

U.S. GOVERNMENT PUBLISHING OFFICE
Washington, DC

GENERAL TERMS, CONDITIONS, AND SPECIFICATIONS

For the Procurement of
MADCAP, MCS, SSA-L991, TASTE (Age Attainments), and TATTER Notices

as requisitioned from the U.S. Government Publishing Office (GPO) by the
Social Security Administration (SSA)

Single Award

TERM OF CONTRACT: The base term of this contract is for approximately 16 months beginning **Date of Award** and ending **October 31, 2020**, plus up to four (4) optional 12-month extension period(s) that may be added in accordance with the “OPTION TO EXTEND THE TERM OF THE CONTRACT” clause in SECTION 1 of this contract.

The period from Date of Award until October 31, 2019 will be used by the contractor for testing and interfacing with SSA’s National File Transfer Management System (FTMS) for electronic transmission of files from SSA to the production facility. Actual live production begins November 1, 2019.

BID OPENING: Bids shall be publicly opened at 11:00 a.m., prevailing Washington, DC time **March 22, 2019**.

BID SUBMISSION: Submit bid in pre-addressed envelope furnished with solicitation or send to: U.S. Government Publishing Office, Bid Section, Room C-848, Stop: CSPS, 732 North Capitol Street, NW, Washington, DC 20401. Facsimile bids in response to this solicitation are permitted. Facsimile bids may be submitted directly to the GPO Bid Section, Fax No. (202) 512-1782. The program number and bid opening date must be specified with the bid. Refer to Facsimile Bids in Solicitation Provisions of GPO Contract Terms, GPO Publication 310.2, as revised January 2018. Hand delivered bids are to be taken to: GPO Bookstore, 710 North Capitol Street, NW, Washington, DC, between the hours of 8:00 a.m. and 4:00 p.m., prevailing Washington, DC, time, Monday through Friday. The contractor is to follow the submission instructions posted in the Bid Submission/Opening area. If further instruction or assistance is required, call (202) 512-0526. *NOTE: The GPO 910 “BID” Form is no longer required. Bidders are to fill out, sign/initial, as applicable, all pages of SECTION 4. – SCHEDULE OF PRICES.*

BID RESTRICTIONS: Due to time constraints, bidders must possess an SSA installed/active data connection between the exact location specified by the bidder and SSA’s National Computer Center (NCC). SSA must have security-cleared the bidder’s physical location(s) used for production of materials for this contract, and all employees passed Final Suitability (for same locations) completed prior to bid submission in order to be eligible for award of this contract. *NOTE: If bidder does not have these requirements completed prior to bid submission, then the bidder will be declared non-responsible.*

BIDDERS, PLEASE NOTE: *This Program was formerly Program 430-S.* These specifications have been extensively revised; therefore, all bidders are cautioned to familiarize themselves with all provisions of these specifications before bidding, with particular attention to the following: GPO has issued a new *GPO Publication 310.2, GPO Contract Terms - Solicitation Provisions, Supplemental Specifications, and Contract Clauses (Rev 1-18)*. Prospective bidders should carefully read this publication as the applicable terms within become an integral part of this contract. The document is posted at: <https://www.gpo.gov/how-to-work-with-us/vendors/forms-and-standards> along with a list of major revisions.

Abstracts of contract prices are available at: <https://www.gpo.gov/how-to-work-with-us/vendors/contract-pricing>

For information of a technical nature call David Love (202) 512-0310 or email aps-team1@gpo.gov.

SECTION 1. - GENERAL TERMS AND CONDITIONS

GPO CONTRACT TERMS: Any contract which results from this Invitation for Bid will be subject to the applicable provisions, clauses, and supplemental specifications of GPO Contract Terms (GPO Publication 310.2, effective December 1, 1987 (Rev 1-18)) and GPO Contract Terms, Quality Assurance through Attributes Program for Printing and Binding (GPO Publication 310.1, effective May 1979 (Rev. August 2002)).

GPO Contract Terms (GPO Publication 310.2) –

<https://www.gpo.gov/docs/default-source/forms-and-standards-files-for-vendors/contractterms2018.pdf>

GPO QATAP (GPO Publication 310.1) –

<https://www.gpo.gov/docs/default-source/forms-and-standards-files-for-vendors/qatap.pdf>

SUBCONTRACTING: The predominant production functions are the laser/ion deposition imaging of data for the printing/imaging of notices, the inserting of items into mailout envelopes, and disposal/destruction of waste materials. Any bidder who cannot perform the predominant production functions will be declared non-responsible.

The contractor shall be responsible for enforcing all contract requirements outsourced to a subcontractor

If the contractor wishes to add a subcontractor at any time after award, the subcontractor must be approved by the Government prior to production starting in that facility. If the subcontractor is not approved by the Government then the contractor must submit a new subcontractor's information to the Government for approval 15 calendar days prior to the start of production at that facility.

If the contractor plans to enter into a "Contractor Team Arrangement," or Joint Venture, to fulfill any requirements of this contract, they must comply with the terms and regulations as detailed in the Printing Procurement Regulation (GPO Publication 305.3; Rev. 2-11).

QUALITY ASSURANCE LEVELS AND STANDARDS: The following levels and standards shall apply to these specifications:

Product Quality Levels:

- (a) Printing (page related) Attributes – Level III.
- (b) Finishing (item related) Attributes – Level III.

Inspection Levels (from ANSI/ASQC Z1.4):

- (a) Non-destructive Tests - General Inspection Level I.
- (b) Destructive Tests - Special Inspection Level S-2.
- (c) Transparent, low-gloss, poly-type window material, covering the envelope window must pass a readability test with a rejection rate of less than 1/4% when run through a United States Postal Service (USPS) OCR Scanner.
- (d) Exception: ANSI X3.17 "Character Set for Optical Character Recognition (OCR A)" shall apply to these specifications. The revisions of this standard, which are effective as of the date of this contract, are those which shall apply.
- (e) Exception: The Data Matrix 2D barcodes must be in accordance with the requirements of ANSI MH 10.8.3M unless otherwise specified.
- (f) The payment portion below the micro-perforation on the "payment stub," once detached, will be scanned and must function properly when processed through the current high speed scanning equipment at SSA. A form is a reject and will be considered a major defect when its OCR print cannot be correctly deciphered on the first pass through the scanning equipment (See "PRINTING/IMAGING" for additional information regarding perforated payment stub.)

NOTE: Use of equipment or ink, which in any way adversely affects the scannability of the payment stub, will not be allowed.

ANSI Standards may be obtained from the American National Standards Institute, 25 West 43rd Street, 4th Floor, New York, NY 10036.

Specified Standards - The specified standards for the attributes requiring them shall be:

<u>Attribute</u>	<u>Specified Standard</u>
P-7. Type Quality and Uniformity	O.K. Press sheets
P-9. Solid and Screen Tint Color Match	O.K. Press sheets

Special Instructions - In the event that inspection of press sheets is waived by the Government, the following listed alternate standards (in order of precedence) shall become the Specified Standards:

P-7. Type Quality and Uniformity	Average Type Dimension in Publication Electronic Media/Camera Copy/Manuscript Copy
P-9. Solid and Screen Tint Color Match	Pantone Matching System

OPTION TO EXTEND THE TERM OF THE CONTRACT: The Government has the option to extend the term of this contract for a period of 12 months by written notice to the contractor no later than 30 days before the contract expires. If the Government exercises this option, the extended contract shall be considered to include this clause, except, the total duration of the contract may not exceed five (5) years as a result of, and including, any extension(s) added under this clause. Further extension may be negotiated under the “EXTENSION OF CONTRACT TERM” clause. See also “ECONOMIC PRICE ADJUSTMENT” for authorized pricing adjustment(s).

EXTENSION OF CONTRACT TERM: At the request of the Government, the term of any contract resulting from this solicitation may be extended for such period of time as may be mutually agreeable to the GPO and the contractor.

ECONOMIC PRICE ADJUSTMENT: The pricing under this contract shall be adjusted in accordance with this clause, provided that in no event will any pricing adjustment be made that would exceed the maximum permissible under any law in effect at the time of the adjustment. There will be no adjustment for orders placed during the first period specified below. Pricing will thereafter be eligible for adjustment during the second and any succeeding performance period(s). For each performance period after the first, a percentage figure will be calculated as described below and that figure will be the economic price adjustment for that entire next period. Pricing adjustments under this clause are not applicable to reimbursable postage or transportation costs, or to paper, if paper prices are subject to adjustment by separate clause elsewhere in this contract.

For the purpose of this clause, performance under this contract will be divided into successive periods. The first period will extend from **Date of Award to October 31, 2020**, and the second and any succeeding period(s) will extend for 12 months from the end of the last preceding period, except that the length of the final period may vary. The first day of the second and any succeeding period(s) will be the effective date of the Economic Price Adjustment for that period.

NOTE: *The term of the first contract year (base year) is expected to be approximately 18 months; however, the Economic Price Adjustment will be based on the date of actual live production. Actual live production begins November 1, 2019.*

Pricing adjustments in accordance with this clause will be based on changes in the seasonally adjusted “Consumer Price Index For All Urban Consumers - Commodities Less Food” (Index) published monthly in the CPI Detailed Report by the U.S. Department of Labor, Bureau of Labor Statistics.

The economic price adjustment will be the percentage difference between Index averages as specified in this paragraph. An index called the variable index will be calculated by averaging the monthly Indexes from the 12-month interval ending three (3) months prior to the beginning of the period being considered for adjustment. This average is then compared to the average of the monthly Indexes for the 12-month interval ending July 31, 2019 called the base index. The percentage change (plus or minus) of the variable index from the base index will be the economic price adjustment for the period being considered for adjustment.

The Government will notify the contractor by contract modification specifying the percentage increase or decrease to be applied to invoices for orders placed during the period indicated. The contractor shall apply the percentage increase or decrease against the total price of the invoice less reimbursable postage or transportation costs and separately adjusted paper prices. Payment discounts shall be applied after the invoice price is adjusted.

PAPER PRICE ADJUSTMENT: Paper prices charged under this contract will be adjusted in accordance with “Table 9 - Producer Price Indexes and Percent Changes for Commodity Groupings and Individual Items” in Producer Price Indexes report, published by the Bureau of Labor Statistics (BLS), as follows:

NOTE: For the purpose of this contract, the Paper Price Adjustment will be based on the date of actual live production. Actual live production begins November 1, 2019.

1. BLS code 0913-01 for “Offset and Text” will apply to all paper required under this contract.
2. The applicable index figures for the month of **October 2019** will establish the Base Index.
3. There shall be no price adjustment for the first three production months of the contract.
4. Price adjustments may be monthly thereafter, but only if the index varies by an amount (plus or minus) exceeding 5% by comparing the Base Index to the index for that month, which is two months prior to the month being considered for adjustment.
5. Beginning with order placement in the fourth month, index variances will be calculated in accordance with the following formula:

$$\frac{X - \text{Base Index}}{\text{Base Index}} \times 100 = \text{___ \%}$$

Where X = the index for that month which is two months prior to the month being considered for adjustment.

6. The contract adjustment amount, if any, will be the percentage calculated in 5 above less 5%.
7. Adjustments under this clause will be applied to the contractor’s bid price(s) for Item VI., “PAPER” in the “SCHEDULE OF PRICES” and will be effective on the first day of any month for which prices are to be adjusted.

The Contracting Officer will give written notice to the contractor of any adjustments to be applied to invoices for orders placed during months affected by this clause. In no event, however, will any price adjustment be made which would exceed the maximum permissible under any law in effect at the time of the adjustment. The adjustment, if any, shall not be based upon the actual change in cost to the contractor, but shall be computed as provided above.

The contractor warrants that the paper prices set forth in this contract do not include any allowance for any contingency to cover anticipated increased costs of paper to the extent such increases are covered by this price adjustment clause.

All requirements, starting with Security Requirements below, through page 13 must be completed and approved at time of solicitation of this contract, if not the bidder will be declared non-responsive.

SECURITY REQUIREMENTS - Protection of Confidential Information

- (a) The contractor must restrict access to all confidential information obtained from the Social Security Administration in the performance of this contract to those employees and officials who need it to perform the contract. Employees and officials who need access to confidential information for performance of the contract will be determined at the postaward conference between the Contracting Officer and the responsible contractor representative.
- (b) The contractor must process all confidential information obtained from SSA in the performance of this contract under the immediate supervision and control of authorized personnel, and in a manner that will protect the confidentiality of the records in such a way that unauthorized persons cannot retrieve any such records.
- (c) The contractor must inform all personnel with access to the confidential information obtained from SSA in the performance of this contract of the confidential nature of the information and the safeguards required to protect this information from improper disclosure.
- (d) For knowingly disclosing information in violation of the Privacy Act, the contractor and the contractor employees may be subject to the criminal penalties as set forth in 5 U.S.C. Section 552a (i)(1), which is made applicable to contractors by 5 U.S.C. 552a (m)(1) to the same extent as employees of the SSA. For knowingly disclosing confidential information as described in section 1106 of the Social Security Act (42 U.S.C. 1306), the contractor and contractor's employees may also be subject to the criminal penalties as set forth in that provision.
- (e) The contractor must ensure that each contractor employee with access to confidential information knows the prescribed rules of conduct, and that each contractor employee is aware that he/she may be subject to criminal penalties for violations of the Privacy Act and/or the Social Security Act.

When the contractor employees are made aware of this information, they are required to sign Form SSA 301- Contractor Personal Security Certification. (See Exhibit A.)

A copy of this signed certification must be forwarded to: Social Security Administration, Division of Printing Management, Attn: Kate Schmidt, 1369 Annex Building, 6401 Security Boulevard, Baltimore, MD 21235-6401.

- (f) All confidential information obtained from SSA for use in the performance of this contract must, at all times, be stored in an area that is physically safe from unauthorized access.
- (g) Performance of this contract may involve access to tax return information as defined in 26 U.S.C. Section 6103(b) of the Internal Revenue Code (IRC). All such information must be handled as confidential and may not be disclosed without the written permission of SSA. For willingly disclosing confidential tax return information in violation of the IRC, the contractor and contractor employees may be subject to the criminal penalties set forth in 26 U.S.C. Section 7213.
- (h) The Government reserves the rights to conduct on-site visits to review the contractor's documentation and in-house procedures for protection of confidential information.

- (i) If a subcontractor is used for the sorting and/or mailing of the notices of this contract, the subcontractor must conform to all security requirements of the contract.

SSA EXTERNAL SERVICE PROVIDER SECURITY REQUIREMENTS: This resource identifies the basic information security requirements related to the procurement of Information Technology (IT) services hosted externally to SSA's Network.

See Exhibit B: SSA External Service Provider Security Requirements.

The following general security requirements apply to all External Service Providers:

- a) The solution must be located in the United States, its territories, or possessions.

NOTE: "United States" means the 50 States, the District of Columbia, Puerto Rico, the Northern Mariana Islands, American Samoa, Guam, the U.S. Virgin Islands, Johnston Island, Wake Island, and Outer Continental Shelf Lands as defined in the Outer Continental Shelf Lands Act (43 U.S.C. 1331, et seq.), but does not include any other place subject to U.S. jurisdiction or any U.S. base or possession within a foreign country (29 CFR 4.112).

- b) Upon request from the SSA Printing Management Branch, the contractor shall provide access to the hosting facility to the U.S. Government or authorized agents for inspection and facilitate an on-site security risk and vulnerability assessment.

- c) The solution must meet Federal Information Processing Standards (FIPS) and guidance developed by the National Institute of Science and Technology (NIST) under its authority provided by the Federal Information Security Management Act (FISMA) to develop security standards for federal information processing systems, and Office of Management and Budget's (OMB) Circular A-130 Appendix III.

- d) Solutions classified as Cloud Service Providers (CSP) must adhere to additional FedRAMP security control requirements. Further information may be found at: <http://www.gsa.gov/portal/category/102371>. As part of these requirements, CSPs must have a security control assessment performed by a Third Party Assessment Organization.

NOTE: A Third Party Assessment Organization (3PAO) is an organization that has been certified to help cloud service providers and Government agencies meet FedRAMP compliance regulations. Accredited 3PAOs can be found at <https://marketplace.fedramp.gov/#/assessors?sort=assessorName>.

- e) Before SSA provides data to the contractor, the contractor shall submit a System Security Plan (SSP), which documents how the solution implements security controls in accordance with the designated FIPS 199 security categorization and the Minimum Security Requirements for Federal Information and Information Systems. This SSP requires the use of NIST SP 800-53, or the contractor shall provide a Security Assessment Package (SAP) completed by either an independent assessor or another Federal agency.

NOTE: An independent assessor is any individual or group capable of conducting an impartial assessment of security controls employed within or inherited by an information system.

- f) SSA will consider a self-assessment of security controls for solutions that do not involve sensitive information or Personally Identifiable Information (PII).

NOTE: PII is any information about an individual maintained by an agency, including: (1) any information that can be used to distinguish or trace an individual's identity, such as name, social security number, date and place of birth, mother's maiden name, or biometric records; and (2) any other information that is linked or linkable to an individual, such as medical, educational, financial, and employment information.

All External Service Providers (ESP) are subject to the following security requirements:

- All ESPs are subjected to SSA’s Security Authorization Process, which will entail security testing and evaluation of the in-place security controls. For more information see NIST SP 800-37, Revision 1.
- ESPs must follow NIST SP 800-53 Revision 4 *Recommended Security Controls for Federal Information Systems and Organizations* for protecting Low or Moderate impact level information as categorized by FIPS 199 for the information system.

NOTE: Systems that contain Personally Identifiable Information (PII) are considered “Moderate.”

- ESPs must document all deployed (applicable) and planned controls for an information system in a System Security Plan that is in NIST-compliant format. Refer to NIST SP 800-18.
- ESPs classified as Cloud Service Providers (CSP) must adhere to additional FedRAMP security control requirements. Further information may be found at: <http://www.gsa.gov/portal/category/102371>. As part of these requirements, CSPs must have a security control assessment performed by a Third Party Assessment Organization.
- Upon request from SSA, the ESP shall provide the following network security information and documentation for review and audit purposes:
 - All information security control artifacts required to support the Security Assessment and Authorization (SA&A) process.
 - Intrusion Detection Systems (IDS) configuration.
 - Network firewall configuration.

- Server and network device patching schedules and compliance.
- Server, network device, and security logs.
- Detailed hardware inventory including servers, network devices, and storage.

ESPs are required to adhere to NIST 800-53 Rev. 4 security control framework based on their assigned categorization. The following sections outline additional security controls and SSA organizational defined parameters for NIST 800-53, Rev. 4. Security requirements below are applicable to low and moderately categorized systems unless otherwise designated. For additional information or supplement guidance for these controls, refer Appendix F of NIST 800-53, Rev. 4.

See Exhibit B: SSA External Service Provider Security Requirements for complete details regarding this requirement.

Templates for Required Security Documents:

- Exhibit C: Security Assessment Report (SAR) Template
- Exhibit D: Risk Assessment Report (RAR) Template
- Exhibit E: External Hosted Information System Plan (ESP) Template

PHYSICAL SECURITY: Contractor's facilities storing SSA assets and information are required to meet the Interagency Security Committee's standard for Federal facilities. This information can be found in the "Facility Security Plan: An Interagency Security Committee Guide," dated February 2015, 1st Edition. SSA reserves the right to inspect contractor facilities to ensure compliance with the ISC guidelines. If facilities are found deficient, the contractor must implement corrective actions within 60 calendar days of notification. Requirements can include but not be limited to, the physical security countermeasures, such as access control systems, closed circuit television systems, intrusion detection systems, and barriers.

Contractor must pass all External Service Provider Security and Physical Security requirements as specified above before the Government can award this contract. Any bidder who cannot obtain approval for any of these security requirements within 60 calendar days of approval of production plans and physical security inspection will be declared non-responsible.

SECURITY WARNING: It is the contractor's responsibility to properly safeguard personally identifiable information from loss, theft, or inadvertent disclosure and to immediately notify the Government of any loss of personally identifiable information. Personally identifiable information is "any information which can be used to distinguish or trace an individual's identity, such as their name, social security number, biometric records, etc., alone or when combined with other personal or identifying information which is linked or linkable to a specific individual, such as date and place of birth, mother's maiden name, etc."

NOTE: These requirements apply to all contractor's facilities (i.e., multiple plants) used for production of the notices.

All employees working on this contract must –

- Be familiar with current information on security, privacy, and confidentiality as they relate to the requirements of this contract.
- Obtain pre-screening authorization before using sensitive or critical applications pending a final suitability determination as applicable to the specifications.
- Lock or logoff their workstation/terminal prior to leaving it unattended.
- Act in an ethical, informed, and trustworthy manner.
- Protect sensitive electronic records.
- Be alert to threats and vulnerabilities to their systems.

- Be prohibited from having any mobile devices or cameras in sensitive areas that contain any confidential materials. This includes areas where shredding and waste management occurs.

Contractor's managers working on this contract must –

- Monitor use of mainframes, PCs, LANs, and networked facilities to ensure compliance with national and local policies, as well as the Privacy Act statement.
- Ensure that employee screening for sensitive positions within their department has occurred prior to any individual being authorized access to sensitive or critical applications.
- Implement, maintain, and enforce the security standards and procedures as they appear in this contract and as outlined by the contractor.
- Contact the SSA, Division of Printing Management, within 24 hours, whenever a systems security violation is discovered or suspected.

Applicability -

The responsibility to protect personally identifiable information applies during the entire term of this contract and all option year terms if exercised. All contractors must secure and retain written acknowledgement from their employees stating they understand these policy provisions and their duty to safeguard personally identifiable information.

These policy provisions include, but are not limited to, the following:

- Employees are required to have locking file cabinets or desk drawers for storage of confidential material, if applicable.
- Material is not to be taken from the contractor's facility without express permission from the Government.
- Employees must safeguard and protect all Government records from theft and damage while being transported to and from contractor's facility.

The following list provides examples of situations where personally identifiable information is not properly safeguarded –

- Leaving an unprotected computer containing Government information in a non-secure space (e.g., leaving the computer unattended in a public place, in an unlocked room, or in an unlocked vehicle).
- Leaving an unattended file containing Government information in a non-secure area (e.g., leaving the file in a breakroom or on an employee's desk).
- Storing electronic files containing Government information on a computer or access device (flash drive, CD, etc.) that other people have access to (not password-protected).

This list does not encompass all failures to safeguard personally identifiable information but is intended to act as an alert to the contractor's employees of situations that must be avoided. Misfeasance occurs when an employee is authorized to access Government information that contains sensitive or personally identifiable information and, due to the employee's failure to exercise due care, the information is lost, stolen, or inadvertently released.

Whenever the contractor's employee has doubts about a specific situation involving their responsibilities for safeguarding personally identifiable information, they should consult the GPO and/or SSA.

SECURITY AND SUITABILITY REQUIREMENTS FOR GOVERNMENT PRINTING (NOV 2018):

NOTE: For the purposes of this contract, the Contracting Officer's Representative (COR) or Contracting Officers Technical Representative (COTR) is the SSA representative/Program Lead. The terms "vendor" and "contractor" are used interchangeably throughout this contract. Additionally, the terms "business days" and "workdays" are used interchangeably throughout this contract.

(a) Suitability Process

The background investigation and adjudication processes are compliant with 5 CFR 731 or equivalent. Any new vendor personnel (i.e., those who have not previously received a suitability determination under this contract) requiring access to a SSA facility, site, information, or system, must complete and submit, through the COR-COTR, the documents listed in (a)(1) at least 30 workdays prior to the date vendor personnel are to begin work. The suitability process cannot begin until the vendor submits, and SSA receives, accurate and complete documents.

(1) Suitability Document Submission

- a. Immediately upon award, the Company Point of Contact (CPOC) must provide to the Center for Suitability and Personnel Security (CSPS) and a copy to the Contracting Officers Representative (COR) for all vendor personnel requesting a suitability determination using a secured/encrypted email* with a password sent separately to DCHR.OPE.Suitability@ssa.gov:
 - (i) An e-QIP applicant listing including the names of all vendor personnel requesting suitability;
 - (ii) Completed Optional Form (OF) 306, Declaration for Federal Employment (see Exhibit G);
 - (iii) Fair Credit Reporting Act (FCRA) Authorization Form (see Exhibit H);
 - (iv) Additional Questions for Public Trust Positions Branching (see Exhibit I); and,
 - (v) Work authorization for non-United States (U.S.) born applicants, if applicable.
- b. The e-QIP applicant listing must include the vendors name, the Social Security Administration vendor number, the CPOC's name, the CPOC's contact information, the COR's name, the COR's contact information, and the full name, Social Security Number, date of birth, place of birth (must show city and state if born in the U.S. OR city and country if born outside of the U.S.), and a valid email address for all vendor personnel requesting suitability. All spelling of names, email addresses, places, and numbers must be accurate and legible.

(2) e-QIP Application

- a. Once SSA receives all completed documents, listed in (a)(1), the Center for Suitability and Personnel Security (CSPS) will initiate the e-QIP process using the e-QIP applicant listing. CSPS will email the e-QIP notification to the CPOC and COR inviting vendor personnel to the e-QIP website to electronically complete the background investigation form (Standard Form (SF) 85P, Questionnaire for Public Trust Positions.
- b. Vendor personnel will have up to 10 business days to complete the e-QIP application. The 10-day timeframe begins the day CSPS sends the invitation to the CPOC and COR. Vendor personnel must electronically sign the signature pages before releasing the application in e-QIP. Signature pages include the Certification, Release, and Medical Release pages for the SF 85P. (See Exhibit J.)

Find information about the e-QIP process in the e-QIP Quick Reference Guide for e-QIP Applicants at <https://nbib.opm.gov/e-qip-background-investigations/>.

- c. If vendor personnel need assistance with e-QIP logon and navigation, they can call the eQIP Hotline at 1-844-874-9940.

(3) Fingerprinting

- a. The e-QIP notification email also provides vendor personnel with instructions to obtain electronic fingerprinting services. Vendor personnel must report for fingerprint services immediately upon completion and release of the e-QIP application and within 10 business days from the day CSPS sends the invitation.
- b. If vendor personnel cannot report to the designated fingerprint locations (in the notification email), CSPS will accept completed Field Division (FD) 258 fingerprint cards. The COR can provide the FD 258, if required. Vendor personnel must complete all fields on the FD 258. Incomplete fields may delay suitability processing. (See Exhibit K.)
- c. If the vendor needs to mail completed FD 258 fingerprint cards, the vendor can send them, via certified mail along with a completed Vendor Personnel Suitability Cover Sheet to: Social Security Administration, Center for Suitability and Personnel Security, Attn: Suitability Program Officer, 6401 Security Boulevard, 2246 Annex Building, Baltimore, MD 21235.

(4) Status Check

- a. If vendor personnel have completed each of the steps in (e) in their entirety and do not receive a suitability determination within 15 business days of their last submission, call 1-844-874-9940 to determine suitability status.

(b) Suitability Determination

- (1) CSPS uses a Federal Bureau of Investigation fingerprint check as part of the basis for making a suitability determination.

This determination is final unless information obtained during the remainder of the full background investigation, conducted by the Office of Personnel Management, is such that SSA would find the vendor personnel unsuitable to continue performing under this contract. CSPS will notify the CPOC and the COR of the results of these determinations.

- (2) SSA will not allow vendor personnel access to a facility, site, information, or system until CSPS issues a favorable suitability determination. A suitability determination letter issued by CSPS is valid only for performance on the vendor specified in the letter.
- (3) If personnel has been cleared at a previous contractor's facility and are to perform work under a new vendor, the CPOC must submit a fully completed, legible Contractor Personnel Rollover Request Form to the COR. CSPS will notify the CPOC, COR, and Contract Officer (CO) of suitability to work under the new vendor. (See Exhibit L.)

(c) Vendor Personnel Previously Cleared by SSA or Another Federal Agency

If vendor personnel previously received a suitability determination from SSA or another Federal agency, the CPOC should include this information next to the vendor personnel's name on the initial applicant listing (see paragraph (a)(1)b.) along with the OF306. CSPS will review the information. If CSPS determines another suitability determination is not required, it will provide a letter to the CPOC and the COR indicating the vendor personnel was previously cleared under another Federal contract and does not need to go through the suitability determination process again.

(d) Unsuitable Determinations

- (1) The vendor must notify the contractor personnel of any unsuitable determinations as soon as possible after receipt of such a determination.
- (2) The vendor must submit requests for clarification for unsuitable determinations in writing within 30 calendar days of the date of the unsuitable determination to the email mailbox or address listed below. Vendor personnel must file their own requests; vendor may not file requests on behalf of vendor personnel.

dchr.ope.suitclarify@ssa.gov

OR

Social Security Administration, Center for Suitability and Personnel Security, Attn: Suitability Program Officer, 6401 Security Boulevard, 2246 Annex Building, Baltimore, MD 21235

(e) Vendor Notification to Government

The vendor shall notify the COR and CSPS within one business day if any vendor personnel is arrested or charged with a crime, or if there is any other change in the status of vendor personnel (e.g., leaves the company, no longer works under the vendor, the alien status changes, etc.) that could affect their suitability determination. The vendor must provide in the notification as much detail as possible, including, but not limited to: name(s) of vendor personnel whose status has changed, SSA vendor number, the type of charge(s), if applicable, date of arrest, the court date, jurisdiction, and, if available, the disposition of the charge(s).

****Email Procedures:***

For the contractor's convenience, SSA has included the following instructions to send emails with sensitive documentation or messages containing personally identifiable information (e.g., SSNs, etc.) securely to an SSA email address. Contractor is to consult their local information technology staff for assistance. If the contractor utilizes an alternate secure method of transmission, it is recommend that the contractor contact the recipient to confirm receipt.

To Encrypt a File using WinZip:

- i. Save the file to contractor's hard drive
- ii. Open Windows Explorer and locate the file
- iii. Right click on the file
- iv. Select "WinZip"
- v. Select "Add to Zip File"
- vi. An Add box pops up. Near the bottom of the box is an "Options" area
- vii. Click the "Encrypt added files" checkbox
- viii. Click the "Add" button
- ix. Check the "Hide Password" checkbox if not already checked
 - a. Enter a string of characters as a password composed of letters, numbers, and special characters (minimum 8 characters – maximum 64)
 - b. Select the 256-Bit AES encryption radio button
 - c. Click "OK"
- x. The file has been successfully encrypted, and the new Zip file can now be attached to an email.

Providing the Recipient with the Password:

Send the password to the intended recipient in a separate email message prior to sending the encrypted file or after sending the encrypted file. Do not send the password in the same email message to which the encrypted file is attached.

If possible, it is recommended to provide the password to the COR-COTR by telephone or establish a predetermined password between the contractor and the COR-COTR.

The COR-COTR should also submit the password in a separate email from the documentation when submitting to ^DCHR OPE Suitability. Due to the large volume of submissions, the COR-COTR must always provide the password to ^DCHR OPE Suitability in a separate email, even if it is a pre-established password for a contract.

Sending an encrypted Zip File via email:

1. Compose a new message
2. Attach the Zip File
3. Send message

SUITABILITY DETERMINATION: A Federal Bureau of Investigation fingerprint check is part of the basis used for making a suitability determination. This determination is final unless information obtained during the remainder of the full background investigation, conducted by the Office of Personnel Management, is such that SSA would find the contractor personnel unsuitable to continue performing under this contract. CPSPM will notify the CPOC, COTR, and Contracting Officer of the result of these determinations.

NOTE: Due to PII issues, the Government cannot provide production test files to the contractor until all Public Trust Security Requirements and Suitability Determination requirements, as specified herein, are met. If the contractor fails to meet these requirements within 90 calendar days of award, the contractor will be declared non-responsive.

PREAWARD SURVEY: In order to determine the responsibility of the prime contractor or any subcontractor, the Government reserves the right to conduct an on-site pre-award survey of all of the contractor's and any subcontractor's computer, printing, inserting, and mailing equipment which will be used on this contract or to require other evidence of technical, production, managerial, financial, and similar abilities to perform, prior to the award of a contract.

The preaward survey will include a review of all subcontractors involved, along with their specific functions; and the contractor's/subcontractor's mail, material, personnel, production, quality control/recovery program, security, and backup facility plans as required by this specification.

If award is predicated on the purchase of production and/or systems equipment, the contractor must provide purchase order(s) with delivery date(s) of equipment to arrive, be installed, and be fully functional at least 90 calendar days prior to the start of live production.

If the Government, during the preaward survey, concludes that the contractor does not or cannot meet all of the requirements as described in this contract, the contractor will be declared non-responsive.

Preaward Production Plans – The contractor must present, in writing, to the Contracting Officer within five (5) workdays of being notified to do so by the Contracting Officer or his/her representative, detailed plans for each of the following activities. The workday after notification to submit will be the first day of the schedule. If the Government requests additional information after review of plans, the contractor must submit updated plans within two (2) workdays of request.

If the contractor intends to use multiple plants, the production plans must indicate which plants will be used and the quantity to be produced in each plant. This requirement applies to all security requirements, tests, and live production. If the contractor intends to change processes described in the production plans during the term of the contract, they must provide updated plans to SSA/GPO for review and approval prior to implementing any changes.

Option Years - For each option year that may be exercised, the contractor will be required to review their production plans and re-submit in writing the above plans detailing any changes and/or revisions that may have occurred. The revised plans are subject to Government approval. The revised plans must be submitted to the Contracting Officer or his/her representative within five (5) workdays of notification of the option year being exercised.

NOTE: If there are no changes/revisions, the contractor will be required to submit to the Contracting Officer or his/her representative a statement confirming that the current plans are still in effect.

THESE PROPOSED PLANS ARE SUBJECT TO REVIEW AND APPROVAL BY THE GOVERNMENT, AND AWARD WILL NOT BE MADE PRIOR TO APPROVAL OF SAME. THE GOVERNMENT RESERVES THE RIGHT TO WAIVE SOME OR ALL OF THESE PLANS.

Backup Facility – The failure to deliver these notices in a timely manner would have an impact on the daily operations of SSA. Therefore, if for any reason(s) (Act of God, labor disagreements, etc.) the contractor is unable to perform at said locations for a period longer than two (2) workdays, the contractor must have a backup facility with the capability of producing the products required under this specification.

Plans for their contingency production must be prepared and submitted to the Contracting Officer as part of the pre-award survey. These plans must include the location of the facility to be used, equipment available at the facility, security plans at the facility, and a timetable for the start of production at that facility.

Part of the plans must also include the transportation of Government materials from one facility to another.

SSA has the option to install a VPN into the contractor's backup facility.

NOTE: All terms and conditions of this contract will apply to the backup facility. Due to the sensitive nature of the notices produced on this contract, the contractor must maintain the original schedule set forth in this contract.

Quality Control Plan – The contractor must provide and maintain, within their organization, an independent quality assurance organization of sufficient size and expertise to monitor the operations performed and inspect the products of each operation to a degree and extent that will ensure the Government's quality assurance, inspection, and acceptance provisions specified herein are met.

The contractor must perform, or have performed, the process controls, inspections, and tests required to substantiate that the products provided under this contract conform to the specifications and contract requirements. The contractor must describe in detail their quality control/quality assurance and recovery plans describing how, when, and by whom the plans will be performed.

The quality control plan must also include examples and a detailed description of all quality control samples and their corresponding inspection reports or logs the contractor will keep to document the quality control inspections performed on each run. Furthermore, the plan must include the names of all quality assurance officials and describe their duties in relationship to the quality control plan.

The quality control plan must account for the number of pieces mailed daily, and must also cover the security over the postage meters, as well as the controls for the setting of the meters (if meters will be used).

Quality Control Sample Plan – The plan must provide a description of how the contractor will create quality control samples for periodic samplings to be taken during the production run, provide for backup and rerunning in the event of an unsatisfactory sample, and contain control systems that will detect defective, missing, or mutilated pieces. The plan should include the sampling interval the contractor intends to utilize. The contractor will be required to create two (2) quality control samples every 4,000 notices. Mailers with low volumes (less than 4,000) will require at least one (1) set of samples to be produced. The samples are to be drawn from the production stream at the same time:

- One (1) sample will be drawn, inspected, and retained as part of the contractor’s quality assurance records.
- One (1) sample will be drawn for the Social Security Administration and packed with associated pieces from each print order and shipped to Social Security Administration, Division of Printing Management, Attn: Kate Schmidt, 1369 Annex Building, 6401 Security Boulevard, Baltimore, MD 21235-6401.

Samples must be bulk shipped back to SSA weekly for each print order. The contractor must ship the quality control samples for a particular print order within two (2) workdays of the last mailing date of that print order.

The plans must detail the actions to be taken by the contractor when defective, missing, or mutilated items are discovered. These actions must be consistent with the requirements found in GPO Contract Terms (GPO Publication 310.2, effective December 1, 1987, (Rev 1-18)).

The plan must monitor all aspects of the job including material handling and mail flow to assure the production and delivery of these notices meet specifications and Government requirements.

This includes maintaining 100% accountability in the accuracy of imaging and mailing of all pieces throughout each run. The contractor must ensure that there are no missing or duplicate pieces.

Contractor must submit samples of the automated 100% Accountability Audit and Summary Reports.

The contractor must maintain quality control samples, inspection reports, and records for a period of no less than 210 calendar days subsequent to the date of the check tendered for final payment by the Government Publishing Office. The Government will periodically verify that the contractor is complying with the approved quality control plan through on-site examinations and/or requesting copies of the contractor’s quality assurance records and quality assurance random copies.

Computer System Plan – This plan must include a detailed listing of the contractor’s operating software platform and file transfer system necessary to interface with SSA’s National File Transfer Management System (FTMS) for electronic transmission of files from SSA. The plan must also include the media type on which files from SSA will be received to the extent that operator intervention (e.g., a tape mount) is not required at SSA or the contractor’s production facility.

This plan must demonstrate the contractor’s ability to provide complete hardware and software compatibility with SSA’s existing network (see “FILE TRANSFER MANAGEMENT SYSTEM (FTMS) REQUIREMENTS” and “TRANSMISSION TESTS” for additional information).

The contractor must complete a System Plan. (See Exhibit M.)

Included with the Computer System Plan must be a resume for each employee responsible for the monitoring and the programming of the contractor’s computer system and file transmissions. If the contractor plans to use a consultant for either task, a resume must still be included. This plan must show that the programmer(s) is skilled in the handling and programming of Advanced Function Presentation (Mixed Mode or Fully Composed) resources and files.

Mail Plan – This plan should include sufficient detail as to how the contractor will comply with all applicable U.S. Postal Service (USPS) mailing requirements as listed in the USPS Domestic and International Mail Manuals in effect at the time of the mailing and other USPS instructional material such as the Postal Bulletin. The contractor must also disclose how they will achieve multi-level USPS automated presort postal discounts as outlined in the contract.

Material Handling and Inventory Control Plan – This plan should explain in detail how the following materials will be handled: incoming raw materials; work-in-progress materials; quality control inspection materials; USPS inspection materials; and all outgoing materials cleared for USPS pick-up/delivery.

Personnel Plan – In conjunction with the required applicant listing (see “SECURITY AND SUITABILITY REQUIREMENTS FOR GOVERNMENT PRINTING”), this plan should include a listing of all personnel who will be involved with this contract. For any new employees, the plan should include the source of these employees and a description of the training programs the employees will receive to familiarize them with the requirements of this program.

Production Plan – The contractor is to provide a detailed plan of the following:

- (a) List of all production equipment and equipment capacities to be utilized on this contract;
- (b) The production capacity currently being utilized on this equipment;
- (c) Capacity that is available for these workloads; and,
- (d) If new equipment is to be utilized, documentation of the purchase order, source, delivery schedule, and installation dates are required.

The contractor must disclose in their production plan their intentions for the use of any subcontractors for any materials necessary under this contract. If a subcontractor will be handling SSA notices, the plan must include the same information required from the contractor for all items contained under “SECURITY REQUIREMENTS” and “PREAWARD SURVEY.” If a subcontractor for any operation is added at any time after award, the contractor must submit the subcontractor’s proposed plans which are subject to review and approval by the Government.

NOTE: The subcontractor must be approved by the Government prior to production starting in that facility. If the subcontractor is not approved by the Government, then the contractor has 15 calendar days prior to production to submit to the Government the new subcontractor’s information.

Security Control Plan - The contractor must maintain in operation, an effective security system where items by these specifications are manufactured and/or stored (awaiting distribution or disposal) to assure against theft and/or the product ordered falling into unauthorized hands.

Contractor is cautioned that no Government provided information shall be used for non-Government business. Specifically, no Government information shall be used for the benefit of a third party.

The Government retains the right to conduct on-site security reviews at any time during the term of the contract.

The plan must contain at a minimum:

- How Government files (data) will be secured to prevent disclosure to a third party.
- How the disposal of waste materials will be handled.
- How all applicable Government-mandated security/privacy/rules and regulations as cited in this contract must be adhered to by the contractor and/or subcontractor(s).
- How contractors classified as Cloud Service Providers (CSP) will adhere to additional FedRAMP security control requirements. CSPs must have a security control assessment performed by a Third Party Assessment Organization (3PAO). Additional information is also available at:
<http://www.gsa.gov/portal/category/102371>.

- The contractor shall submit a System Security Plan (SSP), which documents how the solution implements security controls in accordance with the designated FIPS 199 security categorization and the Minimum Security Requirements for Federal Information and Information Systems. This SSP requires the use of NIST SP 800-53, or the contractor shall provide a Security Assessment Package (SAP) completed by either an independent assessor or another Federal agency.

Materials – The contractor is required to explain how all accountable materials will be handled throughout all phases of production.

Production Area – The contractor must provide a secure area(s) dedicated to the processing and storage of data for SSA notices, either a separate facility dedicated to this product, or a walled-in limited access area within the contractor's existing facility. Access to the area(s) must be limited to security-trained employees involved in the production of notices.

Part of the Production Area Plan must include a floor plan detailing the area(s) to be used, showing existing walls, equipment to be used, and the printing and finishing locations.

Contractor must have, in place, a building security system that is monitored 24 hours a day, seven (7) days a week, and a badging/keypunch system that limits access to Government materials (data processing center/production facility and other areas where Government materials with PII are stored or are accessible) that is only accessible by approved personnel. Contractor must present this information, in detail, in the production area plan.

Disposal of Waste Materials – The contractor is required to demonstrate how all waste materials used in the production of sensitive SSA records will be definitively destroyed (e.g., burning, pulping, shredding, macerating, or other suitable similar means). Electronic records must be definitively destroyed in a manner that prevents reconstruction. *Definitively* destroying the records means the material cannot be reassembled and used in an inappropriate manner in violation of law and regulations. *Sensitive* records are records that are national security classified or exempted from disclosure by statute, including the Privacy Act or regulation.

The contractor, at a minimum, must crosscut shred all documents into squares not to exceed 1/4". All documents to be destroyed cannot leave the security of the building and must be destroyed at contractor's printing site. The contractor must specify the method planned to dispose of the material. Subcontracting is not allowed.

UNIQUE IDENTIFICATION NUMBER: Unique identification numbers will be used to track each individual notice, thereby providing 100% accountability. This enables the contractor to track each notice through completion of the project. The contractor will be required to create a test sample every 4,000 notices. Each file must have a minimum of one (1) test sample. This sample must have a unique number and must be produced on each notice. The contractor will generate a list of the unique identifying numbers for each sample. As samples are pulled, the unique numbers will be marked off the list. This enables the contractor to track which samples have been produced and pulled and what records have been produced. The contractor may create their own sequence number and run date to facilitate their presorting and inserting process but must maintain the original SSA identification number.

RECOVERY SYSTEM: A recovery system will be required to ensure that all defective, missing, or mutilated pieces detected are identified, reprinted, and replaced. The contractor's recovery system must use the unique alpha/numeric identifiers assigned to each piece (including quality control samples) to aid in the recovery and replacement of any defective, missing, or mutilated pieces, and must be capable of tracking and/or locating any individual piece of mail from the time it leaves the press, up to and including when it is off-loaded at the USPS facility. An explanation of the contractor's sequential numbering system is required to understand the audit trail required for each and every piece.

100% ACCOUNTABILITY OF PRODUCTION AND MAILING: Contractor must have a closed loop process* to determine that the data from the original print file is in the correct envelope with the correct number of pages and inserts. Notices requiring print regeneration must be reprinted from their original print image with the original job ID and piece ID remaining unchanged as each mail piece continues through the inserting life cycle. This process will repeat itself (since subsequent reprint runs may yield damages) until all mail pieces from the original print run have been inserted and accounted for.

***Closed Loop Processing** - A method for generating a plurality of mail pieces including error detection and reprinting capabilities. The method provides a mail handling process which tracks processing errors with the use of a first and second scan code which obtain information regarding each mail piece, diverts mail pieces in response to error detection, transmits such errors to a processor, and automatically generates a reconfigured print file to initiate reprints for the diverted mail pieces.

Contractor will be responsible for providing a unique identifying number that will be used to track each individual notice, thereby providing **100% accountability and validating the integrity of every notice produced** in all phases of printing, inserting, and mailing and to ensure all notices received from SSA were correctly entered into the U.S. postal system.

NOTE: Contractor must have all hardware, programming, and finalized reports in place to meet this requirement. The equipment must arrive at least 90 calendar days prior to the start of live production, on July 1, 2019. Contractor must submit a sample of their proposed Audit and Summary reports with the required preaward production plans for approval. The Government considers grounds for the immediate default of this contract if the contractor, at any time, is unable to perform or found not complying with any part of this requirement.

Notice integrity must be defined as follows:

- Each notice must include all pages (and only those pages) intended for the designated recipient as contained in the print files received from SSA.
- The contractor's printing process must have automated systems which can detect all sync errors, stop printing when detected, and identify, remove, and reprint all effected notices.

Mailing integrity must be defined as follows:

- All notices received from SSA for each file date were printed, inserted, and entered correctly into the United States postal system.

The contractor is responsible for providing the *automated* inserted notice tracking/reporting systems and processes required to validate that 100% of all notices received from SSA were printed, all pages for each notice with the correct inserts are accounted for, inserted, and mailed correctly.

The contractor's inserting equipment must have automated systems that include notice coding and scanning technology capable of:

- (a) Uniquely identifying each notice and corresponding notice leaves within each individual file by mailer number and file date.
- (b) Unique identifier to be scanned during insertion to ensure all notices and corresponding notice leaves are present and accounted for.

- (c) Entrance Scanning: A camera system must electronically track and scan all leaves of each mail piece as the inserting equipment pulls them into the machine to ensure each mail piece was produced and inserted. If there is any variance on a mail piece or if a mail piece is not verified that all leaves are present, that piece and the piece prior to and immediately following must be diverted and sent back for reprint. All instances of variance must be logged.
- (d) Touch and Toss: All spoilage, diverted, mutilated, or mail pieces that are acted upon directly by a human hand prior to sealing must be immediately recorded, discarded, properly destroyed, and automatically regenerated in a new print file for reprint. *Exception* – Intentionally diverted pieces due to a requirement for a product, which cannot be intelligently inserted and requires manual insertion such as a publication, can be sealed, re-scanned and placed back into production. These must be programmed diverts and sent to a separate bin for processing to ensure they are not mixed with other problem diverts and logged into the Audit system as such.
- (e) Exit Scanning: A camera system must be mounted just aft of the inserting equipment. This camera system must read a unique code through the window of each mail piece and be capable of identifying and reporting all missing notices that were lost or spoiled during production for each individual file by mailer number and file date. This system ensures that no missing mail pieces have been inadvertently inserted into another mail piece. The equipment must check the mail pieces, after insertion, verify that all leaves are accounted for, and divert any suspect product. During exit scanning, if a sequence number is missing, the notice prior to and immediately after must be diverted. The equipment must divert all products that exhibit missing or out of order sequence numbers and any other processing errors. All diverted pieces are to be automatically recorded and regenerated in a new print file for reprint.
- (f) Reconciliation: All notices and the amount of correct finished product must be electronically accounted for after insertion through the use of the audit system that is independent of the inserting equipment as well as independent of the operator. The sequence numbers, for each file, must be reconciled; taking into account any spoilage, duplicate, and/or diverted product. If the reconciliation yields divergent results, corrective action must be taken to locate the mail pieces that are causing any difference between the input and outputs of the inserting process. Therefore, all finished mail for that sequence run must be held in an accessible area until this reconciliation is complete.
- (g) Generate a new production file for all missing, diverted, or mutilated notices (reprint file).
- (h) Contractor must generate an automated audit report from the information gathered from scanning for each mailer number, file date, and for each notice (manual inputs are not allowed). This audit report will contain detailed information for each notice as outlined above for each individual file by mailer number and file date. Contractor must maintain this information for 210 calendar days after mailing.
- (i) Audit report must contain the following information:
 - 1. Job name
 - 2. Mailer number, file date, and mail date(s)
 - 3. Machine ID
 - 4. Date of production with start and end time for each phase of the run (i.e., machine ID).
 - 5. Start and end sequence numbers in each run
 - 6. Status of all sequence numbers in a run
 - 7. Total volume in run
 - 8. Status report for all incidents for each sequence number and cause (i.e., inserted, diverted, and reason for divert such as missing sequence number, missing leaves, mutilated, duplicate, pulled for inspection, etc.)
 - 9. Bottom of audit report must contain total number of records for that run, quantity sent to reprint, number of duplicates, duplicates verified and pulled, total completed.

