously.

Senator Manchin to complete his first round, and then I believe it's Senator Ayotte.

Senator MANCHIN. Thank you very much, Mr. Chairman.

To Mr. Berneau, if I may ask, I understand the Defense Logistics Agency (DLA) is responsible for the oversight of more than 5.2 million items at a price tag of \$35 billion in annual spending for acquisitions.

Given these rather astounding impressive numbers, how well prepared is the DLA to complete a full audit? We've been trying to get an audit at DOD. How well prepared are you all to do that?

Mr. BERTEAU. Sir, I have not looked at the finances internally of DLA. I'm aware of the reports that they provide publicly and to Congress, but I can't gauge from that how close they are to audit readiness. I think that would be a primary interest that I would take on immediately if confirmed.

Senator MANCHIN. Do you accept the audit proposal? We've been asking for an audit of DOD, agency by agency within the Defense Department.

Mr. BERTEAU. That's absolutely critical. I'm impressed with the progress that appears to have been made there. This is an issue that's been on the docket for 30 years, and elements of DOD are now, for the first time, passing audits, and I think that's an enormous step in the right direction. How close DLA is itself to being ready to do that I can't gauge, but I will certainly take that on.

Senator MANCHIN. I'll ask the question of all of you. I'm going to go to Admiral Harris. First of all, in your role of the tremendous job that you have and that you're doing, do you believe that we can do more with less, or do you believe that sequestering is basically without the flexibility? If we gave you the flexibility to sequester, and let's say politically we can't get through the sequester and get over that hump but we were able to give you more latitude as far as flexibility, would that help relieve some of the problems you're incurring, or is just the lack of money, period, causing most of your problems?

Admiral HARRIS. Senator, I think any increase in flexibility would be helpful. But at the end of the day, the amount we're talking about can't be overcome by just shifting money around.

Senator MANCHIN. Got you.

Admiral HARRIS. I believe that we should go to a knife fight with a gun and not with a butter knife. I think the long-term sequester will have that effect on us.

Senator MANCHIN. You also described basically China's strategy in maritime East Asia and how well we're doing to support our allies over there?

Admiral HARRIS. Yes, sir. I believe that China has embarked on a maritime sovereignty campaign in East Asia, and I believe that we best support our allies and partners and friends out there by being there. Forward presence matters, and I believe that—

Senator MANCHIN. What's the period of time, do you think? I'm so sorry, Admiral, because they gave us such little time here. What's the period of time you think it will take for China to get up to a very threatening force, if you will?

Admiral HARRIS. I think for some regimes, they're already at a threatening level. I believe by 2020, some estimates will have them having a navy of 350 ships. The U.S.-China Commission Report that Senator Hirono talked about, the 2014 report says that China will soon be able to threaten our national security advantages in space, our national security satellite program. I view that with significant concern.

Senator MANCHIN. This is to Ms. Slotkin again, if you will. The Iraqi army is reportedly paying salaries to 50,000 soldiers who exist only on paper. I think you've touched on this, but if you could do it again, it just boggles my mind. American taxpayers spent \$20 billion training the Iraqi army. We saw them fold quicker than a cheap suit and run.

With the amount of money that you're trying to re-surge, if you will, to get them up to speed, what are you taking, what steps are you taking so this will be prevented, and what have you done on these ghost payments and all these millions and millions of dollars? Who is receiving that money?

Ms. SLOTKIN. Sir, the good news was it was Prime Minister Abadi, in front of his parliament, who made that speech about

fighting corruption, and he was the one who cited the number of 50,000 ghost soldiers on his account. The Iraqis are very cash poor right now, so he is extremely interested in reaping that money—

Senator MANCHIN. Who received the money? Since there were no soldiers receiving the pay, who took the graft?

Ms. SLOTKIN. What I understand is that corrupt military leaders, many of whom have been removed from their posts—

Senator MANCHIN. Under Maliki?

Ms. SLOTKIN. Under Maliki.

Senator MANCHIN. So Maliki himself directly?

Ms. SLOTKIN. I don't know about him himself, but certainly commanders who had those ghost soldiers on their books were simply taking their salaries is what I understand.

Senator MANCHIN. Do you know if there is any action being taken against them?

Ms. SLOTKIN. Besides the Prime Minister removed 36 of those commanders and another 20-plus today from the Ministry of the Interior, and—

Senator MANCHIN. Do you know if there are any actions the United States Government is taking to get that money back to the United States Treasury?

Ms. SLOTKIN. I do not know of any action.

Senator MANCHIN. Could you check that out for me and let me know on that?

Ms. SLOTKIN. Sure.

[The information referred to follows:]

The Government of Iraq is responsible for its own budget expenditures and Iraqi leaders, working from the top down, have the strongest ability to prevent corruption among Iraqi Government and security officials.

The U.S. Government, with the Department of State in the lead, is actively working with the Iraqi Government to support its efforts to curb corruption in its system. The Department of State routinely engages Prime Minister Abadi to lead on this effort. To this end, Prime Minister Abadi has taken some important steps early in his tenure, including relieving from their positions dozens of Ministry of Defense and Ministry of Interior officials who were not appropriately executing their responsibilities or accused of corruption. Prime Minister Abadi also gave a public speech in front of parliament highlighting the problem of corruption and ghost soldiers and pledging to clean up the record-keeping to prevent this problem from happening again.

The U.S. Government is not taking action to retrieve retroactive funds from the Government of Iraq. The U.S. Government has not paid salaries for the Iraqi Security Forces since the conclusion of Operation New Dawn in December 2011. Since then, salaries have been paid by the Government of Iraq.

Senator MANCHIN. Also, what are we doing to ensure this doesn't—I can't believe that we're sending checks, giving them money designated for soldiers that don't even exist. Who is checking that?

Ms. SLOTKIN. Right now, sir, we are not providing any money for salaries, for uniforms, for life support for the Iraqi soldiers. The Iraqi Government is providing that. What we're proposing in our Iraq train and equip fund is to provide them some capability training to help them stand up or restand 12 brigades up in the country. We're not suggesting that we pay for salaries, for life support, for uniforms, as we did previously.

Senator MANCHIN. Real quick, if I may, sir, one final thing.

On the Kurds, where do we stand with the Kurds? Are we getting any equipment to the Kurds to defend themselves? Because

they're the only ones who seem willing to fight and die for their country.

Ms. SLOTKIN. The Kurds had a delegation here last week. You may have seen them. I think this is actually a good news story. The Government of Iraq responded in extremis when the Kurds came to them and to us and to everyone in the world asking for a surge of weapons that they desperately needed. The Government of Iraq was the first to respond. They flew two C-130s of their own up there full of equipment; and then, frankly, a huge coalition of international partners has come to the aid of the Kurds to provide them those weapons because they are very much on the front lines. They just had a second tranche of equipment that they requested get approved by the Government of Iraq, and it includes things like mine resistant ambush protected vehicles and Humvees and anti-tank weapons, more serious weaponry.

They are very much on the front lines, but I believe we're getting them equipment that they need.

Senator MANCHIN. Thank you.

Chairman LEVIN. Thank you. Thank you, Senator Manchin.

Senator Ayotte?

Senator AYOTTE. I want to thank the Chairman.

I'm going to give the beginning of my time to Senator McCain.

Senator MCCAIN. Ms. Slotkin, do you believe that we should be providing the Ukrainians with defensive weapons?

Ms. SLOTKIN. Sir, that is something that's under consideration right now.

Senator AYOTTE. I want to thank the witnesses for being here and your willingness to serve.

Admiral HARRIS, I would like to follow up with you. I know you've talked about the importance of our attack submarine fleet. What currently is our attack submarine fleet meeting the requests of our combatant commanders, and also the requests of what we need in PACOM?

Admiral HARRIS. Senator, right now the combatant commander demand for attack submarines, we're only meeting as a Navy about half that demand, about 53 percent in the Pacific. Right now, while I can't go into the specifics of what the demand signal is in this hearing, the PACOM commander's demand signal is being met by me as the Pacific Fleet commander at just over 50 percent.

Senator AYOTTE. Obviously you've already talked about the importance of the *Virginia*-class submarine and continuing to ensure that we have production of that submarine at an adequate rate to try to meet our concerns in terms of the requests of the combatant commanders.

You and I have talked when we met in the office about the importance of our public shipyards, and one of the things that is very important is how we maintain our submarine fleet. I know that you have agreed, and I'm very glad and looking forward to hosting you at the Portsmouth Naval Shipyard. We're very proud of the Portsmouth Naval Shipyard and the work done by the very talented and trained workers there.

In fact, one thing I wanted to highlight is that the Portsmouth Naval Shipyard has actually been producing and putting things out ahead of schedule, including in April the workers at the Shipyard

undocked the USS *Topeka* 20 days ahead of schedule following an engineering overhaul. In June, they did the same thing in terms of maintenance availability for the USS *California* and got it back in the fleet 14 days ahead of time, as well as in September the Shipyard did the same, delivering the USS *Springfield* back to the fleet ahead of schedule and under budget.

These are the kinds of examples of how do we, in a resource constrained environment, perform to a top level. I look forward to you seeing what we're doing at the shipyard, what the workers are doing there to be able to perform ahead of schedule on such an important function of maintaining our attack submarine fleet, and I look forward to hosting you and working out a time to do that.

Admiral HARRIS. Yes, ma'am. I look forward to visiting Portsmouth. If confirmed, I'll do so as soon after I assume the command as possible. I think our public shipyards are national treasures. I think that schedule is money, and if you can make schedule or beat schedule, then you're making money, and I think that's important. I look forward to visiting Portsmouth.

Senator AYOTTE. Thank you, Admiral. I appreciate your willingness to do that.

Ms. Slotkin, I wanted to follow up on the question. One of the questions I wanted to ask you was, as I understood it, Senator Inhofe asked you about what is happening in Ukraine. You answered his question saying you don't know what the actual definition of an invasion is.

Do you believe what the Russians have done in Ukraine is an invasion of that country, yes or no?

Ms. SLOTKIN. ma'am, we consider it an unlawful occupation of Crimea in particular and continuing destabilizing activities in Eastern Ukraine.

Senator AYOTTE. So do you believe that's an invasion?

Ms. SLOTKIN. Again, I don't believe that—I don't want to misspeak, but I can tell you we believe it's an unlawful occupation.

Senator AYOTTE. So General Breedlove in November, who is the commander of the U.S. European Command, has said "We have seen columns of Russian equipment, primarily Russian tanks, Russian artillery, Russian air defense systems, and Russian combat troops entering Ukraine."

If, in the United States of America, we saw columns of equipment from another country, tanks, artillery, air defense systems and combat troops against the will of our government entering this country, would you be prepared to call that an invasion?

Ms. SLOTKIN. ma'am, again, I think, it sounds like an invasion, yes, the way you described it.

Senator AYOTTE. Okay. Let's just call it what it is, because you're being nominated for a very important position, and if we can't have basic conversation about what is an invasion of another country and what is not, then it's going to be very difficult to address the challenges we face in the national security context.

Now that we understand that it is an invasion of another country, on this issue of lethal aid to Ukraine, what will you or will you not recommend that we should be providing lethal aid to Ukraine?

Ms. SLOTKIN. ma'am, I believe, particularly in light of the events this fall with the Russian flagrant violation of the Minsk agree-

ment that they had just signed up to, that all options should be on the table.

Senator AYOTTE. One thing that my office has been trying to get an answer from is that we have asked the Office of the Secretary of Defense to answer a very simple question, and that is, is the Defense Security Cooperation Agency developing a contingency plan to provide arms to Ukraine?

Ms. SLOTKIN. ma'am, again, we've made a series of options available, including additional arms.

Senator AYOTTE. Does that mean that the answer is that the Defense Security Cooperation Agency is developing a contingency plan to provide arms to Ukraine? So the answer to that would be yes?

Ms. SLOTKIN. As I've said, we've provided quite a number of options, including sending additional arms.

Senator AYOTTE. I want to make sure that I can get a specific follow-up to what I've just asked because that will be key to a contingency plan on the provision of arms.

One thing, having listened to President Poroshenko come before the joint session of Congress, and essentially he's very appreciative of the assistance of the United States of America, but he rightly said that they cannot defend against columns of tanks, troops, air defense systems coming from Russia with blankets alone, and I would hope that we have a country with Ukraine that actually, under the Budapest Memorandum, gave up their nuclear weapons. We were a signatory to that agreement. Russia has actually repudiated that agreement by its actions in terms of not respecting the sovereignty of that country.

I would hope that we would provide lethal assistance to Ukraine because I'm just not sure why any other country would ever give up their nuclear weapons again when we won't give them basic arms. don't you think that is an important consideration for us in the bigger picture?

Ms. SLOTKIN. I think it's a consideration, ma'am, of course. But I do think, again, no matter what we give the Ukrainians, no one piece of equipment is going to make them military competitors to the Russians. There is certainly a military dimension to this problem, but there's not a military solution to the problem.

Senator AYOTTE. The President of Ukraine came to our Congress and asked for lethal assistance. He believes it's important. They're willing to fight and die for their own sovereignty. They gave up nuclear weapons, and in return for respect for their sovereignty we were signatory to that agreement, the Russians were a signatory to that agreement. When other countries like Lithuania in the Baltics say they are worried about what Russia's next steps are, I think that to think about the fact that they could be out-matched, so we're just going to let Russia run all over that country when they're willing to defend themselves, I think it's unconscionable that we have not provided this assistance to them, and I would hope—you are going to have a very important position—that you will provide a leadership position in saying that we really should be doing all that we can to allow them to defend themselves. If we don't, I think the consequences are quite grave, not only for Ukraine but the surrounding countries in the region.

I know I'm beyond my time, so I thank the chairman.

Chairman LEVIN. Thank you, Senator Ayotte.
Senator Blumenthal?

Senator BLUMENTHAL. Thanks, Mr. Chairman.

Thank you all for being here, and congratulations to you, and thank you for your service.

I want to follow some of the questions about Ukraine that have been asked and at the outset say that I share the impatience and concern that has been articulated so well by my colleague and friend from New Hampshire and others on this panel. I think our situation there is increasingly untenable, whatever it's called—engagement, unlawful occupation. The fact of the matter is, as the New York Times reported just recently, Russian “tanks and other military vehicles are pouring over the border from Russia into Eastern Ukraine”. Put aside what's happened in Crimea, Russian aggression has been flagrant, blatant, ongoing, effective in Eastern Ukraine, in real time. It's not history. It's ongoing right now.

I believe that the time has come to provide defensive weapons, to listen to the Ukrainians, most recently the President of Ukraine, President Poroshenko, when he came to us in this Congress and asked for those kinds of weapons so that the Ukrainians could defend themselves.

It's not that they are seeking to add land. They are defending themselves, and I've come to that point of view after a great deal of thought. I respect the expertise and experience, Ms. Slotkin, that you and others in DOD and the Department of State have in this area, and I'm not going to put you through the same round of questions.

But I would ask, when will this decision be made about whether to provide these weapons? Because time is not on our side. The Russians are continuing to arm the rebels and separatists there, and people are dying. Two of the victims of Russian aggression are in the Bridgeport, Connecticut Burn Center right now, having lost limbs to this struggle. It affects the Ukrainian community in Connecticut and around the country. It's not just a Ukrainian struggle. Ukraine is the testing ground for the United States against this kind of blatant, ongoing aggression.

What is the timeframe?

Ms. SLOTKIN. Senator, those conversations are happening in real time. They're happening now. The ultimate decision is the President's, and I'm just not privy to the final timeline.

Senator BLUMENTHAL. When do you think we should be making a decision?

Ms. SLOTKIN. Sir, I would always want decisions as fast as possible.

Senator BLUMENTHAL. What do you see as the immediate development there in terms of holding ground, holding land there, by the Ukrainian Government?

Ms. SLOTKIN. I'm sorry, Senator, could you repeat that?

Senator BLUMENTHAL. What do you see as the developing line of events in the future? How soon do you think there will be continuing losses, or do you think there will be a continuing stalemate? What's your prediction as to what will happen in the next very short timeframe?

Ms. SLOTKIN. Unfortunately, we continue to see Russia's destabilizing activities, their flagrant violation of the Minsk agreement. I, unfortunately, fear that will continue. I don't see that ebbing right now.

Senator BLUMENTHAL. That there will be continuing Russian aggression. But will there be loss of cities, of land? What's your prognosis?

Ms. SLOTKIN. I hope not, Senator, and I believe the Ukrainian military is fortifying itself, and we continue to provide advice and counsel to them, along with additional equipment.

Senator BLUMENTHAL. If the President were to decide to increase the level of equipment, what would you recommend to him?

Ms. SLOTKIN. Sir, as I've said, we've provided a range of options. I'm not at liberty to provide my private advice that I've provided up my chain.

Senator BLUMENTHAL. Let me shift topics, although the subject is still Russia. As you're aware, Rosoboronexport has been providing helicopters and Mi-17s to the Afghan Government with American taxpayer dollars buying them. I have been at the lead of the effort to stop those transactions, and the NDAA has a provision relating to those continuing purchases now of components and parts to maintain and supply the helicopters that have already been delivered.

I regret that we are in the situation that we have found ourselves. I have opposed those continued deliveries of helicopters, as well as the continued sales of parts. They ought to be American helicopters, and the purchases certainly should not be from the Russian arms agency that continues to fuel aggression in Ukraine.

I'm asking for your commitment on your confirmation. Will you commit to finding alternative means of maintaining and supplying parts for the existing inventories of Mi-17 helicopters that we have financed, in effect?

Ms. SLOTKIN. I will certainly commit to looking into alternatives, sir. I share your frustration.

Senator BLUMENTHAL. Thank you.

That concludes my questions, Mr. Chairman. Thank you.

Chairman LEVIN. Thank you, Senator Blumenthal.

For a second round, Senator Ayotte?

Senator AYOTTE. Thank you, Mr. Chairman.

Mr. Scher, I wanted to follow up with you. In your written response to the committee's questions, you were asked about nuclear weapons reductions, and you said, "Yes, I believe we should pursue further negotiated verifiable reductions in the nuclear forces of the United States and Russia, and that would enhance U.S. national security."

You also cited the Nuclear Weapons Guidance announced in June 2013, and that would have included the President's assertion that we can ensure the security of the United States and our allies by safely pursuing up to a one-third reduction in our deployed strategic nuclear weapons from the levels established by the New START treaty.

I want to ask you about that because, as I look at your answer in the advance policy questions, and citing the President's desire to reduce our nuclear deterrent another third, our strategic weapons,

I would ask you how does that play when you look at the Russian violation of the Intermediate-Range Nuclear Forces Treaty, the INF Treaty, which the White House, in my view, belatedly acknowledged? Because I've been pursuing this issue for a while behind the scenes, but obviously that's a deep concern where they are flight testing ground-launched cruise missiles within a range of 500 to 5,500 kilometers, so a violation of the INF Treaty. We have the invasion of Ukraine by the Russians.

Tell me what you think about the potential reduction of our nuclear strategic stockpile and resources in light of the potential INF violations, in light of the invasion of Ukraine. That worries me in terms of your view of the role of our nuclear deterrent.

Mr. SCHER. Senator, I agree with the President's statements when they were made that we could reduce by up to a third if we did it in conjunction with the Russians in a negotiated process, that we would still be able to achieve our operational aims, as well as be safer with fewer nuclear weapons across the world.

Certainly, however, as you have pointed out, we have to take a look at any discussions with Russia in the context of all of the activities that are going on, be it Ukraine, be it the violations of the INF Treaty. At this point, we've seen no indications that Russia has any interest in discussing any of these topics with us, especially not nuclear arms reductions, and as a result I would agree with the President that absent that cooperation with Russia, that we stay with the New START agreements, which we still see Russia adhering to.

Senator AYOTTE. Let me ask you this. Do you think that we should ever undertake a unilateral reduction without a negotiated agreement with Russia?

Mr. SCHER. I think that we are in a position now where I would obviously agree with the President that we could, but that the key is a negotiated reduction.

Senator AYOTTE. Do you believe that it would be important that if we were to achieve any reductions, it would be a negotiated reduction?

Mr. SCHER. I believe that that is a critical part to looking at how we could achieve our operational ends.

Senator AYOTTE. I would hope that if there were ever a move in that direction again, that you would also seek congressional approval. I might add, too, that obviously I don't think we could trust negotiating with the Russians right now, so I would hope that the administration would never at this point, in light of their behavior, think about going down that road.

I also wanted to follow up one additional question to Admiral Harris, and that is on the missing-in-action (MIA) recovery operations in North Korea, Admiral. In October 2011, DOD announced an agreement with North Korea that would have allowed U.S. personnel to return to North Korea to resume recovery of remains of U.S. servicemembers missing in the Korean War. In your advance responses, you said that the arrangement negotiated in 2011 covered for a year is no longer valid, and I understand that given what we have seen from the Government of North Korea, and certainly that's really unfortunate when we look at the efforts we want to

make on behalf of those who are missing in action and their families.

We have 43 from New Hampshire that have been listed in terms of Korea, and we have a solemn obligation to ensure that we never leave our servicemembers behind and make every effort to recover their remains, and we owe them that.

Do I have your commitment that you'll do everything possible, obviously consistent with our national security interests, to facilitate recovery operations in North Korea if it ever becomes viable again for us to do that with that government?

Admiral HARRIS. Yes, ma'am, you do.

Senator AYOTTE. Okay. Thank you, Admiral.

Chairman LEVIN. Let me continue, then, my second round.

Ms. Slotkin, the ethnic and religious minority communities in Northern Iraq, including the Christians, have suffered horrific attacks by ISIL. They have had to flee violence in mass numbers. Several years ago the Government of Iraq issued an order to begin establishing the Nineveh Plain Police Force, a security force recruited from those vulnerable communities to provide local protection. U.S. forces in Iraq at the time supported the effort, but the Nineveh Force never attained its goal of 5,000 police personnel.

Does the military assistance plan for Iraq include training and equipping local security forces in vulnerable ethnic and religious minority communities such as the Yazidis and the Christian communities in Nineveh to empower those communities to defend themselves from ISIL?

Ms. SLOTKIN. Senator, we certainly welcome and support representatives of all the groups, particularly the most vulnerable, in our training program. It has not yet begun, but there's no reason why representatives from the entire spectrum shouldn't be in it.

Chairman LEVIN. Is that part of the local police force plan, like the National Guard which we talk about, so that we have local people defending their own communities? Is it part of our plan specifically that the religious communities be focused on so that they can have the power to defend themselves?

Ms. SLOTKIN. Yes. One of the key items of discussion with the Iraqis is the National Guard Program, which would indeed allow communities to provide for their own local security. It's an important initiative and would do exactly what you're talking about, allow forces to maintain responsibility for their own safety of their families and their communities.

Chairman LEVIN. That includes an awareness that these very vulnerable communities have a need to do exactly that?

Ms. SLOTKIN. Sir, I—

Chairman LEVIN. Are they included in our plan specifically?

Ms. SLOTKIN. Sir, again, there is no group that is excluded or included right now. It is a—

Chairman LEVIN. Which means they're included?

Ms. SLOTKIN. Absolutely.

Chairman LEVIN. The question that you were asked about Ukraine—and, by the way, I very publicly urged that we provide the Government of Ukraine with non-provocative lethal weapons that are defensive weapons. When you answered the question that

you don't have an answer on defensive weapons, I assume your answer referred to lethal defensive weapons.

Ms. SLOTKIN. Yes.

Chairman LEVIN. On non-lethal defensive weapons, I presume you—

Ms. SLOTKIN. We're already providing, sir.

Chairman LEVIN. That you would support?

Ms. SLOTKIN. Of course.

Chairman LEVIN. As long as I make clear my position, as I have repeatedly, I happen to believe it's long overdue, that non-provocative defensive weapons, even if they are lethal, should be provided. I also believe that there is no military solution but that if the Ukrainians want to die going down fighting, that they have that right to defend themselves, and we should give them what they're asking for, providing it's not provocative. If it's defensive weapons, that's different. But there's no intent or no evidence that Ukraine is going to invade Russia.

The question really comes down to—and I add the word purposefully non-provocative defensive weapons. I don't know why we can't provide anti-tank weaponry to the Ukrainian Government. I don't understand why we can't do it. We understand that if Russia decided to move into the Ukraine in massive numbers, that there would be no stopping them. Ukrainians understand that, by the way, because we made it clear to the Ukrainians that this isn't going to be Hungary all over again, where we're implying to you that we're going to come militarily to your assistance with boots on the ground. They understand that. But they also don't understand why we don't help them do what they are determined to do, which is defend themselves, even if that means they end up in a guerilla war against Russia instead of being able to defeat them on a battlefield.

I know you're in a position here, and I gather from your answers that you're in the middle of your present job of providing advice to the administration, so that puts some constraints on you, I gather, as to what your advice is. When you're asked what your advice would be, that is, in essence, asking for what your advice currently is in the areas of Ukraine and Iraq and Syria. Is that one of the reasons why there's some constraint in terms of your expressing your opinion as to what your advice would be, because you're currently giving that advice and you're not able publicly to say what your advice is to the administration?

Ms. SLOTKIN. That's correct, sir.

Chairman LEVIN. I think it would have been useful probably for you to indicate what those constraints are. I mean, that there are constraints. We don't have to have the exact definition of the constraints, but the fact that there are constraints, it seems to me, if it's not clear to everybody here, which it isn't, I think that it would have been helpful if you had made clear that there are those constraints. There are such constraints?

Ms. SLOTKIN. There are, sir.

Chairman LEVIN. Now, in terms of one of the questions of Senator McCain, this has to do with how much effort was made to leave some residual forces in Iraq. The decision was made by President Bush to set a date for the deadline for the removal of all of

our forces. The issue battled back and forth is whether or not the Obama administration made an adequate effort to try to persuade Maliki that it's in everybody's interest, theirs and ours, that we leave some kind of a force there.

This is what Secretary Gates said in his book. "In the end, the Iraqi leadership did not try to get an agreement through their parliament that would have made possible a continued U.S. military presence after December 31." These are Gates' words: "Maliki was just too fearful of the political consequences. Most Iraqis wanted us gone." From Gates' book, that's what I get. I have not heard him speak otherwise on this subject, or if I have I've forgotten what he said, but I read his book on this subject, and his book says that Maliki would not present an agreement to the parliament. That agreement, of course, would be a bilateral security agreement which would protect our troops in case of a claim that there was a criminal violation by one of our troops. We weren't about to leave it up to an Iraqi system of justice to try our troops. We insisted on a bilateral security agreement which would protect our troops, which we have with every other country where we have troops, at least most other countries where we have troops.

That, just for the record, is what Gates said in his book, somewhat different from what Senator McCain said is Gates' position. But again, Senator McCain may have information I don't have about something that Secretary Gates may have said in some places other than in his book on this subject.

When you say that relative to Ukraine there's a series of options which have been made available, to whom?

Ms. SLOTKIN. Sir, the Defense Department, the State Department, we all sit in an interagency process. The Defense Department provides recommendations up through the Secretary of Defense and then over to the White House and the rest of the interagency for consideration. That's what I'm referring to.

Chairman LEVIN. It goes up the chain, ultimately to the President?

Ms. SLOTKIN. Ultimately the decisions that are made in the interagency must go up through the President when it's on an important decision. Yes, sir.

Chairman LEVIN. You indicated that something was better in Iraq, I believe, than it was last summer. Were you referring to Iraq or to Syria or what?

Ms. SLOTKIN. I was saying the security situation in Iraq today is at least better than when Mosul originally fell in June in Iraq.

Chairman LEVIN. Okay. Can you explain what you meant by better? I know you don't believe it's good because—

Ms. SLOTKIN. Yes, I wouldn't define it as good.

Chairman LEVIN. But you indicated it was better. I'm just wondering if you would explain your position on that.

Ms. SLOTKIN. Sure. I think since the summer, and certainly since we decided to take kinetic action in Iraq and provide air support, we've seen Iraqis, the Iraqi security forces and Kurdish Peshmerga forces and Iraqi tribal forces take back critical areas in Iraq that ISIL had captured in the early parts of their offensive in June, in particular key infrastructure locations, the Mosul dam, the

Haditha dam, the Baiji refinery, major towns along the border with the Kurdistan regional government.

I would by no means call it good, sir, but we have been able to support the Iraqis as they retake critical areas that were taken in the early parts of the summer.

Chairman LEVIN. I don't see any of my colleagues here for the second round. It's about quarter to 1 p.m. now. What we will do is we will adjourn this hearing, and there will be questions for the record. Whether or not there's a need for an additional hearing for one or more of our witnesses, we will leave that question open.

We obviously hope to move these nominations. It is a lame duck session. The timing is very, very difficult, not just for nominations but for the Defense bill that is the main responsibility of this committee. Our major responsibility is to get our Defense authorization passed. Our second responsibility, obviously, is to deal with nominees as part of the confirmation process.

We're going to do the best we can on both fronts, hopefully get a Defense authorization bill, a new bill that would be a bipartisan bill, a bicameral bill introduced today which would reflect the efforts of our committees, the leadership of our committees, the staff on our committees for many, many months, indeed for a whole year. I hope we can get that bill passed.

It will be introduced in a few hours, and I also again hope that we can get as many nominees as we can confirmed, but I don't want to raise false hopes on either account. Lame duck sessions are named in a weird way, but they also maybe involve much more than the usual understanding of lame duck, which means less power. It also means a lot less time to get an awful lot of work done that in some cases should have been done long ago.

With that, we thank our witnesses. We thank your families.

Again, the record will stay open, and we stand adjourned.

[Whereupon, at 12:50 p.m., the committee adjourned.]

[Prepared questions submitted to Mr. Robert M. Scher by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I believe the Goldwater-Nichols Act has been successful in improving operational and warfighting effectiveness, and I do not see the need to modify that legislation.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not think modification is required.

RELATIONSHIPS

Question. If confirmed, what will be your relationship with:
The Secretary of Defense.

Answer. At the direction of the Under Secretary of Defense for Policy (USD(P)), the Assistant Secretary of Defense for Strategy, Plans, and Capabilities (ASD/SPC) advises the Secretary of Defense on the formulation of national security and defense policy, the integration and oversight of the Department of Defense (DOD) policy and plans to achieve national security objectives, and strategy and policy on matters relating to nuclear weapons, missile defense, and security cooperation. ASD/SPC also provides policy support to the USD(P) and the Secretary in the Planning, Programming, Budgeting, and Execution processes inside the Department, including the Quadrennial Defense Review (QDR), the Nuclear Posture and follow-on reviews, and annual program and budget reviews.

Question. The Deputy Secretary of Defense.

Answer. The ASD/SPC provides similar support to the Deputy Secretary as described above.

Question. The Under Secretaries.

Answer. At the direction of the USD(P), the ASD/SPC works with the Under Secretaries of Defense in support of the Secretary's objectives. Specifically, the ASD/SPC provides the Under Secretary of Defense for Acquisition, Technology, and Logistics with policy input regarding acquisition and programmatic activities, most notably relating to nuclear weapons and missile defense.

Question. The Assistant Secretaries of Defense.

Answer. The ASD/SPC works collaboratively with other Assistant Secretaries of Defense to provide the USD(P) and the Secretary with advice on policy issues under consideration in the Department and provide policy oversight to ensure that the Secretary's guidance is implemented.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. At the direction of the USD(P), the ASD/SPC works with the Chairman and Vice Chairman to provide support on matters that affect strategy, force planning and employment, nuclear weapons, and missile defense.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. The ASD/SPC provides similar support to the Vice Chairman as described above.

Question. The Service Secretaries.

Answer. At the direction of the USD(P), the ASD/SPC works with the Secretaries of the Military Departments on a broad range of strategy, policy, and force planning issues and other areas in which the Military Departments and Services are critical stakeholders.

Question. The Service Chiefs

Answer. At the direction of the USD(P), the ASD/SPC works with the Service Chiefs on a broad range of strategy, policy, and force planning issues.

Question. The Commander of U.S. Strategic Command.

Answer. At the direction of the USD(P) and in coordination with the CJCS, the ASD/SPC works with the Commander of U.S. Strategic Command on a broad range of issues that affect strategy and policy for nuclear weapons and missile defense.

Question. The Commander of U.S. Cyber Command.

Answer. At the direction of the USD(P) and in coordination with the CJCS, the ASD/SPC works with the Commander of U.S. Cyber Command in support of strategy development and execution and contingency planning.

Question. The combatant commanders.

Answer. At the direction of the USD(P), the ASD/SPC works closely with the Regional and Functional Combatant Commanders, particularly in support of strategy development and execution, and steady-state and contingency planning.

Question. The Director, Defense Security Cooperation Agency.

Answer. The ASD/SPC works collaboratively with the Director of the Defense Security Cooperation Agency (DSCA) to provide the USD(P) with advice and recommendations on security cooperation issues to ensure alignment with defense strategy.

Question. The Administrator and Deputy Administrators of the National Nuclear Security Administration.

Answer. The ASD/SPC works with the Administrator and Deputy Administrators of the National Nuclear Security Administration to provide policy support to the USD(P) and the Secretary of Defense on strategy and policy issues relating to nuclear weapons modernization and related issues.

DUTIES

Question. The position for which you have been nominated has been substantially restructured.

What is your understanding of the duties that you will be assigned if you are confirmed?

Answer. My understanding is that the ASD/SPC is primarily responsible for advising and supporting the USD(P) and the Secretary of Defense on formulation and coordination of national security and defense strategy, the forces and contingency plans necessary to implement defense strategy, U.S. nuclear weapons and missile defense policy, and security cooperation plans and policies.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have had more than 23 years of experience in a variety of positions as a career civil servant in the Departments of Defense and State, as a political appointee in DOD, and as a consultant at Booz Allen Hamilton in many of the areas of responsibility assigned to the ASD/SPC. In my current capacity as the Deputy Assistant Secretary of Defense for Plans, I serve as the principal advisor to USD(P) and the Secretary on all policy matters pertaining to plans and force posture. During my 15-year tenure as a career civil servant in the Departments of Defense and State, I helped develop the strategic basis for U.S. Defense strategy, including participating in the oversight of the Bottom-Up Review and the 1997 QDR, and I worked extensively on Presidential Decision Directive-56 on conducting complex contingency operations.

Question. What additional actions do you believe you need to take, if any, to fulfill the responsibilities of this position?

Answer. If confirmed, I would focus on the actions and relationships necessary to perform the duties of the ASD/SPC effectively. Nuclear deterrence and missile defense policy will need particular attention and, if confirmed, I would develop the relationships and knowledge needed to provide policy guidance in these critical areas.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the Assistant Secretary of Defense for Strategy, Plans, and Capabilities?

Answer. Crafting strategic guidance, supporting programmatic options, and ensuring planning processes allow DOD to apply resources as efficiently as possible in an era of fiscal and strategic uncertainty will be challenging. It also will be a challenge to ensure that our efforts to modernize U.S. nuclear forces meet policy and strategy requirements in a cost-effective manner.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, it would be my priority to ensure our nuclear forces remain safe, secure, and effective and that they are planned, postured, operated, and modernized in accordance with policy guidance. I also would work to publish strategic guidance that promulgates clear priorities and risk tradeoffs and infuse this guidance into processes and decisionmaking fora throughout DOD.

Question. What do you anticipate will be the most serious problems in the performance of your responsibilities?

Answer. I am concerned about implementing policies and strategies in a cost-efficient manner.

Question. If confirmed, what management action and timelines would you establish to address these problems?

Answer. If confirmed, I would work with the USD(P) and the ASD/SPC staff to establish specific action plans and timelines and to identify and resolve problems relating to the ASD/SPC portfolio.

PRIORITIES

Question. If confirmed, what broad priorities would you establish for the office to which you have been nominated?

Answer. If confirmed, my priorities for SPC would be to create a new fully integrated ASD component and to provide excellent policy support to the USD(P) and the Secretary across my portfolio.

CONTINGENCY PLANNING

Question. One of the purposes of Goldwater-Nichols was to increase military and civilian attention on the formulation of strategy and contingency planning. The Assistant Secretary of Defense for Strategy, Plans, and Capabilities supports the USD(P) who is required to assist the Secretary of Defense in preparing written pol-

icy guidance for the preparation and review of contingency plans and in reviewing such plans.

What is your view of the civilian role, as compared to the military role, in the formulation of strategy and contingency planning?

Answer. Civilian leadership is critical and a statutory responsibility in the formulation of strategy and contingency planning. Civilian oversight takes our U.S. national security policies and establishes strategic ends and baseline assumptions for the military. The military uses those strategic ends and assumptions to guide its planning.

Question. In your opinion, does the civilian leadership currently have an appropriate level of oversight of strategy formulation and contingency planning?

Answer. In my experience, civilian leadership has the appropriate authorities and processes to provide effective oversight of strategy formulation and contingency planning.

Question. What is your understanding and assessment of the capability and capacity of the Office of the Secretary of Defense and Joint Staff to provide comprehensive, objective and realistic joint analysis in support of formulating and evaluating strategy and operational plans and related force planning?

Answer. The Office of the Secretary of Defense and the Joint Staff maintain sufficient analytic capacity to support strategy and operational plan development, but this is an area that requires constant review for the DOD. The Department is reinvigorating aspects of our analysis capability through the Support for Strategic Analysis (SSA) process to represent innovative concepts more effectively and assess their impact on the dynamic security environment more fully. Both organizations work very closely with the Services and combatant commands to ensure that analysis informing senior DOD leadership decisions on force structure and force planning is both objective and realistic.

Question. What steps do you believe are necessary to ensure effective civilian control and oversight of strategy, contingency, and force planning?

Answer. I believe our current processes and authorities support civilian control and oversight of strategy, contingency, and force planning. Discussions between civilian and military leadership are essential to the civilian oversight process. Existing processes ensure those discussions are taking place.

Question. Many geographic combatant commands' contingency and operation plans are undergoing DOD review. These reviews are justified for a variety of reasons including geo-strategic change, risk assessments, potential adversary and our own capability enhancements, and fiscal realities.

If confirmed, how would you determine whether the alterations to a contingency or operation plan are warranted due to geo-strategic change, risk assessments, potential adversary and our own capability enhancements, and fiscal realities?

Answer. The plans review process involves many stakeholders and several analytic steps to ensure plans are current, in terms of the geo-political dynamics and DOD capabilities, and are viable, resource-informed, and risk appropriate. If confirmed, I would leverage this process to ensure any change to planning is warranted and, then, ultimately approved by the Secretary.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges confronting the Assistant Secretary of Defense for Strategy, Plans, and Capabilities?

Answer. See my answer above.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. See my answer above.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Assistant Secretary of Defense for Strategy, Plans, and Capabilities?

Answer. See my answer above.

STRATEGIC REVIEWS

Question. What is your understanding and evaluation of DOD's processes for strategic assessment, analysis, decisionmaking, and reporting for each of the following strategic reviews?

- The QDR (section 118 of title 10, U.S.C.);
- The National Military Strategy (section 153 of title 10, U.S.C.);
- Global Defense Posture Review (section 2687a of title 10, U.S.C.);
- The Quadrennial Roles and Missions Review (section 118b of title 10, U.S.C.).

Answer. Each of these strategic reviews plays an important role in providing guidance to the entire Department of Defense to achieve the objectives outlined in the President's National Security Strategy. These reviews also help the military departments, combatant commands, and DOD components prioritize their efforts and resources collectively to meet the Department's objectives under changing security and fiscal circumstances. The final documents also serve to communicate the Department's priorities with other audiences, both at home and abroad.

At various points throughout my career, most recently in my position as Deputy Assistant Secretary of Defense for Plans, I have had the opportunity to participate in the preparation and dissemination of these reviews. I have observed various approaches based on defined requirements, including the strategic environment, timing, and leadership preference. That said, I believe each review should be grounded in a rigorous analytical approach that incorporates candid feedback and advice from both military and civilian leadership. Our Nation's defense depends on these reviews to ensure the Department makes the best use of its available resources as we meet current and future national security challenges.

The purpose of the QDR is to articulate the Nation's defense strategy in support of the President's National Security Strategy. Title 10 U.S.C. section 118 tasks the Department with conducting a comprehensive examination of the national defense strategy, force structure, force modernization plans, infrastructure, budget plan, and other elements of the defense program and policies with a view toward determining and expressing the defense strategy of the United States and establishing a defense program for the next 20 years. In my experience, the most effective QDRs incorporate inputs from a wide range of stakeholders, including interagency partners, and work to ensure the defense strategy guides U.S. military force structure, plans, and programs.

The chairman prepares the National Military Strategy as a means to convey the military's views on strategic priorities and associated risks. The National Military Strategy, which the chairman submits every 2 years to the respective Armed Services Committees of the House and Senate, is an important review that draws on guidance in both the National Security Strategy and the most recent QDR. The National Military Strategy delineates the "ends, ways, and means"—in essence, the military's objectives, strategic and operational missions to achieve those objectives, and the required capabilities to carry out the military's missions. It also describes the strategic and operational risks associated with accomplishing the military's strategy.

The Global Defense Posture review describes the operational orientation of the Department's military personnel and facilities, and includes an assessment of changes to that posture based on the evolving security environment and strategic priorities outlined in other guidance documents, such as the QDR. The USD(P) and the Chairman of the Joint Chiefs of Staff are the primary authors of this strategic review document, which offers a comprehensive look at the Department's posture overseas, new initiatives, and defense agreements. It also supports senior leaders in the Department to make future resource decisions based on operational needs.

Title 10 requires the Department to complete a comprehensive assessment of the roles and missions of the Armed Forces and the core competencies and capabilities of the Department to perform and support such roles and missions, known as the Quadrennial Roles and Missions Review (QRM). In the QRM, the Department is required to identify the responsible office, agency, activity, or command for providing these core competencies and capabilities, and identify any gaps or unnecessary duplication.

Question. If confirmed, what recommendations would you make, if any, to change title 10, U.S.C., that would update, improve, or make these reviews more useful to the Department and to Congress?

Answer. These reviews are an important tool for the Department. They offer the Department an opportunity to reassess and, if necessary, adjust the Nation's defense strategy, required capabilities, and force structure in alignment with current national security interests, the future security environment, and available resources. In a time of fiscal uncertainty, these documents are more essential than ever in ensuring that the Department takes a strategic approach to defending the Nation. If confirmed, I look forward to working with Members of Congress to ensure that these reviews serve the needs of both Defense leaders and Congress.

Question. If confirmed, what recommendations would you make, if any, to improve DOD's processes for strategic assessment, analysis, policy formulation, and decision-making relative to each review above?

Answer. Based on my experience, there are many ways to conduct these reviews, but I see three broad principles for successful strategic assessments, analyses, and reviews. First, senior leaders should provide clear initial guidance on the terms of

reference for the review. Second, these same leaders should remain involved in the execution. Third, the process should be transparent to all relevant Department stakeholders, including leaders within the Office of the Secretary of Defense, the Joint Staff, the military departments, and the combatant commands.

In addition to and in support of these broad principles, the Department requires a robust and ongoing analytical effort. To ensure this, if confirmed, I would prioritize engagement with the SSA process, which is designed to inform senior Department leadership deliberations on defense strategy and planning, programming, budgeting, and execution system matters. Along with Cost Assessment and Program Evaluation (CAPE) and Joint Staff colleagues, I would actively use wargames to seek innovative approaches to address a range of challenges.

If confirmed, I would recommend that insights from previous reviews, along the lines of those described above, be applied to future Department reviews.

Question. The law requires the QDR to identify the budget plan that would be required to provide sufficient resources to execute successfully the full range of missions called for in that national defense strategy at a low-to-moderate level of risk, and any additional resources (beyond those programmed in the current Future Years Defense Program) required to achieve such a level of risk. The law also requires the QDR to make recommendations that are not constrained to comply with and are fully independent of the budget submitted to Congress by the President.

What is your understanding and assessment of the Department's QDR analysis and decisionmaking processes to address these two requirements?

Answer. The Department's QDR process is both strategy-driven and resource-informed. The strategy-driven component ensures the Department considers the full range of strategic challenges and opportunities facing the Nation, then identifies the defense approach that best secures U.S. national interests. This leads to decisions on the best mix of capabilities in which the Department should invest. The reality of constrained resources requires the Department to consider investment options from a resource-informed point of view to ensure we develop a strategy that is executable. The complex and ever-changing strategic environment requires us to prioritize and make difficult choices, and the QDR provides strategic direction for doing so. Given the uncertainty about funding levels, the 2014 QDR explicitly considered the implications and risks to the Nation and our defense strategy if sequestration level cuts continued.

Question. In your view, is there analytical and/or practical value in a defense strategy that is unconstrained by or independent of the current or projected budget requests or fiscal environment?

Answer. In my view, the defense strategy should be strategy-driven and resource-informed. Assessments of the future security environment and the military missions required to support the President's National Security Strategy should be unconstrained, but the defense strategy is only viable and executable if informed by anticipated levels of resourcing. A resource-unconstrained strategy could inadvertently mask risk since investment gaps would be inevitable between the unconstrained approach and which investments were actually funded. A resource-informed approach helps ensure coherence between what the Department should achieve, how it expects to achieve it, and the resources available to execute the strategy.

Question. According to the report of the bipartisan National Defense Panel (NDP), "the capabilities and capacities rightly called for in the 2014 QDR ... clearly exceed the budget resources made available to the Department."

Do you concur with this assessment? Do you believe it will be necessary to repeal sequestration in order to make available sufficient resources to execute the QDR strategy?

Answer. The NDP provides an important and valuable tool chartered by Congress to review the QDR independently. The Department worked closely with the NDP throughout the QDR process. I concur in the NDP's strong concern that current and likely budget constraints are "dangerous and self-defeating," and significantly impact the Department's ability to do long-term force planning. I think it is notable that the bipartisan NDP supports the capabilities and capacities set forth in the QDR as appropriate. I also concur in the NDP's assessment that sequestration, if reinstated, would prevent us from achieving the strategy outlined in the QDR. Our defense strategy cannot be executed at sequestration levels without significantly higher levels of casualties, attrition of equipment, extended timelines for mission accomplishment, and risk to mission success. If we return to sequestration level cuts in fiscal year 2016, we will face significant risks across the board, and would have to reassess our defense strategy. If confirmed, I look forward to working with Congress to help solve this pressing problem.

Question. According to the report of the bipartisan National Defense Panel, "national defense needs should drive national defense budgets, not the opposite."

What aspects of a strategy would indicate that a strategy is budget-driven versus budget-informed?

Answer. A budget-driven strategy would define ends, ways, and means based on analysis that starts with available resources, and contains little to no risk because, by definition, the strategy is designed to do only what can be done with available resources, regardless of what might be needed in terms of advancing national interests. A budget-informed strategy considers national interests and objectives, then assesses how to achieve those objectives given the strategic environment first, and then develops specific ways and means to try to meet desired ends, informed by the likely available resource levels. It would explicitly consider risks to the strategy that may result from the reality that resource levels are finite, and ensures that the Department sets priorities among its investments and activities—a central function of an effective strategy. A successful strategy should be started with an unbounded evaluation of the strategic environment, but then would be budget informed to have relevance; a defense strategy is effective only if it is executable. For example, the defense budget request that was informed by and accompanied the QDR, the President's Budget 2015 request, is \$15 billion higher than Budget Control Act funding caps for 2015, demonstrating that the current strategy is not budget driven.

Question. If sequestration remains in effect, do you believe that our strategy will have to be one that is budget-driven?

Answer. Our strategy should be budget informed, but never budget driven. The Department has previously stated that at sequestration levels, it will not be able to achieve the strategy outlined in the QDR without unacceptable risk. If sequestration remains in effect, the Department will have to reassess its strategy. A revised strategy, like the QDR, should be budget informed if it will serve as a guide to prioritize and direct investments, but our strategy should not be a budget exercise. A budget-driven strategy, designed to do only what can be done with available resources regardless of what might be needed in terms of advancing national interests, is not the right strategy for our national defense.

Question. The National Defense Panel also recommended that "Congress should task the Department to do a thorough review to address in detail, without undue emphasis on budgetary constraints, how the Department would construct a force that meets the force sizing construct."

Do you agree with the NDP's recommendation that such an assessment would provide the Department of Defense and Congress with a better understanding of our Armed Forces requirements?

Answer. As part of QDR development, the Department develops a force sizing construct that meets future defense requirements. Rigorous analysis is central to this process. On this specific point, I do not agree with the NDP's recommendation. The QDR is the product of a strategy-driven and resource-informed process. In conducting the 2014 QDR, the Department assessed the international security environment. This allowed the leadership to identify plausible strategic and operational futures that the United States could face in the near-, mid-, and long-term—with particular attention to threats, challenges, and opportunities. Informed by this assessment, the senior leadership identified the objectives that the Department will likely need to be capable of accomplishing in support of U.S. national security interests and assessed the sufficiency and proficiency of the Joint Force to meet these demands. The results of these assessments guided development of the Department's force planning construct.

Question. According to the force sizing construct in the 2014 QDR, American forces should be able to "defeat a regional adversary in a large-scale multi-phased campaign, and deny the objectives of—or impose unacceptable costs on—another aggressor in another region."

In the context of the recent and dramatic deterioration of the security environment in both the Middle East and Russia, as well as continuing instability in Asia, should the force sizing construct also mandate that American forces be able to defeat two adversaries at the same time, a standard embraced by previous QDRs?

Answer. U.S. forces are still and will continue to be capable of prevailing in more than one conflict at the same time. The 2014 QDR envisioned an uncertain and complex security environment, and directed the Department to size and shape the Joint Force so that it would have the flexibility to respond to a wide range of challenges. Although the current force-sizing construct is a bit more detailed in how we will build forces to prevail in any two conflicts in the unlikely event that they begin at the same time, in the end, our forces will prevail. The current force-sizing construct allows us to plan and deliver agile, technologically advanced forces of sufficient size to defend our Nation and secure our interests globally while preventing America's adversaries from achieving their objectives.

GLOBAL FORCE POSTURE

Question. As the Defense Department continues its assessment of projected budget cuts on its end strength, force structure, and other programs, it must also consider the costs, benefits, and risks associated with the permanent stationing of military forces in countries around the world. Based on a series of reports by the Government Accountability Office, evidence indicates that the Department is challenged in its ability to comprehensively and reliably estimate the cost of our global defense posture.

What is your understanding and assessment of the cost and benefits of the U.S. global defense posture and the stationing of U.S. military forces overseas?

Answer. The U.S. global defense posture is the most tangible expression of our interests abroad. To allies, partners, and adversaries alike, our posture demonstrates our ability to respond rapidly to developments that affect our national security. In some ways, it is easy to assess the costs of posturing forces overseas, but difficult to assess the benefits. Although difficult to quantify, there is real value in our posture, through which we deter aggression, safeguard regional stability, respond in a more timely fashion to contingencies, and facilitate close cooperation with our allies and partners.

Any evaluation of our posture requires the consideration of operational requirements, political-military dynamics, host nation support, effects on the force, and costs. The Department employs a continuous review process to determine the appropriate balance between U.S.-based and overseas-stationed forces, taking account of the conditions in each region, operational demands, and costs. If confirmed, I would work to continue seeking new and innovative ways to posture U.S. forces in ways that leverage our strengths and advantages and to assess those costs.

Question. In light of the force structure reductions associated with the Department's planned end strength cuts, and potentially even deeper future end strength cuts, if confirmed, how would you propose to allocate those reductions between forces based within the United States and forces stationed outside the United States?

Answer. Any changes to our forces stationed abroad or within the United States must be decided through careful analysis of the operational requirements, political-military dynamics, host nation support, effects on the force, and costs. Each movement would be handled on an extensively vetted, case-by-case basis, as every military capability has unique characteristics, missions, and limitations that would influence the most beneficial placement.

Question. What is your understanding and assessment of the DOD methodology and assumptions used to evaluate the relative cost of overseas posture compared to stationing forces in the United States?

Answer. The Department employs a continuous review process to determine the appropriate balance between U.S.-based and overseas-stationed forces. We look at a number of cost factors to evaluate the most efficient and effective stationing of U.S. forces, from host nation cost-sharing to rotational costs to base infrastructure costs to military construction costs. We combine this analysis with an accounting of the conditions in each region, the operational demands on U.S. forces, and the benefits of burdensharing with allies and partners who host our forces. If confirmed, I would work to ensure cost analysis remains a key decision criterion when evaluating where to station U.S. forces to ensure the most effective force posture.

Question. If confirmed, what actions would you take or changes would you recommend, if any, to DOD's methodology and assumptions in determining the cost of overseas force posture compared to forces stationed in the United States?

Answer. If confirmed, I would work to ensure our cost methodology and assumptions leverage the most advantageous bilateral arrangements possible, and that planned expenditures on overseas basing are thoroughly reviewed to ensure investments are executable and efficient. If confirmed, I would continue to emphasize high-impact, limited-footprint methods and seek to build capacity among our allies and partners to provide for their security.

Question. On 12 November, the New York Times reported that "Tanks and other military vehicles [are] pouring over the border from Russia into eastern Ukraine" despite the ceasefire reached in September.

In the context of Russian aggression in eastern Europe, do you believe that the deterrence of further aggression will require the permanent stationing of additional U.S. or allied forces in eastern European nations?

Answer. U.S. European Command (EUCOM), in close concert with our allies and partners, is evaluating how we can reassure and deter actors in the region. Going forward, adjustments to our European force structure will be considered, but we have to be cognizant of the need to balance limited fiscal resources and other global

demands. In the end, our extensive diplomatic and operational commitments to the North Atlantic Treaty Organization (NATO) and European security, including any forces we station on the continent, all contribute to deterring further aggressive Russian actions. For example, at this year's NATO summit in Wales, members resolved to establish a Very High Readiness Joint Task Force. This multinational force will stand ready to deploy to NATO's periphery at a moment's notice.

Ultimately, the solution to the Ukraine conflict must be diplomatic in nature. Our defense posture plays a key role in the broader diplomatic push by sending a powerful signal to Russia; aggressive Russian actions have no place in a Europe that is whole, free, and at peace.

Question. Do you believe that the deterrent effect of American ground forces will be greatest if they are stationed in NATO member states that share a border with Ukraine or Russia?

Answer. Our force posture in EUCOM's area of responsibility (AOR) is prepared to respond to contingencies across the AOR. Although geography plays a role, we plan with the understanding that we can leverage our logistical capabilities to meet threats with speed and agility wherever they may come up in the region.

Question. What is your assessment of which American forces and capabilities have the greatest deterrent effect upon Russia and other aggressive actors in the region?

Answer. It's difficult to point to a specific capability or force element that's best able to deter aggressive actions such as those by Russia. Rather, our posture aims to leverage the contributions of a wide range of forces and capabilities. We can best deter aggressive actions by demonstrating a credible capacity to operate in a variety of domains.

Question. The rebalance to the Pacific will increase the percentage of U.S. ships in the region from 50 percent to 60 percent of the Navy's entire fleet. However if the fleet size is reduced from about 300 ships to about 250 ships, the number of ships forward deployed to the region will remain the same at about 150.

Does the potential of increasing the percentage of ships in the region, but the number of ships in the region remaining the same, lead to challenges regarding the expectations of allies, and if so, how would you plan to mitigate such an effect?

Answer. The Department is on-track to meet its goal of homeporting 60 percent of the Navy's fleet in the Pacific by 2020. Current Navy projections show that the fleet size in 2020 will be 308 ships, yielding roughly 170 ships homeported in the Pacific. Additionally, the Navy also will increase ship presence in the region to about 67 ships, up from an average of 50 today.

Numbers alone cannot tell the entire story. Of equal importance, if not more importance, is the prioritization of our newest technology to the region. For example, the new ships homeported in the Pacific represent the best of America's new naval technology. The addition of Littoral Combat Ships to the fleet enable us to engage with regional allies and partners in a range of new training and exercise activities that are in high demand. We will be replacing existing cruisers in the region with ballistic missile defense-capable destroyers, enhancing our deterrent posture towards the North Korean missile threat. We will also be stationing additional amphibious technology in the Pacific, along with new platforms like the P-8A and the F-35C that will provide more capability for missions unique to the Pacific theater.

If confirmed, I would work with colleagues in the Department of the Navy, the U.S. Pacific Command, and with regional allies and partners to ensure that we continue to make progress on these important initiatives, contributing to peace and security in the Asia-Pacific region. Moreover, the new Assistant Secretariat that I would lead will help the Department be more effective in ensuring the proper alignment of strategy and resources as we seek to modernize our alliances while mitigating risk should we face additional resource constraints and improve our security cooperation activities.

STABILITY OPERATIONS

Question. DOD Strategic Guidance established in January 2012 states that, while U.S. forces will capture the lessons learned from operations in Iraq and Afghanistan, they "will no longer be sized to conduct large-scale, prolonged stability operations."

In your view, what are some of the key lessons learned from the stability operations conducted in Iraq and Afghanistan?

Answer. There are many lessons learned from our recent combat experiences, and the Services and the Joint Staff have worked hard to ensure that no lessons so painfully learned are lost. In 2011, the Chairman of the Joint Chiefs of Staff directed an extensive study to identify these enduring lessons. The resulting report identified eleven strategic themes that remain relevant for the Department's current oper-

ations and future planning. The most notable of these themes for me include understanding the environment, providing a public narrative, integrating special operations forces and general purpose forces, increasing interagency coordination, and the importance of host-nation partnering.

Our efforts abroad over the past decade also highlight the importance of collaborative interagency and coordinated multinational efforts. Training foreign security forces and ministries is a whole-of-government approach, and it takes a robust interagency effort to maintain those capacities and institutions that can educate, equip, and enable them for future missions.

Question. What do you believe is the proper role for the DOD in the planning and conduct of stability operations in future contingencies?

Answer. DOD will be an essential part of the planning and conduct of stability operations in future contingencies. However, I believe DOD's stability operations efforts must be in support of a comprehensive interagency and international response. We must ensure that all departments and agencies are operating under a common national strategic framework in support of achieving sustainable outcomes overseas and building long-lasting relationships with our international partners. In most cases, the U.S. military's presence, force protection capabilities, and extensive logistical network can provide the backbone for successful stability operations. If confirmed, I would continue efforts to ensure that interagency collaboration is as effective as possible for future operations.

NUCLEAR POSTURE REVIEW

Question. If confirmed, what role will you play in overseeing and implementing the policies, strategies, and priorities established in the Nuclear Posture Review (NPR)?

Answer. The NPR established the key objectives that guide the Department's work on nuclear policy. If confirmed, I would be specifically engaged in almost all of the NPR's objectives in various roles and venues and would ensure that they remain a top priority for the Department of Defense.

NUCLEAR WEAPONS MANAGEMENT

Question. Since the Air Force unknowingly flew nuclear weapons on a B-52 bomber from Minot Air Force Base in North Dakota to Barksdale Air Force Base in Louisiana on August 30, 2007, the Air Force has taken a number of significant steps to increase its attention, discipline, and expertise on nuclear weapons management.

If confirmed, what role, if any, will you play in ensuring that nuclear weapons are safe, secure and accounted for, and that the Military Services have established a high level of attention, discipline, and conduct of operations with respect to nuclear weapons?

Answer. Secretary Hagel established the Nuclear Deterrent Enterprise Review Group (NDERG) to reinforce and ensure senior leader accountability and bring together all the elements of the nuclear force into a coherent enterprise. This group, which consists of the leaders responsible for training, funding, fielding, and implementing the nuclear mission, will review the actions we are taking and the progress we are making in improving the health of our nuclear forces. If confirmed, I would support the office of the USD(P) as it fulfills oversight responsibilities as a member of the NDERG.

Question. The various reviews of the Air Force incident also exposed significant gaps in the Office of the Secretary of Defense with respect to the attention and expertise to deal with nuclear weapons issues.

If confirmed, what steps will you take to ensure that there is sufficient attention to management of nuclear weapon matters in the Office of the Secretary of Defense?

Answer. Secretary Hagel said that the nuclear deterrent is "DOD's top priority. No other capability we have is more important." If confirmed, ensuring our nuclear forces are safe, secure, and effective and that they are planned, postured, operated, and modernized in accordance with policy guidance would be my top priority.

Question. If confirmed, what steps will you take to ensure that there is sufficient technical expertise in the Office of the Secretary of Defense with respect to nuclear weapons?

Answer. Nuclear technical expertise within OSD resides in multiple organizations. Many of OSD's staff positions include experts from the various Department of Energy laboratories, federally funded research and development centers, think tanks, and agencies in order to ensure expert analysis supports the OSD decisionmaking process. Within OSD Policy, technical expertise for nuclear deterrence resides in the Office of the Deputy Assistant Secretary for Nuclear and Missile Defense Policy (NMD). NMD contains an analytical cell, which has been specifically tasked by

USD(P) to provide the Secretary of Defense independent technical analyses on a range of nuclear issues. If confirmed, I would do everything I can to ensure that we retain this unique capability and continue to advocate for technical expertise across the Department.

NUCLEAR WEAPONS COUNCIL

Question. The Nuclear Weapons Council is intended to be the joint Department of Defense-Department of Energy management organization for nuclear weapons matters.

If confirmed, what responsibilities and interaction do you expect to have relative to the Nuclear Weapons Council?

Answer. The USD(P) is a voting member of the NWC. If confirmed, I would support Policy leadership, or represent Policy, on the NWC and in its subordinate bodies. If confirmed, I would ensure Policy continues to play an active role on the NWC as we steer the nuclear weapons and infrastructure modernization programs to completion.

STRATEGIC NUCLEAR PROGRAMS

Question. The NPR established, among other things, nuclear force structure parameters prior to negotiation of the New START treaty.

If confirmed, what roles and responsibilities do you expect to have relative to policy development concerning future nuclear force structure and planning?

Answer. In support of the USD(P) and the Secretary of Defense, if confirmed, I would manage OSD Policy's role in all nuclear force structure decisions and in nuclear planning, in accordance with the President's June 2013 Nuclear Employment Strategy.

NEW START TREATY IMPLEMENTATION

Question. The New START treaty entered into force in February 2011, and establishes limits on the deployed and nondeployed strategic nuclear forces of Russia and the United States. The treaty allows the parties up to 7 years to comply with the numerical limits of the treaty.

If confirmed, what role do you expect to play in overseeing implementation of the New START treaty?

Answer. If confirmed, I would lead in development and coordination of DOD policies required to implement fully U.S. obligations under the New START treaty. This includes supporting DOD components as they plan, program, budget, and allocate resources necessary for New START treaty implementation and compliance. Additionally, if confirmed, I would fully support the interagency process of assessing the Russian Federation's compliance with its obligations under the treaty and addressing any compliance or implementation issues.

MODERNIZATION OF THE NUCLEAR WEAPONS ENTERPRISE

Question. A principal issue in the debate of the New START treaty was ensuring that as we draw down the number of deployed nuclear warheads that we modernize our nuclear warhead production capability as well as their command and control systems and delivery platforms.

If confirmed what role do you expect to play in modernizing these three areas?

Answer. If confirmed, I would ensure that our efforts to modernize U.S. nuclear forces, and their supporting infrastructure and command and control, meet our policy and strategy requirements. We must ensure our current nuclear forces remain safe, secure, and effective so that our deterrent remains credible and our force remains combat-capable. I will support efforts to do these things in a cost-effective manner.

Question. Do you support the President's commitment to modernize or replace the triad of strategic nuclear delivery systems: a heavy bomber and air launched cruise missile, an ICBM, and a nuclear-powered ballistic missile submarine (SSBN) and SLBM

Answer. Yes. I agree that retaining all three legs of the triad will best maintain strategic stability at reasonable cost, while hedging against potential technical problems or vulnerabilities. Each leg of the Triad has advantages and characteristics that must be maintained, and each leg must be modernized as appropriate.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. I agree that maintaining a safe, secure, and effective nuclear deterrent is a critical national security priority. The DOD works closely with the Department of Energy and the administration to prioritize and align modernization efforts with funding realities, and, if confirmed, I would continue that cooperation.

Question. Prior to completing this modernization effort do you believe it would be prudent to consider reductions below New START treaty limits for either the deployed or nondeployed stockpile of nuclear weapons?

Answer. Whether further reductions below New START limits would be prudent to consider is dependent on a number of contextual factors: whether such reductions are negotiated with Russia, the exact nature and extent of the reductions proposed, and the impact of such reductions on our ability to implement the President's deterrence and employment strategies. I can envision prudent reductions that are negotiated, that are properly structured, and that enable us still to meet the President's policy, strategy, and planning guidance.

I support the President's goal to reduce global nuclear dangers and to take practical steps toward the long-term goal of a world without nuclear weapons. These goals were articulated in the 2010 NPR, which concluded that the United States will retain the smallest possible nuclear stockpile consistent with its need to deter adversaries, reassure allies, and hedge against technical or geopolitical surprise so long as nuclear weapons exist.

I believe that we should make necessary investments in infrastructure modernization regardless of potential future nuclear weapon reductions. If confirmed, I would ensure that the stockpiles of deployed and non-deployed nuclear warheads sustain the credibility of the U.S. deterrent, including our commitments to extend deterrence to our allies.

Question. Without the construction of the Chemical and Metallurgy Research Replacement (CMRR) Facility at Los Alamos and the Uranium Production Facility (UPF) at Y-12 and the other elements associated with the robust plan for modernizing the nuclear weapons complex, do you believe reductions to the strategic hedge would be prudent?

Answer. With regard to CMRR and UPF, I understand that the approach to replacing those facilities has been reviewed and that a more cost-effective way forward has been identified. If confirmed, I would support efforts to modernize our nuclear weapons infrastructure in a cost-effective manner. With regard to the strategic hedge, if confirmed, I would ensure any proposed changes remain aligned with the vision and objectives as articulated in the NPR and the President's policy and employment guidance.

Question. The Congressional Budget Officer has estimated the 10 year cost of modernizing the nuclear enterprise at approximately \$355 billion, while approximately 5–6 percent of the annual DOD budget, this is still an incredible amount of money, with the following 10 years expected to rise further as the construction programs for the *Ohio* replacement submarine get underway. Do you believe we should be spending this sum of money and will you work to find cost savings in these programs?

Answer. As the recent Nuclear Enterprise Reviews made clear, modernizing our nuclear forces is critically important to our Nation's security and, if confirmed, I would continue to support funding sufficient to meet this critical national security requirement. The DOD works closely with the Department of Energy and the administration to prioritize and align modernization efforts with funding realities, and I would continue that cooperation as we work toward cost-effective nuclear modernization.

NUCLEAR POLICY

Question. Do you support the President's vision for a world without nuclear weapons?

Answer. Yes, I believe we should continue to seek the peace and security of a world without nuclear weapons, and take practical steps toward that long-term objective. As long as nuclear weapons exist, the United States will maintain a safe, secure, and effective arsenal to deter adversaries and guarantee that defense to U.S. allies.

Question. Do you support the June 2013 nuclear Employment Strategy?

Answer. Yes, I support the June 2013 Nuclear Employment Strategy.

Question. Do you believe the United States should pursue further nuclear weapons reductions? Please explain why or why not.

Answer. Yes, I believe we should pursue further negotiated, verifiable reductions in the nuclear forces of the United States and Russia that would enhance U.S. national security. Further reductions could achieve this in a number of ways. They

could promote our non-proliferation objectives by demonstrating our commitment to meeting our NPT commitments. Such reductions also could enable us to maintain strategic stability at lower force levels. Reducing Russian nuclear forces reduces the number of nuclear weapons that can be targeted on the United States. Unfortunately, Russia has shown no interest in pursuing further negotiated reductions, and such reductions require a willing partner and a conducive strategic environment.

Question. Do you believe it would be prudent for the United States to pursue unilateral nuclear reductions? Please explain why or why not.

Answer. As part of the nuclear weapons employment guidance announced in June 2013, the President concluded that we can ensure the security of the United States and our allies and partners while safely pursuing up to a one-third reduction in deployed nuclear weapons from the level established in the New START treaty. The President also announced the U.S. intent to seek negotiated cuts with Russia. Negotiated cuts, and their attendant verification provisions, provide transparency and predictability, and they reduce the number of weapons that can be employed against the United States. For these reasons, and in light of the current strategic environment, I believe negotiated reductions are more prudent than unilateral reductions at this time.

Question. Do you believe changes to well-established nuclear targeting requirements could negatively impact our ability to: (1) assure our allies; (2) discourage other countries from seeking strategic equivalence with the United States in nuclear weapons; and (3) hedge against future threats and uncertainties?

Answer. No, I do not. Our nuclear targeting requirements are highly classified. As we do not share them with our allies, these requirements have no effect on the extent to which our allies are assured. Similarly, as other countries do not know what our targeting requirements are, they cannot be encouraged to seek strategic equivalence because of them. Finally, nuclear targeting requirements alone do not directly affect our ability to hedge against future threats and uncertainties. Our technical and geopolitical hedge strategy does affect our ability to hedge.

BALLISTIC MISSILE DEFENSE REVIEW

Question. In February 2010, the Defense Department issued its report on the first-ever comprehensive review of U.S. ballistic missile defense policy and strategy, the Ballistic Missile Defense Review (BMDR), as required by Congress.

Do you support the policies, strategies, and priorities set forth in the BMDR?

Answer. Yes. The 2010 BMDR provided the broad policy framework shaping the administration's missile defense activities. If confirmed, I would continue U.S. efforts to implement the policies, strategies, and priorities in the BMDR.

Question. If confirmed, what role do you expect to have in implementing these policies, strategies, and priorities?

Answer. If confirmed, I would be the lead assistant secretary in OSD Policy for missile defense, so I would therefore have a direct role in implementing these policies, strategies, and priorities as they pertain to both homeland defense and regional defense.

"FLY-BEFORE-YOU-BUY" APPROACH TO MISSILE DEFENSE

Question. The BMDR stated that the Department of Defense would follow a "fly-before-you-buy" approach to new missile defense capabilities, by testing them adequately before deploying them.

Do you agree with the Defense Department's "fly-before-you-buy" policy for missile defense that "before new capabilities are deployed they must undergo testing that enables an assessment under realistic operational conditions against threat-representative targets" to demonstrate that they will be effective and reliable?

Answer. Yes. We have an obligation to field capabilities that work against the threats they are designed to counter. Realistic testing before full-scale acquisition is essential to fielding systems the United States can rely on.

REGIONAL BALLISTIC MISSILE THREATS AND RESPONSE

Question. Iran and North Korea each has hundreds of short- and medium-range ballistic missiles today that are capable of reaching forward-deployed U.S. forces, allies, and other friendly nations in the EUCOM, U.S. Central Command, and U.S. Pacific Command AORs. The Ballistic Missile Defense Review Report of February 2010 stated that the United States intends to pursue regionally tailored phased adaptive approaches to ballistic missile defense against such missile threats in various regions.

Do you believe that such regionally tailored phased adaptive approaches will provide our regional combatant commanders with the missile defense capabilities needed to defend our forward deployed forces and our allies and partners in the region?

Answer. I understand our current policy is to develop regional approaches to ballistic missile defense in Europe, the Middle East, and the Asia-Pacific region that are tailored to the deterrence and defense requirements of each region. Because these regions vary considerably in the character of the ballistic missile threat, geography, and the defense relationships on which we are able to build cooperative missile defenses, I believe such approaches provide us the best option for managing our own high-demand, low-density ballistic missile defense forces and for developing ally and partner ballistic missile defense capacity in support of combatant commander requirements.

Question. What role do you see for the Aegis Ballistic Missile Defense system with Standard Missile-3 interceptors in U.S. missile defense capabilities in these AORs?

Answer. Ballistic missile defense-capable Aegis ships are an excellent example of the type of mobility we have built into our current inventory of ballistic missile defense capabilities to help us address the growing demand for regional missile defense systems. These multi-mission ships offer not only the ability to provide surveillance and tracking of ballistic missiles, but also a ballistic missile defense capability in the form of the growing Standard Missile-3 family of interceptors. Additionally, the land-based version of the Aegis system we are fielding in Romania and Poland will add substantially to the NATO ballistic missile defense architecture.

Question. In addition to U.S. missile defense capabilities in these AORs, what role do you see for other nations to contribute to regional missile defense capabilities?

Answer. I understand building international cooperation and seeking appropriate levels of burden sharing are key tenets of our regional ballistic missile defense policy. I also understand that over time we have developed substantive ballistic missile defense relationships with our allies and partners in Europe, the Middle East, and the Asia Pacific, which have led to significant advances in fielding our own capabilities as well as those of our allies and partners. I view continuing these partnerships as critical to developing effective security architectures that deter, and if necessary, defend against the threat of ballistic missile attack. Accordingly, if confirmed, I would promote strong bilateral and multilateral ballistic missile defense cooperation in these regions.

COMPREHENSIVE TEST BAN TREATY

Question. If confirmed, what role will you play in any efforts to obtain Senate ratification of the Comprehensive Test Ban Treaty (CTBT)?

Answer. Although my position would not have direct responsibility for nuclear nonproliferation treaties such as the CTBT, I would support the administration's efforts to obtain Senate advice and consent to accession to the CTBT.

BUILDING PARTNERSHIP CAPACITY ACTIVITIES

Question. What is the proper role for DOD in building the security capacity of foreign partners? What, if any, overlap is there with State Department? What steps, if any, should DOD take to reduce or eliminate overlap between DOD and State Department capacity building programs?

Answer. DOD plays a key role in building the tactical and operational capacity of foreign military forces within the broader foreign policy lanes established by the State Department. DOD also builds capacity at the ministerial and institutional levels through its defense institution-building programs. DOD contributes irreplaceable value to this range of capacity-building work by drawing upon the unique subject matter expertise and experience of defense civilians and active duty and Reserve component personnel.

The Department's work at these levels—from the tactical to institutional—should be closely coordinated with the State Department and the U.S. Agency for International Development to ensure that the United States pursues a balanced approach to broader security sector reform efforts and that partners are able to sustain any training and equipment provided. Additionally, implementation of Presidential Policy Directive 23, which calls for whole-of-government security sector planning, should help reduce any overlap between DOD and State Department capacity-building programs.

Question. With regard to security cooperation, what is the appropriate role for the Assistant Secretary of Defense for Strategy, Plans, and Capabilities and what should be the ASD's responsibilities on security cooperation relative to the combatant commands, the military departments, and others DOD organizations?

Answer. The ASD/SPC should provide policy guidance to ensure the alignment of security cooperation activities and resources with the defense strategy. Once the Geographic Combatant Commands (GCCs) develop plans to implement this guidance, the ASD/SPC should review them to ensure they are aligned with the strategy. The military departments and Services and other capability providers then allocate adequate resources to accomplish the security cooperation efforts identified in the GCCs' plans. To the extent that there may be shortfalls in DOD resources to execute plans, the ASD/SPC may develop recommendations for adjustments in investment portfolios. Finally, the Joint Staff serves a critical monitoring and communications role, providing assessments of security cooperation requirements and military advice on the effectiveness of DOD activities to the ASD/SPC to inform future policy guidance.

Question. Over the past decade, Congress has provided DOD with a number of authorities to build the capacity of partner nations.

How would you rate the effectiveness of these investments and what will you do, if confirmed, to ensure that these resources provide a return on investment in the future?

Answer. The authorities provided to DOD over the last decade have been critical, especially for support of coalition partners. If confirmed, I would seek to ensure that projects relying on DOD authorities have clear and measurable planned outcomes. I also would seek to ensure that authorities evolve to keep pace with the dynamic environment in which DOD operates, which is characterized by both rapidly changing threats and fluctuations in partner nation roles and capabilities.

Further, if confirmed, I would seek to enhance the Department's "capability package planning"—planning that organizes and synchronizes "train-and-equip" efforts with related security cooperation activities to account for partners' institutional, sustainment, training, and infrastructure needs. Such efforts will better position partners to sustain and properly employ any operational and tactical assistance provided.

Question. The latest QDR emphasizes security cooperation as a means to mitigate risk resulting from DOD's declining budget.

In your view, has the Department increased funds for security cooperation, accordingly? Is security cooperation adequately resourced?

Answer. The fiscal year 2015 budget submission sought to protect resources most closely aligned to the three pillars of the defense strategy outlined in the 2014 QDR, including building security globally. In order to maximize the impact of our presence globally and ensure that security cooperation resources and activities are aligned with the defense strategy, the Department recently created a new Deputy Assistant Secretary of Defense for Security Cooperation (SC). The office will develop institutionalized policies and methodologies for prioritizing and evaluating security cooperation activities and resources, mature defense institution-building capabilities and strengthen their linkages to the Department's operational training and equipping efforts, and use security cooperation tools to drive strategic initiatives.

Question. How effective has security cooperation been as a means of mitigating the risks associated with declining DOD budgets, and what challenges, if any, do you see with such an approach?

Answer. The need to strengthen and deepen partnerships is a theme that runs throughout the 2014 QDR to address the dynamic security environment, as no country alone can address the globalized challenges we collectively face. With reduced force structure and resources, the Department must make greater efforts to coordinate its planning to optimize allies' and partners' contributions to their own security and to combined activities. I believe there is an opportunity to pursue greater deliberate security cooperation planning with key allies and partners and, if confirmed, I would seek to increase such efforts.

There are some who may be concerned that, when needed, partners may not be willing to contribute capabilities to help address shared security concerns. Certainly, we should continue to maintain forces sufficient to address most of the threat to our interests on our own, should we so choose. However, we have witnessed the benefits of partners' and allies' cooperation in coalition operations, clearly demonstrating their willingness to take action, and their cooperation invariably helps in conducting these operations and in most cases reduced the need for some U.S. forces.

Question. What is your assessment of the sufficiency of existing security assistance authorities to address the evolving nature of global security threats? Given the evolving threat environment facing the United States, what new security cooperation missions, if any, might DOD need to take on in the next decade, and what tools and authorities might be required to accomplish those missions?

Answer. Over the past decade, Congress has recognized the need for title 10 authorities to enable military commanders to support allies and partners in addressing

security threats, largely related to counterterrorism and instability. The Department is grateful for these authorities that provide commanders greater flexibility than traditional title 22 security assistance authorities to address the capability and capacity shortfalls that they identify among allies and partners to ensure that these partners are able to operate alongside or in lieu of U.S. forces. As we face new budget realities, building partners capable of supporting or replacing Title 10 missions will take on increasing importance.

Just as the U.S. Armed Forces are resetting for full-spectrum operations after more than a decade of counterinsurgency and counterterrorism (CT) operations, the Department's security cooperation efforts also must be reset to address the full spectrum of security challenges. Over the last decade we have emphasized building partners' capabilities to combat internal or transnational CT threats. Now, our security environment demands that we also consider other functional areas where commanders see a need to enable partners to operate with or in lieu of U.S. forces, but that have been under-resourced due, in part, to a lack of dedicated tools and authorities. Such areas may include logistics, maritime security and domain awareness, cyber, and defense technology protection/security, among others. If confirmed, I would work with Congress to see how we might modify, rationalize, or add to the existing authorities in light of these changes in the security environment.

Question. Given the numerous existing DOD security assistance authorities, what is DOD doing to ensure DOD programs are synchronized and applied in a manner consistent with strategic requirements? If confirmed, what changes, if any, would you recommend?

Answer. The Department has begun an effort to improve the security cooperation governance structure, which began with the establishment of Policy's new office of the Deputy Assistant Secretary of Defense for Security Cooperation. This office is undertaking an ambitious series of initiatives to put in place oversight and accountability mechanisms to ensure our security cooperation activities and resources are aligned to the defense strategy, including the building of an assessment, monitoring, and evaluation mechanism across the Department's security cooperation programs to be much more effective in gauging the return on investment of our building partner capacity programs. If confirmed, I would ensure the office's efforts receive sufficient support and attention from the ASD and other Department leaders to succeed.

Question. Some of DOD's work to build our partners' capacity is at the tactical and operational levels.

What tools do we have in place to ensure that foreign partners possess the institutional capacity to sustain these efforts and operate effectively both to meet their own defense needs and in a coalition environment?

Answer. The Department must ensure that adequate partner nation institutional capacity exists to sustain and properly employ the operational and tactical assistance we might provide. To that end, the Department has developed a suite of defense institution-building (DIB) programs to ensure partner nations have the capacity to craft thoughtful defense policies and strategies, create sustainable budgets to resource those strategies, provide human resources, and procure equipment and provide logistics support. DIB programs are principally implemented through the Defense Institution Reform Initiative (DIRI), the Ministry of Defense Advisors (MoDA) Program, and the Defense Institute of International Legal Studies (DILS).

DIB programs are a critical and growing element of a balanced and comprehensive approach to security cooperation. To that end, the Department is developing initiatives to integrate more effectively security cooperation planning, linking the development of tactical and operational capabilities with the governance, direction, and oversight mechanisms needed to support those capabilities.

Question. How does the Department ensure that partners' militaries operate effectively, accountably, and in accordance with international human rights standards?

Answer. The Department believes that the ethical and accountable behavior of our partner nation security forces is critical to our long-term success. When we engage with partner nation militaries, at all levels, DOD emphasizes that respect for human rights and the rule of law is a vital component to a successful military. To assist partner nation militaries who wish to promote human rights and accountability, DOD has a number of programs that provide training on compliance with the law of armed conflict and human rights, developing military justice systems, and strengthening civilian control of the military.

The Department also is committed to compliance with what is commonly referred to as the Leahy law and is working closely with the Department of State to strengthen our implementation of the law to help ensure accountability for those who commit gross violations of human rights.

Question. The Global Security Contingency Fund (GSCF) is a joint DOD/State program designed to leverage the strengths of both Departments to conduct a wide array of security cooperation missions.

Why has it, to date, mostly been used for counterterrorism missions when Congress authorized a much wider mission set?

Answer. The GSCF projects selected to date represent priorities selected by the Departments of State and Defense to provide training and equipment to partner nations that are consistent with U.S. foreign policy and national security interests. It is a State Department-led authority meant to enable partners to address contingencies, and project proposals to enhance the special operations and CT capabilities of partner nations have historically competed well in the current security environment. More recently, in light of developments in Ukraine, the Departments of State and Defense have submitted a congressional notification for a capacity-building project there. Clearly, it has taken time to work out a governance mechanism to allow the GSCF—which represents a new model of interagency cooperation—to function as an agile and responsive policy tool; if confirmed, I would work with ASD(SO/LIC), who oversees the authority for the Department, to ensure that it continues to mature into a tool that truly enables partners to respond to urgent and emerging contingencies that affect U.S. national security objectives.

Question. The Global Train and Equip Program (or section 1206) has been a DOD tool for a number of years with an annual budget of \$350 million.

How would you assess the effectiveness of that program? As the assistant secretary responsible for security cooperation, do you envision any changes to that program?

Answer. Overall, the section 1206 “train-and-equip” program, overseen by the ASD(SO/LIC), has been effective in achieving the limited set of objectives for which it was designed: namely, providing tools to partner nations to bolster their near-term capabilities to address counterterrorism and stabilization priorities. It has achieved positive results in this area.

The effectiveness of the section 1206 authority is best exemplified by the individual program assessments conducted by country teams, combatant command staffs, and our own contracted personnel who provide a more detailed analysis of six to eight countries annually. In those reports, the section 1206 authority shows a positive return on investment in nearly every country in which the United States has invested. For the countries where the return is not as great, the assessments help to identify where course corrections may be needed.

That said, it is important to underscore that section 1206 was created with the intent of addressing near-term counterterrorism and stabilization priorities, rather than to build long-term partner capabilities. In order to maximize the return and longevity of our investments, the Department must continue to examine how to use section 1206 in conjunction with other authorities to ensure that section 1206 programs transition into sustainable capabilities. If confirmed, I would seek to enhance the Department’s “capability package planning”—planning that organizes and synchronizes train-and-equip efforts with related security cooperation activities to account for partners’ institutional, sustainment, training, and infrastructure needs. Such efforts will better position partners to sustain and properly employ the operational and tactical assistance provided.

DEPUTY ASSISTANT SECRETARY OF DEFENSE FOR SECURITY COOPERATION

Question. The Department recently created Deputy Assistant Secretary of Defense (DASD) for Security Cooperation.

What is your understanding of this position?

Answer. The Office of the DASD for Security Cooperation (ODASD(SC)) was established to prioritize Departmental focus on aligning security cooperation resources and activities with the defense strategy. Security cooperation activities of the Department, which include Security Force Assistance (SFA), Building Partner Capacity (BPC), and Defense Institution Building (DIB), among other activities, play an important role in maintaining U.S. defense relationships and overseas presence, and building the capabilities of partner nations to act in coalition with or in lieu of U.S. military forces to address U.S. national security objectives. This latter role takes on increasing importance as defense budgets decline. ODASD(SC) will ensure that these valuable tools are employed to maximize strategic outcomes, continually prioritize and assess investments, and build enduring, reciprocal global partnerships.

Question. What is the relationship between the DASD for Security Cooperation and the Director of the Defense Security Cooperation Agency?

Answer. The DASD for Security Cooperation provides policy guidance on how to align security cooperation policies, authorities, resources, and activities in service to defense strategic objectives. The Defense Security Cooperation Agency administers security cooperation programs, provides procedural guidance to the broader security cooperation community on program implementation, and provides policy guidance on policies shaping the execution of security cooperation programs. As a result, the DASD SC focuses generally on the overarching architecture of DOD policies, processes, plans, and budgets that shape SC programming as a means to achieve defense strategic ends, while DSCA's role is largely focused on executing current policies and processes to deliver security assistance and security cooperation programs to customers most effectively. The two offices will have to work in close collaboration to achieve security cooperation outcomes consistent with policy objectives.

Question. Does the DASD for Security Cooperation have management control of the Department's security cooperation programs? If so, what programs specifically? What major programs building capacity programs are not included in this portfolio?

Answer. The DASD(SC) maintains direct oversight of a select number of security cooperation programs, primarily focusing on defense institution building (DIB). These programs include the MoDA program, the DIRI, the DIILS, and Regional Centers for Security Studies.

The DASD(SC) also provides policy oversight over a series of programs administered by other, primarily military, components. Examples include, but are not limited to, the National Guard State Partnership Program and the Developing Countries Combined Exchange Program.

As many of the Department's capacity-building programs address niche areas, such as counternarcotics and counterterrorism, the Department continues to rely on the expertise resident in the relevant functional offices to manage these programs. The DASD(SC) shapes the security cooperation governance architecture under which these programs function, however. Additionally, the DASD(SC) works closely with the State Department to support policy oversight of the Department's implementation of title 22 authorities.

Question. In your view, what role should the DASD for Security Cooperation play with respect to security cooperation programs not directly under the DASD's management control?

Answer. In general, ODASD(SC) is tasked with shaping a governance architecture to validate, prioritize, integrate, and assess security cooperation programs across the Department. Whether or not security cooperation programs are directly under the office's management control, it is critical that they be aligned with defense strategy, that they be linked together in ways that are mutually reinforcing, that they be evaluated to determine what is working and what is not, and that they obtain the greatest possible return on our investment. Shaping and overseeing processes to achieve these results is, in my view, the essential role of the ODASD(SC).

SPECIAL OPERATIONS FORCES

Question. The previous two QDRs have mandated significant growth in our Special Operations Forces and enablers that directly support their operations.

Do you believe QDR-directed growth in the size of Special Operations Forces can and should be maintained in light of current fiscal challenges?

Answer. Yes. Given the threats we face, the unique military capabilities provided by our Special Operations Forces (SOF) will continue to be in high demand for the foreseeable future. We will continue to maintain our investment in SOF to preserve this strong capability to combat terrorism and confront other unconventional threats through direct action, indirect action, and building partner capacity. If confirmed, I would work with the ASD(SO/LIC), for SOF, the Service Chiefs, and the Commander, SOCOM, to ensure the SOF community is appropriately sized to meet the full range of SOF missions.

Question. Special Operations Forces heavily rely on enabling capabilities provided by the general purpose forces to be successful in their missions. In light of current fiscal challenges, do you believe sufficient enabling capabilities can be maintained within the general purpose forces and that such capabilities will remain available to special operations forces when needed?

Answer. Yes. In an environment of constraining resources and the drawdown of our forces in Afghanistan, the Department is reshaping and resizing our overall force structure aligned to our national security priorities. The Department will ensure that Special Operations Forces remain sufficiently supported by the general purpose forces, which currently provide SOF with intelligence, communications, logistics, and medical support. If confirmed, I would work closely with the ASD(SO/LIC), the Service Chiefs, the Joint Staff, and the Commander, U.S. Special Oper-

ations Command (SOCOM) to ensure the Department achieves the appropriate balance across the entire force.

Question. Do you believe Special Operations Forces should develop additional organic enabling capabilities in addition or in place of those currently provided by the general purpose forces?

Answer. Our Special Operations Forces receive excellent support from the Services. Any organic enablers assigned to SOCOM should be purposely designed for SOF-specific requirements, while the Services continue to provide SOF's enabler requirements. I believe this arrangement is most efficient in this fiscal environment by allowing SOCOM to use their funding for SOF-specific capabilities and avoid duplication with the Services.

COUNTERTERRORISM PARTNERSHIP FUND

Question. If confirmed, what role, if any, will you have in the development and implementation of the Counterterrorism Partnership Fund?

Answer. The ASD/SPC would work through the DASD(SC) to issue policy guidance and develop governance processes to ensure security cooperation resources and activities are aligned to the defense strategy. Additionally, the ASD/SPC, working through the DASD(SFD), is responsible for developing the defense strategy on behalf of the Secretary of Defense and recommending adjustments to the defense program in support of the strategy. Therefore, if confirmed, I expect that my role in implementation of the Counterterrorism Partnership Fund would be twofold. First, the office of the ASD/SPC would provide support to ASD(SO/LIC) in developing coherent, integrated, feasible implementation plans with detailed objectives, and would support institutional capacity-building aspects of these plans through defense institution-building programs managed by DASD(SC). Second, the office of the ASD/SPC would support ASD(SO/LIC) in teeing up decisions related to investments in enabling capabilities and resources for the joint force.

EUROPEAN REASSURANCE INITIATIVE

Question. If confirmed, what role, if any, will you have in the development and implementation of the European Reassurance Initiative?

Answer. If confirmed, I expect to work closely with the Assistant Secretary of Defense for International Security Affairs to institutionalize many of the European Reassurance Initiative's (ERI) program elements. I would reference changes to the European security environment in future strategy and global force management documents, assist in programming funds in future years' base budgets, assist in the allocation of forces to participate in exercises, training, and operations, and help secure the international agreements necessary to implement the ERI fully.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Global Strategic Affairs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[The nomination reference of Mr. Robert M. Scher follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
September 15, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Robert M. Scher, of the District of Columbia, to be an Assistant Secretary of Defense, vice Madelyn R. Creedon, resigned.

[The biographical sketch of Mr. Robert M. Scher, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ROBERT M. SCHER

Education:

Columbia University School of International and Public Affairs

- August 1989–June 1991
- Master of International Affairs

Swarthmore College

- August 1985–June 1989
- Bachelor of Arts

Employment Record:

Office of the Secretary of Defense, Plans—Washington, DC

- Deputy Assistant Secretary of Defense
- April 2012–Present

Office of the Secretary of Defense, South and Southeast Asia—Washington, DC

- Deputy Assistant Secretary of Defense
- April 2009–April 2012

Booz Allen Hamilton—McLean VA

- Associate
- April 2006–April 2009

Office of the Secretary of Defense, Asia and Pacific Affairs—Washington, DC

- Chief of Staff to Deputy Under Secretary of Defense
- February 2005–April 2006

U.S. Department of State, Policy Planning Staff—Washington, DC

- Member
- February 2003–February 2005

Office of the Secretary of Defense, Asia and Pacific Affairs—Washington, DC

- Director for Maritime Southeast Asia
- February 1999–February 2003

Office of the Secretary of Defense, Strategy—Washington, DC

- Senior Assistant for Strategy Development
- July 1993–February 1999

Office of the Secretary of Defense, Presidential Management Intern—Washington, DC

- Various positions
- August 1991–July 1993

Honors and awards:

Exceptional Civilian Service Award—Department of Defense, 2001

Exceptional Civilian Service Award—Department of Defense, 2006

Outstanding Public Service Award—Department of Defense, 2001

DuPont International Scholarship—Columbia University 1990–1991

Bachelor of Arts Conferred with High Honors—Swarthmore College, 1989

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details

the biographical, financial, and other information of the nominee. The form executed by Mr. Robert M. Scher in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Robert Mark Scher.

2. **Position to which nominated:**

Assistant Secretary of Defense for Strategy, Plans, and Capabilities.

3. **Date of nomination:**

September 15, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

March 14, 1967; Baltimore, MD.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Danielle T. Ewen.

7. **Names and ages of children:**

Maxwell Lawrence Ewen Scher, 14.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

High School, 1985: Friends School of Baltimore; 1981-1985

Bachelor of Arts, 1989: Swarthmore College; 1985-1989

Masters, International Affairs, 1991: Columbia University; 1989-1991

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

2012-Present: Deputy Assistant Secretary of Defense for Plans, U.S. Department of Defense, 2000 Defense Pentagon, Washington, DC.

2009-2012: Deputy Assistant Secretary of Defense for South and Southeast Asia, U.S. Department of Defense, 2700 Defense Pentagon, Washington, DC.

2006-2009: Associate, Booz Allen Hamilton, 8283 Greensboro Drive, McLean, VA., (New Address: 3811 N Fairfax Drive, Arlington, VA)

2005-2006: Chief of Staff, Deputy Under Secretary of Defense for Asian and Pacific Affairs, U.S. Department of Defense, 2700 Defense Pentagon, Washington, DC.

2003-2005: Member, Policy Planning Staff (on detail from DOD). U.S. Department of State, 2201 C St NW, Washington, DC.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Board Member, Capitol Hill Community Foundation

Member, U.S. Holocaust Museum

Member, Kennedy Center

Member, Cheverly Swim and Racquet Club.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

2014, Tommy Wells for Mayor, DC—\$100

2012, Obama for America—\$500

2012, Obama for America—\$375

2012, Obama Victory Fund—\$500

2012, Obama Victory Fund—\$500

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Exceptional Civilian Service Award: Department of Defense, 2001

Exceptional Civilian Service Award: Department of Defense, 2006

Outstanding Public Service Award: Department of Defense, 2001

DuPont International Scholarship—Columbia University, 1990–1991

Bachelor of Arts conferred with High Honors—Swarthmore College, 1989

Scholarship for Voice Study—Swarthmore College, 1986–1987.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Speech at the New America Foundation, India-U.S. Defense Relationship (<http://security.newamerica.net/events/2011/building-foundations>)

DOD Press conference on the India report to Congress (<http://www.defense.aov/transcripts/transcript.aspx?transcriptid=4917>)

Testimony on Indonesia/Papua (<http://democrats.foreianaffairs.house.gov/111/sch092210.pdf>)

Testimony on South China Sea (<http://www.gpo.gov/fdsys/pkg/CHRG-111shrg53Q22/html/CHRG-111shrg53022.htm>)

Testimony on the Palau Compact Agreement (http://www.energy.senate.gov/Public/index.cfm/files/serve?File_id=98e52ea9-e63e-4058-d76f-65616fc51375)

Testimony on the Asia Rebalance (http://armedservices.house.gov/index.cfm/files/serve?File_id=dd4f9af6-8217-4b8a-bffe-c31720f8b719)

Speech on Maritime Security at the Galle Dialogue, Sri Lanka <http://srilanka.usembassy.gov/mobile//sp-14nov11.html>

17. **Commitment regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ROBERT M. SCHER.

This 23rd day of October 2014.

[The nomination of Mr. Robert M. Scher was reported to the Senate by Chairman Levin on December 9, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on December 16, 2014.]

[Prepared questions submitted to Ms. Elissa Slotkin by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. No, I do not. The Goldwater-Nichols Act has led to significant improvements, including increased operational effectiveness, greater unity of effort across our Armed Forces, and civilian oversight—all of which have strengthened our force.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. None.

QUALIFICATIONS, PRIORITIES, AND CHALLENGES

Question. What background and experience do you have that you believe qualifies you for the position of Assistant Secretary of Defense for International Security Affairs (ASD(ISA))?

Answer. I believe that my experiences over the past 11 years in government—in the Intelligence Community, on the National Security Council Staff, at the Department of State and now at the Department of Defense (DOD)—provide me with the background to handle the responsibilities of the ASD(ISA). Working both in the field and here in Washington, I have worked on U.S. policy in the Middle East, Europe,

Africa, and most recently the Western Hemisphere—as well as been involved in a wide range of international crises that span the entirety of the ISA account. I have benefited from close civil-military cooperation to the achievement of U.S. objectives—something that is critically important in meeting new threats.

Question. In your view, what are the major challenges confronting the next ASD(ISA)?

Answer. The next ASD(ISA) will need to continue balancing competing demands across the five areas within the portfolio—Europe, Russia and Eurasia, Africa, the Middle East, and the Western Hemisphere—while providing exemplary support and thought leadership to the Secretary of Defense on emerging crises and longer-term strategy on defense and security issues. The next ASD(ISA) will also need to manage the International Security Affairs team and ensure it has the tools and resources to conduct the day-to-day affairs of the organization while working within real-world budget constraints.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the ASD(ISA)?

Answer. If confirmed, I would work to ensure that DOD pursues a strategic and balanced approach as outlined in the 2014 Quadrennial Defense Review (QDR). Top priorities would include strengthening America's alliances with key partners and allies; ensuring the success and effective transition of the NATO mission in Afghanistan; improving and informing our counter-ISIL campaign and the international coalition that supports it; preventing Iran from acquiring a nuclear weapon; combating terrorism; strengthening security and stability across the Middle East; maintaining a strong relationship with Israel; expanding cooperation with our NATO allies and European partners in the face of Russian aggressive behavior; working with the states of Africa to meet urgent security challenges and help foster stability; and providing DOD support to Colombia and the Central America strategy.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. If confirmed, I would address these challenges by refining the development and implementation of DOD and interagency strategies, policies, and plans on key issues relating to Europe, the Middle East, Africa, and the Western Hemisphere. I would continue to work closely with other components of DOD in support of the Secretary of Defense, as well as our interagency counterparts, U.S. allies and partners, and, where appropriate, the private sector and nongovernmental organizations. I would pay particular attention to shoring up the policies, partnerships, and posture needed to meet the complex and often unpredictable challenges of the current security environment to ensure that they are updated as needed to reflect new challenges and new opportunities. Under the direction of the Under Secretary of Defense for Policy, I would work to support the President and Secretary's guidance to shape a Joint Force for the future that will be smaller and leaner, but will be flexible, agile, ready, and technologically advanced.

ROLE WITHIN THE OFFICE OF THE UNDER SECRETARY FOR POLICY

Question. The Secretary of Defense has announced a plan to reorganize the Office of the Under Secretary of Defense for Policy. The reorganization has begun and is expected to be completed by 2015.

What is your understanding of the major changes planned for the organization that you have been nominated to lead, and what do you believe will be the primary benefits of the reorganization plan?

Answer. Under the reorganization of the Office of the Under Secretary of Defense, the major change for International Security Affairs has already taken place: the integration of Western Hemisphere Affairs into the International Security Affairs. That transition occurred earlier this year, and I worked closely with the Western Hemisphere Affairs team, the ASD(ISA), the Under Secretary of Defense, and Policy's Chief Operating Officer to ensure as smooth a transition as possible. I also stood up a Workforce Implementation Team—composed of action officers from both the Western Hemisphere office and from offices already in ISA—to identify issues the workforce was most concerned with and raise them to management for discussion.

Question. DOD Directive 5111.07 (11/7/2008) delineates the functions and duties of the ASD(ISA). Under this Directive, the ASD(ISA) is the principal advisor to the Under Secretary of Defense for Policy (USD(P)) and the Secretary of Defense on international security strategy and policy on issues of DOD interest that relate to the Nations and international organizations of Europe (including the North Atlantic Treaty Organization (NATO) and Russia), the Middle East, and Africa; their govern-

ments and defense establishments; and for oversight of security cooperation programs.

What is your understanding of the duties and functions of the ASD(ISA)?

Answer. The ASD(ISA) is responsible for providing advice and support on defense policy and strategy for the Middle East, Europe, Russia, Africa, and, since the spring of 2014, the Western Hemisphere to the Under Secretary of Defense for Policy and the Secretary of Defense.

Question. Notably absent from the Directive is the responsibility for the Western Hemisphere (which was add to the portfolio with the USD(P) reorganization), what is the role of the ASD(ISA) with respect to the Western Hemisphere?

Answer. The ASD(ISA) now provides advice and support on defense policy and strategy for the Western Hemisphere to the Under Secretary of Defense for Policy and the Secretary of Defense.

Question. Based on the aforementioned reorganization, what, if any, updates need to be made to DOD Directive 5111.07 (11/7/2008)?

Answer. The DOD Directive will be updated to reflect the reorganization within OSD Policy, including the transition of Western Hemisphere Affairs to International Security Affairs.

RELATIONSHIPS

Question. What do you see as the relationship between the ASD(ISA) and each of the following?

The Secretary of Defense.

Answer. The ASD(ISA) is responsible for advising the Secretary of Defense on defense and security policy and strategy related to Europe (including the North Atlantic Treaty Organization), Russia, the Middle East, Africa, and the Western Hemisphere. This advice is provided under the guidance of the Under Secretary of Defense for Policy.

Question. The Deputy Secretary of Defense.

Answer. Similar to the relationship with the Secretary of Defense, the ASD(ISA) is responsible for advising the Deputy Secretary of Defense on defense and security policy and strategy related to Europe (including the North Atlantic Treaty Organization), Russia, the Middle East, Africa, and the Western Hemisphere. This advice is provided under the guidance of the Under Secretary of Defense for Policy.

Question. The Under Secretaries of Defense for Policy.

Answer. The ASD(ISA) is the Under Secretary of Defense for Policy's principal advisor on defense and security policy and strategy related to Europe (including the North Atlantic Treaty Organization), Russia, the Middle East, Africa, and the Western Hemisphere.

Question. The Principal Deputy Under Secretary of Defense for Policy.

Answer. The ASD(ISA) is the Principal Deputy Under Secretary of Defense for Policy's principal advisor on defense and security policy and strategy related to Europe (including the North Atlantic Treaty Organization), Russia, the Middle East, Africa, and the Western Hemisphere.

Question. The other Under Secretaries of Defense.

Answer. The ASD(ISA) works with the other Under Secretaries of Defense to advance the Secretary's objectives and policy priorities, under the guidance and direction of the Under Secretary of Defense for Policy. This includes providing policy input to each Under Secretary that relates to Europe (including the North Atlantic Treaty Organization), Russia, the Middle East, Africa, and the Western Hemisphere.

Question. The Joint Staff.

Answer. The ASD(ISA) works very closely with the Joint Staff to advance the Secretary's objectives and policy priorities, under the guidance and direction of the Under Secretary of Defense for Policy. This includes providing policy input to the Joint Staff that relates to Europe (including the North Atlantic Treaty Organization), Russia, the Middle East, Africa, and the Western Hemisphere, as well as ensuring that military advice from the Joint Staff is sought out and considered in policy development as appropriate.

Question. The Secretaries of the Military Departments.

Answer. The ASD(ISA) works with the Secretaries of the Military Departments to advance the Secretary's objectives and policy priorities, under the guidance and direction of the Under Secretary of Defense for Policy. This includes providing policy input as appropriate to the Secretaries of the Military Departments that relates to Europe (including the North Atlantic Treaty Organization), Russia, the Middle East, Africa, and the Western Hemisphere, and working with the Secretaries of the Military

tary Departments to help ensure their programs are synchronized with and support our policy in those regions.

Question. The Service Chiefs.

Answer. The ASD(ISA) works with the Service Chiefs to advance the Secretary's objectives and policy priorities, under the guidance and direction of the Under Secretary of Defense for Policy. This includes providing policy input as appropriate to the Secretaries of the Military Departments and the Service Chiefs that relates to Europe (including the North Atlantic Treaty Organization), Russia, the Middle East, Africa, and the Western Hemisphere.

Question. The Geographic and Functional Combatant Commanders.

Answer. The ASD(ISA) works with the commanders of the regional combatant commands in connection with activities in Europe, Russia, the Middle East, Africa, and the Western Hemisphere—U.S. Central Command (CENTCOM), U.S. Africa Command (AFRICOM), U.S. European Command (EUCOM), U.S. Northern Command and U.S. Southern Command—to advance the Secretary's objectives and policy priorities, under the guidance and direction of the Under Secretary of Defense for Policy. The Assistant Secretary of Defense for International Security Affairs also works with the functional combatant commanders—particularly U.S. Special Operations Command and U.S. Transportation Command—to ensure that crosscutting functional efforts are appropriately synched and coordinated with the Secretary's objectives and policy priorities in the International Security Affairs regions. Particular areas of engagement include regional and bilateral strategy and policy, contingency planning, and policy oversight of operations.

Question. The Director of the National Guard Bureau.

Answer. The ASD(ISA) works with the Director of the National Guard Bureau with regard to the State Partnership Program and related activities in Europe, Russia, the Middle East, Africa, and the Western Hemisphere.

Question. The Other Functional and Regional Assistant Secretaries of Defense.

Answer. The ASD(ISA) works with the other functional and regional Assistant Secretaries of Defense within the Office of the Under Secretary of Defense for Policy to provide policy guidance to advance the Secretary's objectives and policy priorities, and to ensure the regional and functional policy recommendations are coordinated and reflect the best advice of the Office of the Under Secretary of Defense for Policy's leadership team.

Question. The Director of the Defense Security Cooperation Agency.

Answer. The ASD(ISA) works with the Director of the Defense Security Cooperation Agency on the policy guidance for and the implementation of security cooperation activities, including Foreign Military Sales, to ensure these activities support the Secretary's objectives and policy priorities as they are implemented with countries in Europe, the Middle East, Africa, and the Western Hemisphere.

TRANSATLANTIC RELATIONSHIP AND NATO

Question. In your view, how important to U.S. national security interests is the U.S. transatlantic relationship with our European partners?

Answer. The U.S. transatlantic relationship with European partners has stood the test of time through the Cold War, the dissolution of the Soviet Union and the Warsaw Pact, the September 11 attack on the United States and ensuing NATO action in Afghanistan, and ongoing operations to counter violent extremism and terrorism. European allies remain the United States' principal partners in promoting global security. Not only is Europe home to our most stalwart and capable allies, it provides essential access and support that ensures the ability of the U.S. Armed Forces to respond to global challenges, particularly in the Middle East and North Africa. If confirmed, I would continue to work to reinforce this critical relationship.

Question. In your view, what is the role of the North Atlantic Treaty Organization (NATO) Alliance in meeting U.S. security interests?

Answer. NATO is a uniquely important and capable Alliance, through which the United States and 27 allies confront together the broad range of diverse and difficult threats to our shared security interests. NATO is composed of like-minded allies who share our fundamental values of democracy, human rights, and rule of law, and it includes the most capable militaries in the world today. Fundamentally, NATO provides a standing forum for the consultations that forge consensus for needed actions, including military operations; it coordinates allies' creation of the interoperable military forces and other capabilities needed for such actions; and it maintains a unique multinational command structure to lead those forces in action. NATO also has evolved into a global hub for security cooperation, connecting allies with more than 40 partner nations who work with us on security challenges worldwide, and

contributing to the political support and legitimacy accorded to actions by a wider international community.

NATO has played a fundamental role in Afghanistan in leading the ISAF mission and is poised to continue in the Resolute Support Mission starting in January 2015. Today, NATO allies and partners continue to take significant steps in addressing Russia's actions in eastern Europe, and in forming the core of the coalition against ISIL in Iraq and Syria. Other examples, from the Cold War through the Balkans to Iraq, Libya, counter-piracy and more, all illustrate NATO's ability to be a strong force-multiplier for helping meet U.S. security interests.

Question. In your view, what are the major strategic objectives of the NATO Alliance in the coming years, particularly in light of the Russian Federation's aggression against Ukraine?

Answer. NATO's enduring purpose is to safeguard the freedom and security of its members, and this includes promoting shared values and aiming to achieve a Europe, including Russia, that is whole, free, and at peace. The Russian Federation's aggressive actions against Ukraine threaten the Alliance's ability to achieve its strategic political objectives in the coming years. This requires both a united political response as well as continued security cooperation between Ukraine and the Alliance. In the coming years, the Alliance will aim to develop and maintain robust, mobile, and deployable forces with the ability to sustain concurrent major joint operations and several smaller operations; to develop the capability to defend its populations and territories against ballistic missile attack; and to develop further capabilities to defend against weapons of mass destruction and cyber-attacks.

NATO MISSION IN AFGHANISTAN

Question. At the NATO Summit in Wales in September, NATO members and partner nations reaffirmed their commitment to the post-2014 train, advise, and assist mission in Afghanistan, known as Operation Resolute Support.

What do you see as the major challenges for the NATO-led Operation Resolute Support mission to build the capacity of the Afghan security forces?

Answer. The key challenge for the NATO-led Operation Resolute Support mission will be ensuring we have the right advisors with the right skills for our capacity building efforts, and ensuring we build enough capacity in the Afghan Ministries of Defense and Interior to execute the funding being provided to them responsibly and transparently. If confirmed, I would work with the Assistant Secretary of Defense for Asian and Pacific Security Affairs, and interagency colleagues, toward that goal.

Question. If confirmed, what recommendations would you have for addressing these challenges?

Answer. If confirmed, I will continue the work within DOD and with our partners to provide the right advisors. General Campbell and his team are in regular dialogue with the Department on this and we are rotating personnel to the field to work in the ministries. If confirmed, I would also work to echo General Campbell's messages to his counterparts about the importance of responsible management of donated funds, which are used to pay army and police salaries and other basic consumables. President Ghani's statements on attacking corruption are helpful to our efforts to build transparency and accountability with the Ministry of Defense and Ministry of Interior—and to keep our allies and partners invested in Afghanistan.

Question. General Campbell and General Dunford have both indicated that the loss of Mi-17 helicopter capability would "... be catastrophic to the mission and would give me cause to reassess the entire campaign." General Campbell and General Dunford also point out that the Mi-17s are key to providing an outer layer of force protection to U.S. and coalition forces.

Do you agree with the statements of General Campbell and General Dunford on the critical importance of the Mi-17s to mission success and force protection in Afghanistan, and if so why?

Answer. Yes. The Afghan Air Force is using the Mi-17s to provide outer ring security for coalition forces. The Afghan Special Mission Wing is using the Mi-17s to conduct operations against terrorists and insurgents in otherwise unreachable areas of Afghanistan. The Mi-17 provides mobility in difficult terrain and is critical for denying enemy sanctuary in these non-permissive areas of the country. It also provides troop transport capability and serves as the primary casualty evacuation platform and as a close air support platforms. It is the centerpiece of the Afghan Air Force and the loss of the Mi-17 would be a serious blow to our operations in Afghanistan.

RUSSIA

Question. What role will you play, if confirmed, in establishing policy with respect to the U.S.-Russia security relationship, including in the NATO context?

Answer. If confirmed, I would play an active role in managing our evolving defense strategy toward Russia, ensuring that the Department is prepared and postured to enforce our Article 5 commitment, reassure our allies with a persistent presence in central and eastern Europe for as long as necessary, support our partners so they are better able to secure their borders and provide for their own defense, and deter potential aggressive Russian actions against U.S. interests.

Question. What do you believe are appropriate objectives for U.S.-Russian security relations?

Answer. Military-to-military relations between the United States and Russia are on hold due to Russia's illegal occupation and attempted annexation of Crimea, as well as its continued destabilizing activities in eastern Ukraine and failure to uphold the Minsk Agreement. Russia's behavior is not consistent with a responsible global stakeholder contributing to international stability, and we will not seek a cooperative relationship with the Russian military while it violates the sovereignty of one of its neighbors. Should Russia change its behavior by fully implementing the Minsk Protocol and withdrawing from Crimea, I believe the Department would be in a position to review the hold on military-to-military activities.

That said, the Department is prepared to work with the Russian Ministry of Defense on issues in which it is in our national interest to do so. For instance, the United States and Russia have worked together to secure Syria's declared chemical weapons stockpile, have common interests in promoting stability and countering terrorism in Afghanistan, and have a shared interest in avoiding misunderstandings or miscalculation concerning our global military presence.

Question. What do you believe are the main areas of disagreement between the United States and Russia and the areas of common interest between the United States and Russia in the security sphere?

Answer. The administration is committed to a Europe that is whole, free, and at peace; believes that nations have the right to associate freely with whatever organization it chooses; and does not accept that some nations have a sphere of influence or privilege—a vision I would uphold if confirmed. As demonstrated by its actions in Ukraine, Russia does not share these views, and is willing to challenge norms that have preserved international security for decades in order to assert its own vision.

However, there are convergent interests between the United States and Russia, and opportunities for constructive engagement with Russia continue to exist, particularly regarding nonproliferation, such as the P5+1 negotiations with Iran and removing Syria's declared chemical weapons stockpile. The United States and Russia also have a shared interest in counterterrorism, counter-piracy, developing the Arctic region, and ensuring stability in Afghanistan, and I believe the United States should be willing to engage with Russia on areas of mutual interest when it is in our national interest to do so.