10. Audit report must contain the same information for all the reprints married with this report as listed above showing that all pieces for each mailer number and file date are accounted for.

See Exhibit N: 100% Accountability Audit and Summary Report

- (j) Contractor must generate a **final automated 100% accountability summary report** for each individual file by mailer number and file date. This information must be generated directly from the audit report (manual inputs are not allowed). The summary report must contain the following (See Exhibit N: 100% Accountability Audit and Summary Report):
 1. Job information - Job name, file date, Mailer number, piece quantity, sequence start and end number, if multiple batches for a single file include number of batches and batch number (i.e., 1 of 4, due date, etc.).
 2. Job Start Time and Job End Time
 3. Volume of sequence numbers associated with an individual file by mailer number and file date that were inserted and date completed
 4. Volume of reprints that were inserted for each file date and when completed.
 5. Total volume inserted for each file date and final date and time that each batch was completed.

A PDF copy of the summary report(s) and matching USPS Certificate of Bulk Mailing, USPS 3607R, and/or GPO 712 form(s) must be submitted to Kate Schmidt at Kathryn.Schmidt@ssa.gov for each file date within two (2) workdays of mailing.

Contractor must submit a sample of their Audit and Summary reports (see Exhibit N) with the required preaward production plans for Government review and approval. The audit team must approve the audit and summary reports prior to award. During the term of the contract NO changes are to be made to the approved audit and summary reports without prior approval from the audit team. The contractor must submit in writing a request to make changes to the audit and summary reports, along with samples of the proposed audit and summary reports for review and approval.

Contractor must generate an automated audit report when necessary showing the tracking of all notices throughout all phases of production for each mail piece. This audit report will contain all information as outlined in item (i) above. Contractor is required to provide any requested Summary and/or Audit reports within one (1) hour of a request via email in an MS Word, MS Excel, or PDF file to Jamey Cunningham at Jamey.Cunningham@ssa.gov.

NOTE: The Government reserves the right to conduct an audit at any time during the term of the contract. The audit team will provide the contractor a minimum of 24-hour notice prior to audit. If the contractor produces multiple SSA contracts, the audit team will provide a list of contracts and print orders that they will require full audit reports, summary reports, and postal documentation for during the audit. The contractor must provide the required audit reports within one (1) hour of request. The audit team will grant one (1) hour for each report to be pulled. The audit team may request a full tour and demonstration of the accountability process at the time of the audit. A wrap-up meeting will occur at the conclusion of the audit. The audit team will review their findings with the contractor at this time. The contractor will need to provide, in writing, responses to all findings, questions, and concerns within one (1) week of the wrap-up meeting. The Government considers grounds for the immediate default of this contract if the contractor, at any time, is unable to perform or found not in compliance with any part of this requirement.

All notice tracking/reporting data must be retained in electronic form for 210 calendar days after mailing and must be made available to SSA for auditing of contractor performance upon request.

NOTE: The Government will not as a routine matter request the contractor produce individual pieces in transit within the plant, however, the contractor must demonstrate they will have an audit trail established that has the ability to comply with this type of request if and when the need arises.

REQUEST FOR NOTICE PULLS FROM PRODUCTION: Due to the sensitivity of notices in this contract, the Government may request that the contractor remove individual notices from the production stream. When this occurs, the Government will supply the contractor with a list of notices to be pulled. The list will contain the name and address that appears in the Mail Run Data (MRD) file to identify the notices. The contractor must be able to run a sort to find and eliminate the notice from the production run. If the list is provided after the notice had been produced, the contractor must be capable of identifying the notice and pulling it from the production floor.

ON-SITE REPRESENTATIVES: One (1) or two (2) full-time Government representatives may be placed on the contractor's premises on a limited basis or throughout the term of the contract.

The contractor will be required to provide one private office of not less than 150 square feet, furnished with at least one desk, two swivel arm chairs, secure internet access for Government laptop computers, a work table, and two 4-drawer, letter-size file cabinets with combination padlock, and pendaflex file folders, or equal.

On-site representative(s) may be stationed at the contractor's facility to: provide project coordination in receipt of transmissions; verify addresses; monitor the printing, folding, inserting, mail processing, quality control, sample selections, and inspections; and monitor the packing and staging of the mail.

These representatives will not have contractual authority, and cannot make changes in the specifications or in contract terms, but will bring any and all defects detected to the attention of the company Quality Control Officer. The representatives must have full and unrestricted access to all production areas where work on this program is being performed.

POSTAWARD CONFERENCE: The total requirements of the job as indicated in these specifications will be reviewed by Government representatives with the contractor's representatives at the Social Security Administration, Baltimore, MD, immediately after award. At the Government's option, the postaward conference may be held via teleconference.

Person(s) that the contractor deems necessary for the successful implementation of the contract must be in attendance.

PREPRODUCTION MEETING: A preproduction meeting covering printing, imaging, folding, inserting, and mailing must be held at the contractor's facility after award of the contract to review the contractor's production plan and to establish coordination of all operations. Attending this meeting will be representatives from the Government Publishing Office, Social Security Administration, and the U.S. Postal Service. The contractor must present and explain their final plan for printing, imaging, folding, inserting, and mailing.

The contractor must meet with SSA Division of Mail and Postage Policy (DMPP) and USPS representatives to present and discuss their plan for mailing. The preproduction meeting will include a visit to the contractor's mailing facility, where the contractor is to furnish specific mail flow information.

The contractor must present documentation of the plant loading agreement and either a copy of the optional procedure, which has been negotiated with the USPS or a draft of the original procedure that the contractor intends to negotiate with the USPS for SSA approval. The contractor also needs to present SSA with a copy or a draft of the manifest (tracking system) to be used to accomplish the above.

In addition, the contractor shall be prepared to present detailed production plans, including such items as quality assurance, projected commencement dates, equipment loading, pallet needs, etc.

The contractor is to provide the name of the representative responsible for the mailing operation and that individual's backup.

Person(s) that the contractor deems necessary for the successful implementation of the contract must be in attendance.

THE GOVERNMENT RESERVES THE RIGHT TO WAIVE THE PREPRODUCTION MEETING.

ASSIGNMENT OF JACKETS, PURCHASE, TASK AND PRINT ORDERS: A GPO jacket number will be assigned and a purchase order issued to the contractor to cover the work performed. The purchase order will be supplemented by an individual daily electronic "Task Order" for each job placed with the contractor. A print order will be issued weekly and will indicate the quantity to be produced and any other information pertinent to the order.

ORDERING: Items to be furnished under the contract must be ordered by the issuance of weekly print orders supplemented by daily electronic task orders. Orders may be issued under the contract from **Date of Award** through **October 31, 2020** plus for such additional periods as the contract is extended. All print orders and task orders issued hereunder are subject to the terms and conditions of the contract. The contract shall control in the event of conflict with any print order or task order.

Task orders will be "issued" daily for purposes of the contract and will detail the daily volume of notices required. A print order (GPO Form 2511) to be used for billing purposes will be issued weekly and will cover all daily task orders issued that week. A print order or task order shall be "issued" upon notification by the Government for purposes of the contract when it is electronically transmitted or otherwise physically furnished to the contractor in conformance with the schedule.

REQUIREMENTS: This is a requirements contract for the items and for the period specified herein. Shipment/delivery of items or performance of work shall be made only as authorized by orders issued in accordance with the clause entitled "ORDERING." The quantities of items specified herein are estimates only, and are not purchased hereby. Except as may be otherwise provided in this contract, if the Government's requirements for the items set forth herein do not result in orders in the amounts or quantities described as "estimated," it shall not constitute the basis for an equitable price adjustment under this contract.

Except as otherwise provided in this contract, the Government shall order from the contractor all the items set forth which are required to be purchased by the Government activity identified on page 1.

The Government shall not be required to purchase from the contractor, requirements in excess of the limit on total orders under this contract, if any.

Orders issued during the effective period of this contract and not completed within that time must be completed by the contractor within the time specified in the order, and the rights and obligations of the contractor and the Government respecting those orders shall be governed by the terms of this contract to the same extent as if completed during the effective period of this contract.

If shipment/delivery of any quantity of an item covered by the contract is required by reason of urgency prior to the earliest date that shipment/delivery may be specified under this contract, and if the contractor will not accept an order providing for the accelerated shipment/delivery, the Government may procure this requirement from another source.

The Government may issue orders which provide for shipment/delivery to or performance at multiple destinations.

Subject to any limitations elsewhere in this contract, the contractor shall furnish to the Government all items set forth herein which are called for by print orders issued in accordance with the "ORDERING" clause of this contract.

PRIVACY ACT NOTIFICATION: This procurement action requires the contractor to do one or more of the following: design, develop, or operate a system of records on individuals to accomplish an agency function in accordance with the Privacy Act of 1974, Public Law 93-579, December 31, 1974 (5 U.S.C. 552a) and applicable agency regulations. Violation of the Act may involve the imposition of criminal penalties as stated in 5 U.S.C. 552a (i)(1) CRIMINAL PENALTIES. It is incumbent upon the contractor to inform its officers and employees of the penalties for improper disclosure imposed by the Privacy Act of 1974, 5 U.S.C. 552a, specifically, 5 U.S.C. 552a (i)(1) CRIMINAL PENALTIES and m(1) GOVERNMENT CONTRACTORS.

PRIVACY ACT

(a) The contractor agrees:

- (1) to comply with the Privacy Act of 1974 and the rules and regulations issued pursuant to the Act in the design, development, or operation of any system of records on individuals in order to accomplish an agency function when the contract specifically identifies (i) the system or systems of records and (ii) the work to be performed by the contractor in terms of any one or combination of the following: (A) design, (B) development, or (C) operation;
- (2) to include the solicitation notification contained in this contract in every solicitation and resulting subcontract and in every subcontract awarded without a solicitation when the statement of work in the proposed subcontract requires the design, development, or operation of a system of records on individuals to accomplish an agency function; and
- (3) to include this clause, including this paragraph (3), in all subcontracts awarded pursuant to this contract which require the design, development, or operation of such a system of records.

(b) In the event of violations of the Act, a civil action may be brought against the agency involved where the violation concerns the design, development, or operation of a system of records on individuals to accomplish an agency function, and criminal penalties may be imposed upon the officers or employees of the agency where the violation concerns the operation of a system of records on individuals to accomplish an agency function. For purposes of the Act when the contract is for the operation of a system of records on individuals to accomplish an agency function, the contractor and any employee of the contractor is considered to be an employee of the agency.

(c) The terms used in this clause have the following meanings:

- (1) "Operation of a system of records" means performance of any of the activities associated with maintaining the system of records including the collection, use, and dissemination of records.
- (2) "Record" means any item, collection or grouping of information about an individual that is maintained by an agency, including, but not limited to, his education, financial transactions, medical history, and criminal or employment history and that contains his name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph.
- (3) "System of records" on individuals means a group of any records under the control of any agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual.

PAYMENT: Submitting invoices for payment via the GPO fax gateway (if no samples are required) utilizing the GPO barcode coversheet program application is the most efficient method of receiving payment. Instruction for using this method can be found at the following web address:

<http://winapps.access.gpo.gov/fms/vouchers/barcode/instructions.html>.

Invoices may also be mailed to: U.S. Government Publishing Office, Office of Financial Management, Attn: Comptroller, Stop: FMCE, Washington, DC 20401.

For more information about the billing process, refer to the General Information of the Office of Finance web page located at: <http://www.gpo.gov/finance/index.htm>.

Contractor's billing invoice must be itemized in accordance with the items in the "SCHEDULE OF PRICES."

SECTION 2. - SPECIFICATIONS

SCOPE: These specifications cover the production of mailing packages from five (5) workloads, consisting of English and Spanish/English personalized notices; English form inserts; English and Spanish publication inserts; mailout envelopes; Business Reply Mail (BRM) envelopes and Courtesy Reply Mail (CRM) envelopes; requiring such operations as: the receipt and processing of electronically transmitted data; re-development of Advanced Function Presentation (Mixed Mode or Fully Composed) resources; composition; printing/imaging; dating of form inserts; binding; construction; inserting; presorting; and distribution.

*The five workloads identified thus far are as follows:

1. MADCAP
2. MCS
3. SSA-L991
4. TASTE
5. TATTER

Future Workloads (during term of the contract) – During the term of this contract, the Government anticipates developing new notice workloads with the same requirements as the notice workload described by these specifications. All terms and conditions in this specification will apply to these future notice workloads. It is estimated that approximately one (1) to three (3) new notice workloads may be added during the term of this contract. The file names for each new notice workload will be supplied to the contractor as they are developed.

FREQUENCY OF ORDERS AND QUANTITY: An electronic task order will be issued daily, Tuesday through Saturday. A print order will be issued weekly.

Separate print orders will be issued for the composition and proofs (after award), and for the preproduction validation tests (after award).

Combined yearly total for all mailers will be approximately 10,800,000 notices per year.

The estimated annual quantity for the daily MADCAP notices is 1,500,000, MCS notices is 7,000,000, SSA-L991 notices is 1,100,000, TASTE notices is 1,000,000, and TATTER notices is 200,000.

The Government reserves the right to increase or decrease by up to and including 25% of the total number of notices ordered annually.

NUMBER OF PAGES AND TRIM SIZES:

<u>Item</u>	<u>No. of Pages</u>	<u>Trim Size</u>
Notice	1 to 24	8-1/2 x 11"
Form CMS-2690	Face and back	8-1/2 x 3-1/2"
Form SSA-3105	Face and back	10-1/2 x 8" flat size
Booklet:		
SSA Publication No. 05-10137	40 pages	3-1/2 x 8"
SSA Publication No. 05-10138	40 pages	3-1/2 x 8"
SSA Publication No. 05-10095	24 pages	3-1/2 x 8"
SSA Publication No. 05-10076	24 pages	5-1/4 x 8"
SSA Publication No. 05-10077	32 pages	5-1/4 x 8"
SSA Publication No. 05-10153	28 pages	5-1/4 x 8"
SSA Publication No. 05-10903	28 pages	5-1/4 x 8"
SSA Publication No. 05-10976	24 pages	5-1/4 x 8"
SSA Publication No. 05-10977	36 pages	5-1/4 x 8"

<u>Item</u>	<u>No. of Pages</u>	<u>Trim Size</u>
Factsheet:		
SSA Publication No. 05-10007	Face and back	8-1/2 x 11" flat size
SSA Publication No. 05-10075	Face and back	8-1/2 x 11" flat size
SSA Publication No. 05-10975	Face and back	8-1/2 x 11" flat size
Leaflet:		
SSA Publication No. 05-10018	Face and back	10-1/2 x 8" flat size,
SSA Publication No. 05-10058	Face and back	14 x 8" flat size
SSA Publication No. 05-10072	Face and back	14 x 8" flat size
SSA Publication No. 70-10281	Face and back	17-1/2 x 8" flat size
SSA Publication No. 05-10972	Face and back	17-1/2 x 8" flat size
SSA Publication No. 70-10283	Face and back	21 x 8" flat size
Green BRM Envelopes	Face and back	3-7/8 x 8-7/8", plus 1-1/2" flap
White BRM Window Envelopes	Face and back	3-7/8 x 8-11/16", plus 1-1/2" flap
CRM Envelopes	Face and back	3-7/8 x 8-7/8", plus 1-1/2" flap
Mailout Envelopes	Face and back	4-1/8 x 9-1/4", plus flap
	Face and back	4-1/8 x 9-1/2", plus flap
	Face and back	6-1/8 x 9-1/2", plus flap

NOTE: All envelopes are face and back (after manufacturing).

MAKE-UP OF MAILERS: A record will be transmitted for each mailing address. The records will contain all the data relevant for the mailing of an associated mail piece. Unique alpha/numeric identifiers will be part of the record to ensure accuracy in the insertion process. All files transmitted by SSA will be physical sequential Advanced Function Presentation (AFP) Mixed Mode. The agency may transition to Advanced Function Presentation (AFP) Fully Composed during this contract. Any alteration of the notice content in the file is not permitted.

The figures indicated below are estimates that are based on historical data of past production runs. The figures show the minimum and maximum daily or monthly quantities for the notices; as well as the number of printed pages in a notice (notices are duplex printed, and one-side only when an odd page is required), inserts (items that are to be inserted into the mailout envelope along with the notice), and how the notice is to be folded. Exact quantities will not be known until each run is electronically transmitted to the contractor. **NO SHORTAGES WILL BE ALLOWED.**

FOR QUALITY CONTROL AND AUDITING PURPOSES: The contractor must not merge file dates and mailers during processing, printing, and mailing. Any alteration of the notice content in the file is not permitted.

MADCAP and MCS NOTE: MADCAP and MCS files can contain third party notices. The third party notice copy is an exact copy of the original notice with a coversheet containing the name and address of a third party designated by the beneficiary (such as, an attorney, a representative for the beneficiary (Rep Payee), or others). The original MADCAP notice is also in a file, which is printed separately.

NOTICES: Notices ordered under this contract will range from 1 to 24 printed pages (per notice). See the following for page counts of each mailer.

MADCAP: There are two MADCAP mailers. MADCAP Mailer 1 notices are considered English but contain English only notices or English notices with the first few paragraphs in Spanish. Mailer 2 is a Spanish/English mailer. This mailer consists of two parts: The first part is the Spanish notice; the second part is the same notice in English. Notices will consist of 1 to 14 pages. Mailers may generate any combination of components below.

Mailer 1: Data Set Name: OLBG.BTI.vendor.MDCAFP.M1#aaaaa.RYYMMDD
 Daily Minimum: 1,900
 Daily Maximum: 11,000
 Approximate Daily Average: 5,850
 Printed Notice Pages: 1 to 10
 Personalized English Notice
 Mailout Envelope (6-1/8 x 9-1/2")
 Inserts: Form CMS-2690
 Form SSA-3105
 Green BRM Envelope
 CRM Envelope
 SSA Publication No. 05-10018
 SSA Publication No. 05-10072
 SSA Publication No. 05-10076
 SSA Publication No. 05-10077
 SSA Publication No. 05-10137
 SSA Publication No. 05-10153
 SSA Publication No. 70-10281
 Folding: Bifold

Mailer 2: Data Set Name: OLBG.BTI.vendor.MDCAFP.M2#aaaaa.RYYMMDD
 Daily Minimum: 35
 Daily Maximum: 1,000
 Approximate Daily Average: 200
 Printed Notice Pages: 1 to 14
 Personalized Spanish/English Notice
 Mailout Envelope (6-1/8 x 9-1/2")
 Inserts: Form CMS-2690
 Form SSA-3105
 Green BRM Envelope
 CRM Envelope
 SSA Publication No. 05-10018
 SSA Publication No. 05-10072
 SSA Publication No. 05-10076
 SSA Publication No. 05-10077
 SSA Publication No. 05-10137
 SSA Publication No. 05-10138
 SSA Publication No. 05-10153
 SSA Publication No. 70-10281
 SSA Publication No. 05-10903
 SSA Publication No. 05-10972
 SSA Publication No. 05-10976
 SSA Publication No. 05-10977
 SSA Publication No. 70-10283
 Folding: Bifold

MCS: The MCS mailers are divided into two (2) categories by data set names. These mailers are English only, or English containing a Spanish Cover Letter, or Spanish/English Bilingual. Notices will consist of 1 to 24 pages. The notices are represented by the following data set names. Mailers may generate any combination of the components listed below:

Mailer 3: Data Set Name: OLBG.BTI.vendor_id.MCSAFP.M3#aaaaa.Ryymmdd
 Daily Minimum: 6,100
 Daily Maximum: 73,000
 Approximate Daily Average: 27,000
 Printed Notice Pages: 1 to 12
 Personalized Notice (English Only and English with Spanish Cover Letter)
 Mailout Envelope (6-1/8 x 9-1/2")
 Inserts: Form CMS-2690
 CRM Envelope
 SSA Publication No. 05-10007
 SSA Publication No. 05-10018
 SSA Publication No. 05-10072
 SSA Publication No. 05-10075
 SSA Publication No. 05-10076
 SSA Publication No. 05-10077
 SSA Publication No. 05-10137
 SSA Publication No. 05-10153
 SSA Publication No. 70-10281
 Folding: Bifold

Mailer 4: Data Set Name: OLBG.BTI.vendor_id.MCSAFP.M4#aaaaa.Ryymmdd
 Daily Minimum: 225
 Daily Maximum: 2,100
 Approximate Daily Average: 1,200
 Printed Notice Pages: 1 to 24
 Personalized Notice (Spanish/English Bilingual)
 Mailout Envelope (6-1/8 x 9-1/2")
 Inserts: Form CMS-2690
 CRM Envelope
 SSA Publication No. 05-10007
 SSA Publication No. 05-10018
 SSA Publication No. 05-10138
 SSA Publication No. 05-10903
 SSA Publication No. 05-10972
 SSA Publication No. 05-10975
 SSA Publication No. 05-10976
 SSA Publication No. 05-10977
 SSA Publication No. 70-10283
 Folding: Bifold

SSA-L991: The SSA-L991 mailers are English only notices represented by the following data set names. Notices will consist of 1 to 4 pages. All mailers will consist of components below.

Mailer 5: Data Set Name: OLBG.BTI.vendor.L99AFP.M51aaaaa.RYYMMDD
 Daily Minimum: 800
 Daily Maximum: 7,100

Approximate Daily Average: 4,500
Printed Notice Pages: 1 to 4
Personalized English Notice
Mailout Envelope (4-1/8 x 9-1/4")
Inserts: None
Folding: Trifold

TASTE: The TASTE mailers are divided into three (3) notice categories by data set names. The notices contained within these mailers carry the form numbers SSA-1076, SSA-1372-BK, SSA-1372-BK-FC, and SSA-1387. Notices can consist of 1 to 10 pages. These mailers may generate any combination of components listed below:

Mailer 6: Data Set Name: OLBG.BTI.vendor.S76AFP.M61aaaa.Rmmyy
OLBG.BTI.vendor.S76AFP.M62aaaa.Rmmyy
OLBG.BTI.vendor.S76AFP.M63aaaa.Rmmyy
OLBG.BTI.vendor.S76AFP.M64aaaa.Rmmyy
Approximate Monthly Average: 3,000
Printed Notice Pages: 1
Personalized Notice
Mailout (Envelope 4-1/8 x 9-1/2")
Inserts: None
Folding: Trifold

Mailer 7: Data Set Name: OLBG.BTI.vendor.S72AFP.M71aaaa.Ryymm01
OLBG.BTI.vendor.S72AFP.M72aaaa.Ryymm01
Approximate Monthly Average: 37,000
Printed Notice Pages: 1 to 10
Personalized Notice
Mailout Envelope (4-1/8 x 9-1/2")
Inserts: White BRM Window Envelope
Folding: Trifold

Mailer 8: Data Set Name: OLBG.BTI.vendor.S87AFP.M81aaaa.Ryymm01
OLBG.BTI.vendor.S87AFP.M82aaaa.Ryymm01
Approximate Monthly Average: 37,000
Printed Notice Pages: 1
Personalized Notice
Mailout Envelope (4-1/8 x 9-1/2")
Inserts: None
Folding: Trifold

NOTE: Mailers 6, 7, and 8 typically transmit during the last week of the month. Frequently, they transmit on the same day, but occasionally, will transmit on different days.

TATTER: The TATTER mailers are divided into two (2) categories by data set names. Notices can consist of 1 to 10 pages. These mailers may generate any combination of components listed below:

Mailer 9: Data Set Name: OLBG.BTI.vendor.EPEAFP.M9#aaaa.Ryymmdd
Daily Minimum: 200
Daily Maximum: 4,300

Approximate Daily Average: 585
 Printed Notice Pages: 1 to 10
 Personalized Notice
 Mailout Envelope (6-1/8 x 9-1/2")
 Inserts: SSA Form SSA-3105
 Green BRM Envelope
 CRM Envelope
 SSA Publication No. 05-10076
 SSA Publication No. 05-10095
 Folding: Bifold

Mailer 10: Data Set Name: OLBG.BTI.vendor.TLCAFP.MA#aaaaa.Ryymmdd
 Daily Minimum: 25
 Daily Maximum: 250
 Approximate Daily Average: 150
 Printed Notice Pages: 1
 Personalized Notices
 Mailout Envelope (6-1/8 x 9-1/2")
 Inserts: SSA Publication No. 05-10058
 Folding: Bifold

NOTE: During the term of this contract, it is anticipated that SSA will require some of the mailers be sent certified or registered mail.

<u>FILE NAME</u>	<u>MAILER</u>	<u>DATA SET NAME*</u>
MADCAP	1	OLBG.BTI.vendor.MDCAFP.M1#aaaaa.Ryymmdd
	2	OLBG.BTI.vendor.MDCAFP.M2#aaaaa.Ryymmdd
MCS	3	OLBG.BTI.vendor.MCSAFP.M3#aaaaa.Ryymmdd
	4	OLBG.BTI.vendor.MCSAFP.M4#aaaaa.Ryymmdd
SSA-L991	5	OLBG.BTI.vendor.L99AFP.M51aaaaa.Ryymmdd
TASTE	6	OLBG.BTI.vendor.S76AFP.M61aaaaa.Rmmyy
		OLBG.BTI.vendor.S76AFP.M62aaaaa.Rmmyy
		OLBG.BTI.vendor.S76AFP.M63aaaaa.Rmmyy
		OLBG.BTI.vendor.S76AFP.M64aaaaa.Rmmyy
	7	OLBG.BTI.vendor.S72AFP.M71aaaaa.Ryymm01
	8	OLBG.BTI.vendor.S72AFP.M72aaaaa.Ryymm01
TATTER	9	OLBG.BTI.vendor.S87AFP.M81aaaaa.Ryymm01
	10	OLBG.BTI.vendor.S87AFP.M82aaaaa.Ryymm01
		OLBG.BTI.vendor.EPEAFP.M9#aaaaa.Ryymmdd
		OLBG.BTI.vendor.TLCAFP.MA#aaaaa.Ryymmdd

NEW NOTICES: The file names for each new notice workload will be supplied to the contractor as they are developed.

All of the data set names are not listed for each mailer. The "aaaaa" represents the unique job identifier that is assigned at run time. The "#" will be replaced with 1 through 8 for each of the Payment Service Centers. For example, there are 8 files (or data set names) for MADCAP Mailer 1 as follows:

OLBG.BTI.vendor.MDCAFP.M11aaaaa.Ryymmdd
 OLBG.BTI.vendor.MDCAFP.M12aaaaa.Ryymmdd
 OLBG.BTI.vendor.MDCAFP.M13aaaaa.Ryymmdd

OLBG.BTI.vendor.MDCAFP.M14aaaaa.Ryymmdd
OLBG.BTI.vendor.MDCAFP.M15aaaaa.Ryymmdd
OLBG.BTI.vendor.MDCAFP.M16aaaaa.Ryymmdd
OLBG.BTI.vendor.MDCAFP.M17aaaaa.Ryymmdd
OLBG.BTI.vendor.MDCAFP.M18aaaaa.Ryymmdd

The data set names listed are SSA names. The first three (3) qualifiers will be removed for the file received by the contractor. The fourth qualifier in the data set name listed is the file type and the fifth qualifier is the unique identifier. This qualifier will be used to match the corresponding files (Mail Run Data file and Banner file) with the print file. The MRD file name will be OLBG.BTI.vendor.MDCMRD.M1#aaaaa.Ryymmdd and the Banner name will be OLBG.BTI.vendor.MDCBNR.M1#aaaaa.Ryymmdd for the MADCAP file type. The final qualifier is the Run Date.

The files will be broken down and transmitted in segments by Program Service Center (PC) codes. Each file transmitted will have a banner page identifying the PC and required inserts.

The PC codes correspond to the mailout envelope required as follows:

- PC 1 – Northeastern (Jamaica, NY)
- PC 2 – Mid-Atlantic (Philadelphia, PA)
- PC 3 – Southeastern (Birmingham, AL)
- PC 4 – Great Lakes (Chicago, IL)
- PC 5 – Western (Richmond, CA)
- PC 6 – Mid-America (Kansas City, MO)
- PC 7 – Office of Central Operations (Domestic & Foreign) (Baltimore, MD)
- PC 8 – Office of International Operations (Baltimore, MD)

****NOTE: The data set names listed above (and throughout these specifications) are not the final data set names that will be transmitted to the contractor. Final data set names will be provided to the contractor at the postaward conference.***

MADCAP, MCS, AND TATTER MAILOUT ENVELOPES:

BIFOLD SIZE: 6-1/8 x 9-1/2”

<u>Program Service Center</u>	<u>90-Calendar Day Volumes</u>
PC1 - Northeastern Program Service Center	266,000
PC2 - Mid-Atlantic Program Service Center	241,000
PC3 - Southeastern Program Service Center	328,000
PC4 - Great Lakes Program Service Center	290,000
PC5 - Western Program Service Center	341,000
PC6 -Mid-America Program Service Center	353,000

SSA Publication No. 05-10138	1,500
SSA Publication No. 05-10903	7,700
SSA Publication No. 05-10975	60
SSA Publication No. 70-10283	550

***NOTE:** When Form CMS-2690 is used for any workload, a CRM will be required.

TATTER PAYMENT STUB NOTE: A micro-perforated payment stub will be on the last leaf of approximately 25% of the notices. However, the micro-perforation will not be on the same leaf for every notice, because the notices have variable page counts. The contractor will be required to identify the payment stub page requiring perforation (Form SSA-53-EP prints at the top of the payment stub) and ensure that only these pages are perforated.

If there is a micro-perforated payment stub (Form SSA-53-EP) in the notice, a Green BRM Envelope will be required.

GOVERNMENT TO FURNISH: At the postaward conference, the contractor will be issued either manuscript, camera copy, or electronic media for the forms, publications (booklets, factsheets, leaflets), and envelopes used in this contract.

If furnished, the electronic media will be furnished as follows:

Platform: Macintosh OSX (or latest version); IBM or compatible using MS Windows (current or most current version).

Storage Media: SFTP; CD-R/RW; DVD-R/RW; E-mail.

Software: Adobe Creative Suite (InDesign, Photoshop, and Illustrator); QuarkXPress; Adobe Acrobat Professional with LiveCycle Designer; and Adobe Experience Manager (AEM). All files will be created in current or near current versions of the above mentioned programs.

NOTE: All platform system and software upgrades (for specified applications) which may occur during the term of the contract must be supported by the contractor.

Fonts: All printer and screen fonts for the booklets, factsheets, and leaflets will be furnished/embedded, as applicable. The contractor is cautioned furnished fonts are the property of the Government and/or its originator. All furnished fonts are to be eliminated from the contractor's archive immediately after completion of the contract.

Additional Information: Files will be provided in PostScript, native application, and/or PDF format.

A data connection between the exact location specified by the contractor and SSA's National Computer Center.

Electronic files will be furnished for the notices (see "ELECTRONIC FILES" below).

Manuscript copy for 22 envelopes, as follows:

- 1 green BRM envelope (3-7/8 x 8-7/8")
- 1 white BRM window envelope (3-7/8 x 8-11/16")
- 9 CRM envelopes (3-7/8 x 8-7/8")
- 1 mailout envelope (4-1/8 x 9-1/4")
- 1 mailout envelope (4-1/8 x 9-1/2")
- 9 mailout envelopes (6-1/8 x 9-1/2")

Camera copy for the Facing Identification Mark (FIM) and ZIP+4 Intelligent Mail Barcode (IMB) for reply envelopes.

At the Government's option, camera copy or electronic files (PostScript format) for the recycled paper logo and legend (English and Spanish) may be furnished.

Test and Production files for printing will be furnished in print image. Print image files are formatted for Advanced Function Presentation (AFP) Mixed Mode printing platform. NOTE: The agency may transition to Advanced Function Presentation (AFP) Fully Composed during this contract.

SSA will provide an Official Government Postage Meter head only, but will not supply the meter mail machine. All meter equipment and supplies must be borne by the contractor.

Postage and Fees Paid Mailing Indicia.

Coding Accuracy Support System (CASS) Certificate.

National Change of Address (NCOA) Certificate

PS Form 3615 (Mailing Permit Application, and Customer Profile)

GPO Form 892 (Proof Label).

- Exhibit A: Form SSA-301, Contractor Personnel Security Certification
- Exhibit B: SSA External Service Provider Security Requirements
- Exhibit C: Security Assessment Report (SAR) Template
- Exhibit D: Risk Assessment Report (RAR) Template
- Exhibit E: External Hosted Information System Plan (ESP) Template
- Exhibit F: Security and Suitability Requirements
- Exhibit G: Declaration of Federal Employment (Optional Form 306)
- Exhibit H: Fair Credit Reporting Act (FCRA) Authorization Form
- Exhibit I: Additional Questions for Public Trust Positions - Branching
- Exhibit J: Questionnaire for Public Trust Positions (Standard Form 85P)
- Exhibit K: Sample of Fingerprint Card
- Exhibit L: Contractor Personnel Rollover Request Form
- Exhibit M: System Plan
- Exhibit N: 100% Accountability Audit and Summary Report
- Exhibit O: MRD File Record Layout
- Exhibit P: Minimum Volume Reduction Program (MVRP) Request Letter
- Exhibit Q: Detailed Meter Report
- Exhibit R: Postage Meter Activity Log

ELECTRONIC FILES: All files will be electronically transmitted to the contractor and contain a complete record for each notice. Any programming or other format changes necessitated due to the contractor's method of production will be the full responsibility of the contractor and must be completed prior to SSA's validation. All files transmitted by SSA will be physical sequential Advanced Function Presentation mixed mode. The agency may transition to Advanced Function Presentation (AFP) Fully Composed during this contract. Any alteration of the notice content in the file is not permitted. The contractor must not merge file dates and mailers during processing, printing/imaging, and mailing.

The Government will furnish test files for performing the preproduction press and mail run test.

NOTE: The contractor must not compress files in processing data for this contract.

The contractor will receive three (3) files for each print file: the Advanced Function Presentation (AFP) file, the Mail Run Data (MRD) file, and the Banner (BNR) file. Similar to the following:

AFP file = vendor***.T2RAFP.M01xaaaaa.Ryymmdd
MRD file = vendor***.T2RAFP.M01xaaaaa.Ryymmdd
BNR file = vendor***.T2RAFP.M01xaaaaa.Ryymmdd

Files provided to the contractor must be retained for 21 workdays after mailing (before destruction).

The notice files for printing are formatted for the AFP printing platform in duplex printing (face and back). For proper processing of AFP, SSA supplies resources used for printing notices in AFP format.

The MRD File will contain all information relevant to each mail piece. This would include, for each mail piece, the unique alpha/numeric identifier (the sequential number of the document), the number of sheets of paper, required inserts and insertion bin selection, recipient's address, return address, USPS IMB, the appropriate signature, and any required inserts. (See Exhibit O for MRD File Record Layout.)

The BNR file contains information for setting up the intelligent inserters such as file totals, number of mail packets, and bin set up for those items being included in the mail packets and total required in each bin.

The contractor will receive an electronic daily task order each morning after transmission with the volumes for notices, leaves, pages, and any inserts required.

Prior to the commencement of production of orders placed under this contract, the Government will furnish preproduction electronic test files shortly after the postaward conference that are to be used in performing all of the preproduction tests (see "PREPRODUCTION TESTS").

Files will be in print image format and in ZIP Code sequence. Contractor will be required to sort files as necessary to obtain maximum USPS Postal discounts (i.e., leaf counts or mail weight). Any alteration of the notice content in the file is not permitted.

NOTE: Whenever the contractor makes a change in the programming, the contractor is required to execute a self-certification statement specifying the date of the last programming change. Prior notification of a programming change is required in addition to the self-certification statement for the contractor to schedule a validation test with SSA.

The contractor shall notify SSA of any reprogramming and/or reformatting of data supplied by transmission necessitated due to the contractor's method of production. Any reprogramming and/or reformatting of data necessitated due to the contractor's method of production shall be the responsibility of the contractor and done at no cost to the Government.

Government to provide the following at the postaward conference or shortly thereafter:

Print Resource Library (AFP) (via email): AFP resources include page and form definitions, fonts, page segments, and overlays (if applicable) for page formatting.

Preproduction Press and Mail Run Test Files for Transmission: An AFP formatted print file with the corresponding Mail Run Data File and Banner file for each workload in the quantities required.

Revised Resource Library (AFP) (via email, when applicable): AFP print resources, overlays, page segments, and non-standard fonts provided shortly after the post award conference may change during the term of the contract, in which case SSA will provide revised AFP resource file(s) via email to the contractor as a replacement(s).

The contractor is cautioned that there may be a signature change(s) during the term of this contract. If this occurs, SSA will provide the contractor with a new AFP resource file. See "PREPRODUCTION TEST, *Systems Change/Signature Change/New and Existing Notice Files Validation Test*" for details.

PRINTER RESOURCES (AFP):

SSA will provide the AFP resources for each notice workload. These resources will be provided on the contractor's choice of media (transmission or email) shortly after the postaward conference. SSA will also provide test files for transmission with samples of each workload to enable the start of the validation process. These test files may be used for the preproduction press and mail run test. (For additional information, see "PREPRODUCTION TEST, *Preproduction Press and Mail Run Test.*")

For proper processing of AFP resources supplied to the contractor by SSA, used for printing notices in AFP (Mixed Mode or Fully Composed) format, the contractor must have software or an operating system which is 100% compliant with the most recent release of the IBM MVS/ZOS operating system accompanied by the most recent release of IBM Print Services Facility (PSF).

These compliances relate solely to interpreting and printing files to be provided to the contractor by SSA to ensure the contractor is able to print the files as provided without alteration of any kind on the part of SSA. It is solely the contractor's responsibility to redevelop/reprogram the AFP (Mixed Mode or Fully Composed) resources and MRD file to ensure proper printing and inserting in their environment.

NOTE: SSA prints 2 UP DUPLEX ROLL IN TO ROLL OUT with the file order reversed for insertion. The predominant data file format is AFP Mixed Mode; however, any valid AFP format, such as fully composed AFP, is possible and must be printable at the contractor's location. Each piece of mail will be assigned a unique alpha/numeric identifier for tracking, insertion, location, and recovery processes.

The contractor will be responsible for maintaining the AFP resources on each system that processes SSA's notices. SSA will provide updated resources electronically, as necessary. When the contractor receives an update to the printer resources, the contractor must install them immediately and provide SSA with up to 100 sample documents, representative of the workload involved, from the test file, within three (3) workdays for review. Contractor is to continue using existing resources while the samples are being reviewed.

Once the samples are approved, the contractor will be instructed as to when to start using the new resources. Whenever testing is required, the contractor will be responsible for performing the test on each printer that will be used during actual production. SSA may require either hard copy samples or PDF samples. If required, contractor to submit hard copy samples to: Social Security Administration, Attn: Kate Schmidt, 1369 Annex Building, 6401 Security Boulevard, Baltimore, MD 21235-6401. If required, contractor to submit PDF samples via the SFTP site.

During the term of the contract, the Government anticipates making programmatic changes to the daily notices as warranted (e.g., changes in language, format, appearance, etc.). When changes occur, SSA will perform testing of the workload in their print facility for a short period of time. (The “Dark Days” for the contractor should only last a few days.) Only those affected workloads (indicated by filename) will be held back at SSA for validation and production. Upon successful testing of the changes by SSA, SSA will then transmit the new print resources (if necessary) and resume transmission of the notice file(s).

CONTRACTOR TO FURNISH: All materials and operations, other than those listed under “GOVERNMENT TO FURNISH,” necessary to produce the product(s) in accordance with these specifications.

Contractor must have programmer(s) capable of handling AFP resources.

Secure File Transfer Protocols (SFTP) Site: Contractor is required to set up, establish, and maintain a contractor-hosted SFTP server that multiple users at SSA can access for passing PDF notice validation samples and other information that contains PII to SSA and back. Contractor cannot send any notices or information that contain PII via email. Appropriate log-on instructions and protocol must be provided at time of award.

TRANSMISSIONS: The primary data transmission method will be via a dedicated circuit or using an encrypted Virtual Private Network (VPN) Internet connection, at the discretion of the Government.

Upon award of this contract, the Government will determine the connectivity method between SSA and the contractor. Internet Protocol (IP) will be the connection protocol for the transmissions. The connectivity method will be through the Internet using an encrypted VPN tunnel, or the Government will place an order for a dedicated circuit to be installed within 60 to 90 calendar days of award between the contractor’s location and SSA’s network interface location. Either connectivity method will be encrypted with the AES256 encryption algorithm. For the Internet option to be used, the contractor must have an Internet ready VPN IPsec capable hardware device. The Government will not be responsible for any cost associated with the VPN Internet connection that the contractor may incur. The connection method is at the sole discretion of the Government. The cost of the dedicated circuit connection will be borne by the Government.

The Government shall not be responsible for installation delays of data connections due to any external influences such as employee strikes, weather, supplies, etc., which conditions are beyond the control of the Government.

If a dedicated circuit is deemed necessary, SSA will provide the dedicated data connection, including a router, and firewall at the contractor’s specified locations. The contractor shall provide adequate rack space for securing the router and firewall; the contractor shall provide a dedicated analog dial-up line within eight feet of the router.

This dedicated analog dial-up line will be used for router management and access for troubleshooting. The line must be in place and active prior to the installation of the circuit/router.

Upon contract award, the contractor shall provide a complete delivery address with nearest cross-street, contact name and phone number for installation of data transmission services and equipment. The contractor’s contact person shall be available for delivery of services at the specified location. The Government shall not be responsible for incorrect or lack of address information, nor for non-availability of contact persons at the delivery site.

It is the contractor's responsibility to notify SSA when systems or data line problems arise and transmission(s) cannot take place. SSA's first point of contact for systems or data line problems shall be the HELP DESK at 877-697-4978.

FILE TRANSFER MANAGEMENT SYSTEM (FTMS) REQUIREMENTS: The contractor shall provide the capability to interface with SSA's National File Transfer Management System (FTMS) for electronic transmission of notice files from SSA to the production facility. SSA will provide the necessary data connection into the contractor's location. At the discretion of SSA, the line speed may be either increased or decreased depending on utilization. The contractor must provide, at their expense, the equipment and operating software platform, and the file transfer software required at their location. The contractor assumes all responsibility for configuration, maintenance, and troubleshooting of their equipment and software.

SSA utilizes, and the contractor must provide compatibility with, Managed File Transfer software from TIBCO. The contractor may implement the Managed File Transfer Platform Server that has embedded software encryption capable of being enabled. The personal computers/servers must have the capability to run Managed File Transfer software with encryption enabled using IP protocols on Windows, UNIX (i.e., IBM's AIX, SUN or HP), or z/OS platforms.

SSA will not permit any private class A, B, or C IP addresses (i.e., 10.xxx.xxx.xxx type IP addresses) from external users on its network. At connection time to SSA, the contractor will be provided a suitable IP address for access to SSA's network via a firewall. SSA will provide the necessary subnet(s) for connection at the remote site. The contractor will be responsible for their own name/address translation to fulfill the intended purpose of data transfers. SSA will provide Managed File Transfer node information to the contractor as required to accomplish file transfers.

The contractor may determine the media type on which files from SSA will be received, to the extent that operator intervention (e.g., a tape mount) is not required at SSA or the contractor's production facility. Simultaneous multiple transmission sessions must be possible on the contractor's equipment. All files transmitted by the SSA will be written as Physical Sequential or "flat" files at the contractor's location and will be distinguished with a "run date" in the contractor's file name. Virtual Storage Access Method files and Generation Data Groups, supported by IBM/MVS or IBM z/OS operating systems are not permitted under this contract. The contractor's storage format must not preclude the availability of the Managed File Transfer software Checkpoint/Restart feature.

NOTE: The contractor may not use VM/VSE/ESA on a mainframe system, as this hampers automated file transmission.

The contractor's FTMS software shall be operational for the receipt of data files 24 hours per day, seven (7) days per week, unless otherwise specified by the Government. The communications protocol between SSA and the contractor shall be the Internet Protocol. The contractor must specify the type of Local Area Network (LAN) connection that will be used at the location where the SSA connection is to be installed. The contractor is responsible for providing complete hardware and software compatibility with SSA's existing network. Production file transfers will be established according to SSA's standard procedures for transmission control, dataset naming, and resource security. The contractor's file management system must accommodate multiple file transmission sessions without intervention at either end. The contractor must have sufficient capacity to support the number of concurrent transmission file sessions as dictated by SSA.

The above will apply regardless of the number of workloads transmitted to the contractor daily. If the contractor is awarded multiple SSA notice workloads, there must be sufficient capacity at the contractor's production facility to accept transmission of all files according to their schedules.

In the event that the transmission network is unavailable for a time period deemed critical by the Government, the files may, at the Government's option, be processed at the SSA print/mail facility.

It is the contractor's responsibility to notify SSA when systems or data line problems arise and transmission(s) cannot take place. SSA's first point of contact for systems or data line problems shall be the HELP DESK at 877-697-4978.

All data provided by the Government or duplicates made by the contractor or his representatives and any resultant printouts must be accounted for and kept under strict security to prevent their release to any unauthorized persons. Data may not be duplicated in whole or in part for any other purpose than to create material to be used in the performance of this contract.

Any duplicate data and any resultant printouts must be destroyed by the contractor. Data provided to the contractor must be retained for 21 workdays after mailing.

PREPRODUCTION TESTS: Prior to the commencement of production of orders placed under this contract, the contractor will be required to demonstrate their ability to perform to the contract requirements. The Government will furnish electronic test files at the postaward conference, or shortly thereafter, to be used in performing a Transmission Test, Preproduction Validation Test, Preproduction Press and Mail Run Test, and System Change/New Notice Files Validation Test.

Failure of the contractor to perform any of the below tests (Transmission Test, Preproduction Validation Test, Preproduction Press and Mail Run Test, and System Change/New Notice Files Validation Test) satisfactorily may be cause for default. The Government reserves the right to waive the requirements of any of these tests. The contractor will be notified at the postaward conference if any test(s) is to be waived.

The contractor will be required to have all material necessary to perform these tests. Government representatives will witness all phases of the Preproduction Press and Mail run Test.

When Preproduction Validation and/or Validation Tests are required, the Government shall include them on a print order.

The contractor will be required to perform the following tests:

Transmission Test: After award, SSA will notify the contractor when transmission test will be performed. The contractor will be required to receive within one (1) workday up to 175,750 notices.

The contractor will be required to perform a record count verification the same workday the complete transmission of the test files are received and perform the Coding Accuracy Support System (CASS) certification the same workday as receipt of the complete transmission of all notice test files.

The contractor will be required to run the test file through their CASS certification system to ensure that there are no problems with the reading of the address file. Contractor will be required to report back to SSA with the test results.

The contractor will be required to copy the files to their own system and provide Kate Schmidt of SSA's Division of Printing Management with the exact counts received (broken down by data set name) via email to Kathryn.Schmidt@ssa.gov before proceeding with any other processing.

SSA will respond within one (1) workday of receipt thereof.

Preproduction Validation Test: Within five (5) workdays of receipt of test files and prior to the Preproduction Press and Mail Run Test, the contractor must conduct a preproduction validation test and furnish at least 500 samples of the completed product (50 notices of each mailer including at least five (5) samples from each PC).

Notices must be complete and include all variable data from Government furnished files. The notices must be inserted into envelopes and must include the inserts. The container and accompanying documentation must include the GPO jacket, purchase order, and program number, and must be submitted to the attention of Kate Schmidt at Social Security Administration, Attn: Kate Schmidt, 1369 Annex Building, 6401 Security Boulevard, Baltimore, MD 21235-6401.

The contractor must also provide 25 samples of the payment stub to Social Security Administration, Attn: Danielle McCray – DMS, DO NOT OPEN IN MAIL ROOM, 300 Spring Garden, Philadelphia, PA 19123.

The Government will approve, conditionally approve, or disapprove the samples from the Preproduction Validation Test within five (5) workdays of receipt thereof. Approval or conditional approval must not relieve the contractor from complying with the specifications and all other terms and conditions of the contract. A conditional approval must state any further action required by the contractor. A notice of disapproval must state the reasons thereof.

NOTE: If errors are found, additional samples will be required until such time as the validation produces no errors.

Preproduction Press and Mail Run Test: Prior to commencement of production, the contractor will be required to demonstrate their ability to perform the contract requirements by performing a 12-hour preproduction press and mail run test utilizing test files transmitted electronically.

Within five (5) workdays of final approval of preproduction validation test samples and contractor's receipt of necessary materials to perform the test (inserts and envelopes), the Government will work with the contractor to select a date when the contractor will be required to perform the 12-hour Preproduction Press and Mail Run Test. The contractor will use the transmitted test files.

The test shall occur during the regular work week of Monday through Friday (excluding holidays).

The contractor will be issued a print order for the 12-hour test. Upon successful completion of all test requirements, the contractor will be reimbursed for all applicable costs in accordance with the contractor's submitted bid prices in the "SCHEDULE OF PRICES." If the contractor fails to meet all test requirements, they will not be reimbursed for any associated costs.

The contractor will be required to have all composition, proofing, printed forms, booklets, factsheets, and leaflets, envelopes, scanning equipment, and reports for 100% accountability of production and mailing, completed, available, and ready for production prior to beginning the test. Notices are to be completed in accordance with contract requirements, inserted with inserts into envelopes, and prepared for mailing. Contractor will be required to provide the necessary audit and summary reports for 100% accountability of production and mailing within one (1) hour after the run is completed.

NOTE: If a subcontractor is utilized for the presorting and/or mailing of the notices of this contract, the 12-hour test must include the use of the subcontractor's facility. No additional time will be allowed for the transportation and handling of the notices to and from this facility.

The contractor must produce a minimum of 87,875 notices, using the notices from the transmission test, in a continuous 12-hour period that will prove to the Government representatives the contractor can satisfactorily complete the requirements of this contract during live production.

During the 12-hour period, the contractor will be required to print and prepare for mailing the following quantities of MADCAP, MCS, SSA-L991, TASTE, and TATTER notices:

MADCAP	Mailer 1	5,500
	Mailer 2	500
MCS	Mailer 3	36,500
	Mailer 4	1,050
SSA-L991	Mailer 5	3,550
TASTE	Mailer 6	1,500
	Mailer 7	18,500
	Mailer 8	18,500
TATTER	Mailer 9	2,150
	Mailer 10	125
TOTAL		87,875

The 12-hour period for the printing process will begin when an “O.K. to Print” is given by the Government representative on-site.

The 12-hour period for the inserting, including any necessary reprints, and mailing process will begin within two (2) hours of the start of the printing to allow the contractor to print sufficient materials to begin the inserting process.

The test run will incorporate all aspects of the program consisting of the receipt of transmitted data; the duplex printing and imaging (and simplex imaging when an odd page is required) of notices; binding; construction; inserting; reprints; manifesting; metering (if approved by SSA under certain circumstances); presorting; and preparing finished notices for delivery to the USPS. To simulate actual production conditions, the product produced must be in accordance with all contract specifications and all USPS regulations.

The contractor must perform the preproduction press and mail run test on their equipment and using their personnel. The test must be performed on the printing equipment and inserting machines with required scanning equipment that will be used in live production. All samples must be manufactured at the facility in which the contract production quantities are to be manufactured.

Samples of the preproduction press and mail run test will be brought back to SSA for validation.

The Government will approve, conditionally approve, or disapprove the output within seven (7) workdays of receipt thereof.

Approval or conditional approval must not relieve the contractor from complying with the specifications and all other terms and conditions of the contract. A conditional approval must state any further action required by the contractor. A notice of disapproval must state the reasons thereof.

Failure to meet the requirements of the 12-hour test is grounds to immediately terminate the contract for default.

Systems Change/Signature Change/New Notice Files Validation Test: When required, the Government will furnish test files for transmission that are to be used in performing a Systems Change/Signature Change/New Notice Files Validation Test. This test is required whenever SSA initiates a systems/programming change, a signature change, or when a new notice workload is developed. The contractor must furnish up to 100 printed samples (no envelopes or inserts/enclosures).

Contractor must submit samples within three (3) workdays of receipt of test files.

SSA may require either hard copy samples or PDF samples. If required, contractor to submit hard copy samples to: Social Security Administration, Attn: Kate Schmidt, 1369 Annex Building, 6401 Security Boulevard, Baltimore, MD 21235-6401. If required, contractor to submit PDF samples via the SFTP site.

The Government will approve, conditionally approve, or disapprove the samples within five (5) workdays of receipt thereof.

If errors are found, additional samples of notices (as indicated above) will be required until such time as the validation produces no errors.

The test must occur without a break in production of notices. The Government will inform the contractor in advance when the test files are to be provided and what changes are taking place.

COMPOSITION:

The contractor will be required to set type for 22 envelopes (return address, indicia, delivery address, and additional printing on face and back may be required on some orders). Contractor will be required to set up to approximately six (6) lines of type for the envelopes. Helvetica or similar typeface will be utilized.

Century Schoolbook, Sonoran Serif or equivalent fonts are to be used for producing the notices. SSA will provide the font numbers. The contractor will be required to validate that they have the proper licenses for each font. SSA cannot provide licensed fonts. Obtaining licensed fonts will be the responsibility of the contractor. No alternate typefaces will be allowed; however, manufacturers' generic equivalents may be accepted (upon Government approval) for the above typefaces.

Intelligent Mail Barcode font will be required for the start of this contract. The contractor will be required to obtain the necessary font; SSA will not provide it with Resources supplied.

PROOFS:

NOTE: SSA uses many of the same booklets, leaflets, factsheets, and forms in several of its print contracts. If SSA determines after award the contractor is responsible for the production of any other SSA workloads containing the same publications and/or forms required for this program, the revisions may be proofed using one of these other programs to reduce the proofing requirements for any revisions.

When ordered, one (1) "Press Quality" PDF soft proof (for content only) using the same Raster Image Processor (RIP) that will be used to produce the final printed product may be required. PDF proof will be evaluated for text flow, image position, and color breaks. Proof will not be used for color match.

Proofs must show all margins and dimensions, and indicate trim marks. For envelopes, proofs must show flap, and window size and placement, as applicable.

When ordered, three (3) sets of digital color content proofs. Proofs must be created using the same Raster Image Processor (RIP) that will be used to produce the product. Direct to plate must be used to produce the final product with a minimum resolution of 2400 x 2400 dpi. Proofs shall be collated with all elements in proper position (not pasted up), imaged face and back, trimmed and folded to the finished size of the product, as applicable.

When ordered, three (3) sets of inkjet proofs that are G7 profiled and use pigment-based inks. A proofing RIP that provides an option for high quality color matching (such as Device Links Technology and/or ICC Profiles Technology), and meets or exceeds industry tolerance to ISO 12647-7 Standard for Graphic Technology (as of 3/19/09, and future amendments) must be utilized plus GRACoL 2006 Coated #1 specifications (CGATS TR006) must be achieved. Output must be a minimum of 720 x 720 dpi on a GRACoL or SWOP certified proofing media. Proofs must contain the following color control strip to be evaluated for accuracy: IDEAlliance ISO 12647-7 Control Strip 2009 or 2013(i1).

Proofs must contain color control bars (such as Brunner, GATF, GRETAG, or RIT) for each color of ink on the sheet. Control bars must be placed parallel to the press's ink rollers and must show areas consisting of minimum 1/8 x 1/8" solid color patches; tint patches of 25, 50 and 75%; dot gain scale; and gray balance patches for process color (if applicable). These areas must be repeated consecutively across the sheet.

The make and model number of the proofing system utilized shall be furnished with the proofs. These proofs must contain all elements, be in press configuration, and indicate margins. Proofs will be used for color match on press. Direct to plate must be used to produce the final product with a minimum of 2400 x 2400 dpi.

Pantone colors must be simulated on proofs and must be proofed separately on a digital color content, overlay, or inkjet proof. Contractor may be required to submit ink draw downs on actual production stock of Pantone color(s) used to produce the product.

SSA reserves the right to make changes to all proofs. The Government may require one (1) or more sets of revised proofs before rendering an "O.K. to Print."

If any contractor's errors are serious enough in the opinion of GPO to require revised proofs, the revised proofs are to be provided at no additional expense to the Government. No extra time can be allowed for this reproofing operation; such operations must be accomplished within the original production schedule allotted in the specifications.

The contractor must not print prior to receipt of an "O.K. to Print."

STOCK/PAPER: The specifications of all paper furnished must be in accordance with those listed herein or listed for the corresponding JCP Code numbers in the "Government Paper Specification Standards No. 12" dated March 2011.

Government Paper Specification Standards No. 12 – https://www.gpo.gov/docs/default-source/forms-and-standards-files-for-vendors/vol_12.pdf?sfvrsn=2.

Color of paper furnished must be of a uniform shade and a close match by visual inspection of the JCP and/or attached color sample(s). The Contracting Officer reserves the right to reject shipments of any order printed on paper the color of which, in his opinion, materially differs from that of the color sample(s).

All paper used in each copy must be of a uniform shade.

NOTE Regarding JCP Code A60 Only: The requirement for postconsumer fiber (as specified in the Government Paper Specification Standards No. 12) for this stock is waived. However, the addition of postconsumer fiber is encouraged provided that the requirements of this Standard are met. All other attributes remain the same.

Personalized Notices: White Offset Book, basis weight: 50 lbs. per 500 sheets, 25 x 38", equal to JCP Code A60.

Form CMS-2690: Yellow Index, basis weight: 90 lbs. per 500 sheets, 25-1/2 x 30-1/2", equal to JCP Code K10.

Form SSA-3105: White Writing, basis weight: 20 lbs. per 500 sheets, 17 x 22", equal to JCP Code D10.

Booklets, Factsheets, and Leaflets: White Offset Book, basis weight: 60 lbs. per 500 sheets, 25 x 38", equal to JCP Code A60.

Green BRM Envelope (3-7/8 x 8-7/8"): Green Writing (match of Pantone 344), basis weight: 20 lbs. per 500 sheets, 17 x 22", bursting strength 20 lb/in², equal to JCP Code D10.

Envelope color must meet USPS print reflectance difference requirements. At contractor's option, the Green BRM envelopes may be surface tinted. Surface tinting must cover all exposed surfaces (front and back) of the envelope when sealed.

White BRM Window Envelope (3-7/8 x 8-11/16"): White Wove, basis weight: 24 lbs. per 500 sheets, 17 x 22", bursting strength 20 lb/in².

CRM Envelopes (3-7/8 x 8-7/8"): White Writing, basis weight: 20 lbs. per 500 sheets, 17 x 22", equal to JCP Code D10, bursting strength 20 lb/in², containing a minimum of 50 percent waste paper.

Mailout Envelopes: White Wove, basis weight: 24 lbs. per 500 sheets, 17 x 22", bursting strength 38 lb/in².

PRINTING/IMAGING: The contractor will be required to convert furnished data from electronic transmission for either laser or ion deposition printing. All imaging/printing must have a minimum resolution of 600 x 600 dpi.

The Government reserves the right to make changes to the envelopes or the format(s)/text of the forms, booklets, leaflets and/or factsheets at any time during the term of the contract. Notification of a proposed change will be given with sufficient time for the contractor to allow for the change, and submit proofs to the Government.

The contractor is not to preprint or maintain more than a 90-calendar day inventory of any of the components required on this contract. The Government will not be required to purchase from the contractor the inventory of any stocked items remaining on hand in excess of what was authorized when an envelope or format/text change is implemented. However, if a revision occurs which requires destruction of outdated stock and/or increases or decreases in booklet page counts, all costs incurred are to be in accordance with the "SCHEDULE OF PRICES," as applicable. No additional charge may be incurred.

Within five (5) workdays of stocking the new material, the contractor will be required to report to SSA the remaining balance of the outdated stock for reimbursement. In some cases, SSA will require the contractor to exhaust the old stock before using the new stock. The instruction to destroy or exhaust stock will be issued with the furnished electronic file containing the new artwork.

Notice: Print/image notices duplex (face and back, head-to-head) in black ink only.

- The MADCAP personalized notices print in both English and Spanish/English.
- The MCS personalized notices print in both English and Spanish/English.
- The SSA-L991 personalized notices print English only.
- The TASTE personalized notices print English only.
- The TATTER personalized notices print English only with a Spanish cover letter when applicable.

Form CMS-2690: Print face and back in black ink.

On the face of each Form CMS-2690, a date is required. Each form must be dated 60 workdays (Monday through Friday) in the future from the actual mailing date. When a Federal Holiday(s) fall within the 60-day period, that day(s) is not to be used; contractor is to skip that day and go to the next available workday. (See "SCHEDULE" for list of Federal Holidays.)

Form SSA-3105: Print face and back in black ink.

Booklet: Print head-to-head and/or head-to-side. Self-cover prints double-sided, full bleed in two Pantone ink colors. Balance of pages print in two Pantone ink colors and contain adequate gripper margins. Match Pantone inks specified.

Factsheet: Print face and back, head-to-head. Single leaf prints in two Pantone ink colors on both face and back and contains adequate gripper margins. Match Pantone inks color specified.

Leaflet: Print face and back, head-to-head. Face prints in two Pantone ink colors and bleeds three (3) sides; back prints in two Pantone ink colors and contains adequate gripper margins. Match Pantone inks specified.

Envelope: Envelopes print face and back (after manufacturing) in black ink. Printing must be in accordance with the requirements for the style envelope ordered. All printing must comply with all applicable U.S. Postal Service regulations. The envelope must accept printing without feathering or penetrating to the reverse side.

All envelopes require a security tint printed on the inside (back before manufacturing) in black ink. The contractor may use his own design but must guarantee that the product will ensure complete opacity and prevent show through of any material contained therein.

Green BRM Envelope (3-7/8 x 8-7/8"): Face of envelope to be in BUSINESS REPLY FORMAT. Print FIMs and Intelligent Mail Barcodes using the furnished camera copy. The FIMs and Intelligent Mail Barcodes should be placed on the mailing piece according to the current U.S. Postal Service's Domestic Mail Manual, "Barcoded Mail pieces."

White BRM Window Envelope (3-7/8 x 8-11/16"): Face of envelope to be in BUSINESS REPLY FORMAT. Print FIMs and Intelligent Mail Barcodes using the furnished camera copy. The FIMs and Intelligent Mail Barcodes should be placed on the mailing piece according to the current U.S. Postal Service's Domestic Mail Manual, "Barcoded Mail pieces."

CRM Envelope (3-7/8 x 8-7/8"): Face of envelope to be in COURTESTY REPLY FORMAT. Print FIMs and Intelligent Mail Barcodes using the furnished camera copy. The FIMs and Intelligent Mail Barcodes should be placed on the mailing piece according to the current U.S. Postal Service's Domestic Mail Manual, "Barcoded Mail pieces."

RECYCLED PAPER LOGO: If recycled paper is used, the recycled paper logo and legend must be printed in black ink on the notices, envelopes, and forms. If the booklets are printed on recycled paper, the recycled paper logo and legend must be printed in the same Pantone ink color as the text.

Notices: The recycled paper logo/legend must be digitized by the contractor and imaged in the bottom right corner aligned with the contractor's control number on the first page of each notice. For bilingual notices, the logo will appear on the Spanish copy only.

Forms, Booklets, Factsheets, and Leaflets: The SSA furnished manuscript, electronic files, or camera copy will already contain the recycled paper logo/legend in either English or Spanish (as appropriate).

Envelopes: The logo/legend must be printed on the back of all envelopes in the bottom left hand corner.

PRESS SHEET INSPECTION: Final makeready press sheets may be inspected and approved at the contractor's (subcontractor's) plant for the purpose of establishing specified standards for use during the actual press run. Upon approval of the sheets, contractor is charged with maintaining those standards throughout the press run (within QATAP tolerances when applicable) and with discarding all makeready sheets that preceded approval. When a press sheet inspection is required, it will be specified on the individual print order. See GPO Publication 315.3 (Guidelines for Contractors Holding Press Sheet Inspections) issued January 2015. NOTE: A press sheet inspection is for the purpose of setting specific standards that are to be maintained throughout the entire run. It does not constitute a prior approval of the entire run.

Press sheets must contain control bars for each color of ink on the sheet. Control bars must be placed parallel to the press's ink rollers. The control bars (such as BRUNNER, GATF, GRETAG, or RIT) must show areas consisting of 1/8 x 1/8" minimum solid color patches; tint patches of 25, 50, and 75%; dot gain scale; slur targets; two-color overprint ink trapping targets and gray balance patches for process color (if applicable). These areas must be repeated across the entire press sheet.

Viewing Light: Press sheets will be viewed under controlled conditions with 5000 degrees Kelvin overhead luminaries. The viewing conditions must conform to ISO 3664-2009; a viewing booth under controlled conditions with 5000 degrees Kelvin overhead luminaries with neutral gray surroundings must be provided.

MARGINS: Margins will be as indicated on the print order, furnished copy, or furnished electronic file.

BINDING:

Notice: Trim four sides. Gather all leaves of a notice in numerical sequence. Notices are to be nested together with all faces forward. Fold from a flat size of 8-1/2 x 11" down to 8-1/2 x 3-11/16" or 8-1/2 x 5-1/2" as indicated, title out.

Address on first page of notice must be visible through window of mailout envelope. Either wraparound or accordion folds will be acceptable for the trifold notices.

NOTE: Bilingual Spanish/English notices consist of two parts: the first part is a Spanish notice; the second part is the same notice in English. The two parts must be nested together.

Payment Stub: The last leaf of approximately 25% of the TATTER notices only will contain a micro-perforated payment stub. However, the micro-perforation will not be on the same leaf for every notice, because the notices have variable page counts. The contractor will be required to identify the payment stub page(s) requiring perforation ("SSA-53-EP" prints at the top of the payment stub) and ensure that only these pages are perforated.

Perforation: It is critical that the micro-perforation on the payment stub page be 3-1/2" from the bottom of the payment stub page and run along the entire 8-1/2" dimension.

Form CMS-2690: Trim four sides.

Form SSA-3105: Trim four sides. Perforate on the fold 7" from left edge. Fold from a flat size of 10-1/2 x 8" down to 3-1/2 x 8" with two parallel wraparound folds, title out. Follow sample.

Booklet: Saddle-wire stitch in two places and trim three sides. Each product must contain complete 4-page signatures after trimming. Single leaves connected with a lip (i.e., binding stub) to left or right side of stitches will not be allowed. The finished product will be either 5-1/4 x 8" or 3-1/2 x 8".

Factsheet: Trim four sides. Fold from flat size of 8-1/2 x 11" down to 8-1/2 x 5-1/2" with one fold, title out.

Leaflet: Trim four sides. Fold from a flat size of 10-1/2 x 8", 14 x 8", 17-1/2 x 8", or 21 x 8" down to 3-1/2 x 8" title out, with two or three parallel folds. Follow furnished folding sample.

CONSTRUCTION:

Green BRM Envelope and CRM Envelope (3-7/8 x 8-7/8"): Envelope must be open side, with gummed fold-over flap for sealing and contain high-cut diagonal seams or double side seams, at contractor's option. Flap depth is at contractor's option, but must meet all USPS requirements. Flap must be coated with a suitable remoistenable glue that will securely seal the envelope for mailing. Adhesive must not adhere to the contents of the envelope.

White BRM Window Envelope (3-7/8 x 8-11/16"): Envelope must be open, with gummed fold-over flap for sealing and contain high-cut diagonal seams or double side seams, at contractor's option. Flaps depth must be 1-1/2" and flap must be coated with suitable re-moistenable glue that will securely seal the envelope without adhering to contents. Face of envelope to contain one die-cut address window (1-1/4 x 3-1/4" in size) with slightly rounded corners. Die-cut window is to be located 7/16" from the bottom edge of the envelope and 1-3/16" from the right edge of the envelope (the long dimension of the window is to be parallel to the long dimension of the envelope). The contractor has the option to adjust the size of the window opening (subject to Government approval), providing the visibility of the computer generated mailing address and barcode on the notice is not obscured, and other extraneous information is not visible when material is inserted into the envelope.

Mailout Envelope (4-1/8 x 9-1/4"): Envelope must be open side, with gummed fold-over flap for sealing and contain high-cut diagonal seams. Flap is at the contractor's option but must meet all USPS requirements. Flap must be coated with suitable glue that will securely seal the envelope without adhering to contents, permit easy opening by the recipient, and not permit resealing of the envelope. Face of envelope to contain one die-cut address window (1-1/2 x 4-1/4" in size) with slightly rounded comers. Die-cut window is to be located 5/8" from the bottom edge of the envelope and 3/4" from the left edge of the envelope (the long dimension of the window is to be parallel to the long dimension of the envelope). The contractor has the option to adjust the size of the window opening (subject to Government approval), providing the visibility of the computer generated mailing address and barcode on the notice is not obscured, and other extraneous information is not visible when material is inserted into the envelope.

Mailout Envelope (4-1/8 x 9-1/2"): Envelope must be open side, with gummed fold-over flap for sealing and contain high-cut diagonal seams. Flap depth is at contractor's option, but must comply with all USPS requirements. Flap must be coated with a suitable glue that will securely seal the envelope without adhering to contents, not permit resealing of the envelope, and permit easy opening by the recipient. Face of envelope to contain one die-cut address window (1-1/2 x 4-1/4" in size) with slightly rounded corners. Die-cut window is to be located 5/8" from the bottom edge of the envelope and 3/4" from the left edge of the envelope (the long dimension of the window is to be parallel to the long dimension of the envelope). Contractor has the option to adjust the size of the window opening (subject to Government approval), providing the visibility of the computer generated mailing address and barcode on the notice is not obscured, and other extraneous information is not visible when material is inserted into the envelope.

Mailout Envelope (6-1/8 x 9-1/2"): Envelope must be open side, with gummed fold-over flap for sealing and contain high-cut diagonal seams. Flap depth is at contractor's option, but must meet all USPS requirements. Flap must be coated with a suitable glue that will securely seal the envelope without adhering to contents, not permit resealing of the envelope, and permit easy opening by the recipient. Face of envelope to contain one die-cut address window (1-1/2 x 4-1/4" in size) with slightly rounded corners. Die-cut window is to be located 2" from the bottom edge of the envelope and 1/2" from the left edge of the envelope (the long dimension of the window is to be parallel to the long dimension of the envelope). Contractor has the option to adjust the size of the window opening (subject to Government approval), providing the visibility of the computer generated mailing address and barcode on the notice is not obscured, and other extraneous information is not visible when material is inserted into the envelope.

Windows: For ALL envelopes with a window, the window is to be covered with a suitable transparent, low-gloss, poly-type material that must be clear of smudges, lines, and distortions. Poly-type material must be securely affixed to the inside of the envelope so as not to interfere with insertion of contents. Window material must meet the current USPS readability standards/requirements.

INSERTING: Gather the appropriate number of leaves per notice, fold as specified, and insert into mailout envelope with recipient's name and address on first page facing out for visibility through window envelope.

In the case of bilingual Spanish/English notices, the recipient's name and address on the Spanish notice should be visible through the window envelope. (NOTE: The bilingual Spanish/English notices must be nested together.)

When required, form(s), booklet(s), factsheet(s), leaflet(s), and/or BRM/CRM envelope(s) should be inserted behind the notice (when viewed from the window side of the envelope).

It is the contractor's responsibility to assure that only the computer-generated address and IMB on the notice will be visible through the window in the envelope and that only one notice and only one copy of each required insert is inserted into each envelope.

NOTE: When Form CMS-2690 is required, it must be dated 60 workdays in the future (Monday through Friday) from the actual mailing date before inserting in the mailing package (see "PRINTING/IMAGING").

Seal envelopes.

PRODUCTION INSPECTION: *Before production begins on any new workloads, a production inspection(s) may be required at the contractor's plant.*

Production inspection(s) may be required at the contractor's/subcontractor's plant for the purpose of establishing that the receipt of transmitted files, the printing of notices, forms, booklets, leaflets, factsheets, and/or envelopes, the imaging, binding, construction, inserting, and mailing is being accomplished in accordance with contract quality attributes and requirements.

A production inspection is for the purpose of setting specific standards that are to be maintained throughout the entire run. It does not constitute a prior approval of the entire run.

When a production inspection is required, the Government will notify the contractor.

DISTRIBUTION:

- Deliver f.o.b. destination (on the first order and any order that requires revisions to the booklets, forms, or envelopes) three (3) production samples of each to: SSA, Division of Printing Management, Attn: Kate Schmidt, 1369 Annex Building, 6401 Security Boulevard, Baltimore, MD 21235-6401.
- Mail f.o.b. contractor's each individual mailer. (The contractor is responsible for all costs incurred in transporting this product to the U.S. Postal Service facility.)

Domestic First-Class Letter-Size Mail: The contractor is required to prepare domestic First-Class letter-size mail in accordance with appropriate USPS rules and regulations, including the USPS Domestic Mail Manual and Postal Bulletins in effect at the time of the mailing.

When volumes warrant, SSA requires the use of a permit imprint. The contractor must use SSA's "Postage and Fees Paid First Class Mail" permit imprint mailing indicia printed on each mail piece.

Each mail piece sent under this payment method must bear a permit imprint indicia showing that postage is paid. Permit imprint indicia may be printed directly on mail pieces. Permit imprint mailings must contain at least 200 pieces or 50 pounds.

The contractor is cautioned to use the permit imprint only for mailing material produced under this contract.

Contractors are strongly encouraged to apply for an exception in the Domestic Mail Manual section 604.5.1.2 called the Minimum Volume Reduction Provision (MVRP) through their local BMEU. (See Exhibit P for MVRP Request Letter for local BMEU.)

The MVRP provides an exception to the "200 pieces or 50 pounds" rule for Permit Imprint mailings (including certified and foreign mail). With the MVRP exception, contractors will be allowed to mail pieces under the 200 pieces or less than 50 pounds on a permit imprint eliminating metering (this includes certified and foreign mail). Mailers must submit USPS postal paperwork electronically, including piece level barcode information. Contractor will be required to contact USPS, prior to any MVRP expiration date (if specified by USPS) all MVRP agreements must be current.

This workload contains various weight pieces. The contractor is strongly encouraged to use manifest mail when postal regulations allow. The contractor must have a Manifest Mailing System (MMS) for First-Class Mail, which has been approved by USPS to document postage charges for this mailing. Each mail piece must be identified with a unique identification number or with a keyline containing a unique identification number and rate information about the piece. Requirements for the MMS are contained in Publication 401 "USPS Guide to the Manifest Mailing System" in effect at the time of the mailing.

NOTE: A copy of the USPS approval for the MMS must be presented at the postaward conference.

If a Government meter is required: All meter equipment and supplies must be borne by the contractor. SSA will provide an Official Government Postage Meter head only, but will not supply the meter mail machine. SSA will fund the postage for meters through the USPS' Official Mail Accounting System (OMAS).

The contractor is responsible for the security of the Government postage meters and access is to be restricted to authorized personnel only. The contractor is to advise all staff there is a penalty for the private use of official Government postage meters (39USC3203).

Contractor should always maintain sufficient postage on the Government meter. The contractor should contact SSA if they are not sure of how much postage to load or frequency.

The contractor is required to submit spoiled postage/postage error envelope(s)/meter strip(s) and prepare a Postal Service Form 3533, Application for Refund of Fees, Products and Withdraw of Customer Accounts. Forms are not obtainable from the USPS website since they contain a barcode making each form unique. Contractors will go to local Post Offices, postal retail units, or Bulk Mailing Units to obtain the hardcopy version of the revised PS Form 3533. USPS will credit the postage refund to SSA through the Official Mail Accounting System (OMAS). SSA requires the contractor to submit a copy of Form 3533 along with the associated print order in which the spoilage occurred and all other postal documentation to the SSA Program Lead.

The contractor must have approval from SSA's Postage Meter Accountability Team for turn-in of postage meter(s) to the meter manufacturer (e.g., excess meter, defective meter, etc.). If the contractor requires a replacement postage meter, USPS credits any remaining postage to SSA through the USPS' Official Mail Accounting System (OMAS) or the meter manufacturer may transfer the remaining postage from the old meter to the new meter. The contractor should be sure to document the last meter reading (postage remaining amount) before the meter is checked out of service. The contractor may receive a PS Form 3601-C, Postage Meter Activity Report, from the meter manufacturer. The contractor is to forward a copy of this report to SSA within three (3) workdays of the transaction.

The Government reserves the right to request the contractor to upload funds at any time. These uploads are in addition to any routine meter replenishments. As a result of the postage uploads, the contractor may receive a Postage Meter Reset Activity Report Statement from the meter manufacturer. If received, the contractor should retain this documentation for 12 months.

Contractor is not to relocate any Government postage meter containing SSA postage funds to any other building. Contractor is required to contact the SSA Program Lead before any movement of a Government postage meter containing SSA postage funds.

The contractor is required to prepare all metered mail in accordance with the rules and regulations in USPS's Domestic Mail Manual and International Mail Manual.

Contractors should not receive invoicing for meter rentals. If an invoice is received, the contractor is to contact the SSA Program Lead immediately.

Contractor Sites Using “Official Government” Postage Meters with Automated Reporting Capability (Detailed): Postage meters with “Detailed Account Reporting” are capable of providing detailed meter usage reports (see Exhibit Q). If the contractor utilizes meters with the detailed account reporting, the contractor is required to provide copies of detailed meter usage reports to SSA with each print order. The detailed report must be contract/print order specific.

NOTE: If the contractor produces multiple SSA contracts, they must submit a separate detailed report for each contract and each print order.

When setting up the detail report for SSA, the contractor must set up the meter to record usage via contract program number, mailer number and file date. The contractor may have to utilize the account and subaccount feature in order to capture the contract program number, mailer number, and file date.

If the contractor utilizes detailed reporting, the contractor will be required to utilize the postage meter account feature for each SSA print program. If the contractor requires assistance with set-up and operating the “accounting” features of the postage meters, they are to contact SSA along with the meter manufacturer.

Contractor Sites Using an SSA Postage Meter Activity Log (Manual Process): If the contractor is using mailing equipment that cannot support a postage meter with an internal accounting feature and/or capable of providing SSA with the detailed reporting, they will be required to complete an SSA Postage Meter Activity Log (see Exhibit R). Contractor must submit a copy of the Postage Meter Activity Log to SSA with each print order. The Postage Meter Activity log must be contract/print order specific.

NOTE: If the contractor produces multiple SSA contracts, they must submit a separate SSA Postage Meter Activity Log for each contract and each print order.

Every field must contain an entry or an N/A if the field does not apply. SSA will return incomplete or incorrect activity logs to the contractor for correction. NOTE: If a primary meter fails and a backup or replacement meter is needed to complete the workload, the contractor will need to document the primary meter log in the note field (i.e., meter failed) and create a new activity log documenting the necessary fields to use with the backup or replacement meter.

The contractor is required to obtain the maximum USPS postage discounts possible in accordance with the USPS First-Class Domestic Mail automated and nonautomated mail discount structure in effect at the time of mailing: (a) Automation (5-digit); (b) Automation (3-digit); (c) Automation (AADC); (d) Automation (Mixed AADC); (e) Nonautomation (Presorted); and, (f) Nonautomation (Single Piece).

Mail addressed to United States possessions (e.g., American Samoa, Federated States of Micronesia, Guam, Marshall Islands, Northern Mariana Islands, Palau, Puerto Rico and U.S. Virgin Islands, Wake Island) and Military Overseas Addresses (APO/FPO mail) is Domestic Mail, not International Mail, and should be included in the discount sorting above.

To maximize automation discounts, Intelligent Mail Barcode (IMB) barcoding, delivery address placement and envelopes used for the mailing are among the items that must comply with USPS requirements for automation-compatible mail in effect at the time of the mailing.

Contractor will be required to produce and use a USPS Intelligent Mail Barcode Full-Service option and achieve the maximum postage discounts available with this option. The contractor will be required to comply with USPS requirements and place the IMB on all mail pieces of this workload. The contractor is required to be capable of achieving the postage discounts available with the Full-Service option of the IMB program. The Full-Service option requires the contractor to use Postal One.

SSA will provide the contractor with a 6-digit Mailer Identifier (MID) for the mailing. The Mailer Identifier is a field within the Intelligent Mail barcode that is used to identify the owner of the mail.

USPS has instituted a verification procedure called a “tap” test. This test is used to screen all mailings with barcoded inserts for proper barcode spacing within the envelope window. When the insert showing through the window is moved to any of its limits inside the envelope, the entire barcode must remain within the barcode clear zone. In addition, a clear space must be maintained that is at least 0.125 inch between the barcode and the left and right edges of the window and at least 0.028 inch clearance between the Intelligent Mail Barcode and the top and bottom edges of the window.

All letters in a mailing must pass the “tap” test in order to obtain the maximum postal discounts for the agency. The contractor will be responsible for payment of any additional postage resulting from a loss of postage discounts due to failure to pass the “tap” test because of inaccuracy or failure to conform to USPS specifications.

The contractor should be aware that USPS uses the Mail Evaluation Readability Look-up Instrument (MERLIN) to evaluate barcodes. If MERLIN is in effect in the contractor’s geographic area, the contractor must ensure that all barcoded mail meets the new barcode standards. The contractor will be responsible for payment of any additional postage resulting from a loss of such discounts due to failure of the contractor-generated barcodes to pass the MERLIN test because of inaccuracy or failure to conform to USPS specifications.

The contractor is required to fill in all applicable items on USPS form(s) and submit in duplicate to the entry post office. The post office will return a verified copy of USPS form(s) to the contractor. The contractor must immediately forward a copy to the ordering agency identifying the Program Number, Print Order Number, Jacket Number, as appropriate.

Coding Accuracy Support System (CASS): SSA will provide a certificate for the addresses on this contract indicating that, within the last 180 calendar days, the addresses have been matched against USPS certified Coding Accuracy Support System certified ZIP Code software. New CASS certificates will be provided to the contractor as required by the USPS Domestic Mail Manual.

National Change of Address (NCOA): Addresses for MADCAP, MCS, TASTE, and TATTER notices come from SSA’s Master Beneficiary Record (MBR) database. SSA will provide the latest USPS National Change of Address certificate to the contractor throughout the duration of the contract as required by the USPS Domestic Mail Manual.

NCOA Certification for the SSA-L991: Addresses for the SSA-L991 notices come from SSA’s Supplemental Security Record (SSR) database. SSA does not provide an NCOA certificate for these addresses. The contractor is required to process the addresses for the SSA-L991 notices through USPS approved NCOA software and furnish USPS with the required NCOA certification to achieve the required postal discounts. The contractor is **NOT** to perform move updates, addresses that show an update through NCOA are to mail at a pre-sort or full postage rate.

The contractor is required to fill in all applicable items on USPS form(s) and submit in duplicate to the entry post office. The post office will return a verified copy of USPS form(s) to the contractor. The contractor must immediately forward a copy to the ordering agency identifying the Program Number, Print Order Number, Jacket Number, as appropriate.

Certified Mail: During the term of this contract, it is anticipated that SSA will require some of the mailers be sent certified or registered mail.

In the event that any of these notices are Special Notice Option (SNO), the mail pieces included in these mailings will be required to be mailed using USPS Certified Mail. The contractor will prepare these mail pieces according to USPS regulations contained in the Domestic Mail Manual (DMM) under section 503.3.0, Certified Mail. Notices associated with the certified mail file shall be inserted into envelopes and processed as certified mail. The contractor must place the current U.S. Postal Service 20-digit certified number and barcode on the envelope. The contractor must prepare the file as a separate permit imprint mailing of identical weight pieces using the appropriate U.S. Postal Service mailing statement.

International Mail: The mail pieces included in these mailings may be required to be mailed using USPS International Registered Mail. The contractor will prepare these mail pieces according to USPS regulations contained in the International Mail Manual (IMM) under Section 330, Registered Mail.

Notices associated with the registered mail file shall be inserted into envelopes and processed as international registered mail. The contractor must place the current Postal Service Form 3806 (Receipt for Registered Mail) and PS Label 200 (13-digit registered number and barcode) on the envelope.

International First-Class Mail: All items mailed must conform to the appropriate USPS International Mail Manual, Postal Bulletins, and other USPS rules and regulations in effect at the time of mailing.

Permit Imprint is to be used for International Mail providing the mailing consists of at least 200 pieces. Permit imprint may not be used if the mailing is less than 200 pieces. Instead, the mail must be metered and any Permit Imprint must be covered/concealed by a meter strip. The contractor will be reimbursed for the metered postage by submitting a properly completed Postal Service form (or equivalent). All meter supplies must be borne by the contractor.

If the mailing meets the qualifications for International Priority Airmail (IPA), it must be processed through IPA in accordance with USPS rules and regulations in effect at the time of the mailing. Contractor must prepare mail pieces in accordance with the shape-based requirements of First-Class Mail International service listed in the USPS International Mail Manual and the additional requirements for IPA as specified in the most recent IMM. The contractor is required to sort the mail to achieve the maximum postage discounts available with the IPA program. To maximize postage savings, the contractor shall sort to the IPA Rate Group 1 through 15. Due to heightened security, many foreign postal administrations require complete sender and addressee information in roman letters and arabic numerals on postal items.

The complete address of the sender, including ZIP Code and country of origin, should be shown in the upper left corner of the address side of the envelope. International Mail return addresses must show as the last line of the address "UNITED STATES OF AMERICA," or "USA," all in upper-case letters. All International Mail must be endorsed "PAR AVION," or "AIR MAIL," as described in the USPS IMM. The contractor may use a rubber stamp to meet these requirements.

NOTE: International mail cannot contain a presort endorsement. Again, mail addressed to United States possessions (e.g., American Samoa, Federated States of Micronesia, Guam, Marshall Islands, Northern Mariana Islands, Palua, Puerto Rico, Virgin Islands and Wake Island), and Military Overseas addresses (APO/FPO mail) is Domestic Mail, NOT International Mail.

Mailing Documentation: The contractor shall provide SSA with complete copies of all documents used by USPS to verify and accept the mail (e.g., computer records of presort ZIP+4, barcode breakdown, press runs, etc.) including USPS 3607R and/or GPO's Form 712 (Certificate of Conformance) and/or Certificate of Bulk mailing, etc. Each document must be noted with file date and mailer number.

The contractor must place the number that is on top of the GPO Form 712 (the number that starts with "A") in the space provided on the USPS mailing statements. If no space is provided on the mailing statement, place the number in the upper right margin of the mailing statement. The contractor will also use SSA's Federal Agency Cost Code number (276-00043) which must be placed on all mailing documents. All copies must be legible and include both obverse and reverse side.

USPS validated copies of postal documentation must be delivered to the SSA Division of Printing Management at the email address stated under "SCHEDULE."

All expenses incidental to picking up and returning materials (as applicable), submitting and picking up proofs (as applicable), and furnishing sample copies must be borne by the contractor.

SCHEDULE: Adherence to this schedule must be maintained. Contractor must not start production of any job prior to receipt of the individual task order or print order (GPO Form 2511), as applicable.

In the event that it becomes necessary for the contractor to deviate from the specified mail out date or the quantity to be mailed, SSA must be notified immediately.

When required, furnished material and hard copy proofs must be picked up from and delivered to: Social Security Administration, Attn: Kate Schmidt, 1369 Annex Building, 6401 Security Boulevard, Baltimore, MD 21235-6401.

If applicable, furnished manuscript copy and/or camera copy must be returned with hard copy proofs.

When ordered, contractor to email PDF soft proof as instructed by SSA.

If applicable, manuscript copy and/or camera copy, for forms, booklets, factsheets, leaflets, and envelopes will be provided at the postaward conference. If applicable, or electronic media will be furnished shortly after preaward conference.

The first task order for actual production will be issued in July.

Proof Schedule:

The following schedules begin the workday after receipt of furnished material. The workday after receipt will be the first workday of the schedule.

Hard Copy Proofs (for initial startup and anytime a change is made throughout the term of the contract) –

- When ordered, contractor must submit all required proofs for forms, booklets, factsheets, leaflets, and all envelopes within seven (7) workdays of receipt of furnished materials.
- Proofs will be withheld no more than five (5) workdays from their receipt at the ordering agency until they are made available for pickup. (NOTE: The first workday after receipt of proofs at the ordering agency is day one (1) of the hold time.)
- Submit revised proofs, if necessary due to author's alterations, within five (5) workdays after receipt of furnished material.
- NOTE: If required, due to author's alterations, the contractor must submit a revised proofs within five (5) workdays of receipt of reviewed proofs. Proofs will be withheld no more than three (3) workdays from their receipt at the ordering agency. (NOTE: The first workday after receipt of proofs at the ordering agency is day one (1) of the hold time.)

PDF Soft Proofs (for initial startup and anytime a change is made throughout the term of the contract) –

- When ordered, contractor must submit all required PDF soft proofs within two (2) workdays of receipt of furnished materials.
- PDF soft proofs will be withheld no more than two (2) workdays from receipt at the ordering agency until changes/corrections/"O.K. to Print" is furnished via email. (NOTE: the first workday after receipt of proofs at the ordering agency is day one (1) of the hold time.)

Preproduction Test Schedules:

Prior to receiving transmission of live production data files, the contractor will be required to perform the following tests: (The transmission test will begin after the Government is notified of the availability of the system.)

In order for proper arrangements to be made, notification must be given at least three (3) workdays prior to all tests.

NOTE: Failure of the contractor to perform any of the below tests satisfactorily may be cause for default. The Government reserves the right to waive the requirements of these tests. The contractor will be notified at the Post Award Conference if any test(s) will be waived.

Transmission Test:

- This test is to be performed after the contract is awarded and the process is ready. The Government will notify the contractor when the test will be performed.
- The contractor will be required to receive 175,750 notices within one (1) workday.
- The contractor will be required to perform a record count verification and perform the CASS certification the same workday as receipt of the complete transmission of the test files and must provide SSA with the exact counts and the CASS certification.
- SSA will respond within one (1) workday of receipt thereof.

Preproduction Validation Test:

- Within five (5) workdays of receipt of test files and prior to the Preproduction Press and Mail Run test, the contractor is required to perform a Preproduction Validation Test.
- The contractor must furnish a total of 500 printed samples of the notices (50 sample notices from each mailer including at least five (5) samples from each PC) and 25 samples of the payment stub.
- The Government will approve, conditionally approve or disapprove the samples from the Preproduction Validation Test within five (5) workdays of receipt thereof.

Preproduction Press and Mail Run Test:

- Within five (5) workdays of final Government approval of preproduction validation test samples and contractor's receipt of necessary materials to perform the test (inserts and envelopes), the Government will work with the contractor to select a date to perform the 12-hour preproduction press and mail run test.

The test shall occur during the regular work week of Monday through Friday (excluding holidays).

- The contractor must produce a minimum of 87,875 notices in a continuous 12-hour period.
- The Government will approve, conditionally approve, or disapprove the samples within seven (7) workdays of receipt.

Systems Change/Signature Change/New Notice Files Validation Test:

- When required, the contractor will furnish up to 50 printed samples (no envelopes or inserts/enclosures) within three (3) workdays of receipt of test files.
- The Government will approve, conditionally approve, or disapprove the samples within five (5) workdays of receipt thereof.

Production Schedule:

Contractor must not proceed with processing a transmission until counts are verified against the task order. If a discrepancy is found, the contractor must call SSA's Scheduling Helpline immediately at 410-966-5469.

Workday – The term “workday” is defined as Monday through Friday each week, excluding of the days on which Federal Government holidays are observed. Also excluded are those days on which the Government Publishing Office is not open for the transaction of business, such days of national mourning, hazardous weather, etc.

Federal Government Holidays are as follows: New Year's Day, Martin Luther King's Birthday, President's Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, and Christmas Day.

The contractor's FTMS software must be operational for the receipt of data files 24 hours a day, seven (7) days a week, unless otherwise specified by the Government. (See “TRANSMISSIONS” for additional information).

Live production files will be transmitted on a daily basis Tuesday through Saturday for the MADCAP, MCS, SSA-L991, and TATTER notices. Live production files for TASTE notices transmit monthly. In the event of Federal holidays, the files will transmit on the Federal holiday but will not transmit the day after the holiday. For example, on Thanksgiving files will transmit on Thursday. Files will not transmit on Friday. Files will resume transmission on Saturday.

MADCAP Notices (Mailers 1 and 2): Complete production and mailing must be made for all daily MADCAP notices within two (2) workdays of receipt of each complete wire transmission (e.g., transmissions received on Tuesday must be mailed by close of business Thursday; transmissions received on Saturday must be mailed by close of business Tuesday).

MCS (Mailers 3 and 4): Complete production and mailing must be made within three (3) workdays of receipt of each complete wire transmission (e.g., transmissions received on Tuesday must be mailed by the close of business Friday; transmissions received on Saturday must be mailed by the close of business Wednesday).

SSA-L991 Notices (Mailer 5): Complete production and mailing must be made for all daily SSA-L991 notices within three (3) workdays of receipt of each complete transmission (e.g., transmissions received on Tuesday must be mailed by close of business Friday; transmissions received on Saturday must be mailed by close of business Wednesday).

TASTE (Mailers 6, 7, and 8): Complete production and mailing must be made within five (5) workdays of receipt of each complete transmission (e.g., transmissions received on Tuesday must be mailed by the close of business the following Tuesday; transmissions received on Saturday must be mailed by the close of business Friday).

TATTER (Mailers 9 and 10): Complete production and mailing must be made within five (5) workdays of receipt of each complete transmission (e.g., transmissions received on Tuesday must be mailed by the close of business the following Tuesday; transmissions received on Saturday must be mailed by the close of business Friday).

Mailing Documentation and Summary Reports: A PDF copy of the summary report(s) and matching USPS Certificate of Bulk Mailing, USPS 3607R, and/or GPO 712 form(s) must be submitted to Kathryn.Schmidt@ssa.gov for each file date within two (2) workdays of mailing. All copies must be legible and include both obverse and reverse side.

Invoices: One copy of the invoice for each print order must be emailed within five (5) workdays of the last mailing date of the print order to Kathryn.Schmidt@ssa.gov. The invoice must be itemized in accordance with the items in the "SCHEDULE OF PRICES." For more information on the invoicing process, refer to information under "PAYMENT."

Quality Control Samples: Each box of quality control samples should contain the samples for a particular print order in a separate box. The contractor must ship the quality control samples each week within two (2) workdays of the last mailing date of the print order.

PRESS SHEET AND PRODUCTION INSPECTIONS: The contractor must notify the SSA and GPO of the date and time of the press sheet inspection or production inspection at least three (3) workdays prior to the inspection(s) to allow time to make proper travel arrangements. Notify Kate Schmidt via email at Kathryn.Schmidt@ssa.gov and the U.S. Government Publishing Office, Quality Control for Published Products, Washington, DC 20401 at (202) 512-0542. Telephone calls will only be accepted between the hours of 8:00 a.m. and 2:00 p.m., prevailing Eastern Time, Monday through Friday. NOTE: See contract clauses, paragraph 14(e) (1), Inspections and Tests in GPO Contract Terms (GPO Publication 310.2, effective December 1, 1987 (Rev. 1-18)). When supplies are not ready at the time specified by the contractor for inspection, the Contracting Officer may charge to the contractor the additional cost of the inspection.

NOTE: If the backup facility is used for the production of these notices, the Government will require a press sheet inspection. Notification must be given at least three (3) workdays in advance of production start-up.

The ship/deliver date indicated on the print order is the date products ordered for delivery f.o.b. destination must be delivered to the destination(s) specified, and products ordered for mailing f.o.b. contractor's city must be delivered to the post office.

Unscheduled material such as shipping documents, receipts or instructions, delivery lists, and labels will be furnished with the order or shortly thereafter. In the event such information is not received in due time, the contractor will not be relieved of any responsibility in meeting the shipping schedule because of failure to request such information.

For compliance reporting purposes, the contractor must notify the U.S. Government Publishing Office of the date of shipment or delivery, as applicable. Upon completion of each order, contractor must contact the Shared Support Services Compliance Section via email at compliance@gpo.gov; via telephone at (202) 512-0520; or via facsimile at (202) 512-1364. Personnel receiving email, call, or facsimile will be unable to respond to questions of a technical nature or to transfer any inquiries.

SECTION 3. - DETERMINATION OF AWARD

The Government will determine the lowest bid by applying the prices offered in the "SCHEDULE OF PRICES" to the following units of production which are the estimated requirements to produce the one (1) year's production under this contract. These units do not constitute, nor are they to be construed as, a guarantee of the volume of work which may be ordered under this contract for a like period of time.

The following item designations correspond to those listed in the "SCHEDULE OF PRICES."

I. 22

II. (a) 320
(b) 320
(c) 42

III. 10

IV. (a) 1

SECTION 4. - SCHEDULE OF PRICES

Bids offered are f.o.b. destination for deliveries and f.o.b. contractor’s city for all mailing.

Bidder must make an entry in each of the spaces provided. Bids submitted with any obliteration, revision, or alteration of the order and manner of submitting bids, may be declared nonresponsive.