Question. On November 2, 2014 the New York Times reported that "Tanks and other military vehicles [are] pouring over the border from Russia into eastern Ukraine" despite the ceasefire reached in September.

In the context of Russian aggression in eastern Europe, do you believe that the deterrence of further aggression will require the permanent stationing of additional U.S. or allied forces in eastern European nations?

Answer. The Department continues to work with the EUCOM and allies and partners to develop additional reassurance and deterrence measures in the region. Adjusting U.S. force structure in Europe may be one of these measures; however, this must be done in the context of balancing other global requirements and managing limited fiscal resources. If confirmed, I would continue to support this effort.

Question. What is your assessment of which American forces and capabilities have the greatest deterrent effect upon Russia and other aggressive actors in the region?

Answer. Effective deterrence relies on the combination of capabilities—but it is our will to defend the NATO Alliance from aggression that gives our capabilities credibility. Deterring aggressive actors in Europe also requires a strong and unified Alliance willing to share the burden for defense, and if confirmed I would continue to work with our allies to work toward that goal.

FORCE POSTURE IN THE MIDDLE EAST

Question. The Gulf continues to be a turbulent area, made more unstable by the malign influence of Iran and the growth of the so-called Islamic State in Iraq and Syria.

Do you believe there is a need for the United States to mitigate the effects of a reduced aircraft carrier presence in the Gulf region and, if so, how would you propose doing so?

Answer. The Department maintains a strong military posture in the Gulf region with a mix of air, land, and naval forces. We do not rely on any single capability to address regional threats. The Department regularly assesses its forward posture, including the deployment of aircraft carriers, to address most effectively the challenges faced globally. The Department also maintains our ability to respond quickly to a range of worldwide contingencies. Therefore, at the present time I understand our military commanders do not see a need to further mitigate the reduced aircraft carrier presence in the Gulf.

IRAQ

Question. The President has announced an increase in the number of U.S. military personnel to be deployed to Iraq to advise and assist Iraqi security forces and Kurdish peshmerga in countering the threat posed by the Islamic State of Iraq and the Levant (ISIL).

How would you describe the key U.S. strategic interests and objectives in Iraq?

Answer. I believe the United States has a strategic interest in a stable, secure, and united Iraq led by an inclusive government that has support from all of Iraq's communities. The United States shares many interests with Iraq—including countering ISIL, countering threats from Iran, and ensuring the region is peaceful and secure in the long-term.

Question. What do you see as the greatest challenges for the U.S.-Iraq security relationship over the coming years?

Answer. As we work to support the President's counter-ISIL strategy, supporting the Government of Iraq's efforts to build an inclusive and effective Iraqi Security Force will be a great challenge, and will take time. In order to reconstitute a sustainable, effective, and inclusive security force that can re-take territory and hold it in the long-term, the Government of Iraq must do the required reform and reconciliation among major sectarian groups in order to support the security forces. If confirmed, I would work with my colleagues toward that end.

Question. Do you support President's approach for training and equipping security forces in Iraq to counter the ISIL threat?

Answer. Yes.

Question. What do you see as the greatest challenges for efforts to train and equip Iraqi security forces to counter the ISIL threat, and if confirmed, what recommendations would you have for addressing these challenges?

Answer. As I noted, supporting the Government of Iraq's efforts to build an inclusive and effective Iraqi Security Force will be challenging, and take time. The Government of Iraq must offer a national program of reform and reconciliation in order for Iraqi security forces to succeed. If confirmed, I would continue to work with the Department of State and coalition partners on an engagement plan that urges the Government of Iraq to match capability development with political reform.

Question. In your view, what conditions, if any, should the United States place on the provision of equipment or assistance to the Government of Iraq in its fight against violent extremism?

Answer. Given the severity of the ISIL threat, the United States should continue to exercise its ongoing foreign assistance and security cooperation activities with the Government of Iraq, in accordance with applicable legal requirements—and continue to consult with Congress while doing so.

IRAN

Question. What is your understanding and assessment of the military and political threat posed by Iran?

Answer. The administration's primary concern is preventing Iran from obtaining a nuclear weapon. However Iran's ballistic missile forces, naval forces, cyber capabilities, and sponsorship of destabilizing activity in the region are also of significant concern. Iranian officials' boasting of their influence in Iraq, Syria, Yemen, and Bahrain, as well as Supreme Leader Khamenei's recent inflammatory comments regarding Israel's right to existence, are also extremely provocative.

Question. What is your understanding and assessment of U.S. policy with respect to Iran?

Answer. Our current priority remains to prevent Iran from obtaining a nuclear weapon and I support the President's decision to continue pursuit of a diplomatic resolution to this issue. Negotiations aside, I subscribe to the view that the United States and many other countries hold that Iran needs to become a more responsible

presence in the region, as well as adhere to international norms, including in the area of human rights.

Question. What are the risks, if any, associated with reducing U.S. presence in the Middle East with respect to the threat posed by Iran?

Answer. The administration has no plans to reduce the U.S. presence in the Middle East, and the President has been clear to both Iran and other countries that might consider testing the United States that we will continue to protect our interests globally. The United States' ability to garner the political will and marshal the forces to counter ISIL as quickly as it did serve as evidence that we continue to advance security and stability in the region—and will retain a robust force posture in the Middle East to protect our partners and our interests.

Question. In your view, what role should DOD play in countering Iran's support of international terrorism?

Answer. In my view, DOD has an important role to play in countering Iran's support for international terrorism by supporting broader U.S. Government and partner nation efforts. We also conduct numerous military exercises in the region that focus on mine countermeasures, maritime defense, and integrated air and missile defense that prepare us for possible Iranian asymmetric threats. If confirmed, I would continue to work with our interagency and international partners to further these efforts and ensure Iran is held accountable on the full scope of its destabilizing activities in the region and beyond, as necessary.

SYRIA

Question. What is your understanding and assessment of United States policy with respect to Syria?

Answer. The administration seeks a stable Syria that provides freedom and security to its citizens and is at peace with its neighbors. The U.S. focus is on three main areas: disrupt, degrade, and destroy ISIL; promote a negotiated political settlement to the Syria conflict; and prevent the Syria crisis from further destabilizing neighboring countries.

The immediate focus is to disrupt, degrade and destroy ISIL. We seek to drive ISIL out of Iraq, deny it safe-haven in Syria, and disrupt its ability to project power. There is no sustainable solution to the Syria crisis without addressing the current ISIL threat. If confirmed, I would work to further the administration's policy with regard to Syria.

Question. What is your understanding and assessment of United States policy with respect to the Assad Regime?

Answer. As the President has said, Assad has been a magnet for extremism and has lost all legitimacy to govern. There must ultimately be a negotiated political settlement in which Assad cedes power in order to restore security and stability to Syria. If confirmed, I would work with my interagency partners to further the administration's policy.

Question. What role, if any, does ASD(ISA) have within the U.S. Government policy community with respect to Syria?

Answer. If confirmed, I would assist the Under Secretary of Defense for Policy in formulating, coordinating, and presenting the Department's Syria recommendations to the rest of the U.S. interagency. I would work closely with my counterparts on the Joint Staff and the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict. I would also work with counterparts across the interagency as they develop options that work towards a resolution to the crisis in Syria. This includes options for disrupting ISIL, and ways to pressure the Assad regime to negotiate a settlement, bolster the moderate Syrian opposition, alleviate the suffering of the Syrian people, and address extremist threats.

Question. What role, if any, does ASD(ISA) have with respect to the DOD's proposed program to train the moderate, vetted Syrian Opposition?

Answer. If confirmed, I would provide advice to DOD and interagency leadership on implementing the Department's proposed program to train and equip the moderate Syrian opposition.

GULF SECURITY COOPERATION

Question. The administration has been working with Gulf Cooperation Council (GCC) governments to enhance regional cooperation and security against ballistic missile threats, particularly from Iran.

What is your view of the potential for missile defense cooperation within the GCC to enhance regional security, and how do you see this potential cooperation fitting into the U.S. missile defense and security efforts in the Middle East?

Answer. During the Secretary's first formal Defense Ministerial with the GCC in May, it was clear that a robust and enduring multilateral missile defense architecture would be advantageous to counter the threat posed by Iran. Our partners in the region share this view, and DOD sees strong potential for cooperation. I understand, however, that this architecture will take time to build and will require continued support from member states to maintain it over the long term. If confirmed, I would work with the Services, the combatant commands, and our partners and allies to build effective deterrence and defense architectures for Europe and the Middle East against ballistic missile threats.

LIBYA

Question. Following the evacuation of the U.S. Embassy in Tripoli on July 26th, there is no longer an active American presence in the country.

What is your understanding of how the departure of the U.S. presence is impacting our security interests in the country, to include its impact on our ability to collect timely intelligence and engage with Libyan security institutions?

Answer. I believe the suspension of operations at the U.S. Embassy in Tripoli in late July has adversely affected our ability to engage with Libyan security institutions, but it was a necessary measure to ensure the safety of U.S. personnel. Unfortunately the fragmentation of the country has caused the United States and our partners to place on hold our security assistance programs with Libya, including a multinational effort to train a Libyan General Purpose Force. If confirmed, I would continue to work with my interagency colleagues to urge all Libyan parties toward a political solution and improved governance.

ISRAEL

Question. With regard to our relationship with Israel, President Obama has stated: "Our military and intelligence cooperation has never been closer. Our joint exercises and training have never been more robust. Despite a tough budget environment, our security assistance has increased every year. We are investing in new capabilities. We're providing Israel with more advanced technology—the type of products and systems that only go to our closest friends and allies. Make no mistake: we will do what it takes to preserve Israel's Qualitative Military Edge—because Israel must always have the ability to defend itself, by itself, against any threat."

Do you agree with President Obama's position and views with regard to the U.S. security relationship with Israel?

Answer. Yes. If confirmed, I would work to continue the Department's substantial cooperation with Israel and maintain the strength of our security relationship.

EGYPT

Question. A stable and secure Egypt is important to maintaining the peace treaty between Israel and Egypt and Egypt played an important role in brokering peace between Israel and Hamas.

What is the purpose of the security assistance provided by the United States to Egypt?

Answer. The U.S. relationship with Egypt is significant and enduring. Egypt plays a key role in the stability of the Middle East. For more than 30 years, our defense relationship has served to further our joint interests. Our security assistance to Egypt, and our security relationship with Egypt, facilitates our access to the Suez Canal and Egyptian airspace, supports the security of Israel, advances joint counterterrorism efforts, and maintains the security of U.S. personnel in Egypt.

Question. What, if any, impact would discontinuing or significantly reducing that assistance have on the bilateral relationship and regional security?

Answer. I believe discontinuing U.S. security assistance to Egypt would undercut key aspects of our relationship with Egypt, which has been a cornerstone of our security policy in the Middle East since the 1980s. It would reduce U.S.-Egypt cooperation on shared interests—including countering terrorism and access to Egyptian airspace for U.S. military aircraft.

AFRICA-RELATED SECURITY MATTERS

Question. The new DOD strategic guidance, "Sustaining U.S. Global Leadership: Priorities for 21st Century Defense," announced by President Obama on January 5, 2012, sets out the defense priorities for the 21st century and the key military missions for which DOD will prepare. The primary emphasis of the strategy relates to the Middle East and Asia. The strategy makes little reference to Africa and its myriad security challenges.

In light of the emphasis on areas outside of the African continent, if confirmed, how would you draw attention to the myriad security challenges confronting African nations?

Answer. The Defense Strategic Guidance and the more recent 2014 QDR both make clear that DOD will focus its resources on achieving U.S. objectives in the Asia-Pacific and Middle East regions in the years ahead. However, from a mission perspective, both documents emphasize the importance of maintaining a strong focus on counterterrorism and irregular warfare, particularly with respect to disrupting and defeating al Qaeda and its affiliates (AQAA) wherever they manifest as a threat to the United States and partner interests. Given this emphasis, and the growing AQAA and potential ISIL presence in Africa, I will ensure African security challenges will continue to receive the focus that they deserve. If confirmed, I would support the Department's ongoing efforts to build the capacity of African security forces, defense institutions, and regional organizations to combat terrorism and transnational threats, participate in regional peace operations, and respect international human rights norms.

Question. In the last few years, there has been a growth of terrorist networks, capabilities, and operations in North and East Africa, including groups that reportedly intending to target Western nations, including the United States. Some have characterized the U.S. counterterrorism effort in North and East Africa as an "economy of force" effort.

Do you agree with that characterization of the U.S. counterterrorism effort in North and East Africa?

Answer. No. The growing terrorist threats across Africa present a complex challenge to U.S. national security interests; thus, I do not consider it to be an "economy of force" region. Africa's ungoverned spaces have increasingly become safe havens for extremists who have been put under increasing pressure in other parts of the world. DOD's approach to disrupting extremist networks in Africa relies on relatively low-cost, small footprint, innovative approaches, often involving partnering with regional or international partners. In light of pressure on the Department's overall budget, we focus our efforts on those cases where the most significant U.S. interests are at stake, there is political will to address the given security challenge, and there is a credible likelihood that our targeted support will result in a decisive effect. If confirmed, I would look for ways to build upon the success that we have seen to date in places like Mali, where U.S. support to French operations and U.N. peacekeeping forces have helped stabilize that country and reduce al Qaeda's freedom of movement.

Question. In your view, should these U.S. counterterrorism efforts be expanded, contracted, or remain the same?

Answer. I believe that U.S. counterterrorism efforts should be dynamic and of sufficient scale to address the threats facing the United States, our interests, and those of our allies and partners. If confirmed, I would continue to support robust counterterrorism efforts to disrupt and ultimately defeat al Qaeda, ISIL, their affiliates, and other violent extremist organizations that pose risk to U.S. and allied interests, threaten regional security, and undermine economic growth and opportunity.

SOMALIA

Question. To date, DOD has had a limited role in Somalia and the Department has not established a military-to-military relationship with the newly formed Somali National Army. Further, the DOD has not provided any security assistance to the Somali National Army.

What is the appropriate role for DOD with respect to Somalia and what, if any, assistance should the DOD provide to the Somali National Army?

Answer. To date, DOD has had a limited, but focused role in Somalia, which has included advice and assistance, training, and logistical support to the African Union Mission in Somalia (AMISOM) and the Somali National Forces as they strive to bring stability and peace to Somalia.

Following the January 2013 recognition of the Federal Government of Somalia (FGS) by the United States, the Under Secretary of Defense for Policy hosted the Somali President in the Pentagon, which was followed by a second visit and meeting with the Secretary of Defense at the Pentagon in September 2013. Through a deliberate engagement plan, the Department established a military-to-military relationship with the Somali National Armed Forces. This plan has included key engagements with Somali defense leaders, visits by the AFRICOM Commander, the Commander of Joint Task Force Horn of Africa, and other DOD personnel. Moreover, in July 2014, the Department installed a Defense Attaché to support the Special Representative to Somalia, who remains based in Kenya.

With respect to the Department's role in Somalia, the United States is in a unique position to play an advisory role at a new beginning in the development of Somali's security sector, and if confirmed, I would work to support that effort.

Question. Are there any restrictions that prevent DOD from providing assistance to the Somalia National Army? If so, what restrictions?

Answer. Yes. Provisions in the fiscal year 2014 Foreign Operations bill currently prohibit the United States from providing lethal assistance to Somalia. As a result, DOD is unable to provide much-needed military equipment and training to the Somali National Army. If confirmed, I look forward to working with Congress to determine the appropriate approach to this prohibition.

U.S. MILITARY OPERATIONS AGAINST THE LORD'S RESISTANCE ARMY

Question. Despite pressure by the Ugandan People's Defense Forces (UPDF) and efforts by U.S. Special Operations personnel to support them, elements of the Lord's Resistance Army (LRA)—including Joseph Kony—continue to operate and commit atrocities against civilian populations. Some observers have identified operational concerns with this mission, including that: (1) supported forces are trying to find an elusive foe in an area roughly the size of California, much of which is covered in thick jungle; (2) technical support to U.S. forces and their UPDF partners from the defense and intelligence community continues to be inadequate; (3) limitations continue to be placed on the ability of U.S. Special Operations personnel to accompany UPDF partners outside of main basing locations, thereby limiting the level of direct support they can provide; and (4) logistics and operational enablers for U.S. forces.

In your view, what is the objective of Operation Observant Compass?

Answer. Under Operation Observant Compass (OOC), U.S. Special Operations Forces seek to enhance the capacity of local forces in the African Union Regional Task Force to end the threat to regional stability and civilian security posed by the Lord's Resistance Army (LRA). U.S. military advisors are working with these forces to improve their intelligence gathering, fusion, and information-sharing; enable effective logistical support; enhance their staff coordination and operational planning; and assist efforts to increase overall operational effectiveness. Because there are no purely military solutions to this problem, the U.S. military supports a broader inter-agency and international effort that involves the U.S. embassies in the affected countries, U.S. Agency for International Development's programs, as well as contributions from nongovernmental organizations.

If confirmed, I would continue to support the current U.S. policy of pursuing a comprehensive, multi-faceted strategy to assist the governments and people of LRA-affected areas to end the threat posed by the LRA and to address the impact of the LRA's atrocities.

Question. In your view, what is the appropriate level of priority to be accorded to efforts to counter the Lord's Resistance Army?

Answer. In my view, the level of priority currently accorded to OOC is appropriate and appears to have yielded significant results. Three of the top five LRA leaders have been removed from the battlefield. There has been a 75 percent decrease in the number of people killed by LRA attacks. Since 2012, there have been 240 confirmed defections from the LRA, with 80 occurring between July and September 2014. Many who have fled the LRA have cited U.S.-supported defections messaging as influential in their decision to leave the group.

Question. If confirmed, will you work to review the four concerns outlined above and report back to the committee?

Answer. Yes. If confirmed, I would work with the relevant experts in the Department to ensure that your concerns are reviewed. I would be happy to organize an update on current OOC operational efforts at your convenience.

'NEW NORMAL' REQUIREMENTS WITHIN U.S. AFRICA COMMAND

Question. AFRICOM consistently suffers from shortfalls in resourcing—particularly in the areas of force posture, mobility, and intelligence, surveillance, and reconnaissance—and a lack of persistent access to the continent that impact its ability to meet requirements in theater, including crisis response.

What is your understanding and assessment of the 'new normal' requirements in AFRICOM's area of responsibility?

Answer. The crises in Africa and the complexity of the security environment have demonstrated the need for DOD to position forces to respond rapidly on the continent. The Department's support has focused on two areas: assisting the Department of State in strengthening the security of high-threat, high-risk diplomatic missions in Africa and developing rapid response capabilities to bolster security during

a crisis as a way to address the challenges presented by the size of Africa and the continent's limited infrastructure.

Question. What is your understanding and assessment of the impact of and resulting risk associated with AFRICOM's resourcing shortfalls and persistent access to the continent on its ability to meet its 'new normal' requirements?

Answer. I believe the AFRICOM forces will remain resilient in their ability to meet new normal requirements and will be augmented as necessary should a crisis occur. If confirmed, I would work with colleagues in the Department to support those requirements.

COLOMBIA

Question. Plan Colombia has enabled the Colombian Government to make significant gains against the FARC (Revolutionary Armed Forces of Colombia) and other paramilitary forces in Colombia, as well as enabled the government to secure many previously ungoverned areas. Since fiscal year 2000, the United States has provided more than \$7 billion to support Colombia's efforts to counter the threat of transnational criminal organizations and various terrorist groups.

What are your views regarding the current situation in Colombia focusing upon: (1) the current military and political situation in Colombia; (2) the ability of the Colombian military to control its territory; and (3) ongoing DOD programs?

Answer. I believe the Government of Colombia has made substantial gains in recent years to enhance its internal stability and citizen security. Although stability in Colombia is not assured, Colombia has made progress in asserting more effective governmental control over its territory through a national consolidation campaign.

The Department's security assistance programs are focused on training, equipping, and mentoring Colombians; helping Colombia with defense institutional reform; and providing support to Intelligence, Surveillance, and Reconnaissance programs. Colombia has also been an increasingly capable and willing partner in addressing shared security challenges and has contributed to efforts to improve stability more broadly in the Western Hemisphere, in particular by partnering with us in Central America.

Question. In your view, is the Colombian Government capable of sustaining the last decade's gains during this economic downturn and the scheduled decline in U.S. security assistance?

Answer. Yes. The Department has worked closely with Colombia to institutionalize the strategic, operational and technical capabilities that it has developed over the past decade, including through defense institutional reforms. Recognizing that continued U.S. assistance and support, such as Intelligence, Surveillance, and Reconnaissance, will be critical to Colombia's continued success, the Department is working closely with Colombia to streamline our security cooperation programs in light of declining resources. If confirmed, I would continue working with our Colombian partners to help them consolidate and sustain their security gains while also addressing their emerging needs.

Question. In light of budget conditions, do you believe continued U.S. security assistance to Colombia at the current levels is sustainable?

Answer. The Department has made difficult decisions about where to focus resources given the fiscal environment, and has also identified areas where continued U.S. support will remain critical for helping Colombia consolidate its security gains. Because of the significant progress that Colombia has made in improving its internal stability, security assistance to Colombia has been gradually reduced. Even as fewer resources are available for Colombia, if confirmed, I would work with my colleagues to assist this strategic partner as it moves toward improved stability and a greater role in exporting security within the region and globally.

Question. In your view, what are the remaining U.S. supported programs that will need to be continued to "lock in" the progress that has been made?

Answer. Consolidating Colombia's security gains will require continued U.S. support to programs that strengthen Colombia's defense institutions. Such programs help provide Colombia the capacity to plan, resource, and maintain its enhanced abilities. As the FARC persists in conducting attacks on infrastructure and other targets, it will be important for the United States to continue to provide support to programs that help the Colombian Government maintain the technical and tactical edge that will guarantee stability over the long term.

CENTRAL AMERICA AND MEXICO

Question. While the unaccompanied children crisis is not in the ASD(ISA)'s portfolio, the root causes that drive many of these individuals to seek sanctuary in the United States are within the purview of ASD(ISA).

What are the root causes of insecurity in the region?

Answer. I believe insecurity stems from a wide range of persistent challenges in some countries in Latin America. Difficult economic conditions, widespread poverty and inequality, weak and sometimes corrupt government institutions, under-governed spaces, lack of sufficient infrastructure, and widespread crime and violence are only some of the significant and often overwhelming factors that contribute to insecurity in this region.

Question. In your view, what role, if any, does DOD have in addressing the root causes?

Answer. DOD has a significant role to play in supporting broader U.S. efforts to strengthen government institutions and fight corruption, develop infrastructure, address control of under-governed spaces and help diminish criminal organizations and violence. Often in a supporting role, the Department provides unique capabilities and expertise to other lead U.S. agencies, and encourages more capable partners in the region to join in efforts to improve security conditions in the hemisphere.

Question. What is your assessment of the threats posed by transnational criminal organizations in this region?

Answer. Transnational criminal organizations present a serious threat to the stability of the region, and many of our partners have become unable to control their growth and influence. Taking advantage of weak government institutions, endemic corruption, large under-governed spaces, and lack of viable economic opportunities for many Latin American citizens, criminal organizations have become entrenched in places like the Northern Triangle of Central America, further weakening already strained governments and citizenry. Dealing in the flow of illegal drugs, human smuggling and trafficking, counterfeiting, weapons, and other contraband smuggling across U.S. borders, these organizations also challenge the control of our southern borders and expose vulnerabilities to the southern approaches to the United States.

Question. What is your understanding and assessment of DOD's ongoing current activities in Mexico and Central America?

Answer. DOD is helping Mexico and the countries of Central America improve their capacity to maintain security and advance hemispheric defense coordination, and if confirmed, I would continue to pursue those efforts. The Department's security assistance and security cooperation activities in the region are focused on professionalization, including respect for human rights, and capacity building of regional security forces. The Department is also working with partners in Central America to facilitate internal defense institutional reform efforts that will help those governments plan, resource, and maintain their enhanced capabilities.

CUBA

Question. What is your view of the need to review and, potentially, revise U.S. policies regarding Cuba?

Answer. I support the President's current policy with regard to Cuba, which includes targeted bilateral engagements that advance U.S. national interests and the enactment of measures that help reduce the dependence of Cuban citizens on the state. I support periodic review of the United States' Cuba policy and DOD's full participation in these interagency reviews.

Question. What is your opinion about the need for, and the pros and cons of, military-to-military contact with Cuba?

Answer. U.S. law and policy restrict official engagement with the Cuban Government, including the Cuban military. DOD currently conducts an annual disaster-relief exercise with the Cuban military at Guantanamo Bay, as well as limited military-to-military engagement with Cuba, including monthly fence-line talks at the Guantanamo Naval Base, which focus on avoiding misunderstandings across the fence line.

Question. In your view, is Cuba currently supporting or sponsoring international terrorism?

Answer. Cuba is one of the countries designated by the Secretary of State as a State Sponsor of Terrorism. This list is reviewed on a recurring basis.

BUILDING PARTNER CAPACITY

Question. In the past few years, DOD has requested and Congress has provided a number of authorities to build the capacity of partner nations. These include the "section 1206" global train and equip authority, targeted authorities to build capacity in Yemen and East Africa, and the Global Security Contingency Fund.

In your view, what are the strategic objectives and priorities for DOD's programs for building the capacity of partner nations?

Answer. The defense strategy articulated in the 2014 QDR emphasizes three pillars, including building security globally, as this type of global engagement is fundamental to U.S. leadership and influence. As the Department's budget declines, security cooperation efforts take on greater importance as a means to mitigate risk. In this regard, building the capacity of partners can ease the burden on U.S. forces by enabling them to act alongside of, in lieu of, or in support of U.S. forces across the globe, as well as to build national and regional security architectures that can prevent potential contingencies from emerging.

Over the last decade, the Department's capacity-building efforts, enabled by the authorities cited above, have largely focused on counterterrorism and counter-insurgency efforts. However, with reduced force structure and resources, the Department also will need to build capacity in other areas that could offset risk to U.S. forces, such as logistics and maritime security.

Question. What improvements, if any, would you recommend, if confirmed, to the strategic direction, oversight, and management of DOD's programs for building partner capacity to ensure that these programs are executed consistent with U.S. national security goals and objectives?

Answer. Recognizing the need to align the Department's security cooperation resources and activities the defense strategy, in 2014 the Department established the office of the Deputy Assistant Secretary of Defense for Security Cooperation within the Office of the Under Secretary of Defense for Policy. I support this effort and believe the office will help prioritize competing requirements among and between partner countries, within and across combatant commands. I also expect the office to work closely with counterparts within the State Department to support implementation of Presidential Policy Directive 23 on Security Sector Assistance, which calls for whole-of-government approaches to security sector assistance in support of U.S. national security goals and objectives.

If confirmed, I would work closely with the Under Secretary of Defense for Policy to support further improvements to the security cooperation governance system. This includes seeking to complement tactical- and operational-level building partner capacity (BPC) efforts with initiatives to support partners' institutional needs.

Question. What is your assessment of the implementation and effectiveness of DOD's programs for building partner capacity in achieving U.S. national security goals and objectives?

Answer. Overall, DOD's BPC programs have contributed to the achievement of U.S. national security goals and objectives, particularly with regard to counterterrorism, and regular program assessments have helped contribute to that success. If confirmed, I would work closely with security cooperation stakeholders to ensure that the Department continues to build on this and other assessment, monitoring, and evaluation efforts to ensure outcomes consistent with policy objectives.

Moreover, although individual BPC programs have demonstrated success, there is an opportunity to magnify their impact by linking together security cooperation programs in ways that are mutually reinforcing, so that activities at the tactical, operational, and institutional levels are woven together to create enduring, sustainable partner nation capabilities.

Question. In your view, what should be the role of DOD, vis-a-vis the State Department and other civilian departments and agencies, in efforts to build the capacity of foreign security forces?

Answer. I believe each U.S. Government agency offers unique skills, subject-matter expertise, and experience to contribute to the planning, execution, and evaluation of efforts to build the capacity of foreign security forces. Simply put, whole-of-government approaches can bring about outcomes that are larger than the sum of their parts.

In my view, DOD should play a supporting role to other departments and agencies, such as State, Justice, and USAID, in areas such as fostering political reconciliation, building accountable institutions of government, and restoring public infrastructure, so that DOD can focus its efforts on providing a safe and secure environment, while also assisting interagency partners in the building of accountable Armed Forces. As DOD continues to develop its approaches to building capacity at the ministerial and institutional levels, it should operate collaboratively and transparently with interagency partners to ensure that security sector reform efforts are mutually reinforcing.

BALLISTIC MISSILE DEFENSE

Question. In February 2010, the Defense Department issued its report on the first-ever comprehensive review of U.S. ballistic missile defense policy and strategy, the Ballistic Missile Defense Review (BMDR), as required by Congress.

Do you support the policies, strategies, and priorities set forth in the BMDR?

Answer. Yes.

Question. Do you agree that any ballistic missile defense systems that we deploy operationally must be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat?

Answer. Yes, I agree.

Question. Do you agree that ballistic missile defense testing needs to be operationally realistic, and should include Operational Test and Evaluation, in order to assess operational capabilities and limitations of ballistic missile defense systems, prior to deploying such systems?

Answer. Yes.

Question. Iran and North Korea each has hundreds of short- and medium-range ballistic missiles today that are capable of reaching forward-deployed U.S. forces, allies, and partner nations in the EUCOM, CENTCOM, and PACOM AORs. The Ballistic Missile Defense Review Report of February 2010 stated that the United States intends to pursue regionally tailored phased adaptive approaches to ballistic missile defense against such missile threats in various regions.

Do you believe that such regionally tailored phased adaptive approaches are appropriate to provide our regional combatant commanders with the missile defense capabilities needed to defend our forward deployed forces and our allies and partners in their areas of responsibility?

Answer. Yes. Iran's ballistic missile arsenal presents a significant threat to our forward-deployed forces, allies, and partners in the Middle East and Europe. Our current policy calls for development of ballistic missile defenses in these regions that are tailored to their unique deterrence and defense requirements, giving specific consideration to their geography, the character of the ballistic missile threat, and the military-to-military relationships on which we are able to build cooperative missile defenses. I believe this approach affords us the best option for developing regional ballistic missile defense architectures in the Middle East and Europe that meet the needs of the responsible combatant commanders.

Question. In addition to U.S. missile defense capabilities in these AORs, what role do you see for other nations to contribute to regional missile defense capabilities?

Answer. The United States maintains longstanding security cooperation relationships with allies and partners in Europe and the Middle East. The current U.S. ballistic missile defense policy seeks to leverage such relationships to build and expand cooperative missile defense partnerships that lead to appropriate levels of burden sharing for defense of common interests. In Europe, we are actively working toward deployment of the U.S. contribution to NATO ballistic missile defense and continuing to work with our allies and partners in the region to build their ballistic missile defense capacity for their own defense, and in support of the NATO architecture. In the Middle East, we are continuing to grow and strengthen our bilateral ballistic missile defense efforts with our partners in the region while also, in the case of the Gulf Cooperation Council states, promoting increased levels of multilateral ballistic missile defense cooperation. Given the significant Iranian ballistic missile threat, I believe strong partnerships are the critical foundation upon which we will build effective deterrence and defense architectures for Europe and the Middle East. If confirmed, I would continue to promote strong bilateral and multilateral ballistic missile defense cooperation in these key regions of U.S. interest.

COMBATING TERRORISM

Question. What is your assessment of the threat posed by al Qaeda, Islamic State of Iraq and Syria, and likeminded organizations in the geographical area of responsibility for ASD ISA to the United States, our allies, and our interests?

Answer. Violent extremists that operate across the geographic area of responsibility of the ASD(ISA) continue to pose a significant threat to the U.S. Homeland, to U.S. interests, and to U.S. allies and partners. Al Qaeda, the Islamic State of Iraq and the Levant (ISIL), and other likeminded organizations pose a continuing, imminent threat to U.S. persons, facilities, partners, and allies. Extremist networks are exploiting political unrest and local grievances in parts of the Levant, North Africa and East Africa and using modern communications methods and social media to spread their ideology and plan operations. DPD conducts a range of operations to counter these threats, including direct and indirect action, cooperative efforts with allies and partners, and activities to help build the capacity of our key counterterrorism partners around the globe.

Looking ahead, the large numbers of foreign fighters that have joined the ranks of ISIL and other extremist groups in Syria and Iraq will pose a long-term threat to the United States and our allies and partners. DOD is therefore working with

the U.S. interagency and foreign partners to implement appropriate counterterrorism measures to address the threat from attacks inspired or directed by violent extremists abroad.

Question. What is your understanding of and familiarity with DOD's ongoing effort to combat al Qaeda in the geographical area of responsibility for ASD ISA?

Answer. I am familiar with DOD's ongoing efforts to combat al Qaeda in the geographic area of responsibility of the ASD(ISA). DOD is engaged in a campaign to address the threat of al Qaeda, its affiliates, and other extremists throughout the Middle East and Africa. The Department supports the U.S. Government's national strategy to counter terrorism through a variety of functions, including, but not limited to kinetic strikes, training foreign partners, capacity-building efforts, counter-messaging, counter-threat finance, and intelligence collection.

Question. What is your assessment of the threat posed by al Qaeda and its associated forces to the U.S. Homeland, U.S. interests overseas, and western interests more broadly?

Answer. Although the core of al Qaeda in Afghanistan and Pakistan remains degraded, the network's affiliates—most notably al Qaeda in the Arab Peninsula (AQAP)—continue to seek to attack the United States and its interests abroad. Strikes against the U.S. Homeland, for instance, remain a common theme in al Qaeda's propaganda, stated aspirations, and planning. We take these threats seriously and, if confirmed, I would work to ensure the Department remains capable and ready to take appropriate action to counter them.

Question. What do you believe is the terrorism threat from al Qaeda and affiliated groups in each of the Geographic Combatant Commands? Of these threats, what do you consider the highest counterterrorism priorities?

Answer. I believe the highest counterterrorism priorities remain in the CENTCOM area of responsibility. Though degraded by years of counterterrorism pressure, core al Qaeda, its affiliates, and adherents in Afghanistan and Pakistan remain a persistent and serious threat.

AQAP has proven its capability to initiate attacks against the United States, remains the most lethal of al Qaeda affiliates, and is among our highest counterterrorism priorities. The Department is working closely with Yemeni forces to capture or kill key AQAP leadership and operatives, and our programs to train, advise, and equip Yemeni forces are critical to long-term efforts against AQAP.

In the Middle East and Levant, ISIL, al-Nusrah Front, and other extremist networks pose threats to U.S. interests and persons in the region. We also face a threat to the U.S. Homeland by a group of seasoned al Qaeda operatives who traveled to Syria and are known as the Khorasan Group. These groups, along with the thousands of foreign fighters they have attracted over the past few years, will remain a serious concern and top counterterrorism priority for the United States and our international partners. If confirmed, I would support improving coordination and information sharing on foreign extremist flows from Syria, and would continue working with Jordan, Lebanon, Turkey, and Israel to bolster regional stability.

In the AFRICOM area of responsibility, our top counterterrorism priorities are al-Shabaab and al Qaeda in the Islamic Maghreb (AQIM). Somalia-based al-Shabaab poses a threat to U.S. and Western interests in the Horn of Africa. Several years of operations by the AMISOM, together with our counterterrorism operations, have weakened al-Shabaab and reduced its safe-havens in Somalia. Al-Shabaab remains, however, a threat because it has demonstrated a capability to stage complex, high-profile attacks against Western targets outside of Somalia and continues to advance similar plots to harm U.S. citizens in the region.

Algeria-based AQIM and its regional-based associates have flourished from instability in Libya and Mali; however, there is no current, credible evidence that AQIM is a direct threat to the U.S. Homeland.

In the remaining geographic combatant commands, the threat from al Qaeda is less pronounced. If confirmed, I would continue working with the intelligence community, interagency colleagues, and foreign partners to disrupt and dismantle any emerging threats from al Qaeda in the areas of responsibility of the ASD(ISA).

Question. What is your understanding of the Department's role in the U.S. strategy to combat terrorism?

Answer. The U.S. Government is engaged in a multi-departmental, multi-national effort guided by the National Strategy for Counterterrorism. DOD supports this strategy principally by building the capacity of partner security forces, collecting intelligence, conducting information operations, and, when appropriate, conducting operations to capture or kill terrorists who pose a continuing, imminent threat to U.S. persons.

Question. Are you aware of any nexus between non-state actors and criminal networks?

Answer. Yes. There is a significant nexus between non-state actors and criminal networks worldwide. Non-state actors and criminal networks together pose threats to our national security interests and those of foreign allies and partners. For example, the FARC in Colombia have depended on criminal networks for years to conduct terrorist operations. Drug cartels in Mexico rely on global criminal networks to distribute their products and expand into new markets. Across Africa, illicit trafficking of wildlife and other natural resources facilitated by criminal networks provides funding for insurgents, violent extremist organizations, and terrorist organizations. Somalia-based pirate groups depend on transnational illicit networks to negotiate and secure ransoms to finance their operations. In Afghanistan, the Taliban continues to generate a significant percentage of its revenue through regional trade and taxation of illicit drugs, posing a direct threat to U.S. and coalition personnel and to our broader interests in the region.

Question. Given your current knowledge of DOD's programs, do you believe resources are aligned in a manner consistent with these counterterrorism priorities?

Answer. Yes. I believe the Department's counterterrorism resources are currently aligned and are consistent with the priorities outlined in the National Strategy for Counterterrorism. If confirmed, I would continue working with the Secretary, the Joint Staff, combatant commands, and interagency partners to ensure alignment of the Department's resources evolves with the nature—and geography—of the threat.

USE OF MILITARY FORCES FOR CIVILIAN LAW ENFORCEMENT

Question. Throughout the Western Hemisphere, there is increased use of militaries to conduct policing and public security roles.

Putting aside issues of corruption and capabilities, what is your assessment of this trend?

Answer. Our Latin American partners, particularly in Central America, have been left with few other readily available options, considering the almost complete breakdown of police and justice systems, and are increasingly looking to their militaries as a way to address the immediate security challenges. DOD supports the broader U.S. Government efforts to strengthen police and justice systems in these countries so they need not rely on their militaries.

Question. In your view, are these permanent shifts or temporary measures taken while the capabilities of police forces are improved?

Answer. I think these are temporary measures. Militaries in some countries have been directed to provide breathing space for police forces so that they can address significant shortcomings in capabilities. Once the elected civilian leadership in these countries has determined the police forces are capable of providing local security, these militaries should return to more traditional military roles.

Question. In your view, what are the benefits and risks of militaries taking on more public-security tasks?

Answer. In times of security crises, militaries can help civil authorities restore order, provide government presence and credibility, and aid public security forces to develop the capabilities and trust needed to reassume their lead role in maintaining citizen security and public order. However, the longer militaries in some Latin America serve in this role, the more likely it is that civil authorities could begin to depend on military forces, instead of focusing efforts on improving police forces.

NATIONAL STRATEGY TO COMBAT TRANSNATIONAL ORGANIZED CRIME

Question. Transnational criminal organizations are having a debilitating impact on the ability of our foreign partners to govern their nations and provide opportunities for their people. DOD is by no means the U.S. Government's law enforcement agency, but it does bring unique enabling capabilities to our Nation's Federal law enforcement agencies.

What is your understanding of the President's strategy to combat transnational criminal organizations?

Answer. The President's 2011 Strategy to Combat Transnational Organized Crime recognizes that transnational organized crime (TOC) has expanded dramatically in size, scope, and influence over the past 20 years, and now poses a significant and direct threat to national and international security. The strategy organizes a U.S. Government approach to counter TOC networks by enhancing information and intelligence sharing of the interagency; strengthening law enforcement interdiction capabilities, investigations, and prosecutions; disrupting drug trafficking networks; and building and improving the capacity and cooperation of our foreign partners. The primary objective is to lower TOC from a U.S. national security threat to a manageable public safety concern. If confirmed, I would work to support the President's strategy on this issue.

Question. What role, if any, should the Department play in combatting transnational criminal organizations?

Answer. The President's 2011 Strategy to Combat Transnational Organized Crime calls on the U.S. Government to build, balance, and integrate the tools of national power to combat transnational organized crime and related threats. DOD provides unique capabilities and expertise in support of law enforcement and foreign partners' broader efforts to include intelligence, counter-threat finance, training, and detection and monitoring. If confirmed, I would work with the Department's senior leadership to ensure that the Department is appropriately organized, resourced, and authorized to support U.S. efforts against transnational criminal organizations that threaten U.S. national security.

Question. What role does ASD(ISA) play in combating transnational organized crime and in training and equipping partner security forces who have been tasked with combating it?

Answer. The ASD(ISA) works closely with the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict and other elements of the Department with counter-drug and counter-transnational organized crime responsibilities. If confirmed, I would work to ensure that the Department's activities to combat transnational organized crime, such as training and equipping of partner nations' security forces, align with broader DOD and U.S. national security objectives.

ILLICIT ARMS TRAFFICKING

Question. What is your understanding of the problem of illicit arms trafficking and the role of the United States to deal with the problem?

Answer. The arms market is complex and global. Existing regional and national arms export control systems do not provide complete, worldwide coverage. This creates gaps that are being exploited by illicit arms dealers. The United States can continue to assist countries by sharing best practices and intelligence to help close these gaps.

Question. In your view, to what extent, if at all, does the lack of national controls and enforcement on arms flows contribute to the illicit trafficking problem, and could efforts to respond to illicit trafficking be improved if other countries adopted and enforced national regulations on arms import, export, and transit similar to those of the United States?

Answer. Wherever illicit arms trafficking is widespread, the lack of effective national controls and secure borders contributes significantly to the illegal flow of arms. The adoption of national controls by affected countries, similar to those of the United States, would likely help to combat this problem. Our active participation in international export control regimes and other arms control fora are part of our strategy to help address the proliferation of arms and weapons technology.

Question. Do you think the arms trade treaty would enhance U.S. national security interests?

Answer. Yes. The arms trade treaty (ATT) that was negotiated in 2013 will serve U.S. national security interests. The ATT establishes international obligations for State Parties related to the trade of arms, while reaffirming the right of self-defense and the legitimacy of arms transfers for security purposes, without undermining existing nonproliferation and export control regimes. These obligations undertaken by States Parties will help to regulate the global arms market and prevent weapons from reaching the hands of terrorists, insurgents and human rights abusers.

MULTILATERAL PEACEKEEPING OPERATIONS

Question. What is your view on whether the United States should contribute additional military personnel to both staff positions and military observers in support of U.N. peacekeeping operations?

Answer. If confirmed, I would support considering additional contributions of U.S. military personnel to staff officer positions. Support for international peacekeeping remains a security objective for the U.S. Government, and the United States has a stake in the success of U.N. peacekeeping operations. I believe that, where practicable, the United States should continue to provide military personnel for U.N. peacekeeping operations, especially for key staff positions that can help shape the direction and success of the mission. If confirmed, I would carefully evaluate any proposals to contribute military or civilian personnel to a U.N. peacekeeping operation, weighing the positive impact of U.S. participation in the mission against other military commitments we have around the globe, and the estimated cost of U.S. involvement.

Question. What are the advantages and disadvantages of contributing additional military personnel to U.N. operations?

Answer. There are several potential advantages to contributing additional military personnel to U.N. missions including providing the opportunity to shape these missions and contribute to their overall success; professional development opportunities for military personnel to serve in a combined, multi-lateral environment; and receiving real-time information on emerging threats and crises from places where there might not otherwise be a U.S. presence. It also enables increased interaction between U.S. military personnel and numerous partner nations' military personnel, with whom we may not normally have the opportunity to serve.

The potential disadvantage of providing additional military personnel is the additional demands these assignments would impose on a U.S. military force that has seen extensive deployments in recent years, and that is still heavily engaged in overseas operations. However, I believe the selective placement of modest numbers of U.S. military personnel in addition to the personnel currently assigned to U.N. operations can have a positive impact on U.N. peacekeeping operations.

MASS ATROCITIES PREVENTION

Question. President Obama identified the prevention of mass atrocities and genocide as a core U.S. national security interest, as well as a core moral interest, in August 2011 under Presidential Study Directive 10.

What is DOD's role in addressing atrocity threats, and what tools does DOD have for preventing or responding to atrocities?

Answer. DOD is a member of the Atrocities Prevention Board, which has strengthened the Department's efforts and provided additional tools to prevent and respond to atrocities. DOD plays an important role in early warning and providing support to prepare and enable international partners to prevent mass atrocities.

DOD employs a range of atrocity prevention and response tools, from providing human rights training to partner security forces to supplying direct humanitarian assistance in active crises. If confirmed, I would continue to ensure that the Department contributes to U.S. efforts to prevent mass atrocities, particularly for those regions that will be within the International Security Affairs area of responsibility.

U.S. MILITARY BASING IN EUROPE

Question. DOD is currently undergoing a European Infrastructure Consolidation (EIC) effort. At the same time, the Department has requested additional funds for facilities in Europe, including almost \$175 million in military construction in fiscal year 2015 in support of the European Reassurance Initiative (ERI).

What is your understanding and assessment of the EIC and ERI initiatives and whether the goals of each can be accomplished in parallel?

Answer. The EIC and the ERI are separate but complementary U.S. initiatives which can be accomplished in parallel. Both initiatives are about increasing U.S. military effectiveness in Europe—the EIC through the consolidation of U.S. infrastructure to make U.S. forces more efficient, and the ERI through investments to U.S. presence, readiness, and responsiveness in Central and Eastern Europe. The EIC will not reduce our military capabilities in Europe, but will shift their location within Europe to lower costs, eliminate excesses, and maximize utility. The ERI will build on these adjustments by adding even more capability, including through a persistent U.S. air, land, and sea presence.

Question. If confirmed, how would you define and recommend the use of the key U.S. strategic interests for consideration in determining the U.S. military's force structure in Europe over the coming years?

Answer. I believe force structure in Europe remains vital to U.S. security and that of our allies and partners, and U.S. forces and facilities in Europe are likely to continue to be involved in any significant military operation we would undertake in the Middle East or Africa. Furthermore, Europe is home to the United States' primary strategic partners and we will continue to rely on those partners and allies to share the burden of protecting common interests. In the 2014 QDR, the Department reiterated its commitment to build security abroad and project power decisively to defeat aggression. European force structure—and the relationships and interoperability it enables—is critical to that mission, and if confirmed, I would work to uphold our commitment to European force structure.

Question. The United States has supported operations in both Africa and the Middle East from our military bases in Europe

What is your understanding and assessment of the potential impact, if any, on our ability to conduct operations in Africa and the Middle East if the United States were to lose access to or from bases in Europe?

Answer. Our partners and allies facilitate U.S. forces' ability to counter security challenges to U.S. interests in Europe, the Mediterranean, North Africa, and the

Middle East in a timely fashion. Base access in Southern Europe, for example, allows U.S. forces to conduct force protection missions, monitor and protect U.S. diplomatic posts, and evacuate U.S. diplomatic personnel and noncombatants in North and Central Africa. Losing access to this extensive network of facilities would harm our ability to protect U.S. assets and personnel in Europe and further afield.

Our footprint in Europe also affords U.S. personnel with opportunities to maintain relationships and interoperability critical to countering global security threats. For example, U.S. facilities in Germany, Italy, and Spain enable U.S. and European militaries to plan, train, exercise, and operate together effectively—activities vital to forming effective coalitions as we look for ways to cooperate through austere times. Coalition efforts like Operation Unified Protector in Libya, ISAF in Afghanistan, and Operation United Assistance in West Africa depend heavily on access to bases in Europe.

CONTINGENCY PLANNING

Question. One of the purposes of Goldwater-Nichols was to increase military and civilian attention on the formulation of strategy and contingency planning. The ASD(ISA) supports the Under Secretary of Defense for Policy who is required to assist the Secretary of Defense in preparing written policy guidance for the preparation and review of contingency plans and in reviewing such plans.

What is your view of the civilian role, as compared to the military role, in the formulation of strategy and contingency planning?

Answer. If confirmed as the ASD(ISA), I would view my role as providing the strategic context to complement the operational expertise that our combatant commanders apply. Specifically, I believe civilian leadership provides critical depth and expertise on regional dynamics, bilateral relationships and priorities, and U.S. regional policies, which help us shape the application of our military power.

Question. In your opinion, does the civilian leadership currently have an appropriate level of oversight of strategy formulation and contingency planning?

Answer. Yes. I believe that the current level of civilian oversight of strategy formulation and contingency planning is appropriate.

Question. What is your understanding and assessment of the capability and capacity of the Office of the Secretary of Defense and Joint Staff to provide comprehensive, objective and realistic joint analysis in support of formulating and evaluating strategy and operational plans and related force planning?

Answer. I believe the Department maintains a satisfactory level of analytic capacity to support strategy and operational plan development. My understanding is that the Office of the Secretary of Defense and the Joint Staff, working closely with the Services and Combatant Commands, have many analytic efforts and venues that support the Department's strategy development and planning oversight. I have benefitted from such analysis in my present role.

Question. What steps do you believe are necessary to ensure effective civilian control and oversight of strategy, contingency, and force planning?

Answer. The Department's civilian leadership is responsible for leading the development of a range of DOD planning efforts, with the support of military leaders. Civilian leaders must engage with military colleagues to understand military concepts and evaluate the validity of assumptions, particularly as they relate to political constraints, resource allocation, and strategic priorities. Civilian leaders should also ensure guidance continues to evolve as strategic and operational environments and objectives shift over time. Among my most important responsibilities, should I be confirmed, would be to ensure International Security Affairs informs force planning in a way that helps to define the future security environment and to support the President's policies.

Question. Many Geographic Combatant Commands' contingency and operation plans are undergoing DOD review. These reviews are justified for a variety of reasons including geo-strategic change, risk assessments, potential adversary and our own capability enhancements, and fiscal realities.

If confirmed, how would you determine whether the alterations to a contingency or operation plan are warranted due to geo-strategic change, risk assessments, potential adversary and our own capability enhancements, and fiscal realities?

Answer. If confirmed, I would rely on support from the Intelligence Community and the regional and policy expertise resident in International Security Affairs to guide and evaluate the combatant commands' planning efforts. Plans should provide viable options to the Secretary and the President that reflect realistic resource assumptions, account for an evolving security environment, and reflect decisions and actions that are viable by bringing together senior experts to evaluate and refine plans.

STRATEGIC REVIEWS

Question. What is your understanding and evaluation of DOD's processes for strategic assessment, analysis, decisionmaking, and reporting for each of the following strategic reviews?

- The QDR (section 118 of title 10, U.S.C.);
- The National Military Strategy (section 153 of title 10, U.S.C.);
- Global Defense Posture Review (section 2687a of title 10, U.S.C.);
- The Quadrennial Roles and Missions Review (section 118b of title 10, U.S.C.);
- The Unified Command Plan (section 161 of title 10, U.S.C.).

Answer. These strategic review documents and associated review processes offer opportunities for meaningful engagement with Members of Congress on the Department's strategic priorities, in addition to providing essential guidance to the defense enterprise. These reviews allow the Department to set priorities across the Services, combatant commands, and defense components, in the context of ever-shifting security and fiscal realities. They also communicate the Department's objectives to external audiences, including the U.S. public and our international partners.

The QDR articulates the Nation's defense strategy in support of the national security strategy. According to 10 U.S.C. section 118, the Department must conduct a comprehensive examination of the national defense strategy, force structure, infrastructure, budget, and other elements with the end of articulating the United States' defense strategy over the next 20 years. This strategy serves as a guide for U.S. military force structure, plans, and programs and is essential in enabling the Department to meet the current and future security challenges our Nation faces.

As directed in 10 U.S.C. Section 153, the Chairman of the Joint Chiefs of Staff prepares the National Military Strategy, which focuses on the U.S. military's strategic priorities. The National Military Strategy articulates the "ends, ways and means" in achieving the objectives outlined in the National Security Strategy and other strategic guidance documents, such as the QDR, as well as describing the strategic and operational risks associated with accomplishing the military's strategy.

The Global Defense Posture review is an annual report to Congress that is the product of a continuous review process to determine the best mix of continental U.S.- and overseas-based forces. The report is authored by the Under Secretary of Defense for Policy and the Chairman. The review also supports senior leaders in the Department to make resource decisions based on the Department's operational needs.

The Quadrennial Roles and Missions Review, a report required under section 161 of title 10, U.S.C., requires the Department to complete a comprehensive assessment of the roles and missions of the Armed Forces and the core competencies and capabilities of the Department to perform and support such roles and missions.

Question. If confirmed, what recommendations would you make, if any, to change title 10, U.S.C., that would update, improve, or make these reviews more useful to the Department and to Congress?

Answer. These reviews provide opportunities to assess and alter, as necessary, the Nation's defense strategy, required capabilities, and force structure for the Nation's security interests, future security environment, and available resources. If confirmed, I look forward to working with the Assistant Secretary of Defense for Strategy, Plans, and Capabilities (ASD SPC) to ensure that these reviews serve the needs of both the Department's senior leaders and the U.S. Congress.

Question. If confirmed, what recommendations would you make, if any, to improve DOD's processes for strategic assessment, analysis, policy formulation, and decision-making relative to each review above?

Answer. I believe that successful strategic reviews include senior leader guidance and involvement, collaboration across the Department, and transparent deliberations.

Strategic reviews require a robust analytical effort to provide a common understanding of future challenges and a common starting point for evaluating the proficiency and sufficiency of different force structures. If confirmed, I would work with ASD SPC to recommend that insights from previous reviews, along the lines of those described above, be applied to future Department reviews.

Question. According to the report of the bipartisan NDP, "the capabilities and capacities rightly called for in the 2014 QDR ... clearly exceed the budget resources made available to the Department."

Do you concur with this assessment? Do you believe it will be necessary to repeal sequestration in order to make available sufficient resources to execute the QDR strategy?

Answer. I concur with the NDP's concern that current and likely budget constraints are "dangerous and self-defeating," and significantly impact the Department's ability to do long-term force planning. I also concur with the NDP's advocacy for the Department's requested compensation reforms, which provide needed flexibility. A return of the sequester mechanism would break our defense strategy by denying DOD the budget level to prioritize its expenditure. This means that, as Deputy Secretary Work has said, not only would there be a risk to certain missions, but also other missions would be executed on longer timelines and with a greater risk to the force.

Question. According to the report of the bipartisan NDP, "national defense needs should drive national defense budgets, not the opposite."

What aspects of a strategy would indicate that a strategy is budget-driven versus budget-informed?

Answer. A budget-driven strategy defines ends, ways, and means based on available resources, and contains little to no risk because, by definition, the strategy is designed to do only what can be done with available resources. A budget-informed strategy considers national interests and objectives, assesses how to achieve those objectives given the strategic environment, and develops specific ways and means to try to meet desired ends, informed by the likely available resource levels. A successful strategy should be budget-informed to have relevance; a defense strategy is effective only if it is executable.

Question. According to the force sizing construct in the 2014 QDR, American forces should be able to "defeat a regional adversary in a large-scale multi-phased campaign, and deny the objectives of—or impose unacceptable costs on—another aggressor in another region."

The portfolio of the ASD(ISA) includes some of the most turbulent regions of the world. In the context of the recent and dramatic deterioration of the security environment in both the Middle East and Russia, as well as continuing instability in Asia, should the force sizing construct also mandate that American forces be able to defeat two adversaries at the same time, a standard embraced by previous QDRs?

Answer. U.S. forces will continue to be able to prevail in more than one conflict at a time. The 2014 QDR envisioned an uncertain and complex security environment. Therefore, it directed the Department to size and shape the Joint Force to respond to a wide range of challenges. The current force-sizing construct allows us to plan and deliver agile, technologically advanced forces of sufficient size to defend our Nation and secure our interests globally while preventing America's adversaries from achieving their objectives.

Question. The law requires the QDR to identify the budget plan that would be required to provide sufficient resources to execute successfully the full range of missions called for in that national defense strategy at a low-to-moderate level of risk, and any additional resources (beyond those programmed in the current Future Years Defense Program) required to achieve such a level of risk. The law also requires the QDR to make recommendations that are not constrained to comply with and are fully independent of the budget submitted to Congress by the President.

What is your understanding and assessment of the Department's QDR analysis and decisionmaking processes to address these two requirements?

Answer. The Department's QDR process is both strategy-driven and resource-informed. It determines the best mix of capabilities and investment portfolios for the Department to pursue. The Department accounts for both the fiscal climate and the strategic environment, and then makes difficult choices—and the QDR provides the strategic direction required to do so. This year, the QDR provided a specific assessment of what a return to sequester levels could mean for the risks associated with the execution of the Department's mission.