An entry of NC (No Charge) shall be entered if bidder intends to furnish individual items at no charge to the Government.

Bids submitted with NB (No Bid), NA (Not Applicable), or blank spaces for an item may be declared nonresponsive.

The Contracting Officer reserves the right to reject any offer that contains prices for individual items of production (whether or not such items are included in the Determination of Award) that are inconsistent or unrealistic in regard to other prices in the same offer or to GPO prices for the same operation if such action would be in the best interest of the Government.

All billing invoices submitted to the GPO shall be based on the most economical method of production. Fractional parts of 1,000 will be prorated at the per-1,000 rate.

Contractor’s billing invoice must be itemized in accordance with the line items in the “SCHEDULE OF PRICES.”

Saddle-Stitched Booklets: Unless otherwise specified, no more than three (3) blank pages shall be permitted at the end of the text.

Cost of all required paper must be charged under Item VI. “PAPER.”

I. COMPOSITION: Prices offered must be all-inclusive, and must include the cost of all operations required in accordance with the terms of these specifications for each of the 22 envelopes.

Envelopes per envelope \$ _____

II. PROOFS: Booklets, Forms, Factsheets, Leaflets, and Envelopes

(a) Color content proofsper trim/page-size unit \$ _____

(b) Ink jet color proofs.....per trim/page-size unit \$ _____

(c) PDF proofs..... per proof \$ _____

III. PROCESSING/FORMATting FILES: The contractor will be allowed only one (1) charge per notice workload for the term of the contract to process and/or format the AFP files, AFP resources and the Mail Run Data Files supplied necessary to print and mail the notices for each notice workload.

Processing/Formatting Filesper/notice workload \$ _____

(Initials)

IV. PREPRODUCTION TESTS: Price offered must include all costs incurred in performing the tests as specified in these specifications. These costs shall cover but are not limited to: machine time, personnel, all required materials, transmissions, electronic prepress, plates, paper, printing, imaging, collating, inserting, mail preparation, and any other operations necessary to produce the required quantities of the product in the time specified and in accordance with the specifications.

- (a) Transmission Test..... \$ _____
- (b) Preproduction Validation Test..... \$ _____

V. PRINTING/IMAGING, BINDING, AND CONSTRUCTION: Prices offered must be all-inclusive and include the cost of all materials and operations necessary (except paper) for the complete production of the product listed in accordance with these specifications.

- (a) *Daily makeready/setup charge.....\$ _____

*Contractor will be allowed only one (1) makeready/setup charge per day. This combined charge shall include all materials and operations necessary to makeready and/or setup the contractor's equipment for the 10 mailers. Contractor cannot submit invoices with more than one makeready/setup charge per day.

- (b) Notices:
 Printing and imaging in black only, including binding.....per 1,000 leaves \$ _____
- (c) Form CMS-2690:
 Printing face and back in black ink, including binding per 1,000 forms \$ _____
- (d) Form SSA-3105:
 Printing face and back in black ink, including binding per 1,000 forms \$ _____
- (e) Saddle-Stitched Booklet (3-1/2 x 8"):
 Printing in two ink colors, including bindingper 1,000 complete booklets \$ _____
- (f) Saddle-Stitched Booklet (5-1/4 x 8"):
 Printing in two ink colors, including bindingper 1,000 complete booklets \$ _____
- (g) Factsheet (8-1/2 x 11"):
 Printing face and back in two ink colors, including binding per 1,000 factsheets \$ _____
- (h) Leaflet (10-1/2 x 8"):
 Printing face and back in two ink colors, including binding per 1,000 leaflets \$ _____
- (i) Leaflet (14 x 8"):
 Printing face and back in two ink colors, including binding per 1,000 leaflets \$ _____
- (j) Leaflet (17-1/2 x 8"):
 Printing face and back in two ink colors, including binding per 1,000 leaflets \$ _____
- (k) Leaflet (21 x 8"):
 Printing face and back in two ink colors, including binding..... per 1,000 leaflets \$ _____

(Initials)

- (l) Green BRM Envelope (3-7/8 x 8-7/8”):
Printing in black ink, including construction.....per 1,000 envelopes \$ _____
- (m) White BRM Window Envelope (3-7/8 x 8-11/16”):
Printing in black ink, including construction.....per 1,000 envelopes \$ _____
- (n) CRM Envelope (3-7/8 x 8-7/8”):
Printing in black ink, including construction.....per 1,000 envelopes \$ _____
- (o) Mailout Envelope (4-1/8 x 9-1/4”):
Printing in black ink, including construction.....per 1,000 envelopes \$ _____
- (p) Mailout Envelope (4-1/8 x 9-1/2”):
Printing in black ink, including construction.....per 1,000 envelopes \$ _____
- (q) Mailout Envelope (6-1/8 x 9-1/2”):
Printing in black ink, including construction.....per 1,000 envelopes \$ _____

VI. PAPER: Payment for all paper supplied by the contractor under the terms of these specifications, as ordered on the individual print order/task order, will be based on the net number of leaves furnished for the product(s) ordered. The cost of any paper required for makeready or running spoilage must be included in the prices offered.

Computation of the net number of leaves will be based on the following:

- Notices – Each page-size leaf.
- Forms – Each page-size leaf.
- Booklets – Each page-size leaf.
- Factsheets – Each page-size leaf.
- Leaflets – Each page-size leaf.
- Envelopes – Each envelope.

Per 1,000 Leaves

- (a) Notice (8-1/2 x 11”): White Offset Book (50-lb.) \$ _____
- (b) Form CMS-2690 (8-1/2 x 3-1/2”): Yellow Index (90-lb.)..... \$ _____
- (c) Form SSA-3105 (10-1/2 x 8”): White Writing (20-lb.)..... \$ _____
- (d) Booklet (3-1/2 x 8”): White Offset Book (60-lb.) \$ _____
- (e) Booklet (5-1/4 x 8”): White Offset Book (60-lb.) \$ _____
- (f) Factsheet (8-1/2 x 11”): White Offset Book (60-lb.)..... \$ _____
- (g) Leaflet (10-1/2 x 8”): White Offset Book (60-lb.)..... \$ _____
- (h) Leaflet (14 x 8”): White Offset Book (60-lb.)..... \$ _____

(Initials)

Per 1,000 Leaves

- (i) Leaflet (17-1/2 x 8"): White Offset Book (60-lb.)..... \$ _____
- (j) Leaflet (21 x 8"): White Offset Book (60-lb.)..... \$ _____
- (k) Green BRM Envelope (3-7/8 x 8-7/8"): Green Writing (20-lb.)..... \$ _____
- (l) White BRM Window Envelope (3-7/8 x 8-11/16"): White Wove (24-lb.) \$ _____
- (m) CRM Envelope (3-7/8 x 8-7/8"): White Writing (20-lb.)..... \$ _____
- (n) Mailout Envelope (4-1/8 x 9-1/4"): White Wove (24-lb.)..... \$ _____
- (o) Mailout Envelope (4-1/8 x 9-1/2"): White Wove (24-lb.)..... \$ _____
- (p) Mailout Envelope (6-1/8 x 9-1/2"): White Wove (24-lb.)..... \$ _____

VII. ADDITIONAL OPERATIONS:

Destruction of outdated stockper 1,000 pieces \$ _____

VII. INSERTING AND MAILING: Prices offered must include the cost of all required materials and operations necessary for the mailing of the notice including cost of inserting the collated and folded notice (single or multiple leaves), and appropriate inserts as required (i.e., form(s), pamphlet(s), leaflet(s) and BRM/CRM envelope(s)), into mailout envelope and mailing in accordance with these specifications.

- (a) Mailer 1..... per 1,000 complete mailers \$ _____
- (b) Mailer 2..... per 1,000 complete mailers \$ _____
- (c) Mailer 3..... per 1,000 complete mailers \$ _____
- (d) Mailer 4..... per 1,000 complete mailers \$ _____
- (e) Mailer 5..... per 1,000 complete mailers \$ _____
- (f) Mailer 6..... per 1,000 complete mailers \$ _____
- (g) Mailer 7..... per 1,000 complete mailers \$ _____
- (h) Mailer 8..... per 1,000 complete mailers \$ _____
- (i) Mailer 9..... per 1,000 complete mailers \$ _____
- (j) Mailer 10..... per 1,000 complete mailers \$ _____

(Initials)

LOCATION OF POST OFFICE: All mailing will be made from the _____

Post Office located at Street Address _____,

City _____, State _____, Zip Code _____

SHIPMENT(S): Shipments will be made from: City _____, State _____

The city(ies) indicated above will be used for evaluation of transportation charges when shipment f.o.b. contractor's city is specified. If no shipping point is indicated above, it will be deemed that the bidder has selected the city and state shown below in the address block, and the bid will be evaluated and the contract awarded on that basis. If shipment is not made from evaluation point, the contractor will be responsible for any additional shipping costs incurred.

DISCOUNTS: Discounts are offered for payment as follows: _____ Percent, _____ calendar days. See Article 12 "Discounts" of Solicitation Provisions in GPO Contract Terms (Publication 310.2).

AMENDMENT(S): Bidder hereby acknowledges amendment(s) number(ed) _____

BID ACCEPTANCE PERIOD: In compliance with the above, the undersigned agree, if this bid is accepted within _____ calendar days (60 calendar days unless a different period is inserted by the bidder) from the date for receipt of bids, to furnish the specified items at the price set opposite each item, delivered at the designated points(s), in exact accordance with specifications.

NOTE: Failure to provide a 60-day bid acceptance period may result in expiration of the bid prior to award.

BIDDER'S NAME AND SIGNATURE: Unless specific written exception is taken, the bidder, by signing and submitting a bid, agrees with and accepts responsibility for all certifications and representations as required by the solicitation and GPO Contract Terms - Publication 310.2. When responding by fax or mail, fill out and return one copy of all pages in "SECTION 4. - SCHEDULE OF PRICES," including initialing/signing where indicated.

Failure to sign the signature block below may result in the bid being declared non-responsive.

Bidder _____
(Contractor Name) (GPO Contractor's Code)

(Street Address)

(City - State - Zip Code)

By _____
(Printed Name, Signature, and Title of Person Authorized to Sign this Bid) (Date)

(Person to be Contacted) (Telephone Number) (Email)

THIS SECTION FOR GPO USE ONLY

CONTRACTOR PERSONNEL SECURITY CERTIFICATION

Purpose: This form is used for contractor personnel to certify that they understand SSA's security and confidentiality requirements.

I understand the SSA security and confidentiality requirements and agree that:

1. I will follow all SSA rules of conduct and security policy/privacy rules/regulations.
2. I agree not to construct and maintain, for a period of time longer than required by the contract, any file containing SSA data unless explicitly agreed to by SSA in writing as part of the task documentation.
3. I agree to safeguard SSA information, whether electronic or hardcopy, in secured and locked containers during transportation.
4. I will use all computer software according to Federal copyright laws and licensing agreements.
5. I agree to keep confidential any third-party proprietary information which may be entrusted to me as part of the contract.
6. I will comply with systems security requirements contained in the SSA Systems Security Handbook.
7. I will not release or disclose any information subject to the Privacy Act of 1974, the Tax Return Act of 1976, SSA Regulation 1 and section 1106 of the Social Security Act to any unauthorized person.
8. I understand that disclosure of any information to parties not authorized by SSA may lead to criminal prosecution under Federal law.

EXHIBIT B

SSA External Service Provider Security Requirements

All External Service Providers (ESP) are subject to the following security requirements:

- All ESPs are subjected to SSA's Security Authorization Process, which will entail security testing and evaluation of the in-place security controls. For more information see NIST SP 800-37, Revision 1.
- ESPs must follow NIST SP 800-53 Revision 4 *Recommended Security Controls for Federal Information Systems and Organizations* for protecting Low or Moderate impact level information as categorized by FIPS 199 for the information system. Note: Systems that contain Personally Identifiable Information (PII) are considered "Moderate".
- ESPs must document all deployed (applicable) and planned controls for an information system in a System Security Plan that is in NIST-compliant format. Refer to NIST SP 800-18.
- ESPs classified as Cloud Service Providers (CSP) must adhere to additional FedRAMP security control requirements. Further information may be found at: <http://www.gsa.gov/portal/category/102371>. As part of these requirements CSPs must have a security control assessment performed by a Third Party Assessment Organization (3PAO).
- Upon request from SSA, the ESP shall provide the following network security information and documentation for review and audit purposes:
 - All information security control artifacts required to support the Security Assessment and Authorization (SA&A) process.
 - Intrusion Detection Systems (IDS) configuration.
 - Network firewall configuration.
 - Server and network device patching schedules and compliance.
 - Server, network device, and security logs.
 - Detailed hardware inventory including servers, network devices, and storage.

ESPs are required to adhere to NIST 800-53 Rev.4 security control framework based on their assigned categorization. The following sections outline additional security controls and SSA organizational defined parameters for NIST 800-53, Rev 4. Security requirements below are applicable to low and moderately categorized systems unless otherwise designated. For additional information or supplement guidance for these controls, refer Appendix F of NIST 800-53, Rev 4.

Account Management Requirements

The purpose of the following is to address requirements for **account and session management** for External Service Providers (ESPs).

SSA Additional Requirements for ESPs:

- **AC-2** ESPs must employ individual account types on external service provider systems. The use of group, anonymous or temporary accounts is strictly prohibited.
- **AC-2** ESPs must demonstrate the implementation of an approval process that describes how system accounts are created, deleted, disabled, or modified. The process should account for roles in the system and the appropriate authorizations to grant access. Public-facing systems may use a registration process in place of the approval process.
- **AC-2(3)** A deactivation process is required to manage inactive accounts. The process must describe how the system identifies and deactivates inactive accounts that have not been in use for 90 days or more. ESPs must *automatically* disable inactive accounts after 90 days and then remove these disabled accounts after 1 year.
- **AC-2(4)** ESPs must provide the capability to produce a record of all account management activities that occur on the system and develop an automated method to submit these records in the form of a report to SSA.
- **AC-6** ESP administrator accounts and privileged user accounts must be customized to only allow access to specific roles and functions on the system. ESP must provide a list of these functions to the Contract Officer Technical Representative (COTR). (Moderate and High categorized systems only).
- **AC-7** ESPs must enforce a limit of 3 consecutive invalid login attempts by a user during a 20 minute time frame and automatically lock the account/node for 30 minutes when the maximum number of unsuccessful attempts is exceeded. The account shall remain locked for 30 minutes. (Moderate and High categorized systems only).
- **AC-8** ESPs providing services to SSA internal users must display the internally used and approved warning banner.
 - The SSA internal banner is as follows:
 - Only authorized users can access the system.
 - The system is a U.S. Government computer system subject to Federal law.

- Unauthorized attempts to access or modify any part of SSA's systems are prohibited and subject to disciplinary, civil action or criminal prosecution.

If the system is serving the general public as its user base, the system must display a warning banner containing language that is appropriate to the application. The SSA COTR must approve the public warning banner language prior to implementation.

- **AC-11** ESPs must enforce termination of user sessions after 30 minutes of inactivity. Users must authenticate again after sessions are terminated in order to continue using the application. (Moderate and High categorized systems only).
- **AC-17(4)** ESPs must restrict remote access to approved administrative functions and accounts.

Auditing Requirements

The purpose of the following is to address requirements for **auditing** for External Service Providers (ESPs).

SSA Additional Requirements for ESPs:

- **(AU-2)** ESPs must maintain an audit log of transactions create, modify, or delete SSA information.
- **(AU-2)** ESPs must maintain an audit log of the following events: Logon/logoff events, account management, privilege or role changes, and administrator activity.
- **(AU-5)** ESPs must report any failure of audit processing that occurs to the SSA COTR within 24 hours.
- **(AU-6)** ESPs must review and analyze information system audit record for indications of inappropriate or unusual activity and report those findings to SSA COTR within 24 hours. ESPs must support monitoring and review of the system for unusual or inappropriate activity daily. This activity must be provided to the COTR immediately for review.
- **(AU-6)** ESPs must provide user and transaction log reports to SSA when requested.
- **(AU-7(1))** ESPs must allow for scoping of audit criteria for efficient reporting capability.
- **(AU-11)** ESPs must retain online audit logs for 90 days.
- **(AU-11)** ESPs must retain audit records for seven (7) years.

Awareness and Training Requirements

The purpose of the following is to address requirements for **awareness and training** for External Service Providers (ESPs).

SSA Additional Requirements for ESPs:

- **(AT-2)** ESP contractors and their employees or sub-contractors must complete SSA provided security awareness training at least annually.
- **(AT-3)** ESPs must provide role based training to all employees who fulfill special roles or duties in regards to SSA data or systems.
- **(AT-4)** ESPs must retain and produce records of role based training completions for 3 years.

Configuration Management Requirements

The purpose of the following is to address requirements for **configuration management** for External Service Providers.

SSA Additional Requirements for ESPs:

- **(CM-2(3))** ESPs must define and deploy an approved device configuration on each device used to provide services to SSA at least annually.
- **CM-6** ESPs must periodically scan the device configuration of each device used to provide services to SSA and identify deviations from the approved device configuration. Deviations shall be logged and corrected within 24 hours. The ESP shall submit device scan reports to SSA upon request.
- **CM-8** ESPs must maintain an inventory all IT assets that store, process, or transmit SSA data and provide to SSA upon request.
- **CM-9** The contractor shall maintain a configuration management plan that addresses the roles, responsibilities, processes, and procedures to manage inventory throughout the lifecycle.

Contingency Planning Requirements

The purpose of the following is to address requirements for **contingency planning** for External Service Providers.

SSA Additional Requirements for ESPs:

- **(CP-2)** ESP must submit a contingency plan that will support and meet the SSA supplied recovery objectives and must be maintained, reviewed and, if necessary updated at least annually.
- **(CP-9)** ESPs must encrypt all Media used for backup and archiving purposes using Federal Information Processing Standard (FIPS) 140-2 compliant solutions. **(Moderate and High categorized systems only).**

Identification and Authentication Requirements

The purpose of the following is to address requirements for **identification and authentication** for External Service Providers (ESPs).

SSA Additional Requirements for ESPs:

- **(IA-2(12))** Identity, Authorization and Access Management (IdAAM) - The External Service Providers must seamlessly integrate with the SSA's Federation Service. This service is based on OAuth and SAML (Security Assertion Markup Language) 2.0 standards and enables SSA to meet its two factor authentication requirements as specified in Homeland Security Presidential Directive (HSPD)-12, dated August 12, 2004. This service enables SSA to leverage an internal Microsoft's Active Directory to create a single SSA-Wide directory of all users. Currently, SSA users are required to authenticate using their SSA HSPD-12 PIV Smart Card at the workstation. In certain acceptable instances, users can revert to user name and password, while the Department is transitioning to HSPD-12 PIV Smart Card Authentication. The External Service Providers must support both authentications methods.
- **(IA-6)** ESPs must mask all fields on a system that has a logon screen that requires credentials, to prevent unauthorized exposure.
- **(IA-7)** The ESP must encrypt credentials used for e-authentication. The encryption solution must be compliant with FIPS 140-2. **(Moderate and High categorized systems only).**

Incident Response Requirements

The purpose of the following is to address requirements for **incident response** for External Service Providers.

SSA Additional Requirements for ESPs:

- **(IR-6)** ESPs will receive the incident response capability timeframe and reporting requirements from the SSA COTR.

- **(IR-6)** ESPs Incident Response plan must require all security incidents of US CERT categories 1,2,3,4 and 6 must be reported to SSA COTR.
- **(IR-7)** ESPs are responsible for notifying the appropriate SSA COTR when there is a security incident that has been categorized 1,2,3,4 or 6 per US CERT regulations. The COTR is authorized to issue orders to take down external systems or components to perform IR, forensics, further loss of data, etc.

Maintenance Requirements

The purpose of the following is to address requirements for **maintenance** for External Service Providers.

SSA Additional Requirements for ESPs:

- **(MA-2)** ESP must retain records of maintenance activities performed on IT devices used to provide services to SSA. Maintenance activity logs must be made available upon request.
- **(MA-2)** IT equipment and media used to provide services to SSA must be sanitized prior to removal from the ESP's facility for maintenance or disposal purposes. The ESP must maintain a log as evidence that the IT equipment or media was sanitized prior to removal. Logs must be made available upon request. Refer to NIST SP 800-88 for more information on media sanitization.

Media Protection Requirements

The purpose of the following is to address requirements for **media protection** for External Service Providers.

SSA Additional Requirements for ESPs:

- **(MP-2)** Removable media used to store SSA data must be encrypted using a FIPS 140-2 compliant encryption solution.
- **(MP-3)** ESP must label or mark (human readable) all media containing PII or other sensitive SSA data as "SSA Confidential Unclassified Information". **(Moderate and High categorized systems only).**
- **(MP-4)** ESP must have a documented process describing how IT equipment and media are controlled to ensure the security and confidentiality of SSA data.
- **(MP-5)** ESP must maintain chain of custody for IT equipment and media during transport outside of controlled-access facilities. Transport of media outside of controlled areas must be performed by authorized personnel.

Planning Requirements

The purpose of the following is to address requirements for the **planning** for External Service Providers (ESPs).

SSA Additional Requirements for ESPs:

- **(PL-2)** ESP must develop a System Security Plan (SSP) compliant with SP SP 800-18. The SSP shall be submitted to the SSA COTR.
- **(PL-2)** ESP must conduct an annual security review of the solution used to provide services to SSA. The System Security Plan (SSP) must be updated to reflect changes affecting the security of SSA data.
- **(PL-4)** The SSA COTR will provide the SSA Rules of Behavior (within the SSA Information System Security Handbook) for ESP systems that support internal users providing services to SSA. The rules of behavior ensure users are familiar with information security, privacy, and confidentiality practices.

Risk Assessment Requirements

The purpose of the following is to address requirements for **risk assessment** for External Service Providers (ESPs).

SSA Additional Requirements for ESPs:

- **(RA-3)** ESPs shall conduct a risk assessment to assess the risk and magnitude of harm that could result from the unauthorized access, use, disclosure, disruption, modification, or destruction of sensitive SSA information. The risk assessment should be reviewed annually and updated every three years or when a significant change occurs.
- **(RA-5)** ESP must scan IT equipment used to provide services to SSA for security vulnerabilities at least monthly. The contractor must use a commercially available scanning tool. The scanning must include vulnerabilities identified in DHS national vulnerability database. Vulnerability scan reports must be retained for 12 months and submitted to the SSA COTR upon request.

Security Assessments and Authorization Requirements

The purpose of the following is to address requirements for **security assessments and authorization** for External Service Providers (ESPs).

SSA Additional Requirements for ESPs:

- **(CA-2)** ESPs must develop an assessment plan that includes:
 - Annual assessment of a subset of controls
 - Triennial comprehensive assessment (full scope)
 - Assessments as needed when a significant change occurs on the system.
- **(CA-2)** ESP and COTR must define what a significant change is and require a new assessment whenever a significant change occurs. *Significant change is defined in NIST Special Publication 800-37 Revision 1, Appendix F.*
- **(CA-3)** The contractor shall document in the SSA security plan, all connections to contractor resources made to external information systems, and applications. Examples of connections would include: connections to subcontractor sites, connections used for remote administration, connections made to contractor's company/corporate networks, etc. These connections shall be reviewed and monitored on an ongoing basis, at least annually to determine the need for ongoing use by the contractor management. **(Moderately categorized systems only).**
- **(CA-5)** For any security reports issued to the contractor, including internal independent reviews, the contractor is responsible for developing a POA&M that identifies corrective actions and/or mitigating controls for any identified vulnerabilities. Contractors shall report to COTR POA&M progress at least monthly. In addition, the contractor must provide artifacts to update POA&M items at least 7 days prior to milestone completion date to ensure SSA has sufficient time to review.
- **(CA-7)** ESP must monitoring the effectiveness of its security controls on a continual basis and take appropriate corrective actions as necessary to ensure SSA data is protected from unauthorized access, modification or disclosure.

System and Communication Requirements

The purpose of the following is to address requirements for **system and communications** for External Service Providers (ESPs).

SSA Additional Requirements for ESPs:

- **(SC-4)** ESP must logically or physically segregate SSA data from that of other customer if a multi-tenant environment is used to provide services to SSA. **(Moderate and High categorized systems only).**

- **(SC-7(1))** ESPs shall physically allocate publicly accessible information system components to separate subnetworks with separate physical network interfaces.
- **(SC-7(4))** ESPs must provide traffic flow policy for each managed interface to SSA COTR for review and approval prior to implementation.
- **(SC-8)** ESP must encrypt PII and other sensitive SSA data when stored on persistent storage devices, or when transmitted over approved system interconnections, using a FIPS 140-2 compliant encryption solution **(Moderate and High categorized systems only)**.
- **(SC-10)** ESPs must terminate user sessions automatically after 15 minutes of inactivity. **(Moderate and High categorized systems only)**.
- **(SC-15)** ESPs use of collaborative computing devices (e.g., networked whiteboards, cameras, and microphones) on systems hosting /processing/ shall have their remote activation capability removed/disabled.
- **(SC-17)** For all ESPs, who manage information systems, the information system shall utilize automated mechanisms with supporting procedures in place for digital certificate generation, installation, and distribution. Subscriber key pairs are generated and stored using FIPS 140-2 Security Level 2 or higher cryptographic modules. The same public/private key pair is not to be used for both encryption and digital signature. Private keys are protected using, at a minimum, a strong password. A certificate is revoked if the associated private key is compromised; management requests revocation; or the certificate is no longer needed. **(Moderate and High categorized systems only)**.
- **(SC-18)** Mobile code is software that is executed from a host machine to run scripts on a client machine, including animation scripts, movies, etc. Mobile code is a powerful computing tool that can introduce risks to the user's information system. Whenever an ESP is developing or deploying the mobile code technology, this shall be identified in the ESP's security plan to SSA. Contractors, who use mobile code, shall be subject to a source code review by SSA personnel to ensure that there is no potential risk in introducing malicious code into the contractor/user's environment. **(Moderate and High categorized systems only)**.

Personnel Security Requirements

The purpose of the following is to address requirements for **personnel security** for External Service Providers.

SSA Additional Requirements for ESPs:

- **(PS-4)** ESP must terminate employee and sub-contractor access to the solution used to provide services to SSA immediately upon reassignment or separation.

- **(PS-6)** ESP personnel who are granted access to IT equipment, media or data used to provide services to SSA must agree and sign a non-disclosure agreement prohibiting unauthorized disclosure of SSA data encountered in the performance of their duties.
- **(PS-7)** ESP sub-contractors are bound to the same security requirements as employees.
- **(PS-8)** ESP must inform the SSA project officer of any violation of security requirements within 24 hours.

System and Information Integrity Requirements

The purpose of the following is to address requirements for **system and information integrity** for External Service Providers.

SSA Additional Requirements for ESPs:

- **(SI-2)** ESPs will remediate discovered flaws in the information system according to a process that is approved by the COTR.
- **(SI-3)** ESP must submit alerts on malicious code detection and actions performed on malicious code to the SSA COTR for review.
- **(SI-4)** The ESP shall employ tools and techniques to monitor events on the information system to detect attacks, vulnerabilities, and detect, deter, and report on unauthorized use of the information system. Whenever there is an elevated security level, the monitoring efforts shall be increased as necessary to enable deterrence, detection, and reporting to take place so that corrective actions shall be made to the networked environment.
- **(SI-5)** ESPs must receive advisories (from US CERT) on a regular basis and take appropriate actions as necessary.
- **(SI-11)** The information system shall identify security relevant error conditions and handle error conditions in an expeditious manner. **(Moderately and High categorized systems only).**

Government Access Requirements (FedRAMP)

To the extent required to carry out a program of inspection to safeguard against threats and hazards to the security, confidentiality, integrity, availability, and reliability of any non-public government data collected and stored by the Offeror, the Offeror shall afford the government access to the Offeror's facilities, installations, technical capabilities,

operations, documentation, records and databases. The Provider shall also identify how the following compliance, oversight and law enforcement objectives can be effectively and efficiently conducted by SSA in the event such activity is deemed by SSA to be appropriate and necessary relative to the facilities, installations, operations, documentation, databases, IT systems, devices, and personnel used in performance of the contract, regardless of the location:

- Audits;
- Inspections;
- Evaluations;
- Investigations;
- Continuous monitoring of the security posture and continued effectiveness of management, operational and technical controls (including IT asset and device discovery, inventory and security configurations);
- Penetration testing; and
- Vulnerability testing

<INSTRUCTIONS: Orange, bracketed text indicates instructions on how a section should be completed or sample text, which should be replaced with project specific information or removed. Ensure sample text is turned from orange to black where necessary (e.g., headings shall be changed to the standard heading color), and all instructions are removed (including this paragraph). Remove the template ID (e.g., TMP V1.3 FY17) from the footer before publishing. All black text shall remain unchanged.>

Assessment Summary

This document describes the Federal Information Security Modernization Act (FISMA) Security Assessment Report (SAR) for Social Security Administration (SSA). The primary purpose of this document is to deliver the independent security assessment findings for <System Name> (hereafter known as <System Acronym>). These findings will lead to the initiation of corrective actions or for making risk-based decisions. This independent security assessment supports the U.S. Government's mandate that all U.S. Federal information systems comply with FISMA of 2014.

The assessment took place between <MM DD, YYYY> and <MM DD, YYYY>. The independent security assessment followed the approved the Security Assessment Plan (SAP). All deviations from the approved SAP are located in Table 7.

The table below represents the aggregate risk identified from the independent security assessment.

Table 1: Executive Summary of Risks

Risk Category	Total	% of Total Risks
High	<# high risks>	<% of total risks>
Moderate	<# moderate risks>	<% of total risks>
Low	<# low risks>	<% of total risks>
Total Risks	<Sum of all H, M, L risks>	100%

 **NOTE:** Total is the sum of high, moderate, and low risks with operationally required risks being represented as a subset of this total.

1 Introduction

This SAR document for <System Acronym> is required by the National Institute of Standards and Technology (NIST) 800-53 Revision 4 (Rev 4) document. This SAR contains unbiased and factual security findings by an independent security assessment team. This SAR contains the <System Acronym> system specific security controls tested as per the Security Assessment Plan (SAP) approved by SSA Office of Information Security (OIS), the <System Acronym> Security Authorization Manager (SAM), and the Coalfire (formally Veris Group) Project Manager (PM). The implementation status of these controls identify the residual risk (risk remaining after controls have been implemented). These controls are required per NIST 800-53 Rev. 4 to address known information system vulnerabilities. The results are in support of SSA Security Authorization program goals, efforts, and activities necessary to achieve compliance with FISMA security requirements.

1.1 Applicable Laws and Regulations

- Computer Fraud and Abuse Act [Public Law (PL) 99-474, 18 U.S. Code (USC) 1030]
- E-Authentication Guidance for Federal Agencies [Office of Management and Budget (OMB) M-04-04]
- FISMA of 2014 [PL 113-283]
- Freedom of Information Act (FOIA) As Amended in 2002 [PL 104-232, 5 USC 552]
- Guidance on Inter-Agency Sharing of Personal Data – Protecting Personal Privacy [OMB M-01-05]
- Homeland Security Presidential Directive(HSPD)-7, Critical Infrastructure Identification, Prioritization and Protection [HSPD-7]
- Internal Control Systems [OMB Circular A-123]
- Management of Federal Information Resources [OMB Circular A-130]
- Management’s Responsibility for Internal Control [OMB Circular A-123, Revised 12/21/2004]
- Privacy Act of 1974 as amended [5 USC 552a]
- Protection of Sensitive Agency Information [OMB M-06-16]
- Records Management by Federal Agencies [44 USC 31]
- Responsibilities for the Maintenance of Records About Individuals by Federal Agencies [OMB Circular A-108, as amended]
- Security of Federal Automated Information Systems [OMB Circular A-130, Appendix III]

1.2 Applicable Standards and Guidance

- A NIST Definition of Cloud Computing [NIST SP 800-145]
- Computer Security Incident Handling Guide [NIST SP 800-61, Revision 2]
- Contingency Planning Guide for Federal Information Systems [NIST SP 800-34, Revision 1]
- Engineering Principles for Information Technology Security (A Baseline for Achieving Security) [NIST SP 800-27, Revision A]
- Assessing Security and Privacy Controls in Federal Information Systems and Organizations [NIST SP 800-53A, Revision 4]

- Security and Privacy Controls for Federal Information Systems and Organizations [NIST SP 800-53, Revision 4]
- Guide for Developing Security Plans for Federal Information Systems [NIST SP 800-18, Revision 1]
- Guide for Applying the Risk Management Framework to Federal Information Systems: A Security Life Cycle Approach [NIST SP 800-37, Revision 1]
- Guide for Mapping Types of Information and Information Systems to Security Categories [NIST SP 800-60, Revision 1]
- Guide for Security-Focused Configuration Management of Information Systems [NIST SP 800-128]
- Information Security Continuous Monitoring for Federal Information Systems and Organizations [NIST SP 800-137]
- Managing Information Security Risk: Organization, Mission, and Information System View [NIST SP 800-39]
- Minimum Security Requirements for Federal Information and Information Systems [FIPS Publication 200]
- Personal Identity Verification (PIV) of Federal Employees and Contractors [FIPS Publication 201-2]
- Recommended Security Controls for Federal Information Systems [NIST SP 800-53, Revision 4]
- Guide for Conducting Risk Assessments [NIST SP 800-30, Revision 1]
- Security Considerations in the System Development Life Cycle [NIST SP 800-64, Revision 2]
- Security Requirements for Cryptographic Modules [Federal Information Processing Standard (FIPS) Publication 140-2]
- Standards for Security Categorization of Federal Information and Information Systems [FIPS Publication 199]
- Technical Guide to Information Security Testing and Assessment [NIST SP 800-115]

1.3 Purpose

The purpose of this document is to provide the System Owner (SO) and the SSA Authorization Official (AO) with a detailed level of the residual risk for <System Acronym>. An independent security assessment team conducted a test for each system specific security control implemented by SSA stakeholders. These tests include a combination of interviews, document examinations, and actual technical testing of controls when applicable. These controls each had implementation statements listed in the <System Acronym> System Security Plan (SSP). These statements identified how the controls are in place and the assessment team tested the controls based on that criteria. Additionally, the testing ensures the controls are in compliance with the FISMA baseline security control requirements as defined in NIST 800-53 Rev 4. FISMA mandates that all Federal Agencies will comply with the NIST 800-53 Rev. 4 standards. Assessors from the independent security assessment team are members of contracted Coalfire Federal Services (formally Veris Group).

The system specific security controls for this assessment are in section 2.1

2 Scope

2.1 Applicable Security Controls

The applicable security controls as listed in the <System Acronym> SAP are in Table 2 of this <System Acronym> SAR. The security control assessment authorized by OIS and the <System Acronym> SAM gives authority to the Coalfire Independent Security Assessment team to assess the listed controls.

Table 2: Identified Security Controls Assessed

Security Control Family	Security Control
Access Control	AC-2, AC-2(2), AC-2(3), AC-2(4)
Awareness and Training	
Audit and Accountability	AU-7(1)
Security Assessment and Authorization	CA-5, CA-6
Configuration Management	CM-9
Contingency Planning	
Identification and Authentication	IA-2, IA-(3), IA-5, IA-5(1)
Planning	PL-2, PL-2(3), PL-8
Personnel Security	PS-4, PS-5
Risk Assessment	RA-2, RA-3
System and Services Acquisition	SA-3, SA-4(9), SA-5, SA-8, SA-9, SA-9(2), SA-11
System and Communications Protection	SC-4, SC-39
System and Information Integrity	SI-10, SI-11, SI-16

2.2 System Name/Title

The <System Acronym> system unique identifier and system acronyms are in Table 3. Due to the number of applications located within <System Acronym>, <only two of the subsystems> fall within the scope of this assessment. The authority to use a representative sample is located within NIST 800-53 Rev 4 Guide for Assessing the Security Controls in Federal Information Systems and Organizations.

Table 3: Information System Name and Title

Information System Name:	<System Name>
Information System Acronym:	<System Acronym>
Information System Identifier	<System Identifier>
Security Categorization: (High, Moderate, Low)	<Categorization>
PII data: (Yes/No)	<Yes/No>
e-Authentication Application: (Yes/No)	<Yes/No>
Production Data Used In Development/Test Environment (Yes/No)	<Yes/No>

Federal Tax Information (Yes/No)	<Yes/No>
----------------------------------	----------

2.3 Assessment Documentation

Documentation used by the independent assessment team to perform the assessment of the <System Acronym> subsystems include the following:

- <System Acronym> System Security Plan (SSP)
- <System Acronym> Security Assessment Plan (SAP)
- Security Operation Division (SOC) Nessus scanner with McAfee, McAfee ePolicy Orchestrator (EPO) instance scan statistic reports
- SSA Information Security Policy (ISP)
- The <System Acronym> Boundary Scope Memo (BSM)
- The <System Acronym> Information System Contingency Plan (ISCP)
- The <System Acronym> Federal Information Processing Standards Publication (FIPS) 199

2.4 Location of Components Tested

The physical locations of all the different functional components supporting the testing of the <System Acronym> information system is in Table 4.

Table 4: Location of Components

System Physical Location and Addresses		
Production Environment Site Name	Address	Description of Components
<EXAMPLE: National Computer Center (NCC)>	6401 Security Blvd Baltimore, MD 21235	Production Environment (i.e., hardware) (Primary Support)
Development/Test Environment Site Name	Address	Description of Components
<EXAMPLE: National Support Center (NSC)>	3500 Campus Drive, Suite 106 Urbana, MD 21704	Development and Testing Environment (Integration Testing)
Disaster Recovery Environment Site Name	Address	Description of Components
<EXAMPLE: Secondary Support Center (SSC)>	3004 Tower Blvd Durham, NC 27707	Production Environment (i.e., hardware) (Secondary/Failover Support)
Contractor Owned Environment Site Name	Address	Description of Components

2.5 Subsystems, Users and Interfaces

The <System Acronym> system contains the following subsystems, users and interfaces that were tested as part of this assessment. They are contained within the embedded **Error! Reference source not found..**

<Complete the embedded spreadsheet with system specific information.>

Table 5: Users and Interfaces

T2 Internet - Users
and Interfaces.doc

<Embed the applicable system's Users and Interface, EXAMPLE attached.>

2.6 Assessment Inventory

The <System Acronym> hardware and software inventories provided by the SO's are in Table 6.

<Complete the embedded spreadsheet with system specific information.>

Table 6: Hardware and Software Inventory

T2 Internet -
HW-SW Inventory.xl

<Embed the applicable system's Hardware and Software Inventory, EXAMPLE attached.>

 **NOTE:** Any changes to the scope of the Authorization Boundary after the Boundary Scope Meeting and finalization of the Boundary Scope Memo (BSM) may impact the overall Independent Verification and Validation (IV&V) schedule.

3 System Overview

3.1 Security Categorization

The FIPS 199 *Security Categorization of a Federal Information and Information System* publication determines the risk impact level of data vulnerability exploitation. The identified impact level sets the security control baseline that needs to be tested. The categorization for <System Acronym> determined by the FIPS 199 publication is a Moderate baseline. The NIST 800-53 Rev 4. <Moderate> baseline of controls are assessed during the security assessment.

3.2 System Description and Purpose

<In the sections below, insert a general description of the information system. Use a description that is consistent with the description found in the SSP. The description must only differ from the description in the SSP if additional information is going to be included that is not available in the SSP or if the description in the SSP is not accurate.>

4 Assessment Methodology

A summary of the assessment methodologies used to conduct the security assessment for the <System Acronym> subsystems are in the following steps:

- Perform tests on the listed controls in the <System Acronym> SAP and record the results
- Identify vulnerabilities related to <System Acronym>
- Identify known threats and determine which threats are associated with the cited vulnerabilities
- Analyze risks based on vulnerabilities and associated threats after mitigating controls are implemented
- Recommend corrective actions for controls that are not satisfied (other than satisfied)
- Document all security assessment results, which include identified unmitigated risks, mitigated risks, and recommend corrective actions.

4.1 Perform Tests

Coalfire Federal Services performed security tests on the <System Acronym> subsystems, which concluded on <MM DD, YYYY>. The results of the tests are documented within the Security Risk Traceability Matrix (SRTM) in Appendix B. The SRTM serves as input to this SAR.

4.1.1 Assessment Deviations

Table 7 contains any deviations from the SAP if applicable. Coalfire Federal Services did not deviate from the testing plan.

Table 7: List of Assessment Deviations

Deviation ID	Deviation Description	Justification

4.2 Identification of Vulnerabilities

Coalfire Federal Services conducts an assessment to identify vulnerabilities for <System Acronym> subsystems. These vulnerabilities should have controls in place to mitigate the risk of exploitation.

A vulnerability is an inherent weakness in an information system that can be exploited by a threat or threat agent, resulting in an undesirable impact on the protection of the confidentiality, integrity, or availability of the system (application and associated data). A vulnerability may be due to a design flaw or error in a configuration that makes the network or a host on the network, susceptible to malicious attacks from local or remote users. Vulnerabilities can exist in multiple areas of the system or facilities, such as in firewalls, application servers, Web servers, operating systems, or fire suppression systems.

Whether or not a vulnerability has the potential to be exploited by a threat depends on a number of variables including (but not limited to):

- The strength of the security controls in place
- The ease at which a human actor could purposefully launch an attack
- The probability of an environmental event or disruption in a given local area

An environmental disruption is usually unique to a geographic location. Depending on the level of the risk exposure, the successful exploitation of a vulnerability can vary from disclosure of information about the host to a complete compromise of the host. Risk exposure to organizational operations can affect the business mission, functions, and/or reputation of the organization.

4.3 Consideration of Threats

A threat is an adversarial force or phenomenon that could affect the availability, integrity, or confidentiality of an information system, its networks, and the facility that houses the hardware and software. A threat agent is an element that provides the delivery mechanism for a threat. An entity that initiates the launch of a threat agent is referred to as a threat actor.

A threat actor might purposefully launch a threat agent (e.g., a terrorist igniting a bomb). A threat actor could also be a trusted employee that acts as an agent by making an unintentional human error (e.g., a trusted employee clicks on a phishing email that downloads malware). Threat agents may also be environmental in nature with no purposeful intent (e.g., a hurricane). Threat agents working alone, or in concert, exploit vulnerabilities to create incidents. FISMA categorizes threats using a threat origination taxonomy of purposeful (P), unintentional (U), or environmental (E) type threats as described in Table 8.

Table 8: Threat Categories and Type Identifiers

Threat Origination Category	Type Identifier
Threats launched purposefully	P
Threats created by unintentional human or machine error	U
Threats caused by environmental agents or disruptions	E

Threat actors for a variety of reasons launch purposeful threats and the reasons may never be fully known. Curiosity, monetary gain, political gain, social activism, revenge or many other driving forces could motivate threat actors. It is possible that some threats could have more than one threat origination category.

Some threat types are more likely to occur than others are. FISMA considers threat types to help determine the likelihood that a vulnerability could be exploited. The threat table shown in

Table 9 describes typical threats to information systems; these threats have been considered for <System Acronym>.

Table 9: Potential Threats

ID	Threat Name	Type Identifier	Description	Typical Impact to Data or System		
				Confidentiality	Integrity	Availability
T-1.	Alteration	U, P, E	Alteration of data, files, or records.		Modification	
T-2.	Audit Compromise	P	An unauthorized user gains access to the audit trail and could cause audit records to be deleted or modified, or prevents future audit records from being recorded, thus masking a security relevant event.		Modification or destruction	Unavailable accurate records
T-3.	Bomb	P	An intentional explosion.		Modification or destruction	Denial of service
T-4.	Communications Failure	U, E	Cut fiber optic lines, trees falling on telephone lines.			Denial of service
T-5.	Compromising Emanations	P	Eavesdropping can occur via electronic media directed against large scale electronic facilities that do not process classified National Security Information.	Disclosure		
T-6.	Cyber Brute Force	P	Unauthorized user could gain access to the information systems by random or systematic guessing of passwords, possibly supported by password cracking utilities.	Disclosure	Modification or destruction	Denial of service
T-7.	Data Disclosure Attack	P	An attacker uses techniques that could result in the disclosure of sensitive information by exploiting weaknesses in system design or configuration.	Disclosure		
T-8.	Data Entry Error	U	Human inattention, lack of knowledge, and failure to cross-check system activities could contribute to errors becoming integrated and ingrained in automated systems.		Modification	
T-9.	Denial of Service Attack	P	An adversary uses techniques to attack a single target rendering it unable to respond; could cause denial of service for users of the targeted information systems.			Denial of service

ID	Threat Name	Type Identifier	Description	Typical Impact to Data or System		
				Confidentiality	Integrity	Availability
T-10.	Distributed Denial of Service Attack	P	An adversary uses multiple compromised information systems to attack a single target; could cause denial of service for users of the targeted information systems.			Denial of service
T-11.	Earthquake	E	Seismic activity can damage the information system or its facility. Refer to the following document for earthquake probability maps http://pubs.usgs.gov/of/2008/1128/pdf/OF08-1128_v1.1.pdf .		Destruction	Denial of service
T-12.	Electromagnetic Interference	E, P	Disruption of electronic and wire transmissions could be caused by high frequency (HF), very high frequency (VHF), and ultra-high frequency (UHF) communications devices (jamming) or sun spots.			Denial of service
T-13.	Espionage	P	The illegal, covert act of copying, reproducing, recording, photographing or intercepting sensitive information.	Disclosure	Modification	
T-14.	Fire	E, P	Fire can be caused by arson, electrical problems, lightning, chemical agents, or other unrelated proximity fires.		Destruction	Denial of service
T-15.	Floods	E	Water damage caused by flood hazards can be caused by proximity to local flood plains. Flood maps and base flood elevation must be considered.		Destruction	Denial of service
T-16.	Fraud	P	Intentional deception regarding data or information about an information system could compromise the confidentiality, integrity, or availability of an information system.	Disclosure	Modification or destruction	Denial of service
T-17.	Hardware Equipment Failure	E	Hardware or equipment may fail due to a variety of reasons.			Denial of service
T-18.	Hardware Tampering	P	An unauthorized modification to hardware that alters the proper functioning of equipment in a manner that		Modification	Denial of service

ID	Threat Name	Type Identifier	Description	Typical Impact to Data or System		
				Confidentiality	Integrity	Availability
			degrades the security functionality provided by the asset.			
T-19.	Hurricane	E	A category 1, 2, 3, 4, or 5 land falling hurricane could impact the facilities that house the information systems.		Destruction	Denial of service
T-20.	Malicious Software	P	Software that damages a system such a virus, Trojan, or worm.		Modification or destruction	Denial of service
T-21.	Phishing Attack	P	Adversary attempts to acquire sensitive information such as usernames, passwords, or SSNs, by pretending to be communications from a legitimate/trustworthy source. Typical attacks occur via email, instant messaging, or comparable means; commonly directing users to Web sites that appear to be legitimate sites, while actually stealing the entered information.	Disclosure	Modification or destruction	Denial of service
T-22.	Power Interruptions	E	Power interruptions may be due to any number of reasons such as electrical grid failures, generator failures, uninterruptable power supply (UPS) failures (e.g. spike, surge, brownout, or blackout).			Denial of service
T-23.	Procedural Error	U	An error in procedures could result in unintended consequences.	Disclosure	Modification or destruction	Denial of service
T-24.	Procedural Violations	P	Violations of standard procedures.	Disclosure	Modification or destruction	Denial of service
T-25.	Resource Exhaustion	U	An errant (buggy) process may create a situation that exhausts critical resources preventing access to services.			Denial of service

ID	Threat Name	Type Identifier	Description	Typical Impact to Data or System		
				Confidentiality	Integrity	Availability
T-26.	Sabotage	P	Underhanded interference with work.		Modification or destruction	Denial of service
T-27.	Scavenging	P	Searching through disposal containers (e.g., dumpsters) to acquire unauthorized data.	Disclosure		
T-28.	Severe Weather	E	Naturally occurring forces of nature could disrupt the operation of an information system by freezing, sleet, hail, heat, lightning, thunderstorms, tornados, or snowfall.		Destruction	Denial of service
T-29.	Social Engineering	P	An attacker manipulates people into performing actions, divulging confidential information, or providing access to computer systems or facilities.	Disclosure		
T-30.	Software Tampering	P	Unauthorized modification of software (e.g., files, programs, database records) that alters the proper operational functions.		Modification or destruction	
T-31.	Terrorist	P	An individual performing a deliberate violent act could use a variety of agents to damage the information system, its facility, and/or its operations.		Modification or destruction	Denial of service
T-32.	Theft	P	An adversary could steal elements of the hardware.			Denial of service
T-33.	Time and State	P	An attacker exploits weaknesses in timing or state of functions to perform actions that would otherwise be prevented (e.g., race conditions, manipulation of user state).	Disclosure	Modification	Denial of service
T-34.	Transportation Accidents	E	Transportation accidents include train derailments, river barge accidents, trucking accidents, and airline accidents. Local transportation accidents typically occur when airports, sea ports, railroad tracks, and major trucking routes occur in close proximity to systems facilities. Likelihood of HAZMAT cargo must		Destruction	Denial of service

ID	Threat Name	Type Identifier	Description	Typical Impact to Data or System		
				Confidentiality	Integrity	Availability
			be determined when considering the probability of local transportation accidents.			
T-35.	Unauthorized Facility Access	P	An unauthorized individual accesses a facility which may result in compromises of confidentiality, integrity, or availability.	Disclosure	Modification or destruction	Denial of service
T-36.	Unauthorized Systems Access	P	An unauthorized user accesses a system or data.	Disclosure	Modification or destruction	
T-37.	Volcanic Activity	E	A crack, perforation, or vent in the earth's crust followed by molten lava, steam, gases, and ash forcefully ejected into the atmosphere. For a list of volcanoes in the U.S. see: http://volcanoes.usgs.gov/about/volcanoes/volcanolist.php .		Destruction	Denial of service

4.4 Perform Risk Analysis

NIST identifies risk assessment as the first process in the risk management methodology. Organizations use the risk assessment to determine the extent of the potential threat and the risk associated with an information system. NIST defines **Risk** as “a function of the likelihood of a given threat-source’s exercising a particular vulnerability and the resulting impact of the adverse event on the organization”. The outcome of performing risk analysis yields risk exposure metrics that can be used to make risk-based decisions.

The FISMA risk analysis process is a qualitative risk analysis. In qualitative risk analysis, the risk level of exploiting a threat may be subjective and the justification for each risk is explained in terms of probability. The following tables have probabilities associated with the likelihood and the impact level of the risk. For example, when a system is easy to exploit, it has a “Very High” likelihood that a threat could exploit the vulnerability. Likelihood definitions and probabilities are in Table 10.

Note: The likelihood levels should not be confused or used interchangeably with the security categorization of the system even though they use the some of the same terminology. The security categorization is determined by the sensitivity of the data residing on the information system and is in the FIPS 199 publication.

Table 10: Likelihood Definitions from NIST 800-30 Rev. 1 Publication

Likelihood Probability Level	Description
Very Low	If the threat event is initiated or occurs, it is almost certain to have adverse impacts.
Low	If the threat event is initiated or occurs, it is unlikely to have adverse impacts.
Moderate	If the threat event is initiated or occurs, it is somewhat likely to have adverse impacts.
High	If the threat event is initiated or occurs, it is highly likely to have adverse impacts.
Very High	If the threat event is initiated or occurs, it is almost certain to have adverse impacts.

Impact refers to the magnitude of potential harm to the information system (or its data) by successful vulnerability exploitation. Definitions for the impact are in Table 11. Since exploitation has not yet occurred, these values are perception values based on available information system information if the exploitation of a vulnerability can cause significant loss to a system (or its data) then the impact is “Very High”.

Table 11: Impact Definitions from NIST 800-30 Rev. 1 Publication

Impact Probability	Description
Very Low	The threat event could be expected to have a negligible adverse effect on organizational operations, organizational assets, individuals other organizations, or the Nation.
Low	The threat event could be expected to have a limited adverse effect on organizational operations, organizational assets, individuals other organizations, or the Nation. A limited adverse effect means that, for example, the threat event might: (i) cause a degradation in mission capability to an extent and duration that the organization is able to perform its primary functions, but the effectiveness of the functions is noticeably reduced; (ii) result in minor damage to organizational assets; (iii) result in minor financial loss; or (iv) result in minor harm to individuals

Moderate	The threat event could be expected to have a serious adverse effect on organizational operations, organizational assets, individuals other organizations, or the Nation. A serious adverse effect means that, for example, the threat event might: (i) cause a significant degradation in mission capability to an extent and duration that the organization is able to perform its primary functions, but the effectiveness of the functions is significantly reduced; (ii) result in significant damage to organizational assets; (iii) result in significant financial loss; or (iv) result in significant harm to individuals that does not involve loss of life or serious life-threatening injuries.
High	The threat event could be expected to have a severe or catastrophic adverse effect on organizational operations, organizational assets, individuals, other organizations, or the Nation. A severe or catastrophic adverse effect means that, for example, the threat event might: (i) cause a severe degradation in or loss of mission capability to an extent and duration that the organization is not able to perform one or more of its primary functions; (ii) result in major damage to organizational assets; (iii) result in major financial loss; or (iv) result in severe or catastrophic harm to individuals involving loss of life or serious life-threatening injuries.
Very High	The threat event could be expected to have multiple severe or catastrophic adverse effects on organizational operations, organizational assets, individuals, other organizations, or the Nation.

The combination of the Likelihood Probability and the Impact Probability creates the risk exposure. The risk exposure matrix shown in Table 12 presents the same likelihood and impact severity ratings as those found in *NIST SP 800-30 Rev. 1 Risk Management Guide for Information Technology Systems*.

Table 12: Risk Exposure Ratings from NIST 800-30 Rev. 1 Publication

Likelihood	Impact				
	Very Low	Low	Moderate	High	Very High
Very High	Very Low	Low	Moderate	High	Very High
High	Very Low	Low	Moderate	High	Very High
Moderate	Very Low	Low	Moderate	Moderate	High
Low	Very Low	Low	Low	Low	Moderate
Very Low	Very Low	Very Low	Very Low	Very Low	Very Low

Using Table 12 as a reference, Coalfire Federal Services reviewed all identified vulnerabilities and assigned a risk exposure located in the <System Acronym> SRTM in Appendix B.

Documenting the results of security control testing creates a record of the security posture for the system at a given moment in time. The record can be used by the AO to make risk-based decision and to create plans of action to mitigate unacceptable residual risks.

FISMA requires that a Plan of Action and Milestones (POA&M) be developed. The POA&M is a mitigation plan designed to address specific residual security risks and includes information on costing, resources, and target dates for remediation efforts resolving the identified security weaknesses. The plan is utilized as the primary mechanism for tracking all the residual risks and other issues. SSA will leverage the SAR to create a POA&M for <System Acronym>.

5 Security Assessment Results

This section describes all security risks found during assessment. The following elements for each security risk are reported.

- Identifier
- Name
- Source of Discovery
- Description
- Affected internet protocol (IP) Address/Hostname/Database
- Applicable Threats
- Likelihood (before mitigating controls/factors)
- Impact (before mitigating controls/factors)
- Risk Exposure (before mitigating controls/factors)
- Risk Statement
- Mitigating Controls/Factors
- Likelihood (after mitigating controls/factors)
- Impact (after mitigating controls/factors)
- Risk Exposure (after mitigating controls/factors)
- Recommendation

Below is a description of the SAR security risk elements.

- **Identifier:** All weaknesses are assigned a vulnerability identifier (ID) in the form of V#-Security Control ID. For example, the first vulnerability listed would be reported as V1-AC-2(2) if the vulnerability is for control ID AC-2(2). If there are multiple vulnerabilities for the same security control ID, the first part of the vulnerability ID must be incremented, for example V1-AC-2(2), V2-AC-2(2).
- **Name:** A short, unique name for each vulnerability.
- **Source of Discovery:** The source of discovery refers to the method that was used to discover the vulnerability (e.g., web application scanner, manual testing, security test procedure workbook, interview, document review). References must be made to scan reports, security test case procedure IDs, staff that were interviewed, manual test results, and document names. All scans reports are attached in Appendix C, Appendix D, Appendix E, and Appendix F. Results of manual tests can be found in Appendix G. If the source of discovery is from one of the security test procedure workbooks, a reference must point to the workbook name, the sheet number, and the cell number. Workbook tests results are found in Appendix B. If the source of discovery is from an interview, the date of the interview and the people who were present at the interview are named. If the source of discovery is from a document, the document must be named.

- **Description:** All security weaknesses must be described in enough detail to be reproduced by the stakeholder, the Information System Security Officer (ISSO), or the AO. If a test was performed manually, the exact manual procedure and any relevant screenshots must be included. If a test was performed using a tool or scanner, a description of the reported scan results for that vulnerability must be included along with the vulnerability identifier (e.g., Common Vulnerabilities and Exposures (CVE), Common Vulnerability Scoring System (CVSS), Nessus Plugin ID) and screenshots of the particular vulnerability being described. If the tool or scanner reports a severity level, that level must be reported in this section. Any relevant login information and role information must be included for vulnerabilities discovered with scanners or automated tools. If any security weaknesses affect a database transaction, a discussion of atomicity violations must be included.
- **Affected IP Address/Hostname(s)/Database:** For each reported vulnerability, all affected IP addresses/hostnames/databases must be included. If multiple hosts/databases have the same vulnerability, list all affected hosts/databases.
- **Applicable Threats:** The applicable threats describe the unique threats that have the ability to exploit the security vulnerability. (Use threat numbers from **Error! Reference source not found.**)
- **Likelihood (before mitigating controls/factors):** Very High, High, Moderate, Low, or Very Low (see **Error! Reference source not found.**).
- **Impact (before mitigating controls/factors):** Very High, High, Moderate, Low, or Very Low (see **Error! Reference source not found.**).
- **Risk Exposure (before mitigating controls/factors):** Very High, High, Moderate, Low, or Very Low (see **Error! Reference source not found.**).
- **Risk Statement:** Provide a risk statement that describes the risk to the business. (See examples in **Error! Reference source not found.**). Also indicate whether the affected machine(s) is/are internally or externally facing.
- **Mitigating Controls/Factors:** Describe any applicable mitigating controls/factors that could downgrade the likelihood or risk exposure. Also indicate whether the affected machine(s) is/are internally or externally facing. Include a full description of any mitigating factors and/or compensating controls if the risk is an operational requirement.
- **Likelihood (after mitigating controls/factors):** Moderate or Low (see **Error! Reference source not found.**) after mitigating control/factors have been identified and considered.
- **Impact (after mitigating controls/factors):** Moderate or Low (see **Error! Reference source not found.**) after mitigating control/factors have been identified and considered.
- **Risk Exposure (after mitigating controls/factors):** Moderate or Low (see **Error! Reference source not found.**) after mitigating controls/factors have been identified and considered.
- **Recommendation:** The recommendation describes how the vulnerability should be resolved. Indicate if there are multiple ways that the vulnerability could be resolved or recommendation for acceptance of operational requirement.

5.1 Security Assessment Summary

<Two (2) vulnerabilities, (0 high, zero moderate, 2 low)> have been discovered as part of the manual security assessment testing. Vulnerability scans provided did not provide enough information to provide analysis of scan vulnerability to assessment result.

The vulnerabilities summary is contained in the following embedded file:

Table 13: Risk Exposure

T2 Risk Exposure
Table.xlsx

<Embed applicable system's Risk Exposure table, EXAMPLE attached.>

6 Non-conforming Controls

In some cases, the initial risk exposure to the system has been adjusted due to either corrections that occurred during testing or to other mitigating factors. Additional detail is provided in the following sections.

6.1 Risks Corrected During Testing

Any risks that were discovered during the testing of the <System Acronym> subsystems and subsequently mitigated prior to authorization are listed in Table 14. Coalfire Federal Services verified risks corrected during testing. The verification method used to determine correction is noted in the right-hand column of Table 14.

Table 14: Summary of Risks Corrected During Testing

Identifier	Description	Source of Discovery	Initial Risk Exposure	Remediation Description	Date of Remediation	Verification Statement/Testing Procedures

6.2 Risks with Mitigating Factors

Risks that have had their severity levels changed due to mitigating factors are summarized in Table 15. The factors used to justify changing the initial risk exposure rating are noted in the right-hand column of the table. See Table 13 for more information on these risks.

Table 15: Summary of Risks with Mitigating Factors

Identifier	Description	Source of Discovery	Initial Risk Exposure	Current Risk Exposure	Description of Mitigating Factors

6.3 Risks Remaining Due to Operational Requirements

Risks that reside in the <system acronym> that cannot be corrected due to operational constraints are summarized in **Error! Reference source not found.** An explanation of the operational constraints and risks are included in **Error! Reference source not found.** as well as in the appropriate security assessment test cases and SSP. Because these risks will not be corrected, they are not tracked in the POA&M. See **Error! Reference source not found.** for more information on these risks.

Table 16: Summary of Risks Remaining Due to Operational Factors

Identifier	Description	Source of Discovery	Current Risk Exposure	Operational Requirements Rationale

7 Risks Known for Interconnected Systems

Inherent relationships between the system and other interconnected systems may affect the overall system security posture. A summary of the risks known for systems that connect to <System Acronym> is provided in Table 17.

Table 17: Risks from Interconnected Systems

System	Authorization Date/Status	Date of POA&M	Control Family Identifier

8 Recommendations

<System Acronym> subsystem risks that were discovered during the assessment have an impact on the security posture of the SSA Federal Agency as a whole. These risks must be mitigated and Coalfire Federal Services has made recommendations in the Risk Exposure section, Table 14. These recommendations should be addressed by the SAM, system owners, OIS, and other stakeholders that have a responsibility for the controlling the overall risk of <System Acronym>.

Appendix A. Acronyms and Terms

Acronyms and terms used throughout this SAR are defined in Table 18.

Table 18: Acronyms and Terms

Acronym/Term	SAR Acronym Definitions
AC	Associate Commissioner
AC	Access Control
AO	Authorizing Official
ARB	Architecture Review Board
ART	Analysis and Reporting Tool
AU	Audit and Accountability
BRI	Benefit Rate Increase
BSM	Boundary Scope Memo
CA	Security Assessment and Authorization
CCB	Configuration Control Board
CIC	Customer Information Control System
CM	Configuration Management
CMP	Contingency Management Plan
COTR	Contract Officer's Technical Representative
CSAM	Cyber Security Assessment & Management
CSO	Component Security Officer
CVE	Common Vulnerabilities and Exposures
CVSS	Common Vulnerability Scoring System
DCS	Deputy Commissioner for Systems
DSPP	Division of Security Policy & PII
EPECS	Electronic Personal Enrollment Credential System
EPO	ePolicy Orchestrator
FIPS	Federal Information Processing Standard
FISMA	Federal Information Security Modernization Act
FOIA	Freedom of Information Act
HRMIS	Human Resources Management Information System
HRODS	Human Resources Operational Data Store
HSPD	Homeland Security Presidential Directive
IA	Identification and Authentication
ID	Identification

IP	Internet Protocol
ISCP	Information System Contingency Plan
ISO	Information Security Officers
ISP	Information Security Policy
ISSO	Information System Security Officer
LIS	Low Income Subsidy
NIST	National Institute of Standards and Technology
NSC	National Support Center
OIS	Office of Information Security
OMB	Office of Management and Budget
OSOHE	Office of Systems Operations and Hardware Engineering
OTSO	Office of Telecommunications and Systems Operations
PAM	Payment Application Modernization
PCCB	Project Configuration Control Board
PIN	Personal Identification Number
PIV	Personal Identification Verification
PL	Public Law
PL	(Control) Planning
PM	Program Manager
POA&M	Plan of Action and Milestones

SOC	Security Operation Division

SP	Special Publication
SRC	System Release Certificate
SRTM	Security Requirements Traceability Matrix
SSA	Social Security Administration
SSC	Secondary Support Center
SSP	System Security Plan
SVR	Security Violations Report
Threat	An adversarial force or phenomenon that could affect the availability, integrity, or confidentiality of an information system, its networks, and the facility that houses the hardware and software.
Threat Actor	An entity that initiates the launch of a threat agent is referred to as a threat actor.
Threat Agent	An element that provides the delivery mechanism for a threat.
UPS	uninterruptable power supply
USC	United States Code
Vulnerability	An inherent weakness in an information system that can be exploited by a threat or threat agent, resulting in an undesirable impact in the protection of the confidentiality, integrity, or availability of the system (application and associated data).

Appendix B. Security Risk Traceability Matrix (SRTM)

The Security Risk Traceability Matrix (SRTM) with test results and test procedures are within the following embedded document in Table 19.

Table 19: Security Test Procedure Workbook

T2 SRTM
Worksheet.xlsx

<Embed the applicable system's Security Risk Traceability Matrix (SRTM), EXAMPLE attached.>

Appendix C. Infrastructure Scan Results

The Nessus scanner along with the McAfee ePolicy Orchestrator (EPO) deployed by the SOC was used to scan SSA servers. Associated Windows Database servers that have the EPO agent deployed within the <System Acronym> boundary were scanned. The other <System Acronym> servers did not have any vulnerability scanning tools available, which allowed for scanning of mainframe or storage hardware, and therefore were not scanned.

Infrastructure Scans: Inventory of Items Scanned

1 Risk Assessment Report (RAR) Background

The Office of Management and Budget (OMB) directive requires the Social Security Administration (SSA) to assess and re-authorize its major information technology (IT) systems at least once every three years and in the event of a major change, when that change occurs. This information must be reported in the annual Federal Information Security Modernization Act (FISMA) report to OMB and Congress during the fourth quarter (Q4) of each year. OMB has directed Chief Information Officers (CIO) of Federal agencies to follow the guidance found in the National Institute of Standards and Technology (NIST) Special Publication (SP) 800-37 Revision 1, *Guide for Applying the Risk Management Framework to Federal Information Systems*, to assess and re-authorize their information systems. This security authorization process contains subordinate efforts including performing risk-based reviews of the systems, developing/updating system security plans (SSP), and assessing and testing the security controls implemented for SSA's information systems.

2 RAR Executive Summary for <System Name>

The Office of Information Security (OIS) contracted with Coalfire Federal Services, a third party assessment organization (3PAO), to conduct a system specific risk assessment on <system name> (<ACRONYM>). The acting Director of the Division of Compliance and Assessments, and the Security Authorization Manager (SAM) of <SYSTEM ACRONYM> approved the controls selected for this risk assessment. Thirty-two (32) controls were tested over eleven (11) different NIST 800-53 Rev 4 control families. These controls were selected out of the <system categorization> baseline due to <SYSTEM ACRONYM> being categorized as a <system categorization> system as per the FIPS 199. During the assessment, there were <55 manual tests conducted, 62 interviews, and 84 document examinations>. Each of these is a requirement of a specific control. At the conclusion of the assessment, two controls were identified as "not implemented". It should be noted that these controls have since been identified as common and should be added to the common control list. The controls that were not implemented, identified as PS4 (personnel termination), and PS 5 (personnel transfer), requires the SSA Information Security Policy (ISP) to document specific exit interview security debrief policies and procedures and the defined time period in which these must be carried out. Please refer to Table 5 for specific details. The likelihood of these vulnerabilities being exploited combined with the potential system impact is considered an overall **LOW** risk to the system. It is recommended that the <system name> assigned representative from the Security Assessment and Authorization Branch (SAAB) work with the System Authorization Manager (SAM) to mitigate these risks. Due to the overall identified risk being LOW, it is recommended that this be considered an acceptable risk and the system be given an authority to operate (ATO) for the next three years.

3 <system name> System Purpose

The <system name> (<ACRONYM>) system, has a <system categorization> Security Categorization. The boundaries are designed to aid SSA in the accomplishment of its mission to provide cost-effective and reliable services to other Federal agencies, and the public at large.

<Insert detailed information>

Coalfire Federal Services' objective is to provide IT Independent Verification and Validation (IV&V) Support Services for <SYSTEM ACRONYM>.

4 Risk Assessment Approach

4.1 Risk Assessment Purpose

The purpose of this Risk Assessment Report (RAR) is to summarize the residual risk identified during the security assessment of <SYSTEM ACRONYM>. Risk is a factor derived from a vulnerability that can be exploited and the likelihood that it will be exploited. Please see Appendix A for the NIST 800-60 Volume II publication for the definition of risk.

4.2 Risk Assessment Objective

The objective of the risk assessment is to identify any controls that are not fully implemented as required by FISMA. Controls that are not implemented pose a measureable risk to SSA and that risk must be mitigated in a timely manner based on the level or risk the non-implemented control creates. For example, a low risk may only require an update to a policy or a POA&M that the system's SAM must execute. Another example is a High risk that must have immediate action taken by the SAM and other stakeholders in order to prevent a threat actor(s) from exploiting the discovered risk.

4.3 Risk Assessment Scope

The previous system specific risk assessment was conducted on <SYSTEM ACRONYM> in <date>. The residual risk was identified and submitted to the SSA's CIO. This submission was in accordance with OMB and FISMA guidelines to present the risk level of <SYSTEM ACRONYM> and ask for the ATO <SYSTEM ACRONYM> for the next three years. The CIO granted the ATO on <Month DD, YYYY> and allowed <SYSTEM ACRONYM> to operate from <Month DD, YYYY> to <Month DD, YYYY>.

A new risk assessment is required by OMB and FISMA in order to identify the current residual risk and any risks associated with controls that are not fully implemented. The assessed controls were selected based on the <SYSTEM ACRONYM> Security Assessment Plan (SAP) approved by the OIS Director and the <SYSTEM ACRONYM> SAM.

In addition to the controls selected, SSA uses the Nessus scanner along with the McAfee ePolicy Orchestrator (EPO) deployed by the SOC to look for signature based vulnerabilities in accordance with the SSA ISP. Associated Windows Database servers that have the EPO agent deployed within the <SYSTEM ACRONYM> boundary were scanned. The other <SYSTEM ACRONYM> servers did not have any vulnerability scanning tools available that could scan mainframe or storage hardware, and therefore were not scanned.

The risk assessment was performed in accordance with all applicable laws, regulations, rules and orders of all governmental agencies and authorities. A complete list of referenced publications and regulations can be found in [Appendix A](#). All risks associated with <SYSTEM ACRONYM> that were identified during the assessment and the potential impact of those risks are documented in this RAR.

The RAR complies with the following SSA guidance:

- SSA [ISP](#)

4.4 Limitations

The <SYSTEM ACRONYM> subsystems, which reside within the National Support Center (NSC), rely on the Office of Systems Operations and Hardware Engineering (OSOHE) for hardware, software, and maintenance support. Additionally, user access and user profile provisioning for <SYSTEM ACRONYM> subsystems residing on the mainframe, are provided by CA Top Secret, and managed by the Office of Systems Operations and Hardware Engineering (OSOHE), not by <SYSTEM ACRONYM>. Therefore, some access controls specific to <SYSTEM ACRONYM> are tested during an enterprise level common control assessment, and not during the <SYSTEM ACRONYM> system specific assessment reported within this RAR.

This assessment was limited to the 32 system specific controls as listed in the approved SAP.

4.5 Risk Assessors

The participants in this risk assessment included the following Coalfire Federal Services personnel:

Table 3: Assessment Team Points of Contact

Name	Role	Contact Information
<TJ Crews>	Program Manager	< Tj.crews@ssa.gov >
<Kenneth Free>	Lead Assessor (Senior Analyst)	< kenneth.free@ssa.gov >
<Gregory Bonham>	Junior Assessor	< gregory.bonham@ssa.gov >
<Thomas G. Volpe, Sr.>	Lead Assessor (Surge Support)	< Thomas.G.Volpe@ssa.gov >

The following techniques and NIST/FIPS publications were used to gather information relevant to the <SYSTEM ACRONYM>:

- **NIST SP 800-60 Volume II Revision 1/ and FIPS 199.** The Risk Assessment (RA) Team utilized the <SYSTEM ACRONYM> Security Categorization, dated February 16, 2017 to determine associated system security categorization for the <SYSTEM ACRONYM>. System security categorization determines which recommended set of minimum (baseline) security controls from NIST SP 800-53 Revision 4 must be implemented.
- **NIST SP 800-53 Revision 4.** The RA Team utilized NIST SP 800-53 Revision 4 to determine the recommended set of minimum-security controls. The security controls (management, operational, and technical safeguards or countermeasures) were reviewed to ensure they adequately protect the confidentiality, integrity, and availability of the <SYSTEM ACRONYM>, and that the selected security controls have been implemented, or there is a plan for future implementation.
- **Interviews.** Interviews were conducted on-site with the SAM, System Administrator, and Database Administrator by the RA Team to collect useful information about the <SYSTEM ACRONYM>. Follow-up communications were conducted via email and by telephone to collect additional information about the <SYSTEM ACRONYM>.
- **Examination/Document Reviews.** The RA Team reviewed documentation from the SSA for <SYSTEM ACRONYM>, such as policy and implementation guidance. POA&M, and the prior Security Assessment and Authorization (SA&A) Package, including the previous SSP, Risk Assessment, and the Security Control Assessment (SCA) Plan were reviewed.
- **Testing of Systems.** Testing and Evaluation of security controls for <SYSTEM ACRONYM> was based on System Specific and Hybrid security controls defined by the OIS Rev4 SSA Control Inheritance Structure Worksheet with a <SYSTEM CATEGORIZATION> Baseline. Using the NIST Guidance from NIST SP 800-53A Revision 4, the RA Team tested and evaluated these controls for specified conditions that compare actual with expected behavior, the results of which are used to support the determination of security control existence, functionality, correctness, completeness, and potential for improvement over time.

4.6 Results

The overall risk level of the <SYSTEM ACRONYM> was determined to be **Low**, which is the combination of the likelihood of identified threats being able to exploit known system vulnerabilities and the potential the impact to <SYSTEM ACRONYM>.

Low risk indicates that corrective actions are needed and a plan must be developed to incorporate these actions within a reasonable period of time. The preliminary review of security measures for the protection of the <SYSTEM ACRONYM> identified two low threat-vulnerability pairs (risks) in the overall risk assessment as summarized below in Table 2.

Table 4: Overall Risk Level

Risk Rating	Control Category			
	Management	Operational	Technical	Total
Very High	0	0	0	0
High	0	0	0	0
Moderate	0	0	0	0
Low	2	0	0	2
Very Low	0	0	0	0
Total	2	0	0	2

4.7 Recommendation

It is the recommendation from the Office of Information Security that an issuance of an Authority to Operate (ATO) for *<system name>* (*<ACRONYM>*) be given. This recommendation comes from the assessment findings from the 3PAO that conducted a system specific security assessment. The overall security categorization of *<SYSTEM ACRONYM>* is *<system categorization>* and the findings have an overall risk of **LOW**.

5 Summary of Findings

Table 5: <SYSTEM ACRONYM> Results Summary

Item No.	Finding (In Order by Control Family)	Threat Source	Likelihood Level	Impact Level	Risk Level	Recommended Corrective Action(s)
V-1	<p>PS-4.c.1 PS-4.c.2</p> <p>Personnel Termination SSA ISP does not define the security debrief topics or policy to discuss with separating employees. In addition, the SSA ISP has no policy, guidelines for including the security debrief actions, or SSA specific information security topics during the exit interview as defined in PS-4.c.1 and PS-4.c.2.</p>	<p>Insider Threat with Intent (e.g., Poorly Trained, Disgruntled, Malicious, Negligent, Dishonest, or Terminated Employees)</p> <p>Insider Threat without Intent or Knowledge</p> <p>Computer Crime/Hackers</p> <p>Espionage (e.g., Companies, Foreign Governments, or Other Government Interests)</p>	Low	Low	Low	<p>This is an agency requirement that must be reflected in the SSA ISP and is the responsibility of Division of Security Customer Service (DSCS). The Security Authorization Manager (SAM) is not responsible for updating policy. The SSA ISP should be updated to include a requirement that employees sign a Non-Disclosure Agreement (NDA), and have a security debrief to discuss the importance of not disclosing knowledge of specifics pertaining to the SSA information system environment. The ISP section 2.1.1.3 should be updated to reflect this. In addition, section 2.1.1.3 should be updated to reflect that a security debrief must be included as part of the exit interview. Exit interview guidance is currently located here: http://personnel.ba.ssa.gov/OPE/cpps/exitprocedures.html</p>

Item No.	Finding (In Order by Control Family)	Threat Source	Likelihood Level	Impact Level	Risk Level	Recommended Corrective Action(s)
V-2	<p>PS-5.b.1 PS-5.b.2</p> <p>Personnel Transfer SSA ISP does not define what security actions are to be taken when an employee is transferred or reassigned. The SSA ISP also does not specify the time period in which security actions that are defined in must occur.</p>	<p>Insider Threat with Intent (e.g., Poorly Trained, Disgruntled, Malicious, Negligent, Dishonest, or Terminated Employees)</p> <p>Insider Threat without Intent or Knowledge</p>	Low	Low	Low	This is an agency requirement that must be reflected in the SSA ISP and is the responsibility of DSCS. The ISP section 2.4 should be updated to define what security actions need to occur, in what period of time and what personnel or role is to be identified to be notified when an employee is transferred or reassigned.

Authority To Operate (ATO) Recommendation

Acceptance and Signature	
<p>As the Security Authorization Manager (SAM) for <system name>, I hereby certify that this Risk Assessment Report provides an accurate representation of the system and its subsystems that were assessed. I also certify that it is my recommendation based on the findings that the SSA Chief Information Officer (CIO) grant an Authority to Operate (ATO) for <system name> for the next three (3) years.</p>	
<p>Security Authorization Manager: <name></p>	
<p>As the Acting Director of the Division of Compliance and Authorization (DCA) in the Office of Information Security (OIS), I hereby certify that this Risk Assessment Report provides an accurate representation of the system and its subsystems that were assessed. I also certify that it is my recommendation based on the findings that the SSA Chief Information Officer (CIO) grant an Authority to Operate (ATO) for <system name> for the next three (3) years.</p>

PREFACE

To carry out its wide-ranging responsibilities, the Social Security Administration (SSA), and its employees and managers have access to diverse and complex automated information systems, which includes, file servers, local and wide area networks (LANs/WANs) running on various platforms, and telecommunications systems. The components and offices within the SSA depend on the confidentiality, integrity, and availability (as defined by the Federal Information Processing Standard (FIPS) 199) of these systems and their data in order to accomplish day-to-day operations.

In accordance with Office of Management and Budget (OMB) Circular A-130, Appendix III, all federal systems have value and require some level of protection. The generic term “system” is used to mean either a general support system or a major application. (See NIST Special Publication 800-18, *Guide for Developing Security Plans for Federal Information Systems* for additional information).

EXECUTIVE SUMMARY

The SSA relies on its information technology (IT) systems, including the [Enter SYSTEM NAME (Acronym)], to accomplish its undertaking of providing cost-effective and reliable services to the SSA, other Federal agencies, and the public at large. Since this externally hosted information system is part of an SSA security authorization boundary, it is subject to meet some or all of the SSA specific security requirements depending upon the information it processes and the services it provides for the SSA.

[Provide an EXECUTIVE SUMMARY and overview of the information system. This summary should describe what the information system is, what its importance is to SSA, who is in the user audience, and any additional subsystems that is encompassed in the system.]

The purpose of this system security plan is to provide an overview of the security requirements of the [ENTER SYSTEM NAME HERE] system and describe the controls in place or planned for meeting those requirements. The system security plan also delineates responsibilities and expected behavior of all individuals who access the system.

The SSP documents the structured process of planning adequate, cost-effective security protection for a system. It shall reflect input from various managers/stakeholders with responsibilities concerning the system from the hosting company and from the SSA component for which the system provides services.

 [Note: This SSP template shall be used to document an external hosted Information Systems that "IS" associated with one of the existing SSA Security Authorization Boundaries.

As part of the development of this SSP document, the external system ISO or designee along with the SSA SAM and the Office of Information Security (OIS) will need to follow the instructions to determine which new application/system/sub-system should be included or associated with SSA. See section 1.1 below for more details related to this process.] ← DELETE THESE INSTRUCTIONS UPON COMPLETION

SYSTEM SECURITY PLAN AGREEMENT SUMMARY

This SSP documents a formal agreement among the organizational officials approving the security controls designed to meet the security requirements for the [SYSTEM NAME]. These officials are the SSA System Owner (SO), (External Contractor) Information System Security Officer (ISSO), SSA Security Authorization Manager (SAM) and the SSA Authorizing Official (AO).

Each organizational official has signed this agreement summary for the reasons identified below and has concurred with the security category of this Controlled Unclassified Information (CUI) system to be [LOW/MODERATE]. See Executive Order 13556 for more information on CUI.

 [Check the box below that is applicable ← DELETE]

- Initiation of the System Security Plan (including FIPS 199 security categorization)¹**
- Annual Update of the System Security Plan (no significant changes)**

Acceptance and Signature	
As the Designated Representative(s) for <System Name>, I hereby certify that the <System Acronym> System Security Plan described in this document provides an accurate representation of the <System Acronym> and its subsystems.	
SSA Security Authorization Manager [ENTER NAME OF SAM ← DELETE]	<Insert digital signature>
SSA DSP Director [ENTER NAME OF DSP DIRECTOR] ← DELETE	<Insert digital signature>

¹ When there are no significant changes, the System Owner, Information System Security Officer and SSA Security Authorization Manager must sign the agreement summary for an annual update. The Authorizing Official is not required to sign if there are no significant changes affecting the security posture of the system requiring reauthorization. Reauthorization is addressed via a formal memorandum approving the security plan and authorizing the system to operate for a specified period of time.

1.3 Information System Categorization

Security categorizations are to be performed as the first step in the security authorization process as required by Federal Information Processing Standard (FIPS) 199 in order to select appropriate system security controls to be addressed throughout the rest of the security authorization. FIPS 199 categories are derived according to the potential impact on the agency that would occur if its Confidentiality, Integrity, or Availability were compromised. FIPS 199 category definitions are as follows:

- **High Impact:** The loss of confidentiality, integrity, or availability could be expected to have a severe or catastrophic adverse effect on organizational operations, organizational assets, or individuals.
- **Moderate Impact:** The loss of confidentiality, integrity, or availability could be expected to have a serious adverse effect on organizational operations, organizational assets, or individuals. (*At SSA, the highest security categorization is currently Moderate*)
- **Low Impact:** The loss of confidentiality, integrity, or availability could be expected to have a limited adverse effect on organizational operations, organizational assets, or individuals.

Based on the system categorization of this externally hosted system the [SYSTEM ACRONYM] system has been categorized as a [LOW/MODERATE] system according to FIPS 199.

1.4 General Description of Information Sensitivity

Sensitive information is defined by the Computer Security Act (section 552a of Title 5, United States Code) as any information, the loss, misuse, or unauthorized access to or modification of which could adversely affect the national interest or the conduct of federal programs, or the privacy to which individuals are entitled. The National Institute of Standards and Technology (NIST) Special Publication 800-122 *Guide to Protecting the Confidentiality of Personally Identifiable Information (PII)* further defines the requirements for Personal Identity Information (PII) which SSA follows with regard to protecting its sensitive PII.

FIPS 199 defines security categories for information systems based on potential impact on organizations, assets, or individuals should there be a breach of security—that is, a loss of confidentiality, integrity, or availability. FIPS 199 security categories play an important part in defining information system security boundaries by partitioning the agency's information systems according to the criticality or sensitivity of the information and information systems and the importance of those systems in accomplishing the agency's mission. This is particularly important when there are various FIPS 199 impact levels contained in one information system. The FIPS 199 requirement to secure an information system to the high watermark or highest impact level must be applied when grouping minor applications/subsystems with varying FIPS 199 impact levels into a single general support system or major application unless there is adequate boundary protection, e.g., firewalls and encryption, around those subsystems or applications with the highest impact level. Additionally, there must be assurance that the shared resources, i.e., networks, communications, and physical access within the whole general support system or major application, are protected adequately for the highest impact level. Having the ability to isolate the high impact systems will not only result in more secure systems, but will also reduce the amount of resources required to secure many applications/systems that do not require that level of security. NIST SP 800-53 provides three security control baselines, i.e., low, moderate, and high (high is not addressed by this SSP), that are associated with the three FIPS 199 impact levels; as the impact level increases, so do the minimum assurance requirements. For reporting purposes, i.e., FISMA annual report, when an information system has varying FIPS 199 impact levels, that system is categorized at the highest impact level on that information system.

1.5 Impact Level for Information Types

The following tables identify the information types that are input, stored, processed, and/or output from **[System Acronym]**. The selection of the information types is based on guidance provided by OMB Federal Enterprise Architecture Program Management Office Business Reference Model 2.0 (<http://www.whitehouse.gov/omb/e-gov/fea>), and the FIPS 199, *Standards for Security Categorization of Federal Information and Information Systems*, and NIST Special Publication (SP) 800-60, *Guide for Mapping Types of Information and Information Systems to Security Categories*. SP 800-60 includes two volumes: Volume I is a basic guideline and Volume II contains appendices. Users should review the guidelines provided in Volume I, then refer to only the material from the appendices that is applicable. NIST SP 800-60 is available for download at <http://csrc.nist.gov/publications/>.

The potential impact is **LOW** if—

The loss of confidentiality, integrity, or availability could be expected to have a limited adverse effect on organizational operations, organizational assets, or individuals.

A limited adverse effect means that, for example, the loss of confidentiality, integrity, or availability might: (i) cause a degradation in mission capability to an extent and duration that the organization is able to perform its primary functions, but the effectiveness of the functions is noticeably reduced; (ii) result in minor damage to organizational assets; (iii) result in minor financial loss; or (iv) result in minor harm to individuals.

The potential impact is **MODERATE** if—

The loss of confidentiality, integrity, or availability could be expected to have a serious adverse effect on organizational operations, organizational assets, or individuals.

A serious adverse effect means that, for example, the loss of confidentiality, integrity, or availability might: (i) cause a significant degradation in mission capability to an extent and duration that the organization is able to perform its primary functions, but the effectiveness of the functions is significantly reduced; (ii) result in significant damage to organizational assets; (iii) result in significant financial loss; or (iv) result in significant harm to individuals that does not involve loss of life or serious life threatening injuries.

The potential impact is **HIGH** if—

The loss of confidentiality, integrity, or availability could be expected to have a severe or catastrophic adverse effect on organizational operations, organizational assets, or individuals.

A severe or catastrophic adverse effect means that, for example, the loss of confidentiality, integrity, or availability might: (i) cause a severe degradation in or loss of mission capability to an extent and duration that the organization is not able to perform one or more of its primary functions; (ii) result in major damage to organizational assets; (iii) result in major financial loss; or (iv) result in severe or catastrophic harm to individuals involving loss of life or serious life threatening injuries.

 [List the different information types per NIST SP 800-60 and indicate provisional impact level. Add or modify information types if necessary]. This information can be copy/pasted from the SSA Parent System FIPS199 Security Categorization Review documentation, Section 4. ← DELETE THESE INSTRUCTIONS UPON COMPLETION

1.15 Security Authorization Boundary

[Provide information of where the information system is located; where backups and restores are conducted, and specifically where databases are housed. Provide an explanation of where the servers are located (company facility, datacenter, etc.), personnel, public access or not, how the systems are connected, how remote users can connect and how in and outbound internet connections are secured and maintained]. ← DELETE

[INSERT a diagram of the information security authorization boundary showing its connections/interfaces/other relationships to SSA.] ← DELETE

Figure 2: [System Acronym] Accreditation Boundary

1.16 System Inventory

The hardware (HW) and software (SW) components included in the externally hosted, non-SSA [System Acronym] boundary are listed in the tables below. <System acronym> consists of multiple technologies. Table 11 contains a listing of technologies (hardware, software, technologies and platforms) that reside within the <system acronym> authorization boundary. Technology is listed per system and subsystem:

<Complete the embedded spreadsheet with system specific information.>

Table 11: Inventory: List of Technologies

Table 6_Inventory -
List of Technologies -

NOTE: Any changes to the scope of the Authorization Boundary after the Boundary Scope Meeting and finalization of the BSM may impact the overall IV&V schedule.

1.17 System Interconnections

The externally hosted [SYSTEM ACRONYM] requires that written agreements (e.g., Memorandums of Understanding (MOUs), Memorandums of Agreement (MOAs), Interconnection Security Agreements (ISAs), etc., on the security controls to be enforced on interconnecting systems and must be obtained prior to connecting and/or sharing sensitive data/information. Table 18 shows the status of these agreements between [SYSTEM ACRONYM] and the external systems that share its information. [SYSTEM ACRONYM] [Has /does not have] external communications requiring MOUs or ISAs.

Table 12: [System Acronym] System Interconnections

Information System	Organization	Type (GSS/MA)	Agreement (ISA/MOU/MOA)	Date	FIPS 199 Category	C&A Status	DAA
N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

2 [System Acronym] NIST SP 800-53 - Rev 4 MINIMUM SECURITY CONTROLS

The minimum security control baseline for [LOW/MODERATE]-impact systems from NIST SP 800-53 Revision 4 is documented below. Specifically, this section provides a description of how all the minimum-security controls in the baseline are being implemented, planned, and compensated or how they will be implemented in the future. The table contains: (1) the NIST SP Publication and revision number (2) the security control family and specific control with applicable enhancements; (3) if the security control is a common control, hybrid or system specific (4) the implementation statement; how the security control is being implemented or how it will be implemented (5) the implementation status to determine whether the control is in place, not in place, compensated or not applicable and (6) comments to capture specific notes about the control's implementation. (Note: if not in place, an explanation will need to be provided under this section). Implementation statements of controls identified as common will reference the system and/or SSP that the control is inherited from.

2.1 Security Controls

Organizations employ security controls in federal information systems and the environments in which those systems operate in accordance with FIPS Publication 199, FIPS Publication 200, and NIST Special Publications 800-37 and 800-39. Security categorization of federal information and information systems, as required by FIPS Publication 199, is the first step in the risk management process. Next, organizations select an appropriate set of security controls for their information systems by satisfying the minimum-security requirements set forth in FIPS Publication 200. Appendix D includes three security control baselines that are associated with the designated impact levels of information systems as determined during the security categorization process. After baseline selection, organizations tailor the baselines by: (i) identifying/designating common controls; (ii) applying scoping considerations; (iii) selecting compensating controls, if needed; (iv) assigning control parameter values in selection and assignment statements; (v) supplementing the baseline controls with additional controls and control enhancements from the security control catalog; and (vi) providing additional information for control implementation.

2.1.1 Access Control (AC)

2.1.1.1 AC-1 Access Control Policy and Procedures

The organization:

- a. Develops, documents, and disseminates to [Assignment: organization-defined personnel or roles]:
- b. An access control policy that addresses purpose, scope, roles, responsibilities, management commitment, coordination among organizational entities, and compliance; and
- c. Procedures to facilitate the implementation of the access control policy and associated access controls; and
- d. Reviews and updates the current:
- e. Access control policy [Assignment: organization-defined frequency]; and
- f. Access control procedures [Assignment: organization-defined frequency].

NIST SP 800-53	Access Control	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[AC-1]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Implementation Statement: AC-1		
Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped		
Comments:		

2.1.1.2 AC-2 Account Management

The organization:

- a. Identifies and selects the following types of information system accounts to support organizational missions/business functions: [*Assignment: organization-defined information system account types*];
- b. Assigns account managers for information system accounts;
- c. Establishes conditions for group and role membership;
- d. Specifies authorized users of the information system, group and role membership, and access authorizations (i.e., privileges) and other attributes (as required) for each account;
- e. Requires approvals by [*Assignment: organization-defined personnel or roles*] for requests to create information system accounts;
- f. Creates, enables, modifies, disables, and removes information system accounts in accordance with [*Assignment: organization-defined procedures or conditions*];
- g. Monitors the use of, information system accounts;
- h. Notifies account managers:
 1. When accounts are no longer required;
 2. When users are terminated or transferred; and
 3. When individual information system usage or need-to-know changes;
- i. Authorizes access to the information system based on:
 1. A valid access authorization;
 2. Intended system usage; and
 3. Other attributes as required by the organization or associated missions/business functions;
- j. Reviews accounts for compliance with account management requirements [*Assignment: organization-defined frequency*]; and
- k. Establishes a process for reissuing shared/group account credentials (if deployed) when individuals are removed from the group.

(1) ACCOUNT MANAGEMENT | AUTOMATED SYSTEM ACCOUNT MANAGEMENT

The organization employs automated mechanisms to support the management of information system accounts.

(2) ACCOUNT MANAGEMENT | REMOVAL OF TEMPORARY / EMERGENCY ACCOUNTS

The information system automatically [Selection: removes; disables] temporary and emergency accounts after [Assignment: organization-defined time period for each type of account].

(3) ACCOUNT MANAGEMENT | DISABLE INACTIVE ACCOUNTS

The information system automatically disables inactive accounts after [Assignment: organization-defined time period].

(4) ACCOUNT MANAGEMENT | AUTOMATED AUDIT ACTIONS

The information system automatically audits account creation, modification, enabling, disabling, and removal actions, and notifies [Assignment: organization-defined personnel or roles].

Comments:		

Comments:

2.1.1.5 AC-5 Separation of Duties

The organization:

- a. Separates [Assignment: organization-defined duties of individuals];
- b. Documents separation of duties of individuals; and
- c. Defines information system access authorizations to support separation of duties.

NIST SP 800-53	Access Control	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[AC-5]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Implementation Statement: AC-5		
Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped		
Comments:		

2.1.1.6 AC-6 Least Privilege

The organization employs the principle of least privilege, allowing only authorized accesses for users (or processes acting on behalf of users) which are necessary to accomplish assigned tasks in accordance with organizational missions and business functions.

Control Enhancements:

(1) LEAST PRIVILEGE | AUTHORIZE ACCESS TO SECURITY FUNCTIONS

The organization explicitly authorizes access to [Assignment: organization-defined security functions (deployed in hardware, software, and firmware) and security-relevant information].

(2) LEAST PRIVILEGE | NON-PRIVILEGED ACCESS FOR NONSECURITY FUNCTIONS

The organization requires that users of information system accounts, or roles, with access to [Assignment: organization-defined security functions or security-relevant information], use non-privileged accounts or roles, when accessing nonsecurity functions.

(5) LEAST PRIVILEGE | PRIVILEGED ACCOUNTS

The organization restricts privileged accounts on the information system to [Assignment: organization-defined personnel or roles].

(9) LEAST PRIVILEGE | AUDITING USE OF PRIVILEGED FUNCTIONS

The information system audits the execution of privileged functions.

(10) LEAST PRIVILEGE | PROHIBIT NON-PRIVILEGED USERS FROM EXECUTING PRIVILEGED FUNCTIONS

The information system prevents non-privileged users from executing privileged functions to include disabling, circumventing, or altering implemented security safeguards/countermeasures.

2.1.1.7 AC-7 Unsuccessful Logon Attempts

The information system:

- a. Enforces a limit of [Assignment: organization-defined number] consecutive invalid logon attempts by a user during a [Assignment: organization-defined time period]; and
- b. Automatically [Selection: locks the account/node for an [Assignment: organization-defined time period]; locks the account/node until released by an administrator; delays next logon prompt according to [Assignment: organization-defined delay algorithm]] when the maximum number of unsuccessful attempts is exceeded.

NIST SP 800-53	Access Control	<input type="checkbox"/> Common (Fully Inherited Control)

2.1.1.8 AC-8 System Use Notification

The information system:

- a. Displays to users [Assignment: organization-defined system use notification message or banner] before granting access to the system that provides privacy and security notices consistent with applicable federal laws, Executive Orders, directives, policies, regulations, standards, and guidance and states that:
 - 1. Users are accessing a U.S. Government information system;
 - 2. Information system usage may be monitored, recorded, and subject to audit;
 - 3. Unauthorized use of the information system is prohibited and subject to criminal and civil penalties; and
 - 4. Use of the information system indicates consent to monitoring and recording;
- b. Retains the notification message or banner on the screen until users acknowledge the usage conditions and take explicit actions to log on to or further access the information system; and
- c. For publicly accessible systems:
 - 1. Displays system use information [Assignment: organization-defined conditions], before granting further access;
 - 2. Displays references, if any, to monitoring, recording, or auditing that are consistent with privacy accommodations for such systems that generally prohibit those activities; and
 - 3. Includes a description of the authorized uses of the system.

2.1.1.9 AC-11 Session Lock

The information system:

- a. Prevents further access to the system by initiating a session lock after [Assignment: organization-defined time period] of inactivity or upon receiving a request from a user; and
- b. Retains the session lock until the user reestablishes access using established identification and authentication procedures.

Control Enhancements:

(1) SESSION LOCK | PATTERN-HIDING DISPLAYS

The information system conceals, via the session lock, information previously visible on the display with a publicly viewable image.

Comments:

2.1.1.12 AC-17 Remote Access

The organization:

- a. Establishes and documents usage restrictions, configuration/connection requirements, and implementation guidance for each type of remote access allowed; and
- b. Authorizes remote access to the information system prior to allowing such connections.

Control Enhancements:

(1) REMOTE ACCESS | AUTOMATED MONITORING / CONTROL

The information system monitors and controls remote access methods.

(2) REMOTE ACCESS | PROTECTION OF CONFIDENTIALITY / INTEGRITY USING ENCRYPTION

The information system implements cryptographic mechanisms to protect the confidentiality and integrity of remote access sessions.