Question. In your view, is there analytical and/or practical value in a defense strategy that is unconstrained by or independent of the current or projected budget requests or fiscal environment?

Answer. An effective defense strategy should take a comprehensive view of the future security environment and ensure the Department appropriately prioritizes its efforts and addresses trade-offs in the needed capabilities, activities, and posture of the future force. If a Defense strategy were characterized by the application of fiscal constraints up front, its focus would be on establishing trade-offs within the force to meet budget targets, rather than on options for best achieving U.S. objectives.

WESTERN HEMISPHERE INSTITUTE FOR SECURITY COOPERATION

Question. Western Hemisphere Institute for Security Cooperation (WHINSEC), which replaced the School of the Americas in 2001, has the mission of contributing

to theater cooperation activities and capacity building efforts through the education and training of students in the Western Hemisphere from Canada to Chile.

What is your view of WHINSEC and its mandate?

Answer. The WHINSEC plays an important role as an educational institution focused on promoting democracy and human rights in the Western Hemisphere—and by providing professional education and training for military, civilian, and law enforcement personnel from countries throughout the Hemisphere. WHINSEC's mandate is to foster mutual understanding, transparency, confidence, and cooperation among participating nations, and to promote democratic values, respect for human rights, and knowledge and understanding of U.S. customs and traditions.

Question. In your view, does WHINSEC promote the national security interests of the United States in the Western Hemisphere?

Answer. Yes. WHINSEC promotes U.S. national security interests and supports strategic objectives of building lasting partnerships that will ensure security, enhance stability, promote respect for human rights, and enable prosperity throughout the Americas.

GLOBAL FORCE POSTURE

Question. As the Defense Department continues its assessment of projected budget cuts on its end strength, force structure, and other programs, it must also consider the costs, benefits, and risks associated with the permanent stationing of military forces in countries around the world. Based on a series of reports by the Government Accountability Office, evidence indicates that the Department is challenged in its ability to comprehensively and reliably estimate the cost of our global defense posture.

What is your understanding and assessment of the cost and benefits of the U.S. global defense posture and the stationing of U.S. military forces overseas?

Answer. I believe U.S. global posture is the most visible illustration of U.S. national security interests. It provides our allies and adversaries a measure of American resolve, while deterring aggression from our adversaries.

In evaluations of U.S. global posture, the Department considers bilateral relationships, operational imperative, force management impact, and fiscal costs. When we choose to station forces home, we have to consider basing and facilities cost alongside the rotational costs incurred when those units have to deploy abroad. On the other hand, stationing forces overseas embeds additional costs in basing, personnel (through allowances such as Cost of Living Allowance and Overseas Housing Allowance), and facilities accounts.

As the Department seeks a balance between the forces kept at home and those stationed abroad, DOD pays close attention to operational demands and regional conditions. If confirmed, I would continue to push for innovative methodologies that leverage America's strengths and advantages.

Question. In light of the force structure reductions associated with the Department's planned end strength cuts, and potentially even deeper future end strength cuts, if confirmed, how would you propose to allocate those reductions between forces based within the United States and forces stationed outside the United States?

Answer. Decisions affecting U.S. forces at home or abroad are considered through the lens I outlined above. Each decision is unique, but the Department uses a rigorous process that seeks to reassure our allies and partners while deterring our adversaries. If confirmed, I would work with my counterparts to determine the best options for military posture given the fiscal environment.

Question. What is your understanding and assessment of the DOD methodology and assumptions used to evaluate the relative cost of overseas posture compared to stationing forces in the United States?

Answer. If confirmed, I would work with the ASD SPC to ensure that the Department considers posture impacts on the achievement of strategic objectives, secures the most advantageous cost-sharing arrangements with partners, and ensures that cost considerations are appropriately analyzed and considered before resources are expended. Finally, I am committed to building the capacity of partners globally, which will allow U.S. overseas forces to focus on our core interests.

Question. If confirmed, what actions would you take or changes would you recommend, if any, to DOD's methodology and assumptions in determining the cost of overseas force posture compared to forces stationed in the United States?

Answer. If confirmed, I would work with the ASD SPC to ensure that U.S. forward-stationed posture is sized to meet operational requirements and leverages innovative presence paradigms. I would also expect to play a significant role in ensur-

ing that bilateral arrangements that support U.S. posture are as cost-effective as possible.

DETAINEE TREATMENT POLICY

Question. Do you support the provisions of section 1403 of the National Defense Authorization Act for Fiscal Year 2006 which state that no individual in the custody or under the physical control of the U.S. Government, regardless of nationality or physical location, shall be subject to cruel, inhuman, or degrading treatment or punishment?

Answer. Yes. The prohibition on cruel, inhuman or degrading treatment or punishment reflects American values and is in our country's best strategic interest. In the 21st century, the strength and appeal of our ideas and moral principles will be as important as our military might to America's leadership in the world. We must hold to those ideas that make this country great, and continue to inspire the growth of freedom and tolerance around the world, if we are to defeat violent extremism.

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. If confirmed, will you take steps to ensure that all relevant DOD directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ASD ISA?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

LETHAL ASSISTANCE TO UKRAINE

1. Senator AYOTTE. Ms. Slotkin, would you agree that the Defense Security Cooperation Agency (DSCA) should be conducting contingency planning to provide lethal assistance to Ukraine in order to minimize the time between a potential policy decision and the delivery of lethal assistance to Ukraine?

Ms. SLOTKIN. If confirmed, I commit to work with DSCA to ensure that it is prepared to provide information, equipment, and/or transportation for any items approved for provision to the Government of Ukraine. In order to provide that information, equipment, and/or transportation as quickly as possible once approved, I would work with DSCA to conduct as much research as possible on the pricing and

availability of all requested items in order to minimize the time between policy decision and delivery of assistance to Ukraine.

2. Senator AYOTTE. Ms. Slotkin, is DSCA developing a contingency plan to provide arms to Ukraine? If not, will you recommend or direct the DSCA to do so, if you are confirmed?

Ms. SLOTKIN. No. The Defense Security Cooperation Agency (DSCA) does not maintain contingency plans—instead, DSCA provides pricing and availability information on equipment, as Ukrainian requests come in. When policy decisions are made to provide either lethal or nonlethal security assistance, DSCA works to provide these items as expeditiously as possible. If confirmed, I commit to continue to work closely with DSCA to provide security assistance to the Government of Ukraine. I also commit to work with DSCA to conduct as much research as possible on pricing and availability on all requested items in order to minimize the time between policy decision and delivery of assistance to Ukraine.

[The nomination reference of Ms. Elissa Slotkin follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
November 13, 2014.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Elissa Slotkin, of the District of Columbia, to be an Assistant Secretary of Defense, vice Derek H. Chollet.

[The biographical sketch of Ms. Elissa Slotkin, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF MS. ELISSA SLOTKIN

Education:

- Columbia University
 - 2001–2003
 - Master’s Degree in International Affairs
- Cornell University
 - 1994–1998
 - Bachelor of Science, degree in Rural Sociology

Employment Record:

- Office of the Secretary of Defense, Department of Defense
 - Principal Deputy Assistant Secretary of Defense for International Security Affairs
 - August 2014 to present
- Office of the Secretary of Defense, Department of Defense
 - Performing the Duties of the Principal Deputy Under Secretary of Defense for Policy
 - July 2013 to August 2014
- Office of the Secretary of Defense, Department of Defense
 - Principal Deputy Assistant Secretary of Defense for International Security Affairs
 - November 2012 to July 2013
- Office of the Secretary of Defense, Department of Defense
 - Chief of Staff, Office of the Assistant Secretary of Defense for International Security Affairs
 - February 2012 to November 2012
- Office of the Secretary of Defense, Department of Defense
 - Senior Advisor for Middle East Transition
 - June 2011 to February 2012

From September 2003 to June 2011, I was an employee at the Central Intelligence Agency—but did frequent rotations around the U.S. Government:

Department of State

- Senior Advisor on Iraq
- July 2009 to May 2011

National Security Council

- Director for Iraq
- August 2007 to July 2009

Central Intelligence Agency

- Team Leader
- September 2006 to August 2007

Central Intelligence Agency

- Team Lead for Special Field Assessment Team
- May to September 2006

Office of the Director of National Intelligence

- Special Assistant to the Director of National Intelligence
- March 2005 to May 2006

Central Intelligence Agency

- Intelligence Briefer to Senior U.S. Officials
- June 2004 to March 2005

From September 2003 to June 2011, I was an employee at the Central Intelligence Agency—but did frequent rotations around the U.S. Government:

Honors and awards:

Military Secretary of Defense Medal for Outstanding Public Service, July 2014

Cranbrook Kingswood Distinguished Alumni of the Year, June 2014

Recognition Certificate for 10 years of Federal service, July 2013

Nine Central Intelligence Agency (CIA) Exemplary Performance Awards, March 2004 to August 2009

CIA Meritorious Unit Award, May 2006

War Zone Service Award: April 2005, September 2006, September 2008

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Ms. Elissa Slotkin in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior

to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Elissa Blair Slotkin.

2. **Position to which nominated:**
Assistant Secretary of Defense for International Security Affairs.

3. **Date of nomination:**
November 13, 2014.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
July 10, 1976; New York, NY.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to David Russell Moore.

7. **Names and ages of children:**
Two step-children:
Christine Ann Moore, 24 years old
Jennifer Clarice Moore, 21 years old

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Columbia University, 2001–2003, Master's Degree in International Affairs, May 2003

American University of Cairo, Summer 2001, Intensive Arabic Language Certificate (non-degree program)

Cornell University, 1994–1998, Bachelor of Science, degree in Rural Sociology, May 1998

Cranbrook Kingswood High School, 1990–1994, High School diploma, June 1994

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Principal Deputy Assistant Secretary of Defense for International Security Affairs, August 2014 to present, Office of the Secretary of Defense, Department of Defense, Washington, DC

Performing the Duties of the Principal Deputy Under Secretary of Defense for Policy, July 2013 to August 2014, Office of the Secretary of Defense, Department of Defense, Washington, DC

Principal Deputy Assistant Secretary of Defense for International Security Affairs, November 2012 to July 2013, Office of the Secretary of Defense, Department of Defense, Washington, DC

Chief of Staff, Office of the Assistant Secretary of Defense for International Security Affairs, February 2012 to November 2012, Office of the Secretary of Defense, Department of Defense, Washington, DC

Senior Advisor for Middle East Transition, June 2011 to February 2012, Office of the Secretary of Defense for Policy, Department of Defense, Washington, DC

From September 2003 to June 2011, I was an employee at the Central Intelligence Agency—but did frequent rotations around the U.S. Government:

Senior Advisor on Iraq, July 2009 to May 2011, Department of State, Washington, DC

Director for Iraq, August 2007 to July 2009, National Security Council, Washington, DC

Team Leader, September 2006 to August 2007, Central Intelligence Agency, Langley, VA

Team Lead for Special Field Assessment Team, May to September 2006, Central Intelligence Agency, Baghdad, Iraq

Special Assistant to the Director of National Intelligence, March 2005 to May 2006, Office of the Director of National Intelligence, Washington, DC

Intelligence Briefer to Senior U.S. Officials, June 2004 to March 2005, Central Intelligence Agency, Baghdad, Iraq

Political Analyst, September 2003 to June 2004, Central Intelligence Agency, Langley, VA

10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Secretary of Defense Medal for Outstanding Public Service, July 2014

Cranbrook Kingswood Distinguished Alumni of the Year, June 2014

Recognition Certificate for 10 years of Federal service, July 2013

Nine CIA Exemplary Performance Awards, March 2004 to August 2009,

CIA Meritorious Unit Award, May 2006

War Zone Service Award: April 2005, September 2006, September 2008

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Commencement speech for Cranbrook Kingswood High School, June 2014.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ELISSA SLOTKIN.

This 19th day of November, 2014.

[The nomination of Ms. Elissa Slotkin was returned to the President at the end of the 113th Congress on December 17, 2014, under provisions of Senate Rule XXXI, paragraph 6 of the Standing Rules of the Senate.]

[Prepared questions submitted to Mr. David J. Berteau by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Currently I see no specific changes in the act that I would recommend.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Currently I see no specific changes in the act that I would recommend.

DUTIES

Question. Section 138a of title 10, U.S.C., provides that the Assistant Secretary of Defense for Logistics and Materiel Readiness is to serve as the principal advisor to the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) on logistics and materiel readiness in the Department of Defense (DOD).

If confirmed as Assistant Secretary of Defense, what would you view as your principal responsibilities to the Secretary and the Under Secretary?

Answer. If confirmed, I would fulfill the statutory responsibilities of being the principal advisor on logistics and materiel readiness issues to the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology, and Logistics, and serving as the principal logistics official for DOD. In this capacity, my responsibilities would include providing oversight and developing policy for all logistics, maintenance, materiel readiness, strategic mobility, and sustainment support programs.

Question. If confirmed, what other duties do you expect that the Secretary and the Under Secretary would prescribe for you?

Answer. If confirmed, I would be ready to respond to changes of mission and leadership direction. Additionally, I would work to provide superior logistics support to the warfighter and find new ways to provide the goods and services we offer in a more efficient and cost effective manner.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have spent the past 35 years working in, studying, and teaching about national security and DOD. In that time, I have learned first-hand the importance of logistics and materiel readiness to the success of every mission. My specific experience includes 12 years of experience in DOD, including 4 years as Principal Deputy Assistant Secretary of Defense for Production and Logistics. In that capacity, all of the current functions of the Assistant Secretary of Defense for Logistics and Materiel Readiness reported to me, including authority, direction, and control of the Defense Logistics Agency. In addition, I have 15 years of experience at senior executive levels in private industry and 12 years of senior analysis of defense matters,

including logistics, contracting, and sustainment for major defense acquisition systems.

Question. Do you believe that there are any additional steps that you need to take to enhance your expertise to perform these duties?

Answer. While I believe that my experience described above has prepared me for the position of Assistant Secretary of Defense for Logistics and Materiel Readiness, there are many aspects of current DOD operations and analysis of which I need to become more familiar. If confirmed, I would plan to spend sufficient time to become more current in my awareness and understanding of current capacities and capabilities across DOD. I would also plan an extensive series of meetings with and visits to the practitioners and installations in the field, including maintenance depots, arsenals, and engineering centers involved in sustainment.

RELATIONSHIPS

Question. If confirmed, what would your relationship be with:

The Secretary of Defense.

Answer. If confirmed, I would serve as the principal advisor to the Secretary of Defense on logistics and materiel readiness issues within the DOD.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. If confirmed, I would serve as the principal advisor to the Under Secretary of Defense for Acquisition, Technology, and Logistics on all logistics and materiel readiness issues in DOD. I would also monitor, review, and provide oversight of all logistics, maintenance, materiel readiness, and sustainment support programs within the Department of Defense, in accordance with applicable DOD policies. In addition, I would assist the USD(AT&L) in the performance of his duties in any other capacity that he might direct.

Question. The Principal Deputy Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. If confirmed, my relationship with the Principal Deputy Under Secretary of Defense for Acquisition, Technology, and Logistics would be the same as that described above in relation to the Under Secretary of Defense for Acquisition, Technology, and Logistics.

Question. The Under Secretary of Defense for Personnel and Readiness.

Answer. If confirmed, I would work closely with the Under Secretary of Defense for Personnel and Readiness so that we can both carry out our statutory obligations relating to readiness and other matters related to logistics, including the logistics workforce.

Question. The Director for Logistics (J4), the Joint Staff.

Answer. If confirmed, my relationship with the Director for Logistics (J4), the Joint Staff, would be based on my role as principal advisor to the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology, and Logistics on logistics and materiel readiness in DOD, and on the J4 role as the principal advisor to the Chairman of the Joint Chiefs of Staff on logistics and materiel readiness.

Question. The Director for Operational Plans and Joint Force Development (J7), the Joint Staff.

Answer. If confirmed, I would coordinate and exchange information with the Director for Operational Plans and Joint Force Development (J7), the Joint Staff, to ensure that DOD logistics and materiel readiness policies are coordinated with J7 roles and responsibilities advising the Chairman of the Joint Chiefs of Staff on operational planning and joint force development requirements.

Question. The Director for Force Structure, Resources, and Assessment (J8), the Joint Staff.

Answer. If confirmed, I would coordinate and exchange information with the Director for Force Structure, Resources, and Assessment (J8), to ensure DOD logistics and materiel readiness policies are coordinated with J8 roles and responsibilities advising the Chairman of the Joint Chiefs of Staff on force structure and resource requirements.

Question. Commander, U.S. Transportation Command.

Answer. If confirmed, I would expect to work closely with the Commander, U.S. Transportation Command, to ensure seamless support to meet warfighter requirements.

Question. The Defense Logistics Agency.

Answer. If confirmed, I would exercise authority, direction, and control over the Defense Logistics Agency through its Director.

Question. The Army Materiel Command.

Answer. If confirmed, I would coordinate and exchange information with the Commanding General, Army Materiel Command, to ensure DOD logistics and materiel readiness policies are coordinated with the Commanding General's roles and responsibilities in meeting Army logistics requirements.

Question. The Naval Sea Systems Command.

Answer. If confirmed, I would coordinate and exchange information with the Commander, Naval Sea Systems Command, to ensure DOD logistics and materiel readiness policies are coordinated with the Commander's roles and responsibilities in meeting Navy logistics requirements.

Question. The Naval Air Systems Command.

Answer. If confirmed, I would coordinate and exchange information with the Commander, Naval Air Systems Command, to ensure DOD logistics and materiel readiness policies are coordinated with the Commander's roles and responsibilities in meeting Navy logistics requirements.

Question. The Marine Corps Systems Command.

Answer. If confirmed, I would coordinate and exchange information with the Commander, Marine Corps Systems Command, to ensure DOD logistics and materiel readiness policies are coordinated with the Commander's roles and responsibilities in meeting Marine logistics requirements.

Question. The Air Force Materiel Command.

Answer. If confirmed, I would coordinate and exchange information with the Commander, Air Force Materiel Command, to ensure DOD logistics and materiel readiness policies are coordinated with the Commander's roles and responsibilities in meeting Air Force logistics requirements.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges confronting the Assistant Secretary of Defense for Logistics and Materiel Readiness?

Answer. If confirmed, I would anticipate the major challenges to be driven by the defense funding shortfalls that will result under the Budget Control Act caps and the potential return to "sequester-level" funding in fiscal year 2016. Beyond that funding challenge, my additional concerns include:

- (1) Ensure that contingency operations forces and functions are provided with the best possible logistics support under available resources.
- (2) Ensure sufficient logistics capability to support future contingency or humanitarian operations.
- (3) Strengthen lifecycle management and long-term logistics planning within the acquisition process and at each Milestone decision.
- (4) Optimize the DOD supply chain so that it is globally responsive to mission needs.
- (5) Ensure that the logistics workforce is trained, experienced, and flexible enough to meet further logistics needs.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would plan to focus my actions on ways to:

- (1) Work to identify and illuminate the consequences of failing to alleviate the impact of Budget Control Act caps in fiscal year 2016 and beyond.
- (2) Support and update policies that optimize all elements of the DOD's logistics community, including the private sector and effectively support our warfighters at the best value to the American taxpayer.
- (3) Work with the military departments, OSD agencies, program offices, and industry to identify and implement long-term lifecycle management considerations throughout the acquisition process.

DEGRADATION OF EQUIPMENT READINESS DUE TO OPERATIONS TEMPO

Question. The committee has received testimony from senior DOD officials and the Military Services citing the effects of operations tempo on the materiel readiness of equipment deployed in support of contingency operations.

What is your understanding of the extent to which many years of combat operations have impacted the service life of major equipment items?

Answer. My research has shown that, on average, major defense acquisition programs today are 50 percent older than were similar systems at this stage of the 1990s drawdown in defense spending. This is a major concern, and if confirmed, I plan to spend considerable time on this question. I am familiar with public testimony and reports of the impact of high usage of equipment based on an aggressive operational tempo (OPTEMPO), coupled with the harsh environments in which

these systems have been operating. If confirmed, I would plan to examine the data regarding the impact of this OPTEMPO on materiel readiness

Question. If confirmed, what would your approach be to regenerating materiel readiness that has been degraded by operations tempo after many years of combat?

Answer. If confirmed, I would plan to understand the priorities of the Military Services in regenerating materiel readiness, work to validate and secure the funding to support those priorities, and optimizing the capability of DOD to reset and reuse existing systems.

DRAWDOWN, RESET, AND RECONSTITUTION

Question. The military departments continue to face major challenges in resetting and reconstituting their equipment as they complete the drawdown of forces in Afghanistan. The Military Services have repeatedly testified to the committee that they anticipate this effort will continue for several years beyond the end of combat operations.

Do you believe that the Army and the Marine Corps have set aside adequate levels of funding in their recent budgets and in future years to meet anticipated reset and reconstitution requirements?

Answer. The DOD budget justification material for fiscal year 2015 base budget and Overseas Contingency Operations (OCO) funding indicates the need for OCO funding for several years to meet reset and reconstitution requirements. Based on my research and on what I know now, I anticipate the need for OCO funding to continue for several years following completion of contingency operations. If confirmed, I would plan to work with the respective Military Departments to validate and obtain the necessary funding. In addition, reset and reconstitution assessments should cover all of DOD, as this problem might also extend to some Navy and Air Force assets.

Question. If not, what steps do you believe the Department should take to ensure that this effort is successfully completed in a timely manner?

Answer. If confirmed, and pending the results of the actions outlined in the answer to question 25, I have no additional steps to propose at this time.

OVERSEAS CONTINGENCY OPERATIONS FUNDING

Question. The committee has received testimony that the Military Services will require OCO funding for multiple years following the end of combat operations in Afghanistan.

Given the uncertainty of OCO funding availability in future years, what enduring maintenance capabilities and activities, if any, would you recommend be transferred to base budget requirements?

Answer. The challenges of reconciling OCO funding with base budgets affects all of DOD. This problem is exacerbated by the potential return to "sequester-level" funding in fiscal year 2016. Absent relief from the Budget Control Act caps, the need for OCO funding is likely to continue for several years following completion of contingency operations. If confirmed, and to the extent that Congress restores funding through a balanced approach, I would plan to work with the military departments to identify and migrate those enduring maintenance capabilities and activities into base budget requirements.

Question. What logistics and maintenance activities, if any, would you recommend eliminating that have been funded with OCO over the last decade?

Answer. At this time, I have no recommendations for eliminating activities that have been funded with OCO over the last decade. OCO funding levels should support the requirements generated by overseas contingency operations.

Question. What impact will the eventual end of OCO funding have on the Military Services maintenance programs and efforts?

Answer. Unless Congress acts to restore needed base budget funding through a balanced approach, any premature elimination or reduction of OCO will negatively impact the Department's ability to generate readiness to sustain current operations, emerging missions, and long-term national defense priorities.

SEQUESTRATION

Question. While the Bipartisan Budget Agreement Act of 2013 gave temporary relief to some of the negative effects of sequestration, the long-term effects of the Budget Control Act of 2011 continue to present significant challenges to the DOD in fiscal year 2016.

If sequestration remains in law, going into fiscal year 2016, what specific capabilities and activities related to logistics and maintenance will be affected?

Answer. My research showed that sequestration impacts in fiscal year 2013 hit harder on spare parts, consumable items, and logistics support than on many other areas of the defense budget. I would expect a similar impact from a return to “sequester-level” funding in fiscal year 2016, with a disproportionate impact on the Military Services’ operations and maintenance accounts—the primary source of readiness funding. Both the purchase of repair parts and the induction of equipment into organic and private sector facilities for scheduled and nonscheduled maintenance would be directly affected by reductions in operations and maintenance accounts.

DEPOT MAINTENANCE STRATEGIC PLANS

Question. The military departments regularly update their depot maintenance strategic plans to address the appropriate levels of capital investment in facilities and equipment, public-private partnerships, workforce planning and development, and the integration of logistics enterprise planning systems.

What is your understanding of the extent to which the Military Services have updated or revised their depot maintenance strategic plans to address current and future logistics and maintenance requirements?

Answer. I am aware that the military departments regularly update their depot maintenance strategic plans. While I am familiar with the recently released Army Organic Industrial Base Strategic Plan and the Navy Depot Maintenance Strategic Plan, if confirmed, I would plan to evaluate these plans and those of the other Military Services against their current and future logistics and maintenance requirements.

Question. Do you believe that the steps taken by the Military Services are adequate, or are additional measures needed?

Answer. If confirmed, I would plan to review the steps taken with each Military Service and determine their adequacy.

Question. What is your understanding of the extent to which the Military Services have assessed the effects of reset on the baseline budgets, competing demands to reset equipment to meet unit readiness goals, the preservation of core capabilities, and the risk level that organic depot maintenance facilities may be able to accommodate in order to complete reset workload requirements?

Answer. If confirmed, I would plan to review with the Military Services their reset plans, funding requirements, and effects on base budgets, readiness, core capabilities, and risk.

Question. What is your understanding of the extent to which the depots’ plans address the need to manage workload requirements as operations in Afghanistan draw down?

Answer. Recent events have demonstrated the need for flexibility in managing workload requirements as operations in Afghanistan draw down. If confirmed, I would plan to meet with the Military Services and review their plans and the funding needed to support them.

Question. Do you believe that the steps taken by the Military Services are adequate, or are additional measures needed?

Answer. If confirmed, and pending the results of the actions outlined in the answer to question 34, I would plan to examine whether additional measures might be needed.

Question. Congress places great importance on the proper implementation of the laws contained in Chapter 146 of Title 10 U.S.C. Please provide your interpretation and how you would implement, if confirmed, the following statutes: 10 U.S.C. 2460, 10 U.S.C. 2464, 10 U.S.C. 2466, and 10 U.S.C. 2476.

Answer. I have read and fully support these statutes. If confirmed, I will work with the Military Departments to ensure that the information is available to achieve readiness goals while maintaining full compliance with the statutes.

Question. Do you believe the amounts allocated for the activation of new workloads, including military construction projects, at the covered depots should be included in the calculation to determine the minimum investment of capital budgets as required by 10 U.S.C. 2476?

Answer. I believe the minimum investment should be what is needed to meet future sustainment requirements in the most efficient manner. If confirmed, I would plan to examine investments for the activation of new workloads at our depots, shipyards or arsenals that could enhance capabilities and provide benefits to accomplish existing workloads.

Question. Do you believe any of the sections included in Chapter 146 of Title 10 U.S.C., or any other statute affecting the depots should be modified? If so, why; and what is your desired outcome?

Answer. If confirmed, I have no proposed modifications to any of the sections of this statute.

CONDITION-BASED MAINTENANCE

Question. DOD aviation assets continue to be under high demand and operating well beyond their anticipated flying hours.

What is your understanding of the military services' plans related to the transmission, storage, and analysis of data important to improving maintenance efforts, decreasing maintenance and spare part costs, and increasing readiness?

Answer. I believe that better use of data is vitally important to improving maintenance efforts, decreasing costs, and increasing readiness. If confirmed, I would plan to examine the efforts of each of the Military Services to improve the transmission, storage, and analysis of such data in support of Condition-Based Maintenance.

Question. What is your understanding of the results of the condition-based maintenance effort thus far in terms of readiness and costs?

Answer. If confirmed, I would plan to assess the results and work to ensure that Condition-Based maintenance supports improvements in the cost of readiness.

PREPOSITIONED STOCK

Question. As the DOD positions materiel and equipment at locations around the world to enable it to quickly field a combat-ready force, it has been reported by the GAO that DOD plans to expand the use and reporting of its prepositioned equipment beyond combat operations may include training and joint exercises with neighboring countries, humanitarian relief, and reconstruction activities. The National Defense Authorization Act (NDAA) of Fiscal Year 2014 required the DOD to develop overarching strategic guidance and a detailed implementation plan to align the service specific prepositioning programs and create a more joint DOD-wide prepositioning program to achieve efficiencies and minimize unnecessary duplication, overlap, and fragmentation.

What is your understanding of the extent to which the Department is working with the Military Services to develop an integrated requirement for prepositioned stocks that is based on a department-wide strategy?

Answer. Prepositioned stocks have demonstrated an ability to improve the overall logistics capability required to ensure critical mission success. The NDAA for Fiscal Year 2014 requires the development of strategic guidance and an implementation plan. If confirmed, I will work with the Joint Staff, the Services, Combatant Commands, and DLA to meet the requirements of the report to Congress.

Question. What are the logistical and maintenance implications of an expanded use of prepositioned stock, particularly in today's constrained budgetary environment?

Answer. If confirmed, I would plan to evaluate the impact of prepositioned stocks on logistics operations, including the possibility of reducing the overall transportation costs for missions such as joint/combined exercises and Humanitarian Assistance efforts, especially in large geographic areas like the Pacific.

Question. How would you plan to coordinate service efforts to identify and validate the requirements for the expanded use and increase in demand of prepositioned stocks?

Answer. If confirmed, I would plan to review current policy and to ensure that the policy provides guidance for validation of expanded use of and demand for prepositioned stock as well as reporting the information necessary to track implementation and prioritize funding to meet shortfalls.

Question. Do you believe that the Military Services have adequately assessed which of the many pieces of nonstandard equipment that were purchased to meet urgent warfighter needs should be added to the prepositioned stock sets?

Answer. I believe that the concept of assessing existing equipment for prepositioning potential is a good concept. If confirmed, I would review existing policies and the data on such nonstandard equipment.

Question. What additional reset and sustainment resources will be needed to add to these stocks?

Answer. If confirmed, I would plan to engage in any ongoing review of prepositioned stock resource requirements. Nonstandard items could create the need for additional support costs, but those could be offset by a reduction in costs for new equipment. Pending the outcome of such a review, I am unaware of any additional resource needs.

Question. In your view, have the Military Services identified adequate funding to meet its plans to reconstitute its prepositioned stocks around the world?

My research has shown significant drawdowns of prepositioned stocks to support operations in Afghanistan and Iraq. If confirmed, I would plan to examine whether policies enable the Military Service's prepositioned stock programs to address requirements within budget constraints.

Question. What steps, if any, would you take if confirmed to address these issues?

Answer. I believe that prepositioning decisions should be based on strategy, plans, and requirements that are consistent with logistics capabilities. If confirmed, I would plan to work to ensure that policies on prepositioned equipment provide the Military Services with the guidance needed for programming decisions and the data to track implementation and shortfalls.

DEFENSE LOGISTICS AGENCY FULFILLMENT OF SPARE PARTS ORDERS

Question. In the past, the Air Force Logistics Centers (ALCs) have expressed frustration over DLA's inability to deliver some parts on time to the ALCs. Even a small percentage of spare parts that are not delivered on time can ground an aircraft. Some parts can take well over a year to arrive at the ALCs and it appears that DLA will often not order parts until the aircraft reaches an ALC. As a result, the Air Force is sometimes forced to cannibalize a part off of one aircraft to repair another.

What is your view of DLA's track record on delivering parts, particularly to the Air Force's ALCs?

Answer. I am aware of reports similar to the ones cited above, and it is my understanding that recent reports show progress. If confirmed, I would plan to meet with DLA and each of the Military Services (including the Air Force) to review the processes and progress on parts delivery and to support any actions needed to continue improvement.

Question. What changes, if any, do you think are needed to improve DLA's performance in this regard?

Answer. If confirmed, I would plan to work to ensure that DLA remains responsive to the Air Force needs as well as to the needs of the other Military Services.

Question. In the past, there have been multiple reports and investigations conducted by the DOD's Inspector General and Government Accountability Office (GAO) which have identified several instances in which the DLA and Military Services have significantly overpaid for spare parts.

If confirmed, what will you do to ensure the DOD, Military Services, and other defense agencies do not allow contractors to overcharge for spare parts?

Answer. I have read some of the reports cited above, and I recognize that overcharging for spare parts is a major concern. If confirmed, I would plan to examine the guidance, tools, and training currently being used to reduce or eliminate such overcharging and to update guidance as needed to improve that guidance. I would plan to include in that review the pricing support capability offered by the Defense Contract Management Agency.

Question. If confirmed, what will you do to ensure that DOD, Military Services, and other defense agencies do not acquire excess inventory of spare parts?

Answer. I am aware of some of the actions underway within DOD to improve inventory management and to reduce the chance of acquiring excess inventory. I am also aware of ongoing work by the GAO with regard to this issue. If confirmed, I would plan to review the Department's strategy to improve inventory management as well as the results of audits and investigations.

Question. If confirmed, what will you do to ensure the Military Services improve the reliability of their spare parts forecasts they submit to the DLA?

Answer. There are a number of existing governance entities, such as the Joint Logistics Board, DLA/Service Days, and the Maintenance and Supply Executive Steering Committees, that are designed in part to help improve forecast reliability. If confirmed, I would plan to use those existing groups as part of the process to examine current forecasting. Additionally, I would plan to work with the Military Services to incorporate best practices from across DOD and to improve forecasting metrics that measure mission support.

CORROSION PREVENTION AND CONTROL

Question. The GAO has estimated that the Department spends over \$22.0 billion per year in costs related to corrosion of equipment and infrastructure. While DOD has established a central corrosion program management office and has institutionalized corrosion prevention and mitigation as a key component of the Department's Planning, Programming, Budgeting, and Execution (PPBE) process, efforts are frequently underfunded.

What is your understanding of the challenge to the readiness of the Military Services as a result of corrosion in equipment and materiel and the extent to which the Services are coordinating their efforts?

Answer. Corrosion has been a persistent challenge that every weapon system in the DOD has faced, and corrosion has a negative impact on readiness, cost and safety. If confirmed, I would plan to examine current practices and to work with the Military Services, Defense Agencies, and commercial entities to pursue the best solutions at the least cost to the Department.

Question. If confirmed, what would be your relationship with the Director of the Corrosion Policy and Oversight Office?

Answer. If confirmed, I would plan to collaborate and work closely with the Director of Corrosion Policy and Oversight in policy and technology development.

Question. If confirmed, how would you assess the implementation and effectiveness of corrosion prevention and control efforts in programs under your purview and, working with other responsible officials, address identified areas of concern?

Answer. Corrosion needs to be addressed across the entire life cycle of defense equipment from conception to disposal. If confirmed, I would plan to work with the Director of Corrosion Policy and Oversight and existing corrosion prevention control mechanisms. In addition, I would plan to address corrosion control and prevention as part of the materiel readiness function during design and development of weapon systems.

ASSET TRACKING, IN-TRANSIT VISIBILITY, AND RADIO FREQUENCY IDENTIFICATION

Question. The NDAA for Fiscal Year 2014 directed the Secretary of Defense to complete a comprehensive strategy and implementation plan for improving asset tracking and in-transit visibility across the DOD. In the past, Congress has also supported the DOD's Radio Frequency Identification (RFID) program in order to improve the visibility and identification of, and access to, equipment and supplies.

What experience and familiarity do you have with asset tracking, in-transit visibility, and RFID technologies and their implementation?

Answer. Asset tracking and in-transit visibility initiatives have been evolving since my previous experience in DOD logistics. If confirmed, I would plan to support the continued use of RFID and other tracking and visibility systems to continue to improve the Department's ability to track assets throughout the logistics supply chain.

Question. In order for RFID technology to be effective, it must be used consistently throughout DOD and the Military Services. One of the problems highlighted in ongoing contingency operations is a lack of understanding of RFID technology and how to use the devices, particularly in field operations.

If confirmed, what actions would you take to ensure that standardized training on the use of RFID and other tracking technologies is being provided to all necessary military and civilian logistics personnel?

Answer. Standardized training and usage makes sense. If confirmed, I would plan to review current policy and training to ensure consistency and standardization, across the logistics community, on RFID and its use. I am aware that DOD just published a document titled "Automatic Identification Technology (AIT) for DOD Supply and Transportation Processes." This document appears to provide a framework and baseline standard to guide DOD organizations in synchronizing the joint use of AIT media in support of DOD operations, and I would plan to begin my review with that.

DATA VALIDATION FOR DEPOT MAINTENANCE PUBLIC-PRIVATE WORKLOAD DISTRIBUTION REPORT

Question. Section 2466 of title 10 U.S.C. directs the Secretary of Defense to submit a report to Congress by April 1 of each year outlining the percent distribution of depot-level maintenance and repair workload between the public and private sectors for the preceding fiscal year and the projected distribution for the current and ensuing physical years. One of the continuing problems noted in the preparation of this report is the validity and accuracy of data submitted by the Services. As a result, the actual percentage of work completed at public depots is less than what is reported by the department in some cases.

If confirmed, what steps will you take to ensure the accuracy of DOD public-private workload distribution reporting?

Answer. Reporting under title 10, section 2466, the 50-50 law, is covered by DOD guidance to the Services for collecting workload distribution data, including specific requirements for maintaining supporting documentation and the conduct of internal audits. If confirmed, I would plan to work with the Services to improve accurate re-

porting, ensure compliance and to send Congress the most accurate data available on depot maintenance and public-private workload distribution.

DEFENSE PERSONAL PROPERTY SYSTEM

Question. After many years of costly development, DOD in 2009 implemented the Defense Personal Property System (DPS) which is a web-based system for managing personal property moves for all DOD personnel. The DPS incorporates numerous improvements including contractual awards to movers based on satisfactory performance, not lowest bid; full replacement value as the standard for lost, stolen or severely damaged personal property; on-demand web-based move counseling; and many other features. An important means of evaluating who the best and worst moving contractors are in DPS is satisfaction surveys that should be submitted by DOD personnel who have completed permanent change of station moves.

What is your understanding of the cost-efficiency of the DPS and whether its reliance on web-based systems has produced any savings for the Services?

Answer. I am aware of the transition to the web-based DPS and its goal of promoting additional competition between shippers in order to drive down costs while providing additional benefits to military servicemembers and their families. If confirmed, I would plan to examine current and projected benefits and savings as well as the overall performance of the DPS system.

Question. What is your understanding of the current return rate of satisfaction surveys by DPS customers?

Answer. If confirmed, I would plan to include in the examination cited in my answer to question 59 the return rate of the customer satisfaction surveys.

Question. If the rate is below 50 percent, to what do you attribute the inability to achieve a higher rate of return and do you believe that the current rate of return jeopardizes the ability to distinguish good and bad movers?

Answer. If confirmed, I would plan to include in the examination cited in my answer to question 59 both parts of this question on the return rate of the customer satisfaction surveys

Question. What methods do you think could properly be used to improve the survey return rate?

Answer. My experience with overseeing surveys is that there are a number of actions that can be taken to improve return rates, including outreach programs, survey design, and improving the ease of survey completion and submission. If confirmed, I would plan to include this question in the examination cited in my response to question 59.

Question. What is your understanding of actions being taken by U.S. Transportation Command and the Services to improve the performance and utility of DPS?

Answer. If confirmed, I would plan to include this question in the examination cited in my response to question 59.

Question. Since International Auto Logistics (IAL) took over the shipment of personal vehicles owned by military servicemembers last May, several reports have arisen regarding delays in the shipping and tracking of vehicles.

What is your understanding of the performance of IAL since assuming its logistical responsibilities last May?

Answer. I am aware of reports regarding unacceptable performance in delivering servicemembers' vehicles on time. If confirmed, I would plan to examine contract requirements and contractor performance, including corrective actions and mechanisms to hold the contractor accountable. The ultimate goal is to ensure performance and delivery of servicemembers' vehicles in a timely and satisfactory manner.

Question. If confirmed, what improvements would you make, if any, regarding the performance of IAL?

Answer. If confirmed, I would plan to include this question in the examination cited in my response to question 64.

LOGISTICS ROUTES FOR THE SUPPLY AND DRAWDOWN OF FORCES IN AFGHANISTAN

Question. What is your assessment of the adequacy and reliability of the current logistics routes available for the supply and drawdown of U.S. forces in Afghanistan?

Answer. Based on the information available to me, it appears that the current logistics routes are adequate to support both the resupply of remaining forces and the ongoing drawdown, with multiple routes to mitigate against a single point of failure. If confirmed, I would plan to make it a high priority to take the actions necessary to sustain this adequacy and reliability, particularly with the prospect of changing requirements.

Question. What role do you expect to play, if confirmed, in addressing the logistics challenges associated with the drawdown of U.S. forces from Afghanistan?

Answer. If confirmed, I would plan to continue to focus on operations in support of Afghanistan. This would be a high priority of me and my staff.

PLANNING FOR CONTRACTOR SUPPORT IN CONTINGENCY OPERATIONS

Question. The GAO has previously reported that DOD's OPLANs often do not include an approved Annex W addressing contract support requirements, contractor management plans, contract oversight processes, and manpower requirements to execute contractor oversight. Moreover, the GAO has found that the few Annexes that do exist merely "restate broad language from existing operational contract support guidance" and fail to identify military capability shortfalls that will require contract solutions or ensure that combatant commanders are aware of even the general scope and scale of contract support that will be needed for an operation.

Do you believe that the current level of military planning for contractor support in military operations is adequate and appropriate?

Answer. My research has shown that planning for and executing contractor support in military operations is a complex and continuously evolving dynamic. Based on that research, it is my belief that this will remain a work in progress for the foreseeable future. If confirmed, I would plan to examine current DOD processes to develop and apply lessons learned.

Question. What steps, if any, would you take if confirmed to improve military planning for contractor support in military operations?

Answer. This has been an area of focus for me since my service on the Commission on Army Acquisition and Program Management in Expeditionary Operations in 2007. If confirmed, I would plan to work across DOD to ensure that guidance and doctrine are implemented and that training is sustained for Operational Contingency Support.

PRIVATE SECURITY CONTRACTORS

Question. Federal agencies including DOD have spent more than \$5 billion for private security contractors in Iraq and Afghanistan over the last decade. Over this period, there have been numerous reports of abuses by private security contractors.

Do you believe DOD and other Federal agencies should reduce their reliance on contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. If confirmed, I would plan to examine DOD reliance on private security contractors and DOD roles in supporting such reliance by other Federal agencies. I am aware that the Defense Department has implemented several initiatives to promote the responsible provision of security services, including those directed by Congress such as accountability procedures and development and implementation of national standards, and I would plan to include those initiatives in my review. In particular, if confirmed, I would plan to work to ensure these security contractors are properly regulated and supervised and that their roles carefully limited and defined.

Question. What steps if any would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. If confirmed, I would plan to include this issue in the examination cited in my response to question 70. In particular, I would plan to work to ensure that DOD instructions remain current, clear, aligned with combatant commander guidance and orders, and consistent with U.S. defense and foreign policy objectives.

In addition, if confirmed, I would plan to work to continue to collaborate with the State Department and other governmental agencies to ensure consistent policy is developed and to promote a common international understanding of responsible use and oversight of private security services.

Question. Section 846 of the NDAA for Fiscal Year 2013 requires DOD to undertake risk assessments and risk mitigation whenever it relies on contractors to perform critical functions in support of overseas contingency operations.

What steps will you take, if confirmed, to ensure that the Department fully implements the requirements of section 846?

Answer. If confirmed, I would plan to include this issue in the examination cited in my response to question 70, including a review of current policy regarding planning requirements for situations when contractor personnel and equipment are anticipated to support military operations. I would also plan to work with the Joint

Staff to ensure that contingency planning includes risk assessment on the intended use of private security contractors. It is my belief that these risk assessments should be continually reassessed during operations.

LIFE CYCLE COSTS

Question. If confirmed, what steps if any would you take to ensure that life cycle maintenance requirements and sustainment support are considered in the acquisition process for new DOD systems?

Answer. If confirmed, I would plan to work with the Milestone Decision Authority and the Military Services to review current Department policy and ensure that guidance addresses life cycle maintenance and sustainment planning and support. I would also plan to continue with the efforts already undertaken by the Department and look at additional areas such as designing for supportability, Core determination, source of repair, and level of repair analysis as part of my responsibility to review program Life Cycle Sustainment Plans. Early consideration of sustainment places additional attention on how design decisions affect the life cycle cost, and I would plan to emphasize sustainment planning as part of all major program reviews. I would also plan to work with others in the Department to ensure our arrangements with industry are incentivizing innovation in areas that improve the Department's ability to maintain its weapon systems and reduce Operating and Support cost.

Question. Are you aware of information or concerns that new major weapon systems' operating and support costs may have exceeded estimates?

Answer. Rising operating and support costs have always been a concern. I am aware of and fully support the operating and support cost actions addressed in section 832 of the NDAA for Fiscal Year 2012 and, if confirmed, I would plan to work with my counterparts to ensure all appropriate actions are in place to control and manage operating and support costs across a system's life cycle.

Question. If confirmed, what actions will you take to ensure rising operating and support costs do not adversely affect the readiness of new equipment and the operational units to which this equipment is issued?

Answer. If confirmed, I will work with my Office of the Secretary of Defense, Joint Staff, and Service counterparts to review operating and support cost estimates during acquisition to identify initiatives that can be designed into a system or into the sustainment organization. My focus would be on delivering reliable and maintainable weapon systems that operate for longer periods without failure and that, when they do fail, can return to service more quickly and affordably. This requires supportability attributes be given the same level of attention as other performance attributes of our weapon systems. If confirmed, I would plan to work to ensure that this area continues to be addressed at major reviews and acquisition decisions as well as after fielding those systems.

Question. If confirmed, what actions will you take to ensure that the DOD will have the resources to properly maintain the readiness of this new equipment?

Answer. If confirmed, I would plan to work with the Joint Staff, Military Services, and the office of the Under Secretary of Defense for Personnel and Readiness to identify all resource requirements during acquisition to maintain the readiness of new equipment. This can partially be accomplished by continuing the existing requirements for sustainment-related Key Performance Parameters and affordability goals. I would also plan to work to ensure that weapon system readiness is managed at a level consistent with the Department's fiscal constraints. I would plan to take an active role in the Program, Planning, and Budgeting System to ensure that the Services readiness accounts are adequate to support our readiness requirements.

Question. The NDAA for Fiscal Year 2009 requires DOD alternatives in the acquisition program design trades.

Do you believe that the fully burdened cost of fuel is an appropriate factor for the Department to consider in the evaluation of acquisition alternatives?

Answer. I do believe that the inclusion of fully burdened cost of fuel in the analysis of alternatives and other comparative studies is appropriate for creating a fair comparison of the systems under consideration.

OPERATIONAL FOOTPRINT

Question. During combat operations in Afghanistan and around the globe, combat service support units are constantly at risk when transporting supplies.

What role do you expect to play, if confirmed, in developing strategies to reduce the logistical footprint of deployed units operating in hostile environments?

Answer. If confirmed, I would plan to examine current and future research and development efforts focused on reducing the logistical footprint of deployed units.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Logistics and Materiel Readiness?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

CAPITAL INVESTMENT AT DEPOTS/SHIPYARDS

1. Senator AYOTTE. Mr. Berteau, title 10 U.S.C. section 2476 requires—by law—the Secretary of each Service to invest in the capital budgets of the depots and shipyards of the Service not less than 6 percent of the average total combined maintenance, repair, and overhaul workload. Is each Service meeting this statutory requirement? Please provide the numbers for each Service for fiscal years 2012, 2013, and 2014. Please provide the numbers for each of the four public shipyards for fiscal years 2012, 2013, and 2014.

Mr. BERTEAU. Based on the fiscal year 2014 and fiscal year 2015 President's budgets, with the exception of the Army, each of the military departments have met or exceeded the statutory requirement to invest not less than 6 percent of the average total combined maintenance, repair, and overhaul workload funded at all the depots of that military department. I only have access to publicly reported data, and therefore I do not have the data for the individual shipyards, but the overall shipyard and individual Service calculations are provided below. The fiscal years 2012 and 2013 data are actuals. The fiscal year 2014 data are execution-year estimates as of the fiscal year 2015 budget submission.

	FY 2012	FY 2013	FY 2014
Army depots and Arsenals	6.5%	4.3%	4.6%
Air Force depots	7.2%	7.6%	8.9%
Department of Navy	7.9%	7.1%	6.0%
Naval Shipyards	8.9%	8.7%	6.5%

If confirmed, I would track performance of the military departments with regard to meeting this statutory requirement and would be available to discuss this issue further as needed.

2. Senator AYOTTE. Mr. Berteau, if you are confirmed, do you commit to ensuring that each of the Services meets the 6 percent statutory requirement?

Mr. BERTEAU. Yes, I am committed to complying with the statutory requirements.

[The nomination reference of Mr. David J. Berteau follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
November 12, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

David J. Berteau, of Maryland, to be an Assistant Secretary of Defense, vice Alan F. Estevez, resigned.

[The biographical sketch of Mr. David J. Berteau, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DAVID J. BERTEAU

Education:

LBJ School of Public Affairs, Univ. of Texas at Austin

- 1979–1981
- Master of Public Affairs

Tulane University

- 1967–1971
- Bachelor of Arts, English

Employment Record:

Center for Strategic and International Studies

- Senior Vice President, Director National Security Program on Industry and Resources
- March 2008–present

Clark and Weinstock

- Director, National Security and Homeland Security
- May 2003–February 2008

Maxwell School of Citizenship and Public Affairs, Syracuse University

- Professor of Practice, Director National Security Studies Program
- January 2001–May 2003

Science Applications International Corporation

- Senior Vice President
- September 1993–January 2001

U.S. Department of Defense

- Principal Deputy Assistant Secretary of Defense (Production and Logistics)
- January 1990–September 1993

U.S. Department of Defense

- Deputy Assistant Secretary of Defense (Resource Management and Support)
- April 1986–December 1989

U.S. Department of Defense

- Executive Secretary, President's Blue Ribbon Commission (Packard Commission)
- August 1985–April 1986

U.S. Department of Defense

- Special Assistant to the Deputy Secretary of Defense
- May 1984–August 1985

U.S. Department of Defense

- Special Assistant to the Assistant Secretary of Defense (Comptroller)
- January 1983–May 1984

U.S. Department of Defense

- Presidential Management Intern, Office of the Secretary of Defense
- September 1981–January 1983

Austin Independent School District, Austin TX

- Teacher

- December 1978–June 1979
Transportation Enterprises, Inc., Austin TX
- Bus Driver
- January 1976–December 1979
Avenues Food Coop, Austin, TX
- Cashier Coordinator
- September 1975–May 1976
Franklin Independent School District, Franklin, TX
- Teacher
- August 1974–August 1975
Perry Lumber Company, Hearne, TX
- Carpenter
- March 1974–August 1974
Sevananda Food Coop, Atlanta, GA
- Manager
- April 1973–February 1974
Sunshine Gardens Food Coop, New Orleans, LA
- Manager
- May 1972–March 1973
Howard-Tilton Memorial Library, Tulane University, New Orleans, LA
- Librarian Assistant
- September 1971–April 1972

Honors and awards:

- Distinguished Public Service Award, Lyndon B. Johnson School of Public Affairs, 2014
- Secretary of the Army Exceptional Public Service Medal, 2007
- NASA Outstanding Public Service Award, 2003
- DOD Distinguished Public Service Medal, 1992
- DOD Outstanding Public Service Medal (Oak Leaf Cluster), 1989
- DOD Outstanding Public Service Medal, 1987
- Lyndon B. Johnson Congressional Fellow, 1980–1981
- Tulane University Honors and Scholars Program, 1967–1971

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Mr. David J. Berteau in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

David John Berteau (1972–1975, nickname “Dharma”).

2. **Position to which nominated:**

Assistant Secretary of Defense for Logistics and Materiel Readiness.

3. **Date of nomination:**

November 12, 2014.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee’s executive files.]

5. **Date and place of birth:**

September 26, 1949; Hammond, LA.

6. **Marital Status:** (Include maiden name of wife or husband’s name.)

Married to Eunice Jane Bordelon.

7. **Names and ages of children:**

Stefan Andre Berteau, age 35.

Celeste Danielle Berteau, age 31.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Ponchatoula, Louisiana, High School; attended Sept. 1963–May 1967; graduated with a high school diploma, May 1967.

Tulane University; attended Sept. 1967–May 1971; graduated with BA in English, May 1971.

The University of Texas at Austin; 54 credit hours of non-degree program courses, Aug. 1976–Aug. 1979. Qualified for an elementary school teaching certificate from the State of Texas in 1979.

Lyndon B. Johnson School of Public Affairs, The University of Texas at Austin; attended Aug. 1979–Aug. 1981; graduated with a Master’s Degree in Public Affairs, Dec. 1981.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Senior Vice President and Director, National Security Program on Industry and Resources; Center for Strategic and International Studies; 1616 Rhode Island Ave NW, Washington, DC (prior to Sept. 2013, location was 1800 K St NW, Washington, DC); March 2008 to present.

Director of Defense and Homeland Security; Clark and Weinstock (firm’s name has since changed to Mercury); 601 13th St NW, Washington, DC (firm’s address has since changed to 701 8th St NW, Washington, DC; May 2003 to February 2008.

Lecturer for National Security Management Course, and occasional Adjunct Professor of Public Administration, Syracuse University; The Maxwell School of Citizenship and Public Affairs, Syracuse University; 200 Eggers Hall, Syracuse University, Syracuse, NY (note: this is the location of the school; the classes were taught and lectures given in Syracuse, in Washington, DC, and at remote locations as needed); June 2003 to present.

Adjunct Professor; Georgetown University; 3600 N Street, NW, Washington, DC; January 2006 to present.

Adjunct Assistant Professor; Lyndon B. Johnson School of Public Affairs, The University of Texas at Austin; P.O. Box Y, Austin, TX (note: classes were taught in Washington, DC); July 2012 to July 2014.

10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Presidential Management Intern, Office of the Secretary of Defense, U.S. Department of Defense, 1981–1983.

Special Assistant to the Assistant Secretary of Defense (Comptroller), Office of the Secretary of Defense, U.S. Department of Defense, 1983–1984.

Special Assistant to the Deputy Secretary of Defense, U.S. Department of Defense, 1984–1985.

Executive Secretary, President’s Blue Ribbon Commission on Defense Management (the Packard Commission), 1985–1986.

Deputy Assistant Secretary of Defense for Resource Management and Support, Office of the Assistant Secretary of Defense (Force Management and Personnel), Office of the Secretary of Defense, U.S. Department of Defense, 1986–1989.

Principal Deputy Assistant Secretary of Defense for Production and Logistics, Office of the Under Secretary of Defense (Acquisition), Office of the Secretary of Defense, U.S. Department of Defense, 1990–1993.

Chair, Defense Conversion Commission, U.S. Department of Defense (simultaneous position with above), 1992–1993.

Member of Defense Science Board Task Forces and Summer Studies in the period 1995–1999.

Member, NASA Advisory Council, 2002–2003.

Member, Secretary of the Army's Commission on Army Acquisition and Program Management in Expeditionary Operations, for 9 weeks in 2007.

Unpaid Government Consultant, Washington Headquarters Service, U.S. Department of Defense, for 2 weeks in 2013.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Senior Vice President and Director, National Security Program on Industry and Resources, Center for Strategic and International Studies, Washington, DC

Member, Board of Directors, R. Christopher Goodwin and Associates, Frederick, MD

Advisory Board Member, National Security Studies Program, Syracuse University, Syracuse, NY

Consultant, LMI, McLean, VA

Member, Federal Outreach Advisory Committee, Association of Defense Communities, Washington, DC

Partner, Bordelon and Berteau LLC, Opelousas, LA

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Fellow, National Academy of Public Administration

Fellow, Robert S. Strauss Center for International Security and the Law, University of Texas at Austin

Director, Procurement Round Table

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

No offices held or candidacies for any public office.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Registered as a member of the Democratic Party in Montgomery County, MD. No offices held or services rendered in the last 5 years.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

November 2013: \$500 to Michelle Nunn, Democratic candidate for U.S. Senate in Georgia

September 2014: \$500 to Michelle Nunn, Democratic candidate for U.S. Senate in Georgia

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Distinguished Public Service Award, Lyndon B. Johnson School of Public Affairs in 2013

Secretary of the Army Exceptional Public Service Medal in 2007

NASA Outstanding Public Service Award in 2003

DOD Distinguished Public Service Medal in 1992

DOD Outstanding Public Service Medal (Oak Leaf Cluster) in 1989

DOD Outstanding Public Service Medal in 1987

Lyndon B. Johnson Congressional Fellow, 1980–1981

Tulane University Honors and Scholars Scholarship, 1967–1971

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

"The Triumph of Process of Politics: The Base Closure Commissions." By David J. Berteau, in *Triumphs and Tragedies of the Modern Congress: Case Studies in Legislative Leadership*. Edited by Maxmillian Angerholzer III, James Kitfield,

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies and are on topics relevant to the position for which you have been nominated.