(3) REMOTE ACCESS | MANAGED ACCESS CONTROL POINTS

The information system routes all remote accesses through [Assignment: organization-defined number] managed network access control points.

(4) REMOTE ACCESS | PRIVILEGED COMMANDS / ACCESS

The organization:

- (a) Authorizes the execution of privileged commands and access to security-relevant information via remote access only for [Assignment: organization-defined needs]; and
- (b) Documents the rationale for such access in the security plan for the information system.

NIST SP 800-53	Access Control	<input type="checkbox"/> Common (Fully Inherited Control)

2.1.1.15 AC-20 Use of External Information Systems

The organization establishes terms and conditions, consistent with any trust relationships established with other organizations owning, operating, and/or maintaining external information systems, allowing authorized individuals to:

- a. Access the information system from external information systems; and
- b. Process, store, or transmit organization-controlled information using external information systems.

Control Enhancements:

(1) USE OF EXTERNAL INFORMATION SYSTEMS | LIMITS ON AUTHORIZED USE

The organization permits authorized individuals to use an external information system to access the information system or to process, store, or transmit organization-controlled information only when the organization:

- (a) Verifies the implementation of required security controls on the external system as specified in the organization's information security policy and security plan; or
- (b) Retains approved information system connection or processing agreements with the organizational entity hosting the external information system.

(2) USE OF EXTERNAL INFORMATION SYSTEMS | PORTABLE STORAGE DEVICES

The organization [Selection: restricts; prohibits] the use of organization-controlled portable storage devices by authorized individuals on external information systems.

Comments:

2.1.1.16 AC-21 Information Sharing

The organization:

- a. Facilitates information sharing by enabling authorized users to determine whether access authorizations assigned to the sharing partner match the access restrictions on the information for [Assignment: organization-defined information sharing circumstances where user discretion is required]; and
- b. Employs [Assignment: organization-defined automated mechanisms or manual processes] to assist users in making information sharing/collaboration decisions.

2.1.1.17 AC-22 Publicly Accessible Content

The organization:

- a. Designates individuals authorized to post information onto a publicly accessible information system;
- b. Trains authorized individuals to ensure that publicly accessible information does not contain nonpublic information;

- c. Reviews the proposed content of information prior to posting onto the publicly accessible information system to ensure that nonpublic information is not included; and
- d. Reviews the content on the publicly accessible information system for nonpublic information [Assignment: organization-defined frequency] and removes such information, if discovered.

NIST SP 800-53	Access Control	<input type="checkbox"/> Common (Fully Inherited Control)

Comments:		

2.1.2 Awareness and Training (AT)

2.1.2.1 AT-1 Security Awareness and Training Policy and Procedures

The organization:

- a. Develops, documents, and disseminates to [Assignment: organization-defined personnel or roles]:
 - 1. A security awareness and training policy that addresses purpose, scope, roles, responsibilities, management commitment, coordination among organizational entities, and compliance; and
 - 2. Procedures to facilitate the implementation of the security awareness and training policy and associated security awareness and training controls; and
- b. Reviews and updates the current:
 - 1. Security awareness and training policy [Assignment: organization-defined frequency]; and
 - 2. Security awareness and training procedures [Assignment: organization-defined frequency].

NIST SP 800-53	Awareness and Training	<input type="checkbox"/> Common (Fully Inherited Control)

Comments:		

2.1.3.2 AU-2 Audit Events

The organization:

- a. Determines that the information system is capable of auditing the following events: [*Assignment: organization-defined auditable events*];
- b. Coordinates the security audit function with other organizational entities requiring audit-related information to enhance mutual support and to help guide the selection of auditable events;
- c. Provides a rationale for why the auditable events are deemed to be adequate to support after-the-fact investigations of security incidents; and
- d. Determines that the following events are to be audited within the information system: [*Assignment: organization-defined audited events (the subset of the auditable events defined in AU-2 a.) along with the frequency of (or situation requiring) auditing for each identified event*].

Control Enhancements:

(3) AUDIT EVENTS | REVIEWS AND UPDATES

The organization reviews and updates the audited events [*Assignment: organization-defined frequency*].

NIST SP 800-53	Audit and Accountability	<input type="checkbox"/> Common (Fully Inherited Control)

2.1.3.6 AU-6 Audit Review, Analysis, and Reporting

The organization:

- a. Reviews and analyzes information system audit records [Assignment: organization-defined frequency] for indications of [Assignment: organization-defined inappropriate or unusual activity]; and
- b. Reports findings to [Assignment: organization-defined personnel or roles].

Control Enhancements:

(1) AUDIT REVIEW, ANALYSIS, AND REPORTING | PROCESS INTEGRATION

The organization employs automated mechanisms to integrate audit review, analysis, and reporting processes to support organizational processes for investigation and response to suspicious activities.

(3) AUDIT REVIEW, ANALYSIS, AND REPORTING | CORRELATE AUDIT REPOSITORIES

The organization analyzes and correlates audit records across different repositories to gain organization-wide situational awareness.

2.1.3.8 AU-8 Time Stamps

The information system:

- a. Uses internal system clocks to generate time stamps for audit records; and
- b. Records time stamps for audit records that can be mapped to Coordinated Universal Time (UTC) or Greenwich Mean Time (GMT) and meets [Assignment: organization-defined granularity of time measurement].

Control Enhancements:

(1) TIME STAMPS | SYNCHRONIZATION WITH AUTHORITATIVE TIME SOURCE

The information system:

- (a) Compares the internal information system clocks [Assignment: organization-defined frequency] with [Assignment: organization-defined authoritative time source]; and
- (b) Synchronizes the internal system clocks to the authoritative time source when the time difference is greater than [Assignment: organization-defined time period].

2.1.4 Security Assessment and Authorization (CA)

2.1.4.1 CA-1 Security Assessment and Authorization Policies and Procedures

The organization:

- a. Develops, documents, and disseminates to [Assignment: organization-defined personnel or roles]:
 - 1. A security assessment and authorization policy that addresses purpose, scope, roles, responsibilities, management commitment, coordination among organizational entities, and compliance; and
 - 2. Procedures to facilitate the implementation of the security assessment and authorization policy and associated security assessment and authorization controls; and
- b. Reviews and updates the current:
 - 1. Security assessment and authorization policy [Assignment: organization-defined frequency]; and
 - 2. Security assessment and authorization procedures [Assignment: organization-defined frequency].

<input type="checkbox"/> Not Applicable		
Comments:		

2.1.4.2 CA-2 Security Assessments

The organization:

- a. Develops a security assessment plan that describes the scope of the assessment including:
 - 1. Security controls and control enhancements under assessment;
 - 2. Assessment procedures to be used to determine security control effectiveness; and
 - 3. Assessment environment, assessment team, and assessment roles and responsibilities;
- b. Assesses the security controls in the information system and its environment of operation [Assignment: organization-defined frequency] to determine the extent to which the controls

are implemented correctly, operating as intended, and producing the desired outcome with respect to meeting established security requirements;

- c. Produces a security assessment report that documents the results of the assessment; and
- d. Provides the results of the security control assessment to [Assignment: organization-defined individuals or roles].

Control Enhancements:

(1) SECURITY ASSESSMENTS | INDEPENDENT ASSESSORS

The organization employs assessors or assessment teams with [Assignment: organization-defined level of independence] to conduct security control assessments.

NIST SP 800-53	Security Assessment and Authorization	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[CA-2]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control

Comments:		

2.1.4.3 CA-3 System Interconnections

The organization:

- a. Authorizes connections from the information system to other information systems through the use of Interconnection Security Agreements;
- b. Documents, for each interconnection, the interface characteristics, security requirements, and the nature of the information communicated; and
- c. Reviews and updates Interconnection Security Agreements [Assignment: organization-defined frequency].

Control Enhancements:

(5) SYSTEM INTERCONNECTIONS | RESTRICTIONS ON EXTERNAL SYSTEM CONNECTIONS

The organization employs [Selection: allow-all, deny-by-exception; deny-all, permit-by-exception] policy for allowing [Assignment: organization-defined information systems] to connect to external information systems.

Scoped Comments:

2.1.4.4 CA-5 Plan of Action and Milestones

The organization:

- a. Develops a plan of action and milestones for the information system to document the organization’s planned remedial actions to correct weaknesses or deficiencies noted during the assessment of the security controls and to reduce or eliminate known vulnerabilities in the system; and
- b. Updates existing plan of action and milestones [*Assignment: organization-defined frequency*] based on the findings from security controls assessments, security impact analyses, and continuous monitoring activities.

Comments:		

2.1.4.6 CA-7 Continuous Monitoring

The organization develops a continuous monitoring strategy and implements a continuous monitoring program that includes:

- a. Establishment of [Assignment: organization-defined metrics] to be monitored;
- b. Establishment of [Assignment: organization-defined frequencies] for monitoring and [Assignment: organization-defined frequencies] for assessments supporting such monitoring;
- c. Ongoing security control assessments in accordance with the organizational continuous monitoring strategy;
- d. Ongoing security status monitoring of organization-defined metrics in accordance with the organizational continuous monitoring strategy;
- e. Correlation and analysis of security-related information generated by assessments and monitoring;
- f. Response actions to address results of the analysis of security-related information; and
- g. Reporting the security status of organization and the information system to [Assignment: organization-defined personnel or roles] [Assignment: organization-defined frequency].

Control Enhancements:

(1) CONTINUOUS MONITORING | INDEPENDENT ASSESSMENT

The organization employs assessors or assessment teams with [Assignment: organization-defined level of independence] to monitor the security controls in the information system on an ongoing basis.

2.1.5 Configuration Management (CM)

2.1.5.1 CM-1 Configuration Management Policy and Procedures

The organization:

- a. Develops, documents, and disseminates to [Assignment: organization-defined personnel or roles]:
 - 1. A configuration management policy that addresses purpose, scope, roles, responsibilities, management commitment, coordination among organizational entities, and compliance; and
 - 2. Procedures to facilitate the implementation of the configuration management policy and associated configuration management controls; and
- b. Reviews and updates the current:
 - 1. Configuration management policy [Assignment: organization-defined frequency]; and
 - 2. Configuration management procedures [Assignment: organization-defined frequency].

NIST SP 800-53	Configuration Management	<input type="checkbox"/> Common (Fully Inherited Control)

Comments:

2.1.5.2 CM-2 Baseline Configuration

The organization develops, documents, and maintains under configuration control, a current baseline configuration of the information system.

Control Enhancements:

(1) BASELINE CONFIGURATION | REVIEWS AND UPDATES

The organization reviews and updates the baseline configuration of the information system:

- (a) [Assignment: organization-defined frequency];
- (b) When required due to [Assignment organization-defined circumstances]; and
- (c) As an integral part of information system component installations and upgrades.

(3) BASELINE CONFIGURATION | RETENTION OF PREVIOUS CONFIGURATIONS

The organization retains [Assignment: organization-defined previous versions of baseline configurations of the information system] to support rollback.

(7) BASELINE CONFIGURATION | CONFIGURE SYSTEMS, COMPONENTS, OR DEVICES FOR HIGH-RISK AREAS

The organization:

- (a) Issues [Assignment: organization-defined information systems, system components, or devices] with [Assignment: organization-defined configurations] to individuals traveling to locations that the organization deems to be of significant risk; and
- (b) Applies [Assignment: organization-defined security safeguards] to the devices when the individuals return.

Comments:				

2.1.5.3 CM-3 Configuration Change Control

The organization:

- a. Determines the types of changes to the information system that are configuration-controlled;
- b. Reviews proposed configuration-controlled changes to the information system and approves or disapproves such changes with explicit consideration for security impact analyses;
- c. Documents configuration change decisions associated with the information system;
- d. Implements approved configuration-controlled changes to the information system;
- e. Retains records of configuration-controlled changes to the information system for [Assignment: organization-defined time period];
- f. Audits and reviews activities associated with configuration-controlled changes to the information system; and
- g. Coordinates and provides oversight for configuration change control activities through [Assignment: organization-defined configuration change control element (e.g., committee, board)] that convenes [Selection (one or more): [Assignment: organization-defined frequency]]; [Assignment: organization-defined configuration change conditions]].

Control Enhancements:

(2) CONFIGURATION CHANGE CONTROL | TEST / VALIDATE / DOCUMENT CHANGES

The organization tests, validates, and documents changes to the information system before implementing the changes on the operational system.

Comments:		

2.1.5.6 CM-6 Configuration Settings

The organization:

- a. Establishes and documents configuration settings for information technology products employed within the information system using [*Assignment: organization-defined security configuration checklists*] that reflect the most restrictive mode consistent with operational requirements;
- b. Implements the configuration settings;
- c. Identifies, documents, and approves any deviations from established configuration settings for [*Assignment: organization-defined information system components*] based on [*Assignment: organization-defined operational requirements*]; and
- d. Monitors and controls changes to the configuration settings in accordance with organizational policies and procedures.

Comments:

2.1.5.7 CM-7 Least Functionality

The organization:

- a. Configures the information system to provide only essential capabilities; and
- b. Prohibits or restricts the use of the following functions, ports, protocols, and/or services:
[Assignment: organization-defined prohibited or restricted functions, ports, protocols, and/or services].

Control Enhancements:

(1) LEAST FUNCTIONALITY | PERIODIC REVIEW

The organization:

- (a) Reviews the information system [Assignment: organization-defined frequency] to identify unnecessary and/or nonsecure functions, ports, protocols, and services; and
- (b) Disables [Assignment: organization-defined functions, ports, protocols, and services within the information system deemed to be unnecessary and/or nonsecure].

(2) LEAST FUNCTIONALITY | PREVENT PROGRAM EXECUTION

The information system prevents program execution in accordance with [Selection (one or more): [Assignment: organization-defined policies regarding software program usage and restrictions]; rules authorizing the terms and conditions of software program usage].

(4) LEAST FUNCTIONALITY | UNAUTHORIZED SOFTWARE / BLACKLISTING

The organization:

- (a) Identifies [Assignment: organization-defined software programs not authorized to execute on the information system];

- (b) Employs an allow-all, deny-by-exception policy to prohibit the execution of unauthorized software programs on the information system; and
- (c) Reviews and updates the list of unauthorized software programs [Assignment: organization-defined frequency].

Comments:

2.1.5.8 CM-8 Information System Component Inventory

The organization:

- a. Develops and documents an inventory of information system components that:
 - 1. Accurately reflects the current information system;
 - 2. Includes all components within the authorization boundary of the information system;
 - 3. Is at the level of granularity deemed necessary for tracking and reporting; and
 - 4. Includes [*Assignment: organization-defined information deemed necessary to achieve effective information system component accountability*]; and
- b. Reviews and updates the information system component inventory [*Assignment: organization-defined frequency*].

Control Enhancements:

(1) INFORMATION SYSTEM COMPONENT INVENTORY | UPDATES DURING INSTALLATIONS / REMOVALS

The organization updates the inventory of information system components as an integral part of component installations, removals, and information system updates.

(3) INFORMATION SYSTEM COMPONENT INVENTORY | AUTOMATED UNAUTHORIZED COMPONENT DETECTION

The organization:

- (a) Employs automated mechanisms [*Assignment: organization-defined frequency*] to detect the presence of unauthorized hardware, software, and firmware components within the information system; and

- (b) Takes the following actions when unauthorized components are detected: [Selection (one or more): disables network access by such components; isolates the components; notifies [Assignment: organization-defined personnel or roles]].

(5) INFORMATION SYSTEM COMPONENT INVENTORY | NO DUPLICATE ACCOUNTING OF COMPONENTS

The organization verifies that all components within the authorization boundary of the information system are not duplicated in other information system inventories.

2.1.5.9 CM-9 Configuration Management Plan

The organization develops, documents, and implements a configuration management plan for the information system that:

- a. Addresses roles, responsibilities, and configuration management processes and procedures;
- b. Establishes a process for identifying configuration items throughout the system development life cycle and for managing the configuration of the configuration items;
- c. Defines the configuration items for the information system and places the configuration items under configuration management; and
- d. Protects the configuration management plan from unauthorized disclosure and modification.

Comments:

2.1.6.2 CP-2 Contingency Plan

The organization:

- a. Develops a contingency plan for the information system that:
 1. Identifies essential missions and business functions and associated contingency requirements;
 2. Provides recovery objectives, restoration priorities, and metrics;
 3. Addresses contingency roles, responsibilities, assigned individuals with contact information;
 4. Addresses maintaining essential missions and business functions despite an information system disruption, compromise, or failure;
 5. Addresses eventual, full information system restoration without deterioration of the security safeguards originally planned and implemented; and
 6. Is reviewed and approved by [*Assignment: organization-defined personnel or roles*];
- b. Distributes copies of the contingency plan to [*Assignment: organization-defined key contingency personnel (identified by name and/or by role) and organizational elements*];
- c. Coordinates contingency planning activities with incident handling activities;
- d. Reviews the contingency plan for the information system [*Assignment: organization-defined frequency*];
- e. Updates the contingency plan to address changes to the organization, information system, or environment of operation and problems encountered during contingency plan implementation, execution, or testing;
- f. Communicates contingency plan changes to [*Assignment: organization-defined key contingency personnel (identified by name and/or by role) and organizational elements*]; and
- g. Protects the contingency plan from unauthorized disclosure and modification.

Control Enhancements:

(1) CONTINGENCY PLAN | COORDINATE WITH RELATED PLANS

The organization coordinates contingency plan development with organizational elements responsible for related plans.

(3) CONTINGENCY PLAN | RESUME ESSENTIAL MISSIONS / BUSINESS FUNCTIONS

The organization plans for the resumption of essential missions and business functions within [Assignment: organization-defined time period] of contingency plan activation.

(8) CONTINGENCY PLAN | IDENTIFY CRITICAL ASSETS

The organization identifies critical information system assets supporting essential missions and business functions.

2.1.6.5 CP-6 Alternate Storage Site

The organization:

- a. Establishes an alternate storage site including necessary agreements to permit the storage and retrieval of information system backup information; and
- b. Ensures that the alternate storage site provides information security safeguards equivalent to that of the primary site.

Control Enhancements:

(1) ALTERNATE STORAGE SITE | SEPARATION FROM PRIMARY SITE

The organization identifies an alternate storage site that is separated from the primary storage site to reduce susceptibility to the same threats.

(3) ALTERNATE STORAGE SITE | ACCESSIBILITY

The organization identifies potential accessibility problems to the alternate storage site in the event of an area-wide disruption or disaster and outlines explicit mitigation actions.

Comments:

2.1.6.6 CP-7 Alternate Processing Site

The organization:

- a. Establishes an alternate processing site including necessary agreements to permit the transfer and resumption of [*Assignment: organization-defined information system operations*] for essential missions/business functions within [*Assignment: organization-defined time period consistent with recovery time and recovery point objectives*] when the primary processing capabilities are unavailable;
- b. Ensures that equipment and supplies required to transfer and resume operations are available at the alternate processing site or contracts are in place to support delivery to the site within the organization-defined time period for transfer/resumption; and
- c. Ensures that the alternate processing site provides information security safeguards equivalent to that of the primary site.

Control Enhancements:

(1) ALTERNATE PROCESSING SITE | SEPARATION FROM PRIMARY SITE

The organization identifies an alternate processing site that is separated from the primary processing site to reduce susceptibility to the same threats.

(2) ALTERNATE PROCESSING SITE | ACCESSIBILITY

The organization identifies potential accessibility problems to the alternate processing site in the event of an area-wide disruption or disaster and outlines explicit mitigation actions.

(3) ALTERNATE PROCESSING SITE | PRIORITY OF SERVICE

The organization develops alternate processing site agreements that contain priority-of-service provisions in accordance with organizational availability requirements (including recovery time objectives).

2.1.6.7 CP-8 Telecommunications Services

The organization establishes alternate telecommunications services including necessary agreements to permit the resumption of [Assignment: organization-defined information system operations] for essential missions and business functions within [Assignment: organization-defined time period] when the primary telecommunications capabilities are unavailable at either the primary or alternate processing or storage sites.

Control Enhancements:

(1) TELECOMMUNICATIONS SERVICES | PRIORITY OF SERVICE PROVISIONS

The organization:

- (a) Develops primary and alternate telecommunications service agreements that contain priority-of-service provisions in accordance with organizational availability requirements (including recovery time objectives); and
- (b) Requests Telecommunications Service Priority for all telecommunications services used for national security emergency preparedness in the event that the primary and/or alternate telecommunications services are provided by a common carrier.

(2) TELECOMMUNICATIONS SERVICES | SINGLE POINTS OF FAILURE

The organization obtains alternate telecommunications services to reduce the likelihood of sharing a single point of failure with primary telecommunications services.

2.1.7 Identification and Authentication (IA)

2.1.7.1 IA-1 Identification and Authentication Policy and Procedures

The organization:

- a. Develops, documents, and disseminates to [*Assignment: organization-defined personnel or roles*]:
 1. An identification and authentication policy that addresses purpose, scope, roles, responsibilities, management commitment, coordination among organizational entities, and compliance; and
 2. Procedures to facilitate the implementation of the identification and authentication policy and associated identification and authentication controls; and
- b. Reviews and updates the current:
 1. Identification and authentication policy [*Assignment: organization-defined frequency*]; and
 2. Identification and authentication procedures [*Assignment: organization-defined frequency*].

NIST SP 800-53	Identification and Authentication	<input type="checkbox"/> Common (Fully Inherited Control)

Comments:		

2.1.7.2 IA-2 Identification and Authentication

The information system uniquely identifies and authenticates organizational users (or processes acting on behalf of organizational users).

Control Enhancements:

(1) IDENTIFICATION AND AUTHENTICATION | NETWORK ACCESS TO PRIVILEGED ACCOUNTS

The information system implements multifactor authentication for network access to privileged accounts.

(2) IDENTIFICATION AND AUTHENTICATION | NETWORK ACCESS TO NON-PRIVILEGED ACCOUNTS

The information system implements multifactor authentication for network access to non-privileged accounts.

(3) IDENTIFICATION AND AUTHENTICATION | LOCAL ACCESS TO PRIVILEGED ACCOUNTS

The information system implements multifactor authentication for local access to privileged accounts.

(8) IDENTIFICATION AND AUTHENTICATION | NETWORK ACCESS TO PRIVILEGED ACCOUNTS - REPLAY RESISTANT

The information system implements replay-resistant authentication mechanisms for network access to privileged accounts.

(11) IDENTIFICATION AND AUTHENTICATION | REMOTE ACCESS - SEPARATE DEVICE

The information system implements multifactor authentication for remote access to privileged and non-privileged accounts such that one of the factors is provided by a device separate from the system gaining access and the device meets [Assignment: organization-defined strength of mechanism requirements].

(12) IDENTIFICATION AND AUTHENTICATION | ACCEPTANCE OF PIV CREDENTIALS

The information system accepts and electronically verifies Personal Identity Verification (PIV) credentials.

Comments:		

2.1.7.4 IA-4 Identifier Management

The organization manages information system identifiers by:

- a. Receiving authorization from [Assignment: organization-defined personnel or roles] to assign an individual, group, role, or device identifier;
- b. Selecting an identifier that identifies an individual, group, role, or device;
- c. Assigning the identifier to the intended individual, group, role, or device;
- d. Preventing reuse of identifiers for [Assignment: organization-defined time period]; and
- e. Disabling the identifier after [Assignment: organization-defined time period of inactivity].

NIST SP 800-53	Identification and Authentication	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[IA-4]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control

Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped		
Comments:		

2.1.7.5 IA-5 Authenticator Management

The organization manages information system authenticators by:

- a. Verifying, as part of the initial authenticator distribution, the identity of the individual, group, role, or device receiving the authenticator;
- b. Establishing initial authenticator content for authenticators defined by the organization;
- c. Ensuring that authenticators have sufficient strength of mechanism for their intended use;
- d. Establishing and implementing administrative procedures for initial authenticator distribution, for lost/compromised or damaged authenticators, and for revoking authenticators;
- e. Changing default content of authenticators prior to information system installation;
- f. Establishing minimum and maximum lifetime restrictions and reuse conditions for authenticators;
- g. Changing/refreshing authenticators [Assignment: organization-defined time period by authenticator type];
- h. Protecting authenticator content from unauthorized disclosure and modification;
- i. Requiring individuals to take, and having devices implement, specific security safeguards to protect authenticators; and

- j. Changing authenticators for group/role accounts when membership to those accounts changes.

Control Enhancements:

(1) AUTHENTICATOR MANAGEMENT | PASSWORD-BASED AUTHENTICATION

The information system, for password-based authentication:

- a. Enforces minimum password complexity of [Assignment: organization-defined requirements for case sensitivity, number of characters, mix of upper-case letters, lower-case letters, numbers, and special characters, including minimum requirements for each type];
- b. Enforces at least the following number of changed characters when new passwords are created: [Assignment: organization-defined number];
- c. Stores and transmits only encrypted representations of passwords;
- d. Enforces password minimum and maximum lifetime restrictions of [Assignment: organization-defined numbers for lifetime minimum, lifetime maximum];
- e. Prohibits password reuse for [Assignment: organization-defined number] generations; and
- f. Allows the use of a temporary password for system logons with an immediate change to a permanent password.

(2) AUTHENTICATOR MANAGEMENT | PKI-BASED AUTHENTICATION

The information system, for PKI-based authentication:

- a. Validates certifications by constructing and verifying a certification path to an accepted trust anchor including checking certificate status information;
- b. Enforces authorized access to the corresponding private key;
- c. Maps the authenticated identity to the account of the individual or group; and
- d. Implements a local cache of revocation data to support path discovery and validation in case of inability to access revocation information via the network.

(3) AUTHENTICATOR MANAGEMENT | IN-PERSON OR TRUSTED THIRD-PARTY REGISTRATION

The organization requires that the registration process to receive [Assignment: organization-defined types of and/or specific authenticators] be conducted [Selection: in person; by a trusted third party] before [Assignment: organization-defined registration authority] with authorization by [Assignment: organization-defined personnel or roles].

(11) AUTHENTICATOR MANAGEMENT | HARDWARE TOKEN-BASED AUTHENTICATION

The information system, for hardware token-based authentication, employs mechanisms that satisfy [Assignment: organization-defined token quality requirements].

2.1.7.8 IA-8 Identification and Authentication (Non-Organizational Users)

The information system uniquely identifies and authenticates non-organizational users (or processes acting on behalf of non-organizational users).

Control Enhancements:

(1) IDENTIFICATION AND AUTHENTICATION | ACCEPTANCE OF PIV CREDENTIALS FROM OTHER AGENCIES

The information system accepts and electronically verifies Personal Identity Verification (PIV) credentials from other federal agencies.

(2) IDENTIFICATION AND AUTHENTICATION | ACCEPTANCE OF THIRD-PARTY CREDENTIALS

The information system accepts only FICAM-approved third-party credentials.

(3) IDENTIFICATION AND AUTHENTICATION | USE OF FICAM-APPROVED PRODUCTS

The organization employs only FICAM-approved information system components in [Assignment: organization-defined information systems] to accept third-party credentials.

(4) IDENTIFICATION AND AUTHENTICATION | USE OF FICAM-ISSUED PROFILES

The information system conforms to FICAM-issued profiles.

2.1.8.7 IR-7 Incident Response Assistance

The organization provides an incident response support resource, integral to the organizational incident response capability that offers advice and assistance to users of the information system for the handling and reporting of security incidents.

Control Enhancements:

(1) INCIDENT RESPONSE ASSISTANCE | AUTOMATION SUPPORT FOR AVAILABILITY OF INFORMATION / SUPPORT

The organization employs automated mechanisms to increase the availability of incident response-related information and support.

NIST SP 800-53	Incident Response	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[IR-7]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
<p>Implementation Statement: IR-7</p> <p>Implementation Status: Status (check all that apply):</p> <p> <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped </p> <p>Comments:</p>		
<p>Control Enhancement IR-7(1)</p> <p>Implementation Statement:</p> <p>Implementation Status: Status (check all that apply):</p> <p> <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped </p> <p>Comments:</p>		

2.1.8.8 IR-8 Incident Response Plan

The organization:

- a. Develops an incident response plan that:
 - 1. Provides the organization with a roadmap for implementing its incident response capability;
 - 2. Describes the structure and organization of the incident response capability;
 - 3. Provides a high-level approach for how the incident response capability fits into the overall organization;
 - 4. Meets the unique requirements of the organization, which relate to mission, size, structure, and functions;
 - 5. Defines reportable incidents;
 - 6. Provides metrics for measuring the incident response capability within the organization;
 - 7. Defines the resources and management support needed to effectively maintain and mature an incident response capability; and
 - 8. Is reviewed and approved by [Assignment: organization-defined personnel or roles];
- b. Distributes copies of the incident response plan to [Assignment: organization-defined incident response personnel (identified by name and/or by role) and organizational elements];
- c. Reviews the incident response plan [Assignment: organization-defined frequency];
- d. Updates the incident response plan to address system/organizational changes or problems encountered during plan implementation, execution, or testing;
- e. Communicates incident response plan changes to [Assignment: organization-defined incident response personnel (identified by name and/or by role) and organizational elements]; and
- f. Protects the incident response plan from unauthorized disclosure and modification.

NIST SP 800-53	Incident Response	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[IR-8]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Implementation Statement:		
IR-8		
Implementation Status: Status (check all that apply):		
<input type="checkbox"/> Implemented (In Place) Scoped	<input type="checkbox"/> Planned (Not in Place)	<input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/>
Comments:		

2.1.9 Maintenance (MA)

2.1.9.1 MA-1 System Maintenance Policy and Procedures

The organization:

- a. Develops, documents, and disseminates to [*Assignment: organization-defined personnel or roles*]:
 - 1. A system maintenance policy that addresses purpose, scope, roles, responsibilities, management commitment, coordination among organizational entities, and compliance; and
 - 2. Procedures to facilitate the implementation of the system maintenance policy and associated system maintenance controls; and
- b. Reviews and updates the current:
 - 1. System maintenance policy [*Assignment: organization-defined frequency*]; and
 - 2. System maintenance procedures [*Assignment: organization-defined frequency*].

NIST SP 800-53	Maintenance	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MA-1]	<input type="checkbox"/> Hybrid (Partially Inherited Control)
		<input type="checkbox"/> System Specific Control
Implementation Statement:		
MA-1		
Implementation Status: Status (check all that apply):		
<input type="checkbox"/> Implemented (In Place) Scoped	<input type="checkbox"/> Planned (Not in Place)	<input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/>
Comments:		

2.1.9.2 MA-2 Controlled Maintenance

The organization:

- a. Schedules, performs, documents, and reviews records of maintenance and repairs on information system components in accordance with manufacturer or vendor specifications and/or organizational requirements;
- b. Approves and monitors all maintenance activities, whether performed on site or remotely and whether the equipment is serviced on site or removed to another location;
- c. Requires that [*Assignment: organization-defined personnel or roles*] explicitly approve the removal of the information system or system components from organizational facilities for off-site maintenance or repairs;

- d. Sanitizes equipment to remove all information from associated media prior to removal from organizational facilities for off-site maintenance or repairs;
- e. Checks all potentially impacted security controls to verify that the controls are still functioning properly following maintenance or repair actions; and
- f. Includes [Assignment: organization-defined maintenance-related information] in organizational maintenance records.

NIST SP 800-53	Maintenance	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MA-2]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
<p>Implementation Statement: MA-2</p> <p>Implementation Status: Status (check all that apply):</p> <p> <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped </p> <p>Comments:</p>		

2.1.9.3 MA-3 Maintenance Tools

The organization approves, controls, and monitors information system maintenance tools.

Control Enhancements:

(1) MAINTENANCE TOOLS | INSPECT TOOLS

The organization inspects the maintenance tools carried into a facility by maintenance personnel for improper or unauthorized modifications.

(2) MAINTENANCE TOOLS | INSPECT MEDIA

The organization checks media containing diagnostic and test programs for malicious code before the media are used in the information system.

NIST SP 800-53	Maintenance	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MA-3]	<input type="checkbox"/> Hybrid (Partially Inherited Control)

	<input type="checkbox"/> System Specific Control
Implementation Statement: MA-3	
Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped	
Comments:	
Control Enhancement MA-3(1)	
Implementation Statement:	
Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped	
Comments:	

2.1.9.4 MA-4 Nonlocal Maintenance

The organization:

- a. Approves and monitors nonlocal maintenance and diagnostic activities;
- b. Allows the use of nonlocal maintenance and diagnostic tools only as consistent with organizational policy and documented in the security plan for the information system;

Employs strong authenticators in the establishment of nonlocal maintenance and diagnostic sessions;

Maintains records for nonlocal maintenance and diagnostic activities; and terminates session and network connections when nonlocal maintenance is completed.

Control Enhancements:

(2) **NONLOCAL MAINTENANCE | DOCUMENT NONLOCAL MAINTENANCE**

The organization documents in the security plan for the information system, the policies and procedures for the establishment and use of nonlocal maintenance and diagnostic connections.

NIST SP 800-53	Maintenance	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MA-4]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
<p>Implementation Statement: MA-4</p> <p>Implementation Status: Status (check all that apply):</p> <p> <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped </p> <p>Comments:</p>		
<p>Control Enhancement MA-4(2)</p> <p>Implementation Statement:</p> <p>Implementation Status: Status (check all that apply):</p> <p> <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped </p> <p>Comments:</p>		

2.1.9.5 MA-5 Maintenance Personnel

The organization:

- a. Establishes a process for maintenance personnel authorization and maintains a list of authorized maintenance organizations or personnel;
- b. Ensures that non-escorted personnel performing maintenance on the information system have required access authorizations; and
- c. Designates organizational personnel with required access authorizations and technical competence to supervise the maintenance activities of personnel who do not possess the required access authorizations.

NIST SP 800-53	Maintenance	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MA-5]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
<p>Implementation Statement: MA-5</p> <p>Implementation Status: Status (check all that apply):</p> <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped <p>Comments:</p>		

2.1.9.6 MA-6 Timely Maintenance

The organization obtains maintenance support and/or spare parts for [Assignment: organization-defined information system components] within [Assignment: organization-defined time period] of failure.

NIST SP 800-53	Maintenance	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MA-6]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
<p>Implementation Statement: MA-6</p> <p>Implementation Status: Status (check all that apply):</p> <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped <p>Comments:</p>		

2.1.10 Media Protection (MP)

2.1.10.1 MP-1 Media Protection Policy and Procedures

The organization:

- a. Develops, documents, and disseminates to [Assignment: organization-defined personnel or roles]:
 - 1. A media protection policy that addresses purpose, scope, roles, responsibilities, management commitment, coordination among organizational entities, and compliance; and
 - 2. Procedures to facilitate the implementation of the media protection policy and associated media protection controls; and
- b. Reviews and updates the current:
 - 1. Media protection policy [Assignment: organization-defined frequency]; and
 - 2. Media protection procedures [Assignment: organization-defined frequency].

NIST SP 800-53	Media Protection	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MP-1]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Implementation Statement: MP-1		
Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped		
Comments:		

2.1.10.2 MP-2 Media Access

The organization restricts access to [Assignment: organization-defined types of digital and/or non-digital media] to [Assignment: organization-defined personnel or roles]

NIST SP 800-53	Media Protection	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MP-2]	<input type="checkbox"/> Hybrid (Partially Inherited Control)

NIST SP 800-53	Media Protection	<input type="checkbox"/> System Specific Control
Implementation Statement: MP-2

Comments:		

2.1.10.3 MP-3 Media Marking

The organization:

- a. Marks information system media indicating the distribution limitations, handling caveats, and applicable security markings (if any) of the information; and
- b. Exempts [*Assignment: organization-defined types of information system media*] from marking as long as the media remain within [*Assignment: organization-defined controlled areas*].

NIST SP 800-53	Media Protection	<input type="checkbox"/> Common (Fully Inherited Control) <input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Revision 4	[MP-3]	
Implementation Statement: MP-3		
Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped		
Comments:		

2.1.10.4 MP-4 Media Storage

The organization:

- a. Physically controls and securely stores [Assignment: organization-defined types of digital and/or non-digital media] within [Assignment: organization-defined controlled areas]; and
- b. Protects information system media until the media are destroyed or sanitized using approved equipment, techniques, and procedures.

NIST SP 800-53	Media Protection	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MP-4]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Implementation Statement: MP-4		
Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped		
Comments:		

2.1.10.5 MP-5 Media Transport

The organization:

- a. Protects and controls [Assignment: organization-defined types of information system media] during transport outside of controlled areas using [Assignment: organization-defined security safeguards];
- b. Maintains accountability for information system media during transport outside of controlled areas;
- c. Documents activities associated with the transport of information system media; and
- d. Restricts the activities associated with the transport of information system media to authorized personnel.

Control Enhancements:

(4) MEDIA TRANSPORT | CRYPTOGRAPHIC PROTECTION

The information system implements cryptographic mechanisms to protect the confidentiality and integrity of information stored on digital media during transport outside of controlled areas.

NIST SP 800-53	Media Protection	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[MP-5]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Implementation Statement: MP-5

2.1.11.2 PE-2 Physical Access Authorizations

The organization:

- a. Develops, approves, and maintains a list of individuals with authorized access to the facility where the information system resides;
- b. Issues authorization credentials for facility access;
- c. Reviews the access list detailing authorized facility access by individuals [*Assignment: organization-defined frequency*]; and
- d. Removes individuals from the facility access list when access is no longer required.

NIST SP 800-53	Physical and Environmental Protection	<input type="checkbox"/> Common (Fully Inherited Control) <input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Revision 4	[PE-2]	
<p>Implementation Statement:</p> <p>PE-2</p> <p>Implementation Status: Status (check all that apply):</p> <p> <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped </p> <p>Comments:</p>		

2.1.11.3 PE-3 Physical Access Control

The organization:

- a. Enforces physical access authorizations at [Assignment: organization-defined entry/exit points to the facility where the information system resides] by;
 - 1. Verifying individual access authorizations before granting access to the facility; and
 - 2. Controlling ingress/egress to the facility using [Selection (one or more): [Assignment: organization-defined physical access control systems/devices]; guards];
- b. Maintains physical access audit logs for [Assignment: organization-defined entry/exit points];
- c. Provides [Assignment: organization-defined security safeguards] to control access to areas within the facility officially designated as publicly accessible;
- d. Escorts visitors and monitors visitor activity [Assignment: organization-defined circumstances requiring visitor escorts and monitoring];
- e. Secures keys, combinations, and other physical access devices;
- f. Inventories [Assignment: organization-defined physical access devices] every [Assignment: organization-defined frequency]; and
- g. Changes combinations and keys [Assignment: organization-defined frequency] and/or when keys are lost, combinations are compromised, or individuals are transferred or terminated.

Comments:

2.1.11.14 PE-15 Water Damage Protection

The organization protects the information system from damage resulting from water leakage by providing master shutoff or isolation valves that are accessible, working properly, and known to key personnel.

NIST SP 800-53	Physical and Environmental Protection	<input type="checkbox"/> Common (Fully Inherited Control) <input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Revision 4	[PE-15]	
Implementation Statement: PE-15		
Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped		
Comments:		

2.1.11.15 PE-16 Delivery and Removal

The organization authorizes, monitors, and controls [Assignment: organization-defined types of information system components] entering and exiting the facility and maintains records of those items.

NIST SP 800-53	Physical and Environmental	<input type="checkbox"/> Common (Fully Inherited Control)
-----------------------	-----------------------------------	---

	Protection	<input type="checkbox"/> Hybrid (Partially Inherited Control)

2.1.12 Planning (PL)

2.1.12.1 PL-1 Security Planning Policy and Procedures

The organization:

- a. Develops, documents, and disseminates to [*Assignment: organization-defined personnel or roles*]:
 - 1. A security planning policy that addresses purpose, scope, roles, responsibilities, management commitment, coordination among organizational entities, and compliance; and
 - 2. Procedures to facilitate the implementation of the security planning policy and associated security planning controls; and
- b. Reviews and updates the current:
 - 1. Security planning policy [*Assignment: organization-defined frequency*]; and
 - 2. Security planning procedures [*Assignment: organization-defined frequency*].

NIST SP 800-53	Planning	<input type="checkbox"/> Common (Fully Inherited Control)
Revision 4	[PL-1]	<input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control
Implementation Statement: PL-1		
Implementation Status: Status (check all that apply): <input type="checkbox"/> Implemented (In Place) <input type="checkbox"/> Planned (Not in Place) <input type="checkbox"/> Compensated <input type="checkbox"/> Not Applicable <input type="checkbox"/> Scoped		
Comments:		

2.1.12.2 PL-2 System Security Plan

The organization:

- a. Develops a security plan for the information system that:
 1. Is consistent with the organization's enterprise architecture;
 2. Explicitly defines the authorization boundary for the system;
 3. Describes the operational context of the information system in terms of missions and business processes;
 4. Provides the security categorization of the information system including supporting rationale;
 5. Describes the operational environment for the information system and relationships with or connections to other information systems;
 6. Provides an overview of the security requirements for the system;
 7. Identifies any relevant overlays, if applicable;
 8. Describes the security controls in place or planned for meeting those requirements including a rationale for the tailoring and supplementation decisions; and
 9. Is reviewed and approved by the authorizing official or designated representative prior to plan implementation;
- b. Distributes copies of the security plan and communicates subsequent changes to the plan to *[Assignment: organization-defined personnel or roles]*;
- c. Reviews the security plan for the information system *[Assignment: organization-defined frequency]*;
- d. Updates the plan to address changes to the information system/environment of operation or problems identified during plan implementation or security control assessments; and
- e. Protects the security plan from unauthorized disclosure and modification.

Control Enhancements:

(1)SYSTEM SECURITY PLAN | PLAN / COORDINATE WITH OTHER ORGANIZATIONAL ENTITIES

The organization plans and coordinates security-related activities affecting the information system with *[Assignment: organization-defined individuals or groups]* before conducting such activities in order to reduce the impact on other organizational entities.

Comments:

2.1.12.3 PL-4 Rules of Behavior

The organization:

- a. Establishes and makes readily available to individuals requiring access to the information system, the rules that describe their responsibilities and expected behavior with regard to information and information system usage;
- b. Receives a signed acknowledgment from such individuals, indicating that they have read, understand, and agree to abide by the rules of behavior, before authorizing access to information and the information system;
- c. Reviews and updates the rules of behavior [*Assignment: organization-defined frequency*]; and
- d. Requires individuals who have signed a previous version of the rules of behavior to read and resign when the rules of behavior are revised/updated.

Control Enhancements:

(1) RULES OF BEHAVIOR | SOCIAL MEDIA AND NETWORKING RESTRICTIONS

The organization includes in the rules of behavior, explicit restrictions on the use of social media/networking sites and posting organizational information on public websites.

2.1.12.4 PL-8 Information Security Architecture

The organization:

- a. Develops an information security architecture for the information system that:
 - 1. Describes the overall philosophy, requirements, and approach to be taken with regard to protecting the confidentiality, integrity, and availability of organizational information;
 - 2. Describes how the information security architecture is integrated into and supports the enterprise architecture; and
 - 3. Describes any information security assumptions about, and dependencies on, external services;
- b. Reviews and updates the information security architecture [*Assignment: organization-defined frequency*] to reflect updates in the enterprise architecture; and
- c. Ensures that planned information security architecture changes are reflected in the security plan, the security Concept of Operations (CONOPS), and organizational procurements/acquisitions.

NIST SP 800-53	Planning	<input type="checkbox"/> Common (Fully Inherited Control)

Comments:		

2.1.13.4 PS-4 Personnel Termination

The organization, upon termination of individual employment:

- a. Disables information system access within [Assignment: organization-defined time period];
- b. Terminates/revokes any authenticators/credentials associated with the individual;
- c. Conducts exit interviews that include a discussion of [Assignment: organization-defined information security topics];
- d. Retrieves all security-related organizational information system-related property;
- e. Retains access to organizational information and information systems formerly controlled by terminated individual; and
- f. Notifies [Assignment: organization-defined personnel or roles] within [Assignment: organization-defined time period].

NIST SP 800-53	Personnel Security	<input type="checkbox"/> Common (Fully Inherited Control)

Comments:		

2.1.13.7 PS-7 Third-Party Personnel Security

The organization:

- a. Establishes personnel security requirements including security roles and responsibilities for third-party providers;
- b. Requires third-party providers to comply with personnel security policies and procedures established by the organization;
- c. Documents personnel security requirements;
- d. Requires third-party providers to notify [*Assignment: organization-defined personnel or roles*] of any personnel transfers or terminations of third-party personnel who possess organizational credentials and/or badges, or who have information system privileges within [*Assignment: organization-defined time period*]; and
- e. Monitors provider compliance.

Comments:		

2.1.14.3 RA-3 Risk Assessment

The organization:

- a. Conducts an assessment of risk, including the likelihood and magnitude of harm, from the unauthorized access, use, disclosure, disruption, modification, or destruction of the information system and the information it processes, stores, or transmits;
- b. Documents risk assessment results in [*Selection: security plan; risk assessment report; Assignment: organization-defined document*];
- c. Reviews risk assessment results [*Assignment: organization-defined frequency*];
- d. Disseminates risk assessment results to [*Assignment: organization-defined personnel or roles*]; and
- e. Updates the risk assessment [*Assignment: organization-defined frequency*] or whenever there are significant changes to the information system or environment of operation (including the identification of new threats and vulnerabilities), or other conditions that may impact the security state of the system.

Comments:			

2.1.14.4 RA-5 Vulnerability Scanning

The organization:

- a. Scans for vulnerabilities in the information system and hosted applications [*Assignment: organization-defined frequency and/or randomly in accordance with organization-defined process*] and when new vulnerabilities potentially affecting the system/applications are identified and reported;
- b. Employs vulnerability scanning tools and techniques that facilitate interoperability among tools and automate parts of the vulnerability management process by using standards for:
 - 1. Enumerating platforms, software flaws, and improper configurations;
 - 2. Formatting checklists and test procedures; and
 - 3. Measuring vulnerability impact;
- c. Analyzes vulnerability scan reports and results from security control assessments;
- d. Remediates legitimate vulnerabilities [*Assignment: organization-defined response times*] in accordance with an organizational assessment of risk; and
- e. Shares information obtained from the vulnerability scanning process and security control assessments with [*Assignment: organization-defined personnel or roles*] to help eliminate similar vulnerabilities in other information systems (i.e., systemic weaknesses or deficiencies).

Control Enhancements:

(1) VULNERABILITY SCANNING | UPDATE TOOL CAPABILITY

The organization employs vulnerability scanning tools that include the capability to readily update the information system vulnerabilities to be scanned.

(2) VULNERABILITY SCANNING | UPDATE BY FREQUENCY / PRIOR TO NEW SCAN / WHEN IDENTIFIED

The organization updates the information system vulnerabilities scanned [Selection (one or more): [*Assignment: organization-defined frequency*]; prior to a new scan; when new vulnerabilities are identified and reported].

(5) VULNERABILITY SCANNING | PRIVILEGED ACCESS

The information system implements privileged access authorization to [*Assignment: organization-identified information system components*] for selected [*Assignment: organization-defined vulnerability scanning activities*].

Comments:		

2.1.15.4 SA-4 Acquisition Process

The organization includes the following requirements, descriptions, and criteria, explicitly or by reference, in the acquisition contract for the information system, system component, or information system service in accordance with applicable federal laws, Executive Orders, directives, policies, regulations, standards, guidelines, and organizational mission/business needs:

- a. Security functional requirements;
- b. Security strength requirements;
- c. Security assurance requirements;
- d. Security-related documentation requirements;
- e. Requirements for protecting security-related documentation;
- f. Description of the information system development environment and environment in which the system is intended to operate; and
- g. Acceptance criteria.

Control Enhancements:

(1) ACQUISITION PROCESS | FUNCTIONAL PROPERTIES OF SECURITY CONTROLS

The organization requires the developer of the information system, system component, or information system service to provide a description of the functional properties of the security controls to be employed.

(2) ACQUISITION PROCESS | DESIGN / IMPLEMENTATION INFORMATION FOR SECURITY CONTROLS

The organization requires the developer of the information system, system component, or information system service to provide design and implementation information for the security controls to be employed that includes: [Selection (one or more): security-relevant external system interfaces; high-level design; low-level design; source code or hardware schematics; [Assignment: organization-defined design/implementation information]] at [Assignment: organization-defined level of detail].

(9) ACQUISITION PROCESS | FUNCTIONS / PORTS / PROTOCOLS / SERVICES IN USE

The organization requires the developer of the information system, system component, or information system service to identify early in the system development life cycle, the functions, ports, protocols, and services intended for organizational use.

(10) ACQUISITION PROCESS | USE OF APPROVED PIV PRODUCTS

The organization employs only information technology products on the FIPS 201-approved products list for Personal Identity Verification (PIV) capability implemented within organizational information systems.