My work at CSIS entails numerous public speaking engagements. These speeches do not normally include formal text but are often accompanied by one or more briefing slides. The list below includes public and semi-public speaking engagements for the past 5 years. In some cases, there is a video and/or audio record or a transcript of the speaking engagement that is available. To assist the committee in its review, where possible, the list includes the link to those video and/or audio records or transcripts.

Berteau Public Speaking Engagements 2009–2014:

September 5, 2014, Panelist, "The Challenges of Complex Acquisition Efforts: Lessons Learned for Future Vertical Lift", <http://csis.org/event/challenges-complex-acquisition-efforts>, CSIS, Washington, DC

August 5, 2014, Moderator, Workshop on "Lowest Price Technically Acceptable (LPTA) or Best Value: Which Way Are We Going?", AFCEA Defense Acquisition Modernization Symposium "Better Buying Power: Do We Have It Right?", Ronald Reagan Building, Washington, DC

July 15, 2014, "U.S. Defense Outlook and Macro Trends" DOD Cost Analysts Symposium, Fort Belvoir, VA

June 27, 2014, Panelist, "A Discussion of the 2014 Quadrennial Homeland Security Review", <http://csis.org/event/discussion-2014-quadrennial-homeland-security-review>, CSIS, Washington, DC

May 15, 2014, "Overall Defense Contract Trends and Policy Implications" on Panel #21, Exploring Managerial Implications of Current DOD Contracting Trends, Harry Hallock, chair, NPS Acquisition Symposium, Seaside, CA

May 14, 2014, "Identifying Governance Best Practices in Systems-of-Systems Acquisition" on Panel #5, Beyond Better Buying Power: Assessing Progress and Institutionalizing Success, Jim Thomsen, chair, NPS Acquisition Symposium, Seaside, CA

May 1, 2014, "U.S. Defense Outlook and Macro Trends", TechAmerica Vision Federal Market Forecast Kick-off, Mclean, VA

April 22, 2014, "State of the Government", National Security Studies Program Maxwell School, Syracuse University, Syracuse, NY

April 12, 2014, Acceptance Speech, Distinguished Public Service Award, <http://youtu.be/qNQJv729EE4>, LBJ School of Public Affairs, University of Texas at Austin, Austin, TX

March 14, 2014, Panel Moderator for "Discussion on the 2014 QDR and FY 15 Defense Budget", with Clark Murdock, Maren Leed, Stephanie Sanok Kostro, and Sam Brannen, <http://csis.org/event/discussion-2014-qdr-and-fy15-defense-budget>, CSIS, Washington, DC

February 11, 2014, Federal Budgets and the Debt Ceiling, LBJ School of Public Affairs GPS International Speaker's Colloquium Series, Austin, TX

February 10, 2014, Keynote Speech on the Defense Budget, (Also panelist on Installations 2030 Breakout Session), Winter Forum, Association of Defense Communities, San Antonio, TX

February 5, 2014, Presenter at "Joint Think Tank Event: Alternatives to the QDR and Fiscal Year 2015 Defense Budget" With Todd Harrison and Jim Thomas of CSBA, Tom Donnelly of AEI, and Nora Bensahel of CNAS, Hosted by the Center for Strategic and Budgetary Assessments, <http://csis.org/event/joint-think-tank-event-alternatives-qdr-and-fy15-defense-budget>, Dirksen Senate Office Building, Washington, DC

December 19, 2013, Presentation with Greg Sanders on "U.S. Department of Defense Contract Spending and the Supporting Industrial Base, 2000–2012." <http://csis.org/files/publication/131207—Sanders—DODContractSpending—Web.pdf>, CSIS, Washington, DC

December 16, 2013, Panel Member, "The Federated Defense Project Launch", <http://csis.org/event/federated-defense-project-launch>, CSIS, Washington, DC

November 18, 2013, Moderator and Discussant, "A Path for Durable Defense Reform with HASC Vice-Chair Mac Thornberry (R-TX)", <http://csis.org/event/path-durable-defense-reform>, CSIS, Washington, DC

November 7, 2013, Panel Moderator, following speech by Frank Kendall, USD(A&L), on "Performance of the Defense Acquisition System: Looking Ahead", with panelists Pierre Chao, Jon Etherton, and Arnold Punaro, <http://csis.org/event/performance-defense-acquisition-system-looking-ahead>, CSIS, Washington, DC

November 5, 2013, Presenter and Panel Moderator on "Global Security Forum 2013: Has the Budget Crisis Shattered the Cold War Consensus on Defense Budgets?", with Steve Cortese, Jim Dyer, Charlie Houy, and David Lyles, <http://csis.org/event/global-security-forum-2013-has-budget-crisis-shattered-cold-war-consensus-defense-budgets>, Global Security Forum, CSIS, Washington, DC

September 3, 2013, Presentation of "Structure and Dynamics of the U.S. Federal Services Industrial Base, 2000–2012" with Greg Sanders, <http://csis.org/event/us-federal-services-industrial-base-report-release-0>, CSIS, Washington, DC

August 14, 2013 "The Asia Pacific Rebalance—What Does It Mean for Space and Missile Defense" <http://smdsymposium.org/wp-content/uploads/2013/09/Berteau-Asia-Pacific-Rebalance1.pdf>, U.S. Space and Missile Defense Symposium, Huntsville, AL

July 30, 2013, Presentation of Conference Summary Evaluation, IGCC 2013 Annual Conference on the Chinese Defense Industry, San Diego, CA

July 23, 2013, "Setting the Stage for the 2014 QDR", Panel Moderated by Kim Wincup, with Clark Murdock, Stephanie Sanok Kostro, and Sam Brannen, <http://csis.org/event/setting-stage-2014-qdr>, CSIS, Washington, DC

July 19, 2013, Moderator "Expanding Foreign Sales of U.S. Military Equipment: Industry Perspectives" with Jon Barney, David Scruggs, and Jim Lovelace, <http://csis.org/event/expanding-foreign-sales-us-military-equipment-industry-perspectives>, CSIS, Washington, DC

June 13, 2013, "Keynote Address: Policy Perspective", National Logistics Forum, National Defense Industrial Association, Arlington, VA

June 4, 2013, "Facing Down the Debt: Impacts on National Security", CSIS, International Policy Roundtable, Washington, DC

June 3, 2013, Panel on the Think Tank Letter for Defense Reform, With Gordon Adams, Mackenzie Eaglen, Todd Harrison, and Larry Korb, Hosted by the Center for Strategic and Budgetary Assessments, Hart Senate Office Building, Washington, DC

April 25, 2013, "The Ground Forces Industrial Base: A Conversation with Brett Lambert", <http://csis.org/event/ground-forces-industrial-base>, Willard Hotel, Washington, DC

April 15, 2013 "Implications of the Fiscal Year 2014 Defense Budget" With Maren Leed, Jim Dyer, and Clark Murdock <http://csis.org/event/implications-fy14-defense-budget>, CSIS, Washington, DC

April 9, 2013, "The Budget 'Deep Dive'" Spring Conference, Professional Services Council, Special Post-Conference Session, Tampa, FL

February 27, 2013, Panel Presentation "American Views on the Rebalance", Georgetown-CSIS Conference on "The U.S. Rebalance to Asia, A One Year Assessment", <http://csis.org/event/us-rebalance-asia-one-year-assessment-where-have-we-been-and-where-are-we-going>, Georgetown University, Washington, DC

February 21, 2013, "Emerging Policy and Practice Issues (2012)" with Steven L Schooner, West Government Contracts Year in Review Conference, Washington, DC

February 8, 2013, "Preparing for a Deep Defense Drawdown", CSIS Panel with Clark Murdock, Maren Leed, and Jim Dyer, CSIS, Washington, DC

January 30, 2013, Keynote speech "The Triple Threat -CR, Sequestration, and Debt Ceiling and the Dysfunctional Environment", National Defense Industrial Association, Conference on Earned Value Management Systems, Clearwater, FL

January 25, 2013, "Preparing for the 2014 Quadrennial Defense Review", panel on "Unique Challenges Facing DoD Under Budgetary Pressures", with Gordon Adams, Todd Harrison, and Michael O'Hanlon, <http://csis.org/event/preparing-2014-quadrennial-defense-review>, CSIS, Washington, DC

January 14, 2013, Keynote address "Where Are We, How Did We Get Here, Where Are We Going, and What Do You Watch For?", Association of Defense Communities Winter Forum, San Antonio, TX

January 14, 2013, Keynote address to the Defense Acquisition Symposium National Defense Industrial Association, Procurement Division, Ritz-Carlton Hotel, New Orleans, LA

December 18, 2012, "European Defense Trends 2012: Budgets, Regulatory Frameworks, and the Industrial Base" report release presentation with Guy Ben-Ari <http://csis.org/event/european-defense-trends-budgets-regulatory-frameworks-and-industrial-base-2011>, CSIS, Washington, DC

December 12, 2012, "It's Not About China"—Strategic Guidance and Air Sea Battle, NDU Conference on "Rebalancing to Asia: Air Sea Battle Concepts for Assured Access", Ft. McNair, Washington, DC

December 7, 2012, "Service Contracting", with Allan Burman, 2012 Nash & Cibinic Roundtable, Washington, DC

17. Commitments regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DAVID J. BERTEAU.

This 19th day of November, 2014.

[The nomination of Mr. David J. Berteau was reported to the Senate by Chairman Levin on December 9, 2014, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on December 16, 2014.]

[Prepared questions submitted to Ms. Alissa M. Starzak by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I believe that Goldwater-Nichols and other reforms significantly improved interservice and joint relationships within the Department of Defense (DOD). At this time, I am unaware of any need to amend Goldwater-Nichols. However, if I am confirmed and become aware of a need, I will recommend any changes I believe to be warranted through the established process.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. As noted above, I am not aware of any need to amend Goldwater-Nichols.

DUTIES

Question. What is your understanding of the duties and functions of the General Counsel of the Department of the Army?

Answer. The duties and functions of the General Counsel of the Army are determined and assigned by the Secretary of the Army. The General Counsel provides legal advice to the Secretary of the Army, the Under Secretary, the Assistant Secretaries, and other offices within the Army Secretariat and serves as the chief legal officer of the Department of the Army responsible for determining the controlling legal positions of the Department. I understand that the General Counsel's responsibilities extend to any matter of law and to other matters as directed by the Secretary, to include overseeing matters in which the Army is involved in litigation, taking final action on certain claims filed against the Army, providing professional guidance to the Army's legal community, and establishing and administering the Army's policies concerning legal services.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. Because of the broad nature of the duties and responsibilities of the office, the Army General Counsel must not only have good judgment and legal skills, but also the ability to build strong relationships and work collaboratively with individuals in the Army, across the executive branch, and in Congress. I believe my experience, both inside and outside DOD, has prepared me for this role.

After receiving a Bachelor of Arts degree, magna cum laude, from Amherst College, I attended the University of Chicago Law School, where I was an editor on the Law Review and graduated with honors. After graduation, I served as a law clerk to the Honorable E. Grady Jolly, on the U.S. Court of Appeals for the Fifth Circuit in Jackson, Mississippi. I subsequently moved to Washington, D.C., to practice law at the law firm of O'Melveny and Myers, where I focused on compliance, corporate investigations and white collar defense. In 2005, I joined the Office of General Counsel at the Central Intelligence Agency, before becoming a counsel on the Senate Select Committee on Intelligence in 2007. I currently serve as a Deputy General Counsel in the DOD Office of General Counsel, working on a variety of legal issues related to Congress, including issues directly related to the Army. I believe that this legal and practical experience—in three branches of government—will serve me well in addressing the wide range of issues that will face the Department of the Army.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the General Counsel of the Department of the Army?

Answer. I am confident that I have the necessary legal and professional experience, analytic skills, and leadership abilities to be the General Counsel of the Department of the Army. If I am confirmed, I will establish and maintain close and professionally cooperative relationships with the talented and dedicated attorneys in the Office of the General Counsel, with The Office of The Judge Advocate General of the Army, and with other offices dealing with matters of mutual interest in order to provide the best possible legal services to all members of the Department of the Army.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Army would prescribe for you?

Answer. If I am confirmed, I will be ready to execute the responsibilities of the General Counsel set forth in the General Order prescribing the duties of each principal officer of Headquarters, Department of the Army. In addition to these duties, I anticipate that the Secretary of the Army will expect me to manage the Office of General Counsel efficiently and effectively, ensuring that it provides accurate and timely legal advice. I also anticipate that the Secretary will expect me to work collaboratively with The Judge Advocate General, the General Counsels of DOD, the other military departments, and the defense agencies, and the legal staff of other Federal agencies.

Question. In carrying out your duties, how will you work with the General Counsel of DOD?

Answer. While the General Counsels of the Army, Navy and Air Force serve as the chief legal officers of their respective departments, the General Counsel of DOD is the chief legal officer and final legal authority for the entire DOD. If confirmed, I intend to continue the close professional relationship I have with Mr. Stephen Preston, the General Counsel of DOD, by meeting regularly and collaboratively working in furtherance of the best interests of DOD.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the General Counsel of the Department of the Army?

Answer. The General Counsel of the Department of the Army must provide accurate and timely legal advice on the full spectrum of matters that arise in the Army.

In a time of shrinking budgets, the General Counsel will be confronted with significant legal matters related to balancing and transitioning the Army. In addition, I expect that the General Counsel will confront significant challenges related to the prevention of, and response to, sexual assault, military and civilian personnel policies, acquisition, and compliance with environmental law.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I plan to prioritize legal issues consistent with the Secretary of the Army's priorities, and to work closely with the Secretary, the Chief of Staff, The Judge Advocate General, and the attorneys in the Office of the General Counsel to provide timely, accurate, and candid legal advice. If confirmed, I will also ensure that the Office of the General Counsel is appropriately resourced and staffed to address those priorities.

Question. What do you see as the most significant legal issues the Army will face in the coming year?

Answer. In an environment of declining resources, the Army is facing difficult policy choices and a period of significant transition. Those efforts to rebalance and reform the Army will invariably involve significant legal questions. Although it is difficult to predict exactly what other significant legal issues will arise in the coming year, if confirmed, I will work closely with the talented team of attorneys and judge advocates in the Office of the General Counsel to address those issues.

Question. Does the Army Office of the General Counsel have the resources to deal with these problems?

Answer. At this time, I believe the Office of the General Counsel has the resources needed to address the many difficult legal issues confronting the Army today. If I am confirmed, I will be in a better position to evaluate this important management and leadership issue.

Question. What broad priorities will you establish in terms of issues which must be addressed by the Office of the General Counsel of the Department of the Army?

Answer. If confirmed, I plan to carefully examine the structure and functioning of the Office of General Counsel to ensure that it continues to appropriately address the needs of the Army as changes are made to the Army's operating framework. To provide high-quality, timely legal advice, the Army legal community must be integrated into the broader Army community and involved at all stages of the decision-making process. If confirmed, I also intend to carefully review programs for attorney recruitment and retention to ensure that the Office has the skills and capacity to address the challenges of the future.

RELATIONSHIPS

Question. What is your understanding of the formal and informal relationship between the General Counsel of the Army and the following offices?

The General Counsel of the Department of Defense.

Answer. I understand that the General Counsel of DOD, Mr. Stephen Preston, has worked closely with the general counsels of the military departments. If confirmed, I intend to continue the professional relationship I have with Mr. Preston, which will include routine consultation, communication, and cooperation on matters of mutual interest, furthering the best interests of the Department of the Army and DOD.

Question. The Secretary of the Army.

Answer. As the head of the Department of the Army, the Secretary of the Army is responsible for all affairs of the Department. If confirmed, my primary responsibility will be to provide the Secretary with clear, concise, and correct legal advice and counsel, and to perform the duties and functions he has assigned. In order to execute these responsibilities to the highest standard, I intend to establish a strong relationship with the Secretary of the Army that will enhance my ability to communicate with him directly and candidly on all matters.

Question. The Chief of Staff of the Army.

Answer. The Chief of Staff of the Army is the senior military officer of the Department of the Army and a member of the Joint Chiefs of Staff. The Chief of Staff is directly responsible to the Secretary of the Army on all matters except those related to his role as a member of the Joint Chiefs of Staff. If confirmed, I will work closely with The Judge Advocate General to continue the excellent relationship between the Army General Counsel, the Chief of Staff, and the Army Staff.

Question. The Assistant Secretaries of the Army.

Answer. I understand that the five Assistant Secretaries of the Army perform the duties and responsibilities assigned to them in statute and prescribed by the Secretary of the Army. In broad terms, the Assistant Secretaries formulate and oversee

policies and programs within their functional areas. As the chief legal officer of the Department of the Army, the General Counsel is responsible for providing legal advice, counsel, and guidance to the Assistant Secretaries and their staffs. If confirmed, I will seek to establish strong, productive relationships with each of the Assistant Secretaries and ensure that the Office of the General Counsel continues to provide timely and correct legal advice to their respective staffs.

Question. The Judge Advocate General of the Army.

Answer. In coordination with the Army General Counsel, I understand The Judge Advocate General serves as military legal advisor to the Secretary of the Army and the primary legal advisor to the Chief of Staff of the Army, members of the Army Staff, and members of the Army generally. Additionally, I recognize that The Judge Advocate General has the primary responsibility for providing legal advice and services regarding the Uniform Code of Military Justice (UCMJ) and the administration of military discipline. A close, professional relationship between the civilian and uniformed members of the Army's legal community is critical. If confirmed, I will work collaboratively with The Judge Advocate General to provide the best possible legal support to the Army.

Question. The Inspector General of DOD.

Answer. The Inspector General of DOD is responsible for advising the Secretary of Defense on criminal investigative matters and all other matters relating to the prevention and detection of fraud, waste, and abuse within DOD. If confirmed, I will work with the Inspector General of DOD on matters related to the Department of the Army to ensure that Army interests are fully and fairly represented and to ensure Army actions taken as a result of DOD Inspector General recommendations are executed in compliance with applicable law, directives, and regulations.

Question. The Inspector General of the Army.

Answer. The Inspector General of the Army reports directly to the Secretary of the Army regarding the discipline, efficiency, and economy of the Army, and on other matters specifically assigned by the Secretary. If confirmed, I anticipate maintaining a close and professional relationship with The Inspector General to ensure that he and his staff have the legal advice and support they require for mission success.

Question. The General Counsels of the other military departments.

Answer. Like the General Counsel of the Army, the General Counsels of the other military departments serve and act under the authority, direction, and control of the Secretaries of their respective Departments. If confirmed, I would expect to work closely with them on matters of mutual interest. I know that the General Counsel of DOD, Mr. Preston, facilitates this effort in order to best use the legal services across DOD. I look forward to participating in this effort.

Question. The Attorney General and the Department of Justice.

Answer. The Attorney General is the chief legal officer of the executive branch and may issue controlling guidance on certain legal issues. I also know the Attorney General and the Department of Justice represent the Department of the Army in litigation before Federal district courts and State courts. I view a strong relationship between the Army and the Department of Justice to be critical to success, and if confirmed, I will work in conjunction with The Judge Advocate General and the General Counsel of DOD to ensure the continuation of the Army's current cooperative relationship with the Attorney General and the Department of Justice.

RELATIONSHIP WITH THE JUDGE ADVOCATE GENERAL

Question. In carrying out your duties if you are confirmed, how will you work with the Judge Advocate General of the Army?

Answer. It is essential that the Army General Counsel maintain a close and cooperative relationship with The Judge Advocate General. A productive and positive relationship sets the tone and the direction for the effective delivery of legal services to the Army at all echelons. I know The Judge Advocate General shares this view, and if confirmed, we will work together to ensure the Offices of the General Counsel and The Judge Advocate General work closely together in the spirit of teamwork to deliver the best possible legal services to the members of the Army.

Question. How are the legal responsibilities of the Department of the Army allocated between the General Counsel and the Judge Advocate General?

Answer. The Army General Counsel serves as the chief legal officer for the Department of the Army. As a component of the Army Secretariat, the Office of the Army General Counsel is charged to provide advice to the Secretary of the Army and other Secretariat officials on any subject of law and on other matters as directed by the Secretary of the Army. The Army General Counsel is authorized to provide the controlling legal opinion in any matter for the Army. The Judge Advo-

cate General is the chief legal advisor to the Chief of Staff of the Army, members of the Army Staff, and members of the Army generally. In coordination with the Army General Counsel, The Judge Advocate General serves as the military legal advisor to the Secretary of the Army. The law prohibits interference with the ability of The Judge Advocate General to provide independent legal advice to the Secretary of the Army, which I fully support. The Judge Advocate General provides supervision over the delivery of a wide-range of legal services across the Army. The Judge Advocate General also has primary responsibility for providing legal advice and services regarding the UCMJ and the administration of military discipline. The Offices of the Army General Counsel and The Judge Advocate General have a well-developed and supportive working relationship in their respective responsibilities. If confirmed, I will work to continue this productive partnership for the benefit of the Army.

Question. If confirmed, how would you ensure that legal opinions of your office will be available to Army attorneys, including judge advocates?

Answer. I understand the respective offices of the General Counsel and The Office of The Judge Advocate General have a longstanding routine and cooperative working arrangement. Open lines of communication and collaboration are essential to ensure legal views and opinions issued by the Office of the Army General Counsel and the Office of The Judge Advocate General are readily available to all Army attorneys, both civilian attorneys and judge advocates. If confirmed, I will support this relationship in a positive manner.

Question. In response to attempts within DOD to subordinate legal functions and authorities of the Judge Advocates General to the General Counsels of DOD and the Military Services, Congress enacted legislation prohibiting any officer or employee of DOD from interfering with the ability of the Judge Advocates General of the Military Services and the legal advisor to the Chairman of the Joint Chiefs of Staff to provide independent legal advice to the Chairman, Service Secretaries, and Service Chiefs.

What is your view of the need for the Judge Advocate General of the Army to have the authority to provide independent legal advice to the Secretary of the Army and the Chief of Staff of the Army?

Answer. I believe it is essential that the expertise of The Judge Advocate General be available to the Secretary of the Army and the Chief of Staff of the Army. I fully support the law, in both principle and in spirit, empowering The Judge Advocate General of the Army to provide independent legal advice honed by years of experience and informed judgment on military affairs to the Secretary of the Army and the Chief of Staff of the Army.

Question. What is your view of the responsibility of Army judge advocates to provide independent legal advice to military commanders?

Answer. Army commanders are charged with the responsibility to maintain discipline and to ensure the lawful conduct of the forces under their control, in addition to the proper functioning of their unit or organization. Army Judge Advocates at all levels provide valuable aid to commanders and leaders to maintain discipline and to help avoid a myriad of legal pitfalls in the day-to-day business of command. A Judge Advocate's ability to provide candid legal advice to a commander and staff, both openly and in confidence as needed, is absolutely critical. Army commanders need and deserve the best legal advice and judgment available. This is best achieved when Judge Advocates are empowered to provide commanders with independent legal advice, supported by appropriate guidance from supervising attorneys.

Question. If confirmed, would you propose any changes to the current relationships between the uniformed judge advocates and the Army General Counsel?

Answer. If confirmed, I will always look for opportunities to improve and to strengthen the relationships between the uniformed judge advocates and the staff of the Office of the General Counsel. At this time, I am not aware of any need for change, and my understanding is that the current relationship works well.

Question. Are legal opinions of the Office of the Army General Counsel binding on all Army lawyers?

Answer. Because the Army General Counsel is the chief legal officer for the Department of the Army as directed by the Secretary of the Army, legal opinions issued by the Office of the Army General Counsel are controlling throughout the Department of the Army. As a general matter, however, I understand that opinions are typically drafted in collaboration with The Judge Advocate General. If confirmed, I would ensure that significant legal opinions are informed by the expertise of both civilian attorneys and judge advocates.

Question. How will you ensure that such legal opinions are available to Army lawyers?

Answer. Written opinions of the Office of the General Counsel for the Department of the Army are distributed in the ordinary course of business, using normal departmental distribution processes. If confirmed, I expect to continue this practice.

Question. If confirmed, are there specific categories of Army Counsel legal opinions that you expect to reconsider and possibly revise? If so, what categories?

Answer. I am not aware of any specific categories of Army General Counsel legal opinions in need of reconsideration or revision. If confirmed, however, as the need arises, I would review opinions warranting revision consistent with contemporary law in consultation with the appropriate attorneys and subject matter experts within the Army and elsewhere as appropriate.

Question. Article 6 of the UCMJ gives primary jurisdiction over military justice to the Judge Advocates General of the Army, Navy, and Air Force.

How do you view the responsibilities of the Army General Counsel in the performance of military justice matters with regard to the Judge Advocate General of the Army?

Answer. The Judge Advocate General's responsibilities to ensure the proper administration of the military justice system require direct and independent advice to the Secretary of the Army. If confirmed, I look forward to supporting The Judge Advocate General on military justice matters with consultation, advice, and assistance, as needed.

ATTORNEY RECRUITING AND RETENTION ISSUES

Question. If confirmed, how do you assess your ability to hire and retain top quality attorneys and provide sufficient opportunity for advancement?

Answer. I believe my background and experience have prepared me to meet the challenges of recruiting and retaining top quality attorneys and providing meaningful and rewarding opportunities for those attorneys to advance. Nevertheless, I believe the Army will face significant challenges in the coming years as we compete with the private sector and other Federal employers for quality attorneys, while shrinking resources will force us to demand more from the highly qualified attorneys we already have. If confirmed, I will work to ensure the Army allocates sufficient resources to attract and select only the best qualified candidates for military and civilian attorney positions. In doing so, I will work closely with the Office of The Judge Advocate General to retain the best attorneys to provide first-rate legal services to the Army, its commanders, soldiers, and family members.

Question. In your view, does the Department of the Army have a sufficient number of civilian and military attorneys to perform its missions?

Answer. My understanding is the Army General Counsel has a sufficient number of civilian attorneys to perform its mission, and the Judge Advocate General's Corps (JAG) has enough military and civilian attorneys to meet its current requirements. To address emerging requirements, however, including special victim capabilities (required by the National Defense Authorization Act for Fiscal Year 2013) and special victim counsel (required by the National Defense Authorization Act for Fiscal Year 2014), the Army JAG Corps is planning to grow. Recognizing that as the Army draws down, legal support requirements may increase, I will closely monitor these emerging requirements and ensure they are resourced appropriately.

Question. In your view, what incentives to successful recruiting and retention of attorneys, if any, need to be implemented or established?

Answer. I understand the legal market is projected to become increasingly competitive over the next several years, with fewer students graduating from law school and a likely increase in hiring by private sector law firms. In my view, it is crucial that the Army renew our commitment to funding current incentive programs, like student loan repayment and career retention bonuses, notwithstanding the current fiscal challenges. These programs are needed to attract and retain the highest quality attorneys.

DETAINEE ISSUES

Question. What role do you expect to play, if confirmed, in addressing legal issues regarding detainees?

Answer. Although issues relating to the treatment of detainees most often arise in combatant commands, there are many Army judge advocates serving in those combatant commands, and the General Counsel of the Army may in some circumstances have an appropriate role in assisting those judge advocates with legal issues regarding detainees.

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the

U.S. Government, regardless of nationality or physical location, shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the section 1403 prohibition in the best interest of the United States? Why or why not?

Answer. Yes, I believe this prohibition is in the best interest of the United States and is fully consistent with protecting our national security.

Question. Do you believe that the phrase “cruel, inhuman, or degrading treatment or punishment” has been adequately and appropriately defined for the purpose of this provision?

Answer. The Detainee Treatment Act of 2005 and the Military Commissions Act of 2009 define “cruel, inhuman, or degrading treatment or punishment” as the cruel, unusual, and inhumane treatment or punishment prohibited by the Fifth, Eighth, and Fourteenth Amendments to the U.S. Constitution. I think this definition provides a clear standard for ensuring that detainees in the custody of the U.S. Government are treated in a humane manner.

Question. What role do you believe the General Counsel of the Army should play in the interpretation of this standard?

Answer. The General Counsel should play an independent role in advising the Secretary of the Army and those who fall under his command on the standards governing the treatment of persons detained by the U.S. Army, including any interpretation of this legal standard.

Question. What role do you believe the Judge Advocate General of the Army should play in the interpretation of this standard?

Answer. The Judge Advocate General of the Army should be intimately involved in the interpretation of legal standards governing the treatment of detainees and should provide independent legal advice to the Secretary of the Army. The Judge Advocate General and the lawyers she leads—many of whom have served multiple deployments—bring experience and an important perspective to these and many other operational matters. If confirmed, and if called on to offer any guidance on this standard, I would expect to work collaboratively with The Judge Advocate General to provide clear advice to the field.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2–22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes, I support the requirements in revised Army Field Manual on Interrogations, FM 2–22.3, issued in September 2006, and DOD Directive 2310.01E, issued on August 14, 2014, that all detainees and detained personnel be treated humanely and with respect for their dignity.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

In your view, does section 2441 define these terms in a manner that provides appropriate protection from abusive treatment to U.S. detainees in foreign custody and to foreign detainees in U.S. custody?

Answer. I believe section 2441 provides an appropriate standard for protecting both U.S. detainees in foreign custody and foreign detainees held in our custody.

Question. Section 812 of title 10, U.S.C. states: “No member of the Armed Forces may be placed in confinement in immediate association with enemy prisoners or foreign nationals not members of the Armed Forces.”

Consistent with the statute, what recommendations would you provide the Secretary of the Army, if confirmed regarding the possible holding of foreign detainees at DOD Regional Corrections Facilities and Disciplinary Barracks?

Answer. In the event that the Secretary of the Army sought my advice on such a matter, I would ensure that my advice was consistent with applicable law, including section 812.

Question. What types of modifications would be needed at military detention facilities to ensure they are compliant with domestic and international law as well as meeting the special security considerations necessary for the safe detention of foreign law of war detainees?

Answer. At this time, I am not familiar with what modifications, if any, would be needed to ensure that a military detention facility complies with domestic and international law.

Question. If confirmed, what recommendations would you have for addressing the safety and security of the general public living near these facilities?

Answer. If confirmed, I would defer to law enforcement experts about what measures would be necessary to ensure the safety and security of the general public liv-

ing near these facilities, and would work closely with them to ensure that safety issues are appropriately and lawfully addressed.

Question. In November 2012, the U.S. Government Accountability Office (GAO) published a report titled: Guantanamo Bay Detainees: Facilities and Factors for Consideration if Detainees Were Brought to the United States. That report noted that only one DOD facility, the U.S. Disciplinary Barracks at Fort Leavenworth, KS, currently holds “inmates with sentences exceeding 5 years as well as inmates sentenced to death.” The report also stated: “in order to conform with international law and DOD policies . . .” detainees are to be “protected from public curiosity (for example, pictures of detainees’ faces are not disseminated publicly).”

In your view, what steps would need to be taken in the handling of law of war detainees in order to comply with international law and DOD regulations, including the “public view” prohibition raised by GAO?

Answer. DOD takes seriously its obligation to comply with the Geneva Conventions and other legal requirements relating to the treatment of detainees, including the requirement not to hold detainees out for public curiosity. If confirmed, I would ensure any advice I provide regarding law of war detention is consistent with those requirements.

CRIMINAL JURISDICTION OVER CONTRACTORS ON THE BATTLEFIELD

Question. The Military Extraterritorial Jurisdiction Act (MEJA) was enacted in 2000 to extend the criminal jurisdiction of the U.S. courts to persons employed by or accompanying the Armed Forces outside the United States.

In your view, does MEJA provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. I believe that the MEJA of 2000 does provide appropriate criminal jurisdiction over contractor employees in areas of combat operations. Although these types of prosecutions are rare, MEJA is an effective tool to hold contractors and DOD civilian employees accountable for serious criminal acts. All people supporting our Armed Forces, regardless of their location, should be held accountable for their actions, and MEJA can be an effective means of achieving that end.

Question. What changes, if any, would you recommend to MEJA?

Answer. My understanding is that MEJA is sufficient in its current form.

Question. What role would you expect to play, if confirmed, in developing administration recommendations for changes to MEJA?

Answer. If confirmed, I expect to be actively involved in any effort to develop administration recommendations for changes to MEJA. Because MEJA applies to civilian personnel working across DOD and its contractors, I would certainly work with officials in other agencies and military departments on any recommended changes to MEJA.

Question. Section 552 of the National Defense Authorization Act for Fiscal Year 2007 extended criminal jurisdiction of the military courts under the UCMJ to persons serving with or accompanying an Armed Force in the field during time of declared war or a contingency operation, such as our current operations in Afghanistan.

In your view, does the UCMJ provide appropriate jurisdiction for alleged criminal actions of contractor employees in Afghanistan and other areas of combat operations?

Answer. Yes. The UCMJ provides appropriate jurisdiction for alleged criminal actions of contractor employees in Afghanistan and other areas of combat operations. Civilians serving with or accompanying our Armed Forces overseas who commit crimes should be held appropriately accountable. While it is difficult to prepare for every scenario that may arise in a deployed environment, Article 2 of the UCMJ provides a means to address the misconduct of civilians accompanying the force in areas of combat operations.

Question. What is your view of the procedures agreed upon by DOD and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ?

Answer. If confirmed, I am prepared to examine, from an Army perspective, the relationship between the Department of Justice and DOD and to give thought to whether it reflects the appropriate balance.

Question. What changes, if any, would you recommend to the UCMJ to ensure appropriate jurisdiction for alleged criminal actions of contractor employees?

Answer. I have no recommendations for any such changes to the UCMJ at this time. If confirmed, and if after further review I perceive a need, I will recommend any changes I believe to be warranted.

IDENTIFICATION OF POTENTIAL EXTREMIST VIEWS

Question. In your view, do current Army policies limit the ability to include information about extremist views in official records that may assist in the identification of potential threats?

Answer. No. To my knowledge, current Army policy does not limit the ability to include this type of information in official records. The Army maintains several types of records that may help identify individuals whose extremist views could pose a threat. These official records include, but are not limited to, records managed by several U.S. Army commands, such as the U.S. Army Human Resources Command, the U.S. Army Criminal Investigation Command, and the U.S. Army Intelligence and Security Command.

Question. Do current Army procedures hinder the ability to share this type of information with other official agencies charged with identifying and monitoring potential extremist or terrorist activities?

Answer. My understanding is that Army procedures do not prohibit sharing this type of information with other official agencies where appropriate. Documents collected in official records are available to individuals or organizations that have a "need to know," which includes appropriate law enforcement agencies.

Question. What is your understanding of how the Army balances the need to identify and respond to potentially harmful extremist views held by soldiers against individual privacy and respect for the right of soldiers to hold and express personal beliefs?

Answer. Commanders are responsible for building healthy and positive social climates based on dignity and respect for treatment of one another, and maintaining good order and discipline. As such, the Army emphasizes the exercise of calm and prudent judgment to achieve the proper balance between security and the need to preserve a Soldier's right of expression. I understand that the Army gives commanders discretion and latitude to balance the mission of safeguarding the security of the United States while preserving the constitutional right of expression.

Question. Do you see a need for a change in this balance?

Answer. I do not currently see a need for change, but I am prepared to examine this issue if confirmed.

RELIGIOUS GUIDELINES

Question. In your view, do DOD policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other beliefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. I believe the Department of the Army and the DOD's policies support the goals of religious tolerance and mutual respect. If confirmed, in this area as well as other areas, I would ensure all Army policies uphold the Constitutional tenets of the Free Exercise and Establishment clauses of the First Amendment.

Question. In your view, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. I have been advised that under current Army policy, when participating in mandatory official events, chaplains are not compelled to offer prayers that are inconsistent with their personal beliefs or faith, but they are expected to remain sensitive to the pluralistic Army and society they serve. Given the diversity of religious views in the Army, this policy appear to strike the proper balance.

Question. Section 533 of the National Defense Authorization Act for Fiscal Year 2013 (P.L. 112-239), as amended by section 532 of the National Defense Authorization Act for Fiscal Year 2014 (P.L. 113-66) protects rights of conscience of members of the Armed Forces and chaplains and prohibits, so far as possible, use of such beliefs as the basis of any adverse personnel action, discrimination, or denial of promotion, schooling, training, or assignment. Members of some religious denominations have sincerely held beliefs in opposition to same-sex marriage.

In your view, may a member of the Armed Forces who has a sincerely held belief in opposition to same-sex marriage be subject to adverse personnel action or similar other adverse action, if he or she shares those personal views on the subject in a personal capacity?

Answer. If soldiers wish to express their personal views about this issue in an open forum and caveat those as such, it is within their right to do so, and they will not be subject to adverse personnel action or similar other adverse action for ex-

pressing those views. This is a fundamental right, and if confirmed, I will ensure that all Army policies protect this and similar rights.

ROLE IN THE OFFICER PROMOTION AND CONFIRMATION PROCESS

Question. What is your understanding of the role of the General Counsel of the Department of the Army in ensuring the integrity and proper functioning of the officer promotion process?

Answer. I understand the Secretary of the Army is responsible for the proper functioning of the Department of the Army's promotion selection process. The Army General Counsel is responsible for ensuring that the conduct of the board process conforms to all legal requirements; this includes reviewing all Memoranda of Instruction and selection board reports to ensure they comport with statutory standards. The Office of the Army General Counsel works closely with the Office of The Judge Advocate General to advise the Secretary of the Army of any case in which a selection board report or selection board process fails to adhere to the statutory standards and to provide counsel on appropriate corrective action.

Question. Do you see a need for change in this role?

Answer. I have been advised that the current process is working well; however, if I am confirmed and determine that a change is necessary and proper, I would work closely with the Assistant Secretary of the Army (Manpower and Reserve Affairs), The Judge Advocate General, and the Deputy Chief of Staff, G-1, to effect such change. Proper execution of this process is essential to maintaining the trust of the Army Officer Corps, Congress, and the American people.

GENERAL OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination for promotion and certain assignments.

If confirmed, what role, if any, would you play in the officer promotion system, particularly in reviewing general officer nominations?

Answer. I have been informed that for all Army officer promotions, including general officer promotions, the Office of the Army General Counsel, in coordination with The Office of The Judge Advocate General, plays an active role in the officer promotion system, to include reviewing Memoranda of Instruction that govern the conduct of promotion selection boards and subsequent promotion selection board reports.

Question. What is your understanding of the role of the General Counsel of the Department of the Army in ensuring the legal sufficiency of statutory selection board processes?

Answer. I understand the Secretary of the Army is responsible for the proper functioning of the Department of the Army's promotion selection process. Prior to approval by the Secretary of the Army, all Memoranda of Instruction for officer promotion selection boards are reviewed by the Office of the Army General Counsel, in coordination with the Office of The Judge Advocate General, to ensure the Secretary's instructions conform to statutes and accurately reflect his guidance regarding attributes necessary for service in the next grade. All reports of promotion selection boards are processed through the Office of the Army General Counsel prior to final action on the report by the Secretary. The Army General Counsel must be satisfied that the Army has met applicable statutory standards and that individual selection board reports conform to the law. The Army General Counsel must advise the Secretary of the Army of any case in which a selection board report fails to adhere to the statutory standards, either generally or with regard to a particular officer being considered for promotion. In advising the Secretary of the Army and the Office of the Assistant Secretary of the Army (Manpower and Reserve Affairs), the Army General Counsel helps to ensure that Army promotion policies properly implement applicable laws and regulations and are fairly applied.

Question. What is the role, if any, of the General Counsel of the Department of the Army in reviewing and providing potentially adverse information pertaining to a nomination to the Senate Armed Services Committee?

Answer. It is my understanding that under current Department of the Army practice, regarding General Officer nominations, the Office of the Army General Counsel reviews each selection board report, as well as departmental communications to the committee, the President, and the Secretary of Defense, to ensure that the reports and communications comply in form and substance with law and applicable directives and regulation. The Office of the Army General Counsel gives special attention to cases of nominees with substantiated or potentially adverse information and

cases with reportable information in order to ensure that such information is reported to the Senate Armed Services Committee in a timely, accurate, and comprehensible manner.

MILITARY PERSONNEL POLICY AND CASES

Question. In your view, what role, if any, should the General Counsel and civilian attorneys assigned to the Office of General Counsel play in military personnel policy and individual cases, including cases before the Board for Correction of Military Records?

Answer. If confirmed, I will work with the Secretary of the Army, the Assistant Secretary of the Army (Manpower and Reserve Affairs), and other senior leaders to ensure that the Army properly develops and fairly applies military personnel policies. If I am confirmed and become aware that the Department did not fairly and lawfully apply military personnel policies, I will take appropriate action to ensure that the Army properly resolves the issue. I understand and fully respect the independent role that the Army Board for the Correction of Military Records (ABCMR) plays in the correction of military records, and if confirmed, I will coordinate with the Assistant Secretary of the Army (Manpower and Reserve Affairs), who exercises overall responsibility for the Army Review Boards Agency regarding the legal sufficiency of ABCMR recommendations to the Secretary of the Army.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Fiscal Year 2013 Department of Defense Annual Report on Sexual Assault in the Military reflects that reports of sexual assaults in the Army increased by 51 percent from fiscal year 2012 to 2,149 reports of sexual assault in fiscal year 2013.

What is your assessment of this report?

Answer. Although DOD did not conduct a study of the prevalence of sexual assault in fiscal year 2013, I understand there are indications that the increase in reporting in fiscal year 2013 reflects an increased willingness of victims to come forward rather than an increase in the number of sexual assaults. Nevertheless, there is still more to do to prevent and punish the crime of sexual assault. If confirmed, I intend to provide my full support in helping the Army achieve this goal.

Question. What is your assessment of the Army's sexual assault prevention and response program?

Answer. I understand that the Army has taken substantial steps to addressing the issue of sexual assault. Through the combined efforts of military and civilian leaders at all echelons, I am informed that the Army has implemented an unprecedented number of program and policy initiatives to address this insider threat.

I support the Army's commitment to a holistic approach to change culture, prevent sexual assault and harassment in the ranks, support and advocate for victims, and hold offenders appropriately accountable.

Question. What is your view of the provision for restricted and unrestricted reporting of sexual assaults?

Answer. I am informed that since implementing the restricted reporting option (which does not initiate a law enforcement investigation) in 2005, the number of total reports has continued to increase. The restricted reporting option gives victims time to understand the process, seek the counseling and care they need, and to consult with an attorney if they wish. I understand the conversion of restricted reports to unrestricted continues to increase, which I believe is an indication that victims are gaining more trust in the system. If confirmed, I will ensure that the Army continues to work to improve upon its response system and to enhance victim support.

Question. What is your view about the role of the chain of command in providing necessary support to the victims of sexual assault?

Answer. I believe the chain of command has an important role to play in providing compassionate care and necessary support to victims of sexual assault. As a general matter, the commander—as well as the commander's subordinate commanders and staff members—has a responsibility to care for Soldiers in the commander's charge. I understand that the Army is working hard to foster a climate in which victims trust their chain of command to support them if and when sexual offenses occur.

Question. What is your understanding of the adequacy of Army resources and programs to provide victims of sexual assault the medical, psychological, and legal help they need?

Answer. My understanding is that the Army is dedicated to providing Soldiers, civilians and eligible family members who are the victims of sexual assault with extensive medical, psychological, and legal support services. I am aware that sexual

assault victims are offered the services of a Sexual Assault Response Coordinator (SARC) and a Victim Advocate (VA). When a victim of sexual assault comes to any Military Treatment Facility in the Army, his or her medical needs are managed by a Sexual Assault Clinical Provider and his or her behavioral health care is provided by the Sexual Assault Behavioral Health Provider. Victims of sexual assault are also entitled to the services of a Special Victim Counsel. The Army Special Victim Counsel program is staffed, resourced, and supported by the Department of the Army; the Army JAG Corps is currently growing to meet emerging requirements.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults both at home station and deployed locations?

Answer. I understand that both the Secretary of the Army and the Chief of Staff of the Army have made the prevention of sexual assault a top priority and are providing resources consistent with that prioritization. As a result, leaders at every echelon and in every location must be committed to preventing sexual assaults and caring for victims, and the Army is working diligently to ensure that all Soldiers share these commitments.

Question. What is your view of the adequacy of the training and resources the Army has in place to investigate and prosecute allegations of sexual assault?

Answer. I understand that the Army has invested substantial resources and training toward the investigation and response to allegations of sexual assault. As stated above, the Secretary of the Army and Chief of Staff have made the prevention of sexual assault a top priority and are providing resources consistent with that prioritization.

Question. What is your view on the value of the Army's Special Victims Counsel Program? Has this program had an impact on the reporting and prosecution of allegations of sexual assault in the Army? If so, what is that impact?

Answer. My understanding is that the Special Victim Counsel Program has been successful for both victims and commanders. The feedback from victims is that this program is an invaluable resource as they navigate the administrative, medical and justice systems within the Army. Commanders indicate that they can now act with confidence that they understand the victim's position and preferences.

Question. What is your view about the role of the chain of command in changing the military culture in which these sexual assaults occur?

Answer. I believe that commanders can drive change in culture. Commanders are responsible for everything their command does or fails to do, which includes training Soldiers on how to prevent sexual assault and holding all leaders accountable for creating a culture that does not tolerate sexual assault. As part of these responsibilities, commanders are responsible for fostering respect within their units, creating a climate in which sexual assaults and sexual harassment are not tolerated, holding offenders accountable, and cultivating an environment in which victims feel comfortable reporting all forms of misconduct.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted?

Answer. I think it is difficult to fully assess the potential impact of such a significant change to the military justice system. Requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted would, in effect, create a separate justice system for sexual assault cases, with uncertain consequences.

The Army must encourage a climate in which victims feel comfortable in reporting misconduct, perpetrators of sexual assault are held accountable for the crimes they commit, and all Soldiers believe the system to be fair and transparent. I believe that both commanders and judge advocates have important roles to play in all components of that effort.

Question. What additional steps would you take, if confirmed, to address the problem of sexual assaults in the Army?

Answer. If confirmed, I will be an ardent supporter of the Army Sexual Harassment/Assault Response and Prevention Program and will work with the Secretary of the Army, the Chief of Staff of the Army, the Assistant Secretary of the Army (Manpower & Reserve Affairs), and the Deputy Chief of Staff, G-1 to ensure that eliminating sexual assault remains a top priority throughout the Army.

ASSIGNMENT OF WOMEN IN THE MILITARY

Question. In January 2013, Secretary of Defense Panetta rescinded the 1994 Direct Ground Combat Definition and Assignment Rule, excluding women from assignment to units and positions whose primary mission is to engage in direct combat on the ground. The Military Departments are required to develop detailed plans for

implementation of this directive and to complete integration of women into newly opened positions and units as expeditiously as possible, considering good order and judicious use of fiscal resources, but no later than January 1, 2016. Any recommendation to keep an occupational specialty or unit closed to women must be personally approved by the Chairman of the Joint Chiefs of Staff and by the Secretary of Defense.

If confirmed, what role, if any, would you expect to play in the evaluation of the plans of the Department of the Army to integrate women into occupational specialties or recommendations to keep specific occupations or units closed to women?

Answer. If confirmed, I would expect to provide legal advice regarding plans to integrate women into those occupational specialties.

RECOMMENDATIONS OF THE RESPONSE SYSTEMS TO ADULT SEXUAL ASSAULT CRIMES
PANEL

Question. On June 27, 2014, the Response Systems to Adult Sexual Assault Crimes Panel (RSP) released its report fulfilling the requirements of section 576 of the National Defense Authorization Act for Fiscal Year (P.L. 112-239). This report contained 132 recommendations in the areas of victim services, victim rights, the role of the commander in the military justice process, and the investigation, prosecution and adjudication of sexual assault.

If confirmed, what role, if any, would you expect to play in the evaluation of the recommendations of the RSP for possible implementation in the Department of the Army?

Answer. If confirmed, I would expect to work closely with The Judge Advocate General to advise the Secretary of the Army about the RSP's recommendations and, where appropriate, how they should be implemented.

WHISTLEBLOWER PROTECTION

Question. Section 1034 of title 10, U.S.C., prohibits taking retaliatory personnel action against a member of the Armed Forces as reprisal for making a protected communication. By definition, protected communications include communications to certain individuals and organizations outside of the chain of command.

If confirmed, what actions will you take to ensure that senior military leaders understand the need to protect servicemembers who report misconduct to appropriate authorities within or outside the chain of command?

Answer. The General Counsel has the primary role of advising the Secretary of the Army and those who fall under his authority on the standards governing treatment of servicemembers reporting misconduct to any appropriate authority. I am fully committed to protecting those who report misconduct to appropriate authorities. Army policy provides for reporting and investigation of retaliatory actions, and for appropriate corrective and disciplinary action. Additionally, the Secretary of the Army, pursuant to the requirements of section 1034 of title 10, has a special obligation to ensure appropriate action is taken to correct the record of those who have been subjected to reprisal and to ensure appropriate disciplinary action is taken against those who engage in prohibited personnel actions against servicemembers reporting misconduct. It is critical for senior Army leaders to be aware of legal requirements so as to avoid improper retaliatory actions against those who bring matters of interest to our attention. My staff and I will work to ensure statutory and policy requirements are understood and appropriately executed.

SUPPORT TO ARMY INSPECTOR GENERAL

Question. What role, if any, do you think the General Counsel of the Army should have in reviewing the investigations and recommendations of the Army Inspector General?

Answer. The Inspector General is a key member of the Secretariat, and if confirmed, as counsel to all Secretariat officials, I will ensure the Office of the General Counsel of the Army continues its current professional relationship with The Inspector General. I personally intend this to include routine, direct, and candid communications. I have been advised that we routinely provide independent and objective legal advice to the Office of The Inspector General in regard to all matters that relate to Inspector General programs, duties, functions, and responsibilities. In coordination with The Judge Advocate General, I will oversee the provision of effective legal guidance to the Office of The Inspector General in conducting investigations and making recommendations. Additionally, based on the Army General Counsel's responsibility to review legal and policy issues arising from the Army's intelligence and counterintelligence activities, I will work closely with The Inspector General concerning proper reporting of the Army's intelligence oversight activities.

CIVILIAN ATTORNEYS

Question. Judge advocates in the Armed Forces benefit from an established career progression, substantial mentoring and training opportunities, and exposure to a broad spectrum of legal areas and leadership responsibilities. By contrast, civilian attorneys in the military departments normally do not have established career programs and may do the same work for many years, with promotion based solely upon longevity and vacancies.

What is your understanding of the personnel management and career development system for civilian attorneys in the Army?

Answer. Civilian career development is important to me, and it is my understanding that all civilian attorneys and paraprofessionals supporting Army legal services are now covered by a comprehensive career program that promotes and facilitates their recruitment, training, education, development, advancement and retention. To achieve these goals, a career program office was established. I have been informed that the career program office publishes two governing documents, which the Army terms "Army Civilian Education, Training, and Education Development System" plans. There are separate guides for civilian attorneys and paraprofessionals, but both are functionally tailored to the legal career field and combine formal training with developmental assignments.

Question. In your view does that system need revision? If so, what do you see as the major problems and what changes would you suggest?

Answer. From what I have been told, the career program is still in its early stages of operation, and program evaluation is ongoing. If confirmed, I will serve as the career program's functional chief, and will advocate for, or direct, revisions when appropriate.

CLIENT

Question. In your opinion, who is the client of the General Counsel of the Department of the Army?

Answer. The client of the General Counsel of the Department of the Army is the Department of the Army, acting through its authorized officials.

ACQUISITION ISSUES

Question. What role should the General Counsel play in ensuring that Army procurement programs are executed in accordance with the law and DOD acquisition policy?

Answer. If confirmed, I will work closely with the Secretary of the Army, the Under Secretary of the Army, the Assistant Secretary of the Army for Acquisition, Logistics and Technology, the Chief Information Officer, the Director of Small Business Programs, and other senior Army officials to ensure that Army acquisition programs comply with applicable laws, regulations, and policies. The Army's acquisition leadership must accomplish its primary mission of acquiring equipment and services for the Department while complying with an extensive framework of legal and policy requirements. Army lawyers best support this mission through early involvement in acquisition program and procurements and through proactive assistance in identifying potential issues and shaping effective, legally-supportable business strategies throughout the acquisition life-cycle.

Question. What role should the General Counsel play in ensuring that Army acquisition officials understand flexibilities provided by Congress in the acquisition and financial statutes and can take advantage of those flexibilities to act in the best interests of the Army?

Answer. I believe the legal community is uniquely suited to assist Army officials in this area. If confirmed, I will work closely with the Department's senior leadership to ensure that Army acquisition programs and financial operations comply with their governing legal and policy framework but also to question and modify program strategies that reflect an inaccurate or unduly restrictive interpretation of applicable authorities.

Question. What role should the General Counsel play in ensuring that ethics provisions on conflict of interest are followed both by Army personnel and by Army contractors?

Answer. It is essential that the Department have well-understood business rules designed to avoid or mitigate organizational and personal conflicts of interest. Army lawyers play an important role in this area through robust programs for acquisition ethics training and proactive involvement in the Army's acquisition, logistics and technology programs and contracting operations. If confirmed, I will work closely with the Assistant Secretary of the Army for Acquisition, Logistics and Technology

and other Army senior leaders to foster an organizational climate that is sensitive to the importance of avoiding conflicts of interest and that appropriately addresses specific situations that arise.

ALLEGATIONS OF FRAUD AND ABUSE DURING CONTINGENCY CONTRACTING IN IRAQ AND AFGHANISTAN HAVE BEEN WIDE-SPREAD.

Question. What role should the General Counsel play in ensuring that Army personnel are properly trained in contingency contracting and are supervised in the performance of their duties?

Answer. If confirmed, I will work closely with the Secretary of the Army, the Under Secretary of the Army, the Assistant Secretary of the Army for Acquisition, Logistics and Technology, and other senior officials to ensure that the Army legal community continues to support the contingency contracting initiatives adopted in response to the 2007 Report of the Commission on Army Acquisition and Program Management in Expeditionary Operations, also known as the "Gansler Commission Report." I would also work closely with The Judge Advocate General of the Army and other senior leaders in the Army legal community to ensure that an appropriate level of legal resources are allocated in support of contingency contracting.

DETECTING CONFLICTS OF INTEREST

Question. Personal and organizational conflicts of interest have become a major concern. DOD's expanded use of private contractors being tasked to perform key functions that the services had formerly performed in-house and the new requirement to fill thousands of DOD civilian positions with experienced, qualified individuals present challenges in preventing conflicts of interest and the appearance of conflicts of interest.

What do you think the Army should do, and what should the General Counsel's role be, in ensuring that the Army identifies personal and organizational conflicts of interests and takes the appropriate steps to avoid or mitigate them?

Answer. Because of their potential not only to result in an unfair competitive advantage, but also to damage the credibility of the institution, conflicts of interest are unacceptable in any organization. As the Army's Designated Agency Ethics Official, the General Counsel is responsible for management and oversight of the Army Ethics Program. These duties include ensuring that Army personnel who are required to file financial disclosure reports do so at the appropriate time and that ethics counselors timely review these reports to prevent or mitigate conflicts of interest. In addition, if confirmed, I will help ensure that other circumstances of potential conflict of interest are addressed promptly, consistent with legal requirements.

Question. What is your understanding of the steps the Army takes to identify and address potential conflicts of interest during the hiring process?

Answer. At this time, I am not aware of the steps the Army takes to identify and address conflicts of interest during the hiring process. If confirmed, I will look into that issue and ensure that appropriate safeguards exist.

LEGAL ETHICS

Question. What is your understanding of the action a Department of the Army attorney or an Army judge advocate should take if the attorney becomes aware of improper activities by a Department of the Army official who has sought the attorney's legal advice and the official is unwilling to follow the attorney's advice?

Answer. If an Army attorney suspects that the Army official, either in exercising functions or in failing to do so, violates a law or standard of conduct, the attorney should immediately bring the matter to the attention of the attorney's supervisor. If not satisfactorily resolved at that level, the matter should be brought to higher level supervisory lawyers or authorities in the chain of supervision or command.

Question. Do you believe that the present limits on pro bono activities of government attorneys are generally correct as a matter of policy or does the policy need to be reviewed and revised?

Answer. I understand the former Army General Counsel established a supportive and permissive pro bono legal practice policy for the Office of the Army General Counsel, consistent with statutory restrictions prohibiting Federal employees from representing clients before the Federal Government, including the Federal courts. Many rewarding pro bono activities are available to government attorneys in their private, non-official capacity in areas such as family law, consumer law, landlord-tenant disputes, and other civil and criminal law matters. If confirmed, I would review pro bono policies to determine whether any change would be appropriate.

Question. In your view, do the laws, regulations, and guidelines that establish the rules of professional responsibility for attorneys in the Department of the Army provide adequate guidance?