2.1.15.5 SA-5 Information System Documentation

The organization:

- a. Obtains administrator documentation for the information system, system component, or information system service that describes:
 1. Secure configuration, installation, and operation of the system, component, or service;
 2. Effective use and maintenance of security functions/mechanisms; and
 3. Known vulnerabilities regarding configuration and use of administrative (i.e., privileged) functions;
- b. Obtains user documentation for the information system, system component, or information system service that describes:
 1. User-accessible security functions/mechanisms and how to effectively use those security functions/mechanisms;
 2. Methods for user interaction, which enables individuals to use the system, component, or service in a more secure manner; and
 3. User responsibilities in maintaining the security of the system, component, or service;
- c. Documents attempts to obtain information system, system component, or information system service documentation when such documentation is either unavailable or nonexistent and [Assignment: organization-defined actions] in response;
- d. Protects documentation as required, in accordance with the risk management strategy; and
- e. Distributes documentation to [Assignment: organization-defined personnel or roles].

Comments:		

2.1.15.7 SA-9 External Information System Services

The organization:

- a. Requires that providers of external information system services comply with organizational information security requirements and employ [*Assignment: organization-defined security controls*] in accordance with applicable federal laws, Executive Orders, directives, policies, regulations, standards, and guidance;
- b. Defines and documents government oversight and user roles and responsibilities with regard to external information system services; and
- c. Employs [*Assignment: organization-defined processes, methods, and techniques*] to monitor security control compliance by external service providers on an ongoing basis.

Control Enhancements:

(2) EXTERNAL INFORMATION SYSTEMS | IDENTIFICATION OF FUNCTIONS / PORTS / PROTOCOLS / SERVICES

The organization requires providers of [*Assignment: organization-defined external information system services*] to identify the functions, ports, protocols, and other services required for the use of such services.

NIST SP 800-53	System and Services Acquisition	<input type="checkbox"/> Common (Fully Inherited Control)

2.1.15.8 SA-10 Developer Configuration Management

The organization requires the developer of the information system, system component, or information system service to:

- a. Perform configuration management during system, component, or service [*Selection (one or more): design; development; implementation; operation*];
- b. Document, manage, and control the integrity of changes to [*Assignment: organization-defined configuration items under configuration management*];
- c. Implement only organization-approved changes to the system, component, or service;
- d. Document approved changes to the system, component, or service and the potential security impacts of such changes; and
- e. Track security flaws and flaw resolution within the system, component, or service and report findings to [*Assignment: organization-defined personnel*].

Comments:

2.1.16 System and Communications Protection

2.1.16.1 SC-1 System and Communications Protection Policy and Procedures

The organization:

- a. Develops, documents, and disseminates to [Assignment: organization-defined personnel or roles]:
 - 1. A system and communications protection policy that addresses purpose, scope, roles, responsibilities, management commitment, coordination among organizational entities, and compliance; and
 - 2. Procedures to facilitate the implementation of the system and communications protection policy and associated system and communications protection controls; and
- b. Reviews and updates the current:
 - 1. System and communications protection policy [Assignment: organization-defined frequency]; and
 - 2. System and communications protection procedures [Assignment: organization-defined frequency].

<input type="checkbox"/> Implemented (In Place) Scoped	<input type="checkbox"/> Planned (Not in Place)	<input type="checkbox"/> Compensated
<input type="checkbox"/> Not Applicable		
<input type="checkbox"/>		
Comments:		

2.1.16.5 SC-7 Boundary Protection

The information system:

- a. Monitors and controls communications at the external boundary of the system and at key internal boundaries within the system;
- b. Implements subnetworks for publicly accessible system components that are [Selection: *physically; logically*] separated from internal organizational networks; and

- c. Connects to external networks or information systems only through managed interfaces consisting of boundary protection devices arranged in accordance with organizational security architecture.

Control Enhancements:

(3) BOUNDARY PROTECTION | ACCESS POINTS

The organization limits the number of external network connections to the information system.

Supplemental Guidance: Limiting the number of external network connections facilitates more comprehensive monitoring of inbound and outbound communications traffic. The Trusted Internet Connection (TIC) initiative is an example of limiting the number of external network connections.

(4) BOUNDARY PROTECTION | EXTERNAL TELECOMMUNICATIONS SERVICES

The organization:

- (a) Implements a managed interface for each external telecommunication service;
- (b) Establishes a traffic flow policy for each managed interface;
- (c) Protects the confidentiality and integrity of the information being transmitted across each interface;
- (d) Documents each exception to the traffic flow policy with a supporting mission/business need and duration of that need; and
- (e) Reviews exceptions to the traffic flow policy [*Assignment: organization-defined frequency*] and removes exceptions that are no longer supported by an explicit mission/business need.

(5) BOUNDARY PROTECTION | DENY BY DEFAULT / ALLOW BY EXCEPTION

The information system at managed interfaces denies network communications traffic by default and allows network communications traffic by exception (i.e., deny all, permit by exception).

(7) BOUNDARY PROTECTION | PREVENT SPLIT TUNNELING FOR REMOTE DEVICES

The information system, in conjunction with a remote device, prevents the device from simultaneously establishing non-remote connections with the system and communicating via some other connection to resources in external networks.

NIST SP 800-53	System and Communications	<input type="checkbox"/> Common (Fully Inherited Control) <input type="checkbox"/> Hybrid (Partially Inherited Control) <input type="checkbox"/> System Specific Control

2.1.17.3 SI-3 Malicious Code Protection

The organization:

- a. Employs malicious code protection mechanisms at information system entry and exit points to detect and eradicate malicious code;
- b. Updates malicious code protection mechanisms whenever new releases are available in accordance with organizational configuration management policy and procedures;

- c. Configures malicious code protection mechanisms to:
 - 1. Perform periodic scans of the information system [Assignment: organization-defined frequency] and real-time scans of files from external sources at [Selection (one or more); endpoint; network entry/exit points] as the files are downloaded, opened, or executed in accordance with organizational security policy; and
 - 2. [Selection (one or more): block malicious code; quarantine malicious code; send alert to administrator; [Assignment: organization-defined action]] in response to malicious code detection; and
- d. Addresses the receipt of false positives during malicious code detection and eradication and the resulting potential impact on the availability of the information system.

Control Enhancements:

(1) MALICIOUS CODE PROTECTION | CENTRAL MANAGEMENT

The organization centrally manages malicious code protection mechanisms.

(2) MALICIOUS CODE PROTECTION | AUTOMATIC UPDATES

The information system automatically updates malicious code protection mechanisms.

2.1.17.4 SI-4 Information System Monitoring

The organization:

- a. Monitors the information system to detect:
 1. Attacks and indicators of potential attacks in accordance with [Assignment: organization-defined monitoring objectives]; and
 2. Unauthorized local, network, and remote connections;
- b. Identifies unauthorized use of the information system through [Assignment: organization-defined techniques and methods];
- c. Deploys monitoring devices: (i) strategically within the information system to collect organization-determined essential information; and (ii) at ad hoc locations within the system to track specific types of transactions of interest to the organization;
- d. Protects information obtained from intrusion-monitoring tools from unauthorized access, modification, and deletion;
- e. Heightens the level of information system monitoring activity whenever there is an indication of increased risk to organizational operations and assets, individuals, other organizations, or the Nation based on law enforcement information, intelligence information, or other credible sources of information;
- f. Obtains legal opinion with regard to information system monitoring activities in accordance with applicable federal laws, Executive Orders, directives, policies, or regulations; and
- g. Provides [Assignment: organization-defined information system monitoring information] to [Assignment: organization-defined personnel or roles] [Selection (one or more): as needed; [Assignment: organization-defined frequency]].

Control Enhancements:

(2) INFORMATION SYSTEM MONITORING | AUTOMATED TOOLS FOR REAL-TIME ANALYSIS

The organization employs automated tools to support near real-time analysis of events.

(4) INFORMATION SYSTEM MONITORING | INBOUND AND OUTBOUND COMMUNICATIONS TRAFFIC

The information system monitors inbound and outbound communications traffic [Assignment: organization-defined frequency] for unusual or unauthorized activities or conditions.

(5) INFORMATION SYSTEM MONITORING | SYSTEM-GENERATED ALERTS

The information system alerts [Assignment: organization-defined personnel or roles] when the following indications of compromise or potential compromise occur: [Assignment: organization-defined compromise indicators].

2.1.17.5 SI-5 Security Alerts, Advisories, and Directives

The organization:

- a. Receives information system security alerts, advisories, and directives from [Assignment: organization-defined external organizations] on an ongoing basis;
- b. Generates internal security alerts, advisories, and directives as deemed necessary;
- c. Disseminates security alerts, advisories, and directives to: [Selection (one or more): [Assignment: organization-defined personnel or roles]; [Assignment: organization-defined elements within the organization]; [Assignment: organization-defined external organizations]]; and
- d. Implements security directives in accordance with established time frames, or notifies the issuing organization of the degree of noncompliance.

Comments:

2.1.17.6 SI-7 Software, Firmware, and Information Integrity

The organization employs integrity verification tools to detect unauthorized changes to [Assignment: organization-defined software, firmware, and information].

Control Enhancements:

(1) SOFTWARE, FIRMWARE, AND INFORMATION INTEGRITY | INTEGRITY CHECKS

The information system performs an integrity check of [Assignment: organization-defined software, firmware, and information] [Selection (one or more): at startup; at [Assignment: organization-defined transitional states or security-relevant events]; [Assignment: organization-defined frequency]].

(7) SOFTWARE, FIRMWARE, AND INFORMATION INTEGRITY | INTEGRATION OF DETECTION AND RESPONSE

The organization incorporates the detection of unauthorized [Assignment: organization-defined security-relevant changes to the information system] into the organizational incident response capability.

Comments:

2.1.17.7 SI-8 Spam Protection

The organization:

- a. Employs spam protection mechanisms at information system entry and exit points to detect and take action on unsolicited messages; and
- b. Updates spam protection mechanisms when new releases are available in accordance with organizational configuration management policy and procedures.

Control Enhancements:

(1) SPAM PROTECTION | CENTRAL MANAGEMENT

The organization centrally manages spam protection mechanisms.

(2) SPAM PROTECTION | AUTOMATIC UPDATES

The information system automatically updates spam protection mechanisms.

WAN	Wide Area Network

3.4 Definitions/Glossary

Term	Definition
Accreditation	The official management decision given by a senior agency official to authorize operation of an information system and to explicitly accept the risk to agency operations (including mission, functions, image, or reputation), agency assets, or individuals, based on the implementation of an agreed-upon set of security controls.
Accreditation Boundary	All components of an information system to be accredited by an authorizing official and excludes separately accredited systems, to which the information system is connected.
Accreditation Package	The evidence provided to the authorizing official to be used in the security accreditation decision process. Evidence includes, but is not limited to: (i) the system security plan; (ii) the assessment results from the security certification; and (iii) the plan of action and milestones.
Assessment Procedure	A set of activities or actions employed by an assessor to determine the extent to which a security control is implemented correctly, operating as intended, and producing the desired outcome with respect to meeting the security requirements for the system.
Automated Information System (AIS)	An assembly of computer hardware, software and/or firmware configured to collect, create, communicate, compute, disseminate, process, store, and/or control data or information.
Certification	The comprehensive evaluation of the technical and non-technical security features of an AIS and other safeguards, made in support of the accreditation process that establishes the extent to which a particular design and implementation meet a specified set of security requirements.
Common Security Control	Security control that can be applied to one or more agency information systems and has the following properties: (i) the development, implementation, and assessment of the control can be assigned to a responsible official or organizational element (other than the information system owner); and (ii) the results from the assessment of the control can be used to support the C&A processes of an agency information system where that control has been applied.
Confidentiality	Preserving authorized restrictions on information access and disclosure, including means for protecting personal privacy and proprietary information. [44 U.S.C., Sec. 3542]
Configuration Control	Process for controlling modifications to hardware, firmware, software, and documentation to ensure the information system is protected against improper modifications prior to, during, and after system implementation. [CNSS Inst. 4009]

Term	Definition
General Support System	An interconnected set of information resources under the same direct management control that shares common functionality. It normally includes hardware, software, information, data, applications, communications, and people. [OMB Circular A-130, Appendix III]
Information Owner	Official with statutory or operational authority for specified information and responsibility for establishing the controls for its generation, collection, processing, dissemination, and disposal. [CNSS Inst. 4009]
Information Security	The protection of information and information systems from unauthorized access, use, disclosure, disruption, modification, or destruction in order to provide confidentiality, integrity, and availability. [44 U.S.C., Sec. 3542]
Information Security Policy	Aggregate of directives, regulations, rules, and practices that prescribe how an organization manages, protects, and distributes information. [CNSS Inst. 4009]
Information System	A discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. [44 U.S.C., Sec. 3502] [OMB Circular A-130, Appendix III]
Information Type	A specific category of information (e.g., privacy, medical, proprietary, financial, investigative, contractor sensitive, security management), defined by an organization or in some instances, by a specific law, Executive Order, directive, policy, or regulation. [FIPS 199]
Integrity	Guarding against improper information modification or destruction, and includes ensuring information non-repudiation and authenticity. [44 U.S.C., Sec. 3542]
Major Application	An application that requires special attention to security due to the risk and magnitude of harm resulting from the loss, misuse, or unauthorized access to or modification of the information in the application. [OMB Circular A-130, Appendix III]
Management Controls	The security controls (i.e., safeguards or countermeasures) for an information system that focus on the management of risk and the management of information system security. [NIST SP 800-18]
Minor Application	An application, other than a major application, that requires attention to security due to the risk and magnitude of harm resulting from the loss, misuse, or unauthorized access to or modification of the information in the application. Minor applications are typically included as part of a general support system.
Operational Controls	The security controls (i.e., safeguards or countermeasures) for an information system that primarily are implemented and executed by people (as opposed to systems). [NIST SP 800-18]
Plan of Action and Milestones	A document that identifies tasks needing to be accomplished. It details resources required to accomplish the elements of the plan, any milestones in meeting the tasks, and scheduled completion dates for the milestones. [OMB Memorandum M-02-09]

Term	Definition
Risk	The level of impact on agency operations, (including mission, functions, image, or reputation), agency assets, or individuals, resulting from the operation of an information system given the potential impact of a threat and the likelihood of that threat occurring. [NIST SP 800-30]
Risk Assessment	The process of identifying risks to agency operations (including mission, functions, image, or reputation), agency assets, or individuals by determining the probability of occurrence, the resulting impact, and additional security controls that would mitigate this impact. Part of risk management, synonymous with risk analysis, and incorporates threat and vulnerability analyses. [NIST SP 800-30]
Risk Management	The process of managing risks to agency operations (including mission, functions, image, or reputation), agency assets, or individuals resulting from the operation of an information system. It includes risk assessment; cost-benefit analysis; the selection, implementation, and assessment of security controls; and the formal authorization to operate the system. The process considers effectiveness, efficiency, and constraints due to laws, directives, policies, or regulations. [NIST SP 800-30]
Security Category	The characterization of information or an information system based on an assessment of the potential impact that a loss of confidentiality, integrity, or availability of such information or information system would have on organizational operations, organizational assets, or individuals. [FIPS 199]
Security Controls	The management, operational, and technical controls (i.e., safeguards or countermeasures) prescribed for an information system to protect the confidentiality, integrity, and availability of the system and its information. [FIPS 199]
Subsystem	A major subdivision or component of an information system consisting of information, information technology, and personnel that performs one or more specific functions.
System Security Plan	Formal document that provides an overview of the security requirements for the information system and describes the security controls in place or planned for meeting those requirements. [NIST SP 800-18]
System-specific Security Control	A security control for an information system that has not been designated as a common security control.
Technical Controls	The security controls (i.e., safeguards or countermeasures) for an information system that are primarily implemented and executed by the information system through mechanisms contained in the hardware, software, or firmware components of the system. [NIST SP 800-18]
Threat	Any circumstance or event with the potential to adversely impact agency operations (including mission, functions, image, or reputation), agency assets, or individuals through an information system via unauthorized access, destruction, disclosure, modification of information, and/or denial of service. [CNSS Inst. 4009, Adapted]

Term	Definition
User	Person or process accessing an AIS either by direct connections (e.g., via terminals), or indirect connections (e.g., prepare input data or receive output that is not reviewed for content or classification by a responsible individual).
Vulnerability	Weakness in an information system, system security procedures, internal controls, or implementation that could be exploited or triggered by a threat source. [CNSS Inst. 4009, Adapted]
Vulnerability Assessment	Formal description and evaluation of the vulnerabilities in an information system. [CNSS Inst. 4009]

VPN	Virtual Private Network

EXHIBIT F

EXHIBIT F

0401 – Security and Suitability Requirements (JUNE 2011)

a. Acronyms and Definitions

- **Access to a facility, site, system, or information** means physical access to any Social Security Administration (SSA) facility or site, logical access to any SSA information system, or access to programmatic or sensitive information.
- **CO** - Contracting Officer
- **Contractor** – In this clause, this term means any entity that has a relationship with SSA because of this contract. This term includes, but is not limited to, corporations, limited liability partnerships, and individuals.
- **CPOC** – Company Point of Contact as specified by the contract
- **CPSPM** – Center for Personnel Security and Project Management
- **COTR** – Contracting Officer’s Technical Representative
- **Contractor Employee** – In this clause, this term means a person hired by an SSA contractor to provide services in exchange for compensation.
- **PIV** – Personal Identity Verification
- **Subcontractor** – In this clause, this term means any entity that has a relationship with SSA’s contractor because of this contract. This term includes, but is not limited to, corporations, limited liability partnerships, and individuals.
- **Subcontractor Employee** - In this clause, this term means a person hired by a subcontractor to provide services in exchange for compensation.
- **eQIP** - Electronic Questionnaire for Investigations Processing

b. Purpose

This clause provides SSA’s policies and procedures concerning the conduct of background investigations (i.e. suitability determinations). The purpose of these investigations is to determine the suitability of contractors, contractor employees, subcontractors, and subcontractor employees who need access to an SSA facility, site, system, or information. If applicable, the clause also describes the process to obtain a PIV credential.

c. PIV Credentials

A PIV credential will be required for:

- Any contractor, contractor employee, subcontractor, or subcontractor employee requiring access to a SSA information system or routine, unescorted access to a SSA facility or site for a period of six months or more. (See Paragraph k. for more information.)

A PIV credential will not be required for:

- Any contractor, contractor employee, subcontractor, or subcontractor employee requiring escorted access to a SSA facility or site for less than six months.
- Any contractor, contractor employee, subcontractor, or subcontractor employee requiring infrequent escorted access to a SSA facility or site, even if the access may be longer than six months. For example, contractors or contractor employees who provide infrequent facilities/equipment maintenance or repair, conduct onsite shredding, etc.

Please Note: A background investigation is required any time a contractor, contractor employee, subcontractor, or subcontractor employee requires any type of access to a facility, site, system, or information regardless of whether a credential is required or not.

The contractor is required to include the substance of this clause in any subcontract where subcontractors and subcontractor employees will have similar access as described in the preceding paragraphs. However, the contractor is responsible for obtaining all of the required forms (see paragraphs g-i) from its subcontractors and the subcontractors' employees, reviewing these forms, and submitting them to SSA. Subcontractors and subcontractors' employees shall not submit forms directly to SSA.

d. Authorities

- [Homeland Security Presidential Directive 12](#)
- [Office of Management and Budget Memorandum M-05-24](#)
- [The Crime Control Act of 1990, Public Law 101-647](#), subtitle E, as amended by Public Law 102-190 (for childcare center security requirements)
- [Executive Orders 10450](#) and [12968](#) and Title 5, Code of Federal Regulations (CFR), Parts [731](#), [732](#) and [736](#) (for positions assigned a "National Security" designation)

e. Background Investigation and Adjudication Process

The background investigation and adjudication processes are compliant with 5 CFR 731.

f. Listing of Applicants

Upon award, the CPOC will provide to SSA an applicant listing of **all** individuals for whom the contractor is requesting a suitability determination (i.e., background investigation). This listing should include the contractor's name, the contract number, the CPOC's name, the CPOC's contact information, each applicant's full name, each applicant's Social Security number (SSN), each applicant's date of birth, and each applicant's place of birth (must show city and state if born in the United States (U.S.) OR city and country if born outside of the U.S.). The background investigation process does not start until the CPOC submits this applicant listing; therefore, the CPOC should submit the listing as soon as practical after award.

Submit the applicant listing via U.S. Mail to the address located in paragraph i. OR via fax to 410-966-0640.

g. Required Forms

1) eQIP

SSA will initiate the eQIP process using the applicant listing provided by the CPOC. SSA will email notification to the CPOC that each applicant has been invited into the eQIP website to electronically complete their background investigation form. The CPOC will provide the website to the applicants to complete their eQIP form. The applicant will have up to seven (7) calendar days to complete the eQIP form. The seven-day timeframe begins once SSA notifies the CPOC of the eQIP invitation(s). The applicant must print the signature pages of the form (pages 5 and 6 for Standard Form (SF) 85; pages 7-9 for SF 85P), sign the signature pages, and then provide the signed originals to the CPOC.

2) Paper Forms

- **Two (2) Field Division-258 charts, *Applicant Fingerprint Chart*** (The CO will provide the FD-258 charts at the time of contract award.)
NOTE: The contractor will be responsible for obtaining and providing acceptable fingerprints for use by SSA. Regardless of the method used to fingerprint contractors, contractor employees, subcontractors, or subcontractor employees, (electronic capture or ink) the only acceptable fingerprint chart is the FD-258.
- **Optional Form 306, *Declaration for Federal Employment***
<http://www.opm.gov/forms/html/of.asp>
- **Fair Credit Reporting Act Authorization Form**
[Federal Investigations Notice: 98-02](#)
- **Original signed and dated eQIP Signature Pages** (See paragraph g.1 above)
- **If the contractor, contractor employee, subcontractor or subcontractor employee is not a U.S. Citizen**, the individual must

provide SSA with a legible photocopy of his or her work authorization permit and Social Security card.

h. Forms Completion

The CPOC must ensure **all paper forms are fully completed and signed prior to submission to SSA.** The fingerprint charts and all paper forms must be legible or typed in black ink and all signatures must be in black ink. There must be no “breaks” in residences or employment. SSA requires complete addresses, including zip codes and phone numbers. SSA must receive forms within 30 days of signature and date.

SSA will return forms not fully completed to the CPOC. To ensure the forms are completed correctly, obtain a sample of a properly completed form at the following website:

http://www.ssa.gov/oag/acq/Sample_Security_Requirement_Docs%20.pdf.

Access information related to the eQIP process at: [e-QIP - Quick Reference Guide for the Applicant](#).

i. Forms Submission

The CPOC shall submit **one cover sheet** to SSA containing the names of all of the individuals for whom the contractor is submitting completed paperwork. This cover sheet should include the contract number, each applicant’s full name, each applicant’s SSN, each applicant’s date of birth, and each applicant’s place of birth. Submit this cover sheet along with the completed paper forms and two FD-258 fingerprint charts for each applicant to:

SSA
CPSPM Suitability Team
6401 Security Boulevard
Room 1260 Dunleavy Building
Baltimore, MD 21235

Simultaneously, the CPOC must submit a copy of the cover sheet ONLY to the COTR.

The CPOC must submit the paper forms **at least 15 days prior to the date work is to begin**. For new contract employees, subcontractors, or subcontract employees (i.e., those who had not previously received a suitability determination under this contract) who will need access to a SSA facility, site, information, or system, the contractor must submit these forms at least 15 days prior to beginning work under the contract.

j. Suitability Determination

A Federal Bureau of Investigation fingerprint check will be used as part of the basis for making a suitability determination. This determination is final unless information obtained during the remainder of the full background investigation,

conducted by the Office of Personnel Management, is such that SSA would find the individual unsuitable to continue performing under this contract. CPSPM will notify the CPOC, COTR, and CO of the results of these determinations.

No contractor, contractor employee, subcontractor, or subcontractor employee will be allowed access to a SSA facility, site, information, or system until CPSPM has issued a favorable suitability determination for that contractor, contractor employee, subcontractor, or subcontractor employee.

A contractor is not entitled to an equitable adjustment of the contract because of an unfavorable suitability determination(s). Additionally, if SSA determines that the number or percentage of unfavorable determinations make successful contract performance unlikely, SSA may terminate the contract for cause or default.

The contractor must notify the contractor employee, subcontractor, or subcontractor employee of any unsuitable determinations as soon as possible after receipt of such a determination (see paragraph p., below, for an explanation of the appeals process).

k. Obtaining a Credential

Note: This section applies only if the contractor, contractor employee, subcontractor, or subcontractor employee will have access to a facility, site, system, or information as described in the first bullet of paragraph c.

Once the contractor, contractor employee, subcontractor, or subcontract employee receives notification of an acceptable suitability determination, but prior to beginning work under the contract, the contractor, contractor employee, subcontractor, or subcontract employee must appear at the respective Regional Security Office or at SSA Headquarters Parking and Credentialing Office to begin the credentialing process. The contractor, contractor employee, subcontractor, or subcontract employee must present the suitability determination letter and two forms of identification at this meeting. At least one of the forms of identification must be a Government-issued photo identification (ID) (please see [Employment Eligibility Verification, I-9](#), for acceptable forms of ID). For SSA Headquarters access, a completed Form SSA-4395, Application for Access to SSA Facilities, signed by the contractor, contractor employee, subcontractor, or subcontract employee and the COTR is also required. The COTR will provide the SSA-4395 Form to the contractor, contractor employee, subcontractor, or subcontract employee when applicable.

The contractor must contact the COTR to arrange for credentialing. The COTR is responsible for scheduling an appointment for contractors, contractor employees, subcontractors, or subcontract employees to meet with the appropriate SSA Parking and Credentialing Office or Regional Security Office and obtain a credential. Once the COTR makes the appointment, the COTR must contact the contractor to inform the contractor of the credentialing appointment(s). The

COTR must also arrange for the contractor, contractor employees, subcontractors, or subcontract employees to be escorted (by either the COTR or a COTR's representative) to the appropriate credentialing office at the time of this appointment.

Credentialing appointments last approximately 15 minutes. Depending on a contractor's scheduling needs and availabilities, contractor employees, subcontractors, or subcontract employees may be scheduled for credentialing all in one day (this process may take a few hours to complete, depending on the number of employees that need to be credentialed) or contractor employees, subcontractors, or subcontract employees may come in at separate times convenient to the individuals' and the COTR's schedules.

SSA Headquarters' Parking and Credentialing Office representatives can be reached by emailing Parking.and.Credentialing@ssa.gov or calling 410/965-5910.

Regional Security Office contact information can be found in the Appendix at the end of this clause.

l. Contractors, Contractor Employees, Subcontractors, or Subcontract Employees Previously Cleared by SSA or Another Federal Agency

If a contractor, contractor employee, subcontractor, or subcontract employee previously received a suitability determination from SSA or another Federal agency, the CPOC should include this information next to the individual's name on the initial applicant listing (see paragraph f.). CPSPM will review the information. If CPSPM determines another suitability determination is not required, it will provide a letter to the CPOC and COTR indicating the contractor, contractor employee, subcontractor, or subcontract employee was previously cleared under another Federal contract and does not need to go through the suitability determination process again.

m. Contractor Notification to Government

The contractor shall notify the COTR and CPSPM within one business day if the contractor, contractor employee, subcontractor, or subcontract employee is arrested or charged with a crime during the term of this contract, or if there is any other change in the status of the contractor, contractor employee, subcontractor, or subcontract employee (e.g., the contractor employee leaves the company; the contractor employee no longer works under the contract; the alien status of the contractor, contractor employee, subcontractor, or subcontract employee changes) that could affect the suitability determination for that individual. The contractor must provide in that notification as much detail as possible, including, but not limited to: name(s) of individual whose status has changed, contract number, the type of charge(s), if applicable, the court date, and, if available, the disposition of the charge(s).

n. Contractor Return of PIV Credential

The contractor must account for and ensure that all forms of Government-provided identification (PIV credential) issued to a contractor, contractor employee, subcontractor, or subcontract employee under this contract are returned to SSA's Headquarters' Parking and Credentialing Office or Regional Security Office, as appropriate, as soon as any of the following occur: when no longer needed for contract performance; upon completion of a contractor's, contractor employee's, subcontractor's, or subcontract employee's employment; or upon contract completion or termination.

o. Government Control

The Government has full control over and may grant, deny, or withhold access to a facility, site, system, or information and may remove contractors, or require the contractor to remove contractor employees, subcontractors, or require the subcontractor to remove subcontractor employees from performing under the contract for reasons related to conduct even after the individual has been found suitable to work on the contract (see paragraph q. below).

p. Appeals Process for Unsuitable Determinations

If a contractor, contractor employee, subcontractor, or subcontract employee would like clarification or wishes to appeal an unsuitable determination, his/her request must be in writing and submitted within 30 days of the date of the unsuitable determination. The contractor may not file appeals on behalf of its employees, subcontractors, or subcontract employees; rather, contractor employees, subcontractors, or subcontract employees must file their own individual appeals.

The request for clarification and/or the appeal can be emailed to SSA at dchr.ope.hspd12appeals@ssa.gov, or mailed to:

Social Security Administration
Attn: CPSPM Suitability Program Officer
6401 Security Boulevard
Room 1260 Dunleavy Building
Baltimore, MD 21235

q. Removal From Duty

SSA may remove a contractor, or request that the contractor immediately remove or cause to be removed any contractor employee, subcontractor, or subcontract employee from working under the contract based on conduct that occurs after a favorable suitability determination. This includes temporarily removing a contract employee, subcontractor, or subcontract employee should the individual be arrested for a violation of law pending the outcome of any judicial proceedings. The contractor must comply with these requests to remove or cause to have removed any contractor employee, subcontractor, or subcontract

employee. The Government's determination may be made based on, but not limited to, incidents involving the misconduct or delinquency as set forth below:

- i. Violation of the Rules and Regulations Governing Public Buildings and Grounds, 41 CFR 101-20.3. This includes any local badging requirements.
- ii. Neglect of duty, including sleeping while on duty; unreasonable delays or failure to carry out assigned tasks; conducting personal affairs while on duty; and refusing to cooperate in upholding the integrity of SSA's security program.
- iii. Falsification or unlawful concealment, removal, mutilation, or destruction of any official documents or records, or concealment of material facts by willful omissions from official documents or records.
- iv. Disorderly conduct, use of abusive or offensive language, quarreling, intimidation by words or actions, or fighting. Also, participating in disruptive activities that interfere with the normal and efficient operations of the Government.
- v. Theft, vandalism, or any other criminal actions.
- vi. Selling, consuming, possessing, or being under the influence of intoxicants, drugs, or substances that produce similar effects.
- vii. Improper use of official authority or credentials.
- viii. Unauthorized use of communications equipment or Government property.
- ix. Misuse of weapon(s) or tools used in the performance of the contract.
- x. Unauthorized access to areas not required for the performance of the contract.
- xi. Unauthorized access to employees' personal property.
- xii. Violation of security procedures or regulations.
- xiii. Prior determination by SSA or other Federal agency that a contractor, contractor employee, subcontractor, or subcontract employee was unsuitable.
- xiv. Unauthorized access to, or disclosure of, agency programmatic or sensitive information, or Internal Revenue Service Tax Return information.
- xv. Unauthorized access to an agency Automated Information System.

- xvi. Unauthorized access of information for personal gain (including, but not limited to, monetary gain), or with malicious intent.

- xvii. Not providing for the confidentiality of and protection from disclosure of information entrusted to them. Certain provisions of the following statutes and regulations that apply to Federal employees also apply equally to contractors, contractor employees, subcontractors, and subcontract employees:
 - The Privacy Act of 1974
 - The Tax Reform Act of 1976 and the Taxpayer Browsing Protection Act of 1997
 - SSA regulation 1
 - The Computer Fraud and Abuse Act of 1986
 - Section 1106 of the Social Security Act

- xviii. Being under investigation by an appropriate authority for violating any of the above.

Declaration for Federal Employment*

Form Approved:
OMB No. 3206-0182

(*This form may also be used to assess fitness for federal contract employment)

Instructions

The information collected on this form is used to determine your acceptability for Federal and Federal contract employment and your enrollment status in the Government's Life Insurance program. You may be asked to complete this form at any time during the hiring process. Follow instructions that the agency provides. If you are selected, before you are appointed you will be asked to update your responses on this form and on other materials submitted during the application process and then to recertify that your answers are true.

All your answers must be truthful and complete. **A false statement on any part of this declaration or attached forms or sheets may be grounds for not hiring you, or for firing you after you begin work. Also, you may be punished by a fine or imprisonment (U.S. Code, title 18, section 1001).**

Either type your responses on this form or print clearly in dark ink. If you need additional space, attach letter-size sheets (8.5" X 11"). Include your name, Social Security Number, and item number on each sheet. We recommend that you keep a photocopy of your completed form for your records.

Privacy Act Statement

The Office of Personnel Management is authorized to request this information under sections 1302, 3301, 3304, 3328, and 8716 of title 5, U. S. Code. Section 1104 of title 5 allows the Office of Personnel Management to delegate personnel management functions to other Federal agencies. If necessary, and usually in conjunction with another form or forms, this form may be used in conducting an investigation to determine your suitability or your ability to hold a security clearance, and it may be disclosed to authorized officials making similar, subsequent determinations.

Your Social Security Number (SSN) is needed to keep our records accurate, because other people may have the same name and birth date. Public Law 104-134 (April 26, 1996) asks Federal agencies to use this number to help identify individuals in agency records. Giving us your SSN or any other information is voluntary. However, if you do not give us your SSN or any other information requested, we cannot process your application. Incomplete addresses and ZIP Codes may also slow processing.

ROUTINE USES: Any disclosure of this record or information in this record is in accordance with routine uses found in System Notice OPM/GOVT-1, General Personnel Records. This system allows disclosure of information to: training facilities; organizations deciding claims for retirement, insurance, unemployment, or health benefits; officials in litigation or administrative proceedings where the Government is a party; law enforcement agencies concerning a violation of law or regulation; Federal agencies for statistical reports and studies; officials of labor organizations recognized by law in connection with representation of employees; Federal agencies or other sources requesting information for Federal agencies in connection with hiring or retaining, security clearance, security or suitability investigations, classifying jobs, contracting, or issuing licenses, grants, or other benefits; public and private organizations, including news media, which grant or publicize employee recognitions and awards; the Merit Systems Protection Board, the Office of Special Counsel, the Equal Employment Opportunity Commission, the Federal Labor Relations Authority, the National Archives and Records Administration, and Congressional offices in connection with their official functions; prospective non-Federal employers concerning tenure of employment, civil service status, length of service, and the date and nature of action for separation as shown on the SF 50 (or authorized exception) of a specifically identified individual; requesting organizations or individuals concerning the home address and other relevant information on those who might have contracted an illness or been exposed to a health hazard; authorized Federal and non-Federal agencies for use in computer matching; spouses or dependent children asking whether the employee has changed from a self-and-family to a self-only health benefits enrollment; individuals working on a contract, service, grant, cooperative agreement, or job for the Federal government; non-agency members of an agency's performance or other panel; and agency-appointed representatives of employees concerning information issued to the employees about fitness-for-duty or agency-filed disability retirement procedures.

Public Burden Statement

Public burden reporting for this collection of information is estimated to vary from 5 to 30 minutes with an average of 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of the collection of information, including suggestions for reducing this burden, to the U.S. Office of Personnel Management, Reports and Forms Manager (3206-0182), Washington, DC 20415-7900. The OMB number, 3206-0182, is valid. OPM may not collect this information, and you are not required to respond, unless this number is displayed.

Declaration for Federal Employment*

Form Approved:
OMB No. 3206-0182

(*This form may also be used to assess fitness for federal contract employment)

GENERAL INFORMATION

1. **FULL NAME** (Provide your full name. If you have only initials in your name, provide them and indicate "Initial only". If you do not have a middle name, indicate "No Middle Name". If you are a "Jr.," "Sr.," etc. enter this under Suffix. First, Middle, Last, Suffix)

2. **SOCIAL SECURITY NUMBER**

3a. **PLACE OF BIRTH** (Include city and state or country)

3b. **ARE YOU A U.S. CITIZEN?**

YES NO (If "NO", provide country of citizenship)

4. **DATE OF BIRTH** (MM / DD / YYYY)

5. **OTHER NAMES EVER USED** (For example, maiden name, nickname, etc)

6. **PHONE NUMBERS** (Include area codes)

Day

Night

Selective Service Registration

If you are a male born after December 31, 1959, and are at least 18 years of age, civil service employment law (5 U.S.C. 3328) requires that you must register with the Selective Service System, unless you meet certain exemptions.

- 7a. Are you a male born after December 31, 1959? YES NO (If "NO", proceed to 8.)
- 7b. Have you registered with the Selective Service System? YES (If "YES", proceed to 8.) NO (If "NO", proceed to 7c.)
- 7c. If "NO," describe your reason(s) in item 16.

Military Service

8. Have you ever served in the United States military? YES (If "YES", provide information below) NO

If you answered "YES," list the branch, dates, and type of discharge for all active duty.
If your only active duty was training in the Reserves or National Guard, answer "NO."

Branch	From (MM/DD/YYYY)	To (MM/DD/YYYY)	Type of Discharge

Background Information

For all questions, provide all additional requested information under item 16 or on attached sheets. The circumstances of each event you list will be considered. However, in most cases you can still be considered for Federal jobs.

For questions 9, 10, and 11, your answers should include convictions resulting from a plea of *nolo contendere* (no contest), but omit (1) traffic fines of \$300 or less, (2) any violation of law committed before your 16th birthday, (3) any violation of law committed before your 18th birthday if finally decided in juvenile court or under a Youth Offender law, (4) any conviction set aside under the Federal Youth Corrections Act or similar state law, and (5) any conviction for which the record was expunged under Federal or state law.

9. During the last 7 years, have you been convicted, been imprisoned, been on probation, or been on parole? (Includes felonies, firearms or explosives violations, misdemeanors, and all other offenses.) If "YES," use item 16 to provide the date, explanation of the violation, place of occurrence, and the name and address of the police department or court involved. YES NO
10. Have you been convicted by a military court-martial in the past 7 years? (If no military service, answer "NO.") If "YES," use item 16 to provide the date, explanation of the violation, place of occurrence, and the name and address of the military authority or court involved. YES NO
11. Are you currently under charges for any violation of law? If "YES," use item 16 to provide the date, explanation of the violation, place of occurrence, and the name and address of the police department or court involved. YES NO
12. During the last 5 years, have you been fired from any job for any reason, did you quit after being told that you would be fired, did you leave any job by mutual agreement because of specific problems, or were you debarred from Federal employment by the Office of Personnel Management or any other Federal agency? If "YES," use item 16 to provide the date, an explanation of the problem, reason for leaving, and the employer's name and address. YES NO
13. Are you delinquent on any Federal debt? (Includes delinquencies arising from Federal taxes, loans, overpayment of benefits, and other debts to the U.S. Government, plus defaults of Federally guaranteed or insured loans such as student and home mortgage loans.) If "YES," use item 16 to provide the type, length, and amount of the delinquency or default, and steps that you are taking to correct the error or repay the debt. YES NO

Declaration for Federal Employment*

(*This form may also be used to assess fitness for federal contract employment)

Form Approved:
OMB No. 3206-0182

Additional Questions

14. Do any of your relatives work for the agency or government organization to which you are submitting this form? (Include: father, mother, husband, wife, son, daughter, brother, sister, uncle, aunt, first cousin, nephew, niece, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, stepfather, stepmother, stepson, stepdaughter, stepbrother, stepsister, half brother, and half sister.) If "YES," use item 16 to provide the relative's name, relationship, and the department, agency, or branch of the Armed Forces for which your relative works. YES NO
15. Do you receive, or have you ever applied for, retirement pay, pension, or other retired pay based on military, Federal civilian, or District of Columbia Government service? YES NO

Continuation Space / Agency Optional Questions

16. Provide details requested in items 7 through 15 and 18c in the space below or on attached sheets. Be sure to identify attached sheets with your name, Social Security Number, and item number, and to include ZIP Codes in all addresses. If any questions are printed below, please answer as instructed (*these questions are specific to your position and your agency is authorized to ask them*).

Certifications / Additional Questions

APPLICANT: If you are applying for a position and have not yet been selected, carefully review your answers on this form and any attached sheets. When this form and all attached materials are accurate, read item 17, and complete 17a.

APPOINTEE: If you are being appointed, carefully review your answers on this form and any attached sheets, including any other application materials that your agency has attached to this form. If any information requires correction to be accurate as of the date you are signing, make changes on this form or the attachments and/or provide updated information on additional sheets, initialing and dating all changes and additions. When this form and all attached materials are accurate, read item 17, complete 17b, read 18, and answer 18a, 18b, and 18c as appropriate.

17. I certify that, to the best of my knowledge and belief, all of the information on and attached to this Declaration for Federal Employment, including any attached application materials, is true, correct, complete, and made in good faith. I understand that a false or fraudulent answer to any question or item on any part of this declaration or its attachments may be grounds for not hiring me, or for firing me after I begin work, and may be punishable by fine or imprisonment. I understand that any information I give may be investigated for purposes of determining eligibility for Federal employment as allowed by law or Presidential order. I consent to the release of information about my ability and fitness for Federal employment by employers, schools, law enforcement agencies, and other individuals and organizations to investigators, personnel specialists, and other authorized employees or representatives of the Federal Government. I understand that for financial or lending institutions, medical institutions, hospitals, health care professionals, and some other sources of information, a separate specific release may be needed, and I may be contacted for such a release at a later date.

- 17a. Applicant's Signature: _____ Date _____
(Sign in ink)
- 17b. Appointee's Signature: _____ Date _____
(Sign in ink)

Appointing Officer:

Enter Date of Appointment or Conversion
MM / DD / YYYY

18. **Appointee (Only respond if you have been employed by the Federal Government before):** Your elections of life insurance during previous Federal employment may affect your eligibility for life insurance during your new appointment. These questions are asked to help your personnel office make a correct determination.

- 18a. When did you leave your last Federal job? _____
DATE: _____ MM / DD / YYYY
- 18b. When you worked for the Federal Government the last time, did you waive Basic Life Insurance or any type of optional life insurance? YES NO DO NOT KNOW
- 18c. If you answered "YES" to item 18b, did you later cancel the waiver(s)? If your answer to item 18c is "NO," use item 16 to identify the type(s) of insurance for which waivers were not canceled. YES NO DO NOT KNOW

EXHIBIT H

Federal Investigations Notice

Fair Credit Reporting Act of 1970, as amended

PLEASE TAKE NOTICE THAT ONE OR MORE CONSUMER CREDIT REPORTS MAY BE OBTAINED FOR EMPLOYMENT PURPOSES PURSUANT TO THE FAIR CREDIT REPORTING ACT, AS AMENDED, 15 U. S. C., §1681, ET SEQ. SHOULD A DECISION TO TAKE ANY ADVERSE ACTION AGAINST YOU BE MADE, BASED EITHER IN WHOLE OR IN PART ON THE CONSUMER CREDIT REPORT, THE CONSUMER REPORTING AGENCY THAT PROVIDED THE REPORT PLAYED NO ROLE IN THE AGENCY'S DECISION TO TAKE SUCH ADVERSE ACTION.

Information provided by you on this form will be furnished to the consumer reporting agency in order to obtain information in connection with an investigation to determine your (1) fitness for Federal employment, (2) clearance to perform contractual service for the Federal Government, and/or (3) security clearance or access. The information obtained may be redisclosed to other Federal agencies for the above purposes and in fulfillment of official responsibilities to the extent that such disclosure is permitted by law.

I hereby authorize the _____ to obtain such report(s) from any
(Name of Requesting Agency)

consumer/credit reporting agency for employment purposes.

(Print Name)

(SSN)

(Signature)

(Date)

Your Social Security Number is needed to keep records accurate, because other people may have the same name. Executive Order 9397 also asks Federal agencies to use this number to help identify individuals in agency records.

FAIR CREDIT AUTHORIZATION FORM

A Summary of Your Rights Under the Fair Credit Reporting Act

The federal Fair Credit Reporting Act (FCRA) promotes the accuracy, fairness, and privacy of information in the files of consumer reporting agencies. There are many types of consumer reporting agencies, including credit bureaus and specialty agencies (such as agencies that sell information about check writing histories, medical records, and rental history records). Here is a summary of your major rights under the FCRA. **For more information, including information about additional rights, go to www.consumerfinance.gov/learnmore or write to: Consumer Financial Protection Bureau, 1700 G Street N.W., Washington, DC 20552.**

- **You must be told if information in your file has been used against you.** Anyone who uses a credit report or another type of consumer report to deny your application for credit, insurance, or employment – or to take another adverse action against you – must tell you, and must give you the name, address, and phone number of the agency that provided the information.
- **You have the right to know what is in your file.** You may request and obtain all the information about you in the files of a consumer reporting agency (your “file disclosure”). You will be required to provide proper identification, which may include your Social Security number. In many cases, the disclosure will be free. You are entitled to a free file disclosure if:
 - a person has taken adverse action against you because of information in your credit report;
 - you are the victim of identity theft and place a fraud alert in your file;
 - your file contains inaccurate information as a result of fraud;
 - you are on public assistance;
 - you are unemployed but expect to apply for employment within 60 days.

In addition, all consumers are entitled to one free disclosure every 12 months upon request from each nationwide credit bureau and from nationwide specialty consumer reporting agencies. See www.consumerfinance.gov/learnmore for additional information.

- **You have the right to ask for a credit score.** Credit scores are numerical summaries of your credit-worthiness based on information from credit bureaus. You may request a credit score from consumer reporting agencies that create scores or distribute scores used in residential real property loans, but you will have to pay for it. In some mortgage transactions, you will receive credit score information for free from the mortgage lender.
- **You have the right to dispute incomplete or inaccurate information.** If you identify information in your file that is incomplete or inaccurate, and report it to the consumer reporting agency, the agency must investigate unless your dispute is frivolous. See www.consumerfinance.gov/learnmore for an explanation of dispute procedures.
- **Consumer reporting agencies must correct or delete inaccurate, incomplete, or unverifiable information.** Inaccurate, incomplete, or unverifiable information must be removed or corrected, usually within 30 days. However, a consumer reporting agency may continue to report information it has verified as accurate.

- **Consumer reporting agencies may not report outdated negative information.** In most cases, a consumer reporting agency may not report negative information that is more than seven years old, or bankruptcies that are more than 10 years old.
- **Access to your file is limited.** A consumer reporting agency may provide information about you only to people with a valid need -- usually to consider an application with a creditor, insurer, employer, landlord, or other business. The FCRA specifies those with a valid need for access.
- **You must give your consent for reports to be provided to employers.** A consumer reporting agency may not give out information about you to your employer, or a potential employer, without your written consent given to the employer. Written consent generally is not required in the trucking industry. For more information, go to www.consumerfinance.gov/learnmore.
- **You may limit “prescreened” offers of credit and insurance you get based on information in your credit report.** Unsolicited “prescreened” offers for credit and insurance must include a toll-free phone number you can call if you choose to remove your name and address from the lists these offers are based on. You may opt out with the nationwide credit bureaus at 1-888-5-OPTOUT (1-888-567-8688).
- **You may seek damages from violators.** If a consumer reporting agency, or, in some cases, a user of consumer reports or a furnisher of information to a consumer reporting agency violates the FCRA, you may be able to sue in state or federal court.
- **Identity theft victims and active duty military personnel have additional rights.** For more information, visit www.consumerfinance.gov/learnmore.

States may enforce the FCRA, and many states have their own consumer reporting laws. In some cases, you may have more rights under state law. For more information, contact your state or local consumer protection agency or your state Attorney General. For information about your federal rights, contact:

TYPE OF BUSINESS:	CONTACT:

EXHIBIT I

Additional Questions for Public Trust Positions - Branching

INSTRUCTIONS

This form is a supplement to the Standard Form 85P, Questionnaire for Public Trust Positions, currently in use in NBIB automated systems. Use of this form in addition to the e-QIP SF85P equates to the SF85P approved by OMB in October 2017. This is an interim collection method until such time the SF85P is updated in e-QIP.

IDENTIFICATION INFORMATION

1 - FULL NAME: Enter your name as it appears on your SF 85P, Questionnaire for Public Trust Positions.

Last Name	First Name	Middle Name	Jr., II, etc.
-----------	------------	-------------	---------------

2 - NBIB CASE NUMBER: If applicable.

PUBLIC TRUST QUESTIONS

3 - EDUCATION: Have you received a degree more than seven (7) years ago? If YES, provide details in section 3A.