Answer. Much of the value and respect for the law depends on the proper ethical conduct of lawyers. I believe that the laws, regulations, and guidelines establishing rules for attorney professional responsibility for the Department of the Army are well developed and adequate. The Army's ethical rules are based on the American Bar Association Model Rules of Professional Conduct. Both uniform and civilian Army attorneys are subject to State licensing authority ethical codes. By regulation, Army attorneys must remain, at all times, in good standing with a at least one licensing authority in the United States, including those of U.S. States, U.S. territories, the District of Columbia, or the Commonwealth of Puerto Rico. This complimentary system of ethical oversight is implemented on a day-to-day basis by the exercise of competent and conscientious supervision by experienced Army attorneys at all levels. If confirmed, I would consult and review the current professional responsibility policy and systems with The Judge Advocate General and, as appropriate, seek revisions and improvements.

LITIGATION INVOLVING THE DEPARTMENT OF THE ARMY

Question. What is your understanding of the relationship between the Department of the Army and the Department of Justice with respect to litigation involving DOD?

Answer. Under section 516 of title 28 of the U.S. code, the authority to represent the military departments in litigation is reserved to the Department of Justice, under the direction of the attorney general. It is my understanding DOD and the Department of the Army, along with the other military departments, have a positive and mutually supportive relationship with the Department of Justice. I understand coordination between the Department of Justice and the military departments is timely and consistent on every level. If confirmed, I will work collaboratively with The Judge Advocate General and the General Counsel of DOD to ensure the interests of the Army are fully understood and appropriately pursued with the Department of Justice in litigation.

Question. In your view, does the Department need more independence and resources to conduct its own litigation or to improve upon its current supporting role?

Answer. In general, because of established close working relationships, I think the Department of Justice is effective in defending the interests of the Department of the Army. If confirmed, I will routinely consult with The Judge Advocate General and the General Counsel of DOD to determine whether adequate authority and resources are available to protect the full measure of the Army's interests in litigation.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the General Counsel of the Department of the Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

SEXUAL ASSAULT

1. Senator GILLIBRAND. Ms. Starzak, some have used the argument that there are insufficient numbers of military lawyers to implement the Military Justice Improvement Act (MJIA). Yet in your advance policy questions you said that “To address emerging requirements, including special victim capabilities and special victims counsel, the Army JAG [Judge Advocate General] Corps is planning to grow.” How do you reconcile this plan to grow the JAG Corps to address what we all agree is a top concern for the military with claims that there are an insufficient number of judge advocates to implement MJIA?

Ms. STARZAK. I understand that enactment of MJIA would require additional judge advocates in grade O-6 or higher who have significant experience in trials by general or special court-martial. Given these requirements, I do not believe that growing the JAG Corps by commissioning new judge advocates would suffice to meet the needs that would be created by the MJIA in the near term.

2. Senator GILLIBRAND. Ms. Starzak, in your advance policy questions you stated, “Although the Department of Defense did not conduct a study of the prevalence of sexual assault in fiscal year 2013, I understand there are indications that the increase in reporting in fiscal year 2013 reflects an increased willingness of victims to come forward rather than an increase in the number of sexual assault.” My concern is that the percent of restricted reports has gone up and unrestricted reports have gone down and the rates of retaliation have stayed the same. That suggests survivors want to receive care, but it doesn’t suggest improved confidence in the military justice system. What to you suggests an increase in confidence in the military justice system, rather than the system of care provided to victims?

Ms. STARZAK. Although I understand that the percentage of reporting victims who made unrestricted reports decreased slightly between fiscal years 2013 and 2014, I also understand that there was an increase in the number of both restricted and unrestricted reports in 2014, as well as a significant increase in the percentage of victims converting from restricted reports to unrestricted reports. I believe this increase in reporting, as well as the willingness to convert from restricted to unrestricted reporting, conveys increased victim confidence in the Department’s overall response system. I agree, however, that it is difficult to attribute this increase in reporting to any particular component of the Department’s response system. In addition, given the concerns victims expressed about retaliation in the 2014 Survivor Experience Survey, as well as the fact that sexual assault continues to be an under-reported crime, I believe the Department still has much work to do to improve victim confidence.

GENDER INTEGRATION

3. Senator GILLIBRAND. Ms. Starzak, on January 2013, former Secretary of Defense Leon E. Panetta and Chairman of the Joint Chief of Staff, Army General Martin E. Dempsey rescinded the ground combat exclusion policy of 1994. The objective in rescinding this policy is to ensure that the mission is met with the best-qualified and most capable servicemember, regardless of gender. I understand that the Services are approaching this with phases of implementation. As the Army’s General Counsel, what is your role in implementing combat integration?

Ms. STARZAK. If confirmed, my role as General Counsel would be to provide legal advice to the Secretary of the Army regarding integration of women into closed positions, units and occupations consistent with the guidelines established by Secretary of Defense Panetta and Chairman Dempsey in January 2013.

4. Senator GILLIBRAND. Ms. Starzak, what challenges do you anticipate with the new policy implementation and do you think the Army will hit the target of January 2016 for integration of women into newly opened jobs, positions, and units?

Ms. STARZAK. My understanding is that the Army is on track to meet the target of January 2016. I have been informed that studies are in progress to identify any potential obstacles to full integration, and, if confirmed, I will work closely with the Army leadership to address any obstacles that are identified.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

SPECIAL VICTIMS' COUNSEL

5. Senator AYOTTE. Ms. Starzak, regarding military sexual assault, I worked with Senator Patty Murray to introduce legislation to provide sexual assault victims with a Special Victims' Counsel (SVC)—a trained military lawyer to assist survivors throughout the legal process—in all military branches. What is your assessment of the SVC program?

Ms. STARZAK. I believe the SVC program to be a significant resource for sexual assault victims. Under the program, sexual assault victims who file a report of sexual assault—either restricted or unrestricted—are provided an attorney who represents their interests and helps them navigate the administrative, medical and military justice systems. Although it is still a relatively new program, the initial feedback on the SVC program has been very positive. The 2014 Survivor Experience Survey recently conducted by the Department found that, of the 68 percent of respondents who interacted with a SVC, 90 percent were satisfied with the services they were provided. I also understand that commanders have expressed positive views about the SVC program, because SVCs clearly communicate the victim's position and preferences.

6. Senator AYOTTE. Ms. Starzak, are we seeing an increase in unrestricted reporting?

Ms. STARZAK. Yes, the Army has seen a significant increase in unrestricted reporting of sexual assault in the last 2 years. In fiscal year 2014, the Army received a report from an estimated 23 percent of victims—up from 14 percent in fiscal year 2012. In fiscal year 2014, victims converted from a restricted report to an unrestricted report to trigger a law enforcement investigation at a rate of 20 percent—the highest rate yet seen since the creation of the unrestricted reporting option in 2005.

7. Senator AYOTTE. Ms. Starzak, are victims feeling more confident that if they come forward, they will receive the support, protection, and justice they deserve?

Ms. STARZAK. I understand that recent statistics on victim reporting of sexual assault suggest increased victim confidence about coming forward. I have been advised that the last few years have shown an increased rate of reporting, with the Army now receiving a report from an estimated 1 in 4 victims, up from an estimated 1 in 7 victims in 2012. Although this is an encouraging trend, sexual assault remains an underreported crime, and victims continue to express concerns about retaliation, particularly from their peers. I believe it is critical for the Army to continue to work to address those concerns to improve victims' confidence.

8. Senator AYOTTE. Ms. Starzak, Senator Klobuchar and I introduced the National Guard and Reserve Access to Counsel Act to ensure victims receive services if there is any connection between the crime and their service. What is your assessment of the SVC program with respect to the National Guard and Reserve?

Ms. STARZAK. Although I have limited knowledge of the Army National Guard and Reserve programs specifically, I understand that all components of the Army have worked closely together to stand up strong SVC programs. During the start-up time frame, this coordination between Army Active Duty, National Guard and U.S. Army Reserve has ensured that every eligible client who requests representation by an SVC has an assigned SVC.

9. Senator AYOTTE. Ms. Starzak, do you believe that National Guard and Reserve members should have access to the same services as Active Duty personnel have, should they also be victims of sexual assault in connection with their military service?

Ms. STARZAK. Yes. I strongly believe that National Guard and Army Reserve members should have access to the same services as Active Duty personnel should they be victims of sexual assault in connection with their military service.

QUESTIONS SUBMITTED BY SENATOR TED CRUZ

FORT HOOD

10. Senator CRUZ. Ms. Starzak, you were appointed to the Deputy General Counsel (Legislation), Office of the General Counsel, at the Department of Defense, on May 31, 2011. During your tenure in that position, in the Department of Defense

Language Position Paper, citing section 552 of H.R. 4310 (Fiscal Year 2013 Defense Authorization Bill), a great deal of time was spent explaining that awarding a Purple Heart to the victims of the Fort Hood massacre would “directly and indirectly influence” the trial of Major Hasan. Despite my obvious objection to that premise, terrorism should be identified as terrorism and not dismissed as workplace violence, the trial has now concluded—Major Hasan was convicted of murder and justly sentenced to death. What is your position on awarding the Purple Heart in recognition to those who were killed or wounded during the tragedy that occurred at Fort Hood on November 5, 2009?

Ms. STARZAK. The criteria for award of the Purple Heart is set by law and Executive Order. According to Executive Order 11016, as amended, the Purple Heart is to be awarded to servicemembers killed or wounded “as the result of an act of an act of an enemy of the United States,” or “as a result of an international terrorist attack against the United States” among other possible criteria. My understanding is that the Department is reviewing whether those criteria are met with respect to the tragedy at Fort Hood.

In addition, section 571 of H.R. 3979, the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015 that passed the House of Representatives on December 4, 2014, would require the award the Purple Heart to servicemembers who are wounded or killed as the result of an attack carried out by an individual or entity that was “in communication with [a] foreign terrorist organization before the attack” where “the attack was inspired or motivated by the foreign terrorist organization.” If that provision is enacted into law, I believe the Department would need to review whether the Purple Heart should be awarded to those who were killed or wounded during the tragedy that occurred at Fort Hood under the modified criteria.

11. Senator CRUZ. Ms. Starzak, what is your broader consideration for presentation of a Purple Heart to victims who are killed or wounded in a domestic terrorist attack, where that attack is inspired or motivated by a foreign terrorist organization?

Ms. STARZAK. As noted above, the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015, which passed the House of Representatives on December 4, 2014, contains a provision requiring the Department to award the Purple Heart to servicemembers who are wounded or killed as the result of an attack carried out by an “individual or entity that was in communication with [a] foreign terrorist organization before the attack” where “the attack was inspired or motivated by the foreign terrorist organization.”

[The nomination reference of Ms. Alissa M. Starzak follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
July 14, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Alissa M. Starzak of New York, to be General Counsel of the Department of the Army, vice Brad Carson, resigned.

[The biographical sketch of Ms. Alissa M. Starzak, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF MS. ALISSA M. STARZAK

Education:

Amherst College

- 1991–1995
- AB

University of Chicago

- 1997–2000
- JD

Employment Record:

- Department of Defense (Washington, DC)
 - Deputy General Counsel (Legislation)
 - May 2011–Present
- U.S. Senate Select Committee on Intelligence (Washington, DC)
 - Counsel
 - January 2007–May 2011
- Central Intelligence Agency (Washington, DC)
 - Assistant General Counsel
 - August 2005–January 2007
- O'Melveny & Myers (Washington, DC)
 - Attorney
 - November 2001–August 2005
- U.S. Court of Appeals for the Fifth Circuit (New Orleans, LA)
 - Judicial Law Clerk to the Honorable E. Grady Jolly
 - 2000–2001

Honors and awards:

- Military Awards: N/A
- Federal Civilian Awards: N/A
- Academic Awards: N/A
- Other Awards: N/A

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Ms. Alissa M. Starzak in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR–228
Washington, DC 20510–6050
(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM
BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Alissa Michelle Starzak.
2. **Position to which nominated:**
General Counsel, Department of the Army.
3. **Date of nomination:**
July 14, 2014.
4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

August 3, 1973; Binghamton, NY.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Andrew G. Ferguson.

7. Names and ages of children:

Cole Ferguson, age 5.

Alexa Ferguson, age 1.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Amherst College, 1991–1995, AB, May 1995

University of Chicago, 1997–2000, JD, June 2000

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

May 2011–Present: Deputy General Counsel (Legislation), Department of Defense, Pentagon, Washington, DC.

January 2007–May 2011: Counsel, Senate Select Committee on Intelligence, U.S. Senate, Washington, DC.

August 2005–January 2007: Assistant General Counsel, Central Intelligence Agency, Washington, DC.

November 2001–August 2005: Associate, O'Melveny & Myers, Washington, DC.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Judicial Law Clerk to the Honorable E. Grady Jolly, U.S. Court of Appeals for the Fifth Circuit, 2000–2001.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Obama for America, 2012, \$200.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

N/A.

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. Speeches: Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. Commitments regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ALISSA M. STARZAK.

This 27th day of August, 2014.

[The nomination of Ms. Alissa M. Starzak was reported to the Senate by Chairman Levin on December 9, 2014, with the recommendation that the nomination be confirmed. The nomination was returned to the President at the end of the 113th Congress on December 17, 2014, under provisions of Senate Rule XXXI, paragraph 6 of the Standing Rules of the Senate.]

[Prepared questions submitted to ADM Harry B. Harris, Jr., USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? If so, what areas do you believe might be appropriate to address in these modifications?

Answer. No. If confirmed, I will continue to assess the need for any modifications.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, U.S. Pacific Command?

Answer. The Commander, U.S. Pacific Command, is responsible for deterring attacks against the United States and its territories, possessions, and bases; pro-

tecting Americans and American interests; and, in the event that deterrence fails, winning our Nation's wars. The Commander is also responsible for expanding security cooperation with our allies, partners, and friends across the Asia-Pacific region.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I believe my 36 years of military experience, culminating in command of the U.S. Pacific Fleet, have prepared me well for assuming command of U.S. Pacific Command (PACOM).

Over my career, I have served in every geographic combatant command region, including seven tours in the Pacific. This has given me a broad understanding of our military, economic, and geopolitical challenges and opportunities around the globe. During my operational tours, I participated in numerous major operations including the S.S. Achille Lauro terrorist hijacking incident, Attain Document III (Libya, 1986), Earnest Will (Kuwaiti reflagged tanker operation, 1987–1988), Desert Shield/Desert Storm, Southern Watch, Enduring Freedom, Iraqi Freedom, Willing Spirit (Columbia hostage rescue, 2006–2007), and Odyssey Dawn (Libya, 2011). I have commanded at every level, including squadron, wing, Joint Task Force Guantanamo, the U.S. Sixth Fleet, Striking and Support Forces NATO, and my current assignment.

Between operational tours, I was assigned three times to the Navy staff and twice to the Joint Staff in the Pentagon where I gained valuable insights and experience into the resourcing, administrative, Joint, Interagency, and Title 10 processes that underpin an effective Department of Defense (DOD).

I have been truly fortunate to have been sent by the Navy to Harvard, Georgetown, and Oxford Universities for post-graduate education where I studied East Asia security, political terrorism, and the ethics of war.

Prior to my current assignment as Commander, U.S. Pacific Fleet, I served as the assistant to the Chairman of the Joint Chiefs of Staff where I was the Chairman's direct representative to the Secretary of State. In this assignment, I travelled extensively throughout the Asia-Pacific region and met senior government leaders, including Defense and Foreign Ministers, many of whom I will work with if confirmed as Commander, U.S. Pacific Command.

Finally, as Commander, U.S. Pacific Fleet, I have had the opportunity to establish or renew personal and professional relationships with political and military leaders in the region. If confirmed, I will continue strengthening those relationships, while enhancing the rebalance to the Pacific. My assignments over my career have given me broad theoretical and practical operational experience leading to a firm understanding of the military's role in the whole-of-governmental approach to global and regional challenges.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, U.S. Pacific Command?

Answer. If confirmed, I will take every opportunity to better my knowledge of, and relationships with, our allies and partners across the Asia-Pacific. I look forward to engaging senior leaders within DOD and the Department of State, regional security experts, leading think tanks and universities, and military and civilian leaders throughout the Asia-Pacific in order to improve my understanding of the challenges and opportunities in the region. I look forward to coordinating closely with members of this committee as we work together.

RELATIONSHIPS

Question. If confirmed, what will be your relationship with:

The Secretary of Defense.

Answer. Commander, U.S. Pacific Command, performs duties under the authority, direction, and control of the Secretary of Defense. The Commander, U.S. Pacific Command, is directly responsible to the Secretary of Defense for the ability of the command to carry out its missions.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense performs duties as directed by the Secretary and performs the duties of the Secretary when the principal is absent. The Commander, U.S. Pacific Command, ensures the Deputy has the information necessary to perform these duties and coordinates on all major issues.

Question. The Under Secretary of Defense for Policy.

Answer. Under Secretaries are key advocates for combatant commands' requirements. The Commander, U.S. Pacific Command coordinates and exchanges information with the Under Secretary of Defense for Policy on strategic and regional security issues involving the Asia-Pacific theater.

Question. The Under Secretary of Defense for Intelligence.

Answer. Commander, U.S. Pacific Command, coordinates and exchanges information with the Under Secretary of Defense for Intelligence as needed to set and meet the Command's intelligence requirements.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman functions under the authority, direction, and control of the National Command Authority. The Chairman transmits communications between the National Command Authority and Commander, U.S. Pacific Command, and oversees the activities of Commander, U.S. Pacific Command, as directed by the Secretary of Defense. As the principal military advisor to the President and the Secretary of Defense, the Chairman is a key conduit between the combatant commanders, Interagency, and Service Chiefs.

Commander, U.S. Pacific Command, keeps the Chairman informed on significant issues regarding the PACOM area of responsibility (AOR). Commander, U.S. Pacific Command, communicates directly with the Chairman on a regular basis.

Question. Commander, U.S. Special Operations Command (SOCOM).

Answer. Commander, U.S. Pacific Command maintains a close relationship and communicates directly with the Commander, SOCOM, on issues of mutual interest. PACOM coordinates requirements and operations of Special Operations Forces within the PACOM AOR through the Commander, Special Operations Command Pacific (SOCPAC) to support PACOM's Theater Security Cooperation Program, deliberate plans, and real world contingencies. SOCPAC is a subordinate component to PACOM.

Question. The other combatant commanders.

Answer. Commander, U.S. Pacific Command, shares borders, and maintains close relationships, with the other combatant commanders. These relationships are critical to the execution of our National Military Strategy and are characterized by mutual support, frequent contact, and productive exchanges of information on key issues.

Question. The Service Secretaries and Service Chiefs.

Answer. The Service Secretaries are responsible for the administration and support of forces assigned to combatant commands. The Commander, U.S. Pacific Command, coordinates with the Secretaries to ensure that requirements to organize, train, and equip PACOM forces are met.

Commander, U.S. Pacific Command, communicates and exchanges information with the Service Chiefs to support their responsibility for organizing, training, and equipping forces. Successful execution of PACOM's mission requires close coordination with the Service Chiefs. The Service Chiefs are valuable sources of judgment and advice for the combatant commanders.

Question. Commander United Nations/Combined Forces Command/U.S. Forces Korea.

Answer. As a subordinate unified commander, the Commander, U.S. Forces Korea receives missions and functions from the Commander, U.S. Pacific Command. I recognize his unique responsibilities in armistice and during hostilities as Commander United Nations Command/Combined Forces Command and will fully support his actions in those sensitive and demanding roles.

Question. The Deputy Assistant Secretary of Defense for Prisoner of War (POW)/Missing Personnel.

Answer. Earlier this year, Secretary Hagel directed the Department to transform how it accounts for its personnel missing from past conflicts. Specifically, he directed that he be provided with a plan to organize the Department most effectively to increase to the maximum extent possible the numbers of missing Service personnel accounted for annually while ensuring timely and accurate information is provided to their families.

As a result of the plan that was presented to Secretary Hagel, the Department submitted a legislative proposal to eliminate in statute the position of the Deputy Assistant Secretary of Defense (DASD) for POW/Missing Personnel Affairs. The DASD's duties and responsibilities will be assumed by the director of a new Defense Agency that is being formed by merging three existing organizations, and will be overseen by the Under Secretary of Defense for Policy. I fully understand the priority our Nation places on this issue and, should I be confirmed, I will fully support the Department's efforts to account for personnel missing from past conflicts.

Question. Commander, U.S. Forces Afghanistan/Commander, International Security Assistance Force.

Answer. When needed, Commander, U.S. Pacific Command, communicates and exchanges information with the Commander, U.S. Forces Afghanistan/Commander, International Security Assistance Force via the Commander, U.S. Central Command (CENTCOM).

Commander, U.S. Pacific Command, maintains a close relationship and communicates directly with the Commander, CENTCOM, on issues of mutual interest that affect both of their AORs so that respective strategies, policies and operations are coordinated and mutually supportive. India-Pakistan issues have heightened the importance of close cross-COCOM coordination. Additionally, Commander, U.S. Pacific Command, must be alert to the possibility of “spillover” into this region of Islamic State of Iraq and the Levant (ISIL) fighters and sympathizers, especially the return of these fighters to countries in this region.

As a force provider, PACOM routinely sends forces to CENTCOM including and most notably, aircraft carrier strike groups, Marine expeditionary forces, Air Force fighter squadrons, and Army Brigade Combat Teams. These forces support CENTCOM and the fight in Afghanistan by providing land and sea based striking power, expeditionary flexibility, and Ballistic Missile Defense (BMD).

Question. Director of the National Guard Bureau.

Answer. Commander, U.S. Pacific Command, communicates and exchanges information with the Director of the National Guard Bureau to support the Bureau’s responsibilities for organizing, training, and equipping forces. Like the Service Chiefs, successful execution of PACOM’s mission requires close coordination with the National Guard Bureau.

Question. The Chief of Naval Research.

Answer. The Office of Naval Research is a valuable resource for technologies that help the Commander, U.S. Pacific Command, counter developing threats in the Asia-Pacific region. If confirmed, I will maintain a close relationship with the Chief of Naval Research as well as the other Services’ research organizations and national laboratories to ensure the requirements for developing technologies for PACOM are understood.

CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next Commander, U.S. Pacific Command?

Answer. This region is critical to U.S. and global security and prosperity. The United States works with its allies and partners to ensure the region’s security and set the conditions for economic prosperity. As our Nation globally rebalances toward the Asia-Pacific region, and if confirmed, I will focus on three main challenges in the PACOM AOR. First, North Korea’s large conventional military, relentless quest to acquire weapons of mass destruction and the means to deliver them, and consolidation of power by Kim Jong Un present a clear and present danger to regional security and stability. This is the region’s most volatile challenge and my greatest concern. Second, China’s rise as a regional military and global economic power, and in particular, its rapid military modernization and assertive behavior toward regional neighbors present opportunities and challenges that must be managed effectively. This is our most enduring challenge. Finally, the stability, security, and prosperity of the Asia-Pacific will depend on strong relationships with our treaty allies and partners to ensure that we are able to maintain access to, and use of, the global commons, including cyber. We must remain alert to the potential for ISIL fighters from Asia-Pacific nations to return to their countries of origin. With their combat experiences and extremist ideology, they could rejoin or establish new Violent Extremist Organizations in the region. Importantly, we must ensure that our relationships, especially in the security assistance arena, help instill respect for human rights and do not abet rights violations.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. I will support the administration’s whole-of-government approach to achieve a peaceful, secure, and prosperous future security environment on the Korean Peninsula. Forward-based and forward-deployed U.S. military presence in the Western Pacific will continue to reassure our treaty allies and deter aggression by North Korea. If this fails, I will ensure PACOM forces are prepared to fight and defeat North Korean forces.

I will work to continue modernizing and strengthening our treaty alliances and partnerships in the region as we orient them toward the challenges of the 21st century. These critical relationships are enhanced by maintaining interoperable military capabilities that deter regional aggression and build partner security capacity. Additionally, I will work toward maturing the military-to-military relationship with China. Both China and the United States have a strong stake in the peace and stability of the region. Building a cooperative bilateral relationship will reduce the likelihood of a miscalculation, increase the clarity of Chinese strategic intentions, and encourage mutual engagement in areas of common concern. Finally, I will work to

improve the Japanese and Korean relationship, especially in the military-to-military arena. Enhancing our trilateral cooperation with Japan and Korea will strengthen regional stability in Northeast Asia.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed?

Answer. My first priority will be to continue to maintain a credible deterrent posture and reassuring military presence in the Asia-Pacific. Second, I will continue to strengthen our alliances and partnerships. Third, I will work through DOD and with this committee to collaborate with other elements of the U.S. Government and our allies to maintain peace on the Korean Peninsula and bring about the verifiable elimination of North Korea's nuclear weapons program. Fourth, I will actively pursue steady and measured military-to-military engagement with China toward a cooperative and constructive relationship. Lastly, while supporting our Nation's strategic focus on the Asia-Pacific and sustaining the realignment and transformation processes already underway, I will work to carefully shepherd and repeatedly assess progress toward our desired force posture.

FORCE POSTURE IN THE PACOM AOR

Question. Significant changes to the U.S. force posture in the region have already begun or are planned to begin in the next few years, including movement of Marines from Okinawa to Guam and the relocation of U.S. forces within South Korea. There are also plans to increase U.S. presence in southern parts of the Asia-Pacific, including in Australia and Singapore, and to develop comprehensive engagement strategies with a number of other countries in the region, such as the Philippines and Vietnam. These initiatives will likely compete with other global commitments for increasingly constrained funding.

What is your understanding of the national security priorities in the Asia-Pacific?

Answer. Our national security priorities in the Asia-Pacific include encouraging the peaceful resolution of disputes, including territorial disputes and those based on history; upholding the freedom of navigation; standing firm against coercion, intimidation, and aggression; building a cooperative regional architecture based on international rules and norms; enhancing the capabilities of our allies and partners to provide security for themselves and the region; and strengthening our own regional defense capabilities.

The North Korean threat is the most significant threat to stability in the region, while a tactical miscalculation arising from territorial disputes such as those that exist in the East and South China Seas is the most likely. Natural disasters such as typhoons, earthquakes and tsunamis will surely occur and some of these will overwhelm the ability of the Nations involved to overcome without assistance from the PACOM must have key capabilities in theater, including robust predictive intelligence, readily available to demonstrate America's commitment to the region and to our allies, friends, and partners there. We must be prepared to address incidents and crises quickly and, if needed, to fight on short notice.

Question. In your view, what strategic criteria, if any, should guide the posture of U.S. military forces in that region to best address those priorities at acceptable risk?

Answer. I believe the posture of U.S. forces in the Asia-Pacific should ensure that U.S. forces are able to operate near potential sources of conflict, safeguard critical assets and infrastructure, respond rapidly to crises, maintain a politically sustainable force laydown, meet contingency and steady state sustainment requirements, and guarantee our ability to execute contingency operations. The presence of U.S. forces on the Korean Peninsula, the risk associated with proximity of those forces to North Korean military capabilities, and the advanced technological capabilities resident in the Asia-Pacific require that the most technologically advanced and ready forces are forward deployed in the AOR.

Question. How, if at all, do the methods of forward basing, rotational forces, and agreements with allies for training and logistics activities support our national security priorities throughout the region?

Answer. DOD views posture as a combination of three elements: forces, footprint, and agreements. "Forces" are U.S. military capabilities, equipment, and commands, assigned or deployed. "Footprint" describes our infrastructure, facilities, land, and prepositioned equipment. "Agreements" are treaties, as well as access, transit, support, and status of forces arrangements with allies and partners. Together, these elements enable the United States to maintain a forward presence to achieve our national security objectives and demonstrate our commitment to the region.

PACOM operations, activities, and actions help shape an Asia-Pacific region into one that is secure, prosperous, and underpinned by a rules-based international

order. If confirmed, I will posture our forces, footprints, and agreements in a manner to effectively communicate U.S. intent and resolve to safeguard our national interests, strengthen alliances and partnerships, maintain an assured presence in the region, prevent conflict and, in the event of crisis, respond rapidly and effectively across the full range of military operations in order to resume steady state activities.

Question. In your view, is the right mix of these forward presence methods necessary to achieve an affordable theater posture at acceptable levels of risk? If so, how would you propose broadly assessing each method relative to its cost and benefit?

Answer. Yes. However, our current force structure and presence are not optimal to counter the threats we face. The size of the Asia-Pacific region and the diversity of threats—from military provocation to illicit trafficking in all its forms to countering terrorism to responding to natural disasters—warrant a more stable forward-deployed presence and readiness posture.

Risk measures our global force structure, including the availability of forces, access, and basing against the full range of regional threats and challenges. With fewer forces, we become more reliant on access and basing. With even less forces, the combatant commander is forced to accept even more risk. A more stable budget environment would allow better management of this risk. Although DOD already has processes in place to continuously evaluate these variables and make adjustments, some risks cannot always be mitigated. These risks must be managed based on the context of the moment.

Question. How important is a forward basing strategy to the ability of PACOM to execute its day-to-day mission? Its operational contingency plans?

Answer. I believe the United States' forward-based forces are our most visible sign of our commitment to regional peace and stability and are critical to PACOM's day-to-day operations. They are essential to our ability to respond quickly and effectively to contingencies. Forward based forces are not only the first responders in any contingency, they also serve to assure allies and partners and deter aggression by potential adversaries. Additionally, forward-based forces are vital for day-to-day engagement where we train and exercise with allies and partners to enhance capabilities and capacity across the region.

Question. How does the planned relocation of U.S. forces from Okinawa to Guam and other locations in the Pacific improve U.S. security in the region? How does the planned relocation of U.S. forces on the Korean Peninsula improve security?

Answer. Maintaining ready forces close to potential sources of conflict is a key pillar of force posture in the Asia-Pacific region. The relocation of U.S. forces from Okinawa to Guam and other locations in the Asia-Pacific will allow us to maintain a significant number of ready forces west of the international dateline, signaling and assuring our steadfast commitment to the region and our regional alliances. Our forces will be readily available for multi-regional security, humanitarian assistance, disaster relief, and operational contingencies. Moreover, this strategic dispersal of forward-deployed forces will increase our agility to respond to crisis and, at the same time, complicate the calculus of potential aggressors.

The United States' commitment to the security of the Republic of Korea is unshakeable. The planned posture changes in Korea support a broader force posture in the Asia-Pacific that is geographically distributed on the Korean peninsula, operationally resilient, and politically sustainable. These changes addresses host nation concerns and simultaneously improve our mutual defense infrastructure. The Army's rotational plan is a global model designed to rotate fully trained formations with high unit cohesion, yielding a net increase in combat capability. I support the posture changes on the Peninsula consistent with the joint vision for the alliance laid out by both Presidents and further developed by the Secretary of Defense and his Republic of Korea counterpart. If confirmed, I will continue close defense cooperation with South Korea.

Question. In your view, are the levels of funding, manning and military-to-military engagement in the Asia-Pacific region appropriate to the management of current and future risk to U.S. strategic interests in the region? Do you foresee a requirement to increase or to decrease those funding levels in the coming years?

Answer. The January 2012 Defense Strategic Guidance and the March 2014 Quadrennial Defense Review place an emphasis on the importance of the Asia-Pacific. If confirmed, I will review levels of funding, manning, and military-to-military engagement in the Asia-Pacific region and, if there are shortfalls in existing resources, I will advocate for additional resources required to support the President's priorities. My preliminary assessment is that there is a great deal that must be accomplished out here and we are limited by current resources. While I do believe funding levels must be increased in the future if we are to meet all of our commit-

ments, the ability to do so will be influenced by budgetary requirements and limitations such as sequestration and continuing resolutions, changes to the regional security environment, and the relative priority of other military commitments around the globe.

Question. What are your views on the current number and types of ships forward-stationed in the Asia-Pacific region? Are they sufficient to support the current operational and contingency plans or would you foresee the need to increase or change that naval force structure in the AOR?

Answer. The January 2012 Defense Strategic Guidance and the March 2014 Quadrennial Defense Review place an emphasis on the importance of the Asia-Pacific. Admiral Locklear has gone on record asking for consideration that the 10th Amphibious Ready Group or elements of that unit be based west of the dateline, options for homeporting the hospital ship USNS *Mercy* west of the dateline be considered, and additional maritime intelligence, surveillance, and reconnaissance (ISR) assets be kept forward in the Western Pacific. I believe recent events such as Operation Damayan (Typhoon Haiyan disaster relief effort in the Philippines in 2013) and the search for Malaysian Airlines Flight 370 validate forward basing such assets. If confirmed, I will review levels of assigned forces in the Asia-Pacific region and, if I believe there are shortfalls, I will advocate for additional resources required to support the President's and Secretary's priorities.

Question. Specifically, what is your assessment of the number of amphibious ships required in the AOR?

Answer. In addition to the Amphibious Ready Group (ARG) forward deployed in Sasebo, Japan, the Program of Record will provide 5 Amphibious Ready Groups in San Diego to meet rotational assignments in the PACOM and CENTCOM AORs. Once the Program of Record is executed, these amphibious ships are adequate to meet current demands. However, forward basing the 10th ARG west of the international dateline would increase theater security cooperation opportunities and enhance PACOM's ability to quickly respond to contingencies.

Question. How would fully funding construction of 12 LPD-17 class ships impact AOR needs?

Answer. The current plan is to fund construction for the 11th LPD-17 to fulfill the 5-Amphibious Ready Group requirement in San Diego. Constructing an additional LPD-17 ship would provide additional flexibility to meet additional Marine Corps requirements.

Question. What is your assessment of the feasibility of using the LPD-17 hull to support BMD requirements?

Answer. I am not aware that adapting the LPD-17 hull to support BMD requirements is an initiative that has been vetted at senior levels within the Navy. As the Commander of the U.S. Pacific Fleet, my opinion is that we don't have enough of these ships in the inventory today to support Marine Corps requirements and that they are fully employed in their current mission sets. Adding BMD to these ships would not only be expensive, it could potentially cause either mission (BMD or amphibious) to suffer in support of the other.

Question. What is your assessment of the force level requirements in the AOR, and potential impact of longer deployments on quality of life for following ship types: Carriers (CVN), Attack Submarines (SSN), and Auxiliaries (Fast Combat Support)?

Answer. Global demands for forces and the price of 13 years of war place a heavy tax on our forces. As part of "fair sharing" as adjudicated through the global force management process, PACOM routinely falls short of formally-stated force requirements. Personnel and operations tempo limitations, planned and unplanned maintenance, and necessary training requirements all detract from the commander's ability to get purposeful presence from those forces permanently assigned to PACOM. Admiral Locklear's stated demand for carriers, attack submarines, and auxiliaries is not met. If confirmed, I will review the PACOM force requirements and will not hesitate to ask for the forces I believe we will need to meet our assigned missions.

While force levels in the AOR from a permanent homeport basis (i.e., "forces for") are adequate, meeting demands of COCOMs in other AORs detracts from PACOM presence. For example, when the forward deployed naval forces (FDNF) carrier in Japan is in planned maintenance we do not always have a ready replacement carrier in the Western Pacific because of other worldwide demands.

Deployments for carrier strike groups and amphibious ready groups are expected to normalize over time as the Navy fully implements its Optimized Fleet Response Plan (OFRP) to a nominal 7-month deployment length. OFRP should help improve both quality of life and training/readiness as schedules become more predictable. Attack submarines are generally able to maintain 6-month deployments. Auxiliary ships (T-AKEs, T-AOs, T-AOEs) are Military Sealift Command (MSC) ships with

rotational civilian mariner crews and not subject to deployment restrictions. JHSVs and MLPs will also be operated by MSC under similar conditions.

Question. In view of declining ship force structure numbers, and lengthened deployments becoming the norm, what proposals would you suggest to better leverage the current force and minimize adverse quality of life manning impact?

Answer. The Navy is on track to achieve its goal of homeporting 60 percent of the fleet in the Pacific by 2019. Implementing the new Optimized Fleet Response Plan across all ships will provide greater stability in schedules, as well as time to conduct adequate maintenance and training. That said, homeporting ships in the Western Pacific increases presence without the 4:1 turnaround ratio for rotational deployments, providing for quicker response to contingencies and greater awareness of the operating areas. I fully support forward presence including the near term addition of two more BMD destroyers to Japan, a fourth SSN to Guam, and expanding littoral combat ship presence in Singapore.

Question. How does the planned relocation of U.S. forces from Okinawa to Guam improve U.S. security in the region?

Answer. The United States' commitment to the security of Japan is unshakeable. Maintaining ready forces close to potential sources of conflict is a key pillar of our force posture in the Asia-Pacific. The Marine Corps Distributed Laydown is a critical enabler to PACOM's Asia-Pacific strategy. The relocation of U.S. forces from Okinawa to Guam will allow PACOM to maintain a significant number of ready forces west of the international dateline, signaling and assuring our steadfast commitment to the region and our regional alliances. Forces will be readily available for multi-regional security and humanitarian assistance/disaster relief missions in addition to operational plan/contingency plan operations. At the same time, PACOM will be able to reduce the number of Marines on Okinawa, which is politically sustainable as it comports with the desires of the host government. If confirmed, I will continue the close defense cooperation with Japan.

Question. How does the planned relocation of U.S. forces on the Korean Peninsula improve security?

Answer. Our commitment to the security of the Republic of Korea is unshakeable. The planned posture changes in Korea will produce a force that is geographically distributed, operationally resilient, and politically sustainable. The changes appear to address host nation concerns and simultaneously improve our mutual defense infrastructure. I support the posture changes on the Peninsula consistent with the joint vision for the alliance laid out by both Presidents and further developed by the Secretary of Defense and his ROK counterpart. If confirmed, I will continue the close defense cooperation with South Korea.

Question. What is your understanding of the plans for rotational deployments of U.S. marines to Australia and how, in your view, will such a presence advance U.S. security interests?

Answer. During the August 2014 Australia-United States Ministerial Consultations, Secretary Kerry, Secretary Hagel, the Australian Minister of Foreign Affairs, Julie Bishop, and the Australian Minister of Defense, David Johnston signed a Force Posture Agreement that enables the investments required to reach a full rotational deployment of up to 2,500 U.S. marines and enhances U.S. Air Force cooperation and access to Northern Australian airfields. The initiatives that we implement under this agreement will continue to enhance our alliance with Australia and our engagement with other regional partners. Smaller Marine rotations to Darwin over the past several years have proven that the multilateral engagement opportunities are beneficial to both U.S. security interests and to our allies' and partners' interests in the region. Additionally, Marine Corps presence in Darwin will help both nations better respond cooperatively to a crisis in the region, including humanitarian assistance and disaster relief. These initiatives—developed in cooperation with our important Australian ally—demonstrate the strength of the U.S.-Australia alliance and its ability to enhance regional stability and security. If confirmed, I will continue the close defense cooperation with Australia.

Question. Do you have any concerns about the timing and readiness of follow-on forces arriving in PACOM to meet operational plans? If yes, what are they and how can they be resolved?

Answer. Yes. The time it will take to deploy the forces/capabilities to locations of most likely crisis and contingency within the PACOM AOR remains a concern. The tyranny of distance involved in moving forces from the West Coast to the Western Pacific, especially Korea, impacts my ability to provide a timely response.

If confirmed, I will advocate for the necessary forward deployed forces, in conjunction with a dynamic force presence and required lift—both sealift and airlift—to ensure we are able to meet required operational timelines.

Question. The rebalance to the Pacific will increase the percentage of U.S. ships in the region from 50 percent to 60 percent of the Navy's entire fleet. However if the fleet size is reduced from about 300 ships to about 250 ships, the number of ships forward deployed the region will remain the same at about 150.

Does the potential of increasing the percentage of ships in the region, but the number of ships in the region remaining the same, lead to challenges regarding the expectations of allies, and if so, how would you plan to mitigate such an effect?

Answer. The Navy is on track to meet its goal of homeporting 60 percent of the fleet in the Pacific by 2019. Current projections show that the fleet size in 2019 will be 286 ships, meaning that 60 percent would total 171 ships. This represents an increase of 21 ships from today's current presence. That said, if the number of ships in the Navy inventory shrinks to 250 because of sequestration or other mandates, the Pacific Fleet would certainly field a proportionally smaller force. However, while I agree that quantity has a quality all its own, looking solely at the number of ships provides only a partial view of our capability—our platforms and systems are dramatically more advanced and capable than their predecessors. Risk in capacity is mitigated by improvements in capability, including the leverage provided by the Joint force.

Question. How do you plan to mitigate the effects of reduced U.S. aircraft carrier presence in the region?

Answer. The Navy does not plan to reduce carrier numbers in the Pacific Fleet. In fact, once CVNs 78 and 79 come on line, the Navy's carrier numbers will be at 11 with 6 CVNs homeported in the Pacific. While not optimal, until then, PACOM has significant deployable assets across the Joint force that can achieve meaningful deterrent and/or kinetic effects. If confirmed, I will continue to posture these forces to achieve PACOM objectives and mitigate operational risk.

Question. The March 14, 2014 U.S.-China Economic and Security Review Commission report said that "... there is growing concern among U.S. allies and partners that the United States will be unable to follow through on its commitment to the rebalance due to declining defense budgets and continuing security challenges elsewhere. Furthermore, some regional countries almost certainly began to question the willingness of the United States to restrain China's increasing assertiveness after China in 2012 gained de facto control of Scarborough Reef, territory also claimed by the Philippines, a U.S. treaty ally. This perception could lead some regional countries to increasingly accommodate China or pursue military capabilities that could be used offensively or preemptively."

Do you agree with this assessment and what mitigation steps would you recommend?

Answer. While I agree that some countries are concerned, I disagree with the premise that the United States is unable to follow through on its commitment to the rebalance and is, therefore, a poor security partner. The Rebalance is real and being realized now. I firmly believe our allies and partners are confident about the U.S. commitment to the region. In fact, in meetings I've had with civilian and military leaders across the region, countries are consistently turning to the United States as their security partner of choice.

Additionally, I have not observed evidence to suggest any significant alignment or accommodation to China among our allies and partners. To the contrary, China's provocative behavior troubles them greatly, which has created a demand signal for greater partnership with the United States. Most nations (including the United States) have increased their economic relationship with China over the past few years—this, of itself, is not a bad thing as it helps promote a strong and prosperous Asia-Pacific region. However, economic arrangements do not portend security relationships. I do not see the demand signal for partnership with the U.S. abating.

ENGAGEMENT POLICY

Question. One of the central pillars of our national security strategy has been military engagement as a means of building relationships around the world. Military-to-military contacts, joint combined exchange training exercises, combatant commander exercises, humanitarian assistance operations, and similar activities are used to achieve this goal.

If confirmed, what modifications, if any, would you make to the engagement activities of the U.S. military in PACOM? What would be your priorities for such activities?

Answer. If confirmed, I would not modify Admiral Locklear's approach to engagement in the region, which is properly focused on strengthening existing alliances and partnerships and building new relationships. Our deepening partnerships with Malaysia, Vietnam, Singapore and Indonesia are examples of recent progress. I would continuously assess and adjust engagement activities based on changing re-

gional dynamics and adjustments to national guidance and initiatives. Should I be confirmed, my priority would be to continue this process of expanding our network of partners to improve the stability and prosperity of the region.

Question. In your opinion, how do these activities contribute to U.S. national security?

Answer. Military engagement activities strengthen the network of alliances and partnerships in the Asia-Pacific, reinforce deterrence, and build partner capacity and competence which, in turn, advance common interests, address shared threats, and facilitate freedom of movement and access. Military engagement builds partnership capacity in order to reduce risk to U.S. forces and postures the United States as the security partner of choice.

Question. In February 2014, General Herbert Carlisle, Commander of U.S. Pacific Air Forces, warned in an interview that America's cancellation of a number of military-to-military exercises in Asia is "incredibly concerning amongst our friends, partners and allies," and added: "If there is any angst out here [from allies], it is the budget situation we are facing; the rebalance of the Pacific; and if, given the fiscal constraints that the United States has, if we are going to be able to follow through on that."

Do you share General Carlisle's assessment regarding "angst" about the ability of the United States to properly resource and execute its Asia Rebalance strategy?

Answer. General Carlisle made those comments after Pacific Air Forces, Pacific Fleet, and the other PACOM components cancelled or down-scoped numerous exercises, large and small, in 2013 due to the sequester. I agree with him completely that continuous changes in fiscal fact and assumptions hamper our ability to execute mid- and long-term plans and exercises. This leads to poor utilization of resources. These budget uncertainties affect not only our ability to exercise and operate with our allies and partners, they also affect our people, equipment, and infrastructure by reducing training and delaying needed investments. These delays reduce our readiness and the ability to reliably interact with our allies and partners in the region.

Question. Do you believe that in order to demonstrate a serious U.S. commitment to the Asia-Pacific, that PACOM will need significantly more resources than would be permitted under the Budget Control Act?

Answer. Continued reductions to meet sequestration-mandated resource levels will diminish our military's size, reach, and margin of technological superiority. All of these factors will impact the U.S. rebalance to the Pacific. For example, there will be fewer aircraft and ships, and these will be under-maintained; there will be fewer troops, and they will be under-trained; and we will have to fight with older weapon systems and equipment.

Question. What specific military risks do you think the United States and its allies and partners in Asia will incur if the Budget Control Act goes forward?

Answer. The cumulative effect of continuing resolutions and sequestration will result in significant reductions to the readiness, presence, capability, and interoperability of U.S. forces in the region. It will decrease our ability to train, exercise, and engage with allies and partners throughout the Asia-Pacific, which will limit the progress in building capable partners that can operate in coalition with, or in lieu of, U.S. forces. As a result, the United States will bear more significant risk in the event of a regional contingency.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations, including the global train and equip authority ("section 1206") and Global Contingency Security Fund.

What is your understanding of the purpose of the section 1206 global train and equip authority and Global Contingency Security Fund?

Answer. Congress approved section 1206 global train and equip authority in 2006 in part to give the State Department and DOD a more flexible capacity building authority to address urgent and emergent threats before the threats destabilize theater partners or threaten the Homeland. I worked with this authority when I was assigned to U.S. Southern Command as its Director of Operations in 2007–2008. In 2009, the scope expanded to assist coalition partners as they prepare for deployment. This rapid funding tool is PACOM's most agile mechanism to address counterterrorism capability gaps in partner nations.

The Global Security Contingency Fund (GSCF) is an initiative to pool the resources of the Departments of State and Defense, as well as the expertise of other

departments, to provide security sector assistance for emergent challenges and opportunities.

The GSCF has no appropriated funding; rather State and DOD can transfer funds from other appropriations into the GSCF. DOD can transfer up to \$200 million from defense-wide Operations and Maintenance and State can transfer up to a combined \$25 million from Foreign Military Financing, International Narcotics Control and Law Enforcement, and the Pakistan Counterinsurgency Capability Fund. The GSCF can provide assistance to: (1) national military and security forces, as well as the government agencies responsible for overseeing these forces; and (2) the justice sector when civilian agencies are challenged (including law enforcement and prisons), rule of law programs, and stabilization efforts in a country.

PACOM currently has two GSCF projects in progress, one in the Philippines and one in Bangladesh. The Bangladesh project is valued at \$3.5 million and focuses on increasing interoperability between the Bangladesh Ministry of Defense and Ministry of Home Affairs. The Philippines project is valued at \$40 million and focuses on strengthening maritime domain awareness and transferring internal security from the military to law enforcement agencies. Both of these projects are in the execution phase now and should enhance security in those nations.

Question. In your view, what are our strategic objectives in building the capacities of partner nations in the Asia and Pacific region?

Answer. The United States' primary objective in building the capacity of foreign partners is to help them develop effective and legitimate security institutions that can provide for their countries' security while contributing to regional and multilateral responses to shared threats. Capacity building provides opportunities to build defense relationships and promotes both interoperability between our forces and access to the region during peacetime and contingency operations. Lastly, building this capacity in our allies and partners lessens the burden on U.S. forces responding to security threats outside the United States.

Question. In a resource-constrained fiscal environment, how would you prioritize the types of programs or activities that should receive support under these security assistance authorities?

Answer. If confirmed, I would prioritize the most critical partner capability shortfalls in the PACOM AOR that present risk to the United States, our allies, and our partners first. In order to receive the most value from these programs, regardless of the fiscal environment, I would aggregate the critical gaps from PACOM's country plans, find common gaps and areas of concern such as maritime security and counter-terrorism, and identify gaps in overlooked and under-resourced areas. Additionally, I would work closely with our Ambassadors to synchronize our efforts with other U.S. Government entities to ensure a whole of government approach to the region.

Question. In your view, what should be the role of DOD, vis-a-vis other civilian departments and agencies of the Government, in the exercise of instruments of soft power (civilian expertise in reconstruction, development, and governance)?

Answer. DOD does, and in my view should, play a role in supporting other U.S. Government departments and agencies to create a whole-of-government effort when exercising soft power. For example, following a natural disaster, DOD often responds to U.S. Agency for International Development (USAID) requests for humanitarian assistance. DOD and partner agencies and departments have liaisons embedded in each other's major headquarters to enable the DOD to effectively provide that support. At PACOM, for example, there are liaison officers from the Department of Energy, Department of the Interior, USAID, Department of State, Federal Bureau of Investigation, and the National Oceanographic and Atmospheric Administration (NOAA), among others. DOD also plays a key role in working specifically with partner nation defense institutions in order to build capacity by contributing perspectives and lessons learned that reside uniquely within the Department; however, it is critical that these efforts be undertaken in close coordination with other Federal agencies, particularly the Department of State.

Question. What is your assessment of the effectiveness of these building partner capacity programs conducted in the PACOM AOR in supporting U.S. strategic objectives?

Answer. I believe the building partner capacity programs are very effective. PACOM's planning priorities directly support U.S. strategic objectives and PACOM's Theater Security Cooperation operations, activities, and actions receive the coordination and resourcing rigor necessary to ensure the best use of resources to achieve those objectives.

Question. China's defense spending has had double-digit increases annually for about the past 20 years.

How would you characterize the current U.S. relationship with China?

Answer. The senior-most leaders of our two countries have consistently affirmed the need for a positive, cooperative, and comprehensive U.S.-China relationship. It is a relationship which includes elements of cooperation and competition. It is one of the most complex and important relationships in the world. China's efforts to cooperate with the international community, such as help with the removal of chemical weapons from Syria, counter piracy in the Horn of Africa, and participation in humanitarian and disaster relief operations during the search for Malaysia Airlines Flight 370 and Typhoon Haiyan should be encouraged. At the same time, China is rapidly modernizing its military and engaging in aggressive behavior against its neighbors, particularly in the East and South China Seas.

Question. What do you believe are the objectives of China's steady increase in defense spending and its overall military modernization program?

Answer. China appears to be building the capability to fight and win short duration, high-intensity conflicts along its periphery, including, potentially, countering U.S. military intervention in regional conflicts. In this respect, we are watching carefully China's investments in so-called anti-access/area denial capabilities. Its near-term focus appears to be on preparing for potential contingencies involving Taiwan. Its modernization efforts emphasize anti-access and area denial capabilities. China is also devoting increasing attention and resources to conducting operations beyond Taiwan and China's immediate periphery. Beijing's growing focus on military missions other than war includes humanitarian assistance, non-combat evacuation operations, and counter-piracy support. Lastly, China is strengthening its nuclear deterrent and enhancing its strategic strike capabilities through modernization of its nuclear forces. Additionally, China is improving other strategic capabilities such as in space, counter-space, and computer network operations.

Question. How should the United States respond to this Chinese military growth and modernization?

Answer. I believe the United States should continue to monitor developments in China's military concepts and capabilities while encouraging Beijing to be more transparent about its military and security affairs. The United States has been, and should remain, the pivotal military power in the Asia-Pacific region in order to preserve the conditions that have fostered peace and prosperity. The United States' response to China's military modernization should be flexible and supported by the continued transformation of our force posture in the region, the maintenance of our global presence and access, the modernization of our own capabilities in areas such as countering anti-access and area denial, and the strengthening of our alliances and partnerships.

Question. What are your views of China's deployment of warships to counter piracy in the western Indian Ocean and how does this deployment contribute to China's ability to project power?

Answer. Counter piracy is an area of mutual concern as Indian Ocean pirates threaten the commercial shipping of both our countries. Ultimately, we want to see China become a net contributor to global stability. These operations allow China to take a more active role in contributing to the international effort of safeguarding sea lines of communication. It demonstrates to China the value of multilateral approaches to global problems. China's power projection ability is progressing and we recognize the evolution of its military modernization. Operations like those off the Horn of Africa can improve China's ability to operate at greater distances from China.

Question. What do you believe are the Chinese political-military goals in the Asia-Pacific region? Globally?

Answer. The overarching objectives of China's leaders appear to be ensuring the continued rule of the Chinese Communist Party, continuing China's economic development, maintaining the country's domestic political stability, defending China's sovereignty and territorial claims, and securing China's influence and status. Within this context, leveraging its political, economic, and military clout to move toward unification with Taiwan is a key part of Beijing's strategy.

Question. What effect is China's military growth having on other countries in the region?

Answer. China's rapid rise and the relative lack of transparency surrounding its intentions are increasingly a source of instability in the region. Other countries in the region are closely watching the growth of China's military and how its military

acts. Tensions between China and its neighbors in the East and South China Seas have increased, spurring regional actors to modernize their forces.

Answer. Security concerns regarding Chinese military intentions have contributed to a greater focus on regional forums such as ASEAN, where issues may be addressed multilaterally. Such security concerns have also led to stronger and more welcoming relations between Asia-Pacific countries and the United States as a security partner of choice.

Question. How do you assess the current cross-strait relationship between China and Taiwan, and how can we help prevent miscalculation on either side?

Answer. Both China and Taiwan have made significant strides to reduce tensions in the Taiwan Strait. These initiatives should be encouraged and we welcome the progress made by both sides. I believe the United States can help contribute to cross-strait stability by continuing to abide by our longstanding policies, based on the one China policy, three U.S.-China Communiqués, and the Taiwan Relations Act, including making available to Taiwan “defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability.”

Question. How do China’s efforts to establish a strategic presence in the Indian Ocean by securing and maintaining access to seaports in various South and Southeast Asian countries affect its political-military posture and influence in the region?

Answer. China looks to South and Southeast Asia as areas of strategic importance, which includes political objectives, access to ports, and access to resources, trade, and investment. I remain concerned with how China intends to use its presence. As China increases its naval deployments to the region, including ongoing participation in counter-piracy activities in the Gulf of Aden, China will require greater forward logistics capabilities to sustain operations. We have already seen Chinese submarines pull into Sri Lanka, for example. Establishing access to various seaports will require improving ties with states along the Indian Ocean littoral and closer cooperation with other regional navies, which could expose them to more nontraditional security challenges such as terrorism. The U.S. retains strong relationships in South and Southeast Asia and should continue to monitor China’s growing presence in the region.

Question. What is the role of DOD in helping to ensure that China’s nuclear power industry does not contribute to the proliferation of nuclear weapons in the region?

Answer. China is a signatory to the Nuclear Non-Proliferation Treaty and the United States should continue to insist that China meet its obligations under that accord. DOD participates in the U.S. Government effort to execute the President’s vision to prevent the proliferation of weapons of mass destruction and delivery systems, along with related technologies and material throughout the globe. DOD must maintain robust ISR capabilities to ensure we are aware of developments in this area. Finally, I believe that DOD should continue to work with the interagency to ensure that any proliferation concerns relating to China are expressed to the Chinese Government in the appropriate forums.

Question. What is your assessment of the current state of U.S.-China military-to-military relations?

Answer. I believe the United States and China desire a healthy, stable, reliable, and continuous military-to-military relationship. There are recent examples where we have seen improved practical cooperation, such as counter-piracy, humanitarian assistance, disaster relief, and military medicine exchanges. The PLA (Navy) participated—at U.S. invitation—in this year’s Rim of the Pacific (RIMPAC) maritime exercise in the Hawaiian operating areas (even though they also deployed an intelligence-collecting ship in the U.S. exclusive economic zone during the exercise). China hosted the Western Pacific Naval Symposium in Qingdao earlier this year, during which the Navies for the region (including the PLA Navy) adopted the Code for Unplanned Encounters at Sea (CUES). I attended, was treated extremely well, and had frank discussions with its Chief of Navy, Admiral Wu Shengli. The PLA (Navy) leadership attended the International Seapower Symposium in Newport this September where I again met with Admiral Wu. The PLA and the U.S. military have made strides in the Rules of Behavior Working Group forum as well, which culminated in the Secretary of Defense and China’s Military of Defense signing a Memorandum of Understanding regarding the rules of behavior for safety of air and maritime encounters. However, a deeper U.S.-China military-to-military dialogue is needed to address many of the sources of insecurity and potential competition that may arise as our two forces come into closer and more frequent contact. For example, the PLA routinely conducts close and unsafe intercepts of our aircraft operating in international airspace.

The U.S. military continues to pursue opportunities to cooperate where there is clear, mutual benefit while establishing a dialogue on areas where there are differences. I believe we should continue to use military engagement with China to demonstrate U.S. commitment to the security of the Asia-Pacific region, to encourage China to play a constructive role in the region, and to press China to partner with the United States and our friends in the region to address common security challenges.

Question. Do you believe that the United States should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. If confirmed, I would look for ways to strengthen the U.S.-China military-to-military relationship, consistent with U.S. law. The U.S.-China military-to-military relationship has experienced positive momentum over the past 2 years. Our approach should continue to pursue this positive development consistent with U.S. interests in a sustained, substantive dialog with China; concrete, practical cooperation where it makes sense; and enhanced risk reduction measures to manage our differences constructively. At the same time, I would seek to ensure that we balance these exchanges with continued robust interactions with allies and partners across the region.

Question. What is your view regarding the longstanding U.S. policy of selling defense articles and services to Taiwan despite objections and criticism from China?

Answer. I personally strongly support the Taiwan Relations Act. U.S. policy on arms sales to Taiwan is based on the 1979 Taiwan Relations Act, which provides that the United States will make available to Taiwan defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. The Act also states that the President and Congress shall determine the nature and quantity of such defense articles and services based solely upon their judgment of the needs of Taiwan. It is my view that this policy has contributed to peace and stability in the region for more than 30 years and is consistent with the longstanding U.S. calls for peaceful resolution of the Taiwan issue in a manner acceptable to the people on both sides of the Taiwan Strait.

Question. In your view, to what extent, if at all, should China's possible reaction to such sales be considered by the United States when making decisions about the provision of defense articles and services to Taiwan?

Answer. Our decisions about arms sales to Taiwan are based solely on our assessment of Taiwan's defense needs. The Taiwan Relations Act states the United States will make available to Taiwan such defense articles and defense services in such quantity as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. In my view, we should not stray from our commitments out of concern for how China may react.

Question. By most accounts, China has become more assertive in its claims of sovereignty in various domains, including maritime, air and space. There are numerous examples of this assertiveness, including: China's increased aggressiveness in asserting its maritime claims in the South China Sea, the recent declaration of its Air Defense Identification Zone (ADIZ), and its stationing of an oil rig in waters claimed by Vietnam which led to a series of unsafe encounters between Vietnam and China this past summer. Other incidents include a Chinese vessel intercepting the USS *Cowpens* and a Chinese fighter plane flying dangerously close to a Navy P-8 Poseidon surveillance plane off the coast of China. These incidents underscore the nature of Chinese maritime claims and the Chinese sensitivity associated with U.S. Navy operations in these areas.

What role should the United States play in the ongoing maritime disputes in the South China Sea?

Answer. I agree with the assessments of the Departments of State and Defense that the United States should not take a position on the competing territorial claims over land features in the South China Sea. I believe all parties should resolve their disputes through peaceful means and in accordance with customary international law, without resorting to the threat or use of force.

The United States is a Pacific nation that has a national interest in freedom of navigation, open access to Asia's maritime domain, the maintenance of peace and stability, free and open commerce, and respect for international law in the South China Sea. The United States should sustain its presence in the South China Sea and uphold its commitments to its allies and partners in order to maintain peace and stability in the region.

Question. How does the presence of the U.S. Navy in the South China Sea influence this maritime dispute and, in your view, would an increase in U.S. activity in that region serve to stabilize or destabilize the situation?

Answer. Although the United States does not take a position on the territorial and maritime disputes, I believe it is essential for the U.S. Navy to maintain its presence and assert its freedom of navigation and overflight rights in the South China Sea in accordance with customary international law. The U.S. Navy is a key provider of the military presence that underlies peace and stability across the globe, including in the South China Sea.

If confirmed, I will work with our military commanders to evaluate the appropriate level of naval activities in the South China Sea to maintain regional peace and stability as well as unimpeded access for lawful commerce and economic development.

Question. What should the United States do to help prevent dangerous encounters in the South China Sea?

Answer. To reduce the risk of conflict in the South China Sea, I believe the United States should continue to support initiatives and confidence building measures that will help claimant states reach agreement on a binding Code of Conduct in the South China Sea. Additionally, the United States should continue serving as a positive example of a nation that adheres to the international norms of safe conduct through policy implementation, effective training, and proper accountability. The United States should also continue to engage China through the Military Maritime Consultative Agreement (MMCA) as a positive bilateral mechanism to address operational safety issues in the maritime domain.

Additionally, the United States should continue to promote existing international “rules of the road,” such as the International Regulations for Preventing Collisions at Sea and other established international safety and communication procedures, such as the new CUES. The United States should also encourage all South China Sea claimants to abide by these international standards of safe conduct to ensure greater operational safety and reduce the risk of dangerous incidents at and over the sea.

Question. How should the United States view China’s recent declaration of an ADIZ zone that includes the area over the Senkaku Islands and does the declaration increase the risk for instability in the region?

Answer. The United States has been very clear that every nation has a right to establish ADIZs, but should not do so unilaterally without collaboration and consultation. We view this development as a destabilizing attempt to alter the status quo in the region. The way China announced its East China Sea ADIZ—uncoordinated and without consultation—increased the risk of misunderstanding and miscalculation. Contrast this with the Republic of Korea’s new ADIZ in the same general area—it was done in consultation with its neighbors, including Japan. China’s unilateral approach and unclear procedures have certainly increased tensions in the region.

Question. The March 14, 2014 U.S.-China Economic and Security Review Commission report said “Particularly since 2012, China has increased control over some disputed areas by stepping up enforcement of its territorial claims with coercive but nonkinetic measures.”

What specific capabilities, strategy, tactics, techniques, and procedures do you think are required to counteract China’s “coercive but nonkinetic measures”.

Answer. China’s “coercive but non-kinetic measures” have primarily been through non-military means, but backed up by threat of force. For example, Chinese coast guard and fishing ships have harassed Japanese shipping vessels near the Senkakus, Vietnamese ships in the Paracels, and Philippine resupply of its outpost on Second Thomas Shoal with shouldering and water cannon, but no kinetic responses from military combatants. While the U.S. military has many options available to address PRC coercion, military actions should be a supporting element of the overall U.S. Government strategy, not the main effort. Just as the rebalance to the Pacific is a whole of government effort, so are the potential solutions to current territorial disputes. That said, forward presence and support to our allies, partners and friends are critical. Discussion of specific capabilities is a conversation best Reserved for a classified forum.

Question. Cyber space has become a critical realm for civilian and military applications and also represents a potentially substantial vulnerability. There are reports that China is aggressively pursuing cyber warfare capabilities, and would likely seek to take advantage of U.S. dependence on cyber space in the event of a potential conflict situation.

What is your understanding of China’s efforts to develop and deploy cyber warfare capabilities?

Answer. As part of China’s military modernization, it is making efforts to degrade the effectiveness of critical enabling nodes of modern warfare, such as space, cyber, and the electromagnetic spectrum. China’s military modernization efforts are aimed

at increasing its relative military advantage and closing what it perceives as a technological capability imbalance between its Armed Forces and modernized militaries.

As does the United States, China fully understands the critical importance of cyber as an element of modern warfare. Chinese military writing clearly shows that China views itself at a disadvantage in any potential conflict against a nation with a modern high-tech military, such as the United States. To overcome this disadvantage, China has developed organizations and capabilities that are designed to reduce its perceived technological gap and to reduce the effectiveness of United States and other advanced militaries' core competencies in a crisis.

Question. If confirmed, what would you do to help ensure our military is protected in cyber space and prepared to defend against a cyber attack?

Answer. If confirmed, I would work closely with other parts of DOD and inter-agency partners to include STRATCOM, CYBERCOM, and Departments of State, Homeland Security, and Commerce, to facilitate a coordinated approach to cyber threats, not only from China, but from any potential adversary. While an increased cyber defensive posture is important, it is not enough for us to build thicker walls and continue to absorb daily cyber-attacks. Defense in itself will not deter our Nation's adversaries. We must work together as a government to defend, and take appropriate response measures to deter, against future exploitation and attack. As the President stated in his International Strategy for Cyberspace, we Reserve the right to use all necessary means—diplomatic, informational, military, and economic—as appropriate and consistent with applicable international law to defend our Nation, our allies, and our interests against hostile acts in cyberspace.

Question. In January 2007, China used a ground-based missile to hit and destroy one of its weather satellites in an anti-satellite test creating considerable space debris and raising serious concerns in the international community. Since then, China has continued its active pursuit of defense and anti-satellite technology.

What is your view of China's purposes for its pursuit of these capabilities?

Answer. The United States' goal should be to promote the responsible use of space. In my view, this test was a troubling incident. It was yet another element of China's comprehensive, long-term military modernization effort to develop and field disruptive military technologies, including those for anti-access/area denial, as well as for nuclear, space, and cyber warfare.

Question. What do you see as the long-term implications of such developments for the U.S. military, for U.S. national security, and for U.S. interests in space?

Answer. The United States should seek ways to protect our interests in space. Space systems are vital to our national security and our economy. I believe we need to enhance our deterrence and ability to operate in a degraded environment. Therefore, U.S. space policies and programs should be informed by China's space and counterspace capabilities, which have contributed to today's challenging space environment. At the same time, the United States should seek to engage China, a major space-faring nation, to promote the responsible use of space. However, our concern should not be focused on only one country, but on the range of actors that make space increasingly congested, contested, and competitive.

Question. What are your views regarding the potential weaponization of space and the international agreements to prevent space weaponization?

Answer. I support the principles outlined in the 2010 National Space Policy, especially that all nations have a right to explore and use space for peaceful purposes, and that all nations should act responsibly in space to help prevent mishaps, misperceptions, and mistrust.

I support our longstanding national policies of affirming the right of all nations to use outer space for peaceful purposes, the right of free passage through space, and the right to protect our forces and our Nation from those that would use space for hostile purposes.

But space is vital to U.S. national security and that of our allies and partners. We must not concede this truly high ground to anyone.

TAIWAN

Question. What is your view of U.S.-Taiwan security relations?

Answer. I personally strongly support the Taiwan Relations Act. U.S. policy on arms sales to Taiwan is based on the 1979 Taiwan Relations Act, which provides that the United States will make available to Taiwan defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. The Act also states that the President and Congress shall determine the nature and quantity of such defense articles and services based solely upon their judgment of the needs of Taiwan. It is my view that that policy has contributed to peace and stability in the region for more than 30 years and is consistent

with the longstanding United States calls for peaceful resolution of the Taiwan issue in a manner acceptable to the people on both sides of the Taiwan Strait. To achieve these ends we maintain a strong military-to-military engagement with Taiwan.

Question. What do you believe should be the priorities for U.S. military assistance to Taiwan?

Answer. We closely monitor the shifting balance in the Taiwan Strait and Taiwan's defense needs. Given the rapid pace of PRC military modernization, I believe our priorities should include assisting Taiwan with its joint operations capabilities and training; streamlining, modernizing, and integrating its existing (and aging) defense programs to be more effective; helping Taiwan develop its new All-Volunteer Force; and seeking innovative solutions to complement its traditional military capabilities.

Question. What is your opinion of the Taiwan Relations Act (TRA)? Enacted 30 years ago this year, do you see any need to modify the TRA to reflect the current state of affairs in the region? If so, how?

Answer. The Taiwan Relations Act, which guides our unofficial relations with Taiwan, has been in force now for over 30 years and plays a valuable and important role in our approach to the Asia-Pacific region. As called for in the TRA, our longstanding policy to assist Taiwan with maintaining a sufficient self-defense capability helps ensure security and stability in the region. I would not recommend any changes to the law at this time.

Question. Given the increasing military imbalance across the Taiwan Strait, do you think Taiwan is making appropriate investments in its defensive capabilities? If not, what is the best way to encourage Taiwan to invest more in its military?

Answer. Taiwan must ensure that it adequately resources its defense programs and defense transformation to include considering increasing its defense budget. We can (and should) proactively help Taiwan see where it should improve its capabilities in the face of the imbalance across the Strait. I believe the best way to encourage Taiwan to invest more in its military is to send strong and consistent messages from the U.S. Government to Taiwan, and to demonstrate our resolve to engage them in a positive and professional manner. Finally, I believe that we must continue to emphasize to our friends in Taiwan that they must be resolute in protecting and securing sensitive and classified military and technological information, particularly as they move forward with its all-volunteer force modernization program.

Question. What military capabilities do you believe would be most effective in improving Taiwan's self-defense capability over the next 5 to 10 years?

Answer. Capabilities that deter the PRC—especially an amphibious invasion—and increase the Taiwan military's survivability are critical. No less important are non-materiel solutions such as improved jointness, recruitment, training, integration and innovative solutions. Finally, one of the most cost effective solutions Taiwan can adapt from the U.S. military is to continue developing its NCOs and Junior Officers.

Question. What do you believe should be appropriate criteria for the consideration of potential United States sales of military aircraft to Taiwan?

Answer. The 1979 Taiwan Relations Act states the United States will make available to Taiwan the defense articles and services required to enable Taiwan to maintain a sufficient self-defense capability. The Act also states the President and Congress will determine the nature and quantity of required defense articles based on the needs of Taiwan. Taiwan's self-defense strategy should dictate the need for specific military capabilities, and the United States should make available to Taiwan the defense articles and services required to maintain a sufficient self-defense, consistent with its defense strategy.

Specific to military aircraft, Taiwan may need a replacement airframe for its aging and outdated F-5 E/F and MIRAGE 2000 fighters in order to maintain a sufficient self-defense. However, Taiwan should look more broadly across its armed forces in all domains to determine what capabilities are best to ensure a sufficient self-defense. We should help them with this analysis.

Question. What is your opinion of Taiwan's proposed plan to develop an indigenous submarine program?

Answer. I believe a Taiwan military equipped with a credible defensive undersea warfare capability will directly contribute to its self-defense and to long-term stability in the region.

NORTH KOREA

Question. North Korea still represents one of the greatest near term challenges to security and stability in Asia and deterring conflict on the Korean peninsula remains a top U.S. priority.

What is your assessment of the current security situation on the Korean peninsula and of the diplomatic efforts to date to persuade North Korea to comply with international mandates regarding its ballistic missile and nuclear weapon programs?

Answer. Following the consolidation of power under Kim Jong Un, North Korea remains my number one security concern. It is what “keeps me awake at night.” While Kim Jun Un’s consolidation appears to have eliminated de-stabilizing factors inside the country in the near term, the Nation’s volatility and unpredictability are troubling. The frequent reshuffling of senior leadership surrounding Kim Jong Un heightens our concern as new variables have been added to North Korea’s decision-making calculus. Diplomatic and other outreach efforts underscore Kim Jong Un’s national strategy of promoting economic development and nuclear deterrence together. However, enduring U.S. and allied concerns—North Korea’s past provocative behavior, large conventional military, provocations, proliferation activities, and pursuit of asymmetric advantages through its ballistic missile and weapons of mass destruction (WMD) programs (including uranium enrichment)—present the most serious threat to the United States, our allies and partners in the region, and the international community.

The U.S. State Department is best positioned to assess diplomatic efforts, but U.S. Special Envoy for North Korean Policy Glyn Davies testified this summer that “We have no misconceptions about North Korea’s willingness to give up its arsenal voluntarily. All of North Korea’s actions over the past few years, from its nuclear tests to the amendment of its constitution to declare itself a nuclear state, signal that it has no interest in denuclearizing. We take this threat seriously, and remain ironclad in our commitment to the defense of our allies, the Republic of Korea and Japan. Together with our allies and partners, we are working to shift Pyongyang’s calculus from believing that a nuclear program is necessary for regime survival to understanding that such a program is incompatible with its national interests . . . That is why our policy mix includes sanctions and traditional deterrence measures. In short, ours is a comprehensive approach that seeks to denuclearize North Korea through diplomacy while ensuring deterrence of the North Korean threat.” Well said!

Question. What is your understanding of the threat posed to the United States and our allies by North Korea’s ballistic missile and WMD capabilities, and the possible export of those capabilities?

Answer. North Korea’s potential use of WMD presents a clear and present threat. We must ensure our forces are prepared to respond and that North Korea is deterred from using WMD. North Korea has an ambitious ballistic missile program that poses a significant threat to the entire Pacific region. As witnessed in 2014, North Korea continues to develop and flight-test short and close-range ballistic missiles—demonstrating the capability to target South Korea and Japan. North Korea also continues to develop the Taepo Dong-2 (TD-2), which Pyongyang claims to have tested in a space launch configuration but could also reach the United States, if developed as an intercontinental ballistic missile (ICBM). Furthermore, North Korea continues to develop newer systems—including an intermediate-range ballistic missile and a road-mobile intercontinental ballistic missile known as the KN08, which was first publically paraded in Pyongyang in April 2012. Though never flight tested, the KN08 could reach the continental United States.

North Korea’s continued proliferation efforts pose a significant threat to the Pacific region and beyond. It is a proven proliferator of ballistic missiles and associated technologies to countries like Iran—creating a serious and growing capability to target U.S. forces and our allies in the Middle East. North Korea assisted Syria in building a covert reactor in the early 2000s, which would have been capable of producing plutonium for nuclear weapons. As such, we must continue to work with our allies and partners to build a regional capability to combat North Korean WMD.

Question. How has the new government of Kim Jong-Un changed the Department’s risk assessments of North Korea?

Answer. Kim Jong Un is approaching his third year in power in December 2014. We assess that his actions throughout his first years were intended to consolidate power and project his capacity for dealing ruthlessly with his enemies, both foreign and domestic. His actions reaffirm that North Korea’s pursuit of nuclear and missile capabilities poses an immediate and evolving threat to the United States and our allies. Our assessments of the risk have not changed, and we continue to conduct operations and refine plans to address these threats.

Question. What concerns you most about North Korea and, if confirmed, what would you do to address those concerns?

Answer. North Korea maintains a large and offensively postured conventional military, continues to develop long-range ballistic missiles, seeks to develop nuclear

weapons and the means to deliver them intercontinentally, and engages in the proliferation of ballistic missiles in violation of international norms and law. North Korea has also conducted provocative attacks against the Republic of Korea. Most concerning about this range of threats is that they come from a single state standing on the outside of the international community. If confirmed, I will continue the strong relationship with USFK/CMC/UNC to drive intelligence, refine forecasts and warnings, sustain and advance our military readiness, and coordination with allies and partners. I will continue to work closely with my friends and counterparts in the Korean military. Finally, I will both seek and welcome opportunities to apply all means of national power to affect North Korean behavior.

Question. The February 2010 Ballistic Missile Defense Review Report established a policy and program priority for defending against near-term regional ballistic missile threats, and elaborated on the Phased Adaptive Approach to regional missile defense, including to defend against North Korean ballistic missile threats.

Do you support the missile defense policies and priorities established in the Ballistic Missile Defense Review, including a tailored phased adaptive approach to missile defense in the Asia-Pacific region to defend against North Korean regional ballistic missile threats?

Answer. Yes. The 2010 Ballistic Missile Defense Review provides the PACOM region with an integrated effort to strengthen regional deterrence architectures against North Korea. It aligns our defensive strategy, policies, and capabilities to the strategic environment. Today, we are deploying a second TPY-2 radar to Japan to enhance early warning and tracking. In 2013 we deployed a Terminal High Altitude Area Defense (THAAD) battery to Guam, and as the Secretary of Defense first announced in April 2014, we will soon deploy additional Aegis BMD-capable ships to Japan. These additional sensors and shooters will enhance a robust missile defense capability to defend the U.S. Homeland and support PACOM's regional missile defense mission against ballistic missile attack.

Question. According to South Korean press reports, recent Nodong missile tests conducted by North Korea appear to have been designed to fly the missiles at higher altitudes, and relatively shorter ranges. For example, although the Nodong has an estimated range between 1,000 and 1,500km, the March 2014 tests flew about 650km before landing in the Sea of Japan. In addition, because the missiles attained relatively high altitudes, they would challenge the ability of the Patriot system to intercept them.

Do you believe that these tests represent an attempt by Pyongyang to overcome missile defense systems currently emplaced in South Korea, and if so, what steps do you recommend in order to meet this threat?

Answer. We assess North Korea is developing mobile ballistic missiles for various reasons, which obviously could include trying to mitigate the effectiveness of U.S. and allied missile defense systems. But, we have no specific information to confirm that hypothesis. It is possible that these missiles were simply fired at a shorter range to demonstrate North Korea's capability without actually firing into another country's territory and thereby creating increased diplomatic friction. Whatever the motivation, North Korea is a threat to the region and to us.

REPUBLIC OF KOREA

Question. What is your understanding of the current status of the U.S.-South Korean security relationship?

Answer. The U.S.-ROK alliance is a linchpin of security in East Asia. This was most recently reaffirmed by the Secretary of Defense during participation in the Security Consultative Meeting in Washington, DC in October of this year. Our security relationship is based on the mutual commitment to common interests, shared values, continuous dialogue, and combined planning to ensure a comprehensive strategic alliance. It is robust and enduring.

Question. If confirmed, what measures, if any, would you take to improve this security relationship?

Answer. I believe it is important to ensure the U.S. and Korean publics continue to understand the enduring mutual benefits derived from this alliance, and that the United States effectively works with the ROK as it plays an increasing role in regional and global security issues commensurate with the ROK's economic status and influence. If confirmed, I would work hard to maintain close contact with ROK military leadership and General Scaparrotti as we work together to improve a vitally important security relationship built upon an amazing foundation of 60 years of alliance.

Question. What is your view regarding the timing of the transfer of wartime operational control from the United States to South Korea that was planned for December 2015 and has now been delayed?

Answer. The United States and the Republic of Korea (ROK) have a comprehensive way forward to transition wartime operational control (OPCON). If confirmed, I will work with ROK military leadership and General Scaparrotti to complete this process, ensuring the transition is implemented methodically and that the combined defense posture remains strong and seamless. I support the current plan for OPCON transition, which calls for the ROK to assume wartime OPCON when critical ROK and alliance military capabilities are secured and the security environment on the Korean Peninsula is conducive to a stable transition. The conditions for the transfer are based on meeting capability-based milestones, including acquisition of weapon systems, command and control systems, ISR platforms, and adequate supply of munitions, along with the right certification process to validate the readiness for the transfer. The ROK military is a very capable force, but it has had some setbacks in funding to achieve these milestones. General Scaparrotti and his team at U.S. Forces Korea are working hard in concert with the ROK Joint Chiefs of Staff to meet the certification and capability requirements. If confirmed, I will help them.

Question. Do you believe that the security relationship with South Korea should remain focused on defense of the Korean Peninsula, or should U.S. forces stationed in Korea be available for regional or global deployments?

Answer. In accordance with the Mutual Defense Treaty between the United States and the ROK, U.S. presence on the Korean Peninsula serves to deter potential aggressors from taking hostile actions that would threaten the peace and security of the Republic of Korea. In my view, this presence has both deterred further war on the Korean Peninsula and contributed to the stability of the Northeast Asia region. As ROK military forces have served, and will continue to serve, with the U.S. military in places off the Peninsula (e.g., Iraq, Afghanistan, and in the Gulf of Aden), I believe the U.S.-ROK Alliance will continue to serve an important role regionally and globally. With regard to deploying U.S. forces stationed in Korea to other AORs, the forces in Korea serve an important mission there and we remain committed to maintaining current troop levels on the Korean Peninsula. Before deploying any forces from the Korean Peninsula to other AORs we will have to carefully weigh the potential risk to regional security and stability with competing national security objectives. We would not do anything that diminishes the Alliance's capability to fulfill its objectives.

Question. What is your assessment of the security benefits of the force repositioning agreed to under the Land Partnership Plan and the Yongsan Relocation Plan and how does repositioning U.S. forces change the way they will operate on the Korean Peninsula?

Answer. The two plans work to consolidate and relocate U.S. forces from north of Seoul and from the Seoul Metropolitan area to locations south of Seoul, primarily to the U.S. Army Garrison at Camp Humphreys and to Daegu. The movement of units and facilities to areas south of the Han River improves force protection and survivability, placing the majority of personnel and equipment outside of the effective tactical range of North Korean artillery. In addition, the move to a central location outside of Seoul provides efficiencies, reduces costs, contributes to the political sustainability of our forward presence, and improves military readiness on the Korean Peninsula. If confirmed, I will support it.

Question. Is the relocation plan affordable?

Answer. The majority of costs associated with the Yongsan Relocation Plan will be paid by the ROK. However, costs associated with the Land Partnership Plan will remain a concern in today's fiscal environment.

Question. What is your understanding of the U.S. obligations in the event of an attack on South Korea by North Korea, and under what circumstances do you believe U.S. Armed Forces should be committed to engage North Korean forces in response to an attack on South Korea?

Answer. Under the Mutual Defense Treaty, when the political independence or security of South Korea or the United States are threatened by external armed attack, the United States and South Korea will consult together and develop appropriate means to deter the attack. Given the pattern and future likelihood of North Korean provocations, the two sides should continue to consult closely so that responses are effective. The United States and South Korea also recognize that an external armed attack would be dangerous to peace and safety and will act to meet the common danger in accordance with our constitutional processes. Because of the uncertainty of actions by Kim Jung Un, we must be ready to fight tonight.

Question. How would you characterize the current U.S.-Japan security relationship?

Answer. The U.S.-Japan relationship is a cornerstone of security in East Asia. Japan is a valued ally and anchor of democracy and prosperity in the region. Our alliance has held fast through the turbulence of the Cold War, the Vietnam era, the post-Cold War period, through political turnover and economic woes in Japan, and through periods of very contentious trade disputes. Our alliance stands poised as a truly global one. The United States and Japan are in the middle of a complicated realignment process that is part of a larger alliance transformation agenda which includes a review of roles, missions, and capabilities to strengthen and ensure the relevance, capability, and cohesiveness of the alliance for the next several decades. In terms of our military-to-military relationship, it is stronger than ever. We welcome Japan's reinterpretation of its constitution.

Question. How does Japan's relationship with its regional neighbors, mainly China, North Korea and South Korea influence the U.S.-Japan relationship?

Answer. I believe it is important for Japan to continue to maintain and further develop constructive relations with all of its neighbors. Japan can and should increase its security cooperation with South Korea. Working with other U.S. allies and partners in the region, Japan can increase its contribution to peace, security, and prosperity throughout Asia and globally. Japan is a valued and essential partner in the Six-Party Talks process and in other important regional security architectures. Progress made to bolster trilateral security dialogues in Northeast Asia effectively links Japan, U.S. and South Korean approaches. That said, I remain concerned that the Japan-South Korea relationship is strained and exacerbated by historical animosities and territorial disputes. This is distracting to us and doesn't allow for the full realization of truly transformative defense architectures in East Asia. I worry that other powers may try to use this friction to drive a wedge between us and either ally.

Question. What steps, if any, do you believe Japan ought to take to become a more active partner in security activities with the United States and in the international security arena?

Answer. Japan is already a strong security partner with the United States and is increasingly contributing to international security activities. Japan is taking a number of domestic policy measures that will enable a greater degree of cooperation with us and with other like-minded international partners. For example, Japan has passed and will soon implement a new law regarding the handling of classified information which will strengthen information sharing ties with the United States, permitting a greater degree of cooperation. The Prime Minister's office also announced its intention to permit the limited exercise of collective self-defense and is embarking on the legislative process to implement that change.

Earlier this year, Japan announced a revision to its self-imposed prohibition on the export of military technology, permitting export in certain situations where it contributes to the peace and security of Japan, does not violate U.N. sanctions, and the recipients have appropriate safeguards to prevent unauthorized third party transfer, thereby opening the door to increased security cooperation and capacity building efforts in the region. In August 2014, Japan agreed to the transfer of 6 coastal patrol boats to Vietnam and is considering other transfers of military technology to partners in the region. This is a positive development that complements U.S. security cooperation activities, and assists the United States in developing ally and partner capabilities and capacities throughout the region.

The changing security environment in Asia will present new challenges and the United States and Japan must continue to work together to deal with these challenges, including greater interoperability between our Armed Forces at the strategic, operational, and tactical levels.

If confirmed, I will encourage Japan's development of joint doctrine and organizations that will enhance Japan's ability to undertake complex missions to build security in Asia. I will also encourage trilateral and multilateral security cooperation with the Republic of Korea, India, and Australia, as these kinds of activities effectively strengthen the functional capacity of the emerging regional security architecture. Regarding international security activity, Japan has actively participated in combined counter-piracy operations in the Gulf of Aden, deployed a battalion-sized Reconstruction and Support Group to southern Iraq from 2004–2006, is participating in the United Nations Mission in South Sudan, has been a significant donor to the ongoing Afghanistan reconstruction, and sent forces to help the Philippines during the Typhoon Haiyan crisis last year, among many other such activities. I be-

lieve Japan's participation in such global operations is a very positive development, and I would encourage future Japanese participation in such missions.

Question. What is your view of the United States-Japanese joint development of the Standard Missile-3, Block IIA missile defense interceptor, and of the overall program of cooperation between the United States and Japan on ballistic missile defense?

Answer. Ballistic missile defense cooperation with Japan is a success story for the alliance and has resulted in Japan's fielding of both sea and land-based missile defense systems. Japan is one of our most important ballistic missile defense partners and U.S.-Japan bilateral cooperation on ballistic missile defense plays an important role in supporting our common strategic objectives on defense. The SM3 Block IIA is an important cooperative program that will result in a significant increase in ballistic missile defense capability.

Question. The current plan is for the closure of the Marine Corps Air Station on Okinawa after the construction of a Futenma Replacement Facility (FRF) at Camp Schwab on Okinawa. While the Governor of Okinawa has signed the landfill permit to allow construction of the FRF to go forward, local opposition and a long construction timeline make the completion of the FRF uncertain.

What is your opinion of the prospects for the successful construction of the Futenma Replacement Facility at Camp Schwab on Okinawa?

Answer. I believe the Government of Japan, like the U.S. Government, remains committed to the Futenma Replacement Facility. This was restated in the October 2013 2+2 and October 2014 Assistant Secretary of Defense-level meetings. Currently, the Futenma Replacement Facility Roadmap is scheduled to be completed in 2022. Recent significant progress includes the signing of the required landfill permit by former Okinawa Governor Nakaima in December 2013 and the start of a preliminary construction geotechnical survey. Of course, there will be future challenges with continued implementation and we are committed to working closely with the Government of Japan to see this through to completion.

Question. Is the cost-sharing arrangement between the United States and Japan to pay for the relocation of U.S. forces from Okinawa to Guam and the costs associated with the continued presence of U.S. forces in Japan equitable and appropriate? Why or why not?

Answer. I believe the cost-sharing arrangements with the Government of Japan (GOJ) to be among the best we have. From an alliance perspective, the current laydown in Okinawa is not politically sustainable; the relocation of approximately 10,000 Marines and the return of land to Japan are critical. Guam is the only location outside of Japan where the GOJ has agreed to provide funds to offset the cost of relocation. For the GOJ, funding the construction of facilities for the use of U.S. forces on U.S. sovereign territory was an unprecedented step. Japan will provide \$3.1 billion in fiscal year 2012 dollars towards this effort. To date, the GOJ has provided over \$900 million towards fulfillment of that commitment. For relocations within Japan, the GOJ is paying the majority of the costs to develop new facilities. In April 2011, we entered into a new, 5-year host nation support agreement with Japan that maintained the overall level of support we receive from Japan for labor and utilities while, for the first time, putting a floor on the amount the GOJ provides for facilities construction.

Question. How, in your view, does building an unpopular new airfield on Okinawa, one that could take 7 to 10 years to finish at a cost of at least \$3.6 billion, serve to improve the U.S.-Japan relations in general and the U.S. military-Okinawa relations in particular?

Answer. The Governments of Japan and the United States agreed to construct a Futenma Replacement Facility at Camp Schwab, in conjunction with reducing the number of U.S. forces on Okinawa and consolidating U.S. basing on the island. The Futenma Replacement Facility will enable the closing of Marine Corps Air Station Futenma (MCAS Futenma), which is located in a very densely populated portion of Okinawa. At the same time, the plan preserves U.S. forces' ability to meet our security commitments to Japan, in accordance with the Mutual Cooperation and Security Treaty. Thus, when fully executed, this new force posture will improve U.S.-Japan relations in general and the U.S. military-Okinawa relations in particular.

Question. Is Japan carrying a fair share of the burden of the cost of the U.S. presence in Japan under the current Special Measures Agreement?

Answer. The Government of Japan's contribution under the Special Measures Agreement covers the cost of approximately 90 percent of the Japanese labor force that work on our bases, 70 percent of utilities used on our bases and the cost of relocating training that the Government of Japan views as politically sensitive. Negotiations for a new Special Measures Agreement will begin in 2015. In my view, what Japan provides for overall Host Nation Support is fair, but as the current

agreement runs its course, we must carefully evaluate how it was implemented and identify areas where Japan's contributions will be especially value-added in the future, considering the regional environment and our own fiscal challenges.

Question. The United States and Japan are currently negotiating updated Bilateral Security Cooperation Guidelines which will, according to a recent update, support "a more balanced and effective Alliance" and will "reflect" the cabinet decision by the Government of Japan to allow its Self Defense Forces to engage in collective security operations.

What specific steps do you believe the United States and Japan should take to strengthen security cooperation, particularly with regard to China's aggressive behavior in the East China Sea?

Answer. Maintaining regional peace and stability is a shared goal between the United States and Japan, and I firmly believe the actions both countries have been taking to strengthen our alliance contribute to that end. Under our rebalance to the Pacific, the United States has increased our force posture in Japan by deploying our most advanced equipment, such as the AN/TPY-2 radars, MV-22 Ospreys, U.S. Navy P-8 aircraft, and announced future initiatives, to include replacing the USS *George Washington* with the USS *Ronald Reagan*. Under Prime Minister Abe, Japan has embarked on a multi-pronged effort to improve the capabilities of the Self-Defense Forces, which range from collective self-defense, relaxing the restrictions on arms sales, and strengthening information security regimes, to operational initiatives such as increasing the missile defense, cyber, and amphibious capabilities of the Self-Defense Forces. Japan recently announced its intention to purchase U.S.-made E-2D Hawkeye early warning/command and control aircraft, Global Hawk unmanned surveillance aircraft, and MV-22 Osprey aircraft. This significantly increases Japan's capabilities and interoperability with the United States. The way ahead will leverage the relationships we have forged with Japan over the past 60 years to increase the interoperability and synergy between our forces. Seamless coordination between our forces provides the most effective deterrent against aggression and best underwrites regional peace and stability.

Question. What updated division of military roles and missions do you hope to see reflected in the Bilateral Security Cooperation Guidelines going forward?

Answer. The United States and Japan are currently revising the bilateral Guidelines for Defense Cooperation which will support "a more balanced and effective Alliance." Additionally, the revised Guidelines will reflect an expanded scope of cooperation to reflect the global nature of the alliance, encompassing areas such as space, cyberspace, counterterrorism, counter-piracy, peacekeeping, capacity building, humanitarian assistance/disaster relief, and equipment and technology enhancement. I hope that the cabinet decision by the Government of Japan to allow its Self-Defense Forces to engage in collective self-defense operations will be reflected in the final product, but that is ultimately a decision for the Government of Japan.

INDIA

Question. What is your view of the current state of the U.S.-India security relations?

Answer. A close, continuing, and expanding security partnership with India is important for security and stability in Asia and for effectively managing Indian Ocean security in the 21st century. The United States and India have a range of common security interests that include maritime security, counter-terrorism, and humanitarian assistance and disaster relief. Over the past decade, there has been a transformation in the U.S.-India defense relationship. What was once a nascent relationship between unfamiliar nations has evolved into a strategic partnership. Today, U.S.-India defense ties are strong and growing stronger, including a robust slate of dialogues, military exercises, defense trade, personnel exchanges, and armaments cooperation. Efforts over the past 10 years have focused on relationship-building and establishing the foundation for a long-term partnership. The strong ties between our two militaries reflect this, but there is much more room to grow. The United States remains committed to a broad defense trade and technology relationship that enables transfers of some of our most advanced technologies to assist India's military with its modernization efforts. The continued growth of our partnership should focus on working closely on common interests in a true partnership.

Question. If confirmed, what specific priorities would you establish for this relationship?

Answer. India is critical to regional economic development, security and stability, and wide-ranging cooperation to counter extremism and radicalization. This comports with U.S. goals in the region. If confirmed, I will focus on increasing maritime security cooperation, expanding the military-to-military relationship across all Serv-

ices, and deepening cooperation on defense trade and production. I believe there is real potential to meaningfully cooperate on counter-proliferation, humanitarian assistance and disaster response, counter-piracy, counterterrorism, greater intelligence sharing on common threats, and stability in Afghanistan and the broader Indian Ocean region.

Question. What expectations do you have for a change or shift in the defense relationship with India now that Narendra Modi has been elected as Prime Minister of India?

Answer. I am optimistic that our strategic partnership will continue to mature in the coming years and we are on the correct path to do so. Right now, our partnership is strong in defense trade. We are also India's partner of choice in military exercises—but this is an area where I would like to see more routine and regularity. The Indian Navy's (INN) first-ever participation in the RIMPAC exercise with one of its most advanced warships this past summer was an enormous boon to that exercise and I look forward to the INN's growing participation in this and other engagements in the future. Pacific Fleet has an exceptional exercise relationship with India's MALABAR series. While this is normally a bilateral exercise between our Navies, I have encouraged the Indian Navy to make MALABAR a trilateral event. The Indians agreed and this year MALABAR included India, United States, and Japan. The exercise was successful and was conducted at the higher end of the operational/tactical level complexity. This effort adds to our interoperability and understanding among India, Japan, and my Pacific Fleet forces which improves our ability to advance confidence building measures within the Asia-Pacific region. Moreover, Pacific Fleet has an excellent USN-INN dialogue program. The annual Naval Engagement Steering Group discussions involve a wide range of issues to include exercises, foreign military sales, maintenance practices, subject matter expert exchanges and an emphasis on safety at sea and in the air, particularly with the Indian Navy submarine force. The INN is very appreciative of the ongoing efforts to assist them in submarine safety and to have the expert exchanges address issues involving operational/tactical mission areas to both increase its professionalism and our naval interoperability in the maritime domain. Finally, I have emphasized the need to share information so that we can work together in the maritime domain to ameliorate transnational crime which benefits every nation in the region. If confirmed, I will do all that I can to continue and further our dialogue with India.

Question. What, in your view, is the effect on DOD interests, if any, of the civil nuclear cooperation agreement with India?

Answer. The civil-nuclear cooperation agreement was a landmark agreement that significantly transformed the U.S.-India bilateral relationship. The agreement deepened the level of trust between the United States and India and will have positive effects on DOD interests leading to greater military-to-military cooperation and increased defense trade. Successful implementation of this agreement will serve to strengthen and mature U.S.-India ties.

Question. What is your assessment of the relationship between India and China and how does that relationship impact the security and stability of the region?

Answer. The current relationship between the region's two fastest growing powers, India and China, is complicated by a trust deficit stemming from China's longstanding relationship with Pakistan, India's defeat in the 1962 Sino-Indian war, and increasing competition for resources. The ongoing border dispute, trade imbalances and competition for influence across South and Southeast Asia complicate efforts to reduce the mistrust, and ultimately complicate the security and stability of the region. Some regional states seek to exploit the competitive Sino-Indian relationship, seeking favorable aid packages from New Delhi and Beijing to enable their own development. New Delhi and Beijing do find common ground and cooperate in international forums such as BRICS, the G20, and in Climate Change Conferences where both countries leverage their convergent interests to shape international trade rules to ensure their continued domestic development and economic growth.

Question. What do you believe the United States should do to assist the Indian government in the prevention of and response to terrorist events in India?

Answer. As the world's largest democracy, I believe India is a significant strategic partner of the United States. Both India and the United States share a strong interest in preventing terrorism. Cooperation between the United States and Pakistan against shared militant threats has increased since 2012, and the United States should continue its efforts to ensure Pakistan takes effective action against all militant groups within its borders.

Regarding capability and capacity building, counterterrorism efforts in India are primarily a Ministry of Home Affairs responsibility that employs domestic intelligence assets in conjunction with police and paramilitary forces. Therefore, counterterrorism cooperation with India is through a whole-of-government approach led by

the Departments of State (via the Counterterrorism Cooperation Initiative) and Homeland Security (via the Homeland Security Dialogue), with support from the Department of Justice and DOD. If confirmed, I will work with the Office of the Secretary of Defense (OSD) to support this whole-of-government approach to address counterterrorism efforts with India and seek to expand the relationship.

Question. What is your assessment of the current relationship between India and Pakistan?

Answer. Since 1947, India and Pakistan have fought four wars and weathered recurring border crisis. The election of India's Prime Minister Narendra Modi generated some hope that Indo-Pakistan relations may improve, but that has yet to occur. India and Pakistan share a legacy of animosity, mistrust, and conflict. Violent extremist organizations strain the relationship and are the most likely catalyst for the next military conflict. We are, of course, concerned that a conventional military conflict between these two nuclear powers could escalate with devastating consequences. Dialogue is currently at a standstill and substantive progress on core security issues and territorial disputes is unlikely in the near term. Neither side has the political space to make unilateral concessions, yet both know that regional stability is absolutely essential to achieve their national interests. Barring military miscalculation or another major terror attack in India, Pakistan's focus on internal stability and New Delhi's desire to restore economic growth will likely preclude significant conflict along the border that could potentially escalate.

Question. In your view, what impact has the ongoing tension between Pakistan and India had on the stability of Central and South Asia generally, and on the prospects for lasting security in Afghanistan?

Answer. India's actions in South and Central Asia generally align with U.S. goals—increasing economic growth and political stability through strengthened democratic institutions and developmental assistance to help prevent radicalization. India shares our interest in ensuring Afghanistan does not become a safe haven for violent extremists. As New Delhi continues to provide financial and training support to the ANSF, Pakistan could grow concerned about Indian influence, but regional stability depends on cooperation between India, Pakistan, and Afghanistan. Transparency in Afghanistan's bilateral relations with both India and Pakistan is essential to reduce India-Pakistan misunderstanding and mistrust.

Question. If confirmed, what steps, if any, would you take to ensure the close coordination of U.S. security policy with respect to South Asia, much of which is in the CENTCOM AOR, and in particular coordination with respect to India-Pakistan relations?

Answer. If confirmed, I will coordinate across the combatant command boundary, as is being done today, to continue to minimize opportunities to exploit the seam in that part of the world by malign actors. The PACOM and CENTCOM J5s (Plans) regularly hold cross-boundary coordination meetings to discuss issues that not only exist on the physical boundary between India and Pakistan, but also conceptual seams such as proliferation both to and from each other's AORs. We have significant collaboration between both combatant command J2 (Intelligence) sections. The South Asia security policy of the United States is not a military-only effort; it is an interagency effort with State's South and Central Asia Affairs Bureau, which strides both PACOM and CENTCOM AORs, and a number of other departments and agencies playing significant roles—and in many cases the lead role. I will actively seek to travel to India and Pakistan with the CENTCOM commander at the first opportunity so we can meet with the right folks on both sides of their border and our shared boundary.

BURMA

Question. There has been a lot of discussion recently about increasing military to military engagements between the U.S. and Burmese military, which has a long history of human rights abuses.

What is the strategic importance of Burma to PACOM and how does it fit within PACOM's overall Southeast Asia strategy?

Answer. Burma represents economic, diplomatic, and developmental opportunities with its untapped potential and strategic location. But, since 1962, the Burmese people have been on a hard and long road to get to democracy. They are attempting to shake off over 50 years of brutal military junta rule, oppressive and documented egregious human rights violations, and bitter ethnic and religious conflict—all of which combine to make a difficult environment in which to grow democracy. Although there have been some steps toward reform, Burma remains firmly under military control. In my opinion, the time is not right to expand or elevate military-to-military activities. Ambassador Derek Mitchell's approach is exactly what is

needed—a limited and calibrated engagement designed to promote and further reforms. His cautious and reciprocal step-for-step approach, while looking for opportunities, will help democracy take root. Any U.S. military effort must demonstrate robust civilian and military teamwork, with the civilian side unquestionably in the lead, both for efficiency of effort and to provide the Burmese a template for success.

REPUBLIC OF THE PHILIPPINES

Question. What is your view of the current state of U.S.-Philippine military relations?

Answer. The Philippines is one of the America's five treaty allies in the Pacific and remains a committed security partner facing regional challenges characteristic of current geo-strategic realities. Our alliance is strong and the foundation of our security partnership. The U.S. military-to-military engagement with the Philippines is mature and focused, allowing the Philippines security forces (military, coast guard and police) to better address security needs as evident by enhanced counter-terrorism performance, expanded maritime security activities, increased multilateral engagement, and effective participation in U.N. Peacekeeping operations.

Question. What do you believe the U.S. goals should be in the Republic of the Philippines and how best can we achieve those goals?

Answer. The primary goals of the United States should be to strengthen the alliance with the Philippines and assist in building and maintaining the capabilities of the Armed Forces of the Philippines. Our network of alliances in the Asia-Pacific, including with the Philippines, are the bedrock of U.S. security strategy in the region. A Philippines that is capable of mitigating terrorist threats, providing a secure maritime environment that ensures freedom of navigation within its region, and leading multilateral approaches towards peace and stability will enable it to fulfill its treaty obligations to the United States, directly benefit U.S. interests in the Asia-Pacific region, and contribute to regional security and stability.

Question. What is your assessment of U.S. military efforts in the Philippines and the effectiveness of the U.S. assistance being provided to the Philippine military in its fight against insurgent groups?

Answer. U.S. military efforts and assistance in the Philippines support the U.S.-Philippines Mutual Defense Treaty. The United States, however, does not operate in a combat role alongside the Philippines in its fight against insurgent groups, such as the New People's Army and the Moro Islamic Liberation Front. U.S. military assistance is focused on helping the Philippines fight terrorism by assisting with the development of skill sets that are no different than those needed to adequately help and protect its civilian populations. As detailed in the 2010 Government of the Philippines Internal Peace and Security Plan (IPSP) "Bayanihan", we continue to see progress with the Philippines accomplishing its goal of transitioning from a military focused on internal security to one focused on territorial defense.

Question. Do you anticipate a reduced U.S. military footprint or change in mission for U.S. military forces in the Philippines in the near to mid-term?

Answer. The United States and the Philippines are discussing arrangements that will allow greater flexibility for U.S. and Philippine security forces to train and work together. We do not seek a return to the basing and bases of years past. Through the Enhanced Defense Cooperation Agreement, we may, on a rotational basis, increase U.S. military engagement with the Philippines in the future.

Question. What policy guidelines, if any, would you establish, if confirmed, to ensure that U.S. personnel do not become involved in combat or law enforcement in the Republic of the Philippines?

Answer. Current U.S. guidelines in place for the conduct of U.S. forces in the Philippines adequately address the roles and responsibilities of our military forces. All U.S. military personnel are in the Philippines under the Philippines-U.S. Visiting Forces Agreement and operate under the auspices of the U.S.-Philippines Mutual Defense Board and Security Engagement Board. Its activities, which will always be in consultation with, and agreement by, the Philippine government, are limited to conducting Humanitarian Assistance and Disaster Response; assisting Philippine security forces to improve its capacity and capability including training and upgrading equipment; and supporting Philippine counter-terrorism operations through activities such as intelligence fusion and sustainment support. Our forces in the Philippines continue to operate "by, with, and through" their Philippine Armed Forces counterparts in a strictly non-combat role.

INDONESIA

Question. Indonesia is a key Asian power and is the largest Muslim country in the world. Consequently, it is important to build on opportunities to improve and expand U.S. relations with Indonesia where possible. In July 2010, Secretary Gates announced that DOD intended to resume working with elements of the Indonesian Special Forces, known as Kopassus. DOD engagement with Kopassus had been suspended for more than a decade because of past human rights violations by some of its members.

What is your view of the current state of military-to-military relations with Indonesia and, specifically, Kopassus?

Answer. In 2010, Presidents Obama and Yudhoyono inaugurated the U.S.-Indonesian Comprehensive Partnership. A key element of this broad partnership is the security component. Our defense relationship with Indonesia—a pivotal country to U.S. national interests—is managed through the Defense Framework Arrangement and facilitated through several forums and mechanisms. Our military-to-military relations with Indonesia are robust and continue to progress and mature, with over 140 theater security cooperation activities scheduled for this fiscal year. These security cooperation engagements include a wide range of activities focused on four main areas of emphasis: Humanitarian Assistance/Disaster Relief, Peace Keeping Operations, maritime security and continued professionalization/reform of the Indonesian Defense Forces (TNI). Beginning with the normalization of military-to-military relationship in 2005, engagements have increased in number and evolved from initial small-scale bilateral exchanges into more complex bilateral and multilateral activities.

The Indonesian Army Special Forces (known as Kopassus) has undergone a near-complete transformation over the past decade and is at the forefront of TNI professionalization and adherence to human rights standards. Following a 12-year pause in bilateral activities, PACOM established a measured and gradual program of security cooperation activities with Kopassus. These security cooperation activities have consisted of key leader engagements and small-scale subject matter expert exchanges in areas such as military decisionmaking, medical planning, law of war, and safeguarding human rights. I expect future activities of this type to continue and gradually expand at a pace commensurate with the demonstrated progress in TNI transparency and reform efforts. Chief among these reform efforts are the fulfillment of commitments made by Indonesian leaders to then Secretary Gates in 2010 to continue to safeguard human rights and accountability throughout the Indonesian military through the unequivocal investigation and prosecution of those military personnel accused of human rights abuses and, if convicted, their removal from military service.

Question. What is your understanding of the extent to which the Indonesian government is cooperating with the United States in the war on terrorism?

Answer. The Government of Indonesia has cooperated closely and effectively with the United States and our partners in combating global terrorist networks in the region. Indonesia has shown tremendous success in arresting and convicting terrorists. Additionally, Indonesia has leveraged its leadership role within the Association of Southeast Asian Nations (ASEAN) by electing to co-chair the Executive Working Group on Counter-Terrorism with the United States in the ASEAN Defense Ministers Meeting Plus forum for the 2011–2013 cycle. This initiative seeks to encourage greater regional counterterrorism cooperation, reinforce military support to civil authorities, build capacity, and collectively address regional security issues in an open consultative forum.

Question. Do you favor increased U.S.-Indonesian military-to-military contacts? If so, under what conditions? Why?

Answer. Yes. If confirmed, I will support increased military-to-military contact within the context of the Comprehensive Partnership, guided by close consultation with the Departments of State and Defense, and within the boundaries of existing legal mechanisms. I believe close military-to-military relations with Indonesia are integral to achieving U.S. national interests in the region. I also believe that one of the most effective methods for encouraging reform is through interaction between Indonesian and U.S. servicemembers. Regardless of their mission, any interactions with U.S. servicemembers reinforce professional military practices, to include respect for human rights and the rule of law. Increased interactions facilitate greater understanding and reinforce professional values.

Question. What is your view of the commitment of the Indonesian military leadership to professionalization of its armed forces, adhering to human rights standards, improving military justice, and cooperating with law enforcement efforts to investigate and prosecute those military personnel accused of human rights abuses?

Answer. Indonesian defense reform progressed at a rapid pace after the resignation of President Suharto in 1998, with the separation of the police from the military, the elimination of formal political roles for the TNI, increased accountability, and the establishment of widespread human rights training initiatives. While reform efforts appear to have slowed, they have not reversed. According to several public opinion polls, the TNI enjoys the respect of the majority of the Indonesian populace and is often noted as the most respected government institution. This is a concrete indicator of progress. Continued reforms that the United States should continue to encourage include accountability for past human rights abuses, strengthening civilian control and oversight of the military, and continued professionalism of the TNI officer corps.

Question. If confirmed, what would you do to encourage respect for human rights and accountability in the Indonesian military?

Answer. If confirmed, I will support TNI's continued progress by encouraging senior Indonesian leaders to fulfill its stated commitments with particular emphasis on accountability, transparency and respect for human rights. We can accomplish this through bilateral security discussions, joint training, and military assistance, including military training programs. Our engagements with the TNI, and especially its Special Forces (Kopassus), frequently involve Human Rights and Rule of Law Training. We have seen significant improvement in Human Rights and Accountability from the senior leadership. I view U.S. interaction with TNI counterparts as an effective method to encourage professionalism and continued reform within the Indonesian military.

OPERATIONAL ACCESS AND FREEDOM OF ACTION

Question. Much has been made in recent years of the development of anti-access/area denial capabilities of certain countries, and the impact such capabilities might have on the United States' freedom of action and ability to protect power.

What is your understanding of the emerging challenges associated with anti-access and area denial strategies in the Asia-Pacific?

Answer. As discussed in the 2014 Quadrennial Defense Review and specifically the 2012 Defense Strategic Guidance, "China will continue to pursue asymmetric means to counter our power projection capabilities." This would include China's pursuit of anti-access/area denial strategies. The United States maintains robust regional and global power projection capabilities that provide a full range of options to succeed in defense of national interests and of our allies. To this end, if confirmed, I will work closely with OSD and the Services in support of policy and programmatic inputs based on assessed operational risk, to ensure we have the ability to project power throughout the theater and preserve the capabilities necessary to maneuver within it.

Question. The Joint Operational Access Concept (JOAC) released on January 17, 2012 broadly describes the Chairman of the Joint Chiefs of Staff's intent for how joint forces will respond to the operational challenges associated with potential adversaries' anti-access and area denial capabilities.

What, in your view, is the JOAC's contribution to better understanding and dealing with the challenges of military operations in the PACOM AOR?

Answer. The JOAC's primary contributions are illuminating the variety of challenges for which U.S. forces must be prepared across an increasingly diverse and rapidly evolving set of domains—air, sea, land, space, and cyber—and identifying Cross-Domain Synergy as the central tenet for addressing these challenges in order to assure operational access. The JOAC provides Strategic Guidance focused on overcoming A2/AD challenges and is intended to guide how the U.S. military is organized, trained, equipped and employed.

Question. The JOAC identifies 33 capabilities required for its implementation, but this list of capabilities is not exhaustive nor is it prioritized.

In view of the PACOM mission, how would you prioritize the required capabilities listed in the JOAC and what capabilities, if any, would you add?

Answer. Unlike Joint Concepts in the past, JOAC has an implementation plan that bridges the gap between concept and operational reality. The 2014 JOAC Implementation Plan (JIP), which is a classified document, provided a priority for the 30 JOAC capability areas. In general, I would agree with the prioritization in the JIP, but more importantly the JIP was designed to provide a comprehensive view of all JOA related activities within the DOD to provide coherence and guide the development of the future joint force. What I can say about the JIP is that all DOD Components participated equally in its formulation. Additionally, the JIP currently has 165 actions, 84 percent of which are non-material activities focused on finding better ways to employ the material capabilities currently planned for the Joint force.

Annual updates to the JIP will be conducted to maintain currency with strategic guidance and combatant commander requirements. The implementation plan will ensure the Department stays focused on the important and innovative capabilities needed to ensure operational access now and in the future.

Question. What new technologies would you suggest DOD pursue in order to develop or improve these capabilities?

Answer. In general, I would suggest pursuit of technologies that improve situational awareness, command and control, and interagency coordination. As Commander, U.S. Pacific Fleet, we contributed to the development of PACOM's Integrated Priority List (IPL), which details the commands warfighting capability gaps and the many specific technologies we will be pursuing over the next several years. Additionally, PACFLT, in conjunction with PACOM, will develop and test these concepts and capabilities in realistic joint exercises that will be used to evaluate the operational utility of a given technology. PACOM's requirements are well documented and, if confirmed, I will continue to pursue those priorities set out in the Sep 2014 IPL.

Question. With respect to air, sea and land capabilities, some proponents of the "air-sea battle" concept appear to de-emphasize ground combat forces.

What are your views on the requirement for land forces before, during, and after operations to gain and maintain assured access?

Answer. Land forces are necessary for all phases of an operation, including peacetime and steady-state. Most notably, in Phase 0 "Shaping", land forces are critical to tangibly demonstrate U.S. commitment to allies and partners, as well as resolve to potential adversaries. Land forces, as an integrated part of the Joint force, engage with allies and partners in the region to influence, train with, and improve, the capabilities and integration of those capabilities enabling allies and partners to better defend themselves against aggression. In many cases land forces may also facilitate relationship building, as many Pacific defense establishments are dominated by their armies. Ground forces allow rapid and effective response, not only to conflict, but also to natural disasters and humanitarian crises.