Yes	No

3A – Education Details

Dates of Attendance FROM: TO: (MM/YY Month and Year)	Choose Type of Qualification <input type="checkbox"/> Degree <input type="checkbox"/> Other If other please provide:	Date Awarded MONTH: YEAR:	Choose the most appropriate characterization of the school <input type="checkbox"/> College/University/Military College <input type="checkbox"/> Vocational/Technical/Trade School <input type="checkbox"/> Correspondence/Distance/Extension/Online School
Name of School			
Street Address of School		City	State
			Zip code

Use the [continuation sheet](#) on the back if you have more than one degree earned more than 7 years ago.

For each Yes response on questions 4 through 30, corresponding branching questions starting on page 5 must be completed.

Yes/No Questions	Yes	No
4 – Have you EVER been issued a passport (or identity card for travel) by a country other than the U.S.?		
5 – In the last seven (7) years, have you received a written warning, been officially reprimanded, suspended, or disciplined for misconduct in the workplace, such as violation of a security policy?		
6 – In the last seven (7) years, have you been subject to court martial or other disciplinary procedure under the Uniform Code of Military Justice (UCMJ), such as Article 15, Captain's Mast, Article 135 Court of Inquiry, etc.? (If no prior military service, answer "No".)		
7 – Have you EVER served as a civilian or military member, in a foreign country's military, intelligence, diplomatic, security forces, militia, other defense force, or government agency?		
8 – Have you EVER been convicted of an offense involving domestic violence or a crime of violence (such as battery or assault) against your child, dependent, cohabitant, spouse or legally recognized civil union/domestic partner, former spouse or former legally recognized civil union/domestic partner, or someone with whom you share a child in common?		

Yes/No Questions	Yes	No
9 – Is there currently a domestic violence protective order or restraining order issued against you?		
10 – In the last seven (7) years, have you illegally used any drugs or controlled substances? Use of a drug or controlled substance includes injecting, snorting, inhaling, swallowing, experimenting with or otherwise consuming any drug or controlled substance.		
11 – In the last seven (7) years, have you been involved in the illegal purchase, manufacture, cultivation, trafficking, production, transfer, shipping, receiving, handling or sale of any drug or controlled substance?		
12 – In the last seven (7) years, have you illegally used or otherwise been involved with a drug or controlled substance while employed as a law enforcement officer, prosecutor, or courtroom official; or while in a position directly and immediately affecting the public safety other than previously listed?		
13 – In the last seven (7) years, have you intentionally engaged in the misuse of prescription drugs, regardless of whether or not the drugs were prescribed for you or someone else?		
14 – In the last seven (7) years, have you been ordered, advised, or asked to seek counseling or treatment as a result of your illegal use of drugs or controlled substances?		
15 – In the last seven (7) years, have you voluntarily sought counseling or treatment as a result of your use of a drug or controlled substance?		
16 – In the last seven (7) years, have you filed a petition under any chapter of the bankruptcy code?		
17 – In the last seven (7) years, have you failed to meet financial obligations due to gambling?		
18 – In the past seven (7) years, have you failed to file or pay Federal, state or other taxes when required by law or ordinance?		
19 – In the past seven (7) years, have you been over 120 days delinquent on any debt? (Include financial obligations for which you were the sole debtor, as well as those for which you were a cosigner or guarantor.)		
20 – In the last seven (7) years, has your use of alcohol had a negative impact on your work performance, your professional relationships, or resulted in intervention by law enforcement/public safety personnel?		
21 – In the last seven (7) years, have you illegally or without proper authorization accessed or attempted to access any information technology system?		

Yes/No Questions	Yes	No
22 – In the last seven (7) years, have you illegally or without authorization, modified, destroyed, manipulated, or denied others access to information residing on an information technology system or attempted any of the above? <i>(Above refers to the actions listed in this question)</i>		
23 – In the last seven (7) years, have you introduced, removed, or used hardware, software, or media in connection with any information technology system without authorization, when specifically prohibited by rules, procedures, guidelines, or regulations or attempted any of the above? <i>(Above refers to the actions listed in this question)</i>		
24 – Are you now or have you EVER been a member of an organization dedicated to terrorism, either with an awareness of the organization’s dedication to that end, or with the specific intent to further such activities?		
25 – Have you EVER knowingly engaged in any acts of terrorism?		
26 – Have you EVER advocated any acts of terrorism or activities designed to overthrow the U.S. Government by force?		
27 – Have you EVER been a member of an organization dedicated to the use of violence or force to overthrow the U.S. Government, and which engaged in activities to that end with an awareness of the organization’s dedication to that end or with the specific intent to further such activities?		
28 – Have you EVER been a member of an organization that advocates or practices commission of acts of force or violence to discourage others from exercising their rights under the U.S. Constitution or any state of the United States with the specific intent to further such action?		
29 – Have you EVER knowingly engaged in activities designed to overthrow the U.S. Government by force?		
30 – Have you EVER associated with anyone involved in activities to further terrorism?		

CERTIFICATION

Certification That My Answers Are True

My statements on this form, and any attachments to it, are true, complete, and correct to the best of my knowledge and belief and are made in good faith. I understand that a knowing and willful false statement on this form can be punished by fine or imprisonment or both. (See section 1001 of title 18, United States Code).

Signature	Date

Question 4

- 4a. Country in which the passport (or identity card) was issued
- 4b. Date the passport (or identity card) was issued
- 4c. Place the passport (or identity card) was issued (City and Country)
- 4d. Full Name under which passport (or identity card) was issued
- 4e. Passport (or identity card) Number
- 4f. Passport (or identity card) expiration date
- 4g. What is the reason for the foreign passport (or identity card)?
- 4h. Have you ever used this passport (or identity card) for foreign travel? Yes No
- 4i. Countries to which you have traveled on this passport (or identity card) and the dates involved with each
- | | | |
|---------|------|----|
| Country | From | To |
| Country | From | To |
| Country | From | To |
| Country | From | To |
| Country | From | To |
| Country | From | To |
- 4j. Do you have an additional foreign passport (or identity card)? Yes No
If yes, please use the [continuation sheet](#) on page 20 to provide the information

Question 5

- 5a. Date of incident (Month/Year) Estimated
- 5b. Reason/details
- 5c. Location of incident (Street address, City, State, Zip Code or Country)
- 5d. Final outcome/result
- 5e. Date of outcome/result (Month/Year) Estimated
- 5f. Do you have other incidents to report? Yes No
If yes, please use the [continuation sheet](#) on page 20 to provide the information

Question 6

6a. Date of the court martial or other disciplinary procedure (month/year)

Estimated

6b. Description of the Uniform Code of Military Justice (UCMJ) offense(s) for which you were charged

6c. Name of the disciplinary procedure, such as court martial, Article 15, Captains Mast, Article 135 Court of inquiry, etc...

6d. Description of the military court or other authority in which you were charged (title of court or convening authority, address, to include city and state or country if overseas)

6e. Description of the final outcome of the disciplinary procedure, such as found guilty, found not guilty, fine, reduction of rank, imprisonment, etc.

6f. Do you have other instances of military discipline in the last seven years? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide the information

Question 7

7a. During your foreign service, which organization were you serving under:

Military (Army, Navy, Air Force, Marines, etc.)

Diplomatic Service

Militia

Other Government Agency (Specify)

If other Government Agency or Defense Forces, please specify

Intelligence Service

Security Forces

Other Defense Forces (Specify)

7b. Name of the foreign organization

7c. Period of Service (Estimated)

7d. Name of Country Served

7e. Highest position/rank held

7f. Division/department/office in which you served

7g. Describe the circumstances of your association with this organization

7h. Describe reason for leaving this service

7i. Do you have further foreign service?

Yes

No

If yes, please use the [continuation sheet](#) on page 20 to provide the information

Question 8

8a. Date of the offense (Month/Year)

Estimated

8b. Describe the nature of the offense

8c. Name of the court

8d. Court location (Street address, City, State, Zip Code or Country)

8e. Provide all charges brought against you for this offense, and the outcome of each charged offense (such as found guilty, found not guilty, or charge dropped or "nolle pros," etc.). If you were found guilty of or plead guilty to a lesser offense, list both the original charge and the lesser offense separately.

8f. Felony/Misdemeanor/Other?

8g. What was the charge

8h. Date of the outcome (Month/Year)

8i. Were you sentenced as a result of these charges?

Yes

No

1. If yes, describe the sentence

2. Were you sentenced to imprisonment for a term exceeding one year?

Yes

No

3. Were you incarcerated as a result of that sentence for not less than 1 year?

Yes

No

4. If the conviction resulted in imprisonment, provide the dates that you were incarcerated

From
To

8j. If no to being sentenced, are you currently on trial, awaiting trial, or awaiting sentencing on criminal charges for this offense? Explain

8k. Do you have any other offenses?

Yes

No

If yes, please use the [continuation sheet](#) on page 20 to provide

information **Question 9**

9a. Date the order was issued

Estimated

9b. Name of the court or agency that issued the order.

9c. Location of court or agency that issued the order (Street address, City, State, Zip Code, Country)

9d. Do you have any other domestic violence protective orders or restraining orders currently issued against you?

Yes

No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 10

10a. Type of drug or controlled substance:

- Cocaine or crack cocaine (Such as rock, freebase, etc.)
- Stimulants (Such as amphetamines, speed, crystal meth, ecstasy, etc.)
- THC (Such as marijuana, weed, pot, hashish, etc.)
- Depressants (Such as barbituates, methaqualone, tranquilizers, etc)
- Ketamine (Such as special K, jet, etc)
- Narcotics (Such as opium, morphine, codeine, heroine, etc.)
- Hallucinogenic (Such as LSD, PCP, mushrooms, etc.)
- Steroids (Such as the clear, juice, etc.)
- Inhalants (Such as toluene, amyl nitrate, etc.)
- Other (Provide Explanation)

10b. Estimate month and year of first use Estimated

10c. Estimate month and year of most recent use Estimated

10d. Nature of use, frequency and number of times used

10e. Was your use while you were employed as a law enforcement officer, prosecutor, or courtroom official, or while in a position directly and immediately affecting public safety? Yes No

10f. Was your use while possessing a security clearance? Yes No

10g. Do you intend to use this drug or controlled substance in the future? Yes No

10h. Explain why you intend or do not intend to use this drug or controlled substance in the future.

10i. Do you have an additional instance(s) of illegal use of a drug or controlled substance?
If yes, please use the [continuation sheet](#) on page 20 to provide information Yes No

Question 11

11a. Type of drug or controlled substance:

- Cocaine or crack cocaine (Such as rock, freebase, etc.)
- Stimulants (Such as amphetamines, speed, crystal meth, ecstasy, etc.)
- THC (Such as marijuana, weed, pot, hashish, etc.)
- Depressants (Such as barbituates, methaqualone, tranquilizers, etc)
- Ketamine (Such as special K, jet, etc)
- Narcotics (Such as opium, morphine, codeine, heroine, etc.)
- Hallucinogenic (Such as LSD, PCP, mushrooms, etc.)
- Steroids (Such as the clear, juice, etc.)
- Inhalants (Such as toluene, amyl nitrate, etc.)
- Other (Provide Explanation)

11b. Estimate month and year of first involvement Estimated

11c. Estimate month and year of most recent involvement Estimated

11d. Nature of involvement and frequency

11e. Reason for engagement in the activity

11f. Was your involvement while you were employed as a law enforcement officer, prosecutor, or courtroom official, or while in a position directly and immediately affecting public safety? Yes No

11g. Was your involvement while possessing a security clearance? Yes No

11h. Do you intend to be involved with this drug or controlled substance in the future? Yes No

11i. Explain why you intend or do not intend to be involved with this drug or controlled substance in the future

11j. Do you have an additional instance(s) of illegal involvement with any drug or controlled substance?
If yes, please use the [continuation sheet](#) on page 20 to provide information Yes No

Question 12

12a. Describe the drugs or controlled substances used and your involvement

12b. Dates of involvement From To Estimated

12c. Estimate the number of times you used and/or were involved with this drug or controlled substance while employed in this capacity

12d. Do you have an additional instance(s) of illegal use or involvement with a drug or controlled substance while employed as a law enforcement officer, prosecutor, or courtroom official; or while in a position directly and immediately affecting the public safety? Yes No
If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 13

13a. Name of the prescription drug that you misused

13b. Dates of involvement From To Estimated

13c. Reason(s) for and circumstances of the misuse of the prescription drug

13d. Was your involvement while you were employed as a law enforcement officer, prosecutor, or courtroom official, or while in a position directly and immediately affecting the public safety?

Yes No

13e. Was your involvement while possessing a security clearance?

Yes No

13f. Do you have additional instance(s) of intentionally engaging in the misuse of prescription drugs in the last seven (7) years?

Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 14

14a. Have any of the following ordered, advised, or asked you to seek counseling or treatment as a result of your illegal use of drugs or controlled substances?

An employer, military commander, or employee assistance program

A medical professional

A mental health professional

A court official/judge

14b. If you have not been ordered, advised, or asked to seek counseling or treatment by one of parties already mentioned, explain

14c. Did you take action to receive counseling or treatment?

Yes No

1. If no, explain

2. If yes, type of drug or controlled substance for which you were treated:

A. Type of drug or controlled substance for which you were treated:

Cocaine or crack cocaine (Such as rock, freebase, etc.)

Stimulants (Such as amphetamines, speed, crystal meth, ecstasy, etc.)

THC (Such as marijuana, weed, pot, hashish, etc.)

Depressants (Such as barbituates, methaqualone, tranquilizers, etc)

Ketamine (Such as special K, jet, etc)

Narcotics (Such as opium, morphine, codeine, heroine, etc.)

Hallucinogenic (Such as LSD, PCP, mushrooms, etc.)

Steroids (Such as the clear, juice, etc.)

Inhalants (Such as toluene, amyl nitrate, etc.)

Other (Provide Explanation)

B. Name of the treatment provider (Last name, First Name)

C. Address for the treatment provider (address, City, State, Zip Code, or Country)

D. Phone Number of the treatment provider

E. Dates of Treatment From To Estimated

F. Did you successfully complete the treatment? Yes No

1. If no, explain?

14d. Do you have any other instances of having been ordered, advised, or asked to seek drug or controlled substance counseling or treatment in the last seven (7) years? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 15

15a. Type of drug or controlled substance for which you were treated:

- Cocaine or crack cocaine (Such as rock, freebase, etc.)
- Stimulants (Such as amphetamines, speed, crystal meth, ecstasy, etc.)
- THC (Such as marijuana, weed, pot, hashish, etc.)
- Depressants (Such as barbituates, methaqualone, tranquilizers, etc)
- Ketamine (Such as special K, jet, etc)
- Narcotics (Such as opium, morphine, codeine, heroine, etc.)
- Hallucinogenic (Such as LSD, PCP, mushrooms, etc.)
- Steroids (Such as the clear, juice, etc.)
- Inhalants (Such as toluene, amyl nitrate, etc.)
- Other (Provide Explanation)

15b. Name of the treatment provider (Last name, First name)

15c. Address for the treatment provider (address, City, State, Zip Code, or Country)

15d. Phone Number of the treatment provider

15e. Dates of Treatment From To Estimated

15f. Did you successfully complete the treatment? Yes No

If no, explain?

15g. Do you have any other instances of ever voluntarily seeking counseling or treatment as a result of your use of a drug or controlled substance? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 16

16a. Type of bankruptcy petition: Chapter 7 Chapter 11 Chapter 12 Chapter 13

1. If Chapter 12 or 13, provide: Name of Trustee

2. Address of Trustee (Street address, City, State, Zip Code or Country)

16b. Bankruptcy court docket/account number

16c. Date bankruptcy was filed Estimated

16d. Date of bankruptcy discharge Estimated

16e. Total amount (in U.S. dollars) involved in the bankruptcy Estimated

16f. Name debt is recorded under (Last, First, Middle, Suffix)

16g. Name of court involved

16h. Address of court involved (Street address, City, State, Zip Code or Country)

16i. Were you discharged of all debts claimed in the bankruptcy? Explain

16j. In the past seven (7) years, have you filed any additional petitions under any chapter of the bankruptcy code? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 17

17a. Date range of your financial problems due to gambling From To Estimated

17b. Estimate the amount (in U.S. dollars) of gambling losses incurred

17c. Describe your financial problems due to gambling

17d. If you have taken any action(s) to rectify your financial problems due to gambling, describe your actions. If you have not taken any action(s), explain

17e. In the last seven (7) years, have you failed to meet other financial obligations due to gambling?

If yes, please use the [continuation sheet](#) on page 20 to provide information

Yes

No

Question 18

18a. Did you fail to file, pay as required, or both?

To file

Pay as required

Both

18b. Year you failed to file or pay your federal, state, or other taxes

18c. Reason(s) for your failure to file or pay required taxes

18d. Federal, state or other agency to which you failed to file or pay taxes

18e. Type of taxes you failed to file or pay (such as property, income, sales, etc.)

18f. Amount (in U.S. dollars) of the taxes

Estimated

18g. Date satisfied (Estimated), if applicable

18h. Describe any action(s) you have taken to satisfy this debt (such as withholdings, frequency and amount of payments, etc.) If you have not taken any action(s), explain

18i. Are there any other instances in the past seven (7) years where you failed to file or pay federal, state or other taxes when required by law or ordinance?

Yes

No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 19

19a. Loan/account number(s) involved

19b. Identify/describe the type of property involved (if any)

19c. Amount (in U.S. dollars) of the financial issue (Estimated)

19d. Reason(s) for the financial issue

19e. Current status of the financial issue

19f. Date the financial issue began

19g. Date the financial issue was resolved, if applicable

19h. Describe any action(s) you have taken to satisfy this debt (such as withholdings, fequency and amount of payments, etc.). If you have not taken any action(s), explain

19i. Do you have another delinquent debt of 120 days or more in the last seven(7) years?

Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 20

20a. Month/Year when this negative impact occurred Estimated

20b. Explain the circumstances and the negative impact

20c. Dates of involvement or use From To Estimated

20d. Has the use of alcohol had any other negative impacts on your work performance, your professional relationships, or resulted in intervention by law enforcement/public safety personnel?

Yes No

If so, please use the [continuation sheet](#) on page 19 to provide information

20e. In the last seven (7) years, have you been ordered, advised, or asked to seek counseling or treatment as a result of your use of alcohol? Yes No

1. If yes, did you take action to seek counseling or treatment? Yes No

2. If no action taken, please explain

20f. If yes to taking action to seek counseling or treatment

1. Dates of counseling or treatment From To Estimated

2. Name of the individual counselor or treatment provider

3. Address of the counseling/treatment provider (Street address, City, State, Zip Code or Country)

4. Telephone number (Number/extension)

5. Did you successfully complete the treatment program? Yes No

6. If no, please explain

20g. Do you have additional instances of having been ordered, advised, or asked to seek counseling or treatment as a result of your use of alcohol? Yes No

If so, please use the [continuation sheet](#) on page 20 to provide information

20h. In the last seven (7) years, have you voluntarily sought counseling or treatment as a result of your use of alcohol? Yes No

1. Dates of counseling or treatment From To Estimated

2. Name of the individual counselor or treatment provider

3. Address of the counseling/treatment provider (Street address, City, State, Zip Code or Country)

4. Telephone number (Number/extension)

5. Did you successfully complete the treatment program? Yes No

6. If no, please explain

20i. Do you have additional instances where you have voluntarily sought counseling or treatment resulting from your use of alcohol? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 21

21a. Date of the incident (Month/Year) Estimated

21b. Describe the nature of the incident or offense

21c. Location of the incident (Street address and City, State, Zip Code or Country)

21d. Describe the action (administrative, criminal, or other) taken as a result of this incident

21e. Are there any other incidents? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 22

22a. Date of the incident (Month/Year) Estimated

22b. Describe the nature of the incident or offense

22c. Location of the incident (Street address and City, State, Zip Code or Country)

22d. Describe the action (administrative, criminal, or other) taken as a result of this incident

22e. Are there any other incidents? Yes No
If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 23

23a. Date of the incident (Month/Year) Estimated

23b. Describe the nature of the incident or offense

23c. Location of the incident (Street address and City, State, Zip Code or Country)

23d. Describe the action (administrative, criminal, or other) taken as a result of this incident

23e. Are there any other incidents? Yes No
If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 24

24a. Full name of the organization

24b. Address/location of the organization (Street address, City, State, Zip Code or Country)

24c. Dates of your involvement with the organization
FromToEstimated

24d. All positions held in the organization, if any

24e. All contributions made to the organization, if any

24f. Describe the nature of and reasons for your involvement with the organization

24g. Do you have any other instances of being a member of an organization dedicated to terrorism, either with an awareness of the organizations dedication to that end, or with the specific intent to further such activities? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 25

25a. Describe the nature and reasons for the activity

25b. Dates for any such activities From To Estimated

25c. Do you have any other instances of knowingly engaging in acts of terrorism? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 26

26a. Reason(s) for advocating acts of terrorism

26b. Dates of advocating acts of terrorism From To Estimated

26c. Do you have any other instances of advocating acts of terrorism or activities designed to overthrow the U.S. Government by force? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 27

27a. Full name of the organization

27b. Address/location of the organization (Street address, City, State, Zip Code or Country)

27c. Dates of your involvement with the organization From To Estimated

27d. All positions held in the organization, if any

27e. All contributions made to the organization, if any

27f. Describe the nature of and reasons for your involvement with the organization

27g. Do you have any other instances of being a member of an organization dedicated to the use of violence or force to overthrow the U.S. Government, which engaged in activities to that end with an awareness of the organizations dedication to that end or with the specific intent to further such activities? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 28

28a. Full name of the organization

28b. Address/location of the organization (Street address, City, State, Zip Code or Country)

28c. Dates of your involvement with the organization From To

28d. All positions held in the organization, if any

28e. All contributions made to the organization, if any

28f. Describe the nature of and reasons for your involvement with the organization

28g. Do you have any other instances of being a member of an organization that advocates or practices commission of acts of force or violence to discourage others from exercising their rights under the U.S. Constitution or any state of the United States with the specific intent to further such action? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 29

29a. Describe the nature and reasons for the activity

29b. Dates of such activities From To Estimated

29c. Do you have any other instances of having knowingly engaged in activities designed to overthrow the U.S. government by force? Yes No

If yes, please use the [continuation sheet](#) on page 20 to provide information

Question 30

30a. Have you ever associated with anyone involved in activities to further terrorism? Explain

Continuation sheet

For any questions you have additional information for, please refer to the question number, then provide all information that was requested in that section.

EXHIBIT J

Questionnaire for Public Trust Positions

Follow instructions fully or we cannot process your form. Be sure to sign and date the certification statement on Page 7 and the release on Page 8. *If you have any questions, call the office that gave you the form.*

Purpose of this Form

The U.S. Government conducts background investigations and reinvestigations to establish that applicants or incumbents either employed by the Government or working for the Government under contract, are suitable for the job and/or eligible for a public trust or sensitive position. Information from this form is used primarily as the basis for this investigation. Complete this form only after a conditional offer of employment has been made.

Giving us the information we ask for is voluntary. However, we may not be able to complete your investigation, or complete it in a timely manner, if you don't give us each item of information we request. This may affect your placement or employment prospects.

Authority to Request this Information

The U.S. Government is authorized to ask for this information under Executive Orders 10450 and 10577, sections 3301 and 3302 of title 5, U.S. Code; and parts 5, 731, 732, and 736 of Title 5, Code of Federal Regulations.

Your Social Security number is needed to keep records accurate, because other people may have the same name and birth date. Executive Order 9397 also asks Federal agencies to use this number to help identify individuals in agency records.

The Investigative Process

Background investigations are conducted using your responses on this form and on your Declaration for Federal Employment (OF 306) to develop information to show whether you are reliable, trustworthy, of good conduct and character, and loyal to the United States. The information that you provide on this form is confirmed during the investigation. Your current employer must be contacted as part of the investigation, even if you have previously indicated on applications or other forms that you do not want this.

In addition to the questions on this form, inquiry also is made about a person's adherence to security requirements, honesty and integrity, vulnerability to exploitation or coercion, falsification, misrepresentation, and any other behavior, activities, or associations that tend to show the person is not reliable, trustworthy, or loyal.

Your Personal Interview

Some investigations will include an interview with you as a normal part of the investigative process. This provides you the opportunity to update, clarify, and explain information on your form more completely, which often helps to complete your investigation faster. It is important that the interview be conducted as soon as possible after you are contacted. Postponements will delay the processing of your investigation, and declining to be interviewed may result in your investigation being delayed or canceled.

You will be asked to bring identification with your picture on it, such as a valid State driver's license, to the interview. There are other documents you may be asked to bring to verify your identity as well.

These include documentation of any legal name change, Social Security card, and/or birth certificate.

You may also be asked to bring documents about information you provided on the form or other matters requiring specific attention. These matters include alien registration, delinquent loans or taxes, bankruptcy, judgments, liens, or other financial obligations, agreements involving child custody or support, alimony or property settlements, arrests, convictions, probation, and/or parole.

Instructions for Completing this Form

1. Follow the instructions given to you by the person who gave you the form and any other clarifying instructions furnished by that person to assist you in completion of the form. Find out how many copies of the form you are to turn in. You must sign and date, in black ink, the original and each copy you submit.
2. Type or legibly print your answers in black ink (if your form is not legible, it will not be accepted). You may also be asked to submit your form in an approved electronic format.
3. All questions on this form must be answered. If no response is necessary or applicable, indicate this on the form (for example, enter "None" or "N/A"). If you find that you cannot report an exact date, approximate or estimate the date to the best of your ability and indicate this by marking "APPROX." or "EST."
4. Any changes that you make to this form after you sign it must be initialed and dated by you. Under certain limited circumstances, agencies may modify the form consistent with your intent.
5. You must use the State codes (abbreviations) listed on the back of this page when you fill out this form. Do not abbreviate the names of cities or foreign countries.
6. The 5-digit postal ZIP codes are needed to speed the processing of your investigation. The office that provided the form will assist you in completing the ZIP codes.
7. All telephone numbers must include area codes.
8. All dates provided on this form must be in Month/Day/Year or Month/Year format. Use numbers (1-12) to indicate months. For example, June 10, 1978, should be shown as 6/10/78.
9. Whenever "City (Country)" is shown in an address block, also provide in that block the name of the country when the address is outside the United States.
10. If you need additional space to list your residences or employments/self-employments/unemployments or education, you should use a continuation sheet, SF 86A. If additional space is needed to answer other items, use a blank piece of paper. Each blank piece of paper you use must contain **your name and Social Security Number at the top of the page.**

Final Determination on Your Eligibility

Final determination on your eligibility for a public trust or sensitive position and your being granted a security clearance is the responsibility of the Office of Personnel Management or the Federal agency that requested your investigation. You may be provided the opportunity personally to explain, refute, or clarify any information before a final decision is made.

Penalties for Inaccurate or False Statements

The U.S. Criminal Code (title 18, section 1001) provides that knowingly falsifying or concealing a material fact is a felony which may result in fines of up to \$10,000, and/or 5 years imprisonment, or both. In addition, Federal agencies generally fire, do not grant a security clearance, or disqualify individuals who have materially and deliberately falsified these forms, and this remains a part of the permanent record for future placements. Because the position for which you are being considered is one of public trust or is sensitive, your trustworthiness is a very important consideration in deciding your suitability for placement or retention in the position.

Your prospects of placement are better if you answer all questions truthfully and completely. You will have adequate opportunity to explain any information you give us on the form and to make your comments part of the record.

Disclosure of Information

The information you give us is for the purpose of investigating you for a position; we will protect it from unauthorized disclosure. The collection, maintenance, and disclosure of background investigative information is governed by the Privacy Act. The agency which requested the investigation and the agency which conducted the investigation have published notices in the Federal Register describing the system of records in which your records will be maintained. You may obtain copies of the relevant notices from the person who gave you this form. The information on this form, and information we collect during an investigation may be disclosed without your consent as permitted by the Privacy Act (5 USC 552a(b)) and as follows:

PRIVACY ACT ROUTINE USES

- To the Department of Justice when: (a) the agency or any component thereof; or (b) any employee of the agency in his or her official capacity; or (c) any employee of the agency in his or her individual capacity where the Department of Justice has agreed to represent the employee; or (d) the United States Government, is a party to litigation or has interest in such litigation, and by careful review, the agency determines that the records are both relevant and necessary to the litigation and the use of such records by the Department of Justice is therefore deemed by the agency to be for a purpose that is compatible with the purpose for which the agency collected the records.
- To a court or adjudicative body in a proceeding when: (a) the agency or any component thereof; or (b) any employee of the agency in his or her official capacity; or (c) any employee of the agency in his or her individual capacity where the Department of Justice has agreed to represent the employee; or (d) the United States Government is a party to litigation or has interest in such litigation, and by careful review, the agency determines that the records are both relevant and necessary to the litigation and the use of such records is therefore deemed by the agency to be for a purpose that is compatible with the purpose for which the agency collected the records.
- Except as noted in Question 21, when a record on its face, or in conjunction with other records, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute, particular program statute, regulation, rule, or order issued pursuant thereto, the relevant records may be disclosed to the appropriate Federal, foreign, State, local, tribal, or other public authority responsible for enforcing, investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order.
- To any source or potential source from which information is requested in the course of an investigation concerning the hiring or retention of an employee or other personnel action, or the issuing or retention of a security clearance, contract, grant, license, or other benefit, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation, and to identify the type of information requested.
- To a Federal, State, local, foreign, tribal, or other public authority the fact that this system of records contains information relevant to the retention of an employee, or the retention of a security clearance, contract, license, grant, or other benefit. The other agency or licensing organization may then make a request supported by written consent of the individual for the entire record if it so chooses. No disclosure will be made unless the information has been determined to be sufficiently reliable to support a referral to another office within the agency or to another Federal agency for criminal, civil, administrative, personnel, or regulatory action.
- To contractors, grantees, experts, consultants, or volunteers when necessary to perform a function or service related to this record for which they have been engaged. Such recipients shall be required to comply with the Privacy Act of 1974, as amended.
- To the news media or the general public, factual information the disclosure of which would be in the public interest and which would not constitute an unwarranted invasion of personal privacy.
- To a Federal, State, or local agency, or other appropriate entities or individuals, or through established liaison channels to selected foreign governments, in order to enable an intelligence agency to carry out its responsibilities under the National Security Act of 1947 as amended, the CIA Act of 1949 as amended, Executive Order 12333 or any successor order, applicable national security directives, or classified implementing procedures approved by the Attorney General and promulgated pursuant to such statutes, orders or directives.
- To a Member of Congress or to a Congressional staff member in response to an inquiry of the Congressional office made at the written request of the constituent about whom the record is maintained.
- To the National Archives and Records Administration for records management inspections conducted under 44 USC 2904 and 2906.
- To the Office of Management and Budget when necessary to the review of private relief legislation.

PUBLIC BURDEN INFORMATION

Public burden reporting for this collection of information is estimated to average 60 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Reports and Forms Management Officer, U.S. Office of Personnel Management, 1900 E Street, N.W., Room CHP-500, Washington, D.C. 20415. Do not send your completed form to this address.

Month/Day/Year	Explanation
----------------	-------------

U.S. Passport

This may be either a current or previous U.S. Passport	Passport Number	Month/Day/Year Issued
--	-----------------	-----------------------

d DUAL CITIZENSHIP If you are (or were) a dual citizen of the United States and another country, provide the name of that country in the space to the right.

	Country
--	---------

e ALIEN If you are an alien, provide the following information:

Place You Entered the United States:	City	State	Date You Entered U.S.	Alien Registration Number	Country(ies) of Citizenship
			Month Day Year		

9 WHERE YOU HAVE LIVED

List the places where you have lived, beginning with the most recent (#1) and working back 7 years. All periods must be accounted for in your list. Be sure to indicate the actual physical location of your residence: do not use a post office box as an address, do not list a permanent address when you were actually living at a school address, etc. Be sure to specify your location as closely as possible: for example, do not list only your base or ship, list your barracks number or home port. You may omit temporary military duty locations under 90 days (list your permanent address instead), and you should use your APO/FPO address if you lived overseas.

For any address in the last 5 years, list a person who knew you at that address, and who preferably still lives in that area (do not list people for residences completely outside this 5-year period, and do not list your spouse, former spouses, or other relatives). Also for addresses in the last 5 years, if the address is "General Delivery," a Rural or Star Route, or may be difficult to locate, provide directions for locating the residence on an attached continuation sheet.

Month/Year #1	Month/Year To Present	Street Address	Apt. #	City (Country)	State	ZIP Code
Name of Person Who Knows You		Street Address	Apt. #	City (Country)	State	ZIP Code
Telephone Number ()						
Month/Year #2	Month/Year To	Street Address	Apt. #	City (Country)	State	ZIP Code
Name of Person Who Knew You		Street Address	Apt. #	City (Country)	State	ZIP Code
Telephone Number ()						
Month/Year #3	Month/Year To	Street Address	Apt. #	City (Country)	State	ZIP Code
Name of Person Who Knew You		Street Address	Apt. #	City (Country)	State	ZIP Code
Telephone Number ()						
Month/Year #4	Month/Year To	Street Address	Apt. #	City (Country)	State	ZIP Code
Name of Person Who Knew You		Street Address	Apt. #	City (Country)	State	ZIP Code
Telephone Number ()						
Month/Year #5	Month/Year To	Street Address	Apt. #	City (Country)	State	ZIP Code
Name of Person Who Knew You		Street Address	Apt. #	City (Country)	State	ZIP Code
Telephone Number ()						

10 WHERE YOU WENT TO SCHOOL

List the schools you have attended, beyond Junior High School, beginning with the most recent (#1) and working back 7 years. List all College or University degrees and the dates they were received. If all of your education occurred more than 7 years ago, list your most recent education beyond high school, no matter when that education occurred.

Use one of the following codes in the "Code" block:

1 - High School

2 - College/University/Military College

3 - Vocational/Technical/Trade School

For schools you attended in the past 3 years, list a person who knew you at school (an instructor, student, etc.). Do not list people for education completely outside this 3-year period.

For correspondence schools and extension classes, provide the address where the records are maintained.

Month/Year #1	Month/Year To	Code	Name of School	Degree/Diploma/Other	Month/Year Awarded
Street Address and City (Country) of School					State
ZIP Code

ZIP Code					
Name of Person Who Knew You		Street Address	Apt. #	City (Country)	State
ZIP Code		Telephone Number ()			

Enter your Social Security Number before going to the next page →

11 YOUR EMPLOYMENT ACTIVITIES

List your employment activities, beginning with the present (#1) and working back 7 years. You should list all full-time work, part-time work, military service, temporary military duty locations over 90 days, self-employment, other paid work, and all periods of unemployment. The entire 7-year period must be accounted for without breaks, but you need not list employments before your 16th birthday.

● **Code.** Use one of the codes listed below to identify the type of employment:

- | | | | |
|-----------------------------------|---|--|-----------|
| 1 - Active military duty stations | 5 - State Government (Non-Federal employment) | 7 - Unemployment (Include name of person who can verify) | 9 - Other |
| 2 - National Guard/Reserve | 6 - Self-employment (Include business and/or name of person who can verify) | 8 - Federal Contractor (List Contractor, not Federal agency) | |
| 3 - U.S.P.H.S. Commissioned Corps | | | |
| 4 - Other Federal employment | | | |

● **Employer/Verifier Name.** List the business name of your employer or the name of the person who can verify your self-employment or unemployment in this block. If military service is being listed, include your duty location or home port here as well as your branch of service. You should provide separate listings to reflect changes in your military duty locations or home ports.

● **Previous Periods of Activity.** Complete these lines if you worked for an employer on more than one occasion at the same location. After entering the most recent period of employment in the initial numbered block, provide previous periods of employment at the same location on the additional lines provided. For example, if you worked at XY Plumbing in Denver, CO, during 3 separate periods of time, you would enter dates and information concerning the most recent period of employment first, and provide dates, position titles, and supervisors for the two previous periods of employment on the lines below that information.

Month/Year		Month/Year		Code	Employer/Verifier Name/Military Duty Location	Your Position Title/Military Rank

12 YOUR EMPLOYMENT RECORD	Has any of the following happened to you in the last 7 years? If "Yes," begin with the most recent occurrence and go backward, providing date fired, quit, or left, and other information requested.	Yes	No

Use the following codes and explain the reason your employment was ended:

- 1 - Fired from a job
- 2 - Quit a job after being told you'd be fired
- 3 - Left a job by mutual agreement following allegations of misconduct
- 4 - Left a job by mutual agreement following allegations of unsatisfactory performance
- 5 - Left a job for other reasons under unfavorable circumstances

Month/Year	Code	Specify Reason	Employer's Name and Address (Include city/Country if outside U.S.)	State	ZIP Code

Enter your Social Security Number before going to the next page

13 PEOPLE WHO KNOW YOU WELL

List three people who know you well and live in the United States. They should be good friends, peers, colleagues, college roommates, etc., whose combined association with you covers as well as possible the last 7 years. Do not list your spouse, former spouses, or other relatives, and try not to list anyone who is listed elsewhere on this form.

Name #1	Dates Known Month/Year To Month/Year	Telephone Number Day () Night ()
Home or Work Address		City (Country) State ZIP Code
Name #2	Dates Known Month/Year To Month/Year	Telephone Number Day () Night ()
Home or Work Address		City (Country) State ZIP Code
Name #3	Dates Known Month/Year To Month/Year	Telephone Number Day () Night ()
Home or Work Address		City (Country) State ZIP Code

14 YOUR MARITAL STATUS

Mark one of the following boxes to show your current marital status:

1 - Never married (go to question 15)
 3 - Separated
 5 - Divorced
 2 - Married
 4 - Legally Separated
 6 - Widowed

Current Spouse Complete the following about your current spouse.

Full Name	Date of Birth (Mo./Day/Yr.)	Place of Birth (Include country if outside the U.S.)	Social Security Number
Other Names Used (Specify maiden name, names by other marriages, etc., and show dates used for each name)			
Country of Citizenship	Date Married (Mo./Day/Yr.)	Place Married (Include country if outside the U.S.)	State
If Separated, Date of Separation (Mo./Day/Yr.)	If Legally Separated, Where is the Record Located? City (Country)		State
Address of Current Spouse (Street, city, and country if outside the U.S.)			State ZIP Code

15 YOUR RELATIVES

Give the full name, correct code, and other requested information for each of your relatives, living or dead, specified below.

- 1 - Mother (first) 3 - Stepmother 5 - Foster Parent 7 - Stepchild
 2 - Father (second) 4 - Stepfather 6 - Child (adopted also)

	1					
	2					

Enter your Social Security Number before going to the next page →

16 YOUR MILITARY HISTORY	Yes	No

- a** Have you served in the United States military?
- b** Have you served in the United States Merchant Marine?

List all of your military service below, including service in Reserve, National Guard, and U.S. Merchant Marine. Start with the most recent period of service (#1) and work backward. If you had a break in service, each separate period should be listed.

- Code. Use one of the codes listed below to identify your branch of service:
 1 - Air Force 2 - Army 3 - Navy 4 - Marine Corps 5 - Coast Guard 6 - Merchant Marine 7 - National Guard

- O/E. Mark "O" block for Officer or "E" block for Enlisted.
- Status. "X" the appropriate block for the status of your service during the time that you served. If your service was in the National Guard, do not use an "X": use the two-letter code for the state to mark the block.
- Country. If your service was with other than the U.S. Armed Forces, identify the country for which you served.

Month/Year	Month/Year	Code	Service/Certificate No.	Status				Country
				O	E	Active	Active Reserve	
To								
To								

17 YOUR SELECTIVE SERVICE RECORD	Yes	No

- a** Are you a male born after December 31, 1959? If "No," go to 18. If "Yes," go to b.
- b** Have you registered with the Selective Service System? If "Yes," provide your registration number. If "No," show the reason for your legal exemption below.

Registration Number _____ Legal Exemption Explanation _____

18 YOUR INVESTIGATIONS RECORD	Yes	No

- a** Has the United States Government ever investigated your background and/or granted you a security clearance? If "Yes," use the codes that follow to provide the requested information below. If "Yes," but you can't recall the investigating agency and/or the security clearance received, enter "Other" agency code or clearance code, as appropriate, and "Don't know" or "Don't recall" under the "Other Agency" heading, below. If your response is "No," or you don't know or can't recall if you were investigated and cleared, check the "No" box.

Codes for Investigating Agency				Codes for Security Clearance Received			
1 - Defense Department	4 - FBI	0 - Not Required	3 - Top Secret	6 - L

19 FOREIGN COUNTRIES YOU HAVE VISITED	Yes	No

List foreign countries you have visited, except on travel under official Government orders, beginning with the most current (#1) and working back 7 years. (Travel as a dependent or contractor must be listed.)

•Use one of these codes to indicate the purpose of your visit: 1 - Business 2 - Pleasure 3 - Education 4 - Other

•Include short trips to Canada or Mexico. If you have lived near a border and have made short (one day or less) trips to the neighboring country, you do not need to list each trip. Instead, provide the time period, the code, the country, and a note ("Many Short Trips").

•Do not repeat travel covered in items 9, 10, or 11.

20 YOUR POLICE RECORD <i>(Do not include anything that happened before your 16th birthday.)</i>					Yes	No
In the last 7 years, have you been arrested for, charged with, or convicted of any offense(s)? <i>(Leave out traffic fines of less than \$150.)</i>						
If you answered "Yes," explain your answer(s) in the space provided.						
Month/Year	Offense	Action Taken	Law Enforcement Authority or Court <i>(City and county/country if outside the U.S.)</i>	State	ZIP Code	

21 ILLEGAL DRUGS					Yes	No
The following questions pertain to the illegal use of drugs or drug activity. You are required to answer the questions fully and truthfully, and your failure to do so could be grounds for an adverse employment decision or action against you, but neither your truthful responses nor information derived from your responses will be used as evidence against you in any subsequent criminal proceeding.						
a In the last year, have you <u>illegally</u> used any controlled substance, for example, marijuana, cocaine, crack cocaine, hashish, narcotics (opium, morphine, codeine, heroin, etc.), amphetamines, depressants (barbiturates, methaqualone, tranquilizers, etc.), hallucinogenics (LSD, PCP, etc.), or prescription drugs?						
b In the last 7 years, have you been involved in the illegal purchase, manufacture, trafficking, production, transfer, shipping, receiving, or sale of any narcotic, depressant, stimulant, hallucinogen, or cannabis, for your own intended profit or that of another?						
If you answered "Yes" to "a" above, provide information relating to the types of substance(s), the nature of the activity, and any other details relating to your involvement with illegal drugs. Include any treatment or counseling received.

22 YOUR FINANCIAL RECORD					Yes	No
a In the last 7 years, have you, or a company over which you exercised some control, filed for bankruptcy, been declared bankrupt, been subject to a tax lien, or had legal judgment rendered against you for a debt? If you answered "Yes," provide date of initial action and other information requested below.						
Month/Year	Type of Action	Name Action Occurred Under	Name/Address of Court or Agency Handling Case	State	ZIP Code	
b Are you now over 180 days delinquent on any loan or financial obligation? Include loans or obligations funded or guaranteed by the Federal Government.					Yes	No
If you answered "Yes," provide the information requested below:						
Month/Year	Type of Loan or Obligation and Account #	Name/Address of Creditor or Obligee			State	ZIP Code

After completing this form and any attachments, you should review your answers to all questions to make sure the form is complete and accurate, and then sign and date the following certification and sign and date the release on Page 8.

Certification That My Answers Are True

My statements on this form, and any attachments to it, are true, complete, and correct to the best of my knowledge and belief and are made in good faith. I understand that a knowing and willful false statement on this form can be punished by fine or imprisonment or both. (See section 1001 of title 18, United States Code).

AUTHORIZATION FOR RELEASE OF INFORMATION

Carefully read this authorization to release information about you, then sign and date it in ink.

I Authorize any investigator, special agent, or other duly accredited representative of the authorized Federal agency conducting my background investigation, to obtain any information relating to my activities from individuals, schools, residential management agents, employers, criminal justice agencies, credit bureaus, consumer reporting agencies, collection agencies, retail business establishments, or other sources of information. This information may include, but is not limited to, my academic, residential, achievement, performance, attendance, disciplinary, employment history, criminal history record information, and financial and credit information. I authorize the Federal agency conducting my investigation to disclose the record of my background investigation to the requesting agency for the purpose of making a determination of suitability or eligibility for a security clearance.

I Understand that, for financial or lending institutions, medical institutions, hospitals, health care professionals, and other sources of information, a separate specific release will be needed, and I may be contacted for such a release at a later date. Where a separate release is requested for information relating to mental health treatment or counseling, the release will contain a list of the specific questions, relevant to the job description, which the doctor or therapist will be asked.

I Further Authorize any investigator, special agent, or other duly accredited representative of the U.S. Office of Personnel Management, the Federal Bureau of Investigation, the Department of Defense, the Defense Investigative Service, and any other authorized Federal agency, to request criminal record information about me from criminal justice agencies for the purpose of determining my eligibility for assignment to, or retention in a sensitive National Security position, in accordance with 5 U.S.C. 9101. I understand that I may request a copy of such records as may be available to me under the law.

I Authorize custodians of records and other sources of information pertaining to me to release such information upon request of the investigator, special agent, or other duly accredited representative of any Federal agency authorized above regardless of any previous agreement to the contrary.

I Understand that the information released by records custodians and sources of information is for official use by the Federal Government only for the purposes provided in this Standard Form 85P, and that it may be redisclosed by the Government only as authorized by law.

Copies of this authorization that show my signature are as valid as the original release signed by me. This authorization is valid for five (5) years from the date signed or upon the termination of my affiliation with the Federal Government, whichever is sooner.

AUTHORIZATION FOR RELEASE OF MEDICAL INFORMATION

Carefully read this authorization to release information about you, then sign and date it in black ink.

Instructions for Completing this Release

This is a release for the investigator to ask your health practitioner(s) the three questions below concerning your mental health consultations. Your signature will allow the practitioner(s) to answer only these questions.

I am seeking assignment to or retention in a position of public trust with the Federal Government as a(n)

(Investigator instructed to write in position title.)

As part of the investigative process, **I hereby authorize** the investigator, special agent, or duly accredited representative of the authorized Federal agency conducting my background investigation, to obtain the following information relating to my mental health consultations:

Does the person under investigation have a condition or treatment that could impair his/her judgment or reliability?

If so, please describe the nature of the condition and the extent and duration of the impairment or treatment.

What is the prognosis?

I understand that the information released pursuant to this release is for use by the Federal Government only for purposes provided in the Standard Form 85P and that it may be redisclosed by the Government only as authorized by law.

Copies of this authorization that show my signature are as valid as the original release signed by me. This authorization is valid for 1 year from the date signed or upon termination of my affiliation with the Federal Government, whichever is sooner.

CONTRACTOR PERSONNEL ROLLOVER REQUEST FORM

Social Security Administration (SSA)

Center for Suitability and Personnel Security (CSPS)

Submit this document to your designated contracting officer's representative-contracting officer's technical representative (COR-COTR) via secure email. The COR-COTR must ensure the information is complete and accurate (all fields are required) and then submit to ^DCHR OPE Suitability.

Only use this form when contractor personnel already working on an SSA contract need to move to another SSA contract. The information on this form must be typed, complete, and accurate. Failure to do so may result in a delay in receiving a suitability letter. The company point of contact (CPOC) and COR-COTR will receive suitability letters from the Center for Suitability and Personnel Security (CSPS) once the rollover is complete.

100% Accountability and Summary Reports

Full Audit report must include the following information (reprints must have the same information):

1. Program Number/Job Name/Print Order/File Date
2. PC#/Sequence numbers/Total Volume
3. Inserter ID and Operator
4. Date of insertion
5. Start and End time
6. Start and End Range (sequence numbers)
7. Total for each Start and End Range
8. Event (i.e. Processed, Spoiled, Diverted and reason: Missing Piece, Unverified, Misread etc.)
9. Status (i.e. Inserted, Routed to Reprint Area, etc.)
10. Totals
 - a. Machine inserted
 - b. Sent to Reprint
 - c. Reprints Recovered
 - d. Records Accounted For
 - e. Duplicates
 - f. Duplicated Verified
 - g. Records less duplicates
 - h. Reported Output
 - i. Variances

YOUR LETTERHEAD

DATE:

TO: Business Mailer Support

RE: USPS Minimum Volume Reduction Program

To Whom It May Concern:

I am writing to request approval to use USPS Minimum Volume Reduction Program as shown in Publication 401 - Guide to the Manifest Mailing System. The exception is for the “200 piece or 50 pound” rule for permit imprint mailings (including certified and foreign mail).

If approved, we would submit the paperwork electronically and include piece level barcode information.

A large portion of our business is government mailings and the use of this exception would greatly expedite our mail processing.

Please let me know if any additional information is required. My contact information is below.

Thank you for your time and consideration.