During conflict, we must be able to credibly project ground forces in a maritime environment consisting of numerous islands, archipelagoes, and littoral population centers. Expeditionary land forces provide indispensable capabilities which complement our navy and air forces in the region. Land force headquarters and staffs also provide a Joint Task Force command and control capability that is necessary to pursue multiple operations simultaneously, a necessity for a region that spans 52 percent of the globe.

If confirmed, I will work closely with the CNO, Chief of Staff of the Army, Commandant of the Marine Corps, and Commander, U.S. Transportation Command (TRANSCOM) on ground force sourcing and lift.

Question. What, in your view, are the required size and capabilities for ground combat forces in the Pacific region, and what capabilities, if any, may be needed to improve their effectiveness?

Answer. PACOM is resourced to Admiral Locklear's demand signal for U.S. Army ground forces. However, PACOM's ability to employ them throughout the theater is a shortfall. U.S. Army Pacific, in coordination with TRANSCOM, has identified solution sets that will enable U.S. Army employment in the Western Pacific.

PACOM routinely experiences a shortfall of Amphibious Readiness Groups/Marine Expeditionary Units (ARG/MEU). Shortfalls in amphibious shipping, coupled with global demand for both the ARG/MEU teams and Afloat Forward Staging Bases, leave PACOM at about 40 percent of requirement.

Land forces are necessary throughout the range of military operations. Most notably, land forces are critical in demonstrating U.S. commitment to allies and partners as well as the resolve to dissuade, disrupt, or defeat potential adversaries. Land forces, as an integrated part of the joint force, engage with allies and partners in the region to influence, train with, and improve their ability to defend themselves against aggression. Ground forces allow rapid and effective response, not only to conflict, but also to natural disasters and humanitarian crises, events which are commonplace in the PACOM AOR.

Expeditionary land forces provide indispensable capabilities which complement our naval and air forces in the region. The land force headquarters and staffs also provide a Joint Task Force command and control capability that is necessary to pursue multiple operations simultaneously, a necessity for this expansive region.

Potential categories that may need improvement include expeditionary basing, mobility, and ISR technologies. Adequate access to basing and logistical support throughout Asia Pacific is necessary to address the whole of the region, and the vastness of the AOR means that forces must have adequate mobility in the form of sealift and air transportation to allow them to engage, train, and respond to cri-

ses. Adequate ISR is also needed to enable the rapid and focused application of limited resources to the point of greatest necessity.

HIGH ALTITUDE RECONNAISSANCE PLATFORMS

Question. DOD intends to retire the U-2 ISR fleet in the middle of this decade and replace these aircraft with the Global Hawk RQ-4. Under the Air Force's plans, the RQ-4s will apparently be a PACOM-wide asset, flying missions throughout the region, whereas the U-2s have been dedicated to supporting U.S. and Korean forces on the Korean peninsula.

The Chairman of the JROC recently sent the Armed Services Committee a letter indicting that "I certify that the combatant commanders will have nearly equivalent" ISR capability when the U-2 retires in fiscal year 2016.

What is your view of the plan to retire the U-2?

Answer. If confirmed, it will be my responsibility to place an ISR demand signal for the Services to fulfill. PACOM currently has an enduring requirement that, even with the U-2, the Services struggle to fulfill. Any PACOM commander would be concerned about the possibility of a diminished ISR capability and capacity as result of retiring any platform prior to full RQ-4 sensor parity. As a result of our shift toward the Asia-Pacific region and rising tensions throughout the theater, any decrement to existing capability and capacity concerns me in my current assignment, and would do so as PACOM commander, should I be confirmed.

Question. Does a 'nearly equivalent' ISR capability meet PACOM ISR requirement?

Answer. Deep-look multi-intelligence collection capabilities support both U.S. and ROK daily intelligence requirements. If confirmed, I would be agnostic to platform as long as "nearly equivalent" provides equal or greater capability and capacity to what is currently employed in the PACOM AOR. If "nearly equivalent" means less, then I would be concerned.

Question. Do you believe there will be an ISR capability gap created by its retirement?

Answer. If the U-2 is allowed to retire prior to full Global Hawk system parity, then there could well be an ISR capability gap globally, not just in the PACOM AOR. Competing priorities could significantly impact theater operations if the U-2 is allowed to retire prior to system parity in follow-on platforms.

Question. Based on your military expertise, can the Global Hawk provide "nearly equivalent" ISR capability today?

Answer. Today, no. When Global Hawk system is on parity with the U-2 there is reason to believe the platform will be able to satisfy theater collection requirements with equivalent capability; that is not the case today and is of concern to me.

Question. What is the risk if sequestration requires further cuts into our ISR platforms to include not funding Global Hawk improvements needed to bring it closer to parity to the U-2?

Answer. I believe PACOM would assume much greater risk and have to re-assess the impact of gapping or operating sub-optimal systems for standing and crisis ISR requirements.

UNITED NATIONS PEACEKEEPING OPERATIONS

Question. A number of the Nations in the PACOM AOR contribute large numbers of police and troops to multilateral peacekeeping operations.

What role, if any, do you believe PACOM should play with regard to engaging the troops from Asia-Pacific nations which contribute to peacekeeping missions?

Answer. If confirmed, I will continue engagement with Asia-Pacific nations in regards to peacekeeping contributions. This is important opportunity and venue for military-to-military cooperation that allows us to increase partner capacity in military capability, professionalism, and increased awareness of human rights issues such as the protection of civilians in a U.N. mission area. I believe that it is in our best interest that countries contributing peacekeepers provide quality troops that are capable, respected, and have the requisite tactical and technical ability, and will enforce the U.N. mandate of that particular mission.

COMBATING TERRORISM

Question. If confirmed, what would be your role within DOD with respect to counter terrorism?

Answer. If confirmed, I will continue PACOM's highly successful "by, with, and through" approaches to counterterrorism that have produced measurable success in the Asia-Pacific region. These efforts rely on a capacity, capability, and network building approach that emphasizes working together with regional host nation part-

ners, other U.S. Government agencies, and key allies, such as the Australians, to deny al Qaeda, adherents, affiliates, and associated forces the ability to operate in the region.

Question. What do you believe is the terrorism threat from al Qaeda and affiliated groups in the Asia-Pacific region?

Answer. The threat of attack by al Qaeda, its affiliates, and like-minded groups and individuals against U.S. and partner nation interests in the PACOM AOR remains a serious concern. The possible re-emergence of other terrorist organizations, like Jemaah Islamiya and the Abu Sayyaf Group, that have been weakened but not defeated by the counter-terror efforts of our allies and partners, could quickly affect the security and stability of the Asia-Pacific region. Compounding the concern, other decentralized groups and individuals ideologically linked to al Qaeda, as well as organizations based primarily outside the PACOM AOR (like Lashkar-e-Tayyiba), desire to support their agendas by conducting destabilizing attacks inside the region. Additionally, al Qaeda affiliated groups operate in the PACOM AOR using facilitation networks that support threats to U.S. interests throughout the world. Finally, emerging terror groups such as Islamic State (ISIL) are of concern, particularly as sympathizers from some of the countries in the region go off to the Middle East to fight and then return to their home countries.

Question. Is there a nexus between terrorist groups and criminal networks in the Asia-Pacific?

Answer. Yes, there is a nexus and it is a serious impediment to regional stability. Transnational crime and terrorism thrive on common enablers such as illicit transportation networks, weapons trafficking, corruption, trafficking in persons, counterfeiting, and movement of money to support nefarious activities. These threats impact political, social, and economic systems by eroding the rule of law and undermining the legitimacy of governments and institutions.

Question. In Southeast Asia, most notably in the Philippines and Indonesia, U.S. engagement with partner nations has helped combat violent extremist ideology and activities. The integration of operations by host nation security forces with U.S. capacity building, development, and information support operations has dramatically reduced the ability of violent extremist organizations to operate.

What more can the United States do in Southeast Asia to help combat the threat of terrorism perpetrated by violent extremists?

Answer. The United States should sustain current engagements with individual nations in the region and continually look for opportunities to assist with ally and partner efforts. Additionally, we should continue multilateral efforts, specifically through organizations like the Association of Southeast Asia Nations (ASEAN), to build regional networks that deny transnational violent extremist and global terrorist facilitation networks the ability to operate within or through Southeast Asia. A sustained effort to build and enhance the capacity of our allies and partners is the cornerstone of our counter terrorism strategy in Southeast and South Asia. We are encouraged by the persistent pressure that partner nations are placing on these networks.

Question. Which Southeast Asian countries are most important in the fight against terrorism in that region and what should the United States do to enhance relations with those countries?

Answer. Even though Indonesia and the Republic of the Philippines have seen tremendous counter-terrorism successes, they remain vulnerable to violent extremism through radicalization and recruitment and are potential terrorist safe havens. Additionally, Malaysia and Thailand have been used as facilitation hubs by violent extremist organizations that operate across the region. Recent well-publicized efforts by Australia to arrest or detain at least 16 persons suspected of supporting or sympathizing with terrorists point to the subversive nature and determination of these organizations to gain footholds throughout the region. PACOM must maintain its robust presence and continue its “by, with, and through” engagement strategy in Southeast Asia.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent legislation, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of the overall effectiveness of this authority?

Answer. Section 1208 funding is most effective in the CENTCOM and U.S. Africa Command AORs, and currently limited in its application in PACOM. I worked with

this funding stream when I was the Director of Operations at U.S. Southern Command in 2007–2008. It is an extremely effective authority for specific threats. If confirmed, I will work with the DOD to identify any potential possibilities for using 1208 authority, similar to the way we have used section 1206 successfully in building capacity in the Philippines and Cambodia.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS ACTIVITIES

Question. On an annual basis, DOD's counternarcotics (CN) program expends approximately \$1 billion to support CN operations, build the capacity of certain foreign governments in Asia and around the globe, and analyze intelligence on CN-related matters.

What is your understanding of the illegal narcotics industry in the PACOM AOR?

Answer. The illegal narcotics industry within the PACOM AOR is primarily focused on feeding the Asian demand for methamphetamine and supplying the growing Australian and Chinese demand for both cocaine and methamphetamine. Growth in market share within Asia for Eurasian, West African, Iranian, and Mexican based drug trafficking organizations has been reported—a clear demonstration of the globalization of the illicit narcotics trade.

Countries in South and Southeast Asia have become increasingly attractive as bases for drug trafficking organizations' production and smuggling operations. Many nations in the PACOM AOR have experienced an increase in the production, transportation, trafficking, or consumption of narcotics in recent years.

In terms of direct impacts on the United States, licit chemicals produced in Asia are the primary precursors that are diverted and used to produce methamphetamine trafficked to the United States. Much of the violence on our southwest border is a result of methamphetamine trafficking by the Mexican cartels.

Question. What role, if any, should DOD play in countering—either directly or with our Asian partners—the illegal narcotics industry in the PACOM AOR?

Answer. In cooperation with other U.S. Government, and Partner Nation Agencies, PACOM executes activities within DOD counter-drug authorities to address the threats to U.S. national security posed by the illegal narcotics industry. As PACOM's executive agent for counterdrug operations, the Joint Interagency Task Force West (JIATF-West) plans, integrates, synchronizes, conducts, and assesses DOD counter-drug activities in the region in order to shape the theater and disrupt organizations that threaten U.S. interests in the region. DOD should continue to play a critical role, through information sharing and building partner nation capacity, working with U.S. and foreign law enforcement agencies responsible for counternarcotics.

TRANSNATIONAL ORGANIZED CRIME

Question. What, if any, threat does transnational organized crime pose to U.S. national security interested in the PACOM AOR?

Answer. The organizations that have amassed unprecedented wealth from illegal activities, including the illicit trafficking of people, drugs, weapons, or other contraband, pose a significant threat to our national security. Transnational criminal organizations (TCOs) are not only expanding their operations, but are also diversifying their activities, resulting in a convergence of transnational threats that is becoming even more complex, volatile, and potentially destabilizing. The major players use their amassed wealth to buy influence and subvert governmental institutions—creating instability, disrupting legitimate commerce, putting civilian populations at risk, and undermining democratic processes.

TCOs are becoming increasingly globalized and interconnected. As the global economy continues to grow, change, and innovate, so will criminal organizations, and they will react quickly to changes in both licit and illicit economies. The permissive environments, loose financial controls, corruption, and fraudulent document facilitation networks fostered by transnational organized crime are also key enablers for the freedom of movement of international terrorist organizations operating in the region.

The United Nations estimates 2.5 million people worldwide are victims of human trafficking at any given time. With more than half the world's population resident in the Asia-Pacific, it is logical to assume a significant percentage of those victims are in PACOM's AOR.

Question. What role, if any, should PACOM play in countering the threats posed by transnational organized crime?

Answer. PACOM intelligence capabilities can contribute significantly to the identification of threat networks and provide the necessary analysis to support law enforcement and other activities required to disrupt TCO operations. As part of the

whole of government approach, DOD can provide critical resources to interagency efforts countering TCOs.

Further, PACOM lead capacity building efforts and the development of regional cooperative networks provide critical reinforcement to partner nation governments. These efforts provide opportunities to hinder the growth of TCOs and reduce risks to the U.S. Homeland. Beyond just being a “force multiplier”, these efforts are essential to addressing the problems where they begin. By addressing the regional environment—strengthening relationships with, and capabilities of, international partners throughout the PACOM AOR—we shrink the operational space within which both extremists and criminals can grow and prosper.

LAW OF THE SEA

Question. Do you support U.S. accession to the United Nations Convention on the Law of the Sea? If so, why?

Answer. Yes. Accession to the Law of the Sea Convention serves the enduring interests of the United States to lead the promotion of the rule of law, including in and on the world’s oceans. Accession would send a clear signal to the world that we remain committed to advancing the rule of law at sea. Acceding to the Convention would not affect or limit our rights, freedoms, and lawful uses of the sea and airspace needed to project power, reassure allies and partners, deter adversaries, respond to crises, sustain deployed combat forces, and secure sea and air lines of communication. Accession would put the United States on the firmest possible international legal foundation for those rights, freedoms, and uses. We currently rely on customary international law and physical presence to secure global freedom of access. Customary international law depends in part on states’ practices and is subject to change over time. This is less so in the case of treaty- or convention-based international law, which comes from written and agreed-upon terms and conditions that are contained in such treaties or conventions. Ironically, by not being party to the Convention and relying on customary international law, our rights within the maritime domain are less well-defined than the rights enjoyed by the 165 other nations around the world who have acceded to the Convention.

Question. Would U.S. accession to the United Nations Law of the Sea Convention benefit the U.S. military’s mission in the Asia-Pacific region? If so, how?

Answer. Yes. U.S. accession to the Law of the Sea Convention would advance U.S. national security interests in the Asia-Pacific region by enabling the United States to legally reinforce and assert protections contained within the Convention for our navigational rights and freedoms, over-flight rights and freedoms, military activities beyond the territorial seas of any coastal state without notice or permission, and our rights to transit international straits and choke points without impediments. Clearly, we are powerful enough to do so anyway, but acceding to the Convention gives us the moral high ground to criticize those countries that would seek to inhibit freedom of maneuver in the oceans and airspace around the world, including the Asia-Pacific region.

As the Asia-Pacific continues to rise, competing claims and counter claims in the maritime domain are becoming more prominent. Nowhere is this more prevalent than the South China Sea. Numerous claimants have asserted broad territorial and sovereignty rights over land features, sea space, and resources in the area. The United States has consistently encouraged all parties to resolve their disputes peacefully through a rules-based approach. The Convention is an important component of this rules-based approach and encourages the peaceful resolution of maritime disputes. Accession would send a powerful and affirmative message to the international community that the United States believes the legal regime reflected in the Convention is worth supporting and upholding against any nation that might seek to manipulate the ordinary and intended meaning of certain provisions in its self-interest.

POW/MIA ACCOUNTING EFFORTS

Question. The Joint POW/MIA Accounting Command is critical to the recovery and identification of remains of missing military members. Recovery of remains of U.S. servicemembers from World War II, the Korean War, and the Vietnam War continues to be a high priority. Section 541 of the National Defense Authorization Act for Fiscal Year 2010 requires that the Secretary of Defense ensure that sufficient resources, personnel, and funds are provided to attain at least 200 identifications per year by fiscal year 2015.

What is your view of the Department’s and the POW/MIA community’s ability to achieve this goal?

Answer. Earlier this year Secretary Hagel directed the Department to transform how it accounts for its personnel missing from past conflicts. Specifically, he directed that he be provided with a plan to organize the Department most effectively to increase to the maximum extent possible the numbers of missing Service personnel accounted for annually while ensuring timely and accurate information is provided to their families.

As a result of the plan that was presented to Secretary Hagel, the Joint POW/MIA Accounting Command will soon be merged with two other organizations to form a new Defense Agency that will be overseen by the Under Secretary of Defense for Policy. I believe the Department's budget request provides the necessary resources to increase its capability and capacity to achieve this goal and implement Secretary Hagel's direction. I fully understand the priority our Nation places on this issue. If confirmed, until the consolidation of these agencies is completed, I will fully support JPAC in its efforts to account for personnel from past conflicts. After the merger occurs, I will fully support the new Defense Agency.

Question. On October 20, 2011, DOD announced an agreement with North Korea that will allow U.S. personnel to return to North Korea to resume recovery of remains of U.S. servicemembers missing from the Korean War. Recovery operations in North Korea were suspended in 2005.

What is your understanding of this recent agreement to resume recovery operations in North Korea?

Answer. The arrangement negotiated in 2011 covered 1 year and is no longer valid. The operations negotiated as part of the arrangement did not occur and were suspended due to North Korea's provocative actions. This is truly unfortunate.

Question. How might the resumption of recovery efforts in North Korea impact the future of the Six Party talks or the stability on the Korean Peninsula?

Answer. The U.S. Government's mission to account for our personnel is not linked to the Six Party talks or to Korean stability.

Question. If confirmed, what steps, if any, would you take to enhance POW/MIA recovery efforts in the PACOM AOR?

Answer. I fully understand the priority our Nation places on this issue. If confirmed, I will ensure the necessary resources are available to JPAC until the new Defense Agency assumes the mission. When that happens, I will ensure the necessary resources are available to the new Defense Agency, as well as the full support of PACOM in the conduct of their important mission.

QUALITY OF LIFE

Question. Combatant commanders have an interest in the quality of life of military personnel and their families assigned within their AOR.

In your view, what is the role and responsibility of combatant commanders for the quality of life of personnel assigned to their AOR?

Answer. The combatant commander is a strong advocate for programs which will ensure the needs of our servicemembers and their families continue to be met, even during an era of fiscal constraint. The commander advocates for sustainment of critical quality of life programs and for improvement where needed in the quality of life of assigned personnel. The Commander ensures that quality of life issues are articulated to community leaders, military installation commanders, DOD policymakers, and Members of Congress. If confirmed, I will continue Admiral Locklear's strong advocacy of the soldiers, sailors, airmen, marines, coastguardsmen assigned to PACOM, and their families.

Question. If confirmed, what would you do to enhance quality of life programs for military members and their families within the PACOM AOR?

Answer. Even though quality of life programs fall under the purview of the individual Services, if confirmed, I will make quality of life for servicemembers and families assigned to PACOM a top priority. I will work with my Service component commanders to ensure our servicemembers' and their families' needs are met.

Question. What is your view of the challenges associated with global rebasing on the quality of life of members and their families in the PACOM AOR (including adequate health care services and DOD schools)?

Answer. Preserving the quality of life for our servicemembers and their families while we realign our forces in theater is a big challenge. Throughout the transition process, we must focus efforts on maintaining quality housing, excellent DOD schools, commissary and exchange services, medical/dental facilities, higher education, work life, family and community support programs for our people.

IN-KIND MILITARY CONSTRUCTION

Question. The committee released a report on April 15, 2013, titled "Inquiry into U.S. Costs and Allied Contributions to Support the U.S. Military Presence Overseas." Among other things, the committee's inquiry found that in-kind payments from partner nations to support the overseas presence of U.S. military forces in Germany, South Korea, and Japan, have been used to fund questionable military construction projects. In response, the committee's version of the National Defense Authorization Act for Fiscal Year 2014 includes a provision (section 2801) that would require that all future military construction projects funded using in-kind payments pursuant to bilateral agreements with partner nations be submitted for congressional authorization in the Military Construction Authorization Act.

If confirmed, how would you ensure that in-kind payments be utilized for identified U.S. priorities to offset costs that DOD would otherwise pay with appropriated funds?

Answer. If confirmed, I will work with OSD, my staff, and my subordinate commanders to ensure we effectively and efficiently prioritize and apply every taxpayer dollar, won or yen, regardless of the type of project or the source of the appropriation. As we press ahead under section 2801, we must be sensitive to the appearance of encroaching on another country's sovereignty if our actions appear to be directing allied budget procedures.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assaults, including providing appropriate resources and care for victims of sexual assault.

What is your view of the steps taken to prevent and respond to sexual assaults in PACOM, including assaults by and against U.S. civilian and contractor personnel?

Answer. Sexual assault is a crime. I have seen great focus by commanders and subordinates to address the issue of sexual assault and a deep commitment towards prevention of incidents and appropriately and adequately responding to reported incidents. Commanders monitor their command climate as it relates to sexual assault more than ever and are proactive in taking steps towards ensuring they maintain a climate free from sexual assault and reprisals against victims. Zero is the only acceptable level for sexual assault in our military.

Question. What is your view of the adequacy of the training and resources in place in PACOM to investigate and respond to allegations of sexual assault?

Answer. PACOM components have adequate resources and training in place to investigate and respond to allegations. All Services have established guidelines for a 24 hour, 7 day a week sexual assault response capability for victims in all locations. Additionally, PACOM provides oversight for ensuring that adequate resources are present at deployed locations to maintain the appropriate level of resources to respond to incidents. With regard to investigations, the Department has multiple efforts underway to improve the utilization of existing resources and enhance its ability to investigate and respond to sexual assaults.

Question. What is your view of the willingness and ability of military leaders to hold assailants accountable for their acts?

Answer. I believe my colleagues take this seriously and are able to hold perpetrators accountable. I personally have a strong public record in this regard. Through actions and words, we reinforce this on a continuing basis. We have the responsibility to enforce regulations and hold our personnel accountable to the high standards that our core values demand. That said, we as leaders must also be held accountable for our actions regarding those in our commands that commit sexual assault and the victims of those assaults.

Question. What is your understanding of the adequacy of the resources and programs in PACOM to provide victims of sexual assault the medical, psychological, and legal help they need?

Answer. Service components within the PACOM have appropriate resources and programs in place to offer victims of sexual assault medical, psychological, investigative, and legal support. Service components have enhanced the support services available through the Sexual Assault Prevention and Response Coordinators and established Victims' Legal Counsel Programs wherein Judge Advocates will help protect a victim's rights through the investigative and adjudicative stages of the military justice process.

Question. What is your view about the role of the chain of command in providing necessary support to the victims of sexual assault?

Answer. Leaders and commanders set the tone for their organization and ensure that all applicable services are available and rendered to the victim. Proactive and positively engaged commanders are vital to providing the necessary support to victims. Beyond this, commanders are responsible for maintaining a climate and culture free from reprisal against victims. We must hold our commanders and leaders accountable to get this right.

Question. What is your view about the role of the chain of command in changing the military culture in which these sexual assaults have occurred?

Answer. Change starts and momentum continues from the top of organizations. If confirmed, I will set PACOM-wide expectations for conduct through guidance on core values and will demand that subordinate leaders set the example in their organizations. Commands shall monitor their climates and the climates of their subordinate units. Chains of command shall be proactively engaged in resolving issues pertaining to command climate and commanders will be held accountable for their units' actions.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command to determine whether allegations of sexual assault should be prosecuted?

Answer. The commander's role in military justice is longstanding and essential to the effectiveness of command in our forces. Removing commanders from the military justice system would signal a lack of confidence in our commanders that would undermine good order and discipline. It would foster doubt in our servicemembers in the competency and abilities of their commanders that are entrusted with their lives. The maintenance of good order and discipline is the responsibility of the commander. Removing this responsibility would certainly erode the ability of a commander to effectively command his unit. That said, I believe in and support the assignment of Judge Advocates as formal Victim Advocates and Victim's Legal Counsel. We as leaders must also be held accountable for our actions regarding those in our commands that commit sexual assault and the victims of those assaults.

Question. Do you consider the current sexual assault policies and procedures, particularly those on restricted reporting, to be effective?

Answer. Yes. Restricted reporting allows victims of this crime to come forward and receive needed services while maintaining confidentiality. Survey data shows that confidentiality is a key driver in accurately assessing the extent of sexual assault in the military. Without restricted reporting, many of these victims would be left without an avenue to access needed services as they would simply forgo reporting.

Question. If confirmed, what actions will you take to reassess current policies, procedures and programs and to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults in PACOM?

Answer. If confirmed, I will establish clear policies and procedures for my leaders, at all levels, to take action to prevent sexual assault, protect and support victims, hold offenders accountable, and to ensure a safe and healthy environment for those in their charge. As is the case in most major commands, subordinate commanders in PACOM are required to immediately notify the combatant commander of any sexual assault report made. I will ensure all personnel (military and civilian) are fully aware, trained, and committed to eradicating sexual assault.

Question. What methods for monitoring overall trends and gauging the sufficiency of component commanders' efforts in preventing and responding to incidents of sexual assault do you consider appropriate and intend to implement as PACOM commander?

Answer. If confirmed, I will ensure commanders comply with all requirements in accordance with DOD Directive 6495.0 and other established Department policies. Additionally, I will require commanders provide me assessments of their prevention efforts as well as their responsiveness to incidents. From these assessments, I will monitor trends and provide further guidance and direction as necessary. I will emphasize the importance of commanders monitoring their command climate with respect to sexual assault and ensuring sexual assault response capabilities continue to be available at all locations in my AOR. I will demand victims be treated with fairness and respect and that sexual assault incidents be given the highest priority and treated as emergency cases. I will not allow sexual assault to injure our personnel, our friends, our families, destroy our professional values, or compromise readiness. I will hold my subordinate commanders accountable.

HUMANITARIAN ASSISTANCE AND DISASTER RELIEF

Question. What should be the role for the U.S. military in humanitarian assistance and disaster relief in the Asia-Pacific region?

Answer. PACOM continues to provide Foreign Disaster Relief in the Asia-Pacific on an “as needed” basis. When countries request assistance, PACOM either provides immediate assistance within the initial 72-hours of a disaster based on life and limb or after the USAID validates the request against an urgent and unique capability that only PACOM can provide. PACOM continues to assist Asia-Pacific nations with their disaster preparations by engaging in multinational forums to share best practices, participating in various bi/multilateral humanitarian assistance/disaster relief exercises, as well as partnering with the Center for Excellence in Disaster Management and Humanitarian Assistance and USAID in country resiliency training. Overall, PACOM should be viewed as a quick response force for countries in dire need with an ability to respond rapidly, for short duration, and to provide assistance when requested.

Additionally, steady-state Humanitarian Assistance activities are an important part of PACOM’s Theater Campaign Plan. PACOM provides humanitarian assistance annually to countries within its AOR. These HA activities are low cost, non-obtrusive, but highly effective efforts that improve DOD access, visibility, and influence in a partner nation or region, generate positive public relations and goodwill for DOD, and build collaborative relationships with the partner nations’ civil society.

Question. Are the resources necessary to fulfill this role currently available to the PACOM commander? If not, what additional resources are necessary?

Answer. Yes. PACOM receives adequate funding from the Overseas Humanitarian, Disaster and Civic Aid appropriation, under 10 U.S.C. 2561 for humanitarian assistance activities, and 10 U.S.C. 404 to respond to disasters within the PACOM AOR.

Additionally, USAID/OFDA has embedded two representatives within the PACOM staff to synchronize and coordinate crisis response in situations where DOD is requested to provide “unique capabilities” that exceed host nation or USAID/OFDA partner capacity.

Question. How should the PACOM Commander incorporate “lessons learned” from prior humanitarian assistance and disaster relief operations in the PACOM AOR?

Answer. The Asia-Pacific’s tectonic plate structure produces its well-known Ring of Fire, which regularly triggers earthquakes, volcanoes, and tsunamis in the region. Weather extremes and anomalies also continue to plague the region, and understanding the scope and severity of long-term climate change, unexpected climate shocks, and inter-annual climate variability such as El Nino, attest to the shared challenges we face with our partners and allies. Capturing lessons learned is critical to properly planning and responding to these enduring challenges.

PACOM, in accordance with the established Chairman Joint Chiefs of Staff policy, uses the PACOM Lessons Learned and Issue Resolution Program to incorporate “lessons learned” from prior humanitarian assistance/disaster relief (HA/DR) operations in the PACOM AOR. These lessons are analyzed and validated to identify issues requiring resolution for staff process improvement and/or to address gaps in plans or resources. The issues are then either resolved internally by PACOM or forwarded up the chain of command for resolution. Once resolved these “lessons learned” are used by PACOM during future HA/DR operations.

Additionally, the Center for Excellence in Disaster Management and Humanitarian Assistance, a PACOM direct reporting unit, focuses on pre-crisis preparedness and capturing lessons learned from HA/DR operations. They provide regional and global information sharing across foreign and domestic government agencies, work to improve multilateral civil-military cooperation, and offer a small but rapid response capability to disasters and humanitarian crisis.

SCIENCE AND TECHNOLOGY

Question. As with other combatant commands, a Science and Technology (S&T) advisor is assigned to support PACOM.

If confirmed, what would be your priorities for the PACOM Science and Technology advisor?

Answer. If confirmed, I will rely on the PACOM Science and Technology (S&T) Advisor to discover, develop and demonstrate innovative solutions to meet warfighter challenges, help ensure adversary technology advancements are identified early and mitigated, help build requirements for Service resourcing, and help build science and technology partnerships among PACOM component commanders and industry, the private sector, academia, the interagency, and regional allies and partners. I would expect that the PACOM S&T Advisor continues to expand collaboration with the national research enterprise composed of Service, DOD, and Department of Energy laboratories, as well as international partners. Additionally, I would expect the S&T Advisor to continue to provide expert advice to the PACOM staff

on new and emerging capabilities that can aid the command in meeting theater objectives.

Question. What role do rapid fielding programs play in developing and delivering new capabilities to the warfighter?

Answer. Rapid fielding programs are designed to be primarily focused on Combatant Command priorities. PACOM has aggressively leveraged rapid fielding programs such as Joint Capability Technology Demonstrations and the Quick Reaction Capabilities through the Joint Urgent Operational Needs program. If confirmed, I intend to continue placing significant emphasis on these processes. Rapid fielding provides a pathway to innovative, agile and affordable solutions for the Combatant Commands and we must continue to build on the excellent work in this area.

Question. The Secretary of Defense has established a Strategic Capabilities Office (SCO) to develop new systems and technologies to counter anti-access and area denial capabilities. How would you work with SCO to prioritize their programs and support the development and deployment of new capabilities?

Answer. Prioritization of SCO programs is accomplished through close coordination between the SCO-West office created within PACOM and the central SCO stake holders at the Pentagon. If confirmed, I would be in the unique position of offering the forces and exercise venues necessary to effectively test the new and innovative strategic capabilities which SCO puts forward. Additionally, the Asia-Pacific offers the opportunity for operationally realistic scenarios which will help to validate the OT&E prerequisites for new capabilities and allow them to move forward more rapidly in the acquisition process.

Question. DOD has, in recent years, put greater emphasis on research and development of persistent ISR capabilities.

In your view, how can persistent ISR improve operations in the Pacific theater, and how would you utilize new platform and sensor technologies?

Answer. Persistent ISR in the Pacific Theater provides real time situational awareness for increased ability to gain indications and warnings and to hold strategic threats at risk. By working with allies and partners we can enhance our understanding of the region in real time and share this information, as needed. New and improved capabilities would provide more reaction time to indications and warning allowing more time to find off-ramps to de-escalate the situation. More capacity and capability would provide actionable intelligence to support theater operations while minimizing delays and keeping us ahead of potential crisis, natural disasters and other unplanned contingencies.

Question. Do you believe that airship platforms can be effectively employed in the Pacific theater?

Answer. Yes. I believe that persistent ISR is one of the most important capabilities for PACOM as it increases the ability to anticipate and react to potential crises to enable the commander to gain a better understanding of activities in the region. To satisfy PACOM's ISR requirements, a broad array of platforms is needed. Airship platforms have demonstrated an exciting potential to fulfill part of this requirement, especially in permissive environments in missions such as air and surface domain awareness. Furthermore, airships of sufficient scale also offer a promising capability to conduct mobility operations independent of traditional aerial or seaport facilities in missions such as disaster response. If confirmed, I would be interested in any platform that could meet my ISR requirements, including airships.

MINERVA AND SOCIAL SCIENCE

Question. Since 2009, DOD has been funding, under the Minerva Initiative, academic research focusing on the evolving relationship between technology and national security in China. The goal of this research is to create a better understanding of China's dynamic science, technology and innovation enterprise and its impact on its military.

Are you aware of this research and in your view, should DOD continue to fund activities like this to increase its breadth and depth of the Chinese military-industrial enterprise?

Answer. Yes to both questions. China is increasingly emphasizing the fusion of civil and military research and development as a key to accelerating the technological advance and modernization of the People's Liberation Army (PLA). As the relationship between China's science and technology sectors and the PLA grows closer, the type of research that the Minerva Initiative provides becomes more important in helping us to assess the pace and longer-term trajectory of China's military modernization.

Question. The Human Terrain System has been effectively used to support efforts to better understand the socio-political environment in which military forces have deployed.

Are you aware of the work of the Human Terrain System teams, and in your view, should similar capabilities be developed to support the PACOM AOR?

Answer. It is very important to have socio-cultural understanding of the people and places where we engage and operate. I am aware of the Army's Human Terrain System, and its use in Iraq and Afghanistan. PACOM employs analysts and foreign area specialists throughout the command in an effort to best integrate that knowledge into our efforts. Several initiatives with similar capabilities are underway, leveraging a variety of knowledge sources as we work to continue expanding this important area. One challenge we face is the size and complexity of the Asia-Pacific. The region is home to over half the world's population who represents thousands of groups, tribes, and societies, and collectively speak over 1,000 languages. The PACOM staff is currently assessing how the Human Terrain System might be utilized in the PACOM AOR. I am very interested in the outcome of that assessment.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the PACOM commander?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR CARL LEVIN

AIR DEFENSE IDENTIFICATION ZONE

1. Senator LEVIN. Admiral Harris, during the hearing you commented on the legality of the Air Defense Identification Zone (ADIZ) that was declared by China. Would you please clarify that response?

Admiral HARRIS. I erred when I used the term "illegal." Freedom of overflight and other internationally lawful uses of airspace are essential to prosperity, stability, and security around the globe. International law does not prohibit nations from establishing an ADIZ in international airspace, adjacent to their national airspace. However, it is inconsistent with international law to establish an ADIZ which applies its procedures to aircraft not intending to enter national airspace. We also do not support efforts of any nation to establish its ADIZ unilaterally without consultation and collaboration with neighboring nations (e.g. China's ADIZ overlaps Japan and the Republic of Korea's ADIZs). By establishing and announcing its East China Sea ADIZ, especially over disputed waters, and without coordination or consultation, China increased the risk of misunderstanding and miscalculation in one of the most highly sensitive areas in the world. I view this development as an improper attempt by China to unilaterally alter the status quo in the region. Because of this, we don't recognize the ADIZ or comply with it.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

AIRBORNE ELECTRONIC ATTACK REQUIREMENTS

2. Senator AYOTTE. Admiral Harris, in this year's congressional testimony, the Chief of Naval Operations, Admiral Jonathan W. Greenert, USN, highlighted the critical need for additional EA-18G Growlers in operational support for both carrier and expeditionary strike forces. Congress is in the process of addressing a portion of the Department of Defense's (DOD) needs in Airborne Electronic Attack (AEA). The Senate and House Armed Services Committees are now asking DOD to provide additional information on the extensive analysis taking place at the Navy level and—most important to your future role—the need for additional Joint AEA at the expeditionary level. Would you please provide your thoughts on the importance of AEA in the Pacific area of responsibility?

Admiral HARRIS. Airborne Electronic Attack (AEA) is critically important to the Pacific area of responsibility as control of the Electromagnetic Spectrum (EMS) is vital for PACOM to preserve its warfighting advantage in the Asia-Pacific. AEA enables PACOM to effectively gain access to heavily contested environments, which consist of state of the art networked systems, distributed controls, and sophisticated sensors integrated into military equipment, civilian infrastructure, and commercial networks. While the demand for this mission is high, the platforms able to perform this mission are decreasing. For this reason, the Navy's fleet of expeditionary and carrier based EA-18 Growlers is vital to Pacific Fleet's ability to achieve my mission sets, and if confirmed, I expect to place a demand on Navy to provide even more.

AEA provides innovative, asymmetric, cost imposing solutions to counter anti-access/area denial challenges. Potential adversaries are developing and fielding Electronic Warfare capabilities (air, surface, subsurface, space, cyber) and the subject matter expertise to decrease our warfighting advantage. Therefore, PACOM must continually invest in research and development of the AEA solutions it will need to maintain the asymmetric advantage in the future.

3. Senator AYOTTE. Admiral Harris, based on what you currently know, what specific areas of Joint AEA do you feel need additional support with the turn-to-the-Pacific strategy that DOD is conducting?

Admiral HARRIS. As our Nation rebalances to the Pacific, we face growing and modernizing adversarial militaries with advanced electronic warfare systems. As such, we must invest in robust, offensive, non-kinetic electronic attack capabilities in order to stay ahead of rapidly modernizing threats in the region. Additionally, we need to improve our electronic protection capabilities for our existing platforms to increase joint operational access. Furthermore, U.S. forces require the tactics, training, and procedures necessary to recognize, identify, and counter current and next generation threats.

4. Senator AYOTTE. Admiral Harris, are there additional assets, both platform and technology, that you feel are key to addressing the AEA role in the Pacific? If so, please elaborate.

Admiral HARRIS. The EA-18 Growler is the premier AEA platform in the U.S. military, and the demand for that platform continues to increase. It is the primary enabler to defeat adversarial A2/AD strategies. PACOM requires EA-18G aircraft, equipment, and personnel in sufficient quantity within Carrier and Expeditionary Air Wings to support a Joint Campaign to complement the U.S. Air Force's fleet of EC-130H Compass Call aircraft. Additionally, PACOM requires next generation Electronic Attack pods for manned and unmanned aircraft in order to disrupt, degrade, or defeat current and next generation threats. Finally, the development and fielding of penetrating, long endurance unmanned aerial vehicles able to conduct AEA in medium to high threat environments are essential to imposing cost and minimizing risk to U.S. forces.

[The nomination reference of ADM Harry B. Harris, Jr., USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
September 18, 2014.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the U.S. Navy to the grade indicated while assigned to a position of importance and responsibility under Title 10, U.S.C., section 601:

To be Admiral.

ADM Harry B. Harris, Jr., 0000.

[The biographical sketch of ADM Harry B. Harris, Jr., USN, which was transmitted to the committee at the time the nomination was referred, follows:]

TRANSCRIPT OF NAVAL SERVICE FOR ADM HARRY BINKLEY HARRIS, JR., USN

07 June 1978 Ensign
07 June 1980 Lieutenant (junior grade)
01 July 1982 Lieutenant
01 November 1987 Lieutenant Commander
01 May 1993 Commander
01 June 1999 Captain
01 May 2005 Rear Admiral (lower half)
01 November 2007 Rear Admiral
13 June 2008 Vice Admiral
16 October 2013 Admiral, Service continuous to date

Assignments and duties:

	From	To
Patrol Squadron ONE ONE (DUINS)	June 1978	Sep 1978
Naval Aviation Schools Command, Pensacola, FL (DUINS)	Sep 1978	Nov 1978
Training Squadron ONE ZERO (DUINS)	Nov 1978	Mar 1979
Naval Air Training Unit, Mather AFB, CA (DUINS)	Mar 1979	Sep 1979
Patrol Squadron THREE ZERO (DUINS)	Sep 1979	Feb 1980
Patrol Squadron FOUR FOUR (Avionics/Armament Division Officer)	Feb 1980	Jan 1983
Commander, Naval Forces Japan, Yokosuka, Japan (Flag Lieutenant)	Jan 1983	Feb 1985
Fleet Combat Training Center Atlantic, Dam Neck, VA (DUINS)	Feb 1985	May 1985
USS <i>Saratoga</i> (CV 60) (Tactical Action Officer)	May 1985	May 1987
Patrol Wing ONE (Task Force Surveillance Officer)	May 1987	July 1989
Patrol Squadron THREE ONE (DUINS)	July 1989	Nov 1989
Patrol Squadron FOUR (Operations Officer)	Nov 1989	July 1991
Harvard University (DUINS)	July 1991	June 1992
Office of the Chief of Naval Operations (Action Officer) (N51)	June 1992	July 1993
Georgetown University (DUINS)	July 1993	Apr 1994
XO, Patrol Squadron FOUR SIX	Apr 1994	June 1995
CO, Patrol Squadron FOUR SIX	June 1995	May 1996
Patrol Wing ONE (Operations Officer)	July 1996	Nov 1998
Joint Staff (Special Assistant to Chairman of the Joint Chiefs of Staff)	Nov 1998	Dec 2000
Commander, Patrol and Reconnaissance Wing ONE	Jan 2001	July 2002
U.S. Naval Forces Central Command (Assistant Chief of Staff for Operations, Plans and Political-Military Affairs)	Aug 2002	Aug 2004
Office of the Chief of Naval Operations (Director, Current Operations) (N31)/AT-FP Division (N32/N34)	Aug 2004	Mar 2006
Commander, Joint Task Force Guantanamo, U.S. Southern Command	Mar 2006	June 2007
U.S. Southern Command (Director for Operations) (J3)	June 2007	May 2008
Office of the Chief of Naval Operations (Deputy Chief of Naval Operations for Communication Networks) (N6)	June 2008	Nov 2009
Commander, Sixth Fleet/Commander, Striking and Support Forces NATO/Deputy Commander, U.S. Naval Forces Africa/Joint Force Maritime Component Commander Europe	Nov 2009	Oct 2011
Assistant to the Chairman of the Joint Chiefs of Staff	Oct 2011	Oct 2013
Commander, U.S. Pacific Fleet	Oct 2013	To date

Medals and awards:

Defense Distinguished Service Medal
 Distinguished Service Medal with one Gold Star
 Defense Superior Service Medal with two Oak Leaf Clusters
 Legion of Merit with two Gold Stars
 Bronze Star Medal with one Gold Star
 Meritorious Service Medal with three Gold Stars
 Air Medal with numeral "1"
 Joint Service Commendation Medal
 Navy and Marine Corps Commendation Medal with four Gold Stars
 Navy and Marine Corps Achievement Medal
 Joint Meritorious Unit Award
 Navy Unit Commendation with two Bronze Stars
 Navy and Marine Corps Overseas Service Ribbon with four Bronze Stars
 Kuwait Liberation Medal (Saudi Arabia)
 Meritorious Unit Commendation with one Bronze Star
 Navy "E" Ribbon with three "E" devices
 Navy Expeditionary Medal with one Bronze Star
 National Defense Service Medal with two Bronze Stars
 Armed Forces Expeditionary Medal
 Southwest Asia Service Medal with three Bronze Stars
 Afghanistan Campaign Medal
 Global War on Terrorism Expeditionary Medal
 Global War on Terrorism Service Medal
 Military Outstanding Volunteer Service Medal
 Sea Service Deployment Ribbon with four Bronze Stars
 Kuwait Liberation Medal (Kuwait)
 Expert Rifle Marksmanship Medal
 Expert Pistol Shot Medal

Civilian Award:

Department of State Distinguished Honor Award

Special Qualifications:

BS (Engineering) U.S. Naval Academy, 1978
 MPA (Public Administration) Harvard University, 1992
 MA (National Security Studies) Georgetown University, 2000
 Designated Naval Flight Officer, 1979
 Awarded the Stephen Decatur Award, 1987
 Capstone, 2005–3
 Designated Level IV Joint Qualified Officer, 2009
 Awarded NECO Ellis Island Medal of Honor, 2014
 Awarded APAICS Lifetime Achievement Award, 2014

Summary of joint duty assignments:

Assignment	Dates	Rank
Joint Staff (Special Assistant to Chairman of the Joint Chiefs of Staff)	Nov 98–Dec 00	CDR/CAPT
Commander, Joint Task Force Guantanamo, U.S. Southern Command	Mar 06–June 07 ...	RDML
U.S. Southern Command (Director for Operations) (J3)	June 07–May 08 ...	RDML/RADM
Commander, Sixth Fleet/Commander, Striking and Support Forces NATO/Deputy Commander, U.S. Naval Forces Africa/Joint Force Maritime Component Com- mander Europe.	Nov 09–Oct 11	VADM
Assistant to the Chairman of the Joint Chiefs of Staff	Oct 11–Oct 13	VADM

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by ADM Harry B. Harris, Jr., USN, in connection with his nomination follows:]

1051

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Harry B. Harris, Jr..

2. **Position to which nominated:**
Commander, U.S. Pacific Command.

3. **Date of nomination:**
September 18, 2014.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
4 August 1956, Yokosuka, Japan.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to CDR Brunhilde K. Bradley, USN (Ret.) (Maiden name unchanged).

7. **Names and ages of children:**
None.

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

Honorary "Colonel Aide de Camp," State of Tennessee
Honorary "Admiral in the Texas Navy," State of Texas

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Fraternal: Japanese American Veterans Association, member
Fraternal: U.S. Naval Academy Alumni Association, member
Fraternal: Army-Navy Club, Washington DC, member
Professional: Maritime Patrol (Aircraft) International, member
Fraternal: Maritime Patrol Association
Professional: U.S. Naval Institute, member
Other: National Association of Watch and Clock Collectors, former member
Other: National Association of the Carabao, former member

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

National Ethnic Coalition of Organizations (NECO) Ellis Island Medal of Honor
2014
 Asia-Pacific American Institute of Congressional Studies Lifetime Achievement
Award, 2014
 Who's Who in America, 2012
 U.S. State Department Distinguished Honor Award, 2012
 Who's Who in Asian American Communities Spirit Award, 2009
 Fellowship: MIT "Seminar 21" fellow, 1999–2000
 Scholarship: Navy "Admiral Arthur S. Moreau Scholarship in International Af-
 fairs" to Georgetown and Oxford Universities, 1994
 Fellowship: Georgetown University "Fellows in the School of Foreign Service",
 1993–1994
 Scholarship: Harvard-Tufts Scholarship to the John F. Kennedy School of
 Government, 1992
 Honors: U.S. Navy League "Stephen Decatur Award for Operational Competence,"
 1986

12. **Commitment to testify before Senate committees:** Do you agree, if con-
 firmed, to appear and testify before any duly constituted committee of the Senate?
 Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted com-
 mittee of Congress, to give your personal views, even if those views differ from the
 administration in power?
 Yes.

[The nominee responded to the questions in Parts B–E of the
 committee questionnaire. The text of the questionnaire is set forth
 in the Appendix to this volume. The nominee's answers to Parts B–
 E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographi-
 cal and Financial Information and that the information provided therein is, to the
 best of my knowledge, current, accurate, and complete.

HARRY B. HARRIS, JR.

This 27th day of August, 2014.

[The nomination of ADM Harry B. Harris, Jr., USN, was re-
 ported to the Senate by Chairman Levin on December 9, 2014, with
 the recommendation that the nomination be confirmed. The nomi-
 nation was confirmed by the Senate on December 11, 2014.]

APPENDIX

COMMITTEE ON ARMED SERVICES QUESTIONNAIRE ON BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF CIVILIAN NOMINEES

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearing and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
2. **Position to which nominated:**
3. **Date of nomination:**
4. **Address:** (List current place of residence and office addresses.)
5. **Date and place of birth:**
6. **Marital Status:** (Include maiden name of wife or husband's name.)
7. **Names and ages of children:**
8. **Education:** List secondary and higher education institutions, dates attended, degree received and date degree granted.
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational or other institution.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable and other organizations.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

COMMITTEE ON ARMED SERVICES FORM

FINANCIAL AND OTHER INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Information furnished in Parts B through F will be retained in the committee's executive files and will not be made available to the public unless specifically directed by the committee.

Name:

PART B—FUTURE EMPLOYMENT RELATIONSHIPS

1. Will you sever all business connections with your present employers, business firms, business associations or business organizations if you are confirmed by the Senate?

2. Do you have any plans, commitments or agreements to pursue outside employment, with or without compensation, during your service with the government? If so, explain.

3. Do you have any plans, commitments or agreements after completing government service to resume employment, affiliation or practice with your previous employer, business firm, association or organization?

4. Has anybody made a commitment to employ your services in any capacity after you leave government service?

5. Is your spouse employed and, if so, where?

6. If confirmed, do you expect to serve out your full term or until the next Presidential election, whichever is applicable?

PART C—POTENTIAL CONFLICTS OF INTEREST

1. Describe all financial arrangements, deferred compensation agreements, and other continuing dealings with business associates, clients or customers.
2. Indicate any investments, obligations, liabilities, or other relationships which could involve potential conflicts of interest in the position to which you have been nominated.
3. Describe any business relationship, dealing or financial transaction which you have had during the last 10 years, whether for yourself, on behalf of a client, or acting as an agent, that could in any way constitute or result in a possible conflict of interest in the position to which you have been nominated.
4. Describe any activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation or affecting the administration and execution of law or public policy.
5. Explain how you will resolve any potential conflict of interest, including any that may be disclosed by your responses to the above items. (Please provide a copy of any trust or other agreements.)
6. Do you agree to provide to the committee any written opinions provided by the General Counsel of the agency to which you are nominated and by the Attorney General's office concerning potential conflicts of interest or any legal impediments to your serving in this position?

PART D—LEGAL MATTERS

1. Have you ever been disciplined or cited for a breach of ethics for unprofessional conduct by, or been the subject of a complaint to any court, administrative agency, professional association, disciplinary committee, or other professional group? If so, provide details.
2. Have you ever been investigated, arrested, charged or held by any Federal, State, or other law enforcement authority for violation of any Federal, State, county or municipal law, regulation or ordinance, other than a minor traffic offense? If so, provide details.
3. Have you or any business of which you are or were an officer ever been involved as a party in interest in any administrative agency proceeding or civil litigation? If so, provide details.
4. Have you ever been convicted (including a plea of guilty or nolo contendere) of any criminal violation other than a minor traffic offense?
5. Please advise the committee of any additional information, favorable or unfavorable, which you feel should be considered in connection with your nomination.

PART E—FOREIGN AFFILIATIONS

1. Have you or your spouse ever represented in any capacity (e.g., employee, attorney, business, or political adviser or consultant), with or without compensation, a foreign government or an entity controlled by a foreign government? If so, please fully describe such relationship.
2. If you or your spouse has ever been formally associated with a law, accounting, public relations firm or other service organization, have any of your or your spouse's associates represented, in any capacity, with or without compensation, a foreign government or an entity controlled by a foreign government? If so, please fully describe such relationship.

3. During the past 10 years have you or your spouse received any compensation from, or been involved in any financial or business transactions with, a foreign government or an entity controlled by a foreign government? If so, please furnish details.

4. Have you or your spouse ever registered under the Foreign Agents Registration Act? If so, please furnish details.

PART F—FINANCIAL DATA

All information requested under this heading must be provided for yourself, your spouse, and your dependents.

1. Describe the terms of any beneficial trust or blind trust of which you, your spouse, or your dependents may be a beneficiary. In the case of a blind trust, provide the name of the trustee(s) and a copy of the trust agreement.

2. Provide a description of any fiduciary responsibility or power of attorney which you hold for or on behalf of any other person.

3. List sources, amounts and dates of all anticipated receipts from deferred income arrangements, stock options, executory contracts and other future benefits which you expect to derive from current or previous business relationships, professional services and firm memberships, employers, clients and customers.

4. Have you filed a Federal income tax return for each of the past 10 years? If not, please explain.

5. Have your taxes always been paid on time?

6. Were all your taxes, Federal, State, and local, current (filed and paid) as of the date of your nomination?

7. Has the Internal Revenue Service ever audited your Federal tax return? If so, what resulted from the audit?

8. Have any tax liens, either Federal, State, or local, been filed against you or against any real property or personal property which you own either individually, jointly, or in partnership?

(The committee may require that copies of your Federal income tax returns be provided to the committee. These documents will be made available only to Senators and the staff designated by the chairman. They will not be available for public inspection.)

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

COMMITTEE ON ARMED SERVICES QUESTIONNAIRE ON BIOGRAPHICAL
AND FINANCIAL INFORMATION REQUESTED OF CERTAIN SENIOR
MILITARY NOMINEES

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES FOR CERTAIN SENIOR MILITARY POSITIONS

INSTRUCTIONS TO THE NOMINEE:

Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

If you have completed this form in connection with a prior military nomination, you may use the following procedure in lieu of submitting a new form. In your letter to the Chairman, add the following paragraph to the end:

"I hereby incorporate by reference the information and commitments contained in the Senate Armed Services Committee form 'Biographical and Financial Information Requested of Nominees for Certain Senior Military Positions,' submitted to the committee on [insert date or your prior form]. I agree that all such commitments apply to the position to which I have been nominated and that all such information is current except as follows:" [If any information on your prior form needs to be updated, please cite the part of the form and the question number and set forth the updated information in your letter to the chairman.]

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
2. **Position to which nominated:**
3. **Date of nomination:**
4. **Address:** (List current place of residence and office addresses. Also include your office telephone number.)
5. **Date and place of birth:**
6. **Marital Status:** (Include name of husband or wife, including wife's maiden name.)
7. **Names and ages of children:**
8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable and other organizations.

11. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

COMMITTEE ON ARMED SERVICES FORM

FINANCIAL AND OTHER INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Information furnished in Parts B through E will be retained in the committee's executive files and will not be made available to the public unless specifically directed by the committee.

Name:

PART B—FUTURE EMPLOYMENT RELATIONSHIPS

1. Do you have any plans, commitments or agreements to pursue outside employment, with or without compensation, during your military service. If so, explain.

2. Has anybody made a commitment to employ your services in any capacity after you leave military service?

PART C—POTENTIAL CONFLICTS OF INTEREST

1. Describe all financial arrangements, deferred compensation agreements, and other continuing dealings with business associates, clients or customers.

2. Indicate any investments, obligations, liabilities, or other relationships which could involve potential conflicts of interest in the position to which you have been nominated.

3. Describe any business relationship, dealing or financial transaction which you have had during the last 10 years, whether for yourself, on behalf of a client, or acting as an agent, that could in any way constitute or result in a possible conflict of interest in the position to which you have been nominated.

4. Explain how you will resolve any potential conflict of interest, including any that may be disclosed by your responses to the above items. (Please provide a copy of any trust or other agreements.)

5. Do you agree to provide to the committee any written opinions provided by the General Counsel of the agency to which you are nominated and by the Office of Government Ethics concerning potential conflicts of interest or any legal impediments to your serving in this position?

6. Is your spouse employed and, if so, where?

PART D—LEGAL MATTERS

1. Have you ever been disciplined or cited for a breach of ethics for unprofessional conduct by, or been the subject of a complaint to any court, administrative agency, professional association, disciplinary committee, or other professional group? If so, provide details.

2. Have you ever been investigated, arrested, charged or held by any Federal, State, or other law enforcement authority for violation of Federal, State, county or municipal law, regulation or ordinance, other than a minor traffic offense? If so, provide details.

3. Have you or any business of which you are or were an officer ever been involved as a party in interest in any administrative agency proceeding or litigation? If so, provide details.

4. Have you ever been convicted (including a plea of guilty or nolo contendere) of any criminal violation other than a minor traffic offense?

5. Please advise the committee of any additional information, favorable or unfavorable, which you feel should be considered in connection with your nomination.

PART E—FOREIGN AFFILIATIONS

1. Have you or your spouse ever represented in any capacity (e.g., employee, attorney, business, or political adviser or consultant), with or without compensation, a foreign government or an entity controlled by a foreign government? If so, please fully describe such relationship.

2. If you or your spouse has ever been formally associated with a law, accounting, public relations firm or other service organization, have any of your or your spouse's associates represented, in any capacity, with or without compensation, a foreign government or an entity controlled by a foreign government? If so, please fully describe such relationship.

3. During the past 10 years have you or your spouse received any compensation from, or been involved in any financial or business transactions with, a foreign government or an entity controlled by a foreign government? If so, please furnish details.

4. Have you or your spouse ever registered under the Foreign Agents Registration Act? If so, please furnish details.

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

This _____ day of _____, 20_____.
